If a student decides to submit a general petition, the form is available in the Office of the Registrar (145 MVR) and in the Office of Admission, Student, and Career Services (172 MVR) or on the web at www.human.cornell.edu/student/forms/. After completing the form and obtaining the required signatures, the student must turn the form in to the Office of the Registrar. Once a decision is made, a letter is placed in the student's mail folder indicating approval or denial of the petition.

Students may appeal the college registrar's decision to the Committee on Academic Status. Students who elect to appeal have the option of appearing in person before the committee to state their case. A member of the counseling staff can guide a student through this process.

In Absentia Study
Under certain conditions, credit toward a Cornell degree may be given for in absentia study, that is, study done at an accredited institution away from Cornell after the student matriculates in the College of Human Ecology. In absentia study can be done during any term; fall, winter, spring, or summer.

To be eligible for in absentia study, a student must be in good academic standing and must receive permission in advance from the college registrar. Students not in good standing may study in absentia but will not receive transcript credit until the Committee on Academic Status has returned them to good standing. In some cases, students may petition for in absentia credit after the work has been completed, but there is no guarantee that such credit will be awarded without advance approval.

In absentia petition forms are available in the Human Ecology Registrar's Office (145 MVR) or on the web at www.human.cornell.edu/student/forms/. The student completes the form, attaches catalog descriptions for the courses that will be taken, then submits the form to the Human Ecology Registrar's Office (145 MVR). In absentia study during the fall or spring term carries a minimal administrative fee. (Contact the Bursar's Office, 260 Day Hall, for the current amount.)

Students will receive a letter in their mail folder from the college registrar notifying them of the petition decision. A student may take up to 15 credits in absentia as long as the courses do not duplicate courses already taken and the in
Students considering a leave of absence should discuss their plans with a counselor in the Office of Admission, Student, and Career Services. The counselor can supply the necessary forms for the student to complete and file in the Human Ecology Registrar's Office (145 MVR). Leaves initiated after instruction begins will be charged a percentage of the semester tuition. (Refer to Bursar Information in this book for a billing schedule.)

Requests for a leave of absence received after the first seven weeks of the semester, or requests for a leave of absence from students who have already had two semesters' leave of absence, will be referred for action to the Committee on Academic Status. The committee may grant or deny such requests, attaching conditions as it deems necessary. Leaves of absence after the first seven weeks are generally granted only when there are compelling reasons why a student is unable to complete the semester, such as extended illness.

A student who requests a leave of absence after the first seven weeks is advised to attend classes until action is taken on the petition. A student whose petition for a leave of absence is denied may choose to withdraw or to complete the semester. If the petition for leave is approved the student's courses will remain on the transcript with "W's."

Under certain documented medical circumstances a student may be granted a medical leave of absence. Medical leaves are initiated by the student with Gannett Health Center, if Gannett Health Center recommends a medical leave for the student, the college registrar may grant the leave. A medical leave is for an indeterminate period of time not to exceed five years. Students who are granted a medical leave of absence are encouraged to maintain contact with a counselor in the Office of Admissions, Student, and Career Services (255-2532) to arrange their return to campus. The counselor will advise the student on procedures to obtain a recommendation from Gannett Health Center to the college registrar for the student's return. The student should plan sufficiently in advance to assure time for the medical leave to expire.

Withdrawal

A withdrawal is a terminations of student status at the university. Students may voluntarily withdraw at any time by notifying a counselor in the Office of Admission, Student, and Career Services and filing a written notice of withdrawal in the Human Ecology Registrar's Office. A student who is in action is urged to discuss plans with a counselor in the Office of Admission, Student, and Career Services (172 MVR).

In some instances a student may be given a withdrawal by the college registrar. Students who leave the college without an approved leave of absence, or do not return after the leave has expired will be given a withdrawal after the seventh week of the term in which they fail to register.

A student who has withdrawn from the college or who has been given a withdrawal by the college registrar and who wishes to return at a later date must reapply through the Office of Admissions for consideration along with all other applicants for admission. If the student was in academic difficulty at the time of the withdrawal, the request for readmission will be referred to the Committee on Academic Status for consideration, and that committee may stipulate criteria under which the student may be readmitted to the college.

**Grades and Examinations**

**Grade Definitions and Equivalents**

The official university grading system uses a system of letter grades ranging from A+ to D+ with F denoting failure. An INC grade is given for incomplete work and R is given at the end of the first semester of a two-semester class. If a student is given permission to withdraw from a class after the seventh week of the term a W is automatically assigned. Students can view their grades on Just the Facts after the semester has ended. Final spring semester grades are mailed to students' homes during the summer. See the "Grading Guidelines" section in this book for more information on the official university grading policies.

To compute a semester grade point average, first add up the products (credits hours X grade quality points) and divide by the total credit hours taken. Grades of INC, R, S, SX, U, UX, and W should not be included in any GPA calculations. A grade of F has no quality points, but the credits are counted thereby lowering the average. A cumulative GPA is just the sum of all semester products divided by all credits taken. For further help on calculating a grade point average ask at the Office of the College Registrar (145 MVR).

These are the quality point equivalents:

- A+ = 4.3
- A = 4.0
- A- = 3.7
- B+ = 3.3
- B = 3.0
- B- = 2.7
- C+ = 2.3
- C = 2.0
- C- = 1.7
- D+ = 1.5
- D = 1.0
- D- = 0.7
- F = 0.0

**S-U Grades**

Some courses in the college and in other academic units at Cornell are offered on an S-U basis; that fact is indicated in this book. Courses listed as SX-UX are only available on an S-U basis and may not be taken for a letter grade. University regulations concerning the S-U system require that a grade of S be given for work equivalent to a C- or better, for work below that level, a U must be given. No grade point assignment is given to S, and S or U grades do not figure in the computation of semester or cumulative averages. A course in which a student receives an S is, however, counted for credit. No credit is received for a U. Both the S and U grades appear on a student's record. A student who is attempting to qualify for the Dean's List must take at least 12 credits of A-F grades. See the section, Awards and Honors for more details about the Dean's List.
No more than 12 S-U credits will count towards a student's 120-credit graduation requirement. However, a student may take more than one S-U course in any one semester. S-U courses may be taken only as electives or in the nine credits required in the college outside the major unless the requirements for a specific major indicate otherwise. Freshmen enrolled in English 137 and 138 (offered for S-U grades only) are permitted to apply those courses to the freshman writing seminar requirement. If a required course is only offered S-U, it will not count toward the 12-credit or four-course limit. To take a course for an S-U grade, a student must check the course description to make sure that the course is offered on the S-U basis; then either sign up for an S-U registration or, before a student completes a course, initiate the process whenever a grade of incomplete is given. This form in the Human Ecology Registrar's Office. After the third week of the term, students cannot change grade options.

Note: students considering medical school or law school should discuss selecting any S-U option with the college's pre-med/pre-law adviser, Paula Jacobs (172 MVR).

Grades of Incomplete
A grade of incomplete is given when a student does not complete the work for a course on time but when, in the instructor's judgment, there was a valid reason. A student with such a reason should discuss the matter with the instructor and request a grade of incomplete.

A grade of incomplete may remain on a student's official transcript for a maximum of two semesters and one summer after the grade is given, or until the awarding of a degree, whichever is the shorter period of time. The instructor has the option of setting a shorter time limit for completing the course work. If the work is completed within the designated time period, the grade of incomplete will be changed to a regular grade on the student's official transcript. If the work is not completed within the designated time period, the grade of incomplete automatically will be converted to an F.

When a student wants to receive a grade of incomplete, the student should arrange a conference with the instructor (preferably before classes end and the study period begins) to work out the agreement. A form, called explanation for reporting a final grade of F or incomplete, which must be signed by both the instructor and the student, needs to be submitted by the instructor to the Human Ecology Registrar's Office. This form is submitted with the final grade sheets whenever a grade of incomplete is given. This form is for the student's protection, particularly in the event that a faculty member with whom a course is being completed leaves campus without leaving a record of the work completed in the course. If circumstances prevent a student from being present to consult the instructor, the student may, if requested by the student, initiate the process by filling out and signing part of the form and turning it in to the Human Ecology Registrar's Office with the grade sheet. Before a student will be allowed to register for succeeding semesters, he or she must go to the Human Ecology Registrar's Office to fill out and sign the remainder of the form.

If the work is satisfactorily completed within the required time, the course appears on the student's official transcript with an asterisk and the final grade received for the semester in which the student was registered for the course. A student who completes the work in the required time and expects to receive a grade must take the responsibility for checking with the Human Ecology Registrar's Office (about two weeks after the work has been handed in) to make sure that the grade has been received. Any questions should be discussed with the course instructor.

Grade Disputes
Students who find themselves in disagreement with instructor over grades have several options:
1. Meet with the instructor and try to resolve the dispute.
2. Meet with the chair of the department in which the instructor has their appointment.
3. Meet the associate dean for undergraduate studies of the college in which the course was taught.
4. Meet with the university ombudsman (113 Stimson Hall, 255-4321).

A student may also seek advice from their faculty adviser or with a counselor in the Office of Admission, Student, and Career Services (172 MVR).

Repeating Courses
Students are allowed to register a second time for a course they have already passed or have received an 'F'. If a student has previously passed a course they are taking a second time, the second registration will not count towards their degree requirements and the grade received will not be included in their cumulative GPA. If a student enrolls in a course in which they previously received an F, the credits from the second registration will count towards their graduation requirements and the grade will be included in their cumulative GPA. The F will also remain on the record and will be included in the GPA.

Examinations
Both the preliminary and final examination schedules are printed every semester in the Course and Time Roster. The current exam information is also available on the university web page at www.cornell.edu/Academic-Academic.html#Class.

Final Examinations
The following is quoted from the Cornell University Faculty Handbook, 1990, pages 66-67:

"The University Faculty long ago established, and has never reversed, the policy that each course should require a final examination or some equivalent exercise (for example, a term paper, project report, final critique, oral presentation, or conference) to be conducted due during the period set aside for final examinations. Although not specifically prohibited, it is University policy to discourage more than two examinations for a student in one twenty-four hour time period and especially on any one day. It is urged that members of the faculty consider student requests for a make-up examination, particularly if their course is the largest of the three courses and thus has the strongest likelihood of offering a makeup for other valid reasons, i.e. illness, death in the family, etc.

Legislation of the University Faculty governing study period and examinations is as follows:
1. No final examinations can be given at a time other than the time appearing on the official examination schedule promulgated by the Registrar's Office without prior written permission of the Dean of the Faculty.
2. No permission will be given, for any reason, to schedule final examinations during the last week of classes or the designated study period preceding final examinations.
3. Permission will be given by the Dean of the Faculty to reschedule examinations during the examination period itself if requested in writing by the faculty member, but only on condition that a comparable examination also be given for those students who wish to take it at the time that the examination was originally scheduled. The faculty member requesting such a change will be responsible for making appropriate arrangements for rooms or other facilities in which to give the examination. This should be done through the Registrar's Office.
4. No tests are allowed during the last week of scheduled classes unless such tests are part of the regular week-by-week course program and are followed by an examination (or the equivalent) in the final examination period.
5. Papers may be required of students during the study period if announced sufficiently far in advance that the student did not have to spend a significant segment of the study period completing them.
6. Faculty can require students to submit papers during the week preceding the study period.
7. Take home examinations should be given to classes well before the end of the regular term and should not be required to be submitted during study period but rather well into the examination period. Students have a right to examine their corrected exams, papers, and the like, in order to be able to question their grading. They do not, however, have an absolute right to the return thereof. Exams, papers, etc., as well as grading records, should be retained for a reasonable time after the end of the semester preferably until the end of the following term, to afford students such right of review."

Preliminary Examinations
The following is quoted from the Cornell University Faculty Handbook (1990), pages 65-66:

"Preliminary examinations are those given at intermediate times during a course. It is common to have three of these in a term to encourage review and integration of major
segments of the course, to provide students with feedback on how well or poorly they are progressing, and to contribute to the overall basis for a subsequent final grade.

The most convenient times and places for "prelims" are the normal class times and classrooms. But many courses, particularly large ones with multiple sections, choose to examine all the sections together at one time and to design an examination that takes more than one class period to complete. In such cases the only alternative is to hold the prelim in the evening. This practice creates conflicts with other student activities, with evening classes and laboratories, and among the various courses that might choose the same nights.

To eliminate direct conflicts, departments offering large multisession courses with evening prelims send representatives annually to meet with the dean of the University Faculty to lay out the evening prelim schedule a year in advance. Instructors of smaller courses work out their own evening prelim schedules, consulting their students to find a time when all can attend. Room assignments are obtained by the faculty member through the contact person in his or her college or the Central Reservations Coordinator.

The policy governing evening examinations is as follows:

1. Evening examinations may be scheduled only on Tuesday and Thursday evenings and only after 7:30 p.m. without prior permission from the Office of the University Faculty.
   a. Such prior permission is not, however, required for examinations or makeup examinations involving small numbers of students (generally 30 or fewer) provided that the scheduled time is acceptable to the students involved and that an alternate examination time is provided for those students who have academic, athletic, or employment conflicts at the time scheduled.

2. Permission from the Office of the University Faculty to schedule on evenings other than Tuesdays and Thursdays or at a time prior to 7:30 p.m. will be granted only on the following conditions:
   a. Conditions such as the nature of the examination, room availability, large number of conflicts, etc., justify such scheduling.
   b. An alternate time to take the examination must be provided for those students who have academic, athletic, or employment conflicts at the time scheduled.

3. If there is a conflict between an examination listed on the schedule developed at the annual evening prelim scheduling meeting and an examination not on the schedule, the examination on the schedule shall have a priority, and the course not on the schedule must provide an alternate time to take the examination for those students faced with the conflict.

4. If there is a conflict between examinations, both of which are on the schedule developed at the annual evening prelim scheduling meeting or both of which are not on the schedule, the instructors of the courses involved must consult and agree on how to resolve the conflict. Both instructors must approach this resolution process with a willingness to provide an alternative or earlier examination.

5. Note that courses using evening examinations are strongly urged to indicate this in the course description listed in Courses and must notify students of the dates of such examinations as early as possible in the semester, preferably when the course outline is distributed.*

**ACADEMIC STANDING**

**Criteria for Good Standing**

The College of Human Ecology has established a set of minimum academic standards which all students must meet or exceed each semester. These standards are as follows:

1. A student must maintain a semester and cumulative grade point average of 1.7 or higher.
2. A student must successfully complete at least 12 credits per semester, excluding physical education courses.
3. Freshmen and sophomore students must complete at least one human ecology course each semester. (ECON 101 and ECON 102 are considered Human Ecology courses).
4. A student must be making "satisfactory progress" toward a bachelor's degree.

Upon the completion of each semester the Committee on Academic Status (CAS) reviews each student's academic record to ensure the above academic standards are upheld. The committee then takes appropriate action for students whose academic achievement is considered unsatisfactory as defined by the above criteria. The five voting faculty members, along with several nonvoting student services staff, consider each case individually before deciding on a course of action. The committee may take any of the following actions depending on the seriousness of the student's academic difficulties:

1. Take no action.
2. Return the student to good standing.
3. Place the student on a review list, which means the case will be monitored throughout the semester.
4. Place the student on a warning status.
5. Place the student on a severe warning status.
6. Place the student on a severe warning with danger of being dropped status, implying that if the student does not show considerable improvement during the semester the committee will likely drop the student at the end.

Suspend the student for one or more terms during which the student may not register at Cornell (except in extramural status with CAS approval).

8. Permanently withdraw the student from the college and Cornell University.

Students who have been suspended or withdrawn have the right to appeal the decision in front of the committee during the appeals meeting. Students who have been placed on warning due to incomplete or missing grades may request their status be updated to good standing once they have cleaned up their records. These requests should be made with a general petition and submitted to the Office of the Registrar.

All students with a status will automatically be reviewed at the end of the subsequent semester. In most cases, students put on a warning, severe warning, or severe warning with danger of being dropped status will be informed of conditions that they are expected to fulfill in order to return to good standing. In general, these conditions are that a student must earn a minimum GPA of 2.0, complete 12 credits, and not have any incomplete, "F," or "U" grades on their semester record.

If a student who has been previously suspended wishes to return to the college he/she must submit a plan of study to the committee before being rejoined.

Students who have been withdrawn by CAS may request reconsideration and ask to be readmitted by the committee. Such students have three years from the date they were withdrawn to make this request. After three years, a former student must apply for admission through the Office of Admission. A student should discuss their situation with a counselor in the Office of Admission, Student, and Career Services (172 MVR). They should also talk with others who may be able to help them—faculty advisers, instructors, or a member of the medical staff. A student may also write directly to the committee (via the committee chair, whose name can be obtained from the college registrar) and present new or previously unknown information. Any information given to the committee is held in the strictest confidence.

**Academic Integrity**

Academic integrity is a critical issue for all students and professors in the academic community. The University Code of Academic Integrity states that (1) a student assumes responsibility for the content and integrity of the academic work he or she submits, such as papers, examinations, reports and (2) a student shall be guilty of violating the code and subject to proceedings under it if he or she:

a. Knowingly represents the work of others as his or her own.

b. Uses or obtains unauthorized assistance in any academic work.

c. Gives fraudulent assistance to another student.

d. Fabricates data in support of laboratory or fieldwork.

e. Forges a signature to certify completion of a course assignment.

f. Uses an assignment for more than one course without the permission of the instructor involved.

g. Uses computer hardware and/or software to abuse privacy, ownership, or user rights of others.

h. In any manner violates the principle of absolute integrity.

The Academic Integrity Hearing Board, which consists of a chairperson, three faculty
members, and three students, hears appeals from students who have breached the code. It also deals with cases brought directly to it by members of the faculty.

Academic Records
Students may obtain their Cornell academic record in several ways. The Cornell transcript, which is the official record of the courses, credits, and grades that a student has earned, can be ordered with no charge at the Office of the University Registrar (B7 Day Hall). For more information call (607) 255-4232. Students who merely want an unofficial working copy of their transcript can request a copy of their record card from the Office of the College Registrar (145 MVR). Students may also access their grades and course schedules electronically using Just the Facts. Student should be in the habit of checking Just the Facts by the second week of every semester to confirm that their schedule and grade options are correct.

The college also maintains a graduation progress worksheet for each student showing progress towards the degree. At the beginning of fall term continuing students receive a copy of their worksheet. It is important to check this document and bring any errors to the attention of the staff in the Office of the College Registrar (145 MVR).

Access to Records
The Family Educational Rights and Privacy Act of 1974 assures students of privacy of their records. The law also assures students' access to their records. Information concerning a student's relationship with the university is considered restricted and may be released only at the student's specific written request. Restricted information includes the courses elected, grades earned, class rank, academic and disciplinary actions by appropriate faculty, student, or administrative committees; and financial arrangements between the student and the university. Letters of recommendation are restricted information unless the student has specifically waived right of access.

Students who want additional information on access to their records may contact the Office of the College Registrar (145 MVR) or the Office of the University Registrar (B7 Day Hall). An inventory of those student records maintained by Cornell University offices in Ithaca, their location, and cognizant officer are available in the Office of the Dean of Students (401 Willard Straight Hall).

For specific information, refer to the university's policy, "Access to Student Information," at the following web address: www.univco.cornell.edu/policy/ASL.html, or talk with the college registrar in the Office of the College Registrar (145 MVR).

ACADEMIC HONORS AND AWARDS
The college encourages high academic achievement and recognizes outstanding students in several ways.

Honors
Dean's List. Excellence in academic achievement is recognized each semester by placing on the Dean's List the names of students who have completed satisfactorily at least 12 credits of letter grades and who have a semester grade point average of 3.7 or above. No student who has received an F or U in an academic course will be eligible.

Kappa Omicron Nu seeks to promote graduate study and research and to stimulate scholarship and leadership toward the wellbeing of individuals and families. As a chapter of a national honor society in the New York State College of Human Ecology, it stimulates and encourages scholarly inquiry and action on significant problems of living—at home, in the community, and throughout the world. Students are eligible for membership if they have attained junior status and have a cumulative average of not less than a B. Transfer students are eligible after completing one year in this institution with a B average. Current members of Kappa Omicron Nu elect new members. Not more than 10 percent of the junior class may be elected to membership and not more than 20 percent of the senior class may be elected. Graduate students nominated by faculty members may be elected. The president of Kappa Omicron Nu has the honor of serving as First Degree Marshall for the college during May commencement.

Bachelor of Science with Honors recognizes outstanding scholastic achievement in an academic field. Programs leading to a degree with honors are offered to selected students by the Department of Human Development and the Division of Nutritional Sciences. Information about admission to the programs and their requirements may be obtained from the appropriate department or division. Students in other departments who wish to qualify for honors should contact Janet Brown-Aist (N118A MVR) during their sophomore year or the first semester of their junior year. Most honors candidates have a minimum grade point average of 3.3 and have demonstrated potential for honors-level research. To graduate with honors a student must take approved courses in research methodology and evaluation; attend honors seminars, complete a written thesis, and successfully defend it in front of a committee.

Bachelor of Science with Distinction recognizes outstanding scholastic achievement. Distinction is awarded to students in the top 10 percent of the graduating class based on the last 60 credits earned at Cornell. The graduating class includes students who will complete requirements for Bachelor of Science degrees in January or May of the same academic year or the prior August. Names of seniors who meet these requirements are presented to the faculty of the college for approval.

The primary objectives of the honor society, Phi Kappa Phi, are to promote the pursuit of excellence in higher education and to recognize outstanding achievement by students, faculty, and others through election to membership. Phi Kappa Phi is unique in that it recognizes scholarship in all academic disciplines. To be eligible for membership students must rank in the top 10 percent of the senior class, or in the top 5 percent of the junior class. Provision also exist for the election of faculty members and graduate students whose work merits recognition.

Gamma Sigma Delta is an honor society of the faculty in the colleges of Human Ecology, Agriculture and Life Sciences, and Veterinary Medicine. The common bond is promotion of excellence in work related to the quality of our environment and life based on "agriculture and the related sciences." The Cornell chapter recognizes the academic achievements of students, faculty, and alumni of those colleges with nominations for membership and with special awards. To be eligible, seniors must be in the upper 15 percent of their major. Five juniors with the highest grade point average in their college are also nominated.

Class Rank for the junior and senior classes is computed at the end of each semester. The college registrar processes class rank after final grades are issued and will not be adjusted if a student's academic record changes for any reason.

Awards
The Elsie Van Buren Rice Award in Oral Communication is awarded for original oral communication projects related to the college's mission by undergraduate students in the College of Human Ecology. The contest is held each year in February and awards prizes totaling $1,500.

The Florence Halpern Award is named for the noted psychologist, Dr. Florence Halpern, in recognition of her lifelong interest in "innovative human service, which better the quality of life." In that spirit the award is presented to a undergraduate in the College of Human Ecology who has demonstrated, through supervised field work or community service, creativity in the search for solutions to human problems. The award carries a $500 cash prize.

COLLEGE COMMITTEES AND ORGANIZATIONS
Student Groups and Organizations
Following are brief descriptions of some of the organizations that offer valuable experiences to human ecology students. Information about many other student activities on campus may be obtained from the Office of the Dean of Students (401 Willard Straight Hall).

The American Council on Consumer Interests (ACCI) offers membership for those interested in consumer economics. Contact the department of Consumer Economics and Housing for further information.

The Cornell Design League was formed to give students interested in apparel a chance to express their creativity outside of the classroom by producing a fashion show every spring. It has become concerned with all aspects of a professional presentation. Consequently, it also provides a creative outlet for those interested in graphics, photography, illustration, or theater production. Although many of its designers are part of the Department of Textiles and Apparel, the Design League welcomes people of all majors and schools.
Students have opportunities to work throughout the community in a variety of service capacities. They volunteer in day care centers, youth programs, health-related agencies, services for elderly people and people with disabilities, social work, nutrition programs, arts organizations, and Ithaca schools. For further information, contact the Public Service Center (200 Barnes Hall). Call 255-1148 for information about volunteer work or 255-1107 for information about work-study arrangements.

Gamma Sigma Delta is an honor society of the faculty in the colleges of Human Ecology, Agriculture and Life Sciences, and Veterinary Medicine. The common bond is promotion of excellence in work related to the quality of our environment and life based on agriculture and the related sciences. The Cornell chapter recognizes the academic achievements of students, faculty, and alumni of those colleges with nominations for membership and with special awards. To be eligible, seniors must be in the upper 15 percent of their major. Five juniors and sophomores to with the highest grade average in their college are also nominated.

Human Ecology Ambassadors is a group of undergraduates who assist the Office of Admission, Student, and Career Services by participating in group conferences with prospective students to provide information from a student’s perspective, assisting with recruitment and yield activities for potential students, conducting high school visitations, assisting with on-campus open-house programs for high school students and potential transfer students, helping with prospective students and alumni phonathons.

In addition, ambassadors attend regular meetings and serve as coordinators for activities in the Office of Admission, Student, and Career Services.

For information, contact the Office of Admission, Student, and Career Services (172 MVR, 255-5471).

The mission of the Human Ecology Voices is to build unity among students, faculty, and staff in the Human Ecology. Membership consists of all representatives of all other Human Ecology student organizations and other interested students. Patti Papapietro serves as Voices adviser from the Office of Admission, Student, and Career Services (172 MVR, 255-2532).

The Human Ecology Mature Students Association is an organization of students who are 24 years of age or older at the time of matriculation. Many mature students need to balance family, work, and other concerns with their academic efforts. The Mature Students Association strives to help by providing a forum for resource exchange and referral, support, socializing, and special projects depending upon expressed interest. These goals are pursued through seminars and informational meetings, the mature students listserv, supplementary orientation activities, liaison with other university offices, and the encouragement of informal networking. Contact Patti Papapietro in the Office of Admission, Student, and Career Services (172 MVR) for more information.

Students interested in the relationship between the physical environment and human behavior may join the Human-Environment Relations Students Association (HERSA).

Human Ecology Alumni Association also has a student chapter. Membership information is available from the Department of Design and Environmental Analysis.

For more information, contact the Department of Design and Environmental Analysis.

The International Facility Managers Association (IFMA) also has a student chapter. Membership information is available from the Department of Design and Environmental Analysis.

The Association for Students of Color (ASC) unites human ecology minority students to provide a supportive foundation for the development of enrollment, retention, graduation, and career placement. ASC members work toward these goals by:

- participating in admissions hosting programs and conducting high school visitations
- sponsoring presentations on career and graduate school outcomes of a human ecology education
- providing volunteer services to the Cornell and Ithaca communities,
- attending regular meetings and hosting annual fall and spring forums

Contact Verdene Lee in the Office of Admission, Student, and Career Services (172 MVR, 255-2532) for more information.

The Orientation Committee consists of students and advisers interested in planning and implementing programs to acquaint new students with the College of Human Ecology. The committee is particularly active at the beginning of each semester and is always eager for new members. For information, contact Patti Papapietro in the Office of Admission, Student, and Career Services (172 MVR, 255-2532).

Membership in the Sloan Student Association is open to students interested in health care and related fields. Contact the president of the association (N222 MVR, 255-8013) for further information.

The Students for Gerontology (SFG) is composed of students from a wide variety of majors who are interested in career and internship opportunities that contribute to the well-being of our aging population. Programs sponsored by this organization focus on developing leadership of student organizations and other student gerontology groups. SFG meets monthly. Contact Donna Dempster-McClain, faculty adviser, Bronfenbrenner Life Course Center, (259 MVR Hall, 255-5557), for further information.

The Undergraduate Nutrition Organization (UNO) promotes nutritional well-being through education, communication, and research. Members of the student chapter organize programs such as Food and Nutrition Day in March, host on-campus speakers in nutrition and health-related fields, and publish NutriNews, a campus-wide nutrition newsletter. The student chapter is open to all students interested in nutrition education. For further information contact Gail Canterbury (302 MVR, 255-5473).

The Educational Policies Committee (EPC) has two student members, one graduate and one undergraduate, who vote along with the faculty members on matters relating to college academic policy. Recommendations are submitted to this committee regarding revisions in degree requirements, new curriculum changes, and new course approval.

Students also have the opportunity to serve on the Admissions Policy Subcommittee, and the Academic Integrity Hearing Board.

The Selection Committee for the Chancellor's Award for Excellence in Teaching or Professional Service handles the nomination and selection process for this prestigious yearly award. The committee consists of three teaching faculty members, one professional staff member, and three undergraduate members.

The Human Ecology Alumni Association Board of Directors includes two student board members—one junior and one senior. One student is selected each spring to begin a two-year term as student representative. The two students co-chair the board’s Student Activities Committee, which works to increase the visibility of the Human Ecology Alumni Association among the student body by funding a variety of activities. The student members also bring an important perspective to board deliberations about programming and annual goals.

The Committee on Academic Status does not include student representatives, but has a faculty representative from each department. This committee is responsible for upholding the academic standards of the college and takes action when appropriate. The committee also hears appeals regarding student petitions and requests to be readmitted.

INTERDEPARTMENTAL COURSES

HE 100 Critical Reading and Thinking Fall, spring, or summer. 2 credits. Enrollment limited. Priority is given to freshmen and sophomores; juniors and seniors are admitted with permission of the department chair. The objective of this course is to enable students to increase critical reading and thinking abilities. Theory and research associated with a wide range of reading, thinking, and learning skills are examined. Emphasis is placed on developing and applying analytical and evaluative skills. Laboratory instruction is individualized and provides the opportunity to focus intensively on increasing comprehension, reading rate, and vocabulary.

HE 101 College Achievement Seminar 6-week summer session. 2 credits. Enrollment limited. Open to the second semester of pre-freshman Summer Program students. Letter or S-U grades.

The objective of this course is to improve the study and learning skills of incoming freshmen. Emphasis is placed on acquisition of skills necessary to achieve academic success. Topics include time management, note-taking, mapping, textbook comprehension, exam preparation, and exam strategies. The application of the demands of Cornell course work is stressed. In addition, students are introduced to library and
THE URBAN SEMESTER PROGRAM IN MULTICULTURAL DYNAMICS IN URBAN AFFAIRS

Cornell in New York City provides students with many study options that focus on multicultural dynamics in urban affairs. The options available include internships, individual and group community service projects, research, independent study, collaborative learning, and mentorships.

Student internships occur as students enroll in the three courses, HE470, HE480 and HE490. Students learn through reflection and action. Program options are possible throughout the academic year, during winter break, and in the summer.

Courses of study enable students to seek out the relationship between theory and practice, apply theory to practice, identify and acquire professional practice skills, and learn about the impact of diversity on New York City. By applying ethnographic research techniques and methods, students learn to think conceptually, reflect on their actions, and be agents of change.

Several majors in the college require internships or encourage field study. Check with the Director of Undergraduate Studies of each major for more information. The Career Development Center in 159 MVR and counselors in the Office of Admission, Student, and Career Services in 172 MVR can help you find internships and provide more information on departmental opportunities and enrolling in Cornell in New York City.

HE 470 Multicultural Practice
Fall and spring semesters.
Students immerse themselves in internship activities three days each week. During small group seminars, students reflect on their internship experiences, focusing on multicultural issues, professional practice, and organizational culture.

HE 480 Multicultural Issues in Urban Affairs
Fall and spring semesters.
This course is a study of multicultural issues in urban environments and how they can enhance their academic foundations and their career development. Using a historical perspective, students examine issues of diversity (e.g., race, ethnicity, religion, class, gender, sexual orientation) in relationship to (1) professional life in different sectors of the economy; (2) the development of neighborhoods and communities; and (3) the basis of a just and democratic society. Reading focuses on inner-city children and youth under a variety of multicultural-influenced conditions and contexts. Costs include travel to and from sites by public transportation at about $3.00-6.00 each week.

HE 490 Communities in Multicultural Practice
Fall and spring semesters.
This course provides students with an understanding of community building processes and enables them to interact with children, youth, and their families in school settings. For a full day once each week, students work in inner city schools with teachers, staff, and children, providing community service. Student learning is focused on how to increase children's learning capacities and expand their horizons by teaching them successful strategies. Students focus on the assets that inner-city children bring to their school environment and learn how to mentor them. They help teach skills, knowledge, values, behaviors, and perspectives that school children must develop in order to enter the working world. Costs include public transportation costs to and from the various sites, about $3.00-6.00 each week.

HE 402 The Winter Session in Community Service and Mutual Learning: The South Bronx-Banana Kelly/Cornell University Project in Community Building
Winter Session.
Over the course of two intensive weeks, students participate in an ongoing community service project in the South Bronx with children of the Banana Kelly Community. In carrying out community service, students participate with the director of the Cornell in New York City Program. Since the 1995 intersession, students have mentored children in an after-school program through projects that have documented the community with photographs, models, and stories. Each intersession, seven students mentor 15 ninth graders from Banana Kelly High School.
A photo exhibit was produced and circulated. In 1998, Cornell students and children produced three-dimensional models of their imagined community in future years and a book of essays and photographs.

HE 406 Fieldwork in Diversity and Professional Practice
Summer session.
Over the course of an eight-week summer session, students participate in a community-based medical center, hospital or clinic as a member of the New York Presbyterian Hospital and Weill College of Medicine at Cornell University. This is a four-day internship and one day of seminars and site visits.

DESIGN AND ENVIRONMENTAL ANALYSIS

F. Becker, chair; W. Sims, director of undergraduate studies; S. Danko, director of graduate studies; A. Basinger, J. Elliott, P. Eshelman, G. Evans, K. Gibson, R. Gilmore, A. Hedge, J. Jennings, J. Laquatra, L. Maxwell

Note: A minimal charge for photocopied course handouts may be required.

Note: Class meeting times are accurate as of the time of publication. If changes are required, the department will provide new information as soon as possible.

DEA 101 Design Studio I
Fall. 3 credits. Each section limited to 20 students. Permission of instructor required for non-DEA majors. Prior to a 6th-year degree, design majors are required to register for this course. Option I majors must take DEA 101 in fall of their first year. Approximate cost of materials, $200. M W 1:25-4:25, or T R 10:10-1:10. J. Elliott. This studio course introduces the fundamental vocabulary and principles of two- and three-dimensional design. Students experiment with the development of image and form through problem-solving activities. Visit http://instruct1.cit.cornell.edu/courses/dea101/.

DEA 102 Design Studio II
Spring. 3 credits. Limited to Option I DEA majors only. 6th- or higher in DEA 101 required to register for this course. Option I majors must take DEA 102 and 115 concurrently. Approximate cost of materials, $200; shop fee, $10. T R 1:25-4:25. P. Eshelman. A studio course in three-dimensional design with an interior design emphasis. Problems in spatial organization are explored through drawings and models.

DEA 111 Making a Difference: By Design
Fall. 3 credits. Limit 130. Lab Fee: $25. M W F 11:15-12:05. S. Danko.
Students from any academic area may examine how design affects their daily lives and future professions. This course focuses on issues of leadership, creative problem-solving, and risk-taking through case study examination of leaders in business, education, medicine, human development, science, and other areas who have made a difference using design as a tool for positive social change. Utilizing a micro to macro framework, students explore the impact of design from the person to the planet. Additional topics include: nurturing innovation, visual language, design criticism, design and culture, semiotics, proactive/reflective decision making, and ecological issues.

As early as the freshman year, students can plan their curriculum toward completing a fifth year masters. Typically, this means students will take 4 to 5 courses in their fall term as a graduate student, and 2 to 3 courses plus their thesis research in the spring term. Students should expect to complete their thesis by the end of the summer term of their fifth year.

Admission to the 4+1 Masters program is not automatic. Students must meet with their advisers early in their undergraduate programs to plan carefully for this possibility. In the fall of the senior year, interested students must submit an application to the Graduate School. The GRE exam is not required for admissions, but students must submit a statement of intent, letters of reference, and transcripts. Students who have compiled a strong undergraduate record in the department are usually good candidates for admission into the graduate program in Design and Environmental Analysis. Students interested in this program should meet with their DEA adviser as early as possible to discuss and plan for application to this program.
DEA 115 Design Graphics
Spring. 3 credits. Option I DEA majors only. Prerequisite: DEA 101, must take DEA 102 and DEA 115 concurrently. Minimum cost of materials, $100; technology fee $10. M W F 9:05—11:00. K. Gibson.

A studio drawing course for interior designers. Discussion groups on drawing techniques are held to develop a visual understanding and vocabulary. Students are introduced to the functions of line, shape, and value. Perspective, spatial, and conceptual drawing are emphasized.

DEA 150 Introduction to Human-Environment Relations

This course analyzes environment and human behavior. We examine the interface of social and environmental sciences with application for the design and management of built and natural habitats. Topics include environmental effects on health, well-being, moods, aesthetics, performance, interpersonal relationships, and organizational effectiveness as well as the ecological consequences of human attitudes and behaviors. Visit our web site at instruct.1.cit.cornell.edu/courses/dea150.

DEA 201 Design Studio III
Fall. 4 credits. Limited to Option I DEA students. Prerequisites: DEA 101,102, and 115 (minimum grades of B–) Recommended: DEA 111 and 150. Coregistration in DEA 251 is required. Minimum cost of materials, $145; lab fee, $40; optional field trip, approximately $120. M W F 12:25—4:25. J. Jennings.

This is the third semester in the studio sequence of eight semesters. The theme and objectives focus on design as critical thinking, introducing means by which students can think, draw, write, and build their way critically through design. Taken concurrently with DEA 251, the course applies historical and theoretical knowledge to design projects. The course also includes a collaborative project with a professor and students from another design discipline.

DEA 202 Design Studio IV
Spring. 4 credits. Each section limited to Option I DEA students. Prerequisites: DEA 201 and 203. Prerequisites or corequisites: DEA 204. Minimum cost of materials, $120; diazo machine fee, $8; field trip fee. T R 12:20—4:25. R. Gilmore.

Interior design studio. Emphasis of the course is on continued development of basic proficiency in design skills through exposure to a selected set of interior design problems of limited complexity. Each problem of three to five weeks duration is structured to emphasize different aspects of the design process.

DEA 203 Digital Communications
Fall. 2 credits. Priority given to DEA majors. Lab fee $10. Sec 01 M 7:30—9:55 P.M., Sec 02 W 7:30—9:55 P.M. J. Elliot.

Digital information technologies for designers of the built environment. Students explore issues in relation to text and image and form and content through a series of weekly projects. They work towards the development of a professional web-based portfolio of self-promotional material. The course objective is to reinforce principles of visual communications while learning the rudiments of vector, raster, and html graphic software.

Http://instruct.1.cit.cornell.edu/courses/dea203/

DEA 204 Introduction to Building Technology

Introduction to building technology for interior designers and facility managers. Emphasis is placed on developing basic understanding of buildings and building systems and their implications for interior design and facility management. Covers basic building types; structural systems; construction materials and methods; HVAC systems; plumbing, electrical, lighting, fire, and security systems; and telephone, computer, and other communication systems. Visit http://courseinfo.cit.cornell.edu/courses/dea204.

[DEA 243 Inside Out: The American Everyday Interior (also WOMNS 243, AM ST 243)]

A study of late nineteenth and twentieth-century everyday interiors. Emphasis on understanding design, design and facility management. Through projects and readings the influence of environmental form on social behaviors such as aggression, cooperation, communication, community, and crime is explored. Also covered are the influences of stage in life cycle, family structure, and social class on environmental needs and purposes. Implications for the planning, design, and management of complex environments such as offices, hospitals, schools, and housing are emphasized.

DEA 251 History and Theory of the Interior

A comprehensive studio course for students interested in the social sciences, design, or facility management. Through projects and readings the influence of environmental form on social behaviors such as aggression, cooperation, communication, community, and crime is explored. Also covered are the influences of stage in life cycle, family structure, and social class on environmental needs and purposes. Implications for the planning, design, and management of complex environments such as offices, hospitals, schools, and housing are emphasized.

DEA 251 History and Theory of the Interior
Fall. 3 credits. Limited to 65. Priority given to DEA majors. M W F 9:05—9:55. J. Jennings.

An historic study of interior architecture and design with an emphasis on the concepts of design theory. Overarching themes encompass several time periods from the classical to the twentieth century and isolate cultural patterns, spatial ideas, design elements, and theorists. Reading, discussion, analytical exercises, essays, examinations, and a field trip will be included. Visit http://instruct.1.cit.cornell.edu/courses/dea251.

DEA 300 Special Studies for Undergraduates
Fall or spring. Credit to be arranged. Department faculty. Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multiplicity description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the head of the department, is filed at course registration or during the change-of-registration period.

DEA 301 Design Studio V

Intermediate-level interior design studio. The course is organized around a series of interior and interior-product design problems of intermediate-level complexity, three to five weeks in duration. Focus is on development of design skills and on understanding of a selected set of generic problem types.

DEA 302 Design Studio VI
Spring. 5 credits. Prerequisites: DEA 301 and 303 or permission of instructor. Corequisite: DEA 305. Minimum cost of materials, $150; shop fee, $10. M W F 1:25—4:25. K. Gibson.

Intermediate-level interior design studio with an introduction to computer applications. Emphasis on using the microcomputer as a design tool in the process of creating and planning interior spaces. Continued development of design skills and problem solving in relation to a selection of problem types.

DEA 303 Introduction to Furnishings, Materials, and Finishes
Fall. 2 credits. W 2:30—4:25. R. Gilmore.

Basic understanding of furniture types and systems; interior products and equipment such as work-stations; window, wall, and floor coverings; ceiling and lighting systems; and materials and finishes. Emphasis is placed on criteria for selection of furnishings, materials, and finishes for typical interior design and facility management problems.

DEA 304 Introduction to Professional Practice of Interior Design
Spring. 1 credit. W 2:30—4:25. A. Basinger.

Introduction to organizational and management principles for delivery of interior design and facility management services. Covers basic organizational structures and basic management functions within interior design and facility management organizations, work flow and scheduling, business practices, legal and ethical responsibilities and concerns, contracts, basic contract documents such as working drawings and specifications, supervision of construction and installation, and cost estimation.

DEA 305 Construction Documents and Detailing

Comprehensive study of drafting, detailing, schedules, and specifications. Emphasis on drawing conventions and limitations on the design of interior elements, terminology, construction methods, and materials.

DEA 325 Human Factors: Ergonomics—Anthropometrics
Fall. 3 credits. Recommended: DEA 150. T R 8:40—9:55. A. Hedge.

Implications of human physical and physiological characteristics and limitations on the design of settings, products, and tasks. An introduction to engineering anthropometry, biomechanics, control/display design, work physiology, and motor performance. Course
includes practical exercises and field project work.

DEA 350 Human Factors: The Ambient Environment
An introduction to human-factor considerations in lighting, acoustics, noise control, indoor air quality and ventilation, and the thermal environment. The ambient environment is viewed as a support system that should promote human efficiency, productivity, health, and safety. Emphasis is placed on the implications for planning, design, and management of settings and facilities. Course includes a field project.

DEA 400-401-402-403 Special Studies for Undergraduates
Fall or spring. Credits to be arranged. S-U grades optional. Department faculty.
For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of DEA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multiplicity description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department head and filed at course registration or within the change-of-registration period in 145 MVR, College Registrar’s Office, along with an add/drop slip. To ensure review before the close of the course registration or change-of-registration period, early submission of the special studies form to the department head is necessary. Students, in consultation with their advisers and the instructor should register for one of the following subdivisions of independent study.

DEA 400 Directed Readings
For study that predominantly involves library research and independent reading.

DEA 401 Empirical Research
For study that predominantly involves data collection and analysis or laboratory or studio projects.

DEA 402 Supervised Fieldwork
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

DEA 403 Teaching Apprenticeship
For study that includes teaching methods in the field and assisting faculty with instruction. Students must have demonstrated a high level of performance in the subject to be taught and in the overall academic program.

DEA 407 Design Studio VII
Advanced interior design studio organized around a series of interior design problems, three to five weeks in duration. Focus is on development of design skills and on competence in solving a selected set of generic interior design problem types.

DEA 408 Design Studio VIII
Design problem-solving experiences involving completion of advanced interior design problems. Problems are broken into five phases: programming, schematic design and evaluation, design development, including material and finish selection; design detailing; and in-process documentation and the preparation of a professional-quality design presentation.

DEA 422 Ecological Literacy and Design (also ARCH 464.02)
This is a lecture/seminar course for students interested in learning about the effects of designing the built environment of the biophysical world. Course objectives are to develop sensitivities to environmental issues, construct conceptual frameworks for analysis, and demonstrate how ecological knowledge can be applied to the practice of design through participatory approaches to learning. Visit http://instruct1.cit.cornell.edu/courses/dea422/.

DEA 430 Furniture as a Social Art
Spring. 3 credits. Limited to 15. Permission of instructor. Cost of building materials: $150. Students must also sign up for 2 hours of DEA shop time each week for model building. M W 9:05–11:00. P. Eschelman.
This course examines furniture as a design process that emphasizes support of human behavior. Information about specific social issues including health care, aging, child care, and education is the starting point for assignments. Students analyze products currently available and design new furniture. Also covered are furniture materials, fabrication processes, and manufacturing techniques.

DEA 443 Cultural Construction: The Nineteenth- and Twentieth-Century American Interior
A topical study of nineteenth- and twentieth-century American vernacular interiors, exploring the relationship between interior design theory and social and cultural values. Sources include historic interiors, literature and art, and architectural and material culture studies. The course includes reading, discussion, comparative analysis, and critical writing.

DEA 451 Seminar on Facility Planning and Management
Fall. 1 credit. Letter grade only. M 3:35–4:25. F. Becker, W. Sims.
Series of seminars led by Cornell faculty and other facility management professionals. Topics include strategic space planning, space standards, office automation, project management, energy conservation, environmental protection, and legal issues. Visit http://instruct1.cit.cornell.edu/courses/dea/451_659.

DEA 453 Planning and Managing the Workplace
Spring. 3 credits. Prerequisite: limited to juniors and seniors. Purchase of course packet required. M 7:30–10:30 p.m. F. Becker.
Intended for students interested in the planning, design, and management of facilities for complex organizations. The purpose of the course is to explore how characteristics of the workplace, including building, design, furniture and equipment, and policies governing their use and allocation, affect individual and organizational effectiveness. Special topics, such as the human implications of new information technologies and work at home, are also covered. Visit http://instruct1.cit.cornell.edu/courses/dea/453_655.

DEA 454 Facility Planning and Management Studio
For advanced undergraduates interested in facility planning and management. Purpose is to provide basic tools, techniques, and concepts useful in planning, designing, and managing facilities for large, complex organizations. The course covers strategic and tactical planning for facilities, organizing to deliver facility management, project management, space forecasting, space allocation policies, programming, relocation analysis, site selection, building assessment, space planning and design, furniture specifications, and moves. Sociopsychological, organizational, financial, architectural, and legal factors are considered. Visit http://instruct1.cit.cornell.edu/courses/dea/454_654.

DEA 455 Research Methods in Human-Environment Relations
Fall. 3 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25–2:15. G. Evans.
The course develops the student’s understanding and competence in the use of research and analytical tools to study the relationship between the physical environment and human behavior. Emphasis is placed on selection of appropriate methods for specific problems and the policy implications derived from research. Topics include research design, unobtrusive and obtrusive data-collecting tools, the processing of qualitative and quantitative data, and effective communication of empirical research findings.

DEA 459 Programming Methods in Design
Fall. 3 credits. Letter grade only. Minimum cost of materials $100. T R 10:10–11:25. W. Sims.
Introduction to environmental programming. Emphasis on formulation of building requirements from user characteristics and limitations. Diverse methods for determining characteristics that will enable a particular environmental setting to support desired behaviors of users and operators. Methods include systems analysis, soft system, behavior circuit, behavior setting, and user characteristic approaches. Selection of appropriate methods to suit problems and creation of new methods or techniques are emphasized. Visit http://instruct1.cit.cornell.edu/courses/dea/459_650.

DEA 470 Applied Ergonomic Methods
Spring. 3 credits. Prerequisite: DEA 325. T R 2:55–4:10 A. Hedge.
This course covers ergonomics methods and techniques and their application to the design of modern work environments. Emphasis is placed on understanding key concepts and coverage includes conceptual frameworks for
ergonomic analysis, systems methods and processes, a repertoire of ergonomics methods and techniques for the analysis of work activities and work systems. This course is the undergraduate section of DEA 670, which will share the same lectures but will meet for an additional hour. DEA 670 will have additional readings and projects.

DEA 499 Senior Honors Thesis
Fall or spring. Variable credit. Prerequisite: permission of thesis advisor and DEA director of undergraduate studies. Letter grades only.

This is an opportunity for DEA majors to undertake original research and scholarly work leading to the preparation of a thesis. Students work closely with their thesis adviser on a topic of interest.

DEA 600-603 Special Problems for Graduate Students
Fall or spring. Credit to be arranged. S-U grades optional. Department faculty.

Independent advanced work by graduate students recommended by their special committee chair and approved by the head of the department and instructor.

600: Special Problems.
For study of special problems in the areas of interior design, human environment relations, or facilities planning and management.

601: Directed Readings.
For study that predominantly involves library research and independent study.

602: Graduate Empirical Research.
For study that predominantly involves collection and analysis of research data.

603: Graduate Practicum.
For study that predominantly involves field experiences in community settings.

DEA 643 Cultural Construction: The Nineteenth- and Twentieth-Century American Interior

Next offered spring 2004. J. Jennings. A course intended for graduate students who want a more thorough grounding in the history of vernacular interiors than is provided by DEA 443. Each student is required to attend DEA 250 lectures, meet with the instructor and other graduate students for an additional class hour each week, and do additional readings and projects.

DEA 645 Dancing Mind/Thinking Heart: Creative Problem-Solving Theory and Practice
Spring. 4 credits. Limited to 15 graduate and advanced undergraduate students. Prerequisite for undergraduates: permission of instructor. T 4:30-7:30. S. Danko. Focuses on thinking processes and techniques that support creative problem solving. Theories of creative behavior and critical thinking are examined. The course is highly participatory and experiential by design. Weekly discussions include hands-on applications of theories on short problems tailored to the backgrounds of the students. The primary goal is to demonstrate perceptual, emotional, intellectual, cultural, and environmental blocks to creative thinking and expand the student's repertoire of creative problem solving strategies for use in day-to-day professional practice. Case studies of creative individuals and organizations from a variety of fields are presented.

DEA 648 Advanced Applications in Computer Graphics
Fall. 3 credits. Limited to 18 graduate and advanced undergraduate students. Prerequisites for undergraduates: DEA 302 or permission of instructor. Minimum cost of materials $150. Lab fee $35. T R 9:05-12:05. K. Hanson. Advanced use of computer technology to create and analyze interior environments. Emphasis will be on the use of 3-D modeling, animation, photorealistic rendering, and emerging technologies to investigate dynamic design issues.

DEA 650 Programming Methods in Design
Fall. 4 credits. T R 10:10-11:25. W. Sims. A course intended for graduate students who want a more thorough introduction to environmental programming methods than is provided by DEA 459. Each student is required to attend DEA 459 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects.

See DEA 459 for more detail.

DEA 651 Human Factors: Ergonomics-Anthropometrics
Fall. 4 credits. Recommended: DEA 150 and a 3-credit statistics course. T R 8:40-9:55. A. Hedge.

A course intended for graduate students who want a more thorough grounding in human factors than is provided by DEA 325. Each student is required to attend DEA 325 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects.

See DEA 325 for more detail.

DEA 652 Human Factors: The Ambient Environment

A course intended for graduate students who want a more thorough grounding in human factors considerations than is provided by DEA 350. Each student is required to attend DEA 350 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects.

For detailed description, see DEA 350.

DEA 653 Planning and Managing the Workplace
Spring. 4 credits. Letter grades only. Purchase of course packet required. M 7:30-10:30. P. M. F. Becker.

Intended for graduate students who want a more thorough grounding in the planning, design, and management of facilities for complex organizations than is provided by DEA 453. Each student is required to attend DEA 453 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects.

See DEA 453 for more detail.

DEA 654 Facility Planning and Management Studio
Spring. 4 credits. Prerequisite: DEA 459/650 or permission of instructor. Letter grades only. Minimum cost of materials, $200. For graduate students in facility planning and management. T R 1:25-4:25. W. Sims.

For description, see DEA 454.

DEA 656 Research Methods in Human-Environment Relations
Fall. 4 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25-2:15. G. Evans.

Intended for graduate students who want a more thorough grounding in the use of research by study to the relationship between physical environment and human behavior than is provided by DEA 455. Each student is required to attend DEA 455 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects.

See DEA 455 for more detail.

DEA 659 Seminar on Facility Planning and Management
Fall. 1 credit. For graduate students interested in careers in facility planning and management. Letter grades only. M 3:35-4:25. F. Becker, W. Sims.

Series of seminars led by Cornell faculty members and other professionals directly involved in facility planning and management. Topics include strategic and tactical facility planning, space standards, project management, computer and facility management, facility maintenance and operations, energy conservation, and building systems. Visit http://instruct1.cit.cornell.edu/courses/dea459_s59.

DEA 660 The Environment and Social Behavior

Intended for graduate students who want a more thorough understanding of the influence of environmental form on social behavior than is provided by DEA 250. Each student is required to attend DEA 250 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects.

See DEA 250 for more detail.

DEA 668 Design Theory Seminar
Spring. 3 credits. Enrollment limited to 25 students. T R 10:10-11:40. J. Jennings.

Directed toward advanced undergraduate and graduate students with interest in the theory of design. The purpose is to provide an understanding of broad ideas underlying design movements of the twentieth century. Explores these ideas through readings, lectures by faculty and visitors, student presentations of research papers, and seminar discussions. Visit http://instruct1.cit.cornell.edu/courses/dea668.

DEA 670 Applied Ergonomics Methods
Spring. 4 credits. Credit limited to 20. Prerequisite: DEA 651. T R 2:55-4:10. A. Hedge.

Intended for graduate students who want a more thorough understanding of applied ergonomics methodology than is provided by DEA 470. Each student is required to attend DEA 470 lectures, meet with the instructor and other graduate students for an additional class each week, and complete additional readings and projects.

See DEA 470 for more detail.

DEA 899 Master's Thesis and Research
Fall or spring. Credits to be arranged. Prerequisite: permission of chair of the chair of the graduate committee and the instructor. S-U grades optional. Department graduate faculty.
HD 230 Cognitive Development
This course surveys and research in perceptual and cognitive development from infancy through adolescence. Extensive coverage of infant perception, cognition, and learning during the first two years of life forms the foundation of the course. Significant linkages between brain development and behavioral development are covered when possible. Language, memory, concepts, and problem solving are covered in the second half of the semester. The course is intended to serve as a foundation for more advanced study in cognitive development, but also as an overview for students whose primary interests lie in other areas.

HD 233 Children and the Law
Fall. 3 credits. Prerequisites: HD 115 and an introductory statistics course. W 2:30-5:00. Staff.
This course examines psychological data and theories that shed light on the practical issues that arise when children enter the legal arena. It attempts to integrate theories, research, and methodology from several areas of psychology including, developmental, cognitive, social, and clinical. This course also attempts to examine the degree to which basic research can (and should) be used to solve applied issues. The topic of children and the law provides an opportunity to meet all these requirements. Rapid changes involving child witnesses in our legal system have forced social scientists to bring their work into the courtroom. At the same time, bringing this fray into the legal system has changed the course of research and thinking for more advanced topics of child development and cognition. It has encouraged researchers to think about new issues and to develop innovative experimental paradigms. Selected topics to be covered include: memory development, suggestibility, theory of mind, childhood amnesia, expectancy formation, symbolic representation, and finality, what can (or should) an expert witness tell the court. Several actual cases involving child witnesses will be presented to illustrate the application of scientific data to the courtroom. Because of the heavy use of case materials; video and textual coverage of actual trials, it is expected that students will devote more than the usual number of hours to this course.

HD 242 Participation with Groups of Young Children
Fall or spring. 4 credits. Limited to 20 students (limit depends on availability of placement and supervision). Prerequisites: HD 115 and permission of instructor. S-U grades optional. W 12:55-3:30. J. Ross-Bernstein.
This course is designed to integrate developmental theories with supervised experience in child care centers. Emphasis will be on helping the student to understand and to relate effectively to young children. This class involves participation, observation, reflection, reading, writing, and sharing of viewpoints. Placements are in local nursery schools, day care centers, Head Start programs, and kindergartens.

HD 250 Families and the Life Course (also SOC 250)
This course provides an introduction to social scientific research on family roles and functions in American society. Topics include the history of the family, family change over the life course, and the influence of cultural and economic forces on families.

HD 251 Social Gerontology: Aging and the Life Course
Spring. 3 credits. Limited to 60 students. Strongly recommended: HD 250 or equivalent to be determined by instructor. S-U grades optional. T R 8:40-9:55. D. Dempster-McClain.
This course analyzes the social aspects of aging in contemporary American society from a life course perspective. Topics to be covered include: (1) an introduction to the field of gerontology, its history, theories, and research methods; (2) a brief overview of the physiological and psychological changes that accompany aging; (3) an analysis of the contexts (such as family, friends, social support, employment, volunteer work) in which individual aging occurs, including differences of gender, ethnicity, and social class; (4) and the influences of society on the aging individual. Guest speakers will provide an introduction to various careers in the field of gerontology.

HD 253 Gender and the Life Course (also WOMNS 253)
Fall. 3 credits. S-U grades optional. M 7:30-10:00 P.M. T. Mitrano.
We will examine the complex interplay between gender and aging as well as the social construction of the life course. Students will explore the relationship between social change and individual lives, observing the significance of two key institutions—work and family—in shaping basic characteristics and consequences throughout the life course. Implications of key life trajectories and transitions for individual lives and for social policy will also be discussed.

HD 258 History of Women in the Professions, 1800 to the Present (also WOMNS 238 and HIST 238, AM ST 241)
An examination of the historical evolution of the female professions in America (midwifery, nursing, teaching, librarianship, home economics, and social work) as well as women's struggles to gain access to medicine, law, and the
HD 260 Introduction to Personality (also PSYCH 275)
Spring. 3 credits. Recommended: introductory course in psychology or human development. T R 1:25–2:40. D. Behm. This course is designed as an introduction to theory and research in the area of personality psychology, with special emphasis on personality development. It covers major influences—including genetic, environmental, and gene-environment interactions—and involves in-depth study of the major theories. The assumptions and models of human behavior that form the basis of each theoretical orientation will be examined and compared, and relevant empirical research will be reviewed and evaluated. In addition, basic psychometric concepts and the methods for measuring and assessing personality will be covered, as will the major related debates and controversies.

HD 266 Emotional Functions of the Brain
Fall. 3 credits. Prerequisite: HD 115 or Psychology 128. Offered alternate years. Not offered 2001–2002. T R 1:25–2:40. Staff. Issues in the development of social behavior are viewed from the perspective of theory and research. Likely topics include bases of social behavior in infancy and early childhood, the role of parents, siblings, and peers, the development of prosocial and aggressive behavior, the development and functioning of attitude and value systems, and the function and limits of experimental research in the study of social development.

HD 281 Foundations of Clinical Practice (also PSYCH 281)
Fall. 3 credits. Enrollment limited to 60 students (50 HD: 30 PSYCH). W 1:30–4:30. C. Maxwell. This course provides an introduction to the theoretical and practical aspects of some basic elements of counseling. Students will develop an understanding of the most current research on the elements of counseling and basic theoretical foundations underlying different approaches. Students will be expected to acquire and demonstrate elementary helping skills. Through role-play, observation of videos, and in-class demonstrations, students will learn such skills as active listening and active listening; they will also develop a capacity to recognize internal conflicts and cognitive distortions as well as the similarities between intra-psychic and interpersonal processes. Other topics include issues of transference and countertransference, the multi-axial dimensions of the DSMIV, defensive strategies as they appear in the DSMIV, and ethical considerations and practices. While this course provides an introduction to the applied aspects of psychological counseling, it does not prepare students to provide treatment of any sort.

HD 282 Community Outreach (also PSYCH 282)
Fall and spring. 2 credits. Letter grades only. Prerequisites: HD 115 or Psychology 101. Students may not concurrently register with HD 327 or HD 328 or Psych 327 or Psych 328. T 10:10–11:25. H. Segal. This course provides students with information and perspectives needed to do volunteer fieldwork with human and social service programs in the community. To gain a practical understanding of mental health professionals do in the workplace, students will examine problems that emerge in fieldwork settings, which raise ethical, methodological, theoretical, and practical issues in the observation and treatment of clients or patients. Prerequisite: HD 327 or Psychology 327 taken the previous term, or permission of instructor. Letter grades only. M W 8:40–9:55. H. Segal.

HD 284 Introduction to Sexual Minorities (also WOMNS 285)
Fall. 3 credits. Prerequisite: one social science course. S-U grades optional. M 7:30–10:00 p.m. Not offered 2001–2002. R. Savin-Williams. This course introduces students to theories, empirical scholarship, public policies, and current controversies regarding sexual orientation, gender identity, sexual expression, and sexual behavior. The major focus is on gay, lesbian, and bisexual development, lifestyles, and communities with additional emphasis on ethnicity, social class, and class issues. Videos supplement the readings and lectures.

HD 300 Special Studies for Undergraduates
Fall or spring. Credit to be arranged. Permission required. Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office.

The form, signed by both the instructor directing the study and the coordinator of undergraduate education, is filed at course registration or during the change-of-registration period.

HD 313 Problematic Behavior in Adolescence (also PSYCH 313)
Fall. 3 credits. Prerequisite: HD 115 or Psychology 101. HD 216 recommended. M W 2:55–4:10. J. Haugaard. This course will explore several problematic behaviors of adolescence, including depression, drug abuse, eating disorders, and delinquency. Various psychological, sociological, and biological explanations for the behaviors will be presented. Appropriate research will be reviewed; treatment and prevention strategies will be explored. An optional discussion section will be available to students who would like an opportunity to discuss readings and lectures in greater depth.

HD 327 Field Practicum I (also PSYCH 327)
Fall. 3 credits. Enrollment limited to 30 students. Students must commit to taking HD 328 in the spring semester. Prerequisites: HD 370 or Psychology 325 and permission of instructor. Letter grades only. M W 8:40–9:55. H. Segal. This course provides three components, which form an intensive undergraduate field practicum. Students will be in the field six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff. Cornell faculty provide additional weekly educational supervision for each student. Seminar meetings cover issues of adult and development mental psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

HD 328 Field Practicum II (also PSYCH 328)
Spring. 3 credits. Enrollment is limited to 30 students. Prerequisites: HD 327 or Psychology 327 taken the previous term, Psychology 325 or HD 370 and permission of instructor. Letter grades only. M W 8:40–9:55. H. Segal. This course continues the field practicum experience from HD 327. Students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents or adults; supervision is provided by host agency staff. Cornell faculty provide additional weekly educational supervision for each student. Seminar meetings cover issues of adult and family psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

HD 334 The Growth of the Mind
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 635, a supplement graduate seminar. Prerequisites: a course in human experimental psychology, statistics, or HD 115 or equivalent; or permission of the instructor. S-U grades optional. T R 2:55–4:10. J. Rotermund. In this course the fundamental issues of cognition are introduced. Students are asked to consider a number of questions. What is
the nature of human intelligence? How are knowledge and understanding acquired and represented in the human mind? What is the nature of mental representation? What are the cognitive characteristics of the mind at birth? What is the relation of the acquisition of knowledge and understanding to their final representation? What are the relations between language and thought? In the study of these issues, how can epistemology and experimental psychology be related through the experimental method? Basic debates within the study of cognition are introduced and discussed throughout. The course will analyze Piaget's comprehensive theory of cognitive development and experimental results. Current research in cognitive development will be contrasted.

HD 344 Infant Behavior and Development
Fall. 3 credits. Prerequisites: HD 115, a biology course, and a statistics course. Not open to freshmen. M W F 1:25-2:15. S. Robertson.

Behavior and development from conception through the first two years of life will be examined in traditional areas (e.g., perception, cognition, socioemotional theory, language, motor function). The fundamental interconnectedness of these aspects of development will be strongly emphasized, as will their relation to the biology of fetal and infant development. Topics with implications for general theories of development will be emphasized (e.g., the functional significance of early behavior, the nature of continuity and change, and the role of the environment in development). Conditions which put infants at risk for poor development (e.g., prematurity, birth, exposure to environmental toxins, maternal depression) and topics with current social, ethical, or political implications (e.g., infant day care, fetal rights) will also be considered. An emphasis on research methodology in the study of early behavior and development will be maintained throughout the course.

HD 346 The Role and Meaning of Play
Fall. 2 credits. Limited to 30 juniors and seniors. Prerequisite: HD 115. M 7:30-9:25 P.M. J. Ross-Bernstein.

The aim of this course is to examine the play of children ages four through seven. Through seminar discussions, workshops, films, and individualized research the student will explore the meaning and validity of play in the lives of young children, the different ways that children play and the value of each, and the effect of the environment in enhancing and supporting play.

HD 347 Human Growth and Development: Biological and Behavioral Interactions (also B & SOC 347 and NS 347)
Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent, and HD 115 or Psychology 101. Limited to 150 students. M W F 1:25. Offered alternate years. Not offered 2001-2002. S. Robertson and J. Hazan.

This course is concerned with the interrelationships of physical and psychological growth and development in humans during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are discussed. In addition, the consequences of early growth and its variations for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

HD 348 Advanced Participation with Children

An advanced, supervised field-based course, designed to help students deepen and consolidate their understanding of children. Students are expected to define their own goals and assess progress with supervising teachers and the instructor; to keep a journal; and to plan, carry out, and evaluate weekly activities for children within their placement. Conference groups and readings focus on the contexts of diverse placements in order to support children's personal and interpersonal learning. Each student is expected to do a presentation and paper on a self-selected topic within the scope of the class. Participation is in several topical and special needs children from three to eight years of age and provide education, care, or special-purpose interventions for them.

HD 353 Risk and Opportunity Factors in Childhood and Adolescence

This course explores the meaning of risk and opportunity in the lives of children and youth. It begins with understanding risk accumulation and resilience as they relate to social policy, professional practice, and community development. The concept of "social toxicity" is a central theme of the course. Assignments include writing research-based editorials and participating in a simulated public policy debate.

HD 359 American Families in Historical Perspective (also WOMNS 357, HIST 359, AM ST 359)

This course provides an introduction to and overview of problems and issues in the historical literature on American families and the family life cycle. Reading and lectures demonstrate the American family experience in the past, focusing on class, ethnicity, sex, and region as important variables. Analysis of the private world of the family deals with changing cultural conceptions of sexuality, gender roles, and family. The role of cultural and historical relationships, stages of life, and life events. Students are required to do a major research paper on the history of their family, covering at least two generations, and demonstrating their ability to integrate life-course development theory, data drawn from the social sciences, and historical circumstances.

HD 362 Human Bonding
Fall. 3 credits. Limited to 600 students. Recommended: introductory course in psychology or human development, S-U grades optional. T R 1:25-2:40. C. Hazan.

The science of interpersonal relationships. Examines the basic nature of human affectional bonds, including their functions and dynamics. Covers such topics as interpersonal attraction and mate selection, intimacy and commitment, jealousy and loneliness, the neurobiology of affiliation and attachment, and the role of relationships in physical and psychological health.

HD 366 Psychobiology of Temperament and Personality
Spring. 3 credits. Letter grades only. Prerequisite: HD 260. M 7:30-10:00 P.M. R. Depue.

This course is for students who have an interest in the neurobiology of behavior, in general, and in temperament and personality, in particular. The course material is presented within an evolutionary biology perspective, where the development of neurobehavioral systems as a means of adapting to critical stimuli is explored as the basis of emotional traits in humans. The emphasis is on temperament, social affiliation, and personality is explored from psychometric, social, genetic, and biological points of view. There is a focus on the general role played by the biogenic amines (dopamine, norepinephrine, and serotonin) in determining individual differences in temperament and personality. Implications for several forms of personality disorders and psychopathology are also discussed. Finally, the manner in which environmental influences across the life span may be coded in the brain and influence the development of personality is explored.

HD 368 Children's Development in Different Cultures
Spring. 3 credits. Letter grades only. Prerequisites: HD 115 or Psych 101 and one college-level statistics course. M W 2:55-4:10. K. Greene.

This course will examine the influence of ecological, cultural, and ethnic factors on the social and cognitive development of children in different cultures. Particular attention will be given to how children's thinking and cognitive development cross the biological, sociocultural, and historical boundaries that guide us in making comparisons about parent-child development across cultures. Topics will include family origin and universality, parental roles, child-family interaction, patterns of kinship, and economy and health issues.

HD 370 Adult Psychopathology (also PSYCH 325)
Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: any one course in psychology or human development. M W 2:55-4:10. S. Bem.

A research-based introduction to the biological, psychological, and social (including cultural and historical) aspects of adult psychopathology. The major mental illnesses will be covered, including but not limited to, schizophrenia, mood disorders, anxiety disorders, and personality disorders. The study of childhood disorders will not be covered.

HD 400-401-402-403 Special Studies for Undergraduates
Fall or spring. Credits to be arranged (1-4). Permission required. S-U grades optional.

For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of HD not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to...
undertake, on a form available from the department office in NG14. This form must be signed by the instructor directing the study and the student's faculty advisor and submitted to NG14 MVR, the Office of Undergraduate Education. After the form is approved, the student takes the form to the College Registrar's Office, 145 MVR, along with an add/drop slip. To ensure review by the department office in NG14, this form must be submitted to NG14 MVR, the Office of Undergraduate Education is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study.

400: Directed Readings. Permission required. For study that predominantly involves library research and independent study.

401: Empirical Research. Permission required. For study that predominantly involves data collection and analysis, or laboratory or studio projects.

402: Supervised Fieldwork. Permission required. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

403: Teaching Apprenticeship. Enrollment limited to juniors and seniors with a minimum 3.0 GPA. Prerequisites: either HD 115, 250, and four intermediate level HD courses, or four courses in psychology or sociology. Students must have taken the course or equivalent and received a grade of B+ or higher. Permission required. For study that includes assisting faculty with instruction.

[H 477 Female Adolescence in Historical Perspective (also WOMNS 438, HIST 458, AM ST 471)]

Spring. 3 credits. Limited to 25 students. Prerequisites: HD 216 and at least one 300-level history or women's studies or American studies course. Permission of instructor required. Required of majors only. T 1:55-4:25. Not offered 2001-2002. J. Braungart.

A reading, writing, and discussion course that will attempt to answer a basic historical question that has consequences for both contemporary developmental theory and social policy: how has female adolescence in the United States changed in the past 200 years? The focus will be on the ways in which gender, class, ethnicity, and popular culture shape adolescent experience. Although the required reading material is primarily historical in nature, students are encouraged to think about the interaction of biology, psychology, and culture. Students are required to do a primary source research paper.

H 478 Psychology of Aging

Fall. 3 credits. Enrollment limited to 25 students. Prerequisites: HD 115, 250, and 218 or permission of instructor. Letter grades only. Offered alternate years. T R 2:55-4:10. S. Cornelius.

This seminar addresses major issues and controversies in the field of aging. It is designed for upper-level students who wish to pursue an in-depth analysis of concepts such as "successful" aging and wisdom, as well as controversies surrounding issues of generational equity and the right to die. Although these issues are addressed primarily from a psychological viewpoint, interdisciplinary perspectives are considered and incorporated in both readings and discussions. The seminar is designed for advanced undergraduates who have completed a psychology course in adulthood and aging and wish to pursue such issues in more depth. Class time will be primarily devoted to discussion of assigned readings.

[H 479 Midlife Development

This course examines the burgeoning research literature on adult development during midlife. The focus of the course will be on research and theory examining psychological changes during middle adulthood such as relativistic and dialectical thinking, personality, identity, and sense of control. It also considers the social and physical changes that occur at this stage of life. Students will be apprised regarding issues such as empty nest anxieties, divorce, career transitions, menopause, and cardiovascular disease. The course will be conducted in a seminar format for upper-level undergraduates. Oral presentations, class participation, and an integrative paper will be required.

[H 486 Language Development (also COGST 436, PSYCH 436 and LING 436)]

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD/LING 700, a supplemental graduate seminar. Prerequisites: at least one course in developmental psychology, cognitive psychology, cognitive development, neuropsychology, biology, or linguistics. S-U grades optional. A supplemental lab course is available (HD 437). T R 2:55-4:10. Not offered 2001-2002. B. Lust.

This course surveys basic issues, methods, and research in the study of language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of "Universal Grammar" and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child.

[H 487 Lab Course: Language Development (also COGST 450, PSYCH 437 and LING 450)]

This laboratory course is an optional supplement to the survey course, Language Development (HD/COGST/PSYCH/LING 436). The lab course will provide students with a hands on introduction to scientific research, including design and methods in the area of first language acquisition.

H 488 Thinking and Reasoning

Fall. 3 credits. Prerequisite: HD 115 or Psychology 101. T R 1:25-2:40. B. Kossowski.

The course will examine problem solving and transfer, pre-causal thinking, logical thinking, practical syllogisms, causal reasoning, scientific reasoning, theories of evidence, concepts, cognitive distinction, and nonrational reasoning. Two general issues will run through the course: the extent to which children and adults approximate the sorts of reasoning that are described by various types of models, and the extent to which various models accurately describe the kind of thinking that is required by the types of problems and issues that arise and must be dealt with in the real world.

H 490 Cognitive Development: Infancy through Adolescence

Spring. 3 credits. Prerequisites: HD 115 or Psychology 101. Letter grades only. T R 1:25-2:40. B. Kossowski.

The course will be an overview of current and classic issues and research in cognitive development. Central topics of both "hard cognition" (e.g., information processing and neuropsychological) and "soft cognition" (e.g., problem solving, concepts, and categories) will be covered. Selected topics will be linked to methodological issues and to important social issues such as cross-cultural cognitive development and putative racial and social class differences.

H 490 Internship in Educational Settings for Children

Fall or spring. 8-12 credits. Prerequisites: HD 115, 242, or 243 and 348. Recommended: HD 346. Permission of instructor required. S-U grades optional. J. Ross-Bernstein.

Opportunity to integrate theory with practice at an advanced level and to further develop understanding of children ages 2 to 10 and their families. Interns will function as participants in varied settings and participate in curriculum planning, evaluation, staff meetings, home visits, parent conferences, and parent meetings. Supervision by head teacher and instructor. Students are expected to define their own goals and to assess their progress, to design and set goals, and read readings, and to keep a critical incident journal.

[H 493 Nontraditional Families and Troubled Families

This is an advanced course designed to explore the functioning of families. The first part of the course examines family system theory and how it relates to our understanding of all families. Four types of families are then examined: two nontraditional families (e.g., adoptive families) and two troubled families (e.g., families with a chronically ill child).

H 497 Families and Social Policy

Spring. 3 credits. Prerequisite: one course in the area of the family or in sociology. S-U grades optional. M 7:30-10:00 p.m. T. Mitrano.

An examination of the intended and unintended family consequences of governmental policies, using case studies in areas such as social welfare, day care, and employment. The policy implications of changes in the structure and composition of families are also considered.
This seminar is devoted to discussion and presentation of honors theses being completed by the senior students.

**HD 499 Senior Honors Thesis**
Fall or spring. Credit to be arranged. Prerequisite: permission of thesis advisor and coordinator of honors program. S-U grades optional. Department faculty.

**HD 106, 206, 306, 406 Topics in Human Development**
2-4 credits. S-U grades optional. These topics vary each time the course is offered and are taught by advanced graduate students in the field of human development. Descriptions are available at the time of course registration. These courses do not fulfill any requirements for the major, they may be taken as electives.

**Topics Courses**
Fall or spring. 2-4 credits. Prerequisites and enrollment limits vary with topic being considered in any given term. Permission of instructor may be required. This series of courses provides an opportunity for undergraduates to explore an issue, a theme, or research in the areas of departmental concentration. Topics vary each time the course is offered. Descriptions are available at the time of course registration. Although the courses are usually taught as seminars, a subject may occasionally lend itself to lecture, practicum, or other formats.

**HD 215, 315, 415 Topics in Adolescent and Adult Development**

**HD 235, 335, 435 Topics in Cognitive Development**

**HD 245, 345, 445 Topics in Early-Childhood Development and Education**

**HD 255, 355, 455 Topics in Family Studies and the Life Course**

**HD 265, 365, 465 Topics in Social and Personality Development**

**HD 275, 375, 475 Topics in Developmental Psychopathology**

**HD 285, 385, 485 Topics in the Ecology of Human Development**

**The Graduate Program**
HD graduate courses are only open to undergraduates with instructor's permission.

**General Courses**

**HD 610 Proseminar in Human Development: Theoretical Models and Research Designs**
Spring. 3 credits. Open to graduate students and juniors and seniors in HD and related fields with instructor's permission. Prerequisite: a minimum of one course in statistics. Letter grades only. W 2:00-4:25. Not offered 2001-2002. U. Bronfenbrenner.

The purpose of the seminar is to acquaint students with selected scientific paradigms being employed at the forefront of developmental science for investigating the conditions and processes that shape human development over the life course. Particular attention will be given to research methods that draw from disciplines (such as evolutionary biology, human genetics, developmental psychology,
The principal seminar activities consist of critical examination of seminal theoretical and empirical writings on adolescent development. Empirical research on specific questions chosen by students is considered in the light of these approaches.

**HD 617 Adolescence**
Critical examination of seminal theoretical and empirical writings on adolescent development. Empirical research on specific questions chosen by students is considered in the light of these approaches.

**HD 631 Cognitive Development**
Fall. 3 credits. Letter grades only. Not offered 2001–2002. Staff.
Faculty members involved in the course will present their area of specialization in cognitive development. These areas will include perception, attention, memory, language, thinking and reasoning, learning, creativity, and intelligence.

**HD 640 Infancy**
Fall. 3 credits. TBA. Not offered 2001–2002. S. Robertson.
Development in infancy will be examined through a critical review of key research and theory in selected aspects of neurobehavior, perception, cognition, language, emotion, and social relationships. Theoretical issues to be considered include the role of experiences in early development, sensitive periods, continuity and discontinuity in development, and the functional significance of early behavior. Some of the conditions that put infants at risk for poor development will also be considered, such as premature birth, perinatal medical complications, and exposure to environmental toxins. The course will combine perspectives from developmental psychology and psychobiology.

**HD 650 Contemporary Family Theory and Research**
Sociological and social psychological theories and research on the family are examined with reference to the relationship between the family and society. Topics change from year to year, but focus on the processes of socialization and social control, the reproduction of gender and social class across generations, changes in family "values" across time, the rise of divorce and single motherhood, family diversity, and the genesis of deviance and psychological disorder.

**HD 660 Social Development**
This course is designed to provide both broad and in-depth training in the areas of social and emotional development during infancy and childhood. It will cover most of the major topic areas and theoretical orientations. Consideration will be given to basic influences on socioemotional development—biological, social, and cultural. Coverage will include normative development as well as the origins and nature of individual differences. We will explore such fundamental issues and questions as: What are emotions? What role do they play in the development and organization of personality? What are the effects of early social relationships on emotional regulation? When and how does the self-system emerge? Emphasis will be on the processes—both internal and external—that help determine the course and outcome of development.

**HD 670 Experimental Psychopathology**
Spring. 3 credits. Prerequisite: an undergraduate course in abnormal psychology or psychopathology; a course in multivariate statistics; and substantive course work in neurobiology or related biological science. TBA. Not offered 2001–2002. Staff.
Overview of current theories and empirical research on functional and organically based psychological disorders. Topic areas to be covered include autism, schizophrenia, anxiety disorders, affective disorders, and personality disorders. Focus is on the developmental and etiology of psychopathology.

**Topical Seminars**
Seminars offered irregularly, with changing topics and instructors. Content, hours, credit, and instructors to be announced. Seminars offer concentrated study of specific theoretical and research issues.

**HD 618 Seminar in Adolescence and Adult Development**
Topics include peer relations, parent-teen relationships, self-esteem, youth and history, work, and moral development.

**HD 633 Seminar on Language Development**
Topics include acquisition of meaning in infancy, precursors of language in early infancy, and atypical language development.

**HD 635 Seminar in Cognitive Development**
Topics include early attention, perception, memory, and communication. Assessment and intervention in relation to these processes will be considered when possible.

**HD 645 Seminar on Infancy**
Focuses on selected topics in the developmental psychobiology of infancy (including fetal development). Special topics vary and depend in part on student interests.

**HD 646 Seminar in Early-Childhood Development and Education**
Topics include analysis of models and settings, design of assessment techniques, program evaluation, and early childhood in a cross-cultural context.

**HD 655 Seminar in Family Studies and the Life Course**
Topics include the sociology of marital status, the single-parent family, work-family linkages, women and work, and families and social change.

**HD 665 Seminar in Personality and Social Development**
Focuses on issues related to personality and social development. The issues selected vary each year according to current importance in the field and student interests.

**HD 675 Seminar in Developmental Psychopathology**
Topics include learning disabilities, therapeutic interventions in atypical development, child abuse and maltreatment, family factors in the etiology of functional disorders, and cognitive characteristics of atypical groups.

**HD 685 Seminar in Research Methods**
This course focuses on quantitative and qualitative research methods frequently used in developmental psychology or life course studies, such as surveys, questionnaires, observations, and interviews.

**HD 700-806 Special Studies for Graduate Students**
Fall or spring. Credits and hours to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades at discretion of instructor.
Independent advanced work by graduate students recommended by their Special Committee chair with permission of the instructor.

**HD 700 Directed Readings**
For study that predominantly involves library research and independent study.

**HD 701 Empirical Research**
For study that predominantly involves collection and analysis of research data.

**HD 702 Practicum**
For study that predominantly involves field experience in community settings.

**HD 703 Teaching Assistantship**
For students assisting faculty with instruction. Does not apply to work for which students receive financial compensation.

**HD 704 Research Assistantship**
For students assisting faculty with research. Does not apply to work for which students receive financial compensation.

**HD 705 Extension Assistantship**
For students assisting faculty with extension activities. Does not apply to work for which students receive financial compensation.

**HD 706 Supervised Teaching**
4 credits. For advanced students who assume major responsibility for teaching in a course. Supervision by a faculty member is required.

**HD 706 Teaching Practicum**
4 credits. For advanced graduate students to independently develop and teach an undergraduate topics course under the supervision of a faculty member.

**HD 899 Master's Thesis and Research**
Fall or spring. Credit to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.

**HD 999 Doctoral Thesis and Research**
Fall or spring. Credit to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.
POLICY ANALYSIS AND MANAGEMENT

NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

PAM 200 Intermediate Microeconomics
Fall or spring. 4 credits. Prerequisite: Econ 101 or equivalent. Fall: preference to sophomores and juniors. Spring: preference to seniors and staff. Staff.
Topics include theory of demand and consumer behavior including classical and indifference curve analyses; theories of production and cost, models for the following markets—competitive, monopoly, monopolistic competition, oligopoly, and industries; general equilibrium; welfare economics; public goods; and risk. A section is mandatory.

PAM 204 Applied Public Finance
Fall or spring. 3 credits. Prerequisites: PAM 200. S-U grades optional. D. Kenkel, K. Simon.
The public sector now spends nearly 2 out of every 5 dollars generated as income in the U.S. economy. A thorough knowledge and understanding of this important sector is an essential part of training in policy analysis and management. This course will provide an overview of the public sector of the U.S. economy, the major categories of public expenditures, and the main methods used to finance these expenditures. The principles of tax analysis and cost-benefit analysis will be presented with a focus on the role of public policy in improving economic efficiency, promoting the goals of equity and social justice, and improving equity by altering the distribution of wealth and income.

PAM 205 Research Methods
Fall or spring. 3 credits. Sections TBD. Staff.
Students will learn the logic and methods of social science research, as well as how to create researchable questions out of their interests of issue. Readings, written assignments, and in-class exercises will focus on stating hypotheses, designing studies and samples to test hypotheses, measuring variables, and simple statistical analysis. PAM majors should take this course no later than their junior year.

PAM 210 Introduction to Statistics
Fall and spring. 4 credits. K. Joyner.
This course introduces students to descriptive and inferential statistics. Topics include hypothesis testing, analysis of variance, and multiple regression. To illustrate these topics, this course examines applications of these methods in studies of child and family policy.

PAM 220 Introduction to Management: Principles and Differences Among Sectors
Fall or spring. 3 credits. D. Tobias, R. Heck.
This course is a basic introduction to management and related concepts of planning, organizing, controlling, leadership, and special topics within five major management contexts including individuals, personal, groups/families, firms, not-for-profit organizations, and governments/communities.

PAM 223 Consumer Markets I
A study of the structure and functioning of consumer retail markets with emphasis on the marketing activities of firms, changes in demand for goods driven by the dynamics of consumer demographics, and government control and intervention in market exchanges. The course teaches market analysis skills and involves group project work consulting with local businesses. Course format is highly audio-visual and incorporates guest lectures from prominent consumer product firms.

PAM 230 Introduction to Policy Analysis
Fall or spring. 3 credits. R. Avery, J. Germer.
Policy analysis is an interdisciplinary field that uses theories, concepts, and methods from disciplines such as economics, sociology, and political science to address substantive issues in the public policy arena. Students will be introduced to the functions of and interactions between the major institutions (public and private) at the state, and local level involved in the policy making process. The course will focus on public policy analysis in the consumer, health, and family/social welfare areas and will also include an introduction to the technical skills required to undertake policy analysis.

PAM 245 Critical Perspectives
Fall. 3 credits. Staff.
This course presents an overview of different perspectives on U.S. social policies and programs with an emphasis on health, welfare, family, and consumer issues. Historical, political, social science and personal perspectives are contrasted. Students are gain knowledge about the social policy and program topics presented in the course, critically analyze them using conceptual frameworks presented in class, and evaluate policy debates by applying these insights.

PAM 270 Housing and Society
Spring. 3 credits. S-U grades optional. P. Chi.
A survey of contemporary American housing issues as they relate to the individual, the family, and the community. The course focuses on the current problems of the individual housing consumer, the resulting implications for housing the American population, and governmental actions to alleviate housing problems.

PAM 300 Special Studies for Undergraduates
Fall or spring. Credit to be arranged. Special arrangement for course work to establish equivalency for training in a previous major or institution. Students prepare a multipage description of the study they want to undertake on a form available from the College Registrar’s Office. This form, signed by both the instructor directing the study and the head of the department, should be filed at course registration during the change-of-registration period.

PAM 303 Ecology and Epidemiology of Health
Spring. 3 credits. S-U grades optional. Limited to 50 students. E. Rodriguez. Ecological and epidemiological approaches to the problems which restrict human health within the physical, social, and mental environment. The course introduces epidemiological methods and surveys the epidemiology of specific diseases such as AIDS, hepatitis, Legionnaires’ disease, plague, cancer, herpes, and chlamydia. Application of epidemiology to health care will be discussed.

PAM 305 Introduction to Multivariate Analysis
Fall or spring. 4 credits. Prerequisites: ARME 210 or ILRST 210 or equivalent. J. S. Butler, J. Schultz.
The course introduces basic econometric principles and the use of statistical procedures in empirical studies of economic models. Assumptions, properties, and problems encountered in the use of multiple regression procedures are discussed. Students are required to specify, estimate, and evaluate the results of an empirical model. Factor analysis and analysis of variance will be covered as well. Section meets one a week.

PAM 310 Evaluation of Public Policies
Fall. 3 credits. Prerequisites: PAM 200, 330, or permission of instructor. Not offered 2001–2002. Staff.
This is an advanced course in economic policy analysis that builds on the material covered in PAM 330, Intermediate Policy Analysis. The course will use a series of policy examples to demonstrate the economic approach. Special topics in cost-benefit analysis and policy evaluation will be developed when necessary for the example under study. Examples of topics that may be addressed include excise taxation, economic evaluations of health care innovations, environmental policies, traffic regulations, consumer policies, and welfare reform.

PAM 320 Introduction to Policy Management
Spring. 3 credits. Prerequisite: PAM 205, 220, and 230. W. Trochim.
An intermediate undergraduate course in policy management that will be focused around a single broad policy area that has numerous specific policies and programmatic implementations associated with it and that touches upon the three major substantive areas in PAM: consumer, health, and family and social welfare. Through readings, case studies, lectures, assignments, and discussions, students will develop a deep understanding of what policy management means, and how it draws from a wide variety of disciplines (politics and public management, history, sociology, economics, law, management)
The study of personal financial management

This course focuses on the cognitive, behavioral, and environmental forces that drive consumer demand. The first half of the course draws on theories and concepts from psychology and focuses on the cognitive processes whereby consumers interpret market-provided information and other stimuli in the purchase environment. The second half of the course covers topics such as financial insolvency and counseling, expenditure and purchase analyses, the use of credit and mortgage credit, financial insolvency and counseling, expenditure and purchase analyses, the use of financial instruments, and government regulations.

PAM 326 Personal Financial Management

Spring. 3 credits. Preference given to human ecology students; limit 50; not open to freshmen. S-U grades optional. R. Heck.
The study of personal financial management at various income levels and during different stages of the family life span. Course topics include financial management frameworks and decision-making processes, basic economic and financial principles, returns to human resources, income and wealth analysis, the role of consumer and mortgage credit, financial insolvency and counseling, expenditure and purchase analyses, the use of budgets and record keeping in achieving family economic goals, economic risks and available protection, retirement and estate planning, and alternative forms of savings and investments.

PAM 330 Intermediate Policy Analysis

Spring. 3 credits. Prerequisite: PAM 200 or permission of instructor. S. Tennyson.
Introduction to the tools and techniques of policy analysis. Topics covered include economic concepts such as: consumer and producer surplus; deadweight loss; rationale for public policy; benefit-cost analysis; impact assessments; experimental, quasi-experimental, and nonexperimental designs; and the social ecology of policy analysis.

PAM 340 The Economics of Consumer Policy

Spring. 4 credits. Prerequisites: PAM 200 or permission of instructor. S. Tennyson.
This course is designed to familiarize students with the basic approaches to consumer policy and the economic analysis of consumer policy issues. The course is structured around the major forms of government intervention in consumer markets, and examines a wide variety of economic and social regulations from the economic perspective. Students are required to write a term paper analyzing a consumer policy issue of their choosing.

Economic analysis of the roles played by the courts and by federal and state regulatory legislation in altering consumer markets, consumer behavior, and consumer welfare. Topics include economic analyses of contract law, product liability, accident law and antitrust law, and the activities of such agencies as the Federal Trade Commission, the Food and Drug Administration, and the Consumer Product Safety Commission.

PAM 346 Economics of Social Security (also ECON 447)

Spring. 3 credits. Prerequisite: PAM 200. S-U grades optional. R. Burkhauser.
This course provides students with an economic perspective on social security policies. The readings illustrate the use of economic analysis to predict the behavioral effects and income distributional consequences of policy. The course primarily focuses on the Old-Age, Survivors, and Disability Insurance Program. Other programs such as, the Supplemental Security Income, and Food Stamps will be discussed.

PAM 350 Contemporary Issues in Women's Health

This course deals with the history of women in medicine and the historical and cultural treatment of women's health problems. Health care researchers and the exclusion of women from research trials and protocols will also be addressed. Reproductive issues, alternative approaches to treatment, medical problems, ethical issues, cancers, factors that contribute to post-traumatic stress disorders, health promotion behaviors, political issues, and routine medical recommendations will also be discussed in depth. Students may take the course for a fourth credit, which will require attending a discussion section every other week and observing seven facilities (i.e., birthing center, mammogram, and ultrasound center, wellness center, hospital labor and delivery unit, LaMaze class, women's self defense class, etc.) that provide a variety of women's health care.

PAM 371 Demography and Family Policy

Fall. 3 credits. K. Joyner.
This course focuses on the demographic perspective family policies that concern children and adults. Toward this end, this course considers the relationships between family policies and demographic behavior. It also addresses the effects of family policies and demographic behavior on the well-being of children. Although this course focuses on the United States, it considers U.S. trends against the backdrop of changes in other industrialized countries.

PAM 376 Housing, Neighborhood and Community Policy

Spring. 3 credits. Prerequisite: PAM 270 or permission of instructor. S-U grades optional. Not offered 2001–2002. P. Chi.
The course examines the interrelationships of housing conditions, neighborhood transitions, and community development. Both theoretical and empirical perspectives on residential patterns, neighborhood change, and community power will be examined. Special attention is given to government policies that deal with housing, residential segregation, neighborhood revitalization, and community development.

[Human Sexuality]

Spring. 3 credits. Limited to 500 students. Prerequisite: an introductory course in human development and family studies, psychology, or sociology (or equivalent social science course). Recommended: one course in biology. Not offered 2001–2002. A. Parrot.
The aim of this course is to provide students with an understanding of the interactions and interrelationships of human behavior that influence sexual development and behavior. The course will focus on the evolution of sexual norms, cross-cultural customs, legislation within the legal and sociopolitical systems, and delivery of services related to sexual issues, needs, and/or problems. Future trends in sexuality will be addressed.

[Healthcare Services and the Consumer]

Fall. 3 credits. Prerequisite: an introductory course in human services or health or biology. S-U grades optional. Offered alternate years. Not offered 2001–2002. A. Parrot.
This course provides students with an understanding of the interactions and interrelationships of human behavior that influence sexual development and behavior. The course will focus on the evolution of sexual norms, cross-cultural customs, legislation within the legal and sociopolitical systems, and delivery of services related to sexual issues, needs, and/or problems. Future trends in sexuality will be addressed.

[Social Welfare as a Social Institution]

Fall. 3 credits. J. Allen.
A philosophical and historical introduction to social welfare services. The course reviews the historical, social, and political contexts within which social welfare programs and the professions of social work have evolved. It discusses the political and ideological processes through which public policy is formed and the way policies are translated into social welfare programs. Basic issues in welfare are discussed through program designs, public concerns, and the interrelationships and support of services in the community.

[New York State Government Affairs]

Spring semester only. 12 credits, letter grade and instructor permission only. Preference is given to juniors and seniors. PAM 220 or a changing government strongly recommended. Staff.
Students participate in the New York State Assembly Intern Program that includes a seminar and other course work on legislative processes, political party dynamics, and policy analysis and management. Students also participate in a thirty-hour-a-week New York State Assembly internship requiring research on legislation, support for legislator initiatives and public hearings, and work on constituent and interest group issues.

[Special Studies for Undergraduates]

Fall and spring. Credits to be arranged. S-U grades optional. Staff.
For advanced independent study by an individual student or for study on an experimental basis with a group of students.
PAM 400: Directed Readings. For study that predominantly involves library research and independent reading.

PAM 401: Empirical Research. For study that predominantly involves data collection and analysis.

PAM 402: Supervised Fieldwork. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

PAM 403 Teaching Apprenticeship. Prerequisite: students must have taken the course (or equivalent) in which they will be assisting and have demonstrated a high level of performance. For study that includes assisting faculty with instruction.

PAM 420 Management Information Systems for the Public Sector. Spring. 3 credits. L. O'Neill. This course focuses on managing information systems in the public and nonprofit sector. Its purpose is to present an overview of the management of technology and to develop the computer literacy that is required of today's managers. It will consist of three modules: technology, planning and management, and public/nonprofit applications such as those related to family and social welfare, health care, and consumer policy.

PAM 422 Risk Management and Policy. Spring. 3 credits. Prerequisite: Econ 101 and a course in statistics. Enrollment limited to 80. S. Temnyon. The objective of this course is to provide students with a broad understanding of risk management problems and solutions, a greater appreciation of the importance of risk and risk regulation in our society, and increased comprehension of the complexities of decision making about risk. Topics covered include alternative ways to define and measure risk, the importance of risk-tradeoffs, and models of decision making under risk. With this background, alternative approaches to risk management are discussed, including insurance, noninsurance financing alternatives, and loss control. The impact on risk management of the legal liability system and government programs, laws and policies are also considered.

PAM 424 Families in Business. Fall. 3 credits. Prerequisites: introductory statistics or permission of instructor. S-U grades optional. R. Heck. Offers students the opportunity to explore family business topics such as business formation, growth and expansion, strategic management, professionalization, succession, locational choices, and family dynamics, conflicts, and relationships relative to the business. An overview of families who own businesses and the profiles of their businesses will be presented. The examination of the course topics relative to the various stages of business activity including feasibility, start-up, ongoing maintenance, expansion or redirection, and exit or transfer. Case studies from the Harvard Business School series will be utilized to examine the course topics listed above. The course also provides an introduction to research on family businesses by surveying the conceptual issues and methodological approaches related to the study of family businesses.

PAM 426 Policy and Management Issues on Foreign Investment in China. Spring. 3 credits. P. Chi. This course will help students understand the general investment environment in China and learn how social, cultural, political, and economic factors affect decisions on market entry strategies, marketing mix strategies, and other management strategies for foreign-invested enterprises (FIEs) in China. This course will not only examine the growth of FIEs since the 1980s, but also discuss the policy initiatives and institutional barriers for direct foreign investment in China. Both multiplier and linkage effects of foreign investment on China's economy will also be evaluated. Further, the management issues on formation, performance, profitability, and dissolution of FIEs will be systematically examined.

PAM 427 Complementary Alternative Medicine. Fall. 3 credits. Prerequisites: a health course and intro biology or permission of instructor. Not offered 2001-2002. A. Parrot. This course will particularly help pre-medical students, health administration students, and health economics students understand the relationship between alternative medicine and western allopathic medicine. The course will cover health and wellness, treatments for specific health conditions, differing philosophies of health care, financing health services, and cross-cultural approaches to these topics.

PAM 435 The U.S. Health Care System. Fall. 3 credits. R. Battistella. This course provides an introduction to the health care delivery systems in the United States, and covers the inter-relatedness of health services, the financing of health care, and the key stakeholders in health care delivery including regulators, providers, health plans, employers, and consumers. The course describes the history and organization of health care, behavioral models of utilization, issues of health care reform, and current trends. The course provides an overview of the key elements of the field including ambulatory care services, mental health services, hospitals and clinicans, insurers, the role of public health organizations, and the politics of health care in the United States.

PAM 473 Social Policy. Spring. 3 credits. Prerequisite: PAM 383 or Government 111 or Sociology 141. S-U grades optional. J. Allen. An examination of the policy-making process and the significance of national policies as they affect the distribution of social services. Frameworks for analyzing social policy are used to evaluate existing social programs and service-delivery systems. Implications for changing policies at the national, state, and local levels are discussed.

PAM 480 Professional Internship in Human Services. Fall or spring. 4-7 credits. Limited to juniors and seniors majoring in human service studies. Prerequisite: PAM 100. Precourse enrollment required. D. Tobias. Students intern for a 10 hours a week in a human service organization and attend a weekly seminar or office hours with a focus on integrating classroom and field-based learning. The course is structured as an opportunity for students to learn experientially and, at the same time, provide meaningful services. Interns are expected to take active roles in structuring, monitoring, and assessing their learning under the guidance of a faculty instructor.

PAM 499 Honors Program. Fall or spring. The honors program provides students with the opportunity to undertake basic or applied research which will be preparation of a thesis representing original work of publishable quality. The program is intended for students who desire the opportunity to extend their interests and efforts beyond the current course offerings in the department. Furthermore, the program is designed to offer the student the opportunity to work closely with a professor on a topic of interest. PAM majors doing an honors program may take PAM 499 for up to 15 credits. See Professor Alan Mathies for more details.

PAM 575 Housing and Long-term Care for the Elderly. Fall. 3 credits. S-U grades optional. P. Chi. This course focuses on the housing of the elderly, their current housing conditions, and options for alternative housing. Housing is viewed as a resource for long-term care for the elderly, integrating housing with related health and social services. Attention is given to government housing and long-term care programs for the elderly, analyzing how the residential environment influences the ability of elders to function independently and how it affects their need for long-term care services. Finally, the senior living and long-term care industries are examined.

PAM 600 Special Problems for Graduate Students. Fall and spring. Credits to be arranged. S-U grades optional. Staff. Independent advanced work by graduate students recommended by their chair and approved by the department chair and the instructor.
Demonstrate knowledge of: (1) the history and development, implementation, and analysis; (2) the role of political priorities in policy development, implementation, and analysis; (3) various methodological approaches for conducting policy and program evaluation research; and (4) the policy agenda-setting process and ways in which research findings are used in policy debates.

PAM 602 Measurement and Validity in Policy Analysis and Management
Spring. 3 credits. E. Rodriguez.
This course provides an introduction to the theoretical foundations of validity in applied social research, basic probabilistic and nonprobabilistic sampling methods, survey research methods (including questionnaires, interviews, and scaling), and other practical inquiry methods are required for valid inferences.

PAM 603 Experimental, Quasi-Experimental, and Economic Evaluation Methods
Spring. 3 credits. E. Peters.
This course focuses on the logic of randomized experimentation, the role of structural experiments, quasi-experimental evaluation methods, nonexperimental regression techniques, issues of sample selection, and cost-benefit analysis.

PAM 604 Qualitative and Mixed-Method Approaches to Policy Analysis and Management
This course introduces qualitative traditions of social inquiry and their roles in policy analysis and management. The course will also address visions of and strategies for mixing different inquiry traditions and approaches in applied policy analysis and management.

PAM 605 Economics of Household Behavior
Fall. 3 credits. Prerequisite: PAM 604 or Economics 609–610 or consent of instructor. S-U grades optional. E. Peters.
This course examines household decision making in both single agent and multiple agent (e.g., game theoretic or bargaining) frameworks. The first half of the course focuses on: (1) fertility; (2) household production; (3) and time allocation models of behavior—decisions that are usually modeled using multiple agent models such as contract theory, game theory, and household bargaining. Empirical applications of the theoretical models are presented for both developed and developing countries. Implications for family policies such as child care subsidies, divorce laws, family planning, government subsidies to education, and social security are also discussed. Much of the material covered by this course could also be found in economic demography and economics of the family courses.

PAM 606 Demographic Techniques (also Rural Sociology 608)
Fall. 3 credits. S-U grades optional. Staff.
This course provides an introduction to the methods, measures, and data used in the analysis of human populations. Topics include demographic rates, life-table analysis, cohort versus period analysis, sources and quality of demographic data, population estimation and projection, and stable population models.

PAM 608 Economics of Consumer Demand (also ARME 670)
Fall. 3 credits. Prerequisite: PAM 200. Economics 313, or concurrent enrollmentting in one of the 2, and 2 semesters of calculus. S-U grades optional. C. Ranney.
A graduate level introduction to theory and empirical research on household demand, consumption, and saving. Emphasis is on the use of the theoretical research in the behavioral models scaling and translating consumption, and savings. Becker and Lancaster models of demand will be introduced.

PAM 616 Strategies for Policy and Program Evaluation
Fall. 3 credits. Prerequisites: PAM 612 and 613 or 617 or equivalent. W. Trochim.
This course examines a wide range of approaches to the evaluation of policies and programs in the human services. The approaches are examined with respect to their purposes, key audiences, and methodologies, as well as their philosophical, political, and value frameworks. Analysis of commonalities and differences across evaluation approaches are used to judge the appropriateness of a given strategy for a particular context.

PAM 632 The Intergovernmental System: Analysis of Current Policy Issues
Fall. 3 credits. Open to seniors who have had a course in American government and to graduate students. J. Ziegler.
This course offers advanced policy analysis of current political and economic issues in the context of the intergovernmental system. Particular attention is paid to how certain policy and human service issues are played out at the federal, state, and local levels of government, and to the formulation of federal and state budget policy. General public administration theory is considered. Students work in teams on a policy/administrative research project and report to the class.

PAM 647 Microeconomics for Management and Policy
Fall. 4 credits. S-U grades optional. C. Ranney.
This course introduces microeconomic theory and its application to decision making in the management and policy arenas. Special emphasis will be placed on the economic environment of health care organizations and the problems faced by managers in this environment.

PAM 650 Applications in Health Management Practice, Entrepreneurship and Consulting
Spring. 3 credits. J. Kuder.
Seminars and practica, offered periodically, are designed to provide students with practical experience in the management of health care organizations. Seminar topics and specialists may include health care organizations and the problems faced by managers in this environment.

PAM 652 Health Care Services: Consumer and Ethical Perspectives
Fall. 3 credits. Limited to 30 students; undergraduates with permission of instructor. 4-credit option may be used as Biology and Society Senior Seminar option. Not offered 2001–2002. A. Parrot.
The course will focus on consumer and ethical issues faced by the health care field today. Broad topics to be discussed include ethical standards and guidelines, health care costs and accessibility of services, government role in health care delivery, health care as a right or privilege, private industry role in health care, services for the medically indigent and elderly, practitioner burnout and training, ethics of transplant surgery and funding, reproductive technology, AIDS research and funding, animals in medical research, right to die, and baby and the doctor case. 

PAM 653 Health Economics and Policy
This course provides an overview of research in health economics and its relevance for health policy. Models of health capital, household production, and insurance are developed and used to address public health policies and health insurance programs and reforms. Major issues in the economics of the health care sector are discussed, including the market for physician services, hospital care and long-term care. Much of the course focuses on the United States, but it will also review research on other countries, especially developing countries, that face a very different set of health policy issues.

PAM 654 Legal Aspects of Health Care
Spring. 3 credits. Prerequisites: PAM 657 or permission of instructor. Taught in alternate years. H. Allen.
This course introduces principles of the law that are specifically applicable to health-care delivery. Topics considered include: the liability of hospitals and their staff and pomocal care, legal status of the physician, medical malpractice, and other legal issues related to the delivery of health care services. Legal practices in highly competitive markets. Marketing, and operation of managed delivery systems.

PAM 656 Managed Health Delivery Systems: Primary-Ambulatory Care
Spring. 3 credits. Prerequisite: PAM 657. J. Kuder.
The concept of primary care is used to enhance understanding of the direction and purpose of ongoing changes in health services organization and financing. Pressures on traditional indemnity insurance and solo fee-for-service medicine are examined in the context of the transition from unmanaged to managed delivery systems. The course is divided into two parts. Part 1 examines the development of health maintenance organizations and related forms of managed care against the backdrop of larger public policy concerns. Part 2 centers on administrative-financial topics associated with the design, development, marketing, and operation of managed delivery systems in highly competitive markets.
Considerable attention is given to the relationship between physicians and management with respect to such subjects as medical practice styles, productivity, quality assurance, and outcome measurement. Many of the managerial topics are highlighted with field trips and visiting speakers.

**PAM 657 Health Care Organization**

Fall. 3 credits. Limited to 30 students. Priority given to Sloan students or permission of the instructor. R. Battistella.

The course will provide an introduction at the graduate level to the organization of health care providers in the United States. The interrelations of health services and the major sources and methods of paying for care. The course will describe how health services are structured in the United States and how these different services interrelate along the continuum of care. The course will describe and analyze organization, delivery, and financing issues from a variety of perspectives using specific performance criteria (e.g., equity, quality, innovations by the public and private sectors in the delivery and reimbursement of health care will also be presented.

**PAM 658 Field Studies in Health Administration and Planning**

Fall or spring. 1–4 credits. Staff. Students interested in developing administrative and program-planning research skills are given an opportunity to evaluate an ongoing phase of health care agency activity in the light of sound administrative practice and principles of good medical care. In planning and carrying out the research, students work closely with a skilled practicing administrator and with members of the faculty.

**PAM 659 Epidemiology, Clinical Medicine, and Management Interface Issues**

Spring. 3 credits. E. Rodriguez.

From an empirical and analytical framework this course explores the relationships between epidemiology, clinical medicine, and management. The course will review the epidemiology, policy issues, and treatment of selected diagnoses accounting for a significant percentage of utilization and cost of health care services. Students will be expected to have an opportunity to explore issues of resource allocation and continuous quality improvement. The format for the class is lecture, discussion, and case analysis.

**PAM 660 Quality In Health Care Organizations**

Fall. 3 credits. Not offered 2001–2002. Staff. The quality of health services—the extent to which the appropriate and most effective care is properly administered in the least costly manner—is a topic of paramount importance to patients. It is also a central concern of the providers and managers of health services and those who pay for care. It is a cornerstone of health care reform. Through readings, lecture, discussion, and group work, this course will acquaint the student with the basic elements of management in health care organizations. Among these elements are: defining quality from many perspectives; measuring performance and detecting poor quality care; traditional and progressive approaches to managing quality including Continuous Quality Improvement; and the politics of quality, both within and outside the organization.

**PAM 661 Economics of Health and Medical Care**

Spring. 3 credits. J. Schultz.

The course is designed for graduate students who can understand the tools, vocabulary, and means of thinking about economics as it applies to decision making in health services delivery, administration, and policy. This course will examine the special features of medical care as a commodity, the demand for health and medical care services, the economic explanations for the behavior of providers, the functioning of insurance markets, health policy issues, federal health insurance programs, and regulation. In addition, this course will introduce students to methods of analyzing the economic consequences of alternative health care policies.

**PAM 662 Health Care Financial Management I**

Spring. 3 credits. Staff.

The course is designed to give graduate students an intensive introduction to the issues and techniques in the financial management of health service organizations. Class lectures, readings, guest speakers, problems, case studies, and research for term-paper/projects will all be used to demonstrate important points, which will be illustrated by examples and applications. The course emphasizes the internal management knowledge and skills necessary for financial success in complex health organizations.

**PAM 663 Health Care Financial Management II: Payment Systems**

Fall. 3 credits. Prerequisite: PAM 662. J. Kuder.

The purpose of this course is to develop an understanding of the theories on which health care payment and reimbursement systems are based and the techniques by which they operate.

**PAM 664 Information Resources Management in Health Organizations**

Spring. 3 credits. Recommended: strong background in computer skills. S-U grades optional. L. O'Neill.

Students are expected to have basic computer skills upon entry into the course. This course is a graduate course in Health Services Administration. Administrators are expected to have an opportunity to explore issues of resource allocation and continuous quality improvement. The format for the class is lecture, discussion, and case analysis.

**PAM 665 Managing Health and Human Service Organizations I**

This is the first segment of a six-credit sequence addressing the management and leadership of health and human services organizations. Different perspectives are examined, from the supervisory to the CEO level. This course begins with a study of the basic concepts of management—communications, motivation, change, management, leadership, human resources, organizational design issues, and labor relations. It then looks at the development of technical skills in the areas of problem solving, decision making, productivity measurement, resource allocation and performance measurement. The course is taught with an applied focus and utilizes a case study approach.

**PAM 666 Strategic Management and Organizational Design of Health Care Systems**

3 credits. Prerequisite: PAM 665. Staff.

This is the second segment of a six-credit sequence in the management and leadership of health and human services organizations. This course concentrates on strategy issues, marketing, organizational culture issues, development of mission, the management of professionals, the importance of roles, structure, and inter- and intra-institutional relationships within these organizations. The course is taught via a case study approach.

**PAM 667 Health and Welfare Policy**

Spring. 3 credits. J. Schultz.

This course addresses major health policy issues and the critical processes that influence them. It focuses primarily on the United States, with some coverage of health policy in other countries. Topics that will be discussed include: Medicaid, Medicare, the uninsured, public health, the effect of welfare policy on health care, managed care development and regulation, state and federal health care reform, and many others. The course analyzes the politics of health policy in terms of legislative and executive processes, the forces involved including economic, social, ethical and political factors, and key players in health policy, such as special interest groups, lobbyists, public agencies, the press, elected officials, and legislative staff.

**PAM 668 Long-Term Care and the Aged: Alternative Health and Social Service Delivery Systems**

Spring. 3 credits. Prerequisite: PAM 657. R. Battistella.

Alternatives for the organization and delivery of long-term care services are examined within the context of public-financing constraints. Progress in long-term care is viewed as a continuum encompassing medical and social services positioned to optimize independent living. Relevant experience from other highly developed countries is presented. Visiting professionals from both the public and private sectors are featured. Field trips provide additional insights into the many challenges and opportunities of long-term care policy and management.

**PAM 669 Regression Analysis and Managerial Forecasting**

Fall. 3 credits. Prerequisite: at least one statistics course. L. O'Neill.

This course teaches various statistical methods for managerial decision making, with a particular emphasis on regression and forecasting. Other topics include: ANOVA, correlation, contingency tables, and statistical process control. Application to heath care organizations are emphasized.

**PAM 718 Advanced Seminar in Program Evaluation**

This advanced course is intended for students with at least three courses in evaluation (PAM 612 or the equivalent) and statistics through multiple regression. The seminar focuses on analysis and appraisal of current literature on program evaluation and evaluative research. The seminar is topical,
addressing current issues of importance in the field.

PAM 760 Challenges and Trends in the Health Services Industry
Fall and spring. 1 credit. S-U grades only.
Staff.
The goal of the course is to provide students with information and exposure to current and emerging issues in the health services industry. Topics may include such matters as: financial management of health care facilities, human resource management, information systems, cost effective clinical decision making, quality measurement and outcomes, public health, and entrepreneurship in the health services industry.

PAM 799 MPS Problem Solving Project
Fall or spring. Credits to be arranged.
Staff.
Recommended by the chair in charge of independent advanced work. S-U grades optional.

PAM 899 Master's Thesis and Research
Fall and spring. Credit to be arranged.
Prerequisite: permission of the chair of the graduate committee and the instructor.
S-U grades optional.

PAM 999 Doctoral Thesis and Research
Fall and spring. Credit to be arranged.
Prerequisite: permission of the chair of the graduate committee and the instructor.
S-U grades optional.

TEXTILES AND APPAREL
A. Lemley, chair, S. K. Obendorf, director of graduate studies; A. Racine, director of undergraduate studies; S. Ashdown, C. C. Chu, C. Coffman, C. Jirousek, S. Loker, A. Netravali.
Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

TXA 114 Introduction to Computer-Aided Design
Fall and summer. 3 credits.
Staff.
It is important for students on wait lists to attend the first class. Limit 23 per lab section. Priority to those who have taken or are currently enrolled in DED 115 and 203. Minimum cost of materials $150; lab fee $75. S-U grades optional. Fall, T or R 1:25-4:25. A. Racine.
A studio course that explores the creative potential of computer-aided design. The AutoCAD software program is used as a design tool for generating a wide variety of visual images. Basic Photoshop software commands are introduced to enhance AutoCAD drawings. Daily hands-on demonstrations and studio work.

TXA 117 Drawing the Clothed Figure
Spring. 3 credits. Enrollment limited to 20 students.
Prerequisite: a basic drawing course. Priority given to apparel design students. Letter grades only. Minimum cost of supplies $125.00. Lab fee: $30. T R 10:10-1:10. Staff.
The goal of this course is to improve a student's capacity to communicate apparel design ideas visually by drawing clothing on the human body. Emphasis will be placed on development of techniques used to express the human body, materials, and clothing designs quickly and clearly in working sketches and to present clothing designs in finished renderings.

TXA 125 Art, Design, and Visual Thinking
An introduction to the visual arts and design that explores aesthetic and cross-cultural dimensions of visual experience. Augmented by slide presentations, artifacts, video, and an Internet-based electronic textbook, lectures emphasize the varieties of visual expression seen in works of art and design. Social, cultural, and historic interpretations of visual expression are discussed.

TXA 135 Fibers, Fabrics, and Finishes
An introduction to fibers, fibrous materials, and dyes and finishes. Special emphasis is given to the use of fibrous materials in apparel, residential and contract interiors, and industrial applications. Topics covered include fiber properties, fabric structure, coloration of fibrous materials, dimensional stability, flammability, product specifications, and performance standards.

TXA 137 Color and Surface Design of Textiles
This course will develop an understanding of the techniques needed to produce apparel and interior finishes. The course will focus on color theory illustrated by slides and textile designs. Students will create a portfolio of textile designs. Studio work will be augmented by lectures on pattern and color theory illustrated by slides and textile examples.

TXA 145 Introduction to Apparel Design
Spring. 4 credits.
Staff.
Limited to 36 students with 18 students per lab section; priority to those who have taken or are currently enrolled in TXA 125 and 135. Minimum cost of materials $125; lab fee $75. S-U grades optional. Fall, T or R 1:25-4:25. A. Racine.
An introduction to apparel design focusing on pattern design. The process of pattern design is introduced to students with a limited knowledge of pattern-making. Special emphasis is given to the use of sewing patterns in apparel design. The use of patterns in apparel design is emphasized. The course includes an introduction to sewing patterns and the cutting and sewing of patterns. The course also includes an introduction to the design of apparel for women and men.

TXA 225 Color and Surface Design of Textiles
Students will study the principles of color and surface design as applied to textiles. The course will cover the use of color theory in the design of textiles. Students will learn the basics of Photoshop and create a design line for a formal portfolio that will involve textile design applied to either apparel or home furnishings use.

TXA 264 Draping
Fall. 4 credits. Limited to 26 students. 13 in each lab. Prerequisite: TXA 125 and TXA 145; one drawing course recommended.
Minimum cost of materials, $125; lab fee, $150. Lecs 01 11:00-1:00 and 02 11:00-1:00. Lab 02 11:45-1:45, lab 01 M W 12:25-4:25, lab 02 F 10:10-1:10. S. Ashdown.
This course will examine the process of creating a three-dimensional garment from the two-dimensional fabric. The principles and processes of draping are advanced. Pattern making and garment cutting are studied. Student exercises will be made of a variety of garments to be made into a portfolio. The course will be directed by an experienced fashion designer and is open to all students.

TXA 269 Style, Fashion, and the Apparel Industry
Spring (first 7 weeks of semester). 2 credits.
This course will examine the various aspects of the apparel industry from the 19th century to the present day. The course will cover the history of fashion and the apparel industry, the role of designers and fashion, the development of the apparel industry, and the impact of technology on the apparel industry.

TXA 275 Photoshop for Portfolio Presentations in Textiles and Apparel Design
Spring (first 7 weeks of semester). 2 credits.
Limited to 23 students. Prerequisite: TXA 114, TXA 217, or TXA 225. Course fee covering CAD lab color printing, $15.00. T R 1:25-4:25. C. Jirousek.
This course will explore the use of Adobe Photoshop as a tool for portfolio development in textile and apparel design. The course will cover the basics of Photoshop and create a design line for a formal portfolio that will involve textile design applied to either apparel or home furnishings use.

TXA 300 Special Studies for Undergraduates
Fall or spring. Credit to be arranged.
Staff.
Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicity description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the department chair, is filed at course registration or during the change-of-registration period.

TXA 331 Apparel Production and Management
Fall. 3 credits. Enrollment limited to 45 students. Prerequisites: Economics 101 and 102 and an upper-division course in either apparel or textiles. M W 12:20-2:15. A. S. Loker.
Introduction to the global textile and apparel industry, particularly the technical and economic aspects of apparel production. Analysis of specific apparel manufacturing and management issues such as international sourcing, Quick Response, mass customization, production and information technology, labor, and logistics.
A team-based studio course in which a fashionable apparel. Drawing techniques that will require students to use the design process information about body structure, will be taught. For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of TXA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multiplicity description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department chair and filed at course registration or within the change-of-registration period after registration along with an add/ drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special-studies form to the department chair is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study.

**TXA 400: Directed Readings.** For study that predominantly involves library research and independent reading.

**TXA 401: Empirical Research.** For study that predominantly involves data collection and analysis, or laboratory or studio projects.

**TXA 402: Supervised Fieldwork.** S-U only. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**TXA 403: Teaching Apprenticeships.** Fall or spring. 2-4 credits. Prerequisites: student must have upperclass standing, have demonstrated a high level of performance in the subject to be taught and in the overall academic program, and have permission of the instructor and the department chair. S-U grades optional. Staff. Apprenticeship includes both a study of teaching methods in the field and assisting the faculty with instruction.

**TXA 439 Biomedical Materials and Devices for Human Body Repair**

Spring. 2-3 credits. 2 credits meets T only; 3 credits meets T and R. S-U grades only for 2 credits, letter grades only for 3 credits. Juniors and seniors only. Prerequisites: college Natural Science requirement. (Chem. or Biol.). T 12:25-2:40, R 12:25-2:40. C. C. Chu.

Survey of materials and devices for repair of injured, diseased, or aged human tissues/ organs. It includes properties of synthetic and biological materials, wound healing processes, medical devices for repair of wounds, blood vessels, hearts, joints, bones, nerves, male impotence, vision/hearing/voice, and drug control/release.

**TXA 444 Apparel/Textile Retailing and Distribution**

Spring. 3 credits. S-U grades optional. Juniors and seniors only. Prerequisite: TXA 135, TXA 331, and ARME 240 or equivalent. Lab T 12:25-2:40. N. Beeh. This course provides an overview of the business of design, production, distribution, marketing, and merchandising of apparel and related products from a marketing perspective. The organization and structure of both domestic and international retailers is included along with pricing strategies, merchandise planning, inventory management, and sales promotion. New uses of computer systems and information technologies will be emphasized throughout.

**TXA 465 Apparel Design: Product Development**

Fall. 3 credits. Prerequisites: minimum of 2 drawing or art courses, TXA 201, TXA 308, and TXA 225 or permission of instructor. Minimum cost of materials, $250, lab fee, $10. T 10:10-12:05, S. Ashdown. Through studio problems in apparel design, students examine the influence of manufacturing technology and cost on apparel products. Garments are developed to various stages from sketches to finished samples. Sketching exercises explore the relationship between technical drawing and illustration. Some portfolio development included.

**TXA 499 Honors Thesis Research**

Fall and spring. 1-6 credits (maximum 6 credits for graduation). S-U grades optional. Prerequisite: TXA students who have been admitted to college honors program. Staff. Independent research leading to the honors thesis. College honors program guidelines are to be followed.

**TXA 600 Special Problems for Graduate Students**

Fall or spring. Credit to be arranged. S-U grades optional. Staff. Independent advanced work by graduate students recommended by their chair and approved by the department chair and instructor.

**[TXA 620 Physical Properties of Fiber-Forming Polymers and Fibers]**

Fall. 3 credits. Prerequisites: completion of instructor. Offered alternate years. Not offered 2001–2002. A. Netravali.
Chemical aspects of textiles with emphasis on the correlation of the observed effect with chemical structure, end-use influences, interaction with fabric and fibers, sources, and synthetic routes. The environmental effect of these textile chemicals and current federal regulation will be briefly discussed.

TXA 637 Research Seminars in Apparel Design
Fall and spring. 1 credit; S-U only; repeat of course each semester is encouraged for all apparel design graduate students. Available to advanced undergraduate students with permission of individual instructor. Apparel Design faculty.

TXA 639 Mechanics of Fibrous Assemblies
Fall. 3 credits. Prerequisite: solid mechanics or permission of instructor. Offered alternate years. M W F 11:15-12:05. Staff. A study of the mechanics of fiber assemblies: idealized yarn and fabric models; statistical bundle theories; deformation of yarns and fabrics in tensile, shear, and compressive stress; bending and buckling; and the mechanical behavior of nonwoven textile materials.

TXA 644 Human Factors: Anthropometrics and Apparel Design
Spring (even-numbered years). 3 credits. S-U grades optional. Prerequisites: course in statistics and permission of instructor. Open to advanced undergraduates. Offered alternate years. T R 10:10-12:05. S. Ashdown. Seminar course focusing on the human form and its relationship to clothing. Includes discussion of quantification of body sizes and human variation; historical, cultural, and aesthetic concepts of fit; apparel sizing techniques; national and international sizing systems and standards; impact of sizing systems on various populations (elderly, handicapped, etc.).

TXA 675 Aesthetics and Meaning in World Dress
Spring. 3 credits; S-U grades optional. Prerequisite: TXA 125 or course in history of art, costume history, or other history. Offered alternate years. Not offered 2001–2002. C. Jirousek. An examination of the aesthetic and social/psychological relationship between body and clothing in the context of various cultures. Students will develop a research topic to be presented orally and in a term paper, and they will participate in the development of an exhibition.

TXA 899 Doctoral Thesis and Research
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Staff.

FACULTY ROSTER
Avery, Rosemary J., Ph.D., Ohio State U. Prof., Policy Analysis and Management.
Becker, Franklin D., Ph.D., U. of California at Davis. Prof. and Chair, Design and Environmental Analysis.
Brannon, Patsy, Ph.D., Cornell U. Prof., Nutritional Sciences, Dean.
Brumberg, Joan J., Ph.D., U. of Virginia. Prof., Human Development.
Burkhauser, Richard, Ph.D., U. of Chicago. Prof. and Chair, Policy Analysis and Management.
Butler, J.S., Ph.D., Cornell U. Prof., Policy Analysis and Management.
Cassarola, Marinella, Ph.D., U. of Texas, Austin. Asst. Prof., Human Development.
Chi, Peter S., Ph.D., Brown U. Prof., Policy Analysis and Management.
Chu, Chih-Chang, Ph.D., Florida State U. Prof., Textiles and Apparel.
Cochran, Moncrieff, Ph.D., U. of Michigan. Prof., Human Development.
Cornelius, Steven W., Ph.D., Pennsylvania State U. Assoc. Prof., Human Development.
Danko, Sheila, M.I.D., Rhode Island School of Design. Assoc. Prof., Design and Environmental Analysis.
Deupree, Richard, Ph.D., U. of Oklahoma. Prof., Human Development.
Eckenrode, John J., Ph.D., Tufts U. Prof. and Chair, Human Development.
Evans, Gary, Ph.D., U. of Massachusetts at Amherst. Prof., Design and Environmental Analysis.
Faber, Alfred, Ph.D., U. of Wisconsin. Asst. Prof., Human Development.
Garbarino, James, Ph.D., Cornell U. Prof. and Co-Director, Family Life Development Center.
Greene, Katrina, Ph.D., U. of Virginia. Asst. Prof., Human Development.
Haugaard, Jeffrey, Ph.D., U. of Virginia. Assoc. Prof., Human Development.
Hazen, Cindy, Ph.D., U. of Denver. Assoc. Prof., Human Development.
Heck, Ramona K.Z., Ph.D., Purdue U. Prof., Policy Analysis and Management.
Hedge, Alan, Ph.D., U. of Sheffield (England).
Lacaterra, Joseph Jr., Ph.D., Cornell U. Assoc. Prof., Design and Environmental Analysis.
Lee, Lee C., Ph.D., The Ohio State U. Prof., Human Development.
Lemley, Ann T., Ph.D., Cornell U. Prof. and Chair, Textiles and Apparel.
Loker, Suzanne, Ph.D., Kansas State U. Prof., Textiles and Apparel.
Lust, Barbara C., Ph.D., City U. of New York. Prof., Human Development.
Moen, Phyllis, Ph.D., U. of Minnesota. Prof. and Director, Bronfenbrenner Life Course Center.
Netravali, Anil, Ph.D., North Carolina State U. Prof., Textiles and Apparel.
Oberndorf, Sharon K., Ph.D., Cornell U. Prof., Textiles and Apparel. Assoc. Dean.
Parr, Andrea, Ph.D., Cornell U. Prof., Policy Analysis and Management.
Pillemr, Karl A., Ph.D., Brandeis U. Prof., Human Development.
Pallak, Patricia B., Ph.D., Syracuse U. Assoc. Prof., Policy Analysis and Management.
Robertson, Steven S., Ph.D., Cornell U. Prof., Human Development.
Savin-Williams, Ritch C., Ph.D., U. of Chicago. Prof., Human Development.
Sims, William R., Ph.D., Massachusetts Inst. of Technology. Prof., Design and Environmental Analysis

Tennyson, Sharon, Ph.D., Northwestern U. Assoc. Prof., Policy Analysis and Management

Tobias, Donald J., Ph.D., Michigan State U. Assoc. Prof., Policy Analysis and Management

Trochim, William M. K., Ph.D., Northwestern U. Prof., Policy Analysis and Management

Wang, Q. I., Ph.D., Harvard University. Asst. Prof., Human Development

Wethington, Elaine, Ph.D., U. of Michigan. Assoc. Prof., Human Development

Williams, Wendy M., Ph.D., Yale U. Assoc. Prof., Human Development

Lecturers

Beck, Sam N., Ph.D., U. of Massachusetts. Sr. Lecturer, Urban Semester

Beckmann, Randi, M.S., Elmira College. Lecturer, Human Development

Breen, Nancy, Ph.D., Syracuse University. Lecturer, Textiles and Apparel

Delara, Thomas, M.B.A., Barry University. Lecturer, Policy Analysis and Management

Dempster-McClain, Donna L., Ph.D., Cornell U. Sr. Lecturer, Human Development

Gilmore, Rhonda, M.A., Cornell U. Lecturer, Design and Environmental Analysis

Mirano, Tracy, Ph.D., SUNY Binghamton. Lecturer, Human Development

Racine, Anita, Ph.D., Cornell U. Sr. Lecturer, Textiles and Apparel

Rosen, William, Ph.D., U. of California. Sr. Lecturer, Policy Analysis and Management

Ross-Bernstein, Judith, M.Ed., Northwestern U. Lecturer, Human Development

Roufaiel, Nazik, Ph.D., Cairo University. Lecturer, Policy Analysis and Management

Schelhas-Miller, Christine, Ed.D., Harvard U. Lecturer, Human Development

Waldron, Kristine, M.A., Syracuse University. Lecturer, Policy Analysis and Management
ADMINISTRATION
Edward J. Lawler, dean
Robert Smith, associate dean, academic affairs
Ann Martin, associate dean, extension and public affairs
James E. McPherson, assistant dean, Office of Student Services
Gordon Law, librarian
Allan Lentini, director, administrative services

DEGREE PROGRAMS

Industrial and Labor Relations

Degree
B.S.
M.I.L.R.
M.P.S.
M.S.
Ph.D.

THE SCHOOL

The School of Industrial and Labor Relations at Cornell (ILR) is a small school within a large university. It tries to maintain the small-college atmosphere expected of an institution that has about 750 undergraduates and approximately 150 graduate students, even as ILR students participate fully in the activities of the larger Cornell community.

ILR students study in modern, technologically advanced lecture halls, seminar rooms, and libraries.

Almost half of the school's typical freshman class comes from the greater New York City area. Another 30 percent live in other parts of New York State. Students from other states and a few from foreign countries make up the rest of the class. Women constitute about 50 percent of entering classes, and minority students comprise about 25 percent of new freshmen and transfer students.

Students enrolled in the School of Industrial and Labor Relations at Cornell may take a substantial number of courses in the other six undergraduate colleges and schools of the university, including the College of Arts and Sciences. Cornell students have access to all of the libraries and other services of the university.

The school operates in four areas: (1) resident instruction, (2) extension and public service, (3) research, and (4) publications. It provides instruction to undergraduates and graduate students who are preparing for careers in industrial and labor relations, as well as to men and women already engaged in industrial relations activities and the general public through its Extension and Public Service Division.

The school's Conference Center, part of the extension division, initiates and hosts conferences covering the full scope of industrial and labor relations. The center provides continuing education and information to practitioners and scholars.

The Research Division develops materials for resident and extension teaching and originates studies in industrial and labor relations. The Publications Division publishes and distributes the research results.

GRADUATE DEGREES

More than 150 students on the Cornell campus are enrolled in graduate study in industrial and labor relations, one of the largest graduate fields in the university. Students may work toward the degrees of Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy. For further information on graduate programs, contact the Graduate Office, School of Industrial and Labor Relations, Cornell University, 216 Ives Hall, Ithaca, NY 14853-3901.

DEPARTMENTS OF INSTRUCTION

Courses in the school are organized into six departments:

Collective Bargaining, Labor Law, and Labor History

In the study of workers, employers, and the government policies affecting them, members of this faculty concentrate on subjects of industrial and labor relations best understood by reliance on the fields of administration, economics, history, and law. Courses explore subjects within the framework of American society, stress fundamental forces of change, and analyze texts and empirical data with tools of analysis.

Human Resource Studies

This department offers specialization in human resource studies. Human Resources focuses on employer-employee relationships and deals with such topics as human-resource planning, staffing, computer applications to personnel, personnel information systems, training, management development, performance appraisal, compensation administration, organization development, and the sociological environment of human resource management. The study of human resource policy focuses on government efforts to enhance the population's ability to be employed. Although primarily concerned with governmental measures that influence the supply of labor (for example, training, education, health, mobility, and immigration), the subject area also includes policies in private industry that relate to the demands for labor.

International and Comparative Labor Relations

International and Comparative Labor Relations is concerned with industrial and labor relations systems and labor markets in other parts of the world. Countries include those in Western Europe, as well as in Asia, Latin America, and South America.

Labor Economics

Labor Economics deals with labor markets: that is, the institutional arrangements, terms, and conditions under which workers supply their labor and under which firms demand their labor. Faculty members are especially concerned with understanding the workings of labor markets and the effects of various public policies. The topics dealt with in courses and research include the following: analysis of the labor force, employment and unemployment, wages and related terms of employment, income distribution, income security programs, health and safety in industry, retirement, pensions and social security, economic aspects of collective bargaining, and economic demography.

Organizational Behavior

By studying individuals, groups, single organizations, and associations or organizations, persons in the field of organizational behavior understand human behavior within organizations as well as the actions of the organizations themselves. At the individual level of analysis, courses consider motivation, leadership, attitudes, personality, group processes, organizational change, and worker participation. At the organizational level, courses examine occupations, deviance in the workplace, conflict, power, organizational design, public policy regarding organizations, and industrial conflict. The department also offers courses on research methods in organizational research and general survey courses in both psychological and sociological research.

Social Statistics

Economic and social statistics include the principles of statistical reasoning, statistical methods, and the application of statistical tools of analysis.

A full list of required and elective courses is available from the Office of Student Services, 101 Ives Hall.

RESIDENT INSTRUCTION

This division conducts the on-campus programs leading to the degrees of Bachelor of Science, Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy from Cornell.
Office of Student Services

Staff members from the Office of Student Services, 101 Ives Hall, work closely with faculty and faculty committees to administer degree programs for the school and many of the school's support services. The office's responsibilities include the admitting and orienting of new students, maintaining students' personal and academic records, and counseling students on personal and academic problems. The office also works closely with seniors who are planning graduate study.

Counseling and Advising

New students are provided advising on orientation, academic procedures, and course registration by counselors in the Office of Student Services. Each of the school's academic departments names faculty members to serve as advisers for students who wish to consult with them regarding career possibilities in the field, postgraduate programs, or similar matters. Questions or issues related to graduation requirements, course registration, and related academic procedures should be brought to the attention of counselors in the Office of Student Services.

Minority Programs

Cornell University administers a variety of special opportunity programs designed to provide financial assistance and other forms of assistance to (1) minority students and (2) low-income students meeting program guidelines. The purpose of these programs is to provide access to a Cornell education for capable students who otherwise might not secure the admissions consideration, financial assistance, or supportive services necessary for their success at the university. The associate director for minority education in the Office of Student Services provides academic and personal counseling to all ILR minority students. ILR offers a variety of support services to enhance academic achievement.

STUDY OPTIONS

Several study options are open to ILR undergraduates, making it possible to tailor a program to fit special circumstances.

One such option is the five-year ILR master's degree. With early planning, some students may earn the M.S. degree in the fifth year. Using another option, a very few ILR students arrange for dual registration in the Johnson Graduate School of Management, earning their bachelor's degree in ILR and a master's degree in the Johnson Graduate School of Management after five years of study.

Some students elect to spend a semester in New York City, Albany, or Washington, D.C., with a chance to observe actual labor problem solving as interns in congressional offices, labor organizations, personnel offices, and state and federal agencies. For more information, see "Special Academic Programs," below.

Study abroad options are also available at a number of foreign universities. Qualified students may spend a semester or a full year studying abroad.

A number of ILR courses deal directly with today's problems and involve fieldwork in the Ithaca area and elsewhere in New York State.

The ILR program allows juniors and seniors who wish to conduct their own research to receive course credit for individually directed studies if the program is supervised by a faculty member.

Study in Absentia

Registration in absentia enables a student to seek admission in another American institution for a semester or a year and transfer credit toward completion of the Cornell degree. This study option requires the development of a plan of study, a statement of appropriate reasons for study away from the university (e.g., availability of courses not offered at Cornell), good academic standing, approval of the plan by the director of student services, and payment of a special in absentia registration fee. Course work taken in absentia is usually not evaluated for transfer credit until the work has been completed and the student has returned to Cornell. Students then submit a course syllabus and other evidence of content to the chairman of the department that might have offered the respective course, or to a counselor in the Office of Student Services if the course is more appropriate as a general elective.

Leave of Absence or Withdrawal

If a student desires to withdraw or to take a leave of absence from the university, an interview should be scheduled with a counselor in the Office of Student Services. Counselors will assist students in petitioning for approval of a leave of absence and in contacting the appropriate offices or departments of the university.

REQUIREMENTS FOR GRADUATION

To earn the Cornell Bachelor of Science degree in industrial and labor relations, the student needs to successfully complete 120 credits. This requires eight terms for an average of 30 credits a year although some students accelerate their studies.

Freshman Year

Fall Semester

Freshman Writing Seminar 3
Introductory Microeconomics (ECON 101) 3
History of American Labor: Nineteenth Century (ILRCB 100) 3
Social and Psychological Foundations of Organizational Behavior I (ILROB 171) 3
ILR Colloquium (ILR 150) 1
Elective 3

Spring Semester

Freshman Writing Seminar 3
Introductory Macroeconomics 102 3
History of American Labor: Twentieth Century (ILRCB 101) 3
Social and Psychological Foundations of Organizational Behavior I (ILROB 170) 3
Elective 3

Physical Education, Fall and Spring 15

Sophomore Year

Fall Semester

Statistics I (ILRST 210) 3
Development of Economic Institutions (ILRLE 140) 3
Labor and Employment Law (ILRCB 201) 3
Human Resource Management (ILRHR 260) Fall 3
Elective 3

Spring Semester

Statistics II (ILRST 211) 3
Economics of Wages and Employment (ILRLE 240) 3
Distribution: Cultural Perspectives 3
Distribution: Western Intellectual Tradition 3
Elective 3

Junior and Senior Years

Economic Security (ILRLE 340) 3
Collective Bargaining (ILRCB 300) 3
Distribution: International and Comparative ILR 3
Distribution: Upper Division Writing 3
Distribution: Science and Technology 3
ILR and General Electives

ILR Electives—30 credits (one course must be ILR)
Minimum of 12 credits of ILR course work including 495 (Honors), 499 (Independent Study) and approved list of courses from the LE Department.
Maximum of 12 credits from foreign languages, advanced math or other non-ILR courses as approved by ILR departments.
9 credits for one semester abroad or 15 credits for a full year.
9 credits for Internships (497: 3 credits; 498: 6 credits S-U).

General Electives—34 credit hours of which up to 22 hours may be freely elected in the university's endowed divisions.

Required Courses (55 credits)

The curriculum prescribes the courses and subjects listed in the table above; some are illustrative. In the senior year, all courses will be electives.

Elective Courses (65 credits)

From the courses offered by the school, students must select a minimum of 30 credits of ILR elective courses. No more than nine of these credits may be satisfied by ILR 497–498, Internships, or one semester of Study Abroad.
Undergraduates are required to select one intensive writing course (for a minimum of three credits) from a list of designated courses.

The remaining 34 credits may be selected from the courses of any other college at Cornell, but a student who takes more than 34 credits in the endowed colleges (the College...
of Architecture, Art, and Planning; the College of Arts and Sciences; the Johnson Graduate School of Management; the College of Engineering; and the School of Hotel Administration) must pay for each credit taken in excess of 34, whether or not the courses are passed. For the precise fee per credit, students should call the Office of the Bursar.

The number of credits that may be taken in the endowed colleges at no additional cost to the student may be changed at any time by official action of the school.

**ILR Math Requirement**

If you took AP calculus in high school and scored a 3 or better on the AB exam or a 2 or better on the BC exam, you have fulfilled the ILR math requirement. If you did not take AP calculus, or if you did not achieve the scores noted above, you will be expected to take and pass the ILR Math Assessment before you may register for required courses in Statistics and Labor Economics. The Math Assessment is based on materials covered in New York State Regents Exams for Courses 2 and 3. (Calculus is not covered in those courses.)

The ILR Math Assessment will be scheduled in August, January, and May. Those who do not pass in the first attempt will be expected to register in an appropriate math course and pass the assessment before the beginning of their third semester in the school. Anyone who cannot meet the requirement by the beginning of the third semester may be enrolled for a terminal term and will be expected to leave the school thereafter.

Transfer students will be expected to meet the same standards in math: either present the score required by Cornell University for AP calculus (AB or BC) credit, or pass the ILR Math Assessment before being permitted to register in ILRST 210 or ILRLE 240 with a terminal semester possible after failing the assessment given at the beginning of a third semester as an ILR student.

**ACADEMIC STANDING AND GRADES**

**Academic Integrity**

In 1997 the faculty of the School of Industrial and Labor Relations approved a revised code of academic integrity. This code, while based on the Cornell University code, varies somewhat.

Absolute integrity is expected of all Cornell students in all academic undertakings. They must in no way misrepresent their work, fraudulently or unfairly advance their academic status, or be a party to another student’s failure to maintain academic integrity. The code specifically prohibits:

1) knowingly representing the work of others as one’s own;
2) using or obtaining unauthorized assistance in any academic work;
3) fabricating data in laboratory or field work;
4) giving fraudulent assistance to others;
5) fabricating data in support of laboratory or field work.

Full details on the applications of those prohibitions to course work, term papers, examinations, and other situations are listed in the code. Copies are available from the Office of Student Services, 101 Ives Hall.

**Dean's List**

A Dean’s List is compiled for each of the four undergraduate classes each term on the seventh day following receipt of final grades from the registrar. Eligibility for the Dean’s List is determined by applying all of the following criteria:

1) achievement of a term average for freshmen of 3.3 or better; for sophomores of 3.4 or better; and for juniors and seniors of 3.6 or better;
2) a minimum course load for the term of 12 letter-graded credits;
3) completion of all courses registered for at the beginning of the term;
4) satisfaction of all good-standing requirements.

**Academic Standing**

Good standing requires that all of the following criteria be met at the end of each term:

1) an average of C– (1.7) for the semester’s work, including a minimum of eight completed and letter-graded credits;
2) no failing grades in any course, including physical education;
3) a cumulative average of C– (1.7) for all completed terms.

If at the end of any term a student fails to maintain good standing or if overall academic performance is so marginal as to endanger the possibility of meeting school and university degree requirements, his or her record is reviewed by the committee on Academic Standards and Scholarships. The committee may issue a written warning to the student at that time. If a student does not improve after the written warning, he or she may be denied permission to register for the next term.

**Involuntary Separation from the School for Academic Reasons**

A student may be denied permission to re-register at the end of any term when he or she has failed:

1) to establish good standing after a semester on warning;
2) to maintain an average of 1.7 in any term after a previous record of warning;
3) to achieve good standing after being on warning any two previous semesters;
4) two or more classes in one term or has a term average of 1.0 or below.

The Academic Standards and Scholarship Committee may decide to permit a student to remain on warning more than one semester if there has been significant improvement even though the cumulative average is still below 1.7.

**S-U Grading Policy**

An undergraduate may register to receive a final grade of S (Satisfactory) or U (Unsatisfactory) in courses that offer this option—either in the school or in other divisions of the university—subject to the following conditions:

1) the S-U option may be used in ILR and in out-of-college course electives only, not in directed studies;
2) students are limited to registering in two S-U courses a term;
3) S-U registration is limited to four credits for each course;
4) students registering for S-U grades must be in good standing;
5) students must fulfill the graduation requirement of 105 letter-graded credits.

ILR faculty members assign a grade of U for any grade below C– and a grade of S for any grade of C– or better. A grade of U is considered equal to an F in determining a student’s academic standing, although it is not included in the cumulative average.

No change of grading (from letter to S-U or from S-U to letter) may be made after the first three weeks of class. There are no exceptions to this restriction, and appeals will not be accepted.

**Grades of Incomplete**

A grade of incomplete is assigned when the course has not been completed for reasons that are acceptable to the instructor. It is understood that the work will be completed later and credit given. Instructors may grant a
grade of incomplete for a limited number of clearly valid reasons, but only to students with substantial equity in a course. A firm and definite agreement on the conditions under which it may be made up must be made with the instructor. The school's policy allows a maximum of two full terms of residence for removal of a grade of incomplete. If it is not made up within this time, the grade automatically becomes an F.

**SPECIAL ACADEMIC PROGRAMS**

To meet the special academic objectives of some students, the school's faculty has established several special academic programs. For additional information, students should contact a counselor in the Office of Student Services. Counselors will explore the program with students to help them decide if it suits their interests.

**Five-Year Master of Science Degree Program**

With early planning it is possible to earn the M.S. degree in a fifth year of study. This program is designed specifically for those who wish concentrated study in an area of specialization in the school for a Master of Science degree. Students considering this program should consult a counselor in the Office of Student Services after their freshman year.

**Internships**

The Credit Internship Program has provided students with a vivid understanding of problems in labor and industrial relations through observation and participation in "real-life" labor problem solving. A number of selected students spend a term of their junior year in Albany, New York City, or Washington, D.C., in close contact with practitioners. Their activities include independent research under direction of ILR faculty members and seminars drawing on fieldwork experience with employers, labor organizations, and government agencies. More information about this program is available from the Office of Student Services.

**Honors Program**

Undergraduates who are ranked in the top 20 percent of their class at the end of the junior year may propose a two-semester research project, an honors thesis, for review by the Committee on Academic Standards and Scholarships. When approved, the candidate for graduation with honors works for two semesters (for three credits in each term) to research, write, and then defend the thesis.

**Study Abroad**

Cornell students with strong academic records and the necessary preparation in required and elective courses are encouraged to consider study abroad. The university currently has contact with universities in more than 40 countries that permit undergraduates to register for courses while maintaining Cornell registration and financial aid for a semester or a year. Information about those opportunities may be requested from Cornell Abroad, 474 Uris Hall.

Some study abroad programs require the development of language proficiency and preparation in appropriate courses at Cornell. Students should consult the Office of Student Services and Cornell Abroad in the freshman and sophomore years to be sure that they comply with the academic and procedural requirements for study abroad.

**COLLECTIVE BARGAINING, LABOR LAW, AND LABOR HISTORY**

**ILRCB 100  Introduction to U.S. Labor History: Nineteenth Century**

Fall. 3 credits. C. Daniel, I. DeVault, N. Salvatore.

This first semester of a two-semester sequence covers the major changes in the nature of work, the workplace, and the institutions involved in industrial relations in the United States through the end of the nineteenth century.

**ILRCB 101  Introduction to U.S. Labor History: The Twentieth Century**

Spring. 3 credits. Prerequisite: ILRCB 100. C. Daniel, I. DeVault, N. Salvatore.

This second semester of a two-semester sequence covers the major changes in the nature of work, the workplace, and the institutions involved in industrial relations in the United States from the end of the nineteenth century up to the present.

**ILRCB 201  Labor and Employment Law**

Fall and one section in spring. 3 credits. M. Gold, J. Gross, R. Lieberwitz, K. Stone.

A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework in which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.

**ILRCB 300  Collective Bargaining (200)**

Fall and spring. 3 credits. M. Cook; H. Katz, S. Kuruvilla, I. Turner.

A comprehensive introduction to industrial relations and collective bargaining in the United States; the negotiation, scope, and day-to-day administration of contracts; the major substantive issues in bargaining, including their implication for public policy; industrial conflict; the major challenges facing unions and employers today; U.S. industrial relations in international and comparative perspective.

**ILRCB 301  Labor Union Administration**

Fall. 3 credits. Staff.

Study and analysis of the structure and operations of American unions, including the complicated internal life of the organizations; the varied environments in which unions develop and grow or decline; the relationship of national unions, local unions, and members in the many different sections of internal union government; the ways in which unions are set up to handle organizing, collective bargaining, contract administration, and political activity; and the widespread movement toward merger and consolidation of unions that began in the sixties and continues today. All of these involve a study of union constitutions and other primary documents, in addition to secondary readings. Attention is given to relevant legislation, current problems of unions, and the eternal problems of attaining union democracy.

**ILRCB 302  Strangers and Citizens: Immigration and Labor in U.S. History**

Fall or spring. 3 credits. I. DeVault.

This course explores immigrant workers' experiences in the nineteenth and twentieth centuries from different perspectives. Students examine what it meant to the immigrants themselves to arrive as strangers in the United States while also examining the ways in which pre-existing American groups defined these immigrants as "strangers." Similarly, students look at U.S. citizens in their roles as greeters of immigrants, detractors of immigrants, and as models for the aspirations of immigrants. Throughout the course the main examples come from the industrial and union realms.

**ILRCB 304  Seminar in American Labor and Social History**

Fall or spring. 4 credits. Permission of instructor. C. Daniel, I. DeVault, N. Salvatore.

An undergraduate seminar whose topic changes depending on semester and instructor.

**ILRCB 305  Introduction to Labor Arbitration and Alternative Dispute Resolution**

Fall. 3 credits. J. Gross.

An introductory survey that focuses on the U.S. labor arbitration process in the private and public sectors (legal issues, discipline and discharge, contract language interpretation, remedies, and procedures), and on alternative dispute resolution systems in the United States and other countries. Student participation in class discussion is expected and assignments include an original research paper.

**ILRCB 384  Women and Unions (also listed as WOSMMS 384)**

Fall or spring. 4 credits. I. DeVault.

This course explores women's participation in the United States labor movement in the nineteenth and twentieth centuries. Issues covered include women workers' relations with male-dominated union movements, the role of cross-class alliances of women in organizing women workers, interactions with radical parties and organizations, problems faced by women union leaders and activities, and others.

**ILRCB 385  The African-American Workers, 1865-1910: The Rural and Urban Experience**

Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. N. Salvatore.

Examines the history of blacks in America from Emancipation through the experience of the first generation born after slavery, with a focus on the work experience. Topics include the restructuring of work during Reconstruction, the relationship between work and black organizational development, between black and white workers, and the nature of work in the agricultural south and in cities throughout the nation.
why individuals volunteer labor and raise and distribute money. Topics include the effect of migration and urbanization on black workers; the nature of the relationship between black and white workers as influenced by the depression and the two world wars; and an examination of the effect of the Civil Rights movement on the economic circumstances of black workers.

ILRCB 400 Union Organizing
Spring. 3 credits. Prerequisites: under­graduates, ILRCB 201 and 300; graduate students, ILRCB 500 and 501. K. Bronfenbrenner.

Explores various aspects of unions: attempts to organize workers; including why some workers join unions and others do not; strategy and tactics implemented by unions and management during organizing campaigns; present status of labor law as it affects organizing; creative approaches to union organizing; and the organizing model of unionism.

ILRCB 401 My Brother's Keeper: Volunteerism and Philanthropy
Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.

The philosophy, practice, economics, and law of volunteer labor and donating money. Issues addressed include altruism versus self interest; why individuals volunteer labor and raise and donate money; the structure and practices of charitable organizations; the economic effects of voluntary philanthropic gifts; and the law of raising and distributing money.

ILRCB 404 Contract Administration
Fall. 3 credits. Prerequisites: ILRCB 300 and 201 or ILRCB 500 and 501. K. Bronfenbrenner.

This course focuses on the practice, nature, and challenges of union representation under collective bargaining agreements. Working with union contracts, constitutions, and bylaws from a diversity of national and local public and private sector agreements, the course examines how U.S. unions represent their members in different industries and different collective bargaining environments. Issues addressed include union representative/steward rights and responsibilities, contract enforcement structures and practice, access to information, new work systems, hours of work and scheduling, contingent staffing arrangements, workplace discrimination, health and safety, promotional opportunities, downsizing, leadership development, membership involvement and commitment, internal organizing and community coalition building, and decertification campaigns. Students practice hands-on work in interpreting contract language and preparing and presenting grievances and unfair labor practices.

ILRCB 405 Negotiation and Dispute Resolution
Fall and spring. 3 credits. Prerequisites: background in economics and the social sciences, or permission of instructor. D. Lipsky, R. Seher.

Course deals with three related topics: (1) the theory and practice of negotiation and bargaining, particularly between groups and organizations, with a focus on process, power, and participation; (2) third-party dispute resolution, with a focus on mediation and arbitration; and (3) alternative dispute resolution (ADR), with a focus on its current use in the corporate sector and in employment disputes. Course also covers the implications of a dispute resolution system of justice. ILRCB 405 is a generic dispute resolution course. Focus is not on labor relations or collective bargaining or on any particular class of disputes, but rather the course deals with the use of conflict resolution techniques in a variety of settings. The first half of the course emphasizes conceptual and theoretical principles useful in understanding negotiations. The second half of the course concentrates on the use of third parties in resolving disputes, especially arbitrators and mediators. The course uses simulations and mock bargaining exercises to illustrate theoretical and practical principles and to provide students with opportunities to gain insight and experience in negotiations and dispute resolution.

ILRCB 407 Contemporary Trade Union Movement
Spring. 3 credits. Prerequisites: under­graduates, ILRCB 100, 101; graduate students ILRCB 502. R. Seher, R. Hurd.

An examination of contemporary trade union issues, including union power, political action, collective bargaining approaches, and organizing efforts. The course covers structural, functional, and strategic aspects of contemporary unions. Speakers from the union movement will address the class.

ILRCB 482 Ethics at Work
Fall or spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.

Major theories of ethics are examined, then applied to issues in the employment relationship such as genetic screening of job applicants, random drug testing of employees, affirmative action for off-duty conduct, whistle-blowing, worker safety and cost/benefit analysis, comparable worth, strikes by employees providing crucial services, and crossing a picket line.

ILRCB 488 Liberty and Justice for All
Fall or spring. 3 credits. Prerequisite: junior or senior or permission of instructor. M. Gold.

Major theories of ethics are examined, then applied to contemporary issues such as affirmative action and reverse discrimination, the right to life (from abortion to capital punishment), comparable worth, and constitutional rights such as freedom of speech.

ILRCB 495 Honors Program
Fall and spring (yearlong course). 3 credits each term. Admission to the ILR senior honors program may be obtained under the following circumstances: (a) students must be in their senior year and have completed 20 percent of their class at the end of their junior year; (b) an honors project, entailing research leading to completion of a thesis, must be proposed to an ILR faculty member who agrees to act as thesis supervisor; and (c) the project, endorsed by the proposed faculty sponsor, is submitted to the Committee on Academic Standards and Scholarships. Accepted students embark on a two-semester sequence. The first semester consists of determining a research design, familiarization with key works in scholarly literature and preliminary data collection. The second semester involves completion of the data collection and preparation of the honors thesis. At the end of the second semester, the candidate is examined orally on the complete thesis by a committee consisting of the thesis supervisor, a second faculty member designated by the appropriate department chair, and a representative of the Academic Standards and Scholarship Committee.

ILRCB 497–498 Internship
Fall and spring. 497, 3 credits; 498, 6 credits. Staff.

All requests for permission to register for an internship must be approved by the faculty member who will supervise the project and the chairperson of the faculty member's academic department before submission for approval by the director of Off-Campus Credit Programs. Upon approval of the internship, the Office of Student Services will register each student for 497, for 3 credits graded A+ to F for individual research, and for 498, for 6 credits graded S/U, for completion of a professionally appropriate learning experience, which is graded by the faculty sponsor.

ILRCB 499 Directed Studies
Fall and spring. 3 credits. For individual or group research projects conducted under the direction of a member of the ILR faculty, in a special area of labor relations not covered by regular course offerings. Sophomores, juniors and seniors with a preceding semester of 3.0 term average, are eligible to submit projects for approval by the Academic Standards Committee. Students should consult with a counselor in the Office of Student Services at the time of course enrollment in order to arrange for formal submission of their Directed Study.

ILRCB 500 Collective Bargaining
Fall. 3 credits. Open only to graduate students. Recommended: ILRCB 501 taken previously or concurrently. M. Cook, H. Katz, S. Kuruvilla, L. Turner.

A comprehensive introduction to the industrial relations system of the United States. The negotiation, scope, and day-to-day administration of contracts; union and employer bargaining structures; implications of industrial relations issues for U.S. competitiveness and public policy, industrial conflict, and U.S. industrial relations in international and comparative perspective.

ILRCB 501 Labor and Employment Law
Fall. 3 credits. Open only to graduate students. M. Gold, R. Lieberwitz, K. Stone.

A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework in which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.
ILRCB 502 History of Industrial Relations in the United States since 1865
Spring. 3 credits. Open only to graduate students. C. Daniel, I. DeVault, N. Salvatore.
This introductory course surveys historical developments in the twentieth century. Special studies include labor union struggles over organizational alternatives and shifts in the workplace, focusing on issues of working-class style, radicalism, welfare, and social justice. Classroom discussions and student research projects use novels and short stories (as well as the literature of industrial and labor relations) to explore issues such as discrimination, law, economics, and the state; work and business; power, conflict, and protest; and rights and justice.
ILRCB 609 Special Topics: Labor Law Policy Seminar
Spring. 3 credits. K. Stone.
The United States' collective bargaining system, which had its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars of both the right and the left, and at the same time the decline in the labor movement has undermined its political support. This seminar looks at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Among the topics to be discussed are: the theory of regulation embodied in the National Labor Relations Act and its critique; alternative concepts of labor markets and their policy ramifications; the emergence of the global economy and its ramifications for domestic labor regulation. There are also discussions of alternative systems of labor regulation, such as those found in West Germany, Sweden, and Japan.

ILRCB 504 The U.S. Industrial Relations System
4 credits. Offered only in New York City for the M.P.S. Program. Staff.
Examines the development, operation, and outcomes of the U.S. industrial relations system in a comparative context. Specifically, the course contrasts the American experience with industrial relations institutions and outcomes with the experience of several other countries in Europe and Asia. Students look at the process of union formation, the practice of collective bargaining at different levels, the methods of dispute resolution, and the legal regulatory framework to industrial relations. The course also focuses on both processes and outcomes of different country systems, focusing on the degree of collaboration or conflict, wage levels and wage inequality, and practices in different industries and firms. Finally, the role played by industrial relations and human resource policy in economic and social development in these nations is addressed.

ILRCB 602 Arbitration
Fall and spring. 4 credits. Limited to 21 students. Prerequisites: undergraduates, ILRCB 201, 300; graduate students, ILRCB 400 and 501; permission of instructor. I. Gross, R. Lieberwitz.
A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the handling of materials in briefs or oral presentation, the conduct of a mock arbitration hearing, and the preparation of arbitration opinions and post-hearing briefs.

ILRCB 603 The Economics of Collective Bargaining in Sports
Fall or spring. 3 credits. L. Kahn.
Surveys economic and industrial issues in the sports industry. Topics include: salary determination, including free agency, salary caps, salary arbitration; competitive balance and financial health of sports leagues; anti-trust issues in sports; labor disputes, union history, and contract administration issues in sports leagues; discrimination in sports; and performance incentives.

ILRCB 604 Theories of Equality and Their Application in the Workplace
Fall or spring. 3 credits. R. Lieberwitz.
An examination of the various aspects of equality in the workplace, focusing on issues of race, gender, and national origin, and the ways in which societal discrimination on these bases are institutionalized in the workplace. Theories attempting to define "equality" and specific workplace issues are studied, including the means for achieving equality at the workplace. The course entails a high level of student participation in class discussions, and assignments include a research paper.

ILRCB 605 Readings in the History of Industrial Relations in the United States
Fall. 3 credits. Limited to seniors and graduate students. C. Daniel, I. DeVault, N. Salvatore.
An intensive seminar covering original printed sources and scholarly accounts for different periods in American history.

ILRCB 606 Theories of Industrial Relations Systems
Fall or spring. 3 credits. Limited to seniors and graduate students. Prerequisites: seniors, ILRCB 100, 101, 300; graduate students, ILRCB 500. H. Katz.
This course traces the evolution of theory and research on industrial relations. Topics include: theories of the labor movement; institutional models and evidence regarding what unions do; the origins of internal labor markets and their relationship with unionization; models of strikes; empirical assessments of arbitration; research on union decline; and empirical evidence of the impacts of new technology.

ILRCB 607 Values in Law, Economics, and Industrial Relations
Fall and spring. 3 credits. Limited to 21 students. Prerequisites: ILRCB 201, 300, 500, 501. J. Gross.
An examination of the often hidden values and assumptions that underlie the contemporary U.S. systems of justice, for the law, work and business, and industrial relations. Classroom discussions and student research projects use novels and short stories (as well as the literature of industrial and labor relations) to explore issues such as discrimination, law, economics, and the state; work and business; power, conflict, and protest; and rights and justice.

ILRCB 608 Special Topics in Collective Bargaining, Labor Law and Labor History
Fall. 3 credits. Prerequisites: ILRCB 201 or 501 or permission of instructor. M. Lieberwitz
Lec 03—An advanced labor law course which builds on the foundation of the study of labor law in the required labor and employment law course. The class is an in-depth study of labor law, with particular focus on the National Labor Relations Act, including issues of organizing across different occupational groups, collective bargaining, strikes, picketing, and contract enforcement. The course also includes a study of legal issues of union democracy and other labor and employment law issues.

ILRCB 608 Collective Bargaining Simulation
Fall. 3 credits. Open only to juniors, seniors, and graduate students. Limited to 14 students. One extended bargaining session is required. H. Kramer.
Lec 04—After a brief introduction to negotiations techniques, participants take part in a simulated negotiation, set in a hypothetical company and union environment (for 2001 in the chemical company) with a moderately sized bargaining unit, either as members of a management or a union team. The course stresses the process of negotiations over their outcome. Negotiation problems are highly realistic, with attention given to dynamic legal, economic, political, and communication concerns. Participants plan for negotiations, cost proposals, negotiate contract language, and bargain wages, benefits, and other economic items, in the context of a company and union with an established contract, history, policies, and culture (which are supplied by the course leaders). Students are required to read, "Game, Set, Match—Winning the Negotiations Game," before the primary thrust is on using practical methods for managing the negotiation process. This is a participation based hands-on course. Students wishing merely to observe should not take this program. There is a group planning paper requirement. This course is recommended for graduate and undergraduate students who have taken or who are taking collective bargaining and labor law. Participants are required to adhere to high standards for "completed stuff work."

ILRCB 609 Special Topics: Labor Law Policy Seminar
Fall or spring. 3 credits. I. DeVault.
A seminar on industry specific labor law issues. Prerequisites: ILRCB 201, 501, or permission of instructor. Classroom presence and participation are mandatory.
This course can be taken either before or after ILRCB 656. There are considerable reading responsibilities. L. Adler.

The approach taken is similar to ILRCB 656, but the subject matter differs. The subject studied includes employment at will and its exceptions; the role of the Constitution in the US workplace; the law of electronic and traditional privacy at work; and the slowly evolving rights of contingent workers in the old and new economies. One study primarily reviews federal and state court decisions and focuses upon the way that employees' rights are advanced or constricted by law.

ILRCB 656 Employment Law II
Spring. 3 credits. Prerequisites: ILRCB 201, 501, or permission of the instructor. Classroom presence and participation are mandatory. This course can be taken either before or after ILRCB 655, L. Adler.

The approach taken is similar to ILRCB 655, but the subject matter differs. The areas covered include the meaning and validity of pre-employment arbitration agreements; the critical distinctions in the status and thus the rights of employees, independent contractors, and contingent workers; what rights the working poor, the homeless, and workfare individuals have on the "job" and the origin and application of the workers compensation laws that apply when people are injured or contract disease from their work. One study primarily reviews federal and state court decisions and focuses upon the way that employees' rights are advanced or constricted by law. There are considerable reading responsibilities.

ILRCB 682 Seminar in Labor Relations Law and Legislation
Fall or spring. 3 credits. Limited enrollment. Prerequisite: permission of instructor. R. Lieberwitz.

This course covers legal problems in public employment and other areas of labor relations affecting the public interest.

ILRCB 683 Research Seminar in the History of Industrial Relations
Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 100 and 101, graduate students, ILRCB 502. C. Daniel, I. DeVault, N. Salvatore.

Areas of study are determined each semester by the instructor offering the seminar.

ILRCB 684 Employment Discrimination and the Law
Fall or spring. 3 credits. Prerequisite: ILRCB 201/501 or equivalent. M. Gold, R. Lieberwitz.

An examination of the laws against employment discrimination based on race, color, religion, sex, national origin, age, and disability.

ILRCB 685 Research Seminar on Trade Unions
Fall or spring. 3 credits. Prerequisite: ILRCB 300 or 500, permission of instructor. S. Novella.

Designed to provide an analytical survey of research on trade unions in the United States. Major topics include unions in politics, unions as complex organizations, public opinion and attitudes toward unions, determinants of union growth and decline, economic and noneconomic effects of unions, internal union government, and commitment and participation in trade union activity. This is a research-oriented course.

ILRCB 686 Collective Bargaining in the Public Sector
Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 300 and 201; graduate students, ILRCB 500 and 501.

Staff. An examination of the development, practice, and extent of collective bargaining between federal, state, and local governments and their employees. The variety of legislative approaches to such matters as representation rights, unfair practices, scope of bargaining, impasse procedures, and the strike against government are considered along with implications of collective bargaining for public policy and its formulation.

ILRCB 689 Constitutional Aspects of Labor Law
Fall or spring. 3 credits. R. Lieberwitz. In-depth analysis of the Supreme Court decisions that interpret the United States Constitution as it applies in the workplace. This study focuses on the First Amendment, Fifth Amendment, Fourteenth Amendment, and Commerce Clause, with issues including freedom of speech and association, equal protection, due process, and other issues in the area of political and civil rights. The course entails a high level of student participation in class discussion, and assignments include a research paper.

ILRCB 703 Theory and Research in Collective Bargaining
Spring. 3 credits. Open to graduate students who have taken ILRCB 500 and ILRCB 723 or their equivalents. Recommended: a statistics course beyond the level of ILRST 510.

Staff. This is a second-level course in collective bargaining that builds on the institutional research covered in ILRCB 500. The existing literature in the area of collective bargaining is appraised for its theoretical and empirical content. Efforts are made to explore the appropriate role for theory and empirical analysis in moving research in collective bargaining toward a more analytical perspective, and to ascertain the underlying paradigms used to study collective bargaining-related issues.

ILRCB 705 The Economics of Collective Bargaining
Spring. 3 credits. Prerequisites: ILRCB 500; ILRLE 540 (or their equivalents) and an understanding of multiple regression analysis, or permission of instructor. Staff.

Focuses on both the economic analysis of unions and collective bargaining in our economy and on the economic forces that affect collective bargaining. The method is to identify and compare the structural determinants of relative bargaining power. On this basis, the course examines both the economic outcomes of collective bargaining and current bargaining trends in a variety of industries. Tentative empirical analyses (neoclassical, institutionalist) are compared. The statistical techniques and empirical results of research on the union effect on economic outcomes (wages, prices, inflation, profits, productivity, earnings inequality) are analyzed. The effect of technology, corporate structures, and public policy on union bargaining power is outlined, and a number of case studies of collective bargaining in the private sector are reviewed. A term paper is required.

ILRCB 708 Negotiations in Practice (also LAW 672)
Fall. 3 credits. S. Kuruvilla.

This course aims to provide opportunities for class participants to develop their negotiating abilities for use in organizational and other settings. The course is premised on the assumption that negotiating concepts are best learned through practice which is grounded in rigorous analysis and reflection. While theoretical principles and concepts from various reference disciplines (such as social psychology, sociology, and economics) are presented through lectures and readings, this course focuses primarily on improving practical skills. Class participants not only learn to enhance their individual abilities in dyadic and group situations, but also learn to analyze contexts for the most effective application of these skills.

ILRCB 783 Seminar in American Labor History (also HIST 683)
3 credits. Graduate students only. Permission of instructor required. A research paper is required. N. Salvatore.

This course explores the relationship of scholarly biographical writing to the field of American social history. More and more biographical biographies look to incorporate social analyses at the center of their biographical structures. Students read, discuss, and analyze the varied strengths and weaknesses of a number of these efforts. The author's understanding of the play between biographical subject and the larger social context, and its meaning for the structure of the book, are a point of inquiry that encourage numerous approaches and interpretations.

ILRCB 790 ILR M.P.S. Program
Fall and spring. 1-9 credits. Staff. Supervised research only for those enrolled in the ILR M.P.S. program.

ILRCB 798 Internship
Fall and spring. 1-3 credits. Designed to grant credit for individual research conducted under the direction of a faculty member by graduate students who have been selected for an internship. All requests for permission to register for ILRCB 798 must be approved by the faculty member who will supervise the project.

ILRCB 799 Directed Studies
Fall and spring. Credit TBD. Designed to provide a forum for the presentation of current research being undertaken by faculty members and graduate students in the Department of Collective Bargaining, Labor Law, and Labor History. Students who are at work on their theses are strongly urged to enroll. Each student in the course is expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.
HUMAN RESOURCE STUDIES

ILRHR 260 Human Resource Management
Fall. 3 credits. Open only to ILR students; others by permission. Q. Roberson.
An overview of the management of human resources in organizations. Topics include human resource decisions dealing with staffing, training and development, performance management, compensation, and employee relations. Emphasis is on: problem-solving and decision-making approaches; operational methods, technologies, and practices; application of relevant behavioral science theory and research; and legislation and other environmental constraints having an important bearing on the effective utilization of human resources by an enterprise.

ILRHR 266 Personal Computer Basics
Fall, spring, and summer. 2 credits. Limited to 200 S-U only. J. Bishop.
Provides basic skills in the use of personal computers using the Windows environment. Course covers the basics of Lexis Nexis, Windows, Microsoft Excel, Access, and Powerpoint. Emphasis is placed on hands-on experience using software demonstrating human resource issues and PC-based solutions. This course is a prerequisite to several advanced Human Resource Management electives.

ILRHR 360 Human Resource Economics and Public Policy
Fall and spring. 3 credits. Open to sophomores, juniors, and seniors. V. Briggs, J. Bishop.
A review of labor-market trends, data collection systems, and theories pertaining to public efforts to develop the employment potential of the nation's human resources and to combat unemployment. The major segments of the nation's educational training enterprise (e.g. public education, higher education, employer-provided training, apprenticeship, and special training programs for the economically disadvantaged) are examined. The course examines programmatic issues pertaining to such groups as youth and disabled rural workers. It also covers public policies pertaining to welfare reform, direct job creation, worker relocation, economic development, targeted tax credits, and "empowerment zone" proposals. Comparisons are made with other industrialized nations.

ILRHR 362 Career Development: Theory and Practice
Fall, spring. 2 credits. 7 weeks. Limited to 32 S-U only. J. McPherson.
This course covers the components of career management, individual factors and organizational realities in the development of both careers and organized programs for career management. Two complementary learning tasks are required, information-gathering for career decision making based on self-assessment activities, and comprehension of organizational circumstances and practices encountered as careers develop. Grades are based on self-assessing assignments and a research paper.

ILRHR 363 Leadership Seminar for Fraternities and Sororities
Spring. 2 credits. S-U only. Permission of instructor. Staff.
Provides seniors with an opportunity to develop their leadership and management skills. The philosophy of the class is that fraternity and sorority houses are small businesses and the leadership must be capable of effective managing and leading in order for them to succeed. The learning method are "hands on" with participants working on weekly assignments that involve the application of lessons learned to their current job duties. Students participate in role plays, class discussions, meetings with guest speakers, and debriefing sessions where they report the results of using the material obtained from class in their current situations.

ILRHR 366 Women at Work
Spring. 3 or 4 credits. Prerequisite: ILRHR 260 or equivalent. J. Farley.
This course covers various aspects of female occupational roles in the 21st century United States. Historical, social, and legal factors that influence women's choice of careers, work socialization and training, and subsequent labor-market experience are considered. Working women's entry-level jobs, opportunities for advancement, and income are compared to men's.

ILRHR 456 International Human Resource Management
Fall. 3 credits. Staff.
Provides an examination of international human resource management issues in multinational enterprises. The course has two major objectives: to enhance understanding of key strategic and functional issues related to IHRM, and to develop analysis of practical IHRM issues in multinational enterprises. Includes topics such as strategic issues for IHRM, cross-cultural management issues, coordination issues, and expatriate management.

ILRHR 460 Human Resource Strategies for Entrepreneurial Firms
Spring. 3 credits. Open to juniors and seniors. Prerequisites: ILR 260 or permission of instructor. C. Collins.
Explores the human resource problems and solutions specific to start-up firms and growing entrepreneurial organizations. Over the course of the semester, students integrate their knowledge of the functional areas of human resource management with general management, business strategy, entrepreneurship, accounting/finance, marketing, public relations, and small business management. Course material and creative solutions to problems are communicated to the class through lecture, class and group discussions, and oral presentations. The emphasis for the course is on the integration of concepts, application to real-life business situations, and the acquisition of general management skills and knowledge.

ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives
Fall or spring. 3 credits. Prerequisite: ILR 260 or equivalent and consent of instructor. L. Dyer.
Seminar designed to explore the state of knowledge and current research concerning the design and development of alternative work systems. The focus is on understanding alternative approaches to work restructuring and their differential effects on firm competitiveness and employee welfare. The first half of the course considers classic texts on mass production, flexible specialization, sociotechnical systems, diversified quality production, and lean production. It compares these workplace models in their original national contexts and in subsequent transplants. Relevant research from economics, engineering, organizational behavior, human resources, and industrial relations is examined. The second half of the course considers these alternative approaches to restructing in the context of specific manufacturing and service industries and occupational groups. Students are required to hand in weekly memos covering the readings, actively participate in seminar discussions, and write two research papers on topics relevant to the course.

ILRHR 462 Staffing, Training, and Development
Spring. 3 credits. Prerequisites: ILRHR 260 or permission of the instructor. C. Collins.
This course provides an overview of the staffing, training, and development functions in organizations. The first half of the semester focuses on the process by which organizations fill positions. Topics include legal issues, job/competency analysis and planning, external selection practices, and internal staffing decisions. The second half of the semester focuses on the process by which organizations train and develop employees. Topics include training needs assessment, program design, training evaluation, and management development practices. Throughout the semester students examine the relationship between the staffing and training/development functions.

ILRHR 463 Employee Relations and Diversity
Fall. 3 credits. Q. Roberson.
Explores the policies, programs and practices used by employers to promote the fair treatment of employees, especially those not covered by collective bargaining contracts. Includes such policies as organizational justice and the protection of employees' rights of such programs as work/life balance, and worker health and safety, and elements of such practices as employee communication and conflict resolution. Also examines individual and organization climate factors that are important to the management of diversity in business organizations. Considers variations in employee relations and diversity management practices and the effects of these practices on relevant individual and organization outcomes.

ILRHR 464 Business Strategy
Fall. 3 credits. C. Collins.
Intended to be an integrative course focusing on strategic management. The main purpose of the course is to provide an opportunity for students to study and analyze issues associated with strategic thinking in complex business situations, top management decision making, and the functions of corporations as a whole. Allows students to bring together all of the functional skills they have learned in other business or related classes (e.g., marketing, accounting, finance, human resources, etc.) and to apply this knowledge to business problems faced by top management in existing organizations. Class is comprised of both a lecture and case study format.
ILRHR 466 Comparative Human Resource Management
Fall. 3 credits. Not offered 2001-2002. Staff.
Provides a survey of human resource management practices in two key regions: Europe and the Asia-Pacific region. Focus of this course is on HRM issues such as selection and staffing, training and development, and appraisal and reward systems. Special attention is given to HRM trends and developments. Issues of transferability of HRM practices, and implications for multinational enterprises operating in those regions, is also discussed.

ILRHR 468 Human Resources Management Simulation
Spring. 2 credits. Limited to 30 juniors and seniors. Prerequisite: ILRHR 260 or equivalent. 7 weeks. W. Wasmuth.
Uses a simulation model and an open-systems approach as means to enhance students' skills in strategic planning and managerial decision making. Attention is given to the implications and efforts of HRM, human resource managerial and supervisory decisions as measured by 10 organizational performance indicators, including quality of work life, employee productivity, customer satisfaction, employee retention, internal control, and the bottom line. Each student is assigned to a group (team) of five members and must be committed to the work of that group. An individual research paper is also required. Regular attendance is required.

ILRHR 469 Immigration and the American Labor Force
Fall and spring. 3 credits. W. Briggs.
Assesses the role that immigration policy plays as an instrument of human resource development in the United States. Immigration policy will be placed in an evolutionary context but primary attention will be given to the post-1965 revival of mass immigration. In addition to legal immigration, policies pertaining to illegal immigration, border commuters, "maquiladoras," refugees, asylees, and nonimmigrant workers are also examined. Comparisons are also made with immigration systems of other nations.

ILRHR 495 Honors Program
Fall and spring (yearlong course). 3 credits each term.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 497-498 Internship
Fall and spring, 3 and 6 credits.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 560 Human Resource Management
Fall and spring. 3 credits. Open to graduate students only. Q. Roberson.
A survey course covering the major areas of the management of human behavior in work organizations. Consideration is given to aspects of strategic human resource management. Focus includes training and development, performance management, compensation, and employee relations. Emphasis is on exploring these issues from both strategic and operational levels to increase organizational effectiveness.

ILRHR 564 Human Resources Management in Effective Organizations
Fall or spring. 4 credits. Offered only in New York City for the M.P.S. Program. Staff.
This course offers the opportunity to become better prepared to make effective decisions about human resources. Successful organizations depend on people: their human resource strategies and human resources. The first module examines strategic human resource management and the effects of HR decisions on organization success and fair treatment of people. The second module focuses on alternative systems used to staff and develop people. The third module focuses on compensating and rewarding people. The final module includes employee relations and alternative work systems. Case and field studies are used throughout the course.

ILRHR 565 Research on Education Reform and Human Resource Policy
Spring. 3 credits. J. Bishop.
State and local efforts to improve K-12 education are employing a variety of (sometimes contradictory) reform strategies. A research seminar that will critically examine the case that is made for (and against) each of the major reform proposals and review studies that provide objective evidence on their effectiveness. The education reform strategies that will be examined include: vouchers, charter schools, site-based decision making by teachers and other staff, direct instruction versus discovery learning, extending the school day and year, better preparation and selection of new teachers, better professional development, ending tenure, merit pay, state standards and school accountability, ending social promotion, and externally set end-of-course examinations.

ILRHR 566 Strategic HR Metrics
Fall. 4 credits. Limited. Prerequisite: ILRHR 260/560 or equivalent, plus two functional courses in HR management. Enrollment limited. L. Dya.
Organizational agility is defined as the capacity to be infinitely adaptable without having to change. It is a core competence for organizations operating in rapidly moving marketplaces. Accordingly, an increasing number of organizations are striving to become more agile by inventing new ways of managing all aspects of organizational capability. This course explores the opportunities and challenges posed by organizational agility, with particular emphasis on crafting human resource strategies that support this evolving paradigm. Every effort is made to run the course as an agile organization rather than using a traditional classroom format.

ILRHR 567 Employee Relations and Diversity
Spring. 4 credits. Prerequisites: ILRHR 260/560 or equivalent and permission of instructor. Q. Roberson.
Explores the policies, programs, and practices used by employers to promote the just and
human treatment of employees, especially employees not covered by collective bargaining contracts. Includes such policies as organizational justice and the protection of employee rights; such programs as work/life balance, worker health and safety; and elements of diversity management practices; the motives of employers in implementing such practices; and strategies for leveraging these practices to increase organization effectiveness.

ILRHR 668 Staffing Organizations
Spring. 3 credits. Prerequisites: ILRHR 260/560 and one course in statistics or permission of instructor. C. Collins. Seminar providing an overview of the processes by which organizations staff positions with both internal and external applicants. Because staffing is one of the primary human resource activities, it is critical for human resource professionals to understand how theory, research, and legal foundations can inform staffing decisions. Therefore, this course focuses on theories, research, policies, and practices concerning job recruitment and selection. Topics covered include staffing strategy and context, measurement of staffing effectiveness, job/competency analysis, human resource planning, recruitment, and job choice, and internal and external selection practices.

ILRHR 669 Managing Compensation
Fall. 4 credits. Limited to 30 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 260 and basic statistics or permission of instructor. Not offered 2001. G. Milkovich. Focuses on managing employee compensation in organizations. The major objectives are: to examine the current state of compensation decision making, to examine how recent theoretical and research developments inform compensation decisions, and to offer an opportunity to develop competencies in making compensation decisions.

ILRHR 671 Seminar in Manufacturing
Spring. 15 credits. R. Bank. Semester in Manufacturing ("SIM") is designed to give students a basic understanding of the fundamentals of manufacturing, as well as a broad overview of current issues and trends. The 15-credit immersion format allows development of manufacturing to other functions in the enterprise (research and development, marketing, corporate strategy, human resources, etc.). A highlight of SIM is that each student visits more than 20 manufacturing facilities during the semester, representing diverse sets of products, processes, and manufacturing strategies. These visits include extended discussion sessions with management, and often union representatives, as well as a factory tour. Visits bring the "real-world" perspective to the course. SIM is built around five basic themes. The 15-credit immersion format allows each theme to be discussed in depth, and the interrelationships between these themes to be developed over the semester, giving students a broad understanding of how an enterprise functions.

ILRHR 690 Comparative Human Resource Management
Fall. 3 credits. Prerequisites: ILRHR 260/560, or permission of instructor. Not offered 2001-2002. Staff. Surveys human resource practices in two key regions of the world: Western Europe and the Pacific Rim. The focus is on HR issues related to management of professional and managerial work force, such as selection and staffing, development, and appraisal and reward systems. Special attention is given to current changes and trends in the human resource management area (e.g., unification of Europe, transformation of Japanese firms). Implications for multinational operating in these countries is also discussed.

ILRHR 692 Training the Displaced and Disadvantaged
Spring. 3 credits. Prerequisite: permission of instructor. J. Bishop. Examines public and private efforts to lower unemployment and underemployment of displaced and disadvantaged workers. The seminar will cover the scope of the problem, its causes, and why specific programs have worked and others have not. Topics covered include training for displaced workers, rehabilitation of the disabled, job-search training, tax credits for hiring, vocational training, literacy instruction, EEO, public service employment, assisting new business, and industrial policy. The seminar also investigates how the structure of the economy influences the ability of targeted training and job creation to achieve sustained reductions in unemployment and draws lessons from the experience of other societies.

ILRHR 693 Training and Development in Organizations
Spring. 3 credits. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics or permission of instructor. M. Cavanaugh. The purpose of this course is to acquaint students with aspects of learning in organizations. We begin by discussing organizational learning, and then focus more narrowly on specific ways in which learning is achieved through the training and development functions. Topics covered include: how learning is linked to organizational strategy, how to determine that training is needed, issues regarding the design of training programs, current training techniques, evaluation strategies, and management development practices.

ILRHR 695 Education, Technology, and Productivity
Fall. 3 credits. J. Bishop. This seminar investigates the nexus between the education and training in schools and at the workplace and the technological progressiveness, productivity, and competitiveness of firms, individuals, and nations. Students investigate: how technological progress is changing the nature of work and what this implies for reform of education and training; whether productivity has increased so little in the past two decades; how education and training contribute to growth and competitiveness; whether educational achievement has declined; and how the responsibility for education and training should be apportioned among individuals, firms, private nonprofit organizations, and government.

ILRHR 697 Special Topics in Resource Studies
Fall or spring. 3 credits. Staff. Areas of study are determined each semester by the instructor offering the seminar.

ILRHR 698 International Human Resource Policies and Institutions
Spring. 3 credits. J. Bishop. A comparative study of human resource policies and institutions in Western Europe, North America, Japan, and East Asia (with special emphasis on math and science education) and of the effects of these institutions on productivity, growth, and equality of opportunity. The institutions studied include primary and secondary education, apprenticeship, employer training, and higher education. Data on the consequences of policies is presented and an effort made to understand the causes of the low levels of achievement of American high school students relative to their counterparts abroad.

ILRHR 760 Seminar in Human Resource Studies
Fall or spring. 3 credits. Prerequisites: ILRHR 560, ILRST 510/511, and ILRHR 669 and permission of instructor. P. Wright. A "floating" seminar designed to give faculty and students an opportunity to pursue specific topics in detail, with an emphasis on theory and research. Topics vary from semester to semester. Interested students should consult current course announcements for details.

ILRHR 765 International Compensation
Spring. 4 credits. G. Milkovich. Seminar focuses on international developments in employee compensation. Recent research, theoretical developments, and specific organizations' practices in a wide variety of countries are considered. Local national practices are the principal focus along with expatriates and the impact of the course draws upon research and theories from sociology, economics, psychology, and other disciplines. Four operative terms are seminar, comparative, compensation, and organization. Students should come to each session prepared to be active players in discussions. The focus is comparative, including research, theory, and practices of specific enterprises in different countries. Compensation includes all forms of pay including cash, benefits, allowances, and so on. Primary focus is at the organization level of analysis.

ILRHR 769 Topics in International Compensation Theory and Research
Spring. 4 credits. Prerequisite: ILRHR 669. G. Milkovich. Examines recent developments in theory, research, and practice related to compensation. Discussion emphasizes the relevance of theory and research to compensation decision making. Students examine compensation and reward-related theories and research from supporting disciplines such as economics, psychology, sociology, and organizational behavior and evaluate their relevance to employee, managerial, executive, and international compensation.

ILRHR 790 IML M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the IML M.P.S. program.
ILRHR 798 Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 799 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 960 Workshop in Human Resource Studies
Fall and spring. 2 credits. Enrollment limited to M.S. and Ph.D. candidates. S-U grades only. Staff.
The workshop is designed to provide a forum for the presentation and critical discussion of current research being undertaken by graduate students, faculty members, and invited guests in the field of human resource studies. All M.S. and Ph.D. candidates in the Department of Human Resource Studies are urged to enroll; candidates in other departments are cordially invited. Each participant has an opportunity to benefit from the collective wisdom of the others in the formulation, design, and execution of his or her research, as well as to become current on the latest developments in the field.

ILRHR 961 Doctoral Research Seminar in Human Resource Management
Fall. 3 credits. Ph.D. candidates only. P. Wright.
This seminar is aimed at reading, understanding, and conducting research in HRM. Students should obtain thorough understanding of the current research in traditional areas of HRM such as validation, job analysis, EEO, selection, performance appraisal, compensation, and training, and should develop the skills necessary to evaluate, criticize, and contribute to the literature on HRM.

ILRHR 962 Doctoral Research Seminar in Strategic Human Resource Management
Spring. 3 credits. Ph.D. candidates only. P. Wright.
Seminar aimed at reading, understanding, and conducting research in SHRM. The course should enable students to obtain a thorough understanding of the current research in Strategic HRM, and to develop the skills necessary to evaluate, criticize, and contribute to the literature on SHRM.

[ILRHR 963 Research Methods in HRM/Strategic Human Resource Management
Designed to build social science research skills, particularly in the area of human resource studies (HRS). Topics include measurement reliability, construct validity, design of studies, external validity, meta-analysis, critiquing/reviewing HRS research, publishing HRS research, and applications of statistical models of HRS issues.]

INTERNATIONAL AND COMPARATIVE LABOR RELATIONS

ILRHR 333 Europe, United States, and Japan in a Global Economy
Fall. 3 credits (1 additional credit may be arranged). L. Turner.
Offers an introduction to the contrasting political economies of Germany, Britain, the European Union, Japan, and the Unites States in today's changing global economy. Emphasis is on national differences and comparisons, and on the different strategies pursued by labor, business, and government in society in the face of growing world trade competition, political conflicts, production reorganization, and labor movement revitalization efforts.

ILRHR 337 Special Topics:
Fall. 3 or 4 credits. Staff.
Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

[ILRHR 339 The Political Economy of Mexico
Explores the range of challenges affecting contemporary Mexican politics, society, and economic development—from democratization to immigration to NAFTA. The course provides both an introduction to Mexican political economy for those with no prior background and an opportunity for students with more knowledge of Mexico to explore a research topic in greater depth.]

ILRHR 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRHR 533 Europe, the United States, and Japan in a Global Economy
Fall. 4 credits. Graduate students. L. Turner.
See description for ILRHR 333. Graduate students attend class, take the midterm, and submit an analytical research paper at the end of the semester.

ILRHR 537 Special Topics
Fall or spring. 3 or 4 credits. Staff.
Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

ILRHR 630 Building a "Social Europe": Regional Integration in the Global Economy
Spring. 4 credits. Seminar designed for graduate students and seniors with permission. L. Turner.
Central questions addressed include: what have the European Union and its member nations done to develop and reform the social dimension in the 1990s and beyond? How are the major actors—labor, government, and business—positioned to influence social policy and industrial relations reform, and what strategies are they pursuing? How doEMU and enlargement affect the effort of European socieities to defend and develop the social dimension of their market economies? What are the prospects for the "Social Europe" in an increasingly deregulated global economy?

ILRHR 631 Comparative Labor Movements in Latin America
Spring. 3 credits. M. Cook.
Examines the historical development of labor movements in Latin America, their role in national political and economic development, and the impact of economic liberalization, authoritarianism, and redemocratization on contemporary labor organizations in the region. Countries examined will include, but are not limited to, Mexico, Brazil, Argentina, Chile, Peru, and Venezuela.

ILRHR 632 Revitalizing the Labor Movement: A Comparative Perspective
Fall. 4 credits. Graduate seminar open to seniors with permission of instructor only. L. Turner.
Examines contemporary efforts in advanced industrial democracies to reform industrial relations. The first half of the course examines contemporary industrial relations' reform efforts in the United States, including innovative organizing strategies; new calls for union militance; business strategies for a "union-free" environment; efforts at labor-management cooperation, and the report of the Dunlop Commission. The second half covers Britain—the Thatcher reforms of the 1980s and the current labor-backed works council movement; France—the Aurox Laws of the 1980s and their effects; and Germany—the transformation of industrial relations in eastern Germany since 1989.

ILRHR 633 Labor, Industry, and Politics in Germany
Fall. 4 credits. Open to seniors with permission and graduate students. L. Turner.
Is the successful postwar "social partnership" model of organized capitalism in the Federal Republic of Germany viable in the twenty-first century? To answer this question, this course covers the works councils and codetermination, the rise of a strong postwar labor movement, the contemporary German version of social partnership, with an emphasis on current events and the new challenges for German industry and labor posed by German unification and the single-European market.

[ILRHR 635 Labor Markets and Income Distribution in Developing Countries
Spring. 4 credits. Prerequisite: ILRHR 240 or Economics 313 or permission of instructor. Not offered 2001-2002. G. Fields.
A course analyzing who benefits and how much from economic growth in developing countries and how income distribution would be affected by various public policies. Topics to be covered include: poverty, inequality, social welfare, and economic growth-theory and evidence; poverty profiles, earnings functions, and decompositions; employment, unemployment, wages, and labor markets; and an introduction to benefit-cost analysis, with application to the economics of education.]

ILRHR 636 Comparative History of Women and Work (also WOMNS 636)
Fall. 4 credits. Permission of instructor. I. DeVault.
Explores the similarities and differences between different cultures' assumptions about the work of women as well as women's experiences in varying work circumstances...
Throughout history. Beginning with theoretical pieces and overviews of the history of women and work, most of the course consists of in-depth examinations of specific work situations or occupations across time and geography. Comparative examples are taken from the United States, Europe, and the Third World.

[ILRIC 637] Labor Relations in Asia
A comparative survey of the industrial relations systems of selected Asian nations such as Japan, South Korea, Thailand, Malaysia, Singapore, Hong Kong, China, and several others. The emphasis is on economic development strategies and industrial relations policies in these countries. Industrial relations practices, the extent of union organization, and labor force demographics of these countries is examined. The primary objective is to provide students with an introduction to industrial relations systems in Asia. The countries chosen are representative, but not exhaustive.

[ILRIC 638] Labor, Free Trade, and Economic Integration in the Americas
Analyzes the contemporary movements toward free trade and regional economic integration in the Western Hemisphere. Special attention is paid to labor’s role in this process. Examines the origins and implications of the North American Free Trade Agreement (NAFTA) and looks at integration schemes in South America (Mercosur), Central America, and the Caribbean, and at hemisphere-wide initiatives. A research paper is required.

[ILRIC 639] Building a Social Europe (also GOVT 736)
Spring. 4 credits. Graduate students or seniors by permission. L. Turner.
This course considers the political, economic, and labor challenges of today’s European Union. Emphasizing efforts to protect and develop a “social market” within the greater deregulated global economy.

[ILRIC 730] Research Seminar on Labor Markets and Economic Development
Fall or spring. 3 credits. Prerequisite: open to M.S. and Ph.D. students only. G. Fields.
Research seminar for students writing theses or dissertations on aspects of labor markets and economic development. Addresses research questions, methodologies, and contributions in the areas of employment and unemployment, income and earnings, educational and human resource development, welfare economics, and economic growth. Presentations and written papers are required.

[ILRIC 739] The Political Economy of Mexico
For course description, see ILRIC 339.

[ILRIC 790] ILR M.P.S. Program
Fall and spring. 1–9 credits.
Supervised research only for those enrolled in the ILR M.P.S. Program.

[ILRCD 799] Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.
Other courses approved to fulfill ILRIC distribution

[ILRCB 304] Latin American Labor History
Fall. J. Cowie.
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

[ILRHR 456] International Human Resource Management
Spring. Staff.
For description, see the section, Human Resource Studies.

[ILRHR 461] The Design of Work Systems: Comparative and Interdisciplinary Perspectives
Fall or spring. R. Batt.
For description, see the section, Human Resource Studies.

[ILRHR 466] Comparative Human Resource Management
Fall. Staff.
For description, see the section, Human Resource Studies.

[ILRHR 469] Immigration and the American Labor Force
Fall and spring. V. Briggs.
For description, see the section, Human Resource Studies.

[ILRHR 690] Comparative Human Resource Management
Fall.
For description, see the section, Human Resource Studies.

[ILRHR 698] International Human Resource Policies and Institutions
Spring. J. Bishop.
For description, see the section, Human Resource Studies.

[ILRL 444] The Evolution of Social Policy in Britain and America
Spring. G. Boyer.
For description, see the section, Labor Economics.

[ILRL 446] Economy History of British Labor 1750-1940 (also ECON 459)
Spring. G. Boyer.
For description, see the section, Labor Economics.

[ILRL 448] Topics in Twentieth-Century Economic History: The Economics of Depression and the Rise of the Managed Economy
Fall. G. Boyer.
For description, see the section, Labor Economics.

INTERDEPARTMENTAL COURSES

[ILRID 150] Freshman Colloquium
Fall. 1 credit. Open only to ILR freshmen. S-U only. Staff.
This course is offered to acquaint new freshman students with some of the issues and disciplines in the field of industrial and labor relations, and establish acquaintanceship among members of the ILR faculty and small, randomly assigned groups of students. The course includes a plant visit and several meetings early in the semester designed to introduce issues encountered in studying the employment relationship.

[ILRID 355] Documentary Research Methodology
Fall. 3 credits. P. Sione.
Critical evaluation of evidence is a fundamental skill for every professional engaged in the processing of information. Lawyers, arbitrators, and human resource managers are asked to find, assess, and use the appropriate sources to build their case, for a legal decision or the formulation of a particular policy. This course helps students develop the ability to analyze a broad range of retrospective evidence, critically evaluate it as to pertinence and accuracy, and place it in a well thought-out and coherent context. It provides research methodology training specifically for professionals in the labor field. Topics are selected from relevant studies in Industrial and Labor Relations.

[ILRID 450] Workplace Diversity: Stepping into the 21st Century
Spring. 1 credit. S-U grades only. Prerequisite: ILR 260 and ILR seniors only. Limited to 50. Staff.
Provides an orientation to diversity in the workplace and to the expectations and challenges presented for future workplace leadership. With an emphasis on hands-on experiential learning, the course begins by familiarizing class participants with current practitioner approaches to diversity awareness training and competency building. Course focuses then shifts to examine diversity as an issue of organizational change. Class participants consider the range of policies, practices, and procedures being used to create workplaces that are both diverse and inclusive. Dialogues among study presentations with invited workplace diversity leaders offer participants an opportunity to learn from an insider's perspective about the experiences, successes, and challenges of making diversity work.

[ILRID 451] Science, Technology, and the American Economy
Spring. 4 credits. Staff.
The industrial revolution did not begin in the United States, but the nation became the world's first technological society. Attention is given to the evolutionary confluence of science, technology, mathematics, religion, and nationalism in the formation of the U.S. economy, its institutions, and its labor force. Primary attention is given to the post-World War II economic developments. The vantage point is the linkage with employment, unemployment, income, and productivity considerations. Public policy issues (such as the employment impact of the computer, research and development policy, national defense influences, the "agricultural revolution," savings and investment rates, and labor force preparedness) are explored. Critical concerns pertaining to environmental impacts, income polarization, and consumerism are also examined.

[ILRID 452] Writing in Industrial and Labor Relations
Fall or spring. 3 credits. J. Farley.
Requires close reading of four or five books related to the term's theme in the field of industrial and labor relations and careful writing about them. Students also have an opportunity to practice writing about the world of work for different audiences.
LABOR ECONOMICS

ILRLE 140 Development of Economic Institutions
Fall. 3 credits. Prerequisite for non-ILR students: permission of instructor.

G. Boyer

Provides students with an understanding of the historical roots of the economic system currently dominant in Western Europe and the United States. The course focuses on the process of European economic growth prior to 1914, the effect of industrialization on labor in Great Britain, and the historical evolution of economic thought from Adam Smith to J. M. Keynes.

ILRLE 240 Economics of Wages and Employment (also ECON 341)
Fall and spring. 3 credits. Prerequisites: Economics 101-102, Economics 313, or permission of instructor.

Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. Considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

ILRLE 340 Economic Security (also ECON 451)
Spring. 3 credits. Prerequisites: ILRLE 240 or equivalent.

Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

ILRLE 440 Special Topics in Labor Economics
Fall or spring. 4 credits. Staff.

An undergraduate seminar whose topic changes depending on semester and instructor.

ILRLE 441 Income Distribution (also ECON 455)
Fall. 4 credits. Prerequisite: ILRLE 240 or Economics 341. R. Hutchens.

Explores income distribution in the United States and the world. Topics to be covered include functional and size distributions of income, wage structure, income-generating functions and theories, discrimination, poverty, public policy and income distribution, and changing income distribution and growth. Students who have taken FAM 370 may not receive credit for 441.

ILRLE 442 The Economics of Employee Benefits (also ECON 456)
Fall. 4 credits. Prerequisites: ILRLE 240 or equivalent. F. Blau.

An in-depth treatment of the economics and financial management and administration of all employee benefits: health care, insurance, retirement income, family-care benefits, executive incentive plans, and other compensation provided as a service or contingent financial package to employees. Detailed international comparisons of health care and retirement systems are included.

ILRLE 444 The Evolution of Social Policy in Britain and America
Spring. 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.

Surveys the history of social policy in Great Britain and the United States from 1800 to the adoption of the British welfare state after World War II. Topics covered include the role of poor relief in the early nineteenth century; the changing relationship between public relief and private charity; the adoption of social insurance programs and protective labor legislation for children and women, government intervention in the Great Depression; and the beginnings of the welfare state.

ILRLE 445 Women in the Economy (also ECON 457 also WOMNS 446)
Fall. 4 credits. Prerequisite ILRLE 240 or equivalent.

Examines the changing economic roles of women and men in the labor market and in the family. Topics include: a historical overview of changing gender roles; the determinants of the gender division of labor in the family; trends in female and male labor force participation, gender differences in occupations and earnings, and the consequences of women's employment for the family.

ILRLE 446 Economic History of British Labor 1750-1940 (also ECON 459)
Fall or spring. 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.

Examines various aspects of British labor history from the beginning of the Industrial Revolution until World War II. Specific topics include: monetary and nonmonetary changes in workers' living standards; internal migration and emigration; the London labor market; the extent of poverty and the evolution of the welfare state; Ludlow and Chartism; and the development of trade unions.

ILRLE 448 Topics in Twentieth-Century Economic History: The Economics of Depression and the Rise of the Managed Economy (also ECON 458)
Spring. 4 credits. Prerequisites: ILRLE 240 or Economics 341. G. Boyer.

Topics covered include: the causes of the Great Depression in the United States; the economics of the New Deal; the causes of high unemployment in interwar Great Britain; the rise of Keynesian economics and the development of demand management policies in Great Britain and the United States after 1945.

ILRLE 485 Honors Program
Fall and spring (yearlong course). 3 credits each term.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 497-498 Internship
Fall and spring. 3 and 6 credits.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 540 Labor Economics
Fall. 3 credits. Prerequisites: Economics 101-102 or Economics 103 or equivalent. Required of graduate students majoring or minoring in labor economics and M.I.L.R. candidates.

Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. The course considers both the demand (employee) and supply (employer) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

ILRLE 544 Labor Market and Personnel Economics

A four-module course, in which the first module covers the basic elements of supply and demand in the labor market, the second and third modules cover the "new personnel economics" (emphasizing economic issues in a firm that relate to selecting, training, assigning, motivating, and compensating workers), and the final module covers key institutions and economic security issues (including unemployment, pensions, disability, discrimination, and unions). The goals of this course are to have students learn to analyze both business and public policy problems, taking into account both basic principles of economic theory and the relevant institutional environments.

ILRLE 642 Economic Analysis of the Welfare State (also ECON 460)
Spring. 4 credits. R. Hutchens.

Uses the tools of public economics to analyze modern welfare states. Although examples are drawn from several countries, the course focuses on the U.S., Canada, and Sweden. What are the rationales for the level of government intervention in these states, and how do these rationales square with notions of market failure? What are the economic costs and benefits of taxes, transfers, and regulations in these states? Can voting models explain the growth and operation of welfare states? The possible answers to these questions are discussed.

ILRLE 648 Economic Analysis of the University (also ECON 342)
Fall. 4 credits.

Seeks to illustrate the complexity of decision making in a nonprofit organization and to show how microeconomic analysis in general, and labor market analysis in particular, can be
usefully applied to analyze resource allocation decisions at universities. Among the topics covered are financial aid, tuition, admissions policies, endowment policies, faculty salary determination, the tenure system, mandatory retirement policies, merit pay, affirmative action, comparable worth, collective bargaining, resource allocation across and within departments, undergraduate versus graduate education, research costs, libraries, athletics, and "socially responsible" policies. Lectures and discussions of the extensive readings are supplemented by presentations by Cornell administrators and outside speakers who have been engaged in university resource allocation decisions or have done research on the subject.

ILRLE 741 Applied Econometrics I
Fall. 4 credits. S-U only. G. Jakubson.
Consider methods for the analysis of longitudinal data, that is, data in which a set of individual units are followed over time. Focus is on both estimation and specification testing of these models. Students consider how these statistical models are linked to underlying theories in the social sciences. Course coverage includes panel data methods (fixed, random, mixed effects models, etc.), factor analysis, measurement error models, and general moment structure methods.

ILRLE 742 Applied Econometrics II
Spring. 4 credits. Letter S-U grades. J. Butler.
Covers statistical methods for models in which the dependent variable is not continuous. Covers: models for dichotomous response (including probit and logit); polychotomous response (including ordered response and multinomial logit); various types of censoring and truncation (e.g. the response variable is only observed when it is greater than a threshold); and sample selection issues. Includes an introduction to duration analysis. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model.

ILRLE 743 Applied Econometrics III
Spring. 4 credits. Letter only. Prerequisites: ILRLE 741-742 or permission of instructor. ILRLE 741, 742, and 743 constitute a Ph.D.-level sequence in applied microeconometrics. G. Jakubson.
Covers topics not covered in ILRLE 741-742, including further development of duration analysis, panel data methods for nonlinear models, quantile regression and related techniques, and an introduction to non-parametric and semiparametric methods. Additional topics as suggested by their use in applied areas of social science. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model. Also develops a general framework for the techniques covered in the ILRLE 741-742-743 sequence.

ILRLE 744 Seminar in Labor Economics I (also ECON 641)
Spring. 3 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics. Course includes reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas are stressed.

ILRLE 745 Seminar in Labor Economics II (also ECON 642)
Fall. 3 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics. Course includes reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas are stressed.

ILRLE 746 Seminar in Labor Economics III (also ECON 643)
Spring. 4 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics. Course includes reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas are stressed.

ILRLE 747 Economics of Education
Spring. 4 credits. R. Ehrenberg.
A survey of the research on a wide variety of issues at the elementary, secondary, and higher education levels. Examples of the issues addressed at the elementary and secondary level are the labor markets for teachers and administrators, educational production functions, class size experiments, financing and voter behavior, special education, and school choice. At the higher education level, issues addressed include public and private funding, financial aid and tuition policies, faculty labor markets and Ph.D. production. While the emphasis is on the American educational system, research from other countries may also be discussed. Interested students other than economics and labor economics Ph.D. students should speak to the instructor before enrolling for the course.

ILRLE 748 Economics of Employee Benefits
Fall. 4 credits. Students in this course attend the lectures in ILRLE 442 (see description for 442) but have additional course requirements. If enrollment warrants, they will also meet separately at a time TBA for discussion of topics in 442 and additional topics.

ILRLE 749 Economics of Development (also ECON 772)
Fall. 4 credits. Students: first-year graduate economic theory and econometric approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development; labor market models; project analysis with application to the economics of education; and development policy.

ILRLE 790 ILR M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

ILRLE 795 Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 799 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 940 Workshop in Labor Economics
Fall and spring. 3 credits. Intended for Ph.D. students who have started to write their dissertations. Presentations of completed papers and work in progress by faculty members, advanced graduate students, and speakers from other universities. Focus is on the formulation, design, and execution of dissertations.

ORGANIZATIONAL BEHAVIOR
P. Tolbert, chair; S. Bacharach, T. Hammer, E. Lawler, M. Lounsbury, W. Sonnenstuhl, R. Stern, L. Williams

ILRLOB 170 Introduction to Micro Organizational Behavior and Analysis: The Social Psychology of the Workplace
Spring. 3 credits. Staff. This introductory (survey) course considers the basic individual and group processes in the workplace. At the individual level, students study personality, motivation, perception, attitude formation, and decision making. On the group level, group dynamics, leadership, power and influence, and culture are emphasized.

ILRLOB 171 Introduction to Macro Organizational Behavior and Analysis
Fall. 3 credits. Staff. The relationship between industry and the economy as a whole and its implications for other social institutions in American society (including stratification, politics, and American values) is discussed. The course moves from classical sociological theory to the analysis of complex organizations. The central focus of the course is the study of industrial organizations and of complex organizations in general, emphasizing authority relations, goals, the division of labor, bureaucracy, and organizational design.

ILRLOB 320 The Psychology of Industrial Engineering
Fall. 4 credits. T. Hammer.
A study of the human factors in the industrial engineering of work, work places, tools, and machinery. The course examines the aspects of individual and social psychology that operate in the work setting and that should be taken into account in the design of jobs. These include limitations of the human sensory system; individual difference in skills, abilities, motives, and needs; group dynamics; intrinsic motivation; job satisfaction; conflict.

ILRLOB 321 Group Solidarity (also SOC 311)
Fall. 4 credits. M. Macy.
What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? This course explores these questions from an interdiscipli- nary perspective, drawing on sociology, economics, and social psychology. Alternative theories of group solidarity are applied to a series of case studies such as: urban gangs, spiritual communities, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.
Theoretical perspectives learned in class during the last two weeks of the course, take a mid-term exam and prepare a research proposal which are discussed and constructed. Simulations model traditional organizations and cooperatives. Games model executive decision making, running a company, and cooperative decision making. Organizational design, decision making, conflict, cooperation, and power are the central topics of discussion. The contrasting bases of power in the organizational life that consolidates many of these expressive forms into one. The course examines types of ceremonial behavior such as rites of passage, rites of enhancement, and rites of degradation, including the role of language gestures, physical settings, and artifacts in ceremonial behavior. The presence of subcultures in organizational behavior will also receive attention, especially the part played by organizational subcultures in formal organizations.

ILROB 370 The Study of Work Motivation
Fall or spring. 4 credits. Open to juniors and seniors. T. Hammer.
Designed to acquaint the student with the basic concepts and theories of human motivation with implications for job design and organizational effectiveness. Focus is on theories of worker motivation and on research approaches and results as they apply to the performance of individuals and groups in formal organizations. Readings are predominately from the field of organizational psychology, supplemented by relevant contributions from experimental and social psychology. Each student designs, executes, and analyzes a research study of his or her own.

ILROB 371 Individual Differences and Organizational Behavior
Fall or spring. 4 credits. Recommended: some acquaintance with the substance and methods of behavioral or social science.
Staff. Examines personality from a comparative psychodynamic point of view. Social behavior, authority relationships, and work motivation are used to illustrate how various theories could be applied to understand behavior and experience in organizations.

ILROB 373 Organizational Behavior Simulations
Fall or summer. 4 credits. Prerequisites: ILROB 170 and 171 or equivalent. Limited enrollment. R. Stern.
Basic principles of organizational behavior are studied through participation and participation in simulation games. Simulations model traditional organizations and cooperatives. Games model executive decision making, running a company, assembly work, and cooperative decision making. Organizational design, decision making, conflict, cooperation, and power are the central topics of discussion. The contrasting bases of power in the organizations permits the study of the assumptions underlying organization structure and process.

ILROB 420 Contemporary Organizational Theories and Practices
Fall or spring. 3 credits. Prerequisites: ILROB 170 or 171. L. Gasser.
An exploration of current practical applications of OB theory in organizations. Using a range of contemporary resources, students sift through theoretical resources, design research tools, manage discussion, meet with managers, consultants, and employees, and explore organizational issues and problems from micro and macro perspectives in a political and legal context. Students also develop a toolbox of knowledge and skills to effectively carry out several organizational interventions or development initiatives. Choice of topics may differ to focus on current issues such as: emotional intelligence, influencing organizational climate and morale, engaging in strategic planning processes, managing large-scale participative techniques, using job or workplace design concepts, applying SWOT analysis, developing effective teamwork, managing diversity, applying quality management tools, etc.

ILROB 421 Regulating the Corporation
Spring. 4 credits. R. Stem.
Examines public and private power from an organizational perspective. The resource-dependence approach to organization-environment relations provides a framework for interpreting government attempts at the regulation of corporate behavior. Topics cover the structure and functioning of government regulatory agencies and corporate responses to regulation, including corporate strategy, change, and political influence. Business ethics and corporate social responsibility are considered along with the role of interest groups such as consumer or citizen organizations. Research and case materials focus on the implementation of environmental protection, occupational health and safety, equal opportunity, antitrust, securities, and consumer regulations.

ILROB 422 Organizations and Deviance
Fall. 3 credits. Enrollment limited to 60. W. Sonnestuhl.
Focuses upon the deviant actions of organizations, including such behaviors as price fixing, environmental pollution, illegal campaign contributions, and discrimination in hiring and promotion. Examines the origins of such behaviors in organizations, the processes by which they become institutionalized, and the processes by which they become defined as deviant organizational actions. Within this context, the course examines such contemporary cases as Exxon’s Valdez oil spill, Iran-Contra, drug testing, and the federal savings and loan scandal. These events raise troubling questions about what it means to live and work in an organizational society, and they cannot be dismissed as instances of a few individuals gone bad.

ILROB 425 Sociology of Industrial Conflict
Fall or spring. 3 credits. R. Stem.
The course focuses on the social, economic, and political causes of industrial conflict. The nature of work and the employment relationship provide the foundation for understanding both individual and collective expressions of conflict in work settings. Worker background, psychological contract, and authority relations set the stage for studying conflict expressions including strikes, labor turnover, absenteeism, sabotage, accidents and illness, theft, violence, and other forms of conflict at work.

ILROB 427 The Professions: Organization and Control
Fall. 3 credits. Prerequisite: permission of the instructor. P. Tolbert.
Focuses on the sources of power and control exercised by professional groups in contemporary society. A number of issues are examined in this context including: the role of professions in society, processes through which an occupational group becomes defined as a profession, sources of control that professional associations have over their members, relations between professionals and nonprofessionals in organizations, and the relationship between unionization and professionalization of occupations.
economies has reinvigorated questions about Asia, Eastern Europe, and Latin America as well as advanced work in organizational behavior. Since World War II, the diffusion of markets in attitudes, motivation, performance, leadership of individuals and groups in organizations. Job ILROB 622 Sociology of Markets (also psychology as these relate to the behavior of ILROB 497-498 Internship Fall. 3 credits. Open to seniors and Fall. 3 credits. Limited. Permission of work and power, group formation, perception, and organizational climate. A preliminary course for advanced work in organizational behavior. ILROB 622 Sociology of Markets (also SOC 622) 3 credits. M. Lounsbury. Since World War II, the diffusion of markets in Asia, Eastern Europe, and Latin America as well as changes in the structure of Western economies has reinvigorated questions about how markets are socially structured. Drawing on the literature in economic sociology, this course explores the social, cultural, economic, and political factors that shape the emergence and dynamics of markets. Among the issues addressed are: the social organization of markets, market discrimination, the co-operative aspects of market formation and functioning, the role of government and other institutional arrangements, the relationship of economic change to broader social forces such as social movements, and the shift towards globally market-oriented economies.

ILROB 623 Micropolitics in Organizations Spring. 3 credits. Prerequisites: ILROB 170 and 171. E. Lawler. Examines micro-political processes in organizations. Neo-Macchiavellian, Marxist, and Weberian approaches to organizational politics are specifically analyzed. An attempt is made to understand how the micro-political rules of organizational games are institutionalized in change. Among the ideas discussed are the institutionalization of ideology and specification of the relationships among power, tactics, and strategy. Interest groups and coalition politics are examined in terms of conflict and bargaining. Other issues discussed include corruption, dealing, and competition. Examples are drawn from both the private and public sectors. Seminar requirements include an in-class presentation and a major paper and/or take-home final exam.

ILROB 624 Groups in Work Organizations Fall. 4 credits. Enrollment limited. Permission of instructor required. Staff. This is an experiential learning course designed primarily for advanced students who have a comprehensive background in the theory and methods of the behavioral sciences. Work group members study their roles and relationships to each other, the task, other work groups, and especially authorities. Students write a number of self-reflective papers in which they conceptualize their experiences and relate them to theory and method in organizational behavior and experience.

ILROB 625 Conflict, Power, and Negotiation Fall. 3 credits. Open to seniors and graduate students. Permission of instructor is required. Limited enrollment. E. Lawler. Theoretical seminar adopts a power perspective on bargaining and conflict resolution. Examines how power relations and power processes affect tactics in bargaining and also when power relations inhibit or promote conflict resolution. "Power" is viewed in the course as a capability, embedded in a social structure, and tactics are the action based on or using such power. The seminar gives overview of several theoretical approaches to conflict and bargaining (e.g., rational choice, cognitive, social exchange) and places the power perspective in this context.

ILROB 626 Organizations and Social Inequality Spring. 3 credits. P. Tolbert. Examines the central role that organizations in industrial societies play in allocating income, status, and other resources to individuals. A variety of theoretical explanations of social inequality are examined, and the social policy implications of each are considered.

ILROB 627 Leadership in Organizations Spring. 3 credits. Prerequisites: two organizational behavior courses at the 300 level or advanced courses in sociology or psychology. Staff. An examination of the theories and research findings from the behavioral sciences that are relevant to leadership and the influence process in groups and organizations. Personality, situational factors, intergroup processes, interpersonal perception as well as the motivation to both lead and follow are discussed. The implications for leadership training, organization development, and action research are explored.

ILROB 628 Cross-Cultural Studies in Organizational Behavior Spring. 3 credits. Limited. Permission of instructor before registering in course. Staff. Designed for students interested in social psychological theory and research in international culture comparisons of behavior and experience in organizations. Variables such as power distance, individualism-collectivism, universalism-particularism, and attitudes toward authority as well as work motivation are examined. Upon completion of the readings and discussion of conceptual materials and consideration of several major international comparison studies, each student prepares and presents a paper on a topic of his/her own choice usually related to his/her own country of origin (China, Japan, German, United States, etc.).

ILROB 670 Semester in Manufacturing Spring. 15 credits. Open to master's and Ph.D. students in Industrial and Labor Relations with permission of instructor. Intended for students who want to work as professionals or who have a strong interest in the manufacturing industries. The course is taught by an interdisciplinary faculty team from the College of Engineering, the Johnson School of Management, and the School of Industrial and Labor Relations. Course material is based on plant visits and project work with local industry. Student participation is in interdisciplinary teams with members representing the three schools. Course content concentrates on four major issues thought to make a competitive difference in today's economic environment: the changing environment for product design, rapid-response production systems; organization, management, and compensation of the manufacturing team; and performance measurement.

ILROB 671 Organizations as Social Networks Spring. 3 credits. Prerequisites: one or more courses in organizational behavior, sociology, psychology, anthropology, or political science. A course in statistics or research methods is helpful. Staff. Increasing attention has been devoted to the idea that social structures can be fruitfully investigated as social networks. In particular, organizational and inter-organizational structures may be analyzed as patterned relationships among individuals, groups, and even other organizations. Such networks appear to be strong predictors of a variety of social dynamics including attitude similarity, the diffusion of innovation, turnover, and the allocation of organizational resources. A variety of methods for collecting and analyzing network data including: graph
theory, sociometry, clique detection, centrality analysis, blockmodeling, and the quadratic assignment procedures are used. In addition to reading recent published research, this course involves work with actual data sets and relevant computer programs.

**ILROB 674 The Social Psychology of Behavior and Experience in Organizations**

Fall. 3 credits. Prerequisites: ILROB 170 and 171 or ILROB 520. Staff.

Considers theories that seek to explain behavior at the individual, group, and organizational levels. Work motivation, leadership, and the member composition and dynamics of groups are discussed. Harmony, conflict, and other aspects of the relationships among groups in the organization are evaluated.

**ILROB 676 Systems of Labor Participation in Management**

Fall. 4 credits. Prerequisites: senior standing and permission of instructor. Examines the theory and practice of worker participation in systems ranging from informal shop-level participation to self-management. Special emphasis is placed on socio-technical systems of job design and work restructuring that give workers control over the labor process. Attention is also given to legislated programs of participation (codetermination) and to participation in employee-owned firms.

**ILROB 679 Methods of Observation and Analysis of Behavior**

Fall or spring. 4 credits. Permission of instructor required. Staff.

Focuses on qualitative methods and emphasizes learning by doing. The course examines different approaches to the collection and analysis of data. Students learn a variety of data collection techniques for understanding individual and collective behavior including: participant observation, in-depth interviews, and working with archival materials. The course also emphasizes the constant comparative method as a basic technique for data analysis. This technique is the basis of such qualitative computer programs as Ethnograph and Nudist. Students conduct their own research projects. Students, who wish to use qualitative methods either for a senior honors thesis, masters thesis, or doctoral dissertation are encouraged to take this course. Because of the intensive nature of the course, class size is limited to 25 students.

**ILROB 720 Issues of Measurement in Research on Organizations (Instrumentation)**

Fall. 4 credits. Staff.

Concerns the study of tests and measures used to assess central variables in organizational behavior and related fields. Students learn where to find measures suitable for their research purposes and examine the theories that define the constructs being measured. The empirical information available about different measures—construction, reliability, and validity—and the ways in which the instruments have been used in research and practice.

**ILROB 721 Advanced Micro Organizational Behavior**

Spring. 3 credits. Staff.

Examines the historical development of psychological theories of organizational behavior and contemporary issues in micro organizational research. The course emphasizes sizes reading and analysis of primary source material.

**ILROB 722 Advanced Macro Organizational Behavior**

Fall. 3 credits. Prerequisites: ILROB 520. Staff.

Examines the historical development of sociological theories of organizations and contemporary issues in macro organizational research. The course emphasizes reading and analysis of primary source material.

**ILROB 723 Behavioral Research Theory, Strategy, and Methods I**

Fall. 4 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll. Staff.

Materials studied in ILROB 723 and 724 include: theoretical, conceptual, and ethical questions; survey research and attitude-scaling procedures; laboratory research methods; participant observation and interview methods; use of documents and qualitative data analysis. Provides students with important philosophical background for doing research and exposes them to a well-balanced, interdisciplinary set of quantitative and qualitative research tools.

**ILROB 724 Behavioral Research Theory, Strategy, and Methods II**

Spring. 3 credits. Prerequisites: ILROB 723 and 724. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll. Staff.

Examines the historical development of sociological theories of organizations and contemporary issues in macro organizational research. The course emphasizes reading and analysis of primary source material.

**ILROB 725 Analysis of Published Research in Organizational Behavior (also SOC 725)**

Fall. 3 credits. Prerequisites: ILROB 520 and 1 year of statistics. Staff.

An advanced research methods course that critically examines published research papers in the field of organizational behavior in terms of research design and method as well as theory.

**ILROB 726 Selected Topics in Organizational Behavior**

Fall. 3 credits. Prerequisites: ILROB 520 and permission of instructor.

An advanced seminar that seeks to develop an interdisciplinary perspective on selected topics in organizational behavior. The topics themselves change from year to year depending on students' interests. Course is designed to allow students and the instructor to jointly pursue significant scholarly inquiry into one or more topics in organizational theory. Emphasis is placed on exploring the relevance of tradition in related disciplines (anthropology, linguistics, philosophy, sociology, etc.) that may enrich our understanding of organizational life.

**ILROB 727 Work and Industrial Conflict**

Spring, weeks 7-14. 2 credits. Staff.

A concentration examination of the sociology of industrial conflict. The seminar focuses on classic formulations of conflict theory in sociology, then on the social, political, economic causes of industrial conflict. Both individual and collective forms of conflict expression are examined. Some discussion of the implications of various types of worker management of firms for industrial conflict are included.

**ILROB 728 Theories of Motivation and Leadership**

Spring. 4 credits. Two halves, each lasting 7 weeks. Prerequisites: ILROB 520. Staff.

(1) Theories of Work Motivation. Course provides an introduction to basic concepts of human motivation in general, with particular emphasis on the theories that explain and predict work motivation. Students examine the empirical research that tests the validity of the theories and shows how and under what conditions different motivation models can be used for practice in work organizations.

(2) Theories of Leadership and Power. Several current micro-theories of leadership and power and related research are examined. The disciplinary perspective employed is social organizational psychology and the level of analysis emphasized is action and experience of individuals in groups.

**ILROB 729 Organizational Change and Intervention**

Fall. 3 credits. Graduate students only. Staff.

This seminar is concerned with planned and unplanned change in organizations. It is designed to analyze theory in practice. Particular attention is paid to the role of internal and external change agents. Class members are encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants submit weekly work force journals.

**ILROB 770 The Cultures of Work Organizations**

Fall. 3 credits. Open only to graduate students. Staff.

Considers both administrative and occupational cultures in the workplace. The course takes an anthropological perspective, focusing on the role of ideology as the main ingredient of cultures but emphasizing the role of cultural forms, myths, stories, sagas, language, rites and ceremonials, and physical settings of meaning. The course pays special attention to the place of subcultures and countercultures in the makeup of administrative culture and to occupations as a major source of subcultures. The role of the environment in which organizations are embedded, and its influence on workplace cultures, is also included. Forms of cultural leadership and approaches to reading and changing cultures are also considered.

**ILROB 772 The Social Construction of Economic Life**

Spring. 3 credits. M. Lounsbury.

Drawing on the literature in economic sociology, this course emphasizes how economic activities are constituted and shaped by the social, cultural, and historical contexts in which they are situated. This course surveys various empirical and theoretical approaches used to study the genesis and influence of broader scale organizational and institutional arrangements. The course provides students with an opportunity to formulate and refine
their own research questions and perspectives.

ILROB 773 Advanced Seminar in Cross-Cultural Studies of Organizational Behavior
Fall. 3 credits. Permission of the instructor. Staff.
Considers theory and method for the study of cross-cultural and cognitive style variables. Members participate in the conceptualization and conduct of a comparative research project.

ILROB 776 Organizational Implications of World Class Manufacturing
Fall. 4 credits. Staff.
Aimed at helping students develop an understanding of organizations as complex social systems, and at helping students understand the behavioral implications of new manufacturing initiatives. Case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, total quality management, and just-in-time material flow. Analyses emphasize the impact of such innovations on individuals' role definitions and relationships, organizations' communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 776 is a core course in the Master of Engineering/Manufacturing Option degree program.

ILROB 778 Solidarity in Groups (also SOC)
Fall. 3 credits. E. Lawler.
Examines sociological and social psychological theories about how social solidarity or a "sense of community" comes about and is maintained in groups and organizations. Distinguishes emotional, normative, and instrumental bases for social solidarity and shows how these promote or inhibit subgroup formation in organizations, commitment of individuals to organizations, and organizational citizenship behavior.

ILROB 790 ILR M.P.S. Program
Fall and spring. 1-9 credits. Staff.
Supervised research only for those enrolled in the ILR M.P.S. program.

ILROB 798 Internship
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 799 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 920 Organizational Behavior Workshop
Fall. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only. Staff.
This workshop is designed to provide a forum for the presentation of current research undertaken by faculty members and graduate students in the Department of Organizational Behavior and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course is expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that students' thesis research.

SOCIAL STATISTICS

T. DiCiccio, chair; J. Angellotti, J. Bunge, A. Hadi, P. Velleman, M. Wells

ILRST 210 Statistical Reasoning I
Fall, spring, and summer 2001-2002. 3 credits. Attendance at weekly discussion section is required. J. Angellotti, P. Velleman.
An introduction to the basic concepts of statistics and data analysis. Descriptive methods, normal theory models, and inference procedures for univariate and bivariate data. Basic statistical designs, an introduction to probability and applications of the Binomial and Normal distributions are covered. Estimation, confidence intervals, and tests of significance for a simple population mean and proportion, the difference in two population means and proportions, simple linear regression, correlation, and two-way contingency tables are also considered. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

ILRST 211 Statistical Reasoning II
Fall, spring, and summer 2001-2002. 3 credits. Prerequisite: ILRST 210 or suitable introductory statistics course. M. Wells.
A second course in statistics. Applications of statistical data analysis techniques, particularly to the social sciences. Topics include: statistical inference and linear regression; multiple linear regression; logistic regression; and analysis of variance. Computer packages are used throughout the course.

ILRST 310 Statistical Sampling
Spring. 3 credits. Prerequisite: 2 terms of statistics. J. Bunge.
Theory and application of statistical sampling, especially in regard to sample design, cost, estimation of population quantities, and error estimation. Assessment of nonsampling errors. Discussion of applications to social and biological sciences and to business problems. Course includes an applied project.

ILRST 311 Practical Matrix Algebra
Fall. 3 credits. J. Bunge.
Matrix algebra is a necessary tool for statistics courses such as regression and multivariate analysis, and for other research methods courses in various other disciplines. One goal of this course is to provide students in various fields of knowledge with a basic understanding of matrix algebra in a language they can easily understand. Topics include special types of matrices; matrix calculations; linear dependence and independence; vector geometry; matrix reduction (trace, determinant, norms); matrix inversion; transformation; eigenvalues; matrix decompositions; ellipsoids and distances; and some applications of matrices.

ILRST 312 Applied Regression Methods
Fall. 3 credits. Prerequisite: ILRST 211 or equivalent courses. Not offered 2001-2002. T. DiCiccio, P. Velleman.
Matrix algebra is a necessary tool to analyze regression models is reviewed. Multiple linear regression, analysis of variance, nonlinear regression, and linear logistic regression models are covered. For these models, least squares and maximum likelihood estimation, hypothesis testing, model selection, and diagnostic procedures are considered. Illustrative examples are taken from the social sciences. Computer packages are used.

ILRST 313 Design and Analysis of Experiments
Spring. 3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 2001-2002. J. Angellotti.
This course covers the statistical design and analysis of comparative experiments including completely randomized, factorial, randomized block, Latin squares, and split-plot designs including crossover and repeated measures. Application of statistical design to research problems is stressed. Analyses to compare treatment groups including ANOVA, ANCOVA, contrasts, and multiple comparison procedures are considered. Computer packages are used.

ILRST 314 Graphical Methods for Data Analysis
Spring. 3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 2001-2002. P. Velleman.
Classical and recently developed graphical methods for analysis and display. Characteristics of effective and honest graphs with comparison of alternative methods for understanding data are stressed. Includes study of current computer programs and methods expected to be practical in the near future: graphing of univariate data, bivariate plots, multivariate data, graphical methods of data analysis; the specification, modification, and control of graphs; study of interaction between choice of display and underlying patterns.

ILRST 315 Statistical Analysis of Legal Data
Presents a survey of the tools from the social and statistical sciences that have been applied to the proof of facts in the courtroom and to the study of questions of legal importance. Reviews various probability models, design issues, and statistical methodologies. The approach taken is based on the determination of the probability of the evidence under two competing hypotheses. Topics include: the role of uncertainty in legal settings; prosecutor's and defender's fallacies; controlled, observational, and epidemiological studies; sampling and surveys; the likelihood ratio approach for evaluation under conflicting hypotheses; p-values and Bayesian assessment; and analysis of various types of transfer evidence, including blood grouping and DNA profiling.

ILRST 410 Techniques of Multivariate Analysis
Spring. 3 credits. Prerequisite: ILRST 312 or equivalent. P. Velleman.
Techniques of multivariate statistical analysis discussed and illustrated by examples from various fields. The course emphasizes application, but theory is not be ignored. Deviation from assumptions and the rationale for choices among techniques are discussed. Students are expected to learn how to thoroughly analyze real-life data sets using computer-packaged programs. Participants should have some knowledge of matrix notation. Topics include: multivariate normal distribution; sample geometry and multivariate distances; inference about a mean vector; comparison of several multivariate means; variances, and covariances; detection of multivariate outliers; principal component analysis; factor analysis; canonical correlation analysis; discriminant analysis, and multivariate multiple regression.
ILRST 411 Statistical Analysis of Qualitative Data
Fall. 3 credits. Prerequisite: 2 statistics courses or permission of instructor. T. DiCiccio, M. Wells.
An advanced undergraduate and beginning graduate course. Includes treatment of association between qualitative variables; contingency tables; log-linear models; binary ordinal, and multinomial regression models; and limit dependent variables.

ILRST 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRST 510 Statistical Methods for the Social Sciences I
Fall, spring, and summer. 3 credits. J. Angellotti, P. Velleman.
A first course in statistics for graduate students in the social sciences. Descriptive statistics, probability and sampling distributions, estimation, hypothesis testing, simple linear regression and correlation are all covered. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

ILRST 511 Statistical Methods for the Social Sciences II
Fall, spring, and summer. 3 credits. Prerequisite: ILRST 510 or equivalent introductory statistics course. J. Bunge, T. DiCiccio, A. Hadi, P. Velleman.
A second course in statistics that emphasizes applications to the social sciences. Topics include multiple linear regression; multiple linear regression (theory, model building, and model diagnostics); and the analysis of variance. Computer packages are used extensively.

ILRST 610 Seminar in Modern Data Analysis
Fall. 3 credits. Prerequisite: 2 statistics courses or permission of instructor. Not offered 2001–2002. P. Velleman.
An advanced survey of modern data analysis methods. Topics include exploratory data analysis, data re-expression, philosophy of data analysis, robust methods, statistical graphics, regression methods, and diagnostics. Extensive outside readings cover recent and historical work. Participants should have some knowledge of multiple regression, including the use of matrices, and some experience using a computer.

ILRST 611 Statistical Computing
A survey of new aspects of statistical computing. Topics include: basic numerical methods, numerical linear algebra, nonlinear statistical methods, numerical integration and approximation, smoothing and density estimation. Additional special topics may include Monte Carlo methods, statistical graphics, computing-intensive methods, parallel computation, or computing environments. Designed for graduate students in the statistical sciences and related fields interested in new advances. Students may be asked to write programs in a programming language of their choice.

ILRST 612 Data Mining
Fall. 3 credits. Prerequisite: ILRST 312 or equivalent, or permission of instructor. J. Bunge.
An introduction to a variety of statistical techniques that assign objects to categories on the basis of observed characteristics of the objects. Course topics include: discriminant analysis and its extensions and variations; nearest neighbor methods, classification and regression trees (CART); neural networks for classification; and estimation of error of classification rules.

ILRST 613 Bayesian and Conditional Inference
Covers the following topics: loss functions and utility theory, prior information and subjective probability, coherence, basic Bayesian inference, empirical Bayesian inference, robust Bayesian inference, Bayesian computations, ancillarity, conditional properties of statistical procedures, and Barndorff-Nielsen's exact likelihood theory.

ILRST 614 Structural Equations with Latent Variables
Spring. 3 credits. Prerequisites: ILRST 210, 211 or ILRST 510, 511, or equivalent. T. DiCiccio.
Provides a comprehensive introduction to the general structural equation system, commonly known as the "LISREL model." One purpose of the course is to demonstrate the generality of this model as a way to treat path analysis, recursive and nonrecursive models, classical econometrics, and confirmatory factor analysis as distinct and unique, this course treats them as special cases of a common model. Another goal of the course is to emphasize the application of these techniques.

ILRST 615 Expert Systems and Probabilistic Network Models
This is an interdisciplinary course for students in applied mathematics, computer science, statistics, and other related fields of application such as medical, engineering, and social sciences. Topics include: components of expert systems, rule-based expert systems, probability-based expert systems, uncertainty measures, dependency models, Bayesian and Markov networks, propagation of uncertainties, learning structure from data, and examples of applications. Students use computer software to gain experience.

ILRST 619 Special Topics in Social Statistics
Spring. 3 credits. Prerequisite: ORIE 670 or equivalent. Staff.
Areas of study are determined each semester by the instructor offering the seminar. Topics may include: the multivariate normal and Wishart distributions; multivariate sampling; tests of mean and covariance; multivariate regression, principal components; factor analysis, canonical correlation; robustness; and bootstrap confidence regions and tests.

ILRST 711 Robust Regression Diagnostics
3 credits. S-U or letter grade. Prerequisite: ILRST 312 or equivalent or permission of instructor. Not offered 2001–2002. Next offered 2003. Staff.
Regression models are simplifications of reality; we rarely expect the model to be exactly true. In many applications of regression, however, small changes in a model, a model assumption, or a data point can have very large effects on the results. Regression analysis is viewed in this course as a cyclical process, which takes inputs and produces outputs in an interactive or cyclical way, a way in which the outputs can be used to diagnose, validate, criticize, and possibly alter the inputs. This is an attempt to narrow the gap between the theory and practice of regression analysis. We discuss classical methods as well as a recently developed general framework for assessing the sensitivity of the outputs to small changes in the inputs. Students are expected to be able to perform thorough analyses of real-life data using computer packages. Topics to be discussed include: role of variables; Student's may be asked to write a regression equation, regression outliers and influential observations, robust regression, alternatives to least squares (e.g., LMS, LAV, IRLS) error-in-variables models, and generalized linear models.

ILRST 712 Theory of Sampling
Fall. 3 credits. Prerequisite: calculus and at least a semester of mathematical statistics. Not offered 2001–2002. J. Bunge.
Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or "design" approach, the second part on the more recent "model-based" approach. Attention is paid to recent progress in the field.

ILRST 713 Counting Processes with Statistical Applications
Spring. 3 credits. Prerequisite: a course at the technical level of Math 572 and 574 or permission of instructor. Not offered 2001–2002. M. Wells.
The statistical analysis of life history data is playing an increasing role in the social, natural, and physical sciences. In this course students formulate and solve various practical problems in the statistical analysis of life history data using the modern theory of stochastic processes. Students examine the martingale dynamics for point processes relevant to life history data. Both parametric and nonparametric inference for multiplicative intensity models are considered. The large sample properties of the proposed procedures are discussed in detail using recent extensions of functional central limit theorems for martingales.

ILRST 714 Topics in Modern Statistical Distribution Theory
3 credits. Prerequisite: courses equivalent to ORIE 651 or Math 571, and STATS 409 or ORIE 670. Not offered 2001–2002. Staff.
Recent research has revealed vast territories of distribution theory that are unfamiliar to most statisticians. This course provides an introduction to three topics underlying this "modern" theory: infinite divisibility, decomposability, and stability; characterization of distributions; and extensions of univariate distributions to multivariate distributions.
The purpose of this course is to provide students with the knowledge and skills to engage in further study of conflict management and conflict resolution theory for testing hypotheses or constructing confidence intervals is either unavailable or computationally cumbersome. Inferences are routinely performed by using large-sample approximations to the distribution of test statistics. This course provides a survey of some recent higher-order asymptotic approximations for likelihood-based methods of inference.

206 The Nature of Conflict
Fall or spring. 3 credits. Staff.
The purpose of the course is to provide students with the knowledge and skills to engage in further study of conflict management and conflict resolution. Having taken the course, the students will be able to: identify and describe types of conflict; be able to identify the various sources of conflict; be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflict situations; be able to describe conflict situations in terms of social psychological aspects using a "person perception" or "attribution" theoretical orientation; and be able to identify their personal response styles to conflict.

208 Workplace Negotiations
Fall or spring. 3 credits. Staff.
Covers the theory and practice of negotiation as it applies to workplace and business situations. Students are exposed to theoretical models of negotiation exercises. Students participate in two negotiation exercises and are asked to write a paper on their negotiating position in each exercise. More weight is given in grading to the student's ability to present a well-though-out rationale for positions and tactics than to the outcome of the negotiation itself.

241 Arbitration
3 credits.
A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of an arbitration hearing, and the preparation of an arbitration opinion.

242 Public Sector Collective Bargaining
Fall or spring. 3 credits. Staff.
This course is designed as an introduction to collective bargaining in the public sector. The course examines the historical development of bargaining in public employment, the evolution of state and federal and bargaining theory and practices, as well as impasse resolutions techniques frequently found in this sector. Special emphasis is given to developing an understanding of the similarities and differences between public and private sector bargaining and how they have affected tactics and strategies employed by the parties.

243 Growth of American Business and Management History
Fall or spring. 3 credits. Staff.
The growth and cycles of American business enterprise produced significant changes in education, government, work, the family, the ethnic composition of the population, and the landscape. As business and industry expanded, new methods were developed for managing these enterprises. This course examines the development of managerial practices, the relationship of management to the work force, and the social ramifications of capitalist expansion.

245 Public Sector Labor Law
3 credits.
A survey and analysis of the New York State Public Employees Fair Employment Act is made as well as a comparison with other state laws covering public employees. The course examines the extent to which the law protects and regulates concerted actions by employees in the public sector. The intent is to study and understand the law as written, but more importantly to understand how it has been interpreted by the courts of New York State in its application. Major emphasis is in employee and employer rights, including recognition and certification, improper practices, strikes, grievances, and disciplinary procedures of the New York State Public Employment Relations Board.

247 Labor and the American Economy
3 credits.
Helps the student understand how economic theories relate to the economic problems confronting the American citizen in general and the American union member in particular. Emphasis is placed on contemporary economic theories and how their proponents attempt to solve American economic problems.

248 Employment Practices Law
3 credits.
Considers laws and regulations that directly affect managers and employers. Students examine issues and laws such as Equal Employment Opportunity, Employee Retirement Income Security Act, Federal Wage and Hour Laws, Occupational Safety and Health Act, unemployment laws, and other topics. Student focus on the practical application of laws and their impact on the workplace.

250 New York Workers' Compensation Law for Trade Unions and Injured Workers
Fall or spring. 3 credits. Staff.
There is a collective perception that the Worker's Compensation system in New York compounds an injured worker's plight with Byzantine responses that lead to despair. Unions and injured workers' organizations believe that, if properly empowered, they can be just as effective in looking after their injured colleagues' claims. This course is structured to meet both of these realities. Students delve into every nook and cranny of New York Worker's Compensation law. The course is entirely practical. Skills teaching, how to present a case, decorum, ethics, and persuasiveness, are built into the course. Experts on how the system really works are used.

251 Principles and Practices of Management
Fall or spring. 3 credits. Staff.
Prepares the theory and processes of management with an emphasis on supervision. Management functions of planning, organizing, staffing, and evaluating are included. Concepts and theories are presented, and case studies are applied. Motivating people, exercising leadership, and effectively developing employees are emphasized.

252 Contract Bargaining
Fall or spring. 3 credits. Staff.
Examines the principles of contract bargaining, including bargaining environments and structures as well as standards used in negotiation.
bargaining. Students learn to prepare bargaining demands, cost economic items, draft noneconomic contract language, negotiate economic and noneconomic issues, and resolve bargaining impasse.

The course considers the impact of contract bargaining outcomes on workers, unions, employers, and the public.

253 Contract Administration
Fall or spring. 3 credits. Staff.
Focuses on the role of the steward in administering the union contract in the workplace. Students evaluate grievance and arbitration contract clauses, the grievance procedure in practice, the role of the union steward, the role of local and international unions, negotiation of grievances, and preparation for arbitration. Students analyze the results of grievance and arbitration procedures on workers, unions, and employers.

254 Labor Law
Fall or spring. 3 credits. Staff.
Examines the principles of labor law by looking at social philosophy and the historical context of federal labor legislation from the 1930s. Students concentrate on major provisions of the National Labor Relations Act, examining how the National Labor Relations Board and the federal courts have interpreted the national labor laws. Discussion includes new directions in legislation and interpretation with consideration given to the impact of labor law on workers, unions, and employers.

255 Labor History
Fall or spring. 3 credits. Staff.
Reviews American labor history from the perspective of workers' social dimensions of the development of the working class, reform and revolution, and the evolution of labor organizations. Special attention is paid to the involvement of women and minority workers with unions.

256 Dispute Resolution
Fall or spring. 3 credits. Staff.
Examines third-party participation in dispute resolution in private and public sector collective bargaining. Development of dispute resolution methods in American labor relations; issues and practices in neutral, binding arbitration of grievances and mediation; conciliation; and fact-finding procedures are discussed. Use of exclusive labor-management mechanisms to settle industry disputes is also looked at.

257 Human Resource Administration
Fall or spring. 3 credits. Staff.
Designed to provide an overview of personnel practices in the modern organization. The course focuses on manpower planning, employment, training and development, motivation and compensation, and performance appraisal and communication for students who are currently supervisors or personnel practitioners or for those aspiring to those positions.

258 Organizational Behavior
Fall or spring. 3 credits. Staff.
Designed to illustrate how behavioral science theory leads to research and how theory and research provide a basis for practical application in business, industry, education, and government.

259 Union Administration
Fall or spring. 3 credits. Staff.
Focus is on the principles and practices of effective union administration. Students study the dynamics of democratic organizations and the communication and collective leadership. The course explores alternative methods of decision making and lines of responsibility. The legal obligations of unions and union officials is discussed and analyzed. The course also examines the history and evolution of relationships inside the labor movement.

262 Project Management
Fall or spring. 3 credits. Staff.
Through the process of restructuring, many companies are "flattening out" the hierarchy of management levels. This means that more responsibilities are shifting downward to employees who may not have the status, authority, or education to take on the additional responsibilities that the organization has concluded that who have the enormous responsibility of completing complex, critical projects within well-defined business constraints. In response to the shift in responsibility downward and with much more to be accomplished with limited resources, the demands for employees with effective project management skills are increasing. Employees who can successfully manage projects are and will continue to be the most marketable individuals in the workforce because their skills are transferable to all disciplines, organizations, and situations.

264 Contemporary Labor Problems
Fall or spring. 3 credits. Staff.
A survey of the major challenges that confront the American labor movement. Students are briefed on the background of each problem and discuss and analyze a broad range of solutions proposed by the experts.

266 Professional Writing: The Power of the Written Word in Business
3 credits.
Focuses on the importance of developing effective writing skills and strategies required to be successful in business communities. Students develop a personal writing style, correct bad writing habits, and develop new writing habits through "real life" exercises taken from case studies and their own experiences. In addition, students learn the importance of using rhetorical strategies such as defining situations requiring direct responses, writing to a specific audience, attending to a specific purpose, choosing the appropriate language, and varying tone and style as the situation demands. Students, upon completing this course, have the confidence to use the writing skills to successfully address most situations requiring written communication. Genres include memos, proposal letters, and reports.

267 Speaking and Listening for Business
3 credits.
The overall objective is to equip participants with the skills they need to speak and listen effectively. By the end of the course, students are able to accurately listen to, and interpret oral communication; identify major causes of listening misunderstandings such as biases, distractions, emotions, etc.; describe and employ techniques for overcoming those listening barriers; speak effectively in front of an audience; describe ways to build rapport with an audience, persuade an audience; use visual aids effectively; introduce speakers, make presentations, and speak extemporaneously.

269 The Evolution of Work in America
Fall or spring. 3 credits. Staff.
Examines the evolution of contemporary business operations. Discussion focuses on historical and present-day theories of work organization, changing workplace and workforce, and future trends. The relationships between businesses and the societies in which they exist, in both local and global economies, are also examined.

343 Health in the Workplace
Fall or spring. 3 credits. Staff.
Examines the state and federal laws that affect job safety, and health, and the way workers and their unions can use legislation to promote safe and healthy working conditions. Topics include safety and health standards; the enforcement of laws and standards; the responsibilities of management; the rights of employees; and the offering rights to information; collective bargaining for safety and health; racial- and gender-based discrimination regarding hazardous work; and drug testing.

344 Union Strategies for Safety and Health
Fall or spring. 3 credits. Staff.
Examines the major role that confront the American labor movement. Students are briefed on the background of each problem and discuss and analyze a broad range of solutions proposed by experts.

345 Health Hazards Identification and Evaluation in the Workplace
Fall or spring. 3 credits. Staff.
Students learn about the many work site health hazards including toxic chemicals, biological agents, radiation, and electromagnetic fields. Routes of exposure, acute and chronic health effects, and the bases of regulatory exposure limits such as TLV's and OSHA PEL's. Hazard evaluation and information gathering techniques familiarize students with available resources for evaluating work site conditions.

346 Introduction to Industrial Hygiene: Hazard Evaluation and Control
Fall or spring. 3 credits. Staff.
This course builds on the knowledge acquired in both the safety health and health hazard courses to provide students with greater mastery of hazard evaluation and control methods. (Students are encouraged to complete the health hazard and safety hazard courses before taking this course.) The course provides practical, hands-on training in evaluating potential worksite hazards. Students learn about environmental monitoring methods such as air sampling and become familiar with the commonly used equipment.
They also learn to interpret and evaluate monitoring data provided by professional testers.

### 347 Safety Hazards Identification and Evaluation in the Workplace
Fall or spring. 3 credits.
Safety hazards (as opposed to health hazards) generally involve harm of an immediate and sometimes violent nature; health effects include burns, electrical shock, broken bones, and the loss of limbs, eyesight, or hearing. With chemicals, the primary concern is their explosive, reactive, or flammable nature rather than with the toxic effects that are the focus of health hazard evaluation. Students become familiar with site inspection and hazard identification methods and learn about control techniques appropriate for a variety of work settings.

### 364 Labor, Government, and Politics
3 credits.
A survey of the ways the American political system affects labor and how organized labor affects the system through voting, political parties, and interest groups.

### 367 Safety and Health in the Workplace
Fall or spring. 3 credits. Staff.
This course provides basic education and training in workplace safety and health. The course focuses on applicable federal and state laws, standards for safety and health, industrial hygiene, and such health concerns as asbestos, radon, and AIDS. Practical experience is provided through workplace walk-through safety and health inspections and in the use of industrial hygiene equipment to measure noise, temperature, humidity, airflow, and airborne toxins.

### FACULTY ROSTER

**Abowd, John M., Ph.D., U. of Chicago.** Prof., Labor Economics
**Angeloff, Jon E., M.S. candidate, Cornell U.** Lecturer, Social Statistics
**Bacharach, Samuel, Ph.D., U. of Wisconsin.** Jean McKelvey-Alice Grant Prof. of Labor Management Relations, Organizational Behavior
**Batt, Rosemary, Ph.D., Mass. Inst. of Technology.** Asst. Prof., Human Resource Studies
**Bishop, John H., Ph.D., U. of Michigan.** Assoc. Prof., Human Resource Studies
**Blau, Francine D., Ph.D., Harvard U.** Francis Perkins Prof. of Industrial and Labor Relations, Labor Economics
**Boudreau, John W., Ph.D., Purdue U.** Assoc. Prof., Human Resource Studies
**Boyce, George R., Ph.D., U. of Wisconsin.** Prof., Labor Economics
**Briggs, Vernon M., Jr., Ph.D., Michigan State U.** Prof., Human Resource Studies
**Bunge, John A., Ph.D., Ohio State U.** Assoc. Prof., Social Statistics
**Cavanaugh, Marci A., U. of Minnesota.** Asst. Prof., Human Resource Studies
**Collins, Christopher, Ph.D., U. of Maryland.** Asst. Prof., Human Resource Studies
**Compa, Lance, J.D., Yale Law School.** Sr. Lecturer, Collective Bargaining, Labor Law, and Labor History
**Cook, Maria L., Ph.D., Univ. of Calif., Berkeley.** Assoc. Prof., Collective Bargaining, Labor Law, and Labor History

**Daniel, Cetas E., Ph.D., U. of Washington.** Prof., Collective Bargaining, Labor Law, and Labor History
**DeVault, Ileen A., Ph.D., Yale U.** Assoc. Prof., Collective Bargaining, Labor Law, and Labor History
**DiCiccio, Thomas J., Ph.D., U. of Waterloo.** Assoc. Prof., Social Statistics
**Dyer, Lee D., Ph.D., U. of Wisconsin.** Prof., Human Resource Studies

ADMINISTRATION
Robert J. Swieringa, dean
John A. Elliott, associate dean for academic affairs
Michael J. Hostetler, associate dean for executive education
Thomas B. Hambury, director of EMBA Program
Cathy S. Dove, associate dean for MBA Program and operations
Richard A. Shafer, associate dean for corporate relations
Rosalya Hines, executive director of development
Natalie M. Grinblatt, director of admissions
John D. Nozell, director of career services
Harriet Peters, director of advising and student activities
Sherry L. Canger, assistant to the dean
Ann W. Richards, financial aid director and associate director of admissions
Janet S. Gray, registrar and associate director for MBA Program

The Johnson Graduate School of Management prepares men and women for managerial careers in business. The school offers courses work in many disciplines to provide potential managers with an understanding of the complexities of the professional world in which they will operate and of the organizations of which they will become a part.

A bachelor's degree or its equivalent is required for admission to the two-year program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background of undergraduate studies in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

Combined degree programs allow highly qualified Cornell students to co-register in the school during their senior year, thereby earning a master's degree in less than the usual time.

The doctoral program, administered through the Graduate School, provides an advanced level of education in business for those who seek careers in teaching and research at leading universities.

More detailed information about these programs is available from the Office of Admissions and Student Affairs, Johnson Graduate School of Management, Room 111 Sage Hall.

Students in other graduate programs and undergraduate students registered with the university are welcome in many classes. Since matriculated MBA students require certain courses for graduation, non-Johnson School students are not allowed to pre-enroll. During the first week of classes, registration of non-Johnson School students occurs on a space available basis.

UNDERGRADUATE ONLY

NBA 300 Entrepreneurship and Enterprise
Fall, spring. 3 credits. D. BenDaniel.
This course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and workouts, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures. For non-Johnson School students only. Johnson School students see NBA 564.

NBA 401 Entrepreneurship for Scientists and Engineers
Fall, spring. 3 credits. J. Nesheim.
This course is intended to introduce students to the new business startup process. Small teams will be formed to come up with an idea for a startup and create a business plan that can attract venture capital or other funding for the new enterprise. Guest lecturers are from successful high-technology companies. The course is led by instructors from Silicon Valley and Ithaca who created high-technology businesses.

COURSES FOR NON-JOHNSON SCHOOL STUDENTS

NCC 550 Financial Accounting
Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.
An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure. This course is similar in content to the MBA core course NCC 500.

NCC 553 Marketing Management
Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.
The course addresses controllable and uncontrollable marketing variables that managers in multi-product firms face in today's business environment. Topics include customer behavior, product planning, distribution, advertising and promotion, pricing, and competitive strategy. This course is similar in content to the MBA core course NCC 503.

NCC 554 Management and Organizations
Fall. 3 credits. Course intended for non-Johnson School students only. Staff.
This course takes a resource-based approach to management by arguing that organizations should link their strategy to their internal resources and capabilities. This theme is developed by addressing: (1) the strategic value of internal resources and capabilities; (2) the role of human resources and organizational behavior in formulating and implementing strategy; and (3) the importance of structure and the design of organizations in formulating and implementing strategy. Included among the topics are: how firms create sustainable competitive advantage through internal resources and capabilities; what the best practices are for managing people; what effects best practices have on attitudes and behaviors; why putting the customer first is not necessarily best practice from a resource-based perspective; why organizational culture is central to organizational effectiveness; why the formal organizational chart and structure of an organization are important; how organizations innovate; how organizations change through re-architecture and re-engineering; what firms gain and lose through pursuing core competencies; and what firms gain through strategic alliances and networks. The course makes extensive use of case materials. This course is similar in content to the MBA core course NCC 504.

NCC 556 Managerial Finance
Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.
An introduction to business finance through theory and case studies. Topics include stock and bond valuation, the capital-budgeting decision, portfolio theory, the asset-pricing models, raising capital, capital structure, mergers and acquisitions, costs of capital, option pricing, and risk management. International applications are considered within each topic area. Letter grade only, based on exam, group case reports, homework and class participation. This course is similar in content to the MBA core course NCC 506.

NCC 558 Production and Operations Management
Spring. 3 credits. Course intended for non-Johnson School students only. Prerequisite: NCC 501 or permission of the instructor. Staff.
Operations management deals with the problems of producing and delivering goods and services, topics that are of strategic importance in almost every organization. Production scheduling is a significant problem for manufacturing firms; smooth work flow and quality control are important in banking operations; inventory control is crucial in large retail establishments; and proper task sequencing is a major problem in the construction industry. The course deals with these problems and others from a managerial
viewpoint. The course is designed around managerial problems in the operations area. Students use case studies to improve skills in problem identification. This course is similar in content to the MBA core course NCC 508.

**NBA 553 Accounting and Finance for Engineers**  
Spring; 3 credits. Course intended for non-Johnson School students only. R. Hilton. This course focuses on basic financial and managerial accounting and the economic and financial concepts that have a bearing on managerial decisions. The goals of the course are: (1) to give students a working knowledge of the accounting process and the value and limitations of the data that comes out of the accounting information system; (2) to familiarize students with key concepts in managerial accounting and the application of cost information to pricing and operating decisions; (3) and to promote an understanding of the use of economic theory in the evaluation of capital investment projects. The teaching methods consist of lectures and cases. Students are evaluated on the basis of exams.

**IMMERSIONS**

Only at the Johnson School will you find learning immersion courses in manufacturing, managerial finance, investment banking, brand management, and e-business. Immersions offer a semester of continuous focus, real-world problem solving, and site visits to dozens of companies.

**MFI—Managerial Finance Immersion**

This is a unique immersion course specifically designed for students planning to pursue finance careers. Some students interested in non-finance careers (including consulting) may wish to consider this course, but they should recognize that it is not specifically designed for this purpose. A major objective of this course is to help students make more informed choices about how to launch their finance careers.

**NBA 502 Managerial Cost Accounting**  
3.0 credits.

**NBA 549 Managerial Finance—Practicum**  
2.5 credits.

**NBA 556 Investment Banking—Practicum**  
2.5 credits.

**NBA 550 Financial Statement Analysis**  
1.5 credits.

**NBA 511 Financial Modeling**  
1.5 credits.

**NCC 508 Managing Operations**  
2.5 credits.

**NCC 509 Strategy**  
2.5 credits.

**NBA 656 Valuation Principles**  
1.5 credits.

**EBI—Electronic Business Immersion**

This is a full-time program for the semester; students cannot take other courses concurrently. The course is designed to make its students more attractive as candidates for employment in the investment banking profession, and we expect that some of the participating firms will be using their visits to identify candidates for summer internships, obtaining relevant summer internships remains the responsibility of the students. Prerequisite: NCC 506.

**NBA 500 Intermediate Accounting**  
3.0 credits.

**NBA 556 Investment Banking**  
2.5 credits.

**NBA 506 Financial Statement Analysis**  
1.5 credits.

**NBA 511 Financial Modeling**  
1.5 credits.

**NCC 508 Managing Operations**  
2.5 credits.

**NCC 509 Strategy**  
2.5 credits.

**NBA 656 Valuation Principles**  
1.5 credits.

**SBM—Immersion in Brand Management**

This is a full-time program for the semester; students will not be able to take other courses concurrently. The course objective is to begin developing students to think and act like brand managers, some of the best trained and most upwardly mobile professionals in industry. It will provide students with a unique opportunity to begin internalizing the concepts, principles, and tools necessary to achieve success in brand management. While the course focuses on managing traditional consumer brands, high tech products, services, and global branding will also be addressed. In-class methods consist of: (1) academic and industry lectures; (2) on-site visits with marketing and manufacturing professionals; (3) case and project discussions and presentations; and (4) a brand management simulation. Course requirements consist of: (1) discussion of readings; (2) individual case write-ups and presentations; (3) group projects and presentations (including a capstone simulation); and (4) in-class exams. There will be considerable off-campus travel for field study. Prerequisites: NCC 500, 501, 502, 503, and 506. Restricted enrollment—permission of the instructor required.

**NBA 624 Brand Management—Practicum**  
4.0 credits.

**NBA 502 Managerial Cost Accounting**  
3.0 credits.

**NBA 620 Marketing Researching**  
3.0 credits.

**NCC 508 Managing Operations**  
2.5 credits.

**NCC 509 Strategy**  
2.5 credits.

**SIM—Semester in Manufacturing**

This is a full-time program for the semester; students cannot take other courses concurrently. The course is designed to meld the practical and theoretical aspects of the field. We will be expecting a great deal of interaction and discussion between students, the participating faculty, and visiting practitioners. While the course is designed to make its students more attractive as candidates for employment in the investment banking profession, and we expect that some of the participating firms will be using their visits to identify candidates for summer internships, obtaining relevant summer internships remains the responsibility of the students. Prerequisite: NCC 506.

**NBA 650 Semester in Manufacturing Practicum**  
10 credits.

**NCC 508 Managing Operations**  
2.5 credits.

**NCC 509 Strategy**  
2.5 credits.

**IMMERSIONS 331**

**EBI—Electronic Business Immersion**

The new E-Business Immersion is unusual in that it is a joint undertaking of the Johnson School and Cornell's Faculty of Computing and Information Science (CIS). Three faculty members from CIS will participate in teaching the course, providing state-of-the-art background in Internet infrastructure and technology. EBI project work will be done by mixed teams of MBA and computer science graduate students. The computer science students will learn about business models and strategy, the MBA students will get a direct understanding of the limited and potential of technology, and both will learn from the approach and perspectives of the other.

The E-Business Immersion is also unusual in that it has a corporate sponsor and partner. Corning Inc., a world leader in fiber, cable, and photonics, will supply speakers and open its nearby facilities to site visits. In addition, the EBI project teams will join existing projects in various Corning divisions. Corning staff will be invited to attend and participate in EBI classes.

E-business, of course, is a field that has experienced unprecedented growth and, recently, attrition. The immersion will examine the rapid rise and fall of the early phases of the Internet economy and look for patterns and lessons. If the first round of pure-play B2C is somewhat tarnished, there is no doubt that multi-channel B2C activity will become vitally important in many industries. Customized manufacturing will be a significant part of this—a topic that EBI will explore jointly with the Semester in Manufacturing. Also joint with SIM will be examination of procurement and supply-chain coordination. EBI will also assess the next generation of applications that can be supported by wireless, networked Internet appliances.

EBI seeks to prepare students to deal with a world of infinite bandwidth, unlimited storage, and universal wireless connectivity. It will examine the fundamental underlying issues of intellectual property protection, privacy and security, and the challenging economics of zero-marginal-cost goods. It will identify and distinguish the four different levels of
The Internet is inexorably transforming the way the world does business. Cornell's E-Business Immersion is an appropriately innovative way to address preparation for participation in this revolution.

**NBA 508 Managing Operations**
2.5 credits.

**NBA 509 Strategy**
2.5 credits.

**NBA 613 E-Business Practicum**
10 credits.

**NCC COMMON CORE COURSES**

**NCC 500 Financial Accounting**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. D'Souza, R. Libby.

An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial statement preparation; use, and analysis; revenue recognition and cost measurement: present value; and problems in financial-accounting disclosure.

**NCC 501 Statistics for Management**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. McClain, J. Thomas.

An introduction to decision making under conditions of uncertainty. Topics include descriptive statistics, probability theory, classical statistics, statistical decision theory, and simple and multiple regression analysis. Applications in finance, marketing, and operations management are discussed.

**NCC 502 Microeconomics for Management**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. M. Waldman.

Microeconomic theory is introduced and applied to problems faced by managers. Specific topics covered include supply and demand, consumer behavior, pricing, when a firm has market power, and the role of contracts. The class employs a lecture format and emphasizes problem solving. Grading is based on a midterm and a final exam.

**NCC 503 Marketing Management**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Stayman.

The course is designed to convey the key concepts of marketing and how they fit into the larger context of management strategy and decisions. Both the practical "how" and the fundamental "why" of marketing activities are presented in the light of contributions from behavioral science, economics, and statistics. The goals are to provide sufficient understanding for those who will need only to interact with the marketing function, as well as communication concepts and developing processes that will provide the foundation for further course work and future experience in marketing. The course makes extensive use of case materials.

**NCC 504 Management and Organizations**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Sally.

If you think about it, stories are central to how we know and remember events, people, and facts, and to how we communicate knowledge and history. Most of the jobs you aspire to involve a particular form of story-telling—the CEO's vision, the analyst's report, the planner's strategy, the salesperson's pitch, the consultant's analysis, and the manager's brand. What distinguishes these as business stories is that they are often analytical (based on a set of objective facts and statistics) and reflect a deep understanding of the complex interactions of individuals and organizations. This course has two goals: (1) to make you appreciate the complexity of the issues that often arise in organizations, and (2) to develop and refine your analytical story-telling abilities. To achieve these goals, the course will be taught by the case-study method. Cases are an efficient way to expand your experience base with respect to such issues as motivation, power, leadership, ethics, structure, design, and change. We hope to teach you how to make good inferences about what will and won't work in particular situations, and how to learn from your own experiences and those of others.

**NCC 506 Managerial Finance**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. R. Michaela.

The course objective is to introduce students to the basic concepts of finance. In particular, we address the issue of what type of investments should firms and individuals take on, and how these investments should be financed. Understanding these concepts are essential to financial managers and professional investors. Important applications to many aspects of financial decisions all of us have to make on a daily basis (e.g., is getting a MBA a good investment?). These issues involve capital budgeting decisions; stock and bond valuation, how to assess and account for risk through the capital asset pricing model (CAPM), option pricing, capital structure and cost of capital, and market efficiency. Letter grade only, based on examinations, quizzes, group case reports, homework, and class participation.

**NCC 508 Managing Operations**
Spring. 2.5 credits. Johnson School core course. Enrollment limited. Prerequisite: NCC 501 or permission of instructor. M. Lojo, L. Robinson.

This course focuses on organizing processes: actions that convert inputs into outputs. Almost any business function can be modeled as a network of processes. The first part of the course examines processes, both individually and as part of a larger system; we see that good process design reflects both the volume and the variety of the product. A common course theme is the deleterious effect of variability (in demand, supply, quality, or capacity) in complex systems. Queuing theory and simulation are particularly helpful for analyzing process capabilities. The second part of the course analyzes how goods and services are produced. After describing the strategic role of operations, we examine forecasting systems, inventory management, and just-in-time and logistic management. Constrained optimization models provide information about managing with finite resources. The final part of the course examines process improvement through quality and productivity management and corporate learning.

**NCC 509 Strategy**
Spring. 2.5 credits. Johnson School core course. Enrollment limited. V. Kadivally.

Among the critical tasks facing any senior manager are the creation, implementation, and evaluation of a business unit's strategy. This course seeks to provide the management student with the tools and frameworks essential to carrying out these tasks. Many of these tools and frameworks are based on recent advances in game theory, industrial organization, and organization theory, although the course also draws from the older business policy tradition as well. Students who successfully complete this course will be able to analyze industries, identify areas of strategy advantage and disadvantage, and to devise strategies that exploit advantages and remedy disadvantages.

**NBA MANAGEMENT ELECTIVE COURSES**

**Accounting**

**NBA 500 Intermediate Accounting**
Fall, spring. 3 credits. Prerequisite: NCC 500 or the equivalent. T. Dyckman.

The course is based on the essential concepts and terminologies of financial accounting introduced in the accounting core course. Students learn to evaluate financial statements through the use of case studies drawn from actual corporate financial reports.

**NBA 501 Accounting for Mergers and Consolidations**
Spring. 1.5 credits. Prerequisite: NBA 500 or permission of the instructor. R. Libby.

The course focuses on accounting problems related to equity financing, including leveraged restructuring, intercorporate investments, leveraged buyouts, consolidated reports, proforma statements for a merger prospectus, and other related financial reporting problems. The method of instruction is lecture with cases. Grading is based on two closed book exams. Course continues in NBA 508, Advanced Accounting, offered second half of semester.

**NBA 502 Managerial Cost Accounting**
Fall, spring. 3 credits. Prerequisites: NCC 500, NCC 501, and NCC 502, or the equivalent. R. Hilton.

The course is designed both for those responsible for internal accounting information and those who use such information for decision making. Topics include budgeting, accumulating costs for product costing, activity-based costing, standard costs, the analysis of cost variances, cost estimation and prediction, cost-price-volume decisions, performance measurement, nonmanufacturing cost analysis, cost allocation, and transfer pricing. Instruction will be a mixture of lecture and case discussion. Student evaluation will be based on a midterm exam, a final exam, a project, and class participation.

**NBA 503 Strategic Cost Management**
1.5 credits. R. Hilton.

This course focuses on the role of cost management and related issues in helping a firm compete successfully in the global market. Topics considered include activity-based costing, activity-based management, value chain analysis, the lean enterprise,
confronting competition in an industry dominated by lean enterprises, re-engineering, process value analysis, identification of non-value-added activities and costs, target costing, Kaizen costing, continuous improvement, time-based competition, cost versus quality, and benchmarking. The course is almost entirely based on cases, many of them lean enterprises in Japan.

NBA 504 Taxation Affecting Business and Personal Decision Making
Spring. 1.5 credits. Prerequisite: NCC 500 or permission of the instructor. R. Bloomfield.
This course introduces students to the fundamental concepts and techniques of tax planning for individuals and businesses. Planning opportunities considered include changing the timing and nature of income, investments, and expenses; choosing an organizational form; and constructing transactions that allow two or more parties to engage in tax arbitrage. The course also introduces tax research techniques and issues regarding tax compliance. Course continues with NBA 507.

NBA 505 Auditing
Spring. 3 credits. Prerequisite: NCC 500 or permission of the instructor. M. Nelson.
The course examines the process by which financial-accounting systems are audited. Topics include ethics, the meaning of audit reports, the legal liability of auditors, the study and evaluation of internal control systems, and various approaches to testing account balances. Problems, cases, and video simulations are used to illustrate concepts.

NBA 506 Financial Statement Analysis
Spring. 1.5 credits. Prerequisite: NCC 506, NBA 507 (or concurrent enrollment) or permission of the instructor. S. Bhorjraj.
This course develops a set of core skills essential to financial statement analysis. We will cover strategic ratio analysis, cash flow analysis, pro forma financial statements, financial modeling, credit analysis, bond rating and bankruptcy predictions, and firm valuation using discounted cash flow techniques. Emphasis is on practical applications. The course format is a combination of case studies and lectures. The lectures communicate other aspects of the material while the cases provide hands-on experience. There will be an exam.

Note: Students who have completed the three-credit version of NBA 506 cannot enroll in this course.

NBA 507 Tax Implication of Mergers and Acquisitions and Other Special Topics
Spring. 1.5 credits. Prerequisite: NBA 504 or permission of instructor. R. Bloomfield.
This course examines special topics in tax planning for businesses, with particular emphasis on capital structure choices and reorganizations (mergers and acquisitions), and intra-entity transactions (transfer pricing issues). Readings include many current research papers examining how large corporations exploit their tax planning opportunities.

NBA 508 Advanced and International Accounting
Spring. 1.5 credits. Prerequisites: NBA 501 or permission of the instructor. J. D’Souza.
The course examines advanced topics in accounting for international transactions and international subsidiaries, including foreign currency translation, price level adjustments and international variation in accounting principles. The method of instruction is lectures mixed with cases. Grading is based on two exams and written cases. Continuation of NBA 501. Accounting for Mergers & Consol (offered first half of semester).

NBA 509 Advanced Financial Analysis
Fall. 1.5 credits. Prerequisites: NBA 506, a finance immersion course, or permission of the instructor. S. Bhorjraj.
This course builds on the core financial analysis skills developed in NBA 506. Topics covered include equity valuation, residual income models, quality of earnings assessments, earnings manipulation detection, market efficiency issues, fairness opinions in MBO’s, and large sample stock screening strategies. The overall focus is on using accounting-based information to make investment decisions. Emphasis is on practical applications and special attention is given to cultivating analytical and communication skills. The course features both lectures and cases. There will be a group term project, but no final exam.

Note: Students who have completed the three-credit version of NBA 506 cannot enroll in this course.

NBA 510 Cornell Equity Research
Fall, spring. 1.5 credits. Prerequisites: NCC 500 and completion of or concurrent enrollment in NBA 506, or permission of the instructor. R. Bloomfield.
Students write and revise equity research reports on companies that are neglected by analysts and preferably undervalued. Class work includes lectures and cases on equity research and valuation, presentations by guest visitors, and presentations by students who must persuade the class to approve their stock recommendations.

NBA 511 Financial Modeling
Fall, spring. 1.5 credits. Prerequisites: NBA 506 or permission of the instructor, and mastery of basic EXCEL skills. Staff.
Financial modeling is the art and science of constructing spreadsheet models of firms’ future financial statements. This class builds on the brief introduction to financial modeling in NBA 506 by modeling the effect on the income statement, balance sheet, and statement of cash flows of more complicated financial transactions such as leveraged buyouts, mergers & acquisitions, and corporate reorganizations. The class meets in the state-of-the-art Parker Center computer lab, and active student participation is emphasized.

NBA 512 Applied Portfolio Management
Fall, spring. 3 credits. Restricted. C. Lee.
An accounting/finance elective course that focuses on the management of an investment fund (see Charles Lee for a full course description). Students enrolled in this course must commit to taking the course for fall and spring semesters. They will receive three credit hours for each semester's work. Strong preference is given to second year MBA students who have successfully completed either NBA 500 or one of the finance immersions. Students need to apply formally. If the number of applicants exceeds 12, admission will be competitive and merit-based.

Economics

NBA 523 Business and Economic Forecasting
Spring. 1.5 credits. Prerequisite: NCC 501 or the equivalent. R. Highfield.
This course focuses on statistical and econometric approaches to forecasting business and economic data series that have a time dimension (time series). The course provides students with a toolbox of time series forecasting methods and teaches them how to choose the appropriate one. Topics include the relationship of forecasting to decision making, univariate methods such as ARIMA modeling, and some multivariate methods such as transfer function, regression, vector autoregression, and neural networks. Applications will usually involve the forecasting of business and economic data. Although statistical theory will be covered as necessary with lecture and supplemental class notes, the emphasis will be on applications and learning by doing. Passing the course requires participation in class discussions and satisfactory performance on both individual and group projects. There are no exams. There is no text for the course but students will be required to use the student version of a sophisticated econometric software package.

NBA 524 Macroeconomics and International Trade
Fall. 3 credits. Prerequisite: NCC 502 or equivalent or permission of the instructor. R. Lind.
The course applies basic macroeconomic theory to such problems as inflation, unemployment, economic growth, and productivity and examines how those problems interact with international trade and finance. Students learn to be informed observers of national and international economic policies and discerning users of economic analyses and forecasts. A lecture-discussion format is used as the method of instruction.

NBA 527 Applied Economic Analysis
(also ECON 616)
Spring. 4 credits. R. Frank.
This course will emphasize how economics analysis can help firms and individuals make the most of their opportunities. Of special interest to managers and consultants will be the course's focus on examples that illustrate how faulty economic reasoning leads to inefficient outcomes. The course will also emphasize strategic thinking, and will instruct students in the art of "economic naturalism"—the use of economic reasoning to understand and explain patterns of individual and firm behavior.

Finance

NBA 540 Advanced Corporate Finance (Theory and Practice)
Fall, spring. 3 credits. Prerequisite: NCC 500 or the equivalent. Students who took NBA 540 and/or NBA 548, 1.5 credit version, can not enroll in this course.
H. Bierman.
This course is relevant for both investment banking and the treasurer's activities of an operating corporation. Most class sessions are lecture-discussion, but there are several corporate finance cases. The topics include
central themes are the structure of financial markets, their pricing function, the interaction between financial markets and macroeconomic conditions, and the processes of innovation and regulation in these markets. Students look at the workings of a variety of markets and developing an understanding of the different problems which different types of markets address. The question of market efficiency and the interaction between government policies and financial markets is studied. We analyze issues in innovation and regulation with the principles of financial economics. Throughout the course, the relevance of these issues for the practical corporate, portfolio, or public sector decision maker is considered. The course includes ideas and evidence from academic research along with historical, institutional, and international perspectives. Recent events are used to illustrate concepts and develop analytic skills. Spreadsheet assignments and a term project requiring data analysis develop research skills and case analyses. Concepts. Exams consist of computational, short answer, and short essay questions.

NBA 546 Corporate Finance
Fall, spring. 1.5 credits. Prerequisite: NCC 506. Staff.
This half-semester course covers some of the more advanced topics in the area of corporate finance, including corporate governance, corporate capital, basic capital structure issues, valuation of natural resources, and evaluation of new product investment projects under uncertainty. The methods of instruction are lecture, case discussion, spreadsheet exercises, statistical exercises, and seminars by practitioners. Students are evaluated on the basis of mid-term and final examinations, cases, and homework assignments.

NBA 547 Applied Financial Engineering (also OR&IE 565)
Spring. 4 credits. Prerequisites: NCC 506, NBA 546, NBA 555, NIA 542, OR&IE 523, OR&IE 525, COMS 211, permission of instructor. Staff.
This course is designed to integrate students' work in engineering (computing, stochastic modeling, finance, and economics) and finance by requiring them to apply modern finance theory and technical analysis techniques in the context of case studies. The course covers derivative securities, hedging, and corporate finance.

NBA 550 Risk Management with Derivatives
Spring. 3 credits. Prerequisites: NBA 546 and NBA 555 (NBA 555 can be taken concurrently). R. Guikla.
This course studies advanced topics in derivatives and risk management. The first part of the course covers topics in derivatives and develops the tools necessary for analysis, and the second part covers their application to risk management. This course is intensive and demanding—about 50 percent more demanding than the Fall NBA 546 course.

NBA 551 Current Topics at the Crossroads of Law and Finance
Spring. 3 credits. M. O'Hara.
This course explores a series of selected topics in law that involve important issues in law and finance. The premise of the course is that financial institutions of all kinds, whether they are banks, insurance companies, brokers, investments banks, or pension funds, invest money and advise clients in a wide variety of settings. This agency relationship introduces a number of important dimensions to the intermediary-client relationship. This course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.

NBA 552 Cases in Corporate Finance
Spring. 3 credits. Prerequisites: NCC 506 or the equivalent. Recommended: NBA 540. Course is limited to second-year MBA's and Twelve-Month MBA (TMB) students. Students who took NBA 535 and/or NBA 536, 1.5 credit version, cannot enroll in this course. H. Bierman.
This course consists of discussions of corporate finance cases dealing with corporate financing. Students will form groups and formally present one case and critique a second. This is in addition to the normal class sessions. This agency relationship introduces a number of important dimensions to the intermediary-client relationship. This course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.

NBA 554 International Finance
Spring. 3 credits. Prerequisites: NCC 506 (Finance core) or permission of instructor. W. Bailey.
This course applies principles of finance to the international setting. International finance is different in two basic respects. First, the existence of multiple currencies adds risk to investment and financing decisions. Second, when corporations and portfolio investors invest in international assets, they are exposed to currency risk. The material applies equally to careers in international asset management and to international business. The course does not deal with foreign exchange trading or the details of multinational business operations.

NBA 555 Advanced Topics in Derivative Securities
Spring. 3 credits. Prerequisites: NBA 550. Staff.
This course is designed to integrate students' work in engineering (computing, stochastic modeling, finance, and economics) and finance by requiring them to apply modern finance theory and technical analysis techniques in the context of case studies. The course covers derivative securities, hedging, and corporate finance.
volatility, barriers to international capital flows, and the value of international diversification. The second part of the class presents a variety of problems, examples, and applications from the three basic themes. These range from corporate applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

**NBA 555 Fixed Income Securities and Interest Rate Derivatives**

Fall, spring. 3 credits. Prerequisites: NCC 506 (Finance core), NCC 501 (Quantitative Methods core). R. Jarrow.

This course is designed to study the pricing, hedging, and risk management of fixed income securities and interest rate derivatives. Topics to be studied include: the term structure of interest rates, interest rate swaps (caps, floors, collars), the risk structure of interest rates, credit risk spreads, and corporate bond valuation. The method of instruction is lectures and discussion, with computer illustrations being an integral part of the class content.

**NBA 557 Case Studies in Venture Investment and Management**

Fall. 2 credits. Prerequisites: NCC 500 and NCC 550 or concurrent enrollment. W. Thomas.

A series of cases that focus on the venture capital investment process and the subsequent management of such ventures. The primary perspective is that of the venture capitalist in assembling and evaluating information, preparing forecasts, assessing risks, developing and negotiating investment structure and terms, and deciding whether to invest. Cases also focus on management and financial problems, policy issues, and the relationship between venture capitalists and entrepreneurs. The secondary perspective is that of the entrepreneur and the techniques and skills employed in managing growing enterprises. Presentations by venture capitalists are will supplement student discussion and analysis of cases. Grades will be based on written reports, quality of class participation, and a final exam.

**NBA 559 Corporate Financial Policy**

Spring. 1.5 credits. Prerequisite: NCC 506 (Finance core). Y. Grinstein.

The course will deal with frontier topics in corporate finance and investment strategy. The financial world is changing at an increasing pace. New financial products are coming to the markets, and the financial structure of many corporations is becoming more and more complicated. Corporate financial officers and investors (such as money managers) need to know the driving forces behind the financial products (debt, equity, and more complicated products) to understand the products themselves. Understanding these issues enable us to estimate firm values more precisely. The course objective is to enable students to better analyze financial situations they may encounter in the future, as well as firms' valuation techniques.

**Entrepreneurship**

**NBA 530 Entrepreneurship Lab**

Fall, spring. 3 credits. Prerequisites: NBA 564 Entrepreneurship, or concurrent enrollment, or permission of the instructor. MBA students only. P. Sears.

Students team up with entrepreneurs in the greater Ithaca area on defined projects, which will be integral to the companies' operations, such as production planning, new product launches, or assessing organizational structure. The goal of the course is for students to gain first-hand exposure to the application of functional knowledge in a start-up setting, while bringing real value to the host company.

**NBA 531 Startup Forum: Cornell Technologies with New Venture Potential**

Fall, spring. 1 credit. R. Holsten.

The course will focus on research at Cornell, which may be a basis for new business ventures. It will cover the fundamental ways in which university-based research differs from industrial research. Students will explore and critique the business potential of each concept.

**NBA 532 Venture Partnerships—The Corporate Business Development Role, Big Company vs. Emerging Company**

Spring. 1.5 credits. P. Sears.

In an era when large corporations are "downsizing" and "outsourcing" in order to save on fixed costs, and emerging companies are dependent upon strategic partnerships with large companies as part of their financing strategies. The business development executive can be found at the vortex of this activity. Priorities for the business development executive are distinctly different depending upon the size and history of the enterprise. This course, taught by a venture capitalist who has also served as a Corporate Development Vice President for a Fortune 100 Company, examines the role of the business development executive. A significant amount of attention is paid to planning and managing the merger and acquisition process, as well as key elements in negotiation of the strategic partnerships. There will be several guest speakers, each an acknowledged expert in the field. Students will be assigned deal-making tasks in the context of a case study that will be the centerpiece of the course. Class dates to be announced. Students are expected to have read the Big Pharm case study prior to the first class.

**NBA 539 The Venture Capital Industry and Private Equity Market**

Spring. 0.5 credit. D. BenDaniel.

This course focuses on the industry from the practitioners' perspective. Topics include: (1) an introduction to the private equity market focusing on the transactions that define the industry, its structure, participants, history and trends; (2) institutional private equity investing—now an increasingly important and dynamic part of the asset allocation mix; and (3) issues in private equity investing such as concentration in fewer, larger funds and the critical role of a new class of gatekeeper/consultants for limited partners. The course will involve four lectures and a final paper.

**NBA 563 Initial Public Offerings and Acquisitions**

Spring. 3 credits. J. Shulman.

An in-depth look at initial public offerings (IPOs) and acquisitions from a practitioner's point of view. With respect to IPOs the course will cover: the applicable statutory framework, pre-offering corporate preparation (such as implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, pricing, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the consequences of going public. Regarding acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale) and crucial aspects of acquisitions, such as letters of intent, continuity of employees, anti-takeover strategies, and non-competition agreements. Mr. Shulman is an attorney with experience in IPOs and acquisitions, and an adjunct professor at the Cornell Law School where he teaches a seminar course on this topic.

**General Management**

**NBA 560 Business Law I (also ARME 330)**

Fall. 3 credits. Limited to juniors, seniors, and graduate students. D. Grossman.

This course introduces the basic tenets of law as they apply to businesses and their operations. Topics include personal property, contracts, agency, real property, and landlord-tenant concerns. Text readings and case studies are used. All students standing to be professional accountants are required to take the course, and it is strongly recommended for finance students.

**NBA 561 Business Law II (also ARME 321)**

Spring. 3 credits. Prerequisite: NBA 560 or permission of the instructor. D. Grossman.

The first portion of this course examines legal issues in the formation and operation of business enterprises, particularly partnerships, corporations, and limited liability companies. The second portion of the course will review selected topics in business law, such as employment discrimination, secured transactions, product liability, unfair competition, and international business law.
NBA 562 Estate Planning (also ARME 422)
Fall. 1 credit. Limited to juniors, seniors, and graduate students. D. Grossman.
Fourteen sessions on the various aspects of estate planning and various trusts. The law of wills, federal and New York State estate and gift taxes, and probate procedures are covered.

NBA 567 Management Writing
Fall, spring. 1.5 credits. B. Mink, A. Pike, M. Hittleman, C. Rosen.
Students learn to write clearly and effectively by focusing on the writing process as well as the finished product. Course topics include audience perspective, style, organization, strategy, and persuasion. There is a writing assignment every week. Students receive instructor and peer feedback. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

NBA 568 Oral Communication
Fall, spring. 1.5 credits. B. Mink, A. Pike, C. Rosen.
This course focuses on improving the presentation skills of management students. The course covers the areas of speaking formats (impromptu, extemporaneous, manuscript), delivery, organization, visual aids, and question/answer. Student speeches constitute the bulk of class time, with each student presenting seven or eight speeches in the seven-week session. The small class size allows for significant individual attention. Students receive feedback from classmates and the instructor, and have the opportunity to review in tutorials the videotapes of most of their presentations. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

NBA 569 Management Consulting
Fall, spring. 3 credits. A. McAdams.
The course is case-study oriented and focuses on strategic consulting. It has multiple objectives. First, it provides students with the opportunity to understand the role of the consultant and gain indirect experience in that role through dealing with a broad range of practical and real-world issues. Second, it helps students improve their analytic skills through practice with case studies. Third, it provides students with information that they are unlikely to gain in other courses, as well as experience in making group presentations and evaluating them. Students are required to write a comprehensive analytic term paper.

NBA 570 Leadership in Management
Spring. 1.5 credits. MBA students only. R. Peterson. RPW Executive Development, and other Johnson School faculty.
This course is a partnership with RPW Executive Development to provide MBA students with the self-awareness and interpersonal skills required to be effective leaders (the general principles of leadership course is MBA 668). RPW has partnered extensively with the Johnson School Executive Education Department in the past. The course consists of five full-day training sessions. Staff from RPW and Johnson School faculty provide training. The first two days focus on self-awareness and employ several experiential exercises and self-assessment instruments including, the Campbell Leadership Index (CLI), Meyers-Briggs Type Indicator (MBTI), the Fundamental Interpersonal Relations Orientation-Behavior (FIRO-B), the Kirton Adaptation/Innovation inventory (KAI), and the Ambiguity Preference Scale (APS). Class members are also trained in giving and receiving feedback from team members and faculty. Mid-week activities include various leadership and team challenges, including a business simulation. Attendance is required every day of the course to receive credit. NOTE: most of the self-assessment instruments listed above will need to be completed prior to the first day of class to allow for scoring and analysis.

NBA 571 Cornell Management Skills
Fall, spring. 1.5 credits. Restricted to second-year MBA students. J. Hass, S. Snidulski.
This computer-based simulation is played by self-selected teams of four students who make marketing, production, and finance decisions for one of five companies operating competitively in the same industry. After the first week, during which the rules of the simulation are explained and the software used by each team is demonstrated, each team makes periodic decisions (meeting at their own convenience). At the beginning of the simulation, each team writes a Strategic Intent paper, and, before the results of the last decision have been determined, each team presents an in-depth analysis of its performance and its strategy for the future in a "board of directors" meeting. Letter grading only, based on the value created for the company's shareholders (relative to other firms in the same industry), the team's Strategic Intent paper and the instructor's evaluation of team's performance at the BOD meeting. Students who have completed MBA 549 cannot take this course. Open to MBA I1s only. Meetings will be periodic throughout the semester.

NBA 573 Seminar in Sustainable Development (also ABEN 673)
Spring, first half of semester. S-U grading only. 1-3 variable credits. A. McAdams.
This seminar-style course will involve readings and discussion of issues in environmental management, and will also focus on significant outcomes of leadership on the subject of environmental management. (Students interested in doing consulting projects in environmental management will be accommodated in NBA 575, Advanced Consulting.)

NBA 575 Field Projects
Fall. 3 variable credits. J. Russo.
The course teaches how to frame unstructured business problems through a hands-on team project. Teams must identify what the central issues are, and then determine the most appropriate tools and concepts to provide insight into these issues. Students also learn to approach business problems from a cross-functional perspective. Specific conceptual content includes: project management, power, politics, and personalities in work groups; managing in for-profit versus not-for-profit organizational change. This course is not classroom-based. Although there will be a few class sessions early in the semester, the course structure will revolve around periodic reviews and coaching sessions as a mentor team will contain one regular member of the Johnson School's faculty, an experienced executive, and an administrator.

NBA 577 The Political, Legal, and Regulatory Environment of Business
Spring. 3 credits. R. Schuler.
The political climate, laws, regulations, and government arrangements for infrastructure have a profound effect on the nature, operation, and profitability of business. Many of the most important decisions that top management makes are driven by political, legal, and regulatory considerations (e.g., the responses of Exxon to the Exxon Valdez oil spill; Union Carbide to the Bhopal, India, gas leak; and the decision of AT&T to accept the division of its company in response to an antitrust suit filed by the U.S. government). Environmental and waste-management concerns are leading to new laws and regulations that affect many aspects of business, creating opportunities as well as posing problems. The course begins with a discussion of the political and economic foundations of business regulation. Students examine different areas of application, including economic regulation, environmental regulation, antitrust, and product liability. Guest speakers include leading scholars from throughout the university and business and government leaders.

NBA 578 Business Ethics
Fall. 3 credits. Staff.
Students examine actual situations in business, both in the United States and abroad, that involve ethical issues affecting individuals and organizations. Students are challenged to decide on appropriate ethical positions.

NBA 579 Business Strategy
Fall. 1.5 credits. Enrollment limited to second-year MBA students only. J. Suwinski.
A well-defined strategy is essential for business success—describing where the business is going, how it's going to get there, and then providing a framework for making decisions along the way. Strategy is the responsibility of top executives of a company/business, and the ability to formulate effective strategy is one of the key skills that distinguishes General Managers from functional managers. This course focuses on the process of effective strategy formulation from the perspective of the general manager of a business unit. This perspective also applies to consultants working for clients on business unit strategy. Corporate strategy and its interaction with business unit strategies will be discussed, as will tools for industry and company analysis. Situational analysis will also be covered. This course complements the core strategy course, with emphasis on understanding and practicing how tools and frameworks are useful in case-based interviews. The course draws heavily on the instructor's experience developing strategy for numerous businesses at Corning Incorporated. Guest speakers from industry and strategy consulting firms and also from industry present their approaches to strategy, and discuss the analytical tools they find most effective in working on business strategy. Students gain experience, via assigned cases, in analyzing business problems/opportunities, using the strategic process to formulate effective business strategies, and in presenting their recommendations in written and oral form. A major case write-up and presentation is part of the course environment at the end of the course gives each student an opportunity to play the role of a strategy consultant working on a real case.
NBA 565 Strategic Alliances: Lessons from Experience
Spring. 1 credit. J. Suwinski.
A wide variety of strategic alliances are being formed today as companies try to leverage their resources for competitive advantage. This course gives an overview of the spectrum of alliances, examining the strategic rationale and pros and cons of each major type of alliance. The primary focus is on joint ventures as a specific form of strategic alliance, where the success rate is less than 50 percent. The course develops a set of principles that have contributed to success for Corning Incorporated. The course is taught from the perspective of the general manager of a major business unit.

NBA 665 Managing Technology and Innovation
Spring. 3 credits. Staff.
This course is designed for students who see themselves in settings where they have to develop new products or processes and for students who must manage innovation change in existing products or processes. Major issues involved in managing the introduction of new technology, including competitiveness, technology assessment, R&D strategy, and positioning will be covered. Businesses today are transformed by new technologies and how innovations diffuse among firms. Also considered are internal management issues, including such topics as the structure of innovative organizations, the design of incentive and reward systems that foster risk taking, the way innovation champions manage new-product development through cross-functional teams, and the role of executive leadership. The course uses a combination of readings, lectures, discussions, case analyses, and guest lectures.

International Management
NBA 576 The World Geopolitical Environment of Business
Fall. 3 credits. R. Lind.
The geopolitical face of the world is changing at a pace that few could have envisioned even five years ago. The unification of Germany, the fall of communism, the institution of sweeping economic restructuring in the former Soviet Union, the move toward democracy with market economies in eastern Europe, the movement of Europe toward a unified economy, and the fluctuations with reform and its implications in China are just a few of the many examples of changing world environment of business. This course provides students with a view of those fast-paced worldwide changes. Topics covered include developments in western and eastern Europe, the former Soviet Union, the Pacific Rim, Central and South America and the Middle East and the role and fate of developing countries in the world economy. Guest speakers include leading scholars from Cornell and other universities and leaders in business and government.

NBA 580 Strategies for Global Competitiveness
Spring. 3 credits. A. McAdams.
Initially, students explore the role of government in several private-market industrialized nations—Japan, France, Germany, the United Kingdom, and Italy—for lessons the United States might learn and use. Students investigate the impact in each of those countries of government policies on the global competitiveness of the country's firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela and Malaysia and newly emergent countries such as Singapore. Classes are run in a discussion format. This course can be used to fulfill the strategy requirement.

NBA 581 Special Topics—Contemporary Development of Southeast Asian Economies
Spring. 3 credits. I. Azis.
This course analyzes the patterns and processes of Southeast Asian economic development during the last three decades. The five plus two countries in the region that will be the focus of the course include Thailand, Indonesia, Malaysia, Singapore, the Philippines, Hong Kong, and the Republic of Korea. The topics will be divided into the following categories: Southeast Asian economic development, regional economic cooperation in Southeast Asia, and the financial crisis of the 1990's. The course assesses important factors and consequences of the region's development patterns and uses international comparative analysis to explicate the relative position and uniqueness of the region's performance. Evaluation will be based equally on the student participation in class discussions and debates and on a term paper.

NBA 584 International Competitive Strategy
Fall and spring. 1.5 credits. J. Katz.
The course focuses on the development of competitive strategies in the global environment—including the identification of internationally relevant strengths and weaknesses, the movement and use of resources to gain competitive advantage, and strategies to confront competitors, both domestic and multinational.

NBA 585 Cross-National Management
Fall. 1.5 credits. J. Katz.
Focuses on the differences in managerial style across countries and develops skills to deal with these differences. Most of the material will be applicable to all countries, though two specific countries will be highlighted each semester.

NBA 586 Global Management Structures
Spring. 1.5 credits. Prerequisites: the new version of NBA 584. J. Katz.
Focuses on the control, communication, and coordination systems within multinational corporations. Design and development of appropriate systems, to ensure enactment of corporate strategy will be addressed.

NBA 587 International Mergers & Acquisitions
Spring. 1.5 credits. J. Hanks.
This course covers issues relating to mergers and acquisitions in an international context. Topics include business due diligence, pricing and negotiation, and other important topics from both the buy and sell side. The course uses both lecture and case formats. Students are evaluated on the basis of group and individual written assignments.

NBA 590 Managing in Developing Countries
Fall. 1.5 credits. J. Katz.
This class centers on the unique features of industrialized and newly industrializing countries as public multinational business operations. It is a case-based course; each class is spent discussing one or two cases. Topics include environmental variation and how to deal with it and concentrated national power structures and their management. A large number of countries spread throughout the world are covered. Students are responsible for providing in-class updates on the countries discussed. Grading is based on the country update presentation, a final case write-up, and class participation.

NBA 592 Experience in International Management
Spring. 1.5 credits. J. Katz.
The objective of this course is to combine classroom sessions and international experience with an increased awareness of business environments outside the United States. NOTE: participation in a faculty-approved study trip is required to complete this course (fee charged). On trips, students will visit local businesses, subsidiaries of foreign multinationals, government officials, local business school students, and others. Students must attend two pre-trip meetings (1 1/4 hours each) and two Saturday meetings during spring semester (2 1/2 hours each). Those meetings will be used to present information on international business conditions, regional economic cooperation, management styles, and also, to develop cross-cultural skills. A final paper, integrating the material learned in the classroom with their experiences, will be required.

Management Information Systems
NBA 601 Electronic Commerce
Spring. 3 credits. Letter/S-U optional grading. L. Orman.
Electronic commerce is the use of information technology in conducting economic transactions and managing businesses over computer networks. It is a phenomenon that has captured the public attention because of its wide-ranging implications for businesses, markets, public institutions, and the general public. Electronic commerce involves a wide variety of cooperating technologies such as communications, networks, databases, expert systems, and multimedia. It also affects a wide variety of managerial issues. Electronic commerce created a new emphasis on information technologies and systems in management. It led to the development of new technologies and new combinations of existing technologies to support management. On occasion, it radically altered business practices and the role of management. The students in this course learn to conduct economic transactions and manage businesses on the Internet. All major technical and managerial issues are covered through computer exercises on the Internet, and case studies and examples of businesses on the Internet.

NBA 612 Imaging and the Electronic Age
Fall. 3 credits. D. Greenberg.
The advances of computer graphics, computer processing power, network bandwidths, and video compression technologies are forcing the merger of the telephone, television, and computer industries. The influence of these
technologies has created paradigm shifts that will drastically change the way we communicate, how we are educated, the way we work, design, and in essence, how we will live in the next century. We are just beginning to fathom how these changes will influence our modus operandi and greatly modify our traditional patterns of behavior, both personal and organizational. Clearly, business and industry management will have to understand the implications of the advanced technological changes. This course is designed to present historical technological advances that created major paradigm shifts for communications. Advances in computer technology emphasizing the fundamentals behind the increases in processing power, video and computer graphics capabilities, and network transmission will be presented. The latter half of the course will cover the effect of these scientific advances on many discipline-specific areas including photography, the film industry, the entertainment and animation industry, television broadcasting, publishing, as well as the computer industry itself. Sessions will be devoted to the social and legal issues arising from the rapid advances in electronic communications. In an attempt to predict the disruptive changes of the future, it is best to understand the technologies themselves. Thus, students with technology or science backgrounds are preferred. Although no computer programming will be required, a working knowledge of computers is necessary. The course will be especially tailored to a business school and industrial concerns and will have interactive live demonstrations at the state-of-the-art laboratory of the Program of Computer Graphics. No prior knowledge in computer science is required.

NBA 614 Managing in the Information Age
Fall. 1.5 credits. A. McAdams.
In this course we explore a topic that is just beginning to emerge: the implications of the explosion of the Internet and interactive multimedia. Selected readings for the way managers think and manage. We examine the origins of the Internet and some of the forces that have led to its rapid development, noting along the way, why and how it has "blindsided us" as Andy Grove and Bill Gates of Microsoft candidly stated. We then look at how information is being used today in pioneering applications in organizations of various kinds based, in part, on original case studies and on guest lecturers. Throughout the semester the student is asked to identify new and innovative use of modern information technologies. The course itself will evolve, even in real time, with the development in the field.

NBA 615 Information Technology to Manage Business
Fall. 1.5 credits (variable). A. McAdams.
This course relies on visiting speakers from several technology-based firms. The speakers address how to manage the information technology function as a business and how to use it to address business problems. Speakers come from hardware companies, software companies, and other organizations dealing with large issues of managing the information resource. There are assignments, with student groups interacting with speakers, and a short paper at the end of the course. The course meets approximately 10 times during the semester for up to two hours.

Marketing

NBA 520 Pricing and Strategy
Spring. 3 credits. Prerequisite: NCC 502.
This course extends material introduced in the core microeconomics course, where the focus is on pricing decisions. The course is taught very much like the core microeconomics course; it consists mostly of lectures and problem sets that use the ideas contained in the lectures. Some understanding of calculus is required. The grading for the course is based on a midterm exam, a final exam, and a paper. Specific topics covered include price discrimination, peak-load pricing, product line pricing, and pricing when information is asymmetric.

NBA 620 Marketing Research
Fall. 3 credits. Prerequisites: NCC 501 and NCC 503, or the equivalent.
This course deals with marketing research as a critical support function in corporations. The broad objective is to provide a fundamental understanding of marketing research methods employed by better managed firms or proposed by leading academicians. The course is aimed at the manager, the ultimate user of marketing information, who is responsible for the scope and direction of research activities involved in obtaining, analyzing, and interpreting results of research. The course covers the use of secondary sources of marketing information for designing studies and collecting primary data. Students are exposed to up-to-date methods in research design, qualitative research, measurement, data collection, and analysis. The emphasis is on research methods and on interpretation and use of results rather than on mathematical derivations. Students are also exposed to the practical side of marketing research through case studies, problem sets, and projects.

NBA 621 Marketing Communications
Fall. 1.5 credits. Prerequisite: NCC 503 (Marketing core).
The course is designed to give students an understanding of advertising and promotion management process. It covers the components of a successful advertising campaign and helps students develop an appreciation of the role involved in advertising planning and decision making. They also learn how recent social-scientific findings and theory can facilitate advertising management.

NBA 622 Marketing Strategy
Fall. 3 credits. Prerequisite: NCC 503 (Marketing core).
The course balances theoretical and practical approaches to the development and evaluation of marketing strategies for multifirm. It considers various environmental opportunities and constraints in developing and evaluating integrated marketing strategies for new and established products and services. Recent research results are applied to decisions on product-market boundary definition, resource allocation, product positioning, and competitive reactions. It includes selected current topics such as brand equity, acquisitions, and lead-user analyses. Students use case studies extensively to develop skills in strategy analysis and to enhance skills in assessing external threats and opportunities. They employ computer-assisted market strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy.

NBA 623 Customer-Based New Product Development
Fall, spring. 1.5 credits. Prerequisites: NCC 501 and NCC 503.
The successful introduction of new products requires careful planning and systematic screening and testing. This course covers models and methods that are useful to managers in the development and marketing of new products. Heavy emphasis is placed on the measurement of consumer preferences. Students are required to complete a group project, consisting of a measurement instrument, data collection (from at least 30 respondents) and data analysis, for a self-chosen product category. The method of instruction consists of a combination of lectures and discussion of cases and articles. Performance is evaluated primarily based on exams and the group project.

NBA 625 International Marketing
Spring. 1.5 credits. Recommended: NCC 503.
This course deals with marketing research as a critical support function in corporations. The broad objective is to provide a fundamental understanding of marketing research methods employed by better managed firms or proposed by leading academicians. The course is aimed at the manager, the ultimate user of marketing information, who is responsible for the scope and direction of research activities involved in obtaining, analyzing, and interpreting results of research. The course covers the use of secondary sources of marketing information for designing studies and collecting primary data. Students are exposed to up-to-date methods in research design, qualitative research, measurement, data collection, and analysis. The emphasis is on research methods and on interpretation and use of results rather than on mathematical derivations. Students are also exposed to the practical side of marketing research through case studies, problem sets, and projects.

NBA 626 Consumer Behavior
Spring. 3 credits. Staff.
Topics include factors that influence response to advertising of various kinds, purchase decisions, product perceptions, response to promotion, consumer satisfaction, and the basic methodologies for understanding consumer behavior.

NBA 637 Affect, Brand Equity, and Internet Marketing
Spring. 3 credits. A. Isen.
The course will focus on concepts central to brand equity, including brand association, brand perceptions, brand loyalty, relationship marketing, and brand extensions and revitalization. Special focus is placed on the role of affect (feelings) in decision-making and thought processes that are fundamental to these and other concepts central to brand equity establishment, maintenance, and management. Additionally the course covers the emerging area of Internet marketing from the consumer perspective relative to brand equity, including consumer response to the Internet as a medium and marketing channel.

NBA 630 Policies for Marketing Channels
Spring. 3 credits. Prerequisite: NCC 503.
Marketing channels are analyzed as a chain of independent and interlocking organizations that produce and deliver goods and services to various types of consumers. This course looks at various aspects of these relationships, such as efficiency, conflict, incentives, and government intervention. Instruction consists of
practices in the industry, students visit one or two direct marketing firms in New York City or its vicinity toward the end of the course.

**NBA 638 Analysis of Competitive Decision Making**
Spring. 3 credits. Prerequisite: NCC 502 (Microeconomics core course). V. Kadiyali.

This course brings methods of microeconomics analysis to competitive decision making. Specifically, it addresses issues relating to optimal competitive decisions for a firm interacting with current and potential rivals. Discussions cover how firms can, by their choice of appropriate decisions, bootstrap their intentions and their degree of commitment. Also considered are sustainability, flexibility, and correction of decision choices. Game theoretic perspectives are used to understand these concepts. The dimensions of competitive strategy considered include product proliferation, R&D and patent policies, choice of compatibility with existing products, bundling of products, investing in capacity, vertical integration, choice of channels of distribution partners, pricing, promotions. Also discussed are problems caused in the optimal choice and implementation of firm strategies when information is imperfect. Specifically, considered are issues of moral hazard and adverse selection, and how these issues affect firm choices of strategies (e.g., pricing, choice of channel partners, etc.). Instruction includes lectures and cases. Student evaluation is based on cases, class participation, and a final project. This course can be used to fulfill the strategy requirement.

**NBA 639 Data-Driven Marketing**
Fall. 3 credits. J. Thomas.

Data-Driven Marketing introduces the future brand manager or marketing consultant to the use of market data to evaluate and construct pricing and promotional strategies. The course introduces new sources of data available on product purchases and consumer reactions to the marketing environment. The course focuses on the practical use of popular data sources. Approximately 70 percent of the course covers panel data on high-volume consumer purchases, and 30 percent is devoted to direct or "database" marketing. The goal of this course is to introduce these new data sources and provide a solid foundation for the development of analytic tools. Examples are drawn from the consumer packaged goods industry. This course makes intensive use of EXCEL and the WINDOWS computing environment. The data has been extracted and organized for use in EXCEL; this allows the student to concentrate on learning modeling tools without a large investment in computing or data manipulation methods.

**Operations Management**

**NBA 641 Logistics and Manufacturing Strategy**
Spring. 3 credits. Prerequisite: NCC 508, OR&IE 410, or permission of the instructor. L. J. Thomason.

The course is about supply-chain integration, which involves strategic management of the values chain, from materials to customer. Students discuss operations strategy issues that are important both in manufacturing and service. The course emphasizes written and oral communication skills. About a fourth of the classes are spent on case studies, with small groups presenting their analyses of them. There is one mid-term examination, but the majority of the grade is evaluated based on projects and class participation. There is an option of replacing some assignments with a "live case," a project with a local company.

**NBA 644 Quality Management**
Fall. 3 credits. Prerequisite: NCC 508 or permission of the instructor. L. Robinson.

The theme of this course is the design and improvement of products and processes. The topics covered within this survey course include: (1) principles of process improvement (the formal seven-step improvement process, quality tools); (2) process monitoring (statistical process control, process capability, Motorola's "6 sigma" program); (3) product design (the Kano model, customer satisfaction and delight, issues in survey design, quality function deployment (QFD), design and manufacturability); (4) product delivery and support (quality in service and administration, satisfaction guarantees, and customer loyalty); (5) process design and improvement (kaizen vs. business process reengineering, benchmarking, design of experiments); and (6) issues in implementing quality improvements. The structure of the course emphasizes "hands-on" applications of the principles and learning from the course. The guest speakers and local plant tour are supplemented with Harvard cases, several exercises (e.g., assuming the role of a Baldridge Examiner, finding and correcting the root causes of problems in a process), and homework assignments (to allow students to work through quantitative problems without any time pressure). A sizeable component of this course is a group project, which applies the formal quality improvement process at a local firm.

**NBA 645 Product Development Practicum**
Spring. 3 credits. J. Thomas.

This course centers on creating a major new product for firms. It involves training in creativity by a consulting firm and readings in product development. This course provides the opportunity to learn from many different sources, consultants, faculty, and executives.

**NBA 646 Managing Knowledge-Based Services**
Spring. 3 credits. Prerequisite: NCC 508. Staff.

This course is designed for students who plan to manage technical and high-skill service enterprises. The pros and cons of the "service economy" are discussed, and the unique aspects of producing knowledge services, focusing on high-end, high value-added services are examined. Although some consumer service examples are included, the primary emphasis is on corporate and industrial services that occur between large firms, including technical, financial, and expert services. The use of traditional operations management tools in the context of service industries, as well as concepts from other disciplines such as sociology, psychology, and economics, is explored. In addition to managing the efficient provision of services, service design, marketing, evaluation, and improvement are addressed. The course uses a combination of case studies, discussions, student projects and presentations, guest lectures, and readings.
NBA 652 Integrating Product Design, Marketing, and Manufacturing

Spring. 1 credit. J. Bradley, J. Thomas.
The course makes apparent the necessity of integrating product design, marketing, and manufacturing for a firm’s success. Managerial tools and useful concepts that facilitate this integration are introduced. Students have the opportunity, through homework assignments or projects, to make a more in-depth foray into the course topics.

Organizational Behavior

NBA 665 Managerial Decision Making

Fall. 3 credits. J. Russo.
This course presents practical concepts from the behavioral sciences that can serve as guides to managerial action. Lectures, cases, and exercises are used to acquaint students with new perspectives on decision making, critical thinking, problem solving, and group processes. Taken together, these perspectives offer a trouble-shooter’s guide to the uncertainty, complexity, and conflict in the business world.

NBA 666 Judgment and Negotiations

Fall, spring. 3 credits. Staff.
Judgment is the art and science of transforming perception into thought or action. Negotiation is the art and science of securing agreements between two or more interdependent parties. The purpose of this course is to understand the theory and processes of negotiation as it is practiced in a variety of settings. This course is designed to complement the technical and diagnostic skills learned in other courses. A basic premise of the course is that while a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills are needed for these solutions to be accepted and implemented. The course highlights the components of an effective negotiation by having students analyze their own behavior in negotiations. The course is largely experiential, providing students with an opportunity to develop their skills by participating in negotiations and integrating their experiences with the principles presented in the assigned readings and course discussions.

NBA 667 Managing Intellectual Capital

Fall. 1.5 credits. B. Nelsen.
As the twentieth century draws to a close, economies long based on manufacturing are giving way to those based on the management of information, the production of knowledge, and the provision of services. Hence, organizational profits will increasingly flow from intellectual rather than material capital. A firm’s success will hinge upon the manager’s ability to recognize and adapt to the unique challenges presented by managing intellectual capital. This course examines this shift in the business environment and its practical implications for managers. Topics addressed include (1) motivating and managing knowledge work; (2) employee empowerment and self-managing teams; (3) organizational learning; and (4) leadership for innovation and creativity.

NBA 668 Leading Teams and Organizations

Fall. 3 credits. R. Peterson.
This course focuses on general principles for successfully leading teams and organizations (the personal development course is NBA 570). The course draws on the latest research in team decision making and organizational leadership to address questions such as: What is the difference between leadership and management? How does a leader establish trust and commitment to an organization? and how do leaders transform organizations? The course consists primarily of case studies of leaders, but also includes some experiential and group activities. Course grade is based on class participation, group case analyses, and a final individual case analysis. Priority is given to MBAs.

NMI AND NRE RESEARCH AND ADVANCED STUDIES

NMI 500-502 Directed Reading and Research

Fall, spring. 1, 2, or 3 credits. Staff.
Students undertake special-interest research under the supervision of faculty members. Registration is limited to students who have the approval of their advisors and of the faculty members involved in the research.

NMI 510 Multi-Cultural Work Environments

Spring. 1 credit. C. Rosen, B. Mink.
NMI 510 is an independent study course that is open to students whose summer internships will be in a country other than that of their citizenship or prior work experience. The goal of the course is to promote an understanding of the cultural assumptions we bring to the work environment and the effects of cultural differences on organizational interactions and productivity. Registration for the course occurs in the spring semester prior to the internship, and grades are posted in the following fall semester after completion of the course project (a 10-page paper). Students may register for the course after obtaining an internship offer and completing the paperwork for the course instructors. International students obtain and process work authorization forms with the International Students Office. See Charlotte Rosen (Sage 304) for further details about the academic and immigration requirements for NMI 510.

DOCTORAL SEMINARS

NRE 502 Doctoral Seminar in Marketing

3 credits. Staff.
This class introduces students to empirical research in marketing. There is a strong focus on the historical development of economic specifications of consumer choice models (with an emphasis on heterogeneity and issues of dynamic consumption patterns), and Bayesian methods in marketing. However, by the very nature of the class, the content is to some extent driven by the participants in the course. Teaching is interactive, and each participant is expected to present one of the papers studied to the rest of the class. Furthermore, each participant is expected to replicate the results of one of the papers, requiring the participant to write the necessary code and briefly discuss their findings.

Enrollment is by consent of the instructor. Students are required to have taken a graduate level course in either mathematical statistics or econometrics, although this restriction may be waived in special cases. Students are welcome to sit in on parts of the class; for example, the section on Bayesian Methods will be broad enough that students from other areas may find the presentation useful.

NRE 504 Doctoral Seminar in Accounting

3 credits. This is for Ph.D. students only. Staff.
The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research.

NRE 507 Doctoral Seminar: Affect and Cognition

Fall. 3 credits. Prerequisites: courses in statistics and experimental design. A. Isen.
The course examines research on some of the ways affect influences such thought processes as memory, decision making (including risk taking), and problem solving (including creative problem solving). Applied topics relevant to management concerns (for example, organizational behavior and consumer behavior) as well as other theoretical and applied topics (among them medical decision making, social interaction, self-concept, and cognitive and affective development) are considered, depending on student interests.

NRE 509 Doctoral Seminar in Research Methods

3 credits. Staff.
This course concerns the fundamentals of scientific research: theory, research design, methods, and criticism. It is designed for doctoral students who wish to undertake research publishable in scholarly journals. Little or no scientific training is assumed. Statistics will not be emphasized; however, familiarity with elementary statistical concepts and inference will prove useful. The course will cover: (1) the principles of theory building; (2) the pros and cons of various general research designs (laboratory and field experiments, surveys, interviews, participant observation, archival studies, simulations, and formal mathematical models); and (3) the structure of research papers and the review process.

NRE 511 Doctoral Seminar in Finance—Corporate Finance

1.5 credits. Staff.
This course covers topics in corporate finance and empirical asset pricing.

NRE 513 Doctoral Seminar in Finance—Market Microstructure

3 credits. Staff.
The course examines recent research in market microstructure, particularly as it relates to theoretical issues. Topics covered include asymmetric information in securities markets, market behavior, and market structure.

NRE 514 Doctoral Seminar in Finance—Asset Pricing Theory

1.5 credits. Permission of instructor required. Staff.
This course covers asset pricing theory as based on either economic equilibrium or the absence of arbitrage. The method of instruction is primarily presentations given by the students on important papers. The presentation and the final exam each comprise about half the grade.
This seminar focuses on decision making. The first topic is competiting paradigms for research in decision making. A central question of this topic is, "Which paradigms have been most successful or show promise in being most productive in the future?" Other topics will be guided by the interest of participants. They include connectionist approaches, dynamical systems, the interpretation (and distortion) of information, consistency-based theories, biased allocation of attention, and memory—all as applied to the theories and phenomena of decision and judgment.

**NRE 517 Doctoral Seminar in Information, Incentives, Games, and Contracts**

3 credits. Staff.

An introduction to game theory and information economics for a broad audience—those who will construct (or just consume) game-theoretic models in applied fields of management (including accounting, finance, marketing, and organizational behavior) and applied fields of economics (including industrial organization, labor economics, macroeconomics, and international economics). The course emphasizes applications as much as pure theory; each step in the theory is illustrated by applications from management and economics before the next step in the theory is introduced. The wide variety of applications shows that similar issues arise in different fields and that the same game-theoretic tools can be applied in each setting.

**FACULTY ROSTER**

**NRE 515 Doctoral Seminar in Behavioral Decision Research**

Spring. 3 credits. J. Russo.

This seminar focuses on decision making. The first topic is competing paradigms for research in decision making. A central question of this topic is, "Which paradigms have been most successful or show promise in being most productive in the future?" Other topics will be guided by the interest of participants. They include connectionist approaches, dynamical systems, the interpretation (and distortion) of information, consistency-based theories, biased allocation of attention, and memory—all as applied to the theories and phenomena of decision and judgment.

**Adjunct and Visiting Faculty**

Grossman, Dale A., J.D., American U. Sr. Lec., Tax and Business Law

Nesheim, John L., MBA, Cornell U. Visiting Lecturer, President, Aladdin Systems, Inc.

Perez, Pedro D., Ph.D., Rochester Polytechnic Inst. Visiting Asst. Prof.

Schuler, Richard E., Ph.D., Brown U. Prof. Economics, Prof. Civil & Environmental Engineering

Sears, Peter A., J.D., Harvard U. Visiting Lecturer, Vice President, Business Investments, Smith Kline Beecham Corporation

Thomas, William, MBA, Harvard. Lec., Management, President, Capital Southwest

**Lecturers**

Katz, Jan, Ph.D., Massachusetts Inst. of Technology, Sr. Lec., International Business and Marketing

Mink, Barbara E., M.A., Cornell U. Sr. Lec., Management Communications

Pike, Alan S., M.A., Cornell U. Sr. Lec., Management Communications

Rosen, Charlotte, Ph.D., Cornell U. Sr. Lec., Coordinator, Management Communications

**NRE 515 Doctoral Seminar in Behavioral Decision Research**

Spring. 3 credits. J. Russo.

This seminar focuses on decision making. The first topic is competing paradigms for research in decision making. A central question of this topic is, "Which paradigms have been most successful or show promise in being most productive in the future?" Other topics will be guided by the interest of participants. They include connectionist approaches, dynamical systems, the interpretation (and distortion) of information, consistency-based theories, biased allocation of attention, and memory—all as applied to the theories and phenomena of decision and judgment.

**NRE 517 Doctoral Seminar in Information, Incentives, Games, and Contracts**

3 credits. Staff.

An introduction to game theory and information economics for a broad audience—those who will construct (or just consume) game-theoretic models in applied fields of management (including accounting, finance, marketing, and organizational behavior) and applied fields of economics (including industrial organization, labor economics, macroeconomics, and international economics). The course emphasizes applications as much as pure theory; each step in the theory is illustrated by applications from management and economics before the next step in the theory is introduced. The wide variety of applications shows that similar issues arise in different fields and that the same game-theoretic tools can be applied in each setting.

ADMINISTRATION

Lee E. Teitelbaum, dean of the law faculty and professor of law
John A. Siliciano, vice dean and professor of law
Gary J. Simon, associate dean for academic affairs and professor of law
Claire M. Germain, law librarian and professor of law
Karen V. Comstock, assistant dean for career services
Richard D. Geiger, associate dean and dean of administration and finance
Anne Lukingbeal, associate dean and dean of students
Karen V. Comstock, assistant dean for career services
Charles D. Gramm, assistant dean for graduate legal studies
John R. DeRosa, assistant dean for student affairs
Richard F. Robinson, assistant dean for administration and finance
Nan A. Colvin, registrar

LAW SCHOOL

The primary function of the Law School is to prepare attorneys for both public and private practice where they will render the highest quality of ethical and professional service to their clients and further legal progress and reform. The curriculum is designed to prepare students for admission to the bar in all American states and territories.

Ordinarily, a student who is admitted to the Law School must have a baccalaureate degree from an approved college or university. The course of study leading to the degree of Doctor of Law (J.D.) covers three academic years. Students may be admitted to a program of study leading to the degree of Doctor of Law "with specialization in international legal affairs." The Law School also offers to a limited number of students an opportunity to earn both a J.D. degree and an LLM degree in international and comparative law.

There are combined graduate degree programs with the Johnson Graduate School of Management, the Department of City and Regional Planning of the College of Architecture, Art, and Planning, the School of Industrial and Labor Relations, the graduate divisions in economics, history, and philosophy of the College of Arts and Sciences, the Université de Paris I (Pantheon-Sorbonne), and Humboldt University, as well as a special opportunity for highly qualified undergraduates in the College of Arts and Sciences to register in the Law School during their senior year.

Each year the graduate program of the Cornell Law School admits a limited number of students, generally all from abroad. The LLM degree (Master of Laws, Legum Magister) and the J.S.D. degree (Doctor of the Science of Law, Jurisprudentiae Scientiae Doctor) are conferred. A small number of law graduates may also be admitted as special students, to pursue advanced legal studies without seeking a degree.

For further information, refer to the Law School catalog, which may be obtained from the Office of the Registrar, Myron Taylor Hall.

FIRST-YEAR COURSES

LAW 500 Civil Procedure
Fall and spring. 6 credits. K. M. Clermont, B. J. Holden-Smith, F. F. Rossi.
An introduction to civil litigation, from commencement of action through disposition on appeal, studied in the context of the federal procedural system. Also, a detailed consideration of federalism and ascertainment of applicable law, jurisdiction, process, and venue; and former adjudication.

LAW 502 Constitutional Law
Fall. 4 credits. T. Eisenberg, S. L. Johnson, S. H. Shiffrin, G. J. Simson.
A study of basic American constitutional law, including judicial review, some structural aspects of the Constitution as developed particularly in light of the passage of the Civil War amendments, and certain of its rights provisions.

LAW 504 Contracts
Fall and spring. 4 credits. R. A. Hillman, R. S. Summers, W. F. Taylor.
An introduction to the nature, functions, and processes of exchange, contract, and contract law. The course focuses on the predominant rules and principles governing contract and related obligation, including the substantive reasons underlying the rules and principles.

LAW 506 Criminal Law
Spring. 4 credits. S. D. Clymer, S. P. Garvey.
An introductory study of the criminal law, including theories of punishment, analysis of the elements of criminal liability and available defenses, and consideration of specific crimes as defined by statute and the common law.

LAW 508 Legal Methods
Legal Methods is a full-year course designed to introduce first-year students to lawyering skills, with primary emphasis on legal writing, analysis, and research. In the context of a law office, students create some of the essential legal writings that lawyers produce. Students develop their oral and written advocacy skills and start thinking about litigation strategy. At the end of the year, the students argue their case. Instruction occurs in small sections of approximately 37 students and in individual conferences.

GRADUATE COURSE

LAW 621 Contracts in a Global Society
Fall. 3 credits. Limited to graduate students. S. J. Schwab.
This course is designed for foreign-trained lawyers who are familiar with basic contract law in their own country. It surveys the Anglo-American common law of contracts and related civil obligations. The pedagogic approach focuses on the case method and is Socratically based, similar to the traditional first-year course in Contracts.

LAW 676 Principles of American Legal Writing
Fall. 2 credits. Limited enrollment. Limited to graduate students. K. Silverstein.
This course provides foreign-trained lawyers with an introduction to the essential principles of legal writing in the United States and an opportunity to practice some of the forms of writing common to American legal practice. Students prepare such documents as client letters and memoranda in the context of representing a hypothetical client. Students also learn and practice various research strategies.

UPPERCLASS COURSES

LAW 601 Accounting for Lawyers
Spring. 2 credits. J. G. Davis.
This course is designed to introduce students to the basic concepts and fundamentals of financial accounting. It focuses on: accrual accounting concepts, principles and conventions; the presentation of financial statements (balance sheets, income statements, statements of cash flow); the interpretation and analysis of financial statements; and the use and misuse of accounting information. The goal of the course is to enable students to critically review a company's financial statements. The course is intended primarily for students with little or no prior background in bookkeeping or accounting.
**LAW 602 Administrative Law: The Law of the Regulatory State**
Fall, spring. 3 credits. Limited enrollment. P. B. Farina, D. B. Hechinger.
An introduction to the constitutional and other legal issues posed by the modern administrative state. Topics include: procedural due process, separation of powers, procedural rules, administrative policymaking; judicial review of agency action; and the oversight and control relationships between agencies and Congress or the President. The course provides a working familiarity with the fundamentals of administrative procedure, as well as a larger role of agencies in our constitutional system—and the effect of legal doctrine on shaping that role.

**LAW 608 American Indian Law**
Fall. 2 credits. D. T. White.
The class is intended to provide a basic understanding and overview of the fundamental principles of Indian law. It examines the origins of Indian law, historical development of the law, tribal sovereign powers, tribal-state conflicts, Indian water rights, economic development, and hunting and fishing rights. A number of recent cases are discussed in detail. Students are graded on the basis of short papers, rather than a final exam.

**LAW 610 Antitrust Law**
Spring. 2 or 3 credits. Students who have taken an antitrust course in the Paris Program may take this course for 2 credits. G. A. Hay.
A consideration of the basic antitrust rules enacted by Congress and supplemented by the courts to protect competitive markets and limit the exercise of monopoly power. Topics include: price fixing, boycotts, and market allocation agreements among competitors; agreements between suppliers and customers; joint ventures; attempts to monopolize and monopolization; price discrimination; and mergers.

**LAW 611 Arbitration**
Fall. 2 credits. Limited enrollment. P. K. Moss.
Arbitration is the principal method of resolving disputes between unions and employers, between securities brokers and their clients, and under international business agreements, and is gaining favor in many other areas. This course familiarizes students with arbitration practice in a variety of fields through readings of simulation exercises and other methods.

**LAW 613 Bankruptcy**
Spring. 3 credits. Prerequisite: Students who have taken Debtor-Creditor Law are ineligible for this course. T. Eisenberg.
Selected topics in the law of bankruptcy. An overview of the various bankruptcy chapters and the bankruptcy provisions of most general applicability. The relationship between the rights of an Article 9-secured creditor and the bankruptcy trustee's power to avoid liens. Related topics in the enforcement of money judgments and the law of fraudulent conveyance.

**LAW 615 Children, Parents, and the State**
Fall. 2 credits. E. F. Teitelbaum.
This course explores legal and social understandings of the rights of children, parents, and the state with respect to issues such as access to and control over the content of education, authority regarding health care, claims to speech and expression, and procreative decisions. The course also examines the operation of rights in connection with juvenile court jurisdiction over neglect and abuse, delinquency, and status offenses.

**LAW 616 Comparative Law**
Examines a variety of commercial dealings and focuses on Articles 2 and 3 of the Uniform Commercial Code, with some coverage of other Articles and the Convention on Contracts for the International Sale of Goods. The course is designed to give students an understanding of commercial statutes and to inform them about many of the underlying commercial transactions to which the law relates.

**LAW 617 Comparative Public Law**
Fall. 2 credits. Limited enrollment. Y. M. Cripps.
This course focuses on a comparison between the constitutional and administrative law of the United States and the United Kingdom and the structure and influences of the legislative, executive, and judicial branches in those systems. Continental public law concepts such as legitimate expectations and proportionality are among those that are examined in relation to the ways in which they have influenced the development of British and EU public law, and questions are raised as to whether such concepts have a role to play in the constitutional and administrative law of the United States. The course involves presentation and discussion of papers in class in lieu of a final exam. Each student writes a 10-15 page paper that is presented in class as well as a very brief written critique of the other students' papers.

**LAW 619 Conflict of Laws**
Spring. 3 credits. G. J. Simson.
A study of the methods used by courts to decide the applicable law in cases that, in their parties or events, involve more than one state or country. Attention is given to the due-process limitations on jurisdiction, a state's obligation under the full-faith-and-credit clause to recognize state judgments, and conflicts between federal and state law.

**LAW 620 Constitutional Law II: The First Amendment**
Spring. 3 credits. S. H. Shiffrin.
A comprehensive discussion of freedom of speech, press, and association. The free-exercise-of-religion clause and the establishment clause of the First Amendment are treated less extensively.

**LAW 622 Copyright**
Fall. 3 credits. P. W. Martin.
This course provides students with a comprehensive overview of the U.S. copyright law. It covers the substantive and procedural requirements for qualifying for copyright protection, the in-depth study of the rights granted to authors under this law, the standards for judging copyright infringement, public policy limitations on the scope of copyright interest (such as the fair use defense), and the rights of successful litigants. Issues raised by new information technologies and recent amendments addressing them receive special attention. The course also provides some comparative and international copyright law components.

**LAW 623 Corporate and White Collar Crime**
Fall. 3 credits. S. P. Garvey.
White collar crime is one of the fastest growing areas of specialization in the legal profession. The collapse of the savings and loan industry, rampant fraud in the nation's financial markets, and systemic corruption in the health care industry have contributed to a dramatic increase in federal white collar crime prosecutions over the past twenty years. This course examines some of the principal statutes that are used to prosecute corporate and white collar crime. We consider theories of liability including traditional white collar offenses like mail and wire fraud, insider trading, perjury, obstruction of justice, and bribery. They also include more recent entries into the field such as RICO, money laundering, and laws enacted to combat government contract fraud. The course also provides an introductory look at the Federal Sentencing Guidelines.

**LAW 624 Corporate Finance and Emerging Markets**
Spring. 3 credits. A. B. Kingston.
The course examines legal aspects of various types of corporate finance transactions in emerging markets, and the role of commercial lawyers in these transactions. The course focuses on corporate finance transactions occurring in the midst of the transformation of former Soviet bloc states from command to market economic systems. Transactions in emerging markets pose different political, economic, social, and legal challenges from those arising from transactions in other, more predictable, legal systems. At the same time, the globalization of the world economy and the profound shortage of capital in many emerging markets make this one of the fastest growing fields of commercial law.

**LAW 625 Corporations**
Fall or spring. 4 credits. Limited enrollment. J. R. Macey, T. Ruskola.
An introduction to the business corporation laws affecting the rights and roles of corporate boards of directors, senior executive officers, and shareholders, with an emphasis on large, publicly traded firms. Shareholders' economic interests and shareholders' limited participation rights in corporate decision making are examined. The latter part of the course focuses on directors' and officers' fiduciary obligations to shareholders, examining the operation of these duties in a variety of settings and transactions. Issues relating to the roles and functions assumed by corporate attorneys (with respect to their clients) and the role of business corporations within society are also addressed. No previous business knowledge is assumed.

**LAW 627 Criminal Procedure**
Fall. 3 credits. J. H. Blume.
This course surveys the law of criminal procedure, with emphasis on the constitutional constraints that regulate the pretrial stage of the criminal process. More specifically, the course focuses on the law of interrogations and confessions, the admissibility of evidence, and on the right to counsel throughout all stages of the criminal process.

**LAW 629 Current Topics in the Crossroads of Law and Finance (also NBA 551)**
Spring. 3 credits. J. R. Macey, M. O'Hara.
Financial institutions of all kinds, whether they are formally known as insurance companies, banks, investment banks, mutual funds, pension funds, invest money on behalf of clients in a wide variety of investment vehicles. This course looks at the way that these financial institutions are treated from
both a legal and an economic perspective. Emphasis is placed on the intersections between modern financial theory and legal analysis. Topics covered include insurance, bank regulation and reform, securities markets, investment banking, and pensions.

[Law] Death Penalty in America: A Survey
The course surveys the law relating to the administration of the death penalty.

Law 630 Directed Reading
Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Registrar.
An examination of a topic through readings selected by arrangement between the instructor and an individual student or group of students (not exceeding eight).

Fall. 2 credits. J. R. Gaulding.
By now most people know that it is illegal to discriminate in the workplace on the basis of certain factors such as race, sex, religion, age, or disability. What does this really mean? This course explores this question in historical context, highlighting trends in federal law under Title VII, the Americans with Disabilities Act (ADA), and the Age Discrimination in Employment Act (ADEA). It examines some key doctrinal puzzles (e.g., Why do unconscious biases qualify as “intentional discrimination”? and, Why aren't all persons fired on the basis of their disability protected by disability law?) and considers the impact of economic and cognitive psychology research on our understanding of the scope and purpose of equal opportunity law.

Law 633 Employment Law
Spring. 3 credits. S. J. Schwab.
Survey of major statutory schemes, constitutional principles, and common law doctrines that affect the employer-employee relationship in the public and private sectors, other than laws regulating collective bargaining, which are covered in Labor Law. Topics covered include unjust dismissal, drug testing, free speech, privacy, and antidiscrimination laws. In addition, the course provides an overview of major statutory schemes affecting the terms and conditions of employment, such as workers' compensation, the Fair Labor Standards Act, and the Occupational Safety and Health Act.

Law 636 Environmental Law
Spring. 3 credits. D. B. Spence.
The course surveys the major environmental laws, with a primary focus on federal statutes (CERCLA, RCRA, NEPA, the Clean Water Act, the Clean Air Act, and the Endangered Species Act). The course lays out the various governmental tools used to address the problems of environmental degradation and discusses the value of these tools. Special attention is paid to the economic, social, and political obstacles to efficient regulation of the environment.

Law 638 Estate Planning
Fall. 2 credits. Limited enrollment.
A. F. Grable.
This course addresses problems involving planning and drafting for the transfer of property, both during lifetime and at death, taking into account relevant property law and federal and state income, gift, and estate taxes.

Law 640 Evidence
Fall or spring. 3 credits. S. D. Clymer, F. F. Rossi.
The rules of evidence in civil and criminal cases with emphasis on relevance, authentication, witness and hearsay. The course focuses on the Federal Rules of Evidence, with some attention to how they diverge from the common law.

Law 641 The Evolving Law of Patents: Patents and Biotechnology
Fall. 2 credits. Y. M. Cripps.
This course focuses on the ways in which biotechnological developments are affecting traditional notions of property, intellectual property, and information. In addition to patent law, other forms of property protection, such as copyright, are examined through a biotechnological prism and compared with the way in which they operate, for example, in relation to the Internet and digital technology. There is also an examination of whether genetically engineered organisms and other biotechnological products should be granted intellectual property protection either within the existing frameworks of intellectual property law or under some new regime designed specifically for that purpose. As is inevitable in any discussion of intellectual property law, international perspectives are important. The course involves presentation and discussion of papers in class in lieu of a final exam. Each student writes a 10–15 page paper that is presented in class as well as very brief written critiques of the other students' papers.

Law 642 Family Law
Spring. 3 credits. M. A. Fineman.
This course uses scientific and social scientific information to evaluate our assumptions and beliefs and to call into question the appropriateness of a number of current state laws regulating families. We examine the extent to which society's understanding of and expectations for marriage, and shifts over the past several decades in the nature of and justification for state regulation of that institution. Substantial attention is paid to the social and legal consequences of divorce, including an examination of the imposition of a gender neutrality-gender equality model in the divorce context.

Law 643 Federal Courts
Spring. 4 credits. Prerequisite: Constitutional Law and second semester of Civil Procedure. Students without such background should consult with instructor. B. J. Holden-Smith.
This course examines the various constitutional and judge-made doctrines that control access to the federal courts to vindicate federal rights. It is particularly valuable for those planning a career in public interest or the public sector, anyone else expecting to litigate extensively in federal court, and students who have or hope to obtain a judicial clerkship. Topics include: core of controversy limitations, including standing; constitutional and statutory limits on jurisdiction; causes of action for constitutional and statutory rights, including 42 U.S.C.§1983 and Bivens actions; and bars to such actions including the vagueness and abstention doctrine and the emerging law on 11th Amendment and sovereign immunities.

Law 644 Federal Income Taxation
Fall or spring. 4 credits. Limited enrollment.
W. C. Gifford, R. A. Green.
A basic course designed to develop understanding of tax concepts and ability to work effectively with the Internal Revenue Code, regulations, cases, and other tax materials.

[Law] Feminist Jurisprudence
This course examines the role of law, and, more generally, the role of the state, in perpetuating and remediying inequities against women. We study several paradigmatic feminist legal theories, including equality, difference, dominance, and various antessialist theories (e.g., intersectional, poststructuralist). Among the questions considered are: How does the law help to construct gender? In what ways does it interact with cultural images and assumption regarding women to perpetuate women's disadvantaged status in society? To what extent can a set of institutions implicated in women's marginalization be used to remedy it? Can a legal system predicated on the liberal assumption of a unitary, prepolitical, autonomous self account for feminist accounts of social construction, constrained "choice," or decentralized subjects? What methods have feminists used to argue in and about the law? And, do these methods themselves have the potential to transform legal thinking?

Law 647 Health Law
Fall. 3 credits. L. L. Palmer.
This course examines the role of law and policy in the health care industry. Students are invited to take a "systems approach" to the study of the role of law in arriving at coherent policy solutions for a host of dilemmas facing a rapidly evolving industry. Students are asked to consider if a particular statute, regulation, or judicially crafted legal doctrine is consistent with new developments or any public policy towards health care. Topics covered include: access to health care; health care reform; commercialization vs. professionalism; the antitrust challenge to professional dominance; changing institutional providers; and public and industry-sponsored quality control.

Law 649 Initial Public Offerings and Acquisitions
Spring. 3 credits. Limited enrollment. Prerequisite: Corporations. Z. J. Shulman.
An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings, the course covers: the applicable statutory framework, pre-offering corporate preparations (such as the focus on federal securities laws), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX), and the transaction closing. Regarding mergers and acquisitions, the course explores: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), public company transaction issues (considering lever matters and fiduciary duty concerns), and crucial legal aspects of the acquisition, such as letters of intent.
successor liability, continuity of employees, and noncompetition agreements.

**LAW 652 International Business Transactions**

Fall. 3 credits. J. J. Barceló III, with D. A. Ridgway.

An examination of the unique legal features of business transactions across national boundaries. The first half of the course deals with the private law of international transactions. The topics covered include: choice of law in the United States and Europe concerning international sales; the U.N. Convention on the International Sale of Goods; financing international transactions through letters of credit; and international dispute settlement (litigation and arbitration). The second half of the course deals with public regulatory law, including an overview of the World Trade Organization (WTO/GATT) with some attention to the trade-environment conflict; fair and unfair trade rules (escape clause, subsidies and countervailing duties, and antidumping); the trade consequences of intellectual property rights; and international antitrust.

**LAW 653 International Commercial Arbitration**

Fall. 3 credits. J. J. Barceló III, with D. A. Ridgway.

A study of arbitration as a dispute resolution process for international trade and business disputes. The course analyzes ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreement to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, and enforcement of international arbitration awards. The course gives special attention to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. It focuses on commercial arbitration as an international phenomenon and not on arbitration under any particular national system.

**LAW 655 International Human Rights**

Spring. 3 credits. Recommended prerequisite: Public International Law.

D. Wippman.

This course explores the development and effectiveness of international legal rules governing the conduct of a state toward people within its jurisdiction. Topics include the substantive norms of human rights, and their philosophic basis; the mechanisms for protecting human rights, such as the United Nations, human rights treaty bodies, international courts, and current issues such as the doctrine of humanitarian intervention, the status of indigenous peoples, and human rights during armed conflicts.

**LAW 657 International Organizations and Human Rights Institutions**

Fall. 3 credits. M. Ndulu.

The course provides a comprehensive legal analysis of problems concerning membership, the structure of the United Nations organs, and a variety of other international organizations. It considers their functions and acts taking into account the United Nations Charter and texts establishing these organizations. The course further considers the structure, jurisdiction, and functions of the International Court of Justice and the International Criminal Court. It also examines the international machinery for the protection of human rights in the world community including the United Nations Human Rights Committee, the European Court of Human Rights, and the Inter-American Court of Human Rights. Relevant decisions of these courts and of municipal courts are studied as well as basic documents.

**LAW International Protection of Intellectual Property**

This course studies intellectual property rights in the international legal system. A general introduction reviews the international protection of patents, trademarks, industrial design, and copyright. The nature of the starting and focal point is the Agreement on Trade-Related Aspects of Intellectual Property (TRIPS) adopted in the framework of the World Trade Organization (WTO). The international protection of intellectual property is studied through consideration of the TRIPS agreement and several international conventions the observation of which is made mandatory for WTO Members by TRIPS. Also examined are issues of international court jurisdiction and application of law in the area of intellectual property.

**LAW 658 International Taxation**

Fall. 3 credits. Prerequisite: Federal Income Taxation. W. C. Gifford.

This course examines the U.S. income tax treatment of foreign investment and business operations in the United States, as well as the treatment of U.S. business operations abroad. The course focuses on international tax jurisdiction and on the methods by which the United States relies international double taxation, both by statute and through income tax treaties.

**LAW 659 Introduction to Chinese Law and Jurisprudence**

Fall. 2 credits. V. Santiago-Irizarry.

This course is an introduction to the comparative study of Chinese law and legal thought. It starts by analyzing the history of the imperial Chinese legal system and its theoretical foundations, and then turns to the modern Chinese legal reforms and the introduction of socialist law and jurisprudence. The course ends with the study of post-Mao law reforms and their implications for the future of Chinese law. In its substantive focus, the course considers methodological problems involved in the cross-cultural study of law. Some of the more general themes that run throughout the course include the following: To what extent is “law” a useful analytical category in Sinic socio-legal systems? How is law related to capitalism and socialism? To culture and socio-economic organization more generally? How and why has Chinese law changed over time? What happens when Eastern and Western legal systems come in contact with each other?

**LAW 660 Labor Law**

Fall. 3 credits. J. J. Barceló III, with W. Stone.

A study of collective bargaining, including the process of union formation, legal regulation of strikes and other economic weapons, negotiation and enforcement of collective agreements, the duty of fair representation, the application of anti-trust law to union activity, and the relationship between federal labor law and local laws regulating the employment contract.

**LAW 661 Land-Use Planning**

Fall. 3 credits. E. F. Roberts.

A study of the legal matrix as a method of controlling the environment in which people live and work, including public nuisance as a device to control the town environment; zoning as a control method and, as a brake on development; subdivision controls; planning as a respectable government activity; the dynamics of planning, zoning, subdivision controls, and private land-use controls; the rehabilitation-of-center-city syndrome; and future prospects of maintaining a decent environment in a class driven multilingual and culturally tribal society that lacks a genuine moral consensus.

**LAW 662 Law, Language, and Ethnic and Racial Identity**

Spring. 2 credits. V. Santiago-Irizarry.

This course examines the influential role that language has in the law and in legal processes, especially in constructing ethnic and racial identity in the United States. We approach the law from a critical anthropological perspective, as a cultural system rather than as an abstract collection of rules, norms, and procedures, to examine how legal processes contribute to the creation and maintenance of asymmetrical power relations. Since racism and racialization have been salient experiences of inequality in the United States, they provide us with a particularly appropriate analytical focus. This course draws on anthropological, linguistic, and critical race theory, as well as ethnographies, legislation, and legal cases to guide and document our analyses.

**LAW 663 Law of Branding: Trademarks, Trade Dress, and Unfair Competition**

Spring. 2 credits. N. D. St. Landau.

Fundamental trademark, trade dress, and unfair competition laws are examined in the context of assisting clients to execute branding and marketing strategies. Special focus is given to branding as it relates to: “consumer products companies;” the impact of e-business and the Internet on branding strategies and acquisitions, and complex proof issues in trademark and domain name litigation. Marketing strategies embody fundamental and long-established principles of the trademark laws. The Lanham Act is used to address issues ranging from confusingly similar words and designs, to false and unsubstantiated advertising claims, and public appropriation—misappropriation—of long-established corporate icons in today’s e-commerce world. This course examines the basics of this rapidly changing body of law.

**LAW 667 Lawyers and Clients**

Spring. 3 credits. D. A. Kysar.

A survey and critique of: the law governing the practice of law and the legal profession’s norms concerning the lawyer-client relationship; the social functions of lawyers; the modes and patterns in which legal services are or are not made available to the public; and ethical theory relating to lawyer role and conduct.

**LAW 668 Legal Aspects of Foreign Investment in Developing Countries**

Spring. 3 credits. M. B. Ndulu.

This course studies legal aspects of foreign investments in developing countries. It seeks to identify legal problems that are likely to
affect a commercial investment in a developing country. Inter alia, it deals with the public international law principles and rules governing the establishment by foreign businesses of various factors of production (persons and capital) on the territory of other states and the protection of such investments. Thus, the course includes a discussion of the following topics: economic development and foreign capital; obstacles to the flow of investments to developing countries; guarantees and investment codes; bilateral treaties; nationalization; joint ventures; transfer of technology; arbitration; insurance; unification of trade law; and the settlement of investment disputes.

**LAW 669 - The Legal Profession**
Spring. 3 credits. Satisfies the professional responsibility requirement.
R. E. Atkinson, Jr.

This course is designed to give students a working knowledge of the regulation of the practice of law. The course explores both the policies served by that system of regulation and the problems encountered in its design and implementation. Actual and hypothetical problem situations are analyzed in light of the Code of Professional Responsibility, the Model Rules of Professional Conduct, and, less extensively, several schools of social science and moral philosophy.

**LAW 670 - Legislation**
Spring. 3 credits. L. I. Palmer.

This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. Drafting exercises are used throughout the course to determine the legal and political impact of domestic and international legislation, and the effectiveness of this legislation can be used to reform law or to remedy particular social problems.

**LAW 671 - Media Law**
Fall. 2 credits. J. P. Due.

This course examines various aspects of media law. It begins by considering the scope of First Amendment protection of the media. It then focuses on such issues arising from news gathering and moves on to issues arising from publication, such as defamation, publication-related privacy torts, and rights of publicity. The course briefly examines basic copyright concepts in order to lay the groundwork for close study of disputes over electronic publishing rights to collective works. Various recent landmark developments in the case law are highlighted.

**LAW 672 - Mergers and Acquisitions**
Fall. 2 credits. Limited enrollment.
R. F. Balotti.

This course examines the principal business and legal issues in the purchase and sale of publicly held businesses. Emphasis is placed on the duties of directors in the acquisitions of publicly held companies (including hostile takeovers).

**LAW 673 - Negotiation and Mediation: Alternative Dispute Resolution and Non-Traditional Approaches to Conflict.**
Spring. 2 credits. Limited enrollment. J. Meyer.

This course inquires into the theories and practices of conflict resolution and focuses on non-traditional, cutting-edge alternatives to the traditional litigation process. The course introduces students to the spectrum of ADR processes and teaches interviewing and counseling, negotiation and mediation as skill sets. A variety of approaches are used to analyze issues and develop skill sets, including lecture/discussion, video tapes, negotiation exercises and simulated mediations.

**LAW 674 - Negotiations**
Spring. 3 credits. Limited enrollment. S. C. Kurvilla.

The purpose of this course is to provide opportunities for class participants to develop their negotiating abilities for use in organizational and other settings. The course is premised on the assumption that negotiating concepts are best learned through practice which is grounded in rigorous analysis and reflection. While theoretical principles and concepts from various reference disciplines (such as social psychology, sociology, and economics) are presented through lectures and readings, this course focuses primarily on improving practical skills. Class participants not only learn to enhance their individual abilities in dyadic and group situations, but also to analyze context for the most effective application of these skills.

**LAW 675 - Partnership Taxation**
Spring. 2 credits. R. A. Green.

This course provides an introduction to the taxation of partnerships and limited liability companies. The course focuses on the tax issues arising upon the formation, operation, and liquidation of a partnership or LLC.

**LAW 676 - Problems in Commercial Law: Sales, Leases, and Electronic Commerce**
Spring. 3 credits. W. F. Taylor.

This course explores contemporary issues in Commercial Law with particular emphasis on sales, leases and electronic transactions. This exploration is pursued primarily through the problem solving method with the objective of encouraging students to concentrate on the exact statutory language in the Uniform Commercial Code (UCC) and other related federal statutes. Recent changes in the commercial world around the UCC such as electronic contracts, this course selectively integrates materials on the Uniform Electronic Transactions Act (UETA), the Uniform Computer Information Transactions Act (UCITA) and the United Nations Convention on Contracts for the International Sale of Goods (CISG). This course extends the ideas explored in the traditional Contracts course.

**[LAW Private Justice: Arbitration and Other Forms of Alternative Dispute Resolution**

Arbitration has become a major aspect of legal practice in such fields as labor law, commercial law, securities law, family law, and other areas. This course examines the developing law of arbitration and the relationship between private arbitration and the judicial system. It examines issues such as the enforceability of arbitration agreements, arbitral due process, judicial review of arbitration awards, and the effect of arbitration on statutory rights. It also examines other forms of alternative dispute resolution including: mediation, small claims courts, and the new mandatory arbitration requirements of some federal and state judicial systems. The course focuses on the law of alternative dispute mechanisms and includes six simulation and problem-solving sessions.

**LAW 678 - Products Liability**
Fall. 3 credits. J. A. Henderson, Jr.

Course involves applications of products-liability doctrine and theory to a variety of problems drawn from or closely approximating actual litigation. Serves as an overview of the relevant case law, statutes, and administrative regulations, including the new Restatement, Third, of Torts: Products Liability.

**LAW 680 - Public International Law**
Fall. 3 credits. D. Wippman.

An introduction to the legal rules governing the conduct of states vis-à-vis other states, individuals, and international organizations, with reference to major current events and issues. Topics include the nature, sources, and effectiveness of international law; the establishment and recognition of states; principles concerning state sovereignty, territory, and jurisdiction; the law of treaties; state responsibility, international criminal law; and human rights. Special attention is given to the law governing the use of force.

**LAW 681 - Securities Regulation and the Regulation of Financial Intermediaries**
Fall. 3 credits. J. R. Macy.

This course covers the federal rules relating to the public offering of securities, secondary market trading of securities, and the regulation of commercial banking, investment banking, and investment companies (mutual funds). Emphasis is placed on the relationship between the various forms of financial intermediation and capital formation, and on the role of these activities in corporate governance. The increasing internationalization of the capital markets, and the public policy issues related to globalization, are also discussed.

**LAW 682 - Sex Discrimination and the Law**
Spring. 3 credits. R. L. Lieberwitz.

This course examines various legal issues relevant to discrimination on the basis of sex. Among the problems analyzed are: sexual harassment; pornography; reproductive rights; prostitution; work-family conflict; inequality in employment opportunities; gay and lesbian rights; welfare rights; and affirmative action.

**LAW 683 - Social Security Law**
Spring. 3 credits. P. W. Martin.

This course focuses especially on how Social Security's benefit rules relate to employment, families, and household composition and how its procedures address the challenge of adjudicating the massive numbers of benefit claims that arise each year. It introduces the general features of the Social Security Act's entitlement, benefit formulae, and procedural rules; highlights those that pose the greatest difficulty to administrators and advocates; and surveys current proposals for change.

**LAW 684 - Sports Law**

The course traces the development of sports law in the United States. Particular attention is given to the relationship of sports with antitrust and labor law. Contemporary issues involving arbitration, collective bargaining, amateur athletics, agents, torts, criminal law, and constitutional law are addressed.
LAW 686 Supervised Teaching
Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Registrar.

LAW 687 Supervised Writing
Fall or spring. 1, 2, or 3 credits. Arrange directly with instructor. See Law School Registrar.

LAW 688 Supervised Teaching and Supervised Writing—Legal Methods Honors Fellows Program
Fall. Spring. 4 credits for full year. Prerequisite: Application Process. Legal Methods Honors Fellows serve for the full year as teaching assistants in the Legal Methods course and as mentors to first-year law students. With training and guidance from the Legal Methods faculty, the Honors Fellows work closely and one-on-one with the students on the various writing projects. In addition to meeting regularly with students, and reviewing their writing assignments, judge oral arguments, and assist the librarians with research training, the Honors Fellows are also responsible for teaching and holding classes on the Bluebook. Additionally, Honors Fellows serve as mentors to the entering students to help them make the most of the foundational first year of law school. The Fellows hold workshops on basic law school skills and, during the spring semester, under the direction of the Dean of Students, a small group of Fellows may tutor first-year law students.

LAW 689 Taxation of Corporations and Shareholders
Fall. 3 credits. Prerequisite: Federal Income Taxation. B. Green. This course examines the federal income taxation of corporate structure and transactions, including incorporation, dividends, redemptions, liquidations, divisions, and reorganizations.

LAW 692 Trial Advocacy
Spring. 4 credits. Prerequisite: Evidence. Limited enrollment. F. F. Ross. This course is devoted to the study of the trial. Fundamental skills are taught in the context of challenging procedural and substantive law problems. Each stage of the trial is examined: jury selection, opening, objections, direct examination, cross-examination, impeachment, expert witnesses, child witnesses, summation, and pretrial. In addition to exercises every week on a particular segment of a trial, the student also does a full-day jury trial at the end of the course. Video equipment is used to teach and critique student performances. There are frequent written assignments.

LAW 694 Trusts and Estates
Fall. 4 credits. G. S. Alexander. The course surveys the basic law of succession to property, including wills and intestate succession, and the law of trusts. Among the recurring themes of the course are strict and lenient enforcement of formal requirements and methods of interpretation. This is not a course on estate taxation.

LAW 703 Advanced Legal Research
Spring. 3 credits. C. M. Germain and staff. Teaches cutting-edge research techniques to prepare students for practice in the law office of the future. Focuses on high-speed electronic legal research, and covers U.S., international, and foreign law, as well as multidisciplinary research. The course is designed to teach students, whose careers will begin in a period of information transition, how to handle traditional and electronic sources and formats and make efficient choices.

LAW 705 African Americans and the Supreme Court
Spring. 3 credits. B. J. Holden-Smith. Beginning with its first decisions related to the slavery question, the Supreme Court has at times aided and at other times hindered efforts to afford African Americans full citizenship. This seminar explores the relationship between blacks and the Supreme Court by examining the major Court decisions affecting African Americans and attempting to understand those decisions in their historical contexts. The course begins with a review of the background and meaning of the constitutional provisions pertaining to the status of blacks in the new nation and ends with an intensive look at Brown v. Board of Education.

LAW 707 American Legal Theory
Fall. 3 credits. R. S. Summers. The fall 2001 topic for this seminar is the appropriate form of basic types of legal phenomena such as criteria of valid law (for both publicly and privately made law), statutory rules, accepted methods of statutory interpretation, the principle of stare decisis and common law rules, adjudicative processes, limitations on judicial power to modify rules, and the formal characteristics of the legal system viewed as a whole. American law lacks appropriate form in many important ways and a heavy price is paid for this. However, appropriate legal form and its distinctive underlying rationales (general legal values) profoundly affect the overall content of law and its impact on the American as well as other legal systems. Such formality and its rationales have as much or more of a claim to primacy as the essence of law than do problem-specific policies that also inform the law’s content. In this seminar, there is equal emphasis on practical skills and theory.

LAW 708 Appellate Advocacy
Fall. 3 credits. J. B. Atlas. This seminar examines the law and skills that are integral to representing a client on appeal. The seminar is loosely divided into three central parts: (1) the principles of appellate law, including standards of review, the preservation doctrine, harmless-error analysis, and remedies; (2) the unique role of appellate counsel, including ethical duties to the court and client, and (3) appellate skills, including client counseling, issue selection, brief-writing, and oral argument. Miscellaneous additional topics for exploration include motion practice, leave applications, and the role of law clerks in the decision-making process. Students read and analyze the record of a criminal proceeding, assess and research potential appellate issues, and prepare a brief (including a re-write) for either the prosecution or defense. Each student also orally argues the case in a moot-court session.

LAW 709 Biblical Law
Fall. 3 credits. C. M. Carmichael. Analysis of law and narrative in the Bible from the perspective of ancient law and legal history. Topics include the law codes (e.g., hypothetical formulation versus statutory law), legal issues in the narratives (e.g., law of adultery and women’s rights), law and morality (e.g., Ten Commandments), law and religion (e.g., institutions guaranteed by the law but condemned by religious authority), the transformation of extralegal relations into legal ones (e.g., with the introduction of money), legal interpretation in antiquity (e.g., Sermon on the Mount), social factors in legal development (e.g., sharia law and guilt), and aspects of criminal, family, and private law (e.g., eye for an eye, incest rules, and unjust enrichment).

LAW 711 The Common Law and African Legal Systems
Spring. 3 credits. M. Ndulo. This seminar studies legal systems in post-colonial Africa. It concentrates on the former British colonies. During the colonial period, the common law was imported into British Africa. As a result, these countries are now common law jurisdictions. The description is supported by the history of the countries as well as by current statutory guidelines. African countries, however, also retained African customary law as part of the legal system. In today's Africa, the two systems continue to operate side by side. This seminar considers the following issues: the introduction of the common law in Africa; the nature of the customary judicial process; the nature of the plural system, areas of conflict between customary law and the common law in such areas as succession, law of marriage, laws of things, and gender. It also examines issues relating to constitutional law and governance.

LAW 712 Constitutional Law and Political Theory
Spring. 3 credits. S. H. Shiffrin. The purpose of the seminar is to explore theories of freedom of speech and theories of equality. How are the ideas of freedom, equality, association, and community linked in doctrine, and how should they be linked? Neoconservative, liberal, radical, feminist, and Marxist writings are considered.

LAW 713 Consumerism
Spring. 3 credits. D. A. Kysar. This seminar examines evidence for the existence of consumerism as a pervasive social phenomenon, weighs arguments for and against consumerism as a welfare-enhancing or welfare-decreasing social phenomenon, unravels the role of current law in supporting or suppressing consumerism, and speculates on possible alternative legal approaches to regulating the sources and impacts of consumerism. This is accomplished through careful, contextual examination of consumerism in various legal settings. We discuss products liability law, deceptive advertising regulation, food and drug law,
anti-discrimination law, labor law, environmental law, international trade regulation, and constitutional law. Background readings on economic, psychological, critical and other theoretical approaches to consumerism will be interspersed within these units. Students complete a written research paper in conjunction with the seminar.

**LAW 716 Corruption Control**
Spring. 3 credits. R. C. Goldstock.
This seminar analyzes the types of corruption that exist in both the public and private sectors, the means by which a variety of criminal and non-traditional remedies may be used to reduce the frequency and impact of corrupt activities, and the constitutional and statutory problems implicated by such approaches.

**LAW 720 Empirical Studies of Leading Civil Rights Issues**
3 credits. T. Eisenberg.
This seminar focuses on empirical studies of sex discrimination in employment cases and death penalty cases.

**LAW European Union Law**
The course studies the EU and EU treaty, institutions, and lawmaking processes; the direct effect, supremacy, and reception of EU law in the member states, the development of the four freedoms (goods, services, persons, and capital) fundamental rights doctrine, protection of the environment, and the EU antitrust law.

**LAW 722 Ethical Issues in Criminal Practice**
Fall. 3 credits. Satisfies the professional responsibility requirement.
C. Grumbach.
Using simulated problems and a real-life perspective, this seminar explores the ethical duties of and practical quandaries faced by prosecutors and defense attorneys. It examines conflicts of interest, ethical duties that pertain to the examination of witnesses and argument to the jury; the duty of the prosecutor to "seek justice," not merely to convict; the relationship of the prosecutor to witnesses and police, and the obligation to disclose exculpatory evidence; the duties and dilemmas of the defense attorney confronted with a guilty client who intends to commit perjury or an innocent client who wishes to accept a plea offer; and the right to effective assistance of counsel.

**LAW 731 Immigration and Refugee Law**
Fall. 3 credits. Prerequisite: Constitutional Law. S. W. Yale-Loehr.
This seminar explores the evolving relationship between U.S. immigration policy and our national purposes. Immigration plays a central role in contemporary American life, significantly affecting our foreign relations, human rights posture, ethnic group relations, labor market conditions, welfare programs, public services, and domestic politics. It also raises in acute form some of the most basic problems that our legal system must address, including the rights of isolated minorities, the concepts of nationhood and sovereignty, fair treatment of competing claimants for scarce resources, the imperatives of mass administrative justice, and pervasive discrimination. In approaching these questions, the seminar draws on diverse historical, judicial, administrative, and policy materials.

**LAW 732 International Criminal Law**
Spring. 3 credits. Recommended prerequisite: Public International Law or International Human Rights. D. Wippman.
This seminar examines the evolution of modern international criminal law, from Nuremberg to the International Criminal Court. Topics include the nature and sources of international criminal law, jurisdiction, individual and state responsibility, penalties and deterrence, and alternatives to criminal trials, such as truth commissions and amnesties. The seminar emphasizes recent developments, such as the Pinochet extradition proceedings and efforts to try senior Khmer Rouge leaders.

**LAW 734 Introduction to French Law**
Spring. 3 credits. Not available to students with significant knowledge of civil law system.
Introduction to the French legal system from a comparative law perspective, with a focus on civil law methodology and French legal institutions. Topics studied include French law sources and authorities, such as legislation, court decisions, and scholarly writings; the relationship between French law and the European Union; the French court structure in civil, criminal, and administrative law matters and its major procedural features; and the organization of the legal profession.

**LAW 735 Islamic Law and Middle Eastern Legal Institutions**
Spring. 3 credits. S. O. Hassan.
This seminar deals with the origins and sources of Islamic law, the various schools of jurisprudence, and the elaboration of an Islamic legal theory. It considers the practical application of that theory in the law of the family, the Islamic law of nations, and Islamic constitutional theory. The seminar further considers the movement of reform and secularization in Muslim countries and the role of Islamic law in the contemporary legal systems of the Middle East with particular emphasis on the law of obligations and contracts.

**LAW 736 Juvenile Advocacy**
Spring. 3 credits. C. Grumbach.
In the context of the simulated law office of Myron Taylor Juvenile Rights and Defenders Inc. (JRAID), students represent juveniles charged as juvenile delinquents or persons in need of supervision. Class meetings are run as weekly law office training sessions with the students functioning as junior attorneys. Students give oral presentations to their JRAID colleagues on issues of interest to them that arise from the clients' cases. Such issues may include: the preventive detention of juveniles, the application of criminal rights and defenses to delinquency proceedings, police questioning of suspected runaways, the role of the law guardian in representing juveniles, and the rights of children charged with incorrigibility to assert constitutional rights such as freedom of association and the free exercise of religion, over their parents' objection. Using simulated case files for the JRAID clients, students choose clients to represent and file various trial motions and legal memoranda before a designated judge. In this manner, students hone their personal writing skills and practice writing for a specific audience, learn to evaluate pleadings, and learn how to develop litigation theories and strategies and formulate a litigation plan.

**LAW Labor Law Theory and Policy Seminar (also ILR 608)**
The U.S. collective bargaining system, which had its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars on both the right and the left, and at the same time, the decline in the labor movement has undermined its political support. This seminar looks at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Some of the topics discussed include: the theory of regulation embodied in the National Labor Relations Act and its critique; alternative conceptions of labor markets and their policy ramifications; and the emerging global economy and its ramifications for domestic labor regulation. There is also discussion of alternative systems of labor regulation, such as found in West Germany, Sweden, and Japan.

**LAW 740 Law and Economics**
Spring. 3 credits. No prior acquaintance with economics is assumed.
S. J. Schwab.
The seminar examines in which ways the law has incorporated, or unwittingly, an economic perspective. A major theme is the art of economic modeling and the merits and demerits of simplifying assumptions to understand law. A second theme is the Coase Theorem and its application to legal rules. The seminar focuses on common law rules in contracts, torts, property, and procedure. The issues surrounding fairness versus efficiency are also stressed.

**LAW 741 Law and Higher Education**
Spring. 3 credits. J. Margulies.
Prerequisite: Constitutional Law or Administrative Law.
J. J. Mingle.
Higher education is a complex, idiosyncratic institution. Universities and colleges have a unique mission—teaching, research, and public service—and a uniquely challenging task of accommodating the various constituencies and organizations that are both internal (governing boards, faculty, students) and external (alumni, legislators, courts, government agencies), that influence how they are managed and how policies are shaped. This seminar explores the dynamic tensions, high expectations, and complex legal issues universities face in fulfilling their mission.

**LAW 742 Law and Mental Health Seminar**
Fall. 3 credits. H. R. Beresford.
The seminar explores issues at the interface of law and psychiatry. After an introduction to clinical and scientific aspects of mental illness, the seminar addresses issues of autonomy, liberty, competency, coercion, and criminal responsibility as they relate to persons with disorders of behavior, cognition, or mood. Students write and present seminar papers on self-selected topics.

**LAW 743 Law and Practice in Civil Rights Litigation**
Spring. 3 credits. J. Margulies.
The seminar explores the legal and practical aspects of police misconduct and prisoner civil rights litigation under 42 U.S.C. section 1983, the principles of vindication of constitutional rights. Case materials are based on actual litigation. Each week, students 'litigate' a new issue in the case—e.g.,
municipal and supervisory liability; qualified, sovereign, and absolute immunity; punitive damages, etc.

**LAW 757 Legal Ethics and Legal Malpractice**

**Fall. 3 credits. Satisfies the professional responsibility requirement.**

R. E. O'Malley.

This seminar is an in-depth examination of several fundamental legal ethics subjects: conflicts of interest, the lawyer's obligation of confidentiality, and the ethical limitations on the lawyer and the lawyer's client in a litigation matter. It is supplemented by an analysis of real cases in which a lawyer has also deviated from the norms has been found liable for legal malpractice. The seminar also explores the legal ethics obligations of junior lawyers in instances where the conduct or proposed conduct of a senior supervising lawyer is questionable. Consideration is given to relevant portions of The American Law Institute's Restatement of the Law Governing Lawyers (published in 2000), and the American Bar Association Ethics Commission's final proposals for amendments to the ABA Model Rules of Professional Conduct.

**LAW 758 Litigation Skills and the Protection of Civil Rights in Housing**

**Fall. 3 credits. M. B. Grant.**

Students perform practical, pre-trial litigation skills while evaluating fair housing laws, history, and policies. The seminar includes litigation exercises, legal writing, reading materials, and class discussion. The litigation exercises and legal writing emphasize those skills necessary to investigate, evaluate, manage and resolve a case up to the point of trial. The seminar introduces civil rights in housing through statutes, cases, and literature about underlying policies. The course highlights the differences between some state and local fair housing laws and the federal fair housing laws, and looks at some cutting-edge litigation currently being conducted around the country. Students complete two to three page litigation exercises that simulate work assignments common in civil litigation practice and at least one oral litigation exercise. Students are permitted to complete these exercises individually, but are encouraged to work as part of a small group. Students will draft two briefs on issues at different procedural postures (for example, injunction and summary judgment), approximately twelve pages each. Each class starts with a discussion of a new litigation skill. The class discussion then shifts to fair housing law and policy. We use photocopied materials and *American Apartheid* by Massey and Denton. The majority of a student's grade is based on the two writing assignments. The balance of the grade is based on completion of the litigation exercises and class participation.

**LAW 759 Modern Legal Thought**

**Spring. 3 credits. S. P. Garvey.**

This seminar is an introduction to modern legal theory. It begins with an examination of several different schools of legal thought (positivism, natural law, legal realism, and critical legal studies), focusing on the different and often competing answers those schools give to a series of questions that have defined the traditional domain of jurisprudence. It next examines several different schools of political thought (libertarianism, liberalism, communitarianism, feminism, and critical theory), together with their principal claims and commitments. It also examines how, if at all, the idea of each of these schools is reflected in the law, or alternatively, how those ideas might be used and relied upon to reshape the law. The seminar is intended for those students interested in a broad and even-handed overview and analysis of the most prominent contemporary schools of legal and political thought. Abstract ideas may be explored, whenever possible, examined in the context of particular cases and controversies, real or imagined.

**LAW 760 Organized Crime Control**

**Fall. 3 credits. R. C. Goldstock.**

This seminar explores the challenges organized crime poses to society and to traditional law enforcement techniques. Students undertake a simulated investigation using physical and electronic surveillance, the analysis of documentary evidence, and the examination of recalcitrant witnesses before the grand jury. The RICO statute is explored in detail as are a variety of non-criminal remedies including forfeiture and court-imposed trusteeships.

**LAW 755 Pretrial Practice, Litigation Strategies, and Remedies in Commercial Litigation**

**Spring. 3 credits. Y. G. Harmon.**

This seminar studies the skills involved in complex commercial litigation, focusing on case development in the pretrial period. It addresses pretrial discovery (strategies and approaches), and remedies (e.g., preliminary injunctions, receiverships) in the context of difficult and unclear legal issues. Damages theories and development are also explored, as is the use of litigation to achieve business goals. Hardball litigation techniques as well as ethical considerations are considered. Actual litigated cases are dissected.

**LAW 765 Problems in Advanced Torts**

**Spring. 3 credits. J. A. Henderson, Jr.**

Students have an opportunity to write a paper on a topic of their choosing from the law of torts. Topics not typically covered in the first-year torts course are preferable, including (but not limited to) products liability, business torts, environmental torts, and defamation. Papers are similar in length and scope to a student note in a law review. Required written submissions include topic proposals, outlines, bibliographies, first drafts, and final drafts. Early meetings are devoted to discussions of background topics—e.g., economic analysis of tort law, fairness-based theories, and the like—and selection of topics. Later meetings give each student an opportunity to present his/her work product to the group.

**LAW 756 Reproductive Issues Seminar**

**Fall. 3 credits. R. C. Goldstock.**

This seminar considers various reproductive dilemmas, paradoxes, and policies in modern American society. Birth control and abortion are addressed, but the emphasis is on placing the reproductive process within a broad sociocultural context. To this end, we explore issues such as eugenics and the regulation of medical technology, lesbian mothering, the relationship between reproduction and poverty programs, and a variety of other contemporary issues.

**LAW 772 Selected Business Transactions Seminar**

**Fall. 3 credits.**

Recommended prerequisites: Corporations, Z. J. Shulman.

An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings,
the course covers: the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the transaction closing. Regarding mergers and acquisitions, the course explores: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), public company transaction issues i.e., antitakeover matters and fiduciary concerns, fiduciary duties, and crucial legal aspects of the acquisition, such as letters of intent, successor liability, continuity of employees, and noncompetition agreements.

**LAW 774 Separation of Powers**
Fall. 3 credits. Prerequisite: Constitutional Law and Administrative Law strongly advised. Students without such background should consult instructor.
C. R. Farina.
The last 20 years have witnessed more debate about the nature and consequences of "separation of powers" than we have seen since the Founding Era. This seminar examines the ways this concept is understood and used by modern judges, legislators, executive officials, and scholars to justify, or to attempt to modify, the distribution of power within contemporary American government.

**LAW 776 Street Law**
Fall. 3 credits. E. F. Taylor.
As a new offering in the fall semester, this seminar allows law students to lead weekly discussions at the Auburn Correctional Facility on contemporary legal topics. Although all students enrolled in the seminar are expected to attend the weekly meeting, two students are responsible for presenting a legal or policy issue at each meeting and then opening the floor to questions and comments from the prisoners in attendance. Prison administrators determine which will attend the legal seminar series. From the experience of those in other disciplines who have done similar prison projects at Auburn, it is anticipated that not more than thirty prisoners will participate weekly. The objective of this seminar is to facilitate the exchange of ideas and to give students an additional opportunity to take law and legal education beyond the traditional classroom setting. Possible topics might include: Reparations for African Americans: Legal and Policy Alternatives, Racial Profiling, Family Law and the Rights of Mothers, Term Limits on Elected Officials: Pornography as Discrimination Against Women; The Relevance of Race, Ethnicity, and Sex to Judicial Appointments: Therapeutic Jurisprudence and Shaming Penalties, and Fourth Amendment and Other Limits on Policing Schools for Drugs and Guns.

**LAW 777 Theories of Law, Theories of Film**
Spring. 3 credits. C. D. Bond.
This seminar examines cultural representations of the American legal system and lawyers. As part of the course materials, students view several canonical, mostly American, films that deal with the law. Students learn the language of film form and theory, which they use to discuss how particular films construct narratives about the legal system. Topics of inquiry include parallels between law and film as narrative systems, the role of interpretation in constructing legal and cultural meaning, and the work of visual rhetoric. Film theorists who have written of law reflect cultural values, fantasies, and myths, with particular attention given to narratives of race and gender. Students read film theory and criticism and legal theory in an attempt to correlate theories of narrative across both disciplines.

**LAW 778 Theories of Property**
Fall. 3 credits. Prerequisite: Property.
G. S. Alexander.
This seminar explores the various ways that people have conceived of, or understood, property. The materials studied are eclectic and interdisciplinary. They include readings on commonses, commodification, and women and property, as well as the classical justifications for private property (libertarian, utilitarian, etc).

**LAW 779 Topics in Feminist Legal Theory**
Spring. 3 credits. M. A. Fineman.
Over the course of the semester we examine the ways in which feminist legal theorists who will also be guest lecturers in the class. The feminist scholars chosen are experts on a variety of legal topics including sexuality, reproduction, family, and work. The objective is to introduce students to feminist thinking and critique in these specific areas, as well as generally. In addition, the seminar is designed to give students an understanding of the processes whereby scholarly (and policy) ideas and concepts are developed by an individual through much revision, reflection and struggle. Two or three pieces of writings by each scholar are distributed and discussed in the session preceding her/his visit to the class. The following week the scholar speaks to the students about the readings and her/his experiences. The scholar responds to questions and comments about her/his current thinking and the direction of future work in her/his area(s) of expertise. Questions and comments are generated and distributed in advance of the scholar's appearance in the class by the students in the form of "reflection papers." A research paper on one of the topics discussed is required at the end of the semester.

**LAW 780 Trial Preparation and Practice**
Fall. 3 credits. H. C. Hay.
Using a sexual harassment lawsuit as a focal point, this seminar seeks to provide students with understanding of, and training in, the basic skills of trial preparation and practice. Students draft a complaint and answer, take and defend a deposition, prepare for and attend a mediation, and ultimately present the case to a mock jury.

**CLINICAL COURSES AND EXTERNSHIPS**
All clinic courses and externships have limited enrollment.

**LAW 781 Capital Punishment Clinic: Post-Conviction Litigation**
Spring. 4 credits. Prerequisite: permission of instructor; Criminal Procedure or criminal law experience preferred.
J. H. Blume, S. L. Johnson.
The clinic covers death penalty post-conviction litigation including: investigation and the preparation of petitions, memorandums, and briefs. This course is taught as a clinic. Two or possibly three South Carolina Death Row cases are worked on. The selection depends on both pedagogical factors and litigation needs of the inmates. Students read the record and research legal issues. Some students are involved in investigation, while others assist in the preparation of papers. All students are included in discussions regarding the necessary investigation and strategy for the cases.

**LAW 782 Capital Trial Clinic**
Spring. 4 credits. Prerequisite: permission of instructor; Criminal Procedure or criminal law experience preferred.
J. H. Blume, S. L. Johnson.
The clinic covers the issues that are unique to a capital trial, with a focus on a specific capital trial and the issues it presents.

**LAW 783 Full-Term Externship**
Fall. 12 credits. G. G. Galbreath, J. M. Miner.
Occasionally students find that their educational and career goals would be best achieved by spending full time at various approved placement sites during the fall semester of their third year. Written application must be submitted to the instructors by March 1 of the preceding spring semester. The application should include, among other things, a description of the placement and the activities that the extern expects to perform, a statement of the extern's educational and career goals, and an explanation of how those goals are better met at the placement than at the law school. The instructors, in collaboration with the Associate Dean for Academic Affairs, review the applications and, by March 15, decide whether each applicant should be granted conditional approval. For students to receive final approval, the placement site must accept the student for the placement and meet specific criteria including identification of an attorney at the placement who will closely supervise and mentor the extern. In addition to his or her work responsibilities for the placement, the extern prepares weekly journal entries for the instructor serving as his or her faculty supervisor, provides the instructor with samples of his or her written work product, engages in regular e-mail communication with the instructor (and, if required by the instructor, with other students in the course), hosts the instructor for a site visit, makes a written evaluation of the placement and the placement experience for the law school's file, and makes him- or herself available in the semester following the externship to do a presentation about the placement for the law school community.

**LAW 784 Government Benefits Clinic**
Spring. 6 credits. Course has two classroom components: Government Benefits Clinic class and Clinical Skills 1 or Clinical Skills 2. B. Strom.
The course has a substantive component, in which a broad conceptual understanding of a complex and controversial area of law and public policy is developed, and a live client clinical experience, in which those concepts can be applied in solving actual client
The substantive component provides an introduction to government benefits law by examining various social insurance and need-based benefit programs including Social Security, Unemployment Insurance, Temporary Assistance to Needy Families (TANF), Supplemental Security Income (SSI), and Food Stamps. Case handling involves the representation of clients in government benefits cases involving the Tompkins County Department of Social Services, the N.Y.S. Department of Labor and the Social Security Administration. The course also includes Clinical Skills 1 or Clinical Skills 3. Clinical Skills 1 class addresses interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, simulations, and role-play exercises. Clinical Skills 3 builds on the skills taught in Clinical Skills 1 and addresses such topics as alternative dispute resolution, formal discovery, and motion argument.

LAW 785  Government Benefits Clinic/ Neighborhood Legal Services Externship
Spring. 4 credits. J. M. Miner.
This course is a combination of Government Benefits and the Neighborhood Legal Services Externship and either Clinical Skills 1 or Clinical Skills 3. The course is the same as Government Benefits Externship except that the case handling component involves handling cases for the Ithaca office of Neighborhood Legal Services. See the descriptions for the Government Benefits Clinic and the Neighborhood Legal Services Externship for additional details.

LAW 786  Judicial Externship
Fall or spring. 4 credits. G. G. Galbreath.
Students work as a judicial clerk. Work involves courtroom observation, conferences with the judge, research and writing memoranda, and drafting decisions. The emphasis is on learning about judges, the judicial decision-making process, and trials. There are weekly class meetings with readings and discussions of topics related to the externship experience. While the primary focus is the student’s work at the placement, each student also does a clinic presentation at a final project, and meets individually with the faculty member.

LAW 789  Law Guardian Externship
Fall or spring. 4 credits. J. M. Miner.
Students learn about the representation of children in abuse and neglect cases, juvenile delinquency proceedings, and PINS (Person in Need of Supervision) cases through their placement at the Tompkins County Law Guardian office. Duties may include interviewing, investigation, drafting memoranda and motions, and assisting in trial preparation. The classroom component is provided by Clinical Skills 1, 2 (fall), or 3 (spring), depending on whether the student has previously been enrolled in a course in which Clinical Skills 1 was a component. Clinical Skills 1 class addresses interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, demonstrations, and simulation exercises. Clinical Skills 2 builds on the skills taught in Clinical Skills 1. Clinical Skills 3 builds on the skills taught in Clinical Skills 1 and 2.

LAW 791  Legislative Externship
Fall or spring. 3 credits. B. Strom.
Students work with the local New York State Member of Assembly. Work involves drafting legislation, tracking legislation for constituents, legal research and writing, responding to constituent requests that particularly require legal research or an explanation of law. The emphasis is on learning about legislative process, drafting of legislation, understanding the reasons for statutory ambiguity, and developing various skills. There are several informal interviews with the faculty supervisor during the semester with readings and group discussions related to the externship experience.

LAW 792  Neighborhood Legal Services Externship
Fall or spring. 4 credits. B. Strom.
Classroom component is provided by Clinical Skills 1, 2 (fall), or 3 (spring), depending on whether the student has previously been enrolled in a course in which Clinical Skills 1 was a component. Cases involve the representation of clients of a legal services office, the Ithaca office of Neighborhood Legal Services (NLS). Along with case handling, this externship includes a classroom component, provided by Clinical Skills 1, 2, or 3. The classes are devoted to the development of lawyering skills and issues related to professional responsibility and the role of an attorney. In addition, each student meets periodically with the faculty supervisor for review of the placement experience.

LAW 793  Public Interest Clinic 1
Fall or spring. 4 credits. Note: During the second or third week their may be an additional class session. Classes are mandatory. N. Cook, G. G. Galbreath, J. M. Miner, N. Cook, G. G. Galbreath, J. M. Miner, R. Seibel, B. Strom.
Students handle civil cases for low-income clients of the Public Interest Clinic under the supervision of the clinic faculty. Students interview and evaluate legal problems to analyze facts; interrelate substantive and procedural law with facts in the context of actual representation; develop a strategy to handle clients’ problems; identify and resolve legal issues related to the case; write legal briefs and legal writing; negotiate and settle cases; and represent clients at administrative hearings. Classroom component is provided by the Clinical Skills 1 class, in which students develop interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises.

LAW 794  Public Interest Clinic 2
Fall. 4 credits. Prerequisite: Public Interest Clinic 1 or a clinic course that included the Clinical Skills 1 classroom component.
Students handle Public Interest Clinic cases, participate in a classroom component, Clinical Skills 2, and help supervise participants in Public Interest Clinic 1. Case handling involves the representation of clients who are currently represented by the clinic’s clients in both federal and state courts.

LAW 795  Public Interest Clinic 3
Spring. 4 credits. Prerequisite: Public Interest Clinic 1 or a clinic course that included the Clinical Skills 1 classroom component. N. Cook, G. G. Galbreath, J. M. Miner, R. Seibel, B. Strom.
Students handle Public Interest Clinic cases, participate in a classroom component, Clinical Skills 3, and help supervise participants in Public Interest Clinic 1. Cases are handled as described in the course description for Public Interest Clinic 1. The classroom component, Clinical Skills 3, builds on the skills taught in Clinical Skills 1 and 2. Students represent the clinic’s clients in both federal and state courts.

LAW 797  Women and the Law Clinic
Spring. 6 credits. J. M. Miner.
The course has two classroom components: Women and the Law Clinic: class and Clinical Skills 1 or Clinical Skills 3 class. Students represent women clients who have legal matters primarily in the family law area (divorce, custody, support, domestic violence). The Women and the Law Clinic class focuses on issues as the impact of substantive law on women, the impact of legal institutions on women, professional role development, feminist lawyering methods, and other topics related to women and the law. Students also participate in the lawyering skills classroom component. Clinical Skills 1 or Clinical Skills 3 addresses interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 3 builds on the skills taught in Clinical Skills 1.

LAW 798  Youth Law Clinic
Spring. 6 credits. Course has two classroom components: Youth Law Clinic class and Clinical Skills 1, 2 (fall), or 3 (spring) class. N. Cook.
Students work with groups of youth and service providers in a multifaceted approach to identifying and resolving problems of a legal nature. Under the supervision of faculty and community experts, clinic students both handle individual representation cases and participate in non-litigation project work such as community education, legislative advocacy, and mediation training. The emphasis of the course is on planning, communication, policy development, and nonadversarial problem solving. Students also participate in the lawyering skills classroom component, Clinical Skills 2 or 3. Clinical Skills 1 class addresses interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 2 builds on the skills taught in Clinical Skills 1.

NONPROFESSIONAL COURSES

GOVT 313  The Nature, Functions, and Limits of Law
Spring. 4 credits. Undergraduates only.
R. A. Hillman.
A general-education course for students at the sophomore and higher levels. Law is presented not as a set of rules but as a set of techniques for resolving conflicts and dealing with social problems. The course analyzes the roles of courts, legislatures, and administrative agencies in the legal process, considering also constitutional limits on their power and practical limits on their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process.

LAW 406  Biotechnology and Law (also BA/SOC 406)
Spring. 4 credits. Undergraduates only.
L. I. Palmer.
Biotechnology, with myriad applications in areas such as medicine and agriculture, is
creating many challenges for basic social institutions. This course explores the use and potential abuse of biotechnology in areas such as genetic screening and counseling, reproductive technologies, intentional release of genetically engineered organisms, patents, and ownership of human tissue. Particular attention is given to evolving legal and management strategies for regulating the applications of biotechnology. Readings are from science, medicine, law, and public policy. Several short written assignments as well as a research paper are required.

**LAW 410 Limits on and Protection of Creative Expression—Copyright Law and Its Close Neighbors**

Fall. 3 credits. P. W. Martin.

This course, offered during fall term 2001, provides an introduction to copyright law and closely related legal regimes for non-law students. The bulk of the instruction and discussion are on-line.

Copyright law has become increasingly important as the U.S. has shifted from a predominantly manufacturing economy to an information economy, with such products as software, recorded music, movies, and TV programs assuming major importance as exports, and digital distribution exploding. This course provides an overview of U.S. copyright law and the relationship between copyright and contractual license, trademark, patent, and the "right of publicity" as these other regimes relate to information products. The survey begins with the substantive and procedural requirements that surround copyright protection. It proceeds to survey the rights granted copyright holders and important limits on those rights such as "fair use." How infringement is established, what remedies are available, and other important features of copyright litigation are covered. Issues raised by new information technologies and recent amendments addressing them receive special attention. Further, the course addresses the growing importance of the global market for copyright-protected products, the international copyright system is also addressed.

**Faculty Roster**

Abrams, Kathryn A., J.D., Yale U. Prof. of Law and Assoc. Prof. of Ethics and Public Life in the College of Arts and Sciences

Alexander, Gregory S., J.D., Northwestern U. A. Robert Noll Prof.

Atkinson, Robert E., Jr., J.D., Yale U. Visiting Prof.

Barceló, John J., III, S.J.D., Harvard U. William Nelson Cromwell Professor of International and Comparative Law

Blume, John H., J.D., Yale U. Visiting Prof.

Clermont, Kevin M., J.D., Harvard U. James and Mark Flanagan Professor of Law

Clymer, Steven D., J.D., Cornell U. Assoc. Prof. Prof. Cripps, Yvonne M., Ph.D., U. of Cambridge. Visiting Prof.

Eisenberg, Theodore, J.D. U. of Pennsylvania. Henry Allen Mark Professor of Law

Farina, Cynthia R., J.D., Boston U. Prof.

Fineman, Martha A., J.D., U. of Chicago. Doreatha S. Clarke Professor of Feminist Jurisprudence

Garvey, Stephen P., J.D., Yale U. Prof.

Germain, Claire M., M.L.L., U. of Denver. Edward Cornell Law Librarian and Professor of Law

Gifford, William C., LL.B., Harvard U. Prof. Green, Robert A., J.D., Georgetown U. Prof.

Hay, George A., Ph.D., Northwestern U. Edward Cornell Professor of Law and Professor of Economics in the College of Arts and Sciences

Hart, Howard C., J.D., U. of Michigan. Visiting Prof.

Henderson, James A., Jr., LL.M., Harvard U. Frank B. Ingerson Professor of Law

Hillman, Robert A., J.D., Cornell U. Edwin H. Woodruff Professor of Law

Holden-Smith, Barbara J., J.D., U. of Chicago. Prof.

Johnson, Sheri L., J.D., Yale U. Prof.

Macey, Jonathan R., J.D., Yale U. J. Don Pratt White Professor of Law

Margulis, Joseph J., J.D., Northwestern U. Visiting Prof.

Martin, John W., Jr., J.D., DePaul U. Visiting Prof.

Martin, Peter W., LL.B., Harvard U. Jane M. G. Foster Professor of Law

Ndulou, Muna B., D. Phil., Trinity C. Prof.

Palmer, Larry L., LL.B., Yale U. Prof.

Rachlinski, Jeffrey J., Ph.D., Stanford U. Prof.

Rossi, Faust P., J.D., Cornell U.

Samuel S. Leibowitz Professor of Trial Techniques

Ruskola, Teemu, J.D., Yale U. Asst. Visiting Prof.

Schwab, Stewart J., Ph.D., U. of Michigan. Prof.

Shiffren, Steven H., J.D. Loyola U. of Los Angeles. Prof.

Siliciano, John A., J.D., Columbia U. Prof.

Simpson, Gary J., J.D., Yale U. Prof.

Spence, David B., Ph.D., Duke U. Visiting Prof.

Stone, Katherine V., W., J.D., Harvard U. Prof. of Law and Anne Evans Estabrook Prof. of Dispute Resolution in the School of Industrial and Labor Relations

Taylor, Winnie F., LL.M., U. of Wisconsin. Prof.

Teitelbaum Lee E., LL.M., Northwestern U. Prof.

Wippman, David J., J.D., Yale U. Prof.

**Legal Aid Clinic**

Cook, Nancy L., J.D., Georgetown U. Senior Lecturer and Director

Gallbreath, Glenn G., J.D., Case Western Reserve U. Senior Lecturer

Miner, JoAnne M., J.D., U. of Connecticut. Senior Lecturer

Seibel, Robert F., J.D., Northwestern U. Visiting Sr. Lecturer

Strom, Barry J., J.D., Cornell U. Senior Lecturer, Cornell Legal Aid Clinic

**Legal Methods Program**

Anderson, Paige S., J.D. Cornell U. Lecturer

Atlas, Joel, J.D., Boston U. Senior Lecturer

Bond, Cynthia D., J.D., Cornell U. Lecturer

Grumbach, Carol J., J.D., Cornell U. Director of Legal Methods Prog. and Senior Lecturer

McKee, Estelle M., J.D., Columbia U. Lecturer

Mooney, Andrew J., J.D., Cornell U. Lecturer

**Academic Library Staff**

Germain, Claire M., LL.B., U. of Paris. Edward Cornell Law Librarian and Professor of Law

Bynum, Charlotte L., J.D., Tulane U. Reference Librarian

Court, Patricia G., J.D. Hamline U. Asst. Director for Administration and Public Affairs

Gillespie, Janet M., M.S., Cornell U. Administrative Supervisor/Access Service

Kreisler, Brandy, J.D., Texas Tech. Reference Librarian

Pajerek, Jean M., M.L.S., SUNY-Albany. Head of cataloging

**Members of Other Faculties Associated with the Law School**

Garmichael, Calum M., B. Litt., Oxford U. Prof. College of Arts and Sciences

Hirschmann, Nance, J., Ph.D., Johns Hopkins U. Assoc. Prof., Government

Kuruvilla, Sarash C., Ph.D., U. of Iowa. Assoc. Prof., School of Industrial and Labor Relations

O'Hara, Maureen, Ph.D., Northwestern U. Prof., Johnson Graduate School of Management

Santiago-Izarray, Vilma, Ph.D., New York U. Asst. Prof., College of Arts and Sciences

**Adjunct Faculty Members**

Balotti, R. Franklin, LL.B., Cornell U. Adjunct Prof.

Beresford, H. Richard, M.D., U. of Colorado. Adjunct Prof.

Blyth, John E., Dr. jur., Goethe U. Adjunct Prof.

Briggs, W. Buckley, J.D., Georgetown U. Adjunct Prof.

Davis, Johnita, P., J.D., Cornell U. Adjunct Prof.

Davis, Jonathan G., LL.M. Georgetown U. Adjunct Prof.

Gaulding, Jill R., J., Cornell U. Adjunct Prof.

Grable, Andrea F., J.D., Cornell U. Adjunct Prof.

Goldstock, Ronald G., J.D., Harvard U. Adjunct Prof.

Grant, Mary Elizabeth, J.D., Cornell U. Adjunct Prof.

Harmon, Yvette G., Cornell U. Adjunct Prof.

Hassan, Sherif O., LL.M., Cornell U. Adjunct Prof.

Kingston, Andrew, J.D., Harvard U. Adjunct Prof.

Meyer, Judith P., J.D., Cornell U. Adjunct Prof.

Mingle, James J., J., U. of Virginia. Adjunct Prof.

O'Malley, Robert E., J.D., Northwestern U. Adjunct Prof.

Rodgeway, Delissa A., J.D., Northeastern U. Adjunct Prof.

Shultz, Zachary, J.D., Cornell U. Adjunct Prof.

St. Landau, Norm D., J.D., Antioch C. Adjunct Prof.

Silverstein, Karen, J.D., Cornell U. Adjunct Prof.

White, Dale T., J.D., Cornell U. Adjunct Prof.

Yale-Loehr, Stephen W., J.D., Cornell U. Adjunct Prof.
ADMINISTRATION
Jere Haas, director
Carole Bisogni, associate director for academic affairs
Michael Kazarinoff, director of graduate studies, Field of Nutrition

THE DIVISION
Nutritional Science draws upon the chemical, biological, and social sciences to understand the complex relationships between human health, nutritional status, food and lifestyle patterns, and social and institutional environments. Understanding these relationships includes the study of the metabolic regulation and function of nutrients, nutrient requirements throughout the life span, the role of diet in reducing risk of chronic disease, the nutritional quality of foods, and interventions and policies designed to promote the nutritional health of individuals, communities, and populations.

The focus of this broad field of study at Cornell is the Division of Nutritional Sciences, which brings together specialists from many disciplines. The faculty are involved in undergraduate and graduate teaching, research, and extension of research-based knowledge throughout New York State, the nation, and the world.

The division is affiliated with both the College of Human Ecology and the College of Agriculture and Life Sciences. The undergraduate program in Nutritional Sciences is offered through the College of Human Ecology. An undergraduate program, Nutrition, Food, and Agriculture, is offered in the College of Agriculture and Life Sciences. The undergraduate program in Human Biology, Health, and Society is offered through the College of Human Ecology. A program of study in nutrition for biological science majors is offered in collaboration with the undergraduate program in biology. Graduate study in the field of nutrition is administered by faculty members throughout the university.

FACILITIES
Most of the faculty members of the division work in Savage Hall, Kineselberg Hall, and Martha Van Rensselaer Hall. In addition to housing offices, classrooms, and seminar rooms, these buildings contain research facilities, specialized laboratories, a human metabolic research unit, and computer facilities. The division's Learning Resource Center in Martha Van Rensselaer Hall is used by students for individual study and for small group discussions. The Learning Resource Center contains computers and printed and audiovisual resources which give students access to specialized software. Savage Hall also has a graduate reading room.

UNDERGRADUATE PROGRAMS
The Division of Nutritional Sciences offers three programs leading to a B.S. degree:

**Nutritional Sciences (NS)**, College of Human Ecology: this program provides students with a strong foundation in the broad field of nutritional sciences as well as thorough training in chemistry and biology. Students may prepare for a variety of career interests including medicine and other health careers, fitness and sports nutrition, nutrition counseling, clinical nutrition, dietetics, nutritional biochemistry, community nutrition, and nutrition education.

**Nutrition, Food, and Agriculture (NEA)**, College of Agriculture and Life Sciences: this program is for students who want strong training in human nutrition combined with supportive course work in the agriculture and the life sciences. Strong preparation in biology, chemistry, and math is required. Students in the Nutrition, Food, and Agriculture program supplement the nutrition curriculum with courses in areas such as food science, animal science, plant science, advanced biology, business and economics, education, and communication.

**Human Biology, Health, and Society (HBHS)**, College of Human Ecology: established in 1997, this program gives students a strong foundation in biology. It then goes on to explore human health issues from the perspectives of both biology and the social sciences. Students complete a rigorous curriculum in the natural sciences and then, choosing from a wide array of courses offered in the College of Human Ecology, focus their studies on health issues of their choice. Students can explore such topics as gene expression and metabolism related to disease states, biological and social aspects of growth and development, and policies and programs influencing health.

The Division also offers the Program of Study in Human Nutrition for biological sciences majors who may be enrolled in the College of Agriculture and Life Sciences or College of Arts and Sciences. The program of study in Human Nutrition offers biology majors courses on the nature and biochemical function of essential and non-essential nutrients, nutrient requirements, the role of nutrients in gene expression, and the role of diet in both risk of chronic disease and treatment of existing disease states.

Students in this program of study are encouraged to complete a diverse set of advanced courses. They afford a perspective on current knowledge of nutrient requirements and function, and how this knowledge can be put to use. With the exception of a core course in the structure and function of nutrients, the course requirements are unspecified.

Faculty advisers work with individual students to develop a curriculum that fits the students' interests. As part of their program, students are encouraged to obtain laboratory experiences either through coursework or research. Students completing the program in nutrition most often choose to continue their education in medical or graduate school, and pursue careers in the applied aspects of nutrition or in laboratory-based or epidemiological research.

THE CURRICULUM
Undergraduate students in these programs complete the requirements of their colleges as well as the courses required by the program of their specific interest.

The NS, NFA, and HBHS programs all require a rigorous sequence of courses in chemistry and biology, including introductory chemistry and biology, organic chemistry, biochemistry, and physiology. A minimum competency in college algebra is required with an additional math and/or statistics requirement for some programs and career paths. Students in the HBHS major also complete a course in physics and two additional courses in advanced biology.

All students complete the introductory course, Nutrition and Health: Concepts and Controversies (NS 115). The NS and NFA programs require the completion of four other core courses: Social Science Perspectives on Food and Nutrition (NS 245), Nutritional and Physicochemical Aspects of Foods (NS 345); Physiological and Biochemical Bases of Nutrition (NS 351); and Methods in Nutritional Sciences (NS 332). Students in these programs also must select a minimum of nine credits in advanced courses in the nutritional sciences.

The HBHS major requires a minimum of six credits from courses that integrate biology and the social sciences as they examine health issues. In addition, students also must complete nine credits of advanced electives in courses focused on human biology, health, and society.

Undergraduate students in these programs have a faculty adviser with whom they meet at least twice a year. Advisers help students plan their course schedules and can suggest opportunities for individual study or experience outside the classroom.

In all undergraduate programs the correct sequencing of biology, chemistry, and/or nutrition courses is very important. Students considering these programs should get detailed information about course requirements from the division’s Academic Affairs Office, 309/335 MVR. This office offers a wide range of advising materials to help students develop a program of study that matches students' interests and needs.

CAREER OPTIONS AND COURSE PLANNING
Requirements for the programs are the minimum set of courses necessary for a
Courses of interest may include those related to health careers should acquire specific admissions requirements can be obtained from the university's Health Careers Office. Students interested in other health careers should acquire specific information about those requirements. Courses of interest may include those related to the biological and social determinants of health: human growth, development, and behavior through the life course; interpersonal communications; advanced biology; sociology; psychology; and ethics.

Dietetics: Students who wish to work in the areas of clinical nutrition, nutrition counseling, sports nutrition, community nutrition, or food and nutrition management should complete the academic requirements for The American Dietetic Association (ADA). Courses in foods, nutrition, and disease, microbiology, management, statistics, and nutritional care are added to the courses required for the nutrition programs. For more information about meeting ADA requirements see Marie Kamp, 373 MVR.

Exercise, Nutrition, and Health Promotion: Students should complete a course in physiology and a course in anatomy after introductory biology. Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in kinesiology, exercise physiology, and biomechanics. Students who wish to apply to graduate schools to study physical therapy should complete a year of introductory physics, a course in statistics, a course in ethics, and three courses in psychology. Students should check the specific requirements of their schools of interest. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office, 309 MVR.

Biomedical Research/Nutritional Biochemistry: Recommended electives include calculus, physics, genetics, advanced biology and chemistry, toxicology, and nutritional sciences courses related to the physiology, biochemistry, and metabolism of different nutrients and disease states.

Public Health and Community Nutrition: Suggested electives include courses in communications, education, human development, policy, and management. Students should complete an original piece of research (at least six credits of NS 499), and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 250 Savage Hall.

INDEPENDENT STUDY ELECTIVES

In addition to fulfilling the requirements for a major, students in the honors program take seminars in designing and evaluating research, complete an original piece of research (at least six credits of NS 499), and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 250 Savage Hall.

HONORS PROGRAM

The honors program, leading to a B.S. degree with honors in the College of Human Ecology, or B.S. degree with Distinction in Research in the College of Agriculture and Life Sciences, gives official recognition to students who have demonstrated excellence in their academic work and their capacity for independent study.

In addition to fulfilling the requirements for a major, students in the honors program take seminars in designing and evaluating research, complete an original piece of research (at least six credits of NS 499), and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 250 Savage Hall.

COURSES RECOMMENDED FOR NONMAJORS

Courses in nutritional sciences can strengthen programs of study in biological sciences, biology and society, communications, food science, human development, human services, and other fields. NS 115, Nutrition and Health: Concepts and Controversies, is open to all students. After NS 115, nonmajors with limited backgrounds in chemistry and biology may elect NS 200, Vegetarian Nutrition; NS 245, Social Science Perspectives on Food and Nutrition; NS 247, Food for Contemporary Living; NS 262, Nutrients and Cells; NS 275, Human Biology and Evolution; NS 306, Nutritional Problems of Developing Nations; NS 315, Obesity and the Regulation of Body Weight; NS 347, Human Growth and Development: Biological and Behavioral Interactions; NS 380, Integrating Food Systems and Human Nutrition Needs; NS 450, Public Health Nutrition; NS 451, Epidemiology and Health of Human Communities. Nonmajors with strong backgrounds in chemistry and the biological sciences may consider NS 331, Physiological and Biochemical Bases of Human Nutrition, as well as many advanced nutritional sciences courses, such as NS 345 Physicochemical and Nutritional Aspects of Foods; NS 431 Mineral Nutrition and Chronic Disease; NS 441, Nutrition and Disease; and NS 475 Molecular Nutrition and Development.

GRADUATE PROGRAMS

Graduate study is administered by the Field of Nutrition, a group of about 40 faculty members from throughout the university who have a common interest in nutritional problems. In the M.S. and Ph.D. degree programs, students may specialize in molecular and biochemical nutrition, human or animal nutrition, community nutrition, or international nutrition. Research is emphasized in all graduate programs. Field experience may be an important component of concentrations in community, international and public-health nutrition, and nutrition education. Teaching experience and participation in the graduate student seminar (NS 703) are important aspects of graduate training. The specialties and interests represented by faculty in the Field of Nutrition provide almost unlimited opportunity for graduate study. Cornell's extensive laboratory and agricultural facilities ensure that students interested in experimental nutrition have exceptional choices and thorough training. As the largest faculty in the country devoted to the study of human nutrition, the field includes specialists in biochemical, metabolic, epidemiological, and sociocultural research. Opportunities to work with community and federal agencies are available to students interested in applied nutrition and public policy. Students in international nutrition are expected to conduct their thesis research abroad.

For more information about the graduate program, please write to the Director of Graduate Studies, Field of Nutrition, Cornell University, 309 MVR Hall, Ithaca, NY 14853–4401; telephone (607) 255–4410; web site: www.nutrition.cornell.edu/grad.html; e-mail: nutrition_gfr@cornell.edu.

COURSES

NS 115 Nutrition and Health: Concepts and Controversies
Fall. 3 credits. S-U grades optional. M W F 1:25. D. Levitsky.

The course will discuss the facts and fallacies concerning the role that nutrition, exercise,
and other health behaviors play in preventing disease, maintaining good health, and maximizing athletic performance. Emphasis is on understanding the biological mechanisms through which good nutrition and regular exercise affect psychological and physical health.

NS 116 Personalized Concepts and Controversies
Fall. 1 credit. Prerequisite: NS 115. S-U only. Limited to freshmen and transfer students, 10 per section. THA E. West. This course provides students enrolled in NS 115 individualized assistance in many skills including use of computers to analyze diets, finding and using scientific references, understanding and criticizing scientific articles, and reviewing material presented in lectures.

NS 120 Nutrition and Health: Issues, Outlooks, and Opportunities
Spring. 1 credit. S-U grades only. Limited to 120 freshmen, sophomores, and juniors, others by permission of instructor. W. 12:20. E. West. A course for students interested in exploring careers in the broad fields of food, nutrition, and health. Experts representing different areas will discuss their work, focusing on current issues and trends as well as their requisite knowledge and skills. This course describes the many disciplines that are drawn upon in addressing human problems related to food, diet, and health. It also explores the related intellectual and career opportunities. This is not an introductory nutrition course for nonmajors.

NS 200 Vegetarian Nutrition: An Introduction
Fall. 3 credits. S-U grades optional. Prerequisites: NS 115 advised but not essential. T R 2:55–4:10. T. C. Campbell. This introductory course will survey vegetarianism from a variety of nutrition and health considerations. The material to be presented and discussed will primarily include the empirical scientific evidence presented for easy comprehension by students without nutrition training. The course will also consider the historical and sociocultural roots, both ancient and of more recent times, that have led to the growing interest in, and acceptance of dietary vegetarianism. Particular attention will be given to the role of vegetarianism in the prevention and reversal of chronic degenerative diseases. Special topics on competitive sport, childhood nutrition, food preparation, and dietary transition will be offered. Internationally known guest speakers, will provide six to eight of the lectures.

NS 222 Maternal and Child Nutrition
Fall. 3 credits. Prerequisites: NS 115 and a college biology course or permission of the instructor. S-U grades optional. Limited to 25 students. Prerequisites are required in room 309 MVR. R 1:25–2:40. C. Garza, P. Brannon. Involves the study of nutritional requirements in pregnancy, lactation, infancy, and child- hood through adolescence. Topics include the relationship between maternal diet and pregnancy outcome; analysis of different methods of infant feeding; and the nutritional status of pregnant women, children, and adolescents in the United States and in developing countries.

NS 245 Social Science Perspectives on Food and Nutrition
Fall. 3 credits. Prerequisite: NS 115. Letter grade only. T R 10:10–11:25. J. Sobal. Theories, concepts, and methods from the social sciences will be used to examine food, eating, and hunger. The course will use the food and nutrition system and the food choice process as conceptual models for examining the scope of social aspects of nutrition.

NS 247 Food for Contemporary Living
Fall and spring. 2 credits. Laboratory sections limited to 32 students. Prerequisites: course prerequisite required in 309 MVR. Hall. Laboratory cost or apartment required. Fall W 12:20–1:20. Spring T 1:25–4:25 or R 9:05–12:05. M. Kamp. Emphasizes meal planning for healthy individuals using national nutrition standards; the development of food preparation and presentation skills; the application of sensory evaluation techniques; food science principles as they apply to cooking and ethnic and cultural influences on cuisine.

NS 262 Nutrients and Cells
Spring. 3 credits. Prerequisites: one semester of biology and chemistry. M W F 9:05. N. Noy. The course will focus on the relationship of the cells with the environment. Examples from three general areas will be considered: (1) mechanisms of uptake of nutrients by bacterial and mammalian cells; (2) cellular consequences of nutritional stimuli: effects on metabolism and gene expression, toxicity; and (3) pathways of neutralization: detoxification, secretion, and DNA repair.

NS 275 Human Biology and Evolution (also BIOEE 275 and ANTHR 275)

NS 300 Special Studies for Undergraduates
Fall or spring. Prerequisites: permission of instructor. S-U grades optional. DNS faculty. Special arrangements can be made to establish equivalency for courses taken in prior major or institution. Students prepare a description of the study they want to undertake using a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the associate director for academic affairs, is filed at course registration or during the change-of-registration period.

NS 306 Nutritional Problems of Developing Nations
Spring. 3 credits. Prerequisites: NS 115. S-U grades optional. T R 10:10. Offered alternate years. M. C. Laitinen. The course is designed for undergraduates interested in the nutritional problems of developing countries. Focus is given to the array of nutritional problems encountered, the causes of hunger and malnutrition, the epidemiology of the major nutritional problems afflicting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.

NS 315 Obesity and the Regulation of Body Weight (also Psychology 613)
Spring. 3 credits. Prerequisites: NS 115, Psych 101. Limited to juniors and seniors. S-U grades optional. Offered alternate years. Not offered 2002-03. T R 1:25–3:00. B. Levine. This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, the psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

NS 320 Introduction to Human Biochemistry
Fall. 4 credits. Prerequisites: one year college biology; one year college general chemistry; and CHEM 257 or 357–358; or permission of the instructor. S-U grades optional. M W F 10:10, sec T 1:25.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits. Prerequisites: Biological Sciences 330, or 331, or NS 320, or equivalent. S-U grades optional. Lec M W F 10:10; disc, W or R. M. Stipanuk, C. McCormick. This course examines the biochemical and physiological bases of human nutritional requirements. The instructors use an integrated approach to cover the digestion and metabolism of the nutrients (carbohydrates, proteins, lipids, vitamins, and minerals). Metabolic and chronic diseases that are related to nutrition are discussed throughout the semester. The discussion sections and problem sets provide an opportunity to examine in greater depth selected topics from lecture.

NS 332 Methods in Nutritional Sciences
Fall and spring. 3 credits. Each section limited to 18 students. Prerequisites: NS 345, NS 331 preferred or concurrent registration. Laboratory prerequisite during course prerequisite required in 309 MVR. One evening per week to be scheduled. Fall. Lec M 12:20; lab M W 1:25–4:25 or T R 10:10–1:10. Spring. Lec M 12:20, labs M W 1:25–4:25 or T R 10:10–1:10. J. T. Brenna, M. N. Kazarinoff. Laboratory introduction to principles and analytical techniques of nutritional research. Emphasis is on analytical concepts and skills required to determine nutrient function and nutritional status of individuals. Topics include methods of nutrient intake, body analyses, protein and amino acid analysis in body fluids, and methods for assessing individual food intake and nutritional status.
NS 341 Human Anatomy and Physiology
Spring. 4 credits. Prerequisite: college biology; NS 115 recommended. Completion of laboratory permission forms required in 309 MVR during course enrollment period. Limit 18 per lab. Attendance is required at first lab; or, you will forfeit your placement. For further information go to room 309 MVR. Lec M W F 11:15, lab W or R or F 9:05-11:00, or 2:30-4:25. V. Utermohlen. Introduction to human anatomy and physiology with particular emphasis on aspects of relevance to the nutrition sciences and medicine. All major organ systems will be covered. Laboratories will emphasize location, recognition, and description of anatomical structures. Topics of the course will focus on the tests with nutritional and medical relevance.

NS 345 Nutritional and Physicochemical Aspects of Food
Spring. 3 credits. Prerequisite: college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25-2:40. B. Parker, B. Lewis. A study of the nutritional, physical, and chemical properties of foods including composition, food structure, enzymic and nonenzymic phenomena, and processing/preparation aspects. Issues related to food safety, regulation, and food composition data bases will also be discussed.

NS 346 Introduction to Physicochemical Aspects of Foods—Laboratory
Spring. 1 credit. Each section limited to 18 students. Limited to dietetics students in DNS. Prerequisites: NS 345 or concurrent registration; a college course in organic chemistry and permission of instructor during course registration (permission-of-instructor forms must be obtained from and returned to 309 MVR). Letter grade only. M 12:20-3:20 or T 9:05-12:05. B. Parker, B. Lewis. Laboratory exercises are designed to illustrate principles related to food quality and ingredient functionality, and to introduce students to the analytical methodology associated with food evaluation.

NS 347 Human Growth and Development: Biological and Behavioral Interactions (also Human Development 347 and Biology and Society 347)
Spring. 3 credits. Prerequisites: Biological Sciences 101, 109 or equivalent; Human Development 115 or Psychology 101 or equivalent. M W F 1:25. Offered alternate years. Next offered 2002-2003. J. Haas, S. Robertson. This course is concerned with the interrelations of physical and psychological growth and development in humans, particularly during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variation for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361)
Fall. 3 credits. Prerequisites: Biological Sciences 101-102 and Psychology 101, or permission of the instructor. A fundamental knowledge of biology and psychology is essential. S-U grades optional. Limited to juniors and seniors. M W F 9:05. B. Strupp. A critical evaluation of biological factors thought to influence behavior and/or cognitive functioning. Biological, psychological, and societal influences will be integrated. Topics include nutrition and behavior, psychiatric disorders, developmental exposure to environmental toxins and abused drugs, biopsychology of learning, memory, intelligence, and related cognitive disorders.

NS 378 Food, Nutrition, and Service Management
Fall. 3 credits. Prerequisites: NS 115, NS 247 or permission of instructor. T R 1:25-2:40. M. Kamp. The course discusses how management principles and theories apply to foodservice operations and nutrition services. The systems concept of organized. Emphasis is placed on leadership development, decision making/problem solving as it relates to procurement, production, distribution, and quality assurance in food and nutrition services. Menus and pricing are utilized to demonstrate the interrelationships of nutrition, labor, equipment, food costs, and customer satisfaction. Marketing strategies and implementation are discussed. Teamwork and negotiating skills are emphasized.

NS 380 Integrating Food Systems and Human Nutrition Needs
Spring. 2 credits. Prerequisites: NS 115 or FOOD 200 or An Sc 100. Letter grade only. T R 8:40-9:55. G. Combs. This is a student-centered course that uses case studies to examine the link between human nutrition and health issues to those involved in the food production and distribution. Student teams will investigate new and existing technological options within food systems that can be used to address domestic or international human nutrition needs.

NS 398 Honors in Nutritional Sciences
For study that predominantly involves library research and independent reading.

NS 401 Empirical Research
For study that predominantly involves data collection and analysis or laboratory or studio projects.

NS 402 Supervised Fieldwork
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

NS 403 Teaching Apprenticeship
For study that includes assisting faculty with instruction.

NS 421 Nutrition and Exercise
Spring. 3 credits. Prerequisites: BIOAP 311 or NS 341 and NS 115 or NS 331 preferred. Limited to nutrition majors, others by permission of the instructor. S-U grades optional. Lec T R 11:15, Sec T, or R or F 8:00-9:55. S. Travis. Designed for nutrition majors, students in this course will examine the interaction between nutrition, exercise, and athletic performance. Topics will include the biological, psychological, and sociological aspects of nutrition as it relates to exercise performance. Lectures will cover current research on nutritional needs in response to exercise including: fluids, energy nutrient requirements and caloric distribution, supplementation, ergogenic aids, pre/post event recommendations. Applications will be made to various sports. Critical thinking skills will be enhanced by critiques of studies on sports nutrition related topics and the evaluation of popular sports nutrition claims. Students will learn educational strategies for communicating with the recreational and professional athlete, coach, and trainer.

NS 425 Nutrition Communications and Counseling
Spring. 3 credits. Prerequisites: NS 115, NS 245. Limited to dietetics majors. S-U grades optional. M W F 1:25. S. Travis. Students will come to understand the theoretical basis of effective health promotion communications and to develop effective nutrition communication skills through application in a variety of settings. The course will provide hands-on experiences in counseling, educational program development, and oral and written communications.

NS 431 Mineral Nutrition and Chronic Disease
Fall. 3 credits. Prerequisites: NS 331, An Sc 410, or permission of instructor. S-U grades optional. T R 11:15. C. McCormick. We will evaluate the evidence that diet plays a role in osteoporosis and hypertension and consider whether iron status affects the development of heart disease and inflammation. An additional goal of the course is to review the data upon which recommendations for daily nutrient intakes are currently based, and the biological basis of current recommendations. Class discussion of key research articles will be conducted and evaluated.

NS 441 Nutrition and Disease
Fall. 4 credits. Prerequisites: NS 331 and a human physiology course. S-U grades optional. M W F 10:10; F 8:00. V. Utermohlen.
Study of the anatomical, physiological, and metabolic abnormalities in acute and chronic illness, and the role of nutritional therapy in their prevention and care. Topics covered include: nutritional assessment, nutritional pharmacology, nutrition in disease, cancer, diabetes mellitus, and renal, cardiovascular, pulmonary, skeletal, neurological, liver, and gastrointestinal disorders.

NS 442 Implementation of Nutrition Care
Fall. 3 credits. Prerequisites: NS 247, concurrent registration in NS 441 (or equivalent background in either course). S-U grades optional. Lec M W F 9-9:50. TBA. Development of skills necessary to implement nutrition care in clinical settings: nutrition screening, dietary assessment, principles of medical nutrition therapy, menu planning for disease states, the role of other allied health practitioners in assessing nutritional health, and reimbursement and legislation in dietetics practice.

NS 450 Public Health Nutrition
Spring. 3 credits. Prerequisites: NS 115, and one course dealing with population-level studies, e.g., NS 245, HDFS 150, PAM 201, PAM 308, RSOC 100, RSOC 200. M W F 11:15. K. Rust, O. Pelletier. Public health nutrition is the major professional career track for nutritionists outside of dietetics. It deals with efforts to improve the diets and nutritional status of whole populations by working at the community, state, and national level. This course helps prepare students to work in public health nutrition by describing methods used in the assessment of nutrition problems, development of nutrition-related policies, and delivery of health, nutrition, and food assistance programs.

NS 451 Epidemiology and Health of Human Communities
Fall. 3 credits. Prerequisite: one semester of statistics (can be taken concurrently). M W F 1-2:50. E. Frongillo. Examines through a series of case studies, the role of epidemiology in understanding, assessing, and improving the health and nutrition of human communities and populations. Students will read and discuss scientific research and public policy literature on specific topics of current interest. Emphasis is on the utilization of epidemiology as an ecological science that studies the interdependence and interaction of humans with their social, cultural, and physical environment. Intended for advanced undergraduates and graduate students with an interest in health, human biology, nutrition, or epidemiology.

NS 452 Molecular Epidemiology and Dietary Markers of Chronic Disease
Spring. 3 credits. Prerequisites: upper level biology course, introductory statistics course (can be taken concurrently), or permission of instructor. S-U grades optional. T R 10-10:15. P. Cassano. This course provides an introduction to chronic disease epidemiology, and covers the natural history of the major chronic diseases affecting the U.S. population. The course focuses on the use of biological markers in understanding the etiology of cardiovascular disease, cancer, and lung disease. The course integrates biological and epidemiological information, as well as public health considerations and concepts related to the prevention of disease. Topics include gene-nutrient interaction in relation to cardiovascular risk, micronutrients and cancer risk, and nutritional influences on the immune system in relation to asthma risk. The course will provide a health context that will enrich the learning experience in other advanced courses, particularly in biology and nutrition.

NS 457 Economics of Hunger and Malnutrition (also ECON 474)
Spring. 3 credits. Prerequisites: ECON 101 and introductory statistics, or permission of the instructor. S-U grades optional. M W F 9-9:50. D. Sahn. This course focuses on the social and nutritional aspects of world hunger and malnutrition. We will analyze various dimensions, causes, and solutions to hunger and malnutrition, particularly in developing countries. Grades will be based on a midterm and a final exam, a term paper, and class participation.

NS 475 Molecular Nutrition and Development
Spring. 3 credits. Prerequisites: Chem 277-278 or equivalent, Chem 357-358 or equivalent, BioBM 330 or equivalent. S-U grades optional. M W F 9-9:50. Offered alternate years. Not offered 2002-03. P. Stover, D. Noden. This course explores the role of maternal nutrition, maternal genotype, and placental function in mammalian embryo development. The role of vitamins and nutrients including folic acid, vitamins A and D, iron, and cholesterol in cellular and morphogenic processes during development are discussed at the molecular level. The course is based on the current primary literature and concentrates on the modern experimental approaches used to address these issues including mutagenic, transgenic, cell and fetal culture models.

NS 480 Applied Dietetics in Foodservice Systems
Spring. 3 credits. Limited to 27 students. Prerequisites: NS 376, Micro 290. Laboratory registration during course registration is required in 309 MVR. White lab coat is required. Approximately $25.00 will be needed for special supplies/activities. Lec M W F 9:05-11:15. M. Kamp. This course will prepare students to gain experience in facility design; equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources; recipe development and volume food production; computer-assisted management; employee training; applied safety and sanitation standards; and will develop other skills required to operate/manage a foodservice program. The application of quality management in food service operations and facility management is stressed. Laboratories will be arranged through Cornell Dining.

NS 498 Honors in Nutritional Sciences
Spring. 1 credit. Limited to students admitted to the division honors program. Students may register in NS 499 concurrently. M or F 2-3:00. M. Kazarinoff and division faculty. Juniors (Mondays). Discussion of research opportunities in nutrition and orientation to research facilities. Delineation of honors research problems in consultation with faculty mentors. Seniors (Fridays). Workshop sessions on honors thesis and oral presentation preparation.

NS 499 Honors Problem
Fall and spring. Credits to be arranged. Open only to students in the division honors program. M. Kazarinoff and division faculty. An independent literature, laboratory, or field investigation. Students should plan to spread the work over two or more semesters.

NS 500 Special Problems for Graduate Students
Fall or spring. Credit to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional. Division faculty. Emphasis on independent advanced work. Experience in research laboratories in the division may be arranged.

NS 601 Proteins and Amino Acids (also AN SC 601)
Spring. 2 credits. Prerequisites: physiology, biochemistry, and nutrition. Offered alternate years. W F 12:20. Next offered 2002-03. R. E. Austin. The course emphasizes the dynamic aspects of protein digestion and absorption, amino acid transport, and amino acid and nitrogen metabolism and their relationships to the nutritional requirements for amino acids.

NS 602 Lipids (also BIO AP 619)
Fall. 2 credits. T R 11:15. A. Bensoudou. Advanced course on biochemical, metabolic, and physiological aspects of lipids, more specifically lipid transport. Topics covered include lipid methodology, structure of plasma lipoproteins, molecular biology and cell biology of apolipoproteins, lipoprotein receptors, lipid transfer factors, lipotropic enzymes, and atherosclerosis.

NS 603 Mineral Nutrition: Metabolic, Health, and Environmental Aspects (also AN SC 603)
Fall and spring. 1 credit. S-U grades only. Prerequisites: biochemistry, physiology, and nutrition. T 2:20-4:25. Offered alternate years. Next offered 2002-2003. X. G. Lei, G. F. Combs, Jr. The course emphasizes the metabolic roles and environmental impacts of mineral nutrition in animal, human, and food systems. Team-taught lectures include general biochemical and physiological aspects of mineral metabolism and specific mechanisms of gene expression regulation and nutritional health disorders associated with individual elements. Methodology and facility of mineral research is also discussed.

NS 604 The Vitamins (also AN SC 604)
Fall. 2 credits. T R 10:10. G. Combs. Text-based discussion sessions on nutritional aspects of the vitamins, including recent developments in nutritional and biochemical interrelationships with other nutrients and metabolites.

NS 605 Nutritional Biochemistry Colloquim
Fall and spring. 1 credit. S-U grades only. R 12:20. Nutritional biochemistry faculty. Nutritional biochemistry colloquium is a graduate seminar series that focuses on recent advancements in biochemical nutrition. Weekly presentations are made by faculty, postdocs, and graduate students, and are based on the primary literature. The presentations are followed by a discussion involving all participants.
NS 607 Nutrition as an Integrating Discipline: Concepts and Paradigms
Fall. 3 credits. Prerequisite: some prior coursework or experience in nutrition, or permission of the instructor. M W F 10:10. M. Kazarinoff, D. Pelletier, and division faculty.

An overview course for beginning graduate students which introduces them to the full breadth of nutritional science disciplines, including quantitative and qualitative sciences. Also suitable for sophomores as an integrating course. The course presents concepts and paradigms of molecular biology, biochemistry, clinical nutrition, epidemiology, anthropology, economics, program planning and administration, policy development, and ethics. The course uses Vitamin A as the example. Emphasis will be placed on the integration of factual and conceptual knowledge to solve nutrition problems in human societies.

NS 611 Molecular Toxicology (also Toxicology 611)
Spring. 3 credits. Prerequisite: Toxicology 610 and a full-year of 400-level course in biochemistry or equivalent. S-U grades optional. TBA. S. Bloom, R. Dietert.

A study of the fundamental biochemical mechanisms of absorption, transport, metabolism, and excretion of drugs, carcinogens, and toxicants. Emphasis is placed on oxidative and conjugative pathways of metabolism and of environmental and nutritional factors that influence toxicant metabolism and disposition. Methods of evaluating in vivo and in vitro metabolism are also addressed.

[NS 612 Methods of Assessing Physical Growth in Children]
Spring. 3 credits. Limited to graduate students and undergraduate students who have permission of the instructor. A previous course in statistics required. S-U grades optional. Lec T 1:25-2:45; disc T 2:15-3:05. Not offered 2001–2002. J. Haas.

A laboratory course to train students in methods and techniques used to assess the physical growth and development of children. The methods explored are those applicable for field, community, and clinical studies and cover anthropometry, body composition, skeletal age, maturity indicators, physical fitness, and energy expenditure.

NS 614 Topics in Maternal and Child Nutrition
Fall. 3 credits. Prerequisites: NS 331, and 222 or 347, Biological Sciences 311, and permission of instructor. T R 8:30–9:55. K. Rasmussen.

An advanced course on the role of nutrition during pregnancy and lactation. The feeding and growth of infants and children in health and disease is considered. Critical evaluation of current literature is emphasized via lecture, discussions, and a term paper.

NS 617 Teaching Seminar
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of the instructor. S-U only. C. Bisogni, D. Way.

Individualized instruction focusing on development of teaching skills for guiding classroom learning in lecture, discussion, and laboratory settings. Preparation of content, presentation, and interaction techniques and evaluative methods are emphasized in relation to the student's specific teaching assignment.

Videotaped simulations provide opportunity for practice and analysis of teaching behaviors.

NS 618 Teaching Experience
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of instructor. S-U only. C. Bisogni.

Designed to provide experience in teaching nutritional sciences by direct involvement in college courses under supervision of a faculty member. The aspects of teaching and the degree of involvement vary, depending on the needs of the course and the experience of the student.

NS 619 Field of Nutrition Seminar (also AN SC 619)
Fall or spring. 0 credit. S-U only. M 4:00. Faculty and guest lecturers.

Lectures on current research in nutrition.

NS 620 Food Carbohydrates (also Food Science 620)
Spring. 2 credits. Prerequisites: Biological Sciences 330 or equivalent. Letter grades only. T R 10:10. Offered alternate years. Not offered 2002–03. J. Brady, B. Lewis.

A consideration of the chemistry of carbohydrates, including sugars and complex carbohydrates (starches, pectins, hemicelluloses, gums, cellulose, and glycoconjugates). Emphasis is placed on intrinsic chemistry, functionality in food systems, and changes occurring during food processing and storage.

NS 626 Special Topics in Food Fall. 2 credits. TBA. B. Lewis.

This course provides a discussion of current research on specific topics related to functional foods and nutraceuticals/phytochemicals.

NS 630 Anthropometric Assessment Spring. 1 credit. Prerequisite: NS 331 or equivalent and permission of the instructor. 5 weeks only. W 1:25–4:25. J. Haas.

Topics covered in this lecture/lab course are: biological basis of anthropometry for nutritional status assessment, quality control of anthropometric data, applications to special groups (infants, children, adolescents, pregnant women, and elderly), statistical analysis and presentation of anthropometric data, references standards and interpretation, measurement techniques of anthropometry, and body composition assessment.

NS 637 Epidemiology of Nutrition Spring. 3 credits. Limited to graduate students. Prerequisites: Biometry 601 and concurrent registration in Biometry 602 or equivalent knowledge. Basic knowledge about the nutritional aspects of growth and development and about nutritional biochemistry. TBA. J-P. Habicht.

This course covers principles of nutritional epidemiology, impact assessment of nutrition intervention programs, and nutritional surveillance. Principles of using nutritional information in decision making are presented. The course shows how the biochemistry and physiology of nutrition can be related to epidemiological assessment and research strategies.

NS 638 Epidemiology of Nutrition Seminar Spring. 3 credits. Reserved for graduate students planning field intervention studies; by permission of instructor. Prerequisite: NS 637. TBA. J-P. Habicht.

Covers the meta-analysis, design, measurement, and analytic issues involved in developing, implementing, and analyzing studies of field interventions with nutritional impact.

NS 639 Epidemiology Seminar (also Statistics and Biometry 639)
Spring. 0–1 credit. Limited to graduate students, others by permission of instructor. Contact P. Cassano 255–7551 for permission and credit information. S-U grades only. M 12:20. P. Cassano.

This course will develop skills in the preparation and interpretation of epidemiological data by discussing current research topics and issues.

NS 640 Social Science Theories in Nutrition
Fall. 3 credits. Limited to 20 graduate students. T R 10:10–12:05. J. Suhal.

Social science theories and paradigms from sociology, psychology, anthropology, economics, political science, geography, and history that contribute to understanding food, eating and nutrition will be discussed to understand how theories apply to nutrition topics, issues, and problems.

NS 644 Community Nutrition Seminar Fall and spring. 1 credit. S-U only. Fall M 11:15; spring M 12:20. A. Gillespie and Cornell Community Nutrition faculty.

This seminar, sponsored by the Cornell Community Nutrition Program, focuses on research and program presentations in community nutrition, and related fields. Cornell faculty, graduate students, and invited outside speakers present research proposals, results from ongoing research, theoretical bases for research, program evaluations, and discuss current programs and issues in community nutrition. The format varies but always includes discussion by participants.

NS 646 Seminar in Physicochemical Aspects of Food
Spring. 1–3 credits. Prerequisite: a college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25–2:40. B. Lewis, B. Parker.

An introduction to physicochemical aspects of food, for graduate students who have had limited or no work in this area. The seminar uses the lectures of NS 345 as a basis for supplementary readings and critical review of research on selected topics.

NS 650 Assessing Food and Nutrition in a Social Context
Fall. 4 credits. Prerequisite: course in Social Sciences. S-U grades only. T R 1:25–2:40. D. Pelletier, G. Pelto.

Food and nutrition problems in developed and developing countries may manifest themselves in biological or functional terms, but their causes and solutions ultimately are rooted in the socio-political world. This course provides multidisciplinary perspectives and some community experiences needed to assess and analyze the social context of nutrition problems. The course is relevant to developed and developing countries and to research and practice related to community nutrition as well as nutrition policy.
NS 651 Food and Nutrition Action in a Social Context
Spring. 3 credits. Prerequisites: at least 1 course in social sciences; NS 650 strongly recommended. S-U grades only. T R 1:25-2:40. D. Pelletier, G. Pelto.
This course builds upon the perspectives developed in NS 650. It provides a framework for combining socio-political considerations and analytical criteria in the planning, implementation, and evaluation of nutrition actions at community and policy levels. Case studies from the United States and developing countries are used extensively for examining a wide range of nutrition actions from the perspective of this integrated framework.

NS 660 Special Topics in Nutrition
Fall or spring. 3 credits maximum each term. Registration by permission of the instructor. Division faculty.
Designed for students who want to become informed in any specific topic related directly or indirectly to nutrition. The course may include individual tutorial study, experience in research laboratories, a lecture series on a special topic selected by a professor or a group of students, and/or selected lectures of another course already offered. Topics may be changed so that the course may be repeated for credit.

NS 680 International Nutrition Problems, Policy, and Programs
Designed for graduate students who want to learn about the important nutritional problems of developing countries. The major forms of malnutrition related to poverty and their underlying causes are discussed. Emphasis is placed on programs and policies that can assist poor countries and communities to improve their nutritional and health status.

NS 685 Empirical Methods for the Analysis of Household Survey Data: Applications to Nutrition, Health, and Poverty (also ECON 771)
Spring. 3 credits. Prerequisites: introductory microeconomics, intermediate statistics (through multiple regression), or instructor’s permission. M W 2:55-4:10. D. Sahn.
This course examines the role of government policy in alleviating poverty, food insecurity, and malnutrition in developing countries. Topics covered include methodologies for economic policy analysis of time use and food acquisition behavior, the “production” of nutritional outcomes, and the role of price policy and markets. Course readings draw largely on examples from Africa and Asia.

NS 690 Trace Element and Isotopic Analysis (also Chemistry 628)
Spring. 3 credits. Primarily for graduate students and advanced undergraduates.
Prerequisite: Chemistry 208 or 300, 302 or Chemistry 208 and Mathematics 112, or permission of instructor. S-U grades optional. T R 11:15. Offered alternate years. Not offered 2002-03. J. T. Brenna.
Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications. The first five weeks of CHEM 628/NS 690 focus on IRMS instrumentation and are offered as a separate 1 cr. special topics course (NS660).

NS 698 International Nutrition Seminar
Fall and spring. 3 credits per term. Registration by permission of instructor. Faculty in International Nutrition Program.
This option is designed for graduate students, mainly those with a concentration in international nutrition, who wish to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It usually consists of tutorial study on an agreed topic. Because the topics change, the course may be repeated for credit.

NS 700 Current Topics in Toxicology (also Toxicology 590)
Fall or spring. 1-3 credits. S-U grades optional. TBA. Staff.
A discussion of the most current developments in various areas of toxicological research and testing. Faculty and students will participate jointly in evaluating research findings and provide seminars and discussion of such material. For information regarding the topic, instructor, location, and credit, contact the office of the Graduate Field of Environmental Toxicology or go to http://www.cfe.cornell.edu/icet/seminars.htm.

NS 702 Seminar in Toxicology (also Toxicology 702)
Fall or spring. 1 credit. S-U grades only. F 12:20-1:20. Staff.
The seminar program covers varied topics in biochemical, genetic, nutritional, veterinary, and regulatory toxicology, ecotoxicology, and environmental chemistry. Included are presentations of basic research studies, fundamental concepts, and research activities involving environmental problems of a toxicological nature. Presentations are given by speakers from Cornell and visitors.

NS 703 Seminar in Nutritional Sciences
Fall and spring. 1 credit. S-U grades only. T 12:20 or W 12:20. Division faculty.
Presentations of original articles pertinent to the Nutritional Sciences. Students will learn how to make professional presentations and how to critique the presentations given by others. In addition, students will read and learn how to interpret original articles published in a wide variety of journals.

NS 707 Nutrition as an Integrating Discipline: Evaluation, Criticism, Application
Fall. 3 credits. Prerequisites: advanced graduate standing and permission of the instructor. 2-hour class period per week plus discussion and workshop M 12:25-3:20. Not offered 2001-2002. M. Kazarinoff, K. Rasmussen.

The goal of this course is to provide an integrative capstone learning experience for advanced graduate students with majors or minors in nutrition. Group of students will focus on a series of special problems in nutrition drawn from those currently faced by nutrition professionals. Special problems may involve assuming the role of consultants, expert committee members or peer-reviewers who are charged with answering questions or formulating recommendations related to research, programs, or policies.

NS 899 Master's Thesis and Research
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

NS 999 Doctoral Thesis and Research
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

FACULTY ROSTER
Arion, William J., Ph.D., U. of N. Dakota. Prof.
Bensadoun, Andre, Ph.D., Cornell U. Prof., Nutritional Sciences/Physiology
Bisogni, Carole, Ph.D., Cornell U. Prof. and Associate Director for Academic Affairs
Brannon, Patsy, Ph.D., Cornell U. Professor and Dean, College of Human Ecology
Brenna, Thomas, Ph.D., Cornell U. Assoc. Prof.
Campbell, T. Colin, Ph.D., Cornell U. Jacob Gould Schurman Professor of Nutritional Biochemistry
Cassano, Patricia, Ph.D., U. of Washington. Asst. Prof.
Chen, Junshi, M.D., Peking Medical College, China. Adjunct Prof.
Comb, Gerald F. Jr., Ph.D., Cornell U. Prof. Devine, Carol M., Ph.D., Cornell U. Asst. Prof. Dollahite, Jamie, Ph.D., U. Texas. Assoc. Prof. and EFNEP Leader
Frongillo, Edward, Jr., Ph.D., Cornell U. Assoc. Prof.
Garza, Cubertco, M.D., Baylor College, Ph.D., MIT. Prof.
Gillespie, Ardyth, Ph.D., Iowa State U. Assoc. Prof.
Haas, Jere D., Ph.D., Pennsylvania State U. Director and Nancy Schlegel Meining Professor in Maternal and Child Nutrition
Habicht, Jean-Pierre, Ph.D., Massachusetts Inst. of Technology. James Jamsom Professor of Nutritional Epidemiology
Kamp, Marie, MBA, Oklahoma City U. Lecturer
Kazarinoff, Michael N., Ph.D., Cornell U. Assoc. Prof., Nutritional Sciences/Biochemistry, Molecular and Cell Biology
Latham, Michael C., D.T.M.&H., U. of London. Professor of Nutritional Epidemiology
Levitsky, David A., Ph.D., Rutgers U. Prof.
Lewis, Bertha A., Ph.D., U. of Minnesota. Assoc. Prof.
Manor, Danny, Ph.D., Albert Einstein College of Medicine. Assoc. Prof.
McCormick, Charles, Ph.D., North Carolina St. U. Assoc. Prof.
Noy, Noa, Ph.D., Tel-Aviv U. (Israel). Assoc. Prof.
Olson, Christine M., Ph.D., U. of Wisconsin. Prof.
Parker, Robert S., Ph.D., Oregon State U. Assoc. Prof.
Pearson, Thomas, Ph.D., Johns Hopkins U.  Adjunct Prof.
Pelletier, David, Ph.D., The Pennsylvania State U. Assoc. Prof.
Pelto, Gretel, Ph.D., U. Minnesota. Prof.
Rasmussen, Kathleen M., Sc.D., Harvard U. Prof.
Rivera, Juan, Ph.D., Cornell U. Adjunct Asst. Prof.
Sahn, David, Ph.D., M.I.T. Prof.
Sobal, Jeffery, Ph.D., U. of Pennsylvania. Assoc. Prof.
Stephenson, Lani, Ph.D., Cornell U. Assoc. Prof.
Stipanuk, Martha H., Ph.D., U. of Wisconsin. Prof.
Stover, Patrick, Ph.D., Med. College of Virginia. Asst. Prof.
Strupp, Barbara, Ph.D., Cornell U. Assoc. Prof.
Travis, Susan, M.S., Colorado State. Lecturer
Utermohlen, Virginia, M.D., Columbia U. Assoc. Prof., Nutritional Sciences/Biochemistry, Molecular and Cell Biology

Other Teaching Personnel
West, Elise, M.S., Cornell U. Teaching and Curriculum Specialist

Joint Appointees
Bauman, Dale, Prof., Animal Science/Nutritional Sciences
Miller, Dennis, Prof., Food Science/Nutritional Sciences
Military instruction began at Cornell University in 1868 under the provisions of the Morrill Act of 1862. Since that time, officer education has been highlighted by the construction of Barton Hall in 1914 and the establishment of a formal Reserve Officers Training Corps (ROTC) unit in 1917. The program evolves to keep pace with the latest military changes and emphasizes the development of leadership and managerial skills.

The Officer Education Programs prepare students for a commission as an officer in either the United States Army, Navy, Air Force, or Marine Corps. Each service program is headed by a senior military officer who also serves as a full professor on the Cornell faculty.

**MILITARY SCIENCE**

Lieutenant Colonel Robert Sova, Aviation (AV), United States Army, Professor of Military Science and Commanding Officer, U.S. Army ROTC Instructor Group

Major Brian Edholm, Military Intelligence, United States Army

Captain Richard Brown, Engineer, United States Army

Captain Michelle McKeown, Air Defense Artillery, United States Army

**United States Army ROTC Program**

The primary objective of the Army Officer Education Program at Cornell is to commission the future officer leadership of the United States Army. Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen's role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential. These objectives are achieved through a program normally covering four years. A two-year program is available for those who qualify. The program includes specific courses in military science, more general academic subjects that assure a well-rounded education, practical training in leadership through participation in the Cadet Corps (including attendance at one five-week summer camp at Ft. Lewis, Washington), and the opportunity to participate in a number of extracurricular activities. This combination prepares the student for commissioning and effective performance in the many branches of the Army. This student's academic major, academic performance, leadership ability, personal desires, and the needs of the Army determine the branch of the Army into which the student is commissioned upon graduation.

**Requirements for Enrolling**

Applicants must be citizens of the United States and be able to obtain a Secret level security clearance prior to being commissioned as lieutenants. (Noncitizens may enroll in selected portions of the program.) Students must meet Army medical requirements. Overall sound mental and physical condition is essential; students are required to undergo periodic physical fitness tests. Enrollment and continuation in the program is subject to the approval of the Professor of Military Science. Enrollment in specific courses by students not formally enrolled in the program must be approved by course instructors. Contracted students must register for letter-grade military science classes and leadership laboratories for the purpose of commissioning into the United States Army.

**Four-Year Program**

The Four-Year Program is open to students in their freshman year or, with the approval of military and university authorities, to sophomores in a five-year degree program. Veterans of the Armed Forces of the United States and students entering Cornell with AROTC credit from secondary or military schools (Junior Division AROTC) may receive advanced standing, if qualified. Under the Four-Year Program students enroll in the Basic Course (Mil S I and II) during the first two years, and the Advanced Course (Mil S III and IV) during the next two years. A total of 12 credits of military subjects are taken. In addition, academic enrichment courses are required in such fields as written communications, computer science, and military history. All cadets attend a five-week camp, with pay, between their junior and senior years. All cadets participate in physical fitness training three days per week. Each year selected cadets are sent to the Army Airborne School, Winter Survival School, and Air Assault Course, depending upon availability and student standings within the ROTC program.

**Basic Course (MIL S I and MIL S II)**

Students in the first year of the Basic Course take one classroom course in military science in the fall and one in leadership training for which they receive academic credit depending upon their college. These courses include study of the U.S. organization for defense and principles and techniques of leadership and management. Students also participate in leadership modules that include rappelling, orienteering, drill and ceremony, physical training, winter survival, rifle marksmanship, historical site visits, land navigation, interpersonal communication, and individual tactical training. These modules are designed to promote personal development and enrollment. While they do not receive academic credit for these activities, students may receive physical education credit. Typical freshman participation in Army officer education is 6 program-related hours per week.

In the fall of the second year, students take a two-credit course in American military history. In the spring of the second year, students take a one-credit course in leadership theory and spend approximately two hours a week in practical leadership training, land navigation, and military skills.

**Advanced Course (MIL S III and MIL S IV)**

The Advanced Course of the Four-Year Program is open to students who have successfully completed the Basic Course and are accepted by the Professor of Military Science for further enrollment. It is also open to students who have gained appropriate advanced standing through either successful completion of Basic Camp, a six-week summer training camp, or prior military training. Students entering the Advanced Course must have the equivalent of four academic semesters remaining at Cornell or another degree-granting institution. Students must pass required physical and aptitude tests. In addition, the past performance and desire of each student is evaluated to determine potential for eventual commissioning.

When students are accepted for the Advanced Course or accept a scholarship, they sign a written contract with the U.S. government. Under the terms of the contract, they agree to complete the Advanced Course and to accept a commission if offered. Concurrently with the signing of the contract, students enlist in the United States Army Reserve.

**Scholarships**

Scholarships are awarded on the basis of merit and may be available for two, three, or four years. AROTC scholarships are awarded each year to outstanding Basic Camp participants and students in the freshman and sophomore classes. Scholarships pay up to $17,000 toward tuition and mandatory fees. Scholarship cadets and Advanced Course cadets also receive between $200 and $400 a month for up to ten months a year. Scholarship cadets also receive $510 per year toward the cost of textbooks.

**Commissioning**

All students who successfully complete the Advanced Course, including the advanced summer camp, are commissioned as second lieutenants in the United States Army upon graduation.

**Service Obligations**

ROTC graduates may serve on Active Duty, in the Army Reserve, or in the National Guard, depending upon the needs of the Army and the leadership abilities of the cadet. Officers beginning active duty attend the Officer Basic Course (normally 10 to 16 weeks) of their assigned branch. Upon completion, officers
are assigned to a unit and location determined by the desires of the individual and the requirements of the Army. Officers selected for reserve duty attend the Officer Basic Course, after which they are released to reserve status. ROTC graduates generally serve four years on active duty and four years in reserve status; however, some may serve eight years on reserve duty.

**Choice of Branch**

Cadets in the second year of the Advanced Course (normally the senior year) may specify the branch of the Army—such as Infantry, Armor, Field Artillery, Air Defense Artillery, Aviation, Corps of Engineers, Signal Corps, Military Police, Military Intelligence—in which they prefer to serve. They are notified in December of the branch to which they are assigned. Appointment in a chosen branch depends upon the student's academic and officer education performance, degree area, and the needs of the Army at that time.

**Graduate Study**

Active duty deferments, or educational delays, may be granted to individuals who want to attend graduate school at their own expense. Requests will be considered on the basis of the student's academic and officer education performance, degree area, and the needs of the Army at that time.

**Benefits**

Each cadet in the Advanced Course (MIL S III and MIL S IV) receives $200 a month for up to 10 months a year. While attending the advanced summer camp (between the junior and senior years), each cadet receives approximately $700. A cadet in the Two-Year Program receives the same payments as cadets in the Advanced Course and, in addition, receives approximately $700 for summer Basic Camp attendance before entering the Advanced Course.

**Military Science Courses**

All cadets take one course and a leadership laboratory each semester in military science. The number of hours a week spent in the classroom varies from semester to semester, as does the credit received for each course.

**Freshman Year (MIL S I)**

**MIL S 101 United States Organization for Defense**

Fall. 1 credit. Required. B. Edholm.

Students examine the U.S. defense structure in terms of organization, mission, personnel, and relationships among and between military forces and branches and departments of the government. The U.S. Army force structure is examined at all levels. The complexities and magnitude of operating the defense organization are studied to provide a framework for subsequent instruction. Students develop skills in conducting oral and written presentations.

**MIL S 102 Leadership Theory**

Spring. 1 credit. Required. B. Edholm.

This course allows students to develop a basic understanding and appreciation of theories of social and organizational psychology and behavior as they apply to the military setting. Attention is given to leader types, the source and exercise of authority, and the impact of varying styles of leadership, resource management, motivation, and organizational effectiveness. The student is instructed in the concepts of integrity, ethics, and professionalism. Classes on historical events and strategy are also presented.

**Sophomore Year (MIL S II)**

**MIL S 222 Small Organizational Operations/Land Navigation**

Spring. 1 credit. Prerequisite: MIL S 102 or instructor approval. J. Lopez.

Students learn the basic principles of group dynamics at the level of the smallest military unit, the squad. Troop-leading procedures are introduced through case studies and role-playing exercises. Leadership theories introduced in MIL S 102 are examined in a variety of realistic settings. The practical application of behavioral theories is explored in the context of small military organizations. This course will also provide practical knowledge of the various forms of topographic representation. Students will use maps in terrain association and land navigation. Knowledge of topography is complemented by an orientation to understanding physical and climatic factors. Portions of the course offer experience in land navigation and orienteering.

**MIL S 321 Armed Conflict in Society**

Fall. 2 credits. Required. J. M. Keefe.

This course provides practical knowledge in American Military History. It is primarily an overview course designed to provide an understanding of the nature of warfare and particularly how warfare has affected the United States. The course consists of three primary areas of instruction with an emphasis on American military history. The first area of instruction addresses the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second phase focuses on America at war in the nineteenth century. It places particular emphasis on the American Civil War and the strategy of annihilation versus the strategy of attrition. The final phase looks at warfare in the twentieth century and finishes with an analysis of the future of warfare for the military of the United States.

**Junior Year (MIL S III)**

**MIL S 331 Theory and Dynamics of the Military Team**

Fall. 2 credits. Required. R. Brown.

After an initial introduction to techniques of presenting briefings, students are provided with a broad understanding of the principles and application of teamwork in military organizations. Particular emphasis is given to the leadership role of the commander as the team coordinator. This course helps students develop an understanding of the roles and contributions of the various branches of the Army in support of the military team.

**MIL S 332 Leadership in Small-Unit Operations**

Spring. 2 credits. Required. Prerequisite: MIL S 331. R. Brown.

This course takes on the nature of decision making and the tactical application of the military team. Through the use of conferences and extensive practical exercises, students develop familiarity with the factors influencing a leader's decisions and the process of planning, coordinating, and directing the operations of military units through operation plans and orders.
Must also meet physical and medical requirements. Interested students can visit the Naval ROTC Unit in Barton Hall or contact their local officer recruiter.

### Programs

There are two programs: the Scholarship Program and the College Program. The two programs differ primarily in benefits given to the student.

#### Scholarship Program

The Scholarship Program provides approximately 1,000 scholarships in more than 60 universities nationwide to help students who want to serve in the Navy or Marine Corps. Financial support is provided to students during college preceding the award of the baccalaureate degree.

#### Benefits

The program offers scholarships that provide full tuition and are not need-based. While on scholarship, students also receive money for instructional fees, textbooks, nonconsumable supplies, and a $200-a-month stipend for a maximum of 40 months.

#### Successful completion of the Scholarship Program

leads to a commission in the Navy or Marine Corps Reserve. At Cornell University over 90 percent of NROTC students have a scholarship. Students entering NROTC without a prior scholarship award are entitled to compete for two- or three-year scholarships controlled by the Chief of Naval Education and Training.

#### Entering the Scholarship Program

There are three ways to enter the Scholarship Program:

- The first way is by applying to the national competition each year. This process entails filling out and submitting an appropriate application; being interviewed; having a physical examination; and applying to, and being accepted by, one of the colleges or universities throughout the country that offers an NROTC program.
- The second way is by enrolling in the College Program at Cornell and being recommended by the Professor of Naval Science for a scholarship. Students entering NROTC without a prior scholarship award are entitled to compete for two- or three-year scholarships controlled by the Chief of Naval Education and Training.
- The third way is by entering through the Two-Year Scholarship Program.

#### College Program

There are two College Programs available. Both lead to a commission in the Navy or Marine Corps Reserve.

#### Starting in the junior year

Each of these programs provides textbooks for naval science courses, uniforms, and a subsistence allowance of $200 a month.

#### The regular College Program

is four years long. Academic requirements for students in this program are somewhat fewer than those for scholarship students, as noted in the curriculum section of this booklet.

#### The Two-Year College Program

begins the summer before the junior year. Students attend a required program, with placement at the Naval Science Institute in Newport, R.I.

### Summer Training

Each summer, students in the Scholarship Program spend approximately four to six weeks on a Navy ship, or participate in a naval activity that may take place anywhere in the world, for on-the-job training. College Program students attend one summer training session of the same duration between the junior and senior years.

### Active Duty Requirements

Scholarship midshipmen commissioned in the Navy or Marine Corps Reserve serve on active duty for a minimum of four years. College program midshipmen commissioned in the Naval or Marine Corps Reserve serve a minimum of three years. In some cases, following commissioning, specialized training such as aviation or nuclear power will add additional active duty requirements.

### Choice of Assignment

Graduates have the opportunity to request the duty they prefer upon graduation. These requests are given careful consideration, and every effort is made to assign newly commissioned officers to their duty of choice.

Among the assignments available are duties in naval aviation as either a pilot or naval flight officer, on submarines, and on surface ships. Other specialties, such as special warfare or medical service corps, may be available on a limited basis.

### Marine Corps Options

The United States Marine Corps is an integral part of the Naval Services and is commanded by the Commandant of the Marine Corps. One-sixth of the NROTC scholarship students may be Marine selectees who will be designated Marine-option midshipmen. Upon successful completion of the program they will be appointed second lieutenants in the United States Marine Corps Reserve.

Marine-option midshipmen follow the same program as other NROTC midshipmen for the first two years. Beginning with the junior year, Marine-option midshipmen are taught Marine oriented courses by a Marine Officer Instructor. For First Class summer training (after the junior year). Marine-option students travel to Quantico, Virginia, where they undergo six weeks of intensive training known as the USMC Officer Candidate School. Upon commissioning the following year as second lieutenants, they are assigned to the Basic School at Quantico, Virginia. After the Basic School, the Marine officer is assigned duty in a variety of occupational fields. Among the duties available are infantry, aviation, artillery, tracked vehicles, engineering, communications, electronics, supply, administration, and computer science. The officer may serve on board naval vessels or on shore installations of the Marine Corps or Navy, either in this country or overseas.

The Marine Corps has a postgraduate training system similar in objectives and organization to that of the Navy. Marine officers selected for aviation receive flight training at the Naval Air Station, Pensacola, Florida, along with their Navy counterparts.

### Curriculum

A student has three categories of requirements to fulfill as a midshipman. The first of these requirements is a weekly naval professional
Naval Professional Laboratories
NAV S 141-142, 241-242, 341-342, or 441-442
All students in the program participate in one 90-minute professional development session each week. The session is held from 2:30 until 4:00 on Wednesday afternoons, and consists of both drill and professional information briefings. Students gain experience in actual leadership situations and learn the fundamentals of seamanship, military formations, movements, commands, discipline, courtesies, and honors. During information briefings, special emphasis is given to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer's duties.

Naval Science Courses
All Navy and Marine midshipmen take one naval science course each semester during their freshman and sophomore years. Navy-option students continue to take a naval science course each semester during their junior and senior years. Marine-option students have slightly different curriculum requirements for their junior and senior years.

Freshman Year (Navy and Marines)
NAV S 101 Fundamentals of Naval Science
Fall. No credit. This course involves a study of fundamental aspects of naval science, this includes contributions to sea power, different warfare communities involved in the physical development of naval forces, and study of resource management and naval science prospects for the future. Naval uniforms, customs, and traditions are also covered.

NAV S 102 Sea Power and Maritime Affairs
Spring. 3 credits. Discussions examine the history of the Navy as a force in diplomacy and an instrument of U.S. foreign policy. Relationships between Congress and the military for determining the national defense policy are also explored. An integrated examination of current events and issues lends historical perspective throughout the course.

NAV S 157 Principles of Sailing
Fall and spring. Physical education credit. This is a course of instruction in basic sailing skills and safety principles. Students sail small boats on Cayuga Lake. Focus is on U.S. Navy Class B inshore skipper certifications.

Sophomore Year (Navy and Marines)
NAV S 201 Organizational Behavior and Small Group Processes
Fall. 3 credits. The theme of the course is the "evolving role of the manager, organizational decision maker, and leader." The course begins by briefly covering the theoretical principles of management and progresses through practical skills used by managers and leaders. Lectures, reading assignments, films, and discussions provide students with an excellent opportunity to consider complex managerial and leadership issues. The goal of this course is for students to begin to develop a sound personal leadership philosophy that will enable them to more effectively accomplish the assigned responsibilities of leading men and women in today's demanding and high-tech naval environment.

NAV S 202 Naval Ship Systems I (also Mechanical and Aerospace Engineering 101)
Spring. 3 credits. An introduction to primary ship-systems and their interrelationships. Basic principles of thermodynamics, propulsion, mechanical operation, internal communications, electronics, ship structure, and other marine systems are covered.

Junior Year (Navy)
NAV S 301 Principles of Navigation (also Agricultural Engineering 305)
Fall. 4 credits. An introduction to the fundamentals of marine navigation emphasizing piloting and celestial navigation procedures. This course covers coordinate systems, chart projections, navigational aids, instruments, compass observations, time, star identification, use of the nautical almanac, and study of tides and currents. Electronic navigation systems are discussed.

NAV S 302 Naval Operations
Spring. 3 credits. The course covers the application of the nautical rules and maneuvering board in order to avoid collisions at sea. Other aspects of naval surface ship operations that are introduced include visual and electronic communications methods, tactical disposition of forces, ship handling theory, and deck seamanship topics.

Senior Year (Navy)
NAV S 401 Naval Ships Systems II (Weapons)
Fall. 5 credits. The principles and theories used in the development of naval weapons systems are examined. Initially, extensive study is made of detection systems, especially radar and sonar, followed by discussions of ancillary systems for computing, stabilizing, tracking, and weapons control and delivery.

NAV S 402 Leadership and Ethics
Spring. 3 credits. A variety of topics important to the naval officer for both professional and managerial development are reviewed. The material is designed to provide the midshipman with an understanding and appreciation of leadership and ethics in preparation for assignments in the naval service. Through the use of lectures, case studies, and role playing, the student will learn various aspects of naval leadership and ethical decision making. Marine-option students may also take this course.

Junior or Senior Year (Marine Options)
NAV S 310 Evolution of War
Spring. 3 credits. A study of warfare that examines the relationship of military strategy to geography, economics, sociology, technology, and national political realities. This course includes study of the evolution of warfare, including principles of war, weapons, and associated equipment, and the effects of nuclear weapons and guerrilla warfare on traditional concepts of national strategy.

NAV S 410 History of Amphibious Warfare
Spring. 3 credits. The history of the development, theory, techniques, and conduct of amphibious operations from 490 B.C. to the present. Special emphasis is placed on amphibious operations conducted in the central Pacific during World War II and on the future of amphibious operations.

Other Required Courses

Navy-Option Scholarship Program
To be eligible for a commission in the United States Navy, midshipmen must successfully complete all the requirements for a baccalaureate degree in any field of study offered by Cornell University, and complete courses in the following subjects (specified courses to be approved by the Professor of Naval Science):

- American military affairs or national security policy (one semester)
- English (one year)
- calculus (one year)
- calculus-based physics (one year)
- computer science (one semester)

The calculus requirement must be satisfied by the end of the sophomore year and the physics requirement by the end of the junior year.

Although free choice of academic majors is permitted, students are encouraged to pursue majors in engineering and the physical sciences so that they may be best prepared to meet the technological requirements of the modern Navy.

Navy-Option College Program
Navy-option College Program students must complete one year of college-level study in mathematics, physical science, and English as a prerequisite for commissioning. The mathematics course must be completed by the end of the junior year; the physical science course by the end of the senior year. In addition, one term of computer science is required. College Program students who desire entry into the Navy-option Scholarship Program should fulfill all of the requirements applicable to Navy-option scholarship students if they wish to be eligible for a scholarship controlled by the Chief of Naval Education and Training.

Marine Option
Any midshipman, in either the Scholarship Program or the College Program, who completes all of Cornell University's degree requirements in any academic major, is eligible for a commission in the U.S. Marine Corps or U.S. Marine Corps Reserve. Marine-option students take the same naval science courses and naval professional laboratories as Navy-option students for the freshman and sophomore years. During the junior and senior years, Marine-option students have slightly different naval science course requirements than their Navy-option counterparts. Two semesters of courses (a minimum of 5 hours each) in the area of American Military Affairs or National Security Policy are
required. One semester of a modern foreign
language must be completed.

Extracurricular Activities
The NROTC midshipman at Cornell is offered a broad range of activities, including sail
training and a comprehensive intramural
sports program. Midshipmen participate in a
roster of social events, including the annual
Navy/Marine Corps Birthday Ball.

DEPARTMENT OF AEROSPACE STUDIES
Colonel James L. Wilson, Jr., United States Air
Force, Professor of Aerospace Studies and
Commander, Air Force ROTC Detachment 520
Captain April L. Murawsky, United States Air
Force
Captain Michael Mowry, United States Air
Force
The objective of the Air Force Officer
Education Program at Cornell is to prepare
men and women for positions as officers in
the United States Air Force. The program is
designed to teach students about the mission
and organization of the Air Force, the
historical development of airpower, leadership,
and management. Students study
national security policy and the role of the
military in a democratic society. This program
includes specific courses in aerospace studies
and practical leadership laboratories.

Requirements for Enrollment
The Air Force Officer Education Program is open
to any qualified undergraduate or
graduate student enrolled in any major field of
study. An applicant must be a United States
citizen to become a commissioned officer.
Noncitizens may enroll and will receive
certificates acknowledging completion of the
course but cannot receive a commission.

All applicants receive physical examinations at
no cost and must meet certain physical
requirements to be accepted. Students who are
interested in qualifying for flying categories (pilot or navigator) must meet more
stringent physical requirements. In addition,
students enrolled in the commissioning
program must meet specified physical fitness
requirements.

Though the program is designed to prepare
future Air Force officers, the Department of
Aerospace Studies’ academic courses are open
to all students at Cornell.

Four-Year Program
The Four-Year Program is open to all qualified
freshmen. Sophomores may also enter a
condensed version of the four-year program
in coordination with the AFROTC staff.
Veterans of the U.S. armed forces and students
entering Cornell from military schools may
receive advanced standing, subject to approval
by the Professor of Aerospace Studies.

The Four-Year Program consists of General
Military Courses (GMC) and Professional
Officer Courses (POC). For scholarship cadets,
the first year of the GMC carries no military
commitment, and students may withdraw at
any time. For nonscholarship cadets, both
years of the GMC carry no military
commitment, and students may withdraw at any time.

General Military Course
Students in General Military Courses (GMC)
take a 1 credit Aerospace Studies course each
semester. During the freshman year, the
student examines the organization and
mission of the United States Air Force and the
environment of the Air Force officer. In the
sophomore year, the student studies the
history and development of American air
power. In both years, officership and
professionalism within the United States Air
Force are emphasized.

Students also spend two hours a week in a
leadership laboratory. Leadership laboratories
provide cadets with an opportunity to put into
practice the skills they have learned in their
aerospace studies classes. These laboratories
focus on the development of officer qualities
through such activities as drill and ceremon­
ies, group leadership problems, confidence-
building exercises, and guest lecturers. In
addition, all students participate in summer
field training for four weeks between their
sophomore and junior years.

Professional Officer Course
The Professional Officer Courses (POC)
provide a two-year advanced program of
instruction. Students who are accepted for the
POC must have successfully completed or
validated the basic course and must meet
academic and physical standards. Each cadet
accepted into the POC must sign an agree­
ment to complete program and accept, if
offered, a commission in the United States Air
Force upon graduation.

Classroom study in the POC is a 3 credit
course each semester. In the junior year,
cadets study Air Force leadership and
management at the junior officer level. During
the senior year, cadets study the elements of
national security and the military’s role in
American society. Leadership laboratory
requires two hours a week in the junior and
senior years. In leadership laboratory, cadets
are exposed to advanced leadership experi­
ces and apply principles of leadership
learned in the classroom.

Two-Year Program
The Two-Year Program consists of the last
two years (Professional Officer Courses) of the
regular Four-Year Program plus a five-week
summer training course preceding enrollment.

The Two-Year Program is open to all qualified
students with two years of academic study
remaining at Cornell (graduate or undergradu­
ate) or at schools supported under a
cross-town agreement. Applications are
accepted from October through April of the
academic year preceding the applicant’s
planned entry year into the program. Selectees are
then required to complete a five-week
summer training program at government
expense.

Scholarships
The Air Force offers three- and four-year
scholarships to high school seniors and one-
two- and three-year scholarships to college
students. Four-year scholarships are offered on
a competitive basis in specified majors to high
school seniors. Scholarship information
available online at the high school guidance
counselor, from Air Force ROTC officers at
Cornell (AFROTC phone number is 607-255-
4004), from a local Air Force recruiter, or from

the Air Force ROTC scholarship section,
Maxwell AFB, AL 36112-6106, 334-953-2093,
extension 2093. The deadline for submitting a
four-year scholarship application is December
1 of the year preceding the academic year in
which a student wants to enter the program.
Students should apply early.

Scholarships for two and three years.
Applications for these scholarships should be
mailed to the Professor of Aerospace Studies
during the freshman, sophomore, or junior
years of college. All selections are based on
the student’s major, scores achieved on the
Air Force Officer Qualifying Test, the student’s
overall grade point average, and the recom-

mendation of the Professor of Aerospace Studies. Scholarships include amounts ranging
from $3,000 per year to full tuition, fees and
books, and provide a $200 monthly nontax-
able allowance during the school year.

Scholarships do not include the cost of room
and board.

Fees
An initial uniform deposit of $50 is required
on entry into AFROTC. Prior to commissioning,
cadets may purchase uniforms with their
deposit or return uniforms and receive their
deposit back.

Benefits
All cadets in the advanced program (POC)—
whether they are on scholarship or not—
receive a $200-a-month, nontaxable subsis-
tence allowance during the academic year.
During the four- or five-week summer field
training (see below), each cadet receives a
pay allowance plus an allowance for travel to
and from the field site. Textbooks and
supplies required for Department of Aero-
space Studies courses are provided.

All cadets are eligible to participate in
AFROTC-sponsored field trips made to Air
Force bases throughout the country as well as
voluntary summer programs for professional
development. Scholarship and advanced
POC are entitled to space-available
travel on Air Force aircraft flying within the
continental United States.

Field Training
There are two types of field training: a four-
week course for cadets in the Four-Year
Program and a five-week course for Two-Year
Program applicants. Students in these
programs normally attend field training
between their sophomore and junior years.

Field training is designed to stimulate the
development of military leadership skills
through meaningful experiences. The
curriculum consists of aircraft, aircrew, and
survival orientation; junior officer training,
physical training, small arms training; a social-
actions program; and supplemental training.
The five-week training program includes sixty
hours of Air Force ROTC academic course
work that substitutes for the freshman and
sophomore Aerospace Studies courses.

Cadets may also volunteer for one of many
Advanced Training Programs. These programs
include but are not limited to the Professional
Development Program, Air Force Academy
Free-Fall Parachute Training, the British Royal
Air Force (RAF) Exchange Program, Research
and Development Experiences, the Academy
Soaring Program, and Army Airborne...
Commissioning Obligations

All students who successfully complete the AFROTC advanced program (POC) are awarded a baccalaureate degree, tendered a commission, and enter the Air Force as second lieutenants.

Second lieutenants commissioned in nonflying categories are required to serve on active duty for four years. Pilots are required to serve on active duty for ten years after completing flying training. Navigators and Air Battle Managers serve six years after completing training.

Air Force Careers

The Air Force assigns new officers to a career field based on mission requirements, educational background, and officers' preferences. Students in the engineering-science category may be assigned to practice in their specialty in research and development, communications, electronics, aeronautics, astronautics, the biological sciences, computer design and maintenance, meteorology, space, or other engineering and scientific fields. Graduates in the nontechnical category can anticipate assignments in manpower management, information management, logistics, legal enforcement and investigation, intelligence, personnel, transportation, accounting and finance, and other career fields.

Any undergraduate major is suitable for those who are qualified and interested in entering the space and missile career fields or in becoming pilots, navigators, or air battle managers. After completion of flying training, personnel are assigned to a specific type of aircraft.

Curriculum

Students in the Four-Year Program are required to take all courses listed below. Students in the Two-Year Program are required to take all of the courses listed for the junior and senior years. There are no prerequisites for any Aerospace Studies courses.

Freshman Year

AIR S 161 The Foundations of the United States Air Force I
Fall. 1 credit.
This is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officerhood and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followship experiences.

AIR S 162 The Foundations of the United States Air Force II
Spring. 1 credit.
Continuation of AIR S 161.

Sophomore Year

AIR S 211 The Evolution of USAF Air and Space Power I
Fall. 1 credit.
This course is designed to examine general aspects of air and space power through a historical perspective. The course covers a time period from the first balloons and dirigibles to the role of air power in Bosnia-Herzegovina. Historical examples are provided to illustrate the development of Air Force capabilities and functions to demonstrate the evolution of what has become today's USAF air and space power. The course examines several fundamental truths associated with war in the third dimension, and provides students with an understanding of the general element and employment of air and space power from an institutional, doctrinal, and historical perspective. In addition, students will continue to discuss the importance of the Air Force core values.

AIR S 212 The Evolution of USAF Air and Space Power II
Spring. 1 credit.
Continuation of AIR S 211.

Junior Year

AIR S 331 Air Force Leadership Studies I
Fall. 3 credits.
This course is a study of the leadership, quality management fundamentals, professional knowledge. Air Force personnel and evaluation systems, ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations; they demonstrate practical applications of the concepts being studied. A mandatory leadership laboratory complements this course, providing advanced leadership experiences in officer-type activities, and giving students the opportunity to apply leadership and management principles of this course.

AIR S 332 Air Force Leadership Studies II
Spring. 3 credits.
Continuation of AIR S 331.

Senior Year

AIR S 401 National Security Affairs/Preparation for Active Duty I
Fall. 3 credits.
This course is concerned with the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Other topics include the military as a profession, officerhood, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. A mandatory leadership laboratory complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles described in this course.

AIR S 402 National Security Affairs/Preparation for Active Duty II
Spring. 3 credits.
Continuation of AIR S 401.

Leadership Laboratory Courses

All Air Force cadets spend two hours a week throughout the academic year in a leadership laboratory, for which no academic credit is given. Occasionally laboratories are held at times other than the normally scheduled period. All cadets are expected to participate in a formal dinner and to meet minimum physical fitness and weight standards each semester. Leadership lab is open to students qualified to compete for an Air Force commission.

AIR S 141-142 Initial Military Experiences
Introduction to the responsibilities, life, and work of an Air Force officer. Basic knowledge of drill and ceremonies, military courtesies, and the wearing of the uniform. This course includes a field trip to a local military installation.

AIR S 241-242 Intermediate Military Experiences
This course is designed to help students develop skill in giving commands for drill and ceremonies. They are also introduced to the Air Force base environment in which the officer functions. Career areas available based on academic majors are described. Students participate in military drills and ceremonies, and go on a field trip to a local military installation.

AIR S 341-342 Junior Officer Leadership Experiences
Cadets assume leadership responsibilities similar to those of a junior officer. Emphasis is on the importance of applying effective human relations skills in dealing with superiors, peers, and subordinates. Cadets also gain insight into the general structure and progression patterns of selected Air Force officer career fields.

AIR S 441 Advanced Leadership Experiences
Cadets assume command leadership responsibilities to operate a military organization. Cadets apply effective leadership and managerial techniques with individuals and groups, and participate in self-analysis of leadership and managerial abilities.

AIR S 442 Precommissioning Laboratory
Factors that facilitate transition from civilian to military life are reviewed. The need for military security, base services and activities, personal finances, travel regulations, and social obligations are introduced.
DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS

ADMINISTRATION
Alan E. Gantert, director

COURSES
The courses and fees described in this catalog are subject to change or cancellation at any time by official action of Cornell University. For current fee information on physical education courses call 255-4286; for outdoor education courses, call 255-6415 (ext. 2).

Enrollment in any course is limited by the space available. Other restrictions are included in the course description. Most courses are coeducational. The specific time and place of class meetings, as well as information about fees, are available at the physical education course registration or may be found on "Bear Access," a package of software for accessing a variety of network services at Cornell. Course fees are billed through the Office of the Bursar.

Additional course offerings may be listed at registration, as the curriculum is frequently reviewed and changed.

Aquatic Courses

LifeGuard Training
Fall and spring. Fee charged. Prerequisite: swimming test consisting of 500 yards, demonstrating 3 strokes, treading water without the use of hands, and retrieving a brick from 7 feet of water. 3 classes a week.

An American Red Cross lifeguarding certification course. Practice and execution of lifeguarding first aid and CPR skills and techniques. Certification is awarded in lifeguarding, first aid, and CPR upon satisfactory completion of the course.

LifeGuard Training Instructor
Spring. Fee charged. Prerequisites: current Red Cross I.C.T. or instructor card, written and skill tests in lifeguarding, first aid, and CPR techniques. Students must not miss first class. 2 classes a week.

American Red Cross lifeguarding instructor and CPR-FPR certifications are awarded upon successful completion.

Scuba, Open-Water
Fall, spring, and summer (6 weeks). Fee charged.

Program includes classroom work, skill training in a pool, and open-water training in Cayuga Lake. P.A.D.I. open water certification awarded upon successful completion.

Scuba, Advanced Open-Water
Fall and spring. Fee charged.

Advanced-level open-water training in Cayuga Lake. For those who have completed the open-water course.

Rescue Diver
Fall and spring. Fee charged. Advanced course for scuba divers. For those who have completed Advanced Open-Water Scuba certification and are interested in learning rescue and safety techniques.

Dive Master
Fall and spring. Fee charged. Advanced-level scuba course open only to those who have completed the Rescue Diver course. NOTE: This is a long, time-consuming course, which requires the student to be in good physical and swimming shape.

Specialty Scuba Diving
Fall and spring. Fee charged. Courses offered in the following specialty diving areas: navigation, search and recovery, night diving, deep diving, underwater photography, wreck, multi-level, boat, tropical fish identification and buoyancy control, and underwater naturalist.

Scuba Diving Trips
Spring. Fee charged. This course is offered during the spring intercession period. Scuba trips to various destinations such as the Bahamas. Locations change from year to year. See the information sheet at the registration table.

Swimming, Introduction to (ARC)
Fall, spring, and summer. (6 weeks). Instruction and practice in skills leading to passing the basic swimming proficiency test.

Swimming, Advanced Beginning (ARC)
Spring. Ideal for all who have taken one term of Beginning Swimming, regardless of whether the test was successfully completed. Areas of special emphasis are the crawl stroke and rotary breathing, back crawl, elementary backstroke, diving, treading water, and underwater swimming. The primary objective is to strengthen the student's confidence and competence.

Swimming, Intermediate (ARC)
Fall and spring. Practice of basic skills and five basic strokes: front crawl, back crawl, elementary backstroke, breaststroke, sidestroke.

Swimming, Advanced (ARC)
Fall and spring. Practice of nine strokes: front crawl, back crawl, elementary backstroke, breaststroke, inverted breaststroke, sidestroke, overarm sidestroke, trudgeon, and butterfly.

Swimming Conditioning
Fall and spring. Prerequisite: reasonable swimming ability. Introduction to, and practice of, different training methods. Final objective: to swim 2,500 yards during class period. Primarily a conditioning course and not an instructional course.

Water Safety Instructor
Spring. Fee charged. Prerequisite: passing of written and skill water tests which are given on the first day. American Red Cross water safety instructor certification is awarded upon satisfactory completion of the course. This is not a course for a casual participant. Approximately 45 hours of work is required.

Bowling Courses
Bowling
Fall and spring. Fee charged. For the beginning and intermediate bowler. Shoe rental is included in the fee.

Dance Courses
Develop flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with rhythmic accuracy, clarity of body design, and fullness of feeling. Auditions are required for admission to all advanced courses, since they require the mental and physical ability to perform more complex phrases in various styles.

Ballet I
Fall and spring.

Ballet II
Fall and spring.

Ballet III
Fall and spring.

Ballet IV
Fall and spring.

Ballroom Dancing
Fall, spring and summer. Fee charged. One class a week, Helen Newman Hall. Students and their partners must sign up at course registration.

Includes instruction in the waltz, swing, cha cha, calypso, tango, and others.

Belly Dancing I
Fall and spring. Fee charged.

Belly dancing is an exciting Middle Eastern folk art that can help in the development of flexibility, body awareness, and overall body tone. The class will begin with warm-ups and continue with basic movements and rhythms, then put them together in a dance to music of the Middle East.

Belly Dancing II
Spring. Fee charged.

Advanced Belly Dance movements and combinations which include putting basic and advanced movements to the Beledi, Masmouli, and Karsilama dance rhythms of the Middle East. A drum solo, taqsim (fluid, graceful movements of the arms and hands), floor work (level changes with the dance), and how to play finger cymbals are also part of this class.

Introduction to Swing Dance
Fall and spring. Fee charged.

No partners are needed. Beginners can expect to develop significant capacity for enjoyment of two forms of swing dance: jitterbug and street boogie. Partners will be rotated throughout the course. Effort will be made at registration to equalize male and female ratios.

Swing Dance I
Fall and spring. Fee charged.

A class for those who have taken the introductory course.

Latin Dance
Fall and spring. Fee charged. Partner sign-in required. This is an introductory course that will teach salsa, mambo, Latin and merengue. Emphasis on listening, feeling, and expressing Latin rhythms with precise detail and technique.

Modern Dance I (also THETR 124)
Fall and spring.

Modern Dance II (also THETR 232)
Fall, spring, and summer (6 weeks).
Modern Dance III (also THETR 306)  
Fall and spring.

Modern Dance IV (also THETR 308)  
Spring.

Equitation Courses

Basic, Intermediate, Advanced  
Fall, spring, and summer (6 weeks). Fee charged.

All riding classes are held at the Cornell Equestrian Center located on Pine Tree Road near East Hill Field. Detailed information will be offered by the equitation staff at the registration sign-up table. Basic—never ridden; Intermediate I—completed basic with knowledge of walk/trot/canter; Intermediate II—walk/trot/canter with control over 2' course. Advanced—strong jumping/dressage skills with experience hunting/showing/attending events. Students must fill out a release form to participate in any riding class.

First Aid/CPR Courses

Emergency Response  
Fall and spring. Fee charged. This advanced-level first aid course is the most comprehensive training for the Professional Rescuer and oxygen administration, as well as many of the first aid skills taught in a basic EMT class. American Red Cross certification is valid throughout the United States and is accepted by many states as a Certified First Responder equivalent. Certification is valid for three years. This certification will be appropriate for camp medical directors and those who work closely with pre-hospital medical staff.

NYS Emergency Medical Technician—Basic  
Two-semester course. Fee charged. This intensive 130-hour course is taught throughout both the fall and spring semesters. Course includes training in CPR for the Professional Rescuer and oxygen administration, as well as many of the first aid skills taught in a basic EMT class. American Red Cross certification is valid throughout the United States and is accepted by many states as a Certified First Responder equivalent. Certification is valid for three years. This certification will be appropriate for camp medical directors and those who work closely with pre-hospital medical staff.

NYS Emergency Medical Technician—Intermediate  
Two-semester course. Fee charged. A class for those who are certified as a Basic Emergency Medical Technician.

Fishing Courses

Fly Fishing and Basic Flytying Techniques, Level I  
Fall and spring. Fee charged. Learn the art of tying several of your own artificial flies while you learn the art of fly casting. Students must have a valid NYS fishing license and their own wader boots. All other materials provided.

Introduction to Freshwater Angling  
Fall. Fee charged. This course acquaints the student with freshwater spinning, casting and fly fishing equipment, tackle, and techniques through on-the-water experiences. It also seeks to promote an awareness of the angling opportunities that are close to Cornell and in the Finger Lakes region of New York. The class consists of an orientation and outings to various locations around the area such as Cayuga Lake and the Susquehanna River.

Fitness Courses

Aerobic Dance  
Fall, spring, and summer (6 weeks). Fee charged. A dance program designed to keep the cardiovascular system in top shape by making the body demand increased amounts of oxygen.

Body Sculpting  
Fall and spring. Fee charged.

Cardio Crazy  
Fall and spring. Fee charged. This course is designed to acquaint the student with the various types of indoor aerobic training equipment, rowing machines, tread mills, stair machines, exercycles, and Nordic Tracks, and to teach them to design a personal fitness program incorporating the equipment.

8 O’Clock Rock  
Fall and spring. Fee charged. This class combines the best of the principles of weight training and the cardiovascular training in the 8 O’Clock Rock Class.

Aerobic Instructor Training  
Fall and spring. Fee charged. The course is designed to train the student to teach aerobics and prepare for the A.F.A.A. Primary Aerobic Instructors Certification Test.

Fitness and Conditioning  
Fall and spring. Physical fitness program that embodies the features of stretching exercises, weight lifting, and jogging. Students work on their individual training needs.

Jogging Tours—Distance Running  
Fall and spring. Fee charged. This course will cover running and stretching techniques. A conditioning program with the objective to develop the capacity to run three miles after 12 weeks of training.

Triathlon  
Fall and spring. Designed to acquaint students with the components of, and conditioning for, triathlon (running, swimming, and bicycling).

Wellness and Fitness  
Fall and spring. Fee charged. "Here’s to a Healthier You!"—a wellness experience for the busy student. This course will assess the student’s physical fitness status, blood cholesterol levels, and overall lifestyle health habits. Each student will receive an individual exercise prescription and have access to the Wellness Program fitness room in Helen Newman Hall. Lectures on nutrition and stress management are also presented. This course has been made possible through the generosity of the Bateman family in memory of Ms. Dorothy Bateman, Cornell’s first director of women’s sports and physical education (1920 to 1962).

Golf Courses

Golf, Introduction to  
Fall and spring. Fee charged. A PGA program of instruction is geared to all levels of experience and ability. The objective is to give beginners enough skill to play, and to give more-advanced players direction in their thinking, practice, and play, through a thorough understanding of fundamentals. Equipment is furnished.

Golf, Recreational  
Fall and spring. Limited to students who are experienced golfers. Fee charged. Students must provide their own clubs. A minimum of ten rounds of nine holes each must be played to receive credit. Fee covers a semester’s membership.

Gymnastics Courses

Gymnastics, Introduction to  
Fall and spring. Introduction to gymnastics deals with a majority of the Olympic events. The course will focus upon beginner-level skills and is open to both male and female participants.

Ice Skating Courses

Skating, Introduction to  
Fall and spring. Fee charged. Students provide their own skates or rent them at Lynah Rink. Course will cover forward and backward skating, turns, and stops.

Figure Skating, Beginning, Intermediate, and Advanced Levels  
Fall and spring. Fee charged. Instruction and practiced in basic figure skating techniques: forward, backward, crossovers, turns, and spirals. Students provide their own skates or rent them at Lynah Rink.

Martial Arts—Self-Defense Courses

Boxing, Introduction to  
Fall and spring. Fee charged. The course covers the basic skills of footwork, defensive, and offensive techniques. Skipping rope, shadow boxing, and heavy bag work will be taught as methods for individual aerobic conditioning.

Boxing, Thai  
Fall and spring. Fee charged. A martial art system developed from the unique culture of Thailand is a blend of art, science, and sport.

Fencing, Introduction to  
Fall and spring. Fee charged. Includes warm-up exercises and offensive and defensive moves. Equipment furnished.

Fencing, Intermediate  
Spring. Fee charged. Prerequisite: Introduction to Fencing or the equivalent. Interclass competition is stressed. Equipment is furnished.

Fencing, Classical  
Fall and spring. Fee charged. Classical fencing is a martial art that uses the practice of the sword to cultivate self-mastery.

Renaissance Fencing  
Fall and spring. Prerequisite: Fencing I or the permission of the instructor. Fee charged. Focuses on the fundamental techniques of 16th-17th century fencing with an emphasis on safety, balance, focus, and distance.

Judo, Introduction to  
Fall and spring. Fee charged. Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

Judo, Intermediate  
Fall and spring. Fee charged. Conditions and increases suppleness. Continue to develop skills in the two parts of
Climbing Courses

Basic Rock-Climbing
Fall, spring, and summer. Fee charged. Seven afternoons climbing inside on the Lindseth climbing wall.

Basic Rock-Climbing, for Women
Fall, spring. Fee charged. Seven afternoons climbing inside on the Lindseth climbing wall taught by and for women.

Basic Rock-Climbing, for 24 and Over
Fall, spring. Fee charged. Four evenings climbing indoors on the Lindseth wall for people age 25 or older.

High Adventure 101
Fall, spring, and summer. Fee charged. Six afternoons at local parks and wilderness areas, some classes on indoor Lindseth climbing wall.

Continuing Rock-Climbing
Fall, spring. Fee charged. Seven afternoons of advanced climbing techniques on the Lindseth climbing wall.

Ice Climbing
Spring. Fee charged. Four outings to local state parks and gorges.

Outdoor Top Roping
Fall, spring. Fee charged. Two outings (nights) on the Lindseth climbing wall and two outings at local climbing areas.

Shawangunks Rock-Climbing
Fall, spring. Fee charged. Four-day climbing camp at the Shawangunks.

Backpacking Courses

Natural History of the Finger Lakes
Fall, spring. Fee charged. Backpacking skills with a strong environmental focus.

Backpacking in the Finger Lakes
Fall, spring. Fee charged. Classes lead to two full weekends on the trail.

Southwest Backpacking
Spring. Fee charged. Spring break trip to the SW deserts and canyons.

Trail Maintenance
Fall, spring. Fee charged. Work with the local trails club to support and maintain trail systems.

Wilderness Skills
Fall, spring. Fee charged. Break trip focusing on wilderness travel and living skills.

Wilderness Survival Skills
Fall, spring. Fee charged. Primitive living skills taught in three classes and a weekend backpack trip.

Biking Courses

Bike and Hike
Fall, spring. Fee charged. Four full days exploring local countryside.

Bike Repair, Beginning
Fall. Repair. Fee charged. Non-credit. Two evenings of hands-on repair work.

Bike Repair, Intermediate
Fall, spring. Fee charged. Non-credit. One evening of hands-on repair work.

Mountain Biking
Fall. Fee charged. Four full days exploring local countryside.

Canoeing Courses

Canoeing, Adirondacks
Fall. Fee charged. Break trip explores the beauty of the Adirondacks via canoe.

Introduction to Padding
Fall, spring. Fee charged. A sampler of beginning canoeing and kayaking.

Canoe/Camping, Flatwater
Fall, spring. Fee charged. Four full days paddling local waterways including an overnight.

Canoeing, Moving Water
Fall, spring. Fee charged. Includes a full weekend of river paddling.
Personal Growth Courses

**Body-Mind**
Fall and spring.
Activities are drawn from ancient Eastern practices as well as modern Western psychology, and are designed to give the student first-hand experience of the interaction between their own bodies and minds.

**Introduction to Meditation**
Fall and spring. Fee charged.
This course provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation. The methods serve to evoke the deep relaxation from which heightened awareness and creativity arise.

**Living Routines**
Fall and spring.
Provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation.

**Relaxation and Stress Management**
Fall and spring.
Introduction to basic relaxation techniques for the reduction of everyday stress. Techniques will be taught that can be used in normal everyday living situations.

**Swedish Massage**
Fall, spring, and summer. Fee charged.
Learn to give a relaxing, stress-reducing Swedish massage. You will master the basic strokes of Swedish massage and learn about their application to the different parts of the body. Students will use oils and lotions as a part of their training.

**Introduction to Massage**
Fall, spring, and summer. Fee charged.
Provides an experiential introduction to several types of massage. Included are Swedish, shiatsu, polarity, and sports massage. Class members will participate in group exercises and practice on each other during class time. All exercises and techniques can be done while wearing street clothing.

**Shiatsu Massage**
Fall and spring. Fee charged.
Gain an experimental understanding of your body and learn certain shiatsu massage techniques.

**Yoga, Introduction to**
Fall, spring, and summer (6 weeks). Fee charged.
Fundamentals of hatha-yoga. Covers basic postures, breathing techniques, and deep relaxation. Introduces chanting.

**Racquet Sports Courses**

**Badminton, Introduction to**
Fall and spring. Helen Newman Hall.
Fundamental shots, scoring, and general play.

**Badminton, Intermediate**
Fall and spring. Helen Newman Hall.
Review of fundamental shots, scoring, and general play.

**Racquetball, Introduction to**
Fall, spring, and summer. Fee charged.
Instruction for beginners. Equipment is furnished. Protective eyewear required.

**Squash, Introduction to**
Fall, spring, and summer. Fee charged.
Classes for appropriate level of play. Equipment is furnished. Protective eye wear required.

**Tennis, Introduction to**
Fall, spring, and summer. Fee charged.
Basic skills taught include forehand, backhand, serve, and volley. Scoring methods taught.

**Tennis, Intermediate**
Fall, spring, and summer. Fee charged.
Review of basic strokes plus topspin and underspin. Doubles strategy emphasized.

**Tennis, Advanced**
Fall, spring. Fee charged.
Advanced strokes and doubles play emphasized. Recommended for tournament players or those with previous team experience.

**Tennis, Indoor-Recreational**
Fall and spring. Fee charged.
Play is conducted at the new Reis Tennis Center. Players must have high school or college tournament experience or a rating of 3.5 or higher from the USTA. Matches are played in both doubles and singles. Equipment furnished. NO BLACK-SOLE SHOES ALLOWED ON COURTS!

**Sailing Courses**

**Small-Boat Sailing, Introduction to**
Fall, spring, and summer (6 weeks). Fee charged.
Learn basic skills necessary to sail small sailboats and basic keelboats safely.

**Small-Boat Sailing, Competitive**
Fall and spring. Fee charged.
Vanguard 420 sailboat used for the course. USYRA Rules Book used as a text for the course. Fee includes one-year membership in university sailing team program.

**Water Skiing**
Fall only. Fee charged.
Introductory course for beginning water skiers. Classes will be conducted from East Shore Marina.

**Skiing and Snow Boarding**

**Downhill Skiing and Snowboarding**
Spring. Fee charged.
Transportation, instruction, ski-lift fees, and skiing time are offered in a package deal. Greek Peak and Song Mountain personnel are present at registration to explain the program and accept fees. Bus transportation to Greek Peak is provided six afternoons a week for six weeks.

**Cross-Country Skiing**—See Outdoor Program.

**Target Shooting Courses**

**Archery, Introduction to**
Fall and spring. Fee charged. Two classes a week.
Instruction in the care of equipment; seven basic steps for shooting; scoring; practice shooting at 20, 30, and 40 yards.

**Pistol, Introduction to**
Fall, spring, and summer (6 weeks). Fee charged.
Instruction in use of pistol in the three modes of 50-foot competitive target shooting—slow fire, timed fire, and rapid fire. Emphasis on safety and responsibility while firing.

**Riflery**
Fall and spring. Fee charged.
Instruction and practice in the techniques of target riflery from various shooting positions.

**Trap and Skeet**
Fall, spring, and summer (6 weeks). Fee charged.
Includes lectures and shooting at the Tompkins County Rod and Gun Club range. Guns and shells are furnished.

**Team Sports Courses**

**Basketball**
Fall and spring. Fee charged. Prerequisite: beginning hockey or previous participation in organized hockey.

**Ice Hockey, Intermediate**
Fall and spring. Fee charged. Prerequisite: beginning hockey or previous participation in organized hockey. This course is designed for the intermediate hockey player. Advanced techniques taught include positioning, power play, penalty killing, and offensive and defensive attack. Each session emphasizes game situations and scrimmaging. Skates and hockey sticks must be supplied by the participants.

**Soccer**
Spring.
Introduction to the game. Includes basic individual skills (passing, trapping, shooting) and team play and strategy.

**Volleyball, Introduction to**
Fall and spring. Fee charged.
Fundamentals of ball handling, serves, defensive blocks, and position play are stressed. Classes will scrimmage.

**Volleyball, Intermediate**
Fall and spring.
Passing and blocking strategy; scrimmages in class.

**Volleyball, Advanced**
Fall and spring.
Offensive and defensive team strategy is emphasized in class scrimmages.

**Weight Training Courses**

**Trotter Circuit Training**
Fall and spring. Fee charged.
Students will gain a working knowledge of the basic principles of Trotter selectorized weight lifting equipment. Emphasis on principles of weight training, circuit training, intensity training, and program design.

**Principles of Weight Training**
Fall and spring. Fee charged.
Introduces the proper use of olympic weights for improving physical condition and muscular strength. Instruction with focus on the relation between high-rep light weight lifting, low-rep heavy lifting, and the development of bulk, strength, and endurance.

**Independent Study**

**Independent Study**
Fall and spring.
Independent study is designed for those who have difficulty fitting any of the regularly scheduled courses into their academic program. Class activities will be based on personal fitness programs. A term paper is required. Permission to enter this program must be granted by the program director.
Summer Sessions provides a wide variety of educational opportunities beyond the degree-granting programs of the university. These programs serve virtually all age groups in a great variety of formats and time frames. For information about the following programs, write B20 Day Hall, Ithaca, New York 14853-2801; call 255-4987; e-mail cuscce@cornell.edu; or fax 255-9697; unless indicated otherwise below. You may also visit us on the web at www.continuingeducation.cornell.edu.

SCHOOL ADMINISTRATION
Glenn C. Altschuler, dean
Stuart M. Blumin, director, Cornell-in-Washington Program
Dane Cruz, interim director, Cornell Interactive Theatre Ensemble
Abby H. Eller, director, Cornell University Summer College
Carol L. Hall, assistant director, finance and administration
Christine Holmes, special programs manager
Ralph Janis, director, Cornell's Adult University
Charles W. Jermy, Jr., associate dean, and director, Cornell University Summer Session
Ann L. Morse, media manager
Cathy M. Pace, registrar
Diane E. Sheridan, director, finance and administration

SPECIAL AND PROFESSIONAL PROGRAMS
Intensive learning experiences are presented year-round both for students and for professionals in many fields. Formats include for-credit courses of one to eight weeks and noncredit weekend and weeklong short courses. Programs can also be designed to respond to the needs and interests of corporations, professional societies, and other groups. These programs take place on the Cornell campus, on site, at other locations worldwide, and via distance learning. For information call 255-7259; e-mail cuscce@cornell.edu; fax 255-9697; or visit www.continuingeducation.cornell.edu/SP/.

SUMMER COLLEGE PROGRAMS FOR HIGH SCHOOL STUDENTS
Talented high school sophomores, juniors, and seniors attend regular university courses through Cornell University Summer College and may earn college credit. They also explore academic and career options in noncredit seminars. Students live in residence halls, become familiar with campus life, and attend seminars describing the college admissions process. The program is designed to help ease the transition from high school to college. For information call 255-6203; e-mail summer_college@cornell.edu; fax 255-6665; or visit www.summercollege.cornell.edu.

CORNELL'S ADULT UNIVERSITY
Cornell's Adult University (CAU) offers week-long noncredit courses on campus for adults and families during the summer. During the fall, winter, and spring, there are weekend seminars, week-long domestic programs, and international study tours. Developed and led by distinguished members of the Cornell faculty, all programs are inspired by the belief that learning never ends and that one of the roles of a great university is to provide a bridge between traditional formal education and informal, noncredit study. For information, write Cornell's Adult University, 626B Thurston Avenue, Ithaca, New York 14850-2490; call 255-6206; e-mail caunfo@cornell.edu; fax 255-4482; or visit www.cau.cornell.edu.

DISTANCE LEARNING
The School of Continuing Education and Summer Sessions offers a range of courses through distance learning. Instructional materials for these courses may be presented on the web, and/or through video tapes, assigned readings, e-mail sessions with course instructors, and CD-ROMs. Students interact with the instructor and other students by phone or e-mail. Courses may be taken from home or elsewhere. Assignments and examinations are completed within a scheduled session, just as in on-campus courses, but students have the option of beginning study prior to the start of the session. For information, visit www.continuingeducation.cornell.edu/DL/.

EXTRAMURAL STUDY
Cornell undergraduate or graduate students whose studies have been interrupted may find it appropriate to resume their studies by taking classes on a part-time basis. Area residents may take courses on a part-time basis by registering as extramural students. Those interested may enroll in almost any course offered in the fall and spring terms if they receive the instructor's written approval. Another offering, the Visitor's Program, allows adults to attend classes in many divisions of the university on a space-available basis at a reduced charge. In this program, no credit is given, and no record is kept of attendance or performance. Visitors are required to obtain written permission from the instructor. For information, write to Extramural Study, B20 Day Hall, Ithaca, NY 14853-2801; call 255-4987; e-mail cuscce@cornell.edu; fax 255-9697; or visit www.continuingeducation.edu/EXMU/.

WINTER SESSION
Cornell undergraduate and graduate students, as well as employees and area residents, can earn up to four credits between the fall and spring semesters by enrolling in the winter session. This quiet time on campus allows students to enjoy generally smaller classes and to concentrate on intensive study. Winter-sessions may enroll in scheduled courses or design individualized study with a faculty member. For information, write to Winter Session, B20 Day Hall, Ithaca, NY 14853-2801; call 255-4987; e-mail cuscce@cornell.edu; fax 255-9697; or visit www.wintersession.cornell.edu.

generally small, and feature personalized interaction with Cornell faculty members. These courses also provide students with the opportunity to accelerate their degree program, take courses not available during the fall and spring semesters, and delve into areas of special interest. For information call 255-4987; e-mail cusce@cornell.edu; or visit our web site at www.summer.cornell.edu.

The Cornell University Summer Session offers a wide variety of courses. The list that follows includes those courses that are usually offered every summer. The list is not exhaustive; many new courses or courses offered only occasionally are not listed. For complete information, contact the Summer Session Office. Courses are posted to the web (www.summer.cornell.edu) in the fall as the roster is developed. A preliminary course roster is available beginning in late November. If a course is also offered through distance learning, the course title will be followed by DL.

THE COLLEGE
The College of Veterinary Medicine offers a professional program that requires four years of full-time academic and clinical study of the normal and abnormal structure and function of the animal body and the diagnosis, treatment, and prevention of animal disease. Graduates of the college receive the Doctor of Veterinary Medicine (D.V.M.) degree, which is recognized by licensing boards throughout the world. Graduates generally enter private practice, academia, or become engaged in one of the increasing number of other biomedical activities. Admission requires a minimum of three years of college work, including specific prerequisite courses and experience. Applications must be filed approximately one year before the proposed matriculation date. The competition for admission is keen, since there are many more qualified applicants than can be admitted.

This course is designed to enable students to understand the principles of veterinary anatomy at the gross, microscopic, and ultrastructural levels. Developmental anatomy is emphasized to the extent that it reflects determination of adult form and species differences. Radiologic and related imaging techniques are used throughout the course to assist in the understanding of normal structural anatomy. Understanding of the anatomic basis of common surgical procedures is achieved during the various dissection procedures.

The course is based on tutorials with significant emphasis on practical laboratories. Lectures and modules complement student learning.

**VTMED 517 Animals, Veterinarians, and Society: Part A (Foundation Course VIIa)**
Fall: 1 credit. Limited to first-year veterinary students. Letter grades only. A fee of approximately $10 is charged for the course guide: J. W. Ludders.
This course is the correlate for VTMED 510 The Animal Body. This is a laboratory-based course that teaches physical examination of four species (dog, cat, cow, and horse). The class is divided into small groups and each group meets for two hours each week during the first 11 weeks. The skills of auscultation, percussion, palpation, and observation are taught along with clinically related diagnostic procedures.

**VTMED 520 Genetics and Development (Foundation Course II)**
Fall and spring: 8 credits. Limited to first-year veterinary students. Prerequisite: VTMED 510 The Animal Body. Letter grades only. R. A. Levine and staff.
An appreciation of how gene expression and cell behavior contribute to normal animal development and health is crucial for our understanding of the pathogenesis of disease. Students gain an understanding of the cellular and molecular mechanisms that regulate development and maintain normal structure and function throughout the life of an animal. Emphasis is placed on defining and characterizing normal cellular behaviors and on understanding how mutations in specific genes promote disease. Students become familiar with the common molecular procedures being used to develop new diagnostic and therapeutic tools to maintain health and combat disease. Tutorial sessions are complemented by lectures, laboratories, and class discussions.

**VTMED 521 Neuroanatomy and Clinical Neurology**
Spring: 3 credits. Limited to first-year veterinary students. Letter grades only. A. deLahunta.
Fundamentals of functional neuroanatomy and diseases of the nervous system are taught so that each student is competent in the diagnosis of clinical neurologic disorders of domestic animals. This is a vertically integrated course that includes dissection of the central nervous system of the dog, the anatomic basis for the diagnosis of diseases of
the nervous system, and the differential diagnosis of those diseases. Clinical cases with pertinent lesions are demonstrated with each system. Films and videotapes of clinical cases are used to demonstrate the clinical signs produced by the various diseases. Slides of gross and microscopic lesions are used to emphasize the clinical and neuroanatomic relationships and to stress characteristic features of representative conditions.

VTMED 527 Animals, Veterinarians, and Society: Part B (Foundation Course V)
This course begins in the last part of fall semester and finishes at the end of winter session. 1 credit. Limited to first-year veterinary students. Prerequisite: VTMED 517 Animals, Veterinarians, and Society: Part A. Letter grades only. A fee of approximately $7 is charged for the course guide. J. W. Ludders.

This course is the correlate for VTMED 520 Genetics and Development. It enters into a study of ethical issues related to animal use, animal welfare, animal genetics, clinical application of genetics, genetics counseling, and clinical day-to-day ethics. The course meets for one 2-hour session each week.

VTMED 530 Function and Dysfunction: Part I (Foundation Course IIIa)
Spring. 9 credits. Limited to first-year veterinary students. Prerequisite: VTMED 520 Genetics and Development. Letter grades only. R. Rawson and staff.

This course is designed to develop students’ understanding of how an animal maintains itself as a functional organism; how this is achieved through the integration of different functional organ systems; how tissue structure relates to tissue function; how injury alters structure and leads to dysfunction, manifested as clinical signs; how organ function can be assessed; and how it can be modulated pharmacologically. The course incorporates aspects of physiology, biochemistry, cell biology, histology, pathology and histopathology, clinical pharmacology, and pathology.

VTMED 531 Function and Dysfunction: Part II (Foundation Course IIIb)
Fall. 7 credits. Limited to second-year veterinary students. Prerequisite: VTMED 530 Function and Dysfunction: Part I. Letter grades only. R. Rawson and staff.

Continued for course guide. J. W. Ludders.

VTMED 537 Animals, Veterinarians, and Society: Part C1 (Foundation Course Vlca)
Spring. 1.5 credits. Limited to first-year veterinary students. Prerequisite: VTMED 527 Animals, Veterinarians, and Society: Part B. Letter grades only. A fee of approximately $9 is charged for the course guide. J. W. Ludders.

This course is the correlate for VTMED 530 Function and Dysfunction: Part I. The central goal of this course is to provide students with the interpersonal skills and techniques necessary to communicate effectively with clients. In addition, students are provided an opportunity to study the human-animal bond, animal death, and grief counseling. This course also provides opportunities to practice client interviewing skills and to participate in a home or farm visit.

VTMED 538 Animals, Veterinarians, and Society: Part C2 (Foundation Course Vlcl, continued)
Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VTMED 537 Animals, Veterinarians, and Society: Part C1. Letter grades only. A fee of approximately $6 is charged for the course guide. J. W. Ludders.

This course is the correlate for VTMED 531 Function and Dysfunction: Part II. This course provides for understanding the importance of the medical record, the diversity of clients, employees, and society in general, and a session on alternative medicine and its various practices. How to critically read and evaluate clinical studies and journal articles is also addressed.

VTMED 540 Host, Agent, and Defense (Foundation Course IV)
Fall. 12 credits. Limited to second-year veterinary students. Prerequisite: VTMED 531 Function and Dysfunction: Part II. Letter grades only. J. Baines (course leader) and others.

This course is divided into six sections: the host response, intracellular environment, extracellular environment, organismic environment, extracorporeal environment, and surrounding environment. Using this approach, students develop an understanding of the host response to insult, a familiarity with groups of important pathogens; an understanding of how pathogens manipulate the host and how the host defends itself against attacks, and an understanding of the roles played by the external environment and human intervention in the epidemiology of infectious organisms.

VTMED 547 Animals, Veterinarians, and Society: Part D (Foundation Course Vlbd)
Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VTMED 538 Animals, Veterinarians, and Society: Part C2. Letter grades only. A fee of approximately $12 is charged for the course guide. J. W. Ludders.

This course is the correlate for VTMED 540 Host, Agent, and Defense. The course emphasizes maintaining health in both individuals and society. Topics include animal bites, nosocomial infections, rabies control and prevention, animal welfare, animal rights and ethics, and the role of USDA and specifically APHIS in controlling the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions.

VTMED 550 Animal Health and Disease: Part I (Foundation Course V)
Fall. 20 credits. Limited to second-year veterinary students. Prerequisite: VTMED 547 Animals, Veterinarians, and Society: Part D. Letter grades only. R. Hackett and staff.

This course is a correlate with Foundation Course V, Animal Health and Disease. The course examines the regulation of the veterinary profession, including proper drug usage, extra label drug use (FDA), controlled substances (DEA), substance abuse, professional liability and malpractice insurance, professional and unprofessional conduct, hazardous materials in the workplace (OSHA), and environmental issues (EPA). Also included are sessions relating to controlling and preventing the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions.

VTMED 551 Animal Health and Disease: Part II (Foundation Course V, continued)
Spring. 1 credit. Limited to second-year veterinary students rolling over into fall semester for the then third-year veterinary students. Prerequisite: VTMED 547 Animals, Veterinarians, and Society: Part D. Letter grade only. A fee of approximately $14 is charged for the course guide.

This course is a correlate with Foundation Course V, Animal Health and Disease. The course examines the regulation of the veterinary profession, including proper drug usage, extra label drug use (FDA), controlled substances (DEA), substance abuse, professional liability and malpractice insurance, professional and unprofessional conduct, hazardous materials in the workplace (OSHA), and environmental issues (EPA). Also included are sessions relating to controlling and preventing the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions.

VTMED 556 Ambulatory and Production Medicine I
Fall, winter, spring and summer. Credit variable (either one or two credits). Limited to veterinary students. Letter grades only. M. E. White and staff.

A total of 4 weeks of Ambulatory and Production Medicine are required. VTMED 556 is taken during the clinical rotations in the 3rd or 4th year. VTMED 560 is also generally taken during the third or fourth year, however first and second year students are encouraged to take one or two weeks of this course over winter recess or during the summer if slots are available. A lottery is done to assign first or second year students to the available slots. See VTMED 556 for course description.

VTMED 557 Community Practice Service—Medicine
2 credits. Required component of Clinical Rotations (Foundation Course V). Letter grades only. W. E. Hornbuckle and staff.

The Community Practice—Medicine Service is structured to provide supervised clinical experience in the practice of small companion animal medicine. The course is conducted in the Small Animal Clinic of the Cornell University Hospital for Animals. Students interact directly with clients presenting their pet for primary medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.
VTMED 562 Surgery III
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. H. J. Harvey and staff. Basic principles of anesthesiology and surgery are emphasized in the clinical rotation. Under direct staff supervision, students anesthetize and perform surgical procedures on patients presented to the Small Animal Clinic for neutering and minor elective procedures. Students are responsible for all aspects of patient care during their hospital stay and are expected to fully participate in client communications. Ordinarily, this course will precede Anesthesiology Service and Small Animal Surgery Service (soft tissue component).

VTMED 563 Small Animal Medicine
Fall, spring, winter, and summer. 4 credits. Required course open to second-semester third-year and all fourth-year veterinary students; not open to others. Letter grades only. S. C. Barr, S. A. Center, J. F. Randolf, and W. Simpson. The Small Animal Medicine Service is structured to provide supervised clinical experience in the practice of companion small animal medicine. The course is conducted in the Small Animal Clinic of the Cornell University Hospital for Animals. Students interact directly with clients presenting their pets for primary or referral medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients.

VTMED 564 Small Animal Surgery Service
Fall, winter, spring, and summer. 4 credits. Required of all third- and fourth-year veterinary students; not open to others. Letter grades only. H. J. Harvey and small animal surgery faculty. A clinical service rotation, this course exposes the student to the practice of surgery under hospital conditions. Students participate in the diagnostic testing of the patient, anesthesia, and daily care of dogs, cats, and exotic species under the direction of a faculty veterinarian. Students assist experienced surgeons in the operating room and with house-officer supervision, are responsible for patients undergoing elective ovariohysterectomy or castration. Client communications and the basics of efficient practice are emphasized.

VTMED 565 Ambulatory and Production Medicine II
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. M. E. White and staff. A clinical service rotation in which students accompany ambulatory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures such as castration and dehorning. All appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

VTMED 566 Large Animal Medicine Service
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. D. Ainsworth, T. Divers, and staff. Students assigned to this service assist the faculty and house staff of the Large Animal Medicine service in the diagnosis and care of patients. The goal of this course is for students working on this service to acquire knowledge and skills in history taking, physical examination, elicitation and completion of appropriate ancillary tests, diagnosis, treatment, and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

VTMED 567 Large Animal Surgery Service
Fall, winter, spring, and summer. 4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. A. J. Nixon and staff. This clinical rotation is structured to provide supervised clinical experience in the practice of large animal surgery. Under the direction of faculty and house staff, students participate in the diagnosis, surgical treatment, and care of patients presented to the Large Animal Clinic. Training through patient care is supplemented by formal rounds and didactic instruction.

VTMED 568 Anesthesiology Service
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. D. Gleed, J. W. Ladders, P. F. Moon, and staff. This course is designed to provide clinical experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in selecting suitable anesthetic techniques for patients in the Cornell University Hospital for Animals and then implement those techniques under the supervision of faculty and residents. The goal is for students to develop the skills and thought processes necessary to perform safe anesthesia in a modern veterinary practice.

VTMED 569 Dermatology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. H. Miller and D. W. Scott. During this clinical rotation, students participate in the diagnosis and management of skin disorders in small and large animals. Patients are examined by appointment and through consultation with other hospital services.

VTMED 570 Ophthalmology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. C. Ris, T. Kern, and N. Irby. This course combines clinical experience with beginning skills in diagnostic ophthalmology. Students learn how to apply the ophthalmic diagnostic tests. A competent ocula examination is the goal of this rotation. Confidence in using direct and indirect ophthalmoscopes, slit lamps, tonometers, gonioscopes, conjunctival cytology, and surgery comes with the practice provided by this rotation. Students are required to review the introductory orientation videotapes in the Autotutorial Center titled "Ocular Examination I and II" before the start of the rotation. This rotation provides surgical experience and consultations. A high percentage of the consultations are referral cases that usually challenge the service. Adequate routine case material is presented to prepare most students for practice.

VTMED 571 Pathology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. B. A. Summers and staff. This course involves the hands-on diagnostic necropsies of most mammalian species that are presented to the pathology necropsy room and of avian species that are admitted to the avian and aquatic animal medicine necropsy room. Students work in groups of three to five for the two-week rotation. Necropsies are performed under the guidance of pathology faculty and residents. Students prepare written reports of necropsies performed, review microscopic hematology and cytology slides, perform urinalyses, and discuss case studies.

VTMED 572 Radiology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. N. L. Dykes and staff. A two-week clinical experience in the Imaging Section of the Cornell University Hospital for Animals. Students use radiographic, CT, ultrasonographic, and nuclear medicine imaging techniques to evaluate animal patients under treatment in the Hospital. Students obtain and interpret radiographic and ultrasonographic studies with guidance from radiology faculty and technical staff. Two 3-hour laboratory sessions are given to allow hands-on experience in patient positioning and radiographic technique. An autotutorial teaching film file is used to familiarize students with radiographic examples of common diseases of large and small animal species. Small-group discussion is scheduled to present and discuss current cases. The use of x-ray-producing equipment and radiosopes is discussed.

VTMED 573 Fourth-Year Seminar
Fall and spring. 1 credit. Required of all fourth-year veterinary students. First-, second-, and third-year students and all staff members are also invited and encouraged to attend. S-U grades only. F. H. Fox, chair of the Senior Seminar Committee. The aim of this course is to give the student the responsibility and opportunity of selecting and studying disease entity on the basis of a case or series of cases, or to conduct a short-term, clinically oriented research project under the direction of a faculty member. In either case, an oral report is presented at a weekly seminar. Written reports are submitted at the time of the seminar. All participants are encouraged to foster an atmosphere in which discussion, exchange of ideas, and the airing of controversial opinions might flourish.
DISTRIBUTION COURSES

Distribution courses comprise 30 percent of the curriculum and are usually scheduled during the first half of each spring semester. During the first two years, many of the distribution courses are oriented to the basic sciences. During years three and four, students have additional distribution course offerings from which to choose. Some emphasize clinical specialties, whereas others integrate basic science disciplines with clinical medicine and are co-taught by faculty representing both areas. Students from different classes have the opportunity to take many of these courses together.

Grades: Grading options for distribution courses are either letter or S-U.

VTMED 601 Anatomy of the Carnivore
Spring. 3 credits. Prerequisite: VTMED 510
The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only.
A. J. Bezuidenhout.

Carnivore anatomy is studied by detailed systematic and regional dissection of the cat, with comparison to the dog. Student dissection is supplemented with projections, radiographs, and exercises focusing on surgical approaches. There are opportunities to dissect other carnivores, such as the ferret and the fox, depending on availability of specimens. The lectures augment the laboratory dissection and introduce the student to functional morphological comparative features in the Order Carnivora. Students do an independent research project on the carnivore species of their choice and give an oral presentation on this to the class.

VTMED 602 Anatomy of the Horse
Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only.
K. Haussler.

This course is organized as a traditional anatomy course that relies primarily on students learning the anatomy of horses through hands-on dissection laboratories augmented by lectures and highlighted by clinical correlations. An understanding of anatomy that provides the foundation for surgery and is directly relevant to clinical practice is emphasized in the regional approach to dissection. Most lectures emphasize structural-functional correlations that are unique or important in the horse. Microscopic anatomy is integrated into the course in selected areas to lay a foundation for the later study of pathology or when it reinforces concepts of structure and function that are difficult to understand by study of the gross anatomy alone (i.e., hoof). Student dissection is supplemented by skeletal materials, radiographs, models, preserved dissected specimens, and fresh specimens when they are available.

VTMED 603 Anatomy of the Ruminant
Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only.
J. Hermanson.

The regional anatomy of several ruminant species is covered using dissection laboratories, lectures, and group discussions. Functional consequences of structural modifications and anatomical features relevant to clinical practice are emphasized. Microscopic anatomy is correlated with gross anatomy when appropriate to relate structure to function and to provide a foundation for later study in pathology. Student dissection material is supplemented by skeletal materials, radiographs, models, pre-dissected specimens, and postmortem specimens. Students are required to complete an independent study project on a relevant subject of their choice. Assessment includes written and practical examinations.

VTMED 605 Comparative Anatomy: Pattern and Function
Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body. First-, second-, third-, or fourth-year veterinary students; others by permission. Letter grades only. L. A. Mizer.

The goal of this course is to study anatomical variability among amniote (mammals, birds, and reptiles) and anamniote (amphibian and fish) species. This is accomplished by relating the anatomy of major organ systems in each species to a common basic pattern and considering the differences in a functional perspective. Five major systems are explored ( integumentary, cardiorespiratory, digestive, and urogenital) in a variety of species as available.

VTMED 606 Advanced Clinical Neurology
Spring. 1 credit. Prerequisite: VTMED 521 Neuroanatomy and Clinical Neurology. Third- and fourth-year veterinary students. Letter grades only. A. de la haute.

The objective of this course is to further the experience and confidence of the student in the diagnosis and understanding of clinical neurological disorders. It continues their correlation of anatomy, physiology, and pathology in the diagnosis of diseases of the nervous system and the understanding of their pathogenesis. Neurological disorders that are not covered in the foundation course are considered here. The course is entirely based on case examples that are presented on videotapes and slides.

VTMED 607 The Literature and Subject Matter of Natural History
Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students; others by permission. S-U grades optional. H. E. Evans.

This course is an introduction to classic and current natural history literature. Materials relating to the earth sciences and the biology of plants and animals from around the world are shown and discussed. Students are required to show and discuss a book that concerns natural history in a country of their choice, and submit a one-page book report for duplication. A recommended reference text for this course is The Cambridge Illustrated Dictionary of Natural History by R. J. Lincoln and G. A. Bozshall, 1990.

VTMED 609 Anatomy and Histology of Fish
Spring. 2 credits. Minimum enrollment 4; maximum enrollment 6. First-, second-, third-, and fourth-year veterinary students; others by written permission of instructor. S-U grades optional. P. R. Bowser.

This course provides an overview of the diversity of anatomy and histology of fish. Students participate in lecture, discussion, and laboratory exercises to review the major organ systems. Extensive use of library resources for assigned readings is expected. Each student prepares a term project and makes one oral presentation.

VTMED 610 Veterinary Aspects of Avian Biology
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 15. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only.
G. V. Kollis.

An introduction to avian biology for veterinary students. The course includes lectures and laboratories involving avian evolution, anatomy, physiology, and ecology. Emphasis is on the development of a strong foundation in avian biology that will be applied in VTMED 616 Diseases of Birds and VTMED 652 Avian Medicine and Surgery.

[VTMED 611 Fish Health Management
Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third-, and fourth-year veterinary students; others by written permission of instructor. S-U grades optional. Offered odd-numbered years; next offered spring 2003.
P. R. Bowser.

This course presents a summary of important diseases of fin fishes. Diseases covered are those of importance in commercial aquaculture as well as those encountered by the tropical fish hobbyist. This course is designed to provide the students with a knowledge base and hands-on diagnostic experience in diseases of fish. Each student prepares a term project and makes one oral presentation.]

VTMED 612 Management of Aquarium Systems
Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third-, and fourth-year veterinary students; others by written permission of instructor. S-U grades optional. Offered even-numbered years. P. R. Bowser.

This is a lecture and laboratory course dealing with procedures and practices involved in management of aquarium systems. Topics include water quality, types of aquarium filtration systems, fish health, fish nutrition, and general fish biology. A portion of the course requires involvement in an aquarium system management. Each student prepares a term project and makes one oral presentation.

VTMED 613 Aquavet I: Introduction to Aquatic Veterinary Medicine
Four weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 4 credits. Maximum enrollment 24 students from Cornell University, the University of Pennsylvania, and other U.S. colleges and schools of veterinary medicine. Available, by a competitive application process, to veterinary and graduate students. S-U grades only. Course fee required.
P. R. Bowser.

The course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutions at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is designed to introduce veterinary students to aquatic animal medicine. The marine environment is described and visited on field trips in the Woods Hole area. Specific aspects of the comparative anatomy,
physiology, nutrition, microbiology, pathology, and medicine of a variety of marine and freshwater species are discussed. Some emphasis is placed on systems of aquaculture. The specific diseases of a few selected species are presented, including diseases of a crustacean, a shellfish, a finfish, and marine mammals. The course is taught by an invited faculty of 35 individuals who are leaders in their respective fields of aquatic animal medicine. Students present seminars on appropriate topics.

VTMED 614 Aquavet II: Comparative Pathology of Aquatic Animals

This course is taught by an invited faculty of 12 individuals who are leaders in their respective fields of aquatic animal medicine. The course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutes at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is an advanced course in the comparative pathology of aquatic invertebrates and vertebrates commonly used as laboratory animals. The material presented consists of discussions of the diseases of aquatic animals as well as extensive use of the microscope to examine the histopathology associated with these diseases. The course is taught by an invited faculty of 12 individuals who are leaders in their respective fields of aquatic animal medicine.

VTMED 615 Veterinary Medicine in Developing Nations

Spring. 2 credits. Maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. S-U grades only. Offered odd-numbered years; next offered spring 2003. J. A. Schat.

Veterinary medicine has an important role to play in developing nations in developing and providing economical sources of animal proteins for human consumption and protecting ecological resources. This seminar course provides interested veterinary students with information on and insight into the multitude of complex issues facing U.S. veterinarians working in developing nations.

VTMED 616 Diseases of Birds

Spring. 2 credits. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. Naqi and G. V. Kollias.

This course is designed to introduce second-, third-, and fourth-year veterinary students to a basic and practical knowledge of the most common infectious and noninfectious diseases affecting avian species. The course emphasizes the latest diagnostic and control approaches. The course format is a combination of didactic lectures and discussions.

VTMED 618 Adaptation of Animals to the Environment

This course examines the physiological adaptations of animals to their environment in addition to methods of acclimatization to novel environments. The course focuses on environmental parameters that exist in harsh environments and include heat, cold, altitude, and xeric conditions. Thus the physiologic, endocrine, and behavioral mechanisms of thermoregulation in mammals, birds, and ectotherms is examined together with their responses to low food and water availability. The knowledge obtained aids in understanding the consequences of translocation of both wild and domestic animals and provide a rational basis for animal housing and the provision of appropriate habitats for zoological gardens. The degree of environmental adaptation is also examined in terms of animal production from a basic science standpoint.

VTMED 619 Pathogenesis of Viral Disease

Course content and objectives: the course focuses on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spreading between cells, disease mechanism, and the roles of the immune response in enhancing and suppressing disease are explored. This includes a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory, and urogenital systems. The basic principles of virus taxonomy, structure and replication are included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) are also covered. Lectures from relevant current literature, the text, Nathanson's *Viral Pathogenesis*. 1997, and Field's *Virology*, third edition, 1996. Relevant materials are placed on reserve in the veterinary library.

VTMED 620 Molecular Biology and Immunology of Host-Parasite Interactions (also VETMI 702)

Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students, others by permission of the instructor. Letter grades only. Offered even-numbered years. E. J. Pearce.

The primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and reviews are used as the basis from which to explore the issues of host invasion and evasion of host defense mechanisms by parasites, vaccination against parasitic infections, chemotherapy, drug resistance, vector biology, and molecular diagnosis.

VTMED 622 Foreign Infectious Diseases of Animals

This course describes the etiology, pathogenesis, clinical symptoms, differential diagnosis, methods of spread, reservoir hosts, and control of foreign animal diseases that present serious economic threats to the United States. The format is student seminar presentations with each student responsible for presenting one seminar. The recent spread of FMD, West Nile and BSE emphasize the importance placed on understanding the relationships between the host, the agent, and the environment as they relate to disease causation. The course explores contemporary epidemiologic methods applicable to old diseases that remain or potential...
problems, newly emerging infectious diseases, and nosocomial infections.Selected diseases are discussed to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and groups of animals. Students have the opportunity to apply the methods learned to actual disease problems and write an epidemiologic report that might lead to a publication in a peer-reviewed scientific journal.

[VTEMED 627 Diseases of Antiquity]
Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2002. Staff. This is a study of human and animal diseases that have had profound effects on the course of human history from the beginning of recorded time to the present. This course combines aspects of literature, medicine, and history and explores the interactions between demographics, commerce, imperialism, medical care, the environment, and disease. Prevailing superstitions and religious views are considered in context with each illness and simultaneously occurring world events.

[VTEMED 628 Clinical Pathology]
Spring. 2 credits. Minimum enrollment 20; maximum enrollment 60. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2002. Staff. This six-week course addresses a range of issues related to laboratory medicine and interpretation of laboratory results. General topics include hematology, clinical chemistry and immunology, and urinalysis. The primary mode of instruction is student-driven small-group (unattended) exploration of case materials followed by faculty-moderated large-group discussions. Selected lectures and laboratory sessions supplement and expand on issues generated by the case discussions. This course builds on concepts previously addressed in Block III and IV and also provides additional experiences in practical clinical pathology procedures and microscopy.

[VTEMED 630 Clinical Biostatistics for Journal Readers]
Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. Second-, third-, and fourth-year veterinary students; others by permission of instructor. Letter grades only. Not offered 2002. Staff. Students become familiar with the statistical methods commonly used in veterinary clinical articles, are taught to recognize obvious misuse of those methods, and are taught to interpret the statistical results.

[VTEMED 631 Clinical Diagnostic Parasitology]
Fall and spring. 0.5 credit. Prerequisite: VTEMED 551. Third- and fourth-year veterinary students. S-U grades only. TBA with Dr. Frongillo, D. D. Bowman and M. K. Frongillo. This course provides a chance to perform diagnostic parasitology methods using samples obtained from ongoing clinic cases. Students attend eight 1-hour sessions as they rotate through the ambulatory, community practice, and pathology rotations. In the ambulatory service (four sessions with students), diagnostics concentrates on the laboratory examination of samples from large animal cases that have been observed during the previous week. In the Community Practice Service, one hour concentrates on the examination of samples from ongoing cases, while a second hour consists of a discussion of the treatment of common endo- and ectoparasites. The two hours spent as part of the pathology rotation examine methods of recovering parasites from pathology specimens, including the methods learned about digestion of tissues for parasite recovery. The course is considered to be a logical extension to the foundation course Host, Agent, and Defense and is expected to build on the didactic material presented in Large and Small Animal Parasitology.

[VTEMED 632 Senior Seminar]
Fall and spring. 1 credit. First-, second-, and third-year veterinary students. S-U grades only. Must be completed in two consecutive terms (either fall to spring or spring to fall). R. O. Gilbert. Attendance at 14 of the senior seminar sessions presented during the academic year constitutes acceptable completion of this course. This course does not fulfill the 1-credit Set VII minimum.

[VTEMED 633 Introduction to Nontraditional Companion and Laboratory Animals]
Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2002. Staff. This course is both laboratory and lecture based and deals with a wide variety of nontraditional species, other than dogs or cats, that might be brought into a small-animal practice. These can be either companion or laboratory animals and include rodents, lagomorphs, other small mammals, reptiles, amphibians, birds, fish, goats, sheep, potbellied pigs, primates, and llamas. Instruction in restraint and handling, breeding, husbandry, and general management information is provided for each species. This is followed, where possible, by laboratory sessions for observation, restraint, and physical examination.

[VTEMED 635 Introduction to the Professional Literature]
Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2002. D. Lee. This course introduces veterinary students to the professional and biomedical literature, including development of critical reading skills. Students become familiar with the broad range of professional and biomedical literature and are encouraged to develop a rigorous approach to journal and scientific article review. Secondary emphasis is on developing skills in library and bibliographic search techniques, as well as exploring the use of veterinary-related online information.

[VTEMED 637 Introduction to Community Practice Service]
Fall, winter, spring, and summer. 1 credit. First- and second-year veterinary students by permission of instructor. S-U grades optional. W. E. Hornbuckle. This course introduces veterinary students to primary care small-animal clinical practice through direct exposure to the Community Practice Service of the Cornell University Hospital for Animals. Students observe and assist with restraint procedures, client education and treatment of pets, and communication with clients. Successful completion requires satisfactory participation during 10 half-days of clinical service.

[VTEMED 638 Physiological Nutrition]
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 90. Second-, third-, and fourth-year veterinary students; others by permission of instructor. Letter grades only. F. A. Kalfelz. This course provides information on the evaluation and formulation of rations for large and small animals. These concepts are applied in discussion on the nutrition requirements of these animals during maintenance, gestation, lactation, growth, stress, and aging. The course is recommended for all second-year veterinary students who do not have a strong background in ruminant, equine, canine, and feline nutrition. This course, or its equivalent, is necessary for completing additional nutrition concepts in Foundation Course V.

[VTEMED 639 Veterinary Dentistry]
Spring. 1 credit. Minimum enrollment 96. Second-, third-, and fourth-year students. Letter grades only. Not offered 2002. Staff. This is an introductory-level course in small animal dentistry. It is a laboratory course that meets for two hours twice a week for 16 sessions. Basic concepts and practical topics in dental nomenclature, dental anatomy, oral/ dental examination, routine dental care including prophylaxis, recordkeeping, genetics and breed differences, tooth wear, dental disease, occlusion/malocclusion, periodontics, endodontics, restorative dentistry, oral surgery, and orthodontics are presented. Basic instrumentation, dental radiography, and materials used in dentistry are stressed. The class uses prepared specimens for all sessions.

[VTEMED 640 Veterinary Aspects of Captive Wildlife Management]
Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. G. V. Kollas. This course concentrates on principles of captive wildlife management, both clinical and non-clinical. Students are challenged to learn and integrate a variety of disciplines that are essential to managing wildlife successfully in a captive or semi-free-ranging environment. These disciplines include but are not limited to: species-specific (1) behavior and behavioral requirements, (2) nutritional requirements and problems, (3) natural history, (4) zoonotic and toxicological problems, (5) microbial restraint and anesthesia, (6) preventive medicine, and (7) medical and legal ethics. In even-numbered years the course emphasizes non-North American wildlife species (examples include African, Asian, Australian, and Central and South American species), and in odd-numbered years the course focuses more on the North American (native) wildlife species.

[VTEMED 641 Approaches to Problems in Canine Infectious Diseases]
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. C. Barr. The course consists of two 50-minute lecture periods each week for eight weeks. The letter grade is obtained entirely from the result of a written examination (usually multiple-choice format) given in the final period. The course emphasizes the clinical aspects of the more common canine infectious diseases that are not covered in Foundation Course IV or V. The overall objective is to provide details about specific infectious diseases a future small animal practitioner may need to know.
to effectively diagnose and treat these diseases. Clinical signs, presentation, clinicopathologic data, diagnostic choices, treatment plans, and prevention are emphasized. Most lectures are presented by clinical faculty and therefore the material is oriented toward practical skills in managing clinical cases.

VTMED 642 Management of Fluid and Electrolyte Disorders
Spring. 2 credits. Minimum enrollment 20; maximum enrollment 40. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2002. D. F. Smith. Study of fluid and electrolyte physiology, fluid and electrolyte disturbances in domestic animals, and the pathophysiologic mechanisms associated with fluid, electrolyte, and metabolic acid base disturbances. The course is divided into two segments dealing with salt and water imbalances, potassium abnormalities, metabolic acidosis, metabolic alkalosis, and mixed acid-base disturbances.

VTMED 643 Fundamental Aspects of Embryo Transfer
Spring. 1 credit. Minimum enrollment 16. Enrollment is done by lottery. Third- and fourth-year veterinary students or graduate students by permission of instructor. S-U grades only. J. R. Hill. This course introduces the theory and practice of embryo transfer in domestic animals. Topics include: background, advantages and disadvantages, superovulation, embryo recovery techniques, embryo culture and manipulation, embryo transfer techniques, registration of offspring, import and export, and related topics in assisted reproductive technologies. Students are exposed to practical techniques of embryo transfer in cattle, small ruminants, horses, and swine. The course consists of lectures, demonstrations, and laboratory classes during which students practice techniques of embryo recovery, evaluation, handling, and transfer.

VTMED 644 Equine Surgical and Anesthetic Techniques
Winter. 1 credit. Prerequisite: VTMED 602 Anatomy of the Horse. Minimum enrollment 3; maximum enrollment 21. Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only. S. L. Fubini (coordinator) and other large-animal surgeons. This course consists of five laboratories performing surgical procedures on ponies and cadaver specimens. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating equine practice after graduation. This course is offered during a one-week period over winter intercession.

VTMED 645 Food Animal Surgical and Anesthetic Techniques
Winter. 1 credit. Prerequisite: VTMED 603 Anatomy of the Ruminant. Minimum enrollment 6; maximum enrollment 21. Third- and fourth-year veterinary students. S-U grades only. Enrollment is done by lottery. S. L. Fubini and other large-animal surgeons. This course consists of five laboratories performing surgical procedures on sheep, calves, cadaver specimens, and adult cattle. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating food animal practice after graduation. This course is offered during a one-week period over winter intercession.

VTMED 647 Poisonous Plants
Fall. 1 credit. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. S-U grades only. R. Hillman and M. Smith. Field trips demonstrate toxic plants growing in natural or cultivated settings. Lectures address economically important poisonous plants native to the United States. Information presented includes plant identification, natural habitat, toxic principles, clinical signs of toxicity, and treatment and prevention of poisoning in animals. Some of the major toxic principles found in plants and considered in detail in the course are nitrates, cyanide, oxalates, photodynamic agents, alkaloids, and mycotoxins.

VTMED 648 Clinical Management of Native Wildlife
Fall, spring, summer (credit given in fall). 1 credit. Enrollment not to exceed 20 students per semester, 2 students per rotation. First-, second-, third-, and fourth-year veterinary students by permission of instructor. Letter grades only. G. V. Kollias and staff. This course introduces veterinary students to primary native wildlife care and to wildlife issues that practicing veterinarians face on a daily basis. Students are required to submit two case summaries before the end of the semester and a log of their experiences throughout the semester. Students are responsible for the diagnosis and treatment of clinical and staff. This course requires 40 hours of satisfactory supervised participation per semester in the clinic. Clinic times are appropriately scheduled throughout the semester. Students are required to submit two case summaries before the end of the semester and a log of their clinical hours.

VTMED 649 Introduction to Equine Practice
Spring. 0.5 credit. Maximum enrollment 30. First- and second-year veterinary students. Letter grades only. R. Hackett and C. Collyer. This is an introductory course in equine husbandry intended for students with little or no experience working with horses. Lecture topics include horse breeds and colors, housing facilities and fencing, and overview discussions of the racing, showing, and breeding industries. Laboratories emphasize basic equine handling and restraint as well as feeds and bedding.

VTMED 652 Avian Medicine and Surgery
Spring. 2 credits. Minimum enrollment 20; maximum enrollment 80. Third- and fourth-year veterinary students. Letter grades only. G. V. Kollias and staff. This course is designed to introduce third- and fourth-year veterinary students to the principles and practice of clinical avian medicine and surgery. The course is taught in a basic didactic lecture and discussion format with laboratories that reinforce concepts presented in the lectures.

VTMED 653 Advanced Equine Lameness
Spring. 1.5 credits. Minimum enrollment 7; maximum enrollment 21. Third- and fourth-year veterinary students. Enrollment is done by lottery. S-U grades only. N. Ducharme, A. Nixon, and staff. This course is designed to help students understand the methodology and to develop the manual skills required for lameness examination in horses. Emphasis is on developing diagnostic skills. Specifically, students are expected to develop proficiency in the identification of clinical characteristics associated with recognized lamenesses and to localize the origin of the lameness. Teaching aids include video modules outlining various gait abnormalities. In addition, horses with specific gait abnormalities will be available for physical, radiographic, and ultrasonographic examination.

VTMED 654 Current Therapy in Equine Reproduction
Spring. Lab, 1 credit; lecture, 1 credit. Lab, 1 credit. Lab, minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery, if oversubscribed; concurrent enrollment in lecture is required. Third- and fourth-year veterinary students. Letter grades only. D. H. Volkman and C. Schweizer. This course covers advanced aspects of equine reproductive physiology. Reproductive management of mares and stallions using natural and artificial breeding strategies is discussed. Diagnosis, treatment, and prevention of common reproductive disorders are stressed. The laboratory component builds on skills acquired during Foundation Courses and provides experience in techniques important in equine theriogenology.

VTMED 655 Production Animal Theriogenology
Spring. Lec, 1 credit; lab, 1 credit. Lab, minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery. Concurrent enrollment in Production Animal Theriogenology Lecture is required. Third- and fourth-year veterinary students. Letter grades only. J. R. Hill. This course deals with specific reproductive disorders of production animals as well as reproductive management of production units. Content includes reproductive biology of production animals, economic considerations, and medical and surgical approaches to management of reproductive disorders. Laboratory sessions are tailored to acquisition of specific skills fundamental to the practice of
VTMED 655 Special Problems in Equine Medicine
Spring. 1.5 credits. Minimum enrollment 10; maximum enrollment 30. Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only. T. Divers and staff. This course is intended for students who plan to or may enter equine practice. In-depth study of important diseases, review of recent literature, health management, and hands-on procedures or demonstrations are the core of this course.

VTMED 657 Disorders of Large Animal Neonates
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 100. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. Ainsworth. The common medical problems of foals and calves, with emphasis placed on the neonatal period, are discussed. Specific topics examined in detail include disorders affecting the respiratory, gastrointestinal, and musculoskeletal systems. Students also spend several hours in the neonatal intensive care unit providing medical care of hospitalized patients under staff supervision.

VTMED 658 Equine Soft Tissue Surgery
Spring. 1 credit. Minimum enrollment 6; maximum enrollment 21. Third- and fourth-year veterinary students. Enrollment is done by lottery. Letter grades only. R. Hackett and staff. This course, intended for students anticipating equine practice after graduation, builds on material presented in the foundation courses to provide supplemental instruction in surgical disorders of the horse. Lectures are case based and emphasize disorders likely to be encountered in equine practice (colic, traumatic injuries, upper respiratory tract disorders, prepurchase examination). Laboratories emphasize diagnostic and therapeutic procedures in which an entry-level equine practitioner should be competent.

VTMED 661 Surgical Pathology
Spring, summer, fall. Variable 1–2 credits. Second-, third-, and fourth-year veterinary students with permission of instructor. Letter grades only. S. McDonough. This one- or two-week course (approximately eight hours per day for one credit per week) provides hands-on experience in the Surgical Pathology Service of the Department of Biomedical Sciences. Working with the attending pathologist, students examine tissue specimens histologically, propose diagnoses, and discuss their interpretations. Students may enroll in this course only through the Office of Student Records within the official add/drop period. All requests to enroll must be accompanied by the Supplemental Enrollment Form indicating Dr. McDonough’s approval of the enrollment and the amount of credit to be awarded. Second-year students should not enroll for any term other than summer unless they have actually reserved a January or spring break slot through Dr. McDonough.

VTMED 665 Medical and Surgical Problems of Dairy Cattle—Emphasis on the Individual Animal
Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 28. Enrollment is done by lottery. Third- and fourth-year veterinary students. Letter grades only. S. Fubini and staff. This course provides students with a special interest in dairy practice the opportunity for in-depth discussions of special problems in bovine medicine and surgery. Emphasis is on case discussions, physical examination techniques, and ethical and practical matters. The course emphasizes individual cow treatment.

VTMED 666 Small Animal Clinical Oncology
Spring. 1 credit. Third- and fourth-year veterinary students. Letter grades only. R. L. Page. This course presents common tumor syndromes in small animals. Emphasis is placed on biological behavior, patient management, and client relations. Format includes lectures, journal club, discussions, demonstrations, and seminars.

VTMED 667 Special Problems in Small Animal Medicine
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third- and fourth-year veterinary students. S-U grades only. J. Randolph (coordinator) and staff. During the four-week course, students work through selected problems in small-animal medicine. The course consists of a 2-hour weekly seminar. The focus is on the medical problems associated with cases using historic, clinical, clinical pathologic, and pathologic findings to elucidate basic pathophysiologic principles of disease. The overall objective is to give future small-animal practitioners skills in the approach to clinical problems with specific emphasis placed on history taking, clinical signs, laboratory skills, assessment of clinical pathology data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course expands knowledge gained in Foundation Course III and, under the instruction of a clinical faculty member, is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases.

VTMED 668 Practice Management
Spring. 2 credits. Number of sections will be determined by enrollment. Third- and fourth-year veterinary students. S-U grades only. Not offered 2002. D. Lee. Course participants form a veterinary group practice that includes the specialties of each person’s interest. Topics are presented and discussed in the staff meeting format of the practice. Topics include basic practice organization, leadership styles, career planning, communication skills, facility management, human resource management, maintenance of standards, marketing and merchandising, handling and maintaining clients, practice growth, finances, computing systems and information management, money management, legal issues and insurance, professional relations and responsibility, and maintaining an acceptable quality of life, including stress management. Various practitioners and practice managers speak to the group about their very different successful practices, concentrating on management and organizational skills.

VTMED 669 Sheep and Goat Medicine
Spring, Loc. 1 credit, Lab. 0.5 credit. Lab. concurrent enrollment in Sheep and Goat Medicine Lecture is required. Third- and fourth-year veterinary students. S-U grades only. M. Smith. This course addresses diagnosis, treatment, and prevention of medical and surgical problems of individual small ruminants and of sheep and goat herds. Basic information on breeds, behavior, nutritional requirements, and management systems is supplied. Economically important contagious or metabolic diseases are discussed in depth. The diagnostic evaluation and differential diagnoses for common clinical presentations such as skin disease, neurologic disease, lameness, and mastitis are considered. Herd monitoring of economically important parameters and necropsy diagnosis of abortions and neonatal losses are addressed. Breeding systems, pregnancy diagnosis methods, and correction of dystocia are discussed and demonstrated in optional laboratory sessions.

VTMED 670 Drug Handling in the Body
Spring. 0.5 credit. Maximum enrollment 60. Second-, third-, and fourth-year veterinary students. Letter grades only. R. A. Cerione and G. A. Weiland. This course provides an in-depth consideration of the pharmacological principles of administration, adsorption, distribution, metabolism, and elimination of drugs. Emphasis is on the conceptual basis of the pharmacokinetic considerations in the therapeutic use of drugs. The course builds on the pharmacological and physiological principles introduced in Foundation Course III.

VTMED 671 Automonc Pharmacology
Spring. 0.5 credit. Maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. G. A. Weiland. This course provides an in-depth consideration of the pharmacological and physiological principles of autoinonc pharmacology. Molecular, cellular, and organ system mechanisms are emphasized. The course explores in more depth the pharmacological and physiological principles of the effects of drugs on autonomic organs introduced in Foundation Course III.

VTMED 672 Antimicrobial Drug Therapy in Veterinary Medicine
Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. W. S. Schwark. The objective of this course is to familiarize students with antimicrobial drugs used in veterinary practice. The course builds on fundamental pharmacological and microbiological principles covered in Foundation Courses III and IV and considers antibacterial, antifungal, antiparasitic, and anticancer drugs from the point of view of unique pharmacokinetic properties, indications for clinical use, and potential toxicities as the basis for rational use.

VTMED 675 Fundamental Principles of Vertebrate Central Nervous System Pharmacology
Spring. 0.5 credit. Minimum enrollment 6. Second-, third-, and fourth-year veterinary students. Letter grades only. L. M. Nowak. This course includes up-to-date knowledge of physiological and pharmacological aspects of the main central nervous system neurotrans-
VTMED 676 Clinical Ophthalmology
Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. R. Riis, N. Irby, and T. Kern.

The principles and practice of entry-level veterinary ophthalmology introduced in Block V, Introduction to Veterinary Ophthalmology, are supplemented by lectures and discussions that emphasize species differences, basic surgical decision-making, and recognition of ocular conditions appropriate for referral.

VTMED 677 Dairy Production Medicine
Fall. 2 credits. Minimum enrollment 6; maximum enrollment 14. Third- and fourth-year veterinary students. S-U grades only. C. Guard.

This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and husbandry and might include housing, facilities, manure management, and employee education. Data analysis, disease and productivity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students are introduced to the dominant software currently used in dairy management. Local dairy herds serve as additional laboratories for class projects.

VTMED 678 Small Animal Theriogenology

This is a distribution course in a lecture-based format designed to complement the knowledge gained in the theriogenology component of Foundation Course V, Animal Health and Disease. Content includes discussion of breeding management, infectious and noninfectious causes of infertility and pathology of both male and female reproductive tracts, their diagnosis and management. The emphasis of the course is on conditions affecting dogs and cats.

VTMED 679 Clinical Pharmacology
Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. W. Schwartz.

This course is offered after Blocks I-V and formal exposure to pharmacology course work is completed. The course is designed to familiarize students with drug use in the clinical setting and uses ongoing cases in the teaching hospital as a teaching tool. Pharmacological concepts are emphasized, with a focus on the rationale for drug choice, alternative drug choices available, pharmacokinetic considerations, and potential drug interactions/toxicities. This course is offered at the time students are about to embark on their clinical rotations. It is designed to emphasize practical aspects of pharmacology in the clinical setting, using basic concepts obtained during formal course work. The onus is placed on the student to explain/rationalize drugs employed in clinical cases in the teaching hospital.

VTMED 680 Behavior Problems of Horses
Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students. S-U grades only. K. A. Houpt.

The goal of this course is to give veterinary students the ability to treat the behavior problems of horses. History-taking, counseling, diagnostic tests, follow-up, and the importance of cooperation with the referring veterinarian, prevention of behavior problems, training techniques of value to the practitioner, and socialization of foals are presented.

VTMED 681 Behavior Problems of Small Animals
Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students. S-U grades only. K. A. Houpt.

The goal of this course is to give veterinary students the ability to treat the behavior problems of cats and dogs. History-taking, counseling, and follow-up methods are presented. Each student has the opportunity to participate in three cases. Behavioral and pharmacological treatments for behavior problems are presented.

VTMED 682 Topics in Veterinary Emergency and Critical Care Medicine
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 35. Enrollment is done by lottery. Third- and fourth-year veterinary students, all others by permission of instructor. S-U grades optional. P. Moon.

This course provides an introduction to emergency and critical care medicine. It is designed to have one to two topics per week. An introductory seminar presents basic information on the topic(s) at the beginning of the week followed by a two-hour group discussion later in the week. Although most of the cases are based on small-animal cases, the same principles apply to both large- and small-animal situations. Topics that might be covered include: triage, emergency fluid therapy, cardiac and pulmonary emergencies, nutritional support, common toxicology problems, emergency surgical procedures (chest tubes), and basic and advanced cardiopulmonary resuscitation. When two courses (i.e., section “A” and “B”) are offered in the same year, different topics are covered in each course.

VTMED 685 Physiology of Pregnancy

This course is presented in lecture fashion. One major reference per lecture is assigned each week. Subjects covered are placental development, fetal breathing, biorhythms in pregnancy, the endocrine system, placental transport, and behavioral and physiological aspects of parturition and neonatal care.

VTMED 686 Fundamentals of Ruminant Digestion and Metabolism
Spring. 0.5 credit. Minimum enrollment 5; maximum enrollment 50. First-, second-, third-, and fourth-year veterinary students; selected graduate students by permission of instructor. Letter grades only. K. A. Houpt.

This course is designed for the student who has little or no previous course work in ruminant digestive physiology. It consists primarily of lectures surveying: the functional aspects of control of feed intake; salivation; reticulorumen motility, including rumination and evacuation; microbial flora; fermentation in reticulorumen (digestion of carbohydrates, proteins and fats); ruminal gas formation; absorption of short-chained fatty acids; special features of ruminal nitrogen metabolism; passage of nutrients to lower tract; and a brief consideration of the functions of omasum, abomasum, and small and large intestines. Emphasis is on the differences of the ruminant digestive processes from those of the simple-stomached animals.

VTMED 689 Molecular and Genetic Basis of Inherited Disorders in Animals and Application to Clinical Medicine
Spring. 2 credits. Minimum enrollment 5; maximum enrollment 15. First-, second-, third-, and fourth-year veterinary students; graduate and undergraduate students also welcome. Letter grades only. Offered even-numbered years. J. Ray.

This course introduces the molecular basis of inherited diseases in domestic animals. Topics include: several inherited metabolic defects causing systematic malfunctions; muscle and bone abnormalities; retinal degeneration; and failure of the immune systems. Techniques to characterize genes and mutations. Use of molecular techniques for diagnosis and prevention. Use of molecular tools for the treatment of inherited disorders.

VTMED 692 Current Concepts in Reproductive Biology
Fall. 3 credits. First-, second-, and third-year veterinary students or appropriate undergraduate/graduate training. Letter grades only. Lee, 2 hours each week; disc, 2 hours each week; T R 10:10-12:05. Offered odd-numbered years. J. Fortune, W. R. Butler, and staff.

This is a team-taught survey course in reproductive physiology/endocrinology. Lectures are given by several reproductive biologists on various aspects of male reproductive function (endocrine regulation, testis function, spermatogenesis, and sperm physiology/function); female reproductive function (endocrinology, ovarian development and function, oocyte physiology/function); fertilization and early embryo development; pregnancy; parturition; puberty; and reproductive technology. Students participate in the form of discussions and/or presentations.
VTMED 696 Fundamental Principles and Techniques of Small Animal Anesthesia: Dogs, Cats, and Birds
This course is designed for the veterinary medical student interested in small-animal practice. The course consists of lectures, case discussions, and development of anesthetic protocols for routine and complicated cases. Subjects to be covered include: anesthetic management for elective and emergency surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, and the management of anesthesia-related complications, cardiopulmonary resuscitation, and post-anesthetic management. While fundamental concepts and recent advances in anesthesia are discussed, the practical application of anesthetic principles and techniques is a major objective of the course.

VTMED 697 Fundamental Principles of Large Animal Anesthesia: Equine and Mixed Animal Practice
This course is designed for the veterinary medical student interested in equine or mixed animal practice. The course consists of lectures, case discussions, and development of anesthetic protocols for routine and complicated cases. Subjects to be covered include: anesthetic management for elective surgery, field anesthesia, management of the high-risk patient, fluid therapy, drug interactions, pain management, and the management of anesthesia-related complications, cardiopulmonary resuscitation, and post-anesthetic management. While fundamental concepts and recent advances in anesthesia are discussed, the practical application of anesthetic principles and techniques is a major objective of the course.

VTMED 698 Special Projects in Veterinary Medicine
Fall, winter, spring, summer. Variable 1–4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.
This course provides the opportunity for students to work individually with a faculty member to pursue an area of particular interest and, typically, not part of the established curriculum. Specific course objectives and course content are flexible and reflect the scope and academic expertise of the faculty.

VTMED 699 Research Opportunities in Veterinary Medicine
Fall, winter, spring, summer. Variable 1–4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.
This course provides the opportunity for individual students to work in the research environment of faculty involved in veterinary, or biomedical research. Specific course objectives and course content are flexible and reflect the scope and academic expertise of the research environment. Research projects may be arranged to accumulate credit toward requirements in Distribution Sets I, II, III, IV, and V.

VTMED 700 Large Animal Theriogenology Service
Spring. 2 or 4 credits. Prerequisite: VTMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. D. H. Volkman, R. J. Schell, and D. Gilbert.
Two week exposure to clinical procedures in large animal theriogenology as provided by CUH patient load and augmented by teaching herd(s) (equine and bovine) animals.

VTMED 701 Cardiology Service
Fall and spring. 2 credits. Prerequisite: VTMED 551. Minimum enrollment 1 per rotation; maximum enrollment 2. Third- and fourth-year veterinary students. Letter grades only. S. Moise.
The purpose of the cardiology rotation is to provide students with the opportunity to put into practice what they have learned in the foundation years. The management of the most common cardiac diseases is emphasized including congestive heart failure, arrhythmias, and secondary cardiac diseases. All species are examined, large and small, although the majority are dogs. Diagnostics including cardiovascular physical examination, electrocardiography, radiography, and echocardiography, are taught. The rotation includes clinical work, didactic teaching, and self-initiated digging for information.

VTMED 702 Laboratory Animal Medicine
Fall and spring. 2 credits. Prerequisite: VTMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. F. Quimby and staff.
The practice of laboratory animal medicine requires a combination of preventive programs, clinical skills, knowledge of various species' biologies, familiarity with research methodology, and acquaintance with state and federal regulations. This course is offered as a two-week introduction to this specialty. Students accompany laboratory animal veterinarians on rounds of Cornell's research animal housing and participate in laboratory diagnostic work. Review sessions are conducted on the biology, medicine, pathology, and husbandry of rodents, rabbits, and primates. Legislation regulating the care and use of research animals. The course may include a field trip to the research animal facilities of Rockefeller University, the Cornell University Medical College, Marshall Farms, and the Laboratory of Experimental Medicine and Surgery in Primates.

VTMED 703 Clinical Wildlife, Exotic, and Zoo Animal Medicine
Fall, winter, spring, summer. 2 credits. Prerequisite: VTMED 551. Maximum enrollment 2 per rotation. Third- and fourth-year veterinary students. Letter grades only. G. V. Kollias and staff.
This course introduces students to primary medical care of nontraditional pet species, zoo animals, and native wildlife. Students, directly supervised by veterinary clinicians, are responsible for the assessment, physical examination, and medical management of exotic animal species presented to the Cornell University Hospital for Animals. Other opportunities available include participation in the development of clinical skills in wildlife, zoo and exotic animal medicine include the wildlife clinic cases, ongoing wildlife research and service projects, and trips to the Rosamond Gifford Zoo. Successful completion of the course requires satisfactory performance during this 14-day clinical rotation.

VTMED 704 Quality Milk Fall or spring. 2 credits. Prerequisite: VTMED 551. Third- and fourth-year veterinary students. Letter grades only. R. Gonzalez, Y. Schukken, D. Wilson and staff.
This course covers the causes, diagnosis, treatment, and prevention of bovine mastitis. The role of management practices is stressed. The course includes lectures, readings, discussions, laboratory exercises, and farm visits as part of the Quality Milk Promotion Services—New York State Mastitis Control Program. Participants are expected to complete a case study on a dairy farm withudder health problems and present their findings to the producer and farm personnel. Grading is based on performance during the course and a final exam.

VTMED 705 Special Opportunities in Clinical Veterinary Medicine
Fall, spring, and summer. Prerequisite: VTMED 551. Third- and fourth-year veterinary students. S-U grades only.
This course provides opportunities for students finished with their core undergraduate course V to explore professional areas not available through the regular curriculum. Blocks of two to four weeks are usually spent at other teaching hospitals, research laboratories, or zoological facilities. Student proposals are submitted to the associate dean for academic programs for review and approval. On-site supervisors of the block act as ex-officio faculty members and are required to evaluate each student formally.

VTMED 707 Poultry Medicine and Production Rotation
Fall. 2 credits. Prerequisite: VTMED 551 and VTMED 616, Diseases of Birds, is recommended. Third- and fourth-year veterinary students. K. A. Schat.
This course is a two-week rotation that takes place at the University of St. Hyacinthe or the University of Guelph in alternating years. The course provides students with an introduction in practical poultry medicine by a combination of lectures, discussions, and laboratory sessions including postmortem examinations. Students also visit hatcheries, broiler, layer, and turkey farms.

VTMED 708 Clinical Oncology
Fall and spring. 2 credits. Prerequisite: VTMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. R. Page.
Management and prevention of cancer in companion animals represents a significant component of the practice of veterinary medicine. The focus of this clinical rotation is the development of a comprehensive set of skills necessary for a veterinarian to become an advocate for the client/patient with cancer. These skills include initial evaluation of animals with cancer, sensitive and effective client and referring veterinarian communication, ability to access relevant information from numerous sources related to cancer management, and apply principles of surgical, medical, and radiation oncology as well as techniques specifically related to minimize pain and treatment-related effects in cancer patients.
Veterinarians often work for or with animal shelters, serve on shelter boards of directors, are community resources for issues relating to companion animal welfare, participate in spay and neuter programs, and influence the quality of the human-animal bond. This course addresses the history of the humane movement, role of the veterinarian in relation to shelters, preventive and palliative health management (including highlighting diseases of major concern), issues surrounding euthanasia, reasons for relinquishment, programs for behavior modification, and the legal concerns of shelters. These issues are addressed using lectures and large group discussions.

VTMED 721 Timely Topics in Veterinary Parasitology: Large Animal
This course presents an in-depth look at one or a few parasites of special interest relative to large-animal medicine. The course presents details of taxonomy, biology, epidemiology, clinical presentation, and preventive and curative treatment. Efforts are made to discuss those aspects of the disease as it relates to the practical control of these and in-depth coverage of primary literature relating to the parasite being discussed. Topics vary annually. The course is presented in a lecture/discussion format.

VTMED 722 Timely Topics in Veterinary Parasitology: Small Animal
This course presents an in-depth look at one or a few parasites of special interest relative to small-animal medicine. The course presents details of taxonomy, biology, epidemiology, clinical presentation, and preventive and curative treatment. Efforts are made to discuss those aspects of the disease as it relates to the practical control of these and in-depth coverage of primary literature relating to the parasite being discussed. Topics vary annually. The course is presented in a lecture/discussion format.

VTMED 723 Bacteria and Fungi in Veterinary Medicine
This course provides an overview and listing of important bacterial and fungal diseases of domestic animals (cow, horse, sheep, pig, goat, dog, cat) in preparation for medicine students. The pathogenesis, host response, and prevention are emphasized. Avian, zoonotic, and exotic (foreign animal) bacterial and fungal diseases are covered in less detail because they are covered in other courses. The course also provides insight into diagnostic procedures for bacterial and fungal diseases such as available tests, what samples to take, how to handle samples, and how diagnostic procedures are performed.

VTMED 725 Diagnostic Cytology
This two-week course provides an in-depth experience in preparation and interpretation of cytological specimens. Evaluation of the cytological specimens is incorporated into clinical cases, so that the results are interpreted with respect to the provided case material. The primary mode of instruction is based on faculty-driven microscopic slide evaluation. Students are required to evaluate the slides independently before the microscope sessions. Selected mini-tutorials and laboratories complement the microscopic sessions. The course builds on concepts previously addressed in the Foundation Course on diagnostic cytology. Emphasis is on those aspects of the disease as it relates to the practical control of these and in-depth coverage of primary literature relating to the parasite being discussed. Topics vary annually. The course is presented in a lecture/discussion format.

VTMED 726 Reptile Medicine and Surgery
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third-, and fourth-year veterinary students. Letter grades only. G. V. Kollias.
This course is designed to introduce third- and fourth-year veterinary students to the principles and practices of reptile medicine and surgery. The course is taught in a basic lecture and discussion format with laboratories (limited) reinforcing concepts presented in the lectures.

VTMED 730 Vaccines: Theory and Practice
Spring. 1 credit. Prerequisite: introductory course in immunology or VTMED 540 or VETMI 315. Minimum enrollment 10; maximum enrollment 40. Second-, third-, and fourth-year veterinary students and graduate students. Letter grades only. G. V. Kollias.
This course provides an overview of vaccines used in small animal practice, as well as an in-depth look at vaccine development. Emphasis is placed on the most recent advances in vaccine design and delivery, including the use of recombinant DNA techniques for targeting specific immunological responses. Lectures touch on vaccines commonly used in veterinary practice and address in detail the use of carriers, adjuvants and immunostimulants; attenuated pathogens; synthetic peptides, recombinant subunit vaccines; viral and bacterial vectors for vaccine delivery; synthetic antibodies; and genetic immunization with "naked" DNA.

VTMED 732 Veterinary Clinical Toxicology
This course provides the veterinary student with a solid introduction to concepts and principles of swine infectious diseases and how they are treated in the clinical setting. Students learn about specific infectious diseases, clinical signs in affected animals, and treatment protocols for the diseases in question. Students also gain an understanding of the clinical approach to suspected or unknown infectious agents, sample collection and handling, and resources available for infectious diseases diagnosis. The course is conducted with two 1-hour lectures per week and one hour-long large-group discussion per week. The class meets two days per week, the first day for one hour and the second day for two hours. Grading is based on weekly quizzes, a final exam, a short paper and/or oral participation.

VTMED 733 Selected Infectious Diseases of Swine
This course provides veterinary students with a solid introduction to concepts and principles of swine infectious diseases and how they are treated in the clinical setting. Students learn about specific infectious diseases, clinical signs in affected animals, and treatment protocols for the diseases in question. Students also gain an understanding of the clinical approach to suspected or unknown infectious agents, sample collection and handling, and resources available for infectious diseases diagnosis. The course is conducted with two 1-hour lectures per week and one hour-long large-group discussion per week. The class meets three days per week for one lecture and two discussion groups held on weekly quizzes, a final exam, a short paper and/or oral participation.

VTMED 735 Special Topics in Ambulatory and Production Animal Medicine.
Fall, winter, spring, and summer. Variable I–2 credits. Prerequisite: VTMED 560. Enrollment is done by lottery. Second-, third-, and fourth-year veterinary students. Letter grades only. M. E. White and staff.
This course provides specialized experiences in the Ambulatory and Production Medicine Service. The course consists of participation in scheduled and emergency farm calls. Completion of projects designed to provide experience in herd problem solving, records analysis and implementing herd-health programs. Clinical service assignments are planned to meet individual student goals. Examples of focus areas available include livestock production medicine, dairy reproductive examinations, small-ruminant medicine, and equine ambulatory practice.

VTMED 736 Veterinary Diagnostic Imaging: Anatomy and Interpretation
Spring. 1.5 credits. Minimum enrollment 20; maximum enrollment 50. First- and second-year veterinary students by permission of instructor. Third- and fourth-year veterinary students. Letter grades only. P. Spirakis.
The course is designed to emphasize the relevance of a solid foundation in veterinary anatomy as it clinically applies to diagnostic imaging. Additionally, the course is designed to provide students with an understanding of the strengths and limitations of diagnostic imaging by discussing interpretation principles, pitfalls and interpretations, and measurements obtained through lectures, laboratory exercises, weekly quizzes, and reading assignments. Integration of these objectives culminates in two laboratory exercises where students must make or evaluate decisions regarding patient management based on evaluation of clinical signs and imaging examinations. The "Roentgen-Sign"
approach to diagnostic imaging interpretation is used as a model.

VTMED 737 Principles of Pathology

Principles of Pathology is intended for students who wish to strengthen and broaden their knowledge of the pathologic basis of disease. Fundamental biologic processes as revealed by gross and microscopic pathologic changes are emphasized. Molecular mechanisms are integrated into the discussion where appropriate. General pathologic processes are organized around specific and uniform systems in order to facilitate comprehension and learning with particular attention paid to definition and proper usage of terminology. The course includes two lectures per week and a one-hour large-group discussion. The large-group discussion allows students to apply general knowledge gained in lecture to a specific problem. Approximately half of the large-group discussions are held in the Necropsy Teaching Laboratory using actual diseased organs for illustration of general pathologic principles.

VTMED 738 Veterinary Parasitology
Spring. 2.5 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. D. Bowman

This course provides a basic introduction to animal parasites of veterinary importance, concentrating on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis is given to parasites representative of significant disease processes or of significant clinical importance to veterinarians. The course elaborates on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced by the different groups of pathogens. Laboratories stress certain aspects of some important parasitic groups.

VTMED 739 Viruses in Veterinary Medicine
Spring. 1.5 credits. Maximum enrollment 90. Second-, third-, and fourth-year veterinary students. Letter grades only. Offered odd-numbered years. C. R. Parrish and J. Bis.

This course is designed to supplement the information provided in the Foundation Courses, particularly courses IV and V. The objective is to provide, in a survey form, an outline of the major groups of viruses which infect animals, and to give a summary of the diseases that they cause. The diseases, which are most commonly encountered in veterinary practice, are given the greatest amount of the time, and diseases which are less frequently seen are given less detailed coverage. The properties of the viruses, their general pathogenic mechanisms, diagnostic methods, and some specific examples are covered.

VTMED 745 Dynamics of Dairy Herd Health and Management

Competitive pressure, increasing input costs, and comparatively stagnant milk and salvage values require dairy producers to become more efficient. The current trend of increasing herd size drives changes in management. Dairy cattle are grouped in herds, although individual cow health and productivity fundamentally underpin the financial success of the dairy enterprise. Veterinarians are called upon to advise dairy producers not only in matters of herd health but increasingly in matters of productivity and management decision making. Identifying opportunity areas to improve productivity and ultimately profitability requires modern veterinarians to recognize the complexity and interdependent milk production, reproduction, and health issues. Until the advent of the new veterinary curriculum, biological systems were often taught in isolation. Yet there are research models that integrate the dynamic nature of dairy production, health, management, and economics through epidemiological and economic modeling. Despite the existence of such advanced research models, they have not been integrated fully into the curriculum. The goal of this course is to teach students the dynamic relationships of herd performance parameters with dairy herd health and management. This is done with a combination of lectures and exercises using two computer simulation models. The following topics are addressed: (1) how often production diseases occur and when, (2) how they are interrelated, (3) the impact of disease on milk production, reproductive performance, and risk of culling, and (4) how to use this information in dairy medicine. The format of this eight-week course (two days per week) is a lecture one day and hands-on work with computer simulation models on the other day.

Biomedical Sciences

VTBMS 346 Introductory Animal Physiology (also BIOAP 311) (Undergraduate)
Fall. 3 credits. Prerequisites: BIOG 105, BIOG 106, or BIOG 101, BIOG 102, BIOG 103, BIOG 104, BIOG 107, BIOG 108; CHEM 107, CHEM 108, or CHEM 200, or CHEM 215, CHEM 216; MATH 106, MATH 111 or MATH 191 or AP credit for any of the above; or one year of college-level biology, chemistry, and mathematics. S-U grades optional. M W F 11:15. E. R. Loew.

A general course in animal physiology emphasizing principles of operation, regulation, and integration common to a broad range of living systems from the cellular to the organismal level. Structure-function relationships are stressed along with underlying physical-chemical mechanisms.

VTBMS 600 Special Projects in Anatomy
Fall. spring. 1 credit per 2.5-hour period. By permission of instructor. S-U grades only. Biomedical science staff.

VTBMS 628 Graduate Research in Animal Physiology (Graduate) [also BIO 6 719]
Fall, spring. 1–3 credits. By written permission of department chairperson and faculty mentor who will supervise the work and assign the grade. S-U grades optional.

Similar to Biologic Sciences 499 but intended for graduate students who are working with faculty members on an individual basis.

[VTBMS 639 Autotutorial in Laboratory Animal Medicine and Science
Spring. 1–3 credits. Letter grades only. Not offered 2002. This course is offered to individuals interested in pursuing various aspects of laboratory animal medicine and science in depth. A variety of resources are available to assist students in their research on a particular topic: the library of the Division of Laboratory Animal Medicine, including the autotutorial library; the university libraries; and special information collected from other institutions. Grades are determined on the basis of a paper, an oral presentation, or the creation of an audiovisual teaching aid, any of which may be selected by the student.]

VTBMS 700 Predictions of Form or Phlogeny
Spring. 1 credit. By permission of instructor. S-U grades optional. J. W. Hermanson.

Form and function are often discussed as a correlated entity in biology. This seminar group starts with the question, Does form really predict function? This is addressed initially with respect to the analysis of paleobiology but then encompasses examples of experimental functional morphology. In particular, there is a growing body of experimental data demonstrating that diverse functions can be achieved with nearly identical morphologies, and that the functional diversity may better be explained by behavior or environmental factors. Might these observations refute current theories about the origin of flight in extinct organisms (i.e., the cuscuar or ground-up theory of flight versus the arboreal gliding theory of flight evolution? Specific topics pursued are selected by participants in this course. Participation is open to interested graduate students, advanced undergraduate students, and veterinary students.

VTBMS 713 Cell Cycle Analysis

Current topics in the control of mammalian cell division are discussed, including growth factors and oncogenes.

VTBMS 720 Special Problems in Physiology (Graduate)
Fall, spring. 1–3 credits. By permission of instructor. Laboratory work, conferences, collateral readings, and reports. Adapted to the needs of students. S-U grades optional.

VTBMS 788 Seminar in Surgical Pathology
Fall, spring. 1 credit. Intended for residents; third- and fourth-year veterinary students may attend. Letter grades only. B. A. Summers and staff.

The major objective of this discussion and seminar course is to introduce the residents to the discipline of surgical pathology. Selected material from the Surgical Pathology Service is prepared in advance for independent review by the residents. The material is presented in a slide-seminar format by the residents under the review of the faculty. Emphasis is placed on pathogenesis using Histologic sections of the lesions. In addition, appropriate guest lecturers cover specific areas of interest and special topics not encountered in the departmental service programs.
Using lectures and group discussions, the course is a survey of major diseases, medical care, and management techniques for all life stages of priates. Topics include physical examination, restraint anesthesia, housing, and management of various nonhuman primates (e.g., bacterial, viral, and parasitic diseases; noninfectious diseases; infant and nursery care reproduction and behavioral considerations; and therapeutics.)

**VTBMS 811 Advanced Physiology Methods I (also BIO S 811) (Graduate)**

Fall. 2 credits. Enrollment limited. Prerequisite: graduate student status or permission of course coordinator. S-U grades only. Lab TBA. J. Ray.

This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

**VTBMS 812 Advanced Physiology Methods II (also BIO S 812) (Graduate)**

Spring. 2 credits. Enrollment limited. Prerequisite: graduate student status or permission of course coordinator. S-U grades only. Lab TBA. J. Ray.

This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

**Clinical Sciences**

**VETCS 700 Pathophysiology of Gastrointestinal Surgery**

Fall. 1.5 credits. S-U grades only. Offered every third year. N. G. Ducharme. Normal anatomy and physiology of the gastrointestinal system in carnivores, herbivores and ruminants is presented initially. This is followed by in-depth discussion of the pathophysiological mechanisms and sequelae of gastrointestinal obstructions including perforation, perforation, appendicitis, adhesions and short bowel syndrome. The emphasis of this course is development of advanced understanding of surgically relevant gastrointestinal problems that lead to appropriate decision making.

**VETCS 701 Pathophysiology of Orthopedic Surgery (Graduate)**

Spring. 1.5 credits. Prerequisites include DVM, MD, or equivalent or approval of instructor. S-U grades only. Offered every third year. Next offered spring 2003. E. J. Trotter.

**VETCS 702 Pathophysiology of Urologic Surgery (Graduate)**

Fall. 1.5 credits. Prerequisite: DVM degree or equivalent. S-U grades only. Offered every third year. Next offered fall 2002. R. P. Hackett, S. L. Fubini, N. G. Ducharme, H. J. Harvey. Using lectures and group discussions, the objective of this course is to explain the pathophysiology of various cardiovascular diseases (cardiac arrest, cardiac arrhythmia under anesthesia) and airway disease (thoracic and upper airway disease). As a basis for these abnormalities, cardiopulmonary hemodynamics and biomechanical aspects of ventilation are reviewed. The emphasis is placed on understanding these mechanisms and outlining the surgeon's response to them.

**VETCS 703 Surgical Principles and Surgery of the Integumentary System (Graduate)**

Spring. 1.5 credits. For graduate DVMs or equivalent in residency or graduate training programs. S-U grades only. Offered every third year. Next offered spring 2003. This course is designed for surgery residents and graduate students. It is a large class discussion of surgical principles and surgery of the integumentary system.

**VETCS 704 Pathophysiology of Urogenital Surgery (Graduate)**

Fall. For graduate DVMs or equivalent in residency or graduate training programs. 1.5 credits. S-U grades only. Offered every third year. Next offered fall 2003. S. Fubini. This course is designed to review and discuss urogenital surgical procedures in animals and the rational basis for them. Pathophysiology will be stressed. Some classes will consist of reprints with discussion.

**VETCS 705 Animal Pain and Its Control (Graduate)**

Spring. 2 credits. By permission of instructor. S-U grades only. R. D. Green, J. W. Lidders, and P. F. Moon.

This course is open to third- and fourth-year veterinary medical students, interns, residents, graduate students, and postdoctoral associates who are interested in the fundamentals and applied concepts of pain in animals. The course emphasizes the physiological and pathophysiologic mechanisms involved in pain perception by animals, their responses (physiological and behavioral) to pain, and the pharmacologic mechanisms underlying anesthetic therapy. The subject material is presented through lectures, group discussions, group readings, and group evaluation of anesthetic protocols.

**VETCS 706 Pathophysiology of Neurologic Surgery (Graduate)**

Spring. 1.5 credits. Prerequisites: DVM, MD, or equivalent or approval of instructor. S-U grades only. Offered every third year. Next offered spring 2004. A. J. Nixon, E. J. Trotter.

This course provides specialized training in neurosurgical techniques and application and discusses pathophysiologic implications of neurosurgical and neurologic diseases.

**VETCS 710 Advanced Veterinary Anesthesiology I**

Fall, winter. 1 credit. Prerequisite: VTME 568, Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. P. F. Moon and staff.

This content of the course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for interns and for residency training in other areas such as surgery and internal medicine. Speakers are from both inside and outside the college. Topics cover the basic sciences as they apply to anesthesiology such as physiology and engineering, applied pharmacology, physiology, and pathology. Clinically oriented lectures are also given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

**Microbiology and Immunology**

**VETMI 315 Basic Immunology (Undergraduate) (also Biological Sciences 305)**

Fall. 3 credits. Strongly recommended: basic courses in microbiology, genetics, and biochemistry. S-U grades optional. J. A. Marsh.

This course is a survey of immunology, with emphasis on the cellular and molecular bases of the immune response. More information is available at the biog/305 courseinfo web site.

**VETMI 320 Principles of Toxicology (Undergraduate) (also Biological Sciences 320 and Toxicology 320)**

This course is an introduction to the interdisciplinary science of toxicology, drawing on material from biology, chemistry, pharmacology, ecology, earth science, risk analysis, and policy studies. Basic principles of toxicological science are presented and illustrated by case studies, such as pesticide toxicity to wildlife reproduction and human health risk assessment at a Superfund hazardous chemical waste site. Chemical risk management is described as a sociopolitical process involving the integration of scientific, economic, and cultural factors.

Independent student projects include a toxic chemical profile and a team analysis of hypothetical "environmental risk scenarios." Periodic talks by toxicology faculty acquaint students with basic research in this interdisciplinary branch of biological science. This is an introductory-level course in toxicology. Format: lecture supplemented by case examples. One field trip to a hazardous chemical waste site. Appropriate for nonmajors seeking basic literacy in environmental and human toxicology. "Gateway course" for students interested in 400- and 600-level toxicology courses.
VETMI 331 General Parasitology (also BIOMI 331; Undergraduate)  
Spring. 2 credits. Prerequisites: zoology or biology; any of the following courses: BIOES 261, 264, 267, 274, 275, 278; BIOL 101, 103, 105, 107, 108, 109, 110, 117, 200, 207; BIOMI 192, 290 or equivalent courses. Letter grades only. D. D. Bowman.  
An introduction to the basic animal parasites, stressed systematics, taxonomy, general biology, ecological interactions, and behavior of non-medically important groups. Introduces the major animal parasites, protozoan, nematode, platyhelminth, acanthocephalan, annelid, and arthropod.

[VETMI 404 Pathogenic Bacteriology and Mycology (also BIOMI 404)  
Spring. 2 or 3 credits (3 credits with lecture and seminar). Prerequisites: BIOMI 290 and 291. Seminar is required of graduate students and open to undergraduates with permission of instructor. Maximum enrollment 15 students. Letter grades only. Not offered 2002. D. P. Debbie.  
This is a course in medical microbiology, presenting the major groups of bacterial and mycotic pathogens important to human and veterinary medicine. The course emphasizes infection and disease pathogenesis. Topics include disease causality; interactions of host, pathogen, and environment, including immunity to bacteria and fungi; and principles of antimicrobial therapy and drug resistance. A companion seminar addresses the current and classic literature related to microbial pathophysiology on the cellular and molecular levels.]

VETMI 408 Viruses and Diseases I (also Biological Sciences 408)  
Spring. 2 credits. Intended primarily for graduate and undergraduate microbiology majors. Prerequisites: Microbiology 290 and 291 (College of Agriculture and Life Sciences). Recommended: VETMI 315, Genetics 281. Letter grades only. Offered even-numbered years. J. W. Casey.  
The course covers basic concepts in virology with emphasis primarily on DNA virus-host interactions, strategies for gene regulation, and mechanisms of pathogenicity. Selected viral infections that result in immune dysfunction and neoplasia are highlighted in the context of approaches to prevent or reduce the severity of diseases.

[VETMI 409 Viruses and Disease II (also BIOMI 409)  
Fall. 2 credits. Prerequisites: BIOMI 290 and 291 or permission of instructor. Recommended: BIOMI 408, BIOMI 330-332, BIOMI 432. Offered even-numbered years, next offered fall 2002. G. Whitlaker.  
This course is complementary to BIOMI 408. Viruses and Disease I, and emphasizes RNA viruses. The course is complete in its own right. As such, completion of BIOMI 408 is not a prerequisite. The course covers the structure and classification of viruses, entry, genome replication, and virus assembly. Particular emphasis is placed on virus-host cell interactions. Vaccinations, chemotherapy, and evolution of viruses are also discussed.]

VETMI 433 Medical Parasitology (also BIOMI 417; Undergraduate)  
Fall. 2 credits. Prerequisites: zoology or biology; any of the following courses: BIOES 261, 263, 264, 267, 274, 275, 278; BIOL 101, 103, 105, 107, 108, 109, 110, 117, 200, 207; BIOMI 192, 290 or equivalent course. Letter grades only. D. D. Bowman.  
This course is a systematic study of arthropod, protozoan, and helminth parasites of public health importance, with emphasis on epidemiologic, clinical, and zoonotic aspects of these parasitisms.

VETMI 605 Special Projects in Microbiology (Undergraduate)  
Fall, spring, 1–3 credits. By permission of instructor. Prerequisite: a good background in microbiology or immunology. Preferably, students should have background in pathogenic microbiology and immunology. S-U grades only. Microbiology staff. The course normally provides an opportunity for the student to work in a research laboratory or carry out a special project under supervision.

VETMI 700 The Biology of Animal Viruses (Graduate and Upper-Level Undergraduate)  
Fall. 2 credits. Letter grades only. Offered odd-numbered years. C. R. Parmish and staff.  
This course examines current topics in studies of animal viruses, including some comparisons with plant viruses where similar mechanisms apply. Selected topics are examined in depth, including the structures of viruses and their components, viral nucleic acids and replication strategies, detection of the interactions between viruses and their host cell components and metabolism. Other topics include the evolution and selection of viruses, novel approaches to the prevention of virus infection, and methods for antiviral chemotherapy.

[VETMI 701 Pathogenesis of Viral Diseases (also VTMED 619)  
Spring. 2 credits. Given during 8-week spring distribution period, January–March. Open to graduate students and advanced undergraduates by permission of instructor. Strongly recommended prerequisite: Immunology. Letter grades only. Generally offered odd-numbered years, but next year offered, still to be determined. Microbiology faculty.  
Course content and objectives: the course focuses on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spread between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease are explored. This includes a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory, and urogenital systems. The basic principles of virus taxonomy, structure, and replication are included to introduce various viral groups and their special properties. A review of methods of intervention (vaccination, antiviral drugs) are also covered. Lectures are derived from relevant current literature; Nathanson's Viral Pathogenesis, 1997; and Field's Virology, third edition, 1996. Relevant materials are placed on reserve in the veterinary library.]
VETMM 773 Advanced Work in Avian Immunology
Fall, spring. Variable credit. Letter grades only. K. A. Schat.

VETMM 783 Seminars in Parasitology (Graduate)
Fall, spring. 1 credit. Open to veterinary students or graduate students; others by permission of instructor. S-U grades only. D. D. Bowman.

This is a seminar series designed to acquaint students with current research in the field of parasitology. The range of topics is determined, in part, by the interests of those participating and may include such topics as the ecology of parasitism, parasite systematics, wildlife parasitology, and parasitic diseases of plants and animals, including humans.

Molecular Medicine

VETMM 299 Undergraduate Research in Pharmacology
Summer. 3 to 6 credits (3 credits per 120 contact hours). Prerequisites: one year of basic biology, BIOG 100 level. Letter grades only. R. A. Cerione.

This is a mentored research apprenticeship program, designed to give laboratory experience to qualified unmatriculated high school students (participating in Cornell Summer College) or Cornell undergraduates.

Students are placed in research laboratories with designated project under the direct supervision of a research associate (upper-level graduate-student; or faculty member). A minimum of 120 hours of laboratory time is expected per three course credits. Students are graded on preparation, participation in laboratory academic life, and appropriate acquisition of techniques. At the end of the six-week session, students are expected to give a brief (15- to 20-minute) oral presentation of their work, and submit a manuscript in a form suitable for publication. The faculty director of the laboratory has ultimate responsibility for evaluating the student's work and assigning the grade.

VETMM 470 Biophysical Methods (also A&EP 470)
Spring. 3 credits. Prerequisite: permission of instructor. Letter grades only. M. Lindau.

This course is an overview of the diversity of modern biophysical experimental techniques used in the study of biological systems at the cellular and molecular level found in articles published in the Biophysical journal. Topics covered include methods that examine both structure and function of biological systems: light microscopy, fluorescence microscopy, Fourier optics and image processing, confocal and multiphoton microscopy, phase contrast, electron microscopy, X-ray diffraction and protein structure determination, multidimensional NMR, spectroscopy, chromatophores, calcium measurements, resonance energy transfer, membrane biophysics, electrophysiology, ion channels, action potentials, ligand-gated channels, fluctuation analysis, patch-clamp, molecular biology of ion channels, rapid kinetics, caged compounds, transmitter release, capacitance measurements, amperometry, optical traps, and molecular force measurements. The course format includes assigned literature reviews by the students on specific topics and individual students' presentation of these topics. The course is intended for students of the engineering, physics, chemistry, and biological disciplines who seek an introduction to modern biophysical experimental methods. Due to the interdisciplinary nature of the course, students have diverse backgrounds. A basic knowledge of and interest in physics and mathematics is expected but strong attempts are made to give an intuitive understanding of mathematics and physics involved. Some knowledge of physical chemistry, molecular and cell biology, or neurobiology is helpful. Depending on individual backgrounds all students find certain aspects of the course easy and other aspects demanding.

VETMM 610 Cellular and Molecular Pharmacology
Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years; next offered fall 2002. G. A. Weiland and molecular medicine faculty.

This graduate-level course surveys the molecular and cellular aspects of receptor mechanisms, signaling pathways, and effector systems. Topics include drug-receptor interactions; ligand- and voltage-gated ion channels; G protein growth factor signaling, lipid signaling; calcium, nutrient and nitric oxide signaling; and mechanisms of receptor-mediated effects on neural excitability, electrical pacemakers, muscle contraction, and gene expression.

VETMM 611 Systems Pharmacology
Spring. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. G. A. Weiland and molecular medicine faculty.

This graduate-level course surveys system- and organ-related aspects of pharmacology. Topics include drug disposition, pharmacokinetics; autoinamic pharmacology; central nervous system pharmacology; pharmacology of inflammation, allergy and platelet function; cardiovascular, gastrointestinal and endocrine pharmacology; and chemotherapy, including antimicrobial agents and cancer chemotherapy.

VETMM 672 Protein Kinetics (also CHEM 672)
Spring. 4 credits. Prerequisite: CHEM 288 or 390, BIOMB 331, or permission of instructor. Letter grades only. B. A. Baird.

This course focuses on protein interactions with ligands and consequent changes in structure and activity. Topics include protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation of cell membrane receptors in regulating cellular activities.

VETMM 700 Calcium as a Second Messenger in Cell Activation
Fall. 2 credits. By permission of instructor. Lecture-discussion. S-U grades only. Offered even-numbered years; next offered fall 2002. G. A. Weiland.

This course focuses on regulation of intracellular calcium and techniques for studying calcium movements and distribution in cells. Topics include calcium channels and exchangers, calcium-binding proteins and calcium stores; phosphatidylinositol turnover, release of calcium from intracellular stores, and activation of calcium influx; calcium gradients and oscillations; mechanisms of exocytosis and the proteins involved. Each topic is introduced with a lecture followed by discussion of recent papers from the literature.

VETMM 701 Organ System Toxicology (also TOX 611)
Fall. 1 credit. For graduate students in environmental toxicology. S-U grades only. Offered even-numbered years; next offered fall 2002. W. S. Schwark.

This is a minicourse on molecular mechanisms involved in chemical toxicity. Specific examples of toxicity in organ systems such as the nervous system, kidney, liver, respiratory tract, and cardiovascular system are considered.

VETMM 703 Receptor-Ligand Interactions (also BIONB 790-02)
Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered odd-numbered years. R. E. Oswald and G. A. Weiland.

The course covers both the practical and theoretical tools for the study of ligand-receptor interactions, emphasizing the quantitative and physical chemical aspects of receptor theory. Topics discussed are basic methods of radioligand binding assays, including separation and measurement of bound and free ligand; characterization of receptor function; analysis of receptor structure; thermodynamic basis of the binding; methods of analyzing equilibrium binding; equilibrium binding for complex binding mechanisms; and kinetics of simple and complex binding mechanisms.

VETMM 704 CNS Synaptic Transmission
Fall. 2 credits. Maximum enrollment 20 graduate students and undergraduate seniors by permission of instructor. S-U grades optional. Offered odd-numbered years. L. M. Nowak.

This is a survey course in vertebrate central nervous system physiology and pharmacology, and it focuses on mechanisms of neurotransmitter action at the neuronochemical and cellular levels. Roles for selected neurotransmitters in normal and dysfunctional brains are covered. Topics are introduced in lectures and followed up in discussions of recent journal articles.

VETMM 705 Molecular Mechanisms of Receptor-G Protein Coupled Signaling
Fall. 2 credits. S-U grades optional. Offered odd-numbered years. R. A. Cerione.

This course focuses on the mechanisms of action of GTP binding proteins. Several receptor-coupled signaling systems are examined, including adenyl cyclase, vertebrate vision, phosphatidylinositol lipid turnover, receptor systems regulating various ion channels, and receptors involved in cell growth regulation.

VETMM 706 Growth Factor-Coupled Signaling (also BIONB 734)
Fall. 0.5 credits. By permission of the instructor. S-U grades optional. Offered odd-numbered years. R. A. Cerione.

The general theme of this course is mitogenic signaling pathways. Receptor tyrosine kinases, src, ras, and ras-regulatory proteins are covered.

VETMM 707 Protein NMR Spectroscopy (also BIONB 730)
The fundamentals of NMR are presented and students acquire the tools necessary to establish an in-depth understanding of multidimensional, multinuclear NMR experiments. Special approaches for applying solution NMR techniques to large proteins are discussed.

**VETMM 708 Lipid Second Messengers**
Fall. 2 credits. Students with a general biology background may enroll by permission of instructor. Offered even-numbered years; next offered fall 2002.
H. A. Brown.
This course covers the biochemical pathways involved in the production of lipid second messengers. These pathways function as essential elements of cellular signal transduction cascades. Topics include pathways of phospholipid synthesis, regulation of major mammalian phospholipases by receptors linked through G-proteins and tyrosine kinase receptors to intracellular cascades, and subsequent metabolism of lipid products. The roles of lipids in regulating cell processes, such as membrane structure, exocytosis, cell cycle, and apoptosis, are topics for discussion following reviews of recent publications. A background in general biochemistry is recommended.

**Special Projects and Research in Pharmacology**
Fall, spring, summer. 1-3 credits. By arrangement with instructor. S-U grades optional. Independent study or research.
Field of pharmacology faculty.
These courses cover a variety of topics related to the research interests of the faculty.

**VETMM 711 The Role of Calcium in Stimulus-Secretion Coupling**
C. M. S. Fewtrell.

**VETMM 713 Mechanisms of Growth-Factor Action**
R. A. Cerione.

**VETMM 714 Central Nervous System Neurotransmitters**
L. M. Nowak.

**VETMM 718 Structure-Function of the Nicotinic Acetylcholine Receptor**
R. E. Oswald.

**VETMM 730 Graduate Research in Molecular Medicine**
Fall, spring, and summer. 1-12 credits. By permission of instructor. S-U grades optional. This course is offered by individual faculty members in the Department of Molecular Medicine for graduate students undertaking research toward M.S. or Ph.D. degrees.

**Directed Readings in Pharmacology**
Fall, spring, and summer. 1-3 credits each topic. By arrangement with instructor. S-U grades optional. Field of pharmacology faculty. Reading and discussions.
These courses are offered to small groups or to individual students.

**VETMM 742 Receptor Mechanisms**
G. A. Weiland.

**VETMM 745 Biochemical Neuropharmacology**
G. A. Weiland.

**VETMM 747 Amino Acid Neurotransmitters**
L. M. Nowak.

**VETMM 748 Stimulus-Secretion Coupling**
C. M. S. Fewtrell.

**VETMM 750 Cell Calcium**
C. M. S. Fewtrell.

**VETMM 760 Advanced Topics in Pharmacology**
Molecular medicine faculty.

**Topics in Cancer Cell Biology**

**VETMM 761 Topics in Cancer Cell Biology**
Fall. 1 credit per section. Letter grades only. Section 02 will not be offered 2001-2002. B. Pauli, J. Guan, A. Yen. Section 1, Cell Adhesion Molecules; Signaling and Cancer is taught by Dr. Jun-in Guan. This section of the topics in cancer cell biology introduces the role of cell adhesion receptors in cancer. The emphasis is on the integrin and cadherin families of cell adhesion molecules and function of integrin, integrin interactions with cytoskeleton, intracellular signaling pathways in cell-matrix interactions, integrin-mediated signaling in cell migration, proliferation and survival, changes of integrins in tumors and metastasis, structure and function of cadherins, and signaling mechanisms in cell-cell interactions in normal development and cancer.
Section 2, Cell Cycle Analysis is taught by Dr. Andrew Yen. This course presents: (1) a brief historical review of the cell cycle, (2) a summary of cell cycle regulatory processes, and (3) practical methods for cell cycle analysis, including mathematical representations. Topics include: growth control of bacterial cell cycle including chemostats, mammalian cell tissue, cell synchronization, flow cytometry, age-density representation, G1 regulation, labile regulatory protein models, cell transformation, regulation by growth factors and the cytoskeleton, cyclin/E2F/RB regulatory model, practical examples for analysis of cell cycle phase durations, cell cycle phase specific growth factor sensitivity, and timing of RB protein phosphorylation within the cell cycle. The objective of the course is to present graduate students with methods for cell cycle analyses that will be useful in their research.

**Population Medicine and Diagnostic Sciences**

**VTPMD 299 Undergraduate Research in Epidemiology**
Summer. 3 credits. Limited to undergraduate students. Letter grades only. Prerequisites are one year of basic biology (Score of 5 on Biology Advanced Placement Examination of the College Entrance Examination Board or BLOG 100 level). Permission of the instructor can be submitted for the prerequisite. J. Scarlett. This is a mentored research apprenticeship program designed to give laboratory experience in applied epidemiology to qualified unmatriculated high-school students (participating in Cornell Summer College) or Cornell undergraduates.

Students are placed in a research laboratory with a designed project under the direct supervision of a research associate (upper-level graduate student, post-doc, or faculty member). A minimum of 120 hours of laboratory time is expected per three course credits. Students are graded on preparation, participation in laboratory academic life, and appropriate acquisition of techniques. At the end of the six-week session, students are expected to give a brief (15-20 minute) oral presentation on their work, and submit a manuscript in a form suitable for publication. The faculty director of the laboratory has ultimate responsibility for evaluating each student's work and assigning the grade.

**VTPMD 664 Introduction to Epidemiology (Graduate)**
Fall. 3 credits. Prerequisites: Statistics and Biometry 601 (College of Agriculture and Life Sciences) may be taken concurrently or by permission of instructor. S-U grades optional. H. N. Erb. Lectures and discussion deal with the fundamentals of epidemiology. Current topics in epidemiology from the fields of nutrition, infectious and chronic diseases, occupational medicine, and veterinary medicine are reviewed to illustrate methodology and practice of epidemiology, especially of clinical-trial design and infectious-disease epidemiology.

**VTPMD 665 Study Designs (Graduate)**
Spring. 2 credits. Prerequisites: VTPMD/VETCS 664 and Statistics and Biometry 601 (College of Agriculture and Life Sciences). S-U grades optional. H. Q. Mohammed. Design and interpretation of cross-sectional, case-control, and cohort studies (including controlled clinical trial) are covered. Design issues include sample size, bias, and relative advantages and disadvantages.
The course objectives are (1) to know the difference between different epidemiologic study designs and relative advantages and disadvantages of each; (2) given a problem (usually a field situation), be able to design an appropriate epidemiologic study; (3) be able to effectively analyze and critique published epidemiologic studies.
The course consists of lectures on the principles of epidemiologic study design and related issues (sample size calculations, validity and precision, and identification and minimizing of bias); basic analysis of epidemiologic data; and discussion of published epidemiologic studies. These studies include observational cohort studies (prospective and retrospective), cross-sectional studies, case-control studies, and hybrid studies (amidibirectional, and other hybrid designs).

**VTPMD 666 Advanced Methods in Epidemiology (Graduate)**
Fall. 3 credits. Prerequisites: VTPMD/VETCS 665 and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. M W F 8:45-9:35. Y. T. Grohn.
Concepts introduced in VTPMD 664 and VTPMD 665 are further developed, with emphasis on statistical methods. Topics include interaction, effect modification, stratified analysis, matching and multivariate (logistic regression) methods, survival analysis, and strategies for the analysis of epidemiologic data.

FACULTY ROSTER

FACULTY ROSTER

VTPMD 700 Special Projects in Diagnostic Endocrinology
Fall, spring. 1–3 credits. By permission of instructor. Letter grades only. Schambacher and Lamb. An independent study course. Students have the opportunity to research a particular topic in diagnostic-clinical endocrinology of animals.

VTPMD 701 Special Projects in Infectious Diseases
Fall, spring. 1–3 credits. By permission of instructor. S-U grades optional. Diagnostic laboratory faculty. This course provides laboratory experience with attention to specific aspects of infectious disease problems.

VTPMD 702 Special Topics in Infectious Diseases
Fall, spring. 1–3 credits. By permission of instructor. S-U grades optional. Diagnostic laboratory faculty. The objective of this course is to offer a broad exposure to various aspects of infectious diseases.

VTPMD 703 Doctoral-Level Thesis Research (Graduate)
Fall, spring. 1–3 credits. By permission of instructor. S-U grades only. Diagnostic laboratory faculty. Research leading to a Ph.D. degree.

VTPMD 704 Master’s-Level Thesis Research (Graduate)
Fall, spring. 1–3 credits. By permission of instructor. S-U grades only. Diagnostic laboratory faculty. Research leading to an M.S. degree.

VTPMD 705 Interdisciplinary Approaches to Animal Health
Spring. 3 credits. Minimum enrollment 7 students. S-U grades optional. A. L. Rivas.

VTPMD 707 Clinical Biostatistics (Graduate)
Spring. 2 credits. For veterinary residents or graduate students. Letter grades only. Offered odd-numbered years. Next offered spring 2003. H. N. Erb, Y. T. Grohn, H. O. Mohammed, and J. M. Scarlet. This course explains the theory behind and interpretation of parametric and nonparametric statistical techniques commonly employed in research-clinical medicine. Students analyze small data sets using a commercial statistical software package.

VTPMD 708 Epidemiology Seminar Series (Graduate)
Fall, spring. 1 credit. S-U grades only. Epidemiology faculty. Advanced theoretical and analytical epidemiologic concepts and techniques are discussed.

VTPMD 766 Graduate Research (Graduate)
Fall, spring, summer. Credit and hours TBA. Must be registered in masters or Ph.D. program in epidemiology and permission of the graduate faculty member concerned. S-U grades only. Epidemiology faculty. This course enables students outside the section of Epidemiology to receive graduate research credits for projects with epidemiologic components.

VTPMD 799 Independent Studies in Epidemiology
Fall, spring. 1–3 credits. H. N. Erb, Y. T. Grohn, H. O. Mohammed, and J. M. Scarlet. The purpose of this course is to investigate an epidemiologic topic with one of the instructors. It provides experience in problem definition, research design, and the analysis of epidemiologic data.

The College of Arts and Sciences awards one undergraduate degree, the Bachelor of Arts degree

Summary of Requirements
1) First-Year Writing Seminars: two courses. (See John S. Knight Institute for Writing in the Disciplines p. 563.)
2) Foreign language: proficiency in one language or qualification in two, zero to four courses, depending on background.
3) Distribution: nine courses, three of which are satisfied with a major in humanities or social sciences and four of which are satisfied with a major in sciences.
4) Breadth: two courses (may be among courses for distribution, major, or electives).
5) Major.
6) Electives: four or five courses (at least 15 credits) not used to fulfill other requirements and not in the major field.
7) Residence: eight full-time semesters, unless a student can successfully complete all other requirements in fewer than eight semesters and meet the additional criteria to accelerate graduation. (See below under "Acceleration").
8) 34 courses: a three- or four-credit course counts as one course. A two-credit course counts as half a course; a one-credit course does not normally count toward the requirement; a six-credit language course counts as one and one-half courses. (See below under "Courses and Credits" for some one-credit courses in music, dance, and theatre performance that can be cumulated to count as one-half course and for counting other five and six credit courses.
9) Credits: a total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. (Note "Non-credit courses below.")
10) Physical education: completion of the university requirement (passing a swim test and two one-credit non-academic courses). Please note that physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester.
11) Application to graduate. (See below under "Graduation").

Explanation of Requirements

Foreign Language Requirement
The faculty considers competence in a foreign language essential for an educated person. Studying language other than one's own helps students understand the problems of language, our fundamental intellectual tool, and more fully opens another culture for exploration. The sooner a student acquires competence, the more useful it will be.

Hence, work toward the foreign language requirement should be undertaken in the first two years. Courses in foreign languages and/or literature are taught in the College of Arts and Sciences by the following departments: Africana Studies and Research Center, Asian Studies, Classics, German Studies, Linguistics, Near Eastern Studies, Romance Studies, and Russian Literature.

The language requirement may be satisfied in one of two ways:
1) by attaining proficiency (competence at the intermediate level) in one language or
2) by attaining qualification (mastery of an introductory sequence) in two languages.

Proficiency
Proficiency may be attained in languages by passing an intermediate (usually 200-level) Cornell course (or Chinese or Japanese 161). Introductory courses in some less commonly taught languages are taught at the 200-level or above; for example, Ancient Egyptian and Welsh; these do not confer proficiency. Proficiency can also be earned by examination. A score of 4 or 5 on an AP literature exam in French, Italian, or Spanish earns proficiency and three credits. A score of 4 or 5 on the AP exam in German earns proficiency and three credits. Students with those scores should also take the Cornell Advanced Standing Examination (CASE), given during orientation week, to see if they can earn three additional credits. A score of 4 or 5 on an AP language exam earns three credits but does not carry with it proficiency. However, a student who received a score of 4 or 5 on an AP language exam can earn proficiency and an additional three credits by scoring high enough on the CASE. Students with appropriate scores on Cornell Language Placement tests or SAT II examinations are also eligible to take the CASE. Native speakers and writers of a language other than English may earn proficiency and six credits by taking the CASE or an individual exam (if no CASE is available).

Qualification
Qualification may be attained in any of the following ways:
1) Three years of high school study in any one language gives qualification in that language. No demonstration of competence is necessary. Note, however, that this route to qualification does not guarantee entrance into an intermediate level course. Students who want to continue studying the language must be placed in the appropriate course through an examination. Being placed below the intermediate level does not cancel the qualification.
2) Passing the requisite Cornell course, the last course of an introductory sequence. Note: Except in the case of Sanskrit, completion of language sequences 131-132 does not constitute qualification.

PROGRAM OF STUDY

Introduction
The College of Arts and Sciences—composed of departments in the humanities and the arts, the basic sciences, mathematics and computer science, and the social sciences and history—is a community of about 4,100 undergraduates and 600 faculty members. The college values intellectual breadth and rigor, individual choice and responsibility, imaginative courses of study, and development of critical thinking and writing. The college is also a graduate school and research center attracting faculty whose research and scholarly and creative work require first-rate academic facilities and who bring to all their students the profound questioning and the current ideas of contemporary scholarship. Finally, the college exists within a university of several other colleges and of about 19,000 students and 1,500 faculty members. This wider community provides depth and diversity of applied and professional studies beyond what one undergraduate college alone can offer. Students may draw upon the knowledge and facilities of the other undergraduate colleges at Cornell to supplement their studies. Abundant variety and outstanding quality in many fields, including interdisciplinary fields, give the college and the university its distinctive character.

The richness of the college's curriculum is extraordinary; there is no course that all students must take, and there are nearly 2,000 from which they may choose. By choosing courses each semester, students design their own education. They strike a balance between developing known interests and exploring new subjects. They sharpen their verbal and quantitative skills. They also come to understand more thoroughly the Western tradition and learn something about the non-Western world and its peoples. An education in the liberal arts and sciences means honing one's critical capacities, learning about oneself in nature and culture, and gaining real experience with views of the world radically unlike one's own. All this is highly individual, and the college relies on each student and faculty adviser to design a sensible, challenging, and appropriate course of study.

Yet the faculty believes that each student's education should have certain common qualities. These include familiarity with several different ways of knowing that are reflected in clusters of disciplines in the natural sciences, the social sciences, and the humanities and the arts. In addition to these general areas of knowledge, students study foreign languages, acquire effective writing and quantitative skills, and concentrate on one particular field to develop the powers of imaginative and critical thinking as fully as possible. To accomplish these objectives, the college has certain requirements for graduation.
3. Achieving the requisite score (see chart) on the SAT II taken in high school or a score of 56 or higher on the appropriate Cornell LP (Language Placement) test.

Students may earn a score of 56 on the placement test at the end of an intermediate course, numbered 122 (second semester of the introductory sequence) and consequently attain qualification without taking 123, the third semester of the introductory sequence.

4. By departmental or (when no placement test is available) individual examination at Cornell (if a qualified examiner is here).

Placement in Language Courses and Advanced Placement Credit

Placement into language courses and advanced placement credit are separate results of examinations.

Placement

Entering students who have had two or more years of high school study in a language, who have been awarded credit for language work at another college or university, who are native speakers, bilingual, or have spoken the language at home, may enroll in a course in the same language only after being placed by examination. The placement exam may have been taken in high school (SAT II, taken after the last course, or AP, if the score was 4 or 5) or at Cornell (LP tests). Students may, but need not, retake a language test if a year or more has passed since last taking it. Being placed into the first course at an intermediate level course does not earn credit toward the degree.

Degree credit is earned only for demonstrated mastery of work equivalent to the first course at an intermediate level at Cornell, and placement into the second intermediate course.

Placement Tests and Advanced Placement Credit

1. The following language placement and advanced standing tests are scheduled at the beginning of each semester: Chinese, Japanese, and Korean (schedule available from the Department of Asian Studies, 388 Rockefeller Hall); German (schedule available from the Department of German Studies, 185 Goldwin Smith Hall); French, Italian, and Spanish (schedule available from the Department of Romance Studies, 303 Morrill Hall); and Russian (schedule available from the Department of Russian Literature, 220 Morrill Hall). Please note that the advanced standing examination in French, German, Italian, Russian, and Spanish, is called the CASE (Cornell Advanced Standing Examination).

Eligibility for the CASE may be determined from the placement tables below. In Russian only, all students seeking placement take the CASE.

Native speakers of Spanish who have completed their secondary education in a Spanish-speaking country do not take the CASE. For these students, the Spanish program offers a walk-in service, the Native Language Accreditation for Spanish, in the third week of September and the first week of February. Students interested in this service should contact Eleanor Dozier in Morrill Hall. Spanish-English bilinguals who do not fit the definition of "native speakers," and whose test scores make them eligible, should take the CASE.

*Students who have a score of 65 of higher on the LPI, or 690 or higher on the SAT II, or an AP score of 4 or 5 may enroll in Italian 201 or 203 without taking the CASE.
Substitutions to the Language Requirement

Outright waivers of the requirement are never granted. However, rarely and as appropriate, alternatives to language acquisition are approved. Legitimate requests for substitutions require evidence of inability to learn foreign languages in a classroom setting. Most students provide documentation of learning disabilities relating to foreign language acquisition (e.g., an auditory processing problem) to Student Disability Services, 420 Computing and Communications Center, 255–4545. Other students who may never have been tested for a disability reveal it through repeated and dedicated but vain attempts in formal language courses. A poor grade in a Cornell introductory language course or taking the LP exam repeatedly and unsuccessfully is not adequate evidence.

Students who wish to request a substitution for the normal requirement should meet with Dean Walbridge, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall. If Dean Walbridge determines that the request has merit, the student meets with the Language Substitution Review Committee. This committee makes the final decision for or against a substitution. If a substitution is allowed, the committee works with the student to select substitute courses.

Distribution Requirements

In satisfying the distribution requirements, students become acquainted with a broad range of subject matter and points of view among disciplines in the college and explore areas that may be entirely new to them. Or, to look at it the other way, as first-year students explore subjects that interest them, they satisfy some of the distribution requirements along the way. Consequently, first-year students should take courses to prepare for possible majors and to explore subjects new to them, and take no course only in order to satisfy a distribution requirement. Although, students may complete the requirements over eight semesters, they can take advanced courses in subjects they (perhaps unexpectedly) find intriguing only if they have completed the introductory prerequisites. Consequently, students should not postpone satisfying distribution requirements until the last semester. Once sure of a major, students should consider which distribution requirements are yet unfilled and how to fulfill them with courses that complement their overall program.

Students must take a total of nine courses of three or more credits each for the distribution requirements: four courses from Groups I and II below, at least two of which are from Group I and at least one of which is from Group II (for example, one chemistry, one physics, one geology, and one mathematics), five courses from Groups III and IV below, with at least two in each group and two in the same department (for example, one course in sociology, one in history, one in history of art, and two in theater arts). Courses that satisfy distribution requirements are listed and described in their departmental sections. The Roman numeral— I, II, III, or IV indicates which group they satisfy. If there is no numeral at all, the course satisfies no distribution requirement. Courses in the major may be applied to the distribution requirements (unless prohibited by one of the restrictions noted under restrictions on applying AP credit, transfer credit, and Cornell courses to distribution requirements).

I. Physical and Biological Sciences

In fulfilling the four courses in science and quantitative reasoning, students must take at least two science courses. At least one of these must be from the primary list of courses in science departments in the College of Arts and Sciences.

Primary list:
- Anthropology
- Human Biology and Evolution
- Human Paleontology
- Lab and Field Methods in Human Biology
- Astronomy
- Computer Science
- Numerical Methods in Computational Molecular Biology
- Earth and Atmospheric Sciences, except 150, 250

Physics

Chemistry

Psychology

111 Brain, Mind, and Behavior
222 Hormones and Behavior
244 Biopsychology Laboratory
325 Biopsychology of Learning and Memory
326 Introduction to Sensory Systems
424 Neuroethology
429 Offaction and Taste: Structure and Function
431 Effects of Aging on Sensory and Perception Systems
492 Sensory Function

Biological Sciences: While there are several single-semester biology courses particularly suitable for distribution, students must note that introductory biology can count for distribution only when completed as a two-semester sequence. 102–110, 105–106, or 101 and 103 plus 102 and 104, or 107–108, or a combination of the first term of one sequence and the second term of another. Students may select additional science courses from the following supplementary list:

Animal Science:
- 100 Domestic Animal Biology I
- 150 Domestic Animal Biology II
- 212 Animal Nutrition

Anthropology:
- 101 Introduction to Anthropology
- 208 The Evolution of Human Mating
- 390 Primate Behavior and Ecology

Applied and Engineering Physics:
- 110 The Laser and its Applications in Science, Technology, and Medicine

Electrical Engineering:
- 430 Lasers and Optical Electronics

Chemistry:
- 110 The Laser and its Applications in Science, Technology, and Medicine

Entomology:
- 212 Insect Biology

Food:
- 200 Introductory Food Science

Materials Science and Engineering:
- 281 The Substance of Civilization

Natural Resources:
- 201 Environmental Conservation
- 210 Introductory Field Biology
- 301 Forest Ecology

Nutritional Science:
- 115 Nutrition and Health

Psychology:
- 223 Introduction to Biopsychology
- 326 Evolution of Human Behavior

II. Quantitative and formal reasoning

In completing four courses in science and quantitative reasoning, students must take at least one of the following courses:

Biometry:
- 261 Statistical Methods

City and Regional Planning:
- 321 Introduction to Quantitative Methods

Computer Science:
- 100 Introduction to Computer Programming
- 211 Computers and Programming
- 312 Structure and Interpretation of Computer Programs
- 486 Applied Logic

Economics:
- 319 Introduction to Statistics and Probability
- 320 Introduction to Econometrics
- 321 Applied Econometrics

Industrial & Labor Relations:
- 210 Statistical Reasoning I
- 211 Statistical Reasoning II

Linguistics:
- 216 Mathematical Linguistics

Mathematics: all courses except 101 and 109

Operations Research & Industrial Engineering:
- 115 Engineering Applications of OR&IE

Philosophy:
- 251 Introduction to Deductive Logic
- 351 Deductive Logic
- 431 Mathematical Logic
- 432 Topics in Logic
- 434 The Foundations of Mathematics
- 436 Intensional Logic

Physics:
- 205 Reasoning about Luck
- 209 Relativity and Chaos
- 210 Random Classical & Quantum Physics

Psychology:
- 350 Statistics and Research Design

Sociology:
- 301 Evaluating Statistical Evidence
If students choose two courses from this list to satisfy part of the distribution requirement, those two courses may not have significant overlap. For example, students may not choose two beginning courses in statistics.

III. Social sciences and history

The following departments are included in Group III, social sciences and history. Most (although not all) courses in these departments satisfy distribution in this group. Students should consult the departmental listings for options that are noted as satisfying Group III.

- Anthropology
- Economics
- Government
- History
- Linguistics
- Psychology
- Sociology

In addition, interdisciplinary departments and programs offer courses in Group III. Again, students should consult the departmental and program listings and note which courses satisfy Group III.

- Africana Studies
- American Studies
- Archaeology
- Asian Studies
- Asian American Studies
- Biology and Society
- Cognitive Studies
- Near Eastern Studies
- Religious Studies
- Science and Technology Studies
- Women's Studies

Finally, CRP 100 and 101 and ENGRG 250 and 298 satisfy distribution in Group III.

IV. Humanities and the arts

The following departments are included in Group IV, humanities (literature and philosophy) and the arts. While language and logic courses do not count for distribution in this group, most (although not all) courses in these departments do. Students should consult the departmental listings for options that are noted as satisfying Group IV.

- Africana Studies
- American Studies
- Archaeology
- Asian Studies
- Asian American Studies
- Biology and Society
- Cognitive Studies
- Near Eastern Studies
- Religious Studies
- Science and Technology Studies
- Women's Studies

Restrictions on Applying AP Courses and Credit from Other Institutions to the Distribution Requirements

Students may apply up to two courses of approved advanced placement or transfer credit towards distribution requirements in Groups I and II (physical/biological sciences and quantitative/formal reasoning), as long as they take at least one course from the primary list in an Arts and Sciences department at Cornell. Transfer credit applied to distribution in Group II (quantitative/formal reasoning) must be in mathematics, statistics, or computer science; it may not be in other quantitative subjects. Courses taken at other institutions in mathematics or computer science must be approved for transfer and distribution credit by the Departments of Mathematics or Computer Science respectively. Statistics courses taken at other institutions in social science departments must be approved by the relevant department in Arts and Sciences (e.g., psychology or sociology); statistics courses taken in mathematics or statistics departments must be approved by the Department of Mathematics.

Students may apply no advanced placement or transfer credit from other institutions toward satisfaction of the distribution requirements in Groups III and IV (social sciences/history and humanities/arts).

Students who transfer to the college from another institution or who enter through the Mid-Year Freshman Program are under the above rules for advanced placement credit, but are eligible to have credit for post high school coursework taken during regular semesters (not summer school) at their previous institution count towards all distribution requirements. Transfer students receive a detailed credit evaluation when they are accepted for admission.

Restrictions on Applying Cornell Courses to the Distribution Requirement

1) First-Year Writing Seminars may not count toward any distribution requirement.
2) No single course may satisfy more than one distribution requirement.
3) Students may count courses in their major towards distribution. However, courses offered or cross-listed by their major department may not be counted toward any distribution category beyond the usual category of the major department itself. For example, a history major may not count a course cross-listed between history and a literature department toward distribution in the humanities.

Breadth Requirements

Students must include in their undergraduate curricula at least one Arts and Sciences course that focuses on an area or a people other than those of the United States, Canada, or Europe and one course that focuses on an historical period before the twentieth century. Courses that satisfy the geographic breadth requirement are marked with an ▲ when described in this catalog. Courses that satisfy the historical breadth requirement are marked with a ★. Many courses satisfy both requirements, and students may in fact use the same course to satisfy both. Students may use courses satisfying distribution, major, or elective—but not writing—requirements in satisfaction of either of the breadth requirements. They may also apply Cornell courses conferring proficiency in a non-Western language toward the geographical breadth requirement. They may not apply to either of the breadth requirements (a) advanced placement credit, (b) credit awarded by examination, or (c) if matriculating as freshmen (unless through the Mid-Year Freshman Program), transfer credit.

The Major

In their last two years, students devote roughly one-half their time to acquiring depth and competence in a major subject. The major does not necessarily define a student's intellect or character or lead directly to a lifetime occupation, although it sometimes does some of each. Through the major, students focus and develop their imaginative and intellectual capacities through a subject they find especially interesting.

Most departments and programs specify certain prerequisites for admission to the major; they are found on the following pages in the descriptions of each department and program.

Students may apply for acceptance into the major as soon as they have completed the prerequisites and are confident of their choice. This may be as early as the second semester of freshman year, and may be no later than second semester of sophomore year. To apply, they take a copy of their transcript to an appointment with the director of undergraduate studies in their prospective major. A department or program may refuse admission into the major if the applicant’s performance does not meet established standards. A student without a major at the beginning of the junior year is not making satisfactory progress toward the degree. That student must meet with an advising dean, and may not be allowed to continue in the college.

Available majors

Majors are offered by each of the departments. There are also majors in American studies, archaeology, biology and society, religious studies, science of earth systems, and women's studies.

Some students want to pursue a subject that cannot be met within an established major. They may plan, with the help of their faculty adviser, an independent major that satisfies the requirements of several departments and even colleges. See "Independent Major Program," under "Special Academic Options." Whatever the major—chemistry, math, philosophy, or music—graduates from the College of Arts and Sciences earn the one degree the college awards, a Bachelor of Arts.

Double Majors

Only one major is required for graduation. Some students choose to complete two
majors. No special permission or procedure is required; students simply become accepted into both majors and find an adviser in each department. Both majors are posted on the official transcript.

Electives
Of the 34 courses and 120 credits required for graduation, almost one-third are free electives. How students use these electives frequently makes the difference between an ordinary and a truly interesting course of study. Students must complete at least four courses and at least 15 credits offered outside the major field and not used to fill another requirement except breadth. AP credits not otherwise used may be used to fulfill elective requirements. Students may group electives to complete one of the established interdisciplinary concentrations described in the pages following the descriptions of departments or may form their own unofficial concentration or "minor" separate from their major. Students may also group electives into a second major. Since only one major is required, students may count courses in a second major as electives. Some students choose to explore a variety of subjects; some develop a concentration in a department or subject outside Arts and Sciences to gain practical training or specialized knowledge.

Residence
The College of Arts and Sciences is a residential college for students who devote their energy and spirit to full-time study. The faculty believes that integrated, full-time study for a defined period best promotes intellectual and creative development and best prepares people for citizenship and careers.

Consequently, eight semesters of full-time study in the College of Arts and Sciences are integral to earning the A.B. degree. Even if the minimum requirements can be met in fewer semesters, the faculty of the college expects students to take advantage of the resources of the university for eight full terms and obtain as rich and advanced an education in the liberal arts and sciences as possible. Students may complete their undergraduate degrees with credits earned at other institutions or as part-time or summer students at Cornell only if they have completed their eight full-time semesters of residence or satisfied the criteria listed below under "Part-time study in final semester."

For transfer students from other institutions each full semester of study at their previous institution counts as one of the eight semesters of residence. However, even if transfer students have completed more than four full semesters at their previous institution, they must spend a minimum of four semesters on the Cornell campus in Ithaca enrolled in the College of Arts and Sciences. Transfers from other colleges at Cornell must spend four semesters on campus in Ithaca as students in the Internal Transfer Division or in the college.

Approved study abroad, SEA Semester, Urban Semester, and Cornell-in-Washington are considered semesters of residence, but not as semesters on the Cornell campus. Students may spend no more than two semesters on such programs and must be on campus during their last semester.

Semesters of extramural study in Cornell's Division of Continuing Education, semesters of study at other institutions while on leave from Cornell, and summer sessions anywhere do not count as semesters of residence.

Acceleration
Some students decide that they do not need eight semesters of residence to obtain a solid undergraduate education. These students must complete the first four semesters and spend four full semesters in the major. Benefiting from opportunities for advanced placement, seminar, and independent (sometimes honors) work is what best characterizes undergraduate education in the college. Students considering acceleration should discuss their plans with their major adviser.

Accelerants apply to graduate one semester before their intended new graduation date. They obtain an "Application to Graduate" for this purpose in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

1. Accelerants must meet either condition a or b.
   a. Complete 60 credits before beginning their last four semesters in the college and complete the prerequisites for admission to the major in time to spend four semesters in the major.
   b. Pass 48 credits in College of Arts and Sciences courses numbered "300" and above. Upper-level courses taken in other colleges at Cornell University may count as College of Arts and Sciences credit only if approved for the major.

2. All accelerants are required to complete 100 credits at Cornell at "C" or above. Courses completed with a grade of "S" will count toward the 100 credits. Advanced placement credits do not count toward this requirement.

3. Students may not use credits earned while on leave of absence to reduce their terms of residence.

4. Accelerants may not finish the degree with credits earned in summer or winter session, through part-time study (unless they meet the guidelines for part-time study), or at an off-campus program, including Cornell-in-Washington, SEA Semester, Urban Semester, or study abroad. That is, they may not exit through any program other than a regular, full-time Cornell semester in Ithaca.

Students matriculating as freshmen may not compress their undergraduate education into fewer than six semesters of residence. Transfer students, both from other institutions and from other colleges at Cornell, must satisfy the residence requirement and must spend at least four semesters in the college on campus in Ithaca.

Ninth term
Students who can graduate in eight semesters should do so. If a worthy academic plan for a full ninth or tenth semester is approved, the student enrolls in the college as a special student for the additional work. Such a status allows enrollment in a full schedule of courses for full tuition and full use of campus resources, but allows financial aid only from loans or outside agencies, not from Cornell funds. Students who need only a part-time schedule of courses in a ninth or tenth term in order to graduate should complete the outstanding courses as part-time students paying prorated tuition. Students may spend a ninth term with Cornell aid only with permission of the Committee on Academic Records. Such permission is normally granted only to:

1. Students who have been ill or have an exceptionally compelling academic plan.
2. Students attracted late to a field with a hierarchical curriculum (for example, physics).
3. Students who were academically underprepared for the curriculum at Cornell and needed to begin with a lighter schedule of courses than normal. (See Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, about this option.)

Part-time study
Students in good academic standing may take a personal leave of absence and enroll in the Division of Continuing Education, but such semesters of extramural study do not count as terms of residence and credits from such semesters may not be used to reduce the terms of residence.

Part-time study in special circumstances
The college and university support students (with financial aid and services) as best they can to make full-time study possible. Occasionally, however, extraordinary but nonfinancial personal, academic, or medical circumstances make petitioning a part-time student necessary and appropriate. Students in good academic standing who face extraordinary situations may petition the Committee on Academic Records for part-time status and proration of tuition in the college.

Students requesting part-time status because of documented disabilities that, under the Americans with Disabilities Act, require appropriate accommodations, should discuss their situation with Dean Walbridge. Otherwise, students should meet with a dean of their class.

Part-time study in final semester
Students may complete their degrees as part-time students paying prorated tuition at Cornell after fewer than eight semesters of full-time residence only if:

1) They have completed all requirements by the end of the sixth or seventh term, met the criteria for accelerated graduation, and are remaining to complete study beyond what is required for the degree.

2) They are writing an honors thesis in the eighth semester and can complete all degree requirements by taking two courses, one of which is the thesis itself. They must register for the thesis and at least one additional course.

In all cases, students must obtain approval of an advising dean in the semester prior to the part-time semester and confirm their status and registration with college registrar Sally O'Hanlon in 55 Goldwin Smith Hall.

Courses and Credits

Counting courses and credits
Students must complete at least 34 courses to...
graduate—that is, an average of four courses during each of six semesters and five courses during each of five summer sessions. A three- or four-credit course counts as one course; a two-credit course counts as one-half course. Single-credit courses do not count as part of the 34 except in certain cases when they form a part of a series. A three- or more-credit course in the same series can be aggregated to count as one-half course (certain offerings in the Departments of Music and of Theatre, Film and Dance fall into this category). Three one-credit courses do not aggregate to count as one course. A six-credit language course counts as 1 1/2 courses, while the summer Falcon Programs in Asian languages count as eight credits and 2 1/2 courses each. Archaeology and geology coursework for more than six credits counts as two courses each. BIOGD 281 counts as a one-credit course. A six-credit course counts as one course; a four-credit course counts as one course; a three- or more-credit course counts as one-half course; those that result in an award of which must be from courses taken in the college. Advanced placement credits, credits earned in other colleges at Cornell, or credits earned in any subject at institutions other than Cornell do not count as part of the 100. The only exceptions to the above restrictions are for courses (usually no more than three) that certain departments accept from other colleges at Cornell as fulfilling major requirements and for up to two courses that an adviser accepts as part of a completed and formally established cross-college, interdisciplinary concentration.

Using courses towards more than one requirement

A course may fulfill more than one college requirement in the following situations:

1) A course may be used to fulfill a distribution requirement and also a major requirement (except as noted under previous section of restrictions on applying AP credits, transfer credits, and Cornell courses to distribution requirements).

2) A one-semester course in foreign language (not language) that is acceptable for achieving proficiency in that language may also be used as a partial fulfillment of the distribution requirement in the humanities and the arts.

3) Courses may count toward breadth requirements and toward any other requirement except First-Year Writing Seminars.

4) Courses in a second major may count as electives.

Auditing

The college encourages its students to take advantage of its rich curriculum by sitting in on courses that interest them but that they prefer not to take for credit. As long as the instructor agrees, students are welcome to visit courses. Small seminars and language courses are sometimes open to visitors. Audited courses do not appear on the student’s schedule or transcript.

Repeating courses

Students occasionally need to repeat courses. If the instructor certifies that the course content has been changed, credit will be granted a second time. If the content has not changed, both grades nonetheless will appear on the transcript and be included in any average that is calculated, but credit will be counted toward the degree only once; students considering repeating a course under this circumstance should discuss the matter with their adviser and an advising dean. Students who plan to repeat a course submit a petition to the college registrar, Sally O’Hanlon, 55 Goldwin Smith Hall. If the original course grade was F, no petition is necessary.

Courses that do not count toward the degree

The college does not grant credit toward the degree for courses completed at the university. Courses in military training, training as an emergency medical technician, physical education, remedial or developmental reading, high school mathematics, supplemental science and mathematics offered by the Learning Strategies Center, English as a second language, keyboarding, and shorthand are among those for which degree credit and credit toward the 12 credits required for good academic standing are not given.

Students enrolled in courses for undergraduate teaching assistants may petition once to have the nondegree credits count towards good academic standing. The college would allow continued eligibility for graduating with distinction in all subjects, but would disqualify the student from being on the dean’s list that semester.

Advanced placement credit

See p. 6 and 7 Advanced placement credit counts as part of the 120 credits and 34 courses required for the degree. It does not count as part of the 100 credits required in Arts and Sciences; its application to distribution requirements is restricted, as explained under “Distribution.”

Summer session credit

A student may earn credit toward the degree by completing courses in Cornell’s summer session or by successful petitioning for credit for summer courses at other colleges. Students should consult their advisers regarding summer study plans.

Credit for summer courses not taken at Cornell must be approved by the appropriate Cornell department. Approval forms and information are available on-line, www.arts.cornell.edu, and in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. Transcripts for completed work at other institutions must be sent to Robin Perry, 172 Goldwin Smith Hall. Credit approved for summer courses away from Cornell (including summer or orientation programs abroad) counts toward the 120 credits and 34 courses required for the degree, but does not count toward the 100 credits required in the college. It may be applied to part of the Group I and II distribution requirements, to elective requirements (but not to breadth requirements) and to major requirements (with the approval of the department).

Entering students who want to receive credit toward the degree for courses completed before matriculation in a summer session away from Cornell should obtain approval forms as soon as possible and have transcripts sent to Robin Perry, 172 Goldwin Smith Hall. Credits completed in Cornell summer sessions will be awarded automatically.

Summersession at Cornell or elsewhere does not count toward the eight-semester residence requirement.

Transferring credit earned away from Cornell while on leave of absence

Students may petition to transfer credits from other accredited institutions for work completed while on leave of absence. Petitions are available in 55 and 172 Goldwin Smith Hall and at www.arts.cornell.edu. The relevant department will decide whether the course is comparable to Cornell courses. Credit approved for transfer counts as part of the 120 required for graduation and as part of the 34 credits. It does not count among the 100 credits required in Arts and Sciences and cannot be used to graduate in fewer than eight semesters. Its application to distribution and breadth requirements is restricted as described under “Distribution.”

Transferring credit (for transfer students from another institution or from another Cornell college)

Transfer students must satisfy all normal requirements for the degree, including eight semesters of full-time study. They may never complete fewer than 60 credits and 16 courses at Cornell nor be in residence in the college for fewer than four regular semesters (summer session does not count toward the residence requirement). The college evaluates credit and residence earned either at another school or college at Cornell University or at another accredited institution of collegiate rank and determines the number of credits and courses the student may apply toward the various requirements for the Bachelor of Arts degree at Cornell. In addition, it reevaluates advanced placement credit allowed by another institution, including another college at Cornell. Evaluations of transfer credits are normally provided when students are notified of their admission.

SPECIAL ACADEMIC OPTIONS

Degree Programs

The following five programs allow students to alter the regular college or major requirements or to work toward more than one degree.

College Scholar Program

The College Scholar Program frees up to 40 students in each class from the usual college requirements for full-time study. It is not necessary to serve students whose interests and talents would benefit from a little more academic freedom than other students have, who demonstrate exceptional promise, and who show the maturity to plan and carry out, with the help of their adviser, a well-designed program of studies. College Scholars design idiosyncratic programs: some pursue diverse
Double Registration with and Early Admission to Professional Schools
Registration in the senior year of the College of Arts and Sciences and the first year of Cornell Law School, Cornell Medical College, or the Johnson Graduate School of Management, is occasionally possible. A very few exceptionally well-prepared students who have earned 105 credits before the start of the senior year and have been accepted by one of the above-named professional schools may be permitted to register simultaneously in the college and in one or another of these professional schools during the seventh and eighth terms. They earn the A.B. degree after the first year of professional school.

Students with eight or fewer credits and two or fewer courses to complete may apply to enter the Master's of Engineering program during (but no earlier than) the last semester; dual-degree students may enter this program no earlier than the ninth semester. They earn the bachelor degree(s) after one semester of graduate school.

Students interested in the joint program with the Law School or the Graduate School of Management, or in early admission to the Master's of Business Administration program should apply to the relevant program. Students interested in the joint program with Cornell Medical College should contact the health careers coordinator, 205 Barnes Hall. All candidates should confer their eligibility with an advising dean, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Double-registered students must, of course, complete all requirements for the A.B. degree, including 100 credits in Arts and Sciences courses.

Teacher Education in Agriculture, Mathematics, and Science
Students at Cornell may pursue teaching credentials in agriculture, earth science, general science, mathematics, and physics. Teacher Education in Agriculture, Mathematics and Science (TEAMS) is a university program jointly conducted by the departments of Education and Mathematics. Cornell Students from any college are encouraged to apply for admissions to TEAMS during their sophomore year. Those who are admitted complete their undergraduate major in an agricultural science, mathematics, or one of the sciences, while taking Education courses. They are then able to complete a Master of Arts in Teaching (MAT) degree in one year.
For more information, contact the TEAMS Program Coordinator at 255-9573.

Special-Interest Options
The following options enable students to pursue special interests within the usual degree programs.

Concentrations
Established interdisciplinary concentrations, described in the pages following the descriptions of the departments and their curricula, provide structures for organizing electives. Completed concentrations are noted on the transcript.

Informal Minors
Some students organize electives within a discipline or department. Such informal minors can be developed with the help of the departmental directors of undergraduate studies. They are not noted on the transcript.

Independent Study
Independent study affords students the opportunity to pursue special interests or research not treated in regular courses. A faculty member, who becomes the student's instructor for the independent course, must approve the program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study (proposal forms are available on-line at www.arts.cornell.edu and in the Office of Undergraduate Admissions and Advising, 55 and 172 Goldwin Smith Hall). In one semester students may earn up to six credits with one instructor or up to eight credits with more than one instructor.

Undergraduate Research Program
An excellent way to benefit from being an undergraduate at a research university, at Cornell in particular, is to become an apprentice in on-going faculty research. About 400 students participate each year in creating new knowledge and earn independent study credit for what they learn and contribute. They sharpen their critical and creative abilities and test their interest in pursuing a research career. Sometimes they publish their work.

The Undergraduate Research Program gathers information about research opportunities in most disciplines of the liberal arts and sciences, guides students in finding further opportunities—on campus and elsewhere and during the academic year and the summer—and helps students prepare for research and presenting themselves as candidates for apprenticeships. Other students locate research opportunities independently through faculty whose courses they have taken, through their major departments, or through published materials.

The Cornell Undergraduate Research Board, an undergraduate organization, conducts an annual open house to help students get started in research and an annual forum at which undergraduates present their work. Students interested in this program should consult the Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Language Study
FALCON (Full-Year Asian Language Concentration). FALCON allows students who are interested in the Far East to study Chinese or Japanese exclusively for one year. They gain proficiency in the language and familiarity with the culture. Students who are interested in the Far East should be aware of the opportunities to pursue rapid and thorough beginning studies on campus with the objective of studying abroad later—in China or Japan. Students interested in this program should contact the Department of Asian Studies, 888 Rockefeller Hall; e-mail: falcon@cornell.edu.

Language House Program
A complement to classroom cultural and linguistic instruction, the Language House Program combines residential and academic opportunities for developing and practicing conversational skills in French, German,
their degree candidates rather than study in self-contained programs that offer courses specially designed for foreigners. The primary goals of this educational immersion are to learn firsthand the modes of inquiry, methods of analysis, and educational values of higher education offered to students of another country and to involve students in social relationships with peers who may hold a new and unexpected range of social attitudes.

The college advocates study abroad that enables students to become competent enough in another language to experience daily life, develop social relationships, and accomplish formal course work in that language. Students who intend to study abroad in a country where the host language is not English must demonstrate a serious commitment to learning the language through course work before studying abroad; specific language requirements may vary, but most programs require two semesters of 200-level language instruction. At least one area studies course or one course in the history, culture, economics, politics, or social relations of the country of destination must be part of every student’s preparation for study abroad.

Students planning to study abroad need solid academic credentials to do so productively and successfully. The college requires a minimum overall grade point average of 3.0 for all Cornell course work and good academic standing in the semester immediately before going abroad.

Study abroad is possible during the sophomore and junior years or during the first semester of the senior year. Study abroad in the final semester is rarely approved. Important steps to prepare for study abroad include:

- substantial progress with college distribution requirements;
- admission to a major and a faculty adviser in the major;
- clear academic agenda for study abroad;
- appropriate preparatory study of the country or region of destination, especially language study.

Study abroad can earn up to 15 liberal arts and sciences credits per semester of full-time course work as long as the curriculum abroad is consistent with that of the college. A maximum of 10 credits is awarded for each trimester of study. Courses that fall outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those with compelling academic reasons may study in more than one location over two semesters. The college does not approve study abroad that tours more than one country or that is more touristic than scholarly in content and structure. Students must continue study of the host language while abroad. Only in exceptional circumstances will the college approve programs which, in non-English speaking countries, provide no language training.

Applications to study abroad must have the support of a faculty adviser in the major and the approval of an advising dean in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall. Although students investigate options for study abroad and submit final applications through the Cornell Abroad office, Arts and Sciences applicants submit to the college an essay describing the academic rationale for study abroad, an outline of prospective courses to be taken and any other relevant materials.

All courses taken abroad will appear on the Cornell transcript and grades earned are reported in the system of the host institution. Grades earned through course work abroad do not, however, become part of the Cornell grade point average.

Students who transfer to Cornell and must complete at least four semesters of residence on campus in Ithaca may not study abroad as one of those four semesters.

All applicants for study abroad during the academic year, must go through the Cornell Abroad Office after being approved by the College of Arts and Sciences. For more information, see Dean Wasyliw, 55 Goldwin Smith Hall.

Summer Residential Programs in Archaeology

During the summer months students may participate in a Cornell-sponsored archaeological project. In recent years the program has organized archaeological projects in Central America, Greece, Israel, Italy, and New York State. Students should contact the Archaeology Program for information about the sites currently available.

Marine Science

Shoals Marine Laboratory is a seasonal field station that offers a variety of courses and experiences designed to introduce undergraduates to the marine sciences. The laboratory is located on Appledore Island, six miles off the Maine/New Hampshire coasts. Students who transfer to Cornell and must complete at least four semesters of residence on campus in Ithaca may not study abroad as part of their major. A maximum of 10 credits is awarded for each trimester of study. Courses that fall outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those with compelling academic reasons may study in more than one location over two semesters. The college does not approve study abroad that tours more than one country or that is more touristic than scholarly in content and structure. Students must continue study of the host language while abroad. Only in exceptional circumstances will the college approve programs which, in non-English speaking countries, provide no language training.

supervision, and evaluates the project at the end of the term. Fieldwork almost always involves writing a long paper or several short ones, as well as practical experience. All proposals for fieldwork must be presented in advance to the college faculty's Committee on Academic Records for approval. A maximum of 15 credits in fieldwork may be earned. For further information students should contact an advising dean in Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

ACADEMIC INTEGRITY

Academic integrity is the heart of intellectual life in the college—both in learning and in research. All members of the university community simply must support each other's efforts to master new material and discover new knowledge by sharing ideas and resources, by respecting each other's contributions, and by being honest about one's own work. Otherwise the university will fail to accomplish its most central and important goals.

Cornell's Code of Academic Integrity and policy about acknowledging the work of others are among the documents new students receive. Students should read them carefully and not assume they understand what integrity and cheating are and are not. Academic integrity implies more here at the university than it usually did in high school. The standards of integrity are those that prevail in professional life. This means that students must acknowledge their own work and cite ideas they adopt from others (not just direct quotations) and help they receive from colleagues. With productive emphases on collaborative learning and writing, students must understand the general standards and policies about academic integrity and be sure they understand the expectations in individual courses as well. When in doubt, ask the instructor.

ADVISING

The following advisers and offices provide academic advising, help with problems, and information on college procedures and regulations.

Faculty Advisers

Each new student is assigned a faculty adviser. Advisers help students plan programs of study and advise them about ways to achieve their academic goals. Advisers may also help students with study or personal problems or may direct them to other offices on campus where help is available. Academic difficulties may frequently be solved or avoided if students and advisers recognize and address problems early.

Advisers and new advisees meet first during orientation week to discuss course selection. New students are encouraged to see their advisers again early in the term, before it is too late to drop courses, to discuss their academic progress and to become better acquainted. Advisers and advisees meet at least once each semester to discuss courses for the following term and more often if advisers wish to discuss academic or personal issues or to petition for an exception to college rules.

Student Advisers

Student advisers pass on lore about the college and life at Cornell and help new students negotiate the university.

Major Advisers

After acceptance into a major, students are assigned a major adviser, a faculty member in the major department, with whom they share and direct their course of study. The adviser eventually certifies the completion of the major. The major adviser should be consulted by the student about all academic plans, including honors, study abroad, acceleration, and graduate study. The adviser's support is especially important if a student petitions for an exception to the requirements for the degree.

Office of Undergraduate Admissions and Advising

This office, 55 Goldwin Smith Hall, 255–5004 and 172 Goldwin Smith Hall, 255–4833, is a resource for faculty and student advisers and especially for students themselves and their parents. Advising deans are available to help students define their academic and career goals, to help with special academic options and exceptions to college rules, and to help when problems arise:

- Lynne S. Abel, associate dean for undergraduate admissions and advising—255–3386
- David Devries, juniors and seniors and undergraduate research—255–4833
- Daniel Evett—Language House Program—255–6543
- Stephen Friedfeld, mid-year freshman and first- and second-year students—255–4833
- Ken Gabard, first- and second-year students and College Scholar Program—255–5004
- Lisa M. Harris, career services and pre-law advising—255–6926
- Irene Komor, career counselling—254–5295
- Lawrence Lamphere, internal transfers and minority students—255–4833
- Diane J. Miller, career services—255–6924
- Sally O'Hanlon, registrar—255–5051
- Janice Turner, minority students and pre-med advising—255–5947
- Peggy Walbridge, transfer students and students with disabilities—255–4833
- Catherine Wagner, juniors and seniors and dual degree students—255–4833
- Patricia Wasylkiw, first- and second-year students and study abroad—255–5004

REGISTRATION AND COURSE SCHEDULING

Enrollment in Courses in the College of Arts and Sciences

New Students

During orientation week, new students attend briefings and other information sessions, meet with faculty advisers, and sign into courses. The college reserves spaces in courses for its incoming students.

Continuing Students

Continuing students select and schedule up to five courses of 3 or more credits and as many 1 and 2 credits as they would like during the semester prior to the one in which the courses will be taken. Students who do not "pre-enroll" during the designated period must wait until the beginning of the term and may have difficulty securing places in the courses they most want. Before signing into courses, students plan their programs and discuss long-range goals with their faculty advisers. In addition, all students are welcome to discuss programs and plans with an advising dean in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

At the beginning of each term, students find their schedules and should confirm the accuracy of their records on "Just the Facts."

Limits on Numbers of Courses and Credits

To meet the 34-course requirement, students must normally take four courses during each of six semesters and five courses during each of two semesters. To meet the 120-credit requirement, students must average 15 credits per semester. (AP credit and/or summer credits may reduce the average numbers of courses and credits required each semester.)

Minimum number of credits per semester

To maintain good academic standing as a full-time student, students must complete at least twelve degree credits per semester; if for compelling personal or academic reasons students need to carry fewer than 12 credits, they should consult their faculty adviser and an advising dean. Permission is by petition only; it is freely given for first-semester students.

Maximum number of credits per semester

First-term freshmen must petition to register for more than 18 credits; other students may register for more than 18 credits if their previous term's average was 3.0 or higher and they are in good academic standing. No more than 22 credits may be taken in a regular semester without permission of the college's faculty Committee on Academic Records. Students who fail to receive approval for excess credits from the committee normally may count only 18 credits for the semester toward the degree.

Attendance

Attendance in classes is expected. Absences are a matter between students and their instructors. If a student cannot attend classes because of illness or family crisis, the Office of Undergraduate Admissions and Advising will notify instructors at the request of the student or the family. Nonetheless, the student must arrange to make up examina-
tions or other work with each instructor. A student who will be absent because of religious holidays or athletic competitions must discuss arrangements for making up work with his or her instructors well in advance of the absence. A student who must miss an examination must also consult with the instructor in advance. Alternative arrangements are at the discretion of the instructor.

Adding and Dropping Courses
After course enrollment (also known as pre-enrollment) students may not adjust their schedules until the new term begins. During the first three weeks of the semester, students may change courses without petitioning. Add/drop forms are available in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. (Note: the add period for First-Year Writing Seminars is only two weeks.)

After the third week of classes, students must petition to add courses and may normally add them only for a letter grade. They may drop courses up to the seventh week of the term, if the department approves and no issue of academic integrity is at stake. Between the seventh and twelfth weeks of the term, students may petition to withdraw from courses, if (1) the instructor approves; (2) the advisor approves; (3) an advising dean approves; and (4) no issue of academic integrity is at stake. Students must meet with an advising dean to obtain petition forms.

Courses dropped after the seventh week will be noted on the transcript by a "W" where the grade would normally appear. This is a matter of record and cannot be petitioned.

Petition to withdraw from courses may not be submitted after the end of the twelfth week in the term. Deadlines for short courses will be adjusted according to the length of the courses.

The effective date of all course changes will be the day the student submits all completed paperwork to the Academic Advising Office.

Leaves of Absence
Taking time off from college to explore goals, find direction, or to gain experiences or funds is sometimes useful. Usually, of course, students take leaves at the end of a semester for the following semester. Students in good academic standing, however, may take a leave as late as the seventh week of a semester, although there are serious financial consequences to taking leaves after a term has begun. Five years is the maximum length of time a student may be on leave and return without special permission. Leaves of absence are of four types:

1) Personal leaves impose no conditions concerning reentering the college except for the five-year limit. Readmission is automatic upon written request made at least one month before the beginning of the term in which the student wishes to return.

2) Medical leaves, usually for at least six months, are granted by the college only on recommendation by University Health Services. In some cases, students must satisfy the UHS that their condition requiring the leave has been corrected before they may return. The student's academic standing will also be subject to review at the time of the leave and on return.

3) Conditional leaves are granted when the student is not in good academic standing or, in unusual circumstances, between the seventh and twelfth weeks of the term. In consultation with the student, an advising dean sets the conditions for the student’s return. Normally students may not return from conditional leaves for at least two terms or until specific and individual conditions, such as completing unfinished work, have been met. Students may be granted conditional leaves after the twelfth week of a term only under extraordinary circumstances and with the approval of the faculty’s Committee on Academic Records.

4) Required leaves: The Committee on Academic Records may require a leave of absence if a student is not making satisfactory progress toward the degree. See the section "Academic Actions." Any student who wishes to take a leave of absence should consult with the academic dean in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. On readmission, the student’s graduation date will be recalculated.

Transferring Credits Earned While on Leave
Students who take courses elsewhere in the United States while on leave may petition to have credits transferred. Approval depends on acceptable grade and the judgment of the relevant departments about the quality of the courses. If approved, these credits may be applied toward the 120 credits and 34 courses needed for graduation, but not toward the 100 credits required in the college. They may be applied to part of Group I and II distribution requirements (not to Group III or IV), to elective requirements (but not to breadth requirements) or to the major as allowed by the department. Credits earned during a leave do not count toward the eight semesters of residence and may not be used to reduce the terms of residence. See the section "Residence."

Study Abroad and International Students on Leave of Absence
Study abroad undertaken during a leave of absence will not affect academic credits. International students on leave of absence from the College of Arts and Sciences may enroll in courses at a college or university in their home country only, as such enrollment is not defined as study abroad. They may petition for transfer of credit upon return to Cornell. If approved, the credit will count as described in the previous paragraph.

Withdrawals
A withdrawal is a permanent severance from the university and from status as a degree candidate. Students planning to withdraw should consult an advising dean. Students not requesting a leave and failing to register for a term will be withdrawn from the college. The college faculty's Committee on Academic Records may require a student to withdraw for a highly unsatisfactory academic record.

Transferring within Cornell (Internal Transfer)
Internal transfer from one college or school at Cornell into another is attractive for many students whose intellectual interests change (or become more focused). Students who want to transfer should discuss their eligibility with a counselor in the new school or college. In some cases, students who want to transfer into the College of Arts and Sciences may transfer directly. In other cases, they may be referred to the Internal Transfer Division. During the term immediately preceding transfer into the College of Arts and Sciences, students should complete at least 12 credits of courses in the College of Arts and Sciences with a 3.0 average and without any grades of Incomplete, any S-U grades (unless only S-U grades are offered for that particular course), or any grades below C. Satisfying this minimum requirement does not, however, guarantee admission. Admission to the college is based on consideration of the student's entire record at Cornell and the high school record, not just the work of one semester. It is also based on ability to complete the A.B. degree within a reasonable time. Internal transfers are required to spend four semesters in Arts and Sciences and thus should initiate the transfer process preferably in their second semester of sophomore year. Interested students should see Dean Lamphere, 172 Goldwin Smith Hall.

ACADEMIC STANDING

Students are in good academic standing for the term if they successfully complete at least 12 degree credits by the end of the term and earn no more than one D and no F or U grades. If a student completes only three courses, all grades must be above D. In addition, students are required to make satisfactory progress toward satisfying requirements for the degree and to earn grades of C (not C-) or better in at least 100 of the 120 credits for the degree. Courses listed under "courses that do not count toward the degree" do not count toward good academic standing in a semester.

Academic Actions

Students who are not in good academic standing will be considered for academic action by the college's faculty Committee on Academic Records or by one of the advising deans of the college. They are urged to present evidence that will help explain their poor academic performance. Students may appeal a decision or action of the committee, if they have new relevant information. They must consult an advising dean about appealing.

Warning
Any student who fails to maintain good academic standing will, at a minimum, be warned. A warning is posted on a student’s college record but is not reported to the university registrar and does not appear on official transcripts.

Required leave of absence

A student in serious academic difficulty may be required by the faculty Committee on Academic Records to take a leave of absence, normally for a full year. Usually, but not always or necessarily, the Committee on Academic Records warns students before suspending them. Before being allowed to return and reregister in the college, students must document what they did on leave and how they resolved their problems and submit a plan for completing the degree. In some
cases students will be required to furnish evidence that they are ready to return or satisfy other conditions before being allowed to reregister in the college. Students who request to return in less than a year must present to the committee extraordinarily convincing evidence of their readiness to return. "Required leave" and the date are posted on the student's official transcript.

Required withdrawal
The faculty Committee on Academic Records may dismiss a student from the college because of a highly unsatisfactory record for one term or for failure to make satisfactory overall progress in grades, credits, or degree requirements. This action expels the student permanently from the college. "Required withdrawal" and the date are posted on the student's official transcript.

Forgery on Forms
Forging signatures or credentials on college forms is an academic offense; sometimes it constitutes academic fraud. In all cases of forgery on academic forms, the effect of the forged documents shall be negated. Students may then petition properly to do whatever they attempted to do improperly. Such incidents will be recorded in the Academic Integrity Hearing Board's confidential file for forgeries. If a student forges more than once or if the forgery would advance the student's academic standing unfairly or fraudulently, or if for any other reason the situation requires some response in addition to the uniform penalty, the Academic Integrity Hearing Board might make a different recommendation, such as a notation on the student's transcript, suspension, or dismissal.

GRADUATION

Letter Grades

S-U Grades
The S-U (satisfactory-unsatisfactory) option allows students to explore unfamiliar subjects or take advanced courses in subjects relatively new to them without being under pressure to compete with better prepared students for high grades. It is not meant to allow students to reduce the amount of work they complete in a course or the amount of effort they devote to it. The S-U option is contingent upon the instructor's willingness to assign such grades. Students must select their grading option and obtain the instructor's approval for the S-U option during the first three weeks of the term. Virtually no exceptions to this deadline are permitted, and consequently students adding courses after the third week of the term must normally add them for an S-U grade unless the department grants permission. Students may elect the S-U option in courses used to satisfy the distribution, and elective requirements, provided that such courses do not also count toward major requirements or serve as prerequisites for admission to the major. Students are advised to use the S-U option sparingly if they intend to apply for graduate school or for transfer to another college. There is no limit on the number of courses each term for which students may elect the S-U grade, but within the 120 credits required for the degree, a minimum of 80 credits must be in courses for which a letter grade was received.

Grades of Incomplete
A grade of incomplete signifies that a course was not completed before the end of the term for reasons beyond the student's control and acceptable to the instructor. Students must have substantial (normally at least 50 percent) equity in the course; that is, they must be able to complete the remaining work without further registration and must have a passing grade for the completed portion. When a grade of incomplete is reported, the instructor submits a form stating what work must be completed, when it must be completed, and the grade (or "frozen" incomplete) earned if the work is not completed by that date. When a final grade is determined, it is recorded on the official transcript with an asterisk and a footnote explaining that this grade was formerly an incomplete.

Students must resolve (make up or "freeze") any incompletes with their instructors before graduation.

Nole of R
R designates two-semester or year-long courses and students enrolled in the course during the entire year. The R is recorded on the student's transcript at the end of the first term. The grade recorded at the end of the second term evaluates the student's level of performance in the course for the entire year. The total of credits earned for the whole course is listed each term.

Grade Reports
Students should periodically check their courses and grades on "Just the Facts" to be sure that they are recorded correctly.

Class Rank
The college does not compute class rank.

Dean's List
Inclusion on the Dean's List for academic excellence is an honor bestowed by the dean of the college semester by semester. Based on grades, the criteria include about the top 30 percent of students and vary with the number of credits the student completes. The criteria are subject to slight changes from semester to semester and are available in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

GRADUATION

The Degree
The College of Arts and Sciences grants only one degree (no matter what the student's major): the A.B. (or B.A.), A.B. is the abbreviation of the Latin name for the degree, "Artium Baccalarius," or translated into English, B.A., "Bachelor of Arts."

Application to Graduate
In the first semester of their senior year, students attend senior briefings and then complete an application to graduate. The application allows the college to check each student's plan for fulfilling college requirements. This process is intended to help seniors identify problems early enough in the final year to make any necessary changes in course selection to satisfy these requirements. Nonetheless, meeting graduation requirements is the student's responsibility: problems that are discovered, even late in the final term, must be resolved by the student before the degree can be granted.

Degree Dates
There are three degree dates in the year: May, August, and January. Students who plan to graduate in August must attend graduation ceremonies in the preceding May. Students graduating in January are invited to a special recognition ceremony in December; they may also attend graduation ceremonies the following May.

Honors
Bachelor of Arts with Honors
Almost all departments offer honors programs for students who have demonstrated exceptional ability in the major and who have completed original independent research. The honors programs are described by individual departments in their following sections. The degree of Bachelor of Arts with honors will be conferred upon students who, in addition to having completed the requirements for the degree of Bachelor of Arts, have satisfactorily completed the honors program in their major and are recommended for honors by their major department, the Independent Major Program, or the College Scholar Program. Concentrations do not offer honors programs.

Bachelor of Arts with Distinction
The degree of Bachelor of Arts with distinction in all subjects will be conferred on students who have completed the requirements for the degree of Bachelor of Arts, if they have met the following requirements by the end of their final semester:

1) completed at least 60 credits while registered in regular sessions at Cornell;
2) ranked in the upper 30 percent of their class at the end of the seventh semester, or next-to-last semester for transfers and accelerants;
3) received a grade below C- in no more than one course;
4) received no failing grade;
5) have no frozen Incompletes on their records, and
6) maintained good academic standing, including completing a full schedule of at least 12 credits, in each of their last four terms.
CALENDAR SUPPLEMENT

All of the dates in the university calendar at the front of this volume apply to all Cornell students. Listed below are some additional dates that are of importance for students in the College of Arts and Sciences.

Courses and Departments

SPECIAL PROGRAMS AND AREAS OF CONCENTRATION

The college offers a number of interdisciplinary programs described in the section following the departmental program descriptions.

AFRIKAANS

See Department of German Studies (Dutch).

AFRICANA STUDIES MAJOR

See Special Programs and Interdisciplinary Studies.

AKKADIAN

See Department of Near Eastern Studies.

AMERICAN STUDIES

See Special Programs and Interdisciplinary Studies.

ANTHROPOLOGY

Anthropology is one of the most diverse disciplines in the university. Spanning human evolution, the development and heterogeneity of language and culture, human history, and the diversity of cultures past and present, the field has broad scope, uses a variety of methods, addresses basic issues about human origins and human life, and maintains commitment to understanding social life and using this understanding to improve society. Anthropology is an ideal "liberal arts" major. It also serves as a major that, when well designed by the student with their adviser, prepares students for a wide range of professional careers, e.g., law, medicine, foreign service, social services, and business, among others.

Courses for nonmajors: Anthropology welcomes nonmajors into many of its courses. Unless prerequisites are explicitly stated, 200- and 300-level courses do not have formal prerequisites and can be taken by students without prior experience in anthropology. Such students are welcome in these upper-level courses. For additional information to assist nonmajors and students from other colleges in selecting anthropology courses, see the anthropology department web page (falcon.arts.cornell.edu/~anthro/).

The Major

The range and complexity of the field of Anthropology requires active collaboration between the student and a faculty adviser in developing an individualized program of study. To enter the anthropology major, a student must pass one course in each of the two broad introductory areas of anthropology: "Nature and Culture" and "Culture and History" listed below under the heading "Introductory Courses." Provisional acceptance into the major is possible before completing these courses, with permission from the Director of Undergraduate Studies in anthropology. Students are encouraged to contact the Director of Undergraduate Studies or other faculty members as soon as possible in their studies to discuss their interests and a possible major in anthropology.

Students see the Director of Undergraduate Studies to apply to the major and get an adviser. They prepare a short statement about their interests and goals for the major, then meet with their adviser to develop a course plan reflecting these special interests. This concentration should include at least 32 credits in addition to the two introductory courses used to enter the major. Examples of possible concentrations are myth and ritual, ethnicity and identity, action research, nature and culture in human history, anthropology and literature, or law, or the arts, or medicine, human origins, ethnomusicology, primate and human behavior, prehistory of the Americas, or Europe, or Africa; cultural construction of the person, etc. When warranted, the adviser is free to approve up to two cognate courses from other departments totaling up to eight credit hours to fulfill the 32-credit requirement. Students may revise their program of study in consultation with their adviser as they move through their studies. Our goal is to provide a close and supportive advising relationship and a strong and coherent structure for the student's major.

In the senior year, all Anthropology majors are required to take one of the Anthropology Senior Seminars offered by the department (archaeologically oriented majors may substitute Approaches to Archaeology or Archaeological Research Design). These seminars are designed to provide broad integrating perspectives on the contemporary field of anthropology through the study of principal trends, contemporary issues, history, etc.

Study abroad and off-campus study programs: the Department of Anthropology encourages students to consider a semester of study abroad or off-campus study developed as an integral part of the student's major concentration. The Director of Undergraduate Studies serves as the Anthropology Study Abroad adviser.

The Cornell-Nepal Study Program: the Cornell-Nepal Study Program is a joint program of Cornell University and Tribhuvan University, the national university of Nepal. Qualified juniors, seniors, and first- or second-year graduate students work with faculty from both universities to prepare for and undertake field research projects in Nepal. Students receive 15 credits per semester; students may enroll for either fall or spring semester, or for the entire year; application is through Cornell Abroad. For further information, consult David Holmberg or Kathryn March in the Department of Anthropology.

ADMINISTRATION

Philip E. Lewis, dean—255-4146
Jon C. Clardy, senior associate dean—255-4147
Jonathan D. Culler, senior associate dean—255-4147
Lynne S. Abel, associate dean of admissions and undergraduate education—255-3386
Jonathan B. Monroe, associate dean and director of writing programs—255-4061
Jane V. Pedersen, associate dean of administration—255-7507
Other anthropologically-relevant study abroad options, using existing Cornell Abroad and off-campus options, can be worked out in consultation with the major adviser, the Anthropology Study Abroad adviser, and Cornell Abroad.

**Honors**

Honors in anthropology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. Anthropology majors interested in the Honors Program should consult the chair of the Honors Committee in their junior year. To qualify for entrance into the Honors Program, a student must have at least a 3.0 GPA overall and 3.5 GPA in the major, and the consent of a faculty member in anthropology who will guide the honors thesis. After applying to the program and being admitted as a candidate by the Honors Committee, the student conducts research and writes a thesis. This thesis is evaluated by the faculty research adviser and two other faculty members. Honors (i.e., cum laude, magna cum laude, or summa cum laude) are awarded based on the quality of the thesis and the student's overall record. Honors candidates must start this process by consulting their major adviser about the honors program early in their junior year.

While working on the thesis during the senior year, students should make use of the Senior Seminar as a place to develop the ideas for their thesis. In addition, students may enroll in ANTHR 483 (fall or spring) "Honors Thesis Research." To complete the thesis, students must enroll in 491 (fall or spring) "Honors Thesis Write-up." Only ANTHR 485 may count toward hours for completion of the anthropology major requirements. The credit hours for these courses are variable, grades for these courses are given by the faculty research adviser, and they are based on performance during thesis research and writing.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

**Special Programs and Facilities**

Collections: the department has an extensive collection of archaeological and ethnological materials housed in the anthropology collections. A limited number of students can make arrangements to serve as interns in the anthropology collections. Olin Library houses some of the most extensive collections of materials on the ethnology of Southeast Asia, South Asia, East Asia, and Latin America to be found anywhere in the United States. The biological anthropology laboratory (McGraw B65) houses an extensive collection of materials for teaching purposes, including (1) human skeletal remains, (2) articulated skeletons and cranial casts of primates, and (3) casts of important fossils in the human lineage.

Independent Study: specialized individual study programs are offered in Anthropology 497, Topics in Anthropology, a course open to a limited number of juniors and seniors who have obtained consent and supervision of a faculty member. Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

Colloquia: the Department of Anthropology holds colloquia almost every week of the semester on Friday at 3:30 in McGraw 215. Faculty members from Cornell and other universities participate in discussions of current research and problems in anthropology. Students are encouraged to attend.

For more complete information about the anthropology major, see the Director of Undergraduate Studies, pick up a copy of the major brochure (which includes descriptions of the courses not offered during 2001–2002), or visit the Anthropology Department web page (falcon.arts.cornell.edu/~anthro/).

### I. Introductory Courses

#### A. Nature and Culture:

- **ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind (I Supplementary List)**
  - Fall. 3 credits. M. Small.
  - The evolution of human kind is explored through the fossil record, studies of the biological differences among current human populations, and a comparison with our closest relatives, the primates. This course investigates the role of human biology and behavior with an evolutionary framework. Fee for lab usage and maintenance. $5.

- **ANTHR 103 The Scope of Anthropology**
  - Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of ANTHR 101 or ANTHR 102. S-U grades only. Staff.
  - This course is intended for majors or prospective majors in anthropology. Each week a different member of the faculty in anthropology at Cornell makes a presentation on the nature of their work within the field and discusses their interests with students. The course is meant to introduce the range of approaches found within anthropology and help students in planning future course work.

#### B. Culture and History:

- **ANTHR 100 Introduction to Archaeology** (also ARKEO 100) # @ (III or IV)
  - Fall. 3 credits. J. Henderson.
  - A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks archaeologists use to reconstruct them. This course can serve as a platform for both archaeology and anthropology undergraduate majors.

- **ANTHR 102 Introduction to Anthropology: The Comparison of Cultures @ (III)**
  - Spring. 3 credits. Staff.
  - An introduction to cultural anthropology through ethnographies, or the descriptive accounts of anthropologists. Through readings and lectures, students acquaint themselves with a number of cultures from several parts of the world. The cultures range in form from those of small-scale tribal societies to those of state societies. Throughout the course, we attempt to make students think of cultures in their own terms. Attention is focused on variation in cultural patterns as these are expressed in social, economic, and ritual practices. In this encounter, the principles of anthropology as a comparative enterprise, which may pose different cultural systems in relief are discussed. Filmmaking, films, and exercises supplement the formal anthropological materials.

- **ANTHR 200 Cultural Diversity and Contemporary Issues @ (III)**
  - Fall. 3 credits. A. Willford.
  - This course introduces students to the meaning and significance of forms of cultural diversity for understanding contemporary social issues. Drawing from films, videos, and selected readings, students are confronted with different representations and forms of culture that portray cultures in various parts of the world and they are asked to critically examine their own prejudices as they influence their perceptions and evaluation of cultural differences. We approach culture holistically, assuming the inseparability of economies, kinship, religion, and politics, as well as the interconnections and dependencies between world areas (e.g., Africa, Latin America, the West). Among the issues considered: "political correctness" and truth; nativism and ecological diversity; race, ethnicity, and sexuality; sin, religion, and war; and global process and cultural integrity.

- **ANTHR 202 Interpretive Archaeology** (also ARKEO 202) # (III)
  - Fall. 3 credits. Not offered 2001–2002.

- **ANTHR 215 Stone Age Art (also ARKEO 215) # (III)**
  - Fall. 3 credits. Not offered 2001–2002.

- **ANTHR 240 Old World Prehistory (also ARKEO 240) # (III)**
  - Fall. 3 credits. Not offered 2001–2002.

### II. Honors and Independent Study

- **ANTHR 483 Honors Thesis Research**
  - Fall or spring. Credit and hours TBA. Prerequisite: consent of the Honors Committee. Staff.
  - Independent work under the close guidance of a faculty member selected by the student.

- **ANTHR 491 Honors Thesis Write-Up**
  - Fall or spring. Credit and hours TBA. Staff.

- **ANTHR 497 Independent Study: Undergrad I**
  - Fall or spring. Credit and hours TBA. Staff.
  - Intended for undergraduate students only. Staff.
  - Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.
ANTHR 498 Independent Study: Undergrad II
Fall or spring. Credit and hours TBA. Intended for undergraduate students only. Staff.
For course description, see ANTHR 497, section I, Honors and Independent Study.

III. Anthropology Major Senior Seminars

In the senior year, all Anthropology majors are required to take one of the Anthropology Senior Seminars offered by the department (archaeologically oriented majors may substitute AnthroArch or Archaeological Research Design). These seminars are designed to provide broad integrating perspectives on the contemporary field of anthropology through the study of principal trends, contemporary issues, history, and so on.

ANTHR 422 Anthropology and Environment @ (III)
Fall. 4 credits. Limited to 15. Prerequisite: anthropology major or permission of instructor. A. Subramanian.
This course explores issues in the environment that anthropology addresses in unique ways. Topics include indigenous knowledge, intellectual property, local and global interrelations, ecotourism, cultural ecology, development and resistance, environmentalism, and cultural diversity framed in the context of extended case studies.

ANTHR 440 Ethnographic Approaches to Studying Professionals and Institutions (III)
Spring. 4 credits. D. Boyer.
Anthropological research on institutions and professions is a rapidly-expanding area of inquiry. Anthropology is broadening horizons of research on complex societies, social elites, and reflexivity. This mode of research has conceptual and methodological challenges all its own, some of which require rethinking or adapting the "traditional" armature of anthropological theory and field research. For example, how can anthropological theories of language and culture be made helpful/relevant to understanding the everyday life of institutions and the social subjectivity of professionals? How do ethnographers gain access to institutions (such as consulting and advertising firms, for example) where logics of proprietary knowledge are paramount? This course reviews past and present ethnography on professionals and institutions with special attention to what conceptual paradigms and methods are suitable to the objects of inquiry.

ANTHR 480 Anthropology and Globalization (also ANTHR 680) (III)
Fall. 4 credits. A. Willford.
This course examines anthropological perspectives on globalization and assesses the cultural, political, and social implications of contemporary global processes. In exploring the factors that contribute to the production of diasporic consciousness, the intensity and variety of transnational flows of culture, commodities, corporations, and people are considered in order to assess challenges these processes pose to the modern nation-state. Has culture been liberated from the control of the nation-state through the emergence of new cultural networks created by immigration, electronic media, tourism, and multinational corporations and organizations? Or has the acceleration of global processes in the modern world system created new tools of domination within an increasingly stratified global economy? This course addresses these and related questions utilizing both anthropological theories of and ethnographic studies on globalization, ethnicity, diaspora, and nationalism.

ANTHR 490 Topics on Primates and Evolution: The Evolution of Language
Spring. 4 credits. Limited to 12. Prerequisite: ANTHR 390 or permission of instructor. A. Clark Arcadi.
This seminar begins by examining general theoretical issues in the study of animal communication: What is the function of communication? How do signalers and receivers benefit from communicative interactions? The focal behavior of our nearest relatives, the primates, is then examined. Emphasis is placed on areas relevant to human language: are primate signals learned? Do they have semantic content? Are they assembled syntactically? What do they tell us about primate cognition? Finally, distinguishing features of language, as both a highly structured system and a social behavior, are considered from the point of view of the differences between human language and a possible primate focal communication system? Is there fossil evidence for the origin of language? What does language tell us about human cognition?

ANTHR 672) @ (III)

IV. Nature and Culture

Thinking about nature and culture and their interaction is central to contemporary anthropology. The courses in this section present a biological and evolutionary perspective on language, focus on the interplay between nature and culture, and discuss the controversies surrounding these relationships between these dimensions of human life.

ANTHR 208 The Evolution of Human Mating (III)

ANTHR 211 Nature and Culture @ (III)

ANTHR 242 Early Agriculture @ # (III)

ANTHR 344 Male and Female in Chinese Culture and Society (also WOMNS 344) @ (III)

ANTHR 370 Environmental Archaeology (also ANTHR 670 and ARKEO 370/670) (III)

ANTHR 371 Human Paleontology (also BIOEE 371) (I)
Fall. 4 credits. Prerequisite: one year of introductory biology or ANTHR 101 or permission of instructor. Lecos, M W F 2:30; lab, 1 hour each week TBA; occasional field trips. Offered alternate years. K. A. R. Kennedy.
A broad survey of the fossil evidence for human evolution with special attention to skeletal and dental anatomy, geological contexts, paleoecology, dating methods, archaeological associations, and current theories of human origins and physical diversity.

ANTHR 372 Hunters and Gatherers (also ANTHR 672) @ (III)

ANTHR 375 Evolutionary Theory and Human Behavior (also ANTHR 675) (III)

ANTHR 390 Primate Behavior and Ecology (also ANTHR 690 and ARKEO 370/670) (III)

ANTHR 409 Approaches to Archaeology (also ANTHR 609 and ARKEO 409/609) (III)

ANTHR 422 Anthropology and Environment @ (III)
Fall. 4 credits. Limited to 15 students. Prerequisite: anthropology major or permission of instructor. D. Holmberg.
For course description, see section III, Anthropology Major Senior Seminars.

ANTHR 490 Topics on Primates and Evolution: The Evolution of Language
Spring. 4 credits. Limited to 12. Prerequisite: ANTHR 390 or permission of instructor. A. Clark Arcadi.
For course description, see section III, Anthropology Major Senior Seminars.

ANTHR 490 Topics on Primates and Evolution: The Evolution of Human Language
Spring. 4 credits. Limited to 12. Prerequisite: ANTHR 390 or permission of instructor. A. Clark Arcadi.
For course description, see section III, Anthropology Major Senior Seminars.

V. Human History and Archeology

Archaeology tells the story of human origins, the invention of farming and settled life, the rise of complex social institutions and technologies, and the worldview of the past, while also teaching field and laboratory methods for uncovering the human past.

ANTHR 203 Early People; The Archaeological and Fossil Record (also ARKEO 203) @ (III)

ANTHR 215 Stone Age Art (also ARKEO 215) @ (III)
Fall. 3 credits. Not offered 2001–2002.

ANTHR 240 Old World Prehistory (also ARKEO 240) # (III)
Fall. 3 credits. Not offered 2001–2002.

ANTHR 242 Early Agriculture @ # (III)

ANTHR 317 Stone Age Archaeology (also ARKEO 317) (III)
and age into account. We also examine the geographical area, but ranges widely in differing interests and experiences of children, adults of reproductive age, and the elderly. This course is not limited to any period or organization in past societies. Some archaeologists are also trying to take into account the feminist thought and uses of archaeological data by contemporary feminists.

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and numerous anthropological approaches are presented, along with courses focused on the design of anthropological research projects.

VI. Anthropological Thought and Method

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and numerous anthropological approaches are presented, along with courses focused on the design of anthropological research projects.
Program, or other departmentally-approved programs. Topics are selected and project proposals prepared by students in consultation with faculty. Fieldwork typically involves extended research (usually four-six weeks) in a foreign setting with faculty supervision, culminating in a major paper or report.

[ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also ARKEO 494) (III) Fall. 4 credits. Not offered 2001–2002.]

ANTHR 495 Action Research Practicum
Fall and spring. 2 credits. Prerequisite: student must be holder of Bartels Action Research Undergraduate Fellowship. D. Greenwood.
The Henry E. Bartels Undergraduate Action Research Fellowship Program offers opportunities for Cornell University undergraduate students from all colleges, departments, and majors to engage in action research projects in the local community, including the Ithaca area and the Cornell campus community. This is a two-part course.

VII. Understanding Cultures
Anthropologists examine the diversity of human behaviors, social relationships and structures, economies, political and legal orders, worldviews, logics, languages, symbols, myths, and religions among the many other means human beings invent to create and reproduce social life around the world. Anthropologists work from a holistic perspective to account for differences and similarities across cultures. Anthropologists also take small-scale societies and local sociocultural systems as the object of analysis. They collect data primarily through ethnographic fieldwork, that is, months or years of participating in and observing of the societies they study. Anthropologists see inherent linkages between the practical and the meaningful dimensions of human existence.

A. Anthropological Approaches to Economy, Society, Law, and Politics:
The courses below take as their starting point what are usually defined as the social, political, legal, and economic practices and structures of human life and how they are shaped culturally and how they shape culture.

[ANTHR 217 Nationalism and Revivalism (III) Spring. 4 credits. Not offered 2001–2002.]

[ANTHR 305 Emotion, Gender, and Culture (also WOMNS 305) @ (III) Spring. 4 credits. Not offered 2001–2002.]

[ANTHR 313 Anthropology of the City @ (III) Spring. 4 credits. Not offered 2001–2002.]

ANTHR 321 Sex and Gender in Cross-Cultural Perspective (also ANTHR 621 and WOMNS 321/631) (III) Fall. 4 credits. D. Doukas.
An introduction to the study of sex roles cross-culturally and to anthropological theories of sex and gender. The course examines various aspects of the place of the sexes in social, political, economic, ideological, and biological systems to emphasize the diversity in gender and sex-role definitions around the world.

ANTHR 323 Kinship and Social Organization (III) Spring. 4 credits. B. Lemberg.
Much of this course is a survey of forms of the family, descent groups, and marriage systems. The role of age and sex in the social structure is also considered. The last part of the course is devoted to a history of the British and American family and to its fate in utopian communities.

[ANTHR 326 Economic Anthropology (III) Fall. 4 credits. Not offered 2001–2002.]

ANTHR 328 Conflict, Dispute Resolution, and Law in Cultural Context (III) Fall. 4 credits. V. Santiago-Irizarry.
Rule-making and dispute resolution are integral aspects of social reality in any culture. The ways in which conflict is treated and interpreted—to be then deflected or resolved—articulate with other cultural domains such as religion, politics, and economics as part of the material and symbolic processes that enable sociocultural interaction. At issue then are the formal and processual means that the treatment of conflict takes in different societies. These means constitute frames for the definition of social experience that are used by social factors in the interpretation of events within the sociocultural logic that is in turn refriged by these interpretive frames.

ANTHR 385 The Anthropology of Intellectuals (III) Fall. 4 credits. D. Boyer.
This course offers a review of anthropological research on intellectuals (or "knowledge-specialists") and on social practices of knowledge-making. The question of how social knowledge is articulated, standardized, and reproduced has become an area of renewed interest across the social sciences since the 1970s. Anthropology has been especially interested in understanding how social and cultural knowledges are created, by whom, and for what purposes. These questions actually have a substantial heritage and the course begins with a review of classical sociological and anthropological theories of intellectuals and their role(s) in society. Then the course explores both classic and contemporary ethnographies of knowledge-specialists and knowledge-making with a special focus on the relationship between intellectuals and the creation of cultural order. Finally, the course discusses the possibly changing role of intellectuals in contemporary western "knowledge societies."

ANTHR 415 Creolization, Syncretism, and Hybridity (also $ HUM 415) (III) Spring. 4 credits. V. Munasinghe.
The concepts of Creolization, Syncretism, and Hybridity all convey a state of 'mixture' that has been especially interested in understanding how social and cultural knowledges are created, by whom, and for what purposes. These questions actually have a substantial heritage and the course begins with a review of classical sociological and anthropological theories of intellectuals and their role(s) in society. Then the course explores both classic and contemporary ethnographies of knowledge-specialists and knowledge-making with a special focus on the relationship between intellectuals and the creation of cultural order. Finally, the course discusses the possibly changing role of intellectuals in contemporary western "knowledge societies."

ANTHR 422 Anthropology and Environment (III) Fall. 4 credits. Prerequisite: anthropology major or permission of instructor. D. Holmberg.
For course description, see section III, Anthropology Major Senior Seminars.

[ANTHR 429 Anthropology and Psychoanalysis (III) Fall. 4 credits. Not offered 2001–2002.]

ANTHR 440 Ethnographic Approaches to Studying Professionals and Institutions (III) Spring. 4 credits. D. Boyer.
For course description, see section III, Anthropology Major Senior Seminars.

[ANTHR 460 Culture and International Order (III) Spring. 4 credits. Not offered 2001–2002.]

[ANTHR 479 Ethnicity and Identity Politics: An Anthropological Perspective (III) Fall. 4 credits. Not offered 2001–2002.]

ANTHR 485 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America (also ANTHR 685) @ (III) Spring. 4 credits. B. J. Isbell.
Latin America is characterized today as a region of widespread yet diverse forms of mobilization that appear to be in constant transformation. The "Mad Mothers" of Argentina, indigenous environmentalists, liberation theologians, revolutionaries, ethnic leaders, gay activists, and urban squatters are challenging historicity, engaging in cultural innovation, and articulating in diverse ways with the state and national cultures. This seminar charts a course between theoretical texts on power and mobilization and examples of ethnography/historical cases of social movements.

B. Interpretive Approaches in Cultural Anthropology:
These courses stress symbolic or textual approaches to human society. They take as their object of analysis structures of meaning in such diverse areas as performance and text, myth and religion, specifically defined as the social, political, legal, and economic practices and structures of human life and how they are shaped culturally and how they shape culture.

[ANTHR 322 Media, Culture, and Society (III) Spring. 3 credits. D. Boyer.
This course provides an introduction to understanding the relationship between media and culture from an anthropological perspective. The primary goal of the course is to help students develop an anthropogenic awareness of the complex factors influencing mass media production, representation, and reception. We work toward this goal by studying how media technologies effect the representation and reproduction of cultural identities, how mass media representations mediate the negotiation of national identities and moralities, how institutional situations and professional practices influence media production, and...]

[ANTHR 323 Media, Culture, and Society (III) Spring. 3 credits. D. Boyer.
This course provides an introduction to understanding the relationship between media and culture from an anthropological perspective. The primary goal of the course is to help students develop an anthropogenic awareness of the complex factors influencing mass media production, representation, and reception. We work toward this goal by studying how media technologies effect the representation and reproduction of cultural identities, how mass media representations mediate the negotiation of national identities and moralities, how institutional situations and professional practices influence media production, and...]

We work toward this goal by studying how media technologies effect the representation and reproduction of cultural identities, how mass media representations mediate the negotiation of national identities and moralities, how institutional situations and professional practices influence media production, and...]
how state and market forces both create and restrict possibilities of media expression. A wide range of social and historical cases are covered by both readings and lectures. Course materials include print, visual, and electronic media. Course assignments encourage students to engage the contemporary American media both analytically and critically.

ANTHR 250 The Anthropology of Food and Cuisine (III)
Spring. 4 credits. J. Fajans. This course examines the way food is produced, prepared, exchanged, presented, and given meaning in cultures around the world. It examines the symbolism of specific foodstuffs. Who prepares food and how is it done? Who feeds whom and how these relations are expressed and valued? In addition to looking at these questions we analyze ideas about commensality, how food is used in public contexts for presentation or exchange, and how food functions as a marker of gender, class, status, ethnicity, and identity. In addition to looking specifically at food, we analyze cultural ideas about gender, the body, and identity in terms of how these cultural patterns are produced and expressed through concrete activities like eating, fasting, and special diets. In this class we stress critical and comparative thinking about subjects we tend to take for granted.

ANTHR 291 Filming Other Cultures (also ANTHR 691 and THETR 291/691) (III)
Spring. 4 credits. Limited to 20 students. Preference given to students who have taken either ANTHR 102 or THETR 474. Fee for film screening and maintenance. S55. R. Ascher. For description, see section VI, Nature and Culture.

ANTHR 320 Myth, Ritual, and Symbol (also RELST 320) (III)
Spring. 4 credits. D. Holmberg. This course examines how systems of thought, symbolic forms, and ritual practice are formulated and expressed in primarily non-Western societies. It focuses on anthropological interpretations of space, time, cosmology, myth, classificatory systems (such as color, totems, food, dress, kinship), taboo, sacrifice, witchcraft, sorcery, and rites of passage (birth, initiation, marriage, death). Examines both the roles of specialists (spirit mediums, curers, priests, acolytes, etc.) and non-specialists in producing these cultural forms.

ANTHR 322 Magic, Myth, Science, and Religion (also RELST 222) (III)
Fall. 3 credits (4 by arrangement with instructor). Not offered 2001–2002.

ANTHR 379 Culture, Language, and Thought (III)

ANTHR 381 Anthropology and Religion (also RELST 381) (III)
Fall. 4 credits. A. Willford. This course approaches the study of religion from an anthropological perspective. The centrality and universality of religion in social life has been fundamental in the development of social and cultural theory. We begin by examining the classic theories of religion in the works of Durkheim, Marx, Weber, and Freud, followed by an exploration of how these theories have been influential in anthropological studies of cosmology, ritual, selfhood, myth, sorcery, witchcraft, and pilgrimage. We conclude by examining the apparent persistence, revival and transformation of religious beliefs and practices within modern and modernizing states. This leads us to ask whether the monopolization and globalization of religious ideology poses significant challenges to the anthropological analysis of religion.

ANTHR 406 The Culture of Lives (also WOMNS 406) (III)

ANTHR 408 Gender Symbolism (also WOMNS 408) (IV)

ANTHR 410 Cross-Culturality in the Caribbean (also S HUM 420) (III)
Spring. 4 credits. S. Shukla. This seminar takes as its inspiration the literary and sociopolitical imagination of Guamanian writer Wilson Harris, described as "cross-cultural." Here, the model of diversity being elaborated is rather different from the multiculturalism we are familiar with, in the United States (or Britain or Canada, for that matter), where cultures are seen to function as discrete parts of the whole. Cross-culturality presumes that individual ethnic or racial cultures are partial and reinvent themselves through dialogues with other cultures. Perhaps this broad and flexible conception can only emerge from the Caribbean, a hyper-theorized space of hybridity. But is this because the constitutive ideas of race, nation, and migration, are different in West Indian countries from those that operate in the North American context? Can they be traced historically, in relation to political developments, of colonialism, historically, in relation to political developments, of colonialism, postcolonialism and regionalism? And what happens to these concepts when they move across the border of the nation-state?

ANTHR 432 Culture and Performance and Performing Culture (also RELST 432) (IV)

ANTHR 453 Visual Anthropology (III)

ANTHR 456 Mesoamerican Religion, Science, and History (III)

ANTHR 460 Culture and International Order (III)

ANTHR 469 Gender and Age in Archaeology (III)

C. Cultures in Anthropological Perspective:

Anthropology constructs its theories in the comparison of different social and cultural systems and in the theoretical knowledge about particular places. The courses below are all focused on the cultures and societies of particular areas of the world and organize knowledge about these areas in reference to key anthropological questions. Students without prior experience in anthropology are welcome in these courses.

ANTHR 221 Anthropological Representation: Ethnographies on Latino Culture (also LSP 221 and AM ST 221) (III)
Fall. 3 credits. Not offered 2001–2002.
domination are reflected in national politics and in local and regional responses to the economic and cultural forces of globalization.

[ANTHR 333 Ethnology of the Andean Region @ # (III)]

ANTHR 336 Change and Continuity in the Pacific Islands (III)
Fall. 4 credits. J. Fajans.

This course provides an introduction to the diverse peoples and cultures of Oceania, which extends from Hawaii to New Zealand and from Easter Island to New Guinea. It surveys the continuities and differences within this vast domain. The primary focus is on cultural diversity, linguistic patterns, history and migration, and ecological constraints and adaptations. The course examines issues confronting the contemporary Pacific nations: colonialism, development, nationalism, the politics of tradition, and how the world system influences events and politics in the region. This course is open to anyone interested in the Pacific region and/or in anthropology.

[ANTHR 337 Gender, Identity, and Exchange in Melanesia @ (III)]

ANTHR 339 Peoples and Cultures of the Himalayas (also ANTHR 739) @ (III)
Spring. 4 credits. K. March.

A comprehensive exploration of the peoples and cultures of the Himalayas. Ethnographic materials draw on the lifeways of populations living in the Himalayan regions of Bhutan, India, Nepal, and Tibet. Some of the cultural issues to be examined through these sources include images of the Himalayas in the West, forms of social life, ethnic diversity, political and economic history, and religious complexity.

[ANTHR 344 Male and Female in Chinese Culture and Society (also WOMNS 344) @ (III)]

[ANTHR 345 Japanese Society @ (III)]

[ANTHR 350 Topics in the Anthropology of Europe (III)]

[ANTHR 355 Ancient Mexico and Central America (also ARKEO 355) @ # (III)]

ANTHR 377 The United States (also LSP 377 and AM ST 377) (III)
Fall. 4 credits. V. Santiago-Irizarry.

The anthropological inquiry into one’s own culture is never a neutral exercise. This course explores issues in the cultural construction of the United States as a “pluralistic” society. We look at the ideological context for the production of a cultural profile predicted upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings include historic documents and accounts, popular writing, and recent ethnographies on the United States.

[ANTHR 413 Religion and Politics in Southeast Asia (also ASIAN 413) @ (III)]

[ANTHR 444 Japanese Social Organization @ (III)]

[ANTHR 456 Mesoamerican Religion, Science, and History @ # (III)]

[ANTHR 477 Ethnology of Island Southeast Asia @ (III)]

[ANTHR 493 Seminar in Archaeology (also ARKEO) (III)]

Relevant courses in other departments

BIOPL 247 Ethnobiology
Fall. 3 credits. D. M. Bates.

BIOPL 348 The Healing Forest
Spring. 2 credits. D. M. Bates.

MUSIC 103 Introduction to World Music: Africa and the Americas
Spring. 3 credits. M. Hatch.

MUSIC 104 Introduction to World Music: Asia
Fall. 3 credits. M. Hatch.

MUSIC 245 Gamelan in Indonesian History and Cultures
Fall or spring. 3 credits. M. Hatch.

NS 650 Food and Nutrition Assessment in a Social Context
Fall. 4 credits. D. Pelletier, G. Pelto.

NS 651 Food and Nutrition Action in a Social Context
Spring. 3 credits. D. Pelletier, G. Pelto.

VIII. Graduate Seminars

The graduate program in anthropology is described in much greater detail in the Graduate Program brochure which is available through the Director of Graduate Studies. This document is also found on the anthropology department web page at falcon.arts.cornell.edu/~anthro/. The seminars described immediately below pertain to the program in socio-cultural anthropology. For information about graduate study in archaeology and biological anthropology, see the anthropology department web page.

A core set of seminars is required of all graduate students in socio-cultural anthropology. ANTHR 600 and 601. ANTHR 600 is strongly recommended. These courses are open to graduate students from other related fields. This sequence, and the graduate curriculum in general, is premised on the idea that anthropology is best defined as the comparative study of human social life. This definition resists institutional pressures in the academy to distinguish social science from humanistic or cultural studies and scholarly from more worldly applications. Our most important method, ethnography, is at once scientific and humanistic; disciplinary aspirations refuse to view cultural interpretation and analytic explanation as separable values. Furthermore, theory in anthropology is directly related to practice in the world whether in relation to research or more action-oriented pursuits. Consequently, the core sequences as well as most other courses for graduate students are oriented explicitly toward subverting an ideological construction of social life as separable into cultural and social (or political-economic) domains.

ANTHR 600 Proseminar: Culture and Symbol
Fall. 6 credits. J. Fajans.

This course focuses on an appreciation of symbolic, expressive, and representational forms and processes both as producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiology, etc., we investigate how identity and meaning are linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course endeavors to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlin, among others, as well as contemporary theories are given careful attention.

ANTHR 601 Proseminar: Social Organization
Spring. 6 credits. T. Turner.

This course focuses on linkages between culture and social institutions, representations and practices. The nature of these linkages is debated from strongly contesting points of view in social theory (structuralist, poststructuralist, utilitarian, hermeneutic, Marxist). Unlike debates in critical theory where the form of contestation has been mainly philosophical, in anthropology, these issues have developed in ethnographic analyses. The course briefly surveys kinship theory and economic anthropology with a focus on implications for general issues in social theory. Discussion of attempts to develop dialectical syntheses around the notion of “practice” follows. The issues addressed in this section carry over into the next, colonialism and post-colonialism, in which poststructuralist writings of history are counterposed to Marxist ones. Finally, Lacanian and Marxist visions of ideology as they relate to anthropological theory and ethnographic analysis are examined with particular emphasis on the cultural and social production of persons.

ANTHR 602 The Practices of Anthropology

ANTHR 604 Praxis and Culture

ANTHR 605 Archaeological Research Design (also ANTHR 405 and ARKEO 405/605)

ANTHR 609 Approaches to Archaeology (also ANTHR 409 and ARKEO 409/609)

ANTHR 610 Language and Myth
ANTHR 614 Reading in the Ethnographic Tradition (1880–1960)
Spring. 4 credits. D. Holmberg.
This seminar examines the development of the monograph tradition in American cultural anthropology and British social anthropology. We read "classic" ethnographic texts beginning with Cushing's writings in the late nineteenth century, following with works by anthropologists such as Rivers, Boas, Radcliffe-Brown, Malinowski, Firth, Mead, Bateson, Radin, Redfield, Srinivas, Evans-Pritchard, and Leach. We also read some of the more recent literature assessing ethnographic practice and writing. This seminar alternates from year to year with ANTHR 615.

ANTHR 615 Reading Contemporary Ethnographies (1960–1990)

ANTHR 616 Cultural Production of the Person

ANTHR 621 Sex and Gender in Cross-Cultural Perspective (also ANTHR 321 and WOMNS 321/631)
Fall. 4 credits. Prerequisite: concurrent attendance in the lectures and films of ANTHR/WOMNS 321 and permission of instructor, D. Doukas.
For course description, see ANTHR 321, section VII A, Understanding Cultures.

ANTHR 628 Political Anthropology
Fall. 4 credits. Prerequisite: a reading knowledge of Indonesian is required. J. Siegel.
A comparison of political rhetoric in the Indonesian Old and New Orders. The bearing of such phenomenon as newspapers, magazines, television, and various types of theater, music, and fiction on the shaping of accommodation or opposition to the political order is examined.

ANTHR 629 Chinese Ethnology

ANTHR 632 Andean Symbolism

ANTHR 635 Southeast Asia: Readings in Special Problems
Fall or spring. Credit and hours TBA. Staff. Independent reading course on topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 636 Cognition and Classification

ANTHR 637 Theorizing Social Movements, Human Rights and Democracy in Latin America

ANTHR 638 Contemporary Gender Issues in the Americas (also WOMNS 638)
Spring. 4 credits. Prerequisite: knowledge of Spanish language required. B. J. Isbell.
This course provides a forum of comparison of contemporary gender issues in the Americas; the focus is on the United States and specific case studies in Latin America. Issues discussed are: globalization and more specifically the feminization of poverty and women's responses; gender rights and public policies; women's and children's health; and the construction of gender identity. The course also takes an historical perspective on the development of feminism and gender politics in specific countries that students are researching. Each student is responsible for indepth research on specific issues in a particular country or countries.

ANTHR 639 The Feminine Symbolic

ANTHR 641 South Asia: Readings in Special Problems
Fall or spring. Credit and hours TBA. Staff. Independent reading course on topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 644 Research Design
Spring. 4 credits. A. Subramanian.
This seminar focuses on preparing a full-scale proposal for anthropological fieldwork for a dissertation. Topics include: identifying appropriate funding sources; defining a researchable problem; selecting and justifying a particular fieldwork site; situating the ethnographic project in appropriate theoretical contexts; selecting and justifying appropriate research methodologies; developing a feasible timetable for field research; ethical considerations and human subjects protection procedures; and preparing appropriate budgets. This is a writing seminar; students complete a proposal suitable for submission to a major funding agency in the social sciences.

ANTHR 645 Japanese Ethnology

ANTHR 647 Death of the Father

ANTHR 648 Marriage and Death

ANTHR 649 Narrative and the Analysis of Culture

ANTHR 653 Myth Onto Film (also THETR 653)
Spring. 4 credits. Enrollment limited by available studio space and equipment. Prerequisite: some knowledge of at least one of the following: cinema, animation, filmmaking, mythology, graphics, drawing, or painting is required. Open to undergraduates and graduate students with permission of instructor. Fee for film screening and maintenance, $50. R. Ascher.
In myths, whales fly, pebbles throw themselves across streams, and trees are transformed into women. Toward the end of visualizing myths—in particular the myths of other people—we explore the possibilities of animated film. The technique used is cameraless animation; that is, we draw and paint, frame by frame, directly onto movie film. The intellectual problem is to visualize the myths of others so that they are comprehensible to us and not thought to be of us.

ANTHR 655 East Asia: Readings in Special Problems
Fall or spring. Credit and hours TBA. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 656 Maya History

ANTHR 658 Archaeological Analysis (also ANTHR 458 and ARKEO 458/558)

ANTHR 659 Archaeology of the Household (also ANTHR 459 and ARKEO 459/559)

ANTHR 660 Language, Ideologies and Practices (also LSP 660)

ANTHR 662 Democratizing Society: Participation, Action, and Research (also ANTHR 362)
Fall. 4 credits. D. J. Greenwood.
For description, see ANTHR 362, Section VI, Anthropolological Thought and Method.

ANTHR 663 Action Research
Spring. 4 credits. D. Greenwood.
This seminar is a practicum in action research (AR) in which the semester becomes a self-managing learning environment for the exploration of the technical and group processes involved in AR, including co-generative learning, searching, and AR facilitation. Participation in a seminar-centered LISTSERV on the Internet is expected.

ANTHR 665 Topics in Native American Societies and Cultures
Spring. 4 credits. B. Lambert.
This seminar is intended for undergraduate and graduate students in any field who are prepared to undertake independent research in American Indian Studies. I am particularly interested in how materials from Native American cultures can be used to help solve problems of general anthropological significance and in the contributions Native Americans have made to anthropological and sociological knowledge as teachers and researchers. However, students are encouraged to pursue their own interests and are expected to discuss work in progress with other members of the seminar. A reading list is developed to provide a shared background for discussions.

ANTHR 666 Humans and Animals (also ANTHR 466 and ARKEO 466/666)

ANTHR 667 Contemporary Archaeological Theory (also ARKEO 667)
Spring. 4 credits. Prerequisite: undergraduates with permission of instructor only. N. Russell.
This course surveys recent developments and current debates in archaeological theory. This includes the processual/postprocessual debate and contrasts between scientific and humanistic approaches more generally, as well as other approaches (Marxist, feminist, etc.). We also discuss ethical concerns and engagements with groups outside archaeology with interests in the past.

ANTHR 668 Marx: An Overview of His Thought (also ANTHR 368)
Spring. 4 credits. T. Turner.
For course description, see section VI, Anthropological Thought and Method.
ANTHR 669 *Gender and Age* in Archaeology (also ANTHR 469 and ARKEO 469/669)
Spring. 4 credits. N. Russell.
For course description, see section V, Human History and Archaeology.

[ANTHR 670] Environmental Archaeology (also ANTHR 370 and ARKEO 370/670)

[ANTHR 671] Paleoenthropology of South Asia (also BIOES 671 and ASIAN 620)
Fall. 3 credits. Not offered 2001–2002.

[ANTHR 672] Hunters and Gatherers (also ANTHR 372)

[ANTHR 673] Human Evolution: Concepts, History, and Theory (also BIOES 673)

ANTHR 680 *Anthropology and Globalization* (also ANTHR 480)
Fall. 4 credits. T. J. Digweed.
For course description, see section VI, Anthropological Thought and Method.

[ANTHR 682] Perspectives on the Nation (also AAS 682)

ANTHR 685 Mothers, Priests, Rebels, and Indian Chiefs: *New Social Movements in Latin America*
Spring. 4 credits. B. J. Isbell.
For course description, see section VII.A, Understanding Cultures.

[ANTHR 690] Ritual and Myth: Structure, Process, Practice

ANTHR 691 Filming Other Cultures (also ANTHR 291 and THETR 291/691)
Spring. 4 credits. Fee for film screening and maintenance, $35.
For description, see ANTHR 291 and THETR 291. Graduate students who register in this course attend the meetings of 291. In addition, they write in-depth studies of one or more films in consultation with the instructor.

[ANTHR 699] *Current Fields in Biological Anthropology*

ANTHR 701 Independent Study: Grad I
Fall, spring. Credit and hours TBA.
Intended for graduate students only. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 702 Independent Study: Grad II
Fall or spring. Credit and hours TBA.
Intended for graduate students only. Staff. For course description, see ANTHR 701, section VII, Graduate Seminars.

ANTHR 703 Independent Study: Grad III
Fall or spring. Credit and hours TBA.
Intended for graduate students only. Staff. For course description, see ANTHR 701, section VIII, Graduate Seminars.

ANTHR 739 Peoples and Cultures of the Himalayas (also ANTHR 339)
Spring. 4 credits. K. March.
For course description, see section VII.C, Understanding Cultures.

ARABIC AND ARAMAIC
See under Department of Near Eastern Studies.

ARCHAEOLOGY
See under Special Programs and Interdisciplinary Studies.

ASIAN AMERICAN STUDIES
See under Special Programs and Interdisciplinary Studies.

ASIAN STUDIES
The Department of Asian Studies encompasses the geographical areas of East Asia, South Asia, and Southeast Asia and offers courses in most of the disciplines of the social sciences and the humanities. Asian studies courses through the 400 level (ASIAN is the prefix) are taught in English and are open to all students in the university. Some of these courses may be counted toward majors in other departments; others fulfill the humanities distribution requirement. Courses listed under Asian Studies offered through other departments may fulfill distribution requirements in history, social sciences, and arts.

The Major
A student majoring in Asian studies normally specializes in the language and culture of one country and often chooses an additional major in a traditional discipline.

Majors complete two courses at the 200 level (a minimum of six credits with a grade of C or better) in one of the Asian languages offered at Cornell. This is in addition to at least 30 additional credits (which may include up to six credits of further language study) selected by the student in consultation with his or her adviser from among the courses listed under the Department of Asian Studies and numbered 250 and above.

The applicant for admission to the major in Asian studies must have completed at least one area studies course selected from among those listed under the Department of Asian Studies and must receive permission for admission to the major from the director of undergraduate studies. The student must have received a minimum grade of C in this course and in all other courses counted toward the major.

Hons
To be eligible for honors in Asian studies, a student must have a cumulative grade average of A- in all Asian studies area courses, exclusive of language study only, and must successfully complete an honors essay during the senior year. Students who wish to be considered for honors should apply to the director of undergraduate studies during the second term of their junior year. The application must include an outline of the proposed project and the endorsement of a supervisor chosen from the Asian studies faculty. During the first term of the senior year the student does research for the essay in conjunction with an appropriate Asian studies course or ASIAN 401. By the end of the first term the student must present a detailed outline of the honors essay or other appropriate written work and have it approved by the project supervisor and the director of undergraduate studies. The student is then eligible for ASIAN 402, the honors course, which entails writing the essay. At the end of the senior year, the student has an oral examination (with at least two faculty members) covering both the honors essay and the student’s area of concentration.

Concentration in East Asia Studies
A candidate for the Bachelor of Arts degree at Cornell may take a concentration in East Asia studies by completing at least 18 credits of course work.

Students normally take five courses in East Asia studies at the 200 level or above from those East Asian courses listed (China, Japan, Korea) either under Asian Studies or Asian-related courses. Of these, two courses might be Asian language courses at the 200-level or beyond. East Asia graduate courses may also be offered for the concentration, as well as East Asia-related courses with a research paper on an East Asia topic. Appropriate courses taken through Cornell Abroad in East Asia may also be counted toward the concentration. Students concentrating in East Asia studies should select an adviser from the East Asia Program faculty for consultation on their course of study. For more information, contact the Asian Studies Department at 388 Rockefeller Hall, (607) 255–5095.

Concentration in South Asia Studies
A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in South Asian studies by completing at least 18 credits of course work in South Asian studies, including ASIAN 215 (Introduction to South Asia) and four courses or seminars at the intermediate or advanced levels, two of which may be South Asian language courses.

Students taking a concentration in South Asian studies are considered members of the South Asia Program and will have an adviser from the program faculty. (This adviser will be for the student’s concentration and is not a substitute for a student’s academic adviser in his or her major.)
One South Asian graduate course may be taken for the concentration with consent of both the instructor and the adviser. The same applies for one South Asia-related course with a research paper on a South Asian subject. Additional courses may be added if offered with comparable South Asia content.

Concentration in Southeast Asia Studies

A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in Southeast Asian studies by completing 18 credits of course work. A recommended plan would include ASIAN 208 and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Students taking a concentration in Southeast Asian studies are members of the Southeast Asia Program and are assigned an adviser from the program faculty. Such students are encouraged to commence work on a Southeast Asian language either at the 10-week intensive courses offered by the Southeast Asia Studies Summer Institute (SEASSI) or by studying for one semester at IKIP Malang, Indonesia; Khon Kaen University, Thailand; or Hanoi University, Vietnam; fellowships are available for undergraduates through the Cornell Abroad Program.

Intensive Language Program (FALCON)

The FALCON Program offers intensive instruction in Japanese or Chinese. The program is still the only one in the world offering a full year of intensive instruction from the elementary level, except for the exclusive language schools of some government agencies. Students must formally apply to the program, but the application process is simple and admission is open to all students. (Applications available for FALCON from the administrative assistant, room 125 Rockefeller Hall, or visit our web site www.arts.cornell.edu/asiand/falcon.htm and apply online.) Students may take the entire sequence of 100, 160, 161, 162, or any other portion of the program if they have the necessary background (to be determined by a placement test). The courses are full-time intensive language study; the degree of intensity required does not allow students to enroll simultaneously in other courses or to work, except perhaps on weekends.

Study Abroad

Cornell is a member of the Inter-University Center for Japanese Language Studies in Yokohama, the Inter-University Board for Chinese Language Studies in Beijing (at Tsinghua University), and a member of the Council on International Educational Exchange offering study in China at Beijing University and Nanjing University. These centers offer training in both spoken and written forms of the languages. The Kyoto Center for Japanese Language Studies (KCGS) is an undergraduate program for students who wish to spend either one or two semesters in Kyoto, Japan studying the Japanese language as well as contemporary and traditional Japanese culture. Cornell is a class-A member of the American Institute of Indian Studies, which offers fellowships in India for intensive language study in Hindi, Bengali, and Tamil.

Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, cosponsor an academic semester or year in Nepal.

Other opportunities include a junior year abroad at IKIP Malang, in Indonesia, or at the School of Oriental and African Studies, University of London. Many other options for study in Asia exist, including in Indonesia, Thailand, and Vietnam through the Council for International Educational Exchange. Undergraduates should consult Cornell Abroad; graduate students should inquire at the East Asia Program, the South Asia Program, or the Southeast Asia Program offices.

First-Year Writing Seminars

See John S. Knight Institute brochure for times, instructor, and descriptions.

General Education Courses

ASIAN 191 Introduction to Modern Asian History (also HIST 191)  @ (III)
Fall. 4 credits. T. Loos. S. Cochran. See HIST 191 for description.

ASIAN 192 Introduction to World Music: Asia (also MUSIC 104)  @ (IV)
Fall. 5 credits. M. Hatch. See MUSIC 104 for description.

ASIAN 203 Introduction to Comparative Literature (also COM L 203)  @ (IV)
Fall. 4 credits. Team. See COM L 203 for description.

ASIAN 204 Global Fictions (also COM L 204)  @ (IV)

ASIAN 206 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also HIST 207)  @ (III)

ASIAN 208 Introduction to Southeast Asia  @ (III or IV)
Spring. 3 credits. T. Chaloemtiarana. This course is for anyone curious about the most diverse part of Asia, it defines Southeast Asia both as the part of the world that has emerged since 1945 (Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, and Vietnam) and as a larger cultural world extending from southern China to Madagascar and Polynesia. Students find a serious, organized introduction to a variety of disciplinary and topical approaches to this region, including geography, linguistics, history, religion and ideology, anthropology and family systems, music, literacy and literature, art and architecture, agriculture, industrialization and urbanization, politics and government, warfare and diplomacy, ecological and human degradation, and business and marketing. The course teaches both basic information and different ways of interpreting that information.

ASIAN 211 Introduction to Japanese: Japanese Texts in History  @ (IV)
Fall. 3 credits. B. deBary. An interdisciplinary introduction to Japanese culture and the meanings generated by these artifacts have changed dramatically over time. We consider verbal and visual, fictional and historical, canonical and noncanonical texts, including the eighth century Kojiki, the courtly narrative Tale of Genji, eighteenth century puppet theater, modern Ainu autobiography, and films and comic books dealing with themes of nuclear warfare and apocalypse.

ASIAN 212 Introduction to China  @ (IV)
Spring. 3 credits. (4 credits with a special project, consult instructor for information.) R. M. Neal.

An interdisciplinary introduction to Chinese culture especially designed for students not majoring in Asian Studies.

ASIAN 215 Introduction to South Asian Civilization  @ (IV)
Fall. 3 credits. C. Minkowski.

An interdisciplinary introduction to the culture and history shared by the nation-states and historical states of South Asia. Designed for students not majoring in Asian Studies. Guest lecturers provide the perspective of their disciplines to the general themes of the course: cultural diversity and the role of tradition in contemporary life.

ASIAN 216 Introduction to Korea (also HIST 218 and GOVT 218)  @ (IV)
Fall or spring. 3 credits. Staff.

An interdisciplinary introduction to Korean history and culture, including: geography, ethnography, language, literature, philosophy, religion, political economy, government, music, and art (sculpture, architecture, painting). Includes an overview of Korean history from the Three Kingdoms Period to the present, focusing on the March 1, 1919 Independence Movement, the Korean War, the 1960 Student Revolution, the 1980 Kwangju Massacre, and other events.

Asia—Literature and Religion Courses

The following courses are taught entirely in English and are open to any Cornell student.

ASIAN 245 Gamelan in Indonesian History and Cultures (also MUSIC 245)  @ (IV)
Fall or spring. 3 credits. M. Hatch. See MUSIC 245 for description.

ASIAN 249 Peddlers, Pirates and Prostitutes: Subaltern Histories of Southeast Asia, 1800–1900 (also HIST 249/648)  @ (III)
Spring. 4 credits. E. Tagliacozzo. See HIST 249 for description.

ASIAN 250 Introduction to Asian Religions (also RELST 250)  @ (IV)
Spring. 3 credits. D. Boucher.

This course explores a range of religious traditions in South Asia (Pakistan, India, and Sri Lanka) and East Asia (China and Japan) including Hinduism, Buddhism (South and East Asian), Confucianism, Daoism, and Shinto. We concentrate on these religions in traditional times in order to understand better the historical foundations that have influenced much of what these cultures are today. We attempt to inquire collectively into the nature of religious impulses among peoples who are in some fundamental ways both very much like us and very much different from us. The course format includes lectures and discussion sections.
This course probes the truths behind wider mark on South Asian civilization. These practices themselves—techniques of meditation and contemplation, religious ways of using intellect, forms of chant and ritual—and the dynamics through which these have left a reverberation and contemplation, religious ways of practice in Indian traditions. We examine both Hindu and Buddhist sources, consistently examining the ways in which similar practices are given distinct shapes by the two religious traditions.

ASIAN 284 Southeast Asia in the World System: Capitalism and Incorporation, 1750-1990 (also HIST 294) @ # (III)
Fall. 4 credits. E. Tagliacozzo. See HIST 284 for description.

ASIAN 294 History of China in Modern Times (also HIST 294) @ (III)
Spring. 4 credits. S. Cochran. See HIST 294 for description.

ASIAN 297 Japan Before 1600 (also HIST 297) @ (III)
Fall. 4 credits. J. Piggoit. See HIST 297 for description.

ASIAN 298 The U.S.-Vietnam War (also HIST 298) @ (III)
Fall. 3 credits. K. Taylor. This is a survey of events in Vietnam, the US, and elsewhere related to US intervention in Vietnam from the 1940s to 1975. Readings include historical narratives, memoirs, and literature. Alternative ways of understanding this war in the context of Vietnamese and American history will be explored.

[ASIAN 301] Schools of Thought-Ancient China @ (IV)
Spring. 4 credits. Not offered 2001–2002. R. McNeal. This course introduces students to China's most important early moral and political philosophers, such as Confucius, Laozi, and Sunzi, through readings in translation. We address the traditional conception of six schools of thought in ancient China as reflected in classical and modern historiography and examine newly discovered texts with an eye toward clarifying the relationships among early schools and their representatives.

[ASIAN 302] Art of War in Ancient China @ (IV)
Winter only. 4 credits. R. McNeal. Also fulfills Humanities requirement. Sun-tzu's Art of War is one of the most widely translated and circulated books of all time. Businessmen in Asia swear by it, professional coaches invoke it when planning strategy, and students of personal influence plumb its depths for timeless wisdom on how to defeat an enemy without taking to the battlefield. This class examines Sun-tzu's text in its historical context, along with several other early military and strategic works. We treat these works as a genre, and look for characteristic features of the genre that can be better understood by reading these texts not as manuals for modern-day success, but as a record of a complex and sophisticated conceptualization of the role of warfare and all its components in the broader mission of the state.

ASIAN 306 Zen Buddhism (also RELST 306) @ (IV)
Spring. 4 credits. Prerequisites: any course in Buddhism or Asian Studies (Religious Studies) 250, or consent of the instructor. Graduate students can take this course for credit and sign up for an additional credit hour for an extra session. J. M. Law. This course is an exploration of the Zen tradition, with a focus on central religious, historical and aesthetic developments in Japan. The course begins by situating the rise of Zen in China and the development of the Northern and Southern Schools. In Japan, we look at the establishment of Zen in the Kamakura period, with a focus on the developments of both Rinzai and Soto Zen, with a focus on the early transmissions of Chinese texts and practices to Japan through Japanese emissaries. To understand the developments of these two schools, we will study the lives and writings of both Eisai (1141–1215) and Dōgen (1200–1253), and also explore how their life works and writings influenced later developments in Zen. We also explore the work of the Tokugawa Zen figure Hakuin (1668–1769). In the latter part of the class, we study in which Zen has become implicated in Japanese postwar identity discourses, by focusing on a critical reading of the writings of D. T. Suzuki and other writings which create an aestheticism as a central component of Japanese national identity. Includes fieldtrips to some of the largest Zen monasteries in North America. Japanese readings are available to those able to read Japanese.

ASIAN 311 Modern Korean Culture and Literature @ (IV)
Spring. 4 credits. Not offered 2001–2002. Staff. A survey of the literature of the Post-Liberation period (1945–present), with an emphasis on the development of modern Korean poetry and its relation to the intellectual history of this time. Students read major poetic texts of each period in English translation as well as writings on cultural movements and major arguments in intellectual history.

ASIAN 312 Intellectuals in Early Modern Korea @ (IV)
Fall. 4 credits. M. Shin. An introduction to early modern Korean history (early 19th century to 1945) through a survey of its major intellectuals. The course gives an overview of the political and socioeconomic background that gave rise to these intellectuals and then examines how they commented on and tried to shape the conditions of their times. Topics to be covered include critiques of feudal society, the origins of modern literature and historiography, socialism/communism, liberation movements, Christianity, and feminism. Readings include secondary sources, Korean texts in translation, and works by Korean intellectuals written in English.

[ASIAN 314] Europe and Its Others (also COM L 304) @ (IV)

[ASIAN 347] Tantric Traditions (also RELST 349) @ (IV)
Fall. 4 credits. Not offered 2001–2002. D. Gold. This course treats the development of tantric traditions in the Indian subcontinent and beyond. Philosophical, socio-religious, cultic, and visionary dimensions of tantra are discussed. We study different Hindu and Indo-Tibetan traditions, with some attention also paid to tantric developments in East Asian Buddhism.

ASIAN 351 Indian Religious Worlds (also RELST 351) @ (IV)
Fall. 4 credits. D. Gold. A study of religious traditions as lived today in the Indian subcontinent. Alongside some understanding of the earliest periods, we paid to differences in piety and practice within alternative environments: urban and rural, male and female, more and less orthodox. In addition to several Hindu traditions, Sikh, Jain, Buddhist, and Muslim traditions may also be treated. Readings include ethnographies and perhaps a novel.

[ASIAN 357] Chinese Religions (also RELST 357) @ (IV)
Spring. 4 credits. Not offered 2001–2002. D. Boucher. This course presents a broad survey of Chinese religions from the earliest historic records through the late imperial and modern periods, from highbrow philosophical movements to local deity cults. Our survey focuses intensively on the great traditions of Confucianism, Taoism, and Buddhism as well as the lesser known practices that often fall through the cracks. Our goal in part is to trace patterns of continuity among competing and sometimes acrimonious voices.

[ASIAN 358] Chinese Buddhism (also RELST 358) @ (IV)
Fall. 4 credits. Not offered 2001–2002. D. Boucher. Buddhism was a mature tradition when it came to China, a society of great sophistication and antiquity, and in their remarkable
This course is a survey of Vietnamese history and culture from earliest times to the present. Graduate students may enroll and attend a seminar section.

**ASIAN 359 Japanese Buddhism: Texts in Context (also RELST 359) @ # (IV)**

This course explores a number of major dynamics in Buddhist thought and practice with special attention to the Lotus Sutra, (2) the major traditions of Buddhist doctrine in practice of four major figures in Japanese Buddhism: Saicho, Kukai, Nichiren, and Dogen; and (3) the receptions of Buddhist thought and practice in the "third" and "fourth" Buddhist sub-periods in Japan. Readings are in English, with optional readings in Japanese for graduate students.

**ASIAN 360 Confucianism @ # (IV)**
Spring. 4 credits. K. Taylor.

This course surveys the major works and thinkers associated with Confucianism in China, Japan, Korea, and Vietnam. It also emphasizes the influence of Confucian thought on rulers, societies, and individuals, from ancient to modern times. The focus of the course is on Confucianism as a moral philosophy of human relations. There is comparative discussion of Confucianism and other major world religions and philosophies.

**ASIAN 373 Twentieth-Century Chinese Literature @ (IV)**
Fall. 4 credits. E. Gunn.

A survey of the principal works in English translation, the course introduces fiction, drama, essays, and poetry of China beginning with the Republican era and continuing up to the present. We explore the contexts in which these works were written and their impact on China and Taiwan, with attention to social and political issues and literary theory.

**ASIAN 374 Chinese Narrative Literature (also COM L 376) @ # (IV)**
Spring. 4 credits. E. Gunn.

Selected works in classical Chinese fiction are read in translation. Major novels, such as The Dream of the Red Chamber and Water Margin, are emphasized.

**ASIAN 383 Introduction to the Arts of China (also ART H 380 and ARKEO 380) @ # (IV)**

See ART H 380 for description.

**ASIAN 384 Representation and Meaning in Chinese Painting (also ART H 385) @ # (IV)**

See ART H 385 for description.

**ASIAN 385 History of Vietnam (also HIST 388/688) @ # (IV)**
Spring. 4 credits. Also fulfills Humanities requirement. K. Taylor.

This course is a survey of Vietnamese history and culture from earliest times to the present. Graduate students may enroll and attend a seminar section.

**ASIAN 390 The Sanskrit Epics @ (IV)**
Spring. 4 credits. C. Minkowski.

Readings in translation from the two Sanskrit epics, the Mahabharata and the Ramayana, supported by a study of the reception of the epics in later Indian imaginative literature. Attention is also given to comparative theories of the epic in ancient Indo-European languages.

**ASIAN 394 The House and the World: Architecture of Asia (also ART H 395) @ # (IV)**
Spring. 4 credits. K. McGowan.

See ART H 395 for description.

**ASIAN 395 Classical Indian Philosophical Systems (also CLASS 395 and RELST 395) @ # (IV)**
Fall. 4 credits. Prerequisite: some background in philosophy or in classical culture. Not offered 2001–2002. C. Minkowski.

A survey of the traditions of philosophical inquiry in ancient India, with such themes as perception, language, identity, karma, and liberation; the dialogue with Buddhism, Jainism, materialism, and cynics; and new theistic models, particularly among the Saiva philosophers in Kashmir.

**ASIAN 396 Southeast Asian History from the Eighteenth Century (also HIST 396) @ (III)**
Spring. 4 credits. T. Loos.

See HIST 396 for description.

**ASIAN 400 Tibetan Buddhism (also RELST 400) @ # (IV)**
Fall. 3 credits. Prerequisites: at least 1 course on Buddhism or Asian religions, or the permission of the instructor. Class size is limited to 15. Not offered 2001–2002. M. Law.

This course is an exploration of the development of the Buddhist tradition through a focus on the myths and stories about, and writings by central figures in, what is known in the west as Tibetan Buddhism. Following an overview of the historical development of this tradition, we explore the contributions made by several (mythico-historical) seminal thinkers in the tradition including Atisa, Naropa, Marpa, Milarepa, and Tsongkapa, and explore how their works reflect the process of adapting Buddhism to the Tibetan context. (We also include myths and stories about the mythical founder Padmasambhava.) Readings include primary source religious works written by or attributed to these figures, historical and biographical accounts of their lives (their "biographies" and "autobiographies" and tributes to them by their disciples), and treatises and commentaries on their works which are influential in the formulation of the various schools of Tibetan Buddhism. In the final segment of the course, we explore the implications of exile for Tibetan Buddhism, and read several popular works by the Ven. Tenzin Gyatso (the fourteenth Dalai Lama), to show how the dramatic changes made in the tradition as it reformulates itself in a more global context. Throughout this course, we direct our attention to dynamics of tradition formulation, articulation, and reformation as it changes throughout Tibetan history. In addition to two short writing assignments and a final research project, we take field trips to two regional Tibetan monasteries.

**ASIAN 405 Global Tokyo (also S HUM 404) (III)**

See S HUM 404 for description.

**ASIAN 407 Religion and Human Rights (also RELST 407) (IV)**

This course, open to advanced students with a strong background in either religious studies, human rights work, or international law pertaining to human rights, is an exploration of the various ways that the sub-disciplines within religious studies (hermeneutics, critical ideological studies, the sociology of religion, etc.) can shed light on our understanding of human rights issues. In particular, the course focuses on four intersections of religion and human rights: religious traditions as ideologies of oppression used to legitimize major human rights violations; religious tradition identification as the primary "subject relationships" causing certain people or groups to be targeted for persecution; religious traditions and doctrine as the motivation for certain human rights workers to campaign as advocates for victims; and the role of religious discourse in attempts at reconciliation after major human rights violations have occurred. Through specific cases (mostly Asian), students explore the methodological issues that each of these intersections raises. The focus of the course is on close readings of primary source documents (some in translation by necessity), context studies of historical and social events surrounding major violations of human rights, and preparation of public response papers for each of the cases studied. In addition to weekly writing assignments prepared as part of a portfolio of written work, students also prepare one group presentation for the class. This course is offered in conjunction with the Writing in the Majors Program.

**ASIAN 410 Chinese Performing Arts @ (IV)**

The course surveys drama, music theater, and film in twentieth-century China. Some material requires knowledge of Chinese.

**ASIAN 411 History of the Japanese Language (also LING 411) @ # (III)**

See LING 411 for description.

**ASIAN 412 Linguistic Structure of Japanese (also LING 404) (III)**

See LING 404 for description.

**ASIAN 415 Virtual Orientalisms (also S HUM 415 and COM L 418) @ # (IV)**

A comparative study of representations of Japan in postwar French, American, and Japanese cultures. The course is particularly concerned with the role of virtual technologies in representations of Japan, as well as with a particular emphasis on late twentieth-century representations of Japan as a site of utopic or dystopic virtuality. Positing Orientalism as a broadly-based, but definitely not monolithic, ensemble of representational and regulatory...
practices, we attend to differences in the historical context. Examples include: Roland Barthes' figuring of Japan as a "possibility of difference," or of "the very fissure of the symbolic" in post-1968 France, and Michael Chrichton's more recent superposition of a "Rising Sun" over processes of American racial making. High-stakes reproduction and alteration of images, and trade imbalances. Ambiguously represented as a culture of both the "chrysanthemum" (the hyper-aesthetic) and the "sword" (the hyper-phallic), with the advent of what some have called "techno-orientalism." Japan has increasingly become a preoccupation of technological and futuroligical imagination. We consider literary, filmic, and theoretical texts, as well as science fiction, video games, and fanzines.

ASIAN 416 Undergraduate Seminar on Gender and Sexuality in Southeast Asian Art (also HIST 416) (III)
Fall. 4 credits. T. Loos.
See HIST 416 for description.

ASIAN 417 Second Language Acquisition (also LING 415) (III)
Y. Shirai.
See LING 415 for description.

ASIAN 427 Buddhist Monasticism (also RELST 425) @ # (IV)
D. Boucher.
Buddhist monasticism has existed and continues to exist in the context of a complex exchange system within Buddhist cultures. The laity provide for the monks' and nuns' material needs; the mendicants, by accepting these offerings, provide an opportunity for spiritual merit and advancement for the faithful. This course explores Buddhist renunciant traditions—sedentary monks and nuns, forest hermits, revolutionary reformers, and others—in the light of this "religious capitalism." We consider the formation of this role for monks in Buddhist societies as well as attempts both to defend and to critique this exchange system within Buddhism. This course operates in a seminar format, which assumes careful reading, active participation, and independent research on the part of all students.

ASIAN 428 Democracy and the City: East and West, Old and New (S HUM 402)
Fall. 4 credits. Limited to 15 students. Permission of instructor, P. Jullien.
See S HUM 402 for description.

ASIAN 429 Structure of the Chinese Language (also LING 429) @ (III)
H. Tao.
See LING 429 for description.

ASIAN 430 Structure of Korean (also LING 430) (III)
J. Whitman.
See LING 430 for description.

ASIAN 431 Language, Religion, and Politics in Modern South Asia (IV)
Fall. 4 credits. P. Mir.
This course examines the modern formation of linguistic identities in South Asia with an emphasis on their role in religious nationalisms and movements for regional autonomy. Drawing on theoretical literature about language and identity to provide a framework, we explore particular movements in South Asian history when linguistic identity became politically charged. Specific topics include: the role of Hindi, Urdu, and Punjabi in constituting, respectively, Hindu, Muslim, and Sikh nationalism in the colonial period; the relationship between linguistic identity and regional movements in post-colonial South Asia, looking specifically at Assamese and Tamil; the adoption of Urdu as the national language of Pakistan; and how regional identities and languages, particularly Bengali until the civil war of 1971, were subsumed under the rubric of Muslim unity.

ASIAN 432 Perspectives from Historiography, Literature, and Film (IV)
Spring. 4 credits. F. Mir.
The aim of the course is to familiarize students with the main historical arguments regarding India's partition, and to compare the narratives of partition as they emerge from different genres. The course looks at the primary historiographical arguments about the partition of British India and its immediate impact. It explores fictional narratives of partition events, looking primarily at short stories and excerpts from novels. Finally, it examines how the narrative of partition has been represented in Indian and Pakistani cinema. Students are encouraged to think about different forms of historical narrative and how historiography can incorporate multiple perspectives and interpretations into the understanding of a historical event by drawing on alternative sources.

ASIAN 441 Mahayana Buddhism (also RELST 441) @ # (IV)
D. Boucher.
By reading successive examples of Mahayana Buddhist literature, we study the formation and evolution of the ideal of the bodhisattva; the understanding of transcendental wisdom and the concept of emptiness; and the workings of both the conscious and subconscious mind in the course of spiritual practice. We include discussion of major philosophical schools, as well as issues of social setting and popular religious practice, in both India and East Asia.

ASIAN 449 History and Methods of the Academic Study of Religion (also RELST 448) (III)
Spring. 4 credits. Prerequisite: 1 course satisfying the religious studies major.
D. Gold.
In this course we read and discuss formative works in the study of religion, exemplary modern studies, and commentaries on contemporary issues in the field. We first explore the rise of the analytic study of religion in the nineteenth century, contrasting the implications of romantic and enlightenment temperaments for academic method. We then examine some different disciplinary perspectives on religion developed in the twentieth century, with attention to exemplary writers. We conclude with some postmodern and postcolonial perspectives. In addition to the theoretical perspectives presented in the works read, we also pay attention to the ways in which they engage readers' imaginations and what they suggest about the characteristics of knowledge in Religious Studies.

ASIAN 450 Crime and Diaspora in Southeast Asian History (also HIST 451) @ (III)
Fall. 4 credits. E. Tagliacozzo.
See HIST 451 for description.

ASIAN 460 Indian Meditation Texts (also RELST 460) @ # (IV)
Fall. 4 credits. D. Gold.
Because texts that record visionary experience prescribe the practice of contemplation, and present enigmatic utterances are highly valued in Indian tradition, they need to be taken seriously by students of Indian and world civilizations. Yet the special problems of interpretation that these texts present have often caused meditation texts to be passed over in embarrassed, sometimes reverent silence. In this course, we draw on approaches from literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise: in what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between convention and experience in the creation of the texts? Readings are drawn from the Upanishads and Tantra, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.

ASIAN 463 Readings in Hindi and Urdu Literature @ (IV)
D. Gold.
Selected topics in Hindi and Urdu literature, with readings in the original, discussions in Hindi-Urdu and English. May be repeated for additional credit with consent of instructor.

ASIAN 471 Japanese Theatre (also THETR 471) @ # (IV)
Fall. 4 credits. Alternates with ASIAN 470.
F. Mir.
A study of traditional Japanese theatre. Topics include ritual and theatre, noh and kyogen, kabuki, and the puppet theatres, and contemporary theatrical use of the traditional forms. Special emphasis is placed on dramaturgy, acting styles, performance aesthetics, and theories of performer training.

ASIAN 476 Senior Seminar on Comparative Colonial Law and Society (also HIST 476 and WOMNS 476) @ (III)
Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2001–2002.
T. Loos.
See HIST 476 for description.

ASIAN 479 Art of the T'ang Dynasty (also ART H 481) @ # (IV)
A. Pan.
See ART H 481 for description.

ASIAN 481 Translation and Identities @ (IV)
N. Sakai.
Translation establishes a division of two spheres and thereby marks the limit of what can be expressed in one medium. Broadly understood, translation can take place not only between two national languages but also at a variety of boundaries within a putatively single society. The seminar investigates
different economies of translation by which different social and cultural identities are constructed, emphasizing the disappearance of multi-lingualism in modern nation-state and the mutation of translation economies which gave rise to new ways of imagining the organismic unity of the society in eighteenth-century and twentieth-century Japan. Seminar readings are translations of pre-modern Japanese and Chinese writings, and modern European and Japanese philosophical articles (in English).

[ASIAN 482 Seminar: Gender Adjudicated (also HIST 480) # (III)]
See HIST 480 for description.

[ASIAN 483 Internationalism, Nationalism, and Modern Japanese Discursive Space @ (III)]
Spring. 3 credits. N. Sakai.
The late nineteenth century marks an important transition period in which nation-states formed in Britain, France, Japan, Germany, the United States, and elsewhere sought to become imperial powers; and "internationalism" virtually collapsed. Focusing on Japanese examples, but not excluding other cases, we study the discursive spaces of modern national subjectivity with a view to the problems of ethnicity, colonialism, imperialism, sexism, violence, historical memory, post-coloniality and academic knowledge. A major critical paper is required.

[ASIAN 486 Ritual and Performance in Japan: Religions (also REL ST 486) (IV)]
Spring. 4 credits. Class size limited to 12. Prerequisites: instructor consent for undergraduates. Ability to read Japanese is not required, but there are optional readings in Japanese. Graduate students may sign up for this as a graduate level course. J. M. Law.
In the last fifty years in Japan, there has been a proliferation of revived, restored, invented, and newly created folk performing arts throughout the country. This course is an exploration of this phenomenon, and its relationship to Japanese religion. The course begins with an overview of the major theoretical works relating to creation, revolution and invention, with a focus on ritual performance theory. With this theoretical basis, we explore several paradigmatic cases classified as "folk performing arts" (minzoku geintō) which are directly related to overtly religious concerns. Through these cases, we see how both national and local identity discourses are being worked out through public ritual performances. Each student also has an opportunity to conduct in-depth research on one ritual performance tradition, or a given aspect of critical theory relating to ritual studies. This course is recommended for upper level undergraduates with the consent of the instructor or graduate students.

[ASIAN 493 Problems in Modern Chinese History (also HIST 493) @ (III)]
Fall. 4 credits. S. Cochran.
See HIST 493 for description.

[ASIAN 496 Tokugawa Literature and Thought # (IV)]
Spring. 4 credits. N. Sakai.
An introduction (in English translation) to literary, theatrical, and intellectual works of the Tokugawa period (1600–1868). We examine the characteristics of early Tokugawa literary and theatrical works and see how different they are from the literary works of the later Tokugawa period. We also read the philosophical and philological works on the classics by writers such as Ogyu Sorai and Motoori Norinaga to understand the ways contemporary Japanese intellectuals understood cultural activities and literature during the Tokugawa period.

[ASIAN 499 Problems in Modern Chinese History (also HIST 499) @ (III)]
Spring. 4 credits. S. Cochran.
See HIST 499 for description.

[ASIAN 580 Problems in Asian Arts: Water and Politics in Southeast Asia (also ART H 580)]
Spring. 4 credits. K. McGowan.
See ART H 580 for description.

[ASIAN 597 Japan Before 1600 (also HIST 597)]
Fall. 4 credits. J. Piggott.
See HIST 597 for description.

Asia—Graduate Seminars
For complete descriptions of courses numbered 500 or above, consult the director of graduate studies.

[ASIAN 601 Southeast Asia Seminar: Indonesia (also GOVT 652)]
The course serves as an introduction to Indonesia, considered in several dimensions: nationalist Indonesian, ethnic Indonesian, the relationships between nationalism and the politics of the present, minority problems, etc. No knowledge of Indonesian is required.

[ASIAN 602 Southeast Asia Seminar]
Fall or spring. 4 credits. Staff.

[ASIAN 603 Southeast Asia Topical Seminar: Sociology of Natural Resources and Development (also R SOC 607)]
Spring. 3 credits. P. Gellert.
Building on theories in the sociology of development, this seminar examines the role of natural resource extraction, processing, and exports to global markets in the development trajectories of nations in Asia, Africa, and Latin America. This course engages students in both theoretical debates and practical implications of resource access, control, and conflict amongst various social stakeholders. Detailed historical cases are examined, primarily from Southeast Asia (Indonesia, Malaysia, Philippines).

[ASIAN 604 Southeast Asia Topical Seminar]

[ASIAN 605/606 Master of Arts Seminar in Asian Studies]
605, fall; 606, spring. 2–4 credits. Staff.

[ASIAN 609 Modern Japanese Studies: The Formation of the Field in History and Literature (also HIST 609)]

[ASIAN 610 SLA and the Asian Languages (also LING 609)]

[ASIAN 612 Japanese Bibliography and Methodology]
Fall. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. F. Kotsu.

[ASIAN 613 Southeast Asian Bibliography and Methodology]
Fall. 1 credit. Prerequisite: permission of instructor. A. Reddy.
This course is designed to instruct students in methods of identifying and locating resources for the study of Southeast Asia. Emphasis is on the practical aspects of using various types of bibliographical tools to identify both primary and secondary sources in Southeast Asian and Western languages. Electronic databases and online services as well as traditional printed resources are covered. Relevant arcana of library science is explained as necessary. Required of honors students and Master of Arts candidates. No foreign language competence is required but a reading knowledge of at least one Southeast Asian language or other Asian language (especially Chinese or Japanese) as well as a major European language (especially French, Spanish, or Dutch) is highly desirable.

A series designed to introduce as well as enhance and build on students' knowledge of various topics of importance to South Asia (Bangladesh, India, Nepal, Pakistan, and Sri Lanka). Weekly lectures survey contemporary themes in South Asian scholarship where visiting scholars and members of the Cornell community discuss a multidisciplinary range of issues. These may include science and nation building, ritual power and resistance, tribal communities and the environment, industrial and agrarian relations, gender and the media, and economic liberalization. A short essay is required at the end of the course.

[ASIAN 648 Peddlers, Pirates, and Prostitutes: Subaltern Histories of Southeast Asia, 1800–1900 (also HIST 284/684)]
Spring. 4 credits. E. Tagliacozzo.
See HIST 648 for description.

[ASIAN 651 Crime and Diaspora in Southeast Asian History (also HIST 451/650)]
Fall. 4 credits. E. Tagliacozzo.
See HIST 650 for description.

[ASIAN 654 Southeast Asia in the World System: Capitalism and Incorporation, 1500–Present (also HIST 584/684)]
Fall. 4 credits. E. Tagliacozzo.
See HIST 684 for description.

[ASIAN 685 History of Vietnam (also HIST 388/688)]
Spring. 4 credits. K. Taylor.
This course is a survey of Vietnamese history and culture from earliest times to the present. Graduate students may enroll and attend a seminar section.

ASIAN 690 Tales of the Heike (also HIST 490/690) Fall. 4 credits. J. R. Piggott.

ASIAN 693 Problems in Modern Chinese History (also HIST 693) Fall. 4 credits. S. Cochran. See HIST 693 for description.

ASIAN 694 Problems in Modern Chinese History (also HIST 694) Spring. 4 credits. S. Cochran. See HIST 694 for description.

ASIAN 696 Modern Southeast Asia: Graduate Proseminar (also HIST 396) Spring. 4 credits. T. Loos. See HIST 696 for description.

ASIAN 701-702 Seminar in East Asian Literature 701, fall; 702, spring. 1-4 credits. Staff.

ASIAN 703-704 Directed Research 703, fall or spring; 704, fall or spring. 1-4 credits. Staff.

ASIAN 899 Master's Thesis Research Fall, spring. 2-4 credits. Staff.

ASIAN 999 Doctoral Dissertation Research Fall, spring. 2-4 credits. Staff.

Honors Courses

ASIAN 401 Asian Studies Honors Course Fall or spring. 4 credits. Intended for seniors who have been admitted to the honors program. Staff. Supervised reading and research on the problem selected for honors work.

ASIAN 402 Asian Studies Honors: Senior Essay Fall or spring. 4 credits. Prerequisite: admission to the honors program. Staff. The student, under faculty direction, prepares an honors essay.

ASIAN 403-404 Asian Studies Supervised Reading Fall. 3 credits variable. Prerequisite: permission of instructor. Open to majors and other qualified students. Intensive reading under the direction of a member of the staff.

Bengali

BENGAL 121-122 Elementary Bengali 121, fall; 122, spring. 4 credits each term. BENGAL 122 provides language qualification. Prerequisite: for BENGAL 122, BENGAL 121 or examination. Staff. The emphasis is on basic grammar, speaking, and comprehension skills; Bengali script is also introduced.

BENGAL 201-202 Intermediate Bengali Reading 201, fall; 202, spring. 3 credits each term. BENGAL 202 provides language proficiency. Prerequisites: for BENGAL 201, BENGAL 122 or examination; for BENGAL 202, BENGAL 201 or examination. Staff. Continuing instruction in grammar with attention to speaking and reading skills.

BENGAL 203-204 Intermediate Bengali Composition and Conversation 203, fall; 204, spring. 3 credits each term. BENGAL 204 provides language proficiency. Prerequisites: for BENGAL 203, BENGAL 122 or examination; for BENGAL 204, BENGAL 203 or examination. Staff. Continuing instruction in grammar with attention to writing skills.

BENGAL 300 Directed Studies Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BENGAL 303-304 Bengali Literature I, II 303, fall; 304, spring. 4 credits each term. Prerequisites: for BENGAL 303-304, BENGAL 203-204 or equivalent. Staff. An introduction to noted Bengali writers. Selections of works by Rabindranath Tagore and Abanindranath Tagore and short stories by Bonohpur are covered. The course is devoted to reading these works and developing literary criticism and creative writing in Bengali.

Burmese

NOTE: Contact S. Tun in Morrill Hall 405 before classes begin for placement or other testing and organizational information.

BURM 103-104 Burmese Conversation Practice 103, fall; 104, spring. 2 credits each term. Prerequisites: for BURM 104, BURM 103 and BURM 121. May not be taken alone. Must be taken simultaneously with BURM 101-102. Satisfactory completion of BURM 104/122 fulfills the qualification portion of the language requirement. S. Tun. Additional drills, practice, and extension of materials covered in BURM 121 and 122. These courses are designed to be attended simultaneously with BURM 121–122; respectively, allowing students to obtain qualification within a year.

BURM 121-122 Elementary Burmese 121, fall; 122, spring. 4 credits each term. BURM 122 provides language qualification. Prerequisite: for BURM 122, BURM 121. May be taken alone or simultaneously with BURM 105-104. Satisfactory completion of BURM 104/122 fulfills the qualification portion of the language requirement. S. Tun. A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

Continuing instruction in Burmese, with emphasis on consolidating and extending conversational skills, and on extending reading ability.

BURM 300 Directed Studies Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. S. Tun. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BURM 301-302 Advanced Burmese 301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for BURM 301, BURM 202 or permission of instructor; for BURM 302, BURM 301. S. Tun. Continuing instruction on conversational and literary skills, but with special emphasis on reading. Students encounter various genres and styles of written Burmese. Readings will include articles on current events, and either several short stories or a novel. Focus is on developing reading skills, particularly on vocabulary development, consolidating and expanding grammar, and appreciating stylistic and cultural differences.

BURM 303-304 Advanced Burmese II 303, fall or spring; 304, fall or spring. 3 credits each term. Prerequisite: for BURM 303, BURM 302 or permission of instructor; for BURM 304, BURM 303, S. Tun. This is a course for students who have good conversational ability in Burmese and some familiarity with Burmese culture, but who need to strengthen reading skills and further enrich their vocabulary. Students in consultation with the instructor, are able to select reading materials. There is also an opportunity for those who need it, to strengthen listening skills, through the study of current films, TV, and radio programs in Burmese.

BURM 401-402 Directed Individual Study 401, fall; 402, spring. 2-4 credits variable each term. Prerequisite: permission of instructor, S. Tun. This course is designed to accommodate the needs of advanced or specialized students, and faculty interests. Topics of reading and discussion are selected on the basis of student need.

Cambodian

See Khmer.

Chinese

NOTE: Testing for placement, except for those with near-native abilities (particularly those schooled in a Chinese setting up until the age of about 12) takes place in registration week, before classes begin. Time and place will be posted on the web at www.arts.cornell.edu/asian/index.html under “Language Programs” and the bulletin board outside Rockefeller 388. Students with some Chinese schooling who want to obtain 3 or 6 credits for their proficiency will be tested at the beginning of the second week of classes. Again, the time and place will be announced.
CHIN 101-102 Elementary Standard Chinese ('Mandarin')

101, fall; 102, spring. 6 credits each term. Prerequisite: for CHIN 102, CHIN 101, or equivalent. You must enroll in lecture and laboratory. Since each section is limited to 10–12 students, students missing the first 2 class meetings without a university excuse are dropped so others may register. No student will be added after the second week of classes. Satisfactory completion of CHIN 102 fulfills the qualification portion of the language requirement. Staff.

A course for beginners or those who have been placed in the course by examination. The course gives a thorough grounding in conversational and reading skills. Students with some facility in the spoken language (because Chinese is spoken at home) but who do not read characters should take 109–110. Students who read Chinese, but who speak 'dialects,' such as Cantonese or Amoy, should consult with the staff before enrolling.

CHIN 109-110 Beginning Reading and Writing (Standard Chinese)

109, fall; 110, spring. 4 credits each term. CHIN 110 provides language qualification. Prerequisites: must have permission of instructor to enroll. Students who complete CHIN 110 normally continue with CHIN 209 and 210. Because of high demand for this course, students missing the first 2 meetings without a university excuse are dropped so others may register. Satisfactory completion of CHIN 110 fulfills the qualification portion of the language requirement. F. Lee Mehta.

This course is intended primarily for students who speak some Chinese (e.g., at home), but who have had little or no formal training. The focus is on characters, reading comprehension, standard grammar, and reading aloud with standard Chinese ('Mandarin') pronunciation.

CHIN 111-112 Elementary Cantonese

111, fall; 112, spring. 4 credits each term. Prerequisite: for CHIN 112, CHIN 111 or equivalent. CHIN 111–112 only satisfies the qualification portion of the language requirement if the student can also demonstrate a comparable reading ability. H. Huang.

A course in conversational standard Cantonese (as spoken in Hong Kong and Canton) for beginners. Students need not have a Mandarin background to take this course, but those with elementary reading skills are also introduced to Cantonese (character) writing.

CHIN 113-114 Beginning Reading for Cantonese Speakers

113, fall; 114, spring. 3 credits each term. CHIN 114 provides language qualification. Prerequisite: everyday conversational ability in Cantonese. H. Huang.

This course is intended primarily for students who speak some Cantonese (e.g., at home), but who have no formal training in writing. The focus is on characters, reading comprehension, standard grammar, and reading aloud with Cantonese pronunciation.

CHIN 201-202 Intermediate Standard Chinese ('Mandarin')

201, fall or summer; 202, spring or summer. 4 credits each term. CHIN 201 provides language proficiency. Prerequisites: for CHIN 201, CHIN 102 with a grade of C+ or above or equivalent; for CHIN 202, CHIN 201 or equivalent. Section 1, Q. Teng; Section 2, Staff.

Continuing instruction in written and spoken Chinese with particular emphasis on consolidating basic conversational skills and improving reading confidence and ability.

CHIN 209-210 Intermediate Reading and Writing

209, fall, 210, spring. 4 credits each term. CHIN 209 provides language proficiency. Prerequisites: for CHIN 209, CHIN 110 or equivalent; CHIN 210, CHIN 209. After completing 210, students may only take 400-level courses in Chinese. X. Sun.

Continuing focus on reading and writing for students with spoken background in standard Chinese, introduction of personal letter writing and other types of composition.

CHIN 211-212 Intermediate Cantonese

211, fall; 212, spring. 4 credits each term. CHIN 211 provides language proficiency. H. Huang.

Continuing instruction in spoken Cantonese and in characters (Cantonese and Mandarin), reading comprehension, and reading aloud with Cantonese pronunciation.

CHIN 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times arranged with instructor.

CHIN 301-302 High Intermediate Chinese

301, fall; 302, spring. 4 credits each term. Prerequisites: for CHIN 301, CHIN 202 or equivalent; for CHIN 302, CHIN 301. F. Lee-Mehta.

Continuing instruction in spoken Chinese and in various genres and styles of written Chinese.

CHIN 411-412 Advanced Chinese:

Fiction, Religion, Current Events

411, fall; 412, spring. 4 credits each term. Prerequisites: for CHIN 411, CHIN 302 or equivalent; for CHIN 412, CHIN 411 and permission of instructor required. Q. Teng.

Reading, discussion, and composition at advanced levels.

CHIN 425 Special Topics

Fall or spring, according to demand. 4 credits. Prerequisite: permission of instructor. Staff.

A number of different topics in advanced Chinese language, advertised the previous semester, are offered under this title to accommodate the needs of advanced or specialized students, and take advantage of faculty interests. Topics include: correspondence and composition, excerpts from classical novels, Chinese documents, kung fu novels, comedy routines, etc. May be repeated for credit.

CHIN 209-210 Intermediate Reading and Writing

209, fall, 210, spring. 4 credits each term. CHIN 209 provides language proficiency. Prerequisites: for CHIN 209, CHIN 110 or equivalent; CHIN 210, CHIN 209. After completing 210, students may only take 400-level courses in Chinese. X. Sun.

Continuing focus on reading and writing for students with spoken background in standard Chinese, introduction of personal letter writing and other types of composition.

CHIN 211-212 Intermediate Cantonese

211, fall; 212, spring. 4 credits each term. CHIN 211 provides language proficiency. H. Huang.

Continuing instruction in spoken Cantonese and in characters (Cantonese and Mandarin), reading comprehension, and reading aloud with Cantonese pronunciation.

CHIN 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times arranged with instructor.

CHIN 301-302 High Intermediate Chinese

301, fall; 302, spring. 4 credits each term. Prerequisites: for CHIN 301, CHIN 202 or equivalent; for CHIN 302, CHIN 301. F. Lee-Mehta.

Continuing instruction in spoken Chinese and in various genres and styles of written Chinese.

CHIN 411-412 Advanced Chinese:

Fiction, Religion, Current Events

411, fall; 412, spring. 4 credits each term. Prerequisites: for CHIN 411, CHIN 302 or equivalent; for CHIN 412, CHIN 411 and permission of instructor required. Q. Teng.

Reading, discussion, and composition at advanced levels.

CHIN 425 Special Topics

Fall or spring, according to demand. 4 credits. Prerequisite: permission of instructor. Staff.

A number of different topics in advanced Chinese language, advertised the previous semester, are offered under this title to accommodate the needs of advanced or specialized students, and take advantage of faculty interests. Topics include: correspondence and composition, excerpts from classical novels, Chinese documents, kung fu novels, comedy routines, etc. May be repeated for credit.

CHinese FALCON (Full-year Asian Language CONcentration)

For full information, brochures, etc., see the FALCON secretary 125 Rockefeller Hall e-mail: falcon@cornell.edu or www.anews.cornell.edu/asian/falcon.htm.

CHIN 160 Introductory Intensive Mandarin

Summer only. 8 credits. Provides language qualification. Completion of 160 fulfills the qualification portion of the language requirement. S. Hoare and staff.

Introduction to spoken and written Mandarin. Lectures on linguistic and cultural matters, intensive practice with native speakers, and laboratory work. Students who complete this course with a grade of at least B are normally eligible to enroll in CHIN 201.

CHIN 161-162 Intensive Mandarin

161, fall; 162, spring. 16 credits each term. Provides language proficiency. Prerequisites: for CHIN 161, CHIN 160 or equivalent or permission of instructor; for CHIN 162, CHIN 161 or placement by FALCON staff prior to beginning of spring term. Students must apply formally to the program; application open to all Cornell students and students from other institutions. S. Hoare and staff.

Work on spoken and written Chinese from an intermediate level to an advanced level. This is a full-time program and full academic load; the demands of the program do not normally permit students to take other courses simultaneously. With a sequence of 160, 161, and 162, in only one calendar year a student can complete as much Chinese as would be contained in three or more years of regular study at most academic institutions. This course sequence also serves to fulfill the language requirement for the MA in Asian Studies and the joint MBA/MA in Asian Studies.

Literature in Chinese

CHILIT 213–214 Introduction to Classical Chinese

213, fall; 214, spring. 3 credits each term. Provides language proficiency. Prerequisite: qualification in Chinese or permission of instructor. May be taken concurrently with CHIN 101–102, 201–202, 301–302. R. McNeal, D. X. Warner.

This course is an introduction to the fundamental grammar and vocabulary of classical Chinese. Students analyze and translate short passages in class, and are tested on these skills in regular quizzes and examinations. Students should be competent in usage of the Chinese script and have at least the equivalent of two years of any East Asian language that employs the Chinese writing system (e.g., Mandarin, Cantonese, Japanese).

CHILIT 300 Reading from the Early Masters

Spring. 4 credits. Prerequisites: CHILIT 213–214 or permission of instructor. R. McNeal.

Students read and discuss several passages from early classical texts, including the Confucian Analects, the Mozi, the Guanzi, and others. Attention is paid to grammar, historical context, and methodology. Students who have not completed one year of classical Chinese at Cornell need permission from the instructor to register.
CHLIT 307 Readings in Classical Chinese Literature
Fall. 4 credits. Prerequisite: CHLIT 214 or permission of instructor. D. Warner.
This is an introduction to classical Chinese literary texts. Students survey a selection of master works from the Pre-Qin and Han dynasty periods, covering the major genres, themes and literary styles that were foundational to later Chinese literary tradition.

CHLIT 421-422 Directed Study
Fall or spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff.
Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop course content.

CHLIT 423 Readings in Chinese History
Fall. 4 credits. Staff.
This course is designed for seniors and graduate students who are interested in ethnic relations and minority issues in Chinese history, and who wish to pursue further research in this field in the future. By studying the selected readings from Chinese historical documents (which were written in classical Chinese), students familiarize themselves with the vocabulary and categorization of the documents, obtain the basic skills needed for reading and analyzing Chinese historical materials, and learn to use original Chinese source materials in conducting their own research. The aim is to provide insight into the historical relations between the Han Chinese and ethnic minorities in China.

CHLIT 435 Chinese Buddhist Texts
Spring. 4 credits. Prerequisite: 1 year of literary Chinese or permission of the instructor. Not offered 2001–2002. D. Boucher.
This seminar is designed to introduce students to the idiom of Buddhist Chinese. We start by reading selections from the early translations to gain a grounding in the vocabulary and syntax that came to characterize literary Buddhism in China. From there we survey some of the so-called apocryphal texts (Buddhist "sutras" produced in China) and look at samples from important writers and schools, depending on student interests. This course is open to students in any area of East Asia with an interest in developing skills in Buddhist texts.

CHLIT 610 Chinese Cultural Criticism
This course develops questions about cultural criticism of China through reading and discussion of modern critiques of Chinese culture, primarily from the late Qing to the post-Mao era, selected from the work of both Chinese and Western critics. Particular emphasis is placed on the role of cultural criticism in producing literature.

CHLIT 615 Seminar: Ideas and Literature of Medieval China
Spring. 4 credits. D. Warner.
This is a graduate-level seminar that offers study of the language and genres of Medieval Chinese literature in the context of Medieval Chinese intellectual history. Students read from a range of primary works—including poetry, prose, literary treatises, philosophical essays, and historical writings—from the Later Han to the Sui and early Tang, in addition to a selection of modern scholarly essays in the field. Our primary aim is to re-examine the interrelationship between the history of ideas and the formation of a medieval poetics during this period of Chinese literary history.

HINDI 201-202 Intermediate Hindi Reading
201, fall; 202, spring. 3 credits each term. HINDI 201 provides language proficiency. Prerequisites: for HINDI 201, HINDI 102, or HINDI 202, HINDI 201 or permission of instructor. M. Farooqi.
HINDI 203-204 Intermediate Composition and Conversation
203, fall; 204, spring. 3 credits each term. HINDI 203 provides language proficiency. Prerequisites: for HINDI 203, HINDI 102, or HINDI 204, HINDI 203 or permission of instructor. M. Farooqi.
Throughout this course sequence all aspects of language learning are practiced: listening, speaking, reading, and writing. In 203, video materials are used and the emphasis is on the conversational aspect of the language. In 204, the focus shifts to reading skills and the main text used is a popular novel.

HINDI 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. M. Farooqi.
Taught on a specialized basis to address particular student needs. Times arranged with instructor.

HINDI 301-302 Advanced Readings in Hindi Literature
301, fall; 302, spring. 4 credits each term. Prerequisites: for HINDI 301, HINDI 202; for HINDI 302, HINDI 301 or equivalent. M. Farooqi.
Selected readings in modern Hindi literature.

Indonesian
For students who have completed INDO 121–122 or its equivalent, the program begins with a one-semester program in Malang, East Java, during the junior year. The program combines a variety of cultural and artistic options with area course work and advanced language study. Complete information is available through Cornell Abroad.
Students who have completed a minimum of 18 credits or the equivalent are eligible to apply for a summer program in the Advanced Indonesian Abroad Program. Further information is available from Professor John Wolff (217 Morrill Hall, 255-0733).

INDO 121-122 Elementary Indonesian
121, fall; 122, spring. 4 credits each term. Prerequisite: for INDO 122, INDO 121.
J. Wolff and staff.
A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

INDO 123 Continuing Indonesian
Fall. 4 credits. Provides language qualification. Prerequisite: INDO 122 or equivalent. Satisfactory completion of INDO 123 fulfills the qualification portion of the language requirement. J. Wolff and staff.
Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills, offers a wide range of readings and sharpenes listening skills.
**Japanese**

**JAPAN 101-102 Elementary Japanese**
101, fall; 102, spring. 6 credits each term. 
*Prerequisite for JAPAN 102: JAPAN 101* or placement by the instructor during registration period.

**JAPAN 141-142 Beginning Japanese at a Moderate Pace**
141, fall; 142, spring. 4 credits each term. 
*Prerequisite for JAPAN 142: JAPAN 141 or placement by instructor during registration period.*

**JAPAN 201-202 Intermediate Japanese Conversation**
201, fall; 202, spring and summer. 4 credits each term. 
*Prerequisite for JAPAN 201: JAPAN 102 or placement by the instructor during registration.*

**JAPAN 202-204 Intermediate Japanese Reading I**
203, fall; 204, spring. 2 or 3 credits each term. 
*Prerequisite for JAPAN 204: JAPAN 203.*

**JAPAN 203-204 Intermediate Japanese Reading II**
204, fall; 205, spring. 4 credits each term. 
*Prerequisite for JAPAN 205: JAPAN 204.*

**JAPAN 241-242 Intermediate Japanese at a Moderate Pace**
241, fall; 242, spring. 4 credits each term. 
*Prerequisite for JAPAN 242: JAPAN 241.*

**JAPAN 301-302 Communicative Competence**
301, fall; 302, spring. 3 credits each term. 
*Prerequisite for JAPAN 302: JAPAN 301.*

**JAPAN 401-402 Oral Narration and Public Speaking**
401, fall; 402, spring. 2 credits each term. 
*Prerequisite for JAPAN 402: JAPAN 401.*

**JAPAN 410 History of the Japanese Language**
410, fall. 4 credits. 
*Prerequisite: permission of instructor. Offered alternate years.*

**JAPAN 421-422 Directed Readings**
421, fall, 422, spring. Credit 1-4 credits variable. 
*Prerequisite: permission of instructor. Taught on a specialized basis to address particular student needs.*

**INDO 203-204 Intermediate Composition and Conversation**
203, fall; 204, spring. 3 credits each term. 
*Prerequisite for INDO 203, INDO 123, for INDO 204, INDO 203 or permission of instructor.*

**INDO 300 Directed Studies**
Fall or spring. 1-4 credits variable. 
*Prerequisite: permission of instructor.*

**INDO 305-306 Directed Individual Study**
305, fall; 306, spring. 2-4 credits. 
*Prerequisite: INDO 301-302 or 303-304 or equivalent knowledge of Indonesian or Malay.*

**INDO 403-404 Advanced Japanese Reading**
403, fall; 404, spring. 4 credits each term. 
*Prerequisite for JAPAN 404: JAPAN 403.*

**INDO 421-422 Directed Readings**
421, fall, 422, spring. Credit 1-4 credits variable. 
*Prerequisite: permission of instructor.*

**ASIAN STUDIES 421**

**Classroom activities focus on oral communication skills.**

**Homework for the course is largely written exercises.**

**Fewer credits and smaller class contact hours than JAPAN 101-102.**

**The course meets five hours per week (MTWRF).**

**Materials covered are not the same materials as JAPAN 101-102.**
Japanese FALCON (Full-year Asian Language Concentration)

Director: R. Sukle, 125 Rockefeller Hall; FALCON Secretary, 125 Rockefeller Hall, 255–6457, e-mail: falcon@cornell.edu or www.arts.cornell.edu/asian/falcon.htm

There are three small interactive classes per day conducted entirely in Japanese and one lecture is conducted by an expert in Japanese language structure. Two one-hour sessions in the language lab are required daily. Additional preparation time in the language lab is necessary in the evenings. Exposure to the language exceeds that of even students living and studying in Japan, providing over 1,800 hours of exposure throughout the full-year program. The extensive exposure and intensive work on the language allows students to develop a level of fluency, accuracy, and the language not achieved in any other type of academic settings. The course is designed to develop 'copability' in the students by bringing them up to the level where they will be able to successfully complete progress in the language on their own even if they do not have further formal instruction. The intensive nature of the program allows graduate students to complete their language work in minimal time and undergraduates, including freshmen, to achieve levels of Japanese that are far beyond what is normally achieved in a four-year program, provided they continue their study of Japanese after FALCON.

JAPAN 160 Introductory Intensive Japanese (FALCON)
Summer only. 8 credits. Satisfies language qualification. R. Sukle and staff. (See general description above.) This is the first term of the FALCON Program. It is a full-time, intensive, nine-week course which begins at the absolute beginning level, in speaking as well as rudimentary reading and writing. Formal application must be made to the program, but admission is open to all students, not just those planning to take the full-year program. Students completing this course and planning to continue at Cornell in the fall may continue with the fall and spring terms of FALCON (JAPAN 161 and 162), or they should consult the FALCON Director, Robert Sukle, at 255–0734 or rs19@cornell.edu, about other options.

JAPAN 161-162 Intensive Japanese (FALCON)  
161, fall; 162, spring. 16 credits each term. JAPAN 161 fulfills the language proficiency requirement. Prerequisites: for JAPAN 161, JAPAN 160, or JAPAN 102 at Cornell, or placement by FALCON staff prior to beginning of fall term; for JAPAN 162, JAPAN 161, or placement by FALCON staff prior to beginning of spring term. Students must apply formally to program (see above); application open to all Cornell students and students from other institutions. R. Sukle and staff. (See general description above.) Work on spoken and written Japanese from an intermediate level to an advanced level. This is a full-time program and full academic load; the demands of the program do not normally permit students to take other courses simultaneously. With a sequence of 160–161–162, in only one calendar year a student can complete as much Japanese as would be contained in three or more years of regular study at most academic institutions. This course sequence also serves to fulfill the language requirement for the M.A. in Asian studies and the joint M.B.A./M.A. in Asian studies.

Literature in Japanese

JPLIT 406 Introduction to Classical Japanese  
Fall. 4 credits. Prerequisite: permission of instructor. K. Selden. This course is an introduction to the fundamental grammar and vocabulary of classical Japanese.

JPLIT 408 Readings in Classical Japanese  
Spring. 4 credits. Prerequisite: JPLIT 406 or permission of instructor. K. Selden. This course is intended for students who have completed the JAPAN 403/404 sequence or the equivalent. Readings of excerpts and complete brief pieces from representative premodern Japanese literature mostly with the use of standard modern annotated editions. Different selections and themes are introduced each year.

JPLIT 421-422 Directed Readings  
421, fall; 422, spring. 2-4 credits. Prerequisite: for JPLIT 421, JAPAN 402 or equivalent; for JPLIT 422, JAPAN 421 or equivalent. Staff. Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop class readings.

JPLIT 611 Seminar in Classical Japanese Literature  
Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 2001–2002. K. Brazell. For advanced graduate students in the field of East Asian Literature. This seminar focuses on the reading of Japanese literary and literary-critical texts in relation to a selected topic in classical literature.

JPLIT 612 Seminar in Medieval Genres  
Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years.

JPLIT 621-622 Directed Readings  
Fall or spring. 2-4 credits. Staff. Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop class readings.

JPLIT 625 Directed Readings  
Fall or spring. 4 credits. Staff. Students choose a faculty member to oversee this independent study. The student and the faculty member work together to develop class readings.

JPLIT 634 Seminar in Modern Japanese Literature: Postmodern Thought for Area Studies (also COM L 695)  
Spring. 4 credits. Prerequisite: permission of instructor. B. de Bary. How might postmodern debates on language and difference transform our understanding of the project of cross-cultural learning institutionalized in popular American area studies? Intended as an introductory course for graduate students, this class emphasizes weekly close readings of important primary texts which have grappled with, or attempted to challenge, epistemological assumptions, categories, and processes which have informed modern disciplinary knowledge of cultural others. Readings will include texts by Rey Chow, James Cliftord, Jacques Derrida, Gayatri Spivak, and others.

JPLIT 624 Advanced Readings in Modern Japanese Literature  
Spring. 4 credits. Prerequisite: permission of instructor. Offered alternate years. B. de Bary. The course considers representations of the body and eroticism in fiction, poetry, film, and theoretical writings from the Taiho through early Shōwa periods (1912 to the late 1930s). Special attention is given to writings about the "New Woman" and "Modern Girl," to sexuality in modernist cinematic and literary experiments, and to reciprocal relations between colonial and metropolitan culture. All readings are done in Japanese.

JAVA 131-134 Elementary Javanese  
131, fall; 132, spring. 3 credits each term. Prerequisite: for JAVA 132, JAVA 131 or equivalent. This language series (131-132) cannot be used to satisfy the language requirement. Not offered 2001–2002. J. Wolff and staff. An elementary language course for those who have had no previous experience in the language.

JAVA 133-134 Continuing Javanese  
133, fall; 134, spring. 3 credits each term. JAVA 134 provides language qualification. Prerequisites: for JAVA 133, JAVA 132 or equivalent; for JAVA 134, JAVA 133 or equivalent. Satisfactory completion of JAVA 134 fulfills the qualification portion of the language requirement. Not offered 2001–2002. J. Wolff and staff. An intermediate conversation and reading course.
Korean

KOREA 101-102 Elementary Korean
101, fall, 102, spring. 6 credits each term.
KOREA 102 provides language qualification.
Prerequisites: for KOREA 101, KOREA 102, KOREA 201, KOREA 202, KOREA 203.

KOREA 201-202 Intermediate Korean
201, fall, 202, spring. 4 credits each term.
KOREA 201 provides language proficiency.
Prerequisites: for KOREA 201, KOREA 202, KOREA 203.

KOREA 209-210 Intermediate
Reading @
209, fall; 210, spring. 4 credits each term.
KOREA 209 provides language proficiency.
Prerequisites: for KOREA 209, KOREA 210, KOREA 209 or permission of instructor.
H. Diffloth.

Nepali

Study Abroad in Nepal

Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, co-sponsor an academic year in Nepal. North American students study and live with Nepalese students who come from outside the Kathmandu Valley to Tribhuvan University. Students may participate in one or two semesters. Courses are offered both at Tribhuvan University and at the Cornell-Nepal Study Program House adjacent to the university. All courses are officially taught in English. A five-week, in-country orientation program includes classes in intensive Nepali conversation, cultural orientation programs, and a ten-day field trip and trek. Semester course offerings include Nepali language (Tibetan and/or Newari languages also possible), contemporary issues in Nepalese studies, field research design and methods in sociology/anthropology and ecology/environment, and guided field research.

Juniors and seniors in good academic standing from any major field may participate. Students must have a desire to study on the other side of the world, to participate in a multicultural program, and to undertake rigorous field research. No experience in Nepal is necessary and instruction is in English, but some prior Nepali language study is strongly recommended. Students interested in the study abroad in Nepal program should consult with the Cornell Abroad office (474 Uris Hall) for further information.

NEPAL 101-102 Elementary Nepali
101, fall; 102, spring. 6 credits each term.
NEPAL 102 provides language qualification.
Prerequisite: for NEPAL 102, NEPAL 101 or examination.
S. Oja.

Intended for beginners. The emphasis is on basic grammar, speaking, and comprehension skills, using culturally appropriate materials and texts. Devanagari script for reading and writing is also introduced.

NEPAL 160 Intensive Nepali
Summer only. 6 credits.
Intended for beginners. Offered alternate years.
S. Oja.

Emphasis is on the spoken language, in dialogues, exercises, and conversation practice. In addition, however, special attention is given to assisting students to develop vocabularies and abilities appropriate to their unique professional needs. Reading and writing practice use both colloquial and scholarly materials in the Nepali (Devanagari) script.
NEPAL 201-202 Intermediate Nepali
Conversation @
201, fall; 202, spring. 3 credits each term.
NEPAL 201 provides language proficiency.
Prerequisites: for NEPAL 201, NEPAL 102 or
examination; for NEPAL 202, NEPAL 201 or
examination. S. Oja.
Intermediate instruction in spoken grammar
and verbal comprehension skills, with special
attention to developing technical vocabularies
and other verbal skills appropriate to students'
professional fields.

NEPAL 203-204 Intermediate Nepali
Composition @
203, fall; 204, spring. 3 credits each term.
NEPAL 203 provides language proficiency.
Prerequisites: for NEPAL 203, NEPAL 102 or
examination, for NEPAL 204, NEPAL 203 or
examination. S. Oja.
A systematic review of written grammar and
reading comprehension, with special attention
to the technical vocabularies, necessary
writing skills, and published materials typical
of advanced students' professional fields.

NEPAL 300 Directed Studies
Fall or spring. 1-4 credits variable.
Prerequisite: permission of instructor. S. Oja.
Taught on a specialized basis to address
particular student needs. Times will be
arranged with instructor.

NEPAL 301-302 Advanced Nepali
301, fall; 302, spring. 3 credits each term.
Prerequisite: NEPAL 204 or permission of
instructor S. Oja.
Reading of advanced texts, together with
advanced drill on the spoken language.

Pali
See also courses listed in this section under
South Asian Languages.

[PALI 131-132 Elementary Pali]
131, fall; 132, spring. 3 credits each term.
This language series cannot be used to
 satisfy the language requirement. Not
offered 2001-2002 Staff.
131 is an introduction to the language of the
canonical texts of Theravada Buddhism.
Reading of authentic texts of Theravada
Buddhism. Emphasis on both content and
grammatical structure. Familiarity with Sanskrit
is not required. 132 is a continuation of 131
with further readings.

PARI 300 Directed Studies
Fall or spring. 1-4 credits variable.
Prerequisite: permission of instructor. D. Boucher.
Taught on a specialized basis to address
particular student needs. Times arranged with
instructor.

Sanskrit

[SANSK 131-132 Elementary Sanskrit
(also CLASS 131-132 and LING 131-132)
131, fall; 132, spring. 4 credits each term.
SANSK 132 provides language qualification.
Offered alternate years. C. Minkowski.
An introduction to the essentials of Sanskrit
grammar. Designed to enable the student to
read classical and epic Sanskrit as quickly as
possible.

[SANSK 251-252 Intermediate Sanskrit
(also CLASS 251-252 and LING 251-252)
251, fall; 252, spring. 3 credits each term.
SANSK 251 provides language proficiency.
Prerequisite: SANSK 132 or equivalent.
Offered alternate years. Not offered 2001-
Readings from the literature of classical
Sanskrit. Fall: selections from the two Sanskrit
epics, the Mahabharata and the Ramayana.
Spring: more selections from the epics and
selections from either Sanskrit story literature
or from Sanskrit dramas.

[SANSK 253-254 Advanced Sanskrit
(also CLASS 253-254 and LING 253-254)
253, fall; 254, spring. 3 credits each term.
SANSK 253 provides language proficiency.
Prerequisite: SANSK 252 or equivalent.
SANSK 254 provides language proficiency.
Prerequisite: SANSK 253 or equivalent.
Fall or spring, 1-4 credits variable.
For nonmajors or majors. Not offered 2001-
Advanced study of Sanskrit. Focus on Sanskrit
language and literature. Literature courses
cover three main parts: (1) sociolinguistic and
eythnohistorical issues of language and politics,
language and culture, and language use; (2)
technical structures and typological patterns of
the area's languages; and (3) historical linguistics,
as well as the linguistic effects of language
contact and linguistic evidence for prehistory.

[LING 653-654 Seminar in Southeast
Asian Linguistics]
653, fall; 654, spring. 4 credits each term.
Prerequisite: permission of instructor.
Language 653 isn't a prerequisite for
J. Wolff.
Languages of mainland Southeast Asia. Topics,
chosen according to student interests, may
include description, dialectology, typology,
comparative reconstruction, and historical
studies.

[LING 655-656 Seminar in Austronesian
Linguistics (also LING 655-656)]
655, fall; 656, spring. 4 credits each term.
Prerequisites: for 655, permission of instructor,
J. Wolff.
Descriptive and comparative studies of
Malayo-Polynesian languages.

Tagalog

[TAG 121-122 Elementary Tagalog]
121, fall; 122, spring. 4 credits each term.
Prerequisite: for TAG 122, TAG 121. Staff.
A thorough grounding is given in basic
speaking and listening skills with an introduc­
tion to reading.

[TAG 123 Continuing Tagalog]
Fall. 4 credits. Provides language
qualification. Prerequisite: TAG 122 or
equivalent. Satisfactory completion of TAG
123 fulfills the qualification portion of the
language requirement. J. Wolff and staff.
Improves speaking skills, such as fluency and
pronunciation, focusing on verbal communica­
tion skills; offers a wide range of readings;
and sharpens listening skills.

TAG 205-206 Intermediate Tagalog @
205, fall; 206, spring. 3 credits each term.
TAG 205 provides language proficiency.
Prerequisites: for TAG 205, TAG 123 or
equivalent; for TAG 206, TAG 205 or
equivalent. Staff.
This course develops all four skills: reading,
writing, speaking, and comprehension.

TAG 300 Directed Studies
Fall or spring. 1-4 credits variable.
Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address
particular student needs. Times arranged with
instructor.

Thai

[THAI 101-102 Elementary Thai]
101, fall; 102, spring. 6 credits each term.
THAI 102 provides language qualification.
Prerequisite: for THAI 102, THAI 101
and sharpens listening skills.

[THAI 201-202 Intermediate Thai]
201, fall; 202, spring. 3 credits each term.
THAI 201 provides language proficiency.
Prerequisites: for THAI 201, THAI 102;
THAI 202, THAI 201 or equivalent.
Staff.

[THAI 203-204 Intermediate
Composition and Conversation @
203, fall; 204, spring. 3 credits each term.
THAI 203 provides language proficiency.
Prerequisites: for THAI 203, THAI 102 or
permission of instructor; for THAI 204,
THAI 203 or equivalent. Not offered

[THAI 300 Directed Studies]
Fall or spring. 1-4 credits variable.
Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address
particular student needs. Times arranged with
instructor.

Southeast Asian Languages

[LING 230 Introduction to Southeast
Asian Languages and Linguistics @
Fall. 3-4 credits variable. For nonmajors or
majors. Not offered 2001-2002. A. Cohn,
J. Wolff.
This is a survey of the languages of Southeast
Asia. The goal of this course is to expose
students to Southeast Asia as a linguistic area
and introduce them to the rich language
diversity of the region. It includes three main
parts: (1) sociolinguistic and ethnolinguistic
issues of language and politics, language
and culture, and language use; (2) language
structures and typological patterns of the
area's languages; and (3) historical linguistics,
as well as the linguistic effects of language
contact and linguistic evidence for prehistory.

[LING 467-468 Reading in Sanskrit
Literature: The Vedas @]
Spring. 3 credits. Prerequisite: permission
C. Minkowski.
Readings in translation; readings in the
original Vedic. Both courses must be taken as
a sequence.

Sinhala (Sinhalese)

[SINHA 101-102 Elementary Sinhala]
101, fall; 102, spring. 6 credits each term.
SINHA 102 provides language qualification.
Prerequisite: for SINHA 102, SINHA
101 or equivalent. Staff.
A semi-intensive course for beginners. A
thorough grounding is given in all the
language skills, listening, speaking, reading,
and writing.

[SINHA 160 Intensive Sinhala]
Summer only. 6 credits. Intended for
beginners. Offered alternate years.
Emphasis is on the spoken (colloquial)
language, the writing system is introduced and
used to present all Sinhala materials, with
additional reading practice with colloquial
materials. A foundation is laid for later study
of the written language (literary Sinhala).

[SINHA 201-202 Intermediate Sinhala
Reading @
201, fall; 202, spring. 3 credits each term.
SINHA 201 provides language proficiency.
Prerequisites: for SINHA 201, SINHA 102;
for SINHA 202, SINHA 201 or equivalent.
Staff.

[SINHA 203-204 Intermediate
Composition and Conversation @
203, fall; 204, spring. 3 credits each term.
SINHA 203 provides language proficiency.
Prerequisites: for SINHA 203, SINHA 102
or permission of instructor; for SINHA 204,
SINHA 203 or equivalent. Not offered

[SINHA 300 Directed Studies]
Fall or spring. 1-4 credits variable.
Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address
particular student needs. Times arranged with
instructor.

Thai

[THAI 101-102 Elementary Thai]
101, fall; 102, spring. 6 credits each term.
THAI 102 provides language qualification.
Prerequisite: for THAI 102, THAI 101
or equivalent. Intended for beginners or
students placed by examination.
N. Jagacinski.
A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

**THAI 201-202 Intermediate Thai Reading @**
201, fall; 202, spring. 3 credits each term. **THAI 201 provides language proficiency.** Prerequisites: for THAI 201, THAI 102; for THAI 202, THAI 201 or equivalent. N. Jagacinski.
Continuing instruction in spoken and written Thai.

**THAI 203-204 Intermediate Composition and Conversation @**
203, fall; 204, spring. 3 credits each term. **THAI 203 provides language proficiency.** Prerequisites: for THAI 203, THAI 102; for THAI 204, THAI 203. N. Jagacinski.
Intermediate instruction in spoken and written grammar and reading comprehension.

**THAI 301-302 Advanced Thai**
301, fall; 302, spring. 4 credits each term. Prerequisite: THAI 202 or equivalent. N. Jagacinski.
Selected readings in Thai writings in various fields.

**THAI 300 Directed Studies**
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. N. Jagacinski.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**THAI 303-304 Thai Literature @**
303, fall; 304, spring. 4 credits each term. Prerequisite: THAI 302 or equivalent. N. Jagacinski.
Reading of significant novels, short stories, and poetry written since 1850.

**THAI 401-402 Directed Individual Study**
401, fall; 402, spring. 4 credits each term. For advanced students or students with special problems or interests. Prerequisite: permission of instructor. N. Jagacinski.

**Vietnamese**

**VIET 101-102 Elementary Vietnamese**
101, fall; 102, spring. 6 credits each term. **VIET 102 provides language qualification.** Prerequisite: for VIET 102, VIET 101 or equivalent. Intended for beginners or students placed by examination. Satisfactory completion of VIET 102 fulfills the qualification portion of the language requirement. T. Tranviet.

A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

**VIET 201-202 Intermediate Vietnamese @**
201, fall; 202, spring. 3 credits each term. **VIET 201 provides language proficiency.** Prerequisites: for VIET 201, VIET 102 or equivalent; for VIET 202, VIET 201. T. Tranviet.
Continuing instruction in spoken and written Vietnamese.

**VIET 203-204 Intermediate Vietnamese Composition and Reading @**
203, fall; 204, spring. 3 credits each term. **VIET 203 provides language proficiency.** Prerequisite: permission of instructor only. T. Tranviet.
Designed for students and "native" speakers of Vietnamese whose speaking and listening are at the advanced level, but who still need to improve writing and reading skills.

**VIET 300 Directed Studies**
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. T. Tranviet.
Taught on a specialized basis to address particular student needs. Times arranged with instructor.

**VIET 301-302 Advanced Vietnamese**
301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for VIET 301, VIET 202 or permission of instructor; for VIET 302, VIET 301. T. Tranviet.
Continuing instruction in spoken and written Vietnamese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

**VIET 401-402 Directed Individual Study**
401, fall; 402, spring. 2–4 credits variable each term. Prerequisite: permission of instructor. N. Jagacinski.
Various topics according to need.

**[VTLIT 222-223 Introduction to Classical Vietnamese @]**
222, fall; 223, spring. 3 credits. **VTLIT 222 provides language proficiency.** Prerequisite: qualification in Vietnamese or permission of instructor. Not offered 2001–2002. K. Taylor.
This is the first semester of a two-semester sequence of courses introducing students to Han (Classical Chinese as used in the Vietnamese language) and Nom (vernacular Vietnamese character writing). Students learn to read Han and Nom texts, mostly from the seventeenth through nineteenth centuries, including historical records, prose writings, and poetry.

**[VTLIT 224 Continuing Classical Vietnamese @]**
This course continues study for students who have completed VTLIT 222–223 "Introduction to Classical Vietnamese."

**Related Courses in Other Departments and Colleges**
Check the primary department section for the offering status of the following courses. Courses in other colleges will count as College of Arts and Sciences credit only for Asian Studies majors.

HIMALAYAS
ANTHR 325 Himalaya: Society, Culture, and Environment

Courses numbered above 400 are intended for students who have had two to three years of college physics and at least two years of college mathematics. Astronomy 440, Independent Study, permits students to engage in individual research projects under the guidance of a faculty member.

Interested students are encouraged to become members of the undergraduate Cornell Astronomy Club. The club has access to the Fuertes Observatory on campus and conducts regular observing and astrophotography sessions. All students are invited to visit the Space Sciences Building, see the exhibits on display there, and consult faculty members about career plans or choice of courses.

The Major
The purpose of the major in astronomy is to provide in-depth knowledge and education about the nature of the universe. Astronomy relies heavily on preparation in physics and mathematics. Consequently, many courses in these fields are included as prerequisites. In preparation for the major, students normally elect the introductory physics sequence PHYS 112–215–214 or 116–217–218 and the complementary pathway in mathematics, MATH 111–122–221–222 or 191–192–293–294 (or equivalent). Students who anticipate undertaking graduate study are urged to elect the honors physics sequence PHYS 116–217–218–318–327 if possible. The sophomore seminar, ASTRO 233 "Topics in Astronomy and Astrophysics," provides an introduction to current research in astronomy and astrophysics for prospective majors, but is not required of students who elect to major in astronomy after the sophomore year. Students are also urged to acquire computer literacy. ASTRO 234 is designed to give students hands-on experience with the methods of analysis, visualization, and simulation needed in astrophysical research. Acceptance to the major is first considered after completion of three semesters of introductory physics and mathematics and in general requires a GPA of 3.2 in physics and mathematics courses.

The major requirements stress the importance of building a strong preparation in physical science. The following upper level courses are normally required:

PHYS 314 or 318, 316, 323 or 327, 341 and 443
A&EP 321–322 (or equivalent, e.g. MATH 420 and 422)
ASTRO 410, 431, and 432.

Upon consent of the major adviser, students interested in planetary studies may substitute appropriate advanced courses or may pursue an independent major under the program in the Science of Earth Systems. Majors are encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level. Advanced seniors can enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects under the course ASTRO 440 or to apply to a variety of programs at Cornell, Arecibo, and elsewhere that offer undergradu-
Ates summer employment as research assistants. Nearly all undergraduate majors and concentrators become involved in research projects in the junior and senior years.

Students whose interest in astronomy is sparked somewhat late in their undergraduate career are encouraged to discuss possible paths with the Director of Undergraduate Studies in Astronomy.

Honors. A student may be granted honors in astronomy upon the recommendation of the Astronomy Advisers Committee of the astronomy faculty.

Double majors. A double major in astronomy and another subject is possible in many circumstances. However, the set of courses used to fulfill the requirements for each major must be completely independent.

Concentration. The concentration in astronomy for other majors normally requires 12 credits, at least eight of which must be at the 300 level or above. ASTRO 233 and 234 are recommended for sophomores planning to concentrate in astronomy.

Distribution Requirement

All courses in astronomy, except ASTRO 233 and 234, may be used to fulfill the science distribution requirement in the College of Arts and Sciences.

Courses

**ASTRO 101 The Nature of the Universe (I)**
Fall. 4 credits. No prerequisites. Labs limited to 18 students each and discussions limited to 30 students each. T. Herter, lab: J. Houck.

This course introduces students to the cosmos. The birth, evolution, and death of stars, the formation of the chemical elements, and the nature of white dwarfs, neutron stars, and black holes are discussed. An introduction to the theories of special relativity and general relativity is given. The course covers the search for other worlds outside the solar system and the possible existence of life and intelligence elsewhere in the universe. Modern theories of cosmology are presented, and the origin, structure, and fate of the universe are discussed. The course as well as sample exams and simulations are made available on the web.

**ASTRO 102 Our Solar System (I)**
Spring. 4 credits. Labs limited to 18 students each; discussions limited to 30 students each. J. Bell; labs: J. Houck.

The past few decades have seen incredible advances in our understanding of our solar system. This course students learn about the current state and past evolution of the Sun and its family of planets, moons, asteroids, and comets. The course emphasizes images and other data obtained from current and past NASA space missions and how these data provide insights about the important processes that have shaped the evolution of our solar system. High school mathematics is assumed, but otherwise there are no formal prerequisites. The course objective is to teach how we know what we know about the universe. The course is set up with two lectures and one evening laboratory per week. Not all of the evening sessions will be used. Planned exercises include five or six observational labs (star gazing with binoculars and small telescopes, telescopic observations and CCD imaging of star clusters, nebulae, and the planets, solar observations, radio observations of the Milky Way Galaxy), plus a selection of exercises from the following: construction and use of simple instruments such as optical spectroscopes and sun dials; laboratory spectroscopy; experiments in planetary cratering; collection and study of micrometeorites; computer simulations of the orbits of planets and their satellites; and cosmological explorations using data from the Hubble Space Telescope available on the web.

**ASTRO 201 Our Home in the Universe (I)**
Fall. 3 credits. Assumes some background in science. Course intended for freshmen and sophomores. R. Giovannelli, M. Haynes.

A general discussion of our relation to the physical universe and how our view of the universe has changed from ancient to modern times. Several main themes are covered over the course of the semester: the evolution of our view of the sky from that of ancient cultures to that of space telescopes, the death of stars and the formation of black holes; dark matter and the structure of galaxies; and the origin, evolution, and fate of the universe. We present a nonmathematical introduction to these subjects and discuss uncertainties and unresolved issues in our understanding.

**ASTRO 202 Our Home in the Solar System (I)**
Spring. 3 credits. Prerequisite: some background in science is required. Course intended for freshmen and sophomores. J. Veverka.

This writing course is designed to develop an understanding of our home planet as a member of a diverse family of objects in our solar system. Discussion centers on how studies of other planets and satellites have broadened our knowledge and perspective of Earth, and vice versa. We study, debate, and learn to write critically about important issues in science and public policy that benefit from this perspective. Topics discussed include global warming, the impact threat, the searches for extrasolar planets and extraterrestrial intelligence and the exploration of Mars.

**ASTRO 211 Astronomy: Stars, Galaxies, and Cosmology (I)**
Fall. 4 credits. Intended for engineering and physical sciences freshmen and sophomores. Prerequisite: introductory calculus or coregistration in MATH 111 or 112, OC 1.0.

The formation and evolution of normal stars, supernovae, pulsars, and black holes. The interstellar medium. Cosmology and the structure and evolution of galaxies.

**ASTRO 212 The Solar System: Planets, Satellites, and Rings (I)**
Spring. 4 credits. Intended for first and second year engineering and physical sciences students. Prerequisite: introductory calculus or coregistration in MATH 111 or 112; some knowledge of classical physics (mechanics and thermodynamics).

S. Squyres.

An introduction to the solar system, with emphasis on the application of simple physical principles. Topics include: the Sun, nucleosynthesis of the elements, radioactive dating, seismology and planetary interiors, planetary surfaces and atmospheres including greenhouse models, orbital mechanics and resonances, interrelations between meteorites, asteroids and comets, the Jovian planets, icy moons, and ring systems, and the search for extra-solar planets.
ASTRO 233 Topics in Astronomy and Astrophysics
Fall. 2 credits. Prerequisites: PHYS 112 or 116 and 215 or 217, MATH 112, 122, or 192, or permission of instructor. Intended for sophomores majoring in astronomy or related fields. M. Haynes, R. Giovanelli. A seminar course on selected topics in astronomy and astrophysics designed for prospective astronomy majors. Content varies from year to year, but includes topics from the fields of planetary, galactic, and extragalactic research.

ASTRO 234 Modern Astrophysical Techniques
Spring. 2 credits. Prerequisites: 2 semesters of introductory physics and 2 semesters of calculus plus ASTRO 233 or permission of instructor. Some experience with computer programming expected. Intended for sophomores majoring or concentrating in astronomy or related fields. S. Eikenberry. The course reviews the basic techniques employed in astrophysical research, both observational and theoretical, to explore the universe. Basic methods and strategies of data acquisition and image and signal processing are discussed. Students gain hands-on experience with visualization techniques and methods of error analysis, data fitting, and numerical simulation. Exercises address the processes by which astrophysicists piece together observations made with today's foremost astronomical instruments to solve questions, ascertain the origin of planets, stars, galaxies, and the universe itself.

ASTRO 280 Space Exploration (I)
Fall. 3 credits. S. Squyres. This course provides an overview of space science, with particular emphasis on the solar system, and a detailed examination of a few selected objects, including the planet Mars, the satellites in the outer solar system, and comets. The focus is on methods of collecting information and especially on spacecraft and space missions. Topics include the design and limitations of instruments. Ethical and political questions associated with space exploration are discussed. This course is intended for students with an interest in science, technology, and associated policy issues. No special background in physical sciences, math, or engineering is assumed.

[ASTRO 290 Relativity and Astrophysics (I) Spring. 4 credits. Prerequisites: knowledge of freshman physics, calculus, and geometry. Not offered 2001-2002. I. Wasserman. This course provides a geometrically based introduction to special and general relativity, followed by consideration of astrophysical applications. Includes discussion of tests of Einstein's theory of space, time, and gravitation; the physics of white dwarfs, neutron stars, and black holes; an introduction to modern cosmology.]

[ASTRO 299 Search for Life in the Universe
Spring. 4 credits. Prerequisites: courses in any physical science subject or permission of instructors. Not offered 2001-2002. J. Cordes, Y. Terzian. The contents of the universe is surveyed. Theoretical and observational aspects are presented. Theories of cosmic and stellar evolution, and of the formation and evolution of planetary systems, planetary atmospheres, and surfaces are reviewed. Questions regarding the evolution of life and the development of technology are discussed. Methods to detect extraterrestrial life with emphasis on radio techniques and associated instrumentation are presented. Hypothetical communication systems are developed and discussed.]

ASTRO 331 Climate Dynamics (also EAS 331)
Fall. 4 credits. Prerequisite: MATH 112 or 192 or equivalent or instructor's approval. K. Cook, P. Gierasch. Processes that determine climate and contribute to its change are discussed, including atmospheric radiation, ocean circulation, and atmospheric dynamics. Contemporary climate change issues are investigated and discussed in the context of natural variability of the system.

ASTRO 332 Elements of Astrophysics (II)
Spring. 4 credits. Prerequisites: MATH 112, 122, 192, or equivalent. PHYS 213 or 217. P. Nicholson. An introduction to astronomy, with emphasis on the application of physics to the study of the universe. Covers: physical laws of radiation; distance, size, mass, and age of stars, galaxies, and the universe; stellar evolution and nucleosynthesis; supernovae, pulsars, and black holes; galaxies and quasars. Introduction to cosmology. Mainly intended for students of science, engineering, and science education interested in astronomy and astrophysics.

ASTRO 342 Atmospheric Dynamics (also EAS 342)
Spring. 3 credits. Prerequisites: 1 year each of calculus and physics. K. H. Cook, P. J. Gierasch. Introduction to atmospheric dynamics and to the methods of description and quantitative analysis used in meteorology. Topics considered include: equations of atmospheric motion, vertical variations of wind and pressure fields, mathematical representation and characteristics of flow concepts of circulation and vorticity, and effects of friction on atmospheric motion. Applications and illustrations are drawn from both terrestrial and planetary examples.

ASTRO 410 Experimental Astronomy (I)
Fall. 4 credits. Prerequisites: PHYS 214/8 (or 310 or 360), PHYS 323/7 or coregistration) or permission of instructor. J. Houck, S. Eikenberry, P. Goldsmith. Observational astrophysics. Major experiments involve techniques in CCD (charge-coupled-device) imaging, optical photometry, optical spectroscopy, radiometry, radio spectroscopy, and radio astronomy. The experiments involve use of the Hartung-Boothroyd Observatory's 24-inch telescope, a laboratory two-element radio interferometer, and a radio telescope mounted on top of the Space Sciences Building. The laboratory covers the fundamentals of using astronomical instrumentation and data analysis as applied to celestial phenomena: asteroids, normal stars, supernova remnants, globular clusters, planetary nebulae, the interstellar medium, OH masers, and galaxies.

ASTRO 431 Introduction to Astrophysics and Space Sciences (I)
Fall. 4 credits. Prerequisites: mathematics above the 200 level and physics above the 300 level; PHYS 443 is recommended. I. Wasserman. A systematic development of modern astrophysical concepts for physical science majors. Stellar structure and evolution, stellar atmospheres, compact objects (white dwarf, neutron star, and black holes), planets, and brown dwarfs. Current research problems in these areas are introduced along the way. The emphasis is on using fundamental physics principles to explain astronomical phenomena. A variety of physics, including elements of general relativity, nuclear physics, solid state physics and fluid mechanics, are introduced or reviewed in a quick, practical fashion and put into use in solving astrophysics puzzles.

ASTRO 432 Introduction to Astrophysics and Space Sciences II (II)
Spring. 4 credits. Prerequisites: ASTRO 431 or permission of instructor. D. Chernoff. This course is divided into two broad topics: the astrophysics of the interstellar medium and cosmology. The interstellar medium section covers thermal equilibrium and radiative transport in cosmic gas regions, and molecular clouds. The cosmology section includes expansion of the universe, metrics, Friedmann equations, dark matter, cosmological tests, the early universe, and the cosmological production of the elements.

ASTRO 434 The Evolution of Planets (I)
Spring. 4 credits. Not offered 2001-2002. Staff. An introduction to the physical and chemical processes that have been active in altering the environments of planets and satellites from their original to their present state. Theories of the formation of the solar system are revealed with special emphasis on chemical differentiation of the prymval solar nebula. A critical assessment is made of how well the various theories account for the clues left in the meteorite record and how well they explain the current environments of the planets and satellites. The main ideas about the formation and evolution of terrestrial planets, satellite systems, and asteroids are considered in detail. Some specific topics included are the history of the earth-moon system, the probable evolution of the Jupiter's Galilean satellites, and the comparative histories of Venus, Earth, and Mars.

ASTRO 440 Independent Study in Astronomy
Fall or spring. 2-4 credits. Prerequisite: permission of instructor. Recommended: familiarity with the topics covered in ASTRO 332, 431, or 434. Individuals work on selected topics. A program of study is devised by the student and instructor. Students need to fill out an independent study form, have it signed by the instructor, and register in the department office, 610 Space Sciences Building.

ASTRO 490 Senior Seminar Critical Thinking (I)
Fall. 3 credits. Y. Terzian. Critical thinking in scientific and nonscientific contexts. Topics include elements of classical logic, including standard of evidence and paradoxes. Case studies include examples of competing hypotheses in the history of science, as well as examples from borderline sciences. Stress will be put on creative generation of alternative hypotheses and their winnowing by critical scrutiny. Topics include the nature and history of the universe, the nature of time, the nature of reality, the possibilities of life on other planets, and
ASTRO 509 General Relativity
E. Flanagan.
For description, see PHYS 553.

ASTRO 510 Applications of General Relativity
E. Flanagan.
For description, see PHYS 554.

ASTRO 511 Physics of Black Holes, White Dwarfs, and Neutron Stars (also PHYS 570B)
Fall. 4 credits. The minimum prerequisites for this course are all of the physics at the upper division undergraduate level. Not offered 2001–2002. D. Lai. Compact objects (neutron stars, black holes and white dwarfs) are the endpoints of stellar evolution. They are responsible for some of the most exotic phenomena in the universe including: supernova explosion, radio pulsars, bright X-ray binaries, magnetars, gamma-ray bursts, and so on. Supernasive black holes also lie at the heart of the violent processes in active galactic nuclei and quasars. The study of compact objects allows one to probe physics under extreme conditions (high densities, magnetic fields, and gravity). This course surveys the astrophysics of compact stars and related subjects. Emphasis is on the application of diverse theoretical physics tools to various observations of compact stars. There are no astronomy or general relativity prerequisites. At the level of Physics of Black Holes, White Dwarfs, and Neutron Stars by Shapiro and Teukolsky.

ASTRO 516 Galactic Structure and Stellar Dynamics (I)
Fall. 4 credits. D. Chernoff.
This course is an introduction to the study of the structure of galaxies via the laws of modern physics. Topics include the observed kinematics and spatial distribution of stars in the vicinity of the Sun, shapes and properties of stellar orbits, the gravitational N-body problem, collisional relaxation in stellar systems, spatial structure, galaxy classification and evolution, and cosmological results in galaxy formation.

ASTRO 520 Radio Astronomy
Fall. 4 credits. D. Campbell, P. Goldsmith.
Covers radio astronomy telescopes and electronics; antenna theory; observing procedures and data analysis; concepts of interferometry and aperture synthesis.

ASTRO 523 Signal Modeling, Statistical Inference, and Data Mining in Astronomy
The course aims to provide tools for modeling and detecting signals encountered in the physical sciences and engineering. Data mining and statistical inference from large and diverse databases are also covered. Experimental design is to be discussed. Basic topics covered include: probability theory; Fourier analysis of continuous and discrete signals; digital filtering; matched filtering and pattern recognition; spectral analysis; Karhunen-Loeve analysis; wavelets, parameter estimation, optimization techniques; Bayesian statistical inference; deterministic, chaotic, and stochastic processes; image formation and analysis; maximum entropy techniques. Specific applications are chosen from current areas of interest in astronomy, where large-scale surveys throughout the electromagnetic spectrum and using non-electromagnetic signals (e.g., neutrinos and gravitational waves) are ongoing and anticipated. Applications are also chosen from topics in geophysics, plasma physics, electronics, artificial intelligence, expert systems, and genetic programming. The course is self-contained and is intended for students with thorough backgrounds in the physical sciences or engineering.

ASTRO 525 Techniques of Optical/Infrared and Submillimeter Astronomy
Spring. 4 credits. T. Herter, G. Stacey. Optical/infrared and submillimeter telescopes and instrumentation are discussed and related to current research in these fields. The course includes telescope design and general optical design (ray tracing). CCD, photoconductor, photovoltaic, bolometer, impurity band conduction, and cryogenic systems are presented. The instrumentation discussion includes general instrument design and specific applications to cameras, spectrographs, and interferometers. Detection limits of various systems, cryogenic techniques, and astronomical data analysis techniques are also discussed. Special topics include speckle interferometry and adaptive optics.

ASTRO 530 Astrophysical Processes
Spring. 4 credits. D. Lai. Thermal and nonthermal radiation processes encountered in studies of stars, the interstellar and intergalactic media, galaxies, and quasars. Fundamentals of radiation transfer, bremsstrahlung, synchrotron radiation, and Compton scattering are covered, as well as spectral line transfer, gas heating and cooling, and topics in atomic and molecular spectroscopy. These topics are discussed within the framework of astrophysical situations, such as star formation, interstellar gas and dust clouds, jets, active galactic nuclei, clusters of galaxies and cosmology.

ASTRO 555 Theory of the Interstellar Medium
Spring. 4 credits. Not offered 2001–2002. Covers global theories of the interstellar medium-mass and energy exchange between the different phases, the role of shock waves and energetic outflows in the thermal equilibrium and ionization state of gas in the galaxy; basic astrophysical fluids and plasmas, galactic dynamics; and observation techniques, current problems and results.

ASTRO 560 Theory of Stellar Structure and Evolution (also PHYS 667)
Spring. 4 credits. Not offered 2001–2002. This course is intended to provide a systematic development of stellar astrophysics, both theory and observations. Topics include nuclear hydrostatic equilibrium; equation of state; radiation transfer and atmosphere; convection and stellar turbulence; nuclear burning and nucleosynthesis; solar neutrinos; star formation; pre-main sequence stars; brown dwarfs; end states of stellar evolution (white dwarves, neutron stars and black holes); supernovae; interacting binary stars; stellar rotation and magnetic fields; stellar pulsations; winds and outflows. The prerequisites for the course are all undergraduate level physics. Though helpful, no astronomy background is required.

ASTRO 570 Physics of the Planets
Fall. 4 credits. P. Nicholson.
An introductory survey of planetary science with an emphasis on the application of physical principles. Planetary dynamics, including satellite orbits, tidal interactions, resonances, and ring dynamics. An introduction to the theory of planetary interiors, gravitational fields, heat sources, and rotational mechanics. Physics of planetary atmospheres, including radiative transfer, convection, and thermodynamic processes. Important observational results, including those of ground-based optical, infrared, and radar astronomy, as well as those made by spacecraft, are discussed. Intended for graduate students and seniors in astronomy, physics, and engineering.

ASTRO 571 Mechanics of the Solar System
Course topics include: gravitational potential, planetary gravity fields; free and forced oscillations; Chandler wobble, polar wander, damping of rotation; equilibrium tidal theory; tidal heating; orbital evolution of natural satellites, resonances, spin-orbit coupling; Cassini states; long-term variations in planetary orbits; orbital and rotational chaos; dust dynamics; dynamics of ring systems; and seismic waves, free oscillations. Illustrative examples are drawn from contemporary research.

ASTRO 579 Celestial Mechanics

ASTRO 590 Galaxies and the Universe

ASTRO 599 Cosmology (also PHYS 599)
Fall. 4 credits. Prerequisites: statistical physics, quantum mechanics and electromagnetic theory. I. Wasserman.
This course is intended to provide a detailed theoretical development of current ideas in cosmology. Topics include observational overview; growth of irregularities, galaxy formation, and clustering; black holes, big bang cosmology, recombination, nucleosynthesis; very early universe, symmetry breaking, inflationary scenarios. At the level of Peebles, Principles of Physical Cosmology.

ASTRO 620 Seminar: Advanced Radio Astronomy
Fall. 2 credits. Prerequisites: some background in astronomical spectroscopy suggested. Open to advanced undergraduates by permission of instructor. W 2:30–4:30. Not offered 2001–2002. Selected topics in the application of spectroscopic techniques from radio through radio regime to studies of the "dark ages" and the origin of galaxies, stars, and planets. We emphasize the processes of star formation.
from the earliest times to the current circumstances of stellar and planetary formation in the Milky Way and other galaxies. Discussions include the potential of new facilities including the Arecibo and Green Bank telescopes, the Expanded VLA, the Atacama Large Millimeter Array, the Large Millimeter Telescope, the Square Kilometer Array, SIRTF, and the Cornell Atacama Telescope.

**ASTRO 621 Seminar: Planetary Radar Astronomy**  
Spring. 3 credits. Prerequisites: intended for graduate students and upper-level undergraduates in astronomy, engineering, and geology. A good background in undergraduate mathematics and physics is required. D. Campbell.  
The application of radar to the study of the surfaces of planets, planetary satellites, asteroids, and comets. Topics covered target detectability and the specification of the needed antennas, transmitters, and receiving systems; data processing techniques; imaging techniques including delay-Doppler imaging, synthetic aperture radar (SAR) and interferometric SAR; target characterization from cross section, scattering laws and polarization measurements, results from Earth-based and spacecraft radar observations of Mercury, Earth, the Moon, Mars, the satellites of Jupiter, the rings of Saturn, asteroids, and comets.

**ASTRO 640 Advanced Study and Research**  
Fall or spring. Credit TBA. Guided reading and seminars on topics not currently covered in regular courses. Students need to register in the department office, 610 Space Sciences Building.

**ASTRO 651 Atmospheric Physics (also EAS 651)**  

**ASTRO 652 Advanced Atmospheric Dynamics (also SCAS 652)**  
Spring. 3 credits. Offered alternate years, not offered 2001–2002. S. Colucci, K. Cook, P. Gierasch. For description, see SCAS 652.

**ASTRO 660 Cosmic Electrodynamics (also A&EP 608)**  

**ASTRO 671 Seminar: Spectroscopy of Planetary Surfaces**  
Fall. 3 credits. J. Bell. Students review the physics behind remote sensing of the solid surfaces of the Moon, terrestrial planets, asteroids and comets. The class emphasizes relevant aspects of Crystal Field theory, Hartree theory, spectral analysis and classification, and measurement techniques. Examples of telescopic and spacecraft reflectance and thermal emission spectra are discussed.

**ASTRO 673 Seminar: Planetary Atmospheres**  
Spring. 2 credits. P. Gierasch. This course deals with motions in planetary atmospheres. Among the topics discussed are the Venus general circulation, dust and water transports on Mars, alternating jets on the outer planets, and compositional layering in the outer planets.

**ASTRO 690 Seminar: Computational Astrophysics (also PHYS 680)**  
Spring. 3 credits. Prerequisites: working knowledge of FORTRAN. Not offered 2001–2002. Staff.

**ASTRO 699 Seminar: Problems in Theoretical Astrophysics (also PHYS 685)**  

**ASTRO 699 Seminar: Observational High Energy Physics**  
Spring. 2 credits. ASTRO 511 (PHYS 525) is strongly recommended as a co- or prerequisite. Not offered 2001–2002. Staff.

**BIOLOGICAL SCIENCES**

Biology is a popular subject at many universities for a variety of reasons: it is a science that is in an exciting phase of development; it prepares students for careers in challenging and appealing fields such as human and veterinary medicine, environmental sciences, and biotechnology, and it deals with the inherently interesting questions that arise when we try to understand ourselves and the living world around us. Many of the decisions we face today deal with the opportunities and problems that biology has put before us.

The major in biological sciences at Cornell is available to students enrolled in either the College of Agriculture and Life Sciences or the College of Arts and Sciences. Student services provided by the Office of Undergraduate Biology, 216 Stimson Hall, are available to students from either college.

The biology major is designed to enable students to acquire the foundations in physical and life sciences necessary to understand modern biology and to pursue advanced studies in a specific area of biology. Programs of study include animal physiology, biochemistry, computational biology, ecology and evolutionary biology, general biology, genetics and development, microbiology, molecular and cell biology, neurobiology and behavior, nutrition, plant biology, and systematics and biotic diversity. Students interested in the marine sciences may consult the Cornell Marine Programs Office (G14 Stimson Hall, 255–3717) for academic advice and career counseling. For more details about the biology curriculum, see the section in this catalog on Biological Sciences.

**BIOLOGY AND SOCIETY MAJOR**

See under Special Programs and Interdisciplinary Studies.

**BURMESE**

See Department of Asian Studies.

**CAMBODIAN**

See Department of Asian Studies.

**CHEMISTRY AND CHEMICAL BIOLOGY**

The Department of Chemistry and Chemical Biology offers a full range of courses in physical, organic, inorganic, analytical, theoretical, bioorganic, and biophysical chemistry. In addition to their teaching interests, Chemistry and Chemical Biology faculty members have active research programs. The link between teaching and research is a vital one in a continuously evolving scientific subject; it ensures that students will be provided with the most advanced information and perspectives, and affords opportunities for students to participate in research.

**The Standard Major**

The chemistry major at Cornell provides a great deal of flexibility and prepares students for a large variety of career options. In recent years, chemistry majors have gone on to graduate study in chemistry, medicine, law, and business management, as well as directly into positions with chemical, pharmaceutical, and other industrial companies. A major in chemistry can also provide the basis for work in related areas such as molecular biology, chemical physics, geochemistry, chemical engineering, materials science, solid state physics, and secondary education. Nearly all of the required courses for the major can be completed in three years, leaving the senior year open for advanced and independent work under the supervision of a professor.

The courses are arranged as a progression, with some (including mathematics and physics) prerequisite to those that are more advanced. During the first year, a student should normally register for general chemistry (preferably CHEM 215–216 although CHEM 207–208 or 206–208 is acceptable), mathematics, a freshman writing seminar, a foreign language if necessary, or physics. CHEM 215–216 is aimed at those students with good preparation and a strong interest in chemistry. Students who do not know if their preparation is adequate should consult the instructor. In the second year a student should complete calculus and take physics and organic chemistry (CHEM 359–360 is preferred to CHEM 357–358). The second-year laboratory courses include 300, Quantitative Chemistry and 301, Experimental Chemistry I. CHEM 389–390, Physical Chemistry I and II, and CHEM 302–303, Experimental Chemistry II and III, should be completed in the third year. CHEM 410 should be completed in the third or fourth year. Advanced work in chemistry and related subjects can be pursued in the fourth year and in the earlier years as well.
The opportunity for independent research is also available. All students with questions about the major are encouraged to consult the chair of the Department of Chemistry and Chemical Biology or the chair's representative. Entering students who are exceptionally well prepared in chemistry may receive advanced placement credit for CHEM 207.

Prerequisites for admission to a major in chemistry are (1) CHEM 215–216, 300; or 207–208, 300; or 211, 208, 300; or 206, 208, 300; (2) PHYS 207 or 112; and (3) MATH 111 or 191. Students are encouraged to undertake a major in chemistry unless they have passed those prerequisite courses at a good level of proficiency. The minimum additional courses that must be completed for the standard major in chemistry are listed below:

1) CHEM 301–302–303, 359–360 (357–358 may be substituted), 389–390, and 410
2) MATH 112, 213; or 122, 221–222; or 192–293–294
3) PHYS 208

Potential majors electing to take MATH 213 are strongly urged to do so in their sophomore year to avoid scheduling conflicts with CHEM 389 in their junior year.

The sequence described above is a basic program in chemistry that students can extend substantially in whatever direction suits their own needs and interests. Those going on to do graduate work in chemistry should recognize that these requirements are minimal and should supplement these programs, where possible, with further courses such as CHEM 405, 605, 606, 665, 666, 668, and 681. Even students not planning graduate work in chemistry should consider advanced work in physics and mathematics, courses in the biological sciences, and advanced work in chemistry as possible extensions of the basic program.

Honors. The honors program in chemistry offers superior students in the standard major an opportunity to study independently in seminars and to gain additional experience by engaging in research during the senior year. It is particularly recommended to those who plan graduate work in chemistry. Prospective candidates should complete the introductory organic chemistry and physical chemistry sequences by the end of the junior year, although failure to have completed those courses in the junior year does not in itself disqualify a student from the honors program. Completion of the program at a high level of performance leads to the degree of Bachelor of Arts with honors in chemistry. Students will be admitted to the program by invitation of the department, with selection based on a superior cumulative average, including chemistry grades, and good performance in at least four credits of research at Cornell. Prospective candidates should discuss their plans with advisers by March 1 of their junior year; participants are notified by early January of their senior year. To be awarded honors, candidates must show outstanding performance in at least eight credits of undergraduate research such as is offered in CHEM 423, 455, 461, or 477. In addition, the writing of a thesis in the honors seminar (CHEM 498) is expected.

The Alternative Major

The alternative major is a flexible program that provides core coverage of chemistry around which students can design a program to meet their own career goals. Requirements consist of a core program along with four additional courses chosen by the student. One of the four must be in chemistry at the 300 level or above; the other three may be in another field but should represent a cohesive plan and must be approved by a departmental committee.

The Core Program for the Alternative Major

1) CHEM 215–216, 300 (or 207–208, 300; or 211, 208, 300; or 206, 208, 300), 251, 257, 287, 289, and 410 (CHEM 357–358 or 359–360 can be substituted for CHEM 257, or CHEM 389–390 can be substituted for CHEM 287; thereby fulfilling the requirement for an additional 300-level chemistry course)
2) MATH 111–112; or 111, 122; or 191–192
3) PHYS 207–208; or 112, 213

Additional Courses for the Alternative Major

Possible plans for the remaining three courses might include programs in Biochemistry; Biology; Physics; Computer Science; Polymers; Materials Science; Science, Technology, and Society; History and Philosophy of Science; Technology, Business and Management; Economics; Education; and others.

Premedical students and those interested in pursuing double majors might find the alternative major particularly attractive. The course requirements for admission to the alternative major are the same as those for the standard major.

Program for Science Teachers

Chemistry majors who wish to become teachers will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7–12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students integrate some undergraduate studies. All chemistry majors who enter this program will remain in the College of Arts and Sciences to complete the major.

After earning the bachelor's degree, certification students enter the Graduate Field of Education to complete a fifth year of study at Cornell. Following this fifth year, students are eligible for a master's degree from Cornell and a teaching certificate from New York State. Additional information is available from Sue Sluck, 424 Kennedy Hall, 255–9255 or Prof. Deborah Trumbull, 426 Kennedy Hall, 255–3108.

Laboratory Course Regulations

Students registered for laboratory courses who do not appear at the first meeting of the laboratory will forfeit their registration in that course.

Students and members of the teaching staff are required to wear safety goggles and lab aprons in all chemistry laboratories. Close-toed footwear is required (no sandals). Students are reminded to take their goggles and lab aprons to the first laboratory session. Those who fail to cooperate with the safety program will be asked to leave the laboratories.

Students are required to pay for glassware and any other items broken or missing from their laboratory desks at the close of each semester. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a $10 fee in addition to charges for any breakage.

Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

Preliminary examinations for all courses may be given in the evening.

[CHEM 105 The Language of Chemistry (I)] Fall. 3 credits. This course contributes to satisfying the CALS physical science requirement of one course in chemistry. S-U or letter grades. Lecs, M W F 12:20. Prelims: in normal class period at 12:20 P.M. Not offered 2001–2002, next offered Fall 2002. Staff.

In his autobiography, A. Kornberg (Nobel Laureate in Medicine, 1959) wrote, "much of life can be understood in rational terms if expressed in the language of chemistry. It is an international language, a language for all time, a language that explains where we came from, what we are, and where the physical world will allow us to go." Through careful examination of a few milestone investigations of naturally occurring biologically important compounds (such as the antimalarial quinine, bombykol, and the sperm attractants of algae), the principles of chemistry to which Kornberg refers are developed. Methods of analyzing chemical problems are emphasized, rather than the memorization of specific results or formulas. There is an opportunity for students, working in small groups, to prepare and present short reports on topics of particular current interest at the interface between chemistry and biology.

[CHEM 106 The World of Chemistry (I)] Spring. 3 credits. This course contributes to satisfying the CALS physical science requirement of one course in chemistry. S-U or letter grades. Lecs, M W F 1:25. Prelims: 3:30–4 P.M., March 5, April 4. H. Hoffman.

Chemistry is the art, craft, business, and science of substances and their transformations. And, ever since we've learned to look inside, we know those substances are molecular, and chemistry is also played out on the microscopic level. This is a course that looks at the way chemistry enters all aspects of the everyday world. In CHEM 106 students gain a feeling for the way science is done and grasp the interplay of chemistry and biology. They come to understand the central place of chemistry in culture and in the economy. The teaching is open and unimimidating, and there are many live demonstrations, as well as excerpts from poems, plays, and movies.

[CHEM 206 Introduction to General Chemistry (I)] Fall or summer. 4 credits. Enrollment limitation: 20. Recommeded for students who have not had high school chemistry and for those needing a less intensive course than CHEM 207. Lecs, M W F 11:15; lab, T R or F 8:00–11:00, or M W or F 1:25–4:25.
CHEM 207-208 General Chemistry (I)  
Fall or summer. 207: spring or summer, 208. 4 credits each term. Recommended for those students who will take further courses in chemistry. Prerequisite for CHEM 207: high school chemistry. Prerequisite for CHEM 208: CHEM 206 or 207. Lecs, T R 10:10 or 12:20; lab, T R F 8–12 or M T W R F 12:20–4:25. Prelims: 7:30–9 P.M., Oct. 11, Nov. 15, Feb. 26, April 9. Fall: J. E. McMurtry; spring: M. A. Hines.

Fundamental chemical principles and descriptive facts are covered, with considerable attention given to the qualitative aspects and to the techniques important for further work in chemistry. Second-term laboratory includes a systematic study of qualitative analysis.

Note: Taking CHEM 208 after 215 is not recommended and can be done only with the permission of the 208 instructor.

CHEM 211 Chemistry for the Applied Sciences (I)  
Fall or spring. 4 credits. Recommended for those students who intend to take only one term of chemistry. Enrollment limited. Prerequisite: high school chemistry or permission of instructor. Corequisite: a calculus course at the level of MATH 111 or 191. Lecs, fall, M W F 12:20, spring, M W F 11:15, T W R F 1:25–4:25. Prelims: 7:30–9 P.M., Sept. 25, Oct. 25, Nov. 29, Feb. 14, Mar. 12, Apr. 11. Fall: P. T. Wolczanski; spring: J. Marzouk.

Important chemical principles and facts are covered with the objective of understanding the role of chemistry in other fields. Emphasis is on topics such as solid-state materials, periodic trends, and specific classes of compounds, such as polymers.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry 207 by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall. Taking CHEM 208 after 215 is not recommended and can be done only with the permission of the 208 instructor.

CHEM 215-216 General and Inorganic Chemistry (I)  
Fall, 215; spring, 216. 4 credits each term. Recommended for students who intend to specialize in chemistry or in related fields. Enrollment limited. Prerequisites: good performance in high school chemistry, physics, and mathematics. Corequisite: a calculus course at the level of MATH 111 or 191 for students who have not taken high school calculus. Prerequisite for CHEM 216: CHEM 215. Lecs, M W F 12:20; lab, M T W R or F 1:25–4:25. Prelims: 7:30–9 P.M., Oct. 11, Nov. 15, Feb. 14, Mar. 12, Apr. 11. Fall: B. Widow; spring: B. R. Crane.

A systematic intensive study of the laws and concepts of chemistry, with considerable emphasis on qualitative aspects. Second term includes systems of inorganic chemistry. Laboratory work covers qualitative and quantitative analysis, transition metal chemistry, and spectroscopic techniques.

Note: Taking CHEM 208 after 215 is not recommended and can be done only with the permission of 208 instructor.

CHEM 233 Introduction to Biomolecular Structure  
Fall. 2 credits. Limited to 30 students. Prerequisite: CHEM 206 or equivalents. Lecs, T R 2:30–3:20. Not offered 2001–2002. S. E. Ealick. This course is intended for students with a basic understanding of chemistry who are considering a program of study in biochemistry. The internal structure and function of biologically important molecules are explored. Emphasis is placed on understanding the way in which the three-dimensional arrangements of atoms determine the biological function of small molecules and macromolecules such as proteins and enzymes. The study of molecular structure is aided by interactive computer graphics for visualizing three-dimensional structures of molecules.

CHEM 251 Introduction to Experimental Organic Chemistry  
Fall, spring. 3 credits. Recommended for non-chemistry majors. Enrollment limited. Prerequisites: coregistration in CHEM 257 or 258. Lecs: fall, R 11:15 or F 8:00, spring, F 8, lab, M T W R or F 1:25–4:25, or T R 8–11. Prelims: 7:30–9 P.M., Fall: Nov. 15, Spring: Apr. 16. S. Russo. Introduction to the synthesis, separation, and handling of materials, including applications of many types of chromatography, simple and fractional distillation, crystallization, extraction, and others.

CHEM 252 Elementary Experimental Organic Chemistry  

CHEM 257 Introduction to Organic and Biological Chemistry (I)  
Spring. 3 credits. Prerequisite: CHEM 206 or 207. Because CHEM 257 is only a 3-credit course, it does not provide a practical route to satisfying medical school requirements. Lecs, M W F 12:20. Prelims: 7:30–9 P.M., March 5; 257: 7:30–9 P.M., Oct. 16, Nov. 29. Feb. 14, Mar. 12, April 9. Fall: A. C. Albrecht; spring: J. H. Freed.

A systematic treatment of the fundamental principles of physical chemistry, focusing in the fall on thermodynamics and an introduction to quantum mechanics. In the spring the course is oriented to the application of physical chemistry to biological systems, including transport, kinetics, electrochemistry, spectroscopy. CHEM 287 satisfies the minimum requirement for physical chemistry in the alternative chemistry major.

CHEM 289-290 Introductory Physical Chemistry Laboratory  
Fall: 289; spring, 290. 2 credits each term. Lecs: fall: M W R F 8:00–10:00; spring, R 8:00 or 9:05. Lab: fall, M T 1:25–4:25; spring, M T W R 1:25–4:25. T. McCarrick. A survey of the methods basic to the experimental study of physical chemistry, with a focus on the areas of kinetics, equilibrium, calorimetry, and molecular spectroscopy.

CHEM 300 Quantitative Chemistry  
Fall or spring. 3 credits each term. Lecs, M W F 12:20; 2 labs, M W 1:25–4:25 or T R 8–11 or T R 1:25–4:25. J. M. Burlitch. An introduction to the techniques of synthetic organic chemistry. A representative selection of the most important classes of organic reactions is explored in the first half of the semester, augmented by lectures on the reaction chemistry and the theory of separation and characterization techniques. The second half of the term is devoted to a special project, part of which is designed by the student. An opportunity to use inert atmosphere techniques is included.

CHEM 302 Experimental Chemistry II (I)  
Fall. 4 credits. Enrollment limited; preference given to chemistry majors. Prerequisite: CHEM 301. Lecs. M W F 9:05; 2 labs, M W 1:25–4:25, T R 8–11 or T R 1:25–4:25. F. J. Disalvo. Instrumental methods of analysis, including chemical microscopy, UV, IR, and AA spectroscopy, and gas chromatography. The design, execution, and analysis of experiments is stressed.

CHEM 303 Experimental Chemistry III (I)  
Spring. 4 credits. Each lab limited to 10 students. Prerequisites: CHEM 502, 589, 390; coregistration in the latter is permissible. Lecs, M W F 9:05; 2 labs, M W 12:25–4:25, or T R 9:00–12 or T R 1:25–4:25. H. D. Aburto. An introduction to experimental physical chemistry, including topics in calorimetry, spectroscopy, and kinetics. The analysis and numerical simulation of experimental data is stressed.
CHEM 357-358 Organic Chemistry for the Life Sciences (I)
Fall or summer, 357; spring or summer, 358. 3 credits each term. Prerequisite for CHEM 357: CHEM 208 or 216 or advanced placement; recommended: concurrent registration in CHEM 251 or 300. Prerequisite for CHEM 358: CHEM 357 or permission of the instructor. Lecs. M W F 9:05 or 10:10; opti-may rec may be offered. Prelims. 7:30–9 p.m., Oct. 4, Oct. 23, Nov. 20, Feb. 14, Mar. 12, Apr. 11. Fall: T. Rutledge; spring: J. Meinwald.
A study of the more important classes of carbon compounds—especially those encountered in biological sciences. Emphasis is placed on their three-dimensional structures, mechanisms of their characteristic reactions, their synthesis in nature and the laboratory, methods of identifying them, and their role in modern science and technology. Note: Because of duplication of material, students who take both CHEM 257 and 357 will receive graduation credit only for CHEM 257.

CHEM 359-360 Organic Chemistry I and II (I)
Fall, 359; spring, 360. 4 credits each term. Recommended for students who intend to specialize in chemistry or closely related fields. Enrollment limited. Prerequisites: CHEM 216 with a grade of B or better, CHEM 208 with a grade of A or better, or permission of instructor. Prerequisite for CHEM 360: CHEM 359. Recommended: coregistration in both CHEM 357 and 358. Lecs. M W F 9:05, dis sex., W 7:30–9 p.m., Prelims. 7:30–9:00 p.m., Sept. 19, Oct. 17, Dec. 14. Spring: 7:30–9:00 p.m., Feb. 13, Mar. 13, Apr. 17. Fall: D. Ganem; spring: G. W. Coates.
A rigorous and systematic study of organic compounds, their structures, the mechanisms of their reactions, and the ways they are synthesized in nature and in the laboratory.

CHEM 369-370 Physical Chemistry I and II (I)
Fall, 369; spring, 370. 4 credits each term. Prerequisites: MATH 213 or, ideally, 221-222; PHYS 208; CHEM 208 or 216 or permission of instructor. Prerequisite for CHEM 370: CHEM 369. Lecs. M W F 10:10; rec M or W 12:55 or T 9:05. Lecs. M W F 10:10; prelims. 7:30–9:00 p.m., Sept. 12, Oct. 30. Nov. 29; 390: Feb. 14, Mar. 12, Apr. 11. Fall: P. L. Houston; spring: 390: H. F. Davis.
The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, statistical mechanics, and quantum chemistry.

CHEM 391 Physical Chemistry II (also CHEM 391) (I)
Spring. 4 credits. Enrollment limited to engineering students only. Prerequisites: MATH 293; PHYS 112, 213; CHEM 208 or 216 or permission of instructor.
Course is the study of two topics: (1) Quantum chemistry—the electronic structure of atoms, molecules, and condensed matter; the interaction of electromagnetic radiation with matter for spectroscopy and chemical reaction; and (2) Chemistry kinetics—reaction rate laws from experimental data and reaction mechanisms; approximation methods and applications to polymerization and heterogeneous catalysis.

CHEM 404 Entrepreneurship in Chemical Enterprise
Designed to acquaint students with the problems of planning, starting, and managing a new scientifically oriented business venture. The course consists of six weekly 90-minute meetings focusing on case studies and assigned reading, as well as outside lectures by entrepreneurs in the chemical, pharmaceutical, and biotechnology industries. Topics include new technology evaluation and assessment, business formation, resource allocation, management development, as well as manufacturing and sales issues.

CHEM 405 Techniques of Modern Synthetic Chemistry (I)
Spring. 3 or 6 credits. Enrollment limited. Prerequisites: CHEM 390 and MATH 109. Students collecting both CHEM 257 and 357 will receive graduation credit only for CHEM 257.

CHEM 410 Inorganic Chemistry (I)
Fall. 4 credits. Prerequisites: CHEM 358 or 360, and 287 or 390. Lecs. M W F 11:15. Prelims. 7:30–9:00 p.m., Sept. 25, Oct. 25, Nov. 20. R. C. Fay.
A systematic study of the synthesis, structure, bonding, reactivity, and uses of inorganic organometallic, and solid-state compounds.

CHEM 421 Introduction to Inorganic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: CHEM 303 and 389–390, or CHEM 287–288, and CHEM 289–290 with an average of B or better, or permission of instructor. Research in inorganic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 423 Introduction to Analytical Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: CHEM 303 and 390 with an average of B or better, or permission of instructor. Selected faculty. Research in analytical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 450 Principles of Chemical Biology (I)
Biological processes are increasingly understood in chemical terms, and this course introduces some of the most important chemical approaches to biological processes. Topics such as structure-based drug design, small molecule mediators or protein-protein interaction, combinatorial synthesis, chemical genetics, conformational analysis of biological molecules, and the molecules transfer of biological information are covered.

CHEM 461 Introduction to Organic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: CHEM 302 and 358 or 360 with a grade of B or better or permission of instructor. Selected faculty. Research in organic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 477 Introduction to Physical Chemistry Research
Fall or spring. 2–4 credits. Prerequisite: CHEM 350 with an average of B or better or permission of instructor. Selected faculty. Research in physical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 498 Honors Seminar
Spring. No credit. Admission to standard chemistry majors only by departmental invitation. Additional prerequisites or corequisites: outstanding performance in either (1) two coherent 4-credit units of research in a course such as CHEM 421, 433, 461, or 477; or (2) one 4-credit unit in a course such as CHEM 421, 433, 461, or 477 and summer research equivalent to at least 4 credits in the same subject. W 2:30–4. R. F. Loring.
Informal presentations and discussions of selected topics in which all students participate. Professional issues are discussed, including graduate education, publication, techniques of oral and audiovisual presentation, employment, ethics, chemistry in society, and support of scientific research. Individual research on advanced problems in chemistry or a related subject under the guidance of a faculty member, culminating in a written report.

CHEM 600-601 General Chemistry Colloquium
Fall, 600; spring, 601. No credit. R 4:40. Staff.
A series of talks representative of all fields of current research interest in chemistry given by distinguished visitors and faculty members.

CHEM 602 Information Literacy for the Physical Scientist
Spring. 1 credit. Primarily for first-year graduate students and undergraduate chemistry majors doing research. Lecs. T 4:45–6:00. L. Solla.
An introduction to physical science information research methods, including use of paper and electronic resources. With the continued information explosion, much time can be wasted and important information missed unless an efficient information research strategy is developed. This course demonstrates the use of library and other information resources as a method to critically evaluate the success of research projects.

CHEM 605 Advanced Inorganic Chemistry I: Symmetry, Structure, and Reactivity
Fall. 4 credits. Prerequisites: CHEM 389–390 or equivalent or permission of instructor. Lecs. M W F 11:15. J. P. Chirik.
Selected topics in modern inorganic chemistry. Group theory applications: hybrid orbitals, molecular orbitals, molecular vibrations and spectroscopy with emphasis on modern coordination compounds. Reading at the level of Jordan's Reaction Mechanisms of Inorganic and Organometallic Systems, and
ARTS AND SCIENCES - 2001-2002

Cotton's Chemical Applications of Group Theory.

[CHEM 606 Advanced Inorganic Chemistry II: Synthesis, Structure, and Reactivity of Coordination Compounds, and Bioinorganic Chemistry]

Synthesis, structure, and reactivity of coordination compounds; oxidation and bioinorganic chemistry. Emphasis on bonding models, structural reactivity, including the elucidation of mechanisms. Readings at the level of Purcell and Kotz's Inorganic Chemistry, and Jordan's Reaction Mechanisms of Inorganic and Organometallic Systems.

CHEM 607 Advanced Inorganic Chemistry III: Solid-State Chemistry
Spring. 4 credits. Prerequisite: CHEM 606 or permission of instructor. Lecs, M W F 11:15. S. Lee.

CHEM 608 Organometallic Chemistry

Synthesis, structure, and reactivity of organotransition metal complexes. Current literature is emphasized, and background readings are at the level of Collman, Hefedus, Finke, and Norton's Principles and Applications of Organotransition Metal Chemistry.

CHEM 622 Chemical Communication

For description, see BIONB 623.

CHEM 625 Advanced Analytical Chemistry I
Spring. 4 credits. Prerequisite: CHEM 288 or 390 or equivalent. Lecs, M W F 9:05-11:45. D. B. Zax.

The application of molecular spectroscopy to chemical problems. Topics in infrared, NMR, and mass spectroscopy are discussed.

[CHEM 627 Advanced Analytical Chemistry II]
Spring. 3 credits. Primarily for graduate students. Prerequisite: CHEM 793 or equivalent is preferable. Lecs, M W F 9:05-11:15. B. Zax.

Modern techniques in nuclear magnetic resonance. Little overlap is expected with CHEM 625, as this course focuses on more general questions of experimental design, understanding of multiple experiments, and aspects of coherent averaging theory. Examples taken from both liquid and solid-state NMR. May also be of interest to other coherent spectroscopists.

CHEM 620 Isotopic and Trace Element Analysis I
Fall. 3 credits. Primarily for graduate students and advanced undergraduates. Prerequisite: CHEM 288 or 390 or 302, or CHEM 208 and PHYS 208, or permission of instructor. Lecs, T R 10:10. Offered alternate years. J. T. Brenna.

Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics of IRMS include continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications.

CHEM 629 Electrochemistry
Fall. 4 credits. Primarily for graduate students and junior and senior undergraduates. Prerequisite: CHEM 390 or equivalent (MATH 213 helpful). Lecs, T R 8:40-9:55. H. D. Abrufia.

Fundamentals and applications of electrochemistry. Topics include fundamentals of electrode kinetics, electron transfer theory, the electrical double layer, diffusion, and other modes of transport. A wide range of techniques and their application as well as instrumental aspects are covered.

CHEM 665 Advanced Organic Chemistry
Fall. 4 credits. Primarily for graduate students and junior and senior undergraduates. Prerequisite: CHEM 358 or 360, and 390 or equivalents or permission of instructor. Lecs, M W F 9:05. D. T. McQuade.

CHEM 665 focuses on bonding (covalent and non-covalent), reaction mechanisms, and reactive intermediates, with an emphasis on experimental design and methods. The lecture portion of the course is augmented by both written and oral presentations from the students.

CHEM 666 Synthetic Organic Chemistry
Spring. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: CHEM 665 or permission of instructor. Lecs, T R 10:10-11:25. D. B. Collum.

Modern techniques of organic synthesis; applications of organic reaction mechanisms and retrosynthetic analysis to the problems encountered in rational multistep synthesis, with particular emphasis on modern developments in synthesis design.

CHEM 668 Chemical Aspects of Biological Processes
Fall. 4 credits. Prerequisite: CHEM 360 or equivalent. Lecs, T R 8:40-9:55.

T. P. Begley

A representative selection of the most important classes of enzyme-catalyzed reactions is examined from a mechanistic perspective. Topics discussed include the chemical basis of enzymatic catalysis, techniques for the elucidation of enzyme mechanism, cofactor chemistry, and the biosynthesis of selected natural products. The application of chemical principles to understanding biological processes is emphasized.

CHEM 670 Fundamental Principles of Polymer Chemistry
Fall. 4 credits. Prerequisite: Physical Chemistry 389/390 and Organic Chemistry 359/360 or equivalent or by permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymers is required. Lecs, T R 10:00-11:15. D. Y. Sohag.

This course emphasizes general concepts and fundamental principles of polymer chemistry.

The first part of the course deals with general introduction to classes of polymers, molar masses and their distributions, and a brief survey of major methods of polymer synthesis—radical, step-growth, ionic, group transfer, Ziegler-Natta, and metathesis polymerization methods—with emphasis on kinetics, mechanisms and stereochemistry rather than on structure. The second part deals with characterization and physical properties. These include: solution properties—solubility and solubility parameters, solution viscosity, molecular weight characterization (gel permeation chromatography, viscometry, light scattering, osmometry); bulk properties—thermal properties; and structure-property relationships. The discussions will focus on chemistry rather and physics than engineering of polymers.

CHEM 671 Synthetic Polymer Chemistry (also MS&E 671 and CHEM 678)
Spring. 4 credits. Prerequisites: a minimum of organic chemistry background. Students without this background should see the instructor before registering for the course. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymer chemistry is required although knowledge of material covered in CHEM 670 or MS&E 452 will be helpful. Lecs, T R 8:30-10:00. D. Y. Sogah.

This course emphasizes application of synthetic methods to the development of new polymerization methods and control of polymer architecture. Emphasis is on modern concepts in synthetic polymer chemistry and topics of current interest: the study of new methods of synthesis, preparation of polymers with reactive end groups, the control of polymer stereochemistry and topology, and the design of polymers tailored for specific uses and properties. Topics on synthesis are selected from the following: step-growth polymerization with emphasis on high performance materials, free radical polymerization and copolymerization, Ziegler-Natta polymerization, recent developments in living radical, anionic, cationic, group transfer, and ring-opening metathesis polymerizations.

CHEM 672 Kinetics and Regulation of Enzyme Systems
Spring. 4 credits. Primarily for graduate students with interests in biophysical chemistry. Prerequisite: CHEM 288 or 390, BIONB 351, or equivalents or permission of instructor. Lecs, M W F 10:10. Not offered 2001-2002. B. Baird.

Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include protein structure and dynamics, thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics, enzyme catalysis and regulation; and the role of cell membrane receptors in regulating cellular activities.

CHEM 677 Chemistry of Nucleic Acids
Fall. 4 credits. Primarily for graduate students. Prerequisites: CHEM 358 or 360, and 390 or equivalents. Lecs, M W 10:10-11:00. D. A. Usher.

Structure, properties, synthesis, and reactions of nucleic acids from a chemical point of view. Special topics include antisense and antigene technology, ribosome reactions (including the ribosome), mutagens, PCR, recent advances in sequencing, DNA as a computer, and alternative genetic materials.
CHEM 678 Statistical Thermodynamics
Fall. 4 credits. Primarily for graduate students. Prerequisite: CHEM 390 or equivalent. Lecs, M W F 9:05. J. Marchon.
Course covers principles of statistical thermodynamics and how they lead to classical thermodynamics. Topics include: ensembles and partition functions; ideal gases and crystals; thermodynamic properties from spectroscopic and structural data; chemical equilibrium; dense gases: virial coefficients; statistical mechanics of solutions, and Bose-Einstein and Fermi-Dirac statistics. At the level of the first twelve chapters of Statistical Mechanics by McQuarrie.

CHEM 686 Physical Chemistry of Proteins
Fall. 4 credits. Primarily for graduate students. Prerequisite: CHEM 288 or 590 or equivalents. Letter grade for undergraduate and graduates. Lecs, M W F 12:20.
B. Crane.
Physical properties of proteins are presented from a quantitative perspective and related to biological function. Topics include: chemical, structural, thermodynamic, hydrodynamic, electrical and conductive properties of soluble and membrane proteins; conformational transitions, protein stability and folding; photochemistry and spectroscopic properties of proteins; and protein-protein interactions and single molecular studies.

CHEM 700 Baker Lectures
Fall. On dates TBA. No credit. Lec, T R 11:15.
Distinguished scientists who have made significant contributions to chemistry present lectures for approximately six weeks. This year's lecturer: Jean M. J. Fréchet, University of California at Berkeley.

CHEM 701 Introductory Graduate Seminar
Fall. No credit. Highly recommended for all senior graduate students, in any field of chemistry. Lecs W 8:00-9:00 P.M.
R. Hoffmann.
A discussion of professional issues facing young chemists as well as life skills: academic and industrial trends, presentations, employment, immigration, publication, research funding, and ethics.

CHEM 716 Introduction to Solid State Organic Chemistry
Fall. 3 credits. Prerequisite: some exposure to (or course in) quantum mechanics. A good undergraduate physical chemistry course may be sufficient, while PHYS 443 or CHEM 793 or CHEM 794 are at a substantially higher level than what is needed. Lecs, M W F 12:20. S. Lee.
This course examines first the principles of crystallography. We then consider properties such as conduction, superconductivity, ferroelectricity and ferromagnetism. The final portion of this course is concerned with structure-property relations.

CHEM 765 Physical Organic Chemistry I
Application of computational and experimental techniques to studies of organic reaction mechanisms and the properties of reactive intermediates.

CHEM 774 Chemistry of Natural Products: Combinatorial Chemistry
Spring. 3 credits. Prerequisites. CHEM 360 and BIOBM 350 or equivalent. Lec, M W F 10:10–11:30. T. P. Begley.
Combinatorial chemistry has revolutionized the way organic chemists think about structure function studies on biological systems and the design of inhibitors. This course explores the design, synthesis, screening, and use of natural (i.e., peptide, protein, nucleic acid, carbohydrate) and unnatural (i.e., totally synthetic) libraries.

CHEM 780 Chemical Kinetics and Molecular Reaction Dynamics
Fall. 3 credits. Prerequisite: CHEM 681 or permission of instructor. Lecs, T R 10:10–11:25. P. L. Houston.
Principles and theories of chemical kinetics and molecular reaction dynamics. Topics include potential energy surfaces, transition state theory, and statistical theories of unimolecular decomposition. Depending on class interest, the course also includes special topics such as surface reactions and photochemistry.

CHEM 787 Modern Methods of Physical Chemistry
Fall. 4 credits. Prerequisites: 1 year of undergraduate physical chemistry, 3 semesters of calculus, 1 year of college physics. Lecs, T R 10:10–11:25. J. H. Freed.
This course provides the methodological background for graduate courses in chemical thermodynamics, kinetics, statistical mechanics, and quantum chemistry. It includes the methods of solution of relevant differential equations; the eigenvalue problem and linear algebra; special functions partial differential equations for diffusion and wave mechanics; integral transforms; functions of a complex variable. At the level of Mathematical Methods in the Physical Sciences, 2nd Edition, by Boas. There is a midterm and a final exam, and 12 problem sets.

CHEM 788 Macromolecular Crystallography (also BIOBM 738)
Spring. 3 credits. S-U grades optional. Prerequisite: permission of instructor. Offered alternate years. Lecs, T R 10:10. S. E. Fallica.
Lectures briefly cover the fundamentals of crystallography and focus on methods for determining the three-dimensional structures of macromolecules. These include crystallization, data collection, phasing methods, model building, refinement, structure validation and structure interpretation.

CHEM 791 Spectroscopy
Principles of molecular rotational, vibrational, and electronic spectroscopy. Topics include interaction of molecules with radiation; Born-Oppenheimer approximation; diatomic molecules; polyatomic molecules; feasible operations and the molecular symmetry group, and spectroscopy, dynamics, and IFR. At the level of Kroto's Molecular Rotation Spectra.

CHEM 792 Molecular Collision Theory
The concepts and methods of scattering theory are described with particular emphasis on applications to physical and chemical interest. At the level of Child's Molecular Collision Theory and Taylor's Scattering Theory.

CHEM 793 Quantum Mechanics I
Fall. 4 credits. Prerequisites: CHEM 390, coregistration in A&EP 321 or equivalents or permission of instructor. Lecs, M W F 10:10–11:15. B. Zox.
Course topics include: Schrödinger's equation, wave packets, uncertainty principle, WKBJ theory, matrix mechanics, orbital and spin angular momentum, exclusion principle, perturbation theory, and the variational principle. At the level of Cohen-Tannoudji's Quantum Mechanics.

CHEM 794 Quantum Mechanics II
Spring. 4 credits. Prerequisites: CHEM 793 or equivalent and the equivalent of or coregistration in A&EP 322, or permission of instructor. Lecs, T R 10:10–11:15. B. Widom.
Course topics include: WKBJ theory, potential curves and surfaces, light-matter interaction, electronic structure and photochemistry, quantum systems and spectroscopy, scattering theory, Hartree-Fock and density-functional theories of electronic structure; molecular-orbital theory; and band theory of solids.

CHEM 796 Statistical Mechanics
Spring. 4 credits. Prerequisite: CHEM 678 and 793 or equivalent. Lecs, T R 8:30–9:55. F. R. Loring.

CHEM 798 Special Topics in Physical Chemistry (Chemical Bonding in Polymers, Surfaces, and the Solid State)
The qualitative aspects of the electronic structure and chemical bonding on extended one-, two-, and three-dimensional systems are discussed, in a way accessible to a wide range of inorganic and organic chemists, and to engineers and physicists as well.

CHINESE
FALCON Program (Chinese)
See Department of Asian Studies.
CLASSICS

K. Clinton, J. E. Coleman, G. Fine, F. I. Kolias, D. Mankin, G. M. Messing

Cornell University has long recognized the importance of studying the civilizations of ancient Greece and Rome. Particularly in an age of increasing specialization, study of the Classics is widely viewed as an excellent means of acquiring a liberal education, at Cornell, we are deeply interested in the continuing humanistic values contained in the literature of the ancient world and in gaining a fuller understanding of these important cultures and their imprint on subsequent ages.

The Department of Classics at Cornell is one of the oldest in the country. With 14 full-time faculty members, together with professors of related interests in the Departments of History, Philosophy, Comparative Literature, History of Art, Modern Languages, Linguistics, and Near Eastern Studies and in the Archaeology, Medieval Studies, and Religious Studies programs, the range of instruction available is very large, including not only the traditional study of language, literature, and ancient history, but also newer developments in the field, such as comparative study of Mediterranean civilizations and modern literary theory.

Although Classics, like other areas of humanistic study, does not aim at providing specific preprofessional training, over the years Classics majors from Cornell have gone on to a wide variety of careers in law, education, medicine, diplomacy, management, educational administration, government, and many others.

The department offers courses in Bronze Age and Classical archaeology and is active in field projects in Classical lands. It sponsors archaeological excavations at Halai in Greece, which serves as a field training school for Cornell undergraduate and graduate students. On campus there are also collections of ancient artifacts, reproductions of ancient sculpture, and one of the few laboratories in the world to concentrate on the tree-ring dating of ancient monuments from Greece, Cyprus, and Turkey. The archaeology courses may be used to satisfy some of the requirements for the Intercollege Program in Archaeology or for the major in Classical Civilization. They require no knowledge of either Greek or Latin. Similarly, the department offers a variety of courses and seminars in English on such subjects as Greek mythology, Greek and Roman mystery religions, early Christianity, and Greek and Roman society, as well as ancient epic, tragedy, history, and philosophy. For those whose interest in things Greek and Roman extends no further than a desire to understand the English language a little better, the department offers one course in the Greek and Latin elements that make up a huge proportion of the vocabulary of Modern English, and another that deals more specifically with the Greek and Latin ingredients of bioscientific vocabulary. Programs in Greek and Latin at the elementary level are also offered. For the more ambitious there are courses involving reading, in the original, of Greek and Latin authors from Homer to St. Augustine and Bede and, periodically, the Latin works of Dante, Petrarch, and Milton. Sanskrit, the classical language of ancient India, is also offered, along with courses in translation on Indic religion, myth, and literature. The department makes every attempt to adapt its program to the needs of each student. If there is a classical writer you would like to study, the department will do its best to help you do so whatever you are a major in the department or not.

Majors

The Department of Classics offers majors in Classics, Greek, Latin, and Classical Civilization.

Classics

The Classics major comprises seven courses in advanced Greek and Latin (numbered 201 or above) and three courses in related subjects (see below) selected in consultation with the adviser. Classics majors are required to take a minimum of one 300-level course in one language and two 300-level courses in the other. Students who are considering the option of undertaking graduate study in Classics are strongly advised to complete the Classics major.

Greek

The Greek major comprises CLASS 201 plus five advanced courses in Greek (numbered 203 and above) of which at least three are to be taken at the 300-level, and three courses in related subjects (see below) selected in consultation with the adviser.

Latin

The Latin major comprises CLASS 205 plus five advanced courses in Latin (numbered 207 and above) of which at least three are to be taken at the 300-level, and three courses in related subjects (see below) selected in consultation with the adviser.

Classical Civilization

Those who major in Classical Civilization must complete (a) qualification in Latin and Greek or proficiency in either; (b) CLASS 211 (or HIST 265), CLASS 212 (or HIST 269), and CLASS 220, plus five courses selected from those listed under Classical civilization, Classical archaeology, Ancient Philosophy, Latin, and Greek; and (c) three courses in related subjects (see below) selected in consultation with the adviser.

Related Subjects

The field or scope of the subject "Classics" is the interdisciplinary study of Greek and Roman antiquity, comprising Greek and Latin language, literature, and linguistics; ancient philosophy, art, archaeology and art history, papyrology, epigraphy, and numismatics. It covers the ancient Mediterranean and neighboring lands as they were during the period extending from approximately 3000 B.C.E. to the sixth century C.E. In addition to the required courses in language and literature, the major includes related courses intended to give breadth and exposure to the other disciplines within the field and to enrich the student's study of the original languages.

Since the influence of the Greco-Roman world extended far beyond antiquity, a related course could well focus on some aspect of the classical tradition in a later period. Students seeking such courses in consultation with their advisers or the DUS.

Honors

Candidates for the degree of Bachelor of Arts with honors in Classics, Greek, Latin, or Classical civilization must fulfill the requirements of the appropriate major study as given above and must also successfully complete the special honors course 472. Credit for the honors course may be included in the credits required for the major. Students who wish to become candidates for honors must have a cumulative average of B, and B+ in the major. In consultation with the Standing Committee on Honors, the students should choose an honors adviser by the end of their sixth semester. By the second week of their seventh semester they should submit an outline of their proposed honors work to the Standing Committee and to the adviser(s). The thesis will be written under the supervision of the honors adviser(s) chosen by the student. Honors advisers will submit recommendations to the Standing Committee on Honors. The Committee will read all honors theses and will determine the level of departmental honors. A copy of each successful honors thesis will be filed with the department.

Independent Study

Independent study at the 300 level may be undertaken by undergraduates upon completion of one semester of work at the 300 level. 200-level independent study may be undertaken only in the case of documented schedule conflict upon application to the DUS.

Study Abroad

Cornell participates in the Intercollegiate Center for Classical Studies in Rome, which offers courses in Latin, Greek, ancient history, art, archaeology, and Italian. Another opportunity for a semester's study abroad is available through College Year in Athens. (Consult Cornell Abroad for details.) In addition, Cornell is a member institution of the American School of Classical Studies at Athens, whose Summer Program is open to qualifying students and qualified undergraduates. The American Academy in Rome, of which Cornell is also a member institution, offers full-year and summer programs for qualified graduate students. For graduate students the Department of Classics offers a few travel grants each year from the Townsend Memorial Fund. Detailed information on these programs is available in the Department of Classics Office, 120 Goldwin Smith Hall.

Summer Support for Language Study

The Beatrice R. Kanders Memorial Scholarship (for the summer immediately following the freshman or sophomore year, preference given to dyslexic students) is available to students who want to enroll in Intensive Latin or Greek in the Cornell summer session. These courses are designed to enable students to enter second-year Latin or Greek the following fall. Preference is given to Classics undergraduate majors, and other students needing Latin or Greek for completion of their majors. Applications are due to the chair of the Department of Classics by March 16.
Placement in Latin, Ancient Greek, and Modern Greek
Placement of first-year students in Latin and ancient Greek courses, and proficiency level in modern Greek, is determined by an examination given by the Department of Classics during orientation week or by arrangement with the director of undergraduate studies.

First-Year Writing Seminars
The department offers freshman writing seminars on a variety of topics. Consult John S. Knight Institute brochure for times, instructors, and descriptions.

Classical Civilization

CLASS 100 Word Power: Greek and Latin Elements in the English Language
Spring. 3 credits. E. Hohendahl.
This course gives the student with no knowledge of the classical languages an understanding of how the Greek and Latin elements that make up over half our English vocabulary operate in both literary and scientific English usage. Attention is paid to how words acquire their meaning and to how these issues persist and are formulated in our own thinking.

CLASS 109 English Words: Histories and Mysteries (also LING 109) # (III)
Fall. 3 credits. M. Weiss.
For description, see LING 109.

CLASS 211 The Greek Experience # (IV)
Fall. 3 credits. Limited to 50 students. F. Ahl.
An introduction to the literature and thought of ancient Greece. Topics include epic and lyric poetry, tragedy and comedy, and historical, political, philosophical, and scientific writings. Some attention is given to the daily life of ordinary citizens, supplemented by slides of ancient architecture.

CLASS 212 The Roman Experience # (IV)
An introduction to the civilization of the Romans as expressed in their literature, religion, and social and political institutions.

CLASS 217 Initiation to Greek Culture # (IV)
Fall. 4 credits. Limited to 18 students. This course is intended especially for freshmen (a few exceptionally motivated sophomores or upperclass students may be accepted). Apply in writing to the Chair, Department of Classics, 120 Goldwin Smith Hall, P. Pucci and L. Abel.
Knowledge of Greek or Latin is not necessary, since all texts are in translation. What is necessary is the willingness to participate in three one-hour seminars each week and also a supplementary one- or two-hour session, during which the class participates in workshops with specially invited guests.
This course covers a wide range of Greek literary and philosophical works, as well as modern critical and philosophical writings on the Greeks. Our focus throughout is on the status of language; the many forms of discourse that appear in the literature, and the attempts the Greeks themselves made to overcome the perceived inadequacies and difficulties inherent in language as the medium of poetry and philosophy.
We inquire into the development of philosophy in the context of a culture infused with traditional, mythological accounts of the cosmos. We ask how poetic forms such as tragedy responded to and made accommodation with philosophical discourse while creating a most emotional effect on the audience; how the first historians, using literary and philosophical discourse, created space for their own inquiry; and we discuss how these issues persist and are formulated in our own thinking.

CLASS 218 Initiation to the Classical Tradition # (IV)

CLASS 222 Ancient Fiction (also COM L 222) # (IV)
Fall. 3 credits. All readings are in English. J. Rife.
Ancient fiction blended ideal romance, fantastic adventure, and social realism into new literary forms that would have a lasting impact on the medieval and modern imagination, from early Christian and Renaissance literature to opera and film. This course surveys ancient fiction by Greek and Roman authors in translation, including the novels by Achilles Tatius, Apuleius, Chariton, Heliodorus, Longus, and Petronius and a selection of shorter pieces from related genres such as satire, biography, and travel accounts. Lecture and discussion address the development of several defining features: the central themes of love and death, the design and invocation of narrative structure, the play of intertextuality, the drawing of imaginary landscapes, the portrayal of ethnic and social identity, and the labile classification of truth, or historicity, and falsehood, or fictionality. Students also evaluate several theoretical approaches to the interpretation of ancient fiction and consider the influence of the ancient novels on their successors.

CLASS 223 The Comic Theater (also COM L 223 and THETR 223) # (IV)
Summer 2002. 3 credits. J. Rusten.
The origins of comic drama in ancient Greece and Rome, and its subsequent incarnations especially in the Italian Renaissance (Commedia erudita and Commedia dell'arte), Elizabethan England, seventeenth-century France, the English Restoration, and Hollywood in the thirties and forties. Chief topics include: the growth of the comic theatrical tradition and conventions, techniques and themes of comic plots (trickster, parody, farce, caricature); and the role of comedy in society. All readings are in English.

CLASS 229 War and Peace in Greece and Rome (also HIST 228) # (III)
For description, see HIST 228.

CLASS 231 Ancient Philosophy (also PHIL 211) # (IV)
Fall. 4 credits. C. Brittain.
For description, see PHIL 211.

CLASS 233 Seminar: Eyewitness to War in the Ancient World (also HIST 232) # (III)
Spring. 3 credits. B. Strauss.
A study of ancient soldier-historians who participated in the campaigns about which they later wrote. Topics include historiography, autobiography, propaganda, prose style. Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus, Ammianus Marcellinus as well as, for comparative purposes, modern soldier-historians.

CLASS 236 Greek Mythology (also COM L 236) # (IV)
Fall 2001 and summer 2002. 3 credits. Limited to 200 students. D. Mankin.
A survey of the Greek myths, with emphasis on the content and significance of the myths in Mediterranean society, including the place of myth in Greek life and consciousness: the factors and influences involved in the creation of myths; and the use of myths for our understanding of Greek literature, religion, and moral and political concepts.

CLASS 237 Greek Religion and Mystery Cults (also RELST 237) # (IV)
Greek religion constitutes one of the essential features of ancient Greek civilization and distinguishes it from later Western civilization. Since religion permeates Greek culture, including the major art forms (poetry, tragedy, comedy, architecture, painting, and sculpture), the course investigates the interaction of religion with these forms—an investigation that is fruitful both for the understanding of Greek religion and the forms themselves, some of which, like tragedy, originated in cult. A representative variety of cults and their histories are studied with special emphasis on mystery cults, such as the Eleusinian mysteries of Demeter and Persephone; the Kahunic Mysteries of the Great Gods of Samothrace, and Hecataic rites.

CLASS 238 The Ancient Epic and Beyond # (IV)
We move, Odyssey-like, to the West, beginning with Homer's Iliad (and including the British poet Christopher Logue's "account" of the opening books) and Odyssey, we continue in the Hellenistic and Augustan eras with Apollonius of Rhodes' Argonautica and Virgil's Aeneid. A violent shift in space and time has us conclude with two New World maritime epics: Herman Melville's Moby Dick and Derek Walcott's Omeros.

CLASS 258 Periclean Athens # (IV)
Spring. 4 credits. H. Pelliccia, H. R. Rawlings III, and J. Rusten.
The first five weeks provide a synoptic view of Athens' historical and cultural achievement in the middle of the fifth century B.C.—the traditional pinnacle of "The Glory that was Greece." Readings are taken from Greek historians, philosophers, poets, and documentary texts. At least two of the (75-minute) lectures are devoted to art history and delivered by a guest speaker. The next 7–8 weeks follow the course of the Peloponnesian War to its end; readings from Thucydides are interwoven with contemporaneous texts composed by the dramatists (Sophocles, Euripides, and Aristophanes) and the sophists (supplemented with readings from Plato). The remaining classes consider the fate of Socrates and a few other fourth-century developments. The basic aim of the course is to approach an understanding of how and why a vital and creative society came unglued. There are weekly discussion sections.
CLASS 260 Conceptions of the Self in Classical Antiquity # (IV)
Spring. 4 credits. There are no prerequisites for this course; all readings are in English. C. Brittain.
The idea of a person or a 'self' seems to be something determined by nature: we each have one mind, a unique personality, and the capacity to act as moral agents. But the way in which we conceive of ourselves also depends on our beliefs about human nature, rationality, freedom, luck, and society. This course examines a variety of different conceptions of the self from the period 700 BCE to 400 CE, using a range of texts from Greek and Roman literature (including epic and tragedy), medical theory, and philosophy (both pagan and Christian).

CLASS 265 Ancient Greece from Homer to Alexander the Great (also HIST 265) # (III)
4 credits. Open to freshmen. B. Strauss.
For description, see HIST 265.

CLASS 268 A History of Rome from Republic to Principate (also HIST 268) # (III)
For description, see HIST 268.

CLASS 291 Classical Indian Narrative (also ASIAN 291) @ # (IV)

CLASS 303-304 Independent Study in Classical Civilization, Undergraduate Level
303, fall; 304, spring. Up to 4 credits.

CLASS 324 Translation for the Theatre (also THETR 423/623 and COM L 446/646) # (IV)
Spring. 4 credits. Prerequisites: proficiency in language other than English; coursework in dramatic literature, directing, or playwriting. J. E. Gainor.
For description, see THETR 423/623.

CLASS 331 Goths, Vandals, Franks, and Romans (II) # (IV)
Fall. 4 credits. D. Shanzer.
Contemporary views of the Visigothic Sack of Rome by Alaric in 410 are followed by three different case-studies for co-existence of one that lasted, the Frankish kingdom (Gaul). Romans # (IV)

CLASS 332 Greek and Roman Mystery Cults and Early Christianity (also RELST 332) # (IV)
Fall. 4 credits. A. Nussbaum.
For description, see RELST 332.

CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also RELST 333) # (IV)
Fall. 4 credits. A. Nussbaum.
A study of the controversial question of religious continuity between paganism and early Christianity. After a brief survey of classical mystery cults and Hellenistic religion, the course focuses on such Hellenistic and Roman cults as the mystery cults of Isis, Bacchus, Mithras, and Attis and the Great Mother and on the distinctive features that contributed to their success. Discussion of Christian liturgy and beliefs to determine what Christian belief is to its pagan predecessors and to isolate the factors that contributed to its triumph over the “rival” pagan cults of late antiquity.

CLASS 339 Plato (also PHIL 309) # (IV)
Fall. 4 credits. Prerequisite: at least one previous course in philosophy. G. Fine.
For description, see PHIL 309.

CLASS 345 The Tragic Theater (also COM L 344 and THETR 345) # (IV)
Tragedy and its audiences from ancient Greece to modern theater and film. Topics: origins of theatrical conventions; Shakespeare and Seneca; tragedy in modern theater and film. Works, studies included: Aeschylus; Agamemnon; Sophocles' Oedipus Tyrannus, Philoctetes; Euripides’ Alcestis, Hekla, Iphigenia in Aulis, Orestes; Seneca's Thyestes, Trojan Women; Shakespeare’s Julius Caesar, Titus Andronicus, Othello; Strindberg's The Father; Durrenmatt's The Visit; Bergman's Seventh Seal, Cacoyannis Iphigenia.

CLASS 382 Greeks, Romans, and Victorians (also COM L 382) # (IV)
Spring. 4 credits. Prerequisite: HIST 268.
This course explores how nineteenth-century (and especially Victorian English and Irish) poets, dramatists, and to a lesser extent, novelists, present Greco-Roman antiquity. The varied influences of Vergil and Homer, Seneca and Sophocles, Plautus and Aristophanes, Horace, and Greek lyric poetry are discussed in selected works of Thomas More, Shelley, Byron, Swinburne, W. S. Gilbert, Oscar Wilde, and the pre-Raphaelites and Victorian poets.

CLASS 390 The Sanskrit Epics (also ASIAN 390) @ # (IV)
For description, see ASIAN 390.

CLASS 395 Classical Indian Philosophical Systems (also ASIAN 395 and RELST 395) # (IV)
For description, see ASIAN 395.

CLASS 445 Classic Modern Historiography of Ancient Greece (also HIST 435) (III)
Fall. 4 credits. Prerequisite: an introductory course in ancient Greek history or civilization or permission of the instructor. B. Strauss.
This upper-level seminar is an introduction to some of the main themes, directions, and controversies in modern research on ancient Greece. We read selections from the leading works of scholarship on ancient Greece from the nineteenth and twentieth century, including such authors as Grose, Buerkhardt, Cornford, Glotz, Momigliano. M. I. Finley, Ste. Croix, Vernant, Vidal-Naquet, and the current crop of scholars.

CLASS 450 The Peloponnesian War (also CLASS 632 and HIST 450/630) # (III)
Fall. 4 credits. Prerequisites: CLASS 211 or 217, HIST 265, or permission of instructor. Not offered 2001–2002. B. Strauss.
For description, see HIST 450.

CLASS 463 Gender and Politics in the Roman World (also HIST 463 and WOMNS 464) # (III or IV)
An undergraduate seminar examining the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions this course addresses are: was politics the exclusive domain of men in Roman society (as is generally assumed) or does a broader definition of politics and an understanding of the various forms political activity in ancient Rome might have taken allow a place for women in Roman political life? What role did gender play in Roman political discourse and ideology? Why did issues such as family, marriage, and sexuality become subjects of political debate and legislation?

CLASS 469 Equality and Inequality in Ancient Greece (also HIST 469) # (III or IV)
Fall. 4 credits. Prerequisite: HIST 265, CLASS 211 or 217, or written permission of the instructor. Not offered 2001–2002. B. Strauss.
For description, see HIST 469.

CLASS 480 Roman Society and Politics under the Julio-Claudians (also HIST 473) # (III or IV)
Spring. 4 credits. Prerequisite: CLASS 212, HIST 268, or permission of instructor. J. Ginsburg.
This course examines several of the important social and political changes in Roman society under Augustus and his successors, the Julio-Claudians. Topics to be investigated include Augustus's consolidation of power through political and social revolution, the Augustan attempt to regulate family life and social relations by legislation, the relation of the emperor Tiberius with the members of the old ruling class, the growth of the imperial bureaucracy and the new opportunities for social mobility, the political opposition to Claudius and Nero, Nero's cultural and provincial policy, and the manipulation of the imperial cult. All readings will be in English.

CLASS 711-712 Independent Study for Graduate Students in Classical Civilization
711, fall; 712, spring. Up to 4 credits.

Greek

CLASS 101 Greek for Beginners
Fall. 4 credits. A. Nussbaum.
Introduction to Attic Greek. Designed to enable the student to read the ancient authors as soon as possible.

CLASS 103 Attic Greek
Spring. 4 credits. Provides language qualification. Prerequisite: 101 or equivalent. K. Clinton.
A continuation of CLASS 101. Preparatory for students for CLASS 201.

CLASS 104 Intensive Greek
Summer. 6 credits. Provides language qualification. Staff.
An intensive introduction combining the fundamentals of ancient Greek grammar with readings from a variety of classical authors in the original Greek. Prepares students in a single semester for CLASS 201.
CLASS 201 Attic Authors # (IV)
Fall. 3 credits. Prerequisite: CLASS 103 or 104 or equivalent. C. Brittain. Selected readings from Greek prose.

CLASS 203 Homer # (IV)

CLASS 210 Attic Prose # (IV)

CLASS 225-226 Independent Study in Greek, Undergraduate Level
225, fall; 226, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict.

CLASS 230 The Greek New Testament and Early Christian Literature # (IV)
Fall. 4 credits. Prerequisite: CLASS 201 or equivalent, or permission of instructor. Not offered 2001–2002. D. Shanzer. More advanced readings from the Acts of the Apostles and some exercises on the Gospels are followed by readings from Early Christian Greek literature. The latter may include theological tracts and hagiographical texts, e.g. martyr-acts, such as the Passion of Pionius or the Passion of Perpetua.

CLASS 307-308 Independent Study in Greek, Undergraduate Level
307, fall; 308, spring. Up to 4 credits.

CLASS 310 Greek Undergraduate Seminar # (IV)
Fall and spring. 4 credits. Prerequisite: two 200-level courses in Greek or permission of instructor. Fall topic: Synopssis. P. Pucci. Spring topic: Herodotus. K. Clinton. Symposium: extensive passages from Plato’s Symposium and Xenophon’s Symposium are read. Literary and pictorial evidence that illustrates the erotic, social, and cultural importance of this Greek institution are studied.

CLASS 342 Greek Prose Composition
Spring. 4 credits. Prerequisite: CLASS 201 or permission of instructor. Not offered 2001–2002. P. Pucci.

CLASS 417 Advanced Readings in Greek # (IV)

CLASS 419 Advanced Greek Composition

CLASS 511 Greek Philosophical Texts (also PHIL 411)
Fall and spring. Up to 4 credits. Prerequisites: knowledge of Greek and permission of instructor. T. Irwin, C. Brittain. Readings of Greek philosophical texts in the original.

CLASS 545 Graduate TA Training
Fall and spring. 1 credit. H. Pelliccia and D. Shanzer. Pedagogical instruction and course coordination. Required for all graduate student teachers of CLASS (Latin) 105–106 and Classics First-Year Writing Seminars.

CLASS 555 Graduate Proseminar
Fall. 1 credit. Not offered 2001–2002. Staff. Graduate students are introduced to the tools, techniques, and methods of classical scholarship.

CLASS 605-606 Graduate Survey of Greek Literature
605, fall; 606, spring. 4 credits each term. Prerequisite: linguistic proficiency to be determined by instructor. J. Rife. A survey of Greek literature in two semesters. CLASS 605: Greek literature from Homer to the mid-fifth century. H. Pelliccia. CLASS 606: Greek literature from the late fifth century to the Empire.

CLASS 632 Topics in Ancient History (also CLASS 450 and HIST 450/630)
Fall. 4 credits. Not offered 2001–2002. B. Strauss. For description, see HIST 630.

CLASS 671 Graduate Seminar in Greek: The Pre-Socratics (also PHIL 619)
Fall. 4 credits. D. Sedley. The philosophical positions and arguments of the major fifth-century BC pre-Socratic thinkers, from Heraclitus to Democritus.

CLASS 672 Graduate Seminar in Greek: Hesiod
Spring. 4 credits. P. Pucci.

CLASS 701-702 Independent Study for Graduate Students in Greek
701, fall; 702, spring. Up to 4 credits.
ARTS AND SCIENCES - 2001-2002

[CLASS 240 Plautus # (IV)
4 credits. Prerequisite: at least one 300-level Latin course or permission of instructor. Not offered 2001–2002.
A. Nussbaum.]

[CLASS 441 Advanced Latin Prose Composition
Spring. 4 credits. For graduate students. Only those undergraduates who have completed CLASS 341 and have permission of the instructor may enroll. Not offered 2001–2002. Staff.]

[CLASS 555 Graduate Proseminar
Fall. 1 credit. Not offered 2001–2002. Staff. Graduate students are introduced to the tools, techniques, and methods of Classical scholarship.]

[CLASS 602 Later Latin Literature: Late Antique and Medieval Magiography
D. Shazer.]

[CLASS 625-626 Graduate Survey of Latin Literature
625 fall; 626 spring. 4 credits each term. Prerequisite: linguistic proficiency to be determined by instructor. Not offered 2001–2002.
A survey of Latin literature in two semesters. 625: Latin poetry from its beginnings to the early Empire. 626: Latin literature of the Empire.]

CLASS 679 Graduate Seminar in Latin: The Flavians
Fall. 4 credits. P. Ahl.

CLASS 680 Graduate Seminar in Latin
Spring. 4 credits. Not offered spring 2002.

CLASS 751-752 Independent Study for Graduate Students in Latin
751: fall; 752: spring. Up to 4 credits.

Classical Art and Archaeology

CLASS 220 Introduction to Art History: The Classical World (also ART H 220) # (IV)
Spring. 4 credits. A. Ramage.
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the late empire and early Christianity. An introduction to the social, cultural, economic, and religious contexts of classical art in the ancient Mediterranean. Discussion of critical methods, formal analyses, and practical techniques of art historians and classical archaeologists.

CLASS 221 Minoan-Mycenaean Art and Archaeology (also ARKEO 221 and ART H 221) # (IV)
J. Coleman.
The birth of civilization in Greece and the Aegean islands during the Bronze Age. The main focus is on the rise and fall of Minoan Crete and Mycenaean Greece, with consideration given to the nature and significance of Aegean interactions with Egypt, the Near East, and Anatolia.

CLASS 232 Archaeology in Action I (also ARKEO 232 and ART H 224) # (IV)
3 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
P. I. Kuniholm.

CLASS 233 Archaeology in Action II (also ARKEO 233 and ART H 225) # (IV)
3 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
P. I. Kuniholm.

CLASS 256 Practical Archaeology (also ARKEO 256) (III or IV)
J. Coleman.
An introduction to the aims and methods of field archaeology. Topics covered include: remote sensing (satellite images and aerial photos); surface survey, subsurface investigations by magnetometer, ground penetrating radar, etc.; the layout and development of a land excavation, underwater excavations; the collection, description, illustration, and analysis of artifacts and data, such as pottery, lichics, botanical samples, and radiocarbon samples. Hands-on experience with potsherds and other artifacts from prehistoric and Classical Greece and Cyprus in the university’s collections is required to prepare students for work in the field.

CLASS 309 Dendrochronology of the Aegean (also ARKEO 309 and ART H 309) # (III or IV)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Letter grade only. Limited to 10 students.
P. I. Kuniholm.
For description, see ART H 309.

CLASS 319 Art in the Daily Life of Greece and Rome (also ART H 319) # (IV)
Spring. 4 credits. A. Ramage.
For description, see ART H 319.

CLASS 320 The Archaeology of Classical Greece (also ART H 320) # (IV)
A. Ramage.

CLASS 321 Mycenae and Homer (also ARKEO 321 and ART H 321) # (IV)
Fall. 4 credits. Prerequisite: at least 1 previous course in archaeology, classics, or history of art. Not offered 2001–2002.
J. Coleman.
Study of the relationship between the Mycenaean period of Greece (known primarily from archaeology) and the Homeric Iliad and Odyssey. Topics include Mycenaean architecture, burial customs, kingship, and military activities; the reasons for the collapse of the Bronze Age palatial economies; the archaeological evidence for society in the “Dark Ages” that followed; the writing systems of Mycenaean Greece (Linear B) and the Iron Age (the Semitic/Greek alphabet); the nature of the Homeric poems and their value as historical sources.

CLASS 322 Greeks and Barbarians (also ART H 328) # (IV)
Fall. 4 credits. Prerequisite: CLASS 220 or 221, or permission of instructor. Not offered 2001–2002.
J. Coleman.
A study of the archaeological and other evidence for the interaction between Greek civilization and the peoples of the eastern and western Mediterranean from the thirteenth to the fourth centuries B.C.E. The course focuses on Greek relationships with Egypt, Phoenicia, Cyprus, Anatolia, and Italy in the post-Bronze Age period.

CLASS 323 Painting in the Greek and Roman World (also ART H 323) # (IV)
A. Ramage.

CLASS 325 Greek Vase Painting (also ART H 325) # (IV)
A. Ramage.
For description, see ART H 325.

CLASS 327 Greek and Roman Coins (also ART H 327) # (IV)
A. Ramage.
For description, see ART H 327.

CLASS 329 Greek Sculpture (also ART H 329) # (IV)
A. Coleman.
An examination of ancient Greek sculpture, both three-dimensional and two-dimensional, from the Archaic to the Hellenistic period. Aspects of the works studied include: technological advances, changing ideology of the sculptors, regionalism of styles, and taste of individual patrons.

CLASS 350 Arts of the Roman Empire (also ART H 332) # (IV)
A. Ramage.
For description, see ART H 332.

CLASS 357-358 Independent Study in Classical Archaeology, Undergraduate Level
357, fall; 358, spring. Up to 4 credits.

CLASS 423 Ceramics (also ARKEO 423 and ART H 423) # (IV)
A. Ramage.
For description, see ART H 423.

CLASS 430 Seminar on the Bronze Age Architecture of Asia Minor (also ARKEO 425 and ART H 425) # (IV)
P. I. Kuniholm.
For description, see ART H 425.

CLASS 432 Sardis and the Cities of Asia Minor (also ARKEO 432 and ART H 424) # (IV)
A. Ramage.
For description, see ART H 424.

CLASS 434 The Rise of Classical Greece (also ARKEO 434 and ART H 434) # (IV)
Spring. 4 credits. Recommended: CLASS 220 or 221, ART H 220 or 221, or permission of instructor. P. I. Kuniholm.
For description, see ART H 434.

CLASS 435 Seminar on Roman Art and Archaeology (also ARKEO 435 and ART H 427) # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 427.

Greek and Latin Linguistics

[CLASS 421 Greek Comparative Grammar (also LING 451) (III)
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.]

[CLASS 422 Latin Comparative Grammar (also LING 452) (III)
4 credits. Prerequisite: thorough familiarity with the morphology of classical Latin. A. Nussbaum.
The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.]

[CLASS 424 Italic Dialects (also LING 454) (III)

[CLASS 425 Greek Dialects (also LING 455) (III)

[CLASS 426 Archaic Latin (also LING 456) (III)
Spring. 4 credits. Prerequisite: reading knowledge of Latin. A. Nussbaum.
Reading of epigraphic and literary pre-Classical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language.]

[CLASS 427 Homeric Philology (also LING 457) (III)
The language of the Homeric epics: dialect background, archaism, modernizations. The notion of a Kunstrspreche: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.]

[CLASS 429 Mycenaean Greek (also LING 459) (III)

Sanskrit

[CLASS 131-132 Elementary Sanskrit (also LING 131-132 and SANSK 131-132)
131, fall; 132, spring. 4 credits each term. CLASS 132 provides language proficiency.

An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

[CLASS 251-252 Intermediate Sanskrit (also LING 251-252 and SANSK 251-252) @ (IV)
251, fall; 252, spring. 3 credits each term. CLASS 251 provides language proficiency.

Readings from the literature of Classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics, and from either Sanskrit story literature or from Sanskrit dramas.]

[CLASS 403-404 Independent Study in Sanskrit, Undergraduate Level
403, fall; 404, spring. Up to 4 credits.

C. Minkowski.

[CLASS 703-704 Independent Study for Graduate Students in Sanskrit
703, fall; 704, spring. Up to 4 credits.

C. Minkowski.

Also see CLASS 291, 390, and 395 (Classical Civilization listings).

Honors Courses

[CLASS 472 Honors Course: Senior Essay
Fall and spring. 8 credits. An adviser must be chosen by the end of the student's sixth semester. Topics must be approved by the Standing Committee on Honors by the beginning of the seventh semester. See "Honors." Classics front matter.

COMPARATIVE LITERATURE

N. Saccamano, chairman (247 Goldwin Smith), W. J. Kennedy (fall), C. Chase (spring), director of Undergraduate Studies, (247 Goldwin Smith); C. Carmichael (fall), N. Melas (spring), director of Graduate Studies (247 Goldwin Smith); A. Adams, F. Ahl, C. Arroyo, A. Caputi (Emeritus), C. Carmichael,

The Department of Comparative Literature provides a broad range of courses in the ancient world as well as non-European literature. Courses stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, reconstruction, cultural criticism, Marxism, reception aesthetics, feminism, and psychoanalysis.

The Major

The major enables students to develop an integrated knowledge of Western literature, to strengthen their reading and writing abilities, and to prepare for careers demanding analytical, interpretive, and evaluative skills. Prospective majors should consult with the director of undergraduate studies. After declaring a major, a student chooses an adviser from the department's faculty. The requirements for the major are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests. The specific contours of such a program are worked out in consultation with the student's adviser.

Requirements for the Major

1) Five courses in Comparative Literature at the 300 level and above, including the core course listed below. A student may include up to two literature courses from other departments.

2) One core course in Comparative Literature (for 2001–2002 COM L 365 [fall]), COM L 370 [spring], to be taken by all majors in their junior or senior year. At the discretion of the department, students may enroll in core courses in both their junior and senior years.

3) Five courses in literature and other areas of the humanities at the 200 or higher level, to be taken in one or more foreign literature departments. Texts must be read in the original language. A student may offer one language course (conversation, composition, etc.) towards fulfilling the language requirement.

4) An honor's essay (COM L 493) of roughly 50 pages is now optional. It is to be written during the senior year under the direction of a faculty member, preferably from within the department, who has agreed to work in close cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year. In lieu of a Senior Honors Essay, students may take one course at the 400-600 level.
The department also encourages:

1) a program that includes broad historical coverage (e.g., COM L 201-202: Great Books); intensive study of a single genre (e.g., COM L 563-564: The European Novel, COM L 565: Contemporary Fiction); analysis of problems in literary theory (e.g., COM L 502: Literature and Theory). The department also offers a number of strongly recommended 200-level courses designed to acquaint undergraduates with the discipline: COM L 203: "introduction to Comparative Literature," as well as broadening introductory courses in World Fiction (COM L 204) and Introduction to Literary Criticism (COM L 206).

Honors

A student who completes the requirements for the major is eligible for the degree of Bachelor of Arts with honors in comparative literature.

The department bases its decision on the students achieving grades of at least B+ on the senior essay, in course work for the major, and in their overall academic performance at Cornell.

First-Year Writing Seminars

Most 100-level courses may be used toward satisfying the freshman writing seminar requirements. See "John S. Knight Institute for Writing in the Disciplines" for a full description of the first-year seminar program.

Courses

COM L 201 Great Books # (IV)

Fall. 4 credits. COM L 201 and 202 may be taken independently of each other.

S. Donatelli.

A reading each semester of seminal texts that represent and have shaped Western culture and hence form an essential part of the student's intellectual equipment. By analyzing, interpreting, and evaluating, students develop critical reading abilities. Selections from the Bible, Homer, Dante, Rabelais, Shakespeare, and others.

COM L 202 Great Books (IV)

Spring. 4 credits. N. Melas.

World literature of the last 300 years, emphasizing the response to European worldwide expansion first in the colonizing countries, then in the colonized. A central concern is the globalization of European literary forms. Readings likely to include selections from Camoens, Shakespeare, Behn, Voltaire, Melville, Conrad, Tagore, Lu Hsun, Borges, Cesaire, Mahfouz, Soyinka, Erichi, Erdrich, and others as well as selected lyric poets.

COM L 203 Introduction to Comparative Literature (also ASIAN 203) (IV)

Fall. 4 credits. W. J. Kennedy and E. Rosenberg.

The course is intended to answer the question persistently asked by undergraduates: "What is comparative literature, anyway?" The format of the course is designed to acquaint students with the range and variety of the field by having members of the department present those aspects which reflect their areas of expertise and their methods of teaching. Of the two meetings each week, the first generally takes the form of a lecture; the second is a discussion of the assigned text.

Texts and topics range from the naturalism of Thomas Mann and the word play of James Joyce, to post-modern critical theory.

COM L 204 Global Fictions (also ASIAN 204) (IV)

COM L 206 Introduction to Literary Criticism (IV)

Fall. 4 credits. J. Stark.

More advanced undergraduates with the discipline.

COM L 207 Shakespeare and the Twentieth Century (also ENGL 208) (IV)

Spring. 4 credits. W. J. Kennedy.

What is the relationship between the plays of Shakespeare in their own time and the various ways they have functioned in modern culture?

We compare selected works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The course is intended to offer sophomores with the range and variety of the field by having members of the department present those aspects which reflect their areas of expertise and their methods of teaching. Of the two meetings each week, the first generally takes the form of a lecture; the second is a discussion of the assigned text.

The course is intended to offer sophomores with the range and variety of the field by having members of the department present those aspects which reflect their areas of expertise and their methods of teaching. Of the two meetings each week, the first generally takes the form of a lecture; the second is a discussion of the assigned text.
What is the relationship between the diverse pleasures we experience in poetry and contemporary ethical concerns? In what ways does poetry encourage us to understand and engage, in particular, questions of difference and otherness? By exploring these and related questions, this course begins with a constellation of influential examples from poetry of the past two centuries, then moves to recent discussions from a cross-section of fields including anthropology, philosophy, linguistics, and cultural studies. The latter half of the course explores the role such questions have played across a range of contemporary poetic practices within the United States and abroad over the past two decades, with particular emphasis on the period since 1989. Readings include works by Edgar Allen Poe, Gertrude Stein, André Breton, Andreï Rich, June Jordan, Kamau Brathwaite, Aimé Césaire, Hans Magnus Enzensberger, Joy Harjo, Rosmarie Waldrop, Charles Bernstein, Michael Palmer, Leslie Scalapino, and Susan Howe.

**COM L 233 Greek Mythology (also CLASS 336)** (IV)

Fall. 3 credits. Limited to 200. D. Mankin.

For description, see CLASS 236.

**COM L 239 Cultural History of the Jews of Spain (also NSES 239, JWST 239, RELST 239 and SPAN L 239)** (IV)

Spring. 3 credits. Staff.

See NSES 239 for a full course description.

**COM L 256 Introduction to the Qur'an (NSES 256, RELST 213, JWST 256)** (IV)

Spring. 3 credits. S. Toorawa.

See NSES 256 for a full course description.

**COM L 302 Literature and Theory (also COM L 622 and ENGL 302/602)** (IV)

Fall. 4 credits. J. Culler.

Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings from Barthes, Derrida, Foucault, J. Butler, B. Johnson, and others. No previous knowledge of literary theory is assumed.

**COM L 304 Europe and Its Others: An Introduction to the Literature of Colonialism** (IV)

Through an examination of selected works from the early twentieth century to the present from France, England, Africa, and the Caribbean, this course provides an introduction to the literature written alongside and against the historical phenomenon that has arguably had the most far-reaching impact in modern history: European colonialism. How was culture instrumental in the political project of domination? How have writers of the postcolonial period attempted to write back? What problems and possibilities does colonialism present for cultural identity and cultural resistance? In addition to a close reading of texts and a consideration of historical background we also examine visual representations of colonialism, particularly film. Authors include Conrad, Ngugi, Nandy, Condé, Duras, Salih, Fanon, Memmi, Djebar, Resnais, and Pontecorvo. All readings available in English.

**COM L 311 Modern European Literature and Culture (also FRLIT 315)** (IV)

We concern ourselves with European culture as embracing regions from Russia to the Atlantic Ocean, not as divided into Western, Eastern, or Central. European culture crosses the old East-West political boundaries. Case studies: Ireland, France, Czech Republic, Russia.

This course is designed for those interested both in the artistic, imaginative side of European literature and in the ways in which culture expresses some of the most significant concerns of our age. The conceptual links include issues of national identity and social justice, as well as concerns of private emotions and individual personality. Popular culture, film, TV, and theatre are integrated with the reading and class discussion. Some authors who are read: Flaubert, Charlotte Bronte (Violette), Karl Marx, Dostoivsky, Mayakovsky, Yeats, Malraux, Camus, Joyce, Solzhenitsyn, Kundera, and others.

**COM L 326 Christianity and Judaism (also RELST 326)** (IV)

**COM L 328 Literature of the Old Testament (also RELST 328)** (IV)

Fall. 4 credits. C. M. Carmichael.

Analysis of small sections of well-known material for in-depth discussion.

**COM L 330 Political Theory and Cinema (also GERST 330, GOVT 370, THETR 329)** (III or IV)

Fall. 4 credits. G. Waite.

See GERST 330 for full course description.

**COM L 332 Dostoievsky (also RUSSL 369)** (IV)

Spring. 4 credits. P. Carden.

See RUSSL 369 for full course description.

**COM L 334 Islamic Spain: Culture and Society (also NSES 339, JWST 339, SPANL 339)** (IV)

Fall. 4 credits. R. Brann.

See NSES 339 for full course description.

**COM L 335 Modern Western Drama, Modern Western Theater: Theory and Practice (also THETR 335)** (IV)

Fall. 4 credits. R. Schneider.

See THETR 335 for full course description.

**COM L 343 Contemporary Mass Culture in Japan and in the U.S. (also ASIAN 363)** (IV)

For description, please see ASIAN 363.

**COM L 344 Tragic Theatre (also CLASS 345)** (IV)

For course description, please see CLASS 345.

**COM L 353 European Cultural History 1870–1945 (also Hist 363)** (III or IV)

Spring. 4 credits. M. Steinberg.

See HIST 363 for full course description.

**COM L 356 Renaissance Literature** (IV)

Spring. 4 credits. W. J. Kennedy.

An introduction to Renaissance literary texts with some attention to cultural backgrounds and intellectual history. Readings from Machiavelli, Erasmus, Rabelais, Shakespeare, Cervantes, and others.

**COM L 362 The Culture of the Renaissance II (also ENGL 325, HIST 364, MUSIC 390, ART H 351 and RELST 362)** (III or IV)

Members of various departments lecture on Luther, Michelangelo, Edmond Spenser, Cervantes, Copernicus, Galileo, and Monteverdi.

**COM L 363 The European Novel** (IV)

Fall. 4 credits. J. Stark.

This course examines the history of the European novel and its forms of representing reality. We study how the structure and themes of the novel emerged against a background of radical social, economic, and political upheavals that held profound consequences for Western conceptions of culture, selfhood, and history. How do novels reflect the world? What can they tell us about structures of knowing and understanding? How do novels interact with the worlds of their readers? To address these questions, detailed analysis of formal and aesthetic issues is combined with discussion of the historical and cultural contexts of the works studied. Readings (in English translation) include novels by Cervantes, Diderot, Stendhal, Flaubert, Dostoievsky, Kafka, Woolf, and Calvino.

**COM L 364 The European Novel IV** (IV)

Spring. 4 credits. E. Rosenberg.

Close readings of some eight texts which essentially chart the history of nineteenth and twentieth-century fiction. Readings from among the following: Austen, Persuasion, Balzac, Old Goriot or Eugene Grandet, Dickens, Oliver Twist, Flaubert, Madame Bovary, Tolstoy, Death of Ivan Ilyich and Master and Man; Mann, Death in Venice, and Mario and the Magician; Gide, The Immoralist, Kafka, The Metamorphosis; Woolf, Mrs. Dalloway, Nabokov, Lolita or Pale Fire. All texts read in English; students who command the pertinent foreign language may, of course, read the books in the original.

**COM L 365 Contemporary Fiction** (IV)

Fall. 4 credits. Limited to 15 students. Core course for majors. B. Maxwell.

A study of European fiction and drama largely drawing on texts from the first half of the twentieth century. We pay particular attention to the making of literary characters; to traces of utopian and messianic elements; to the relations between memory and political revolution; and to the motive of resentment. Readings (in translation) chosen from the following: Robert Walser, Struwwelpeter and The Walk; Franz Kafka, The Trial; Thomas Mann, Death in Venice; Bertolt Brecht, The Rise and Fall of the City of Mahagonny; Joseph Roth, Hotel Savoy; Alfred Doblin, Berlin Alexanderplatz; Christa Wolf, The Quest for Christa T.; Louis Aragon, Paris Peasant; Louis-Ferdinand Céline, Death on the Installment Plan; Elio Vittorini, In Sicily; Natalia Ginzburg, stories; and Isaac Babel, stories. Collateral theoretical readings by Georg Lukacs, Ernst Bloch, Bertolt Brecht, Walter Benjamin.
COM L 367 The Russian Novel (also RUSS 367) (IV)
Fall. 4 credits. N. Pollack.
See RUSSL 367 for a full course description.

COM L 370 Literature and Ethics (IV)
Spring. 4 credits. Limited to 15 students.
Core course for majors. J. Stark.
Recent literary criticism has renewed the
fraught question of how literature relates to
ethics. This question arises most dramatically
when incompatible modes of interpreting or
representing experience confront each other
and consequently destabilize accepted
definitions of the law, of moral value, and of
historical truth. In this course, we encounter a
range of paradigmatic scenes that compel
ethical reflection, touching on rituals of
mourning, social cooperation and rebellion,
and specific traumatic histories. We ask how
fiction can foster responsibility to one's
literature in writings by, among others, Sartre,
Adorno, and Blanchot. Students may read
texts in the original language or in English
translation.

COM L 382 Greeks, Romans, and
Victorians (also CLASS 382) (IV)
Spring. 4 credits. F. Ahl.
See CLASS 382 for full course description.

COM L 404 History into Fiction: Nazis
and the Literary Imagination (also
JEWST 414, ENGL 404 and GERST 414) (IV)
Fall. 4 credits. Limited to 15. E. Rosenberg.
See ENGL 404 for a full course description.

[COM L 413 Death, Culture, and the
Literary Monument (IV)
N. Melas.
Beginning with Homer's Iliad, this course
explores how the monumental transformation
into death into immortality in the literary
composition. How do death's negations become fiction's triumph? We pay particular
attention to the fate of this procedure when its
subjects are no longer heroic warriors but
slaves and women. How do colonial
domination and gender difference alter the
aesthetic procedures and assumptions
underlying commemoration and literary
immortality? In addition to death and
language, we consider such themes as the
relation of antiquity to the present, of identity
to its dissolution and of politics to culture.
Readings of literary texts drawn from a variety of
languages and traditions are attended by
selected readings in critical theory and a
glimpse at visual culture, particularly surrounding
monuments commemorating the emancipa-
tion of slaves and the Holocaust. Authors
include Homer, Derek Walcott, Simone
Schwartz-Bart, Virginia Woolf, Krista Wolf,
Tayeb Salih, Maurice Blanchot, Hegel,
Orlando Patterson, and Walter Benjamin.]

COM L 417 Faust (also GERST 417) (IV)
Spring. 4 credits. H. Deinert.
See GERST 417 for a full course description.

COM L 418 Virtual Orientalisms (also
ASIAN 415) (IV)
Fall. 4 credits. Limited to 25 students.
B. delarry.
See ASIAN 415 for a full course description.

COM L 419–420 Independent Study
Fall, 420, spring. Variable credit.
COM L 419 and 420 may be taken
independent of each other. Applications
available in 247 G.S.

[COM L 428 New Testament Seminar
(also RELST 428) (IV)
Fall. 4 credits. Limited to 20 students. Next
Identification and discussion of problems in
the New Testament.

COM L 428 Biblical Seminar (also RELST
427) (IV)
Fall. 4 credits. C. Carmichael.
We discuss attitudes to sexuality in the Bible.
In Old and New Testament texts we examine
the clash between ancestral behavior and
subsequent laws and between legal and
religious ideas. Topics include: marriage
and divorce, incest, intermarriage, gender
discrimination, guilt and shame, homosexuals-
ity, women and purity, sexual language, and
symbols.

COM L 432 Racial Democracy in the
Americas (also S HUM 418) (IV)
Spring. 4 credits. Z. Nunes.
See for S HUM 418 for full course description.

COM L 442 Spinoza and New Spinozism
(also GERST 409) (IV)
Spring. 4 credits. G. Waite.
See GERST 409 for a full course description.

COM L 448 Translation for the Theatre
(also THETR 423/623, COM L 646) (IV)
Spring. 4 credits. J. E. Gainor.
See THETR 423 for full course description.

[COM L 450 Renaissance Poetry (also
COM L 650, ENGL 622, ITALL 450/
650) (IV)
W. J. Kennedy.
A reading and discussion of key texts in lyric
poetry from Italian, French, English, and other
European literatures of the Renaissance.]

[COM L 451 Renaissance Narrative (IV)
W. J. Kennedy.
A reading and discussion of key texts in
narrative epic and chivalric romance from
Italian, French, English, and other European
literatures of the Renaissance.]

COM L 452 Renaissance Humanism (also
COM L 652) (IV)
Fall. 4 credits. Enrollment limited to 15.
W. J. Kennedy.
A reading and discussion of key texts by
Renaissance humanists in Italian, French,
English and other European literatures from
the fourteenth to seventeenth centuries.

COM L 459 Opera, History, Politics,
Gender (also HIST 456, WOMNS 454,
S HUM 459, MUSIC 474, ITALL
4561) (IV)
Spring. 4 credits. M. Steinberg, S. Stewart.
See HIST 456 for full course description.

COM L 461 Art and Social Histories
(ART H 461) (IV)
Spring. 4 credits. L. Meixner.
See ART H 461 for a full course description.

[COM L 467 Poetry and Rhetoric (also
COM L 667, ENGL 483/683, FRLIT
437/637) (IV)
C. Chase.
In present-day common usage, "poetry"
means emotion or beauty, and "rhetoric"
means deceptive, decorative language. These
incompatible meanings cover over a history of
close connection between poetry and rhetoric.
Historically, if poetry and rhetoric at times have been seen as opposite, incompatible
kinds of language, they also have been identified with each other and strongly
distinguished from philosophy and science.
Where rhetoric belongs turns out to raise
issues of politics and philosophy not only of
literary history and language. Such questions
and issues have been intensely pursued in
modern poetry beginning with the Romantics.
In this course we read poetry and criticism or "theory" that explore what it means for
language to be rhetorical. Readings from
Aristotle, Shakespeare, Marvell, Coleridge,
Wordsworth, Mallarme, Rilke, Valery, Wallace
Stevens, Jean Paulhan, Gerard Genette,
Derrida, de Man, Judith Butler. Two
papers (one short, one longer) required.
Reading knowledge of French and or German
recommended but not required.]

COM L 474 Topics in Modern European
Intellectual and Cultural History
(also HIST 474/673, JWST 474) (III
or IV)
Fall. 4 credits. D. LaCapra.
See HIST 474 for a full course description.

COM L 480 Baudelaire in Context (also
COM L 680, FRLIT 488/688) (IV)
Spring. 4 credits. Prequisite: reading
knowledge of French required. J. Culler.
A reading of Les Fleurs du Mal and Les Petits
poemes en prose, in conjunction with major
twentieth-century critical treatments of them,
so as to grasp what has been at stake in
discussions of Baudelaire. Critics to be read
include Benjamin, Bersani, de Man, Friedrich,
Jakobson, Jauss, Johnson, and Sartre.]

[COM L 482 Latin American Women
Writers (also SPANL 492, WOMNS
481) (IV)
R. Resina.
See SPANL 492 for a full course description.

COM L 483 Imagining the Holocaust
(also ENGL 458/650, JWST 458/658,
COM L 683, GERST 483) (IV)
Spring. 4 credits. R. Schwartz.
See ENGL 458 for a full course description.

COM L 484 Nationalism and Literature
(also SPANL 484) (IV)
Spring. 4 credits. T. McNulty.
See SPANL 484 for full course description.

COM L 488 Biblical Diasporas in France
(also S HUM 406) (IV)
Fall. 4 credits. Limited to 15 students.
Prerequisite: permission of instructor.
T. McNulty.
See S HUM 406 for full course description.

COM L 493 Senior Essay
Fall and spring. 8 credits.
Hours with the student individually in consultation with
the director of the Senior Essay Colloquium.
Approximately 50 pages to be written over the
course of two semesters in the student's senior
year under the direction of the student's
derived. An "R" grade is assigned on the basis of
research and a preliminary draft completed
in the first semester. A letter grade is awarded on completion of the second semester.

COM L 495 The Cultural Theory of the Frankfurt School (also GERST 495, GOVT 471) (III or IV)
P. Holordinie.
See GERST 495 for a full course description.

COM L 496 Theorizing the Public Sphere (also GERST 496) (IV)
Fall. 4 credits. P. Holordinie.
See GERST 496 for full course description.

COM L 499 Seasons of Migration (also S HUM 409/499)
Fall. 4 credits. S. Toorawava.
See S HUM 409 for full course description.

COM L 604 Translation and the Global Marketplace
N. Melas.

COM L 609 Comparison and Cultural Difference
N. Melas.

This course is a wide-ranging investigation of the pitfalls and possibilities for cross-cultural comparison. We examine the structure and mechanisms of comparison, both as a disciplinary method and as a concept or practice: to what extent and in what circumstance can comparison produce cultural difference, consolidate it, dissolve it, erect borders, inhabit borderlands, propose a global ecumene? With particular attention to colonialism and globalization, we inquire into the relation between various modes of comparison and broader contexts and ideologies. Though focused on the humanities and on theoretical texts, readings include incursions into the social sciences and selected poetry and film. Authors may include Lyotard, Foucault, Fanon, Gilroy, Clifford, Appadurai, Bhabha, Lanser, Kinaid, and Walcott.

COM L 610 Modern Japanese Studies: The Formation of the Field in History and Literature (also ASIAN 609)
B. deBary, N. Sakai, J. Koschmanin.
See ASIAN 609 for a full course description.

COM L 619–620 Independent Study
619, fall; 620, spring. Variable credit.
COM L 619 and 620 may be taken independently of each other. Applications available in 247 G.S.

COM L 622 Literature and Theory (also COM L 302 and ENGL 302/602)
Fall. 4 credits. J. Culler.
See COM L 302 for a full course description.

COM L 630 Aesthetics in the Eighteenth Century (also ENGL 630)
N. Saccamano.
See ENGL 630 for a full course description.

COM L 631 Politics and the Passions: Hobbes to Rousseau (also ENGL 631)
Spring. 4 credits. N. Saccamano.
See ENGL 631 for full course description.

COM L 646 Translation for the Theatre (also THETR 423/623, COM L 446)
Spring. 4 credits. J. E. Gainor.
See THETR 623 for full course description.

COM L 650 Renaissance Poetry (also COM L 450, ENGL 622, ITALL 450/650)
W. J. Kennedy.
See COM L 450 for a full course description.

COM L 652 Renaissance Humanism (also COM L 452)
Fall. 4 credits. W. J. Kennedy.

COM L 656 Aesthetic Theory: End of Art (also GERST 656)
Fall. 4 credits. P. Gilgen.
See GERST 656 for full course description.

COM L 661 The Gay Critic (also GERST 641)
Fall. 4 credits. P. Reberg.
See GERST 641 for full course description.

COM L 665 The Literature of Empire in the Renaissance (also ENGL 626)
Spring. 4 credits. W. Cohen.

Lightly responsive to the first age of European globalization—its effect on the context of the category of the Renaissance and the ongoing process of the self-definition of European literature and Western civilization. Emphasis on the interplay between Mediterranean and oceanic imperialism, and on the relationship between ideology and literary form. Readings from lyric poetry, Ariosto, Bacon, Camoës, Campanella, Marlowe, Montaigne, More, Rabelais, Shakespeare, Spenser, Tasso, and especially Cervantes. Readings available in English.

COM L 667 Poetry and Rhetoric (also COM L 467, ENGL 4483/663, FRLIT 437/637)
C. Chase.
See COM L 467 for a full course description.

COM L 671 Transnational Imaginaries: Globalization and Culture
Spring. 4 credits. Limited to 15 students, advanced undergraduates and graduates.
N. Melas.

The term 'globalization' has become ubiquitous in recent years as the primary conceptual frame and material basis for understanding contemporary transnationalism. It evokes a brave new borderless world in which politics, culture and social formations are no longer necessarily congruent with nor primarily beholden to national boundaries. It triumphantly or despairingly announces the end of history when space precedes time as the measure of human experience, and that experience exceeds the grasp of modernity's autonomous subject. Globalization thus challenges many aspects of our experience of culture and history, and of the categories through which we apprehend and analyze it. This course provides an introduction to recent writings surrounding globalization in that shifting borderland between the humanities and the social sciences, while focussing on some theoretical implications rather than attempting a comprehensive survey. We dwell specifically on 1) analyzing the relation between the terms "postcolonial" and "global" in recent critical theory. To what extent does the "global" mark the end of the "postcolonial" in transnational relations, particularly between the so-called first and third worlds? 2) examining culture's relation to space, time and subjectivity in view of the "time-space compression" that underlies globalization. Readings are equally divided between critical expository texts and fictional texts (including both literature and film).

COM L 675 After the Divide: German Critical Theory of the Seventies and Eighties (also GERST 675 and HIST 675)
P. Holordinie.
See GERST 675 for a full course description.

COM L 680 Baudelaire in Context (also COM L 480, FRLIT 488/688)
Spring. 4 credits. J. Culler.
For course description, please see COM L 480.

COM L 683 Imagining the Holocaust (also COM L 483, ENGL 455/658, JWST 459/658, GERST 483)
Spring. 4 credits. D. Schwarz.
For description, please see ENGL 458.

COM L 688 Postcolonial Theory and German Studies (also GERST 671)
Spring. 4 credits. L. Adelson.
See GERST 671 for full course description.

COM L 689 Adorno's Aesthetic Theory (also GERST 689)
P. Holordinie.
See GERST 689 for a full course description.

COM L 695 Post-Modern Thought and Area Studies (also JPLIT 614)
B. deBary.
See JPLIT 614 for a full course description.

COMPUTER SCIENCE

The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college may major in computer science. For details, visit our web site at www.cs.cornell.edu/ugrad

The Major

CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:

- four semesters of calculus (MATH 111–122 (or 112–221–222 or 191–192–293–294)
- two semesters of introductory computer programming (COM S 100 and 211)
- a one-credit project (COM S 212)
• a seven-course computer science core (COM S 280, 312, 314, 321 or 322 or 421, 381, 414, and 482)
• two 400+ computer science electives, totaling at least six credits
• a computer science project course (COM S 413, 415, 418, 433, 473, 501, 514, 519, or 664)
• a mathematical elective course (OR&IE 270, MATH 300+, T&AM 310, etc.)
• two 300+ courses that are technical in nature and total at least six credits
• a three-course specialization in a topic area other than computer science. These courses must be numbered 300 level or greater.

Note: All of the field electives described above must be courses of three or more credit hours with the exception of the COM S project course, which may be two credits.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the adviser, the computer science major is expected to put together a coherent program of study that supports career objectives and is true to the aims of liberal education.

Admission
All potential affiliates are reviewed on a case-by-case basis relative to the following criteria:

1) Completion of MATH 293 (or MATH 221), COM S 211, COM S 212*, and COM S 280.
2) A grade of C or better in all required COM S courses, excluding COM S 100, with the overall average of these courses being not less than 2.7.
3) A grade of C or better in all required math courses, with the overall average of these courses being not less than 2.7 (can include the math-related elective).
4) An overall GPA of not less than 2.0 (2.5 or better recommended).

If any courses are repeated, both grades will be counted in the averages used for admissions. Qualifying courses must be taken at Cornell.

Note: Students who do not meet these requirements are discouraged from attempting affiliation with the major. The COM S major can be exceptionally rigorous for students who are not suitably prepared for the academic requirements of the program and are unlikely to be admitted to the major if they do not meet the admissions standards listed above.

*COM S 212 required for class of 2004 and later.

Honors. To qualify for departmental honors a student must have:
• maintained a cumulative GPA greater than or equal to 3.5
• completed eight credit hours of COM S course work at or above the 500 level (graded courses only; no seminars or two-credit project courses)
• completed six credit hours of COM S 490 research with a COM S faculty member, spread over at least two semesters and with grades of A- or better.

Note: Honors courses may not be used to satisfy the COM S 400+ elective requirement, the COM S project requirement, the math elective, or the specialization. See the COM S undergraduate web site for more information on eligibility: www.cs.cornell.edu/ugrad.

Courses
For complete course descriptions, see the computer science listing in the College of Engineering section.

COM S 099 Fundamental Programming Concepts
Fall, summer. 2 credits. S-U grades only. No prerequisites. Freshman only.

COM S 100 Introduction to Computer Programming (I)
Fall, spring, summer. 4 credits. During the fall semester, two versions of COM S 100 (COM S 100M and COM S 100J) are available as described in the computer science listing in the College of Engineering.

COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, and PSYCH 102) (III)
Fall. 3 credits.

COM S 113 Introduction to C
Fall, spring. 1 credit. Usually weeks 1-4. Prerequisite: COM S 100 or equivalent programming experience. Credit is granted for both COM S 113 and 213 only if 113 is taken first. S-U grades only.

COM S 114 Unix Tools
Fall. 1 credit. Usually weeks 5-8. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.

COM S 130 Creating Web Documents
Fall. 3 credits. No prerequisites.

COM S 191 Media Arts Studio I (also ART 391, THETR 391)
Fall. 3 credits. Prerequisites: one of the following courses: ART 171, THETR 277, 377, MUSIC 120, or equivalent. Also must be a junior and have permission of instructor. Lab fee $50.

For description, see ART 391.

COM S 201 Cognitive Science in Context Laboratory (also COGST 201 and PSYCH 201) (III)
Fall or spring. 4 credits. Concurrent or prior registration in "Introduction to Cognitive Science" PSYCH 102/COGST 101/COM S 101/LING 170/PHIL 191 is suggested but not required. Knowledge of programming languages is not assumed. Limited to 24 students. Fall, B. Halpern and staff; spring, D. Field and staff.

COM S 202 Transition to Java
Fall, spring. 1 credit. Usually weeks 1-4. Prerequisite: one semester-long programming course.

COM S 211 Computers and Programming (also ENGRD 211) (II)
Fall, spring, summer. 3 credits. Prerequisite: COM S 100 or an equivalent course in Java or C++.

COM S 212 Java Practicum
Fall, spring. 1 credit. Letter grade only. Pre- or corequisite: COM S/ENG RD 211.

COM S 213 C++ Programming
Fall, spring. 2 credits. Prerequisite: COM S 100 or equivalent programming experience. Students who plan to take COM S 113 and 213 must take 113 first. S-U grades only.

COM S 220 Intermediate Web Design
Spring. 3 credits. Prerequisite: COM S 130. Not offered every year; may be offered spring 2002.

COM S 280 Discrete Structures
Fall, spring. 4 credits. Prerequisite: COM S 211 or permission of instructor.

COM S 312 Data Structures and Functional Programming (II)
Fall, spring. 4 credits. Prerequisite: COM S 211, COM S 312 or ENGRD 231/ECSE 232 recommended, but not required.

COM S 321 Numerical Methods in Computational Molecular Biology (also BIOMB 321 and ENGRD 321) (II)
Fall. 3 credits. Prerequisites: at least one course in calculus such as MATH 106, 111, or 191 and a course in linear algebra such as MATH 221 or 294 or BTBY 417. COM S 100 or equivalent and some familiarity with iteration, arrays, and procedures. COM S majors may use only one of the following toward their degree: COM S 321, 322, or 421.

COM S 322 Introduction to Scientific Computation (also ENGRD 322)
Spring, summer. 3 credits. Prerequisites: COM S 100 and (MATH 222 or 294). COM S majors may use only one of the following toward their degree: COM S 321, 322, or 421.

COM S 324 Computational Linguistics (also COGST 424, LING 424) (III)
Spring. 4 credits. Prerequisites: LING 203; Labs involve work in the UNIX environment; COM S 114 recommended. For description, see LING 424.

COM S 381 Introduction to Theory of Computing
Fall, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.

COM S 392 Topics in High-level Vision (also COGST 465, PSYCH 465) (III)
Spring. 4 credits. For description, see PSYCH 465.

[COM S 400 The Science of Programming (Spring. 4 credits. Prerequisite: COM S 280 or equivalent. Not offered every year; semester TBD)]
COM S 409 Data Structures and Algorithms for Computational Science
Spring. 4 credits. This course is not open to COM S majors. Prerequisite: COM S 211 or equivalent programming experience. Not offered every year.

COM S 411 Programming Languages and Logic
Fall. 4 credits. Prerequisites: COM S 312 or permission of instructor. Not offered every year; semester TBA.

COM S 412 Introduction to Compilers
Spring. 3 credits. Prerequisites: COM S 312 (or permission of instructor) and 314. Corequisite: COM S 413.

COM S 413 Practicum in Compilers
Spring. 2 credits. Corequisite: COM S 412. A compiler implementation project related to COM S 412.

COM S 414 Systems Programming and Operating Systems
Fall, spring, summer. 3 credits. Prerequisite: COM S 211, 212, 312 (or permission of instructor), and 314. Corequisite: COM S 415 in spring only.

COM S 415 Practicum in Operating Systems
Fall. 2 credits. Corequisite: COM S 414.

COM S 417 Computer Graphics and Visualization (also ARCH 374)
Spring. 3 credits. Prerequisite: COM S 211.

COM S 418 Practicum in Computer Graphics (also ARCH 375)

COM S 421 Numerical Analysis
Fall. 4 credits. Prerequisites: MATH 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming. COM S majors may use only one of the following toward their degree: COM S 321, 322, or 421.

COM S 430 Information Discovery
Spring. 3 credits. Prerequisite: COM S 211 or equivalent.

COM S 432 Introduction to Database Systems
Fall. 3 credits. Prerequisites: COM S 312 or 211, 212, and permission of instructor. Recommended: COM S 213 and strong programming skills in C or C++.

COM S 433 Practicum in Database Systems
Fall. 2 credits. Corequisite: COM S 432.

COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits. Prerequisites: COM S 211 and 280 (or equivalent).

COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits. Corequisite: COM S 472.

COM S 474 Introduction to Natural Language Processing (also COGST 474, LING 474)
Spring. 4 credits. Prerequisites: COM S 211.

COM S 478 Machine Learning
Spring. 4 credits. Prerequisites: COM S 280, 312, and basic knowledge of linear algebra and probability theory.

COM S 481 Introduction to Theory of Computing
Fall. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481. A faster-moving and deeper version of COM S 381. Corrective transfers between COM S 481 and 381 (in either direction) are encouraged during the first few weeks of instruction.

COM S 482 Introduction to Analysis of Algorithms
Spring, summer. 4 credits. Prerequisites: COM S 280, 312, and either 381 or 481, or permission of instructor.

COM S 483 Quantum Information Processing (also PHYS 481, 681)
Spring. 2 credits. Prerequisite: familiarity with the theory of vector spaces over the complex numbers.

COM S 486 Applied Logic (also MATH 486) (II)
Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, COM S 280 or equivalent (such as MATH 332, 432, 434, 481), and some course in mathematics or theoretical computer science.

COM S 490 Independent Reading and Research
Fall, spring. 1-4 credits.

COM S 501 Software Engineering
Spring. 4 credits. Prerequisite: COM S 211 or equivalent experience programming in Java or C++.

COM S 502 Computing Methods for Digital Libraries
Spring. 3 credits. Prerequisite: COM S 211 and some familiarity with the technology of web sites.

COM S 504 Applied Systems Engineering I (also CEE 504, ECE 512, M&AE 591, ORIE 512)
Fall. 3 credits. Prerequisite: permission of instructor. May not be used to fulfill the COM S 400+ electives.

COM S 505 Applied Systems Engineering II (also CEE 505, ECE 513, M&AE 592, OR&IE 513)
Spring. 3 credits. Prerequisite: Applied Systems Engineering I. May not be used to fulfill the COM S 400+ electives.

COM S 513 System Security
Spring. 4 credits. Prerequisites: COM S 414 or 519 and familiarity with JAVA programming language.

COM S 514 Intermediate Computer Systems
Fall or spring. 4 credits. Prerequisites: COM S 414 or permission of instructor.

COM S 515 Practicum in Systems
Fall or spring. 1-2 credits. Corequisite: COM S 514.

COM S 519 Computer Networks
Spring. 4 credits. Prerequisites: COM S 314 or permission of instructor. Not offered every year.

COM S 522 Computational Tools and Methods for Finance
Spring. 4 credits. Prerequisites: programming experience (e.g. C FORTRAN, or MATLAB) and some knowledge of numerical methods, especially numerical linear algebra. Not offered every year.

COM S 574 Heuristic Methods for Optimization (also CEE 509)
Spring. 3 or 4 credits. Prerequisite: COM S 412 or ENGRD 211 or 322 or CEE/ENGRD 241, or graduate standing, or permission of instructor. Not offered every year.

COM S 601 System Concepts
Fall. 3 credits. Prerequisite: open to students enrolled in the COM S Ph.D. program.

COM S 611 Advanced Programming Languages
Fall. 4 credits. Prerequisites: graduate standing or permission of instructor.

COM S 612 Compiler Design for High-Performance Architectures
Spring. 4 credits. Prerequisites: COM S 314 and 412 or permission of instructor.

COM S 613 Concurrent Programming
Spring. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered every year; semester TBA.

COM S 614 Advanced Systems
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

COM S 615 Adaptive Systems
Fall. 4 credits. Prerequisites: COM S 614 recommended.

COM S 621 Matrix Computations
Fall. 3 credits. Prerequisites: MATH 411 and 431 or permission of instructor.

COM S 622 Numerical Optimization and Nonlinear Algebraic Equations
Spring. 4 credits. Prerequisite: COM S 621. Offered in odd-numbered years.

COM S 624 Numerical Solution of Differential Equations
Spring. 4 credits. Prerequisite: previous exposure to numerical analysis (e.g. COM S 421 or 621) to differential equations, and knowledge of MATLAB. Offered in even-numbered years.

COM S 626 Computational Molecular Biology
Spring. 4 credits. Prerequisites: familiarity with linear programming, numerical solutions of ordinary differential equations and nonlinear optimization methods.

COM S 632 Advanced Database Systems
Spring. 4 credits. Prerequisite: COM S 432/435 or permission of instructor.

COM S 664 Machine Learning
Fall or spring. 4 credits. Prerequisites: undergraduate-level understanding of algorithms and MATH 221 or equivalent.

COM S 671 Introduction to Automated Reasoning
Fall. 4 credits. Prerequisite: COM S 611 and graduate standing or permission of instructor.
COM S 672  Advanced Artificial Intelligence
Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor.

COM S 674  Natural Language Processing
Spring. 3 credits. Prerequisites: COM S 472 or permission of instructor. Not offered every year; semester TBA.

COM S 676  Reasoning about Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in even-numbered years. Not offered 2001–2002.

COM S 677  Reasoning about Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in odd-numbered years. Not offered 2001–2002.

COM S 681  Analysis of Algorithms
Fall. 4 credits. Prerequisite: COM S 482 or graduate standing.

COM S 682  Theory of Computing
Spring. 4 credits. Prerequisite: (COM S 381 or 481) and (COM S 482 or 681) or permission of instructor.

COM S 683  Advanced Design and Analysis of Algorithms
Spring. 4 credits. Prerequisites: COM S 681 or permission of instructor.

COM S 684  Approximation and Network Algorithms
Fall. 4 credits. Prerequisites: COM S 681 or permission of instructor.

COM S 686  Logics of Programs
Spring. 4 credits. Prerequisites: COM S 481 or 682, and (MATH 481 or MATH/COM S 486).

COM S 709  Computer Science Colloquium
Fall, spring. 1 credit. S-U grades only. For staff, visitors, and graduate students interested in computer science.

COM S 713  Seminar in Systems and Methodology
Fall, spring. 4 credits. Prerequisites: a graduate course employing formal reasoning, such as COM S 611, 613, 671, a logic course, or permission of instructor. Not offered every year; semester TBA.

COM S 715  Seminar in Programming Refinement Logic
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 717  Topics in Parallel Architectures
Fall. 4 credits. Prerequisite: COM S 612 or permission of instructor. Not offered every year; semester TBA.

COM S 719  Seminar in Programming Languages
Fall, spring. 4 credits. Prerequisite: COM S 611 or permission of instructor. S-U grades only.

COM S 721  Topics in Numerical Analysis
Fall, spring. 4 credits. Prerequisite: COM S 621 or 622 or permission of instructor. Not offered every year; semester TBA.

COM S 726  Problems in Computational Molecular Biology (also PL BR 726)
Fall, spring. 1 credit. S-U grades only.

COM S 732  Seminar in Database Systems
Fall, spring. 4 credits. S-U grades only.

COM S 754  Systems Research Seminar
Fall. 1 credit. S-U grades only.

COM S 772  Seminar in Artificial Intelligence
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

COM S 773/774  Proseminar in Cognitive Studies I & II (also COGST, PHIL, LING, and PSYCH 733/774)
Fall, 773; spring, 774. 4 credits. Not offered 2001–2002.

COM S 775  Seminar in Natural Language Understanding
Fall, spring. 2 credits.

COM S 789  Seminar in Theory of Algorithms and Computing
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

COM S 790  Special Investigations in Computer Science
Fall, spring. 4 credits. Prerequisite: permission of a computer science adviser. Letter grade only. Independent research or Master of Engineering project.

COM S 890  Special Investigations in Computer Science
Fall, spring. 4 credits. Prerequisite: permission of a computer science adviser. S-U grades only. Master of Science degree research.

COM S 990  Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Doctoral research.

EARTH AND ATMOSPHERIC SCIENCES
The new Department of Earth and Atmospheric Sciences joins faculty in the geological sciences with faculty in atmospheric sciences to cover the breadth of modern earth sciences. We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is also a powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important for both future policymakers and ordinary citizens.

The new department is the home department for three majors: geological sciences, atmospheric sciences, and science of earth systems (SES). Geological sciences emphasizes the solid earth and its history, atmospheric sciences emphasizes basic understanding of modern climate and weather, while the science of earth systems major covers the new disciplines which study the interactions among rock, water, air, and life in our planet's operation. The geological sciences and SES majors are available for students in the College of Arts and Sciences. The geological sciences major is described below, and the SES major is described in the section, "Special Programs and Interdisciplinary Studies."

Atmospheric sciences has been proposed as a new major in the College of Arts and Sciences. If approved, the new major would commence during 2001–2002. The goal is to have the breadth of earth sciences available to students in the Colleges of Arts and Sciences, Engineering, and Agriculture and Life Sciences. The community of majors in these inter-collegiate programs share a common interest in a rigorous scientific understanding of how our planet works.

For the latest information about these programs, please consult our web site at www.eas.cornell.edu.

The Geological Sciences Major
The geological sciences major reveals Earth's turbulent history from the formation of our solar system to the plate tectonic cycles that dominate Earth's present behavior. That history is highlighted by the co-evolution of life and the Earth system, a dramatic story that starts with the origin of life in our sun's planetary system and leads to the modern interglacial phase of our planet's latest ice age during which our species has emerged to play a major role in the planetary system. Topics of study also include the fundamental processes responsible for the concentration of mineral and energy resources that have enabled our technological evolution, and include natural hazards such as earthquakes, volcanic eruptions, floods, and landslides which pose dangers to our increasingly vulnerable cities and infrastructure.

The geological sciences major prepares students in geology, geophysics, geochemistry, and geobiology for careers in mineral and energy resources that have enabled our technological evolution, and include natural hazards such as earthquakes, volcanic eruptions, floods, and landslides which pose dangers to our increasingly vulnerable cities and infrastructure.

The geological sciences major provides students in geology, geophysics, geochemistry, and geobiology for careers in mineral and petroleum exploration, environmental geology, and academic and government research enterprises. Many of these career tracks involve graduate study, for which the major is excellent preparation. Alternatively, it is a valuable major for a pre-law or pre-med program or in preparation for a career in K-12 education.

In addition to course work, students learn by outdoor fieldwork and involvement in the vigorous research programs of the depart-
ment. Facilities include equipment for processing seismic signals and satellite images of the Earth's surface using extensive libraries of earthquake records, satellite images, and exploration seismic records, and instruments for highly precise and physical analyses of earth materials, including instruments of the Cornell Center for Material Research, Ward Laboratory and the Cornell High Energy Synchotron Source (CHESS). Undergraduates have served as field assistants for faculty members and graduate students in Argentina, Mexico, British Columbia, the Aleutian Islands and southeastern Alaska, Scotland, Switzerland, Tibet, and the Barbados. Undergraduates are encouraged to participate in research activities, frequently as paid assistants.

For admission to the geological sciences major, a student should have made substantial progress toward completing the following basic science requirements for the major: MATH 111–112 or MATH 191–192, PHYS 207–208 or PHYS 207 or 211, PHYS 209 or 212. Freshmen and sophomores should take an introductory EAS course (or courses), normally EAS 101 or EAS 201, or EAS 102 or EAS 104. Juniors with a strong foundation in mathematics and science may be accepted into the major without an introductory course. Majors take EAS 210, the five 300-level core courses listed below, six credits of additional coursework from earth and atmospheric sciences courses numbered 300, 400, or 600, plus an additional course in either computer science or biological science or an intermediate-level course in biological science, mathematics, chemistry, or physics. In addition, a requirement for an advanced outdoor field experience may be met by completing one of the following four-credit options: (a) EAS 417 (Field Mapping in Argentina, 3 credits) and EAS 491 or 492 (based on field observations) for a combined four-credit minimum; (b) EAS 437 (Geophysical Field Methods, 3 credits) plus at least one credit of EAS 491 or 492 using geophysical techniques from EAS 437; (c) EAS 491–492 (Undergraduate Research, 2 credits each) with a significant component of field work; or (d) an approved outdoor field course taught by a college or university (4-credit minimum).

Core Courses
EAS 326 Structural Geology
EAS 355 Mineralogy
EAS 356 Petrology and Geochemistry
EAS 375 Sedimentology and Stratigraphy
EAS 388 Geophysics and Geotectonics

Prospective majors should contact R. W. Kay as early as possible for advice in planning a program. Students majoring in geological sciences may attend the department seminars and take advantage of courses, field trips, and conferences offered through the Department of Earth and Atmospheric Sciences.

Courses offered at the 100 and 200 level are open to all students. Certain 300- and 400-level courses in earth and atmospheric sciences may be of particular interest to students of chemistry, biology, and physics. Students are encouraged to inquire about courses that interest them at the department office in 2122 Snee Hall.

Honors. An honors program is offered by the Department of Earth and Atmospheric Sciences for superior students. Candidates for honors must maintain an overall 3.0 grade-point average, a cumulative average of 3.5 in the major, and a thesis (EAS 491 or 492). Students interested in applying should contact the director of undergraduate studies during the second semester of the junior year.

Courses
EAS 101 Introductory Geological Science (I)
Fall, spring, or summer. 3 credits. Fall, A. Moore; spring, J. M. Bird; summer, W. Brice.

Designed to enhance an appreciation of the physical world. Emphasizes natural environments, surface temperatures, and dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (earth system science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

EAS 102 Evolution of the Earth and Life (also BIO G 170) (I)
Spring. 3 credits. J. L. Cisne.

Course topics include: Earth systems and their evolution; Earth history's astronomical context; plate tectonics, continental drift, and their implications for climate and life; co-evolution of life and the atmosphere; precedents for ongoing global change; and dinosaurs, mass extinctions, and human ancestry. Includes laboratory on reconstructing geological history and mapping ancient geography. Fossil collecting on field trips.

EAS 104 The Sea; An Introduction to Oceanography (also BIOEE 154) (I)

A survey of the physics, chemistry, geology, and biology of the oceans for both science and nonscience majors. Topics include: sea-floor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, coastal processes, marine pollution, and marine resources.

EAS 105 Writing on Rocks (Freshman Seminar)
Fall, spring. 3 credits. J. Chiment.

See Freshman Seminar Handbook for description.

EAS 106 Vertebrate Fossil Preparation
Fall, spring. 1 credit. Prerequisite: 1 introductory geology course or concurrent enrollment, class size is limited. J. Chiment.

A laboratory-oriented course that exposes students to techniques of vertebrate fossil preparation. Roughing-out and fine preparation of large specimens in solid matrix are covered, as well as screen washing and microscope techniques for the recovery of micro-vertebrate remains. Specialized scanning techniques are discussed.

The class meets for one hour each week for the first six weeks of the semester. Students are assigned to an individual or group project requiring two hours of participation each week for the remainder of the semester.

EAS 107 How the Earth Works
Fall. 1 credit. J. L. Cisne.

A user-friendly introduction to the workings and interactions of solid earth, ocean, atmosphere, and life as they relate to understanding ongoing global change.

EAS 109 Dinosaurs
Fall. 1 credit. J. L. Cisne.

An introductory survey course for anyone interested in dinosaurs. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

EAS 111 To Know the Earth and Build a Habitable Planet (I)
Fall. 3 credits. J. M. Bird.

Acquaints the nonscientist with Earth. Course topics include: major features and how Earth has evolved; Earth system science and building a habitable planet; effects of human activity on geologic environments, mitigating environmental damage, living with natural hazards; and mineral resource use in the twenty-first century and an environmentally sound fuel-minerals cycle.

EAS 122 Earthquake! (also ENGR 122) (I)
Fall. 3 credits. J. D. Brown.

The science of natural hazards and strategic resources is explored. Techniques for locating and characterizing earthquakes and assessing the damage they cause; methods of using sound waves to image the earth's interior to search for strategic minerals; the historical importance of such resources. Seismic experiments on campus to probe for groundwater, the new critical environmental resource.

EAS 131 Basic Principles of Meteorology (I)
Fall. 3 credits. M. W. Wysocki.

A simplified treatment of the structure of the atmosphere: heat balance of the Earth; general and secondary circulations; air masses, fronts, and cyclones; and hurricanes, thunderstorms, tornados, and atmospheric condensation. In the laboratory, emphasis is on techniques of analysis of weather systems.

EAS 150 Introduction to Fortran Programming
Fall. 3 credits. M. W. Wysocki.

An introduction to the elements of computer programming using Fortran. Exercises involve mainly meteorological problems.

EAS 200 Art, Archaeology, and Analysis (also ARKEO 285, ART H 200, ENGR 165, PHYS 200) (I or IV)
Spring. 3 credits. R. H. Gifford.

An interdisciplinary course on the use of techniques of science and engineering in cultural research. Applications of physical and physiological principles to the study of archaeological artifacts and works of art. Historical and technical aspects of artistic creation. Analyses by modern methods to deduce geographic origins and for exploration, dating, and authentication of cultural objects. Does not meet liberal studies distribution requirement for engineering.

EAS 201 Introduction to the Physics and Chemistry of the Earth (also ENGRD 201) (I)
Fall. 3 credits. Prerequisites: PHYS 112 or 207. L. M. Cathles.

Course topics include: formation of the solar system: accretion and evolution of the earth;
the rock cycle: radioactive isotopes and the geological time scale, plate tectonics, rock and minerals, earth dynamics, mantle plumes, the hydrologic cycle: runoff, floods and sedimentation, groundwater flow, and contaminant transport; and the weathering cycle: chemical cycles, CO₂ (weathering), rock cycle, controls on global temperature (CO₂ or ocean currents), oil, and mineral resources.

**EAS 203 Natural Hazards and the Science of Complexity (I)**
Studies of natural hazards: earthquakes, volcanic eruptions, floods, hurricanes, tornadoes, severe storms, wildfires, meteor impacts. Applications of the science of complexity to natural hazards: fractals, chaos, and self-organized criticality.

**EAS 210 Introduction to Field Methods in Geologic Sciences (I)**
Fall. 3 credits. 1 lecture, Saturday field trips. Prerequisites: EAS 101 (or 201) or permission of instructor. R. W. Allmendinger.
Course covers the methods by which rocks are used as a geological database. Topics include field methods used in the construction of geological maps and cross sections; systematic description of stratigraphic sections. There are field and laboratory sessions on Saturdays until Thanksgiving. There is one additional lecture during most of these weeks. Course includes one weekend field trip to eastern New York.

**EAS 212 Caribbean Field Trip**
Spring. 2 credits. Prerequisite: permission of instructor. Enrollment limited to 15. Approximate cost $1,100. L. D. Brown.
A multidisciplinary look at earth science and environmental issues represented in the Yucatan Peninsula of Mexico. Base for operations is the Centro Ecologico Akumal, located on the Caribbean coast south of Cancun. This coast and its associated reef epitomizes the conflict between ecological protection and economic development on an international scale. Excursions may include visits to Merida, a historic Spanish town which lies above the buried impact structure that many believe resulted in the death of the dinosaurs, ruins at Chichen Itza, Mayapán, Coba, and Tulum associated with the rise and fall of Mayan culture; and wildlife (monkeys, jaguars, crocodiles) preserves where recent accumulations of grains or sediment.

**EAS 250 Meteorological Observations and Instruments**
Spring. 3 credits. Lab fee $50. M. W. Wysocki.
Methods and principles of meteorological measurements and observations including surface, free-air, and remote systems. Topics include: instrument sitting, mounting, and protection; instrument response characteristics, calibration, and standardization; and recorders and data logging systems. Includes laboratory exercises in observation and data analysis. Intended to serve as preparation for Observers Examination.

**EAS 260 Soil Science (also CSS 260) (I)**
Fall. 4 credits. S-U grades optional. S. J. Rha.
Designed for students interested in a comprehensive introduction to soil science from both an environmental and plant management perspective, this course is divided into three units. A unit on soil information introduces students to soil characterization, testing, mapping, classification, GIS, and land evaluation. A soil management unit addresses fertility, pest management, water, and microclimate, as well as erosion, conservation, pollution, and soil health. The unit on the role of soils in ecosystems covers such as biodiversity, soils as sinks and sources of greenhouse gases, and the impact of soils on land use. Labs are initially field-oriented with an emphasis on learning practical skills needed to evaluate and manage soils. Subsequent labs focus on accessing, interpreting, and applying soil information.

**EAS 296 Forecast Competition**
Fall and spring. 1 credit. S-U grades only. Prerequisites: sophomore undergraduate standing in atmospheric science or permission of instructor. D. S. Wilks.
This two-semester course provides daily exercise in probabilistic weather forecasting, in which students compete to forecast local weather most skillfully. Enroll for two consecutive semesters, with credit awarded after the second semester. May be repeated for credit.

**EAS 302 Evolution of the Earth System (I)**
Spring. 4 credits. Prerequisites: MATH 112 or 192 and CHEM 207 or equivalent. W. M. White, W. D. Allmon, and B. L. Isacks.
Course covers the co-evolution of life and the earth system: Earth's early history; plate tectonics, continental drift, and climate changes during the past billion years; mountain building, ice ages, and our own emergence during the past ten million years. Serves as an introduction to methods of interpreting information preserved in the rock record.

**EAS 315 Geomorphology (I)**
Fall. 4 credits. Prerequisite: a 3-credit EAS course. T. E. Jordan and B. L. Isacks.
A study of the processes that sculpt the Earth's landscapes (above and below sea level) and the nature of its landforms. Landforms constructed by Earth's internal processes are the point of departure as we examine their modification by physical interaction with the atmosphere and oceans. Also treated are depositional forms that are generated by accumulations of grains or sediments. Laboratory exercises include both field examination of landforms of the Finger Lakes area and computer analysis of satellite images and Digital Elevation Models of examples from around the globe. Includes two Saturday field trips.

**EAS 321 Introduction to Biogeochemistry (also NTRES 321) (I)**
Fall. 4 credits. Prerequisites: CHEM 207, MATH 112, plus a course in biology and/or geology. L. A. Derry, J. Yavitt.
Control and function of the Earth's global biogeochemical cycles. The course begins with a review of the basic inorganic and organic chemistry of biologically significant elements, and then considers the biogeochemical cycling of carbon, nutrients, and metals that take place in soils, sediments, rivers, and the oceans. Topics include weathering, acid-base chemistry, biological redox processes, nutrient cycling, trace gas fluxes, bio-active metals, the use of isotopic tracers, and mathematical models. Interactions between global biogeochemical cycles and other components of the Earth system are discussed.

**EAS 326 Structural Geology (I)**
Spring. 4 credits. Prerequisite: MATH 112, EAS 101 or 201, or permission of instructor. R. W. Allmendinger.
Nature and origin of deformed rocks at microscopic to macroscopic scales, with emphasis on structural geometry and kinematics. Topics include stress, strain, rheology, deformation mechanisms, minor structures, faulting, folding, and structural families.

**EAS 331 Climate Dynamics (also ASTRO 331) (I)**
Fall. 4 credits. Prerequisites: MATH 112 or 192 or equivalent. K. H. Cook, P. J. Giere.
Processes that determine climate and contribute to its change are discussed, including atmospheric radiation, ocean circulation, and atmospheric dynamics. Contemporary climate change issues are investigated and discussed in the context of natural variability of the system.

**EAS 334 Micrometeorology (I)**
Spring. 3 credits. Prerequisite: a course in physics. Offered alternate years. D. S. Wilks.
Considers the relationships of radiative energy, temperature, wind, and moisture in the atmosphere near the ground. The interplay between physical processes of the atmosphere, plant canopies, and soil is examined with emphasis on the energy balance.

**EAS 341 Atmospheric Thermodynamics and Hydrostatics (I)**
Fall. 3 credits. Prerequisites: 1 year of calculus and 1 semester of physics. M. W. Wysocki.
Introduction to the thermodynamics and hydrostatics of the atmosphere and to the methods of description and quantitative analysis used in meteorology. Topics covered include thermodynamic processes of dry air, water vapor, and moist air and concepts of hydrostatics and stability.

**EAS 342 Atmospheric Dynamics (I)**
Spring. 3 credits. Prerequisites: 1 year each of calculus and physics. K. H. Cook and P. J. Giere.
Introduction to atmospheric dynamics and to the methods of description and quantitative analysis used in meteorology. Topics
considered include equations of atmospheric motion, motion in the free atmosphere, vertical variations of wind and pressure fields, mathematical representation and characteristics of fronts, mechanisms of pressure change, concepts of circulation and vorticity, and effects of friction on atmospheric motion.

EAS 352 Synoptic Meteorology (I)
Spring. 3 credits. Prerequisites: EAS 341 and concurrent enrollment in EAS 342.
M. W. Wysocki.
Weather map analysis and forecasting techniques are studied by applying the principles of fluid and heat flow. This course strengthens previously introduced meteorological concepts which are applied to forecasting midlatitude synoptic scale weather systems, such as cyclones, anticyclones, jet streams, fronts, and waves.

EAS 355 Mineralogy (I)
Fall. 4 credits. Prerequisites: EAS 101 or 201 and CHEM 207 or permission of instructor. S. Mahlburg Kay.
The course covers chemical and physical properties and identification of minerals with emphasis on the rock forming minerals that are the principal constituents of the Earth and other planets. Topics include internal and external crystallography, crystal chemistry, introductions to x-ray crystallography and optical mineralogy, and a systematic examination of the structures, chemistry, and occurrence of the rock forming minerals. Independent study project includes use of electron microprobe and x-ray facilities.

EAS 356 Petrology and Geochemistry (I)
Spring. 4 credits. Prerequisite: EAS 355.
R. W. Kay.
Principles of phase equilibria as applied to igneous and metamorphic systems. Description, classification, chemistry, origin, regional distribution, and dating of igneous and metamorphic rocks. Geochemical distribution of trace elements and isotopes in igneous and metamorphic systems. The petrological evolution of the planets.

EAS 375 Sedimentology and Stratigraphy (I)
Fall. 4 credits. Prerequisite: EAS 101 or 201.
J. L. Cisne.
Course covers: the formation of sedimentary rocks, depositional processes and environments; correlation of strata in relation to time and environment; petrology of sandstone and limestone; geological age determination, reconstruction of paleogeography and stratigraphic evidence; and organization of strata in stratigraphic sequences.

EAS 388 Geophysics and Geotectonics (I)
Spring. 4 credits. Prerequisites: MATH 192 (or 112) and PHYS 208 or 213.
B. L. Isacks.
Covers global tectonics and the deep structure of the solid earth as revealed by investigations of earthquakes, earthquake waves, the earth's gravitational and magnetic fields, and heat flow.

EAS 417 Field Mapping in Argentina (I)
Summer. 3 credits. Prerequisites: EAS 210 and 326; Spanish desirable, but not required. S. Mahlburg Kay.
Covers modern techniques of geological mapping applied in the region of San Juan, Argentina, including folded and faulted sedimentary rock units of the Andean Precordillera (San Juan River section), intensely deformed Precambrian metamorphic rocks of the Pampean Ranges (Pie de Palo), and shallow-level silicic intrusives (Cerro Blanco-Ullon).

EAS 434 Reflection Seismology (I)
Spring. 4 credits. Prerequisites: MATH 192 and PHYS 208, 213, or equivalent.
L. D. Brown.
Fundamentals of subsurface imaging by multichannel seismic reflection techniques as used in oil exploration and geohydrological investigations. Covers survey design, acquisition, analysis, processing, and interpretation in both 2-D and 3-D. Includes discussion of related techniques such as seismic refraction analysis, tomographic inversion, vertical seismic profiling, shear wave exploration, and ground penetrating radar. Lab is key to state-of-the-art seismic processing, modeling and interpretation software from LandMark.

EAS 435 Statistical Methods in Meteorology and Climatology (I)
Fall. 3 credits. Prerequisite: an introductory course in statistics (e.g., AEM 210) and calculus.
D. S. Wilks.
Covers statistical methods used in climatology, operational weather forecasting, and selected meteorological research applications; some statistical characteristics of meteorological data, including probability distributions and correlation structures; operational forecasts derived from multiple regression models, including the MOS system; forecast verification techniques and scoring rules; and time series analysis, EOFs, and other research topics as time permits.

EAS 437 Geophysical Field Methods (I)
Fall. 3 credits. Prerequisites: PHYS 213 or 208, or permission of instructor. S. Mahlburg Kay.
Introduction to field methods of geophysical exploration, especially as applied to environmental issues. Emphasis is on seismic, ground penetrating radar, gravity, and magnetic techniques. Field surveys carried out at the beginning of the semester are analyzed and interpreted.

EAS 447 Physical Meteorology (I)
Fall. 3 credits. Prerequisites: calculus and physics. Offered alternate years.
A. T. DeGaetano.
Primarily a survey of natural phenomena of the atmosphere, with emphasis on their underlying physical principles. Topics include composition and structure of the atmosphere, atmospheric optics, acoustics and electricity, solar and terrestrial radiation, and principles of radar probing of the atmosphere.

EAS 451 Synoptic Meteorology II (I)
Fall. 3 credits. Prerequisites: EAS 341 and 342.
S. J. Colucci.
Structure and dynamics of large-scale, mid-latitude weather systems, such as cyclones, anticyclones, and waves, with consideration of processes that contribute to temperature changes and precipitation are covered. Laboratory sessions involve real-time weather forecasting and the computer application of a numerical model of the atmosphere to study selected large-scale, mid-latitude weather events.

EAS 453 Advanced Petrology (I)
Fall. 3 credits. Prerequisite: EAS 356.
Course topics include: magmas and metamorphism in the context of plate tectonics; major and trace element chemistry and petrology as monitors of the creation and modification of igneous rocks; and temperature and stress in the crust and mantle and their influence on reaction rates and textures of metamorphic rocks. Application of experimental studies to natural systems.

EAS 454 Advanced Mineralogy (I)
Spring. 3 credits. Prerequisite: EAS 355 or permission of instructor. Offered alternate years.
S. Mahlburg Kay.
Course covers: crystallography and crystal chemistry of minerals and the methods of their study. Includes X-ray diffraction, optical methods and computer simulation of crystal structures. Emphasis is on effects of high pressures and temperatures with implications for understanding the Earth's interior.

EAS 455 Geochemistry (I)
Fall. 4 credits. Prerequisites: CHEM 207 and MATH 192 or equivalent. Recommended: EAS 356. Offered alternate years.
W. M. White.
Looks at the Earth from a chemical perspective. Covers: the formation of the elements; cosmochemistry, chemical evidence regarding the formation of the Earth and solar system; trace-element geochronology; isotope geochemistry; geochemical thermodynamics and kinetics; chemical evolution of the crust, mantle, and core; weathering and the chemistry of natural waters; chemistry of rivers and the oceans; hydrothermal systems and ore deposition.

EAS 456 Mesoscale Meteorology (I)
Spring. 3 credits. Prerequisites: EAS 341 and 342 or permission of instructor.
Offered alternate years.
S. J. Colucci.
Covers the structure and dynamics of mid-latitude mesoscale weather systems such as fronts, jets, squall lines, convective complexes, pre-storm bands, downslope windstorms, mountain snowstorms, sea breeze circulations, and lake effect snowstorms.

EAS 457 Atmospheric Air Pollution (I)
Fall. 3 credits. Prerequisites: EAS 341 or 1 course in thermodynamics, and 1 semester of chemistry, or permission of instructor. Offered alternate years; not offered 2001-2002. R. W. Kay and W. M. White.
Course examines sources, effects, transport, measurement, and controls of air pollution. The basic principles in each area are discussed with an emphasis on their local, regional, and global impacts.

EAS 458 Volcanology (I)
Spring. 3 credits. Corequisite: EAS 356 or equivalent.
Considers the causes of volcanism, melting in the Earth, and the origin of magmas. Topics include: physical volcanology, nature and types of volcanic eruptions and associated deposits, eruption mechanisms; volcanic plumbing systems, magma chamber processes, evolution of magma; volcanism and impact phenomena in the solar system; volcanic hazard assessment and volcano monitoring; and ore deposits associated with volcanism.
EAS 462 Marine Ecology (also BIOEE 462) (I)
Spring. 3 credits. Limited to 75 students. Prerequisite: BIOEE 261. Offered alternate years. Not offered 2001–2002. C. D. Harvell, C. H. Greene. Lectures and discussions focus on current research in broad areas of marine ecology with an emphasis on processes unique to marine systems. A synthetic treatment of multiple levels of organization in marine systems including organismal, population, community, ecosystems, and evolutionary biology. Examples are drawn from all types of marine habitats including polar seas, temperate coastal waters, and tropical coral reefs.

EAS 475 Special Topics in Oceanography (I)
Spring, summer. 2–5 var. credits. Prerequisites: EAS 104 or BIOEE 154, and permission of instructor. C. H. Greene. Undergraduate instruction and participation in advanced areas of oceanographic research. Topics change from term to term. Contact instructor for further information.

EAS 476 Sedimentary Basins: Tectonics and Mechanics (I)
Fall. 3 credits. Prerequisite: EAS 375 or permission of instructor. Offered alternate years. Not offered 2001–2002. T. E. Jordan. Covers subsidence of sedimentary basins from the point of view of plate tectonics and geomechanics. Topics include: interactions of subsidence, sediment supply, and environmental characteristics in development of stratigraphic sequences; stratigraphic characteristics of active-margin, passive-margin, and cratonic basins, and geophysical and stratigraphic modeling; sequence stratigraphy. Modern and ancient examples are used.

EAS 478 Advanced Stratigraphy (I)
Fall. 3 credits. Prerequisite: EAS 375 or permission of instructor. Offered alternate years. T. E. Jordan. Modern improvements on traditional methods of the study of ages and genetic relations among sedimentary rocks, emphasizing 3-D relationships. Techniques and applications of sequence stratigraphy at scales ranging from beds to entire basins. Physical correlation, dating techniques, and time resolution in sedimentary rocks. Physical controls on the stratigraphic record. Numerical modeling.

EAS 479 Paleobiology (also BIOEES 479) (I)
Fall. 4 credits. Prerequisites: 1 year of introductory biology for majors and either BIOEE 274, 373, EAS 375, or permission of instructor. W. Allmon. A survey of the major groups of organisms and their evolutionary histories. Intended to fill out the biological backgrounds of earth and atmospheric sciences students concerning the nature and significance of the fossil record for their respective studies.

EAS 481 Senior Survey of Earth Systems (I)
Fall. 3 credits. Limited to seniors majoring in geological science. J. M. Bird. Survey course that integrates undergraduate coursework, emphasizing synthesis and review of literature; scientific literature readings, discussions, student presentations.

EAS 483 Environmental Biophysics (also CSS 469) (I)
Spring. 3 credits. Prerequisites: EAS/CSS 260 or equivalent, or permission of instructor. Offered alternate years. Not offered 2001–2002. S. J. Riha. Introduction to basic principles of energy and mass transfer and storage in soil-plant systems. Topics include: energy budgets, soil heat flow, water movement in saturated and unsaturated soils, evapotranspiration, water, gas, and nutrient dynamics in the soil-plant-atmosphere continuum. Applications to agronomic and environmental problems and instrument design and use are considered through discussion and problem sets.

EAS 491-492 Undergraduate Research
Fall, spring. 1–4 credits. Staff. (R. W. Kay, coordinator.) Introduction to the techniques and philosophy of research in the earth sciences and an opportunity for undergraduates to participate in current staff research projects. Topics chosen in consultation with, and guided by, a staff member. A short written report is required, and outstanding projects are prepared for publication.

EAS 496 Internship Experience
Fall or spring. 1–2 credits. S-U grades only.

EAS 497 Individual Study in Atmospheric Science
Fall or spring. 1–6 credits. S-U grades optional. Students must register with an Independent Study form.
Topics are arranged at the beginning of the term for individual study or for group discussions.

EAS 498 Teaching Experience in Atmospheric Science
Fall or spring. Credit by arrangement. Students must register with an Independent Study form.
Teaching experience is obtained by assisting in the instruction of an atmospheric science course.

EAS 499 Undergraduate Research in Atmospheric Science
Fall or spring. Credit by arrangement. Students must register with an Independent Study form.
Independent research on current problems in atmospheric science.

EAS 500 Design Project in Geohydrology
Fall, spring. 3–12 credits. An alternative to an industrial project for M.Eng. students choosing the geohydrology option. May continue over 2 or more semesters. L. M. Cathles. The project may address one of the many aspects of groundwater flow and contamination and must involve a significant geohydrological component and lead to concrete recommendations or conclusions of an engineering nature. Results are presented orally and in a professional report.

EAS 502 Case Histories in Groundwater Analysis
Spring. 4 credits. L. M. Cathles. Groundwater flow in a specific area, such as a proposed nuclear-waste disposal site, is analyzed in depth. Geological and resource data on the area are presented early in the course. Then the material is analyzed by students working as an engineering analysis team. Each student makes a weekly progress report and writes part of a final report. Results are presented in a half-day seminar at the end of term.

EAS 622 Advanced Structural Geology I
Spring. 3 credits. Prerequisites: EAS 326 and permission of instructor. Offered alternate years. R. W. Allmendinger. Stress-strain theory and application. Advanced techniques of structural analysis. Topics include finite and incremental strain measurement; microstructure, preferred orientation, and TEM analysis; pressure solution and cleavage development; and experimental deformation. Applications to deformation of unconsolidated sediments, brittle and brittle-ductile deformation of supracrustal strata, and ductile deformation of high-grade metamorphic rocks. Kinematic analysis of shear zones and folds in these regimes.

EAS 623 Advanced Structural Geology II

EAS 628 Geology of Orogenic Belts
Spring. 3 credits. Prerequisite: permission of instructor. J. M. Bird. A seminar course in which students study specific geologic topics of an orogenic belt selected for study during the term. The course is intended to complement EAS 681.

EAS 634 Advanced Geophysics II: Fractals and Chaos in Geology and Geophysics
Spring. 3 credits. Prerequisite: EAS 388 or permission of instructor. Offered alternate years. Next offered 2002–2003. D. L. Turcotte. Topics include: definitions of fractal sets and statistical fractals, scale invariance, self-affine fractals, multifractals, applications to fragmentation, seismicity and tectonics, petroleum distribution and reserves, ore grade and tonnage, drainage networks and landforms, and floods and droughts. Definitions of chaos and self-organized criticality, renormalization groups, diffusion limited aggregation and percolation clusters, wavelet transforms, applications to mantle convection, the earth’s dynamo, and distributed seismicity.

EAS 635 Advanced Statistical Meteorology and Climatology
Fall. 3 credits. Prerequisites: coursework in or elementary knowledge of statistics, calculus, matrix algebra, and computer programming. D. S. Wilks. Lectures and topics concurrent with EAS 435, plus an extra 40-minute session per week in which selected topics from EAS 435 are treated in more depth and additional topics are covered which may vary from year to year according to student interest. Term project required. Not open to students who have taken EAS 435 for credit.

EAS 636 Advanced Geophysics II: Quantitative Geodynamics
Spring. 3 credits. Prerequisite: EAS 388 or permission of instructor. Offered alternate years. Next offered 2003–2004. D. L. Turcotte.
Stress and strain in the earth, elasticity and flexure, heat transfer, gravity, fluid mechanics, rock rheology, faulting, chemical geodynamics, flow in porous media.

[EAS 641] Analysis of Biogeochemical Systems
Spring. 3 credits. Prerequisite: MATH 293 or permission of instructor. Offered alternate years. Not offered 2001–2002. L. A. Derry.

Dynamics of biogeochemical systems. Kinetic treatment of biogeochemical cycles. Box models, residence time, response time. Analytical and numerical solutions of model systems. Eigen-analysis of linear systems. Feedback and nonlinear cases, problems of uncertainties in natural systems. Modeling software such as Stella II and Matlab; applications to current research of participants or from recent literature.

[EAS 651] Atmospheric Physics (also ASTRO 651)
Fall. 3 credits. Prerequisite: a good background in undergraduate calculus and physics is required. Offered alternate years. Not offered 2001–2002. K. H. Cook, P. J. Gierasch, S. Colucci.

A survey of the fundamental physical processes in atmospheres. Topics include thermodynamics of atmospheric gases, moist effects, hydrostatics, convective instability, atmospheric radiation and radiative heating, radiative-convective equilibrium, clouds, cloud microphysics, and precipitation processes. Thermal structure and greenhouse effects on the Earth and other planets are discussed. The course is taught at the level of *Fundamentals of Atmospheric Physics* by Sally.)

[EAS 652] Advanced Atmospheric Dynamics (also ASTRO 652)

Course topics include: quasigeostrophic theory, atmospheric waves, hydrodynamic instability, the general circulation of the atmosphere, and topics selected from among numerical weather prediction and tropical, mesoscale, and middle atmosphere processes according to student interest.

[EAS 655] Isotope Geochemistry
Spring. 3 credits. Open to undergraduates. Prerequisite: EAS 455 or permission of instructor. Offered alternate years. W. M. White.

Course topics include: nucleosynthetic processes and the isotopic abundances of the elements; geochronology and cosmochronology using radioactive decay schemes, including U-Pb, Rb-Sr, Sm-Nd, K-Ar, U-series isotopes, and cosmogenic isotopes such as 10C and 36Cl; use of radiogenic and stable isotopes in petrology and their application to study the evolution of the crust and mantle; isotopic evidence regarding the formation of the Earth and the solar system; and stable isotopes and their use in geothermometry, ore petrogenesis, paleontology, and the global climate system.

[EAS 675] Modeling the Soil-Plant-Air System (also CSS 675)
Spring. 3 credits. Prerequisites: EAS/CSS 483 or equivalent. Offered alternate years. S. J. Riha.

Introduction to the structure and use of soil-plant-atmosphere models. Topics covered include modeling plant physiology, morphology, and development; potential crop production and crop production limited by moisture and nutrient availability; plant-plant competition; and land surface processes as well as model data requirements, validation, and scale. Use of soil-plant-atmosphere models for teaching, research, extension, and policy formation is discussed.

[EAS 692] Special Topics in Atmospheric Science
Fall or spring. 1–6 credits. S-U grades optional.

Study of topics in atmospheric science that are more specialized or different from other courses. Special topics covered depend on staff and student interests.

[EAS 695] Computer Methods in Geological Sciences
Fall, spring. 3 credits. Prerequisite: permission of instructor. Staff.

Advanced work on original investigations in earth and atmospheric sciences. Topics change from term to term. Contact appropriate professor for more information.

[EAS 722] Advanced Topics in Structural Geology
R. W. Allmendinger.

[EAS 731] Plate Tectonics and Geology
J. M. Bird.

[EAS 733] Fractals and Chaos—Independent Studies

[EAS 750] Petrology and Geochemistry
R. W. Kay.

[EAS 755] Advanced Topics in Petrology and Tectonics
J. M. Bird.

[EAS 757] Current Research in Petrology and Geochemistry
S. Mahlburg Kay.

[EAS 762] Advanced Topics in Paleobiology
W. D. Allmon.

[EAS 771] Advanced Topics in Sedimentology and Stratigraphy
T. E. Jordan.

[EAS 773] Paleobiology
J. L. Cinne.

[EAS 775] Advanced Topics in Oceanography
Spring. C. H. Greene.

[EAS 780] Earthquake Record Reading
Fall. M. Barazangi.

L. D. Brown.

[EAS 783] Advanced Topics in Geophysics
B. L. Isacks.

[EAS 789] Lithospheric Seismology Seminar
L. D. Brown.

[EAS 793] Andes-Himalayas Seminar

[EAS 795] Low Temperature Geochemistry
Spring. L. A. Derry.

[EAS 796] Geochemistry of the Solid Earth
W. M. White.

[EAS 797] Fluid-Rock Interactions
L. M. Cathles.

[EAS 799] Soil, Water, and Geology Seminar
L. M. Cathles, T. S. Steenhuis.

[EAS 850] Master's-Level Thesis Research in Atmospheric Science
Fall or spring. Credit by arrangement. S-U grades only. Hours by arrangement. Graduate faculty.

Limited to students specifically in the master's program in atmospheric science.

[EAS 950] Graduate-Level Dissertation Research in Atmospheric Science
Fall or spring. Credit by arrangement. S-U grades optional. Hours by arrangement. Graduate faculty.

Limited to students in the atmospheric science Ph.D. program only before the “A” exam has been passed.

[EAS 951] Doctoral-Level Dissertation Research in Atmospheric Science
Fall or spring. Credit by arrangement. S-U grades optional. Hours by arrangement. Graduate faculty.

Limited to students admitted to candidacy in the atmospheric science Ph.D. program after the “A” exam has been passed.

ECONOMICS

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking, international and comparative economics, economics; theory; history; growth and development; and the organization, performance, and control of industry.

Social Science Distribution Requirement

The microeconomics distribution requirement can be fulfilled with any of the following: ECON 101, ECON 301, or ECON 313.
The macroeconomics distribution requirement can be satisfied with any of the following:
ECON 102, ECON 302, or ECON 314.

The Major
Prerequisites
ECON 101 and 102 and MATH 111 (or equivalents, with approval of the director of undergraduate studies), all with grades of C or better.
ECON 301 with a grade of C or better substitutes for 101; ECON 302 with a grade of C or better substitutes for 102.

Requirements
Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student’s major adviser, all with grades of C or better. (S-I grade option is not allowed.)

These eight courses must include:
(1) ECON 313 and 314
(2) ECON 321, or ECON 319 and 320
(3) at least three courses from the following: ECON 317-318, Mathematical Economics

An honors program is currently being offered. Students should consult the director of undergraduate studies before May of their junior year for more information.

ECON 301 with a grade of B or better substitutes for both 101 and 313; ECON 302 with a grade of B or better substitutes for both 102 and 314.

ECON 313 Intermediate Microeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: ECON 101-102 and calculus. This course provides an introduction to empirical aggregate economic data is examined.

ECON 319 Introduction to Statistics and Probability
Fall. 4 credits. Prerequisites: ECON 101-102 and MATH 111-112. This course provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

ECON 320 Introduction to Econometrics
Spring. 4 credits. Prerequisites: ECON 101-102, 319, or equivalent. Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding econometricists’ results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

Other analytical tools and methods of peace science, and alternatives to war.

ECON 333 Financial Economics
ECON 351 or 352, Industrial Organization
ECON 361-362, International Trade and Finance

ECON 443, Personnel Economics for Managers

Fall. 4 credits. Prerequisites: ECON 101–102 or the equivalent. An economist’s perspective on the comparative evolution of selected economic and social institutions, with emphasis on trade, finance, population growth and technological change.

Other analytical tools and methods of peace science, and alternatives to war.
ECON 341 Labor Economics (III)  
For description, see ILRLE 240.

ECON 351 Industrial Organization I (III)  
Fall. 4 credits. Prerequisite: ECON 313 or its equivalent.
This course examines markets with only a few firms (i.e., oligopolies), and the primary focus is the strategic interactions between firms. Topics include static competition in oligopolies, cartels and other forms of collusive behavior, competition between firms producing differentiated products, entry behavior, R&D behavior, and government interventions in oligopoly industries (e.g., antitrust laws).

ECON 352 Industrial Organization II (III)  
Spring. 4 credits. Prerequisite: ECON 313 or its equivalent.
This course primarily focuses on the pricing decisions of firms. The course does not consider the strategic response of other firms to these pricing decisions. The pricing decisions include price discrimination, commodity bundling, pricing a product line and pricing a duopoly good. In addition to pricing decisions, the course considers topics associated with private information such as adverse selection, signaling, and moral hazard. Numerous theoretical models are presented and empirical results are discussed.

ECON 356 Monetary and Credit (III)  
Fall. 4 credits. Prerequisites: ECON 101-102 and 314.
A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

ECON 357 Public Finance: Money and Credit (III)  
Spring. 4 credits. Prerequisites: ECON 313 and 314.
The theory and decision making in the presence of uncertainty and the practical aspects of particular asset markets are examined.

ECON 358 Public Finance: The Microeconomics of Government (III)  
Fall. 4 credits. Prerequisites: ECON 101-102 and 313, or their equivalent, and one semester of calculus.
The role of government in a free market economy is analyzed. Topics covered include public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature vary from term to term.

ECON 359 Public Finance: Resource Allocation and Fiscal Policy (III)  
Spring. 4 credits. Prerequisites: ECON 101-102, 313 or their equivalent and 1 semester of calculus. This course covers the revenue side of public finance and special topics. Subjects covered include the federal debt, the budget, and government regulation and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

ECON 360 International Trade Theory and Policy (III)  
Fall. 4 credits. Prerequisites: ECON 101-102 and 313.
This course surveys the sources of comparative advantage. It studies commercial policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

ECON 361 International Trade Theory and Policy (III)  
Fall. 4 credits. Prerequisites: ECON 101-102 and 313.
This course surveys the sources of comparative advantage. It studies commercial policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

ECON 362 International Monetary Theory and Policy (III)  
Spring and summer. 4 credits. Prerequisites: ECON 101-102 and 314.
This course surveys the determination of exchange rates and theories of balance of payments adjustments. It also explores open economy macroeconomics, and it analyzes some of the institutional details of foreign exchange markets, balance of payments accounting, and the international monetary system.

ECON 363 Game Theoretic Methods (III)  
Fall, spring. 4 credits. Prerequisites: ECON 101 or equivalent.
This course introduces students to the use of game-theoretic methods for the social sciences. This leads to an analysis of the social and economic foundations of economics which prepares students to think strategically on social and economic matters and thus serve as a background for more advanced courses in economics, game theory, and related social sciences.

ECON 364 Economic Development (III)  
Fall. 4 credits. Prerequisites: ECON 313 or equivalent.
Study of the problem of sustaining accelerated economic growth in less-developed countries. Trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change are emphasized.

ECON 365 Applied Economic Development (III)  
Spring. 4 credits. Prerequisite: ECON 101-102. This course examines several special topics in the economics of developing countries. Among the topics covered recently are the concepts of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.

ECON 404 Economics and the Law (III)  
Fall. 4 credits. Prerequisite: ECON 101. An examination, through the lens of economic analysis, of legal principles drawn from the various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

ECON 408 Production Economics and Policy (III)  
For description, see AEM 608.

ECON 409 Environmental Economics and Policy (III)  
For description, see AEM 451.

ECON 415 Price Analysis (III)  
For description, see AEM 415.

ECON 416 Intertemporal Economics (III)  
Spring. 4 credits. Prerequisites: ECON 313. Not offered 2001-2002. This course is intended for advanced economics majors who are especially interested in economic theory. Topics covered: (1) review of the one good Ramsey model of optimal savings and accumulation; conditions for intertemporal efficiency in production; comparative dynamics and sensitivity analysis; (2) some earlier models of capital accumulation; the roles of present value and internal rate of return in guiding investment decisions; (3) growth, exhaustible resources; pollution and conservation; discussion of the trade-offs facing a society.

ECON 417 History of Economic Analysis (III)  
Fall or spring. 4 credits. Prerequisites: ECON 101-102 or permission of instructor. Covers early writings in economics and their relationship to current economic analysis and policy issues. Examples include: ancient and medieval philosophers on justice in exchange; mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Capitulo); and general competitive equilibrium (the Physiocrats). The most recent reading assignment in this course isAdam Smith's Wealth of Nations but the emphasis is on the relationship between the preoccupations of Adam Smith and his Wealth of Nations to modern economics analysis and current efforts to answer some of the questions raised in the early writing on economics.

ECON 419 Economic Decisions under Uncertainty (III)  
Fall. 4 credits. Prerequisites: ECON 313 and 314. Not offered 2001-2002. This course provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.

ECON 420 Economics of Family Policy—Adults  
Economics 420 and 421 together, count as 1 course for the Economics major. For description, see PAM 320.

ECON 421 Economics of Family Policy—Children  
Economics 420 and 421 together, count as 1 course for the Economics major. For description, see PAM 321.

ECON 425 Economic History of Latin America @# (III)  
Spring. 4 credits. A survey of changing economic institutions and policies from pre-Columbian to modern times.

ECON 430 Policy Analysis: Welfare Theory, Agriculture, and Trade (III)  
For description, see AEM 630.

ECON 440 Analysis of Agricultural Markets  
ECON 440 and 441 together, count as 1 course for the Economics major. For description, see AEM 640.
ECON 441 Commodity Futures Markets
ECON 440 and 441 together, count as 1 course for the Economics major.
For description, see AEM 343.
ECON 443 Personnel Economics for Managers
For description, see IRLE 443.
ECON 444 Modern European Economic History
For description, see IRLE 444.
ECON 445 Topics in Microeconomic Analysis—Markets and Planning (III)
Fall, 4 credits. Prerequisites: ECON 313. Not offered 2001–2002.
This is a course of economic theory designed for upperclass undergraduates. Course contents may vary from year to year. Issues that may be examined include: How can economic activities be efficiently organized through the market mechanism? Why is the presence of many traders essential to efficiency? What can be done if the indivisibility in production processes becomes an important hindrance to competitive pricing? How can economic planning be decentralized efficiently? The course serves two purposes: to introduce concepts that are novel to undergraduates and relevant to public policy but require only a modicum of analytic tooling up, and to illustrate the deductive approach of modern economic analysis—how to define concepts unambiguously, how to form propositions in clear-cut fashion, and how to follow up logical implications sequentially to the conclusion.
ECON 446 Topics in Macroeconomic Analysis—is Keynesianism Dead? (III)
Fall or spring. 4 credits. Prerequisites: ECON 314. Not offered 2001–2002.
The coverage of this course may vary from term to term. Presently, the content of the course deals with the range of criticisms against Keynesian theory by the New Classical Economists, and the Equilibrium School, alias the Rational Expectations School. Despite the fact that almost all intermediate macroeconomic textbooks are Keynesian in perspective, clearly Keynesian economics is currently at bay. We review critically critiques to Keynesian theory.
ECON 447 Economics of Social Security (III)
For description, see CEH 346.
ECON 450 Resource Economics (III)
For description, see ARME 450.
ECON 451 Economic Security (III)
For description, see IRLE 340.
ECON 453 The Economics of Unemployment (III)
For description, see IRLE 348.
ECON 454 The Economics of Health Care (III)
For description, see IRLE 440.
ECON 455 Income Distribution (III)
For description, see IRLE 441.
ECON 456 The Economics of Employee Benefits (III)
For description, see IRLE 442.
ECON 457 Women in the Economy (III)
For description, see IRLE 445.
ECON 458 Topics in Twentieth-Century Economic History (III)
For description, see IRLE 448.
ECON 459 Economic History of British Labor 1750–1940 (III)
For description, see IRLE 446.
ECON 460 Economic Analysis of the Welfare State (III)
For description, see IRLE 642.
ECON 461 The Economics of Occupational Safety and Health (III)
For description, see IRLE 644.
ECON 464 Economics of Agricultural Development (III)
For description, see AEM 464.
ECON 465 Food and Nutrition Policy (III)
For description, see AEM 655.
ECON 466 Economics of Development (III)
For description, see AEM 666.
ECON 467 Game Theory (III)
Fall. 4 credits. Prerequisites: ECON 313 and 319.
This course studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).
ECON 468 Economic Problems of Latin America (III)
Spring. 4 credits. Prerequisites: ECON 101–102.
Current topics include, international debt, capital flight, economic integration, stabilization programs, etc.
ECON 469 China's Economy under Mao and Deng (III)
Fall. 4 credits. Prerequisites: ECON 101–102 or permission of instructor.
Examines the development of the Chinese economy and the evolution of China's economic system between 1949 and the early 1990s.
ECON 471 The Economies of the Former Soviet Union and of Central Europe: From Central Planning to Markets (III)
Fall. 4 credits. Prerequisites: ECON 101, 102.
The course introduces first the basic features of a centrally planned economy and proceeds to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis extends to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course proceeds to current attempts to move away from Socialist central planning and its legacies to market economy, privatization, and independence.
ECON 472 Comparative Economic Systems: East and West (III)
Fall. 4 credits. Prerequisites: ECON 101–102.
The course develops first a framework for studying economic systems and national economies and presents three simple stylized systemic models: capitalist market, socialist market, and central planning. Secondly, the course considers economic goals to be achieved (such as growth, stability, and productivity) and introduces quantitative measures used in the evaluation of the performance. Thirdly, comparative studies of selected national economies representing the models are carried out.
ECON 473 Economics of Export-Led Development (III)
Spring. 4 credits. Prerequisites: ECON 313, 314, or their equivalent.
This course examines the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration is on experiences within the West Pacific Rim.
ECON 474 National and International Food Economics (III)
For description, see NS 457.
ECON 475 The Economy of India (III)
Fall. 4 credits. Prerequisite: ECON 101–102 or equivalent background.
This course presents the major economics and development problems of contemporary India and examines the country's future economic prospects. It is, however, our aim to discuss these problems in their proper historical perspectives. Hence, the course starts with a brief outline of the social and political history of India. It then turns to a more detailed account of the economic history of India in two stages.
ECON 498 Independent Study in Economics
Fall or spring. Variable credit.
Independent study.
ECON 499 Honors Program
Fall and spring. 8 credits. Prerequisites: ECON 313, 314, 321 (or 319–320).
Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.
Graduate Courses and Seminars
ECON 609 Microeconomic Theory I
Fall. 4 credits.
Topics in consumer and producer theory.
ECON 610 Microeconomic Theory II
Spring. 4 credits.
Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.
ECON 613 Macroeconomic Theory I
Fall. 4 credits.
Course covers the following topics: static general equilibrium; intertemporal general equilibrium; infinitely lived agents models and overlapping generations models, welfare theorems; equivalence between sequential markets and Arrow-Debreu Markets, Ricardian proposition, Modigliani-Miller theorem, asset pricing, recursive competitive equilibrium, the Neoclassical Growth Model, calibration, and introduction to dynamic programming.
ECON 614 Macroeconomic Theory II
Spring. 4 credits.
Course covers the following topics: dynamic programming; stochastic growth; search models; cash-in-advance models; real business-cycle models; labor indivisibilities and lotteries; heterogeneous agents models, optimal fiscal and monetary policy; sustainable plans; and endogenous growth.
ECON 618 Applied Price Theory (also NBA 527)
Spring. 4 credits.
The course emphasizes the applications of the principles of price theory to a variety of problems taken from concrete, practical settings.

ECON 617 Intermediate Mathematical Economics I
Fall. 4 credits. Prerequisites: Calculus II and intermediate linear algebra.
The course covers selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).

ECON 619 Econometrics I
Fall. 4 credits. Prerequisites: ECON 319–320 or permission of instructor.
This course gives the probabilistic and statistical background for meaningful application of econometric techniques. Topics covered include: probability theory; probability spaces, random variables, distributions, moments, transformations, conditional distributions, distribution theory and the multivariate normal distribution, convergence concepts, laws of large numbers, central limit theorems. Monte Carlo simulation; sample statistics, sufficiency, exponential families of distributions. Further topics in statistics are considered in ECON 620.

ECON 620 Econometrics II
Spring. 4 credits. Prerequisites: ECON 619.
This course is a continuation of ECON 619 (Econometrics I) covering statistics: estimation theory, least squares methods, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nontested hypothesis testing; and econometrics: the general linear model, generalized least squares, specification testing, instrumental variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

ECON 639 Public Political Economy
Spring. 4 credits. Prerequisites: ECON 313 or equivalent.
Topics covered include the intrinsic nature of goods and services, increasing cost of production, externalities and congestion, attributes and government regulation essential for an effective market, the efficient role of government in non-market resource allocation methods, methods for inferring the demand for public goods, efficient public decision-making, the supply of public services and raising revenue through taxes and user-fees. Particular emphasis is placed on the intersection between fairness and efficiency in resolving conflicts over public good provision, including defining jurisdictions for the provision of particular services. Examples emphasize the proper provision of infrastructure services: physical (transportation, utilities, tele-information), human-capital (education and R&D), and biological (renewable resources, species diversity and the environment).

ECON 699 Readings in Economics
Fall or spring. Variable credit. Independent study.

ECON 703 Seminar in Peace Science
Fall. 4 credits.
Among the topics covered at an advanced level are game theory, bargaining and negotiation processes, cooperative procedures, microbehavior models, macroprocesses, and general systems analysis.

ECON 710 Stochastic Economics: Concepts and Techniques
Spring. 4 credits. Prerequisites: ECON 609, 610, 613, 614, 619, and 620.
This course reviews a number of techniques that have been useful in developing stochastic models of economic behavior. These include: discrete-time Markov processes, dynamic programming under uncertainty, and continuous-time diffusion processes. Examples of economic models drawn from recent literature on optimal capital accumulation and optimal savings and portfolio selection problems, permanent income hypothesis; dynamic models of price adjustment, etc. Advanced graduate students contemplating work in economic theory and econometric theory gain exposure to current research.

ECON 712 Advanced Macroeconomics
4 credits. Prerequisites: ECON 613, 614.
The purpose of this course is to introduce students to some of the topics and analytic techniques of current macroeconomic research. The course falls into three parts: dynamic programming, new Keynesian economics, and recent theories of economic growth. The dynamic programming section includes models of consumption, investment, and real business cycles. The new Keynesian section covers wage and price rigidity, coordination failure, and credit markets. The section on endogenous growth looks at recent efforts to add nonconvexities to models of optimal growth. These topics are intended to complement the material on overlapping generations covered elsewhere.

ECON 713 Advanced Macroeconomics II
Spring. 4 credits. Prerequisites: ECON 613, 614.
This course reviews the most recent research in endogenous growth theory. This theory is little more than a decade old, but it has produced a large number of both empirical and theoretical results that have substantially reshaped the general field of macroeconomics. It is perhaps no exaggeration to say that most of the work at the frontier of today's macroeconomics begins from this field. An increasing number of papers have been looking at important issues such as; learning by doing, R&D investment, market structure, private and public organization of R&D, education financing, human capital accumulation, technological change, growth and business cycles, inequality and growth, political equilibrium, democracy and growth, instability, social conflict, capital accumulation, intergenerational and vested interests and barriers to technology adoption, international transfers of technologies, sustainable development, etc.

This course aims to orient the student in this large and variegated literature consisting of recently published articles and working papers. Understanding this literature is a sound training in the analytical methods used at the frontier of theoretical research, but it also provides a number of empirical results at the center of the economic debate.

ECON 717 Mathematical Economics
4 credits. Prerequisites: ECON 609–610 (or equivalent training in micro theory) and MATH 413–414 (or equivalent training in analysis).
The primary theme of this course is to explore the role of prices in achieving an efficient allocation of resources in dynamic economies. Some of the classical results on static equilibrium theory and welfare economics on attaining optimal allocation through decentralized organizations are examined through an axiomatic approach. Some basic issues on capital theory are also analyzed.

ECON 718 Topics in Mathematical Economics

ECON 719 Advanced Topics in Econometrics I
Fall. 4 credits. Prerequisites: ECON 619–620 or permission of instructor.
Covers advanced topics in econometrics, such as asymptotic estimation and test theory, robust estimation, Bayesian inference, advanced topics in time-series analysis, errors in variable and latent variable models, qualitative and limited dependent variables, aggregation, panel data, and duration models.

ECON 720 Advanced Topics in Econometrics II
Spring. 4 credits. Prerequisites: ECON 619–620 or permission of instructor.
For description see ECON 719.

ECON 721 Time Series Econometrics
Spring. 4 credits. Prerequisites: ECON 619–620 or permission of instructor.
This course covers traditional and current time series techniques that are widely used in econometrics. Topics include: the theory of stationary stochastic processes including univariate ARMA(p,q) models, spectral density analysis, and vector autoregressive models, parametric and semi-parametric estimation; current developments in distributional theory; and estimation and testing in models with integrated regressors including, unit root tests, cointegration, and permanent vs. transitory components.

ECON 731 Monetary Economics
Spring. 4 credits. Prerequisites: ECON 614 or permission of the instructor.
Covers advanced topics in monetary economics, macroeconomics, and economic growth—such as overlapping-generations, taxes and transfers denominated in money, transactions demand for money, multi-asset accumulation, exchange rates, and financial intermediation.

ECON 732 Monetary Economics
Fall. 4 credits. Prerequisites: ECON 731 or permission of the instructor.
Covers advanced topics in monetary economics, macroeconomics, and economic growth—such as economic volatility, the "burden" of
government debt, restrictions on government borrowing, dynamic optimization, endogenous growth theory, technological evolution, financial market frictions, and cyclical fluctuations.

**ECON 735 Public Finance: Resource Allocation and Fiscal Policy (also AEM 735)**

Spring. 4 credits.
This course develops a mathematical and highly analytical understanding of the role of government in market economies and the fundamentals of public economics and related issues. Topics covered include: generalizations and extensions of the fundamental theorems of welfare economics, in-depth analysis of social choice theory and the theory on implementation in economic environments, public goods and externalities and other forms of market failure associated with asymmetric information. The theoretical foundation for optimal direct and indirect taxation is also introduced along with the development of various consumer surplus measures and an application to benefit cost analysis. Topics of an applied nature vary from semester to semester depending on faculty research interests.

**ECON 736 Public Finance: Resource Allocation and Fiscal Policy**

Fall. 4 credits.
This course spends a large part of the semester covering the revenue side of public finance. Topics include the impact of various types of taxes as well as the determination of optimal taxation. The impact of taxation on labor supply, savings, company finance and investment behavior, risk bearing, and portfolio choice are explored. Other topics include the interaction of taxation and inflation, tax evasion, tax incidence, social security, unemployment insurance, deficits, and interactions between different levels of government.

**ECON 737 Location Theory and Regional Analysis**

Fall. 4 credits. Prerequisites: ECON 609, 617, and Econometrics. Not offered 2001-2002.
Covers economic principles influencing the location of economic activity, its spatial equilibrium and dynamic forces. Topics include spatial pricing policies, price competition, and relocation by firms; residential location patterns; patterns of regional growth and decline; and patterns of urbanization.

**ECON 738 Public Choice**

Spring. 4 credits. Prerequisites: ECON 609, 610.
This class has two parts. It begins with an introduction to economic theories of political decision making. We review the theory of voting, theories of political parties and party competition, theories of legislative decision making and interest group influence. We also discuss empirical evidence concerning the validity of these theories. The second part uses these theories to address a number of issues in Public Economics. We develop the theory of political failure, analyze the performance of alternative political systems and discuss the problem of doing policy analysis which takes into account political constraints.

**ECON 741 Seminar in Labor Economics**

For description see ILRLE 744.

**ECON 742 Seminar in Labor Economics**

For description see ILRLE 745.

**ECON 751 Industrial Organization and Regulation**

Fall. 4 credits. Prerequisites: ECON 609, 610.
This course focuses primarily on recent theoretical advances in the study of industrial organization. Topics covered include: market structure, non-price quality, duration, location selection, repeated games, collusion, entry deterrence, managerial incentives, switching costs, government intervention, and R&D/Patents. These topics are discussed in a game-theoretic context.

**ECON 752 Industrial Organization and Regulation**

Spring. 4 credits. Prerequisites: ECON 609, 610, 751.
This course rounds out some topics in the Theory of Industrial Organization with the specific intent of addressing the empirical implications of the theory. The course reviews empirical literature in the SCP paradigm and in the NEIO paradigm.

**ECON 753 Public Policy Issues for Industrial Organizations**

The course takes an in-depth view of the interaction between the government and business. Methods of business control, including antitrust, price regulation, entry regulation, and safety regulation. Emphasis will be not only on the economic effects on business, but on the economics of selecting and evolving the method of control.

**ECON 755 Rivalry and Cooperation**

Fall. 4 credits. Prerequisites: Economics Graduate Core or instructor's permission.
In standard models, economic interaction is impersonal. Agents respond to price signals and measure their own welfare not in relative but in absolute terms. As a result, cooperative or competitive behavior emerges only when it coincides with narrow self-interest. This course explores the details of rivalry and cooperation in an effort to synthesize broader views of economic interaction. Topics include: the effect of concerns about relative income on wage rates, consumption, savings, and regulation; the effect of concerns about fairness on prices and wages; the conditions that foster trust and cooperation; and the role of positional competition in the distribution of economic rewards.

**ECON 756 Noncooperative Game Theory**

Fall. 4 credits. Prerequisites: ECON 609-610 and 619.
This course surveys equilibrium concepts for noncooperative games. We cover Nash equilibrium and a variety of equilibrium refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more! We pay attention to important special classes of games, including bargaining games, signaling games, and games of incomplete information. Most of our analysis is from the strict decision-theoretic point of view, but we also survey some models of bounded rationality in games, including games played by automata.

**ECON 757 Economics of Imperfect Information**

Spring. 4 credits. Prerequisites: ECON 609-610 and 619.
The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory are discussed.

**ECON 758 Psychology and Economic Theory**

Fall. Spring. 4 credits. Prerequisites: grad core or instructors permission.
This course explores the ways in which insights from psychology can be integrated into economic theory. Evidence is presented on how human behavior systematically departs from the standard assumptions of Economics and how this can be incorporated into modeling techniques.

**ECON 760 Topics in Political Economy**

Fall. 4 credits. Prerequisite: Economics graduate core or instructor's permission.
This course develops critiques and extensions of economic theory, taking into account the political and social moorings of economic activity and equilibria. The formation and persistence of social norms, the meaning and emergence of property rights, the role of policy advice in influencing economic outcomes; and the effect of political power and ideology on economic variables are studied. While these topics were popular in the classic works of political economy, recent advances in game theory and, more generally, game-theoretic thinking allows us to approach these topics from a new perspective. Hence, the course begins by devoting some lectures to elementary ideas in game-theory and strategic analysis.

**ECON 761 International Economics: Trade Theory and Policy**

Fall. 4 credits. Prerequisites: ECON 609, 610.
This course surveys the sources of comparative advantage. It analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and economics as applied to international economics may be covered.

**ECON 762 International Economics: International Finance and Open Economy Macroeconomics**

Spring. 4 credits. Prerequisite: ECON 761.
This course surveys the determination of exchange rates and theories of balance of payment adjustments. It explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics are covered.

**ECON 770 Topics in Economic Development**

For description, see AEM 667.

**ECON 771 Economic Development and Development Planning**

Spring. 4 credits. Prerequisites: graduate core or instructor's permission.
Reviews the existing literature on the determinants of economic growth and the interrelationship of growth and income distribution through the process of economic development. A general equilibrium approach...
ENGLISH

ENGLISH 459

■

The department recommends that students prepare themselves for the English major by taking one or more of its preparatory courses, such as “The Reading of Fiction” (ENGL 270), “The Reading of Poetry” (ENGL 271), or “Introduction to Drama” (ENGL 272). The “ENGL” prefix identifies courses sponsored by the Department of English, all of which appear in the English section of Courses of Study or the department’s supplementary lists of courses; it also identifies courses sponsored and taught by other academic units and cross-listed with English. These courses concentrate on the skills basic to the English major and to much other academic work—responsive, sensitive reading and lucid, strong writing. As First-Year Writing Seminar requirement, ENGL 201 and 202 will satisfy one-half the College of Arts and Sciences’ First-Year writing requirement. ENGL 280, 281, 288, and 289 are also suitable preparations for the major and are open to students who have completed their First-Year Writing Seminar requirement. ENGL 201 and 202, which together constitute a two-semester survey of major British writers, though not required are strongly recommended for majors and prospective majors. ENGL 201 and 202 (unlike ENGL 280, 288 and 289) are also “approved for the major” in the special sense of that phrase explained below.

To graduate with a major in English, a student must complete with passing letter grades 10 courses (40 credit hours) approved for the English major. All ENGL courses numbered 300 and above are approved for the major. In addition, with the exception of First-Year Writing Seminars (ENGL 270, 271, and 272), 200-level courses in creative and expository writing (ENGL 280, 281, 288, and 289) and courses designated for nonmajors, all 200-level ENGL courses are also approved for the major. Courses used to meet requirements for the English major may also be used to meet the “Humanities and the Arts” distribution requirement of the College of Arts and Sciences. Many of these courses may be used to meet the college’s “historical breadth” requirement as well.

Of the 40 credits required to complete the major, 8 credits (two courses) must be at the 400 level or above; 12 credits (three courses) must be courses in which 50 percent or more of the material consists of literature originally written in English before 1800, and another 12 credits (three courses) must form an intellectually coherent “concentration.” The 400-level and pre-1800 requirements may be satisfied only with ENGL courses, and ENGL 493–494, the Honors Essay Tutorial, may not be used to satisfy either one. Courses that satisfy the pre-1800 requirement are so designated in Courses of Study. Many English majors use ENGL 201 to begin meeting this requirement since it is an overview of earlier periods of British literature and so enables them to make more informed choices of additional pre-1800 courses. ENGL 202, however, does not qualify as a pre-1800 course. Neither do courses offered by other departments unless they are cross-listed with English. Although advanced courses in foreign literature read in the original languages may not be used to fulfill the pre-1800 requirement, they may be approved for the English major. The “ENGL” prefix provides they are included within the 12-credit limit described below. The three-course concentration requirement may be satisfied with any courses approved for the major. The department’s “Guide to the English Major” contains suggested areas of concentra-
As many as 12 credits in courses offered by departments and programs other than English may under certain conditions be used to satisfy English major requirements. Courses in literature and creative writing offered by academic units representing neighboring or allied disciplines (German Studies, Romance Studies, Russian, Asian Studies, Classics, Comparative Literature, Africana Studies, the Society for the Humanities, American Studies, Women's Studies, Religious Studies, Asian American Studies, Latino Studies, and Theatre, Film, & Dance) are routinely counted toward the 40 hours of major credit provided they are appropriate for juniors or seniors, as are most courses at the 300 level and above. English majors who are double majors may exercise this option even if all 12 credits are applied to their second major. All English majors are urged to take courses in which they read foreign works of literature in the original language, and for that reason 200-level literature courses for which qualification is a prerequisite (as well as more advanced foreign literature courses taught in the original language) may be included toward the English major. Credit from other non-ENGL courses may be included within the 12 credits of nond部artmental courses approved for the major only when the student is able to demonstrate to their adviser their relevance to his or her individual program of study.

**The Major in English with Honors**

Second-term sophomores who have done superior work in English and related subjects are encouraged to seek admission to the department's program leading to the degree of Bachelor of Arts with Honors in English. Following an interview with the chair of the Honors Committee, qualified students will be admitted provisionally to the program. During their junior year these students must complete at least one Honors Seminar (ENGL 491 or 492); they are encouraged to take an additional 400-level English course in the field in which they plan to concentrate. On the basis of work in these and other English courses, a provisional Honors candidate is expected to select a thesis topic and secure a thesis adviser by the end of the junior year. A student who has been accepted by a thesis adviser becomes a candidate for Honors rather than a provisional candidate. During the senior year, each candidate for Honors in English enters a year-long tutorial (ENGL 493-494) with the faculty member who has agreed to serve as the student's thesis adviser. The year's work culminates in the submission of a substantial scholarly or creative work to be judged by at least two members of the faculty. More information about the Honors Program may be found in a leaflet available in the English offices.

**First-Year Writing Seminars Recommended for Prospective Majors**

**ENGL 270 The Reading of Fiction**

Fall, spring, summer. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English. This course examines modern fiction, with an emphasis on the short story and novella. Students write critical essays on authors who flourished between 1870 and the present, such as James, Joyce, Woolf, Hurston, Lawrence, Fitzgerald, Hemingway, Faulkner, Rhys, Welty, Salinger, and Morrison. Reading lists vary from section to section, and some may include a novel, but close, attentive, imaginative reading and writing are central to all. *This course does not satisfy requirements for the English major.*

**ENGL 271 The Reading of Poetry**

Fall, spring, 3 credits. Each section limited to 1 student. Recommended for prospective majors in English. How can we become more perceptive, alert readers of poetry, and at the same time better writers of prose? This course attends to the rich variety of poems written in English, drawing on the works of poets from William Shakespeare to Sylvia Plath, John Keats to Li-Young Lee, Emily Dickinson to A. R. Ammons. We may read songs, sonnets, odes, villanelles, even limericks. By engaging in thorough discussion of writing assignments, we explore some of the major periods, modes, and genres of English poetry, and in the process expand the possibilities of our own writing. *This course does not satisfy requirements for the English major.*

**ENGL 272 Introduction to Drama**

Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English. Students in this seminar study plays, older and newer, in a variety of dramatic idioms and cultural traditions. Plays being performed by the theatre department will be included, if possible. A typical reading list might include works by Sophocles, Shakespeare, Moliere, Chekhov, Brecht, Miller, Beckett, and Shange. Course work consists of writing and discussion and the occasional viewing of live or filmed performances. *This course does not satisfy requirements for the English major.*

**Expository Writing**

**ENGL 288-289 Expository Writing (IV)**

Fall, spring, summer, winter. 3 credits. Each section limited to 16 students. Students must have completed their colleges' first-year writing requirements or have the permission of the instructor. S. Davis and staff. ENGL 288-289 offers guidance and an audience for students who wish to develop their skills in expository writing. Each section provides a context for writing defined by a form of exposition, a disciplinary area, a practice, or a topic intimately related to the written medium. Course members read in relevant published material and write and revise their own work regularly, while viewing and responding to each other's. Since these seminar-sized courses depend on members' full participation, regular attendance and submission of written work are required. Students and instructor will confer individually throughout the term. For more information please see the following web site: http://instructor.cit.comell.edu/Courses/engl288-89/. Topics for the various sections include:

- **Section 1:** Roensch, R.—The Essay: Personal to Public
- **Section 2:** Wesley, M.—Myths of the City
- **Section 3:** Staff—Reading the News, Understanding the Media

**Section 4:** Boehm, A.—Minding the Body

**Section 5:** LeGendre, B.—Issues, Audiences, and Ourselves

Spring 2002 topics TBA.

See English department *Course Offerings* for full fall and spring section descriptions.

This course does not satisfy requirements for the English major.

**ENGL 381 Reading as Writing (IV)**

Fall. 4 credits. Course limited to 15 students. Prerequisite: permission of the instructor on the basis of a writing sample (critical/interpretive prose), which should reach the instructor before the first day of class. S. Davis.

"Haven't you ever happened to read while looking up from your book?" asked one theorist of reading, "not because you weren't interested, but because you were: because of a flow of ideas, stimuli, associations?" Students in this course look into the intracacies of the "reading-writing" process to see how a small number of nineteenth- and twentieth-century novels and poems, writing frequently about them, and reading each other's writing as collaborators and commentators. They "look up" frequently to pay conscious attention to the way writers' original literary works are often "readings" of the work of other writers and to the way our own readings may, critically and creatively, rewrite the literary texts we read. This is a course for English majors and non-majors who wish to extend their mastery of critical and interpretive prose and their understanding of what they do when they write it. It is advantageous for those planning to write honors theses in English or another discipline to take this course. The 2001 reading list (tentatively): Nabokov's *Pale Fire*, Wordsworth's two-part *Prelude*, Bronte's *Jane Eyre*, James' *Turn of the Screw*, Rhys' *Wide Sargasso Sea*, and Wilde's *Dorian Gray.*

**ENGL 386 Philosophic Fictions (IV)**

Spring. 4 credits. S. Davis.

Course limited to 15 students. Prerequisite: permission of the instructor on the basis of a writing sample (critical/interpretive prose), which should reach the instructor before the first day of class.

"Fictions"—of voice, audience, plot, point of view, figurative language, and thought—abound in good expository writing; they stand out in works that deliberately test and play with ideas: dialogues, satires, parodies, parables, philosophic tales, and "thought-experiments." Students write critically about such works and the issues they raise and experiment with writing in similar forms. The "fictions" read and course are not realistic narratives or evocations of personal experience; they are the vehicles and their understanding of what they do when they write it. Readings include such works as Plato's *Republic*, Swift's "Modest Proposal" and *Tale of a Tub*, Voltaire's *Candide*, Carroll's *Alice* books, short fiction by Jorge Luis Borges and Octavia Butler, and essays by Richard Rorty and Anthony Appiah.

**ENGL 387 Autobiography: Theory and Practice (IV)**

ENGL 388 The Art of the Essay (IV)  
Fall. 4 credits. Limited to 15 students.  
Interested students should submit 1 or more pieces of recent writing (prose) to the instructor before the beginning of the term, preferably at pre-registration. L. Falkundny.  
For both English majors and nonmajors who have done distinguished work in first-year writing seminars and in such courses as ENGL 280, 281, 288, or 289 and who desire intensive practice in writing essays as a kind of creative nonfiction. The course assumes a high degree of self-motivation, a capacity for independent work, and critical interest in the work of other writers; it aims for a portfolio of conceptually rich and stylistically polished writing.

Creative Writing  
Students usually begin their work in Creative Writing with ENGL 280 or 281, and only after completion of the First-Year Writing Seminar requirement. Please note that either ENGL 280 or ENGL 281 is the recommended prerequisite for 300-level creative writing courses. ENGL 280 and 281 may satisfy a distribution requirement in your college (please check with your college adviser). ENGL 382-383, 384-385, and 480-481 are approved for the English major.

ENGL 280-281 Creative Writing (IV)  
Fall, spring, summer, winter. 3 credits.  
Prerequisites: completion of the Freshman Seminar requirement. Limited to 18 students.  
Majors and prospective majors, please note. Although recommended for prospective English majors, ENGL 280-281 cannot be counted toward the 40 credits required for completion of the English major. It is a prerequisite for 300-level courses in creative writing, which count toward the major. ENGL 280 is not a prerequisite for ENGL 281.

An introductory course in the theory, practice, and reading of prose, poetry, and allied forms. Students have the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.

ENGL 382-383 Narrative Writing (IV)  
Fall, spring; 383. 4 credits each term. Each section limited to 15 students. Previous enrollment in ENGL 280 or 281 recommended. Prerequisite: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, D. McColl; Sec. 2, S. Vaughn; Sec. 3, R. Morgan. Spring: H. Viramontes, M. Koch, S. Vaughn. The writing of fiction: study of models; analysis of students’ work.

ENGL 384-385 Verse Writing (IV)  
Fall or summer; 384; spring; 385. 4 credits each term. Each section limited to 15 students. Prerequisites: ENGL 280 or 281, or permission of instructor. Fall: P. Janowitz, K. McClane. Spring: P. Janowitz, A. Fulton. The writing of poetry; study of models; analysis of students’ poems; personal conferences.

ENGL 480-481 Seminar in Writing (IV)  
Fall, spring; 480. 4 credits each term. Each section limited to 15 students. Prerequisite: permission of instructor, normally on the basis of a manuscript. The manuscript should be submitted to the instructor no later than the first day of class. Previous enrollment in ENGL 280 or 281 and at least one 300-level writing course recommended. Successful completion of one half of the 480-481 sequence does not guarantee enrollment in the other half; students must receive permission of the instructor to enroll in the second course. Fall: Sec. 1, H. Viramontes, Sec. 2, R. Morgan. Spring: P. Janowitz, S. Vaughn.

Intended for those writers who have already gained a basic mastery of technique. Although ENGL 480 is not a prerequisite for ENGL 481, students normally enroll for both terms and should be capable of a major project—a collection of stories or poems, a group of personal essays and a novel—to be completed by the end of the second semester. Seminars are used for discussion of the students’ manuscripts and published works that individual members have found of exceptional value.

Courses for Freshmen and Sophomores

ENGL 201-202 The English Literary Tradition # (IV)  
201: Fall. 4 credits. ENGL 201 is not a prerequisite for 202. This course may be used as one of the three courses before 1800 required of English majors. A. Galloway.

An introduction to the study of English literature, examining its historical development and some of its achievements within the contexts of cultural, intellectual, and religious history from its beginnings in the 8th century through the 17th century. Some of the works we read, discuss and write about across this thousand-year span are Beowulf; Sir Gawain and the Green Knight; selections from Chaucer’s Canterbury Tales and Spenser’s Faerie Queene; Shakespeare’s Sonnets and King Lear; poems by Sidney, Jonson, Donne, Herbert, Herrick, and Marvell; and selections from Milton’s Paradise Lost.

202: spring. 4 credits. D. Fried.

A survey of English literature from the late seventeenth century through the start of the twentieth century. The focus is on English poetry, drawn from a range of genres and modes, and including Pope’s Rape of the Lock and the poems and illustrations of Blake’s Songs of Innocence and of Experience. In addition we read two novels (Swift’s Gulliver’s Travels, Austen’s Persuasion), and one play (Wilde’s The Importance of Being Earnest). Lectures twice a week, and once a week small discussion groups provide a chance for closer scrutiny of texts and topics covered in the lectures.

ENGL 207 Introduction to Modern Poetry (IV)  
Fall. 4 credits. R. Shepherd.

This course samples the vast array of poetic modes and forms employed over the past century and a half, with primary emphasis on the work of American poets. Our focus in the course is on the poems themselves—what they mean, how they feel, sound, look, and behave. Lectures, discussions, and written assignments emphasize both the craft of writing poetry and the discipline of reading it with understanding and appreciation. No previous study of poetry required.

ENGL 208 Shakespeare and the Twentieth Century (IV)  
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. S. Davis.

What can we learn about Shakespeare’s plays from their reception in the twentieth century? What can we learn about twentieth century cultures from their appropriations of these texts and their reinventions of the Shakespeare legend? Can the four or five plays with their adaptations in fiction, theater, and film and explore the uses made of Shakespeare in education, advertising, and public culture. Our discussions try to illuminate the vast differences and startling continuities among the Shakespearean texts handed down by earlier times and those recovered or invented in the modern era; we also pay attention to the variety of critical approaches readers and viewers have taken to Shakespeare on the page and in performance.

For spring 2002, tentatively: Romeo and Juliet, Titus Andronicus, Othello, Macbeth, and The Tempest, together with plays by Eugene Ionesco and Aimé Césaire and films or stage productions directed by Baz Luhrmann, Julie Taymor, Akira Kurosawa, Trevor Nunn, Janet Suzman, and Fred Wilcox.

ENGL 227 Shakespeare # (IV)  
Spring, summer, and winter. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. W. Wetherbee.  
Careful study of 10 of Shakespeare’s major plays, including at least three videotaped performances.

Major Genres and Areas

ENGL 203 Major Poets (IV)  
Fall. 4 credits. R. Gilbert.

Intensive readings in the work of nine poets chosen to represent important periods, modes, and assumptions about the uses of poetry. Poets studied may include William Shakespeare (the sonnets), Andrew Marvell, Alexander Pope, John Keats, Emily Dickinson, Robert Browning, Robert Frost, Gwendolyn Brooks, and Seamus Heaney.

ENGL 209 Introduction to Cultural Studies (IV)  

ENGL 220 Survey in U.S. Latino Literature (IV)  

ENGL 251 Twentieth-Century Women Novelists (also WOMNS 251 and AM ST 252) (IV)  
Fall. 4 credits. S. Samuels.

This course is particularly concerned with questions about women’s experience and perspective and exploring intersections of gender, ethnicity, race, sexuality, and other vectors of identity. We read novels by Nella Lutman, Dorothy Allison, Louise Erdrich, Toni Morrison, Helena Maria Viramontes, Fae Ng, Cristina Garcia, and others. Assignments include two papers, a research project, and a number of short in-class writings.
ENGL 255 African Literature # (IV)
Spring. 4 credits. B. Jeyifo.
An introduction to major African writers and literary traditions. Authors to be studied may include Wole Soyinka, Chinua Achebe, Bessie Head, Ayi Kwei Armah, Ama Ata Aidoo, Tayeb Salih, and Ousmane Sembene.

[ENGL 260 Introduction to American Indian Literatures (also AM ST 260) # (IV)]

ENGL 262 Introduction to Asian American Literature (also AM ST 262 and AAS 262) # (IV)
Spring. 4 credits. S. Wong.
This course introduces students to a range of writing by Asian Americans and to some critical issues concerning the production and the reception of Asian American texts. In reading through selected works of prose, poetry and drama, we ask questions about the relation between literary forms and the sociohistorical context within which they take on their meanings, and about the historical formation of Asian American identities.

ENGL 274 Scottish Literature and Culture # (IV)
Fall. 3 or 4 credits. The course may be taken for 3 or 4 credits; those taking it for 4 credits will complete an additional writing project. If taken for four credits, it counts toward the English major, but non-majors are welcome. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill and H. Shaw.
Scotland was an independent kingdom during most of its history. Although it is now politically united with England, it preserves a cultural distinctiveness. This course provides an introduction to Scottish literature and its cultural context. We focus on important Scottish literary texts, with special emphasis on the medieval period and the eighteenth through the twentieth centuries. The course should appeal to those who wish to learn more about their Scottish heritage, to those who wish to view in a new perspective works normally considered monuments of "English" literature, and to those who simply wish to know more about a remarkable culture and its literary history. We begin with the historical origins of pet keeping in the eighteenth century, and then turn to focus on the literature of pets in the nineteenth and twentieth centuries. We move from literary critical questions about the representation of animals to discussions of the social and moral dimensions of pet keeping and the ethics of animal rights. The course includes a workshop on the modern veterinarian's relationship with the companion animal and its owner, and a forum on the ethics of the treatment of animals. Reading include works by T. H. White, Virginia Woolf, Jack London, Albert Payson Terhune, and J. M. Coetzee. Three short papers and a final interdisciplinary term paper are required.

ENGL 275 The American Literary Tradition (also AM ST 275) # (IV)
Spring. 4 credits. N. Waligora-Davis.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

[ENGL 278 Queer Fiction (also WOMNS 278) # (IV)]

[ENGL 295 The Essay in English # (IV)]
4 credits. Prerequisite: completion of the First-Year Writing Seminar requirement. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2002-2003. L. Fukunid.

Special Topics

ENGL 217 History of the English Language (also LING 217) # (III or IV)
Fall. 4 credits. W. Harbert.
See LING 217 for full course description.

ENGL 220 The Idea of the Pet in Literature and History # (IV)
Spring. 4 credits. Enrollment is limited to 15 students. While not restricted to sophomores this course is intended to offer sophomores especially an opportunity to work closely with faculty in a seminar environment within a strong interdisciplinary context. L. Brown.
Animal companions are signs of our modernity. They can confirm our humanity, or call it into question. This course studies the culture of pet keeping from the perspectives of literature, history, and philosophy. It introduces students to the methods of cultural critique currently prominent in literary studies, and to some of the recent approaches to the topic of the human relation to the natural world. We begin with the historical origins of pet keeping in the eighteenth century, and then turn to focus on the literature of pets in the nineteenth and twentieth centuries. We move from literary critical questions about the representation of animals to discussions of the social and moral dimensions of pet keeping and the ethics of animal rights. The course includes a workshop on the modern veterinarian's relationship with the companion animal and its owner, and a forum on the ethics of the treatment of animals. Reading include works by T. H. White, Virginia Woolf, Jack London, Albert Payson Terhune, and J. M. Coetzee. Three short papers and a final interdisciplinary term paper are required.

ENGL 221 The Ethics of Imagining the Holocaust # (IV)
Fall. 4 credits. Enrollment is limited to 15 students. While not restricted to sophomores this course is intended to offer sophomores especially an opportunity to work closely with faculty in a seminar environment within a strong interdisciplinary context. D. Schwarz.
Beginning with memoirs and diaries, and moving to realistic texts and finally fables, myths, and cartoons, this interdisciplinary seminar about ethical issues in writing and reading about the Holocaust selects its syllabus from the following texts: Wiesel's "Never," Levi's "Survival at Auschwitz" and The Periodic Table, Anne Frank: The Diary of a Young Girl, Lanzmann's film Shoah, Borowsky's This Way for the Gas, Chamber Laddys and Gentlemen, Ozick's The Shavel (the volume including both "The Shavel" and the sequel, "Rosa"), Hersey's The Wall, Epstein's King of the Jews, Kosinsky's The Painted Bird, both Kineally's novel Schindler's List and the Spielberg film of that novel, Styron's Sophie's Choice, the recent film Life Is Beautiful, Appelfeld's Baderem, Schwarz-Bart's The Last of the Just, and Spiegelman's Maus. We also read a few of the important histories of the period, including those by Lucy Davidowicz (The War Against the Jews, 1933-1945) and Martin Gilbert (The Holocaust: The Jewish Tragedy). Working with a number of major memoirs, novels, and films about the Holocaust, the course discusses the following issues: How does one survive when the traditional assumptions on which civilized life are based break down? How does one discuss how memory transforms reality and how words transform meaning? Can we speak ethically, when addressing the Holocaust? How can those of us who are not survivors write ethically about the Holocaust since, through our writing, we cannot make amends for not being victims? Why do some of those closest to events object to films like Schindler's List? What is the ethics of ethnocentrism? Can we define an ethics of Holocaust writing? How would such an ethics affect the aesthetics of representing the Holocaust—or, indeed, other historical atrocities?

ENGL 225 Rewriting the Classics: Stories of Travels and Encounters (also COM L 225) # (IV)
Spring. 4 credits. J. Monroe.

ENGL 226 Asian American Women and Literature (also AAS 266 and AM ST 266) # (IV)
Fall. 4 credits. S. Davé.
This course explores the intersection of ethnicity, race, class, gender, and sexuality in the lives and literature of Asian American women. We discuss and analyze the historical, and contemporary social, political, and economic forces that have shaped women's lives and how they are reflected in literature. Our goal in the course is to explore and discover the diversity of voices in Asian American women's experiences and the similarities and commonalities of their social histories.

ENGL 235 Rewriting the Classics: Stories of Travels and Encounters (also COM L 225) # (IV)
Spring. 4 credits. Lab fee. Enrollment limited to 20. L. Bogel.
Through detailed analysis of about 15 of Hitchcock's major films—from early British talkies (Blackmail, The Thirty-Nine Steps), to early 40s work in Hollywood (Shadow of a Doubt, Notorious), and major American films of his late period (Rear Window, Vertigo, North by Northwest, Psycho, The Birds)—we consider Hitchcock as a major technical and stylistic innovator in the history of cinema. As texts for psychoanalytic and feminist approaches to study, his films invite questions about film language, the ethics of spectatorship, and the nature of desire and sexuality. For this writing-intensive seminar—including two essay exams, regular readings, and viewing exercises in close analysis—students must be free to attend Monday late afternoon screenings of the films.

ENGL 266 Asian American Women and Literature (also AAS 266 and AM ST 266) # (IV)
Fall. 4 credits. P. Sawyer.
We were the sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time
of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an impassioned critique that changed American society? What can the experiences of young “boomers” contribute to a later generation, the first of the twenty-first century? The course explores these and other questions by focusing on the topics of racial justice, the Vietnam War, the counterculture, the New Left, the woman’s movement and the movement for gay rights. Texts include *The Autobiography of Malcolm X*, *The Electric Kool-Aid Acid Test*, *Dispatches*, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, and manifestos.

**ENGL 273 Children’s Literature (IV)**

Fall. 4 credits. J. Adams.

An historical study of children’s literature from the seventeenth century to the present, principally in Europe and America, which explores changing literary forms in relation to the social history of childhood. Ranging from oral folklore to contemporary novelistic realism (with some glimpses at film narrative), major figures include Perrault, Newberry, the Grimms, Andersen, Carroll, Alcott, Stevenson, Burnett, Kipling, Disney, E. B. White, C. S. Lewis, Sendak, Silverstein, Mildred Taylor, and Bette Greene. We also encounter a variety of critical models—psychoanalytic, materialist, feminist, structuralist—that scholars have employed to explain the variety and importance of children’s literature.

**ENGL 291 The American 1920s: Literature and Culture (also AM ST 291) (IV)**

**ENGL 292 Introduction to Visual Studies (IV)**

Spring. 4 credits. T. Murray.

See A&S 200 for full course description.

**Courses for Sophomores, Juniors, and Seniors**

Courses at the 300 level are open to sophomores, juniors, and seniors and to others with the permission of the instructor.

**ENGL 302 Literature and Theory (also ENGL 602 and COM L 302 and 622) (IV)**

Fall. 4 credits. J. Culler.

Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings by Roland Barthes, Judith Butler, Jacques Derrida, Michel Foucault, Barbara Johnson, Jacques Lacan, and others. No previous knowledge of literary theory is assumed.

**ENGL 308 Icelandic Family Saga (IV)**

Fall. 4 credits. This course may not be used as one of the three pre-1800 courses required of all English majors. T. Hill.

An introduction to the Icelandic family saga—considered by many to be the native heroic literary genre of Iceland. Texts vary but normally include the *Prose Edda*, the *Poetic Edda*, *Hrafnkels Saga*, *Njal Saga*, *Laxdela Saga*, and *Grettirs Saga*. All readings are in translation.

**ENGL 310 Old English in Translation (IV)**

**ENGL 311 Old English (also ENGL 611) (IV)**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.

This course provides a grounding in the Old English language, and precedes the reading of some major texts: *The Wanderer* and *The Battle of Maldon*. No previous knowledge of Old or Middle English is required or expected. There is both a midterm and a final, plus oral reports. Students are encouraged to follow their own interests. Graduate students are expected to do a substantial paper, or other research exercise.

**ENGL 312 Beowulf (also ENGL 612) (IV)**

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill.

A close reading of *Beowulf*: Attention is given to relevant literary, cultural, and linguistic issues. One semester’s study of Old English, or the equivalent, is recommended.

**ENGL 313 The Structure of English (also LING 311) (III or IV)**

Fall. 4 credits. M. S. Unna.

See LING 313 for full course description.

**ENGL 314 Life, Literature, and Power in Late-Medieval England (also HIST 310) (IV)**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of all English majors. A. Galloway and P. Hyams.

See HIST 310 for full course description.

**ENGL 319 Chaucer (IV)**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.

This course will begin with the study of the major *Canterbury Tales* and some of his minor works, such as *The Book of the Duchess*: If time permits, we will read at least part of his great epic romance *The Charge of Edward*. All works will be read in Middle English, but ample time will be devoted to learning the language, for it is impossible to read Chaucer as a poet without Middle English. There will be lectures on Chaucer’s life, society, literary, and religious content. There will be take-home, mid-, and end-of-term exams and student presentations.

**ENGL 321 Spenser and Malory (also RELST 319) (IV)**

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Informal lecture and discussion. Two papers, no exams. C. Kaske.

Paired selections covering about half of *Malory’s Mort d’ Arthur* and half of Spenser’s *Faerie Queene*. The French *Prosse Arturian Cycle*, Chretien’s romances, Sir Gawaye and *The Green Knight*, and some of Spenser’s minor poems are mentioned occasionally as background. Comparisons are possible in style, development, and some of the major themes of the Arthurian romance from the Middle Ages to the Renaissance.

**ENGL 327 Shakespeare: Gender and Power (also WMNS 327) (IV)**

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2002–2003.

**ENGL 328 The Bible (IV)**

Fall. 4 credits. G. Teskey.

An introduction to the Bible as what William Blake called “the great code of art.” The purpose of the course is to provide students of English literature with a basic knowledge of that literature’s most important, underlying text. We examine such matters as the significance of the theological division of the Bible into “old” and “new” testaments; the division of the Hebrew scriptures into narrative, legal, historical, and prophetic books; the structure of the new testament writings about Jesus; the Christian church; and history; the historical contexts for various parts of the Bible, in particular the fate of the Hebrew nation from about 1200 B.C. and of the early Christian church under the Roman empire; the source of poetic imagery that Biblical writings have provided for three thousand years; and the unusual, imaginative power of prophecy. The King James Version (1611) is used.

**ENGL 329 Milton (IV)**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Boegel.

An introduction to the life, poetry, and ideas of John Milton, the most important English poet after Shakespeare.

**ENGL 330 Restoration and Eighteenth-Century Literature (IV)**

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. N. Saccamano.

A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction, romance, realism, satire, and the comic; heroic and mock-heroic modes; sentiment, sensibility, and the ridiculous and the sublime; the politics of gender and sexuality; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Behn, Finch, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

**ENGL 333 The Eighteenth-Century English Novel (IV)**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.

A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction, romance, realism, satire, and the comic; heroic and mock-heroic modes; sentiment, sensibility, and the ridiculous and the sublime; the politics of gender and sexuality; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Behn, Finch, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

**ENGL 340 The English Romantic Period (IV)**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Boegel.

A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction, romance, realism, satire, and the comic; heroic and mock-heroic modes; sentiment, sensibility, and the ridiculous and the sublime; the politics of gender and sexuality; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Behn, Finch, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

**ENGL 346 The English Romantic Period (IV)**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Boegel.

A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction, romance, realism, satire, and the comic; heroic and mock-heroic modes; sentiment, sensibility, and the ridiculous and the sublime; the politics of gender and sexuality; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Behn, Finch, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.
The course is concerned with close reading of formal experiments in narrative, lyric and dramatic representation and with analysis of their relation to political and cultural issues and contexts in an age of national reform and international revolution and conflict.

[ENGL 345 Victorian Controversies (IV)]
S. Siegel.

[ENGL 348 Studies in Women's Fiction (also WOMNS 348) (IV)]

[ENGL 350 The Modern Tradition I: 1890-1930] (IV)
Fall. 4 credits. D. Schwartz.
Critical study of major works by Hardy, Conrad, Lawrence, Joyce, Woolf, Eliot, Yeats, Hopkins, Wilde, Wallace Stevens, and others. While the emphasis is on close reading of individual works we place the authors and works within the latter part of the 19th century and the development of literary modernism (mostly but not exclusively in England), and relate literary modernism in England to that in Europe and America as well as to other intellectual developments. We are especially interested in the relationship between modern literature and modern painting and sculpture, occasionally looking at slides.

[ENGL 353 The Modern Indian Novel] (IV)
Spring. 4 credits. S. Mohanty.
A survey of the modern Indian novel, from its origins in the latter part of the 19th century to the present. An attempt is made to read the novels as responses to colonialism and to the challenges of a postcolonial society. Texts (mainly novels, but also a few short stories) drawn from a variety of Indian languages as well as English, including works by such authors as U. R. Ananthamurthy, Rabindranath Tagore, Salman Rushdie, Gopinath Mohanty, Anita Desai, Fakir Mohan Senapati, Ambai, Prem Chand, Arundhati Roy, and R. K. Narayan. Two term papers (5-6 pp. and 12-14 pp.) and a journal.

[ENGL 355 Decadence (also COM L 355 and WOMNS 355) (IV)]

[ENGL 356 Postmodernist Fiction (IV)]

[ENGL 361 Early American Literature (also AM ST 361) (IV)]
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required for the English major. J. Porte.
American literature and culture from the 1630s to the 1830s, including some of the following: prose and poetry of the Puritans (Winthrop, Bradford, Bradstreet, Rowlandson, Taylor, Cotton Mather) study of the witchcraft phenomenon; Edwards and Franklin; Tom Paine; Jefferson; Crevecoeur; Rebecca Rush's Kelroy; selections from Irving's Sketchbook; the writing of William Ape; the poetry of Bryant, a novel by James Fenimore Cooper; the early work of Emerson and Hawthorne.

[ENGL 362 The American Renaissance (also AM ST 362) (IV)]

[ENGL 363 The Age of Realism and Naturalism (also AM ST 363) (IV)]
Fall. 4 credits. Next offered 2002-2003.

[ENGL 364 American Literature Between the Wars (also AM ST 364) (IV)]

[ENGL 366 The Nineteenth-Century American Novel (also AM ST 366) (IV)]
Fall. 4 credits. D. McCall.
A study of American fiction in its first flowering. This course includes such major works as Hawthorne's The Scarlet Letter, Melville's Moby Dick, James's The Portrait of a Lady, and Mark Twain's Adventures of Huckleberry Finn.

[ENGL 367 The Modern American Novel (also AM ST 367) (IV)]
Spring. 4 credits. D. McCall.
A reading of some modern American writers of the first half of the twentieth century. Works by Hemingway, Fitzgerald, Faulkner. Lectures with some opportunity for discussion. Emphasis is on the individual works in their historical contexts.

[ENGL 368 American Novel Since 1950 (also AM ST 368) (IV)]
Fall. 4 credits. P. Sawyer.
A survey of some distinguished American novels of the recent past with particular attention to narrative structure, and political implication. We explore the relationships between gender, ethnicity, and "Americanness"; between documentary realism and "magical" or satiric abstraction; and between traumatic memory and the impulse to narrate. Readings may include Bellow's The Victim, Nabokov's Lolita, Heller's Catch-22, Pynchon's The Crying of Lot 49, Doctorow's Book of Daniel, Kingstone's The Woman Warrior, and Morrison's Beloved.

[ENGL 369 Fast Talking Dames and Sad Ladies (also WOMNS 369 and THETR 367) (IV)]
Fall. 4 credits. Enrollment limited to 15. Regular critical readings, frequent viewing questions, two longer essays, no exam. Students must be free to attend Monday and/or Tuesday late-afternoon screenings $20 lab fee. L. Bogel.
In this seminar focusing on brash heroines of Hollywood's 1940s films and 1950s films, we work to define romantic comedy and melodrama as genres, as vehicles for female stars, sassy or subdued; as ways of viewing the world. Psychoanalytic and feminist analyses of these films help us pose questions about gender and culture, about gendered spectatorship, about the relation of these films to American culture, about Hollywood's changing constructions of "woman," the "maternal," and the "feminine," and about representations of desire, pleasure, fantasy, and ideology. Required weekly screenings of such films as Gilda, The Lady Eve, Gentleman Prefer Blondes, Notorious, The Women, The Philadelphia Story, His Girl Friday, The Piano, Mrs. Dalloway, First Wives' Club, Silence of the Lambs, Girl Fight, Erin Brockovich.

[ENGL 370 The Nineteenth Century Novel] (IV)
Spring. 4 credits. J. Adams.
A survey of representative works by major British novelists from Austen to Hardy. As great writers in a realistic mode, these novelists explore the interplay of self and society, particularly the clash between traditional social orders—class, gender, marriage—and new forms of mobility and self-determination in the world's first industrial nation. We are especially interested in the novel's preoccupation with domestic life, and reshapers of the familiar "marriage plot" in a world of great social and sexual anxiety. In short: love and money. Readings include works by Austen, Thackeray, Dickens, C. Brontë, Braddon, George Eliot, and Hardy.

[ENGL 372 English Drama to 1700 (also THETR 372) (IV)]
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2002-2003.
S. McMillin.

[ENGL 373 English Drama from 1700 to the Present (also THETR 373) (IV)]
S. McMillin.

[ENGL 376 Survey in African American Literature: 1918 to present (IV)]
Spring. 4 credits. H. Spillers.
This course selects its readings from the genres of poetry, drama, fiction, and nonfiction produced by black American writers from the period of the Harlem Renaissance, to the present. Readings include poems by Harlem Renaissance poets, the poets of African-American modernism, i.e., Gwendolyn Brooks and Robert Hayden, and some of the poetry of the Black Arts Movement of the 60s, by way of Leroi Jones/Imamu Baraka's and Larry Neal's Black Fire; plays by Lorraine Hansberry, Ed Bullins, and August Wilson, nonfictional and fictional writings by Malcolm X, Martin Luther King, Nella Larsen, Jean Toomer, Zora Neale Hurston, Toni Morrison, and Nate Mackey. Cave, The Autobiography of an Ex-Colored Man, Passing, The Autobiography of Malcolm X, Letter from an Birmingham Jail, Black Boy, Invisible Man, Flight to Canada, Ozoneburn Tides, Middle Passage, Jazz, and The Bedouin Hornbook will be among the selected texts. The course is designed for majors, but is open to all interested students.

[ENGL 378 American Poetry Since 1950 (also AM ST 372) (IV)]

[ENGL 381 Reading as Writing (IV)]
See complete course description in section headed Expository Writing.

[ENGL 382-383 Narrative Writing (IV)]
See complete course description in section headed Creative Writing.

[ENGL 384-385 Verse Writing (IV)]
See complete course description in section headed Expository Writing.

[ENGL 386 Philosophic Fictions (IV)]
See complete course description in section headed Expository Writing.

[ENGL 388 The Art of the Essay (IV)]
T. Murray.

[ENGL 390 Autobiography: Memoir, Memory, and History (IV)]

[ENGL 395 Video: Art, Theory, and Politics (also THETR 395) (IV)]
T. Murray.

[ENGL 396 Introduction to Global Women's Literature (also WOMNS 396) (IV)]
E. DeLoughrey.
ENGL 397 Policing and Prisons in American Culture (also AM ST 395) (IV)
Spring. 4 credits. B. Maxwell.
Having attained the highest number of incarcerated persons of any nation on earth, while subjecting the citizenry to ordeals that most recently bear the names King, Louima, and Diallo, United States regimes of policing and imprisonment compel historical and critical attention. This course considers policing and imprisonment in United States culture, stressing prisoners' writing, song, slang, and graphic art. Edgar Allan Poe wrote in 1849: "in looking back through history...we should pass over all biographies of the 'good and great', while we search carefully the slight records of wretches who died in prison, in Bedlam, or upon the gallows." These records—novels, stories, poems, plays, raps, songs, essays, autobiographies, letters, manifestos, paintings, drawings, crafts, and tattoos—are of slight now than they were in Poe's day; they make up the greater part of our source material. In addition to work by imprisoned people, readings draw on carceral theory, activist documentation, and the history of justice. Finally, we consider questions raised by noncriminal confinement in U.S. history: slavery, indentured servitude, the reservation system for indigenous peoples, prisoners of war in the Civil War, the wartime internment of Japanese Americans, and carceral and punitive operations of the Immigration and Naturalization Service.

Courses for Advanced Undergraduates

Courses at the 400 level are open to juniors and seniors and to others by permission of instructor unless other prerequisites are noted.

ENGL 401 The Transoceanic Imagination (also ENGL 601 and S HUM 410) (IV)
Fall. 4 credits. E. DeLoughrey. See S HUM 410 for full course description.

ENGL 402 Literature as Moral Inquiry (IV)
Fall. 4 credits. S. Mohanty.
What can literary works, especially novels and short stories, tell us about moral issues? Should they be seen as suggesting a form of moral inquiry similar to the kind of philosophical discussion we get in, say, Aristotle's Nicomachean Ethics? Do they deal with the same range of issues? Can reading philosophical works in ethics together with novels that deal with similar themes help us understand these themes better? This course is an attempt to answer these questions. We read selections from key texts in moral philosophy, including works by Aristotle, Nietzsche. Our attempt is to use these works to help us understand the nature of moral debate and inquiry in novels like Eliot's Middlemarch, James's Portrait of a Lady, Morrison's Beloved, Woolf's Mrs. Dalloway, Heart of Darkness, and Achebe's Things Fall Apart.

Other writers we will probably read include Nadine Gordimer, Doris Lessing, and Kazuo Ishiguro. The emphasis is on close reading, with particular attention to the relationship between formal elements (such as the use of narrative techniques) and the moral questions the texts organize and explore. Assignments include two papers and a journal.

ENGL 403 Studies in American Poetry: Great Books, 1855-1826 (also AM ST 403) (IV)

ENGL 404 History Into Fiction: Nazis and the Literary Imagination (also COM L 404 and GERST 414) (IV)
Fall. 4 credits. Two papers; no exam. E. Rosenberg.
The twelve years of Hitler's rule remain the "longest," most critical years of the twentieth century. We read some eight to ten texts by Anglophone and Continental novelists and short-story writers (and a few playwrights and poets) that explore the salient features of the regime: the Weimar background (Thomas Mann's "Disorder and Early Sorrow," Isherwood's Goodbye to Berlin), Hitler's rise to power (Mann's "Mario and the Magician," Brecht's Arturo Ui, Sarre's "Childhood of a Leader"); civilian life in Nazi Germany (Brecht's "Jewish Wife" and other one-acters, Günter Grass's Tin Drum); World War II and the Occupation (Nabokov's "That in Aleppo Once," Heinrich Boll's short fiction, Camus's The Plague); the genocide (Peter Weiss's The Investigation, Borowski's This Way for the Gas, Ozick's "The Shawl" and "Rosa," lyrics by Celan, Nelly Sachs, Anthony Hecht). Mondays and Wednesdays are devoted to discussions of the readings; Fridays to twenty-minute oral reports by students on texts dealing with specific topics related to the course, from the Berlin Olympics to the role of the clergy, from Weimar culture to neo-Nazism, from the cult of Richard Wagner to "Aryan" physics, from "autobiographies" of the perpetrators to autobiographies of the survivors. Ancillary materials from the instructor's private documentation of life under the Nazis.

ENGL 413 Middle English (also ENGL 613) (IV)
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2003-2004.

ENGL 416 Chaucer and the Politics of Love (IV)
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2002-2003.

ENGL 417 Early Medieval Archaeology and Literature (also ENGL 617 and ARKEO 417 and 617) (IV)
Spring. 4 credits. Prerequisite: permission of instructor. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2002-2003.

ENGL 418 Racial Democracy in the Americas (also S HUM 418 and ENGL 613) (IV)
Spring. 4 credits. Z. Nunes.
See S HUM 418 for full course description.

ENGL 424 Spenser (also ENGL 624) (IV)
Fall. 4 credits. C. Kaske.
This course covers, either in whole or in part, almost all the works Spenser wrote—his epic The Faerie Queene, his pastoral poem The Shepheard-Epyllion, pastoral, picareque tale in verse, Neoplatonic hymns, sonnet-sequence, and prose colonialist treatise. Spenser has something for everybody. The Bible, Aristotle's Ethics, classical pastoralists and ethics, medieval romances, and the works of Dante, Chaucer, Petrarch, Ariosto, Tasso, Sidney, and Milton are brought in for comparison. Special attention is given to pedagogy and to rhetoric and versification. Political readings alternate with text-centered, formalist readings. Other concerns are intertextuality, self-contestation, gender, genre, the constructions of the sexually and politically alien, public and private virtues, and the interplay of hierarchically equalitarian power. Lecture and discussion. Everyone participates in class discussion and writes one brief paper of at least 8 pages; those enrolled for a letter grade also give a brief oral report and write a long paper, preferably on the epic. Open to graduate students and to undergraduate juniors and seniors.

ENGL 429 Adam's Rib and Other Divine Signs: Reading Biblical Narrative (also RELST 429) (IV)
Spring. 4 credits. L. Donaldson.
One of the most exciting developments in the field of biblical studies has been the introduction of new literary and critical methodologies to the texts of the Jewish and Christian Testaments. Reading the Bible through the lenses of semiotics, new historicism, reconstruction, cultural studies, postcolonialism, and feminism has posed a significant challenge to many traditional modes of biblical interpretation. This advanced undergraduate course introduces students to these new and provocative ways of reading biblical narrative. Rather than covering the entire Bible, the course instead focuses on stories and passages foregrounding specific critical issues. For example, feminist critics have examined why the book of Judges symbolically perpetrates violence against women (through the narratives of the Levite's concubine, Jephthah's daughter and the Benjaminite women), while semioticians have privileged the Judges story of Samson and Delilah. Postcolonial critics have interrogated such passages as Matthew's "great commandment" as well as the Johannine story of the woman at the well, while those in cultural studies have paid particular attention to the construction of a multicultural church in Luke/Acts. In this course, students read portions of Genesis and Exodus, Judges, Ruth, I and II Samuel, and the book of Daniel; from the Christian Testament, we read selections from Mark and Matthew as well as the Gospel of John. Course texts include J. M. Robinson, Reading Biblical Narrative: An Introductory Guide; Mieke Bal, Lethal Love: Feminist Literary Readings of Biblical Love Stories; Gale A. Yee, ed., Judges & Method: New Approaches in Biblical Studies; R. S. Sugirtharajah, ed., The expected to do more detailed oral reports and research papers.

ENGL 440 The Development and History of the American Novel (also AM ST 440) (IV)
Fall. 4 credits. P. Law.
The modern American novel in its major stages: the 19th century, the 20th century, and the postmodern movement. Emphasis is placed on the development of the novel as an American form.

ENGL 442 The American Short Story (also ENGL 642) (IV)
Fall. 4 credits. J. Zueger.
This course is an introduction to the history and development of the American short story. Emphasis is placed on the ways in which various cultural and aesthetic movements have affected the form of this particular literary genre.

ENGL 465 American Literature of the 19th Century (also AM ST 465) (IV)
Spring. 4 credits. T. morning.
This course focuses on the major literary figures of the 19th century, including Hawthorne, Melville, Emily and Edna Dickinson, Whitman, and Thoreau. Through a close reading of the works, students examine the themes and issues that shaped American society during this period.

ENGL 475 Modern American Literature (also AM ST 475) (IV)
Fall. 4 credits. L. Donaldson.
This course examines the major literature of the 20th century, including Hemingway, Steinbeck, Booth, and others. Students read and analyze the works in the context of their historical and cultural setting.

ENGL 485 American Literature Since World War II (also AM ST 485) (IV)
Spring. 4 credits. J. Zueger.
This course examines the major literature of the post-World War II period, includingMailer, Pynchon, and others. Students read and analyze the works in the context of their historical and cultural setting.
define their own critical positions as they plan their senior honors theses.

Section II. Women and the Novel Form

L. Brown.

This course raises central questions about the role of gender in the study of literature by exploring the development of the female-authored novel from the seventeenth to the twentieth century. Readings include Aphra Behn's Oroonoko, Fanny Burney's Evelina, Jane Austen's Emma, Charlotte Brontë's Jane Eyre, Virginia Woolf's A Room of One's Own and Mrs. Dalloway, and Toni Morrison's Sula. The course raises issues of race and slavery, love and marriage, sexuality and homophobia, history and women's history, and writing itself. Students in the class will work together to develop strong close readings of the texts and to explore the contexts in which they were written. These discussions are the basis for an evolving assessment of the status of a work authored by a woman. Is it shaped in a distinctive way? Does it evoke a specific response? Does it register an unusual apprehension of the psyche? Does it display a unique relation to sexuality? Does it intersect with its context, or with history, in a particular or unconventional fashion? Does it have a special relation to language, ideology, or culture? Students are asked to participate in discussion, and to write two short papers and a final research paper.

ENGL 493 Honors Essay Tutorial I
Fall or spring. 4 credits. Prerequisites: senior standing and permission of Director of the Honors Program.

ENGL 494 Honors Essay Tutorial II
Fall or spring. 4 credits. Prerequisites: English 493 and permission of Director of the Honors Program.

ENGL 495 Independent Study
Fall or spring. 2–4 credits. Prerequisites: Permission of departmental adviser and director of undergraduate studies.

ENGL 496 Decolonizing Identities and Values (IV)
Spring. 4 credits. S. Mohanty.

A close analysis of four novelists who have written, directly or indirectly about the theme of decolonization: Chinua Achebe, Toni Morrison, Salman Rushdie, and Leslie Marmon Silko. Our focus is on the decolonization of social and cultural identities, and the values that accompany the colonized identities as well as the process of decolonization. Selected theoretical readings on decolonization and identity will help inform and orient our discussions, but much of the time is spent pursuing close readings of a few novels and developing frameworks for comparative analyses of the aesthetic and socio-political visions of these writers. Two papers required, one 6–8 pages, and one 14–16 pages.

**Courses Primarily for Graduate Students**

Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600-level course should consult the instructor. The list of courses given below is illustrative only, a definitive list, together with course...

## ENGLISH FOR ACADEMIC PURPOSES

### ENGLF 205 English as a Second Language
D. Campbell, director; S. Schaffzin, F-H Yap

#### Note
Courses and credits do not count toward the B.A. degree.

### ENGLF 210 English as a Second Language
Fall. 4 credits. Prerequisite: placement by examination.

### ENGLF 211 English as a Second Language
Fall, spring, or summer. 3 credits. Prerequisite: placement by examination. D. Campbell.

### ENGLF 212 English as a Second Language
Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

### ENGLF 213 Written English for Non-Bilinguals
Fall. An all-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor. Individual conferences supplement class work.

### ENGLF 214 Written English for Non-Bilinguals
Spring. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology.

### ENGLB 115-116 English for Later Bilinguals
For description, see first-year writing seminar brochure.

## First-Year Writing Seminar

### ENGLB 115-116 Written English for Non-Native Speakers
Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

### ENGLB 205 English as a Second Language
Fall. 4 credits. Prerequisite: placement by examination. S. Schaffzin.

### ENGLB 206 English as a Second Language
Spring. 3 credits. Prerequisite: ENGLF 205 or placement by examination. S. Schaffzin.

### ENGLB 209 English as a Second Language
Fall or spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in classroom speaking and in informal conversational English techniques for gaining information. Students also practice giving informal presentations. Individual conferences with the instructor supplement class work.

### ENGLB 210 English as a Second Language
Spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in academic speaking. Formal classroom discussion techniques and presentation of information to a group. Presentations are videotaped and reviewed with the instructor. Individual conferences supplement class work.

### ENGLB 211 English as a Second Language
Fall. 3 credits. Prerequisite: placement by examination. D. Campbell.

Research paper writing. For the major writing assignment of this course, the students must have a real project that is required for their graduate work. This can be a thesis proposal; a pre-thesis; part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (with permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology.

### ENGLB 212 English as a Second Language
Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

### ENGLB 213 Written English for Non-Native Speakers
Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

### INTENSIVE ENGLISH PROGRAM

105 Morrill Hall
The Majors

The department offers two options for the major: German literature and culture, and German area studies. The latter is a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines. For both majors, there is a wide variety of courses co-sponsored with other departments (Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women’s Studies).

The department encourages double majors and makes every effort to accommodate prospective majors with a late start in German. Students interested in a major should consult the director of undergraduate studies, Peter Gilgen, 192 Goldwin Smith Hall.

German (Literature and Culture)

Although the emphasis of this track is on literature, majors may also pursue individual interests in courses on film and visual culture, theater and performing arts, music, intellectual and political history, and women’s studies that have a substantial German component. Please consult with the director of undergraduate studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, 220, 204, or 206.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, or 306) or the equivalent.

2. Complete six courses in German Studies at the 300 level or above. One of these must be the Senior Seminar (GERST 410).

German Area Studies

Students select courses from the Department of German Studies as well as courses with a substantial German component from other departments, such as Comparative Literature; Government; History; Music; Theatre, Film, and Dance; and Women’s Studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, 220, 204, or 206.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, or 306) or the equivalent.

2. Complete six courses with a substantial German component at the 300 level or above. Three of these must be in German Studies, including the Senior Seminar (GERST 410).

3. Select a committee of one or more faculty advisers to help formulate a coherent program of study. One of the advisers must be from the Department of German Studies.
Study Abroad in Germany

German Studies strongly supports Study Abroad as an opportunity for students to put their German to use by living and studying in the German cultural context. The experience of living abroad promotes enduring personal growth, provides new intellectual perspectives, and opens up academic and professional opportunities.

Students interested in studying abroad are encouraged to consider the Berlin Consortium (formerly also GERLA), of which Cornell is an associate member. The program is run in conjunction with the Free University of Berlin, and includes study and internships in Germany and Austria. Six weeks of a foreign language practicum held at the center of the consortium are followed by one or two semesters of study at the university. Participants enroll in regular courses at the university. Academic-year students have been assisted in finding internships between semesters. Prerequisite for participating in the program is five semesters of German language study, of which the last course must be on the 300 level.

Students interested in this or other study abroad options in Germany, Austria, or Switzerland should consult Gunhild Lischke (G75 Goldwin Smith; 255-0725; gl15@cornell.edu) as soon as possible.

Honors

Eligibility: A student wishing to receive honors in German Studies must have a GPA of 3.5 in all courses relevant to the major.

Committee: Candidates for honors form an advisory committee consisting of an adviser from German Studies and at least one additional faculty member.

Honors essay: During the first term of their senior year, students determine the focus of their honors essay through an appropriate course, GERST 453, under the direction of their advisers. During the second term they complete an honors essay, GERST 454, which will be evaluated by the committee.

Determination of honors: An oral examination concludes the process. Honors is determined by the essay, the exam, and grades in the major.

First-Year Writing Seminars

Consult the John S. Knight Institute brochure for course times, instructors, and descriptions.

Courses Offered in German

Note: All courses are now designated GERST. In earlier years courses were designated either GERLA or GERST. Course numbers remain the same.

GERST 121 Elementary German I

Fall or spring. 4 credits. Intended for students with no prior experience in German or with a language placement test (LPG) score below 37, or an SAT II score below 370. G. Lischke and staff.

Students develop basic abilities in listening, reading, writing, and speaking German in meaningful contexts through interaction in small group activities. Course materials including videos, short articles, poems, and songs provide students with varied perspectives on German language, culture, and society.

GERST 122 Elementary German II

Fall or spring. 4 credits. Prerequisite: GERST 121, LPG score 37-44, or SAT II 370-450, or obtain an LPG score of 56 or above after GERST 122 attain qualification and may enter a 200-level course; otherwise successful completion of GERST 122 is required for qualification. G. Lischke and staff.

Students build on their basic knowledge of German by engaging in intense and more sustained interaction in the language. Students learn more advanced language structures allowing them to express more complex ideas. Through oral presentations, interviews with native German speakers, German news broadcasts, reading German newspapers on the Internet.

GERST 123 Continuing German

Fall or spring. 3 credits. Provides language qualification. Limited to students who have previously studied German and have an LPG score 45-55 or SAT II 460-570.

Students continue to develop their language skills by discussing a variety of cultural topics and themes in the German-speaking world. The focus of the course is on expanding vocabulary, grammar, and reading comprehension, and working on writing skills. Work in small groups increases each student’s opportunity to speak in German and provides for greater feedback and individual help.

GERST 200 Contemporary Germany (formerly also GERLA 200) (IV)

Fall or spring. 3 credits. Provides language proficiency. Prerequisite: qualification in German (GERST 123 or LPG score of 56-64 or SAT II score of 580-670) or placement by examination. Staff.

A content-based language course on the intermediate level. Students examine important aspects of present-day German culture while expanding and strengthening their reading, writing, and speaking skills in German. Major topics draw from a variety of sources (fiction, newspapers, magazines, and the Internet). Units address a variety of topics including studying at a German university, modern literature, Germany and Europe, Germany’s role within the European Union, and Germany's role within the European Union, the role of the European Central Bank, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a Business German textbook.

GERST 204 Intermediate Conversation and Composition

Fall or spring. 3 credits. Prerequisite: GERST 200, GERST 201 or GERST 205 or placement by examination (placement score and CASE). Staff.

Emphasis is on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Material consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include awareness of culture, dependence of the media, perspectives, interviews with native German speakers, German news broadcasts, reading German newspapers on the Internet.

GERST 205 Business German I

Fall. 3 credits. GERST 205 provides language proficiency. Prerequisite: qualification in German (GERST 123), or an LPG score of 56-64, or an SAT II score between 580-670. G. Lischke.

Learn German and understand German business culture at the same time. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants learn about the business culture in Germany and how to be effective in a work environment. Germany’s role within the European Union, the dual education system, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a Business German textbook.

GERST 206 Business German II

Spring. 3 credits. Prerequisite: proficiency in German (GERST 205, 200, 201, or placement by examination (placement score and CASE)). G. Lischke.

This course is a continuation of GERST 205; however students without previous knowledge of Business German are welcome. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants learn about the business culture in Germany and how to be effective in a work environment. Germany’s role within the European Union, the role of the European Central Bank, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a Business German textbook. At the end of the course, the external Goethe Institut exam "Deutsch für den Beruf" will be offered.

GERST 301 Scenes of the Crime: German Mystery and Detective Fiction (IV)

Fall. 4 credits. Prerequisites: GERST 202, 220, 204, or equivalent, or permission of instructor. Taught in German. This course may be counted towards the requirement for 500-level language work in the major. P. Gilgen.

An exploration of German crime, detective, and mystery writing in texts ranging from the early nineteenth century to contemporary fiction. Authors to be studied may include:
Kleist, E. T. A. Hoffmann, Dürrenmatt, Schatten, Süsskind, Handke, and Oren. In addition to exercising hermeneutic skills (and, by extension, that gray matter of which Sherlock Holmes was so fond), this course aims at improving proficiency in aural and reading comprehension, as well as speaking and writing skills, with emphasis on vocabulary expansion, advanced grammar review, and stylistic development. Recommended to students interested in a combined introduction to literature and high-level language training. The follow-up course, GERST 302, Youth/Adolescence, is taught in the spring only.

**GERST 302 Youth Culture: Adolescence in German Fiction (IV)**
Spring. 4 credits. Prerequisite: GERST 202, 220, 204, 206 and 301 or equivalent or permission of instructor. Taught in German. P. Gilgen.

Examination of literary and cultural approaches to childhood, youth, and adolescence in texts ranging from the late eighteenth century to the present. Authors include: Hoffmann, Keller, Goethe, Mann, Walser, Musil, Zweig, Handke, and Kaschnitz. Aimed at further improving students’ proficiency in aural and reading comprehension, as well as in speaking and composition skills. Focus on high-level grammar review, stylistic and expository refinement and vocabulary expansion. Recommended for students wishing to combine intensive language training with reading and discussion of short fiction.

**GERST 303 Advanced Conversation and Composition (IV)**

**GERST 304 Advanced Conversation and Composition (IV)**

**GERST 306 German Media Studies (IV)**

**GERST 307 After the Fires: Divided Germany 1945–1989 (IV)**
Fall. 4 credits. Prerequisite: GERST 202, or GERST, or GER 204, or GERST 220, or equivalent or permission of instructor. Taught in German. P. Adelson.

Introduction to the history of postwar Germany: the development and unification of the two Germanys, and their societies. The emphasis is on cultural and social institutions as well as political and intellectual debates. Focal topics include responses to the Nazi past, Germany and Europe, protest movements, migration patterns, women, mass media, and popular culture. We consider the changes taking place in Germany today in light of the recent past. Some films are also shown.

**GERST 319 Laughter in German Literature (IV)**
Spring. 4 credits. Prerequisites: GERST 202 or 204 and 301 or equivalent or permission of instructor. Required readings and class discussion in German. P. Rehberg.

This course explores the sometimes subterranean tradition of the comic in modern German literature and thought. The literary work of Franz Kafka and traditional responses to it are considered in unconventional ways. What happens when readers take the unspoken seriously? Discussion and humorous elements in Kafka’s work will additionally serve as a springboard for considering the possible relationship between comedy and modernity in broad historical terms. Required readings are drawn from three key periods of German literature: Romanticism, early twentieth century, and Postmodernism. Laughter in works by authors as diverse as Friedrich Schlegel, Sigmund Freud, Robert Musil, and Thomas Bernhard are addressed. Comical phenomena and stylistic media such as irony, jokes, and laughter are compared and contrasted.

**GERST 353 Kleist # (IV)**

**GERST 354 Schiller # (IV)**

**GERST 357 Major Works of Goethe (1749-1832) # (IV)**
Fall. 4 credits. Open to all qualified students. Prerequisite: GERST 202, or 204, or 206, or equivalent, or permission of instructor. All texts are read in German, but translations will be available to serve as study aids. Class discussion in German and occasionally English. P. Heinert.

Poet, statesman, artist, scientist, rebel, conservative, utopian, and iconoclast, Goethe stands at the center of Germany’s belated Renaissance. Taking his early cues from Homer, Shakespeare, and the Bible, he created cultural icons at once modern and steeped in tradition. We examine what is open all phases of the man’s incredibly productive life against the background of political turmoil in Europe and the Americas. We use art, music, and theater as additional tools of interpretation.

**Courses offered in English**

It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

**GERST 221 The Ethics of Imagining the Holocaust (also ENGL 221 and JWST 287) (IV)**
Fall. 4 credits. D. Schwarz. For description, see ENGL 221.

**GERST 237 The Germanic Languages (also LING 237) (III)**

**GERST 318 “1800” # (IV)**

**GERST 320 Postwar German Novel (IV)**

**GERST 330 Political Theory and Cinema (also COM L 330, GOVT 370 and THETR 329) (III or IV)**
Fall. 4 credits. G. Waite.

An introduction (without prerequisites) to fundamental problems of current political theory, filmmaking, and film analysis, along with their interrelationship. Particular emphasis on comparing and contrasting European and alternative cinema with Hollywood in terms of post-Marxist, psychoanalytic, postmodernist, and postcolonial types of interpretation. Filmmakers/theorists might include: David Cronenberg, Michael Curtiz, Kathryn Bigelow, Gilles Deleuze, Rainer Fassbinder, John Ford, Jean-Luc Godard, Marleen Gorris, Werner Herzog, Alfred Hitchcock, Allen & Albert Hughes, Stanley Kubrick, Fredric Jameson, Chris Marker, Pier Paolo Pasolini, Gillo Pontecorvo, Robert Ray, Martin Scorsese, Ridley Scott, Oliver Stone, George Romero, Steven Shaviro, Kidlat Tahimik, Maurizio Viano, Slavoj Zizek.

Although this is a lecture course, there is ample time for class discussions.

**GERST 340 Metropolis: Urban Sites in Literature (IV)**
Spring. 4 credits. Readings and discussions in English (texts will be available in German). A. Schwarz.

An interdisciplinary study of metropolitan life focusing on Berlin and Vienna (1850–1999) as major contexts of artistic modernity and historical change. Topics of investigation include: the city as both the product and source of artistic production, the interrelationship between literary concepts of montage, collage, and their architectural counterparts (Bauhaus et al.); the tension between private and public spaces, and the status of crowds, anonymity, and the flaneur. We also analyze the rise of the avant-garde movement in an urban environment. Focus on short fiction, architectural theory, sites and art history, film, political and literary modernity. Authors include: Fontane, Broch, Benn, Benjamin, Döblin, Simmel, Johnson, Rilke, Kohlhass, Vidler.

**GERST 374 Opera and Culture (also MUSIC 374) # (IV)**

**GERST 378 German Aesthetic Theory: From Kant to Hegel # (IV)**

**GERST 392 Minority Literature in the Federal Republic (IV)**

**GERST 395 Rilke: The Duino Elegies and Sonnets to Orpheus (IV)**

**GERST 396 German Film (also COM L 396 and THETR 396) (IV)**

**Advanced Undergraduate and Graduate Courses**

**GERST 402 The Language of German Poetry (IV)**
Spring. 4 credits. Taught in German. Prerequisite: GERST 301, 302, or equivalent, or permission of instructor. P. Gilgen.

Based on close readings of lyric poetry written in German from the eighteenth century to the present, this course focuses on linguistic self-reference as the fundamental trait of the poetic function of language. We also examine how poetry is defined vis-a-vis its environment by different poetic conceptions. Attention to changes that affected the situation of poetry (such as new theories of language and the emergence of new media) provide historical orientation for our inquiry. To analyze in detail how poetry and poetics are affected by changing discursive structures, we read recent poetry against some of its poetic sources and address questions concerning poetic traditions, translatability, and media transposition. Such juxtapositions may include Peter Waterhouse/Celan/Hölдерlin; Oswald Egger/Brockes; Michael Donhauser/Ponge; and others.

**GERST 403 The Afro-Europeans (IV)**

**GERST 405 Introduction to Medieval German Literature I # (IV)**
[GERST 406] Introduction to Medieval German Literature II (IV)

[GERST 407] Teaching German as a Foreign Language
Fall. 4 credits. G. Lischke.
This course has been designed to familiarize students with current ways of thinking in the field of applied linguistics and language pedagogy. It introduces different concepts of foreign language methodology as well as presents and discusses various techniques as they can be implemented in the foreign language classroom. Special consideration is given to topics such as planning syllabi, writing classroom tests, and evaluating student's performance. Participants conduct an action research project.

[GERST 408] Uncanny Communities (IV)

[GERST 409] Spinoza and New Spinozism (also COM L 442) (IV)
Spring. 4 credits. Prerequisite: permission of instructor. C. Y. White.
Spinoza was excommunicated in his own time, wrote under the constant threat of death, and has remained a scandal to almost all subsequent thought, including philosophy, psychoanalysis, political theory, and practice, and ethics. And he exerted a powerful, if subterranean, influence on Marx, Freud, and Nietzsche. Indeed, "every philosopher has two philosophies, his own and Spinoza's" (Henri Bergson), and "everyone is a philosopher, whether professionally or otherwise" (Antonio Gramsci). This seminar takes up the challenge of these two remarks, with two main aims: to introduce Spinoza's basic philosophical and political writings; and then to trace his legacy, concentrating on the current, international group of men and women loosely grouped as the New Spinozists. These include: Gabriel Albiac, Louis Althusser, Etienne Balibar, Gilles Deleuze and Félix Guattari, Emilia Giamboni, Luce Irigaray, Žižek, Jacques Lacan, Pierre Macherey, Nancy. Spinoza is currently being used to produce an anti-Kantian, anti-Hegelian analysis of many contemporary problems, including Cyberspace and Virtual Reality. We focus especially on the neo-communitarian tradition of reading and using Spinoza. In part this is because it may be true that "the new world system, the ultimate third stage of capitalism is for us the absent totality, Spinoza's God or Nature, the ultimate (indeed perhaps the only) referent, the true ground of Being in our time" (Fredric Jameson), though Spinoza is also interesting in his own right. In addition to selections from Spinoza's work, our basic text is the recent anthology The New Spinoza (ed. Warren Montag and Ted Stolze).

[GERST 410] Senior Seminar
Fall. 4 credits. Open to all students with an adequate command of German. Prerequisite: any German course at the 300-level or equivalent or permission of instructor.
Texts and seminar discourse in German.

Topic: The Fiction of Autobiography
An investigation of the changing forms of autobiographical discourse in novels ranging from the 18th to the 20th century. The goal of this class is to analyze the interrelationship between the representation of subjectivity and its articulation in novels. Points of discussion include: the status of life as history; autobiography as loss or gain of selfhood; construction of identity and literary existence. Authors include: Rilke, Frisch, Raabe, Goethe, Stifter, Th. Mann, Handke. Students are also introduced to pertinent theories of autobiography. Readings and discussion in German.

[GERST 412] German Literature from 1770 to 1848 (IV)

[GERST 413] Women around Freud (also COM L 442 and WOMNS 413) (IV)

[GERST 414] History into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, and NES 404) (IV)

[GERST 415] Marx, Nietzsche, Freud (also COM L 425 and GOVT 473) (III or IV)

[GERST 416] Gender and the Law in German Culture (also HIST 413 and WOMNS 414) (III or IV)
Spring. 4 credits. T. Matysik.
The status of law as a social and cultural phenomenon is a much-disputed issue. This course examines the cultural space of law in modern German history. It pays particular attention to law and legal reform in relation to gendered notions of citizenry, subjectivity, and sexuality. The course takes as its hypothesis the idea that the prevalence in modern German thought of the concern with the "law" as the moral regulation of normative behavior is closely connected to the transformation of actual laws and legal codes in German history. In order to assess the terrain between such actual laws and their cultural effects, we examine a combination of literary, social-theoretical, and historiographical readings that address the problem of law. In this way we acquire, first, a general overview of German legal history together with legal texts with which to speak about a variety of legal theoretical traditions. Second, we explore perceptions of, responses to, and critiques of the historical role of law in German culture. Readings cover: the late eighteenth-century era of legal reform, the late nineteenth- and early twentieth-century context in which sexual morality had re-entered the legal domain and, more recent thought on law. At the same time, we use our historical understanding to assess the extent to which these more recent critical efforts are a departure from and/or a continuation of their historical predecessors. In the course of these investigations we are guided by questions of the relationships between law, subjectivity, gender, citizenship, and morality.

[GERST 417] Faust: Transformations of a Myth (also COM L 417) (IV)
Spring. 4 credits. Taught in English.
H. Deinert.
Few legends have so engaged the imagination as that of the man who signed a pact with the devil to obtain pleasure, power, and knowledge. While the myth itself is timeless, the modern version takes its cue from one real George Faust, a figure of dubious character, half scholar, half quack, during the time of the German Reformation. The German Volksbuch depicting his adventures was almost immediately translated into English and became the inspiration for Marlowe's Tragic History of Doctor Faust. Goethe devoted some 60 years to his Faust, completing it only months before his death in 1832. While Marlowe's Faust deserves eternal damnation for his hubris, Goethe's protagonist finds favor with God for the same reason. We look at various representations of the myth from the late sixteenth century through the early nineteenth. The Faust Book, Marlowe, and Goethe are our main texts. We listen to some of the music they have inspired: Schubert, Schumann, Berlioz, Gounod, Mahler, and look at related mythical figures like Lucifer, Prometheus, Don Juan, Ahasverus, Schlemiel, and others. Time permitting, we discuss selections from several recent versions: Bulgaroff's The Master and Margarita (1938), Valéry's Mon Faust (1940), and Thomas Mann's Doktor Faustus (1947).

[GERST 418] Thomas Mann (IV)

[GERST 419] Modern Nomads (also S HUM 419) (IV)
Spring. 4 credits. Limited to 15 students. J. Noyes.

[GERST 496 Theorizing the Public Sphere (also COM L 496 and GOVT 464) (III or IV)]
Fall. 4 credits. P. U. Hohendahl. The recent translation of Jürgen Habermas' *The Structural Transformation of the Public Sphere* into English has renewed the debate about the nature and significance of the public and publicity, about public communication and the media. This discussion has centered around the history of the public sphere in modern society and its relevance for contemporary culture and politics. The seminar discussion deals with contemporary as well as historical topics, among them the significance of class, gender, and race for the construction of the public sphere, the possibility of shared cultures in advanced industrial societies, and the character of public communication under the conditions of the new media. The readings focus on three seminal texts, namely Hannah Arendt's *The Human Condition* (1958), Jürgen Habermas' *The Structural Transformation of the Public Sphere* (1962), and Oskar Negt's Alexander Kluge's *Public Sphere and Experience*. The discussion includes readings from Richard Sennett and Reinhart Koselleck. Special attention is given to the recent debate about the history and function of the public sphere, which was collected in Craig Calhoun's volume *Habermas and the Public Sphere* (1991) (also COM L 496 and GOVT 464) (III or IV) with contributions (among others) by Thomas McCarthy, Nancy Fraser, Mary P. Ryan, Geoff Eley, and Jürgen Habermas.

[GERST 498 German Literature in Exile (IV)]

[GERST 627 Baroque (also COM L 626)]

[GERST 629 The Enlightenment]

[GERST 630 Classicism and Idealism]

[GERST 631-632 Academic German I and II]
631, fall; 632, spring. 3 credits each term. Limited to graduate students. Prerequisite: for GERST 632, GERST 631 or equivalent. Subject matter will focus on understanding the character and function of the public sphere, which was collected in Craig Calhoun's volume *Habermas and the Public Sphere* (1991) with contributions (among others) by Thomas McCarthy, Nancy Fraser, Mary P. Ryan, Geoff Eley, and Jürgen Habermas. Intended primarily for beginners with little or no previous German knowledge. Emphasis in 631 on acquiring basic German reading skills. Emphasis in 632 on development of the specialized vocabulary of student's field of study.

[GERST 634 German Romanticism]
Fall. 4 credits. Major participants include: B. and A. von Arnim, Arndt, Brentano, Fichte, Gontard, the Grim brothers, Günterode, Hegel, Heine, Hölderlin, Hoffmann, Kleist, Novalis, Schlegel, Schiller, Schlegel-Schlegel, F. Schlegel, Schleiermacher, Tieck, Varnhagen, D. Veit-Schlegel, and W. Harbeck. The seminar investigates the discursive invention of "the homosexual" within the context of the romantic movement, the romanticization of "the other" (19th century), and the social, cultural, and political implications of the romantic movement. The seminar examines the problematic relationship between discourse of homosexuality and the romantic movement, and the romantic movement as both object and subject of social, cultural, and political criticism. The course first reviews the discursive invention of "the homosexual" in medical and juridical practices of the late nineteenth century and subsequently explores the epistemological and discursive status of this figure in the development of the family and the law. The course focuses on the role of the voice and the figure of the homosexual in the modern German narrative. The seminar examines the role of the voice and the figure of the homosexual in the modern German narrative. The seminar examines the role of the voice and the figure of the homosexual in the modern German narrative.

[GERST 635 The Gates to Modernity: From Karlbad to the 1848 Revolution]
Spring. 4 credits. Anchor course. P. U. Hohendahl. The seminar focuses on Germany's entry into the modern age represented by authors such as Heine, Büchner, Feuerbach, and Marx. The course deals with the cultural, political, and social consequences of the Enlightenment, among them the democratization of literature and culture, the politicization of philosophy, and the emancipation of underprivileged groups (women and the working class). Readings trace the formation of bourgeois culture and its contradictions as they are articulated by the writers of Young Germany, the Left Hegelians, and radical literature of the 1840s. In addition to the authors mentioned above, readings are taken from the works of Bettina von Arnim, Börne, Grabbe, Hebbel, and Fanny Lewald.

[GERST 637 Nineteenth-Century Fiction: The Realist Project]

[GERST 640 The Modern German Novel]
Fall. 4 credits. A. Schwarz. The goal of this seminar is to analyze selected works of modernist fiction in order to assess the stylistic qualities that constitute their specifically modernist character. Concentrating on novels ranging from the late 19th to the early 20th century, we pay close attention to questions of narrative structure as well as temporal and spatial arrangements. Also including comparatist interests, the seminar discusses the modern German novel within the European context, discusses generic differences (modern versus "classic"), and examines theories of the novel and their relationship to contemporary representational concerns. Specific points of interest are: the status of self-reflection; philosophical interruptions; irony; montage; subjectivity and literary self-fashioning; and the relationship between temporality and urbanity. In order to evaluate the "very" modern, the class also discusses two examples of contemporary fiction. Authors include: Rilke, Kafka, Döblin, Broch, T. Mann, R. Walser, Nossack, Handke, Johnson, Bernhard, Goetz. All texts are read in translation. (German speakers are encouraged to read the original texts.)

[GERST 641 The Gay Critic (also COM L 661)]
Fall. 4 credits. Reading knowledge of German is recommended but not required for this course. P. Rehberg. This seminar examines the problematic relationship between discourses of homosexuality and modernity as a point of departure, this seminar investigates specifically German contributions to theories and representations of twenty-century homosexuality in its historical and rhetorical contours. Readings includes stylistically diverse works by M. Foucault, S. Freud, K. Mann, K. Thewelet, L. Biefenstahl, T. W. Adorno, A. Hewitt, H. Fichte, and R. W. Fassbinder.

[GERST 647 German Literature from 1949 to 1989: Questions about Identity]

[GERST 650 Culture in the Weimar Period]

[GERST 652 Culture in Germany 1933–1945]
Spring. 4 credits. Prerequisite: reading knowledge of German necessary. Permission of instructor. Anchor course. P. U. Hohendahl. This course examines three contexts for culture in Germany during the Nazi period. First, the officially promoted culture and mass mediated culture (film, music, architecture, the performing and visual arts) produced within the *Third Reich*. Second, the
various cultures of resistance, “Inner Immigration,” or non-compliance as they emerged in the realm of literature and mass culture during the period. Third, the culture of the Jewish community of Germany and Austria during the Nazi period as well as the cultural products of the concentration and death camps.

[GERST 653 Opera (also COM L 655 and MUSIC 679)]

[GERST 656 Aesthetic Theory: The End of Art (also COM L 656, ART H 447 and Visual Studies)]
Fall. 4 credits. Prerequisite: permission of instructor. P. Gilgen.
This course investigates the emergence of aesthetics as its own discipline at the end of the eighteenth century. We examine the rationalist articulation of aesthetics in Baumgarten’s work and the empiricist theory of taste, particularly Burke’s *Enquiry*. Drawing on the findings of these two traditions, Kant’s *Critique of Judgment* (1790) inaugurated a preoccupation in German philosophy around 1800 with the metaphysical status of the beautiful and of art. Especially in Romantic theory and practice, art was meant to provide a solution to the philosophical dilemmas in the wake of Kant’s critical philosophy. But already in Hegel’s *Phenomenology*, and more explicitly in the *Encyclopedia* and the *Lectures on Aesthetics*, art lost this elevated position vis-à-vis philosophy. Taking this observation as a guiding thread, the main part of the course is structured around in-depth readings that may include Kant, Schiller, Schelling, Schlegel, Novalis, Hölderlin, and Hegel. Further readings may include writings by contemporary philosophers and theoreticians such as Derrida, Lyotard, de Man, Adorno, and Danto. The following questions will be addressed: What are the conditions for the move from the subjective judgment of taste (Kant) to objective beauty (Romantics, Hegel)? How is the relation of art and nature reconceived by the Romantics? What is the relation of aesthetic theory and the history of art? Is philosophy the end of art?

[GERST 669-670 Modern Social Theory I & II (also GOVT 669-670)]

[GERST 671 Postcolonial Theory and German Studies (also COM L 668)]
Spring. 4 credits. Prerequisite: graduate standing or permission of instructor. L. Adelson.
The recent boom in interdisciplinary scholarship at the crossroads of German Studies and postcolonial theory challenges conventional parameters of both fields of inquiry. The mutual interrogation of German Studies and postcolonial theory promises to reconfigure our understanding of colonial histories in relation to social imaginaries (including facets of German fascism, German intellectual history, modernist canons, 20th-century nationalism, and European relations on the continent and in the world). With these broad analytical concerns in mind this course juxtaposes readings in the histories and literary cultures surrounding German colonialism with readings in international postcolonial theory as well as new postcolonial scholarship on explicitly German objects of study. Some by now canonical works by postcolonial theorists (e.g., Fanon, Said, Bhabha, Spivak, Pratt) are used both to introduce key concepts and dilemmas and to excavate decisive German influences on postcolonial theory outside putatively German contexts. Scholars by authors such as S. Zaniop, R. Berman, N. Berman, J. Noyes, L. Wildenthal, P. Grosse, M. Klotz, and others are highlighted, while literary examples (e.g., G. Frenssen, V. Bölow, F. Kafka, I. Bachmann, H. Müller, H. M. Enzensberger, B. Honigmann, H. Cixous, and others) are drawn primarily from the nineteenth and twentieth centuries. Reading knowledge of German is not required.

[GERST 672 German Opera Topics: Wagner (also MUSIC 674)]

[GERST 674 Contemporary Poetry and Culture: 1968-1993 (also COM L 674, ENGL 675, and SPAH L 674)]

[GERST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also COM L 675 and HIST 675)]

[GERST 679 Bertolt Brecht in Context (also COM L 679 and THER 679)]

[GERST 685 Gramsci and Cultural Politics (also COM L 685 and GOVT 675)]
Spring. 4 credits. G. Waite.
The modern or postmodern, and increasingly global, capitalist system rules not only by overt violence and coercion but also in tandem with what Antonio Gramsci (1891-1937) called the “non-coercive coercion” of “cultural hegemony.” This seminar has two basic aims: (1) to introduce the basic political, theoretical, historical, and cultural writings of Gramsci himself (which also requires attention to his main sources, e.g., Croce, Dane, Lenin, Marx, Machiavelli) and (2) to trace recent directions of the Gramsci legacy in philosophy, political theory and practice, and cultural theory and practice (notably filmmaking). This legacy includes the works of Alajaz Ahmad, Louis Althusser, Christine Buci-Glucksmann, Norberto Bobbio, Ernesto Laclau, Ariel Dorfman & Armand Mattelart, Chantal Mouffe, and Pier-Paolo Pasolini, among others. It also includes less famous, but no less important, individuals and groups: e.g., feminist activists in Italy, the subaltern study movement in India, and other forms of anti-capitalist theory and practice around the world. We must also note that the first English translation of The Prison Notebooks was made by the U.S. Pentagon, and that “the ashes of Gramsci” is a code name in Italy for cocaine. Our main texts are Gramsci’s *Prison Writings* and his *Prison Notebooks and Letters*, which we read alongside symptomatic examples of his ongoing legacy.

[GERST 686 Althusser and Lacan (also COM L 686, GOVT 679, and FRILIT 623)]

[GERST 699 German Film Theory (also COM L 699 and THER 699)]

[GERST 753-754 Tutorial in German Literature Fall and spring. 1–4 credits per term. Prerequisite: permission of instructor.

[DUTCH 121-122 Elementary Dutch 121, fall; 122, spring. 4 credits each term. Provides language qualification. Prerequisite: permission of instructor. M. Briggs.

[DUTCH 203 Intermediate Composition and Conversation Fall. 3 credits. Prerequisite: Dutch or permission of instructor. Provides language proficiency. M. Briggs.

[DUTCH 204 Intermediate Composition and Conversation Spring. 3 credits. Prerequisite: DUTCH 203 or permission of instructor. M. Briggs.

[DUTCH 300 Directed Studies Fall or spring. 1–4 credits variable. Prerequisite: proficiency in Dutch or permission of instructor. M. Briggs.

[DUTCH 301 Individualized advanced Dutch study. This course provides students with individualized
programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research. Literature history in support of all disciplines. Taught in Dutch. Topic for fall: Afrikans.

**Swedish**

**SWED 121-122 Elementary Swedish**
121, Fall; 122, Spring. 4 credits each term. Prerequisite: SWED 122, SWED 121 or equivalent. L. Tranick.
The course develops skills in listening, speaking, reading, and writing within Sweden's cultural context. Work on the Internet and interactive computer programs are used in these courses.

**SWED 123 Continuing Swedish**
Fall. 4 credits. Provides language qualification. Prerequisite: SWED 122 or equivalent. L. Tranick.
Development of skills in spoken and written Swedish within Sweden's cultural context.

**SWED 203 Intermediate Swedish**
Fall. 3 credits. Provides language proficiency. Prerequisite: SWED 123 or permission of instructor. L. Tranick.
Intermediate to advanced-level instruction using audio-visual material and text to enhance language comprehension.

**SWED 204 Advanced Swedish**
Spring. 3 credits. Prerequisite: SWED 203 or permission of instructor. Taught in Swedish. L. Tranick.
Emphasis on improving oral and written expression of Swedish, including vocabulary, readings in contemporary prose, treatment of specific problems in grammar, and presentation of videos and films.

**SWED 300 Directed Studies**
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Tranick.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**GOVERNMENT**

Government is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on applications. Some engage in the close reading of great texts of political philosophy, while others analyze the behavior of power-wielders and publics in this and other societies.

Government is divided into four subfields: U. S. politics, comparative politics (other nations), political theory (philosophy), and international relations (transactions between nations).

To accommodate new courses or course changes, a supplementary announcement is prepared by the department. Before enrolling in courses or registering each term, students are requested to consult the current supplement listing courses in government, available in 125 McGraw Hall.

**The Major**

To be admitted to the major, a student must pass two government courses.

To complete the major, a student must:

1. pass two of the introductory government courses (GOVT 111, 131, 161, 181).
2. pass an additional course in one of the remaining subfields (American government, comparative government, political theory, or international relations). This course may be any course offered in the government department, including introductory courses, upper-level courses or seminars. Students are strongly advised to take at least one course in each of the four subfields;
3. accumulate an additional 28 credits of government course work at the 200-level or above;
4. complete at least one seminar-style course in government which may be applied toward the 28 credits. These courses include those numbered 400 XX to which students are admitted by application only;
5. accumulate 12 credits in upper-level courses in related fields (such as anthropology, economics, history, science and technology studies, psychology, and sociology). Upper-level courses are usually courses numbered at the 300 level or above (200-level courses are not considered upper-level). Students should consult with their major adviser to choose appropriate courses. All choices of related courses must be approved by the major adviser or the director of undergraduate studies;
6. all courses used to fulfill a government major must be passed with a letter grade.

To summarize, a total of 10 government courses and three additional courses (12 credits) of upper-level related courses are required to complete the major.

**Cornell-in-Washington Program.** Government majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

**European Studies Concentration.** Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein, J. Pontusson, and S. G. Tarrow for advice on course selection and foreign study programs.

**Model European Community Simulation.** Undergraduates with an interest in the European Union, public affairs, or debating may participate in an annual European Union simulation held on an alternating basis, in April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the member states, to discuss issues and resolutions of current concern to the European Union.

**GOVERNMENT 475**

To prepare for the simulation, a two-credit course is offered by the Government department each year (GOVT 431 or GOVT 432). Participation in the simulation is open only to those who register for this course. Anyone interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255–7592.

**International Relations Concentration.** See the description under "Special Programs and Interdisciplinary Studies."

**Honors.** In their junior year, Government majors with a G.P.A. of 3.3 in all subjects may join the honors program, which involves a sequence of special courses through the junior and senior year. Application to the honors program is made in the late spring of the sophomore year and application forms are available in 125 McGraw Hall. The courses comprising the honors sequence (honors courses) are described below. Students may be admitted to the honors program in the junior or senior year only with the special permission of the Director of Undergraduate Studies.

**Introductory Courses**

Students registering for introductory courses should register for the lecture only. Sections are assigned during the first week of class. Introductory courses are also offered during summer session.

**GOVT 111 Introduction to American Government and Politics (III)**
Fall and summer. 3 credits. T. J. Lowi.
An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

**GOVT 131 Introduction to Comparative Government and Politics (III)**
Spring and summer. 3 credits. J. Pontusson.
This course provides a survey of the institutions, political processes, and policies of contemporary states. It focuses on the conditions for and workings of democracy. Looking at Western Europe, we analyze institutional variation among liberal democracies, and their political implications. We then probe the origins of democracy in Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, we explore the impetus behind and the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy are related to problems of economic development, efficiency, and equality.

**GOVT 181 Introduction to Political Philosophy (III)**
Spring. 3 credits. I. Kramnick.
A survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. An examination of the relevance of their ideas to contemporary politics.

**GOVT 181 Introduction to International Relations (III)**
Fall and summer. 3 credits. J. Kirshner.
An introduction to the basic concepts and practice of international politics.
First-Year Writing Seminars

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

Major Seminars

**GOVT 400 Major Seminars**

Fall or spring. 4 credits.

These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given to majors over juniors and seniors over juniors. Topics and instructors change each semester. To apply, students should pick up an application in 125 McGraw Hall during the course selection period the semester before the seminar is given.

The following courses are open to sophomores, juniors, and seniors without prerequisites unless otherwise indicated.

American Government and Institutions

**GOVT 110** is recommended.

**GOVT 302 Social Movements in American Politics (also AM ST 302) (III)**

Fall. 4 credits. E. Sanders.

From populism to environmentalism, social movements directed at reform of national policies and political structures have been an earmark of American politics. This course begins with an examination of late nineteenth-century agrarian and labor movements and moves through progressivism, a variety of 1930s upsurges, civil rights, and new religious right movements. The focus is on the conditions that gave rise to these movements, their internal resources, and external alliances and their ultimate impact on the national state (as well as vice versa).

**GOVT 303 Introduction to American Political Parties (III)**

**GOVT 304 Public Opinion and Political Participation (III)**

Spring. 4 credits. J. Cowden.

GOVT 304 is a survey course about the nature and impact of public opinion and mass political behavior. We examine classic and contemporary scholarship on the following topics: the role of public opinion in democratic theory; the measurement of opinions; the political sophistication of the electorate; racial and political intolerance; political socialization; party identification and party systems; media effects; candidate preference; turnout and abstention; attitudes about distributive justice; and the intersection between public opinion and public policy.

**GOVT 305 Atomic Consequences: The Incorpotation of Nuclear Weapons in Post-War American (III)**

**GOVT 308 Science in the American Polity 1800–1960 (also S&T S 390) (III)**

Fall. 3 credits. M. Dennis.

See S&T S 390 for description.

**GOVT 309 Science in the American Polity (also S&T S 391) (III)**

Fall. 4 credits. M. Dennis.

This course reviews the changing political relations between science, technology, and the state in America from 1800 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

**GOVT 310 Power and Poverty in America (III)**

Fall. 4 credits. E. W. Kelley.

Despite egalitarian democratic rights, the United States remains a stratified society. Despite national policies to correct disparities in the allocation of income and wealth. The purpose of this class is to investigate these disparities, both empirically and normatively, and to assess the impact of government on them. Topics for discussion include: What do we mean by distributive inequality and by the demand for greater egalitarianism? What is the extent of inequality and of poverty in America today? How does one establish minimum standards for distributional justice? Is the United States currently on the road toward achieving that minimum standard? What is the array of federal welfare programs presently available and what is their effect? What reforms or changes are currently on the political agenda? Can we imagine a society somewhat like that in the United States achieving a very different distribution of educational and occupational outcomes as described by race, income, class, and language spoken by parents?

**GOVT 311 Urban Politics (III)**

Fall. 4 credits. M. Shefter.

Covers the major political actors, institutions, and political scientists concerning American cities, mayors, city councils, bureaucracies, ethnic and racial minorities, urban machine politics, and the municipal reform movement. Considers the implications of these political forces for policies pertaining to urban poverty, homelessness, and criminal justice.

**GOVT 313 The Nature, Functions, and Limits of Law (III)**

Spring. 4 credits. Undergraduates only. R. Hillman.

A general education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion.

**GOVT 314 Prisons (III)**

**GOVT 316 The American Presidency (also AM ST 316) (III)**

**GOVT 317 Campaigns and Elections (III)**

Fall. 4 credits. M. W. Melbom.

This course examines campaigns and elections, focusing primarily on national elections in the United States. Topics include the relationship between elections and the economy, the weakness of the American party system, voter turnout, individual voting decisions, negative campaigning, and the noncompetitiveness of congressional elections. We examine several theories that explain these phenomena, including in particular the theory of rational choice. Course requirements include one or two papers based on original analysis of election survey data.

**GOVT 318 The American Congress (III)**

Spring. 4 credits. M. Shefter.

The role of Congress in the American political system. Topics discussed: the political setting within which Congress operates, the structure of Congress, the salient features of the legislative process, and recent congressional behavior in a number of policy areas.

**GOVT 319 Minority Politics in the US (also S&T S 319) (Spring)**

Spring. 4 credits. M. Jones-Correa.

In 1965 the landscape of American politics changed dramatically with the passage of the Voting Rights Act. That same year, Congress passed the Immigration Reform Act, which though little heralded at the time, arguably had equally profound effects. This course provides a general survey of minority politics in the United States, focusing on the effects of these two key pieces of legislation. The course highlights the relationships between immigrants and minorities, electoral politics and protest politics, and between cooperation and competition within and among minority groups. The purpose of the course is not only to pinpoint the similarities and differences in the agendas and strategies adopted by minority groups, but to indicate the interaction between "minority" politics and American politics as a whole.

**GOVT 320 Public Opinion and Public Choice (III)**

4 credits. Prerequisite: GOVT 110 or permission of the instructor. W. Melbom.

A general education course. The paradox of democracy is the fact that a government the people control will only rarely be a government that does what the people want. This is not to say that government not by the people is better (it's usually worse). This course explores this problem, contrasting the answers given by the concept of public opinion and the formal theory of social choice. We encounter the paradox in several American political institutions, including elections, legislatures, and bureaucracy.

**GOVT 324 Legal Reasoning and Legal Adaptation: A Comparison of American and Talmudic Law (III)**

Spring. 4 credits. J. Rabkin.

Legislatures may change old laws to reflect new circumstances, but much American law is still adapted to modern challenges by judges using old precedents and principles, particularly in fields like family law, the law of contracts, and the law of torts. Talmudic law, which rests on much older principles and precepts, can adapt to new legislation to justify change in the modern
world, must also be adapted to new circumstances. The rabbinc authorities who seek to apply this law often invoke similar kinds of reasoning as American courts but under peculiar circumstances. This course, an unusual venture in comparative law, focuses on characteristics common to each system, rather than attempting any systematic surveys of legal outcomes. Readings include selections from ancient texts as well as modern decisions and contemporary commentaries. No previous background is required.

GOVT 328 Constitutional Politics: The United States Supreme Court (III)
Fall. 4 credits. J. Rabkin. This course investigates the role of the Supreme Court in American politics and government. It traces the historical development of constitutional doctrine and the institutional role the court has played in American politics.

GOVT 404 American Political Development in the 20th Century (co-taught with GOVT 612) (III)
Spring. 4 credits. E. Sanders. This course focuses on the major outbursts of reform directed at the national state from around 1890 to 2001: populism, progressivism, the New Deal, the civil rights—anticommunist—environmental—feminist era 1964–76, and the emergence of new movements. It explores the various movements in the 1980s and after, as well as the challenges to the neo-conservative and religious right movements posed by anti-nuclear weapons and gay rights movements. In each period we attempt to specify the composition and grievances of the reformers, changes in political party regimes, and their legislative and other institutional and cultural legacies. We identify grand and continuing themes in these episodic reform movements and what they say about American political life and institutions past and present.

GOVT 406 Politics of Education (III)
Fall. 4 credits. E. W. Kelley. Education is simultaneously America’s biggest business and the institutional process through which skills and values are passed on to the next generation. This course deals with conflicts about, and the politics of, education as they occur at national, state, and local levels. What (including values) will be taught and to whom? Who will benefit from formal education as a vehicle for entry into economic opportunity? What are the powers and restrictions on government in this area? How does the American system differ from other systems? How does educational testing affect equal opportunity to obtain meaningful competences and jobs?

GOVT 408 Politics of the American Civil War (also AM ST 430) (III)
Spring. 4 credits. R. R. Beckles. The Civil War, along with the Founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American political development. Airing out of intense ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention is paid to: the political economy and culture of plantation slavery in the ante-bellum South; the apparent inevitability of collision between the slave and free states and their respective societies; the military, political, and economic strategies that determined, on both sides, the course and duration of the war; the limits and possibilities of reform of southern society during Reconstruction; and the impact of the Civil War on the subsequent development of the United States.

GOVT 409 Racial Prejudice and Political Intolerance (III)
Fall. 4 credits. J. Cowden. This course explores the nature, scope, and etiology of intolerance and its implications for the operation of politics in the United States. Readings include many of the classics in political science, political psychology, psychoanalysis, and social psychology, dating from the 1950s to the present.

GOVT 416 Personality and Politics (III)
Fall. 4 credits. J. Cowden. The guiding assumption of this course is that politics is influenced in fundamental ways by variables that are commonly summarized by the term “personality.” The course examines in a systematic fashion the effects of such variables on leadership, culture and ideology, national character, ethnic violence and hostility, and mass movements.

GOVT 419 The Politics of Scandal (III)
Spring. 4 credits. M. Shetter, J. Rabkin. This seminar discusses the politics of “scandal” and “reform” in constitutional doctrine, American history, and recent experience.

GOVT 428/728 Government and Public Policy: An Introduction to Analysis and Criticism (III)
Fall. 4 credits. T. J. Lowi. GOVT 428 concentrates on history and criticism of U.S. policies and the politics associated with them. Particular attention is given to the origins and character of the regulatory state and the welfare state.

GOVT 429 Government and Public Policy: An Introduction to Analysis and Criticism (III)
Spring. Open to undergraduates. 428 and consent of instructor are required for 429. T. J. Lowi. GOVT 429 is an opportunity to pursue further the research begun in 428.

Comparative Government
GOVT 131 is recommended.

GOVT 326 Building a Better Democracy (III)
Fall. 4 credits. K. O’Neill.

How would you put together a constitution for a newly democratic country? Democracy exhibits a variety of forms throughout the world. While all of these forms are democratic, the different structures and rules adopted by countries can lead to surprisingly different outcomes. This course explores the tradeoffs inherent in choosing a presidential versus a parliamentary structure. We will look at the consequences of using different electoral rules, whether there is a meaningful difference between systems with two parties and those with multiple parties, and what the different arguments are for choosing a unitary versus a federal government structure. The course combines theoretical arguments about different democratic institutions with real world examples of constitutional assemblies and constitutional reforms from Africa, Latin America, Israel, the United States, and Western and Eastern Europe.

GOVT 330 Europe, the US, and Japan in the Global Economy (also ILRIC 333) (III)
Fall. 4 credits. L. Turner. For a description, see ILRIC 333.

GOVT 332 Modern European Politics (III)
Fall. 4 credits. D. Schirmer. The course gives an introduction to politics and political systems in Western Europe. It starts with a brief history of the formation of the nation state and the establishment of democratic rule. It continues with the modes and structures of political conflict and explores political cultures, party and electoral systems, the roles of interest groups and social movements, and the mass media. It then turns to a discussion of parliament and government. The main countries studied include Britain, France, Germany, and Italy. The main dimensions guiding the comparison are conflict vs. consent, federalism vs. centralism, parliamentary vs. presidential systems, and majority vs. proportional representation. The course concludes with a discussion of minority-majority relations and the problem of democratic inclusion.

GOVT 333 Government and Politics of the Former Soviet Union (III)

GOVT 334 Political Economy of East Asia (II) (III)

GOVT 335 America in the World (III)

GOVT 336 Postcommunist Transitions (III)

GOVT 338 Comparative Political Economy (III)

GOVT 340 Latin American Politics (III)
Spring. 4 credits. H. Schamis. This course is introductory lecture on the politics of Latin America. The main purpose is to view the region in a conceptual and comparative perspective. Country cases are introduced in order to understand the fundamental historical processes as well as to explain the significance of competing theoretical frameworks that have shaped the debate in the field. The course focuses on the political economies of the region in order to analyze the role of groups and classes under
different political regimes and contrasting strategies of development.

**GOVT 341 Modern European Society and Politics (SOC 341) (III)**
Spring. 4 credits. S. Tarrow.
Since the French and industrial revolutions, modern Europe has been the major source of innovation and stability, freedom and imperialism, war and peace, capitalism and socialism, rule of law and state terror, and modernity and its critics. Even the 50-year division of the continent by the Cold War could not destroy its common, but contradictory heritage. This interdisciplinary core course in Modern European Studies serves as an introduction to European society and politics. Topics include European state-building and capitalism, nationalism and socialism, cycles of revolution and reaction, stratification and mobility, law and violence, and war and democracy. The course ends with an introduction to the European Union and its conflicts. May be taken separately, or in combination with GOVT 342, The New Europe, which focuses on contemporary Europe. If qualifications divergent interests permit, a section may be offered in French or German.

**GOVT 342 United Germany in the New Europe (III)**

**GOVT 343 The Politics of European Integration (III)**
Fall. 4 credits. J. Pontusson.
This course explores the policies and policy-making of the European Union against the backdrop of the postwar history of European integration and the institutional framework of the EU. We also explore how European integration is reshaping domestic political and economic arrangements in the member states of the European Union and current debates about the future of the European polity. The implications of Eastward enlargement for the EU, for the emerging market economies of Eastern Europe and for the process of Europeanization are considered in some depth.

**GOVT 346 Modern Japanese Politics (III)**

**GOVT 347 Government and Politics of China (III)**
Fall. 4 credits. V. Shue.
An introduction to the main currents in China's domestic politics over the last 60 years. Topics include the revolutionary rise of communism; Maoism, in theory and in practice; the political culture of the Cultural Revolution; the evolving roles of the party and the military, and of peasants, workers, and intellectuals in the polity; the prospects for democracy, perceived social inequality, violence, corruption, and other pressing problems that have emerged with the reforms under Deng Xiaoping.

**GOVT 354 Capitalism, Competition, and Conflict in the Global Economy (III)**

**GOVT 356 Enlarging the New Europe: Labor, Business, and Politics (also ILR LIC 337) (III)**

**GOVT 357 American Indian Politics and Policy (also AIS 367 and R SOC 367) (III)**
Fall. 3 credits. Enrollment limited to 20. B. Baker.
This course addresses the Constitutional basis of the Federal-Indian Relationship through an examination of treaties, Supreme Court decisions, and Congressional law/policy. The effects of European and American forms of governance on traditional American Indian political structures are detailed and contrasted with contemporary tribal governments and political organizations. Issues relating to sovereignty and self-governance with respect to American Indian tribal governments are addressed relative to state and federal governments.

**GOVT 358 Imagining the Modern Middle East (also NES 294, JWST 294) (III)**
Fall. 4 credits. S. Aatout.
For description, see NES 294.

**GOVT 415 Race, Gender, and Organization (III)**

**GOVT 432 Model European Union (III)**
Fall. 2 credits. J. Pontusson.
This two-credit course is designed to prepare students to participate in the annual Model European Union Simulation held, on an alternating basis, at SUNY Brockport and in Brussels. The simulation provides an opportunity for participants, representing politicians from the European Union, to discuss issues and resolutions of current concern to the E.U. The preparatory course introduces students to the E.U., the country that the Cornell team will represent, and the issues to be discussed at the simulation. A substantial part of travel costs for the Cornell team will be paid by the Institute for European Studies, and course enrollment is restricted by budgetary considerations. Students enrolled in this course are required to write a research paper.

**GOVT 433 The Politics of Economic Liberalization in the Developing World (III)**
Fall. 4 credits. H. Schamis.
What drives the current processes of economic liberalization taking place in most of the developing world? What kinds of constraints and opportunities do governments embarked upon such policy reforms face? What types of factors account for their success or failure? What is the relationship between the international dimension of this phenomenon and the domestic political conditions? This seminar addresses these questions by examining the interplay of domestic and international ideas, local and foreign actors, and national and transnational institutions which take part in these processes. The course focuses extensively on, but is limited to, Latin America.

**GOVT 436 Environmental Politics and Policy (III)**

**GOVT 437 Contemporary China: Society and Politics (III)**
Spring. 4 credits. V. Shue.
Selected reading and in-class discussion of some of the themes that have been posed by the rapidly escalating processes of social change taking place under conditions of continuing political authoritarianism in China today. Topics include broad changes in demographic and social structure; rising tensions in family and gender relations; the enduring salience of community and workplace; the resurgence of Chinese nationalism, of ethnic nationalisms, of regionalism, and of a new religious movements; the significance of rising rates of crime and of political corruption; the growing crisis of social welfare delivery; and the limits on political dissent and on the development of civil society.

**GOVT 438 Contemporary China: Political Economy (III)**

**GOVT 439 Japan in International Politics (III)**

**GOVT 440 The Political Economy of Market Reform (also GOVT 630) (III)**

**GOVT 448 The Quality of Democracy in Latin America (III)**

**GOVT 449/749 Politics and Magic: Popular Religion and Political Power in China (III)**
Spring. 4 credits. V. Shue.
A course of readings, research, and seminar discussions illuminating the intersections, past and present, between popular religious organizations, mass spiritual movements, the exercise of state power, and the patterns of political dissent in China. Topics include the Taiping Heavenly Kingdom, the Boxer Uprising, Chinese modern and contemporary charismatic healing cults, as well as the recent global rise (and repression in China) of the Falun Dafa movement.

**GOVT 456 Poor People's Movements (III)**

**GOVT 458 Comparative Democratization (III)**

**Political Theory**

GOVT 161 is recommended.

**GOVT 260 Social and Political Philosophy (also PHIL 260) (III or IV)**

**GOVT 293 Inequality, Diversity, and Justice (III or IV)**
Fall. 4 credits R. Miller.
See PHIL 193 for description.

**GOVT 360 Ideology (III)**
Spring. 4 credits. D. Rubenstein.
This course focuses on critical approaches to the study of ideology in order to understand the role of ideology in political subject formation. After an initial explanatory presentation of key Marxist (Marx, Gramsci, Althusser, Hobsheide), structuralist/semiotic (Barthes, Eco) and psychoanalytic models (Freud, Lacan), we focus on specific ideologies of race, technology and gender. Students are required to write a 7–8 page take-home examination and a longer 10–12 page (double spaced) paper related to the issues addressed by the course material. A recommended bibliography is available to assist in the selection of the final paper topic.
[GOVT 364] The Selfish Individual and the Modern World (III)

[GOVT 366] American Political Thought from Madison to Malcolm X (also HIST 316 and AM ST 366) (III)
Fall. 4 credits. J. Kramnick.
A survey of American political thought from the eighteenth century to the present. Particular attention is devoted to the persistence of liberal individualism in the American tradition. Politicians, pamphleteers, and poets provide the reading. Insightful historical and social context is offered.

[GOVT 369] Introduction to Feminist Political Thought (also WOMNS 359) (III)
Fall. 4 credits. N. Hirschmann.
This course provides a general introduction to feminist political thought, surveying various current issues and methodologies. The course combines analysis of women in Western political thought and the relationship of feminism to the discipline of political science; readings by contemporary feminist theorists; and consideration of how these topics can contribute to practical issues such as battering, pornography, prostitution, racism, sexuality, and sexual harassment.

[GOVT 370] Political Theory and Cinema (also GERST 330, COM L 330, THETR 330) (III or IV)
Fall. 4 credits. G. Waite.
For description, see GERST 330.

[GOVT 375] Visual Culture and Social Theory (also ART H 370 and COM L 368) (III or IV)

[GOVT 377] Concepts of Race and Racism (III)
Spring. 4 credits. A. M. Smith.
This course examines race and racism from a political theory perspective. We discuss the different types of racism, including traditional racism, "new racism" or cultural racism, scientific racism and contemporary hybrid racism. We then examine the politically ambiguous "ethnicity theory." In the second half of the course, we consider the works by Marble on African American political economy; women of color feminist theorists; native American theorists; Takaki on Asian American labor history; and Hero on Latinos/Latinas and American politics. Although we discuss American multicultural history in some detail, our primary focus is on an investigation of these works' theoretical foundations.

[GOVT 461] Interpreting Race and Racism (III)

[GOVT 462] Modern Political Philosophy (also PHIL 346) (III or IV)
Fall. 4 credits. R. Miller.
See Philosophy 346 for description.

[GOVT 464] Theorizing the Public Sphere (also GERST 496) (III or IV)
Fall. 4 credits. P. U. Hohendahl.
For description, see GERST 496.

[GOVT 465] Reconciling Liberalism (also PHIL 447) (III or IV)
Spring. 4 credits. R. Miller.
For description, see PHIL 447.

[GOVT 466] Feminism and Gender Discrimination (III)

[GOVT 467] Radical Democratic Feminisms (III)

[GOVT 469] Limiting War (also PHIL 369) (III or IV)

[GOVT 470] Contemporary Reading of the Ancients (III)

[GOVT 471] The Cultural Theory of the Frankfurt School (also GERST 495, COM L 495) (III or IV)

[GOVT 473] Marx, Nietzsche, Freud (also GERST 415) (III or IV)

[GOVT 474] Community, Nation, and Morality (also PHIL 446) (III or IV)

International Relations

GOVT 181 is recommended.

[GOVT 294] Global Thinking (also PHIL 194) @ (III or IV)
Fall. 4 credits. No prerequisites; intended for freshmen and sophomores. H. Shue.
For description, see PHIL 194.

[GOVT 380] The Politics of Modern Germany (III)

[GOVT 382] International Relations of East Asia @ (III)

[GOVT 384] Contemporary International Conflicts (III)
Fall. 4 credits. J. J. Suh.
This is a survey of contemporary international conflicts. After a brief review of theoretical literature on the causes of conflict/war, we address some of the more salient international security issues such as proliferation of weapons of mass destruction, missile defense, civil wars, and ethnic conflicts. We also critically evaluate whether the use of force or outside intervention is helpful in mitigating the contemporary conflicts.

[GOVT 385] American Foreign Policy (III)
Fall. 4 credits. M. Fanis.
This course provides an overview of the history of American foreign policy, concentrating on the period between 1914 and the present. Various theoretical approaches to the study of American foreign policy are covered, including international, domestic, and individual levels of analysis. These interpretations are used to examine events including the First World War and the League of Nations; the rise of American hegemony; various crises of the Cold War, including the U-2 crisis, the Suez and Berlin crises, and the Cuban missile crisis; and the Korean, Vietnamese, and Gulf Wars. Emphasis is placed on security as opposed to economic foreign policy issues.

[GOVT 386] The Causes of War (III)
Spring. 4 credits. C. Way.
This course surveys leading theories of the causes of international war that is, large scale organized violence between the armed forces of states. Why is war a recurring feature of international politics? Are democracies more peaceful than other types of states, and if so what explains this "democratic peace? Why do democratic publics seem to reward threats to use force by "rallying around the flag" in support of their governments? Does the inexorable pattern of the rise and fall of nations lead to cycles of great power wars throughout history? These and other questions are examined in our survey of theories of war at three levels of analysis: the individual and small groups, domestic politics, and the international system. Topics covered include: historical patterns in warfare; theoretical explanations for war; evaluation of the evidence for the various explanations; nuclear weapons; ethics and warfare; and the major security problems of the coming decades, civil war, and the prospects for peace in the future.

[GOVT 387] Political Psychology in International Relations (III)

[GOVT 388] International Political Economy (III)

[GOVT 389] International Law (III)

[GOVT 390] International Relations and Film Theory (III)
Fall. 4 credits. J. Krasner.
This course considers how ideas about major themes in the history of world politics have been expressed through film. The course includes a review of principal theories of international relations as well as a consideration of visual analysis: how filmmakers express their ideas through the construction, juxtaposition, and manipulation of images. Topics such as World War I, the Cold War, and globalization are addressed and films discussed include Paths of Glory, Lifeboat, and The Manchurian Candidate.

[GOVT 391] Chinese Foreign Policy @ (III)
Fall. 4 credits. A. Carlson.
In this course we examine the dramatic rise of China through review of the main themes and trends in contemporary Chinese foreign policy since the establishment of the People's Republic, and more specifically concentrating on major developments in Chinese foreign policy during the 1980s and 1990s. Such a survey involves not only a consideration of the evolution of China's relations with its major bilateral partners, but also investigating its changing relationship with international institutions and norms. In addition, students are asked to consider the extent to which Chinese foreign policy is simply a reflection of systemic and structural variables, such as shifts in the relative balance of power, and what role other factors, such as ideology, culture, leadership psychology, and/or domestic politics play. In short, we are exploring how important "China" is in determining the course of Chinese foreign policy.

[GOVT 392] International Relations of the Middle East (also NES 395) @ (III)

[GOVT 393] Introduction to Peace Studies (also SOC 310) (III)
Fall. 4 credits. J. Reppy.
This course serves as an introduction to the study of war, peace, and peacemaking. We study different theories of peace and war from a variety of disciplinary perspectives. The course covers definitions of peace and war, causes of conflict, and modes of conflict prevention and resolution. The concepts are
applied to a range of historical and current conflicts. Students prepare analyses of specific conflicts or instances of peacemaking for class presentation.

**GOVT 395 New Forces (Actors and Issues) in International Politics (III)**
Spring. 4 credits. A. Carlson.

How important are regional groupings, non-governmental organizations, narco-terrorism, ethnic groups, and transnational environmental issues, within international politics? These forces seem to be occupying an increasingly central position in the international arena, yet the factors that have caused their rise, and the degree to which they have transformed the face of international politics, are still poorly understood. In this course we address such issues through exploring how students of international politics have described and explained the emergence of these new forces in the international system during the post-Cold War period. In short, the course focuses on determining the extent to which competing explanations for these new actors and issue areas within the region.

**GOVT 400 International Institutions (also GOVT 690) (III)**
Fall. 4 credits. J. J. Suh.

This is a study of the ways in which units in the international system are constituted and how their interactions are institutionalized. We examine not only formal international organizations that have formal decision-making rules and palpable entities, but also “settled practices” that legitimize certain actions and de-legitimize others. We develop our theoretical understanding of international institutions by analyzing such issue areas as decolonization, human rights, the environment, and communications.

**GOVT 401 Democracies in the International System (III)**

**GOVT 403 The Military and New Technology (also SATS 483) (III)**
Spring. 4 credits. J. Reppy.

In conventional wisdom, military organizations are seen paradoxically both as inflexible institutions and as proponents and consumers of rapid technological change. In this seminar we examine changes over time in the attitude of the military toward new technology and analyze competing explanations for these changes. Readings include Michael Howard, *War and European History*, John Ellis, *The Social History of the Machine Gun*, and Donald Mackenzie, *Inventing Accuracy: An Historical Sociology of Nuclear Missile Guidance*.

**GOVT 405 Gender, Nationalism, and Conflict (III)**

**GOVT 407 Asian Security (also GOVT 687) (III)**
Spring. 4 credits. A. Carlson, J. J. Suh.

Throughout the 1990s it has been part of the conventional wisdom of international relations scholarship that Asia was, in the words of Aaron Friedberg, “ripe for rivalry.” In this seminar we explore the accuracy of such an assessment through studying Asia’s historical and contemporary security situation. Such an examination is oriented toward introducing students to the security issues confronting Asia, alongside an exploration of the extent to which competing explanations drawn from different strands of IR theory and the security field can explain such issues. In addition, we ask students to challenge the limitations of traditional security studies through considering the importance of new actors and issue areas within the region. In short, while the seminar has a regional focus on east Asia, it is framed within the broader literature of the field.

**GOVT 490 Honors Seminar: Thesis Clarification and Research**
Fall. 4 credits. A. M. Smith.

Each student works individually with a faculty member. The student initiates the tutorial by outlining the general area the thesis will treat, the state of existing research, and the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The application form for Independent Study is available in 125 McGraw Hall and must be completed at the beginning of the semester in which the course is being taken.

**GOVT 491 Conflict, Cooperation, and Norm: Ethical Issues in International Affairs (III)**

**Honors Courses**

Late each spring a limited number of sophomore majors are admitted to the honors program, their work to begin the following fall. Application forms and a full description of the program may be obtained in 125 McGraw Hall.

**GOVT 493 Studying Politics: The Junior Honors Seminar**
Fall and spring. 4 credits. H. Schamis; spring, K. O’Neill.

This seminar meets twice weekly under the supervision of a senior faculty member with numerous classes being led by other members of the department faculty. The seminar surveys the broad range of what we mean by “the study of politics” and the various methods we enlist to carry out the study. The seminar is writing intensive, requiring at least five papers.

**GOVT 494 Honors Seminar: Thesis Writing**
Fall. 4 credits. A. M. Smith.

Each student works individually with a faculty member. The student initiates the tutorial by outlining the general area the thesis will treat, the state of existing research, and the capacity to subject a body of related readings to analysis and criticism. The seminar is determined by the faculty tutor, while the degree of honors (if any) awarded is being taken.

**GOVT 499 Readings**

Fall or spring. 1–4 credits.

**Graduate Seminars**

Qualified undergraduates are encouraged to apply for seminars listed with 600 course numbers but may only register with the permission of the instructor. Students may consult the supplement that lists graduate courses, available in the department office.

**Field Seminars**

**GOVT 600 Field Seminar in American Politics**
Fall. 4 credits. E. Sanders.

The basic issues and institutions of American government and the various subfields of American politics are introduced. The focus is on substantive information and theoretical analysis and problems of teaching and research.

**GOVT 601 Scope and Methods of Political Analysis**
Fall. 4 credits. W. Mebane.

This course introduces major analytical approaches used in contemporary political science research. We touch on broad philosophical issues concerning the nature of theory and inference, the practices of cultural
and historical interpretation, and the relevance of moral values and political commitments. Several kinds of research designs, including comparative case study and quasi-experimentation, are briefly examined. The basic analytical ideas involved in statistical methods such as sampling and regression analysis are introduced, as are the basic concepts of the theory of collective choice and the elementary methods of applied game theory.

**GOVT 602 Seminar in Political Methodology**
Spring. 4 credits. J. Cowden and W. Mebane.
This course provides an introduction to some of the quantitative methods used in the social sciences. Topics discussed include elementary probability theory, random variables, functions of random variables, and sampling distributions; concepts of inference including point estimation, confidence intervals, and hypothesis testing, bivariate regression, and multiple regression.

**GOVT 605 Comparative Methods**
Spring. 4 credits. J. Pontius.
This seminar provides a survey of different methodological approaches to the study of comparative politics: single case studies, comparative case studies based on Millian logic, qualitative comparative analysis, and a variety of quantitative methods. Substantive works are used to illustrate each approach. Throughout, the discussion emphasizes methodological issues that are common to all forms of comparative inquiry.

**GOVT 707 Game Theory for Political Science**
Fall. 4 credits. K. O'Neill.
Introduction to game theoretic models of politics. Lays out the logical basis of game theory at an accessible level, and demonstrates applications to topics in comparative politics, international relations, and American politics. Students achieve an understanding of the basic concepts of game theory, the ability to solve and to formulate simple games, and some knowledge of the basic models used in political science.

**American Government and Institutions**

**GOVT 610 Political Identity: Race, Ethnicity, and Nationalism (also LSP 610)**
Fall. 4 credits. M. Jones-Correa.
The social sciences generally treat ethnicity, nationalism, and race as descriptive categories or variables, while avoiding actually defining these categories, or thinking about how they should be used. The course seeks answers to the following questions: How should we go about describing ethnicity, nationalism, and race? Should we treat them as primordial or as social constructions? Much of the recent literature suggests the latter. If constructed, by whom are they constructed (or by what)? What constrains or structures these constructions? What purposes do these constructions serve? Whom do they serve? Are some constructions better representations of identity than others, and what does this mean? How should we go about applying these categories in political analysis?

**GOVT 612 American Political Development in the 20th Century (co-taught with GOVT 404)**
Spring. 4 credits. E. Sanders.
For description, see GOVT 404.

**GOVT 613/413 Finance, Federalism, and Politics**

**GOVT 615 State and Economy in Comparative Perspective**
Fall. 4 credits. R. Benew.
This course reviews the extensive literature on the political economy of comparative state formation and institutional change. Among the topics covered are war-making and state expansion, regime evolution and economic development, and market processes and class transformation. Although much of the reading and discussion focuses on the United States and Europe, the limits of these cases as theoretical prototypes for the remainder of the world is also considered.

**GOVT 620 The United States Congress**

**GOVT 623 The Politics of Courts**
Fall. 4 credits. J. Babkin.
All modern or westernized governments have judicial organs, designed to provide impartial decisions on certain kinds of disputes. But the kinds of issues that are left to courts vary widely from country to country and from era to era; the forms and degrees of political insulation for courts also vary widely, even the official rationales for such institutions vary a good deal. All of these differences are sometimes subjects of political controversy. This course will survey various forms and doctrines of judicial authority, seeking to clarify the relation between particular judicial models and the political systems in which they operate. Sub-national courts and administrative organs will be included in the survey, but principal emphasis will be on the role of courts in English-speaking countries.

**GOVT 703 Political Economy**

**GOVT 728 Government and Public Policy**
Fall. 4 credits. T. J. Lowi.
For description, see GOVT 428.

**Comparative Government**

**GOVT 630 The Political Economy of Market Reform**
Spring. 4 credits. H. Shachmi.
This seminar is open to advanced undergraduates and graduate students. It addresses the political economy of market reform in East-Central Europe and Latin America. Specifically, we study the relatively fast collapse of state socialism versus the long decline of import substituting industrialization, and their respective legacies on new economic and political systems. We focus on the role of major agents in the transformation process—the international system, coalitions of interest groups, political (especially state) institutions, and ideologies. Throughout the semester, we examine the emerging market societies in the east and the south in comparative fashion.

**GOVT 632 Politics and Society in Western Europe**

**GOVT 638 Latin American Political Economy**

**GOVT 639 Studying Political Culture**
Spring. 4 credits. D. Schiener.
Selected readings deploying a range of differing approaches to the study of the relations between culture and politics. Discussion of central methodological and interpretive questions and paradigms including the linkage of cultural with structural explanations and the framing of informative comparisons across cultures. Readings and discussion focus on European and North American examples.

**GOVT 641 Revitalizing Labor: A Comparative Perspective (also ILRIC 632)**
Fall. 4 credits. L. Turner.
For description, see ILRIC 632.

**GOVT 642 Comparative Political Economy: East and Southeast Asia**

**GOVT 645 Chinese Politics**
Fall 4 credits. V. Shue.
Review and assessment of several of the major currently competing approaches to the study of Chinese politics. Discussion and evaluation of leading works in the field analyzing Chinese state and society, policymaking and policy implementation, bureaucratic politics, elite politics, political culture, and political economy. Special attention to problems of research and interpretation.

**GOVT 653 The Plural Society Revisited (also ASIAN 607)**

**GOVT 656 Comparative Political Economy**

**GOVT 657 Comparative Democratization**

**GOVT 660 Social Movements and Contentious Politics (also SOC 660)**
Fall. 4 credits. S. Tarrow.
This research seminar surveys the related fields of social movements and contentious politics. Using theories that derive from both the collective behavior and political process traditions of social movement research, the course seeks to broaden these into a general approach to contentious politics, applicable protest cycles, strike waves, nationalism, democratization and revolution. Students write review essays or research papers.

**GOVT 692 The Administration of Agricultural and Rural Development**
Spring. 4 credits. N. Uphoff.
For description, see INTAG 603.

**GOVT 731 Political Ecology**

**GOVT 732 Postsocialist Transformations**

**GOVT 735 Politics of South Asia**

**GOVT 749/449 Politics and Magic: Popular Religion and Political Power in China**
Spring. 4 credits. V. Shue.
See GOVT 449 for description.

**Political Theory**

**GOVT 663 Political Theories of Power**
A complementary course to GOVT 667, this graduate seminar allows students to continue intensive study of major figures in modern political theory through particular temporal or thematic lenses. While the focus changes from year to year, the seminar either engages in intensive analysis of two or three particular "great names" in the field of political theory, or focuses on a specific theme—such as freedom, justice, obligation—as it is treated by significant theorists of the modern era.

GOVT 669 Modern Social Theory I (also GERST 669) 4 credits. Not offered 2001–2002.

GOVT 671 Graduate Seminar in Feminist Political Theory Fall 4 credits. The course is open to undergraduates who have taken GOVT 463 or courses in feminist theory, with permission of the instructor.

N. Hirschmann. This graduate seminar examines contemporary feminist theory from the perspective of political theory to study the work of feminist theorists who work specifically within the discipline of political science, as well as the specifically political dimensions of work not generally considered political theory. Though particular readings and topics change from year to year in response to the most recent literature, in general the course focuses on questions of epistemology and methodology as a way to explore a variety of issues of relevance to feminism as an academic, intellectual, and political enterprise.

GOVT 674 Theory and Practice of Nationalism Fall. 4 credits. D. Schirmer. This course is devoted to the comparative study of the rise and transformation of nationalism, according to different theoretical and philosophical traditions. The relationship of nationalism to questions of race, gender, class, and time is also discussed on the basis of both theoretical and empirical studies.

GOVT 762 Sexuality and the Law Seminar (also WOMNS 762) Spring. 4 credits. A. M. Smith. An advanced feminist theory/social theory/policy theory/queer theory/legal theory seminar for graduate students. The seminar deals first with approaches to sexuality that build on and interrogate the post-structuralist approach that defines sexuality as a social construction, rather than an expression of a-historical instincts. Then we explore major works in the field that address issues in American politics such as the construction of “the family” in law; lesbian, gay, bisexual and transgender rights; the regulation of prostitution and public sex; eugenics and governmental population management initiatives; sex education, birth control, reproductive technologies and abortion politics; pornography, censorship and public arts funding; public policy responses to sexually transmitted diseases and the AIDS crisis, and the "feminist politics" dimension of welfare policy. Our reading list includes the works of Michel Foucault, Martha Fineman, Janet Halley, Nancy Fraser, Judith Butler, Judith Walkowitz, Jeffrey Weeks, Linda Gordon, Mimi Abramowitz, Gwendolyn Mink, Dorothy Rabenstein, Rosalind Petchesky, Nan Hunter and Lisa Duggan. Advanced undergraduate students are welcome to apply for admission to the seminar, but they are asked to satisfy, at minimum, the following prerequisites: at least one course in feminist theory and at least one course in American Government.

International Relations

GOVT 680 Sovereignty and International Politics Fall. 4 credits. A. Carlson. In recent years, international relations theorists have become embroiled in an increasingly heated debate over the role of sovereignty in the contemporary international system. In this seminar we investigate the main aspects of this debate—particularly as it relates to questions involving the historical evolution of sovereignty, and its contemporary meaning within an international system. The intent of such a course is not only to critically analyze sovereignty’s role in international politics, but also to explore the approach IR theorists take in regards to sovereignty informs their understanding of systemic and structural change within the international system. In addition, we consider the extent to which a series of competing explanations shed insight upon issues of continuity and change raised by the apparent rise of economic and political integration between states.

GOVT 681 Politics of Transnationalism Fall. 4 credits. S. Tarrow. Between the realism of traditional international relations and the constructivism of its critics, a new school of transnational politics has developed. Ranging from sociological institutionalists who examine transnational normative diffusion to students of international institutions who focus on non-state authority, to globalization and its deconstructs, scholars in this tradition examine the responses of actors in civil society to a globalizing world through their interactions with one another, with states, and with international institutions. The course traces the development of this area of research from its origins in the "old" transnational politics of the 1970s; examines critically the contributions of constructivism, sociological institutionalism, and global civil society; and proposes a model of the international system in which transnational actors—claiming to act as proxies for civil society groups—interact with states and international institutions. Particular attention is paid to the formation of transnational coalitions among social movements, non-state actors and agents of international institutions.

GOVT 687 Asian Security (also GOVT 487) Spring. 4 credits. J. Kirshner. This seminar considers the relationship between economics and national security. Specific topics change from year to year, but typically include the following: the economic foundations of power, economic coercion, and the economic roots of conflict, and the ways in which structural changes in the international economy shape and limit state authority.

GOVT 691 Normative Elements of International Relations Fall. 4 credits. H. Shue. We examine selected normative elements of international affairs, divided into three interlocking clusters. First are issues about conflict, including both low-intensity military intervention and nuclear weapons. Second are questions about cooperation, especially between rich nations and poor nations. Third are debates about authority and status of the major players in the international system: individual persons, nation-states, and international regimes. Questions considered include: is the retention by some nations of nuclear weapons morally justified? Is the world economy unjust? Should national governments be pressured to respect individual human rights?

Independent Study

This course is NOT open to undergraduates. Undergraduates wishing to conduct supervised study should register for GOVT 499.

GOVT 799 Independent Study Fall or spring. 4 credits.

GOVT 799 is a course of individualized readings and research for graduate students. Topics, readings, and writing requirements are designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chairs of their special committees. They are available from, and must be returned to, the graduate assistant in 125 McGraw Hall.
2) Of the total nine courses:

- Seminars.
- History Courses excluding First-Year Writing

Entry requirement: completion of

1) Take nine history department courses (for

unsure about their qualification should consult

placements are urged to enroll in intermediate or

Placement Examination or a 6 or 7 in the

Students earning a 4 or 5 in the Advanced

American, and Asian history; and in the

Baccalaureate credit awarded by the College

Advanced Placement and International

Discipline. A wide variety of introductory and

advanced courses is offered. The department is

particularly strong in ancient, medieval, and

modern European history; in American, Latin

American, and Asian history; and in the

history of science.

Advanced Placement and International Baccalaureate

Advanced placement and International Baccalaureate credit awarded by the College of Arts and Sciences counts towards the 120 credits needed for graduation, but does not count toward completion of the history major. Students earning a 4 or 5 in the Advanced Placement Examination or a 6 or 7 in the International Baccalaureate history examinations are urged to enroll in intermediate or advanced history classes. Students who are unsure about their qualification should consult the instructor.

The Major

To complete the history major, a student must fulfill the requirements listed below:

Entry requirement: completion of any two History courses excluding First-Year Writing Seminars.

1) Take nine history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better.

(Courses taken for entry may count towards fulfilling the major.)

2) Of the total nine courses:

- a) four must be outside of American history and
- b) three must be in history before 1800.

Courses used to fulfill requirement (1) above may also be used to fulfill Requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill Requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both Requirements (2a) and (2b).

3) Of the total nine courses, one must be a 400-level seminar. HIST 400 may be used to fulfill this requirement. Appropriate 400-level seminars may be used to fulfill Requirements (2a) and (2b).

Honors

The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take the Honors Proseminar (History 400) plus an additional 400-level seminar, preferably during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second term of the sophomore year or early in the junior year, interested students should speak to a faculty member or faculty adviser about the honors program.

Before the beginning of the senior year, the candidate presents, in conversation or in writing, a thesis proposal to an appropriately qualified member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in HIST 401, Honors Research, with their supervisors. Any exceptions to this must be approved by the Honors Committee. HIST 401 is a four-credit course that permits honors candidates to conduct research and to begin writing the honors essay. At the end of the first semester of the senior year, as part of the requirements for HIST 401, the student submits to the supervisor a 10- to 15-page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole and meets with a committee consisting of the student's supervisor and one other department member who will eventually serve as a reader of the thesis. That committee then recommends whether the student may proceed to enroll in HIST 402, Honors Thesis, for the final semester of the senior year. HIST 402 is a four-credit course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the two faculty members who administered the preliminary oral interview in December.

The text of the honors essay may not exceed 60 pages except by permission of the chair of the honors committee and the student's supervisor. Two copies are due during the third or fourth week of April. In May each honors candidate is given an oral examination administered by the supervisor; examination focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, seventeenth-century science, nineteenth-century American politics).

To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral examination.

Cornell-in-Washington Program. History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Course Offerings

Comparative history
- History of science
- American history
- Latin American history
- African history
- Asian history
- Near Eastern history
- Ancient European history
- Medieval, Renaissance, and early modern
- European history
- Modern European history
- Honors and research courses

Course Numbering System

100-level courses are very general introductory courses (like 151-152, 190-191) and freshman writing seminars.

200-level courses come in two kinds: seminars or lecture courses. Neither kind has prerequisites and both admit freshmen.

200-level seminars (which are identified by the name "seminar" in the title) are similar to first-year writing seminars, except that there is greater emphasis on subject matter and less on writing.

200-level lecture courses cover a relatively broad geographical area, period of time, or subject.

300-399-level courses may have specified prerequisites or deal with more-specialized subjects than do those numbered 250-299. Admission of freshmen varies from course to course and is indicated in the course descriptions.

400-499 are upper level undergraduate courses.

600-699 and 700-799 are graduate level courses.

Comparative History

See Department of Classics.

See Department of Near Eastern Studies.

See Department of Asian Studies.
Tactical evolution and the impact of innovation were found both in the East and the West from ancient times up to the eighteenth century. Tactically and the impact of innovations are stressed, but attention is also paid to the general social and cultural background and the role of nonmilitary factors.

[HIST 380 Social History of Western Technology # (III)]
For description, see History of Science.

[HIST 393 Images of Humanity in Medieval China (also ASIAN 393) @ # (III)]
Fall. 4 credits. Prerequisite: any course on premodern Chinese or Chinese religions, or permission. Not offered 2001–2002. C. Peterson.

[HIST 409 Seminar in Work in Europe and America # (III)]
A comparative study of the meaning of work in different societies from premodern times to the present. Emphasis is on the "representations" of work of the actors themselves who worked, as well as of those, who for various critical reasons, did not work. The seminar examines not only ideology but also the organization, practice, and physical place of work. It explores theory as well as "cases," and draws on anthropological and sociological as well as historical materials.

[HIST 432 The City in History: Europe and America # (III)]
Reading and discussion of significant interpretations of cities in medieval and early modern Europe and in modern Europe and America. Individual research projects.

[HIST 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also GOVT 454) # (III)]

History of Science

[HIST 250 Technology in Society (also ENGRG 250, ECE 250, and S&TS 250) # (III)]
Fall. 3 credits. R. Kline.
For description, see ENGRG 250.

[HIST 280 The Sciences in the Twentieth Century (also S&TS 283) # (III)]
Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciences—physical and biomedical—during the twentieth century, students learn about the reciprocal relations between science and society. Topics covered may include the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Soviet Union, Nazi Germany, and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the changing character of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-Western cultures.

[HIST 281 Science in Western Civilization (also S&TS 281) # (III)]
Fall. 4 credits. HIST 281 is not a prerequisite to 282. P. R. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. 281 runs chronologically up to the death of Isaac Newton and focuses on the cultural traditions of Christian Europe and its selective appropriation of a Greek heritage.

[HIST 282 Science in Western Civilization (also S&TS 282) # (III)]
Spring. 4 credits. HIST 281 is not a prerequisite to 282. P. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show sciences as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. This course covers the eighteenth, nineteenth, and early twentieth centuries.

[HIST 287 Evolution (also BIO EE 207, S&TS 287) # (I or III)]
Fall or summer. 3 credits. W. Provine.
For description, see BIO G 207.

[HIST 292 Inventing an Information Society (also ENGRG 298, ECE 298, and S&TS 292) # (I or III)]
Spring. 3 credits. R. Kline.
For description, see ENGRG 298.

[HIST 380 Social History of Western Technology # (III)]
Studies in the interaction between technological changes and social changes in Western Europe and America since the eighteenth century. Readings and lectures deal both with instances of social transformation that accompanied technological changes and with the role of technology in social thought and cultural expression. Special attention is paid to three periods: Britain during the Industrial Revolution, America in the nineteenth century, and America during the Vietnam War.

[HIST 415 Seminar in the History of Biology (also BIO G 467, B&SOC 447, S&TS 447) # (I or III)]
Summer. 4 credits. Limited to 15 students. P. R. Dear and R. Weil.
England in the 17th century was a revolutionary ferment of political, religious, and philosophical conflict. This course examines the conflicts and arguments, and the means explored for their apparent resolution. These affected ideas of God and worship, the meanings of good and evil, the relation of the natural world and its scientific appropriation, and the legitimacy and proper form of political power. The course focuses on the close study of primary source readings by many of the principal actors in all these areas, including Francis Bacon, Thomas Hobbes, the Duchess of Newcastle, and John Locke.

[HIST 525 Seminar in the History of Technology (also S&TS 525)]
Spring. 4 credits. R. Kline.
For description, see S&TS 525.

[HIST 616 Enlightened Science (also S&TS 416)]
"Science" is a term that is often associated with "rationality." The idea that "reason," rather than "faith" or "tradition" should be the pre-eminent guide. No practical action has deep roots in the thought of eighteenth-century Europe, the period known as the Enlightenment. The practice and image of science in the Enlightenment shows how this ideal was developed and understood, and what its meanings and implications were. Those meanings, and their associated values, remain strongly with us today. This course investigates our current scholarly understanding of many themes and issues relating to "enlightened science," and the practical consequences of the period itself in a variety of topical areas, from political economy to astronomy and natural history, in several national contexts including Scotland, France, and Germany. We attempt to view these materials from the perspective both of developments from earlier periods and in relation to the later consequences of this ideology.

[HIST 680 Seminar in Historiographical Approaches to Science (also S&TS 680)]
Examines philosophical, sociological, and methodological dimensions of recent historiography of science.

[HIST 682 Topics in the Scientific Revolution (also S&TS 682)]
This is a graduate seminar devoted to investigation of recent scholarship and issues in sixteenth- and seventeenth-century European knowledge of nature. Students are expected to produce a substantial paper focused on the study of primary source documents. Topics include: credibility and social status; the academic environment;
The impact of the Great Depression and World War II on American politics, law, and culture.

[HIST 209 Seminar: Political History of Indians in the United States (also AIS 209)] # (III)
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001-2002. D. Usner.
An investigation of political organization and change among Native American societies. Discussions and assignments examine forms of tribal government, diplomacy, and warfare, as well as political relations with European colonies and the United States. Specific topics include pan-Indian confederacies, Indian policy, struggles over sovereignty, and Indian strategies of autonomy and resistance.

[HIST 210 The Atlantic World from Columbus to Equiano # (III)]
After Europeans first crossed the Atlantic in the late fifteenth century, the ocean became a vast highway linking the European powers—Spain, France, Britain, and the Netherlands—with their colonial outposts in America. This seminar explores the Atlantic world through reading such primary sources as the log of Christopher Columbus and the autobiography of Olaudah Equiano, an Anglo-African sailor, and recent scholarly examinations of the slave trade and other aspects of the Atlantic economy. Intended primarily for sophomore prospective history majors; open to others by permission of instructors.

[HIST 212 African-American Women in the Twentieth Century (also AM ST 212 and WOMNS 212)] (III)
An examination of twentieth-century themes significant in the historical experience of Black women. Major emphasis is on race, gender, community, art, and politics in post World War II America. Specific topics include African-American women's involvement in such areas as political activism at the electoral and grass-root levels; socio-economic issues affecting women and the community; religion; representation and participation of Black women in art and entertainment; and issues specific to gender cross-racially as well as intra-racially.

[HIST 213 Asian American History (also AAS 213)] (III)
Fall. 4 credits. Staff.
Comparative introductory history of Asian Indians, Chinese, Filipino, Japanese, and Koreans in the U.S. from about 1850 to World War II. Themes include U.S. expansionism in the Pacific, Asian migrant labor in Hawaii and the American West, the anti-Asian movement, and Asian resistance.

[HIST 214 Seminar on American Foreign Policy (also AM ST 214)] (III)
Fall. 3 credits. Prerequisite: permission of instructor. W. L. Washington.
Topic: for fall 2001: U.S. Presidential power and foreign relations since the 1890s.

[HIST 238 History of Women in the Professions, 1800 to the Present (also AM ST 258, WOMNS 238, and HD 258)] (III)
For description, see HD 258.

[HIST 251 Black Religious Traditions from Slavery to Freedom (also AM ST 251, RELST 251)] (III)
A survey on the black religious and spiritual traditions during bondage and the early years of freedom. The course examines slave religion, the rise of black churches in the North, the formation of black churches after the Civil War, the independent church movement and the churches' role in social protest.

[HIST 260 Introduction to U. S. Latino History, Part I (also LSP 261 and AM ST 259)] (III)
This course introduces students to the history of Latinos in the United States. We focus specifically on the history of Chicanos (Mexican Americans) and Central Americans. Part II of this course, History 261, focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. (students are not required to take both courses). Among the topics addressed are: historical immigration patterns and the "push/pull" factors that compelled migration to the United States; the social and political events that shaped the evolution of these Latino communities; and the role of cultural identity, race, class, and gender in shaping experience; and the role of foreign policy in formulating immigration policy.

[HIST 261 Introduction to U. S. Latino History, Part II (also LSP 261 and AM ST 261)] (III)
Spring. 4 credits. M. C. Garcia.
This course discusses the history of Latinos from the Caribbean: the Puerto Ricans, Cubans, and Dominicans. Students are introduced to some of the most important historical and theoretical works in this field. Topics discussed include the push-pull/historical-stuctural factors that influenced migration to the United States; the historical evolution of these communities; the role of cultural identity, as well as race, class, and gender in shaping experience; and the intersection of foreign policy and immigration policy.

[HIST 273 Women in American Society, Past and Present (also WOMNS 273)] (III)
A survey of women's experiences in America from the seventeenth century to the present. Among the topics discussed are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism.]
A survey of North American Indian history from the sixteenth century to the mid-nineteenth century. Relations between Indian Nations and with European colonies are explored. Different cultural groups and cross-cultural encounters are compared, with emphasis on resistance and adaptation to European colonialism. The formative years of U.S. Indian policy and the experiences of Indian people through the removal era receives close attention.

**HIST 277 American Indian History Since 1865** (also AIS 277 and AM ST 277) (III)
A historical study of American Indians in the United States and Canada from the mid-nineteenth century to the present. The active and complex role played by Indian people in their responses to government policies and to socioeconomic changes is emphasized. Challenges faced and initiatives taken by Indians from the early reservation years to the current era of self-determination. Cultural change and continuity within Indian communities is closely examined.

**HIST 303 African-American Women in Slavery and Freedom** (also WOMNS 307 and AM ST 303) (III)
Historical exploration of African-American women from a sociopolitical perspective. Topics include women in Africa, slavery and freedom, sexuality, labor, the family, and gender cross-racially beginning with the African background and ending at 1900.

**HIST 304 American Culture in Historical Perspective, 1880–1890** (also AM ST 304) (III)
An introduction to the study of modern American culture. Emphasis is on the role of culture in the quest for national identity; the function of cultural myths and myth-making; the advent of modernism; relationships between mass culture, popular culture, and high culture; and the question of American exceptionalism (distinctiveness). Special attention is also paid to the situation of subcultures and regions, to the changing role of entertainment in relation to leisure, the media, ethnicity (pluralism), and the decorative and popular arts.

**HIST 311 The Structure of American Political History** (also AM ST 311) (III)
Examines the course of American politics from the 1600s to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialism and urbanization, the depression, and the international crises from the 1930s to the 1990s.

**HIST 313 U.S. Foreign Relations, 1750–1912** (III)
Examines the development of the U.S. continental and global empires by analyzing foreign policy and policymakers from Benjamin Franklin to Woodrow Wilson. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with HIST 313, a special course, 301, for discussion and guided research is offered.

**HIST 314 History of American Foreign Policy, 1912 to the Present** (also AM ST 314) (III)
Students examine the formative years of the United States as a world power in the twentieth century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policymakers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the Cold War, the Third World, and the increasingly dominant role of the president in the making of U.S. foreign policy.

**HIST 316 American Political Thought: From Madison to Malcolm X** (also AM ST 376 and GOVT 360) (III)
Fall. 4 credits. I. Kramnick.
For description, see GOVT 366.

**HIST 318 American Constitutional Development** (also AM ST 317) (III)
Fall. 4 credits. Not open to freshmen. R. Polenberg.
Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by slavery and emancipation; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt revolution; civil liberties and civil rights in modern America; the right of privacy; the contemporary Supreme Court.

**HIST 321 Colonial North America to 1763** (III)
A survey of European settlement in North America and the Caribbean, emphasizing the interactions of Europeans, Indians, and Africans; economic development; gender relations; religious and political change; and the impact on the colonies of internal and external conflicts.

**HIST 324 Varieties of American Dissent, 1800–1900** (also AM ST 324) (III)
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course explores the varieties of economic, political, and cultural dissent in America between 1800 and 1900, and examines how understanding dissent in its specific historical context illuminates major aspects of American life and culture.

**HIST 325 Age of the American Revolution, 1754–1815** (also AM ST 322) (III)
Spring. 4 credits. M. B. Norton.
An examination of the process by which the 13 English colonies became an independent and united nation, with emphasis on political thought and practice, social and economic change, and cultural development. Attention is paid to the impact of the American Revolution on women, Blacks, Indians, and white males.

**HIST 327 American Frontier History before 1850** (III)
An overview of European exploration and colonization in North America, life on different colonial-Indian frontiers, and territorial expansion by the United States. Topics include the ecological and material framework of expansionism, the political and social dimensions of interethnic and imperial rivalry, and the formation of U.S. Indian and land policies. Themes of human migration, colonial development, and environmental change are emphasized.

**HIST 329 Indians, Settlers, and Slaves in the Early South** (also AIS 329) (III)
Spring. 4 credits. D. H. Usner.
History of the American South from the sixteenth century to the early nineteenth century with an emphasis on intercultural relations. Topics include colonization of the region by Spain, England, France, and the United States, American Indian adaptation and resistance, the evolution of slavery, African American relations with European and Indians, and the role of racial ideology and ethnic identity in the formation of the South as a distinct section of the United States.

**HIST 330 The Age of Jackson, 1815–1850** (also AM ST 330) (III)
An analysis of the factors leading up to the breakup of the Union, the impact of the war in North and South, and the problems of restoration and reconstruction of the seceded states.

**HIST 332 The Urbanization of American Society, 1600–1860** (also AM ST 332) (III)
America was born in the country and moved to the city. This course examines the transformation of America from a rural to a rapidly urbanizing society and culture, from the first European settlements to the era of the Civil War. It is also a history of the city itself, as a human community, and as a crucible of cultural contact and change.

**HIST 333 The Urbanization of American Society, 1860–2000** (also AM ST 333) (III)
Spring. 4 credits. S. Blumin. 332 is not a prerequisite to 333.
An examination of the development of American society in the urbanizing world of the mid-nineteenth century to the thoroughly metropolitan nation of the present. It is also a history of the city itself, as a human community, a crucible of cultural contact and change, and a focus of public policy.

[HIST 335] African-American History from Slavery to Freedom # (III)
M. Washington.
Introductory course on African-Americans from the colonial period to World War II. Emphasizes the effects of slavery and plantation society on African-American culture, society, and the economy of America.

[HIST 336] Capitalism and Society in Developing America, 1607–1877 (also AM ST 336) # (III)
S. Blumin.
An examination of American society in the context of capitalist development, and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of social classes; the emerging ethos of free enterprise.

[HIST 337] Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840–2000 (also AM ST 337) (III)
Spring. 4 credits. Not open to freshmen.
S. Blumin.
An examination of American society in the context of capitalist development and capitalism as a social phenomenon. The rise of corporate capitalism; class, "mass", and the ethos of enterprise in twentieth-century American society.

Spring. 4 credits. Not open to freshmen.
R. Polenberg.
Topics include the Sacco-Vanzetti case; radicalism and reform in the New Deal; Franklin Roosevelt and World War II; the Holocaust and the atomic age; the Cold War and civil liberties; individualism and conformity in the 1950s.

[HIST 341] Recent American History, 1960 to the Present (also AM ST 341) (III)
Summer and fall. 4 credits. Not open to freshmen.
R. Polenberg.
Topics include the Supreme Court and civil rights; Kennedy, Johnson, and social reform; the Vietnam War and Watergate; politics and the presidency from Carter to Clinton; and class, race, and ethnicity in modern America.

[HIST 345] The Intellectual and Cultural Life of Nineteenth-Century Americans (also AM ST 345 and RELST 345) # (III)
R. L. Moore.
An examination of the development of cultural and intellectual diversity in the United States. Particular emphasis is placed on religious pluralism.

[HIST 346] The Modernization of the American Mind (also AM ST 346) (III)
R. L. Moore.
American thought and culture from 1890 to the present. Emphasizes the intellectual impact of major political and economic events and the adaptation of social ideas and values to new conditions.

[HIST 347] American Environmental History (also AM ST 347) (III)
Fall. 4 credits. F. Dunaway.
This course provides an introduction to American environmental history, an exciting and relatively new field of scholarship. Ranging from the colonial period to the present, we explore how different groups of Americans have interacted with the natural world.

[HIST 359] American Families in Historical Perspective (also AM ST 359, HD 359, and WOMNS 357) (III)
Spring. 3 credits. Prerequisite: HD 150 or one 200-level social science or history course. Students are required to register for HD 359. Not offered 2001–2002.
J. Brumberg.
For description, see HD 359.

Fall. 3 credits. Prerequisite: juniors and seniors, or permission of instructor. Not offered 2001–2002.
N. Salvatore.
For description, see ILRCB 385.

[HIST 376] The African-American Workers, 1910–the present: Race, Work, and the City (III)
N. Salvatore.
For description, see ILRCB 386.

[HIST 378] Topics in U.S. Women's History (also AM ST 378 and WOMNS 378) (III)
Fall. 4 credits. Preference given to students who have taken HIST/WOMNS 273, HIST/WOMNS 303, or HIST/WOMNS 238.
N. Salvatore.
M. B. Norton.
Topic for 2003: Gender and Sexuality in America. A colloquium course, limited to 20 students. Students read and discuss some of the new scholarly work on gender and sexuality in American history. They also prepare several written and oral presentations based on their analyses of primary sources in the Cornell Human Sexuality collection and elsewhere.

[HIST 411] Undergraduate Seminar in American Political History (also AM ST 411) (III)
Spring. 4 credits. Prerequisite: permission of instructor. J. Silbey.

[HIST 414] Motivations of American Foreign Policy (III)
Fall. 4 credits. Prerequisite: permission of instructor. W. L. Feber.
Topic for fall 2001: Woodrow Wilson’s impact on U.S. foreign relations, 1912 to the present.

[HIST 418] Undergraduate Seminar in the History of the American South (III)
J. Silbey.

[HIST 419] Seminar in American Social History (also AM ST 419) (III)
Spring. 4 credits. S. Blumin.

[HIST 421] Undergraduate Seminar in Cultural History (also AM ST 421) (III)
M. Kammen.

[HIST 426] Undergraduate Seminar in Early American History (III)
M. B. Norton.

[HIST 428] Comparative History of Colonial North America (III)
D. Usner.
A seminar examining the history of Native Americans in the eastern woodlands from colonial times to the present. The cultural and economic participation of Indians in the evolution of frontier societies is examined. Major topics include fur-trade networks, political relations, removal, and the persistence of Indian communities in eastern states.

[HIST 430] America in the Camera’s Eye (III or IV)
R. L. Moore.
Photographs and films have become archives for historical research. From the era of Matthew Brady’s Civil War images, the United States has been recorded by documentary photographers who have called attention to the country’s progress and its poverty. Hollywood filmmakers have also recorded endless images of the American landscape and placed against that landscape fictionalized accounts of the country’s history and its social problems. What can we learn from these images? What is their relation to written texts and to other documents that tell us about the past? How truthful is documentary? How misleading is Hollywood? One key text is James Agee’s and Walker Evans’ Let Us Now Praise Famous Men. The seminar meets once each week for discussion and periodically during the semester to view films.

[HIST 432] The City in History: Europe and America (III)
Spring. 4 credits. S. Blumin.
Reading and discussion of significant interpretations of the rise, role, and character
of cities in medieval and early modern Europe, and in modern Europe and America. Individual research projects.]

[HIST 439 Reenactment and the New South (also AM ST 439) # (III)
Fall. 4 credits. Limited to 15 students.
M. Washington.
This course focuses on the American South in the nineteenth century as it made the transition from Reconstruction to new forms of social organization and patterns of race relations. Reconstruction is considered from a sociopolitical perspective, concentrating on the experiences of the freed-people. The New South emphasis includes topics on labor relations, economic and political changes, new cultural alliances, the rise of agrarianism, and legalization of Jim Crow.

[HIST 440 Undergraduate Seminar in Recent American History (also AM ST 440) # (III)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
R. Polenberg.
Topic: freedom of speech, censorship, and the Supreme Court.]

[HIST 442 Religion and Politics in American History: From J. Winthrop to R. Nixon (also AM ST 442 and RELST 442) # (III)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
R. L. Moore.
A reading and research seminar concerned with popular culture in nineteenth-century America (publications, performances, and audiences.)

[HIST 455 The Four Seasons Motif in American Culture (also SOC HUM 405 and AM ST 430.2) # (III)
Fall. 4 credits. Limited to 15 students. Permission of instructor required.
M. Kammen.
The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the northern hemisphere, both West and East.
The Four Seasons. We view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attention to the Old World origins, dispersion, and local permutations of this motif, more than half of the seminar given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations.

[HIST 458 Female Adolescence in Historical Perspective (also WOMNS 438 and HD 417) # (III)
Spring. 3 credits. Limited to juniors and seniors. Prerequisite: permission of instructor. Not offered 2001–2002.
J. Brumberg.
For description, see HD 417.]

[HIST 484 Seminar in the History of American Labor, Race, Work, and the City (also ILR 304) # (III)
Fall. 4 credits. Open to juniors and seniors only with the permission of the instructor.
For description, see ILRCB 304.]

[HIST 486 Seminar on the 1960s (also AM ST 486) # (III)
Fall. 4 credits. T. Borstelmann.
This course explores the issues and developments of the most turbulent and significant decade in recent U.S. history. Major topics include the civil rights movement, the Kennedy and Johnson administrations, the Vietnam War, the anti-war movement, the counterculture, the women's liberation movement, and the Nixon administration. A substantial research paper is required.

[HIST 494 Cross-Culturality in the Caribbean (also S HUM 420) # (III)
Spring. 4 credits. Limited to 15 students.
S. Shukla.
For description, see S HUM 420.

[HIST 500 Undergraduate Research Seminar (also AM ST 500)
Fall and spring. 8 credits each term.
S. Blumkin and others.
Offered in Cornell-in-Washington Program. An intensive research and writing experience utilizing the extensive resources of Washington, D.C.

[HIST 521 Seminar in American Cultural Studies (also AM ST 521)
M. Kammen.
The focus is the relationship between government and culture in historical perspective. After three contextual sessions devoted to nineteenth-century background, we are mainly concerned with topics from the 1930s to the present. Several comparative sessions are devoted to government as a patron of culture in other societies. A research paper is required.]

[HIST 607 Writing Seminar on African-American Women
M. Washington.
This course is designed for students actively engaged in a writing project on African-American women's history. Students must have already done the research and most of the writing for their papers prior to enrollment. Reading and class discussion focus on style, methodology, and theory. An extensive research paper is due at the end of the semester.

[HIST 608 African-American Women
M. Washington.
A reading and discussion topics seminar focusing on the experiences of African-American women in nineteenth- and twentieth-century America, including the Caribbean.

[HIST 610 Afro-American Historiography
M. Washington.
A reading and discussion topics focusing on the way historians write and interpret the Black experience in America. Students will be concerned with individual historians, various schools of thought, and historical approaches.

[HIST 613 Seminar on American Diplomatic History
T. Borstelmann.
A reading and research seminar in twentieth-century American diplomatic history, emphasizing the Cold War period and interpretative approaches to U.S. foreign policy. A research paper is required.]

[HIST 617 Seminar in American Cultural History
R. L. Moore.

[HIST 618 Seminar in American Cultural History
R. L. Moore.
A reading and research seminar concerning selected topics in nineteenth-century America.

[HIST 621 Graduate Seminar in American Cultural History
M. Kammen.]

[HIST 624 Graduate Seminar in American Indian History (also AIS 624)
M. B. Norton.
A reading and research seminar intended primarily for graduate students. Major works in American women's history and carefully scrutinized, and each student prepares a lengthy research paper.]

[HIST 627 Graduate Seminar in Early American History
M. B. Norton.]

[HIST 633 Seminar in Nineteenth-Century American History
J. Silbey.]

[HIST 634 Seminar in Nineteenth-Century American History
J. Silbey.
A research seminar intended primarily for graduate students exploring society, culture, and politics of the United States between 1815 and 1896.

[HIST 640 Graduate Seminar in Recent American History
Fall. 4 credits. Prerequisite: permission of instructor. T. Borstelmann.
A graduate research seminar that will examine American political and social history since 1945.

[HIST 663 Seminar in American Labor History (also ILRB 783)
Fall. 3 credits. Prerequisites: graduate students only. N. Salvatore.
For description, see ILRCH 783.]

[HIST 710 Colloquium in American History
M. Kammen.
Examination of major approaches, periods, issues, and modes of interpreting American history. Readings include recent "classics" of
A comparative, interdisciplinary examination of United States-Latin American relations, including ethnic, gender, and class relations; and the Prominent themes include neocolonialism; processes of nation-state formation and the present with particular emphasis on history from the early nineteenth century to achievement of political independence. Development of colonial societies, imperial European conquest, the establishment and appropriation of public spaces as artistic muralism and the Mexican Revolution; the construction of the Zapatistas. This seminar examines how the intersection of various ethnicities and classes between the 15th and 19th centuries, as well as the experiences of women and men of various ethnicities and classes between the 15th and 19th centuries.

HIST 219 Mexican Immigration to the United States (also LSP 219, AM ST 219) @ (III)
Fall. 4 credits. K. Graubart.
This seminar addresses questions of gender (and sometimes sexuality) in the conquest and colonization of Latin America. We look at the gendered aspects of colonization itself, as well as the experiences of women and men of various ethnicities and classes between the 15th and 19th centuries.

HIST 224 Art and Politics in Twentieth-Century Latin America @ (III)
Fall. 4 credits. J. Cárdenas. For description, see LSP 219.

HIST 295 Colonial Latin America @ (III)
Fall. 4 credits. K. Graubart. Survey of Spanish America from the rise of pre-Columbian civilizations through the European conquest, the establishment and development of colonial societies, imperial rivalries in the New World, the background of the independence movements, and the achievement of political independence.

HIST 296 Modern Latin America @ (III)
Spring. 4 credits. R. Craib. An introductory survey of Latin American history from the early nineteenth century to the present with particular emphasis on processes of nation-state formation and the development of capitalist economies. Prominent themes include neocolonialism, revolutionary movements and radicalism, ethnic, gender, and class relations; and the United States-Latin American relations.

HIST 418 Agrarian History (III)
Fall. 4 credits. R. Craib. A comparative, interdisciplinary examination of agrarian life from a broad temporal and geographical perspective. Strong emphasis on recent historiography, methodology and theory. Major themes include rural rebellion, resistance, and crime; capitalist transformation of the countryside; agrarian custom and practice; and the way in which rural life has been romanticized, denigrated, and essentialized. Readings include works of history, fiction, literary theory, anthropology, and geography.

HIST 423 Chronicles of the Conquest of Latin America @ (III)
Spring. 4 credits. K. Graubart. In this seminar we examine the writings of participants in the conquest and colonization of Latin America. Readings include writings by European conquistadors, Amerindian elites, and non-alphabetic materials from the early colonial period. In particular we investigate how the history of the conquest itself and of the societies that were produced by its participants, with special attention to questions of ethnicity, gender, and class.

HIST 438 History's Margins: Frontiers and Borders in Comparative Perspective (III)
Spring. 4 credits. R. Craib. A comparative seminar on borders and frontiers. Primary emphasis is on the Mexican-U.S. border. Central themes include the historical transformation of frontiers into borders, colonialism and imperialism; and immigration and nativization, among others. Attention is also given to situating the revived interest in borders in relationship to contemporary economic, political, and social changes. Readings include works of fiction, literary theory, history, science studies, and postcolonial criticism.

HIST 445 Prostitutes and Patriots: Urban Culture and the Construction of Citizenship in Latin America, 1880-1950 (also HIST 645) @ (III)
Fall. 4 credits. Prerequisites: HIST 295 and/or 296 suggested. Permission of instructor required. Enrollment limited to 15. Not offered 2001-2002. M. Roldan.
Unprecedented demographic and economic changes gave rise to debates by the late nineteenth century regarding the definition of citizenship and the limits of individual participation in Latin American societies. These debates centered on the city—the symbol of both "progress" and "disorder". Rising tensions were expressed through the trope of the "prostitute" (disease and loss of control), and the "patriot" (science, state, manliness, and order). The course examines the changing notions of the private/public; the regulation of sexuality and gender; popular mobilization; and the construction of the nation.

HIST 649 Seminar in Latin American History
Fall. 4 credits. M. Roldan. A graduate-level seminar focusing on changing topics in Latin American history (politics, labor, race/ethnicity, violence, social movements, agrarian society, etc.). In addition to weekly meetings, students are expected to conduct original research culminating in a final 25- to 30-page paper.

African History

HIST 255 Cultures and Controversies in Precolonial Africa @ (III)

This course examines the history of Africa, focusing on a selected set of political communities whose pre-colonial histories help us to understand controversies raging today. Who were the ancient Egyptians? What "race" were they and is this important anyway? If so, why? What role did women and men, slaves and free, kings and commoners play in ancient Mali, the Swahili city-states in Rwanda, and what can this information tell us about these societies today? What role did the slave trade play in influencing the current economic position of Africa and race relations in the U.S. today? We explore these and other questions.

HIST 256 Sophomore Seminar: Riot and Revolution in Nineteenth-Century Africa: The Birth of the Modern @ (III)
Spring. 4 credits. S. Greene.
The beginning of the nineteenth century witnessed the rapid and often times forceful expansion of Islam in West Africa, the transformation of the Zulu from a small, inconsequential people to the largest and most powerful ethnic group in South Africa, and a major riot by enslaved peoples in east Africa. This course explores these revolutionary changes and uprisings as Africa remake itself to face the modern era. Lectures, readings and discussions focus on the causes and consequences of these events and their significance for understanding contemporary Africa.

HIST 443 The European as Other @ (III)
Fall. 4 credits. Prerequisite: permission of instructor. Limit 15. Not offered 2001-2002. S. Greene.

HIST 604 The Colonial Encounter
Fall. 4 credits. Prerequisite: permission of instructor. S. Greene and T. Loos. The course examines the way colonizer and colonized influenced the culture, history, and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself. We consider both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, the Netherlands) with the states they colonized in Africa and Asia. This linkage challenged, at different times and in different places, pre-existing understandings of self, country, and culture, and notions about the other.

Asian History

HIST 190 Introduction to Asian Civilizations @ (III)
Spring. 4 credits. Not offered 2001-2002. J. Piggott and staff. An introduction to the distinctive cultures of China, India, Japan, and Southeast Asia that features an intensive examination of selected topics and periods of particular significance in the history of each.

HIST 191 Introduction to Modern Asian History (also ASIAN 191) @ (III)
Fall. 4 credits. S. Cochran and T. Loos. The history of Asia-Pacific from the nineteenth century to the present, focusing on relations of China, Japan, and Southeast Asia with each other and with the West.

HIST 203 War and Diplomacy in Korea @ (III)
Korea's challenging location between great powers, its long struggle between independence and outside control, and its tragic division, all make for a singular case study in the history of war and diplomacy. This course examines that history with particular focus on the Imjin War (1592-1598) and the Korean War (1950-1953). Topics include geopolitics, military tactics, and strategy on the Korean peninsula. Yi Sun-Shin as strategist and tactician; the effect of war on Korean society; and the pattern of Korean relations with China, Japan, Russia (and other northern Asian powers), and the United States.

[HIST 207 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also ASIAN 206 and HIST 507)] @ (III)

Students read travel literature about Southeast Asia in the nineteenth and early twentieth centuries and travel accounts written by Southeast Asians living abroad. The seminar emphasizes themes of race, orientalism, transculturation, and authenticity. We critically assess the transformative potential of the Internet on (virtual) tourism. Graduate students should enroll for HIST 507 and are expected to participate in the HIST 207 seminar. Preference is given to students with Internet experience.

[HIST 218 Introduction to Korea (also ASIAN 218)] @ (III)

Fall. 3 credits. Staff.

For description see ASIAN 218.

[HIST 230 Seminar in History and Memory: The Asia-Pacific War] @ (III)

This seminar examines what is at stake when the fighting between Japan and its former enemies in the Pacific during World War II is remembered, memorialized, and (re)constructed as historical narrative by Japanese, Americans, and others. By exploring the legacies of such events and processes as the Rape of Nanking, live testing of biological and chemical warfare agents, sexual slavery, and incendiary bombings of Hiroshima and Nagasaki, the seminar offers an opportunity to reflect in a more general way on the politics of historical representation and memory.

[HIST 243 Seminar: China and the West before Imperialism] @ (III)

Spring. 3 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: Permission of instructor. Not offered 2001–2002. C. Peterson.

What accounts for the first great passion for things Chinese in the West (from the sixteenth to the nineteenth centuries) followed by the hostility characteristic of imperialism? This seminar explores this question relying heavily on original sources to trace the China vogue in thought, literature, and art and comparing the Western image with the realities of China of that day.

[HIST 249 Peddlers, Pirates, and Prostitutes: Subaltern Histories of Southeast Asia, 1800-1900 (also HIST 648 and ASIAN 249/648)] @ (III)

Spring. 4 credits. E. Tagliacozzo.

This course examines Southeast Asian history “from below” -- in the life of a single century, 1800-1900. Laboring histories, the history of piracy and prostitution, and the pasts of people usually considered “marginal” to the state are all discussed. How do we look for clues to these peoples’ lives? Were there similarities in experience across disparate geographies? What did it mean to be an outlaw, “deviant,” or poor in colonial Southeast Asia? This course attempts to answer these questions.

[HIST 284 Southeast Asia in the World System: Capitalism and Incorporation, 1500-Present (also HIST 284/ASIAN 284/684)] @ (III)

Fall. 4 credits. Graduate students should enroll in HIST 684. E. Tagliacozzo.

This course examines the history of Southeast Asia in conjunction with what theorists have called the emerging “World System.” The expanding reach of capitalism is traced through the region’s Early Modern “Age of Commerce”; through the age of great European merchant companies; through the coercive capitalism of the imperial age; and into our own times. Throughout, attention is paid to similar (or dissimilar) trends in the rest of global history, spanning Europe, Africa, Middle East, and the Americas. Open to students with an interest in Southeast Asian history, as well as the shaping forces of capitalism on the modern world.

[HIST 289 The U.S.-Vietnam War (also ASIAN 289)] @ (III)

Fall. 3 credits. K. Taylor.

This is a survey of events in Vietnam, the U.S., and elsewhere related to U.S. intervention in Vietnam from the 1940s to 1975. Readings include historical narratives, memoirs, and literature. Alternative ways of understanding this war in context of Vietnamese and American history are explored.

[HIST 293 History of China up to Modern Times] @ (III)

A survey of the principal developments in the history of China from the earliest times to the eighteenth century that also undertakes a topical introduction to Chinese culture and civilization, in part by the use of visual materials.

[HIST 294 History of China in Modern Times (also ASIAN 294)] @ (III)

Spring. 4 credits. S. Cochran.

A survey that concentrates on the rise of the last imperial dynasty in the seventeenth and eighteenth centuries, the upheavals resulting from domestic rebellions and foreign imperialism in the nineteenth century, and the twentieth-century efforts to achieve social mobilization, political unity, and commercial expansion.

[HIST 297 Japan Before 1600 (also HIST 597 and ASIAN 297/597)] @ (III)

Fall. 4 credits. E. Tagliacozzo.

This course explores Japan before 1600 from a variety of perspectives. Analysis of primary sources, including literary and archaeological artifacts, is emphasized. HIST 297 is a good introduction to issues of presmodern historical study and to the study of East Asia. (Graduate students or more advanced undergraduates who would like to do a research project should register for HIST 597).

[HIST 322 History of the Samurai II] @ (III)

This course explores the role of the samurai at various epochal moments, and the effects samurai-centered governance has had on society and culture up to the early modern era. This is very much a hands-on course in which analysis and writing are emphasized. Recommended: HIST 297. Graduate students are welcome but they should register for HIST 522 after consultation with the instructor.

[HIST 326 History of the Samurai III] @ (III)

Fall. 4 credits. J. V. Koschmann.

A survey of Japan from early-nineteenth century to the present, which attempts to connect the political, socio-economic, and imaginative realms of modern Japanese life so as to achieve a complex view of modern Japanese society. Pays particular attention to the changing situation of women and women's movements, Japan's relations with Asia and the United States, and problems of historical representation and consciousness. Readings include Japanese works in translation as well as secondary sources.

[HIST 360 Early Warfare, East and West] @ (III)

Fall. 4 credits. C. A. Peterson.

For description see Comparative History.

[HIST 388 Vietnamese Histories (also HIST 688 and ASIAN 385/685)] @ (III)

Fall. 3 credits. K. Taylor.

For description see ASIAN 385.

[HIST 393 Images of Humanity in Medieval China (also ASIAN 393)] @ (III)

[HIST 395 Southeast Asia to the Eighteenth Century (also HIST 695)] @ (III)

Fall. 4 credits. D. Wyatt.

A survey of the earlier history of Southeast Asia, concentrating particularly on regional movements of economic, social, cultural, and political change and using, to the extent possible, readings in translated primary sources.

[HIST 396 Southeast Asian History from the Eighteenth Century (also HIST 696 and ASIAN 396/696)] @ (III)

Spring. 4 credits. B-U option. T. Loos and E. Tagliacozzo.

Surveys the modern history of Southeast Asia with special attention to colonialism, the Chinese diaspora, and socio-cultural institutions. Considers global transformations that
brought “the West” into people’s lives in Southeast Asia. Focuses on the development of the modern nation-state, but also questions the narrative by incorporating groups that are typically excluded. Assigns primary texts in translation.

HIST 416 Undergraduate Seminar on Gender and Sexuality in Southeast Asia (also ASIAN 416 and WOMNS 416) @ (III)
Spring. 4 credits. Letter grade only.
T. Loos
Students consider the relationships among colonialism and gender and sexual identity formation in Southeast Asia. Using material from a wide range of fields including anthropology and literature, the course complements a simplistic East/West and male/female binary.

[HIST 420 Japan in the Year 1000: The Tale of Genji in Historical Perspective @ # (III)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
J. Piggott
The Tale of Genji is a classic of premodern Japanese literature that provides readers a broad view into Japan’s courtly society at a time when many of the elements of Japan’s classical tradition were taking form. Those interested in premodern Japan, Comparative Literature, and courtly societies will find the seminar of great interest. Previous study of premodern Japan is advised.

[HIST 448 Family and Gender Relations in Premodern Japan # @ (III)
J. Piggott
An inquiry into and scrutiny of family and gender relations in the classical and medieval periods. Themes will include kinship and family organization, state formation, and gender construction. Those interested in comparative perspectives are encouraged to enroll. Breadth reading, primary source materials, and comparative reading placing Japan in an East Asian context are emphasized. Previous study of premodern Japan and East Asia is recommended.

HIST 451 Crime and Diaspora in Southeast Asian History, 1750–1950 (also HIST 650 and ASIAN 450/651) @ # (III)
Fall. 4 credits. E. Tagliacozzo
During the last two centuries, the mass movement of people in Southeast Asia has increased to an unparalleled scale. This course examines the diasporas of various Asian peoples in this time frame, and asks how these movements have intersected with notions (and actions) of “criminality” in the region. Historical sources, period literature, and anthropological writings are used to analyze the growth of migration, smuggling syndicates, and “illicit” behavior in Southeast Asia. Open to students with an interest in Southeast Asian history and the region’s links to the wider Asian orbit.

[HIST 466 Kings and Shoguns: the Talebeiki Age @ # (III)
J. Piggott
The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-Rabbits relations, landholding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenny’s royal restoration. Core readings of the seminar include portions of the martial epic, the Talebeiki, and other materials from which insights into these transformations can be drawn. Previous study of Japanese history, especially HIST 322, is highly recommended.

[HIST 475 Senior Seminar: Comparative Colonial Law and Society (also ASIAN 476) @ III
Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2001–2002.
T. Loos
Students explore topics including: hybrid jurisprudence, notions of public and private, religious codes, family, and national identity that resulted from colonial policies. Most readings focus on law, society in colonial Southeast Asia. Readings may include theoretical material on law and society and historical material about jurisprudence in Europe that informed colonial categories of law in the colonies. Relevant comparative readings outside the scope of Southeast Asia are also included.

HIST 480 Senior Seminar: Gender Adjudication in the Modern Colonies (also ASIAN 480 and ASIAN 482) @ # III
Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2001–2002.
T. Loos
Students explore the intersections among jurisprudence, religious codes, gender, family, and national identity in Southeast Asia from the colonial period to the present.

[HIST 489 Seminar in Modern Japanese History @ III
Fall. 4 credits. Prerequisites: HIST 298 or equivalent knowledge of modern Japanese history. Not offered 2001–2002.
J. V. Koschnmann

HIST 490 Tales of the Heike (also ASIAN 490/690 and HIST 690) @ # III
Fall. 4 credits. Prerequisite: previous study of pre-1600 Japan or permission of instructor. Limited to 15 students.
J. Piggott
Medieval Japan was crisscrossed by a sort of minstrel monks who sang the heroic exploits of fighting men—samurai—in the late twelfth century. The resulting Tale of the Heike (Heike Monogatari) was later compiled in its current form by the master chanters Kakuichi during the 14th century. It has been called “Japan’s first national epic,” because listening to it, enjoying it, and identifying with it brought people of all strata and regions together as nothing had done before. In this seminar we will investigate the Tale of the Heike from various historical and literary perspectives.

HIST 492 Undergraduate Seminar in Medieval Chinese History @ # III
Fall. 4 credits. Prerequisite: HIST 190, 293, 360, or permission of instructor.
C. A. Peterson

HIST 493 Problems in Modern Chinese History (also HIST 693) @ III
Fall. 4 credits. Prerequisite: HIST 294 or permission of instructor. S. Cochran
Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

[HIST 495 Kings and States: Asian Models @ # III
Spring. 4 credits. Prerequisite: previous coursework in East Asian history and permission of instructor. Not offered 2001–2002.
J. Piggott
The seminar explores kingship and state formation in comparative perspective. In addition to participating in discussions focused on core readings, seminar members undertake research projects targeting a society of their choice. Students interested in the history of preindustrial societies, political and cultural anthropology, political science, and religion will find the seminar of interest.

HIST 496 The Colonial Encounter
Fall. 4 credits. S. Greene and T. Loos
This course examines the way colonizer and colonized influenced the culture, history, and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself. We consider both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, and the Netherlands) with the states they colonized in Africa and Asia. We discuss how this linkage challenged, at different times and in different places, pre-existing understandings of self, country, culture and notions about the other.
complete the readings for HIST 396, and they will separately as a group to further explore selected topics.

Near Eastern History

[HIST 253 Introduction to Islamic Civilization I (also NES 255, RELST 255) @ III] Spring. 3 credits. D. Powers. For description, see NES 255.

[HIST 254 Islamic History: 600–1250 (also NES 257 and RELST 257) @ III] Fall. 3 credits. Not offered 2001–2002. D. Powers. For description, see NES 257.

[HIST 288 Imagining the Modern Middle East (also NES 294, JBST 294, GOVT 358) @ III] Fall. 4 credits. S. Alatout. For description, see NES 294.

[HIST 299 Introduction to Christian Civilization (also NES 295, JBST 295, RELST 295) @ III or IV] Spring. 3 credits. K. Haines-Eitzen. This course offers an introduction to the history of Christianity from the apostle Paul through the seventeenth century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We explore the origins of Christianity in the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the various controversies that occupied the church throughout its history. This course draws upon primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

[HIST 317 Islamic History: The Age of Ibn Khaldun (also NES 356) @ III] Spring. 4 credits. Prerequisite: NES 257 or equivalent. Not offered 2001–2002. D. Powers. For description, see NES 356.

[HIST 372 Law, Society and Culture in the Middle East, 1200–1500 (also HIST 652, NES 351/651, RELST 350) @ III] Fall. 4 credits. Enrollment is limited to 25 students. Not offered 2001–2002. D. Powers. For description, see NES 351.

Ancient European History

[HIST 151 Introduction to Western Civilization # (III)] Summer and fall. 4 credits. R. Graubart. A survey of European history from Antiquity to the Renaissance and Reformation. Important themes include the influence of ancient culture on medieval society, the development of and conflict between secular and ecclesiastical governments, European encounters with the non-Europeans, the culture and role of minority groups within European society, and the roles of women.

[HIST 228 War and Peace in Greece and Rome # (III)] Fall. 4 credits. No prerequisites. Open to freshmen. Not offered 2001–2002. B. Strauss. In ancient Greece and Rome, government did little besides wage war and raise taxes; culture focused on war, warriors gloried in battle, and civilians tried to get out of the way. This course surveys the impact of war and the rarity of peace in the ancient world. Topics include: Why war?; the face of battle; leadership, strategy, operations, and tactics; women and war; intelligence and information gathering; diplomacy and peace-making; militarism, war and slavery; and the archaeology of warfare. Readings in translation include selections from Homer, Herodotus, Thucydides, Xenophon, Caesar, Livy, Tacitus, Josephus, and Ammianus Marcellinus.

[HIST 232 Sophomore Seminar: Eyewitness to War in the Ancient World (also CLASS 234) # (III)] Spring. 4 credits. B. Strauss. A study of ancient soldier-historians who participated in the campaigns about which they later wrote. Topics include historicity,
autobiography, propaganda, and prose style. Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus, Ammianus Marcellinus, as well as, for comparative purposes, modern soldier-historians.

HIST 265 Ancient Greece from Homer to Alexander the Great (also CLASS 265) # (III)
A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture.

HIST 268 A History of Rome from Republic to Principate (also CLASS 268) # (III)
A survey of Rome and its empire. This course explores the formation of Rome’s Mediterranean empire and its political, social, and economic consequences, the constitutional and social struggles of the late Republic; the transition from Republic to Principate; society and state under the Caesars; the nature and limits of governing a world empire; and the interaction of pagans, Christians, and Jews in the Roman world.

HIST 438 Modern Classics in the Historiography of Ancient Greece (also CLASS 435) # (III)
Fall. 4 credits. Prerequisite: an introductory course in ancient Greek history or civilization or permission of the instructor. B. Strauss.
This upper-level seminar is an introduction to some of the main themes, directions and controversies in modern research on ancient Greece. We read selections from the leading works of scholarship on ancient Greece from the nineteenth and twentieth century, including such authors as Grose, Burchhardt, Comford, Glotz, Momigliano, M. I. Finley, Ste. Croix, Vernant, Vidal-Naquet, and the current crop of scholars.

HIST 450 The Peloponnesian War (also HIST 630 and CLASS 450/632) # (III)
Fall. 4 credits. Prerequisites: HIST 265, CLASS 211 or 217, or permission of instructor. Not offered 2001–2002. B. Strauss.
Famous as the subject matter of one of the most important books ever written about war—Thucydides’ History—the Peloponnesian War (431–404 B.C.) remains today the focus of study by historians, classicists, and political scientists. This course looks at the results of intensive and ongoing study by ancient historians and considers areas of future research. Topics include strategy, operations, and tactics; battle on land and sea; alliance politics; war and psychology; if the Peloponnesian War was really a historic turning point; war and ethics; Thucydides as a historian; and sources other than Thucydides. Graduate students should enroll in HIST 630.1

[HIST 452 The Tragedy of Classical Athens, 462–404 B.C. # (III)]
Course covers the nature of Athenian democracy, society, and culture in the “golden age” of Athens. The course examines the influence of Athenian political life on the great tragedians of the age and the influence of tragedy on the Athenians’ conception of their character and history. Readings are from Herodotus, Thucydides, Aeschylus, Sophocles, Euripides, Aristophanes, Plato, Aristotle, and Plutarch.

[HIST 453 Crisis of the Greek City-State, 415–336 B.C. # (III)]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. B. Strauss.
Course covers the fortunes of the city-state and citizen in an age of uncertainty. The focus is on Athens with some attention paid to the wider Greek world. Topics include the nature of Athenian political society, causes of change and war between the city-states, crisis as a historical concept, and anthropology and ancient Greece. Readings in translation include Thucydides, Sophocles, Euripides, Aristophanes, Plato, Aristotle, Demostenes, and Xenophon.

[HIST 463 Gender and Politics in the Roman World (also CLASS 463 and WOMNS 464) # (III or IV)]
Spring. 4 credits. Prerequisite: HIST 268, CLASS 212, or permission of the instructor. Not offered 2001–2002. J. Ginsburg.
This course examines the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions we address are: Was politics the exclusive domain of men in Roman society (as is generally assumed)? Does a broader definition of politics, and an understanding of the various forms political activity in ancient Rome might take, allow a place for women in Roman political life? What role does gender have in Roman political discourse and ideology? Why do issues such as family, marriage, and sexuality become subjects of political debate and legislation?

[HIST 469 Equality and Inequality in Ancient Greece (also CLASS 469) # (III or IV)]
We examine equality and inequality in Archaic and Classical Greek city-states ca. 650-400 B.C., with an eye toward politics, society and economics, culture, and gender relations. The course focuses on concepts and institutions such as ancient democracy, tyranny, oligarchy, “middling” ideology, and slavery, as well as theories of equality. All readings in English.

HIST 473 Roman Society and Politics under the Julio-Claudians (also CLASS 473) # (III or IV)
Spring. 4 credits. Prerequisite: CLASS 212, HIST 268, or permission of instructor. J. Ginsburg.
For description, see CLASS 480.

[HIST 630 Topics in Ancient History (also CLASS 632)]

Medieval, Renaissance, and Early Modern European History

HIST 151 Introduction to Western Civilization # (III)
Fall and summer. 4 credits. K. Graubard.
For description, see Ancient European History.

HIST 152 Introduction to Western Civilization # (III)
Summer and spring. 4 credits. R. Weil and P. Holquist.
For description, see Modern European History.

[HIST 204 Seminar: Age of Atlantic Revolution # (III)]
Fall. 4 credits. Seminar designed for undergraduates but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002. R. Weil.
"All the Atlantic Mountains shook," wrote the poet William Blake of the revolutions which toppled regimes across the Americas at the end of the eighteenth century. This course explores the ideas, outcomes, and connections among events in America, France, Haiti, and Britain, through literary and philosophical texts: Wordsworth, Rousseau, Jefferson, Paine, Burke, Godwin, Toqueville, and even Jane Austen.

HIST 211 Specters, Demons, and the Dead in European Society, 1200–1800 # (III)
Premodern Europeans believed that they could interact with supernatural apparitions in a variety of ways. The dead could return to admonish the living, demons might possess men and women, houses could be haunted by specters and poltergeists. What can we learn from a study of these beliefs about the ways in which Europeans regarded sin, punishment, the afterlife, and the role of the devil in their lives? What was the impact of the Reformation or the scientific revolution on these beliefs?

HIST 234 Seminar: Gender in Early Modern Europe (also WOMNS 234) # (III)
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002; next offered 2002–2003. R. Weil.
Course serves as an inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?

HIST 257 English History from Anglo-Saxon Times to 1461 # (III)
A survey of the government, social organization, and cultural and religious experience of the English people. Particular stress is laid on land settlement, the unification of the realm, the emergence of state institutions such as Parliament, and changes in economic organization (manors, towns, and commerce). The approach is comparative within a context
of contemporary European developments. The course offers students who wish to work on their writing skills an opportunity to do so, especially in the second paper.]

[HIST 259 The Crusades # (III)]

P. Hyams.

A lecture course examining the Crusading Movement and the States it produced from the eleventh century to the fall of the mainland Kingdom of Jerusalem in 1292. The historical themes this generates are almost limitless. The course treats the Christianity and Chivalry of the Medieval West, the confrontation of this culture with those of the Mediterranean and Islam, and what is perhaps the cradle of Western Colonialism. The very concept of “Crusade” itself is problematic today and will continue to cast its shadow on U.S. dealings with the Middle East. The readings allow students to choose from a very wide range of paper topics, and enjoy an excellent introduc-
tion to every aspect of the long-gone world of the Middle Ages.]

[HIST 262 The Middle Ages: Introduction and Sampler (also RELST 265) # (III)]
Spring. 4 credits. P. Hyams.

As a single-semester introduction to the period, this course aims to convey what was significant in that area of the “West” that was to become Europe, between the end of the Roman Empire in the West and the Renais-
sance, from 395 to 1400. It takes a critical look at a formative period of Western Civilization.
The course is organized into modules, the first of which surveys in five weeks the main
topic in medieval civilization from ca. 300 to ca. 1100 dealing with religious, intellectual, political, and economic developments in Western Europe.

[HIST 264 The High Middle Ages # (III)]

P. Hyams.

A survey of medieval civilization 1100–1400, dealing with political, economic, religious, and intellectual developments in Western Europe. Special attention is paid to the interaction of different kinds of history and to the historian’s understanding of literature and its use as a primary source. Lectures and class discussions.

[HIST 275 Authority and Resistance in Europe, 1400–1600 # (III)]

S. Pohl.

A lecture course examining the political, cultural, and social transformations during the Reformation era through an exploration of aspects of state formation and ecclesiastical order, social and religious protest, and defiant behavior. Specific topics covered include the Protestant Reformation and the emergence of confessional churches, law and crime, the peasant rebellions and the early modern witch hunts.

[HIST 305 Britain, 1660–1815 # (III)]

R. Well.

Course covers the British Isles from the Restoration of Charles II through the Napoléonic wars. We consider the domestic effects of war and Empire, luxury, commerce, and the public sphere; continuing conflicts over religious toleration, popular politics, and the relation of England to Ireland and Scotland. Readings include works by John Locke, Jonathan Swift, Adam Smith, Thomas Paine, Edmund Burke, and Jane Austen.

[HIST 310 Life, Literature, and Power in Medieval England (also ENGL 314) # (III or IV)]
Fall. 4 credits. No prerequisites. P. Hyams and A. Galloway.

This course explores key issues and key texts from the English literature of the period 1100–1500. It aims to survey and introduce the Age of Middle English—its history, its language, and its literature—to majors in English and History and others who seek something more than a bare acquaintance with the best of medieval culture. Emphasis is on students finding their own ways to win credit.

[HIST 263 The Earlier Middle Ages (also RELST 263) # (III)]
Fall. 4 credits. J. J. John.

A survey of medieval civilization from ca. 300 to ca. 1100 dealing with religious, intellectual, political, and economic developments in Western Europe.

[HIST 349 Early Modern England # (III)]
Fall. 4 credits. R. Well.

This course explores the crises of political, religious, and epistemological authority that plagued England in the sixteenth and seventeenth centuries. We examine the political and cultural impact of the Protestant Reformation, the nature of Tudor despotism, and the invention of liberalism. Emphasis is on close reading of contemporary sources, from autobiography and drama to political theory.

[HIST 350 The Italian Renaissance (also ITALL 221) # (III or IV)]

J. Najemy.

An exploration of intellectual, cultural, religious, and political developments in Italy from the political thought of Dante and Marsilius in the age of the communes, through the celebrated Humanism of Petrarch, to Alberti to Pico, down to the crisis of Italian liberty in the generation of Machiavelli, Guicciardini, and Castiglione. The course seeks to problematize the notion of “Renaissance” in the period’s ambivalent attitudes toward history, politics, learning, culture, gender, language, and the role of intellectuals in politics and society. Emphasis is placed on the close reading of primary sources and on issues of interpretation.

[HIST 351 Machiavelli (also ITALL 351) # (III or IV)]
Fall. 4 credits. J. Najemy.

This course presents Machiavelli in a variety of historical and interpretive contexts: European and Italian politics in the early sixteenth century; the decline of the Florentine republic and the rise of the Medicean principe; Machiavelli’s own career in government and his, and the republic’s, crisis in 1512–13; the intellectual traditions of Renaissance humanism, political thought, and the revival of antiquity; vernacular literary currents and popular culture; and the political figures, writers, and theorists with whom Machiavelli associated and corresponded. Emphasis is placed on a close reading of the major works (including the letters, The Prince, The Discourses, Mandragola, and selections from The Art of War and the Florentine Histories, all in translation) and a critical examination, in the light of that reading, of some major modern interpretations of Machiavelli.

[HIST 364 The Culture of the Renaissance II (also COM L 362, ENGL 325, RELST 363, MUSIC 390) # (III or IV)]

J. Caskey and J. W. Kerber.

For description, see COM L 362.

[HIST 365 Medieval Culture, 400–1150 (also RELST 365) # (III)]
Fall. 4 credits. Prerequisite: HIST 263 or permission of instructor. Not offered 2001–

Intelectual and cultural developments in the age of monasticism, from St. Augustine and St. Benedict to St. Anselm and St. Bernard of Clairvaux.

[HIST 366 Medieval Culture, 1100–1300 (also RELST 366) # (III)]
Fall. 4 credits. Prerequisite: HIST 264 or permission of instructor. Not offered 2001–

The origin and development of the universities is studied as background for a considera-
tion of the scholastic mentality and its influence on the art, literature, philosophy, science, script, and theology of the period. Readings from Abelard, St. Victor, Bonaventure, Thomas Aquinas, Dante, and others.

[HIST 368 Marriage and Sexuality in Medieval Europe (also RELST 366, WOMNS 368) # (III)]

P. Hyams.

Few topics generate heat so readily as gender relations and sexuality. Behind the current controversies lie decisions made in the first Christian centuries, and simmered up in the course of the Middle Ages; these still affect all of us, believers and unbelievers alike. This course studies Western attempts to deal with the problem of sexuality up to about 1500. The class first clarifies the church’s normative rules of law and theology. Armed with this framework, we then turn to more specific topics, including homosexuality, prostitution, rape, abduction, and witchcraft in medieval literature. The goal is to be able to compare the ideal model with the reality, and thus to assess the product the medieval church passed on to Western culture and to our-selves.

[HIST 389 The History of Florence in the Time of the Republic, 1250–1530 (also ITALL 389) # (III or IV)]
Spring. 4 credits. J. Najemy.
Florentine politics and society from the communal period through the age of Dante, the rise and decline of the guild republic, the age of civic humanism, and the rise of the Medici, to the fall of the republic; in the time of Machiavelli. Social classes and conflicts, the elite families, economic structures, the working classes, guilds, family history, women, and political and historical ideas are considered in the context of the emergence and transformation of republican government.

HIST 404 The Soul in Medieval Culture (also S NUM 401) # (III)
Fall. 4 credits. R. Ziomkowski.
This course covers the medieval reception of mythological themes in Plato's philosophy, particularly the world-soul and the transmission of souls, as these appear in the Timaeus (the only dialogue of Plato known in the Latin West throughout the Middle Ages). In focusing on the nature of the soul, we study the tension between the theology and philosophy concerning a doctrine of central importance to medieval Christian thought, as well as one that the ancient world had developed to a high degree of sophistication. We look at texts written during the first thirteen centuries of the Christian era, with particular emphasis on the twelfth century (in most of Europe) as intellectual history, inasmuch as we study the reception of Plato's Timaeus across time and across a range of literary genres (dialogues, theological treatises, cosmological compendia, poetry), with particular attention to works of Menippean satire such as Boethius' Consolation of Philosophy, Bernardus Silvestris' Cosmographia, and Alan of Lille's Plaint of Nature. Theoretical perspectives are drawn from works of literary criticism, particularly from Mikhail Bakhtin's theories of Menippean satire. All texts are read in translation, although the ability to read Latin can broaden students' research options.

HIST 408 Feudalism and Chivalry: Secular Culture in Medieval France, 1000-1300 # (III)
Fall. 4 credits. S. Pohl.
An upper-level seminar on the main currents of noble lay culture in France, which led European fashions in love, warfare, entertainment, and enough growth of the period. There is heavy emphasis on contemporary sources (in English), including lively and complete readings from epic literature (The Song of Roland), lives, and chronicles.

HIST 409 Seminar on Work in Europe and America # (III)
For description, see Comparative History.

HIST 427 Power and Society in Early Medieval Europe and Japan # (III)
Spring. 4 credits. Prerequisite: a course in medieval European or Japanese historical studies, or permission of instructor. Not offered 2001–2002. P. Hyams and J. Piggott.
This seminar focuses on structures, processes, and practices of society in early medieval Europe and Japan. It provides a forum for discussion of the ways in which, in some very different societies, Europeans and Japanese handled power. We are also interested in comparing historiographical methodologies employed and issues considered by historians of these societies.

HIST 436 Conflict Resolution in Medieval Europe # (III)
This is a seminar course on the crusading movement (late ninth to thirteenth centuries) when much of Europe lacked formal systems of justice, and so handled questions of social control quite largely by extra-legal means. Its subject is in some sense political history upside-down: viewed by individuals rather than their rulers. We examine ways in which anthropologists and some recent approaches to law can: assist the readings are partly anthropologically translated medieval accounts of actual conflicts, with samples of recent interpretation. The topics covered should be of interest to law students and majors in anthropology and other modern social sciences.

HIST 444 Seminar: Witchcraft, Magic, and the Occult in Europe, 1400-1700 # (III)
Spring. 4 credits. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002. S. Pohl.
A study of attitudes toward magic, witchcraft, astrology, specters, and demons in late medieval and early modern Europe and what they reveal to us about religious beliefs, concepts of community, and gender relations. Special attention is given to the role the Christian Church claimed in defining the occult: which aspects it legitimated and which it condemned. Other topics include the influence of humanism, the Reformation, and the Scientific Revolution on attitudes toward the occult. We also undertake an analysis of the historiographical model which opposes "elite" to "popular" ideas. The course emphasizes close analyses of primary works, including literary and visual sources.

HIST 446 Law, Crime and Society in Europe, 1400-1700 # (III)
This course focuses on Germany, England, France, and Italy and concentrates mainly on the social and legal treatment of crimes of violence. Throughout the course, we consider the differences and similarities between English common law and continental legal systems with regard to the courts of justice, laws of evidence, and legal procedures and practices of evidence and punishment. The topics covered include the role of criminal justice, the fate of customary methods of conflict resolution in a time of increasing legal centralization, and the relationship between cultural and legal change. We approach these issues by examining, among other things, the development of criminal procedure, the role of lawyers, contested notions of criminal responsibility, and the self-presentation of defendants. The course concentrates close readings of primary works, including trial documents and literary sources.

HIST 447 Crusaders and Chroniclers # (III)
Fall. 4 credits. P. Hyams.
An intensive reading seminar offering a natural progression from HIST 259 The Crusades. It examines contemporary accounts of the crusading movement in English translation. The twin goals are to follow select themes of crusading history to a deeper level than is possible in HIST 259 and to study medieval historiographical approaches, whole chronicles and other primary sources.

HIST 464 Murder, Warfare, and the State: Violence in Europe, 1300–1800 # (III)
An inquiry into forms of and attitudes toward violence in late medieval and early modern Europe. Questions to be explored include: How violent was premodern Europe compared to modern Europe? How did the various cultural legitimations of violence change over time? We examine these questions by analyzing forms of interpersonal violence as well as violence orchestrated by the state, such as warfare and capital punishment.

HIST 468 Love and Sex in the Italian Renaissance (also ITALL 468) # (III or IV)
Spring. 4 credits. J. Najemy.
An exploration of the representation of love, sex, and eros in Italian Renaissance literature and the attempt by secular governments and the Church to manage, discipline, and punish sexual transgression. Primary texts include Boccaccio's Decameron, fifteenth-century novelle, plays by Machiavelli (Mandragina, Clizia), and Biondo's Saggi (Calendria), and Aretino's Dialogues. Secondary readings include studies of sexual crime, love across social boundaries, prostitution, homosexuality, and lesbianism.

HIST 471 Knowledge and Politics in Seventeenth-Century England (also S&TS 473) # (III)
Spring. 4 credits. Limited to 15 students. P. Dear and R. Weil.
England in the 17th century was a revolutionary ferment of political, religious, and philosophical conflict. This course examines the conflicts and arguments, and the means explored for their apparent resolution. These affected ideas of God and worship, the meanings of gender, conceptions of the natural world and its scientific appropriation, and the legitimacy and proper form of political power. The course focuses on the close study of primary source readings by many of the principal players in all these areas, including Francis Bacon, Thomas Hobbes, the Duchess of Newcastle, and John Locke.

HIST 472 Politics and Culture in Eighteenth-Century England # (III)
Between 1660 and 1800 England experienced imperial and economic expansion, the Enlightenment, and the threat of Revolution abroad and at home. How in this context did people interpret and imagine the nature of the social order, political authority, and the family? We consider the changing and fiercely contested notions of property, politeness, crime and punishment, sexuality, Empire, slavery, and the market.

HIST 479 Patronage and the Medici # (III)
Between the early fifteenth and sixteenth centuries, the Medici family of Florence rose from the ranks of the city's merchant bankers to become virtual rulers of the republic, cardinals, and popes in Rome, and eventually hereditary grand dukes of Tuscany. Much of the family's power and fame derived from two kinds of patronage: the social and political
patronage central to the fashioning of their ambitions. This seminar explores the connections between the two kinds of patronage with a focus on works of art and architecture and recent historical and art historical scholarship.

[HIST 481 The English Revolution # (III)]
R. Weil.
Between 1640 and 1660, England experienced two decades of civil war and revolution and embarked on a fascinating series of attempts to reorganize political and religious life. Women and the lower classes emerged as actors on the political stage; radical religious sects flourished, and the nature of authority was questioned in both the family and the state. This course explores the political, cultural, religious, and social dimensions of the English Revolution, using mostly primary sources.

[HIST 496 Theorizing the Public Sphere (also COM L 496 and GERST 496) (II)]
P. Hohenfeld.
For description, see GERST 496.

[HIST 651 Old English Literature in Its Historical Context (also ENGL 710)]
Spring. 4 credits. P. Hyams, T. D. Hill.
This graduate course, cross-listed with ENGL 710, might equally be known as "Anglo-Saxon England: History and Literary Context." It studies the written sources for major questions of Anglo-Saxon history in their literary and cultural context. It concentrates on important texts extant in both Latin and Old English. Comparison can illuminate the resources and intentions of writers, compilers, and copyists, the literary and linguistic culture of England, and the ways in which historians might most fruitfully study such texts. Bede's Ecclesiastical History and Battle of Maldon, Aelfric's Colloquies, selections from the Anglo-Saxon chronicle, Beowulf, laws, homilies, and wisdom literature are all likely to come under scrutiny. Or we may take Ericxton is to reclaim for European religious history a corpus of material that historians neglect because it is in Old English.

[HIST 653 England—Britain—Europe in the Middle Ages #]
P. Hyams.
This graduate seminar tentatively explores the coming move from the study of medieval English history to that of the British Isles and its inhabitants within the wider context of Europe and Western Christendom. Readings are mostly representative original sources. The precise texts and topics studied depend on the interests (and especially future teaching plans) of participants, but certainly allow for a critical examination of existing literature on the general and cultural history of England, Scotland, Ireland, and Wales.

[HIST 664 Seminar in Latin Paleography]
Fall, six; 665, spring. 4 credits each term. Hours TBA. Not offered 2001–2002.
J. J. John.

[HIST 666 Seminar in Medieval History]
J. J. John.

[HIST 669 Politics, Power, and Culture in Early Modern England]
R. Weil.
An inquiry into how the ruling class ruled, and what that meant to and for everyone else. Topics include: the invention of the "state", the relationship of central and local power; clientage and corruption; the construction of categories of "public" and "private"; representations of monarchy, hegemony, and resistance; court culture, and the social interpretations of the English Revolution and their critics. Focus is on historiography and methodology, with some engagement with primary sources.

Modern European History

[HIST 152 Introduction to Western Civilization (1600 to the End of World War II) #]
Spring. 4 credits. P. Holquist and R. Weil.
This course offers a comparative perspective on the development of modern states, societies, and cultures in Europe and North America. Topics include: religious and scientific revolutions in early modern Europe; European expansion and conquest; Enlightenment and revolution; liberalism, capitalism, and communism; the politics of race, slavery, and the new imperialism; the World Wars and the Holocaust; the Cold War, and the modern and the post-modern in European and American culture.

[HIST 215 Balkan Cultures and History # (III)]
Spring. 4 credits. J. Weiss and W. Browne.
Cultural and linguistic factors interacted with political events to form present-day Slovenia, Croatia, Bosnia-Herzegovina, Serbia, Montenegro, Romania, Bulgaria, Macedonia, Albania, and Greece. The course traces these relationships from the end of the medieval period to the present.

[HIST 220 The French Experience: An Introduction (also FRLIT 224) (III or IV)]
An examination of French society, culture, and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals, and cinemas? Looking attentively at texts, images, and contexts from selected moments in the seventeenth, eighteenth, nineteenth, and twentieth centuries, we attempt to unravel some of the defining enigmas of the French experience. Two lectures/week in English and one section (one section conducted in English, one in French). Readings available both in French and English translation.

[HIST 235 Antisemitism and Crisis Modernity (also JWST 254)] (III)
Spring. 4 credits. V. Caron.
This course examines the role of antisemitism in nineteenth and twentieth century European political, ideological, and socioeconomic developments. Attention is paid to the way in which antisemitism is connected to the "rise of the West," the "rise of modern Europe," and the new imperialism; the World Wars and communism; the politics of race, slavery, and the post-modern in European and Middle Eastern History. Topics include: the ideological foundations of Zionism: the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration; the development of the Yishuv; Zionism as a cultural identity for Diaspora Jewry; the British mandate; the Arab-Zionist encounter; Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.

[HIST 267 History of Zionism and the Birth of Israel (also JWST 290, NES 290) # (III)]
J. Weiss.
This course examines the history of Zionism as an ideology and political movement from its origins in the nineteenth century to the present. Attention is paid to situating Zionism within the context of modern Jewish history in Europe, and Middle Eastern History. Topics include: the ideological foundations of Zionism: the role of Theodor Herzl and the rise of political Zionism: the Balfour Declaration: the development of the Yishuv: Zionism as a cultural identity for Diaspora Jewry: the British mandate: the Arab-Zionist encounter: Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.

[HIST 283 Europe in the Technological Age (III)]
J. Weiss.
An introduction to politics, culture, and technology in contemporary Europe. In the sections on politics a survey of party systems and their interactions with social movements is followed by examinations of post-Communist constitution and politics, restructurings, the New Germany, and the European Union. The section on European culture pays special attention to the European press and electronic media as shapers and reflectors of cultural identity. A section on the struggle over the control of the past deals with tensions and conflicts in European national memories. In the section on Nationalism and ethnicity, political and cultural approaches are combined in consideration of the wars in former Yugoslavia as well as less violent conflicts between nationalists and members of ethnic minorities elsewhere in Europe. The section on technology deals with the design of products and processes as a cultural phenomenon, making cross-national comparisons of some of the social, cultural, and institutional influences on engineering performance.

[HIST 285 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492-1789 (also NES 245, JWST 253) # (III)]
V. Caron.
This course examines the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics include the impact of
the Spanish Expulsion of 1492, religious, intellectual, and socioeconomic dimensions of the Marrano dispersion, including Lurianic Kaballah and the messianic movement of Shabbetai Zevi, the establishment of Jewish communities in the West, the end of the "Golden Age" of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the seventeenth and eighteenth centuries, and the impact of the Enlightenment.

HIST 290 Twentieth-Century Russia and the Soviet Union (III)
Fall. 4 credits. P. Holquist
An introductory lecture course spanning the lifetime of the USSR (1917–1991), but covering the last years of the Russian Empire and the first years of the post-communist present as well. Geographically, it focuses on the Russian heartland and the non-Russian areas of the Soviet Union. The course explores the roots and consequences of the Russian Revolution; the nature of Leninism, Stalinism, and Soviet communism; the entrenchment of reform of the post-Stalinist system; and the legacy of communism for the region's new regimes. Students are introduced to a wide variety of historical materials, including documents, essays, memoirs, literature, and film.

HIST 291 Modern European Jewish History, 1789–1948 (also JWST 252) (III)
Fall. 4 credits. V. Caron
Jewish life in Europe experienced a profound transformation as a result of the political emancipation which began at the end of the eighteenth century. While emancipation offered Jews unprecedented social, economic, and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course examines the ways in which Jewish and non-Jewish society responded to these new developments from the eighteenth century Enlightenment to the post World War II era. Topics include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation; the development of modern antisemitism; the rise of Zionism and the creation of the Jewish state in Israel; the modernization of Eastern European Jewish; the impact of mass immigration; and the Nazi era.

HIST 355 The Old Regime: France in the Seventeenth and Eighteenth Centuries (III)
Fall. 4 credits. S. Kaplan
A systematic examination of the social structure, economic organization, and collective mentalities of an era that eclipsed all others in its time and then, brutally and irreversibly, began to age. France, in European perspective, from the wars of religion through the age of Voltaire.

HIST 356 The Era of the French Revolution and Napoleon (III)
A study of the failure of the traditional system, its dismantling and replacement in France, and the international consequences. Focus is on the meaning of the revolutionary experience, the tension between the desires to destroy and to create, and the implications of the Revolution for the modern world.

HIST 357 Survey of German History, 1648–1890 (III)
Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 2001–2002; next offered fall 2002. I. Hull An examination of the social, political, intellectual, and diplomatic history of the German states from the devastation of the Thirty Years War, through absolutism, the bourgeois revolutions of 1848, the struggle for unification, to the beginning of the modern industrial state.

HIST 358 Survey of German History, 1890 to the Present (III)
Spring. 4 credits. Open to freshmen with permission of instructor. Not offered 2001–2002; next offered spring 2003. I. Hull An examination of the political, cultural, economic, and other causes of modern Germany’s extreme violence and volatility from 1890 through 1945, and of the consequences thereof on the divided Germany of 1949 and on the new German state since 1989.

HIST 362 European Cultural History, 1750–1870 (also COM L 325) (III or IV)
Fall. 4 credits. Not offered 2001–2002. M. Steinberg
The course focuses on the making of middle-class culture, society, and imagination from the Enlightenment through the French Second Empire. There are three units with national and thematic foci: Germany in the period of Enlightenment, emancipation, and the burgeoning of national consciousness; questions of law, property, gender, and sexuality in early nineteenth-century England; modernism and urbanism in Second Empire France. Primary readings (including novels, paintings, and operas) are considered along with contemporary historical and theoretical readings.

HIST 363 European Cultural History, 1870–1945 (also COM L 353) (III or IV)
Spring. 4 credits. M. Steinberg
This course focuses on problems of modernity, identity, and comparative European contexts. We address the politics and culture of German nationalism, French urbanism and religious revival, the cultural origins of psychoanalysis, technological culture (including film), and the cultural origins and dynamics of fascism. As in 362, primary materials (including Wagner, Nietzsche, George Eliot, Freud, Benjamin, and Alfred Hitchcock) are considered along with recent theoretical work.

HIST 370 History of the Holocaust (also JWST 353) (III)
This course analyzes the meaning of the Holocaust from three vantage points. European history, Jewish history; and that of those states and religious institutions that shared responsibility by having stood by in silence. Topics include: the evolution of modern anti-Semitism; the role of anti-Semitism in the Nazi ideology and program; the bureaucratization of death; Jewish life in ghettos and concentration camps; the fate of Jews in occupied Europe and the question of collaboration; Jewish political behavior under duress; the responses of the Western allies and the Churches; and contemporary interpretations of the Holocaust and the meaning of evil.

HIST 371 World War II in Europe (III)
Fall. 4 credits. J. Weiss
The Second World War remains the single most important set of events shaping the contemporary world. The course deals with both the events of World War II as they shaped European and world history and the way those events were remembered and commemorated in postwar years. Lectures, screenings, and readings examine: the role of wartime political leaders and military commanders; the experience of war and occupation for soldiers and civilians, including Resistance movements and collaborators; Nazi genocide; intellectual and cultural changes during the war, including the impact on literature and philosophy; strategic questions about the origins and conduct of the war; the concluding phases involving the Nuremberg Trials, the Yalta and Potsdam conferences, and the launching of the Cold War; and the representation of the war in subsequent films, literature, and political culture.

HIST 379 The First World War: Causes, Conduct, Consequences (III)
Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 2001–2002. P. Holquist and I. Hull
This course examines the long-term and immediate political, social, and cultural causes of World War I, its catastrophic prosecution, and its revolutionary consequences. Recurring themes are: the building of nation-states, the diplomatic and military systems of the nineteenth and twentieth centuries, mass mobilization, the development of mass violence, and the emergence of millenarian visions of the future.

HIST 380 Social History of Western Technology (III)
For description, see History of Science.

HIST 383 Europe, 1900–1945 (III)
Spring. 4 credits. J. Weiss
An investigation of the roots and developments in European politics between 1900 and the end of the Second World War. Emphasis is on the rise and fall of democratic political systems and their alternatives. Topics include the reorientation of liberalism and socialism, the dynamics of fascism, the European response to the economic and ideological influence of America and the Soviet Union, the changes in Eastern Europe during the interwar years, and the interaction between politics and social structure.

HIST 384 Europe, 1945–1968 (III)
Fall. 4 credits. Not offered 2001–2002. J. Weiss
A political and social history of Europe between the fall of fascism and the political crises of 1968. Emphasis is on the comparative study of the elaboration of democratic institutions and ideologies. Topics include the causes of World War II in Western and Eastern Europe, Gaulicism and Christian Democracy, the emergence of welfare states, liberal-democratic and Communist culture, the end of colonial empires in the West, opposition movements in Eastern Europe, and the general upheaval of 1968.
[HIST 385 Europe in the Twentieth Century; 1968-1990 (III)
Spring. 4 credits. Not offered 2001-2002.]
J. Weiss.
The major political developments in Europe between the upheavals of 1968 and the collapse of Communist regimes. Topics include the effects of economic downturn in 1973-1974; the response to terrorism; regional minorities and ethnic groups; new ethnic minorities and their opponents; Socialist governments in southern Europe; the arrival of democracy in Spain, Portugal, and Greece; new dynamics in the European Community; the rise of Thatcherism; the war scare of the 1980s; and the European Community; the rise of southern Europe; the arrival of democracy in regionalist movements; new ethnic minorities 1973-1974; the response to terrorism; drawn also from England, France, and the

[HIST 405 Jewish Culture and Modernity (also SOC HUM 408, JWS 408, GERST 420) (III or IV)
Fall. 4 credits. Limited to 15 students. M. Steinberg.
With emphasis on Germany but with materials drawn from both History and Cultural Studies.

[HIST 406 The People in the French Revolution # (III)
The French Revolution was nothing if not a mass event. Mass action played a critical part in shaping its course. The "re-invention" of France affected the population down to each village and from the perceptions of virtually every adult. This course focuses on the people as actors: their collective memory, their ideologies, their repertoire of intervention, the formation of a popular political culture. It examines the encounters between the people (in their multiple incarnations) and the revolutionary elites who sought to articulate and appropriate the Revolution. A major theme is the tension between the ambitions to achieve liberty and equality.]

[HIST 409 Seminar on Work in Europe and America # (III)
For description, see Comparative History.]

[HIST 410 Russia in the Age of Revolution and Total War (III)
Spring. 4 credits. P. Holquist.
This seminar examines the years of 1905-1945, a period of unparalleled violence and transformation in Russian history, encompassing several revolutions, two world wars and one civil war. Out of Russia’s "second time of troubles" (1905-1921), a Soviet state emerged propagating an alternative model for politics and society, a model of society that would be explicitly challenged in the cataclysmic confrontation between the Soviet Union and Nazi Germany. This course examines the links between revolution, total war, and the emergence of the welfare state in Russia and

[HIST 413 Gender and the Law in German Culture (also GERST 416) (III or IV)
Spring. 4 credits. T. Matsyisk.
This course examines the cultural space of law in modern German history. It pays particular attention to law and legal reform in relation to gendered notions of citizenry, subjectivity, and sexuality. The course takes as its hypothesis the idea that the prevalence in modern German thought of the concern with the "law" as the moral regulation of normative behavior is closely connected to the transformation of actual laws and legal codes in German history. In order to assess the terrain between such actual laws and their cultural effects, we examine a combination of legal, social, theoretical, and historiographical readings that address the problem of law. In this way we acquire, first, a general overview of German legal history together with a language with which to speak about a variety of legal theoretical writings. We also explore perceptions of, responses to, and critiques of the historical role of law in German culture.

[HIST 417 History of Jews in Modern France (also JWS 446, FRLIT 413) (III or IV)
Fall. 4 credits. Prerequisite: permission of instructor. V. Caron.
This course explores the integration of Jews into French society from the French Revolution to the present. Topics include: the debate over Jewish emancipation during the Enlightenment, the French Revolution, and the Napoleonic era; the processes of religious and social assimilation; the rise of anti-Semitism and the Dreyfus Affair; Jewish responses to anti-Semitism; the immigrant challenge and refugee crisis of the 1930s; the Vichy era and Jewish resistance during World War II; and the reconstruction of the French Jewish community since 1945.

[HIST 418 Collective Action and Politics in Modern Europe (III)
Not offered 2001-2002. S. Kaplan, S. Tarrow. For description, see GOVT 455.]

[HIST 419 Seminar in the European Enlightenment # (III)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001-2002. Semester TBA. I. Hull.]

[HIST 420 Opera, History, Politics, Gender (also WOMNS 454, COM L 159, S. HUM 459, MUSIC 474) (III or IV)
The will to social order and the desire to transcend it: this basic conflict in modern culture was negotiated in many places, but nowhere more dramatically than in the world of opera. Body and mind, the visceral and the mannered; authority and subversion; these themes are integral to operatic works and culture. This seminar examines the works and contexts of Mozart, Beethoven, Wagner, Verdi, and Puccini alongside issues of German and Italian nationalbuilding, liberalism, the continuities of patriarchy, and patterns of cultural identity and cultural difference in modern Europe. We analyze opera videos in class, and if possible we arrange an excursion to the Metropolitan Opera in New York City. No technical competence is required, but the seminar should be most interesting to those seeking an upper-level course in cultural history and/or cultural studies.]
HIST 482 The Aesthetic and Cultural Theory of the Frankfurt School (also GERST 495) (III or IV)
P. Hohendahl.

HIST 488 Seminar in Late Nineteenth-Century European Imperialism (III)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
I. Hull.

This seminar examines the themes of the “second wave” of European imperialism, and then compares the imperial experiences of Great Britain, France, and Germany. It focuses on the imperialist powers, and on the often unintended consequences of their colonial involvement on them. Of special concern are the transformation of nationalism into imperialism, and the effects on the European powers themselves of their experiences of applied racism and the commission of mass violence in their colonies.

HIST 491 Context of Irish Diaspora (also S HUM 421) (III)
Spring. 4 credits. Limited to 15 students.
G. Peattling.
For description see S HUM 421.

HIST 605 Graduate Seminar in European Cultural and Intellectual History
M. Steinberg.
The topic is “Cultural History, Cultural Memory, Cultural Analysis.” We will focus on the epistemological claims and metaphors of cultural historical practice, in particular those of memory and cultural analysis. What are the stakes, advantages, and problems of identifying history with memory or cultural analysis? Readings include works of Freud, Warburg, Benjamin, Yenush, Gili, Mieke Bal, and other contemporary sources.

HIST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution (also GERST 635)
P. Hohendahl.
For description, see GERST 635.

HIST 661 Graduate Seminar in Twentieth-Century German History
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
Semester TBA. I. Hull.

HIST 672 Seminar in European Intellectual History
Fall. 4 credits. D. LaCapra.

HIST 673 Seminar in European Intellectual History
Spring. 4 credits. D. LaCapra.

HIST 674 Graduate Seminar in German History, 1770–1918
Semester TBA. I. Hull.

HIST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also COM L 675 and GERST 675)
P. Hohendahl.
For description, see GERST 675.

HIST 678 Seminar in Modern European Social History
J. Weiss.

HIST 750 European History Colloquium
Fall and spring. 4 credits, each term. Dear, Weil (fall); Steinberg, Caron (spring).
A research colloquium designed for European history graduate students. The colloquium offers a forum for students to present papers and to discuss the work of visiting scholars.

Honors and Research Courses
Note: HIST 301–302 are not regular courses for which students may sign up at will. They are personal arrangements between an instructor and a particular student. Students must first gain the consent of a particular instructor to work with them.

HIST 301 Supervised Reading
Fall or spring. 2 credits. Open only to juniors and seniors. Prerequisite: permission of instructor. Staff.

HIST 302 Supervised Research
Fall or spring. 3 or 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 400 Honors Prosseminar
Fall and spring. 4 credits. Limited to 15 students. For prospective honors candidates in history. Prerequisite: permission of a member of the Honors Committee is required to register. Well (fall); Norton (spring).
An exploration of major approaches to historical inquiry, analysis, and presentation. Ways of thinking about history along with research methods and organization of the results are considered by reading and discussing a variety of historical works. Substantive readings are drawn from several time periods and diverse geographical areas. There is one short paper during the semester, and a longer final paper which explores the work of a major historian or school of historical writing.

HIST 401 Honors Guidance
Fall or spring. 4 credits. Prerequisites: HIST 400 and permission of instructor. Staff.

HIST 402 Honors Research
Fall or spring. 4 credits. Prerequisites: HIST 400 and permission of instructor. Staff.

HIST 703–704 Supervised Reading
703, fall; 704, spring. 4 credits each term. Limited to graduate students. Prerequisite: permission of instructor. Staff.

HIST 709 Introduction to the Graduate Study of History
Fall. 4 credits. Required of all first-year graduate students. P. Holquist and D. Usner.
The course is designed to introduce entering graduate students to crucial issues and problems in historical methodology that cut across various areas of specialization.

HISTOR Y OF ART 499

HISTORY OF ART

The Department of the History of Art provides a broad range of introductory and advanced courses in Western art (European and North American) and non-Western art (East and Southeast Asian, African), from antiquity to the present.

The Major
Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, modern (Europe and North America), Southeast Asia, China, Japan, and Africa. Additionally, majors practice a range of art historical methods and interpretative strategies, including connoisseurship, dendrochronology, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is strongly encouraged.

Requirements for the Major
Prospective majors should consult the director of undergraduate studies. Students wishing to declare a major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. These courses should reflect the diversity of the departmental offerings. One must be at the 200 level, and one—but not both—must emphasize material either predominantly before 1800 or outside Europe/North America. These two courses are prerequisites for the major and a grade of C or above is required for admission; courses must be taken for a letter grade. These courses do count toward the total 44 credits. The major in the history of art requires 44 credits, 30 at the 300 level or above. The core requirements are: prosseminar, one 400-level area seminar, two courses in art outside Europe/North America; and three courses in art predating 1800 (ancient, medieval, or Renaissance [Baroque]). Majors must choose at least two courses from different categories. In addition to the 44 credits, majors are required to take two courses, approved by their advisers, in areas related to the history of art.

Honors
To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all arts and sciences courses. Application to write an honors thesis should be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student’s transcript. In the senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student’s project adviser.

Course Numbering System
100-level courses are freshman writing seminars.
200-level courses are introductions to the major subdivisions of Western art and art outside the West.
300-level courses are intermediary courses addressing more specialized topics or epochs.
ARTS AND SCIENCES - 2001-2002

400-level courses are seminars primarily for advanced undergraduates and graduate students.

500-level courses are seminars primarily for graduate students.

First-Year Writing Seminars

For First-Year Writing Seminar offerings in the History of Art, consult the John S. Knight Institute brochure for times, instructors, and descriptions. These courses may be used as freshman electives but not to satisfy the distribution requirement.

Courses

ART H 200 Art, Archaeology, and Analysis (also ARCH 285, M&E 285, ENGR 195, GEOL 200, PHYS 200) (I or IV)
Spring. 3 credits. Staff.
For description see GEOL 200.

ART H 202 Survey of European Art: Renaissance to Modern (also ART H 220) (IV)
Summer only. 3 credits. Staff.
The major traditions and movements in European art from the Renaissance to the modern period. Painting, sculpture, and architecture with an emphasis on painting.

ART H 220 Introduction to Art History: The Classical World (also CLASS 220) (IV)
Spring. 4 credits. Each student must enroll in a section. A. Ramage.
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.

ART H 221 Minoan-Mycenaean Art and Archaeology (also CLASS 221 and ARKEO 221) (IV)
For description, see CLASS 221.

ART H 224 Archaeology in Action I (also CLASS 232 and ARKEO 232) (IV)

ART H 225 Archaeology in Action II (also CLASS 233 and ARKEO 233) (IV)

ART H 230 Introduction to Art History: Monuments of Medieval Art (also RELST 230) (IV)
Spring. 4 credits. Each student must enroll in a section. R. G. Calkins.
An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 245 Introduction to Art History: Renaissance and Baroque Art (also CLASS 245 and ARKEO 245) (IV)
Fall. 4 credits. Each student must enroll in a section. C. Lazzaro.
A survey of major trends in European painting, sculpture, and architecture from 1400 to 1700. The focus is on preeminent artists, workshop methods, style, meaning, patronage, and the function of art in a range of social contexts. The course also covers the methods of art history currently practiced in Renaissance and Baroque studies. Weekly section meetings are required.

ART H 260 Introduction to Art History: The Modern Era (IV)
Fall. 4 credits. Not open to students who have taken ART H 261. Each student must enroll in a section. E. Bernstock.
A discussion of the most important developments in art from 1780 to the present in a socio-political, historical context. The emphasis is on such major movements and artists such as (Delaunay), Realism (Courbet), Impressionism (Monet), Post-Impressionism (Van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Picasso), Abstract Expressionism (Pollock), and Pop Art (Warhol). Different critical approaches are examined.

ART H 261 Introduction to Art History: Modern Art (IV)
An introduction to modern art as it developed between the French Revolution and World War I. Both European and American movements are examined, including Romanticism, Impressionism, and Cubism. The course starts with the architecture, painting, and sculpture of the Greek and Roman Republics but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.

ART H 262 Arts of the Roman Empire (also CLASS 262 and ARKEO 262) (IV)
An introduction to modern American art from colonial mercantilism through the Great Depression. The visual arts in the service of the first world state. The course starts with the architecture, painting, and sculpture of the Greek and Roman Republics but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.

ART H 263 Painting in the Greek and Roman World (also CLASS 263) (IV)

ART H 264 Greek Vase Painting (also CLASS 264) (IV)
A stylistic and iconographical approach to an art in which the Greeks excelled. The course is arranged chronologically from the early (eleventh century B.C.), anonymous beginnings to the "personal" hands of identifiable masters of the fifth and fourth centuries B.C. Styles of cities other than Athens are stressed.

ART H 265 Greek Cities and Towns (also CLASS 265) (IV)
Fall. 4 credits. Prerequisite: CLASS/ART H 220 or permission of instructor. Not offered 2001-2002. J. Coleman.

ART H 266 Greek and Roman Coins (also CLASS 266) (IV)
The varied issues of Greek cities and the Roman state are examined. Coins are considered as art objects as well as economic and historical documents. The changes in design, value, and metals from the origins of coinage to the late Roman period are studied. Lectures, student presentations, and work with the actual examples.

Participation in a research project of dating modern and ancient tree-ring samples from the Aegean and Mediterranean. Supervised reading and laboratory work. A possibility exists for summer fieldwork in the Aegean.

ART H 319 Art in the Daily Life of Greece and Rome (also CLASS 319) (IV)
Classical art is well reflected in the small items of daily life that are neglected frequently in the standard histories. This course looks at the making and decorating of household items in Greece and Rome in a variety of materials from clay to metal. The links between the commissions of the state and the tastes of the people are examined through their material culture.

ART H 320 The Archaeology of Classical Greece (also CLASS 320) (IV)

ART H 321 Mycenaean and Homer (also CLASS 321 and ARKEO 321) (IV)
For description, see CLASS 321.

ART H 322 The Archaeology of Classical Greece (also CLASS 322) (IV)

ART H 323 Greek Cities and Towns (also CLASS 323) (IV)

ART H 324 Greek and Roman Art (also CLASS 324) (IV)

ART H 325 Greek Vase Painting (also CLASS 325) (IV)
A stylistic and iconographical approach to an art in which the Greeks excelled. The course is arranged chronologically from the early (eleventh century B.C.), anonymous beginnings to the "personal" hands of identifiable masters of the fifth and fourth centuries B.C. Styles of cities other than Athens are stressed.

ART H 326 Greek Cities and Towns (also CLASS 326) (IV)

ART H 327 Greek and Roman Art (also CLASS 327) (IV)

ART H 328 Mycenaean and Homer (also CLASS 328) (IV)

ART H 329 Greek and Roman Coins (also CLASS 329) (IV)
ART H 328 Greeks and Barbarians (also CLASS 322) # (IV)
J. Coleman.
For description, see CLASS 322.

ART H 329 Greek Sculpture (also CLASS 329) # (IV)
J. Coleman.
For description, see CLASS 329.

ART H 332 Medieval Architecture (also ARCH 382, RELST 332) # (IV)
Fall. 4 credits. R. G. Calkins.
A survey of medieval architecture from the Early Christian period to the Late Gothic (A.D. 300–1500). Considerable emphasis is placed on the development of structural systems and on the form, function, and meaning of important medieval buildings.

ART H 333 Early Medieval Art and Architecture # (IV)
R. G. Calkins.
Sculpture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300–900). The evolution of the early Byzantine tradition is also considered.

ART H 335 Gothic Art and Architecture (also RELST 335) # (IV)
R. G. Calkins.
An examination of Italian art, beginning with twelfth-century Sicily, and with emphasis on thirteenth- and fourteenth-century sculpture, painting, and to a lesser extent, architecture, which includes the works of Duccio, Giotto, the Pisani, and Lorenzetti as the prelude to the Italian Renaissance.

ART H 337 The Medieval Illuminated Book (also RELST 337) # (IV)
Fall. 4 credits. R. G. Calkins.
A study of selected major examples of medieval illuminated manuscripts from between A.D. 300 and 1500. Facsimiles of major manuscripts such as the Lindisfarne Gospels, the Book of Kells, and the Hours of Mary of Burgundy are examined. Students write a research paper on a manuscript of their choice. Two lectures, plus a session each week in the Rare Book Room.

ART H 338 Modern Western Drama, Modern Western Theater: Theory and Practice (also COM L 335 and THEAT 335) (IV)
Fall. 4 credits. R. Schneider.
A study of drama and the culture contexts of its performances from the mid-nineteenth century to the mid-twentieth century in Europe and America. We move from symbolism and naturalism through to constructivism, expressionism, Dadaism, futurism, surrealism and on the Brecht, Artaud, and a few of their more contemporary descendants. Students engage in performance projects as well as text analysis.

ART H 341 Flemish Painting (also RELST 342) # (IV)
R. G. Calkins.
An examination of Flemish painting in the fifteenth century, with emphasis on the works of Robert Campin, Jan van Eyck, Roger van der Weyden, Hugo van der Goes, Hans Memling, and ending with Jerome Bosch. Issues of the social, economic, and devotional context are discussed as they pertain to the particular development of Northern Realism and Symbolism during this century.

ART H 343 Italian Renaissance of the Fifteenth Century # (IV)
C. Lazzaro.
This course examines the artistic production of the fifteenth century in its social and cultural context. The new style, which was developed in Florence in the early century and spread to other city-states in Italy, is examined in the context of the new educated class, the increased wealth of the mercantile, urban class, and the new role of family in society.

ART H 344 Italian Renaissance of the Sixteenth Century: Leonardo, Michelangelo, and Raphael # (IV)
Spring. 4 credits. C. Lazzaro.
This course focuses on the three great artists of the late fifteenth and sixteenth centuries, Leonardo, Michelangelo, and Raphael. It examines each as a thinker as well as an artist, through their own writings together with their works of painting, sculpture, and architecture. It also analyzes the contemporary constructions of the artist as genius and as courtier in the biographies and other writings about them.

ART H 345 Rome, Florence, and Venice in the Sixteenth Century # (IV)
C. Lazzaro.
This course examines the distinctive cultural identities of Rome, Florence, and Venice, and how art, architecture, and urban planning served to create the myths and self-images of these cities, their rulers, and society. Topics include the centers of power, relationship of church and state, and private patronage and collections.

ART H 348 Renaissance Art in Northern Europe: The Sixteenth Century # (IV)
W. J. Kennedy.
This course examines the painting, graphic arts, and sculpture of Northern Europe in the sixteenth century. Principal emphasis is on art produced in the Netherlands and Germany. Topics considered include patronage and audience in different regions of Northern Europe, the importance of fifteenth-century traditions, the impact of Italian art, and the development of specifically northern forms of artistic expression in religious and secular art, including landscape, portraiture, and genre painting. Among the themes we explore are the conventions of gender and representations of women in Northern Renaissance art, attitudes to peasants and the urban lower classes, the impact of the Protestant Reformation and iconoclasm, and the development of the art market in the North. Special topics include Bosch, Bruegel, Dürer, and Grüssewald.

ART H 351 The Culture of the Renaissance II (also COM L 362, HIST 364, MUSCI 390, RELST 362, ENGL 325) # (III or IV)
W. J. Kennedy, C. Kaske.
For description, see COM L 362.

ART H 360 Painting Nineteenth-Century America (also AM ST 360) # (IV)
Spring. 4 credits. L. L. Meixner.
This course is an interdisciplinary view of art and life in nineteenth-century America from the colonial period through the Gilded Age. We will consider definitions of democratic culture through topical units including the following: New England portraiture and commodity culture; the art museum in the new republic; genre painting in the Jacksonian era; Hudson River landscape and railroad expansion; photography and the rising middle class; images of African Americans and Reconstruction; images of Native Americans, Manifest Destiny; and the frontier myth; cosmopolitan taste and robber barons in the Gilded Age. Alongside key paintings, we look at print culture including daguerreotypes, postcards, political prints, photographs, and advertisements. Major artists include: John S. Copley, George Caleb Bingham, Winslow Homer, Thomas Eakins, Mary Cassatt, and John Singer Sargent. We address their relationship to major writers including Walt Whitman, Henry James, Stephen Crane, and Edith Wharton.

ART H 362 Impressionism in Society (also WOMNNS 361) # (IV)
Fall. 4 credits. L. L. Meixner.
This course discusses French Impressionist art as products of nineteenth-century public life. By relating Impressionism to state culture, including Universal Expositions, we trace subversive themes such as criminality, cafés and brothel societies, clandestine prostitution, and class-regulated leisure. We consider images of Parisian spectacle and commodity culture (Manet, Cassatt, Degas, Toulouse-Lautrec) as well as French landscapes (Monet, Van Gogh, Pissarro). Special topics include artists' relationships to novelists (Zola), poets, and the avant garde theatre as well as the construction of the artist and courtesan in Puccini's "La Bohème" and Verdi's "La Traviata." Images include postcards, playbills, medical photographs, and posters. Organizing our historical units is the theme of power and vision, with attention to the female gaze, voyeurism, surveillance, and scopophilia.

ART H 365 U.S. Art From FDR to Reagan (also AM ST 355) # (IV)
J. E. Bernard.
Course covers major artists and movements in the United States since 1940, beginning with Jackson Pollock and Abstract Expressionism, and continuing through recent developments in the art. Attention is devoted to the critical reception that artists have received and to artists' statements themselves.

ART H 370 Visual Culture and Social Theory (also GOVT 375 and COM L 368) (III or IV)
F. Buck-Morss.
For description, see GOVT 375.

ART H 371 Architectural History of Washington, D.C. (also AM ST 360) # (IV)
A historical and critical survey of the architecture of Washington. Attention is given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urbanscape of the nation's capital.
The vocabulary of architectural analysis and criticism is taught. Field trips required.

**ART H 377 African American Art (also AS&RC 304) (IV)**
Spring. 3 credits. S. Hassan.

For description, see AS&RC 304.

**ART H 378 Art in African Culture and Society (also AS&RC 310) @ (IV)**
Fall. 3 credits. S. Hassan.

For description, see AS&RC 310.

**ART H 380 Introduction to the Arts of China (also ARKEO 380 and ASIAN 384) @ (IV)**
Spring. 4 credits. A. Pan.

This course offers a survey of the art and culture of China, from the Neolithic period to the twentieth century. We begin with an inquiry into the meaning of national boundaries and the controversy of the Han Chinese people, which helps us identify the scope of Chinese culture. Pre-dynastic (or prehistoric) Chinese culture is presented through both legends about the origins of the Chinese, and scientifically extant. Art of the dynastic and modern periods is presented in light of contemporaneous social, political, geographical, philosophical and religious contexts. Students work directly with objects in the Herbert F. Johnson Museum of Art.

**ART H 384 Introduction to the Arts of Japan @ (IV)**

As an island nation east of the Asian continent, Japan developed a unique culture that reflects both continental and indigenous characteristics. This course examines pre- and post-contact with continental culture and the process of artistic acculturation and assimilation in successive periods of Japanese art history.

**ART H 385 Representation and Meaning in Chinese Painting (also ASIAN 384) @ # (IV)**

Using major monuments of art, this course introduces various genres of Chinese painting through socio-political and religious history. The focus is on understanding the aesthetic criteria, artistic movements, stylistic transformations, and the social contexts of different social classes. Weekly sections will meet at the Herbert F. Johnson Museum so that students can gain first-hand experience examining and handling Chinese paintings.

**ART H 395 The House and the World: Architecture of Asia (also ASIAN 394) @ (IV)**
Spring. 4 credits. K. McGowan.

In many Asian societies, houses are regarded as having a life force or a vitality of their own. This course examines the role of the house as a living organism in Asia, a symbol of the cosmos encapsulated. Houses also function in many societies as storehouses for material and immaterial wealth; artifacts such as textiles, jewelry, sculptures, and masks function within the house as ancestral heirlooms, conveying their own currents of life force, the power from which serving to blend with the vitality of the house. This accumulation of energy can be conferred on the inhabitants, or it may exist as a quiet reservoir of power, distinct from its occupants. The indigenous architectural traditions of India, Vietnam, Thailand, Indonesia, and the Philippines are examined. By studying the inhabited spaces of others, divining their technologies of construction and their applied symbologies, students are provided with powerful tools for examining the visual skills and sensibilities of other cultures. The House and the World serves as the metaphor for these discoveries.

**ART H 396 The Arts of Southeast Asia @ (IV)**

The arts of Southeast Asia are studied in their social context, since art plays a role in most of the salient occasions in life in traditional societies. Special emphasis is devoted to developments in Indochina, Thailand, and Cambodia. Among topics covered are the shadow puppet theater of Java, textiles, architecture, sculpture, and Bali's performance tradition.

**ART H 400 Seminar for Art History Majors: The History and Practice of Art History (IV)**
Fall. 4 credits. Prerequisite: History of Art majors only. Enrollment is limited. K. McGowan.

Works of art have always engendered political, social, and cultural meanings. This seminar presents an introduction to the methods which art historians have engaged in studying the objects and ideas which constitute the historiography of their discipline. Challenged and enlarged by cultural debates over issues of class, ethnicity, nationality, sexual orientation, and gender, the field of art history is expanding to incorporate problems of assessing authority of intention and reception along with authorship, of artistic production in place of artistic creation, and of Western-oriented attitudes to race in reference to orientalism and colonialism. Readings focus on historically situating methods which art historians have engaged in examining the objects and ideas which constitute the historiography of their discipline. Challenged and enlarged by cultural debates over issues of class, ethnicity, nationality, sexual orientation, and gender, the field of art history is expanding to incorporate problems of assessing authority of intention and reception along with authorship, of artistic production in place of artistic creation, and of Western-oriented attitudes to race in reference to orientalism and colonialism. Readings focus on historically situating methods and implications of their cross-cultural application.

**ART H 401 Independent Study**
Fall or spring. 2-4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member.

Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

**ART H 402 Independent Study**
Fall or spring. 2-4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member.

Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

**ART H 403 Ritual, Play, Spectacle, Act: Performing Culture (also THETR 403 and 603) (IV)**
Fall. 4 credits. Not offered 2001-2002. R. Schneider.

For description, see THETR 403.

**ART H 407 The Museum and the Object (IV)**
Fall. 4 credits. Prerequisite: permission of instructor. All classes meet in the Johnson Art Museum Study Gallery. L. L. Meixner.

This seminar gives advanced Art History majors the opportunity to work directly with original objects from collections in the Herbert F. Johnson Museum. The course focuses on art and connoisseurship by questioning the ways quality is determined in works of art. Topics include methods of attribution, fakes and forgeries, technique and media, restoration and conservation, art education and theories of perception. Session leaders include the curatorial staff of the art museum.

**ART H 423 Ceramics (also CLASS 423 and ARKEO 423) # (IV)**

Bronze Age, Greek, and Roman pottery specimens from Italian, Near-Eastern and Mediterranean sites are studied to provide direct experience of one of the basic prerequisites of archaeological excavation—the identification and dating of pottery types. Reports, delivered in class, concern ancient ceramic materials or particular types and periods of ceramics. Practical experience in making and decorating pottery is encouraged.

**ART H 424 Sardis and the Cities of Asia Minor (also ARKEO 432 and CLASS 432) # (IV)**

**ART H 425 Seminar on the Bronze Age Architecture of Asia Minor (also CLASS 430 and ARKEO 425) # (IV)**

The course covers major architectural building programs from Neolithic Catal Hüyük, Belyeçultan, to the final phases of Troy and Hittite Bogazköy. The art and archaeology of these civilizations is taken into account when relevant. Reading knowledge of German useful.
This seminar examines representations of the Madonna and Child from the fourteenth and fifteenth centuries, the narrative scenes painted on closestreligion and secular furniture, biblical and historical heroines such as Judith and Lucretia, portraits of patrician women and courtesans, and violence to women in a political context. It investigates the contemporary ideas about motherhood, beauty, sexuality, social presentation, and gender roles in society that inform these representations. We discuss the existing critical frameworks for interpreting them in feminin art history and theory (particularly in Renaissance studies). We are concerned especially with how visual images are encoded with meaning, what kind of relationship can be established with their historical context, and how they convey social constructs as ideology.

**ART H 451 Prints of the Fifteenth through the Seventeenth Century (IV)**

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.

C. Lazzaro.

This seminar has several aims: to introduce students to printmaking—techniques, styles, and issues of connoisseurship—and to the major printmakers of the period, including Marcantonio Raimondi, Dürer, and Rembrandt; to give students first-hand experience with works of art in the Herbert F. Johnson Museum; and to consider the social and cultural issues raised in the medium of prints and through their unique visual language. These issues include the social hierarchies of class and gender (including witches), moral concerns and religious devotion, the construction and transmission of notions of antiquity and classicism, and the representation of the urban and rural environment. Students give brief presentations on prints in the collection and longer ones of their own research projects on these and related topics.

**ART H 461 Art and Social Histories (also COM L 461) (IV)**

Spring. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted.

L. L. Meixner.

Topic for spring 2002: Landscape as Ideology. This seminar considers images of land as cosmos, empire, fantasy, memory, and marvel. We approach our focal issue—land and capital—via Old and New World encounters, the political picturesque, rural enclosure, the Grand Tour and the tourist sublime, colonial and post-colonial spaces, the "greening of capitalism," the feminization of nature, and the transparency of utopia. In addition to art historical texts, our readings include the diaries of artists and voyagers and conquest narratives, nature writing, and ecocriticism. Darwin, Thoreau, S. J. Gould, and Greenblatt number among our authors. Crossing boundaries, we discuss illuminated manuscripts, early modern pastoral poems (Europe and England), the symbolic frontier (U.S.A. and Russia), the topographic body and HGP, earthart, national parks, the Land of Oz and Eurodisney.

**ART H 462 Topics in Early Modernism (IV)**

Spring. 4 credits. Prerequisite: permission of instructor. Not open to freshmen or sophomores. Not offered 2001–2002.

L. L. Meixner.

Early Modernism in America. Using the Armory Show (1913) as its center, this interdisciplinary seminar examines the varied expressions of American modernism prior to World War II. Against the backdrop of post-world War I social politics and the Jazz Age, we examine: the machine aesthetic and kinetic poetry, icons such as the Brooklyn Bridge, O'Keeffe, Steiglitz, and the rise of photography at "291," American Dada, the Harlem Renaissance, and the introduction of homogeneous imagery. Aside from major artists, key figures include Gertrude Stein, Dos Passos, Hart Crane, and Ernest Hemingway. (Also ASIAN 479 and COM L 479) (III)

**ART H 463 Studies in Modern Art (IV)**

Spring. 4 credits. Prerequisite: ART H 365 and permission of instructor. Auditing is not permitted. Not offered 2001–2002.

J. E. Bernstok.

An Analysis of Abstract Art in Europe (1910–1920). Various reasons have been cited for the emergence of abstract art in Europe between 1910 and 1920. This seminar considers the historical context, the philosophical literature, and the developments in art criticism that had a bearing on the evolution of abstract art in the Netherlands, Germany, and Russia.

**ART H 464 Studies in Modern Art (IV)**

Spring. 4 credits. Prerequisite: ART H 365 and permission of instructor. Auditing is not permitted. Not offered 2001–2002.

J. E. Bernstok.

Subjectivism in Art of the 1980s. This seminar examines the tendency toward a subjective form of art in the United States and in Germany during the 1980s, and the reasons for its international impact. The political and economic circumstances in the two cultures as well as related art criticism are studied.

**ART H 466 Women Artists (also WOMNS 404) (IV)**

4 credits. Prerequisite: permission of instructor. J. E. Bernstok.

This seminar studies the work of women artists from antiquity to the present. We consider the works of the most prominent women artists from each period in relation to the changing roles of women in society. The artists covered include Jennifer Bartlett, Artemisia Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Kätte Kollwitz, Georgia O'Keeffe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger. Different critical approaches to feminin art are discussed.

**ART H 476 Seminar in American Art (IV)**

L. L. Meixner.

**ART H 478 African Cinema (also ASIAN 435) (IV)**

Fall. 4 credits. S. Hassan.

For description, see ASIAN 435.

**ART H 481 Art of the Tang Dynasty (618–907) (also ASIAN 479) (IV)**

Spring. 4 credits. Prerequisite: ART H 365 or a course in Chinese history or Chinese literature and permission of instructor required. Not offered 2001–2002. A. Pan.

This seminar explores art and culture of the Tang dynasty, China’s “golden age,” by focusing on new discoveries and museum objects representing court, secular, and Buddhist art. We examine how imperial taste, patronage, and aesthetics influenced painting, calligraphy, gold and silver wares, ceramics, and important architectural and cave-temple sites.

**ART H 482 Art of the Tang Dynasty (618–907) (also ASIAN 479) (IV)**

Spring. 4 credits. Prerequisite: ART H 365 or a course in Chinese history or Chinese literature and permission of instructor required. Not offered 2001–2002. A. Pan.

This seminar explores art and culture of the Tang dynasty, China’s “golden age,” by focusing on new discoveries and museum objects representing court, secular, and Buddhist art. We examine how imperial taste, patronage, and aesthetics influenced painting, calligraphy, gold and silver wares, ceramics, and important architectural and cave-temple sites.
This seminar surveys arts of the Song dynasty, to the Herbert F. Johnson Museum of Art, Japan, and Mainland and Island Southeast Asia (landscape, figure, horse, flower-and-bird, *). This course examines the social life of things, religious art (painting, sculpture, and temples), Song antiquarianism, imperial patronage, literati traditions, and theories), calligraphy, organizing metaphor for cross-cultural traffic of culture. There are dynamic convergences occurring in the East and West. India, Europe, China, America, Japan, and Mainland and Island Southeast Asia are examined at different points historically, and the emphasis in this course is on local ingenuity, how technologies of water use and control at ancient sites in Southeast Asia can be seen to shape vivid visual symbologies, past and present.

ART H 520 Seminar in Classical Archaeology (also CLASS 630 and ARKEO 520)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.

J. Coleman.
For description, see CLASS 630.

ART H 531 Problems in Medieval Art and Architecture (also RELST 531)
Spring. 4 credits. Prerequisite: permission of instructor. R. G. Calkins.

Topic for spring 2002: “Water: Art and Politics in Southeast Asia.” This seminar focuses on the significance of water—economic, religious, political, social—and its role in the art and architecture of Mainland and Island Southeast Asia. While India and China can be seen to provide aquatic themes and patterns for transformation, the emphasis in this course is on local ingenuity, how technologies of water use and control at ancient sites in Southeast Asia can be seen to shape vivid visual symbologies, past and present.

ART H 591-592 Supervised Reading
Fall; 591, spring. 4 credits. May be repeated for credit. Limited to graduate students.

ART H 599 Problems in Interpretation in Italian Renaissance Art
4 credits. Prerequisite: permission of instructor. C. Lazzaro.

This seminar examines assumptions about meaning and how meaning is produced in Renaissance art. Various interpretative strategies are examined, among them iconographic, semiotic, feminist, and psychoanalytic, within a specifically Renaissance literary, intellectual, and social context. Texts by Panofsky and critical discussions of them. Baxandall, Bryson, and others are read and discussed with reference to particular works of art. The seminar is intended primarily for graduate students in all areas of the history of art and those in other disciplines with an interest in the Italian Renaissance. Senior History of Art majors with background in the Italian Renaissance are also welcome.

ART H 571 African Aesthetics (also AS&RC 503)
Spring. 4 credits. S. Hassan.
For description, see AS&RC 503.

ART H 580 Problems in Asian Art (also ASIAN 602 and RELST 580)
Spring. 4 credits. Prerequisite: permission of instructor. K. McGowan.

Topic for 2002: “Water: Art and Politics in Southeast Asia.” This seminar focuses on the significance of water—economic, religious, political, social—and its role in the art and architecture of Mainland and Island Southeast Asia. While India and China can be seen to provide aquatic themes and patterns for transformation, the emphasis in this course is on local ingenuity, how technologies of water use and control at ancient sites in Southeast Asia can be seen to shape vivid visual symbologies, past and present.

ART H 591-592 Supervised Reading
591, fall; 592, spring. 4 credits. May be repeated for credit. Limited to graduate students.

ART H 560 Honors Work
Fall or spring. 8 credits. Intended for senior art history majors who have been admitted to the honors program. Basic methods of art historical research are discussed and individual readings assigned, leading to the selection of an appropriate thesis topic.

ART H 601 Honors Work
Fall or spring. 8 credits. Prerequisite: ART H 560.
The student under faculty direction prepares a senior thesis.

LINGUISTICS
A. Cohn, chair (203D Morrill Hall); D. Zec, director of graduate studies (219 Morrill Hall); W. Harbert, director of undergraduate studies (210 Morrill Hall); D. Abus, J. Bowes, W. Browne, C. Collins, M. Diesing, S. Hertz, S. McConnell-Ginet, A. Miller-Ockhuizen, A. Nussbaum, M. Ross, C. Rosen, M. Suner, M. Weiss, J. Whitman, J. Wolff.

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and linguistic colleagues in other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; and sociolinguistics, the study of language's role in social and cultural interactions.

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless,
knowing particular languages (e.g., Spanish or Japanese) in some degree can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study. Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take Linguistics 101, a general overview, which is a prerequisite for most other courses in the field, or one of the first-year writing seminars offered in linguistics (on topics such as metaphor and the science of language). Linguistics 101 and other introductory courses fulfill the social science distribution requirement. Most 100- and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., LING 170, Introduction to Cognitive Science; LING 285, Linguistic Theory and Poetic Structure) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., LING 217, History of the English Language; LING 239, The Celtic Languages). Some of these courses also fulfill the breadth requirements.

Talks and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Linguistics Colloquium (sponsored by the department and the Cornell Linguistic Circle). These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

The Major

For questions regarding the linguistics major, contact Professor Wayne Harbert (210 Morrill Hall, 255-8841, webh@cornell.edu).

The prerequisite for a major in linguistics is the completion of LING 101 and either LING 201 or 203. The major has its own language requirement, which should be completed as early as possible: qualification in two languages other than English, one of which must be either non-European or non-Indo-European. With approval of the department's director of undergraduate studies, this requirement may be waived (i.e., reduced to the normal arts college language requirement) for students taking the cognitive studies concentration or a double major.

The other standard requirements for the linguistics major are as follows:

1) LING 201 (Introduction to Phonetics and Phonology) or LING 203 (Introduction to Syntax and Semantics), whichever one was not taken as a prerequisite to the major

2) LING 314 (Historical)

3) Three of the following five courses, one of which must be either Phonology I or Syntax I:
   - LING 301 (Phonology I)
   - LING 303 (Syntax I)
   - LING 309 (Morphology)
   - LING 319 (Phonetics I)
   - LING 421 (Semantics I)

4) A course at or beyond the 300 level in the structure of English or some other language, or a typological or comparative structure course such as Linguistics 401 or Field Methods (LING 300)

5) One additional linguistics course for at least four credit hours, which may be a course with significant linguistic content in a related field.

Some substitutions to these standard requirements are possible after consultation with your adviser and approval by the DUS.

Honors

Applications for honors should be made during the junior year or by the start of full term of the senior year. For further information, please contact the DUS. Candidates for admission must have a 3.0 (B) average overall and should have a 3.2 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete a senior thesis and take a final oral examination in defense of it. The thesis is usually written during the senior year but may be started in the second term of the junior year when the student's program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis adviser and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. LING 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

First-Year Writing Seminars

For descriptions, consult the John S. Knight brochure for times, instructors, and descriptions.

Courses

LING 101  Introduction to Linguistics (II)
Fall or spring. 4 credits each term. Fall, J. Whitman, spring, M. Diesing.

An introductory course designed to provide an overview of the science of language, especially its theoretical underpinnings, methodology, and history. LING 101 and 102 will cover the basic concepts of phonetics, phonology, morphology, syntax, semantics, language variation, language change, and psycholinguistics.

LING 109  English Words: Histories and Mysteries (also CLASS 109) # Fall. 3 credits. M. Weiss.
Where do the words we use come from? This course examines the history and structure of the English vocabulary from its distant Indo-European roots to the latest in technical jargon and slang. Topics to be discussed include formal and semantic change, taboo and euphemism, borrowing, new words from old, "learned" English loans from Greek and Latin, slang, and society.

LING 131-132  Elementary Sanskrit (also CLASS 131-132 and SANSK 131-132) For description, see SANSK 131-132.

LING 170  Introduction to Cognitive Science (also COGST 101, COM S 101, PHIL 102, and PSYCH 102) For description, see COGST 101.

LING 201  Introduction to Phonetics and Phonology (III)
Spring. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. A. Cohn.

An introduction to the study of human speech sounds and how they pattern in languages. The first part of the course focuses on phonetics: the production, acoustics, and perception of speech, with attention to both the common and the less common sounds of the world's languages. The second part of the course focuses on phonology: how human speech sounds pattern within and across languages, with an emphasis on the rules that govern these patterns and their possible representations.

LING 203  Introduction to Syntax and Semantics (II)
Fall. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. M. Diesing.

This course focuses on language as a system of knowledge that enables native speakers to create and interpret the utterances of their language. Part of the course considers issues of syntactic structure, such as the order of constituents, the hierarchical organization of grammars, and syntactic universals. The other part of the course focuses on meaning and interpretation, addressing such issues as the role of context, how information is structured, and how it is encoded in the syntax.

LING 212  Language and Culture (III)

We often assume that there is a close relationship between differences in language and cultural variation. This course focuses on that relationship, beginning with an examination of the linguistic relativity hypothesis, which posits a link between basic properties of languages and crosscultural differences in world view. We also examine potential cultural determinants of variation in language: pronouns and honorific systems, systems of ritual and taboo in language, and the impact of narrative organization on grammar. Special attention is paid to "exotic" forms of language: invented languages from Esperanto to Klingon; glossemata and trancelanguages; language games and secret languages.

LING 215/715  Psychology of Language (also PSYCH 215) (III)
Not offered 2001-2002. For description, see PSYCH 215.

LING 216 Mathematical Linguistics (II)

The course is an introduction to the mathematical concepts and techniques most frequently used in theoretical linguistics.

LING 217  History of the English Language (also ENGL 217) (III) or (IV)
Fall. 4 credits. W. Harbert.

This course explores the development of the English language from its Indo-European beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old English, Middle English, Standard English, dialects, and World Englishes.

LING 220  Introduction to Southeast Asian Languages and Linguistics (III)
This course is an introduction to the history, structure, and current status of the Scottish Gaelic language, oriented around elementary structure, and current status of the Scottish Gaelic texts.

This course surveys the history, structure, and use of the modern Germanic languages (English, German, Dutch, Afrikaans, Swedish, Danish, Icelandic, Norwegian, Faroese, and Yiddish).

This course surveys the history, structure, and political and social situation of the Welsh language. It includes several sessions of elementary language instruction and a brief introduction to Welsh literature.

This course covers a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.

This course is a basic introduction to the regional dialect of English spoken in the United States. It is linguistically oriented, introducing the relevant aspects of phonetics, phonology, morphology, and syntax where appropriate. There is an emphasis on the students discovering what features characterize their own dialects (if they speak American English). The class is also of use as an introduction to American English dialects for non-native speakers of English.

This course explores connections between language (use) and gender/sex systems, addressing such questions as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women's studies and feminist theory.

This course presents an introduction to the formal structure of natural language and its biological basis. The following topics are covered: the formal representation of linguistic knowledge, principles and parameters of universal grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. This course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.

This course addresses the basic issues in the study of words and their structures. It provides an introduction to different types of morphological structures with examples from a wide range of languages. Special emphasis is given to current theoretical approaches to morphological theory.

This course addresses the basic issues in the study of words and their structures. It provides an introduction to different types of morphological structures with examples from a wide range of languages. Special emphasis is given to current theoretical approaches to morphological theory.

This course provides a basic introduction to phonological theory. The first half of the course focuses on basic principles of phonology, patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 302 provides further refinement of the issues investigated in 301, focusing in particular on metrical theory, Lexical Phonology, autosegmental phonology, and Prosodic Morphology.

This course addresses the basic issues in the study of words and their structures. It provides an introduction to different types of morphological structures with examples from a wide range of languages. Special emphasis is given to current theoretical approaches to morphological theory.

This course addresses the basic issues in the study of words and their structures. It provides an introduction to different types of morphological structures with examples from a wide range of languages. Special emphasis is given to current theoretical approaches to morphological theory.
LING 319 Phonetics I (III)  
Fall. 4 credits. Prerequisite: LING 201 or permission of instructor A. Miller-Ockhuizen.  
This course provides a basic introduction to the study of phonetics. Topics covered include anatomy and physiology of the speech production apparatus, transcription and production of some of the world's sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, and stress and intonation.

LING 320 Phonetics II (III)  
Spring. 4 credits. Prerequisite: LING 319. A. Miller-Ockhuizen.  
This course is a continuation of Phonetics I and provides a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of "hands-on" projects are part of the course.

LING 321-322 History of the Romance Languages (also ROMS 321) (III)  
Fall; Spring 4 credits each term. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. C. Rosen.  
321: Course covers: popular Latin; Pan-Romance trends in phonology, morphology, syntax, and the lexicon; regional divergence; non-Latin influences; transmission, transcription and production of some of the world's sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, and stress and intonation.

LING 323 Comparative Romance Syntax (also ROM S 323) (III)  
Spring. 4 credits. Prerequisites: LING 101, or equivalent and qualification in any romance language. Offered alternate years. C. Rosen.  
Concise survey of romance syntax, covering the salient constructions in six languages with equal attention to their historical evolution and their current state. Grammatical innovation and divergence in a typological perspective.

LING 325 Pragmatics (also PHIL 334) (III or IV)  
Fall. 4 credits. Prerequisite: LING 201 or PHIL 231 or permission of instructor. D. Abusch.  
An introduction to aspects of linguistic meaning which have to do with context and with the use of language. Topics include context change: semantics and pragmatics, presupposition and accommodation, conversational implicature, speech acts, and the pragmatics of definite descriptions and quantifiers.

LING 332 Philosophy of Language (also PHIL 332) (IV)  
For description, see PHIL 332.

LING 333 Problems in Semantics (also PHIL 333 and COGST 333) (III or IV)  
Spring. 4 credits. Prerequisite: logic or semantics course or permission of instructor. Not offered 2001-2002. S. McConnell-Ginet, Z. Gendler Szabo.  
This course looks at problems in the semantic analysis of natural languages, critically examining several semantic theories of natural language and their current state. Grammatical innovation and divergence in a typological perspective and their current state.

LING 334 Principles of Linguistics (also PHIL 334) (IV)  
Spring. 4 credits. Prerequisite: LING 101 or equivalent. C. Rosen.  
Study of basic questions of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts to formalize universals of syntax and to characterize the total repertoire of constructions available to natural languages. Common morphological devices and their syntactic correlates. Emphasis is on systems of case, agreement, and voice.

LING 347 Topics in the History of English (III)  
Spring. 4 credits. Prerequisite: LING 217, 314, a course in Old or Middle English, or permission of instructor. Not offered 2001-2002. W. Harbert.  
The course will treat specific topics in the linguistic history of the English language, selected on the basis of the particular interests of the students and the instructor. The topic area for 2000-2001 was morphological and syntactic change during the Early Middle English period—a period crucial to the development of the distinctive syntactic properties of Modern English.

LING 355 Languages in Contact (III)  
A principal cause of language change is contact with another language—that is, when some speakers of the community speak another or several other languages. This course examines the role played by contexts in contact influence each other: what kind of changes they undergo and the social factors which determine the kind, direction, and degree of change. We study issues of bilingualism and its social correlates, code switching, issues of language mixture (religion and ethnic group, language interwining), language maintenance and language death. Finally, we look at how issues of language in contact shape our understanding of traditional historical linguistics—that is, where languages that are now spoken in the world came from and how they came to be the way they are.

LING 356 Spanish in the United States (also SPAN 366 and LSP 366) (III)  
Fall. 4 credits. Prerequisite: some knowledge of Spanish. M. Suter.

LING 390 Independent Study in Linguistics  
Fall or spring. 1-4 credits variable. Prerequisite: LING 101 or permission of instructor. Staff.  
Independent study of linguistics topics not covered in regular curriculum for undergrads.

LING 401 Language Typology (III)  
Spring. 4 credits. Prerequisite: LING 101 or equivalent. C. Rosen.  
Study of a basic question of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts to formalize universals of syntax and to characterize the total repertoire of constructions available to natural languages. Common morphological devices and their syntactic correlates. Emphasis is on systems of case, agreement, and voice.

LING 403 Applied Linguistics and Second Language Learning (III)  
Fall. 4 credits. Prerequisite: at least one course in applied linguistics, psychology, anthropology, communication, cognitive studies, education, or literary analysis; or permission of instructor. Not offered 2001-2002; next offered 2002-2003. Staff.  
This course is an introduction to the field of applied linguistics with focus on different domains of language research as they come to bear on the matter of second language learning. Thus, topics include developmental and experimental psychology of language, textual and discourse analysis, literacy, cognitive consequences of bilingualism, corpora and language teaching, and contact between first and second language communities.

LING 404 Linguistic Structure of Japanese (also ASIAN 412) (III)  
Fall. 4 credits. Prerequisites: JAPAN 102 or permission of instructor and LING 101 or equivalent introductory course in linguistics. Offered alternate years. Not offered 2001-2002; next offered 2002-2003. Y. Shirai.

LING 405 Sociolinguistics (III)  
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. J. Wolff.  
The principal work of linguistics is to describe, analyze, and understand the regularities of language systems. How, then, are we to deal with irregularities and variability when they are observed in language? This course introduces and discusses the most significant issues in the study of language variation, and it examines some of the methodologies that have been developed to study variation in language use. We consider the observable interactions between linguistic variables and social factors (e.g., age, sex, ethnicity) and review the main generalizations about these factors that sociolinguistics has arrived at in the last three decades. Some of the problems associated with the quantification and measurement of nonlinguistic variables are discussed and we evaluate the various ways researchers have dealt with these problems.

LING 406 Ethnosociolinguistics (III)  
This course is an introduction to the study of pidgin and creole languages and the issues surrounding them both in and beyond linguistics. Topics covered include: genesis of pidgins and creoles; classification of pidgins and creoles; creoles and language universals; sociolinguistic variation, a module on Saramaccan Creole English; educational and language planning issues; sociolinguistic issues; Black English.

LING 407 Grammatical Structure of Spanish I (also SPANR 407) (III)

This course seeks to equip the advanced student or the future language professional with practical insights into problem areas for the student or the future language professional linguistic descriptions. The intent is to narrow the gap known to exist between the knowledge that a native speaker has and the incomplete one that a foreign language learner possesses.

LING 408 Grammatical Structure of Spanish II (also SPANR 408) (III)

Survey of Spanish morpho-syntax using contemporary theoretical models to highlight hidden patterns and generalizations. Topics may vary according to students' interests, but may include major clause types, word order possibilities, negation, agreement, and null categories.

LING 409 Structure of Italian (III)

Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modals, clitics, reflexive constructions, agreement, impersonal constructions, causatives.

LING 410 History of the Italian Language (III)

Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.

LING 411 History of the Japanese Language (also ASIAN 411) (III)
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. J. Whitman.

An overview of the history of the Japanese language following an extensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

LING 413 Topics in Historical Linguistics
Fall. 4 credits. Prerequisite: LING 314 or permission of instructor. Not offered 2001–2002. W. Harbert, C. Rosen.

Examines a selection of recent research illustrating a variety of productive and innovative approaches to problems in historical linguistics. Readings center on phonological and morphological evolution in the Romance and Germanic families. Students carry out guided research projects.

LING 414 Second Language Acquisition I (also ASIAN 414) (III)
Spring. 4 credits. Prerequisite: permission of instructor. Y. Shirai.

A survey of the quantitative and qualitative research literature on the acquisition of second and additional languages among the adult population. Research carried out in both experimental and natural settings is considered. Topics include: learner errors and errors analysis; contrastive analysis hypothesis; developmental and variability patterns in the acquisition of syntax, phonology and morphology, including the potential effects of typological and formal universals; pragmatics and discourse; the lexicon, social and cognitive factors in acquisition, communication, and learning strategies; theories of second language acquisition.

LING 415 Second Language Acquisition II (also ASIAN 417) (III)

This course examines various issues in second language acquisition research that is particularly relevant to foreign language teaching and learning. Topics covered include: the role of input (listening/reading) vs. output (speaking/writing); implicit vs. explicit learning; negative vs. positive evidence (including the role of error correction); affective factors (motivation, anxiety); individual differences; teachability hypothesis and syllabus construction; the structure of second language proficiency.

LING 416 Structure of the Arabic Language (also NES 416) @ (III)
Not offered 2001–2002. For description, see NES 416.

LING 417–418 History of the Russian Language (also RUSSA 401–402) (III)
Fall, spring. 4 credits each term. Prerequisites: for LING 417, permission of instructor; for LING 418, LING 417 or equivalent. Offered alternate years. Not offered 2001–2002; next offered 2003–2004. W. Browne.

Phonological, morphological, and syntactic developments from Old Russian to modern Russian.

LING 420 Approaches to Discourse (also ASIAN 419 and COM L 421) (III or IV)

LING 421–422 Semantics I, II (III)
Spring, fall. 4 credits each term. Prerequisites: for LING 421, LING 203; for LING 422, LING 421. Permission of instructor. D. Abusch.

421: An introduction to semantics of natural language. The course starts from basic foundational questions concerning the nature of meaning and the empirical domain of semantic theory. Truth-conditional and logical theories and their application to the investigation of the structure of natural languages are extensively explored (with some comparisons with other approaches). Through the study of quantification, scope, anaphora, modalities, presuppositions, and the like, one tries to gain insight into general characteristics of the cognitive apparatus that is at the basis of our capacity for understanding sentences.

422: Guides students into current work in semantic theory. The first half of the course is an introduction to Montague-style semantics, whose influence on current research is quite extensive. The second half of the course focuses on selected topics in the linguistic relevance of algebraic approaches to properties, propositions, events and thematic roles, and discourse representation theory.

LING 424 Computational Linguistics (also COGST 424 and COM S 424) (III)
Spring. 4 credits. Prerequisite: LING 203 or permission of instructor; COM S 114 is also recommended. M. Rooth.

Steady progress in formalisms, algorithms, linguistic knowledge, and computer technology is bringing computational mastery of the syntax, morphology, and phonology of natural languages within reach. The course introduces methods for "doing a language" computationally, with an emphasis on approaches which combine linguistic knowledge with powerful computational formalisms. Topics: computational grammars, parsing, representation of syntactic analyses; finite state morphology; weighted grammars; feature constraint formalisms for syntax; treebank and other markup methodology; robust low-level syntax and semantics; and experimental-modeling methodology using large data samples.

LING 425 Corpora and Applied Linguistics (also ASIAN 425) (III)

LING 426 Computational Linguistics II (also ASIAN 426) (III)

LING 427 Structure of Hungarian (III)

Survey of phonology, morphology, and syntax of this non-Indo-European language. Topics to be stressed include vowel harmony, consonant assimilation; definite and indefinite conjugations, possessives, verb prefixes, causatives; and focus, word order, clause types, movement, intonation.

LING 428 Structure of the Chinese Language (also ASIAN 429) (III)

LING 430 Structure of Korean (also ASIAN 430) (III)
Spring. 4 credits. Offered alternate years. J. Whitman.

Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory. No previous knowledge of Korean required.

LING 431 Structure of an African Language (III)

A survey of the grammar of an African language in light of current linguistic theory.
LING 433 The Lesser-Known Romance Languages (also ROM S 433)  
Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance language. C. Rosen. 
The course surveys three or four Romance languages or dialects, examining their sound systems, grammar, and historical evolution from Latin. Includes some native speaker demonstrations. Readings represent both the modern languages and their earliest attested stages. Topics for fall 2001: Catalan, Romanian, a Northern Italian dialect, and a Rhetor-American language. 

LING 436 Language Development (also COGTS 436, HD 436, and PSYCH 436) (III)  
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 635/LING 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least 1 course in developmental psychology, cognitive psychology, cognitive development, biology, neurobiology, or linguistics. B. Lust. 
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGTS 450/LING 450/PSYCH 457). 

[LING 437 Celtic Linguistic Structures (III)]  
This course treats selected topics in the syntax and morphosyntax of the modern Celtic languages. 

LING 441 Introduction to Germanic Linguistics (also GERST 441) (III)  
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. W. Harbert. 
Survey of major issues in historical Germanic linguistics. 

[LING 443-444 Linguistic Structure of Russian (also RUSSA 403–404) (III)]  
443, fall, 444, spring. 4 credits each term. Prerequisites: for LING 443, LING 101 and permission of instructor; for LING 444, LING 443 or equivalent. Offered alternate years; next offered 2003–2004. W. Browne. 
A synchronic analysis of the structure of modern Russian. LING 443 deals primarily with phonology and its relation to syntax and 444 with syntax and word order. Topics covered include: case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax. 

LING 450 Lab Course: Language Development (also COGTS 450 and PSYCH 437)  
Spring. 2 credits. Prerequisite: COGTS/HD/LING/PSYCH 436. B. Lust. 
This laboratory course provides undergraduates with an introduction to hands-on research experience in the Cognitive Studies research labs and meets once a week in group format. It includes several structured modules dealing with topics covered in the survey course, COGTS/HD/LING/PSYCH 436, Language Development. They include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis is placed on developing research methods in order to test hypotheses. 

[LING 451 Greek Comparative Grammar (also CLASS 421) (III)]  
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages. 

LING 452 Latin Comparative Grammar (also CLASS 422) (III)  
Fall. 4 credits. Prerequisite: thorough familiarity with classical Latin morphology. A. Nussbaum. 
The prehistory and evolution of the sounds and forms of classical Latin as reconstructed by comparison with the other Indo-European languages. 

[LING 454 Italic Dialects (also CLASS 424) (III)]  
The phonology and morphology of Faliscan, Oscan, and Umbrian studied through the reading of epigraphic texts. Attention to the relations of these languages to Latin and the question of proto-Italic. 

[LING 455 Greek Dialects (also CLASS 425) (III)]  
A survey of the dialects of ancient Greek through the reading and analysis of representative epigraphical and literary texts. 

LING 456 Archaic Latin (also CLASS 426) (III)  
Spring. 4 credits. Prerequisite: reading knowledge of Latin. A. Nussbaum. 
Reading of epigraphic and literary preclassical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language. 

[LING 457 Homeric Philology (also CLASS 427) (III)]  
The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstsprache: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique. 

[LING 459 Mycenaean Greek (also CLASS 429) (III)]  
An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology. 

[LING 460 Sanskrit Comparative Grammar (III or IV)]  
A survey of the historical phonology and morphosyntax of Sanskrit in relation to the Iranian and Indo-European comparative evidence. 

LING 474 Introduction to Natural Language Processing (also COGTS 474 and COMS 474) (III)  
For description, see COMS 474. 

LING 493 Honors Thesis Research  
Fall. 4 credits. Staff. May be taken before or after LING 494, or may be taken independently. 

LING 494 Honors Thesis Research  
Spring. 4 credits. Staff. May be taken as a continuation of, or before, LING 493. 

[LING 601 Topics in Phonological Theory]  
Selected topics in current phonological theory. 

[LING 602 Topics in Morphology]  
Fall. 4 credits. Prerequisites: LING 301 or 303 or permission of instructor. Not offered 2001–2002. D. Zec. 
Selected topics in current morphological theory. 

LING 604 Research Workshop  
Fall. 2 credits. S–U grade only. Required of third-year linguistics graduate students. A. Cohn. 
This course provides a forum for presentation and discussion of ongoing research, and development of professional skills. Participants must enroll in a concurrent independent study with a special committee member, or a relevant workshop. 

LING 606 Historical Syntax  
A course on change in language structure, beginning with an overview of widely attested types of syntactic change and proceeding to an introduction of current theoretical treatments. Topics covered include grammaticalization, word order change, and...
Students develop a reading knowledge of Middle Welsh through translating selections from prose and poetry. Emphasis is on the prose tales, including the Mabinogi. No familiarity with Welsh is assumed.

[LING 627 Advanced Old Irish]
LING 629 Old Avestan (also NES 622)
Fall. 4 credits. Prerequisite: LING 621. M. Weiss.
Linguistically and philologically oriented reading of the Gathas of Zarathustra and the Yasna Haptnahiti. Some knowledge of Sanskrit required.

[LING 631 Comparative Indo-European]
LING 633 Language Acquisition Seminar (also COGST 633 and HD 633)
Fall. 1–4 credits. Prerequisite: LING 436 or equivalent or permission of instructor. B. Lust.
This seminar reviews and critiques current theoretical and experimental studies of first-language acquisition, with a concentration on insights gained by cross-linguistic study of this area. Attention is also given to the development of research proposals.

[LING 635-636 Indo-European Workshop]
LING 636 Indo-European Workshop 635, fall; 636, spring. 4 credits each term.
An assortment of subjects intended for students with previous training in Indo-European linguistics: problems in the reconstruction of Proto Indo-European, topics in the historical grammars of the various IE languages, reading and historical linguistic analysis of texts, and grammatical sketches of “minor” IE languages.

[LING 643 Topics in Historical Germanic Phonology]
LING 644 Topics in Historical Germanic Syntax
Development of the sound system from Proto-Germanic to its daughter languages.

[LING 645 Gothic]
LING 646 Old High German, Old Saxon (also GERST 658)
Linguistic structure of Gothic, with extensive readings of Gothic texts.

[LING 646 Old High German, Old Saxon (also GERST 658)]
LING 661 Old Church Slavonic (also RUSSA 601)
Fall. 4 credits. Prerequisite: students must know a Slavic or Indo-European language. This course is prerequisite to LING 662 and LING 671. Offered alternate years. W. Browne.
Grammar and reading of basic texts.

[LING 662 Old Russian Texts (also RUSSA 602)]
LING 664 Speech Synthesis by Rule
Studies the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model is proposed, developed, and motivated by considering the relationship between phonological and acoustic structure, speech timing, phonetic universals, coarticulation, and speech perception. The primary tool for investigation will be the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduate students in linguistics, but may also be of interest to students in psychology/psycholinguistics, computer science, and cognitive studies.

[LING 669 Structure of Old English]
LING 671-672 Comparative Slavic Linguistics (also RUSSA 651-652)
LING 671-672 Comparative Slavic Linguistics (also RUSSA 651-652)
671, fall; 672, spring. 4 credits each term.
Prerequisite: for LING 672, LING 661 taken previously or simultaneously or permission of instructor. Offered alternate years. W. Browne.
Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.
The Department of Mathematics faculty has strong groups specializing in algebra, number theory, combinatorics, real and complex analysis, Lie groups, topology and geometry, logic, probability and statistics, mathematical physics, and applied mathematics. Related departments at Cornell have specialists in computer science, operations research, linear programming, and game theory, and courses in these topics can be integrated readily into the mathematics major.

The department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help.

Students who want to take any of the courses numbered 300 or above are invited to confer, before registering, with the instructor concerned. The level of a course is indicated by the first digit of the course number: roughly, 1, 2, indicate underclass courses; 3, 4, upperclass courses; 5, professional level and mathematics education courses; 6, 7, graduate courses. The subject matter of courses is often indicated by the second digit: 0, general; 1, 2, analysis; 3, 4, algebra and combinatorics; 5, 6, topology and geometry; 7, probability and statistics; 8, logic; 9, other.

Midterm grades, when required, will be S or U only, except in special circumstances. In courses with numbers below 700, students will receive letter grades, with the exception of nonmathematics majors who have requested an S-U grade.

Advanced Placement
Secondary school students are strongly urged to take one of the two advanced placement examinations of the College Entrance Examination Board in their senior year. Freshmen who have had some calculus but who have not taken an advanced placement examination should take the placement examination in mathematics offered at Cornell just before the beginning of classes in the fall. It is most important that anyone with knowledge of calculus carefully read "Advanced Placement," p. 6, 7.

The Major
The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike, and can be broad or narrow. It can also be combined easily with serious study in another subject in the physical, biological, or social sciences by means of a double major or concentration.

For example, a double major in mathematics and computer science is facilitated by the concentration in computer science (requirement 4, option b) described below. This concentration permits a student to use certain computer science courses to satisfy the requirements of both majors. Questions concerning the major should be brought to a departmental representative.

Prerequisites
The traditional prerequisites are MATH 221–222, 223–224, or 293–294. A unit on infinite series is required. Such a unit is offered in MATH 112, 122 and 192. Normally students will be admitted to the major only when they have grades of B- or better in all 200-level mathematics courses taken. Alternative prerequisites are MATH 213 and 231, normally with grades of B+ or better.

Requirements
There are five requirements for the major:

1. COM S 100. Students are urged to take this course before the end of their sophomore year.

2. Two courses in algebra. Eligible courses are MATH 336 or 436, 431 or 433, 332 or 432 or 434.

3. Two courses in analysis. Eligible courses are MATH 311, 321, 411 or 413, 414, 418, 420, 422, 425, 424, 427, 428. (MATH 411 has been discontinued and replaced by MATH 311. Students may not receive credit for MATH 311 if they have received credit for MATH 411. MATH 423 will not be offered again.)

4. Further high-level mathematical courses. Any one of (a), (b), (c), (d), (e) below is sufficient. The five alternatives below do not exhaust the possibilities. A mathematics major interested in a concentration in a subject different from those below may develop a suitable individual program in consultation with his/her major adviser.

(a) Four additional Mathematics courses numbered 300 or above

(b) Concentration in Computer Science: Five additional courses from (i) and (ii) below, of which at least one is from (i) and three are from (ii)

(i) Mathematics courses numbered 300 or above

(ii) Computer Science courses numbered 300 or above

(c) Concentration in Operations Research: Five additional courses from (iii) and (iv) below, of which at least one is from (iii) and three are from (iv)

(iii) Mathematics courses numbered 300 or above

(iv) Courses in Operations Research and Industrial Engineering in which the primary focus involves mathematical techniques. Undergraduate courses include OR&IE 320–462 excluding OR&IE 350, 414, and 418. Many Operations Research graduate courses are also allowed. Students should consult with their advisers.

(d) Concentration in Economics: Five additional courses from (v), (vi), and (vii) below, as follows: one course from (v), three courses from (vi), and a fifth course from any of (v), (vi), or (vii).

However, Mathematics 472 and Economics 319 cannot both be used to satisfy these requirements.

(v) Mathematics courses numbered 300 or above

(vi) Economics courses with significant mathematical content. Eligible courses are ECON 318, 319, 320, 416, 419, 450 (also ARME 450), 467, 609, 610, 613, 614, 619, 620, 717, 756.

(vii) Courses in Operations Research and Industrial Engineering in which the primary focus involves mathematical techniques. Undergraduate courses include OR&IE 350, 414, 418, and 418. Many Operations Research courses are also allowed. Students should consult with their advisers.
should consult their major advisers concerning suitable courses.

To be considered for high honors, a student usually will be expected to write a Senior Thesis and present it orally. This project is carried out during the senior year under the supervision of a member of the Mathematics Department faculty. Students interested in high honors should consult their major advisers and the chair of the department's Mathematics Major Committee during the second semester of their junior year.

Teacher Education in Mathematics

Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. TEAMS (Teacher Education in Agriculture, Mathematics, and Science) is a university program jointly conducted by the departments of Education and Mathematics. Most TEAMS students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates. Students completing the graduate program will earn the master's degree required for permanent certification in New York and most other states.

Mathematics students in TEAMS must complete all the requirements for a mathematics major (or its equivalent) including MATH 403, 408, 451, 507, and a probability/statistics course. There are a number of education courses required including EDUC 402, 403, 601, 602, 644 plus 2-3 additional courses. Some of the required courses will be taken in the graduate fifth year.

For more information, contact the TEAMS Student Support Specialist at 255-9255 or ap5@cornell.edu, or David Henderson (Mathematics, dw2h@cornell.edu).

Studying Mathematics Outside the Major

The College of Arts and Sciences and the Department of Mathematics offer no minor in mathematics; however, some other scientific departments in the college offer, within their own majors, concentrations in mathematics and mathematics-related fields. A student interested in such a concentration should consult the Director of Undergraduate Studies of his/her major department.

The Engineering College offers a minor in applied mathematics that is open to any undergraduate in that college. The minor is sponsored jointly by the Department of Mathematics and the Department of Theoretical and Applied Mechanics, and is administered by the latter department. Engineering students interested in this minor should contact Professor Richard Rand of the Department of Theoretical and Applied Mechanics (255-7145, rh2@cornell.edu). Information about this minor is also available at www.math.cornell.edu.

The Mathematics Department welcomes into its upper-level courses students from all departments. The department's Director of Undergraduate Studies and other faculty can provide assistance in selecting appropriate areas of study and individual courses.

Distribution Requirement

The mathematics courses that can be used to satisfy the Group II (Quantitative and Formal Reasoning) part of the Arts College distribution requirements are indicated by the symbol "(II)" next to the title of the course.

Basic Sequences

Precalculus

Students who want to take two semesters of calculus are advised to take the first two
semesters of one of the three calculus sequences. Students with excellent performance in MATH 106 may follow that course with MATH 112 or 122. The courses in each of the calculus and statistics sequences may be taken in either order, since no calculus background is required for MATH 171. Each of the sequences listed here satisfies the mathematics requirement for most medical schools. Switching between calculus sequences is often difficult, especially at the 200 level. Students should not attempt such a switch without consulting the Director of Undergraduate Studies.

Courses with Overlapping Content
Because the department offers many courses with overlapping content, students must choose their courses carefully to ensure that they will receive credit for each course they take. Listed below are groups of courses with similar content. Students will receive credit for only one of the courses in each group.

106, 111, 121, 190, 191
112, 122, 192
213, 222, 224, 293
221, 223, 231, 294
311 and 411
322 and 452
336 and 436
411 and 413
431 and 433
432 and 434

Fees
In some courses there may be a small fee for computer lab use or for photocopying materials to be handed out to students.

Summer Courses
A list of mathematics courses usually offered every summer can be found in the School of Continuing Education and Summer Sessions section of this catalog. Students interested in taking summer courses in mathematics should consult the Mathematics Department (255-4035). A tentative summer listing may be available as early as October.

Undergraduate Course Offerings
Please visit www.math.cornell.edu for further information and up-to-the-minute corrections.

Foundation courses: 105, 106, 109, 111, 112, 121, 122, 190, 191, 192, 213, 221, 222, 223, 224, 231, 293, 294
Mathematics Education: 408, 451
History of Mathematics: 403
General and Liberal Arts Courses: 103, 171, 401, 402, 408
Analysis: 311, 411, 413, 414, 418
Algebra and Number Theory: 332, 336, 431, 432, 433, 434, 436
Combinatorics: 441, 442
Geometry and Topology: 356, 451, 452, 453, 454, 455
Probability and Statistics: 171, 471, 472
Mathematical Logic: 281, 284, 481, 482, 483, 486

MATH 103 Mathematical Explorations (II)
Fall, spring. 3 credits. This course may be used to satisfy the distribution requirement in mathematics.
This course is for students who wish to experience how mathematical ideas naturally evolve. The homework consists of the students actively investigating mathematical ideas. The course emphasizes ideas and imagination as opposed to techniques and calculations. Textbooks vary depending on the instructor and are announced (www.math.cornell.edu) several weeks before the semester begins. Some assessment is done through writing assignments.

MATH 105 Finite Mathematics for the Life and Social Sciences (II)
Fall. 3 credits. Prerequisite: 3 years of high school mathematics, including trigonometry and logarithms. Course topics include: mathematical modeling, sets, functions, and graphing; transformations to linearize data (including use of log and semi-log paper); probability (with some applications to genetics); and matrices, systems of linear equations, and Markov chains. Examples from biology and the social sciences are used.

MATH 106 Calculus for the Life and Social Sciences (II)
Spring. 3 credits. Prerequisite: readiness for calculus, such as can be obtained from 3 years of high school mathematics (including trigonometry and logarithms) or any of the following Cornell courses: MATH 105, MATH 109, or EDUC 115.
MATH 111, rather than 106, is recommended for those planning to take 112.* Course serves as an introduction to differential and integral calculus, partial derivatives, elementary differential equations. Examples from biology and the social sciences are used.

MATH 109 Precalculus Mathematics
Summer. 3 transcript credits only; cannot be used toward graduation. This course is designed to prepare students for MATH 111. Algebra, trigonometry, logarithms, and exponents are reviewed.

MATH 111-112 Calculus
Calculus is the study of functions and processes from the point of view of how they are changing. What can we know of a function from the rate at which it changes? What is the cumulative effect of infinitely many infinitesimal changes? MATH 111 and 112 aim to provide, to students with little or no prior exposure to calculus, the knowledge that calculus is useful, that its applications to the physical, biological, and social sciences have shaped our world, and beautiful, in that it represents a breathtaking attempt of the human mind to capture the infinitely large and the infinitely small. These courses seek to provide basic understanding of technical skills, and sample applications in various fields for the very broad range of students who take them. Topics are studied (as appropriate) by analytic, numerical, and graphical methods. These courses sometimes offer one or more sections with small group projects. (See the Supplement to the Course and Room Roster.)

MATH 111 Calculus (II)
Fall, spring. 4 credits. Prerequisite: MATH 109 or 3 years of high school mathematics, including trigonometry and logarithms.* Course topics include: functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic, and exponential functions; applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, and applications to the sciences; the mean value theorem; and antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integration, the area under a curve. Graphing calculators are used, and their pitfalls are discussed, as applicable to the above topics.

MATH 111 can serve as a one-semester introduction to calculus or as part of a two-semester sequence in which it is followed by MATH 112 or 122.

MATH 112 Calculus (II)
Fall, spring. 4 credits. Prerequisite: MATH 111 with a grade of C or better or excellent performance in MATH 106. Those who do well in MATH 111 and expect to major in mathematics or a strongly mathematics-related field should take 112 instead of 111.* Course focus is on integration: applications, including volumes and arc length; techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separation of variables, initial conditions, systems, some applications). Also covered are infinite sequences and series: definition and tests for convergence, power series, Taylor series with remainder, and parametric equations.

MATH 121 Honors Calculus (II)
Fall. 4 credits. Prerequisite: 3 years of high school mathematics with average grade of A- or better, or permission of the department.* This is a first-semester course in calculus intended for students who have been quite successful in their previous mathematics courses. The syllabus for the course is quite similar to that of MATH 111; however, the approach is more theoretical and the material is covered in greater depth.

MATH 122 Honors Calculus (II)
Fall, spring. 4 credits. Prerequisite: 1 semester of calculus with a high performance or permission of the department. Students planning to continue with MATH 213 are advised to take 112 instead of this course.* Topics covered include: differentiation and integration of elementary transcendental functions, techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems. The approach is more theoretical than in MATH 112.

MATH 171 Statistical Theory and Application in the Real World (II)
Fall, spring. 4 credits. Prerequisite: high school mathematics.
This introductory statistics course discusses techniques for analyzing data occurring in the real world and the mathematical and philosophical justification for these tech-
niques. Topics include: population and sample distributions, central limit theorem, statistical theories of point estimation, confidence intervals, testing hypotheses, the linear model, and the least squares estimator. The course concludes with a discussion of tests of significance, regression and analysis of variance (if time permits). The computer is used to demonstrate some aspects of the theory, such as sampling distributions and the Central Limit Theorem. In the lab portion of the course, students learn and use computer-based methods for implementing the statistical methodology presented in the lectures. (No previous familiarity with computers is presumed.)

**MATH 190 Calculus for Engineers (II)**

Fall. 4 credits. Prerequisite: 3 years of high school mathematics, including trigonometry and logarithms.

Course topics include: plane analytic geometry, differential and integral calculus, and applications. This course is restricted to engineering students who have had no previous successful experience with calculus. Students who have had such experience but wish a first-semester calculus course should take MATH 191.

**MATH 191 Calculus for Engineers (II)**

Fall, spring. 4 credits. Prerequisite: 3 years of high school mathematics including trigonometry and logarithms, plus some knowledge of calculus.

Course topics include: plane analytic geometry, differential and integral calculus, and applications. MATH 191 covers essentially the same topics as 190, but is designed for students with some previous successful experience with calculus.

**MATH 192 Calculus for Engineers (II)**

Fall, spring. 4 credits. Prerequisite: MATH 190 or 191.*

Course topics include: polar coordinates, infinite series, and power series. Also covered are: vectors and calculus of functions of several variables through double and triple integrals.

**MATH 213 Calculus (II)**

Fall, spring. 4 credits. Prerequisite: MATH 112, 122, or 192.*

Course topics include: vectors and vector-valued functions; multivariable and vector calculus including multiple and line integrals; first- and second-order differential equations with applications; systems of differential equations; and elementary partial differential equations. This course is designed for students who wish to master the basic techniques of calculus, but whose major will not require a substantial amount of mathematics. The course may emphasize different topics in the syllabus in different semesters.

**MATH 221 Linear Algebra and Calculus (II)**

Fall, spring. 4 credits. Prerequisite: 2 semesters of calculus with high performance or permission of the department.*

Course covers linear algebra and differential equations. Topics include: vector algebra, linear transformations, matrices, and linear differential equations, as well as an introduction to proving theorems. This course is especially recommended for students who plan to major in mathematics or in a strongly related field.

**MATH 222 Calculus (II)**

Fall, spring. 4 credits. Prerequisite: MATH 221.*

Course topics include: multivariable and vector differential and integral calculus, including multiple, line, and surface integrals. This course is especially recommended for students who plan to major in mathematics or in a strongly related field.

**MATH 223 Honors Linear Algebra and Calculus (II)**

Fall. 4 credits. Prerequisite: 2 semesters of calculus with a grade of A– or better, or permission of instructor.

Course topics include: vectors, matrices, and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals. MATH 223–224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses.

**MATH 224 Honors Linear Algebra and Calculus (II)**

Spring. 4 credits. Prerequisite: MATH 223.*

Course topics include: vector fields; line integrals; differential forms and exterior derivative; work, flux, and density forms; integration of forms over parametrized domains; and Green’s, Stoke’s, and divergence theorems.

**MATH 231 Linear Algebra (II)**

Spring. 3 credits. Prerequisite: MATH 111 or equivalent.*

Course topics include: vectors, matrices, and linear transformations, affine and Euclidean spaces, transformation of matrices, and eigenvalues.

**MATH 232 Deductive Logic (also PHIL 331) (II)**

Fall. 4 credits.

For description, see PHIL 331.

**MATH 233 Engineering Mathematics (II)**

Fall, spring. 4 credits. Prerequisite: MATH 192.*

Course topics include: vector fields and vector calculus; complex numbers, introduction to ordinary and partial differential equations; and Fourier series and boundary value problems. May include computer use in problem solving.

**MATH 234 Engineering Mathematics (II)**

Fall, spring. 4 credits. Prerequisite: MATH 192.*

Course topics include: matrix theory and linear algebra, inner product spaces, and systems of linear ordinary differential equations. May include computer use in solving problems.

**MATH 311 Introduction to Analysis (II)**

Spring. 4 credits. Prerequisites: MATH 221–222 or 293–294.

Provides a transition from calculus to real analysis. Topics include rigorous treatment of fundamental concepts in calculus: including limits and convergence of sequences and series, compact sets; continuity, uniform continuity and differentiability of functions. Emphasis will be placed upon understanding and constructing mathematical proofs.

**MATH 321 Manifolds and Differential Forms (II)**

Fall. 4 credits. Prerequisites: multivariable calculus and linear algebra as taught in MATH 221–222 or 293–294.

Topics for this course include: differential forms, exterior derivatives, differential equation theorem, manifolds, orientation, boundaries, integration of forms, generalized Stokes’ theorem, Hodge star operator, Laplace operator, basics of de Rham cohomology. We reexamine the integral theorems of vector calculus (Green, Gauss, and Stokes) in the light of the exterior differential calculus and apply differential forms to problems in partial differential equations, fluid mechanics and electromagnetism.

**MATH 332 Algebra and Number Theory (II)**

Fall. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.*

Course covers various topics from number theory and modern algebra, usually including most of the following: Primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, and an introduction to the arithmetic of the Gaussian integers and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.

**MATH 336 Applicable Algebra (II)**

Spring. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.*

An introduction to the concepts and methods of abstract algebra and number theory that are of interest in applications. Covers: basic theory of groups, rings and fields and their applications to such areas as public-key cryptography, error-correcting codes, parallel computing, and experimental designs. Also covers: elementary number theory, Euclidean algorithm, prime factorization, congruences, theorems of Fermat and Euler, elementary group theory, Chinese remainder theorem, factorization in the ring of polynomials, and classification of finite fields. Applications include the RSA cryptosystem and use of finite fields to construct error-correcting codes and Latin squares.

**MATH 356 Groups and Geometry (II)**

Spring. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.

Groups were introduced in the nineteenth century as the set of symmetries of an algebraic or geometric object, and this viewpoint is a central one in modern Mathematics. This course studies the geometry of the planes and of patterns in the plane in terms of the group of symmetries ("isometries") of the plane. Prior knowledge of groups is not a prerequisite. One aim is to give students experience in modern algebra and geometry (including the geometry of complex numbers) and a sense of the unity of mathematics before they take the 400-level courses. Special care is given to initiate the student into the writing of proofs and the language of mathematics. Topics include: symmetries; groups of transformations; subgroups and cosets; homomorphisms and isomorphisms; orbits and fixed points, Friese groups, wallpaper groups ("2-dimensional crystallographic groups"); and the associated tesselations of the Euclidean plane.

*See the list of courses with overlapping content at the end of the introduction.
MATH 384 Foundations of Mathematics (also PHIL 434) (II)
Fall. 4 credits. Prerequisite: 1 course in logic or permission of instructor.
For description, see PHIL 434.

MATH 401 Honors Seminar: Topics in Modern Mathematics (II)
Spring. 4 credits. Prerequisite: 2 courses in mathematics numbered 300 or higher or permission of instructor.
This course is a participatory seminar primarily aimed at introducing senior and junior mathematics majors to some of the challenging problems and areas of modern mathematics. The seminar helps students develop research and expository skills in mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). The content varies from year to year.

MATH 402 Smorgasbord Seminar
Fall. 1 credit. Prerequisite: 2 courses in mathematics numbered 300 or higher. S-U only. Recommended for mathematics majors. A student may only receive credit for this course once.
A lecture series by members of the Mathematics Department about current research topics, to give students a little taste of many different areas in mathematics. This course is valuable for students looking for a topic for a senior thesis and for students thinking about graduate work in the mathematical sciences.

MATH 403 History of Mathematics # (II)
Spring. 4 credits. Prerequisite: 2 courses in mathematics above 300, or permission of instructor.
Survey of the development of mathematics from antiquity to the present, with an emphasis on the achievements, problems, and mathematical viewpoints of each historical period and the evolution of such basic concepts as number, geometry, construction, and proof. Material from original sources in translation. Students are required to give oral and written reports.

MATH 408 Mathematics in Perspective (II)
Spring. 4 credits. Prerequisite: consent of instructor. Not offered 2001–2002.
The purpose of this course is for students to step back and form an overview of the mathematics they have learned. The course is intended for junior and senior mathematics majors and other undergraduates with strong backgrounds in mathematics.

MATH 411 Introduction to Analysis (II)
4 credits. Prerequisite: MATH 221–222, 223–224, or 293–294. Students who need measure theory and Lebesgue integration for advanced probability courses should take MATH 413–414 or audit the first few weeks of MATH 621. Undergraduates who plan to attend graduate school in mathematics should take MATH 413–414.* Will not be offered again.
An introduction to the theory of functions of real variables, stressing concepts and a logical development of the subject rather than applications. Topics include: Euclidean spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, and the Riemann integral. Students who wish to continue study of theoretical analysis upon completion of MATH 411 may take, for example, MATH 418.

MATH 413–414 Honors Introduction to Analysis (II)
413, fall; 414, spring. 4 credits each.
Prerequisite for 413: a high level of performance in MATH 221–222, 223–224 or 293–294. Prerequisite for MATH 414: MATH 413.*
This sequence, designed for honors students, provides an introduction to the theory of functions of real variables, stressing a rigorous logical development of the subject rather than applications. Topics include: metric spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, Fourier series, Riemann and Lebesgue integrals, calculus in several variables, and differential forms.

MATH 418 Introduction to the Theory of Functions of One Complex Variable (II)
Spring. 4 credits. Prerequisite: MATH 223–224, 311, 411 or 413 or permission of instructor.
A theoretical and rigorous introduction to complex variable theory. Topics include: complex numbers, differential and integral calculus for functions of a complex variable, including Cauchy's theorem and the calculus of residues, elements of conformal mapping. Students interested in the applications of complex analysis should consider MATH 422.

MATH 420 Differential Equations and Dynamical Systems (II)
Fall. spring. 4 credits. Prerequisite: high level of performance in MATH 293–294, 221–222, 223–224, or permission of instructor.
Course covers ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical methods. Emphasis is on differential equations as models and the implications of the theory for the behavior of the system being modeled and includes an introduction to bifurcations.

MATH 422 Applied Complex Analysis (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, 293–294, or 213 and 231.
Course covers complex variables, Fourier transforms, Laplace transforms and applications to partial differential equations. Additional topics may include an introduction to generalized functions.

MATH 423 Applicable Analysis III (II)
4 credits. Will not be offered again.

MATH 424 Wavelets and Fourier Series (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, 293–294, or permission of instructor.
Both Fourier series and wavelets provide methods to represent or approximate general functions in terms of simple building blocks. Such representations may have important consequences, both for pure mathematics and for applications. Fourier series use natural sinusoidal building blocks and may be used to help solve differential equations. Wavelets use artificial building blocks that have the

*See the list of courses with overlapping content at the end of the introduction.

advantage of localization in space. A full understanding of both topics requires a background involving Lebesgue integration theory and functional analysis. This course presents as much as possible on both topics without such formidable prerequisites. The emphasis is on clear statements of results and key ideas of proofs, working out examples, and applications. Related topics that may be included in the course: Fourier transforms, Heisenberg uncertainty principle, Shannon sampling theorem, and Poisson summation formula.

MATH 425 Numerical Solutions of Differential Equations (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, or 293–294 and one course numbered 300 or higher in mathematics, or permission of instructor. Generally offered every two years. Not offered 2001–2002.

MATH 427 Introduction to Ordinary Differential Equations (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, or 293–294 or permission of instructor.
Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include: singular points, series solutions, Sturm-Liouville theory, transform methods, approximation methods, and application to physical problems.

MATH 428 Introduction to Partial Differential Equations (II)
Fall. 4 credits. Prerequisite: MATH 221–222, 223–224, or 293–294 or permission of instructor.
Topics selected from first-order quasilinear equations, classification of second-order equations, with emphasis on maximum principles, existence, uniqueness, stability, Fourier series method, approximation methods.

MATH 431–432 Introduction to Algebra (II)
431, fall; 432, spring. 4 credits each.
Prerequisite: MATH 221, 223, 231, or 294. Prerequisite for MATH 432: MATH 431 or 453, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take MATH 433–434.*

*See the list of courses with overlapping content at the end of the introduction.
MATH 433-434 Honors Introduction to Algebra (II)
Spring, 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Prerequisites for this terminal course in basic algebra. Familiarity with elementary algebra or number theory such as MATH 332 would also be helpful. Not offered 2001-2002.

The course is intended for students who would like to learn modern algebra and its applications outside of mathematics. There is at least as much emphasis on applications as there is on the elegant modern algebra. Frequently the applications involve or were made possible by the advent of computers. Students who already know the modern algebra covered in the course may still find the applications of interest. Specific topics are chosen by the instructor. The course typically includes items drawn from: elementary number theory, polynomials and ring theory, monoids and group theory, real closed fields, algebraic combinatorics, Groebner bases, algebraic geometry, and field theory. The applications and related topics typically include items drawn from: complexity theory, coding theory, encryption, discrete and fast Fourier transform, primality testing, factoring integers and polynomials, root counting and isolation, solving systems of polynomial equations, formal language theory, and automata.

MATH 336 and 436 may overlap in choice of material. Where they overlap, the coverage in MATH 436 is of greater depth appropriate to a 400-level course. Students cannot get credit for both MATH 336 and MATH 436.

MATH 441 Introduction to Combinatorics (II)
Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Generally offered every two years.

Course covers enumerative combinatorics: permutation enumeration, Stirling and Bell numbers, generating functions, exponential formula, Lagrange inversion, recurrences, basic asymptotic methods, rational generating functions. Also covers basic graph theory: trees and Cayley's theorem, chromatic polynomial, eigenvalues and their application. Also considers matching theory, equivalence, marriage theorem, flow problems, totally unimodular matrices. Also considers Polya theory: action of a group on a set, Burnside lemma, DeBrujin's method, applications to graphical enumeration and algorithms.

MATH 442 Introduction to Combinatorics (II)
Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Generally offered every two years. Not offered 2001-2002.

Course topics include: Sieves and Mobius Inversion: inclusion/exclusion and its application to enumeration and number theory; partially ordered sets, abstract Mobius inversion, rudiments of lattice theory; matroids and combinatorial geometry: rank function, circuits, bases, application to graph theory and geometry; combinatorial design: Fisher's inequality, Latin squares, Hadamard matrices, Wilson's theorem on t-designs, application to statistical design; nonconstructive methods: Ramsey's theorem, Lovasz's local lemma, random graphs, application to coding theory; and extremal set theory: Sperner's lemma, Kruskal-Katona and Erdos-Ko-Rado theorems.

MATH 451 Euclidean and Spherical Geometry (II)
Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor.

This is an introduction to hyperbolic, spherical, and projective geometry—the classical geometries developed as Euclidean geometry was better understood. For example, the historical problem of the independence of Euclid's fifth postulate is understood when the existence of the hyperbolic plane is realized. Straightedge (and compass) constructions and stereographic projection in Euclidean geometry can be understood within the structure of projective geometry. Topics in hyperbolic geometry include: models of the hyperbolic plane and relations to spherical geometry. Topics in projective geometry include: homogeneous coordinates and the classical theorems about conics and configurations of points and lines. Optional topics include: principles of perspective drawing, finite projective planes, orthogonal Latin squares, and the cross ratio.

MATH 452 Classical Geometries (II)
Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor.

Course covers: propositional and predicate logic; classical proof procedures; completeness and compactness; decidability and undecidability; the Godel incompleteness theorem; and elements of set theory.

MATH 453 Introduction to Topology (II)
Spring. 4 credits. Prerequisite: MATH 411 or 413, or permission of instructor.

Course covers basic point set topology, connectedness, compactness, metric spaces, fundamental group. Application of these concepts to surfaces such as the torus, the Klein bottle, and the Mobius band.

MATH 454 Introduction to Differential Geometry (II)
Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 293–294, plus at least one mathematics course numbered 300 or above. MATH 453 is not a prerequisite. Course covers differential geometry of curves and surfaces. Also covers curvature, geodesics, and differential forms. Serves as an introduction to n-dimensional Riemannian manifolds. This material provides some background for the study of general relativity; connections with the latter are indicated.

MATH 455 Applicable Geometry (II)
Fall. 4 credits. Prerequisite: A good introduction to linear algebra (such as in MATH 221, 223, 231, or 294) or permission of the instructor. It is not assumed that students know what any of the words in the following description mean. Generally offered every two years.

An introduction to the theory of n-dimensional convex polytopes and polyhedra and some of its applications, with an in-depth treatment of the case of 3-dimensions. We discuss both combinatorial properties (such as face counts) as well as metric properties (such as rigidity). Covers theorems of Euler, Cauchy, and Steinitz, Voronoi diagrams and triangulations, convex hulls, cyclic polytopes, shellability and the upper-bound theorem. We relate these ideas to applications in tiling, linear inequalities and linear programming, structural rigidity, computational geometry, hyperplane arrangements and zonotopes.

MATH 471 Basic Probability (II)
Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. May be used as a terminal course in probability.

Topics include: combinations, important probability laws, expectations, moments, moment-generating functions, limit theorems. Emphasis is on diverse applications and on development of use in statistical applications. See also the description of MATH 671.

MATH 472 Statistics (II)
Spring. 4 credits. Prerequisites: MATH 471 and knowledge of linear algebra such as taught in MATH 221. Some knowledge of multivariable calculus helpful but not necessary.

Classical and recently developed statistical procedures are discussed in a framework that emphasizes the basic principles of statistical inference and the rationale underlying the choice of these procedures in various settings. These settings include problems of estimation, hypothesis testing, and large sample theory.

MATH 481 Mathematical Logic (also PHIL 431)

Course covers: propositional and predicate logic; classical proof procedures; completeness and compactness; decidability and undecidability; the Godel incompleteness theorem; and elements of set theory.

MATH 482 Topics in Logic (also PHIL 432)
Spring. 4 credits. Prerequisite: 1 logic course from the Mathematics Department at the 200 level or higher, 1 logic course from the Philosophy Department at the 300 level or higher, and permission of the instructor. Not offered 2001-2002. For description, see PHIL 432.

MATH 483 Intensional Logic (also PHIL 436)
Spring. 4 credits. Prerequisite: 1 logic course at the 200 level or higher from the Philosophy Department or the Mathematics Department, or permission of the instructor. For description, see PHIL 436.

MATH 486 Applied Logic (also COM S 486)
Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 293–294; COM S 280 or equivalent (such as MATH 352, 336, 432, 434, 436, or 481); and some additional course in mathematics or theoretical computer science.

Course covers: propositional and predicate logic; compactness and completeness by tableaux, natural deduction, and resolution. Other possible topics: equational logic; Herbrand Universes and unification; rewrite rules and equational logic; Knuth-Bendix method and the congruence-closure algorithm and lambda-calculus reduction strategies; topics in Prolog, Lisp, ML, or Nuprl; and applications to expert systems and program verification.
MATH 490 Supervised Reading and Research
Fall, spring. 1-6 credits. Supervised reading and research by arrangement with individual professors. Not for credit currently available in regularly scheduled courses.

Professional Level and Mathematics Education Courses

MATH 500 College Teaching
Fall, weeks 1-6. 1 credit. Among the topics covered: basic topics about teaching, such as how to plan recitations, how to prepare lesson plans for lectures, exam design and grading, syllabus planning. Also discussed: the structure of colleges and universities, jobs and tenure, professionalism, alternative teaching strategies.

MATH 503 History of Modern Mathematics

MATH 505 Educational Issues in Undergraduate Mathematics
Spring. 4 credits. Prerequisite: graduate standing or permission of the instructor. Generally offered every two years. This course examines various educational issues in undergraduate mathematics and the relationship of these issues to the mathematics itself. The precise choice of topics varies, but the intent is that a balance of different views be presented and discussed. There are extensive readings in the course and occasional guest lectures. Possible topics include: nature of proof and how and when to teach it, calculus "reform," teaching mathematics to school teachers, using writing, using history, alternative assessments, alternatives to lecturing, equity issues, effective uses of technology, what is mathematical understanding and how do we recognize it, what should every mathematics major know, and research in undergraduate mathematics.

MATH 507 Teaching Secondary Mathematics: Theory and Practices
Spring. 4 credits. Prerequisite: graduate standing or permission of the instructor. Generally offered every two years. This course provides direct experience of new approaches, curricula and standards in mathematics education. Discussion of articles, activities for the secondary classroom and videotape of classroom teaching is tied to in-class exploration of math problems. Experience in the computer lab, examining software environments and their use in the mathematics classroom is included. Participants are expected to write short papers, share ideas in class and present their opinions on issues.

MATH 508 Mathematics for Secondary School Teachers
Fall, spring. 1-6 credits. Prerequisite: secondary school mathematics teacher, or permission of instructor. May not be taught every semester. An examination of the principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics and current mathematics research.

Graduate Courses

Many of our graduate courses are topics courses for which descriptions are not included here; however, during each pre-enrollment period a schedule of graduate courses to be offered the following semester is posted at www.math cornell.edu/Courses. This schedule includes course descriptions that are often more detailed than those included here, as well as a means for interested students to participate in the process of selecting meeting times.

MATH 611-612 Real and Complex Analysis
611, fall; 612, spring. 4 credits each. 611 covers: measure and integration and functional analysis. 612 covers: complex analysis, Fournier analysis, and distribution theory.

MATH 613-614 Topics in Analysis
613, fall; 614, spring. 4 credits each. Not offered 2001-2002.

MATH 615-616 Mathematical Methods in Physics
615, fall; 616, spring. 4 credits each. Intended for graduate students in physics or related fields who have had a strong advanced calculus course and at least 2 years of general physics. A knowledge of the elements of finite dimensional vector space theory, complex variables, separation of variables in partial differential equations, and Fourier series is assumed. Undergraduates are admitted only with permission of instructor. MATH 615 is a prerequisite for 616. MATH 616 is not offered 2001-2002.

Topics are designed to give a working knowledge of the principal mathematical methods used in advanced physics. 615 covers: Hilbert space, generalized functions, contour transform, Sturm-Liouville problem in ODE, Green's functions, and asymptotic expansions. 616 covers: Linear operators. Also covers: differential operators and integral operators, the eigenvalues and eigenvalue problems connected with them and some special functions arising from them; elements of group theory; and the rotation group and its representations.

MATH 617 Dynamical Systems
Fall. 4 credits. Generally offered every two years. Topics include: existence and uniqueness theorems for ODEs; Picard-Bendixon theorem and global properties of two dimensional flows; limit sets, nonwandering sets, chain recurrence, pseudo-orbits and structural stability; linearization at equilibrium points: stable, unstable, and saddle invariant manifolds; the Hartman-Grobman theorem; and generic properties: transversality theorem and the Kupka-Smale theorem. Examples include: expanding maps and Anosov diffeomorphisms; hyperbolicity: the horseshoe and the Birkhoff-Smale theorem on transversal homoclinic orbits; rotation numbers; Herman's theorem; and characterization of structurally stable systems.

MATH 618 Smooth Ergodic Theory
Spring. 4 credits. Generally offered every two years. Not offered 2001-2002. Topics include: invariant measures; entropy, Hausdorff dimension and related concepts; hyperbolic invariant sets: stable manifolds, Markov partitions and symbolic dynamics; equilibrium measures of hyperbolic attractors; ergodic theorems; Pesin theory; stable manifolds of nonhyperbolic systems; Liapunov exponents; and relations between entropy, exponents, and dimensions.

MATH 619-620 Partial Differential Equations
619, fall; 620, spring. 4 credits each. Generally offered every two years. Course covers basic theory of partial differential equations.

MATH 621 Measure Theory and Lebesgue Integration
Fall. 4 credits. Course covers measure theory, integration, and lp spaces.

MATH 622 Applied Functional Analysis
Spring. 4 credits. Not offered every year. Course covers basic theory of Hilbert and Banach spaces and operations on them. Applications.

MATH 628 Complex Dynamical Systems
Fall. 4 credits. Prerequisite: MATH 418. Not offered every year. Next offered 2002-2003. Various topics in the dynamics of analytic mappings in one complex variable, such as: Julia and Fatou sets, the Mandelbrot set, Marie-Sad-Sullivan's theorem on structural stability. Also covers: local theory, including repulsive cycles and the Yoccoz inequality, parabolic points and Erciller-Voronin invariants, Siegel disks and Yoccoz's proof of the Siegel Brjuno theorem; quasi-conformal mappings and surgery: Sullivan's theorem on non-wandering domains, polynomial-like mappings and renormalization, Shishikura's construction of Hermann rings; puzzles, tableaux and local connectivity problems; and Thurston's topological characterization of rational functions, the spider algorithm, and mating of polynomials.

MATH 631-632-634 Algebra
631, fall; 632, spring; 634, spring. 4 credits each. 632 and 634 offered in alternate years. 632 not offered 2001-2002. 631 covers: finite groups, field extensions, Galois theory, rings and algebras, and tensor and exterior algebra. 632 covers: Wedderburn structure theorem, Brauer group, and group cohomology. 634 covers: Dedekind domains, primary decomposition, Hilbert basis theorem, and local rings.

MATH 649 Lie Algebras
Fall. 4 credits. Generally offered every two years. Not offered 2001-2002. Topics include: nilpotent, solvable and reductive Lie algebras; enveloping algebras; root systems; Coxeter groups; and classification of simple algebras.

MATH 650 Lie Groups
Spring. 4 credits. Generally offered every two years. Course topics include: topological groups; Lie groups; relation between Lie groups and Lie algebras; exponential map, homogeneous manifolds; and invariant differential operators.

MATH 651 Introductory Algebraic Topology
Spring. 4 credits. Course covers fundamental group and covering spaces, and homology theories for complexes and spaces.
This is an introduction to differential geometry and differential topology at the level of a beginning graduate student. Topics include: smooth manifolds, embeddings, tangent bundles, tensors, vector bundles, vector fields, and Frobenius' theorem. Further topics chosen by the instructor from other major areas such as fibre bundles, Lie groups, connections, curvature, geodesics, Riemannian manifolds, differential forms, and de Rham cohomology.

**MATH 652 Differentiable Manifolds I**
Fall. 4 credits. Prerequisites: advanced calculus, linear algebra (MATH 431), point-set topology (MATH 453). This is an introduction to differential geometry and differential topology at the level of a beginning graduate student. Topics include: smooth manifolds, embeddings, tangent bundles, tensors, vector bundles, vector fields, and Frobenius' theorem. Further topics chosen by the instructor from other major areas such as fibre bundles, Lie groups, connections, curvature, geodesics, Riemannian manifolds, differential forms, and de Rham cohomology.

**MATH 653 Differentiable Manifolds II**
Spring. Prerequisites: MATH 652 or equivalent. Generally offered every 3-4 years. Not offered 2001-2002. Advanced vector bundle geometry and differential topology selected by instructor. Examples of eligible topics include: transversality, cobordism, Morse theory, classification of vector bundles and principal bundles, characteristic classes, microlocal analysis, convexity, geometry, geometric analysis and partial differential equations, and Atiyah-Singer index theorem.

**MATH 661 Geometric Topology**
Fall. 4 credits. An introduction to some of the more geometric aspects of topology and its connections with group theory. Possible topics include: surface theory (3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, and hyperbolic manifolds.

**MATH 662 Riemannian Geometry**
Spring. 4 credits. Generally offered every two years. Course topics include: linear connections, Riemannian metrics and parallel translation; covariant differentiation and curvature tensors; the exponential map, the Gauss Lemma and completeness of the metric; isometries and space forms, Jacobi fields and the theorem of Cartan-Hadamard; the first and second variation formulas, the index form of Morse and the theorem of Bonnet-Myers; the Rauch, Hessian, and Laplacian comparison theorems; the Morse index theorem; the conjugate and cut loci; and submanifolds and the Second Fundamental form.

**MATH 671-672 Probability Theory**
671, fall; 672, spring. 4 credits each. Prerequisites: a knowledge of Lebesgue integration theory, at least on the real line. Students can learn this material by taking parts of MATH 413-414 or 621. Prerequisite for MATH 672: MATH 671. Course topics include: properties and examples of probability spaces; sample space, random variables, and distribution functions; expectation and moments; independence; Borel-Cantelli lemma; zero-one law; convergence of random variables, probability measures, and characteristic functions; law of large numbers; selected limit theorems for sums of independent random variables; Markov chains, recurrent events; ergodic and renewal theorems, Martingale theory; and Brownian motion and processes with independent increments.

**MATH 674 Introduction to Mathematical Statistics**
Spring. 4 credits. Prerequisites: MATH 671 and ORIE 670 or permission of instructor.

Topics include: an introduction to the theory of point estimation, hypothesis testing and confidence intervals, consistency, efficiency, sufficiency, and the method of maximum likelihood. Basic concepts of decision theory are discussed, and methods of hypothesis testing and confidence intervals are introduced and developed in detail. The course is coordinated with ORIE 670 to form the second part of a one-year course in mathematical statistics.

**MATH 681 Logic**
Spring. 4 credits. Course covers basic topics in mathematical logic, including propositional and predicate calculus, formal number theory and recursive functions, completeness and incompleteness theorems. Other topics as time permits.

**MATH 711-712 Seminar in Analysis**
711, fall; 712, spring. 4 credits each. 712 not offered 2001-2002.

**MATH 713 Functional Analysis**

**MATH 715 Fourier Analysis**
Fall. 4 credits. Generally offered every two years. Course topics include: review of planar (single-degree-of-freedom) systems; local and global analysis; structural stability and bifurcations in planar systems; center manifolds and normal forms; the averaging theorem and perturbation methods, Melnikov's method; discrete dynamical systems, maps and difference equations, and applications to problems in solid and fluid mechanics.

**MATH 722 Topics in Complex Analysis**
Spring. 4 credits. Not offered every year. Selections of advanced topics from complex analysis, including Riemann surfaces, complex dynamics, and conformal and quasiconformal mapping. Course content varies.

**MATH 728 Seminar in Partial Differential Equations**
Fall. 4 credits. Generally offered every two years. Not offered 2001-2002.

**MATH 735 Topics in Algebra**
Fall. 4 credits. Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

**MATH 737 Algebraic Number Theory**
Fall. 4 credits.

**MATH 740 Homological Algebra**
Spring. 4 credits.

**MATH 751-752 Seminar in Topology**
751, fall; 752, spring. 4 credits each.

**MATH 753 Algebraic Topology**
Fall. 4 credits. The continuation of 651. The standard topics covered in this course must therefore be considered. The Morse index theorem; the conjugate and cut loci; and submanifolds and the Second Fundamental form.

**MATH 757-758 Topics in Topology**
757, fall; 758, spring. 4 credits each. Selection of advanced topics from modern algebraic, differential, and geometric topology. Course content varies.

**MATH 761-762 Seminar in Geometry**
761, fall; 762, spring. 4 credits each. Either 761 or 762 generally offered every year.

**MATH 767 Algebraic Geometry**
Spring. 4 credits.

**MATH 771-772 Seminar in Probability and Statistics**
771, fall; 772, spring. 4 credits each.

**MATH 774 Asymptotic Statistics**
Fall. 4 credits. Prerequisites: probability theory (MATH 671-672 or equivalent, containing stochastic processes) and statistics (MATH 472 or MATH 674). Not offered 2001-2002.

Introduction to asymptotic statistical decision theory and to empirical stochastic processes. Course covers: the notion of experimental reduction by sufficiency, equivalence classes, the Le Cam delta distance, local asymptotic normality and minimaxity, optimal rates of convergence, white noise models, the Pinsker bound, and Gaussian approximation of nonparametric experiments. Includes topics in empirical processes involving coupling techniques, some probability metrics, entropy conditions, functional limit theorems, and Hungarian constructions.

**MATH 781-782 Seminar in Logic**
781, fall; 782, spring. 4 credits each.

**MATH 783 Model Theory**
Spring. 4 credits. Generally offered every two years. An introduction to model theory at the level of the books by Hodges or Chang and Keisler.

**MATH 784 Recursion Theory**
Fall. 4 credits. Course covers: theory of effectively computable functions; classification of recursively enumerable sets; degrees of recursive unsolvability; applications to logic; hierarchies; recursive functions of ordinals and higher type objects; generalized recursion theory.
MATH 787  Set Theory
A first course in axiomatic set theory at the level of the book by Kunen.

MATH 788  Topics in Applied Logic
Fall. 4 credits.
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automatic theorem proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), nonstandard analysis. Students are expected to be familiar with the standard results in graduate level mathematical logic.

MATH 790  Supervised Reading and Research
Fall, spring. 1–6 credits.

MATH 901–902  Oliver Club Seminar
MATH 903–904  O livetti Club Seminar
MATH 905–906  Occasional Seminar on Undergraduate Education
MATH 907–908  Educational Issues in Undergraduate Mathematics
MATH 911–912  Seminar in Analysis
MATH 913–914  Seminar in Dynamics and Geometry
MATH 949–950  Seminar in Lie Groups
MATH 951–952  Topics in Topology and Geometry
MATH 967–968  Seminar in Combinatorial and Algebraic Geometry

MUSIC

MEDIEVAL STUDIES
See "Special Programs and Interdisciplinary Studies."

MUSIC
M. Scattenday, chair, S. Tucker, director of undergraduate studies (235 Lincoln Hall, 255–3424); D. Rosen, director of graduate studies (126 Lincoln Hall, 255–4974); M. Bilson, X. Bjerk, D. Borden, D. Conn, L. Coral, R. Harris-Warrick, M. Hatch, H. Hoffman, J. Hsu, J. Kellock, P. Merrill, J. Peraino, S. Pond, A. Richards, R. Riley, B. Robson, R. Sierra, S. Stucky, K. Tan, J. Webster, D. Yearles, N. Zaslav
Department office: 255–4097
Department web site: www.arts.cornell.edu/music/

MUSICAL PERFORMANCE AND CONCERTS
Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

Vocal ensembles
Cornell Chamber Singers
Cornell Chorale
Cornell University Chorus
Cornell University Glee Club
Sage Chapel Choir

Instrumental ensembles
Chamber Music Ensembles
Cornell Chamber Orchestra
Cornell Experimental Lab Ensemble
Cornell Gamelan
Cornell Jazz Ensembles
Cornell Symphony Orchestra
Cornell University Chamber Winds
Cornell University Symphonic Band
Cornell University Wind Ensemble
Cornell University Wind Symphony

Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall term and, where appropriate, each spring term as well.

The university is also home to many student-run musical organizations, including the Big Red Marching Band and Big Red Pep Band, the Cornell Savoyards, and several a cappella groups. Information about these groups, too, is available through the Department of Music office, 101 Lincoln Hall (255–4097).

The Department of Music and the Faculty Committee on Music sponsor more than 100 formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artists. The great majority of concerts are free and open to the public. Lectures and concerts are listed on the web (www.arts.cornell.edu/music/).

Additional information is available through the events office (255–4760).

NONMAJORS
In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information consult the department office, 101 Lincoln Hall (255–4097), or the director of undergraduate studies (255–3424).

THE MAJOR
The major carries the study of music to an advanced level through the integration of performance, music theory, and music history. It is designed to accommodate both students who are oriented toward eventual graduate or professional work in music and those who wish to take a more general approach, often in conjunction with a major in another department.

Students contemplating a major in music should arrange for placement examinations and advising in the department as early as possible, usually during the freshman orientation period. Information is available from the director of undergraduate studies. Prerequisites for admission to the major are completion of MUSIC 152 and 154, at the latest by the end of the sophomore year (the freshman year is preferred), with an overall grade of B- or better in each course. In consultation with the director of undergraduate studies, students are expected to have chosen an adviser from among the department faculty before acceptance into the major; admission to the major is decided by the faculty as a whole. Students majoring in music then design their course of study with their adviser.

Music majors must complete the Core Curriculum plus at least two electives. The Core Curriculum serves as the basis for focus in specific areas, such as composition, performance, jazz studies, vernacular music, Western art music, and Asian music. Students may, however, choose electives that reflect a more broadly-based study. Those intending to pursue graduate study or professional work in music are advised to take further courses in addition to the two required electives.

The Core Curriculum is comprised of:
1) in music theory: MUSIC 251, 252, 253, 254
2) in music history: MUSIC 207, 208, 300, 400
3) in performance: four semesters of participation in a musical organization or ensemble sponsored by the department of music (MUSIC 331 through 436 and 421 through 448)

Electives: at least two from the following:
1) in music theory: MUSIC 451–457
2) in music history: All courses above and including MUSIC 374
3) in performance: MUSIC 321, 322, 323, 324

HONORS. The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty early in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. In their senior year, candidates enroll in MUSIC 401–402 with the chair of the honors committee as instructor. Candidates are encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, culminating in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. The comprehensive examination administered by the candidate's committee is held not later than May 1. The level of honors conferred is based primarily on the candidate's performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

DISTRIBUTION REQUIREMENT
College of Arts and Sciences students may apply either one or two Music Department courses toward the distribution requirement in Group 4 (humanities and the arts). Neither freshman seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least three credits, and it may not be in musical performance (MUSIC 331 through 436 and 421 through 448) or in organizations and ensembles (MUSIC 331 through 436 and 421 through 448).

If two music courses are counted for distribution, they must total at least six credits, and at least one of the courses must be academic, not performance-oriented. The second "course," however, may comprise either up to four credits earned in perfor-
mance (MUSIC 321–322, 323–324) or up to four credits earned in organizations and ensembles (MUSIC 331 through 436 and 431 through 448), but not both.

Facilities

Music Library. The Sidney Cox Library of Music and Dance in Lincoln Hall has an excellent collection of standard research tools. Its holdings consist of approximately 127,000 books, periodicals, and scores and 50,000 sound and video recordings. Particularly noteworthy are the collections of opera from all periods; twentieth-century scores and recordings; a large microfilm collection of Renaissance sources, both theoretical and musical; and a collection of eighteenth-century chamber music. In addition, the Department of Rare Books, in the Kroch Library, houses a collection of early printed books on music and musical manuscripts.

Concert Halls. The Department of Music sponsors more than 100 concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 2,000), Alice Statler Auditorium (about 600), Sage Chapel (about 800) and Barnes Hall Auditorium (about 280).

Rehearsal Spaces. The orchestras and bands rehearse in Lincoln Hall, Bailey Hall, Barnes Hall, and Barton Hall; the Jazz Ensembles, Gamelan, and Chamber Ensembles rehearse in Lincoln Hall; and the choral ensembles are primarily quartered in Sage Chapel. Practice studios in Lincoln Hall are available for individual practice by pianists, vocalists, and instrumentalists.

Thirty-five grand pianos and 22 upright or studio pianos are housed in Cornell's offices, classrooms, and rehearsal spaces. In addition, our Center for Keyboard Studies includes two concert grand pianos (Steinway and Mason & Hamlin), two eighteenth-century fortepiano replicas (copies of Johann Andreas Stein and Anton Walter), an original Broadwood grand piano from 1827, an 1824 Conrad Graf fortepiano replica, one Dowd and one Hubbard harpsichord, and a Chalini clavichord.

Two chapels on campus house three distinctive organs that are available to qualified individuals for lessons and practice. These instruments include: a small Italian organ (1746); a two-manual mechanical action instrument (1972); and a three-manual symphonic organ (1941).

Digital/Electronic Equipment. A Macintosh Master studio is available for graduate student use (hours TBA) and occasional independent study use. The software used is Digital Performer, Finale, Peak, and eMusic editor/librarian. The instruments include a Yamaha KX88 MIDI Controller keyboard, a Yamaha TX802 FM synthesizer, an E-Mu Proteus XR, a Casio FZ 10M sampler and various other synthesizers. In addition, there are four MIDI workstations with additional instruments, including a Korg M1 synthesizer and an Akai S900 sampler.

Introductory Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

MUSIC 100 Elements of Musical Notation
Fall or spring, weeks 2-5, 1 credit.
Prerequisite: concurrent enrollment in any 3-credit course in music and permission of instructor.
This four-week course, given at the beginning of each term, fulfills the requirement of basic pitch and rhythm and reading skills needed for some introductory courses and 200-level courses with prerequisites. The material covered in this course is no longer part of MUSIC 105.

MUSIC 101 Popular Music in America: A Historical Survey (also AM ST 105) # (IV)
Spring. 3 credits. 1-hour disc TBA. S. Pond. A survey of the history and diverse streams of popular music in America. Elementary vocabulary and techniques for describing, analyzing, and evaluating music. Covers the relationships between mainstream musics, tributaries, and side-streems, and between folk art, and popular music.

MUSIC 103 Intro to World Music I: Asia and the Americas (also LSP 100) @ (IV)
Spring. 3 credits. 1-hour disc TBA. No previous training in music required. S. Pond.
Exploration of folk, popular, and traditional musical genres from Asia, South, Southeast, and East Asia. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

MUSIC 104 Intro to World Music II: Asia # (IV)
Fall. 3 credits. 1-hour disc to be arranged. No previous training in music required. M. Hatch.
Exploration of folk, popular, and traditional musical genres from South, Southeast, and East Asia. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

MUSIC 105 Introduction to Music Theory (IV)
Fall, spring, or summer. 3 credits. Plus 2 hours TBA. Experience in reading music is recommended. D. Conn.
An elementary, self-contained introduction to music theory emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads; basic concepts of tonality; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Haydn, and Beethoven.

MUSIC 107 Hildegard to Handel # (IV)
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Not offered 2001–2002. N. Zaslaw.
The music of Western Europe from the Middle Ages through the Baroque period. Starting from Gregorian chant and the monophonic works of Hildegard von Bingen, this course surveys composers and repertoires such as the troubadours, the Notre Dame School, Renaissance sacred polyphony, madrigals, the dance suite, concertos, cantatas, and ends in the early eighteenth century with works by Vivaldi, Bach, and Handel.

MUSIC 108 Mozart to Minimalism (IV)
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. N. Zaslaw.
A survey of Western art music in many genres from the second half of the eighteenth century to the present. Composers whose music is studied include Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Berlioz, Chopin, Wagner, Verdi, Liszt, Brahms, Mahler, Debussy, Strauss, Stravinsky, Bartók, Ives, Webern, Messiaen, Copland, Bernstein, Carter, Stucky, and Sierra.

Music Theory

Students contemplating the music major are strongly advised to take MUSIC 151, 152, 153, and 154 in the freshman year. MUSIC 152 and 154 must be completed no later than the end of the sophomore year.

MUSIC 151 Tonal Theory I (IV)
Fall. 3 credits. Prerequisites: admission by departmental placement exam and concurrent enrollment in or previous credit for MUSIC 153, or equivalent. Intended for students expecting to major in music and other qualified students. B. Robison.
Detailed study of the fundamental elements of tonal music: rhythm, scales, intervals, triads; melodic principles and 2-part counterpoint; diatonic harmony and 4-part voice leading in root position and inversion; and analysis of phrase and period structure.

MUSIC 152 Tonal Theory II (IV)
Spring. 3 credits. Prerequisites: MUSIC 151 and 153 or equivalent, and concurrent enrollment in or previous credit for MUSIC 154. Intended for students expecting to major in music and other qualified students. A grade of B or better in MUSIC 152 is required for admission to the music major. B. Robison.
Continued study of voice leading and harmonic progression, including diatonic modulation; analysis of binary and ternary form.

MUSIC 153 Musicianship I
Fall. 2 credits. Prerequisites: concurrent enrollment in or previous credit for MUSIC 151. Intended for students expecting to major in music and other qualified students. 3 hrs. TBA. B. Robison.

MUSIC 154 Musicianship II
Spring. 2 credits. Prerequisites: concurrent enrollment in or previous credit for MUSIC 152. Intended for students expecting to major in music and other qualified students. A grade of B or better in MUSIC 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. 3 hrs. TBA. B. Robison.
[MUSIC 239 Introduction to Improvisational Theory]
Spring. 2 credits. Prerequisite: permission of instructor. Intended for performers in "jazz" and related styles. Not offered 2001–2002. Staff. Covers tonal, modal, and blues harmonic resources, and the formal structures in which they are embodied. Development of improvisational skills and creation of spontaneous compositions.

[MUSIC 251 Tonal Theory III (IV)]
Fall. 3 credits. Prerequisites: MUSIC 152 and 154 or equivalent, and concurrent enrollment in MUSIC 253. J. Webster. Continuation of diatonic and introduction to chromatic harmony; species counterpoint; composition in small forms.

[MUSIC 252 Tonal Theory IV (IV)]
Spring. 3 credits. Prerequisites: MUSIC 251 and 253 or equivalent, and concurrent enrollment in MUSIC 254. K. Tan. Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

[MUSIC 253 Musicianship III]
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 251. 2 hours TBA. J. Webster. Sight singing: melodies with chromaticism in treble, alto, tenor, and bass clefs. Keyboard: diatonic modulation, chromatic chords. Dictation: melodies with modulation, chorale phrases with secondary dominants and other chromatic chords. Score reading: 4 parts using treble, alto, tenor, and bass clefs. Musical terms: orchestral ranges, terms, clefs, and transpositions.

[MUSIC 254 Musicianship IV]
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 252. 2 hours TBA. K. Tan. Sight singing: melodies in 4 clefs, including modality and chromatic modulation. Keyboard: chromatic sequences, chromatic modulations, improvised modulations employing diatonic and chromatic chords. Dictation: intervals, rhythms, short melodies, and short, diatonic chorale phrases. Score reading: 4 parts, including transposing instruments. Musical terms: other terms in French, German, and Italian.

[MUSIC 255 Materials of Twentieth-Century Music (IV)]
Fall. 3 credits. Prerequisite: MUSIC 252 and 254 or equivalent, and concurrent enrollment in MUSIC 353. S. Stucky. Introduction to some techniques of twentieth-century music including extended tonality, modes, twelve-tone technique, set theory, and new approaches to form and rhythm. Analysis of representative works by Debussy, Bartók, Webern, Hindemith, Schoenberg, Stravinsky, and others.

[MUSIC 256 Composition and Analysis]
Fall. 3 credits. Prerequisite: MUSIC 253 and 255. R. Sierra. Composition in a variety of styles including sonata form, large-scale paragraph construction, structural-tonal voice-leading, and relationships among the movements in a multimovement work.

[MUSIC 257 Composition]
Spring. 3 credits. Prerequisite: MUSIC 256. R. Sierra. Composition in the polyphonic vocal style of the late Renaissance.

[MUSIC 451 Counterpoint]
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. S. Stucky. Composition in the polyphonic vocal style of the late Renaissance.

[MUSIC 452 Topics in Music Analysis]
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. J. Webster. A survey of important analytical approaches to tonal music, including thematic-motivic relations, phony-dyadic large-scale paragraph construction, structural-tonal voice-leading, and relationships among the movements in a multimovement work.

[MUSIC 453 Introduction to Improvisational Theory]
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. Staff. Study and performance of tonal, modal, and blues harmonic resources; introduction to the formal structures in which these resources are embodied. Includes ear training, work at the keyboard, composing short pieces, and analyzing selected representational works of popular music and African-American art music from 1940 to 1970.

[MUSIC 454 Composition (IV)]
Fall. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. R. Sierra. Study of music composition through the use of traditional forms such as variation and rondo. The student is required to write original pieces for solo and chamber ensembles.

[MUSIC 455 Conducting (IV)]
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. S. Tucker. Covers fundamentals of score reading, score analysis, rehearsal procedures and conducting technique; instrumental and choral contexts.

[MUSIC 456 Orchestration]
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. R. Sierra. Orchestration based on nineteenth- and twentieth-century models.

[MUSIC 458 Conducting]
Fall. 3 credits. Prerequisite: MUSIC 457 or permission of instructor. R. Sierra. Orchestration based on nineteenth- and twentieth-century models.

[MUSIC 521 Improvisation]
Fall. 3 credits. Prerequisite: MUSIC 251 or permission of instructor. K. Tan. Improvisation in various styles with emphasis on the relationships between music and the environment.

[MUSIC 522 History of Rock Music (also AM ST 223) (IV)]
Spring. 3 credits. No previous training in music required. Not offered 2001–2002. J. Peraino. This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to present-day genres of alternative rock and hip hop.

[MUSIC 522 A Survey of Jazz (also AM ST 222) (IV)]
Fall. 3 credits. Enrollment limited. S. Pond. This course addresses jazz from two perspectives: the various aspects of jazz as well as the historical development of jazz as musical and cultural with which it has contributed to society. The historical focus locates jazz as an expression of culture. We investigate how jazz has evolved and is affected by concepts of ethnicity, class, nationalism, gender, art, and genre. We examine what has changed over time and try to understand why. Throughout we focus on the inquiry through listening to recordings, studying written accounts about music and musicians, and learning to listen with new ears, experiencing jazz hands-on, and collaborating to add to the body of literature on jazz.

[MUSIC 261 Bach and Handel # (IV)]
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. J. Webster. Bach's music, product of a provincial life, and Handel's music, product of a cosmopolitan life, are compared. Genres studied include works for keyboard instruments, chamber music, concertos, cantatas, operas, oratorios, anthems, and oratorios.

[MUSIC 262 Haydn and Mozart # (IV)]
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. J. Webster. Mozart, a genius of the Enlightenment, and Haydn, the father of the symphony, are among the greatest composers of all time. Their lives and works are compared.

[MUSIC 263 Beethoven # (IV)]
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. J. Webster. A survey of Beethoven's life, music, and influence. While the primary focus is his musical style and development, the course also covers social-cultural factors and the psychology and reception of genius.

[MUSIC 264 Musical Romantics # (IV)]
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. J. Webster. A survey of the Romantic era's life, music, and influence. While the primary focus is his musical style and development, the course also covers social-cultural factors and the psychology and reception of genius.

[MUSIC 265 Opera # (IV)]
Fall. 3 credits. D. Rosen. An introduction to major works of the operatic repertoire, with discussion of texts and theatrical performances as well as music. Video recordings are an integral part of the course; trips to live performances are scheduled where possible.

[MUSIC 266 Choral Sounds # (IV)]
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Not offered 2001–2002. R. Harris-Warrick. This course examines representative works composed for group singing, primarily from the Western choral tradition, but also including folk and popular styles, from the...
Middle Ages to the twentieth century. Class includes discussion of performance practices as well as historical and stylistic issues, and is integrated with local concert offerings.)

**MUSIC 276 The Orchestra and Its Music** # (IV)
Spring. 3 credits. Prerequisite: any 3-credit music course or permission of instructor. N. Zaslav.
The music of, and the social structures supporting, large instrumental ensembles in the Western world, including: Italian court festivals of the sixteenth century, string bands of the seventeenth century, Lully's ascendency at Paris and Versailles, and music of Purcell, Corelli, Vivaldi, Bach, Handel, Haydn, Mozart, Beethoven, Schubert, Schumann, Mendelssohn, Berlioz, Liszt, Wagner, Brahms, Tchaikovsky, Bruckner, Mahler, Strauss, Stravinsky, Schoenberg, Webern, Bartók, Shostakovich, Messiaen, Copland, Carter, Tower, Stucky, Sierra, and others.

**MUSIC 277 The Piano and Its Music** # (IV)
Fall or spring. 3 credits. Prerequisite: 1 semester of music theory (MUSIC 105, an equivalent course, or equivalent experience) or permission of the instructors. Not offered 2001–2002. D. Rosen and M. Bilson.
Representative masterpieces of the piano repertoire from J. S. Bach to the present, placed in the context of the instruments for which they were written and the social structures mediating their production. Thus three different historical approaches are interwoven: (1) the history of music written for the piano and its predecessors, the harpsichord and clavichord; (2) the development of the piano from these predecessors, through Mozart's Stein piano, the pianos of Beethoven, Chopin, Liszt, and Brahms, up to today's Steinway; and (3) the social history of the piano.

**MUSIC 372 Mind and Memory (also ENGL 301, SHUM 301, and THETR 301)** # (IV)
Spring. 4 credits. J. Morgenroth.
See THETR 301 for description.

### Music History Courses for Majors and Qualified Non-Majors

**MUSIC 207 Survey of Western Music I** # (IV)
Fall. 3 credits. Prerequisite: MUSIC 151/153, concurrent enrollment in 151/153, or permission of instructor J. Peraino.
A survey of Western music and its social contexts from the beginning of notation (circa 900) to 1700. Topics include sacred chant, polyphony, monophony, early opera, and the development of independent instrumental music. The course emphasizes listening and comprehension of genres and styles, and is intended for music majors and qualified non-majors.

**MUSIC 208 Survey of Western Music II** # (IV)
Spring. 3 credits. Prerequisite: MUSIC 152/154, concurrent enrollment in 152/154, or permission of instructor N. Zaslav.
A survey of Western music and its social contexts from 1700 to the present. Topics include the decline of church music, the rise of public concerts and opera, the evolution of domestic music-making, and the influence of electronic media upon acoustical traditions. The course, which emphasizes listening and comprehension of genres and styles, is intended for music majors and qualified non-majors.

**MUSIC 300 Proseminar in Musicology** # (IV)
Spring. 4 credits. Offered 2001–2002. Staff. Introduction to methods in musicology, including historiography, criticism, approaches to vernacular and non-Western musics, and gender studies.

**MUSIC 374 Opera and Culture (also GERST 374 and ITAL 374)** # (IV)
Spring. 4 credits. Prerequisite: any 3-credit music course or proficiency in German or Italian. Not offered 2001–2002. A. Groos. See GERST 374 for description.

**MUSIC 381 Music in Western Europe to 1700** # (IV)
Fall. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. J. Peraino.
Western European music from the Middle Ages to the early Baroque, including Gregorian chant, secular monophony, the development of polyphony, the birth of opera, and the rise of independent instrumental music.

**MUSIC 382 Music of the Eighteenth Century** # (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. J. Webster.
Music in Western and Central Europe and North America from Bach, Handel, and Vivaldi to Haydn and Mozart, including comic and serious opera, church music, concert music, and social music.

**MUSIC 383 Music of the Nineteenth Century** # (IV)
Fall. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. D. Rosen.
A chronological survey of nineteenth-century music from Beethoven through Puccini (including reference to its cultural and historical context).

**MUSIC 384 Music of the Twentieth Century** # (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. S. Stucky.
Covers movements, schools, and styles in "classical" music from the turn of the century to the present. Includes extensive listening and reading assignments for historical breadth; detailed attention to representative works for analytical depth.

**MUSIC 386 Topics In Popular Music and Jazz** # (IV)
Fall. 4 credits. Prerequisite: MUSIC 152/154. S. Pond.
Topic: Post-Bebop Jazz to 1965. This course examines a cluster of jazz developments in the aftermath of the Bebop Revolution, from the late 1940s to the mid-1960s, from historical, cultural, and analytical viewpoints. A special focus is the complex of styles known as Hard Bop. The course also discusses the negotiation in jazz of Western European- and African-based aesthetics, key personal and compositional and improvisational developments, the music industry, and cultural politics of this rich period of jazz history. Throughout, we are attentive to the myriad musical streams that grew out of this time, and assess the historical importance this period has assumed in retrospect.

**MUSIC 388 Historical Performance Practicum** # (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. M. Bilson.
The study of eighteenth- and nineteenth-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

**MUSIC 390 Culture of Renaissance II (also COM L 362, ENGL 325, HIST 364 ART H 351)** # (III or IV)
See COM L 362 for description.

**MUSIC 399-399 Independent Study in Music History**
398, fall; 399, spring. 4 credits. Prerequisite: MUSIC 152 and permission of instructor. Staff.
Advanced study of various topics in music history. Students enrolling in MUSIC 398–399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects.

**MUSIC 400 Senior Seminar**

**MUSIC 410 Music and Monstrous Imaginings** # (IV)
Fall. 4 credits. A. Richards.
This seminar explores the limits of the imaginary in the eighteenth- and nineteenth-century culture, from theories of fantasy, unreason, and "monstrous imagining" to freak shows, virtuosi, and illusionists. Focusing on visual, literary, and musical phantasmagoria, we investigate the performance of the uncanny (Paganini and devilish technical feats, Mesmer and the glass harmonica), the gendered imagination and artistic creation (pregnancy and invention), technologies of death and its representation (the guillotine and wax museum, magic lantern shows and automatons). Novels by Radcliffe, Lewis, Shelley, instrumental music by C. P. E. Bach, Beethoven, Mendelssohn, Berlioz; opera by Mozart, Weber, Meyerbeer; critical texts from Addison and Steele to Freud and Foucault.

**MUSIC 474 Opera, History, Politics, Gender (also HIST 460, WOMENS 454, COM L 459, SHUM 459, ITALIA 456)** # (III or IV)
Spring. 4 credits. M. Steinberg and S. Stewart.
See HIST 460 for description.

**MUSIC 489 African American Music Innovators (also AS&RC 489)**

**MUSIC 490 American Musical Theatre** (also ENGL 454) # (IV)
Spring. 4 credits. S. McMullen.
See ENGL 454 for description.

**MUSIC 492 Music and Queer Identity** # (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. J. Peraino.
Throughout history music has been associated with "otherness" in Western cultures.
Digital Music and New Media

**MUSIC 120 Learning Music through Digital Technology (IV)**

Fall or spring. 3 credits. Enrollment limited. Prerequisite: permission of instructor. D. Borden. This course uses selected commercially available technological resources to produce live music. The student is expected to master the Macintosh computer, several music software programs, and several synthesizers using MIDI. The ability to read music is helpful but not necessary. There are no papers to write; homework is presented in three classroom concerts. The final is a live presentation of the student's final project in a concert open to the public.

**MUSIC 220 Learning Counterpoint through Digital Technology**

Spring. 3 credits. Enrollment limited. Prerequisite: MUSIC 152 and permission of instructor. Not offered 2001–2002. D. Borden. This course is a study of traditional contrapuntal techniques from the fourteenth century to the present, with emphasis on invention and fugue. Synthesizers, samplers, MIDI, and music software are covered. There are three classroom concerts, some analysis and a final public concert.

**MUSIC 320 Scoring the Moving Image Using Digital Technology**

Spring. 4 credits. Prerequisite: MUSIC 120 with a grade of B or higher. D. Borden. Students learn sound design and music composition using MIDI and Digital Audio to enhance images in motion. The course is at least partially collaborative, involving students taking courses in computer animation, film, and dance. In addition, to learn techniques involving synchronizing sound to image, film clips from various sources are used as practice exercises. The final project is a public showing of film computer animation and/or dance performance using the sound and music provided by the students in this course.

**MUSIC 391 Media Arts Studio I (also THETR 391, ART 391, ARCH 391) (IV)**

Fall. 3 credits. Permission of instructor. See THETR 391 for description.

**MUSIC 392 Media Arts Studio II (also THETR 392, ART 392, ARCH 392) (IV)**

Spring. 3 credits. Permission of instructor. See THETR 392 for description.

**MUSIC 420 Introduction to MIDI Techniques**

Spring. 4 credits. Permission of instructor. Not offered 2001–2002. D. Borden. This course is an introduction to MIDI for students who are already at an advanced level in music composition. Three composition projects are completed in collaboration with film, dance, and computer animation students.

Musical Performance

Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, violin, viola, cello, and some brass and woodwind instruments to those students advanced enough to do college-level work in these instruments. Lessons are available by audition only. They may be taken either without credit or, through MUSIC 321–322, with credit. Other instruments may sometimes be studied for credit outside Cornell, but also by audition only (see MUSIC 321–322).

**Lessons for beginners.** The Music Department can recommend outside teachers for those who wish to begin studying voice or an instrument. No credit is available for beginning instruction.

**Auditions.** Auditions are held at the beginning of each term for lessons for advanced students. Contact the Department of Music office (101 Lincoln Hall) for information.

**Fees.** The fee for a one-half hour lesson weekly, **without credit**, is $150 per term. For a one-hour lesson (or two half-hour lessons) weekly, **without credit**, the fee is $300. The fee in MUSIC 321–322 for a one-hour lesson (or two half-hour lessons) **for credit** is $225 per term. All fees are non-refundable once lessons begin, even if the course is subsequently dropped.

**Scholarships.** Music majors receive a scholarship equal to the lesson fee listed above. Members of department-sponsored organizations and ensembles may, with the permission of the director of the organization, receive a scholarship of up to $100 of the Cornell fee for the type of lessons chosen during the term. These scholarships are intended only for lessons in the student's primary performing medium. Scholarship forms, available in the Music Department office, are to be returned to the office within the first three weeks of classes.

**Practice rooms.** Practice-room fees for a room with a grand piano are $75 per term for up to 10 hours weekly, with a charge of $10 for each additional hour. A $25 cash deposit must be made for a key to the grand piano practice rooms, $20 of which is refunded upon return of the key. Fees for a room with either an upright piano or drum set are $60 per term for up to 10 hours weekly, with a charge of $8 for each additional hour, and fees for a room without a piano are $25 per term for up to 10 hours weekly. The fee for use of the pipe organs is $60 per term for up to 10 hours weekly. All fees are non-refundable and are not prorated.

**Earning credit.** For every four credits earned in MUSIC 321–322, the student must have earned, or currently be earning, at least three credits in another music course (excluding freshman seminars, MUSIC 321–322, 323–324, 331–343, or 421 through 448). These three credits must be earned prior to, or simultaneously with, the first two credits in 321–322; they cannot be applied retroactively. Transfer credit for appropriate music courses already taken elsewhere may be used to satisfy this requirement with the approval of the department chair.

**Lessons taken outside Cornell.** Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of Music 321–322 and contact the Music Department office.
MUSIC 321-322 Individual Instruction in Voice, Organ, Harpsichord, Piano, Strings, Woodwinds, and Brass
Prerequisite: advanced students may register only after a successful audition with the instructor, usually scheduled during the first week of classes, and will receive credit only as described under "Earning credit." Students may register for this course in successive years.
Students, at the sole discretion of the instructor, earn two credits each term for a one-hour lesson (or two half-hour lessons) weekly accompanied by an appropriate practice schedule.

MUSIC 321a-322a Individual Instruction in Voice
321a, fall; 322a, spring. 2 credits each term. Prerequisite: successful audition. Limited enrollment. Attendance at weekly studio class required for all credit students.
J. Kellock.

MUSIC 321b-322b Individual Instruction in Organ
321b, fall; 322b, spring. 2 credits each term. Prerequisite: successful audition. A. Richards.

MUSIC 321c-322c Individual Instruction in Violin or Viola
321c, fall; 322c, spring. 2 credits each term. Prerequisite: successful audition.
X. Bjerken.

MUSIC 321d-322d Individual Instruction in Harpsichord
321d, fall; 322d, spring. 2 credits each term. Prerequisite: successful audition. K. Tan.

MUSIC 321e-322e Individual Instruction in Cello
321e, fall; 322e, spring. 2 credits each term. Prerequisite: successful audition. H. Hoffman.

MUSIC 321g-322g Individual Instruction in Brass
321g, fall; 322g, spring. 2 credits each term. Prerequisite: successful audition. M. Scatterday.

MUSIC 321h-322h Individual Instruction Outside Cornell
321h, fall; 322h, spring. 2 credits each term. Prerequisite: successful audition.
Coordinator: D. Conn.
All the standard orchestral and band instruments, keyboard instruments, guitar and voice may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and when there is limited enrollment in MUSIC 321-322. Prior approval and audition by a member of the faculty in the department is required, and credit may be earned only as described under "Earning credit," above. Additionally, a departmental petition must be completed by the end of the third week of classes. For information and a list of approved teachers, consult the department office, 101 Lincoln Hall.

MUSIC 321l-322l Individual Instruction in Woodwinds
321l, fall, 322l, spring. 2 credits each term. Prerequisite: successful audition. D. Conn.

MUSIC 323-324 Advanced Individual Instruction
323, fall; 324, spring. 4 credits each term. Open only to juniors and seniors majoring in music with a concentration in performance and to graduate students. Majors whose lessons must be taken outside Cornell may apply to the department for financial assistance toward the cost of lessons; $225 per semester is normally awarded to such students.

Musical Organizations and Ensembles
Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admittance is by audition only (usually at the beginning of each semester), except that the Sage Chapel Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than eight credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

MUSIC 331-332 Sage Chapel Choir
331, fall or summer; 332, spring. 1 credit.
No audition required. R. Riley. Open to all students and members of the university. Varied and demanding repertoire. The Sage Chapel Choir sings regularly in the Sunday Service of Worship which is broadcast on 870 WHCU-AM radio, and on special occasions throughout the year.

MUSIC 333-334 Cornell Chorus
333, fall; 334, spring. 1 credit. Prerequisite: permission of instructor. W 5:15-7:15 P.M. plus 2 hours TBA. S. Tucker.
A treble-voice chorus specializing in music for women's voices and in mixed-voice repertory.

MUSIC 335-336 Cornell University Glee Club
335, fall; 336, spring. 1 credit. Prerequisite: permission of instructor. W 7:30-9:30 P.M. plus 2 hours TBA. S. Tucker.
A male-voice chorus specializing in music for men's voices and in mixed-voice repertory.

MUSIC 337 Wind Symphony
Fall. 1 credit. Prerequisite: permission of instructor. M W 4:45-6:30. M. Scatterday and D. Conn.

MUSIC 338 Symphonic Band
Spring. 1 credit. Prerequisite: permission of instructor. M W 4:45-6:30. D. Conn.

MUSIC 339-340 Cornell Jazz Ensembles
339, fall; 340, spring. 1 credit. Prerequisite: permission of instructor. W 6-8 P.M. P. Merrill.

MUSIC 342 Wind Ensemble
Spring. 1 credit. Prerequisite: permission of instructor. M 7:30-9:30 and R 4:45-6:30. M. Scatterday.

MUSIC 343-344 Cornell Symphony Orchestra
343, fall; 344, spring. 1 credit. Prerequisite: permission of instructor. W 7:30-10:00 P.M. J. Hsu.

MUSIC 345-346 Introduction to the Gamelan
345 fall; 346 spring. 1 credit. Enrollment limited. Prerequisite: permission of instructor. Not offered 2001-2002. Concentrated instruction for beginning students in elementary techniques of performance on the indonesian gamelan. MUSIC 245 is a three-credit course that complements the instruction in gamelan by an introduction to indonesian history and cultures.

MUSIC 421-422 Cornell Chamber Orchestra
421, fall; 422 spring. 1 credit. Prerequisite: permission of instructor. T 5-6:30 P.M. M. Scatterday.
Study and performance of the chamber symphonies of Haydn, Mozart, and their contemporaries.

MUSIC 437-438 Chamber Winds
437, fall; 438, spring. 1 credit each term. Prerequisite: enrollment in Symphonic Band, Wind Symphony or Wind Ensemble in the same semester. Prerequisite permission of instructor only. M. Scatterday and D. Conn.
A flexible instrumentation ensemble performing original woodwind, brass, and percussion music from Gabrieli brass choirs and Mozart serenades through more contemporary works such as Stravinsky's Octet and new music premieres. The ensemble performs in wind symphony, symphonic band, and wind ensemble concerts in addition to several chamber concerts throughout the year.

MUSIC 439-440 Experimental Lab Ensemble
439, fall; 440, spring. 1 credit each term. Permission of instructor. W 8:30-10:30 P.M. P. Merrill.

MUSIC 441-442 Chamber Music Ensemble
441, fall; 442, spring. 1 credit. Prerequisite: permission of instructor. K. Tan.
Study and perform chamber music works from duos to octets for pianists, string, and wind players.

MUSIC 443-444 Chorale
443, fall; 444, spring. 1 credit each term. Prerequisite: permission of instructor. F 4:30-6:15 P.M. J. Day-O'Connell.
Study and performance of selected choral music for mixed voices.

MUSIC 445-446 Cornell Gamelan Ensemble
445, fall; 446, spring. 1 credit each term. Enrollment limited. Prerequisite: permission of instructor. M. Hatch, fall; staff, spring.
Advanced performance on the Javanese gamelan. Tape recordings of gamelan and elementary number notation are provided. Some instruction by Indonesian musicians is offered in most years.

MUSIC 447-448 Chamber Singers
447, fall; 448, spring. 1 credit each term. Prerequisite: permission of instructor. Plus 2 hours TBA. Y. Haber.
A mixed-voice chamber choir specializing in renaissance and twentieth-century music.
This course surveys the many critical theories that have been included under the umbrella of
"postmodernism," and that have fueled the debate between "old" and "new" styles of
musicology. Readings focus on structuralism and poststructuralism, feminist literary
criticism, queer theory, and postmodern and postcolonialism, and their application in
musicology and ethnomusicology. A broad spectrum of music is examined along with the
readings.

[MUSIC 684 Seminar in Renaissance Music]
R. Harris-Warrick.

[MUSIC 686 Seminar in Baroque Music]
Spring. 4 credits. D. Yearsley.
Topic: Bach's Clavier-Übung Series and
Keyboard Arias in the Mid-18th Century. This course examines not only the sources,
reception, and influence of Bach's published keyboard works (beginning with the Six
Partitas of 1731 and culminating with the Goldberg Variations of 1742), but also
investigates the social contexts, pedagogical approaches, and moral values embodied in
described collections.

[MUSIC 688 Seminar in Classical Music]
Fall. 4 credits. J. Webster.
Topic: Haydn.

[MUSIC 699 Seminar in Music of the Romantic Era]
D. Rosen.

[MUSIC 690 Seminar in Music of the Twentieth Century]
Spring. 4 credits. R. Sierra.
Topic: Ligeti.

[MUSIC 691-692 Historical Performance Practice]
Spring. 4 credits each term.
Prerequisite: permission of instructor. Hours TBA. M. Bilson.
Lessons on the major instrument with
supplementary study and research on related subjects.

[MUSIC 693 Seminar in Performance Practice]
N. Zaslav.
String bands, orchestral discipline, and
orchestral repertories in Paris and Versailles in
the seventeenth century and their dissemination
in Western Europe. Special emphasis on the
music and prefaces of Georg Muffat.

[MUSIC 697-698 Independent Study and Research]
697, fall; 698, spring. Credit TBA. Staff.

[MUSIC 785-786 History of Music Theory]
785, fall; 786, spring. 4 credits each term.

[MUSIC 797 History and Criticism]
Spring. 4 credits. A. Richards.

[MUSIC 789 Liturgical Chant in the West]

[MUSIC 901-902 Thesis Research]
901, fall; 902, spring. Up to 6 credits each
term, TBA. Offered for S-U only.
Limited to doctoral students in music who
have passed the Admission-to-Candidacy Exam.

The Department
The Department of Near Eastern Studies (360 Rockefeller Hall, 255–6275) offers courses in
Near Eastern civilization including archaeology,
history, religions, languages, and
literatures. These course offerings treat the
Near East from the dawn of history to the
present and emphasize methods of historical,
cultural, and literary analysis. Students are
couraged to take an interdisciplinary approach to the
regions and their literature, science, and
time periods.

Distribution Requirements
Any two Near Eastern Studies history or
archaeology courses at the 200, 300, or 400
level that form a reasonable sequence or
combination satisfy the distribution requirement
in the social sciences/history. Any two
Near Eastern Studies civilization or literature
courses at the 200, 300, or 400 level that form
a reasonable sequence or combination satisfy the
distribution requirement in the humanities.

The Major
The precise sequence and combination of
courses chosen to fulfill the major is selected in
consultation with the student's adviser. All
majors must satisfy the following requirements
(no course may be used to satisfy two
requirements; S-U options not permitted):

A. Qualification in two Near Eastern
languages or proficiency in one.

B. Nine three- or four-credit NES courses,
which must include the following:
1. NES 197 or 251.
2. Two 200-level NES survey courses, one
whose chronological parameters fall
within the period 3000 B.C.E. to 600
C.E., and one whose chronological
parameters fall within the period 600
C.E. to the present. The following are
equal to the course offerings (a complete list can be
obtained in the department office):

3000 B.C.E. to 600 C.E.

NES 224, Introduction to the
Hebrew Bible
NES 261, Ancient Seafaring
NES 262, Introduction to the New
Testament
NES 295, Introduction to Christian
History
600 C.E. to the present

NES 234, Arabs and Jews: Cultures
and Conflicts, and Conflict: The
Pre-Modern Period

NES 235, Arabs and Jews: The
Modern Period

NES 250, Muhammad and Mystics in
the Literatures of the Islamic World

NES 258, Islamic History 1258–1914

NES 294, Modern History of the
Near East

3. At least two NES courses at the 300
level or above (one of which may be
NES 301, 302, 311, or 312):

Prospective majors should discuss their plans
with the director of undergraduate studies
before formally enrolling in the department.

To qualify as a major, a cumulative grade
average of C or better is required.

Honor: Candidates for the degree of
Bachelor of Arts with honors in Near Eastern
Studies must fulfill the requirements of the
appropriate major and study and enroll in the
honors course, NES 499, in the fall and spring
semesters of their senior year. For admission
to the honors program, candidates must have
a cumulative average of B+ or better and have
demonstrated superior performance overall in
Near Eastern Studies courses. After consulting
their major adviser, candidates should submit
an outline of their proposed honors work to
the department during the second semester
of their junior year.

Study abroad: Near Eastern Studies majors
can choose to study in the Near East during
their junior year. There are various academic
programs in the countries of the Near East that
are recognized by the Department of Near
Eastern Studies and that allow for the transfer
of credit. Archaeological field work on
Cornell-sponsored projects in the Near East
can also qualify for course credit.

First-Year Writing Seminars

For descriptions, consult the John S. Knight
Institute brochure for times, instructors, and
descriptions.

Language Courses

NES 101–102 Elementary Modern

Hebrew I and II (also JWST 105–106)

101, fall; 102, spring. 6 credits each term.

NES 102 satisfies the language qualifica-
tion. Prerequisite for NES 102: 101 or
permission of instructor. Enrollment limited
to 15 students in each section. S. Shoen.

For beginning students, this course provides
a thorough grounding in reading, writing,
grammar, oral comprehension, and speaking.

NES 111–112 Elementary Arabic I and II

111, fall; 112, spring. Enrollment limited to
17 in each session. 4 credits each term.

NES 112 satisfies the language qualifica-
tion. NES 111 is prerequisite for 112, or
permission of instructor. M. Younes.

The course provides a thorough grounding in
all language skills: listening, speaking,
reading, and writing. It starts with spoken
Arabic and gradually integrates Modern
Standard Arabic (MSA). Emphasis is on learning
the language through its meaning contexts.

Students who successfully complete the
two-semester sequence are able to: (1)
understand and actively participate in simple
conversations involving practical and
daily situations (introductions, greetings,
school, home and family, work, simple
instructions, etc.); (2) read Arabic material of
limited complexity and variety (simple
narrative and descriptive texts, directions,
etc.); (3) write notes and short letters
describing an event or a personal experience.

An important objective of the course is to
familiarize students with basic facts about
the geography, history, and culture of the Arab
world.

(NES 113–114 Elementary Biblical

Hebrew I and II (also JWST 123–124,
RELST 123–124)

123, fall; 124, spring. 3 credits each term.

NES 124 satisfies the language qualifica-
tion. Enrollment limited to 17 students. Not

The course is intended to develop basic
proficiency in reading the Hebrew Bible.

I. First semester emphasizes introductory
grammar and vocabulary. The second
semester focuses on reading selected passages
in the Hebrew Bible, with further develop-
mant of grammar and vocabulary.

NES 133–134 Qur’anic and Classical

Arabic

133, fall; 134, spring. 4 credits each
semester. M. Younes.

This course is designed for students who are
interested in reading the language of the
Qur’an and Hadiths with accuracy and understand-
ing. Authentic texts in the form of chapters from
the Qur’an and Hadiths are presented and analyzed,
and basic grammatical structures are discussed,
explained, and practiced systematically.

Interested students are encouraged to
memorize excerpts from the texts. At the end
of the two-semester sequence, the successful
student has mastered a working vocabulary
of over 1,000 words, correct pronunciation,
and the most commonly used grammatical
structures. In addition, the course provides
the student with a firm foundation on which to
build an advanced study of Classical Arabic.

NES 201–202 Intermediate Modern

Hebrew I and II (also JWST 201–202)

201, fall; 202, spring. Enrollment limited to
15 students in each section. 4 credits each
term. NES 201 provides language
proficiency. Prerequisites for NES 201: 102
or permission of instructor; for NES 202,
201 or permission of instructor. N. Scharf.

A sequel to NES 101–102. Continued
development of reading, writing, grammar,
oral comprehension, and speaking skills.

The course introduces Hebrew literature
and Israeli culture through the use of texts and
audio-visual materials.

NES 211–212 Intermediate Arabic I and

II @

211, fall; 212, spring. Enrollment limited to
15 students in each section. 4 credits each
term. NES 211 provides language
proficiency. Prerequisites: for NES 211, one
year of Arabic or permission of instructor;
for NES 212, 211 or permission of
instructor. M. Younes.

A sequel to NES 111–112. Continued
development of the four language skills
through extensive use of graded materials on
a wide variety of topics. Increasing attention
is given to developing native-like pronunciation
and grammatical accuracy, but the main focus
is on developing communication skills. The
student who successfully completes 212 is
able to: (1) understand and express himself or
herself in Arabic in situations beyond the basic
needs; (2) read and comprehend written
Arabic of average difficulty; (3) write a letter,
a summary of a report, or a reading selection.

An appreciation of Arabic literature and
culture is sought through the use of authentic
materials.

NES 301–302 Advanced Modern Hebrew

I and II (also JWST 301–302) @

301, fall; 302, spring. Limited to 15
students. 4 credits each term. Prerequisite
for NES 301: 302 or equivalent, with permi-
tion of instructor. Prerequisite for
NES 302: 301 or equivalent, with permis-
tion of instructor. This sequence may be
used to fulfill the humanities distribution
requirement in literature. N. Scharf.

Advanced study of Hebrew through the
analysis of literary texts and expository prose.

This course employs a double perspective:

language is viewed through literature and
literature through language. Students develop
composition skills by studying language
structures, idioms, and various registers of

style.

NES 311 Advanced Arabic I @

Fall. 4 credits. Prerequisite: NES 212 or
permission of instructor. Limited to 15
students. D. Starr.

Students are introduced to authentic, unedited
Arabic language materials ranging from
poems, short stories, and plays to newspaper
articles dealing with social, political, and
cultural issues. Emphasis is on developing
fluency in oral expression through discussions
of issues presented in the reading selections.

A primary objective of the course is the
development of writing skills through free
composition exercises in topics of interest to
individual students.

NES 312 Advanced Arabic II @

Spring. 4 credits. Limited to 15 students.
Prerequisite: NES 311, or permission of
instructor. S. Toorawa.

This course is a continuation of NES 311 using
similar but more challenging materials. There
is more focus on the writing skills, the
development of native-like pronunciation,
and accurate oral and written expression.

Students are required to make an
oral presentation in Arabic on a topic of his/his
choice and submit a written version of the
presentation.

NES 313 Classical Arabic Texts (also

RELST 313) @

Fall. 4 credits. Prerequisite: NES 212 or

This course will introduce students to different
genres of literary-Arabic. We read, translate,
and discuss selected texts written in classical
literature.

For descriptions, consult the John S. Knight
Institute brochure for times, instructors, and
descriptions.
and modern standard Arabic. Review of morphology and grammar.

[NES 330-331 Hieroglyphic Egyptian I and II @ (IV)
330 fall; 331 spring. 4 credits. Not offered 2001-2002. Staff.]

[NES 333-334 Elementary Akkadian I & II also NES 633-634 @ # (IV)
335, fall; 334, spring. 4 credits each term. Prerequisite for NES 334: 333 or permission of instructor. Prerequisite for NES 634: 633 or permission of instructor. Not offered 2001-2002. D. I. Owen.
An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide a background for study of the language. Knowledge of another Semitic language is helpful but not essential.]

[NES 337-338 Ugaritic I & II also NES 637-638 @ # (IV)
Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.]

[NES 416 Structure of the Arabic Language also LING 416
Spring. 4 credits. Prerequisite: NES 112 or one year of Arabic. Not offered 2001-2002. M. Younes.]

[NES 420 Readings in the Hebrew Bible also JWST 420, RELST 420 @ # (IV)
Fall. 4 credits. Prerequisite: 1 year of biblical or modern Hebrew. Course may be repeated for credit. R. Brann.
An advanced course in reading selected portions of the Hebrew Bible. Emphasis is placed on the philological method, with attention to literary, historical, and comparative concerns.]

[NES 433 Introductory Sumerian I also NES 631 @ # (IV)
Fall. 4 credits each semester. Prerequisite: permission of instructor. Not offered 2001-2002. D. I. Owen.
This course consists of an introduction to the Sumerian cuneiform script and grammar of the third millennium B.C.E. Readings in selected Sumerian economic, legal, and historical inscriptions, a basic introduction to Sumerian grammar and script, linguistic connections, and a survey and discussion of Sumerian civilization and culture. Students who have taken or plan to take Akkadian, Hebrew, or Hitite linguistics or are otherwise interested in the history of language should consider this course.]

[NES 434 Introductory Sumerian II also NES 632 @ # (IV)
Continued study of Sumerian grammar and syntax; further readings in selected Sumerian economic, legal, and historical inscriptions of the late third millennium B.C.E.; additional discussion of Sumerian civilization and culture.]

[NES 435 Aramaic I @ # (IV)
A panoply of Aramaic materials is read during the course, including selections from ancient Aramaic inscriptions, the biblical books of Ezra and Daniel, Qumran texts, and the Targumim. Explanations of grammar, syntax, and vocabulary are based on the linguistic data which occur in the readings.]

[NES 622 Old Avestan also LING 629]
Fall and spring. 4 credits. Prerequisite: LING 620.
For description, see LING 629.

[NES 623 Comparative Grammar of Anatolian
Spring. 4 credits. M. Weiss.
For description, see LING 620.]

[NES 631 Introductory Sumerian II also NES 433]
For description, see NES 433 under Near Eastern Languages.]

[NES 632 Introductory Sumerian II also NES 434]
For description, see NES 434 under Near Eastern Languages.]

[NES 633-634 Elementary Akkadian I and II also NES 333-334]
633, fall; 634, spring. 4 credits each term. Prerequisite for NES 634: 633 or permission of instructor. Not offered 2001-2002. D. I. Owen.
An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide the background for the study of the language. Knowledge of another Semitic language helpful but not essential.]

[NES 637-638 Ugaritic I & II also NES 337-338]
Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.]

[Arsheology]

[NES 261 Ancient Seafaring also ARKEO 263, JWST 261] @ # (III)
A survey of the history and development of seafaring under the sea. Considers the role of nautical technology and seafaring among the maritime peoples of the ancient Mediterranean—Canaanites, Minoans, Mycenaean, Phoenicians, Hebrews, Greeks, and Romans—as well as the riverine cultures of Mesopotamia and Egypt. Evidence for maritime trade, economics, exploration and colonization, and the role of the sea in religion and mythology is examined.]

[NES 263 Introduction to Biblical History and Archaeology also ARKEO 263, JWST 263, RELST 264] @ # (III)
Spring. 3 credits. Enrollment limited to 50 students. J. Zorn.
A survey of the principal archaeological developments in Canaan/Israel from the Neolithic period (ca 8000-3000 B.C.E.) to the Babylonian Exile (586 B.C.E.). Includes an introduction to archaeological methodology used in the reconstruction of ancient cultures, as well as the basic bibliography of the field. Emphasis is placed on the use of archaeological data for understanding major problems in Israelite history and archaeology: such as the dating of the cultural milieu of the patriarchs, the dating and geographical setting of the Exodus and the Israelite conquest, and the origin and history of the Philistines. Special lectures are devoted to topics such as warfare, cult, food production and storage, writing, and water systems. Recommended for students planning to participate in excavations in Israel.]

[NES 268 Ancient Egyptian Civilization also JWST 268, ARKEO 268] @ # (III or IV)
Spring. 3 credits. G. Kadish.
The course surveys the history and culture of pharaonic Egypt from its prehistoric origins down to the conquest by Alexander the Great. Within a chronological framework, the following themes and topics are considered: the development of the Egyptian state (monarchy, administration, ideology); social organization (class, gender and family, slavery); economic factors; empire and international relations; science and technology; and such cultural factors as religion, literature, writing, art and architecture. There is considerable use of ancient texts in translation and slides. This is basically a lecture course, but there is opportunity for questions and clarifications.]

[NES 360 The Origins of Mesopotamian Civilization also JWST 360, ARKEO 360] @ # (III or IV)
Fall. 4 Credits. D. I. Owen.
An introduction to the language, literature, history, culture and archaeology of Sumer-Mesopotamia in the fourth and third millennia B.C.E. The course focuses on Sumerian civilization from its emergence in the archaeological record in the fourth millennium until its disappearance around 2000 B.C.E. In addition, it emphasizes the parallel development of the Semitic peoples in Syria (Eblaite) and upper Mesopotamia (Akkadian). A special feature of the course will be a basic introduction to the Sumerian language.
utilizing original cuneiform tablets in the
collection of the Department of Near Eastern
Studies.

NES 361  Sumerian Language and Culture
(also JWST 361, ARKEO 361)  @ (IV)
Spring. 4 credits. D. I. Owen.
A continuation of NES 360, the course focuses
on a more intense introduction to Sumerian
language and grammar with additional
readings in literature in translation. Particular
emphasis is placed on the reading and
interpretation of original texts from the Cornell
collection and their use in the reconstruction
of Mesopotamian history and culture in the
third millennium.

[NES 366  The History and Archaeology of the
Ancient Near East (also
ARKEO 366, JWST 366)  @ (III or IV)
Fall. 4 credits. Prerequisite: ARKEO 100 or
permission of instructor. Not offered 2001–
A survey of the history and archaeology of the
major civilizations of the Near East from the
Persian Gulf to Syria and Anatolia. The course
covers the time span from the prehistoric
period to the Persian conquest. Sumerian,
Babylonian, Elamite, Elamite, West Semitic,
Assyrian, and Persian cultures are discussed with
particular emphasis on indigenous
development and cross-cultural contacts.

Civilization

[NES 197  Introduction to Near Eastern
Civilization (also JWST 197 and
RELST 197)  @ (IV)
Fall. 3 credits each term. Not offered 2001–

[NES 244  Introduction to Ancient
Judaism (also JWST 244 and RELST
244)  @ (III or IV)
Rendsburg.
This course focuses on the development of
Judaism as a religion and as a civilization in
antiquity. Particular emphasis is placed on
themological development culminating in
monothedism, the role of the covenant, law
and society, sacrifice and prayer as modes of
worship, and similar topics. Jewish civilization
is placed within the context of ancient
civilizations (Canaan, Egypt, Babylon, Persia,
Greece, Rome). Texts studied include
selections from the Bible, the Apocalypse, the
Dead Sea Scrolls, Josephus, and the Mishnah.
All readings are in English translation.

[NES 246  Jewish Mysticism (also RELST
246, JWST 246)  @ (IV)
Fall. 3 credits. M. Segol.
This course introduces students to the body of
Jewish mystical literature—the Kabbalah. In this
course we study the Kabbalah as a literary
tradition, reading, considering, and analyzing
a section of the core works from the five
major periods of Jewish mystical thought.
While we survey mystical traditions from the
Talmudic period through modernity, the
central focus is on the rich medieval stream
known as kaballah. Among the issues
explored are: the nature of mystical experience;
images of God, world, and Person; sexual and
symbolism (images of the
male and female); constructions of body,
mind, and spirit; the problem of evil;
problems presence and absence; mysticism,
language, and silence; mysticism and
community; meditative and ecstatic practices
(ranging from visualization to chant, letter
combination to modulated breathing);
kabbalistic myth and ritual innovation; and
kabbalistic interpretations of history. Readings
consist of selections from primary sources,
coupled with complementary selections from
Jewish history, comparative religion, and related
disciplines. The course is taught in
English, and all works are studied in
translation.

[NES 251  Judaism, Christianity, and
Islam (also JWST 251, RELST
251)  @ (IV)
Fall. 3 credits. Not offered 2001–2002.
R. Brann and K. Haines-Eitzman.]

[NES 255  Introduction to Islamic
Civilization (also HIST 253, RELST
255)  @ (III or IV)
Fall. 3 credits. D. Powers.
We consider the major themes of Islamic
Civilization as developed from the
lifetime of Muhammad until the twentieth
century. While the readings provide the
student with the chronology of Islamic
History, lectures are devoted to an analysis of
topics such as the role of religion, science and
cities. The class meets three times weekly,
and the classroom format is that of a
lecture/discussion in which students are
couraged to participate actively. Lectures
are accompanied by slide presentations, when
appropriate.

[NES 281  Gender and Society in the
Muslim Middle East (also RELST 281,
WOMNS 281)  @ (III)
Staff.]

[NES 291  Arab Society and Culture (III)
Fall. 3 credits. Enrollment limited to 25
M. Younes.]
The focus of this course is Arab society in the
twentieth century. We start with a definition of
the term "Arab" and address the issue of
whether there is one or several Arab nations.
This is followed by a detailed examination of
the following topics: the role of religion,
jihad (holy war); the nature of the Muslim
community; meditative and ecstatic practices
(ranging from visualization to chant, letter
combination to modulated breathing);
kabbalistic myth and ritual innovation; and
kabbalistic interpretations of history. Readings
regulate the life of every Muslim in all its
aspects. The Shari'ab comprises on an equal
basis ordinances regarding worship and ritual
as well as political and, in Western terms,
strict legal rules. This course examines the
relationship between the Shari'ab and the
major social, economic, and political
institutions of Islamic society. Topics
discussed include the status of women, slaves,
and non-Muslims; attitudes toward the
economy and the arts; the significance of
Islamic culture.

[NES 317  A Mediterranean Society, and
Its Culture: The Jews and Judaism
under Classical Islam (also JWST
317, RELST 371, COM L 371)  @ (IV)
R. Brann.]
The Jewish Encounter with Islamic civilization
tenth through thirteenth centuries) reshaped
the conditions of Jewish existence in
Mediterranean lands and redefined the culture
and world-view of rabbinic Judaism. The
seminar studies these transformations by
learning how to read travelers accounts and
documentary materials (personal correspon-
dence, court records, economic and
regional registries) preserved in the so-called "Cairo
Genizah." We also examine selected texts
produced by and for the benefit of Jewish
literary and religious intellectuals, such as
Saadiah Gaon, Solomon Ibn Gabirol, Judah
Halevi, and Moses Maimonides.

[NES 464  The Herodotean Moment (also
GOVT 454, HIST 454)  @ (III)
M. Bernal.]
This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political, and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusian Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.

**NES 651 Law, Society, and Culture in the Middle East, 1200-1500**

For description, see NES 351.

**NES 666 Conceptualizing Cultural Contact**

A survey of the cultural history of the Jews in Spain from the late Visigothic period until the converso crisis of the fourteenth and fifteenth centuries and the Expulsion, focusing on the interaction of Jewish with Muslim and Christian cultures and the stable yet evolving sense of "Sephardi" identity. The course establishes historical and literary-critical frames for reading primary sources in translation, including secular and synagogue poetry, philosophy and kabbalah, biblical hermeneutics, historiography, polemics, and other genres.

**NES 294 Imagining the Modern Middle East**

Fall. 4 credits. Fulfills the college distribution requirement in history or the social sciences. S. Alatout.

This course traces the emergence of contemporary Middle East back to the political, social, and cultural encounters between "East" and "West." Readings bring together works in the history and politics of the Middle East as well as political theory. Themes include modernization; modern colonial encounters; nationalist responses; the postcolonial state; and Islamic, feminist, and sexual critiques of the postcolonial state.

**NES 295 Introduction to Christian History**

K. Haines-Eitzen.

This course offers an introduction of Christianity from the apostle Paul through the seventeenth century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We explore the origins of Christianity within Judaism in the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the various controversies that occupied the church throughout its history. The course draws on primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

**NES 321 Heresy and Orthodoxy in Early Christianity**

Spring. 4 credits. Limited to 17 students.

K. Haines-Eitzen.

In this course we explore the varieties of Christian thought and practice from the first through the fourth centuries. In its earliest centuries, Christianity consisted of a diverse range of movements, each of which was considered "heretical" by its opponents, one of which came to dominate all the others and so earned for itself the designation "orthodoxy." The "heresies" we study include Adoptionism, Marcionism, Gnosticism, Montanism, Arianism, and Donatism. Consideration is also given to the ways in which charges of "heresy" intersected with competing views about women in the early Church, the relationship between Judaism and Christianity, the construction of authority, and the content, function, and sacredness of early Christian books.

**NES 351 Law, Society, and Culture in the Middle East, 1200-1500**

Fall. 4 credits. Enrollment limited to 25 students. Not offered 2001-2002.

D. Powers.

After surveying the historical development of Islamic Law, the seminar focuses on the structure and function of the Islamic legal system in the thirteenth, fourteenth, and fifteenth centuries, using legal documents, judicial opinions, and court cases (all in English translation) to elicit major themes and issues; (e.g., the Marital regime, women and property, social hierarchies, law, and the public sphere).

**NES 356 Islamic History: The Age of Ibn Khaldun**

Spring. 4 credits. Enrollment limited to 15 students. Prerequisite: NES 257 or equivalent. Not offered 2001-2002.

D. Powers.

**NES 366 The History and Archaeology of the Ancient Near East**

Fall. 4 credits. Prerequisite: ARKEO 366, JWST 366. # (III or IV)

Staff.

For description, see Near Eastern Archaeology.

**NES 393 Religion and Politics in the Middle East**

Fall. 4 credits. Enrollment limited to 25 students. Not offered 2001-2002.

**NES 395 International Relations of the Middle East**

Spring. 4 credits. Enrollment limited to 50 students. Prerequisite: NES 294 or permission of instructor. Not offered 2001-2002. Staff.

**NES 418 Seminar in Islamic History**

Spring. 4 credits. Knowledge of Arabic is desirable, but not required. D. Powers.

An examination of Islamic history from 600-750, with special attention to interpretive issues relating to the career of the Prophet Muhammad; the Arab conquests, the emergence of the Caliphate, conversion to Islam, and the Abbasid revolution. Students read primary sources in English translation, especially The History of Tabari.

**NES 651 Law, Society, and Culture in the Middle East, 1200-1500**

Fall. 4 credits. Enrollment limited to 25 students. Not offered 2001-2002.

D. Powers.

For description, see NES 351.1

**NES 223 Introduction to the Hebrew Bible I**

Fall. 3 credits. Not offered 2001-2002.

G. Rendsburg.

This is the first course of a two-semester sequence. The main goal is to introduce students to the literature of the Hebrew Bible, which is accomplished by concentrating on the Torah and the historical material in Joshua through Samuel, that is, the material which covers the period from Israel's origins through King David. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, and law.

**NES 224 Introduction to the Hebrew Bible II**

Fall. 3 credits. Not offered 2001-2002.

G. Rendsburg.
This is the second of a two-semester sequence, but one does not need to take NES 223 in order to take this course. The main goal is to introduce students to the literature of the Hebrew Bible. This is accomplished by concentrating on the historical material in Kings, the books of the Prophets, and the book of Job, that is, the material which covers the period from King Solomon through the end of the biblical era. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern, history, religion, and mythology. (Note: students who have taken NES 227, Introduction to the Prophets are ineligible to take this course; NES 224 is intended to replace NES 227). Students interested in a one-credit option, reading the texts covered in class in the original Hebrew, should also enroll in NES 325.

[NES 227 The Bible and the Literature of the Ancient Near East (also JWST 227 and RELST 227)] @ (IV) Spring. 3 credits. Not offered 2001–2002. J. Zorn.

The Hebrew Scriptures are a composite work containing a wide array of literary forms: historical works, prophetic texts, wisdom literature, and so on. These works themselves were compiled from an even wider assortment of text types: cosmologies, folk tales, love songs, palace records, treaties, letters, and more. These texts were not written in a cultural vacuum but find a home in the literary work of Israel’s neighbors, including the Mesopotamians, Egyptians, Hittites, and others. This course examines the different literary genres found in the Hebrew Scriptures in comparison with similar material from the ancient Near East. The intent is to clarify the interpretation, dating, and purpose of the biblical material.

[NES 229 Introduction to the New Testament (also RELST 229 and JWST 229)] @ (IV) Fall. 3 credits. Not offered 2001–2002. K. Haines-Eitzen.

This course provides a literary and historical introduction to the earliest Christian writings, most of which eventually came to be included in the New Testament. Through the lens of the gospel narratives and earliest Christian letters, especially those of Paul, the course explores the rich diversity of the early Christian movement from its Jewish roots in first century Palestine through its development and spread to Asia Minor and beyond. Careful consideration is given to the political, economic, social, cultural, and religious circumstances that gave rise to the Jesus movement, as well as those that facilitated the emergence of various manifestations of early Christian beliefs and practices. (Students who have had at least one year of Greek and would like to participate in a one-credit, New Testament Greek reading weekly seminar should also enroll in NES 329.)

[NES 235 Jews and Arabs in Conflict: The Modern Period (also JWST 235)] @ (III) Spring. 3 credits. D. Starr.

This course traces the history and representations of Arab-Jewish relations from the late 19th Century to the present. The majority of class time is devoted to discussing literary works and films by Jews from Arab countries, Israelis from a variety of backgrounds, Palestinians including Palestinians in Israel, under Israeli occupation, and in the diaspora and Arabs representing a variety of other nationalities. This course is limited in scope by the idea of “influence” in the Near Eastern context is also studied.

[NES 323 Classical Arabic Texts (also JWST 323, COM L 246)] @ (IV) Fall. 3 credits. Not offered 2001–2002. S. Toorawa.

This course teaches students to read modern Arabic novels in translation in which the themes of crime and conflict are uppermost, including Nobel laureate Naguib Mahfouz's The Thief and the Dogs, Nawal El Saadawi's Woman at Point Zero, and Rachid El Dafiy's Dear Mister Kasabata. We complement the readings with three films.

[NES 320 Women in the Hebrew Bible (also JWST 320, WOMNS 322)] @ (IV) Spring. 3 credits. Not offered 2001–2002. K. Haines-Eitzen.

This course focuses on women in the Hebrew Bible. Through literary readings of these texts we attempt to understand the portrayal of women (characteristics and roles assigned by male writers); the social reality represented; and the role of narrative in the promotion of ideologies. All texts in English translation. Hebrew texts optional. There is a one-credit option for students who wish to meet 1 hour/week to read the texts in the Hebrew original (NES 326).

[NES 322 Reinventing Biblical Narrative (also JWST 322, RELST 322)] @ (IV) Spring. 4 credits. Not offered 2001–2002. K. Haines-Eitzen.

Narratives, particularly sacred narratives, are not static or fixed but rather infinitely flexible and malleable. Subject to multiple retellings—elaborations, modifications, and deletions—narratives take on lives of their own even after they come to be written down. What happens to sacred stories when they are heard and read by different communities of interpreters? How is this the broad question at the heart of this course, which explores the diverse interpretations of biblical narratives—especially the stories and characters in the book of Genesis—found Jewish and Christian literature from the second century B.C.E. through the third century C.E. Writers like the Hellenistic Jewish philosopher Philo and the Jewish historian Josephus, bodies of literature like Jewish and Christian pseudepigrapha and apocrypha, the New Testament, gnostic literature, early rabbinic literature, and patristic writers are sources we investigate in this class.

This is a one-credit option for students who wish to meet one day each week to read the texts covered in class in the original Hebrew. Must be concurrently enrolled in NES 323 or NES 224.
NEAR EASTERN STUDIES 531

NES 326 Women in the Hebrew Bible—
    Seminar (also JWST 326, WOMNS 326)
    G. Rendsburg.

This is a one-credit option for students who
    wish to meet one hour each week to read
    the texts in the Hebrew original. Must be
    concurrently enrolled in NES 320.

NES 328 Gnosticism and Early
    Christianity (also JWST 328, RELST
    330, RELST 334, SPAN L 339/699)
    K. Haines-Eitzen.

An in-depth exploration of early Christian
    Gnosticism—its literatures, beliefs, and
    practices. Early Christian Gnosticism came to
    be considered heretical by early proto-
    orthodox Church Fathers. In this course,
    however, we do not simply read the
    condemnations written by the opponents
    of gnostic thought; rather, we focus our attention
    on reading (in English translation) substantial
    portions of the texts written by the Gnostics
    themselves and found at Nag Hammadi,
    Egypt, in 1945. We explore gnostic ideas
    about the world, creation, salvation, God,
    humanity, and the human body, while also
    attending to issues of gender, asceticism, and
    scriptural interpretation as they intersect with
    gnostic thought. To set gnostic literature
    within a socio-historical context, we discuss
    other relevant ancient texts and scholarly
    theories about Jewish and Hellenistic roots
    of early Christian Gnosticism.

[NES 329 Intro to the New Testament—
    Seminar (also JWST 329, RELST 329)
    Fall. 1 credit. Prerequisite: concurrent
    enrollment (or past enrollment) in NES 229
    and 1 year of ancient Greek. Not offered

A weekly seminar that may be taken in
    addition to NES 229. The seminar provides an
    opportunity to read portions of the New
    Testament and other early Christian writings in
    Greek. We work on grammatical and textual
    issues as well as other problems related to
    translations.

NES 339 Islamic Spain: Culture and
    Society (also JWST 339, COM L 334,
    RELST 334, SPAN L 339/699) @ #
    (IV)
    Fall. 4 credits. R. Brann.

For description, see NES Civilization.

NES 394 Gender, Sexuality, and
    the Body in Early Christianity (also
    RELST 394, WOMNS 394, JWST
    394) @ (IV)
    Spring. 4 credits. K. Haines-Eitzen.

Beliefs about gender, sexuality, and the
    human body were remarkably interwoven
    with political, religious, and cultural disputes
    in early Christianity. In this course we explore
    the construction and representation of gender,
    sexuality, and the body in various forms of
    Christianity from the first century through the
    fourth. Asceticism and celibacy, veiling and
    unveiling, cross-dressing and Gnostic
    androgyny, marriage and childbirth, and
    homosexuality are among the topics consid­
    ered, and our sources range from the New
    Testament, early Christian apocrypha, martyr­
    logies, and patristic writings to Greek
    medical texts, Jewish midrash, Roman
    inscriptions, and Egyptian erotic and magical
    spells. Current interdisciplinary and theoretical
    studies on gender, ideology, sexuality, and
    power aid us in developing our analytical
    approaches to the ancient materials.

NES 400 Seminar in Advanced Hebrew
    (also JWST 400) @
    Fall. 4 credits. Prerequisite: NES 302/JWST
    302 or permission of instructor. Enrollment
    limited to 15 students. The course may be
    repeated for credit with permission of
    instructor. N. Scharf.

Continuation of work done in NES/JWST 302,
    with less emphasis on the study of grammar.
    We will read and discuss texts of cultural
    relevance, using articles published in each of
    the three principal genres: poetry, theater, and
    novels.

NES 401 Topics in Modern Hebrew
    Literature
    Spring. 4 credits. D. Starr.

For description, see department.

NES 409 Seasons of Migration (also
    JWST 409, RELST 409) @ (IV)
    Fall. 4 credits. S. Toorawa.

For description, see S HUM 409.

NES 420 Readings in the Hebrew Bible
    (also JWST 420 and RELST 420) @ #
    (IV)
    Fall. 4 credits. Prerequisite: 1 year of
    biblical or modern Hebrew. Course may be
    repeated for credit. R. Brann.

An advanced course in reading selected
    portions of the Hebrew Bible. Emphasis is
    placed on the philological method, with
    attention to literary, historical, and compara­
    tive concerns.

NES 421 Readings in Biblical Hebrew
    Poetry (also JWST 421, RELST
    421) @ (IV)
    Fall. 4 credits. Prerequisite for NES 421:
    1 year of Biblical or Modern Hebrew.
    Course may be repeated for credit. Not

Advanced course in reading selected poems
    of the Hebrew Bible. Chapters studied include
    various Psalms, parts of the Book of Job,
    various prophetic speeches, and early
    compositions such as Genesis 49 and Judges
    5. Emphasis is placed on the philological
    method, with attention to literary, historical, and
    comparative concerns as well.

NES 439 Islamic Spain: Culture and
    Society (also JWST 439, RELST 339,
    COM L 334, RELST 334, SPAN L 339/699)
    @ (IV)
    R. Brann.

This course examines the culture and society of
    al-Andalus (Islamic Spain) from 711, when
    Islam arrived in Iberia, until 1492 and the
    demise of Nasrid Granada. Through extensive
    investigations into the construction and
    representation of gender, sexuality, and the
    body in various forms of Islamic
    Civilization, history, language, literature,
    philology, archaeology and religion. The
    program offers students the opportunity to
    take a wide variety of courses in Jewish
    Studies whose subjects are not represented in
    the Department of Near Eastern Studies.

Students interested in planning a program in
    Jewish Studies should consult with the
    director, Professor David J. Owen, 350
    Rockefeller Hall. For complete listings and
    descriptions, see Program of Jewish Studies
    under “Special Programs and Interdisciplinary
    Studies.”

JWST 105-106 Elementary Modern
    Hebrew I and II (also NES 101-102)
    105, fall; 106, spring. 6 credits each term.
    Enrollment limited to 15 students. JWST
    106 satisfies language qualification.
    S. Shoer.

JWST 201-202 Intermediate Modern
    Hebrew I and II (also NES 201-202)
    201, fall; 202, spring. 4 credits. Enrollment
    limited to 15 students. JWST 201 satisfies
    language qualification. N. Scharf.

JWST 235 Jews and Arabs in Conflict:
    The Modern Period (also NES
    235) @ (III)
    Spring. 3 credits. D. Starr.

For description, see NES 235.

PHILOSOPHY
Emeritus: C. A. Ginett.

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning study in the field. Sections of Philosophy 100 are part of the freshman writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (seventeen students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take Philosophy 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to first year students.

The Major
Students expecting to major in philosophy should begin their study of it in their freshman or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses are required for the major. They must include at least one course in ancient philosophy (Philosophy 210 or 211, or a course with a large component on Plato or Aristotle), at least one course in classical modern metaphysics and epistemology from Descartes through Kant (e.g., Philosophy 212 or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major (after fall 1996) are required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of Philosophy 100 toward the major. A course in formal logic (e.g., PHIL 231), while not required, is especially recommended for majors or prospective majors. Courses numbered 191-199 do not count toward the major.

Philosophy majors must also complete at least eight credits of course work in related subjects approved by their major advisers. Occasionally majors may serve as teaching or research aids, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the College of Arts and Sciences and an average of B+ or better for all work in philosophy. In either or both terms of the senior year a candidate for honors enrolls in PHIL 490 and undertakes research leading to the writing of an honors essay by the end of the final term. Honors students normally need to take PHIL 490 both terms of their senior year in order to write a satisfactory honors essay. PHIL 490 does not count toward the eight philosophy courses required for the major. Prospective candidates should apply at the philosophy department office, 218 Goldwin Smith Hall.

Fees
In some courses there may be a small fee for photocopying materials to be handed out to students.

Introductory Courses
These courses have no prerequisites; all are open to freshmen.

Freshman Writing Seminars in Philosophy
Fall and spring. 3 credits. Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

PHIL 101 Introduction to Philosophy (IV)
Fall. 3 credits. M W F 9:05-9:55.
B. Hellie.
Fall. This course deals with a number of the central problems of philosophy, such as the existence of God, our knowledge of the external world, the mind-body problem, free will and the foundations of morality.

Spring: We talk about some big questions that make the mind boggle: why is there something rather than nothing? Is there at least one god? Is there a meaning to life, and if so what is it? Do we have free will? Students should not expect to be given conclusive answers to these questions. They should, however, expect to deal with abstractions on a regular basis, and to get used to chopping things up and organizing them in a precise way; otherwise things get out of control pretty quickly.

[PHIL 131 Logic, Evidence and Argument Fall. 3 credits. Not offered 2001-2002.]

PHIL 142 Appropriation and Alienation (IV)
This course investigates an important issue in political philosophy: the justification of property rights. We start the course by
watching a film, *The Field*, in which two different conceptions of what justifies ownership come into conflict. Should things belong to those who make them? Or shouldn’t labor be the primary justification of property rights? We spend the first half of the course investigating how this philosopher John Locke handles this issue in his classic defense of private property. In the second half, we consider Karl Marx’s classic objections to Locke’s defense of private property.

**PHIL 145 Contemporary Moral Issues**

**PHIL 191 Introduction to the Philosophy of Science (IV)**

Spring. 3 credits. T R 1:25–2:40. N. Sethi.

This course is an introductory survey of contemporary philosophy of science. We attempt to answer such central questions as: What reasons do scientists have for accepting current scientific theories? How can scientists test theories about unobservable entities? Is science a search for truth? Do scientists discover or construct facts about nature? Are scientific claims immune to cultural, social, and subjective influences? The last part of the course focuses on the moral issues that scientific and technological developments force us to face.

**PHIL 192 Introduction to Cognitive Science (also COGST 101 and PSYCH 102) (III)**

Fall. T R 11:15–12:30. Spivey.

This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second and third part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence. Does not count toward the Philosophy major or toward the Humanities Distribution Requirement in Philosophy.

**PHIL 193 Inequality, Diversity, and Justice (also CRP 293, GOVT 293, SOC 293) (III or IV)**

Fall. 4 credits. No prerequisites. Intended primarily for freshmen and sophomores. M W 2:30–3:20. The class will meet as a whole, for a lecture, F, 8:31, thereafter, lectures will be given M W. disc secs will be F, R Miller.

An interdisciplinary discussion of the nature and moral implications of social inequality, diversity and poverty and of the search for just responses to them. How unequal are economic opportunities in the United States today? How many people are in genuine poverty? What are the causes of poverty? To what extent, if any, does justice require government action to reduce current economic inequalities? Does race have special significance as a source of inequality? Does gender? Is affirmative action justified, as a response to such inequalities? How does membership in an ethnic group shape people’s lives, and how should it? How should governments deal with religious diversity and other differences in ultimate values (which give rise, for example, to radically different attitudes toward abortion, school prayer, and sexuality? Do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes, and historical case studies interact in the search for answers to these questions. To provide these resources, the course is taught by leading faculty researchers in philosophy, political theory, the social sciences, and law.

**PHIL 194 Global Thinking (also GOVT 294) @ (III or IV)**

The analysis taught is global in two independent respects: international subjects and interdisciplinary methods. We examine in depth questions raised by one of the most important and most difficult issues facing international society: when, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Rwanda. Neutrality when UN forces were withdrawn just before 800,000 were massacred, and Kosovo 1999, into which NATO intervened but only with airpower and without Security Council authorization. These recent cases raise fundamental questions about global governance in the 21st century. To what extent is the system of sovereign nation-states inherited from 17th century Europe still either desirable or unavoidable? Does every ethnic group have a right to self-determination? When, if ever, is the use of military force for purposes other than self-defense justified? To stop genocide? Should trials for war crimes routinely be held after military conflicts by the proposed International Criminal Court? Such moral issues are explored in the light of the political dynamics of foreign intervention and the evolving international legal regime, setting ethics in the context of politics and law.

**PHIL 210 Ancient Thought # (IV)**

**PHIL 211 Ancient Philosophy (also CLASS 231) # (IV)**

Fall. 4 credits. No prerequisites. T R 11:40–12:55. C. Brittain.

This course explores the origin and development of Western philosophy in Ancient Greece and Rome. We explore some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philosophers (Epicureans, Stoics, and Skeptics). Questions considered include: What are the nature and limits of knowledge? How reliable is perception? What are the basic entities in the universe: atoms, Platonic Forms, or Aristotelian substances? Is moral knowledge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will?

**PHIL 212 Modern Philosophy # (IV)**

Spring. 4 credits. M W F 10:10–11:00. T. J. Berry.

This course is an introduction to the ethical issues associated with contemporary medicine. No previous study of philosophy is presupposed. The course has two lectures and one discussion section per week. Topics to be covered include: the professional-patient relationship (including informed consent, medical confidentiality, and medical paternalism, and trust), contemporary problems such as abortion and euthanasia—beginning from these practical moral problems we investigate concepts such as illness, death, autonomy, quality of life and personhood, and the role of care in a just society. We consider competing conceptions of justice and arguments for entitlement to health care. Does justice require that all have access to basic health care? Does it require that all have access to approximately the same level of health care? What are the implications for access to health care from Kierkegaard, Nietzsche, Camus, Sartre, and Beauvoir. Topics discussed include: the relationship between freedom and responsibility; the idea that a self is something one "becomes"; the role of evaluation and commitment in becoming a self; the Sartrian doctrine that evaluations and commitments are ultimately based on "absurd" or "groundless" individual choices; the possibility of an ethics of authenticity and the relationship of the latter to what we normally think of as ethics; bad faith and self-deception; the role that relations to others play in the achievement of selfhood; and the relationship between the form and content in existentialist writings.

**PHIL 214 Aesthetics (IV)**

**PHIL 215 Ethics and Health Care (IV)**

Fall. 4 credits. M W F 10:10–11:00. T. J. Berry.

This course provides an introduction to the major themes of existentialism in philosophy and literature, as exemplified in central texts by leading faculty researchers in philosophy, political theory, the social sciences, and law.
resources by the requirement that we not discriminate on the basis of race or gender? In the course of investigating these topics, there questions emerge about what ethics is, and whether or not ethical judgments can be objective. Thus, in addition to learning how to arrive at and defend ethical positions, we reflect on the techniques and methods we use.

PHIL 246 Ethics and the Environment (also S&TS 206) (IV)
Spring. 4 credits. Open to all undergraduates; permission of instructor required for freshmen.

The aim of this course is to acquaint students with moral issues that arise in the context of the environment and environmental policy. Our concerns about the environment bring to our attention the importance of economic, epistemological, legal, political, and social issues in assessing our moral obligations to other humans and the natural world. Our attempt then is to explore how different factors come into play in defining our responsibilites to the environment and to examine the grounds for our environmental policy decisions.

PHIL 247 Ethics and Public Life (IV)

What kind of public life is worth having? This course examines the efforts of philosophers, social theorists, theologians, and others to understand the ethical dimensions of our lives as citizens of complex social and political communities. We consider several questions of pressing concern. To what moral standards should we hold those, such as politicians and journalists, whose professions involve service to the public? What moral obligations do citizens themselves have to those with whom they share a public life? What does morality tell us about how to draw the line between "public" and "private," for the purposes of public policy? Is it ever morally permissible (or even required) to opt out of demands that underwrite a stable public life—in civil disobedience, for instance, or in conscientious objection to some public policy?

PHIL 249 Feminism and Philosophy (also WOMNS 249) (IV)

An introduction using a variety of texts (philosophical, historical, literary, legal, and political) to feminist thought. Special attention is paid to sexual difference and the social construction of gender, and to how we frame various issues (e.g., whether pornography is primarily an issue about freedom of expression or about equal protection).

PHIL 261 Knowledge and Reality (IV)
Fall. 4 credits. T R 1:25-2:40. M. Fara.

This course provides an introduction to some central philosophical questions about the nature of the universe and our knowledge of it. Questions addressed include: What is the relation between mind and matter? What reason do we have to believe in the predictions of science? How do you know you're not dreaming right now? What is the nature of human freedom? Don't expect the course to answer these questions once and for all. Instead, expect to learn how to go about thinking about them, and how to distinguish a good philosophical argument from a bad one.

PHIL 262 Philosophy of Mind (IV)

There are a couple of central problems in philosophy of mind: What is consciousness? How does something in the skull get to be "about" something not in the skull? We try to make some headway on these issues. We also talk about such questions as whether we think in language, in pictures, in both, or in neither; whether we have any innate mental abilities and if so how many; and the nature of the self.

PHIL 263 Religion and Reason (IV)
Spring. 4 credits. M W F 11:15-12:05. S. MacDonald.

What must (or could) God be like, and what reasons do we have for thinking that a being of that sort actually exists? What difference would (or could) the existence of God make to our lives? This course examines the idea, common to several major world religions, that God must be an absolutely perfect being. What attributes must a perfect being have? Must it have a mind, be a person, care for human well-being, and be a being of a perfect being coherent? Is the existence of a perfect being compatible with the presence of evil in the world and the existence of human freedom? Does human morality depend on the view of the nature or will of a perfect being? Is a perfect being among the things that actually inhabit our universe? The course approaches these questions with the tools and methods of philosophical reason and through readings drawn from both classic and contemporary philosophical discussion.

PHIL 270 Truth and Interpretation (also LING 270/COGST 270) (III or IV)

PHIL 286 Science and Human Nature (also S&TS 286) (IV)

Intermediate or Advanced Courses
Some of these courses have prerequisites.

PHIL 309 Plato (also CLASS 339) (IV)
Fall. 4 credits. Prerequisites: at least one previous course in philosophy at the 200 level or above, or the permission of the instructor. T R 2:55-4:10. G. Finc.

We consider many of Plato's major dialogues, focusing on questions in metaphysics and epistemology, though some attention is also paid to his ethical theories, especially in the Republic. Among the topics considered are the following: the theory of Forms; Socrates' disavowal of knowledge; dialectic and recollection; the nature of knowledge and how to acquire it; the nature of the soul and moral motivation; justice and happiness.

PHIL 310 Aristotle (IV)
Spring. 4 credits. T R 1:10-2:25. B. Morrison.

This course is an introduction to several major aspects of Aristotle's Logic, Metaphysics, Physics, Biology, and Ethics. Topics covered include: argument and reason, science and knowledge, cause and effect, time and space, body and soul, good and bad, life and death, though not necessarily in that order.

PHIL 311 The Rationalists (IV)

PHIL 312 Modern Empiricism (IV)

PHIL 313 Twentieth-Century Continental Philosophy (IV)

PHIL 314 Ancient Philosophy: The World of Theory and the World of Ordinary Life (IV)

PHIL 315 Medieval Philosophy (IV)
Spring. 4 credits. M W F 1:25-2:15. S. MacDonald.

A survey of some main themes and major figures in medieval philosophy. Emphasis is on the close reading and analysis of representative texts, but some attention is given to the general historical development of philosophical thought and to the thousand years separating late antiquity and the Renaissance. Readings in (English translation) may include Augustine, Boethius, Anselm, Abelard, Aquinas, Scotus, and Ockham and address topics in metaphysics, epistemology, ethics, and philosophical theology.

PHIL 316 Kant (IV)
Fall. 4 credits. T R 10:10-11:25.

An introduction to Kant's main metaphysical and epistemological doctrines as presented in the Critique of Pure Reason, including: the nature of space and time, the justification of scientific knowledge, the nature of human reason and self-consciousness. Special attention is paid to Kant's critique of traditional metaphysics and his attempt to establish a new metaphysics, grounded in practical reason, that establishes the existence of God, human freedom, and morality.

PHIL 317 Hegel (IV)

PHIL 318 Origins of Twentieth-Century Philosophy (IV)

PHIL 319 Post-War Analytic Philosophy (IV)

Three central research topics in postwar analytic philosophy have concerned the nature of modality, the nature of meaning, and the links between modality and meaning. We start with Carnap's attempt to reduce the former to the latter. Then we move onto Quine's technical critique of this program. The two leading post-Quinean approaches to modality are that of Saul Kripke, which attempts to rehabilitate the metaphysical perspective on modality Carnap was trying to avoid; and that of David Lewis, which attempts to rehabilitate the Carnapian program against Quine's criticism. Quine also famously criticized the notion of meaning. Davidson attempted to save theorizing about meaning from this criticism by theorizing about meaning without appeal to meanings. We examine neo-Davidsonian approaches to meaning and challenges to them from the Kaplanites and the conceptual role theorists. If time permits we also address the degree to which language is conventional.
PHIL 320 17th Century Women
Philosophers (also WOMNS 319) (IV)
We look at the writings of such women thinkers as Lucrezia Marinella, Marie de Gournay, Anna Maria van Schurman, Elizabeth of Bohemia, Margaret Cavendish, Anne Conway, Mary Astell, and Damans Musham, attending to their philosophical positions—on causation, free will, virtue, the nature of substance, and the nature of women—and consider the ways in which they are in conversation with other more familiar philosophers of the 17c (including Montaigne (16c), Descartes, Leibniz and Locke (18c). Historiographical issues of how some philosophers and philosophical questions become canonical and others disappear from view lurk in the background.

PHIL 331 Deductive Logic (also MATH 201) (II)
Fall. 4 credits. Prerequisite: PHIL 231 or equivalent or permission of instructor. M W F 2:30–3:20. H. Hodes. Course topics include: review of derivations and truth-in-a-model; function-constants and identity, truth in non-fully-distinguished models; very basic set-theory; sets as the only mathematical objects; mathematical induction; soundness; and completeness.

PHIL 332 Philosophy of Language (IV)
Fall. 4 credits. T R 11:40–12:55. Z. Szabó. This course is an introduction to contemporary philosophy of language. About two thirds of the course is spent reading and discussing some of the classic work done between 1879 and 1905, and between 1967 and 1977, by philosophers such as Frege, Russell, Grice, Davidson, Kripke, and Kaplan. These papers are essential references points in contemporary debates not only in philosophy of language but in analytic philosophy in general. The rest of the course focuses on a specific topic: the interpretation of modal expressions, such as necessarily, possibly, ought, can, etc.

PHIL 333 Problems in Semantics (also LING 333 and COGST 333) (III or IV)

PHIL 334 Pragmatics (also LING 333) (IV)
Fall. 4 credits. Prerequisite: LING 201 or PHIL 231 or permission of instructor. T 2:30–5:00. D. Abusch.
An introduction to aspects of linguistic meaning which have to do with context and the use of language. Topics include context change semantics and pragmatics, presupposition and accommodation, conversational implicature, speech acts, and the pragmatics of definite descriptions and quantifiers.

PHIL 341 Ethical Theory (IV)

PHIL 343 Resistance and Responsibility (also LAW 678) (IV)

PHIL 344 History of Ethics: Ancient and Medieval (IV)

PHIL 345 History of Ethics: Modern (IV)

PHIL 346 Modern Political Philosophy (also GOVT 462) (III or IV)
Fall. 4 credits. T R 2:55–4:10. R. Miller.
A study of the leading contemporary theories of justice, including the work of Rawls, Nozick, Gauthier, and Scanlon. We discuss rival views of the moral significance of economic inequality, the kinds of freedom that governments ought to protect, the kinds of values and convictions that are a proper basis for laws (as opposed to being private matters), the tension between unequal political influence and democratic rights, and the roles of community, virtue, and group-loyalty in political justification. We are largely concerned with the conceptions of freedom, equality, obligation, and community underlying competing theories. We also consider implications for specific political controversies, e.g., over abortion, welfare programs, and pornography.

PHIL 361 Epistemology (IV)
Fall. 4 credits. T R 1:25–2:40. D. Graff. This course is a survey of some contemporary philosophical issues and debates in the study of knowledge. Our investigations include: (i) the possibility of knowledge, whether there is merit to the skeptical idea that we don't know much about anything, since for all we know, we're brains in vats, with all our experiences being wired in directly by benevolent scientists; (ii) the analysis of knowledge, whether knowledge is true justified belief or something else (and what is it anyway for a belief to be justified?); and (iii) the various means by which we acquire knowledge (if we do), such as through reason, perception, and the testimony of others.

PHIL 362 Philosophy of Mind (IV)

PHIL 363 Topics in the Philosophy of Religion (IV)

PHIL 364 Metaphysics (IV)
Spring. 4 credits. T R 1:25–2:40. M. Fara. This course focuses on problems surrounding the idea that we have "free will", that we are free to act in whatever way we choose. Are we free in this way? If we are, how does that fit with the idea that we inhabit a causally ordered universe? If we have free will, what (if anything) might that tell us about the relation between the past and the future? And what is the connection between having free will and being morally responsible for our actions? In exploring these and related questions, we look at a wide variety of work in metaphysics and philosophy of mind.

PHIL 365 Global Climate and Global Justice (also GOVT 368) (III or IV)

PHIL 366 Limiting War (also GOVT 469) (III or IV)

PHIL 371 Philosophy of Science: Knowledge and Objectivity (also S&TS 361) (IV)
Fall. 4 credits. W 7:30–10:00. R. Boyd. An examination of central epistemological and metaphysical issues raised by scientific theorizing: the nature of evidence; scientific objectivity; the nature of theories, models, and paradigms; and the character of scientific revolutions.

PHIL 382 Philosophy and Psychology (IV)

PHIL 383 Choice, Chance, and Reason (IV)

PHIL 384 Philosophy of Physics (IV)

PHIL 387 Philosophy of Mathematics (IV)

PHIL 390 Informal Study
Fall or spring. Credit TBA. To be taken only in exceptional circumstances. Must be arranged by the student with his or her adviser and the faculty member who has agreed to direct the study.

Advanced Courses and Seminars
These courses are offered primarily for majors and graduate students.

PHIL 395 Majors Seminar

PHIL 409 German Philosophical Texts (IV)

PHIL 410 Latin Philosophical Texts (also CLASS 311) (IV)
Fall and spring. Variable credit. Prerequisites: knowledge of Latin and permission of instructor. Hours TBA. S. MacDonald. Reading of philosophical texts in the original Latin.

PHIL 411 Greek Philosophical Texts (also CLASS 311) (IV)
Fall and spring. Variable credit. Prerequisites: knowledge of Greek and permission of instructor. Hours TBA. Staff. Reading of philosophical texts in the original Greek.

PHIL 412 Medieval Philosophy (IV)

PHIL 413 Topics in Ancient Philosophy (also S HUM 402 and 403) (IV)

PHIL 414 German Philosophy after Kant (IV)

PHIL 415 Special Topics in the History of Philosophy (IV)

PHIL 416 Modern Philosophy (IV)
Fall. 4 credits. M 12:20–2:15. L. Shapiro.
We consider the theories of the passions or emotions of several philosophers of the Early Modern period, including Descartes, Spinoza, and Hume. Of particular concern are accounts of the representationality of the passions, the way these accounts put pressure on or resolve tensions in theories of mind and human nature, and the place of the passions in accounts of moral psychology.

PHIL 431 Mathematical Logic (also MATH 481) (II)

PHIL 432 Topics in Logic (also MATH 482) (II)
PHIL 433 Philosophy of Logic

PHIL 434 The Foundations of Mathematics (also MATH 384) (II)
Fall. 4 credits. M W F 1:25–2:15. H. Hodes.
Set-theory is the standard theoretical basis for mathematics (there are competitors).
Primarily this is a course on set-theory, based on H. Enderton's text Elements of Set Theory.

PHIL 435 Topics in the Philosophy of Language (IV)

PHIL 436 Intensional Logic (II)

PHIL 443 Aesthetic Theory (IV)

PHIL 444 Contemporary Legal Theory (IV)

PHIL 446 Topics in Social and Political Philosophy (also GOVT 474) (III or IV)

PHIL 447 Contemporary Political Philosophy (also GOVT 465) (III or IV)

PHIL 460 Epistemology (IV)
Fall. 4 credits. M 7:30–10:00. B. Hellie.
The talk about Tim Williamson's recent book Knowledge and its Limits, which is interesting in its own right. The work is of interest not only for its exposition of Aristotelian and Stoic Logic, but also for a mysterious third kind of reason which Galen introduces, namely relational reasoning.

PHIL 461 Feminist Epistemology (also WOMNS 461) (IV)

PHIL 462 Philosophy of Mind (IV)

PHIL 463 Philosophy of Language

PHIL 464 Morality, Self, and Psychopathology
Philosophical accounts of personal identity typically aspire to a kind of universality; each account tends to represent itself as the (presumably uniquely) correct account implying the falsity of its various rivals (e.g., psychological continuity theories implying the falsity of bodily continuity theories and vice versa). To the extent that we are dealing with selves—i.e., partially reflexive entities—it seems possible that different self-conceptions might yield different sorts of selves, some more and some less bodily (or psychological) than others. We will examine this sort of "contingency of selfhood" both cross-culturally (looking at non-Western conceptions of self and at the Buddhist ideal of self-dissolution) and psychopathologically (looking at pathological configurations of self such as those involved in autism, schizophrenia, multiple-personality disorder, and eating disorders), treating the study of psychopathology as akin to ethnography. The idea is to see whether forms of selfhood that we take for granted and perhaps even view as inescapable are in fact contingent and optional. We can then ask what sorts of selfhood it is valuable to cultivate. This raises the difficult question of the point(s) of view from which we are to make such assessments.

PHIL 465 Philosophy of Science (IV)

PHIL 466 Philosophy of Science

PHIL 467 Medieval Philosophy

PHIL 468 Modern Philosophers

PHIL 469 History of Philosophy

PHIL 470 Philosophy of Language
The topic of the seminar is vagueness and the sorites paradox. The vagueness of a predicate like 'tall woman' is metaphysically characterized by saying that there is a "fuzzy boundary" between the things it applies to and those it doesn't. The sorites paradox of antiquity (also known as "the paradox of the heap") arises from thoughts such as, "If I'm tall before I go to bed then even if I shrink 1mm overnight, I'll still be tall when I wake up," which, though attractive, apparently lead to absurdity. We will question what the fuzziness that's characteristic of vagueness amounts to; what is the relation between vagueness and perception; how are we to resolve the sorites paradox; does vagueness require us to abandon Bivalence and the Law of Excluded Middle; can the epistemological and metaphysical problems about vagueness be adequately handled by some such revision to classical logic or semantics.

PHIL 471 Ethics and Value Theory

PHIL 472 Philosophy of Mind
PHIL 664 Metaphysics  
Fall. 4 credits. T 4:30-5:30. S. Shoemaker.  
Topic: Color and color experience.

PHIL 665 Metaphysics  
Spring. 4 credits. M 4:30-5:30. M. Fara.  
It is frequently taken for granted in many areas of philosophy that we understand the notion of a disposition. In this seminar, by looking at some issues in the metaphysics of dispositions, we see just how problematic that notion is. Among the questions we consider are: What, in general, does it take for something to have a disposition? How do we distinguish dispositions from other kinds of properties? What is the relation between dispositions and their "categorical bases"? Are dispositions "reducible," and what does this mean? Do dispositions cause their manifestations? Are dispositions intrinsic properties of their bearers? In addressing these questions, we touch on a wide range of topics in metaphysics, including causation, causal explanation, laws of nature, and the intrinsic/extrinsic distinction.

PHIL 681 Philosophy of Science  
Spring. 4 credits. W 7:30-10:00. R. Boyd.  
Topic: Topics in the philosophy of science.

PHIL 682 Philosophy of Social Science  

PHIL 700 Informal Study  
Fall or spring. Credit TBA.  
To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee and the faculty member who has agreed to direct the study.

PHIL 773 Proseminar in Cognitive Studies (also COGST 773, LING 773, and COM S 773)  
For description, see COGST 773.

PHIL 774 Proseminar in Cognitive Studies (also LING 774 and COGST 774)  
For description, see COGST 774.

PHYSICS  
The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by two component organizations, the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Nuclear Studies (LNS). LASSP carries out extensive research efforts in condensed-matter physics and in low-temperature physics. LNS operates a major high-energy particle physics research facility at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Students will find many opportunities for research participation and summer employment.

• For majors with concentrations outside physics, there will be wide variation in individual programs, arranged to best match the field of concentration.
• Crossovers between the two sequences 112–113–214 and 116–217–218 are possible, although the combinations 112–217–218 and 112–213–218 are difficult. PHYS 207 may be substituted for PHYS 112. Students taking 217 after 112 must coregister for 216.
• Students taking the honors sequence 116–217–218 are strongly encouraged to start with PHYS 116. Exceptionally well-prepared students may be able to begin work at Cornell with PHYS 217. Such students should come to the department office for advice in planning a course program.
• Physics electives for the major include 360, 444, 454, 455, 480, 490, 525, 533, 561, 572, the senior seminars 481–489, ASTRO 532 or 431–432, and A&EP 434.
• One semester of intermediate laboratory, listed here as 3x0, is required.
• Well-prepared sophomores wishing to take PHYS 318 should consult the instructor before registering.

The Major  
The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals. Students who wish to major in physics are advised to start the physics sequence in the first term of their freshman year. (Note that students who have had contact with introductory calculus may take PHYS 112 with co-registration in MATH 190 or 191.) The major program can still be completed with a second-term start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of a year of physics and mathematics courses at Cornell with all course grades at the B-level or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major adviser.

Physics Core  
Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-term introductory sequence (PHYS 112–213–214 or PHYS 116–217–218), the core includes five upper-level courses—(a) the two-course sequence in modern physics (PHYS 316–317), (b) at least three semester hours of laboratory work selected from PHYS 310, 330, 360, 410, Astronomy 410, (c) an intermediate course in classical mechanics, and (d) an intermediate course in electromagnetism.
Accompanying these physics courses should be work in mathematics through at least MATH 222 or 294. Students following the professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (A&E 321–322 or MATH 321-420-422). In addition to the core, each physics major must complete 15 semester hours of credit in an area of concentration which has been agreed on by the student and major faculty adviser.

Concentration within Physics
A student who wishes to pursue professional or graduate work in physics or a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence PHYS 116–217–218 is encouraged. Students are strongly encouraged to start the sequence with PHYS 116, even if they qualify for advanced placement credit for PHYS 112. Core courses in mechanics and electromagnetism will normally be PHYS 318 and PHYS 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course PHYS 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who follow the different sequences is the amount and level of pre-college work in calculus and in physics. Changes in these typical patterns will be common, as agreed on between student and major faculty adviser. Research work is encouraged of all majors. If this work is done as an independent project, PHYS 490, up to eight credits can be applied to the concentration.

Concentration outside Physics
The concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty adviser and must be approved by the adviser. Of the required 15 hours credit beyond the core, at least eight credits must be in courses numbered above 300. Students have chosen to concentrate in such topics as chemical physics, astrophysics, natural sciences, history and philosophy of science, computer science, meteorology, or econometrics. A combined biology-chemistry concentration is appropriate for pre-medical students or those who wish to prepare for work in biophysics. Students interested in a career in the teaching of science should consider the Teacher Education in Science and Mathematics (TESM) Program, which is administered by the Departments of Education and Mathematics and is described in detail in the College of Education section of this catalog. A concentration in "science education" would then typically include EDUC 402 and 403, both of TESM, and two or more courses designed to broaden the student's background in general science and mathematics.

For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with PHYS 314 and PHYS 325, respectively.

Students with an astronomy concentration who might continue in that field in graduate school should use ASTRO 410, 431, 432 as part of the concentration; they are encouraged to use PHYS 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

Honors
A student may be granted honors in physics upon the recommendation of the Physics Advisers Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

Double Majors
Double majors including physics are possible and not at all uncommon. It should be noted, however, that any course used to satisfy a requirement of another major may be used in satisfaction of physics major requirements only if the student's concentration is within physics.

Courses with Overlapping Content
Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content.

In general, students may receive credit for only one of the courses in each group.

Course Prerequisites
Prerequisites are specified in physics course descriptions to illustrate the materials that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisites ordering are urged to discuss their preparation and background with a physics adviser or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

Courses
Listed days and times are not definite but are unlikely to change. Days and times are not listed for 600-level courses.

PHYS 101 General Physics I (I)
Fall, summer 4-week or 8-week session. 4 credits. Prerequisite for PHYS 102: PHYS 101 or 112 or 207. Includes less mathematical analysis than PHYS 208, but more than PHYS 200–206, 209, 210. Enrollment may be limited. Fall introductory lec, M Jan. 24, 7:30 P.M. Staff.

PHYS 101–102 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit. Most instruction occurs in the learning center using video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 101: kinematics, forces and dynamics, momentum, energy, fluid mechanics, waves and sound, thermal physics, kinetic theory, and thermodynamics. At the level of Physics 5th edition by Cutnell and Johnson.

PHYS 102 General Physics II (I)
Spring, summer 4-week or 8-week session. 4 credits. Prerequisite for PHYS 102: PHYS 101 or 112 or 207. Includes less mathematical analysis than PHYS 208, but more than PHYS 200–206, 209, 210. Enrollment may be limited. Spring introductory lec, M Jan. 24, 7:30 P.M. Staff.

PHYS 101–102 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit each term. Most instruction occurs in the learning center using video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 102: electricity and magnetism, optics, relativity, atomic, quantum, and nuclear physics. At the level of Physics 5th edition by Cutnell and Johnson.

PHYS 103 General Physics (I)
Summer. 4 credits. Prerequisite: 3 years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for PHYS 103. PHYS 103 is a more traditional version of PHYS 101. PHYS 103 is not appropriate for students majoring in physics or engineering, it is primarily for students majoring in the life sciences. Lec, M-F 10:00–11:15; laboratories M W 2:00–5:00.

Basic principles treated quantitatively but without calculus. Topics include: kinematics; forces and fields; momentum, angular momentum, and energy; thermal physics and fluid mechanics; sound waves. Text at the level of Physics 5th edition by Cutnell and Johnson.

PHYS 112 Physics I: Mechanics (II)
Fall, spring, summer 6-week session. 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisite: coregistration in MATH 192 (or 194 or 112), or substantial previous contact with introductory calculus combined with coregistration in MATH 111 or MATH 112. Lec, M W 10:10–11:00 or 12:20–1:10. Two rec. and one lab/cooperative learning session each week. Evening exams. Fall, A. LeClair; spring, staff.

Course covers the mechanics of particles with focus on: kinematics, dynamics, conservation laws, central force fields, periodic motion. Mechanics of many-particle systems: center of mass, rotational mechanics of a rigid body, and static equilibrium. At the level of University Physics, Vol. I, by Young and Freedman.
PHYS 116 Physics I: Mechanics and Special Relativity (I)
Fall, spring. 4 credits. More analytic than PHYS 112, intended for students who will be comfortable with a deeper, somewhat more abstract approach. Intended mainly but not exclusively for prospective physics majors or applied and engineering physics majors. Prerequisites: a good secondary school physics course, familiarity with basic calculus, and enjoyment of puzzle-solving. Corrective transfers between PHYS 116 and PHYS 112 (in either direction) are encouraged during the first several weeks of instruction. Lec M W F 10:10–11:00.

A more rigorous version of PHYS 112, covering similar topics at the level of An Introduction to Mechanics, by Kleppner and Kolenkow.

PHYS 117 Concepts of Modern Physics
Fall. 1 credit. S-U only. Enrollment may be limited. Coregistration in PHYS 112 or 116 or 213 or 217 is required. For freshmen who plan to major in physics, applied and engineering physics, or astronomy. Lec. W 1:25–2:15; P.M. A. Sadoff.

This course is intended for freshmen who plan to major in physics or a closely related field (i.e., applied and engineering physics or astronomy) and who would like to learn about the concepts of modern physics early in their physics education. Possible topics of discussion are methodology, symmetry and conservation laws, quantum theory, the unification of forces and matter, and big-bang cosmology.

PHYS 190 Supplemental Introductory Laboratory
Fall, spring. 1 credit. Times by arrangement with instructor. S–U only. Enrollment limited to students who have all of the following: (1) 3 transfer credits for introductory physics lecture material, (2) a degree requirement of the laboratory component of that introductory course, (3) approval of the director of undergraduate studies, and (4) permission of the lecturer of that course at Cornell. Enrollment limited.

A PHYS 190 Permission Form must be filed in 121 Clark Hall with the physics department course coordinator. Students perform the laboratory component of one of the introductory courses (PHYS 112 or 116) to complement the lecture-related course credit acquired elsewhere. Those wishing to take the equivalent of one of these introductory courses at another institution should receive prior approval from the director of undergraduate studies.

PHYS 200 Art, Archaeology, and Analytical Paleoecol. (1 or IV)
For description, see EAS 200.

PHYS 201 Why the Sky Is Blue: Aspects of the Physical World (I)

A. Sadoff.

This is a descriptive physics course aimed specifically at the nonscience student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overriding theme is the character of physical laws as shown through the great principles of symmetry and conservation. While there are a few computational problems assigned, the purpose is to help students to understand the concepts rather than to master problem-solving techniques. At the level of Physics Concepts and Connections by Hobson.

PHYS 202 The World According to Physics—The Way Things Work (I)
Summer—3 week session. 3 credits.

Prerequisite: 3 years of high school mathematics, including some trigonometry. M–F 10:00–12:00; laboratories 2 afternoons per week TBA. R. Liefman.

Intended to provide students majoring in fields outside the sciences with an appreciation for the familiar physical world surrounding them. Which falls faster, a pound of gold or a pound of feathers? What trajectory does a launched rocket follow? Why are the curves on highways banked? What actually keeps a satellite circling the earth—why doesn't it just fall down or fly away? Can you build a ship that runs off the heat found in the ocean? With an emphasis on problem solving, the course helps the students develop skills transferable to other areas. Topics include Newton's basic laws of motion, trajectories, satellites, space travel, and the concepts of energy.

PHYS 203 Physics of the Heavens and the Earth—A Synthesis (I)

This course shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and understanding. The material is divided into three parts: the physics of motion on earth and motion in the heavens, showing how the two evolved separately, from the ideas of the ancient Greeks to the dynamics and telescopic discoveries of Galileo; the final melding of these two topics with Newton's Universal Gravitation; and an exploration of this "new" physics and its impact. There is an emphasis throughout on "how do we know the laws?" These are the stories of breakthroughs and brilliant insights made by fascinating people, offering a humanistic perspective.

PHYS 205 Reasoning about Luck (I or II)
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but uses high school algebra. Lec. M W 2:55–4:10; Rec. T 2:30–3:20.

An attempt to explain how natural scientists can cope rationally with randomness. The first part of the course deals with the basic ideas of probability theory and explains why it is that in large systems likely events can become overwhelmingly likely. If we apply these ideas to gases consisting of very large numbers of molecules, an explanation of the true nature of heat follows. In this way, students are given a deep understanding of the second law of thermodynamics. Probability enters into quantum mechanics in a more basic and somewhat mysterious way. We will spend the latter part of the course giving simple examples of the difference between classical and quantum probability. In particular, we discuss what is meant by an "entangled state" and how we know there are no hidden variables. At the level of Reasoning About Luck: Probability and Its Uses in Physics by Ambegaokar.

PHYS 206 Physics in the News (I)
Spring. 3 credits. Prerequisite: high school algebra. Intended for non-science majors. Does not serve as a prerequisite for further science courses. Lec. T R 1:25–2:40. One rec. each week. N. Mistry.

"Physics in the News" examines the physics concepts behind the everyday news headlines. Typical topics include space exploration, global warming, medical imaging, magnetic levitation trains and electric cars, asteroid impacts, and other interesting headlines that may occur during the semester. This course is intended for non-science majors and is mainly descriptive. Our tools for understanding these topics are some of the most basic principles of physics, illustrated using algebra at the high school level. Detailed lecture notes are provided on the web. Readings are from the scientific press at the level of Scientific American and the text by Hobson listed below. Students are encouraged to explore the causal and environmental aspects of some of the more debatable topics through articles and webpages. At the level of, Physics, Concepts and Connections, 2nd edition, by Art Hobson.

PHYS 207 Fundamentals of Physics I (I)
Fall. 4 credits. Prerequisites: high school physics plus MAT 111 or 191, or substantial previous contact with introductory calculus, combined with coregistration in a math course approved by instructor. Lec. M W F 9:05–9:55 or 11:15–12:05; two rec. and one lab each week. Evening exams. R. Thorne.

PHYS 207–208 is a two-semester introduction to physics, intended for students majoring in an analytically oriented biological science, a physical science, or mathematics with emphasis on applications and on quantitative tools generally applicable to the sciences. Course covers: mechanics, conservation laws, waves, and topics from classical physics, fluids, acoustics, and properties of matter. At the level of Fundamentals of Physics, Vol. I, 5th edition, by Halliday, Resnick, and Walker.

PHYS 208 Fundamentals of Physics II (I)
Spring. 3 credits. Prerequisites for PHYS 208: PHYS 207 or 112 or 101 and at least coregistration in MATH 112 or 192. PHYS 207–208 is a two-semester introduction to physics with emphasis on tools generally applicable in the sciences, intended for students majoring in a physical science, mathematics, or an analytically oriented biological science. Lec. M W F 9:05–9:55 or 11:15–12:05; two rec. and one lab each week. Evening exams. Staff.

Course covers electricity and magnetism, and topics from physical and geometrical optics, quantum and nuclear physics. At the level of Fundamentals of Physics, Vol II, 5th edition, by Halliday, Resnick, and Walker.

PHYS 209 Relativity and Chaos (I or II)
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but uses high school algebra. Lec. T R 1:25–2:40; Rec. M 2:30–3:20 or M 3:55–4:25.

We examine two revolutionary fields of classical physics, one venerable and one
relatively recent: the special theory of relativity is developed, with a view to understanding how certain simple but apparently contradictory facts about light lead to extraordinary insights into the nature of time; and the newer subject of "chaos" is explored, with a view to seeing how extremely simple rules can lead to behavior of breathtaking complexity.

**PHYS 213 Physics II: Heat/ Electromagnetism (I)**

Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: PHYS 112 and coregistration in the continuation of the mathematics sequence for PHYS 112. Lec, T R 9:05-9:55 or 11:15-12:05, two rec. each week and six 2-hour labs. Evening exams.

Fall, J. Rogers; spring, staff.

Course topics include: temperature, heat, thermal energy, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday’s law, Maxwell’s equations, and electromagnetic oscillations. At the level of University Physics/Vol. 162, by Young and Freedman. Laboratory covers electrical measurements, circuits, and some aspects of heat transfer.

**PHYS 214 Physics III: Optics, Waves, and Particles (II)**

Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: PHYS 213 and completion of a course in differential equations. Two rec. each week and one 3-hour lab alternate weeks.

Evening exams. Lec, T R 9:05-9:55 or 11:15-12:05, Fall, T. Arias; spring, staff.

Physics of wave phenomena, electromagnetic waves, interference and diffraction effects, wave properties of particles and introduction to quantum physics. Course includes computer use in solving problems and labs. At the level of University Physics, Vol. 162, by Young and Freedman.

**PHYS 216 Introduction to Special Relativity**

Fall, spring, based on preregistration. 1 credit. S-U only. Enrollment may be limited. Course is completed within first 4 to 6 weeks of term. Coregistration in this course is a requirement for registration in PHYS 217. Each student has taken a relativity course at the level of PHYS 116 or ASTRO 106. Prerequisites: PHYS 112 or PHYS 207 or permission of instructor. Lec, T R 8:00-8:50. Fall, J. Rogers; spring, staff.

Introduction to Einstein’s Theory of Special Relativity including: Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum, and relativistic invariance in the laws of physics. At the level of An Introduction to Mechanics by Kleppner and Kolenkow.

**PHYS 217 Physics II: Electricity and Magnetism (also A&E 217) (I)**

Fall, spring, 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 112 or 116 and in mathematics and who desire a more analytic treatment than that of PHYS 213. Prospective physics majors are encouraged to select PHYS 217. Prerequisites: approval of department and permission from the instructor. A placement quiz may be given early in the semester, permitting those students who find PHYS 217 too abstract or analytical to transfer into PHYS 213, which they can do without difficulty at that time. Vector calculus is taught in this course, but previous contact, especially with the operations grad, div, and curl, is presumed. It is assumed the student has seen Special Relativity at the level of PHYS 116 or is currently enrolled in PHYS 216. It is also assumed that the student has covered the material of MATH 192 and is coregistered in MATH 293 or equivalent. Lec. M W F 10:10–11:00.

Fall, A. Sievers, spring, R. Buhman.

At the level of Electricity and Magnetism, by Purcell (Vol. 2, Berkeley Physics Series).

**PHYS 218 Physics III: Waves and Thermodynamics (II)**

Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 116 and 217 and in mathematics, and who desire a more analytic treatment than that of PHYS 214. Prospective physics majors are encouraged to select PHYS 218. Prerequisites: PHYS 217 (with a grade of B or higher) and completion of a course in differential equations or permission of instructor. A placement quiz may be given early in the semester so that students who find PHYS 218 too demanding can transfer into PHYS 214. Lec. M W F 11:15–12:05, Fall, N. Ashcroft; spring, staff.

Physics of wave phenomena, electromagnetic waves, physical and geometrical optics, and the first and second laws of thermodynamics. Evening exams may be scheduled. At the level of Waves by Elmore and Head.

**PHYS 310 Intermediate Experimental Physics (I)**

Spring. 5 credits. Enrollment may be limited. Prerequisite: PHYS 208 or 213. Labs T R 1:25-4:25. Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the PHYS 410 lab are available for some experiments.

**PHYS 314 Intermediate Mechanics (I)**

Spring. 4 credits. Prerequisites: PHYS 208 or 214 (or equivalent) and MATH 294 (or equivalent). Intended for physics majors with concentration outside of physics or astronomy. PHYS 318 covers similar material at a more analytical level. Lec. M W F 10:10–11:00, rec. F 1:25–2:15.

C. Franck.

Likely topics include: Lagrangian mechanics, Newtonian mechanics based on a variational principle; conservation laws from symmetries; two-body orbits due to a central force; Newtonian mechanics of particles and systems; gravitation and planetary motion; moving coordinate systems; Euler’s equations; Lagrange and Hamilton formulations, normal modes and small vibrations; introduction to chaos. At the level of Classical Mechanics by Goldstein, Classical Dynamics by Marion and Thornton, and Analytical Mechanics by Hand and Finch. Supplementary reading is assigned.

**PHYS 322 Intermediate Electricity and Magnetism (I)**

Fall. 4 credits. Prerequisites: PHYS 208 or 213/214 (or equivalent) and MATH 293/294 (or equivalent); coregistration in A&E 321 or MATH 420 recommended. Intended for physics majors with a concentration outside of physics or astronomy; PHYS 327 covers similar material at a more analytical level.

Course topics include: electro/magneto-statics, boundary value problems, dielectric and magnetic media, Maxwell’s Equations, electromagnetic waves, and sources of electromagnetic radiation. At the level of Introduction to Electrodynamics by Griffiths.

**PHYS 327 Advanced Electricity and Magnetism (I)**

Fall. 4 credits. Prerequisites: PHYS 217/218 or permission of instructor; coregistration in A&E 321 or MATH 420. Intended for physics majors concentrating in physics or astronomy. PHYS 327 covers similar material at a less demanding level. Lec. M W F 10:10–11:00, rec. F 2:30–3:20. L. Gibbons.

energy-momentum of radiation; electrodynamics in media; and special relativity-transformations, for vectors, particle kinematics and dynamics, relativistic electrodynamics. At the level of Classical Electromagnetic Radiation, by Heald and Marion.

**PHYS 330 Modern Experimental Optics (also A&EP 330) (I)**
Fall. 4 credits. Prerequisite limited. Prerequisite: PHYS 214 or equivalent. Lect, W 12:20–1:10; Lab, M T 1:25–4:25. M. Wang.

A practical laboratory course in basic and modern optics. The six projects cover a wide range of topics from geometrical optics to classical wave properties such as interference, diffraction, and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. Students are also introduced to digital imaging and image processing techniques. At the level of Optics by Hecht.

**PHYS 341 Thermodynamics and Statistical Physics (I)**
Fall. 4 credits. Prerequisites: PHYS 214, 316, and MATH 294. Lect, M W F 10:10–11:00, rec, R 2:30–3:20. V. Ambegaokar. Courses cover: statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Also covers concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, and free energy. Applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems, and introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of Fundamentals of Statistical and Thermal Physics, by Reif, or Introduction to Statistical Mechanics by Betts.

**PHYS 360 Electronic Circuits (also A&EP 363) (I)**
Fall, spring. 4 credits. S-U grade option available by permission of the instructor for students who do not require this course for their major prerequisites: undergraduate course in electricity and magnetism (e.g., PHYS 208, 213, or 217) or permission of the instructor. No previous electronics experience is assumed, although it will be of considerable benefit. Prerequisites: PHYS 214, 316, 318, or 327, or permission of instructor. Lect, M T W 1:25–4:25. Fell, L. Hand; spring, D. Hartill. Experiments of widely varying difficulty in one or more areas, as listed under PHYS 410, may be done to fill the student's special requirements.

**PHYS 410 Advanced Experimental Physics**
Fall, spring. 4 credits. Limited to seniors except by special permission. Prerequisites: PHYS 214 (or 310 or 360) plus 318 and 327, or permission of instructor. Lect, M T W F 12:30–3:20, lab T W 1:25–4:25. Fell, L. Hand; spring, D. Hartill. Selected topics in experimental concepts and techniques. About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic and nuclear physics. The student performs three to six diverse experiments, depending on difficulty, selected to meet individual needs and interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

**PHYS 443 Introductory Quantum Mechanics (I)**
Spring. 4 credits. Prerequisites: PHYS 327 or 323, and PHYS 316 and A&EP 321 or MATH 420; coregistration in PHYS 314 or 323; and PHYS 316 and A&EP 321 or MATH 420; coregistration in PHYS 314 or 323; and PHYS 316 and A&EP 321 or MATH 420; coregistration in PHYS 314 or 323; and PHYS 316 and A&EP 321 or MATH 420. Lee, M W F 9:05–9:55, rec, R 3:35–4:25. S. Teukolsky. This course provides an introduction to concepts and techniques of quantum mechanics, at the level of An Introduction to Quantum Mechanics, by Griffiths.

**PHYS 444 Nuclear and High-Energy Particle Physics (I)**
Spring. 4 credits. Prerequisites: PHYS 316 or MATH 420; coregistration in PHYS 314 or 323; and PHYS 316 and A&EP 321 or MATH 420; coregistration in PHYS 314 or 323; and PHYS 316 and A&EP 321 or MATH 420. Lee, M W F 9:05–9:55, rec, R 2:30–3:20. J. Rogers. The course begins with a phenomenological description of atomic nuclei made of neutrons and protons. This includes what is measured and how one may use nuclear interactions as a source of energy. The study of proton-nuclear interactions led to the discovery of many new particles. The course then goes into the behavior of high-energy particles and radiation; elementary properties of accelerators and detectors; general symmetries and conservation laws. At the level of Concepts of Particle Physics, by Gottfried and Weisskopf or Modern Elementary Particle Physics by Kane.

**PHYS 451 Classical Mechanics, Nonlinear Dynamics and Chaos (also PHYS 551) (I)**
Spring. 3 credits. Only students with a strong performance in PHYS 318 or the equivalent will be admitted to the course. Five-week twenty-hour seminar to be scheduled. Lee, T R 10:10–11:25. Next offered spring 2002. L. Hand. This course provides an introduction to advanced topics in modern classical mechanics: methods of formulating both discrete and continuum Hamiltonian dynamics, classical field theory, canonical transformations, action-angle variables, the Hamilton-Jacobi equation, connection between classical and quantum mechanics, solvable, integrable, and nonintegrable systems, and KAM tori. Includes analytic techniques in nonlinear dynamics with examples chosen from a variety of systems of physical interest, phase-locking and fractional order resonances, and classification of bifurcations. Also covers dissipative and Hamiltonian chaos: logistic and standard maps, renormalization, KAM theorem, and quantum chaos. Some fluid dynamics and Sturm-Liouville theory included as time permits. The first part of the course is at the level of Theoretical Mechanics of Particles and Continua, by Fetter and Walecka; the second part is at the level of Regular and Chaotic Dynamics, 2nd edition, by Lichtenberg and Lieberman.

**PHYS 454 Introductory Solid-State Physics (also A&EP 450) (I)**
Fall. 4 credits. Prerequisite: PHYS 443, A&EP 361, or CHEM 793 is highly desirable but not required. Lect, M W F 9:05–9:55. Computer lab: W or R 2:30–4:25. F. Wise. An introduction to modern solid-state physics, including crystal structure, lattice vibrations, electronic theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, superconductivity, and defects. At the level of Introduction to Solid State Physics, by Kittel, and Solid State Physics, by Ashcroft and Mermin.

**PHYS 455 Geometrical Concepts in Physics (I)**
Spring. 4 credits. Prerequisite: PHYS 323 or equivalent and at least coregistration in PHYS 318 or permission of instructor. Usually offered every other spring. Lect, T R 10:10–11:25. R. Talman. Geometrical methods are an essential tool in modern theoretical physics and also provide deep insights into classical physics. This course introduces basic concepts from differential geometry, emphasizing calculational methods and illustrating their utility by drawing examples from mechanics, electrodynamics, and crystal diffraction. Tensors, differential forms, covariant and Lie derivatives, Lie algebras of vector fields, and gauge invariance are developed and employed. At the level of Geometric Mechanics by Talman.

**PHYS 456 Introduction to Accelerator Physics and Technology (also PHYS 658) (I)**
Fall. 3 credits. Prerequisites: Intermediate E&M (PHYS 323 or 327) and Classical Mechanics (PHYS 314 or 318). Lect, T R 10:10–11:25. Not offered 2001-2002. G. Dugan. Fundamental physical principles of particle accelerators and enabling technologies, with a focus on circular high energy colliders, such as the Cornell Electron Storage Ring (CESR). Includes beam dynamics, the single particle dynamics of transverse and longitudinal motion, the role of synchrotron radiation, nonlinear and coupled motion, and collective effects. The physics of some of the required technologies (radio frequency cavity systems, vacuum systems, and magnets) will be covered in seminars conducted by experts. At the level of Introduction to the Physics of High Energy Accelerators by Edwards and Syphers.
This course covers physics of synchrotron radiation with a focus on characteristics of radiation from dipole magnets, electron beam properties that influence radiation characteristics, issues of flux, brightness, emittance, brilliance, beam stability, and beam lifetime. Regular lecture alternate with visitors lecture topics on special chapters on radiation from insertion devices (i.e., wigglers and undulators), x-ray optics, coupling to beams, and coherence in x-ray beams. There is special emphasis on understanding the requirements of experimental x-ray applications and hands-on opportunities for doing synchrotron radiation experiments. Course notes are made available on a web site.

### PHYS 480 Computation Physics (also PHYS 680 and ASTRO 690) (I)

Spring, 3 credits. S-U grades only. The course will cover the main topics in the standard mathematical methods for the physical sciences and engineering, differential equations and linear algebra in particular and with computer programming (e.g., Fortran or C). Lect, T R 8:40-9:55.

T. Arias.

This course covers numerical methods for ordinary and partial differential equations, linear algebra and eigenvalue problems, nonlinear equations, and fast Fourier transforms from the hand-on perspective of how they are used in modern computational research in the era of open software and the web. The computer assignments which teach the material are designed also to achieve a larger goal: In the end, each student has developed his or her own working ab initio computer program for calculating the properties of molecules and materials with the methods which won Walter Kohn and John Pople the Nobel prize in Chemistry in 1998.

### PHYS 481 Quantum Information Processing (also PHYS 681 and RegSci 6 4 6)

Spring, 2 credits. S-U only. Lect, T R 1:25-2:15.

N. David Mermin.

A technology firmly grounded on fundamental principles of quantum physics can spectacularly alter both the nature of computation and the means available for the transmission of information. Though implementation may be extremely difficult to achieve, the theory of quantum computation offers striking new perspectives on computation and information, as well as on the quantum theory itself. Topics include an introduction to the relevant principles of quantum physics, quantum cryptography, quantum bit commitment, teleportation, Shor's factoring algorithm, Grover's search, quantum circuits, and quantum error correction. The subject is developed in a manner suitable both for physicists, unfamiliar with computational complexity theory, and computer scientists and mathematicians familiar with the principles of quantum mechanics. Familiarity with the theory of vector spaces over the complex numbers is assumed.

### PHYS 487 Selected Topics in Accelerator Technology (also PHYS 687)

Fall. 2 credits. S-U only. Prerequisites: intermediate E&M (PHYS 323 or 327) and Classical Mechanics (PHYS 314 or PHYS 318). Lect, T R 10:10-11:25.

A. G. Dugan.

Course covers fundamental physical principles of particle accelerators and enabling technologies, with a focus on circular high energy accelerators. Introduction to the Cornell Electron Storage Ring (CESR). Includes beam optical design, the single-particle dynamics of transverse and longitudinal motion, collective motion, the role of synchrotron radiation, and the interactions of beams. The physics of some of the required technologies, such as radiofrequency cavity systems, vacuum systems, and magnets, is covered in seminars conducted by experts. At the level of Introduction to the Physics of High Energy Accelerators by Edwards and Syphers.

### PHYS 490 Independent Study in Physics

Fall or spring. Variable to 4 credits. By permission of instructor. Experiments of widely varying difficulty in one or more areas, as listed under PHYS 510, may be done to fill student's special requirements.

### PHYS 500 Informal Graduate Laboratory

Fall, spring, summer. Variable to 2 credits. By permission of instructor. Experiments of widely varying difficulty in one or more areas, as listed under PHYS 510, may be done to fill student's special requirements.

### PHYS 510 Advanced Experimental Physics

Fall, spring, summer. 3 credits. Lab, T W 1:25-4:25. An optional lecture associated with PHYS 410, M 2:30-4:25 is available.

### PHYS 520 Projects in Experimental Physics

Fall, spring, summer. Variable to 3 credits. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible for their project. Prerequisite: PHYS 510.

Projects of modern topical interest that involve some independent development work by students. Opportunity for more initiative in experimental work than is possible in PHYS 510.

### PHYS 555 Physics of Black Holes, White Dwarfs, and Neutron Stars (also ASTRO 511)

Spring, 4 credits. No astronomy or general relativity prerequisites. D. Lai.

This course covers the formation of compact objects: neutron and gravitational radiation from supernova collapse and neutron stars; equilibrium configurations, equations of state, stability criteria, and mass limits; the influence of rotation and magnetic fields, pulsar phenomena, mass flow in binary systems; spherical and disk accretion; high-temperature radiation processes, compact X-ray sources; Gamma-Ray bursts; and high energy processes near supermassive black holes, Quasars, and active galactic nuclei. Emphasis is on the application of fundamental physical principles to compact objects. Topics in diverse areas of physics are discussed including: solid-state physics, nuclear physics, relativity, fluid dynamics, and high-energy physics.

### PHYS 551 Classical Mechanics, Nonlinear Dynamics, and Chaos (also PHYS 451)

Spring, 3 credits. For description, see PHYS 451.

### PHYS 553-554 General Relativity (also ASTRO 509-510)

553, fall; 554, spring. 4 credits. Prerequisites: knowledge of special relativity at the level of Classical Mechanics, by Goldstein. Lect, T R 1:25-2:40. E. Flanagan.

PHYS 553 is a systematic introduction to Einstein's theory, with emphasis on modern coordinate-free methods of computation. Topics include review of special relativity, modern differential geometry, foundations of general relativity, light in the presence of a gravitational field, and experimental tests of gravitation theories. At the level of Generalization, by Misner, Thorne, and Wheeler. PHYS 554 is a continuation of 553 that emphasizes applications to astrophysics and cosmology. Topics include relativistic stars; gravitational collapse and black holes, gravitational waves, and cosmology.

### PHYS 561 Classical Electrodynamics

Fall, 3 credits. T-M. Yan.

Course covers Maxwell's equations, electromagnetic potentials, electrodynamics of continuous media, acceleration topics, special relativity, and radiation theory. At the level of Classical Electrodynamics, by Jackson.

### PHYS 562 Statistical Physics

Spring, 4 credits. Primarily for graduate students. Prerequisites: a good knowledge of quantum mechanics (at the level of Merzbacher), classical mechanics (at the level of Marion), and statistical mechanics (at the level of Reif). Lect, M W F 9:05-9:55. N. Ashcroft.

Course covers macroscopic or thermodynamic concepts including the laws of thermodynamics, thermodynamic stability, and the thermodynamics of phase
equilibria. Other topics include: microscopic concepts including 1-, 2- and N-particle quantum states; the micro-canonical, canonical and grand-canonical distributions; Bose-Einstein, Fermi-Dirac, and Boltzmann statistics; the density-matrix; and the microscopic-macroscopic connection. Applications include spin systems on related models; strongly correlated fluids, and lattice-gases, including distribution and correlation functions, thermodynamic perturbation theory and introduction to critical phenomena and the renormalization group; dense Fermi- and Bose- systems; linear response of quantum and classical systems; transport properties; and the Boltzmann equation. At the level of *Statistical Mechanics* (2nd edition) by Pathria and *Statistical Mechanics of Phase Transition* by Yevrazi.

**PHYS 572 Quantum Mechanics (I)**

Fall. 4 credits. Lec. M W F 11:15-12:05. P. Drell.
Course covers the general principles of quantum mechanics, formulated in the language of Dirac. Covers systems with few degrees of freedom: hydrogen atom, including fine and hyperfine structure; the deuteron, and atomic transitions. Theory of angular momentum, symmetries, perturbations and collisions are developed to analyze phenomena displayed by these systems. At the level of *Modern Quantum Mechanics* by Sakurai. A knowledge of the subject at the level of PHYS 443 is assumed, but the course is self-contained.

**PHYS 574 Quantum Mechanics (II)**

Course covers systems with many degrees of freedom. Topics include: quantization of the electromagnetic field, interaction of light with matter; many electron atoms; second quantization for fermions; quantum liquids; scattering of complex systems; and an introduction to the Dirac equation. A knowledge of the concepts and techniques covered in PHYS 561 and 572 is assumed.

**PHYS 599 Cosmology (also ASTRO 599)**

For description, see ASTRO 599.

**PHYS 635 Solid State Physics (II)**

Fall. 3 credits. Prerequisites: a good undergraduate solid-state physics course, such as PHYS 454, as well as familiarity with graduate-level quantum mechanics.

**PHYS 636 Solid-State Physics (II)**

Spring. 3 credits. Prerequisite: PHYS 635. P. Brouwer.
A continuation of PHYS 635. Topics covered include: Fermi Liquid Theory, magnetism, superconductivity, broken symmetries, elementary excitations, and other topics in quantum condensed matter physics not covered in *Solid State Physics* by Ashcroft and Mermin. These topics include: topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, disordered systems, Anderson localization, and other metal insulator transitions.

**PHYS 645 High-Energy Particle Physics**

Fall. 3 credits. B. Gitelman.
Course serves as an introduction to physics of baryons, mesons, and leptons. Topics include: strong, electromagnetic, and weak interactions; relevance of symmetry laws to particle physics; and an introduction to the quark model. At the level of *The Experimental Foundations of Particle Physics* by Cahn and Goldhaber.

**PHYS 646 High-Energy Particle Physics**

Spring. 3 credits. Staff.
This course covers: topics of current interest, such as high-energy electron and neutrino interactions, electron positron annihilation, and high-energy hadronic reactions. Lectures and reading material are at the level of *Introduction to High Energy Physics*, by Perkins and *Elementary Particle Physics* by Griffiths.

*Note: Only S-U grades are given in courses numbered 650 or above.*

**PHYS 651 Relativistic Quantum Field Theory (I)**

Fall. 3 credits. S-U grades only. M. Nester.
Topics covered include consequences of causality and Lorentz invariance, field quantization, perturbation theory, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and weak interactions.

**PHYS 652 Relativistic Quantum Field Theory (II)**

Spring. 3 credits. S-U grades only. H. Tye.
This course is a continuation of PHYS 651 and introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-abelian gauge theories, the renormalization group, and spontaneous symmetry breaking. Topics in cosmology, supersymmetry or superstring may be introduced. Applications to the electroweak theory and quantum chromodynamics are emphasized. At the level of *An Introduction to Quantum Field Theory* by Peskin and Schroeder.

**PHYS 653 Statistical Physics**

Fall. 3 credits. Normally taken by graduate students in their second or later years. Prerequisite: Experience in the basic principles of quantum mechanics, statistical physics at the level of PHYS 562, and thermodynamics. S-U grades only.

A. C. Henley.
Survey of topics in modern statistical physics including: Dynamical statistical physics (kinetic theory, Boltzmann equation, hydrodynamics); theory of simple fluids; scaling theories and the renormalization group; phase transitions in disordered systems; and pattern formation in nonlinear systems, percolation theory.

**PHYS 654 Theory of Many-Particle Systems**

Spring. 3 credits. Prerequisites: PHYS 562, 574, 635, 656, and 653 or permission of instructor. S-U grades only. Staff.
Equilibrium and transport properties of microscopic systems of many particles studied at zero and finite temperatures. Formalisms such as thermodynamic Green's functions are introduced and applied to such topics as normal and superconducting Fermi systems, superfluidity, magnetism, insulating crystals.

**PHYS 656 Introduction to Accelerator Physics and Technology (also PHYS 487)**

Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

**PHYS 661 Advanced Topics in High Energy Particle Theory**

Fall. 3 credits. Prerequisites: PHYS 652. S-U grades only. Not offered 2001-2002. This course presents advanced topics of current research interest. Subject matter varies from year to year. Some likely topics are two-dimensional conformal field theory with applications to string theory and condensed matter physics, applications of the electroweak theory, lattice gauge theory, mathematical methods (e.g. group theory), perturbative quantum chromodynamics, anomalies and geometry, supersymmetry, current algebra, heavy quark physics, heavy quark symmetry, and phenomenological issues beyond the standard model.

**PHYS 667 Theory of Stellar Structure and Evolution (also ASTRO 560)**

For description, see ASTRO 560.

**PHYS 670 Instrumentation Seminar**

**PHYS 680 Computational Physics (also PHYS 480 and ASTRO 690)**

For description, see PHYS 480.

**PHYS 681-689 Special Topics**

Offerings are announced each term. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

**PHYS 681 Quantum Information Processing (also PHYS 481 and COM S 453)**

See PHYS 481 for description.

**PHYS 687 Selected Topics in Accelerator Technology (also PHYS 487)**

See PHYS 487 for description.

**PHYS 688 Introduction to Accelerator Physics and Technology (also PHYS 488)**

Fall. 3 credits. Staff TBA.
For description, see PHYS 488.

**PHYS 690 Independent Study in Physics**

Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.
The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes such things as animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology is represented by courses in social psychology and personality (such as Psychology and Law, Judgment and Decision Making, and Social Construction of Gender), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department also emphasizes the statistical and logical analysis of psychological data and problems.

The Major

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an adviser, a major application form may be obtained from the department office (211 Uris Hall) and should be completed and taken to one of the faculty members whose name is listed on the form.

Requirements for the major are:

1) a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisers, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); and
2) demonstration of proficiency in statistics before the beginning of the senior year. (See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

1) **Perceptual and cognitive psychology**
2) **Biopsychology**
3) **Social, personality, and abnormal psychology**

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.

1) **Perceptual and cognitive psychology**
2) **Biopsychology**
3) **Social, personality, and abnormal psychology**
   - PSYCH 128, 205, 275, 277, 280, 281, 325, 327, 328, 402, 404, 450, 481, 489, 491.
4) **Other courses**
   - PSYCH 101, 199, 347, 350, 410, 440, 441, 470, 471, 472, 473, 475, 478, 479. The major adviser determines to which group, if any, these courses may be applied.

With the permission of the adviser, courses in other departments may be accepted toward the major requirements.

**Fieldwork, independent study, and teaching.** The department requires students to observe the following limits on fieldwork, independent study, and teaching:

1) Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.
2) An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

**Statistics requirement.** Proficiency in statistics can be demonstrated in any of the several ways listed below:

1) Passing PSYCH 350.
2) Passing an approved course or course sequence in statistics in some other department at Cornell. The approved list of courses and sequences may change. It has usually included SOC 301 and ILR 210 and 211. Requests that a particular course be added to this list may be made to Professor Gilovich.
3) Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least six semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.
4) Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives at least one week notice. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

**Concentration in biopsychology.** Psychologists interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology, the physical sciences, including at least introductory chemistry; and mathematics. Students will design with their advisers an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her biopsychology adviser.

**Concentration in personality and social psychology.** Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration will be permitted to include some major courses in sociology and related fields. Advisers will assist students in the selection of a coherent set of courses from the social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the adviser. Undergraduate honors program. The honors program is designed for those exceptionally able students who wish to pursue an intensive and independent program of research in psychology. Successful participation in this program serves as evidence of the student's facility in the two most important skills of an academic psychologist: the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to engage in creative research activity. All qualified students planning on a graduate education in psychology or other academic fields should consider the honors program seriously. The program offers most students the closest contact and consultation with faculty that they will receive during their time at Cornell.

The core of the honors program is a research project that the student carries out in close collaboration with a faculty member in the field of psychology. It is assumed that most students will do so while enrolled in PSYCH 470 (Undergraduate Research in Psychology). A written report of the research is to be given to the chair of the honors committee (currently Professor Owren) toward the end of the last semester of the student's senior year. An oral defense of the thesis is then given before a committee of faculty members, and the student presents his or her work in a public forum. Final honors standing (summa cum laude, magna cum laude, cum laude) is indicated on the student's diploma. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year. A student may formally apply to the honors program at any time during the senior year provided that she or he is actively engaged in independent research. However, students
must do so by the second week of November. Applications should be given to Professor Owen and should be made directly by the student.

Distribution Requirement
The distribution requirement in the social sciences is satisfied by any two courses in psychology with the exception of PSYCH 223, 307, 322, 324, 326, 332, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492.

Note: The Department of Psychology has listed all days and times for each course that we offer. If there should be changes in the days, times, or semester that a course is offered, we will post the necessary changes throughout the department and in the supplements of the Course and Time and Course and Room Rosters. Changes are also available on the web site, comp0.psych.cornell.edu.

Courses

**PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry (III)**
Fall. 3 credits. Students who would like to take a discussion seminar should also enroll in PSYCH 103. M W F 10:10. J. B. Maas.
The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

**PSYCH 102 Introduction to Cognitive Science (also COGST 101, COMS 101, LING 170, PHIL 191) (III)**
Fall. 3 or 4 credits (the four-credit option involves a writing section instead of taking exams). T R 11:40-12:55. M. Spivey.
This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

**PSYCH 103 Introductory Psychology Seminars**
Fall. 1 credit. Limited to 300 students.
Prerequisite: concurrent enrollment in PSYCH 101 and a different time option. J. B. Maas and staff.
A weekly seminar that may be taken in addition to PSYCH 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a term paper related to the seminar topic. Choice of seminar topics and meeting times are available at the second lecture of PSYCH 101.

**PSYCH 111 Brain Mind and Behavior (also BIONB 111 and COGST 111) (I)**
Spring. 3 credits. Letter grades only. No prerequisites. Intended for freshmen and sophomores in the humanities and social sciences; seniors by permission only. Not recommended for psychology majors; biology majors may not use the course for credit toward the major. M W F 9:05. E. Atkins Regan and B. Hoy.
Understanding how the brain creates complex human behavior and mental life is a great scientific frontier of the next century. This course enables students with little scientific background from any college or major to appreciate the excitement. What are the interesting and important questions? How are researchers trying to answer them? What are they discovering? Why did the brain evolve this remarkable capacity?

**PSYCH 201 Cognitive Science in Context Laboratory (also COGST 201 and COMS S 201) (III)**
Spring. 4 credits. Prerequisite: PSYCH 102/COGST 101, Introduction to Cognitive Science. Knowledge of programming languages is not assumed. Limited to 24 students. Disc and demos, M W 11:15-12:05; lab, M W 12:10-13:25, plus additional hours to be arranged. Urs Hall 259.
D. Field and staff.
A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned and student-developed experiments. Use of digital computers as well as the Internet, electronic mail, and web sites are integral components of the course.
The focus is on human-computer interactions that are intended to permit efficient and effective cognitive and control functions or operations. This approach is applied to real life settings. Students are expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities are available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data is facilitated.

**PSYCH 205 Perception (III)**
Spring. 3 credits. Open to first-year students. Graduate students, see PSYCH 605. T R 11:40-12:55. J. E. Cutting.
One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual and auditory perception are discussed in detail.

**PSYCH 209 Developmental Psychology (III)**

One of four introductory courses in cognition and perception. A comprehensive introduction to current thinking and research in developmental psychology that approaches problems primarily from a cognitive perspective. The course focuses on the development of perception, action, cognition, language, and social understanding in infancy and early childhood.

**PSYCH 214 Issues in Cognitive Psychology (also COGST 214) (III)**
Fall. 3 or 4 credits (the 4-credit option involves some participation in COGST/PSYCH 501). Sophomore standing required. Limited to 150 students. Graduated students, see PSYCH 614. M W F 11:15. S. Edelman.
A broad overview of problems arising in the study of cognition and of the information-processing, or computational, approaches to solving these problems, in natural and artificial cognitive systems. Theoretical and experimental challenges posed by the understanding of perception, attention and consciousness, memory, thinking, and language will be discussed and analyzed. Participants acquire conceptual tools essential for following the current debates on the nature of mind and its relationship to the brain.

**PSYCH 216 Cognitive Psychology Lab**
Fall. 1 credit. Limited to 16 students.
If you’ve ever wondered how humans manage to represent their visual world, why telephone numbers are seven digits long, why imagery works as a mnemonic device, why certain things are better remembered than others, whether bilinguals are disadvantaged relative to monolinguals, how children acquire knowledge of the world, or how people make decisions—this laboratory is for you! A weekly lab meeting that encourages students to discover the scientist in themselves through the study of cognition. Much of cognitive research takes place in the laboratory and this course allows students to become familiar with the “how-to” of such research. Students are given six to eight basic experiments to explore and tinker with. They are encouraged to pose “what if?” questions and eventually test them. The course promotes independent thinking, problem solving in an experimental setting, proposing and testing of one’s own hypotheses, relating laboratory cognition to the real world, and communication of scientific ideas through informal and formal writing and oral assignments. Be prepared for an interactive learning experience.

**PSYCH 223 Introduction to Biopsychology (Iasupplementary list)**
Fall. 3 credits. M W F 10:10. No prerequisites. Can be used to satisfy the psychology major breadth requirement and as an alternative prerequisite for upper-level biopsychology courses. M. J. Owen.
An introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the evolution of social organization.
Introductory courses in social and personality psychology. Each of the following four courses (265, 275, 277, 280) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and have no prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.

PSYCH 265 Psychology and Law (III) Fall. 3 credits. M W F 1:25. D. A. Dunning. This course examines the implications of psychological theory and methods for law and the criminal justice system. We concentrate on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), and on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

PSYCH 275 Introduction to Personality Psychology (also HD 260) (III) Spring. 3 credits. Recommended: introductory course in psychology or human development T R 1:25–2:40. D. Bem. This course is designed as an introduction to theory and research in the area of personality psychology, with special emphasis on personality development. It covers the major influences including genetic, environmental, and gene-environment interactions, and involves in-depth study of the major theories. The assumptions and models of human behavior that form the basis of each theoretical orientation are examined and compared, and the relevant empirical evidence reviewed and evaluated. In addition, basic psychometric concepts and the methods for measuring and assessing personality are covered, as will the major related debates and controversies.

PSYCH 320 Introduction to Social Psychology (III) Spring. 3 credits. T R 1:25–2:40. D. T. Regan. An introduction to research and theory in social psychology. Topics include social influence, persuasion, and attitude change; social interaction and group phenomena; altruism and aggression; stereotyping and prejudice; and everyday reasoning and judgment.

PSYCH 281 Foundations of Clinical Practice (also HD 281) (III) Fall. 3 credits. Limited to 60 students (30 PSYCH/30 HD). No prerequisites. Not offered 2001–2002. Staff. This course provides an introduction to the theoretical and practical aspects of some basic elements of counseling. Students develop an understanding of the most current research on the elements of counseling and basic theoretical foundations underlying different approaches. Students are expected to acquire and demonstrate elementary helping skills. Through role-play, observation of videos, and in-class demonstrations, students learn such skills as attending and active listening; they also develop a capacity to recognize internal conflicts and cognitive distortions as well as the similarities between intra-psychic and interpersonal processes. Other topics include issues of transference and counter transference, the multiaxial dimensions of the DSMIV, defensive strategies as they appear in the DSMIV and ethical considerations and practice. While this course provides an introduction to the applied aspects of psychology, it does not prepare students to provide treatment of any sort.

PSYCH 282 Community Outreach (also HD 282) Fall and spring. 2 credits. Prerequisites: PSYCH 101 or HD 115. Students may not concurrently register with PSYCH 327 or PSYCH 328. T 10:10–11:25. H. Segal. This course provides students with information and perspectives essential to volunteer field work with human and social service programs in the community. To gain a practical understanding of what mental health professionals do in the workplace, students examine problems that emerge in fieldwork settings which raise ethical, methodological, theoretical, and practical issues in the observation or treatment of clients or patients. Although students are not required to volunteer at a local agency, the instructor will assist students in finding sites that may provide appropriate learning opportunities. A paper, relating current research to issues relevant to community mental health, is due at the end of the course.

PSYCH 292 Intelligence (III) Spring. 4 credits. Prerequisites: one 200-level course in psychology. M W TBA. Section meetings on Friday. U. Neisser. A scientific overview of the controversial issues that surround intelligence tests and what they measure. Topics include the history of testing, correlates of test scores, alternative approaches to mental ability, genetic and environmental contributions to diversity in intelligence, testing, IQ gains, cultural factors, and group differences.

PSYCH 305 Visual Perception (III) Fall. 4 credits. Limited to 25 students. Prerequisite: PSYCH 205 or permission of instructor. M W F 11:15. J. E. Cutting. A detailed examination of pictures and their comparison to the perspective in Renaissance art, photography, cinema, and video are discussed in light of contemporary research in perception and cognition.

PSYCH 307 Chemosensory Perception (III) Fall. 3 or 4 credits; the optional (or fourth) credit is for an independent research project. Graduate students, see PSYCH 607. Not offered 2001–2002. T R 9:05. B. P. Halpern. An examination of basic theory, data, and processes for perception of the chemosensory environment. Includes a very brief (about two weeks) lecture survey of the anatomy and physiology of human taste and olfaction, the remainder of the course uses the Socratic method, in which the instructor asks questions of the students, to cover topics such as chemosensory psychophysics, saliva, chemosensory bases for the tastes of foods, taste-smell interactions, chemosensory function in neonates and in the aged, temporal aspects of taste and smell, effects of pollution of the chemosensory environment, and interactions between body state and chemosensory stimuli. At the level of Smell and Taste in Health and Disease, edited by T.V. Getchell et al., Sensory Science Theory and Applications in Foods, edited by H. T. Lawless and B. Klein, Sensory Analysis of Foods, 2nd edition, edited by J. R. Piggott.

PSYCH 311 Introduction to Human Memory (III) Spring. 3 credits. Limited to 40 students. Some familiarity with statistical methods and experimental design and with the study of cognition is desirable. Graduate students, see PSYCH 611. T R 11:40–12:55. Not offered 2001–2002. Staff. This course offers an overview of experimental findings and theoretical issues in the study of human memory. Coverage includes topics such as the nature of memory, various memory systems, coding and retrieval processes, practice and habit acquisition, organization for learning and memory, interference and forgetting, models of memory, and memory dysfunction and its relation to normal memory.

PSYCH 313 Problematic Behavior in Adolescence (also HD 313) (III) Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101. HD 216 recommended. M W 2:55–4:10. J. Haugaard. This course explores several problematic behaviors of adolescence, including depression, drug abuse, eating disorders, and delinquency. Various psychological, sociological, and biological explanations for the behaviors are presented. Literature research is reviewed; treatment and prevention strategies are explored. An optional discussion section is available to students who would like an opportunity to discuss readings and lectures in greater depth.

PSYCH 316 Auditory Perception (III) Fall. 3 or 4 credits; the 4-credit option involves a laboratory project or paper. Prerequisite: PSYCH 205, 209, 214 (other psychology, linguistics, or biology courses could serve as prerequisite with permis-
A broad comparative approach to the auditory perception including: physics of sound, structure and function of the auditory system; perception of loudness, pitch, and spatial location, with applications to speech production and perception; and music and environmental sounds.

**PSYCH 322 Hormones and Behavior (also BIONB 322)** (I)

Fall. 3 credits. Two lectures plus a section in which students discuss original papers in the field, give an oral presentation, and write a term paper. Limited to juniors and seniors. Prerequisites: any one of the following: (a) PSYCH 223, (b) BIONB 221, (c) BIONB 222, or (d) one year of introductory biology plus a course in psychology. Letter grade only. Graduate students see PSYCH 722. M W F 11:15. Not offered 2001-2002. E. Adkins Regan.

The major focus of the course are comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also included are hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.

**PSYCH 324 Biopsychology Laboratory (also BIONB 324)** (I)

Fall. 4 credits. Limited to 20 juniors and seniors. Prerequisites: PSYCH 223 or BIONB 221 or 222, and permission of instructor. T R 1:25-4:25. T. J. DeVoogd.

Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, species, and behavior patterns are included.

**PSYCH 325 Adult Psychopathology (also HD 370) (III)**

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: any one course in Psychology or Human Development. M W 2:55-4:10. S. Bem.

A research-based introduction to the biological, psychological, and social (including cultural) aspects of adult psychopathology. The major mental illnesses are covered, including (among others) schizophrenia, mood disorders, anxiety disorders, and personality disorders. Childhood disorders are not covered.

**PSYCH 326 Evolution of Human Behavior (tisupplementary list)**

Spring. 4 credits. Prerequisite: PSYCH 223, or an introductory biology course, or an introductory anthropology course. Graduate students, see PSYCH 620. T R 2:55-4:10. R. E. Johnston.

A broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics covered vary but include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, and warfare.

**PSYCH 327 Field Practicum I (also HD 327)** (III)

Fall only. 3 credits. Prerequisites: PSYCH 325 or HD 370 (or taken concurrently), and permission of instructor. No S-U grading. Enrollment is limited to 30 students. Fee: $25 each semester. Enrolled students must commit to taking PSYCH 328 in the spring semester. No S-U option. M W 8:40-9:50. H. Segal.

This course is composed of three components which form an intensive undergraduate field practicum. First, students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff. Second, Cornell faculty provide additional weekly educational supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

**PSYCH 328 Field Practicum II (also HD 328)** (III)

Spring. 3 credits. Prerequisites: PSYCH 327 taken the previous term, PSYCH 325 or HD 370 (or taken concurrently), permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: $25 each semester. M W 8:40-9:50. H. Segal.

This course continues the field practicum experience from PSYCH 327. Students spend three to six hours a week at local mental health agencies, schools, or skilled nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff.

**PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328)** (I)

Spring. 3 credits. Prerequisites: 1 year of biology and either a biopsychology class or BIONB 222. Limited to 60 students. Graduate students, see PSYCH 652. M W F 11:15. T. J. DeVoogd.

This course surveys the approaches that have or are currently being used in order to understand the biological bases for learning and memory. Topics include invertebrate, "simple system" approaches, imprinting, avian song learning, hippocampal and cerebellar function, and human pathology. Many of the readings are from primary literature.

**PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also COGST 342)** (III)

Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: PSYCH 101 or permission of instructor. PSYCH 205 strongly recommended. Graduate students, see PSYCH 642. T R 11:40-12:55. D. J. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics covered include "two-dimensional," "three-dimensional," and "four-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

**PSYCH 347 Psychology of Visual Communications (III)**

Spring. 3 credits. Limited to 15 students. Prerequisites: PSYCH 101 and permission of instructor. R 10:10-12:05. J. B. Maas.

An exploration of the relationship of visual communication, perception, attitude, and behavior change as they relate to the effectiveness of visually based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages.

**PSYCH 350 Statistics and Research Design (II)**

Fall. 4 credits. Limited to 120 students. M W F 9:05-9:55. T. G. Gilovich.

Acquaints the student with the elements of statistical description (measures of average, variation, correlation, etc.) and more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

**PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also NS 361)**

Fall. 3 credits. Limited to 50 students in psychology and 50 in biological sciences. Prerequisites: An introductory biology course and an introductory psychology course, or permission of instructor. S-U grades optional. Juniors and seniors only. M W F 9:05-9:55. B. J. Strupp.

A critical evaluation of factors thought to underlie normal and abnormal behavior and/ or cognitive functioning. Psychological, biological, and societal influences are integrated. Topics include the psychobiology of learning and memory; nutritional influences on behavior/cognition (e.g., sugar, food additives, choline); cognitive dysfunction (e.g., amnesia, Alzheimer's disease); developmental exposure to environmental toxins and drugs of abuse; and psychiatric disorders (depression, eating disorders).

**PSYCH 396 Introduction to Sensory Systems (also BIONB 396)** (I)

Spring. 4 credits. Limited to 25 students. Prerequisites: an introductory course in biology or biopsychology, plus a second course in behavior, biological psychology, cognitive science, neuroscience, or perception. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Offered alternate years. Class meetings, M W F 10:10. B. P. Halpern.

This course covers both those characteristics of sensory systems that are common across living organisms and those sensory properties that represent adaptations to particular habitats, environments, or niches. The principles and limitations of major methods used to examine sensory systems are considered. Emphasis is on somesthetic, visual, and auditory systems. This course will be taught using the Socratic method, in which the instructor asks questions of the students. Students are assigned original literature in the form of printed or electronic journal articles or reviews. Students are expected to come to each class having read, thought about, and prepared to discuss the assigned readings and other assigned information resources. A course packet of reproduced articles, textbooks, a course web site, and Internet sites are used. Students submit brief analyses of, and comments and questions on, all assignments by email to the course's
electronic mailing list a day before each class meeting. The mailing list distributes submissions to all members of the class and to the instructor. In addition to these brief tri-weekly written exercises, a web site or a term paper on a topic of the instructor's choice is required. All examinations are in take-home format. At the level of From Sound to Synapse by C. D. Geisler; The Retina, by J. E. Dowling. coursework.info.cornell.edu/courses psyh_nibh_396

**[PSYCH 401 Theoretical Approaches to Psychopathology and Treatment (III)]**

Fall. 3 credits. Limited to 20 students. Prerequisites: PSYCH 281 or 325. TBA. Not offered 2001-2002. Staff.

This course is designed to provide students with an overview of theoretical approaches to psychopathology and psychotherapy. It also aims to develop students' capacities to think in theoretical terms about psychological practice. We examine the theoretical and pragmatic features of major contemporary models of psychotherapy and explore the conceptual traditions on which they draw. Observation of the work of children and adolescents, audio-visual demonstrations, case presentations and discussions are included to advance students' understanding of the application of theory to practice. At the end of the course, students should be prepared to take a particular case and discuss the theoretical, practical, and research issues if raise including intervention strategies. This course is not intended to provide students simply with an understanding of methods. It is organized around theory, research, and practice relevant to the treatment of several of the Disorders of Infancy and Childhood as well as specific disorders of Adults on Axis I and Axis II of DSM IV. Special attention is given to the work of: Daniel Stern, M.D. and Otto Kernberg, M.D.—Psychoanalytic revisionists; Lorna Benninger, Ph.D.—Interpersonal Theory; Aaron Beck, M.D.—Cognitive Theory; and Marsha Linehan, Ph.D.—Behavioral and Cognitive-Behavioral Treatments.

**[PSYCH 402 Current Research on Psychopathology: Depression (III)]**

Current research and theory on the nature and etiology of depression. Approaches from various perspectives (biological, psychological, socio-cultural) are considered. Minimal attention given to psychotherapy and symptomatology.

**[PSYCH 404 Psychopathology and the Family (III)]**

This course explores familial influences on the development of abnormal behavior. It examines how psychological, biological, and cultural factors in a family might contribute to such disorders as anorexia nervosa, depression, psychosis, and psychosomatic illness. Emphasis is placed on early childhood experiences in the family and their impact on the development of later psychopathology. The course also discusses how the evolution of family structures in more recent times (e.g., the rise in day care and divorce) influences the individual. Family therapy approaches and techniques are also examined.

**[PSYCH 410 Undergraduate Seminar in Psychology (III)]**

Fall or spring. 2 credits. Nonmajors may be admitted, but psychology majors are given priority. Hours TBA. Staff.

Information on specific sections for each term, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall.

**[PSYCH 412 Laboratory in Cognition and Perception (III)]**

A laboratory course is designed to introduce students to experimental methods in perception and cognitive psychology. Students take part in a number of classic experiments and develop at least one independent project. Computers are available and used in many of the experiments although computer literacy is not required. Projects are selected from the areas of visual perception, pattern recognition, memory, and concept learning.

**[PSYCH 413 Information Processing: Conscious and Nonconscious (III)]**

Spring. 4 credits. Prerequisites: at least 1 course in human experimental and permission of instructor. PSYCH 350 or equivalent will be useful for evaluating empirical articles. R 10:10-12:35. Not offered 2001-2002. Staff.

In the past decade, a not-so-quiet revolution has been taking place in the field of cognition regarding the problem of conscious mental computation. Data have come from patients with striking neuropsychological syndromes, i.e., the phenomenon of "blindsight" and the "amnesic" syndrome. This signature of independent mental computations has also been amply demonstrated in normal individuals in laboratory settings. We critically evaluate the theoretical worth and empirical justification of the dual "conscious" and "nonconscious" mental computations in normal and patient populations. Weekly readings are from, but not limited to, topics such as visual processes, face recognition, explicit and implicit memory, language processing and social cognition. Students are required to: lead and partake in advanced level discussions of classic and current papers; submit weekly summaries of the assigned readings; and write a term paper on a topic of their interest. Students should be prepared to read extensively.

**[PSYCH 414 Comparative Cognition (also COGST 414) (III)]**

Spring. 3 credits. Prerequisites: PSYCH 205, 209, 214, or permission of instructor. Graduate students, see PSYCH 714. T R 2:55-4:10. M. J. Giger.

This course examines some of the conceptual and empirical work resulting from and fueling recent surge of interest in animals' thinking. Specific topics may include: whether nonhumans behave intentionally; whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" play a strong role in the deliberations, including studies of naturally occurring signaling in various species. Experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.

**[PSYCH 415 Concepts, Categories, and Word Meanings (III)]**

Fall. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Graduate students, see PSYCH 615. M 1:25-4:25. Not offered 2001-2002. Staff.

A consideration of what types of categories are psychologically important, how they are represented and used through concepts, and how concept structure and semantic structure are interrelated. Different models of concept structure and categorization processes are evaluated, as are models of conceptual change and concept acquisition. Other topics include: relations between concepts and broader knowledge representation systems such as scripts, mental models, and intuitive theories; relations of acquisition and beliefs in concept structure; categorization in other species; neuropsychological studies of categorization; comparisons of categorization systems across cultures; and comparisons of concept structures across different types of categories.

**[PSYCH 416 Modeling Perception and Cognition (also COGST 416) (III)]**

Spring. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Graduate students, see PSYCH 616. M W F. M. Spivey.

This course offers a survey of several computational approaches to understanding perception and cognition. We explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis is placed on how complex sensory inputs are represented in these models, as well as how it gets processed. This course covers computational accounts of language processing, language acquisition, visual perception, and visual development, among other topics. Students complete a final project that applies a computational model to some perceptual/cognitive phenomena.

**[PSYCH 417 The Origins of Thought and Knowledge (III)]**

Fall. 4 credits. Prerequisite: permission of instructor. Graduate students, see PSYCH 717. M W 2:55-4:10. S. Johnson.

An in-depth analysis of current theories concerning the growth of thought and knowledge in infancy and early childhood. This course addresses the following questions: How do infants come to understand the objects and events they experience? What are the best methods for assessing development of perception, cognition, and language? How do developing perceptual, cognitive, and language skills constrain object perception? What are the applications of research on early perceptual and cognitive development to such fields as robotics and artificial intelligence?
understand how animals with specialized neural circuits adapted to species-typical compare and how did they come about. We discuss the relationship between structure and function in the central nervous system. The importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition is stressed. The course focuses on issues in cognitive neuroscience including: mechanisms of perception, particularly vision, and the neuropsychology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the environment, memory, social interaction and consciousness.

PSYCH 435 Olfaction, Pheromones, and Behavior (III)  
Fall. 4 credits. Prerequisites: an introductory course in biology and one in neurobiology and behavior or biopsychology or a 300-level course in biopsychology or permission of instructor. R. Johnston. This course covers olfaction, pheromones, and behavior in vertebrates (including humans), as well as the neurobiology of olfaction and odor-mediated behaviors. Behavioral topics may vary from year to year but will include evaluation of sexual displays for mates, aggressive and territorial behavior, parental-young interactions, social recognition (species, sex, individual, kin reproductive state, status), memory for odors, odor and endocrine interactions, imprinting, and homing and navigation. Basic aspects of the structure and function of the olfactory system and also covered, including the molecular biology of chemo-reception, olfactory coding, and higher-order processing in the central nervous system. The format includes lectures, discussions, and student presentations.

PSYCH 436 Language Development (also COGST 436, HD 436, and LING 436) (III)  
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll under HD 633/LING 700/PSYCH 600, a seminar. Prerequisite: at least 1 course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. T R 2:55–4:10. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of “Universal Grammar” and the biological foundations for acquisition are discussed, as are the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available. (See COGST 450/ LING 450 and PSYCH 437.)

PSYCH 437 Lab Course: Language Development  
Fall. 2 credits. R 1:25. B. Lust. The laboratory course is an optional supplement to the survey course, Language Development (HD/COGST/PSYCH/LING 436). The lab course provides students with a
hands-on introduction to scientific research, including design and methods, in the area of first language acquisition.

PSYCH 440 The Brain and Sleep
Fall. 4 credits. Prerequisites: at least PSYCH 223 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. 5-4 grades optional. Graduate students, see PSYCH 640. M W 2:55-4:10. H. S. Porte.
Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics include sleep deprivation and the biological functions of sleep; sleep's putative role in learning and memory; biologically interesting deviations from normal sleep, and the cognitive neuroscience of sleep.

PSYCH 441 Laboratory in Sleep Research
Spring. 4 credits. Prerequisites: PSYCH 440 or comparable preparation, and permission of the instructor during preregistration. Enrollment is limited to graduate students, see PSYCH 641. W 7:30-10:30 p.m. H. S. Porte.
Emphasizing the neurobiology of sleep state, the course introduces students to the laboratory study of human sleep and its psychological correlates. Serving as both experimenter and subject, each student learns the physical rationale and techniques of electroencephalography and other bioelectric measures of behavioral state. Using computerized data analysis, students complete weekly laboratory reports and a collaborative term project. Sleep recordings are done during the day or evening when possible. In addition, overnight recording sessions are required.

PSYCH 450 The Lenses of Gender (also WOMNS 450) (III)
Fall. 4 credits. Limited to 15 juniors, seniors, and graduate students. Prerequisites: (1) junior or graduate standing, with preference given to psychology majors and women's studies majors; (2) a prior course related to psychopathology (preferably PSYCH 325/HDD 320), or a prior course related to gender and/or sexuality. Permission of instructor required through an application process during the preceding spring semester. Graduate students, see PSYCH 650/WOMNS 650. Letter grade only. W 2:30-4:25. S. L. Bem.
This advanced undergraduate/graduate seminar takes up several interrelated topics at the intersection of clinical psychology and gender/sexuality. Possible topics include, among others, stress, trauma, personality disorders, and psychiatry's troubled history in the domain of gender/sexuality. Course requirements generally include weekly informal written commentaries on the readings, a final essay examination, and your choice of either a term paper or a class presentation.

PSYCH 460 Human Neuroanatomy (also BIONB 420, sec 02) (I or III)
Spring. 3 or 4 credits (4 credits with one discussion/lab per week in which students dissect sheep brains, read original research papers, and write a term paper). Prerequisites: PSYCH 223, or BIONB 222, or permission of the instructor. Permission required for 4-credit option. Limited to juniors, seniors and graduate students. S-U grades and auditing not permitted. Lecs, M W F 1:25; discussion section to be arranged. S. Newman.
Neuroanatomy is the substrate for the functional organization of the human nervous system. This course introduces the brain nuclei and major connecting pathways of functional neural systems: sensory, motor, and integrative. Our understanding of the functions of these systems is based on part on their dysfunction, on the symptoms of neurological and psychiatric diseases that damage or inactivate selected pathways. This course highlights neuroanatomical pathways and networks that are known, or hypothesized, to be dysfunctional in a variety of nervous system disorders.

PSYCH 465 Topics in High-Level Vision (also COGST 465 and COMP S 392) (III)
Spring. 4 credits. Graduate students see PSYCH 665. S. Edelman.
High-level vision is a field of study concerned with functions such as object recognition and categorization, scene understanding, and reasoning about visual structure. It is an essentially cross-disciplinary endeavor, drawing on concepts and methods from neuroanatomy, neurophysiology, cognitive psychology, applied mathematics, computer science, and philosophy. The course concentrates on a critical examination of a collection of research publications, linked by a common thread, from the diverse perspectives offered by the different disciplines. Students write bi-weekly commentaries on the assigned papers and a term paper integrating the material covered in class.

PSYCH 470 Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours TBA. Staff. Practice in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 471 Advanced Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours TBA. Staff. Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 472 Multiple Regression
Course covers uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis is on analyzing data collected under uncontrolled conditions. Includes colinearity, indicator variables, sets, adjusted and shrunken R², suppressor hierarchical analysis, overcontrol, and experimental design. Students may use the Mystat, Minitab, SPSS, or Statstikt packages.

PSYCH 473 General Linear Model
Spring, weeks 8-14. 2 credits. Prerequisite: PSYCH 472 or equivalent. M W F 10:10. R. B. Darlington.
Course topics include multigraticular variables, correlations with tests, regression, diagnostic methods, nonlinear relationships, interaction, main and simple effects, and basic power analysis. Student may use Mystat, Minitab, SPSS or Statstikt.

PSYCH 475 Multivariate Analysis of Psychological Data
Fall. 2 credits. Prerequisite: PSYCH 473 or permission of instructor. R 10:10-12:05. R. B. Darlington.
Students vote on topics to cover, choosing among time series, cluster analysis, multidimensional scaling, component analysis, factor analysis, MANOVA, canonical correlation, regression measures, logistic regression, log-linear models, ANOVA with empty cells, meta-analysis, and other topics. First class sketches all these topics before vote.

PSYCH 480 The Cornell Westchester/NY Hosp. Field Placements (III)
Fall full year. 7 credits. Spring through summer and fall. Prerequisites: PSYCH 325 or PSYCH 281 (for PSYCH 281) and Chemistry for lab (pre-med). Sophomores or juniors only. Not offered 2001–2002. Staff.
The Cornell-Westchester/Payne Whitney field placement program makes available eight-week research/clinical internships for Cornell-Ithaca undergraduates who are pre-professional in psychology, neurobiology, psychiatry, or medicine. Each student is matched with a MD/Ph.D. mentor at the Cornell/Westchester or Payne Whitney Hospital. Students work on rotation throughout the summer and assist the researcher with his/her work. Students' work includes, but is not limited to, reading, reporting, observing, writing literature reviews, learning grant-writing, assisting in the conducting of experiments, and planning their own experiments.

Most placements involve a clinical component as well. Under the supervision of the mentor, students work in therapy groups with patients, participate in testing, and assist in psychological rehabilitative activities. The patient populations with whom students work are diverse with regard to age and diagnosis as well as race, culture, ethnicity, and national background.

PSYCH 481 Advanced Social Psychology (III)
Fall. 4 credits. Limited to 20 students, by application. Senior psychology majors have priority. Graduate students, see PSYCH 681. T R 10:10-11:25. D. T. Regan.
Selected topics in social psychology are examined in depth with an emphasis on the relationship between experimental research and the development of theory. Readings are mostly primary sources. Among the theoretical approaches to social behavior we may discuss are social comparison theory, cognitive dissonance, attribution processes and social
Advanced Courses and Seminars

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each term is determined by the needs of the students. A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Urs Hall). The following courses may be offered either term and carry four credits unless otherwise indicated.

**PSYCH 501 Cognition (also COGST 501)**

This course introduces graduate students interested in cognition (especially those who plan to pursue the Cognitive Studies minor) to the central issues in computational cognitive psychology. It consists of a series of advanced-level discussions of selected examples from the material covered in COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102 and COGST 214/PSYCH 214/614 (perception, attention and consciousness, memory, thinking, and language). The course focuses on the development of skills required for critical evaluation of research in cognitive sciences, backed by an in-depth understanding of the relevant concepts and theories.

**PSYCH 510-511 Perception**

**PSYCH 512-514 Visual Perception**

**PSYCH 518 Topics in Psycholinguistics**

**PSYCH 519-520 Cognition**

**PSYCH 521 Psychobiology (Developmental Seminar)**

**PSYCH 522 Topics in Perception and Cognition**

**PSYCH 523 Hormones and Behavior**

**PSYCH 527 Topics in Biopsychology**

**PSYCH 530 Representation of Structure in Vision and Language (also COGST 530 and LING 530)**

**PSYCH 531 Topics in Cognitive Studies (also COGST 531 and LING 531)**

**PSYCH 532 Representation of Structure in Vision and Language (also COGST 530 and LING 530)**

**PSYCH 533 Topics in Cognitive Studies (also COGST 531 and LING 531)**

**PSYCH 560 General Research Seminar**

Fall or spring. No credit.

**PSYCH 601 Computational Models of Language**

This seminar involves in-depth discussion of a range of computational approaches to language representation, processing, and acquisition. We cover phrase-structure grammars, context-free grammars, connectionist models, statistical natural language processing, and dynamical systems, to name just a few. There is also some hands-on experience writing models in a computer lab using the MATLAB programming environment.

**PSYCH 605 Perception (also PSYCH 205)**

Spring. 4 credits. Non-arts graduate students only. T R 11:40–12:55. J. E. Cutting.

**PSYCH 607 Chemosensory Perception (also PSYCH 307)**

**PSYCH 611 Introduction to Human Memory (also PSYCH 311)**

**PSYCH 612 Laboratory in Cognition and Perception (also PSYCH 412)**

**PSYCH 613 Obesity and the Regulation of Body Weight (also NS 315)**

Spring. 3 credits. Limited to 30 students. Prerequisites: 1 course in psychology and 1 course in nutrition. Undergraduate students may register with permission of instructor. S-U grades optional. Offered alternate years. T R 1:25–3:20. D. A. Levitsky.

This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

**PSYCH 614 Issues in Cognitive Psychology (also PSYCH 214)**

Fall. 4 credits. M W F 10:10. S. Edelman.

**PSYCH 615 Concepts, Categories, and Word Meaning (also PSYCH 415)**

**PSYCH 616 Modeling Perception and Cognition (also PSYCH 416 and COGST 416)**

Spring. 4 credits.
[PSYCH 618] Psychology of Music (also PSYCH 410)

[PSYCH 619] Neural Networks Laboratory (also PSYCH 420)

[PSYCH 622] Developmental Biopsychology (also PSYCH 422)

PSYCH 626 Evolution of Human Behavior (also PSYCH 326)
Fall. 4 credits. T R 2:55-4:10. R. E. Johnston.

[PSYCH 632] Olfaction and Taste: Structure and Function (also PSYCH 429 and BIONB 429)

PSYCH 633 Biopsychology of Learning and Memory (also PSYCH 332 and BIONB 332)
Spring. 4 credits. M W F 11-11:55.

PSYCH 640 The Brain and Sleep (also PSYCH 440)

PSYCH 641 Laboratory in Sleep Research (also PSYCH 441)
Spring. 4 credits. W 7:30-10:30. H. S. Porte.

PSYCH 642 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH 342 and COGST 342)

PSYCH 650 The Lenses of Gender (also PSYCH 450 and WOMNS 450 and 650)
Fall. 4 credits. F 2:30-4:25. S. L. Bern.

PSYCH 665 Topics In High-Level Vision (also PSYCH 465, COGST 465, and COM S 392)
Spring. 4 credits. S. Edelman.

PSYCH 681 Advanced Social Psychology (also PSYCH 481)

PSYCH 689 Seminar: Beliefs, Attitudes, and Ideologies (also PSYCH 489)
Fall. 4 credits. M 2:30-4:25. D. J. Bern.

[PSYCH 691] Research Methods in Psychology (also PSYCH 491)

PSYCH 692 Sensory Function (also PSYCH 492 and BIONB 492)
Spring. 4 credits. M W F 10-10:10.

[PSYCH 696] Introduction to Sensory Systems (also PSYCH 396 and BIONB 396)

PSYCH 700 Research in Biopsychology

PSYCH 709 Developmental Psychology (also PSYCH 209)

PSYCH 710 Research in Human Experimental Psychology

PSYCH 713 Information Processing: Conscious and Nonconscious (also PSYCH 413)
Spring. 4 credits. R 10:10-12:35. Staff.

PSYCH 714 Comparative Cognition (also PSYCH 414 and COGST 414)
Spring. 4 credits. T R 11:40-12:55.

PSYCH 716 Auditory Perception (also PSYCH 316)
Fall. 4 credits. M W 2:55-4:10. C. L. Krumhansl.

PSYCH 717 The Origins of Thought and Knowledge (also PSYCH 417)

PSYCH 720 Research in Social Psychology and Personality

PSYCH 722 Hormones and Behavior (also PSYCH 322 and BIONB 322)
Fall. 4 credits. M W F 11:15-12:05.

[PSYCH 773-774] Proseminar in Cognitive Studies I and II (also COGST 773/774, PHIL 773/774, LING 773/774, and COMS 773/774)
Fall. R grade. Spring: S-U only. 4 credits.

PSYCH 775 Proseminar in Social Psychology (I)
Fall. 2 credits. Limited to 10 graduate students in social psychology. Prerequisite: permission of instructors. Hours TBA.

PSYCH 776 Proseminar in Social Psychology (II)
Spring. 2 credits. Limited to 10 graduate students in social psychology. Prerequisite: permission of instructors. Hours TBA.

Summer Session Courses

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses are offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry

PSYCH 102 Introduction to Cognitive Science

PSYCH 128 Introduction to Psychology: Personality and Social Behavior

PSYCH 199 Sports Psychology

PSYCH 223 Introduction to Biopsychology

PSYCH 280 Introduction to Social Psychology

PSYCH 350 Statistics and Research Design

QUECHUA
See Romance Studies.

RELIGIOUS STUDIES MAJOR

See "Special Programs and Interdisciplinary Studies."
The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in the following areas: French, Italian, and Spanish literature; French, Italian, Portuguese, Quechua, and Spanish language; Francophone, Italian, and Hispanic culture; and linguistics and semiotics. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

French

The Major

The major in French is divided into two options: French Area Studies and French literature. While prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad, no student will be refused admission merely because of a late start. In view of the ongoing curriculum changes that will be implemented in 2001–2002, please see Professor Jacques Béreaud, jb73@cornell.edu, the Director of Undergraduate Studies, in 308 Morrill Hall. This consultation is especially important for finding out what sequence of courses will follow the current choice of courses.

Students interested in majoring in French linguistics should contact the Department of Linguistics.

Honors. The honors program encourages well-qualified students majoring in French linguistics to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not practically possible in the case of course papers.

No special seminars or courses are required of honors students, but they have regular meetings with faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in FRROM 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

The Literature Option

The major in French, Literature Option, is designed to give students proficiency in the oral and written language, to acquaint them with French literature and culture, and to develop skills in literary analysis.

Admission

To be admitted to the major, students should have completed FRRLT 201, 220, or 221 plus 222 and FRROM 219 (formerly 213) or its equivalent by the end of their sophomore year.

For completion of the major, a student must:
1) acquire a sound degree of competence in French language. This competence is demonstrated by the successful completion of FRROM 301–312 or its equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).
2) take six courses in French literature or civilization at the 300 level or above. These courses, selected in consultation with the student's major adviser, will include at least one pre-twentieth-century course and at least one 400-level course.
3) take two connected courses in one of the following related areas: literature, linguistics, comparative literature, history, history of art, visual studies, music, government, or another relevant discipline with a significant French component. Students who are double majors are exempted from this last requirement.

The French Area Studies Option

Admission

To be admitted to the major, students should have completed FRRLT 201, 220, 221, or 224 plus 219 (formerly 213) or its equivalent by the end of their sophomore year.

For completion of the major, a student must:
1) acquire a sound degree of competence in the French language. This competence is demonstrated by the successful completion of FRROM 301–312 or its equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).
2) take two courses in Romance Studies (literature or civilization) at the 300 level or above.
3) take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—African cultures, anthropology, comparative literature, French literature, economics, government, gender studies, history of art, linguistics, music, theater arts, women's studies, and visual studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of these six courses should be at the 400 level.

Administration of French Area Studies

Students are admitted to the major by the director of undergraduate studies in the French section of the Department of Romance Studies but are guided by their individual advisers. A copy of each student's program is given to the director of undergraduate studies for approval and keeping.

Study Abroad in France

French majors or other interested students may study in France for one or two semesters during their junior year. Opting for one of several study-abroad plans recognized by the Departments of Romance Studies and Linguistics facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of FRROM 219 (formerly 213) or its equivalent in advanced credit or placement by the Cornell CASE examination. The taking of FRROM 301 and/or 312 is, however, strongly recommended.

Students interested in studying in France are encouraged to consider the special benefits offered by EDCO, the program in Paris cosponsored by Cornell and by Emory-Duke University. EDCO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the year or semester as fully matriculated students at the University of Paris VII and other institutions of higher learning in Paris, including the Institut des Études Politiques (Sciences Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation in French history, society and daily life. While it is possible to enroll in the EDCO Program for one semester, admission will be given first to students planning to study abroad for the full academic year.

EDCO maintains a center in Paris with appropriate support staff. The resident director, chosen annually from the Cornell and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

Honors. The honors program encourages well-qualified students majoring in French literature and culture to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers.

To be eligible for Honors, students must have a general grade point average of at least 3.00 and a grade point average of at least 3.5 in their French major.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in FRROM 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The senior essay is to be made available for reading by the jury on or before April 15. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.
Language
Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance of the first scheduled class session. Further, a student who fails to attend the first three days of class will be automatically dropped from the course in order to accommodate those on the waiting lists.

All French language courses are offered by the Department of Romance Studies and French linguistics courses are offered by the Department of Linguistics.

Note: Students placed in the 200-level courses have the option of taking language and/or literature courses; see listings under "Literature" for descriptions of the literature courses, some of which may be taken concurrently with FRROM 206, 209, or 219 or H ADM 266.

FRROM 112 Elementary French: Review of Basic Languagewith Oral and Written Expression
Fall. 4 credits. Prerequisite: LPF score 37-44. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. T. Tun and staff.

This course is designed for students who have taken some French and who have a placement score of 37-44 or SAT II 410-480. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken FRROM 121 may enroll for this course. As part of the final exam, students take the LPF and, according to their score, may place into FRROM 123 (score below 56) or receive qualification (56 or above), and placement into the 200-level courses.

FRROM 121-122 Elementary French 121, fall; 122, spring. 4 credits each term. Prerequisite: FRROM 122, FRROM 121. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. C. Sparfel and staff.

This course is intended for students with no experience in French. (To be eligible for FRROM 121, students who have previously studied two or more years of French must have an LPF score lower than 37 or SAT II lower than 370.)

The goal of FRROM 121-122 is to provide a thorough grounding in the language and insights into French language and francophone cultures so that students can function in basic situations in a French-speaking culture. Small classes provide intensive, context-specific practice in speaking, reading, writing, and listening comprehension.

FRROM 123 Continuing French Fall or spring. 4 credits. Provides language qualification. Prerequisite: LPF score 45-55 or SAT II 490-590. Satisfactory completion of FRROM 123 fulfills the qualification portion of the language requirement. Recommended courses after FRROM 123: FRROM 206 or 209. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. T. Tun and C. Waldron and staff; spring: S. Tun and C. Waldron.

FRROM 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability; to establish a groundwork for correct writing; and to provide a substantial grammar review. The approach in the course encourages the student to see the language within the context of its culture.

FRROM 206 Intermediate Reading and Writing (formerly FRROM 200)
Fall or spring. 3 credits. Provides language proficiency. Prerequisite: qualification in French (FRROM 123, LPF score 56-64, or SAT II 600-680). Satisfactory completion of FRROM 206 fulfills the proficiency portion of the language requirement. Conducted in French. Recommended courses after FRROM 206: FRROM 219 (formerly FRROM 213), FRROM 220 or FRROM 221. FRROM 219 (formerly FRROM 215) may be taken concurrently with FRROM 220. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: S. LoBello; spring: C. Sparfel.

This language course is designed for students who want to focus on their reading and writing skills. Emphasis is placed on grammar review and expansion, vocabulary development, and appreciation of different styles of language. Diverse text types are used, including a contemporary novel and student-selected material.

FRROM 209 Intermediate Composition and Conversation I (formerly FRROM 203)
Fall, spring, or summer. 3 credits. Provides language proficiency. Prerequisite: qualification in French (FRROM 123, LPF score 56-64, or SAT II 600-680). Satisfactory completion of FRROM 209 (formerly FRROM 203) fulfills the proficiency portion of the language requirement. Recommended courses after FRROM 209: FRROM 219 (formerly FRROM 213), FRROM 220 or FRROM 221. FRROM 219 (formerly FRROM 215) may be taken concurrently with either FRROM 220 or FRROM 221. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. A. Grandjean-Levy, K. Proux and staff; summer: staff.

Listening comprehension and speaking activities are aimed at improving oral communication. Includes compositions, and cultural and literary readings. This course gives students the opportunity to strengthen their knowledge of grammar for increased mastery.

FRROM 219 Intermediate Composition and Conversation II (formerly FRROM 213)
Fall or spring. 4 credits. Provides language proficiency in French (FRROM 206 or 209), or permission of instructor, or placement by Cornell Advanced Standing Examination (CASE). For admission to the Cornell Abroad Program, students are required to take either course or have completed an equivalent level of study. Taught in French. Recommended courses after FRROM 219: FRROM 220, 221, 301, or 305 (220 or 221 may be taken concurrently with 301 or 305). Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: A. Grandjean-Levy, S. LoBello, and K. Proux; spring: S. LoBello and K. Proux.

Emphasis is on improving grammatical accuracy and on enriching vocabulary in oral and written expression of French. Varied types of reading including newspaper articles, short videos, films, and presentations by students, provide the basis for writing assignments and class discussions. Themes and emphases may vary from section to section.

FRROM 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times arranged with instructor.

FRROM 301 Advanced French (I)
Fall or spring. 4 credits. Prerequisite: FRROM 219 (formerly FRROM 213), or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FRROM 301: FRROM 312, FRROM 220, or FRROM 221 may be taken concurrently with 301. Fall: J. Béreaud and staff; spring: S. LoBello and staff.

Class discussions based on reading contemporary texts: half short stories, half articles on current events taken from French magazines or newspapers. All texts are chosen for thematic or cultural interest and linguistic quality. Special attention is given to accuracy in French through grammar review and weekly papers (essays or translations). Each student gives one or more oral presentations in class. Course required of French majors.

FRROM 305 French through Film
Fall or spring. 4 credits. Prerequisite: FRROM 219 (formerly FRROM 203), or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FRROM 305: FRROM 301, 312 (with the permission of the instructor), FRROM 220, or FRROM 221. FRROM 220 or 221 may also be taken concurrently with FRROM 305. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. C. Waldron.

Analysis of French contemporary films and related readings. Used as a means of studying the language. Particular emphasis is on the culture and historical context as it relates to French contemporary society. Additionally, guest speakers provide enrichment on selected topics.

FRROM 312 Advanced French (II)
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 301 or with permission of instructor, or placement by the Cornell Advanced Standing Examination (CASE). Fall: M. C. Vallois and staff; spring: N. Furman.

Continuation of work done in FRROM 301. The objective of FRROM 301 is to teach students to speak and write correct French; in FRROM 312 students are expected to have a richer, more idiomatic and hopefully elegant command of the language.

Formal study of grammar is discontinued, and more attention is devoted to the examination of the stylistics and rhetorical characteristics of texts and to oral presentations by students. Weekly papers as in FRROM 301.

FRROM 313 French in the News
Spring. 4 credits. Prerequisite: FRROM 301, or FRROM 305, or placement by the Cornell Advanced Standing Examination (CASE). A. Grandjean-Levy.

Studying French televised news broadcasts and other media, places students at the heart of today's France. Flexible approach allows themes and emphases to vary from section to section.

FRROM 630 French for Reading—Graduate Students
Spring only. 3 credits. Limited to graduate students. C. Sparfel and staff.
Designed for those with little or no background in French, this course's primary aim is to develop skill in reading French: Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. Some flexibility in selecting texts according to fields of interest is offered.

**Literature**

**FRLIT 201 Introduction to Techniques of Reading French Literature**
Fall. 3 credits. Provides language proficiency. Prerequisites: qualification in French (SAT II score of 600-680, LPF score of 594-629, French 123). Students with an SAT II score of 640 or an LPF score of 60 or more, should take French 221.

Recommended courses after FRLIT 201: French 219, 220, or 221, or permission of instructor. Conducted in French. M. C. Vallois and staff.

FRLIT 201 is designed for students interested in improving their written and oral skills in French and also their literary proficiency. Texts have been chosen both for their literary merit and their manageable linguistic difficulty. Close scrutiny of the works and active class discussions will sharpen students' critical and analytical abilities. The reading list may include authors such as Baudelaire, Hugo, Jonecso, Campus, Ribaud, Sartre, and Duras.

**FRLIT 220 French and Francophone Culture # (IV)**
Spring. 3 credits. Prerequisite: SAT II score of 640 and above, or LPF score of 60 or FRROM 206 (formerly FRROM 200) or 209 (formerly FRROM 203). Conducted in French. M-C. Vallois and staff.

This course serves as an introduction to French Area Studies. It provides an overview of Francophone culture and society from 1945 to the present. Readings include a selection of articles dealing with issues of current concern in France; works by French and Maghrebi or African writers; poetry or drama; two films are also discussed.

**FRLIT 221 Modern French Literature # (IV)**
Fall or spring. 3 credits. Prerequisites: SAT II score of 640 and above, or LPF score of 60, or FRROM 220 or FRROM 200 (formerly FRROM 203). Conducted in French. Fall: M. C. Vallois and staff; spring: J. Béraud, T. McNulty and staff.

This course, divided into small sections, is intended as an introduction to French literature of the modern period. Texts are chosen because of their centrality to the traditional literary canon and with an eye to experimentation. The course considers literary genres (poetry, drama, the novel) as solicitation to read them definitively, at different speeds, with diverse claims on our attention. One test may include French script. The course is designed to satisfy a general interest in modern French literature as well as to prepare students to pursue a French major in literature. Readings include works by Baudelaire, Mallarmé, Beckett, Camus, Proust, Duras, and Assia Djebar.

**FRLIT 222 Early Modern French Literature # (IV)**
Spring. 3 credits. Prerequisite: FRLIT 220, 221, or permission of the instructor. Conducted in French. M. C. Vallois.

Study of the classic literature of seventeenth-century France (Corneille, Racine, Molière, Mme de Lafayette, La Fontaine) and of eighteenth-century Enlightenment literature (Voltaire, Rousseau, Diderot, Beaumarchais). Special attention is paid to the ways in which these various works represent or deal with the shift from an aristocratic cultural code of values to modern bourgeois ideology and aesthetics. The course also invites reflection on the status and centrality of female characters in classical and neo-classical French literature. Theater being central to this period, the course gives special attention to major plays of the classical period. It traces the evolution from the classical tragic heroine to more modern (but no less problematic) representations of women.

**FRLIT 224 The French Experience (also ANTHR 224) (III or IV)**
Fall. 3 credits. Conducted in English. Readings available both in French and in English translation. A. Berger and J. Siegel. We look ethnographically and through literature at tastes and at class as they function and are discussed in France. We examine speech in its practice and as it is reflected upon; and we look at views from France, from America, and in Africa. As we emphasize differences, the French experience emerges.

Note: Prerequisite for all 300-level courses in French literature: FRLIT 220, 221 or the equivalent.

**FRLIT 320 Civilisation II: Contemporary France (IV)**
Fall. 4 credits. Prerequisite: FRROM 219 (formerly FRROM 213) or equivalent. Conducted in French. J. Béraud. Detailed, analytical study of contemporary French society, its structure and its culture. In the second part of the course, students select a topic for in-depth, personal research leading to the writing of a term paper. Short oral presentations are encouraged. A variety of resources are used: texts, magazine and television excerpts, internet items. A few films are shown to illustrate some aspects of French life.

**FRLIT 324 Imagining America: French Travel Writing from De Tocqueville to Baudrillard (IV)**
Fall. 4 credits. D. Rubenstein.

This course addresses nineteenth and twentieth-century French travel writing about America from Alexis de Tocqueville's landmark work, De la Democratic en Amerique to Jean Baudrillard's polemical Amérique. We will be concerned with the question of what America, as both "utopian" ideal and as a living example, represents for the French philosophico-voyager. For example, what role does national fantasy play in the encounters revealed in Julia Kristeva's question of what America, as both "utopian" ideal and as a living example, represents for the French philosophical voyager. For example, what role does national fantasy play in the encounters revealed in Julia Kristeva's._In the spirit of May '68 in some areas of French society, especially youth and education. Finally, it leads to a reflection on current ideologies and the change from modernism to post-modernism.

**FRLIT 330 Francophone African Literature # (IV)**
Spring. 4 credits. Conducted in French. D. Posner.

Introduction to the works of representative poets, dramatists, novelists, and short story writers from sub-Saharan Africa and Madagascar. L. S. Senghor, C. Laye, F. Oyono, J. J. Rabearielovo, S. Labou Tansi, and the Afro-Caribbean Aimé Césaire are among the writers whose works are read. The focus is on the twentieth century and the nature of these writers' relationships with both the West and with Africa.

**FRLIT 333 Contemporary French Thought (IV)**
Spring. 4 credits. Conducted in French. D. Rubenstein.

This course will survey the major contemporary post structuralist, psychoanalytic, and deconstructive theorists in French thought today: Lacan, Foucault, Derrida, Barthes, Bourdieu, Baudrillard, and Watig. Particular emphasis will be on the contribution of these theorists to the analysis of sexuality and pedagogy.

**FRLIT 334 The Novel as Masterwork (also FRLIT 684) # (IV)**
Spring. 4 credits. Conducted in French. Prerequisite: FRLIT 221 or permission of the instructor. N. Furman.

This course traces the evolution of the nineteenth-century French novel. Readings include novels by Stendhal, Balzac, Flaubert, and Zola.

**FRLIT 335 Romance to Revolution: The French Novel before 1789 # (IV)**
Spring. 4 credits. Prerequisite: FRLIT 221 or permission of instructor. Conducted in French. M. C. Vallois.

In addition to considering formal questions relating to the development of the novel in French, this course examines problems such as the appearance of narrative and historical consciousness, the relation between literature and society. Texts read include major such works as Tristan and Iseult, Perrault's Contes, Mme de LaFayette, Prevost, Rousseau, Diderot, Laclos, and Sade.

**FRLIT 370 Perspectives on the Age of Enlightenment: "Enlightened" Literatures # (IV)**
Fall. 4 credits. M. C. Vallois.

Through a reading of various works of the French 18th century (by Montesquieu, Voltaire, Diderot, Rousseau, and Sade), we study the emergence of new literary discourses and practices aiming at a "secularization" of the literary field, in conjunction with the ideological and epistemological changes which took place under the name of Enlightenment.

**FRLIT 386 Jewelry, Perfume, and Cigarettes in French Literature (IV)**
Fall. 4 credits. R. Klein.

This course considers representations of adornment and other useless artifacts in French literature. Readings include works by Mérimée, Diderot, Baudelaire, Gautier, Colette, Mauriac, and Patrick Suskind.
FRLIT 393 The 20th Century Novel (IV)
Spring. 4 credits. Prerequisite: FRLIT 221 or permission of instructor. T. McNulty.
This course examines some of the major experiments with the novel form in twentieth century France (including surrealism, automatic writing, the nouveau roman, and écriture feminine), considering how authors adapt the form and structure of the novel to address such concerns as memory and forgetting, the creative agency of the unconscious, gender and sexuality, exile and displacement, technology and mass reproduction. Authors studied include Gide, Proust, Breton, Roussel, Malraux, Duras, Robbe-Grillet, and Sarrasse.

FRLIT 406 Biblical Diaspora’s in France (also S HUM 406 and COM L 488) (IV)
Fall. 4 credits. T. McNulty.
This course uses the concept of "diaspora" in contemporary French thought. We focus our attention on a group of authors whose uses and adaptations of the concept of "diaspora" are heavily indebted to theologies such as Judaism and mysticism. Can we locate in modern philosophy the "diaspora" of a certain kind of theological thought? What is its relationship to the philosophical discourse in which it takes up residence? The first part of the course considers the problems of estrangement, nomadism, and diaspora in the Bible, examining how the Hebrew patriarchs, Jewish prophets, and Christian apostles use these themes to define their position with regard to God and their different attitudes toward the law, the word, and the book. We then explore how these themes are developed in works by Blanchot, Buber, Deleuze, Derrida, Levinas, Lyotard, Schollem and Rosenzweig. Students may read all works in the original languages or in translation.

FRLIT 413 History of Jews in Modern France (also HIST 417 and JWST 419) (IV or V)
Fall. 4 credits. Prerequisite: permission of instructor. V. Caron.
For description, see HIST 417.

FRLIT 419-420 Special Topics in French Literature
419, fall; 420, spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of special topics.

FRLIT 429-430 Honors Work in French
429, fall; 430, spring. 8 credits year-long course. R grade fall semester, letter grade spring semester, with permission of the adviser. Open to juniors and seniors. Consult the director of the honors program. M. C. Vallois and staff.

FRLIT 448 Medieval Literature (IV)
Spring. 4 credits. Prerequisite: FRLIT 221 or permission of the instructor. Conducted in English. A. Collier.
FRLIT 448 deals with the romance and the lyric. Facility in reading Old French and appreciation of these two major genres are the primary goals of this course.

FRLIT 455 Rabelais (also FRLIT 655) (IV)
Spring. 4 credits. Conducted in French. D. Posner.
Rabelais’s novels, and their explorations of the limits of linguistic expression, are studied in the context of the popular culture of the Late Middle Ages and Early Renaissance, of the dawn of religious conflict in France, of the querre des femmes (the intellectual debate over the status of women), and of early modern science. We also examine how Rabelais’s texts situate themselves in problematic relation to the institutions of Church and State.

FRLIT 471 Translation for the Theatre (also THETR 423/623 and FRLIT 671) (IV)
Spring. 4 credits. Prerequisite: proficiency in language other than English; coursework in dramatic literature, directing, or playwriting. Conducted in English. J. E. Gainor.
For description, see THETR 423.

FRLIT 480 Nineteenth-Century French Women Writers (also WOMNS 478 and FRLIT 680) (IV)
Fall. 4 credits. Conducted in French. A. Berger.
While situating the works read within their specific historical and literary context, this course attempts to address the following questions: How does the inscription of literature as a Public Institution within a phallocentric cultural order affect women authors’ status and writing strategies? To what extent and at what levels does being a woman inform or shape the text produced? And, what ways is literary writing concerned with sexual difference? Writers include Mme. de Staël, George Sand, Flora Tristan, Rachilde and others.

FRLIT 488 Baudelaire in Context (also FRLIT 666, COML 460/660) (IV)
Spring. 4 credits. Prerequisite: one 300-level course in French literature or permission of instructor. Conducted in French. J. Culler.
A study of Les Fleurs du mal in the context of various nineteenth- and twentieth-century discourses. The Romantic lyric (Hugo, Lamartine, Desbordes-Valmore), Romantic Satanism, debates about prostitution, and twentieth-century accounts of Baudelaire as the founder of modern poetry or the poet of the city.

FRLIT 607-608 Proseminar
607, fall; 608, spring. 2 credits each term. M. Greenberg.
The proseminar is the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities include reading and discussion of seminal texts, chapters from dissertations and works in progress, and articles and essays from visiting lecturers.

FRLIT 639-640 Special Topics in French Literature
639, fall; 640, spring. 2-4 credits each term. Staff.
Guided independent study for graduate students.

FRLIT 655 Rabelais (also FRLIT 455)
Spring. 4 credits. Conducted in French. D. Posner.
For description, see FRLIT 455.

FRLIT 671 Translation for the Theatre (also THETR 423/623 and FRLIT 471)
Spring. 4 credits. Conducted in English. J. E. Gainor.
For description, see THETR 423.

FRLIT 680 Nineteenth-Century French Women Writers (also WOMNS 478 and FRLIT 480)
Fall. 4 credits. Conducted in French. A. Berger.
For description, see FRLIT 480.

FRLIT 684 The Novel as Masterwork (also FRLIT 334)
Spring. 4 credits. Conducted in French. N. Purman.
For description, see FRLIT 334

Italian

Students who wish to major in Italian should consult Professor Marilyn Migiel, mm55@cornell.edu, the Director of Undergraduate Studies, in Morrill Hall 311. She will assign the student a major adviser; the general plan and the details of the student's course of study will be worked out in consultation with the adviser. Italian majors are encouraged to take courses in related subjects such as history, art history, music, philosophy, anthropology, classics, linguistics, and other modern languages and literatures. While a major often occupies only the junior and senior years, it is wise for students to seek faculty advice about the major as early as possible.

Students who elect to major in Italian ordinarily should have completed ITALL 216 or 217 by the end of their sophomore year. Exemptions can be made on the basis of an examination. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary history, and to develop some skill in literary analysis. To this end, students are expected to complete successfully 32 credits of Italian literature courses at the 300 level or higher, with papers written in Italian or English. Required courses for the Major are ITALL 303, 304, and a course on Dante. ITALL 402, History of the Italian Language, and 403, Linguistic Structure of Italian, may be counted toward the 32 credits required for the major (an introductory linguistics course is a prerequisite for ITALL 402 and 403).

Students majoring in Italian are also expected to acquire competence in the handling of the language. That competence may be demonstrated by passing an oral and written examination to be arranged by the adviser. Italian majors are also required to complete successfully two courses in related fields (for example, Italian history, Italian art history, literary theory).

Italian majors may study in Italy, generally during their junior year, under any of those study-abroad plans organized by American universities that allow the transfer of grades and credit.

To be eligible, students must have completed the first two years of their curriculum requirements and be in good academic standing.
ITALA 121-122 Elementary Italian
121, fall; 122, spring. 4 credits each term. Prerequisite: ITAL 121, or equivalent. Intended for beginners or students placed by examination. At the end of ITAL 122, students score 56 or higher on the LPI attainment and must pass an oral proficiency examination. ITAL 123 is required for qualification. Evening prelims. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: P. Swenson, F. Cervese-McCobb, S. Stewart-Steinberg, and staff; spring: P. Swenson, T. Alkire, F. Cervese-McCobb, S. Stewart-Steinberg and staff.

A thorough grounding in all the language skills: listening, speaking, reading, writing. Language practice in small groups. Lectures cover grammar and cultural information.

ITALA 132 Continuing Italian
Fall or spring. 4 credits. Provides language proficiency. Limited to students who have previously studied Italian and have an LPI score of 45–55 or an SAT II score of 460–580. Satisfactory completion of ITAL 132 fulfills the qualification portion of the language requirement. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. T. Alkire.

ITALA 209 Intermediate Composition and Conversation I (formerly ITAL 203)
Fall or spring. 3 credits. Provides language proficiency. Prerequisite: qualification in Italian. Students wishing to major in Italian are strongly encouraged to enroll concurrently in ITALL 214, 215, 216, or 217. Letter grades assigned until student receives exceptional permission from the course coordinator for S-U. Fall: K. Bättig von Wittelsbach or T. Alkire; spring: K. Bättig von Wittelsbach.

Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

ITALA 219 Intermediate Composition and Conversation II (formerly ITAL 204)
Spring. 3 credits. Prerequisite: ITAL 209 (formerly ITAL 203) or equivalent. Students wishing to major in Italian are strongly encouraged to enroll concurrently in ITALL 214, 215, 216, or 217. Letter grades assigned until student receives exceptional permission from the course coordinator for S-U. K. Bättig von Wittelsbach.

Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

ITALA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

ITALA 214 World News, Italian Views (IV)
Fall. 4 credits. Course limited to 18 students. Prerequisite: ITAL 209 (formerly ITALL 214) or permission of instructor.

ITALA 215 The Cinematic Eye of Italy (IV)
Spring. 4 credits. Conducted in Italian. Prerequisite: ITAL 209 (formerly ITAL 215) or permission of the instructor.

ITALA 216-217 Introduction to Italian Literature (IV)
Fall: 216; spring: 217. 5 credits. Prerequisite: permission of instructor. ITAL 216 is not prerequisite to ITAL 217. Conducted in Italian. Fall: F. Cervesi-McCobb; spring: T. Campbell.

ITALA 220 Medieval Italy # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. Conducted in English. M. Migiel.

ITALA 224 Contemporary Italy (IV)
Fall. 4 credits. Prerequisite: permission of instructor. Conducted in English. J. Najemy.

ITALA 300 Italian Practicum
Fall or spring. 1 credit. Conducted in Italian. Fall: T. Campbell and M. Migiel; spring: C. Campbell, M. Migiel and S. Stewart-Steinberg.

ITALA 351 Machiavelli (also HIST 351) # (III or IV)
Fall. 4 credits. Conducted in English. J. Najemy.

ITALA 369 History of Florence (also HIST 369) # (III or IV)
Spring. 4 credits. Conducted in English. J. Najemy.

ITALA 399 Modern Italian Novel (IV)
Fall. 4 credits. Prerequisite: permission of instructor. Students who have taken ITALL 399 previously are permitted to retake the course for credit, provided that the readings are different. Conducted in Italian. P. Swenson.

ITALA 220–224 are conducted in English. Students who are proficient in Italian have the option of enrolling concurrently in the one-credit Italian Practicum, ITALL 300.
We examine the depiction of fascism in films by Benigni, Berrolucci, Carevani, Cavani, de Sica, Pasolini, and Visconti.

ITAL 390 Fascist Bodies, Fascist Films (also ITALL 690) (IV)
Fall. 4 credits. Conducted in English.
T. Campbell.

An introduction to the central issues in Italian feminist activity from the 1970s to the present. In addition to introducing students to the work of Italian feminist writers (principal among them Dacia Maraini) and the work of Italian feminist philosophers (Luisa Muraro, Adriana Cavarero, and other members of the group Diotima), the seminar also explores the Italian political debates about issues that affect women (including abortion, divorce, harassment, and violence against women).

ITAL 419-420 Special Topics in Italian Literature
419, fall; 420, spring. 2–4 credits each term.
Prerequisite: permission of instructor.
T. Campbell and M. Migiel.

Guided independent study of specific topics.

ITAL 427 Dante: The Divine Comedy (also ITALL 627) (IV)
Spring. 4 credits. Conducted in English.
T. Campbell.

A close reading of selected canons from the three sections of Dante's Divine Comedy. Readings and class discussion are in English, but there is an opportunity for students with some Italian to read portions of the poem in the original.

ITAL 429-430 Honors in Italian Literature
429, fall; 430, spring. 8 credits year-long course.
Prerequisite: permission of instructor. M. Migiel.

ITAL 456 Opera, History, Politics, and Gender (also HIST 456, WOMNS 454, COML 456, S HUM 450, MUSIC 474) (III or IV)
Spring. 4 credits. Conducted in English.
M. Steinberg and S. Stewart-Steinberg.

For description, see HIST 456.

ITAL 465 The Modern Post-Postmodernism in Italy (also ITALL 665) (IV)
Spring. 4 credits. Conducted in Italian.
T. Campbell.

Against the backdrop of recent, far-reaching changes in technology, we examine the movement that has come to be known as postmodernism. The following issues are taken up in the context of mainly, though not exclusively, Italian literature: conceptions of temporality; the mass media; simulacra and dystopia; post-hermeneutics; and urban landscapes. Works by Calvino, Eco, Jameson, Kluge, Primo Levi, Lyotard, Manganelli, Pynchon, Tabucchi, and Vattimo are read.

ITAL 468 Love and Sex in the Italian Renaissance (also HIST 468) (III or IV)
Spring. 4 credits. Conducted in Italian.
W. Wetherbee.

For description, see HIST 468.

ITAL 627 Dante: The Divine Comedy (also ITALL 427)
Spring. 4 credits. Conducted in English.
W. Wetherbee.

For description, see ITALL 427.

ITAL 639-640 Special Topics in Italian Literature
639, fall; 640, spring. 4 credits each term.
T. Campbell and M. Migiel.

For description, see ITALL 639.

ITAL 665 The Modern Post-Postmodernism in Italy
Spring. 4 credits. Conducted in Italian.
T. Campbell.

For description, see ITALL 665.

ITAL 657 Italian Renaissance Epic (also ITALL 457)
Fall. 4 credits. Conducted in English.
M. Migiel.

For description, see ITALL 657.

ITAL 690 Fascist Bodies, Fascist Films (also ITALL 390)
Fall. 4 credits. Conducted in English.
T. Campbell.

For description, see ITALL 690.

ITAL 696 Italian Feminisms (also ITALL 396)
4 credits. Conducted in Italian.
M. Migiel.

For description, see ITALL 696.

Portuguese

Faculty: J. Oliveira

PORT 121-122 Elementary Portuguese
121, fall; 122, spring. 4 credits each term.
Intended for beginners. Students may attain qualification upon completion of 122 by achieving a satisfactory score on a special examination. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. L. Morato-Peña.

PORT 209-219 Continuing Portuguese
209, fall; 219, spring. 3 credits each term.
Prerequisites: for PORT 209: PORT 122 or equivalent and qualification in any Romance Language. C. Rosen.

PORT 209-219 Intermediate Composition and Conversation (formerly PORT 203-204)
209, fall; 219, spring. 3 credits each term.
Prerequisites: for PORT 209, PORT 122 or permission of instructor, for PORT 219, PORT 209 or permission of instructor. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. J. Oliveira.

PORT 2090-219 CONVERSATIONAL LANGUAGE PROFICIENCY
209, fall; 219, spring. 3 credits each term.
Prerequisites: for PORT 209, PORT 122 or permission of instructor, for PORT 219, PORT 209 or permission of instructor. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. J. Oliveira.

PORT 319 Readings in Luso-Brazilian Literature (formerly HIST 479) (IV)
Fall. 4 credits. Conducted in Portuguese.

For description, see PORT 319.

QUECH 121-122 Elementary Quechua
(formerly QUECH 131-132)
121, fall; 122, spring. 4 credits each term.
Prerequisite: qualification in Spanish. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. L. Morato-Peña.

An beginning conversation course in the Cuzco dialect of Quechua.

QUECH 136 Quechua Writing Lab
Spring. 1 credit. Prerequisite: concurrent enrollment in QUECH 122 or instructor's approval. Letter grade only.
L. Morato-Peña.

Computer-assisted drill and writing instruction in elementary Quechua.

QUECH 209-219 Continuing Quechua
209, fall; 219, spring. 3 credits each term.
Prerequisites: for QUECH 209: QUECH 122 or equivalent, for QUECH 219: QUECH 209 or equivalent. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. L. Morato-Peña.

An intermediate conversation and reading course. Study of the Huarochiri manuscript.

QUECH 300 Directed Studies
Fall or spring. 1–4 credits variable.
Prerequisite: permission of instructor.
L. Morato-Peña.

Taught on a specialized basis to address particular student needs. Times arranged with instructor.

Romance Studies

ROM S 321 History of the Romance Languages (also LING 321) (III)
Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance Language. C. Rosen.

Course topics include: popular Latin; pan-Romance trends in phonology, morphology, syntax, and the lexicon; regional divergence; non-Latin influences; Medieval diglossia; and emergence of Romance standards.

ROM S 322 History of the Romance Languages (also LING 322) (III)
Spring. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance Language. C. Rosen.

Covers the history of French, Italian, and Spanish from 850 to 1250 A.D. Includes
Spanish

The Major
The Spanish major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in literary and linguistic analysis. Satisfactory completion of the major requires that students meet language and literature requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, and to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake preprofessional training for graduate study in law, medicine, engineering, or a variety of disciplines in which knowledge of Spanish is beneficial.

Students in the major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult Professor C. Arroyo, cma6@cornell.edu, the Director of Undergraduate Studies, in Morrill Hall 306, who will admit them to the major, and assign them an adviser from the Spanish faculty. Spanish majors will then work out a plan of study in consultation with their advisers. Spanish majors have great flexibility in devising their programs of study and areas of concentration. Previous training and interests as well as vocational goals will be taken into account when the student's program of courses is determined.

Spanish Language Requirement
The Spanish Language Requirement normally includes at least 20 credits of Spanish literature beyond the core courses. Literature majors are strongly encouraged to include in their programs courses in all the major periods of Hispanic literature.

Spanish Literature Option
The Spanish Literature Option normally includes at least 20 credits of Spanish literature beyond the core courses. Literature majors are strongly encouraged to include in their programs courses in all the major periods of Hispanic literature.

Spanish Language Option
A combination of literature and linguistics.

Area Studies Option (Spanish, Latin American, or U.S. Latino Studies)
At least 20 credits of courses at the 300 level and above in any of these focus areas beyond the core, all courses to be approved through consultation with the major adviser. Courses should reflect interdisciplinary interests in the area and may include up to three other academic fields of interest. For example, a student interested in Latin American studies may want to include courses on such topics as Latin American history, government, rural sociology, and economics. Students who want to specialize in U.S. Latino issues may want to include such topics as sociology of Latinos, Latino history, and Latino medical issues in addition to further studies in literature. Students planning to spend a year or semester in Seville (but not exclusively such students) frequently plan their coursework to emphasize Spanish history, art, political economy, and other related field courses, such as courses on Islam and Moorish Spain.

The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

Study Abroad in Spain. Cornell, the University of Michigan, and the University of Pennsylvania cosponsor an academic year in Spain program. Students enrolled in this program spend the first year in Seville and the second year at the program's center in Madrid. Students in the major beginning in the fall semester begin in an orientation session at the University of Seville, where they take coursework in Spanish language and culture and take advantage of special lectures and field trips in Andalucia. The College of Arts and Sciences awards three credits for orientation. Once the semester begins, students enroll in regular classes the University of Seville and at the program's center facility. Center courses are designed for the program and include a seminar offered by the resident director, from the faculty of either Cornell, Michigan, or Pennsylvania. Other center courses typically include history of art, history of the Mediterranean, a literature course, and Spanish composition and syntax. In Seville, students live in private homes and a rich array of cultural activities and excursions are organized every semester.

Applicants are expected to have at least completed SPANR 219 prior to departure. Students are strongly encouraged to study abroad for the entire year rather than one semester. Students interested in the study abroad program should visit Cornell Abroad in 474 Uris and take a look at the Cornell Abroad web site: www.einaudi.cornell.edu/cuabroad.

Study Abroad in Bolivia: The Summer program in Cochabamba, Bolivia is sponsored by the Latin American Studies Program and accepts both undergraduate and graduate students. Students live with Bolivian families and normally take two courses with Cornell faculty who participate in this program. In addition to course work in Bolivian culture, politics, and social movements, the program features the opportunity to do intensive study in Quechua, the native language spoken by many Bolivians, as well as Spanish, and to participate in research and internships with grass-roots communities, government offices, and businesses.

Spanish language courses are offered by the Department of Romance Studies, and Spanish linguistics courses are offered by the Department of Linguistics.

SPANR 112 Elementary Spanish: Review and Continuation
Fall. 4 credits. Prerequisite: LPS score 37-44. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. M. Rice and staff.

This course is designed for students who have taken some Spanish and who have a placement score of 37-44 or SAT II 370-450. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken SPANR 121 may enroll for this course. As part of the final exam, students take the LPS and, according to their score, may place into SPANR 123 (score below 56) or receive qualification (56 or above), and placement into the 200-level courses.

SPANR 121-122 Elementary Spanish
121, fall and summer; 122, spring. 4 credits each term. Prerequisites: for SPANR 121, SPANR 121. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: M. K. Redmond, S. Amigo-Silvestre and staff; spring: M. K. Redmond and staff.

This course is intended for students with no experience in Spanish. (Students who have previously studied 2 or more years of Spanish are not eligible for 121 unless they have an LPS score lower than 37 or SAT II lower than 370.) The course provides thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information. Evening prelims.
**SPANR 123 Continuing Spanish**
Fall, spring, or summer. 4 credits. Provides language qualification. Prerequisite: SPANR 112, or an LPS score 45–55 or SAT II 460–580. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: E. Dozier. S. Amigo-Silvestre and staff; spring: E. Dozier, Z. Iguina, and C. Lawless. An advanced-intermediate course designed for students who want to go beyond the basic language requirement, and further broaden their knowledge of the language and related cultures, as well as improve their comprehension and communication skills. This course guides students to take greater command of their own language learning process to optimize their continued progress. Includes a strategic focus on specific problems in listening, and reading comprehension, and in accurate writing and speaking.

**SPANR 300 Directed Studies**
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Times arranged with instructor. Staff. Taught on a special topic to address particular student needs.

**SPANR 310 Advanced Conversation and Pronunciation**
Spring. 3 credits. Prerequisite: SPANR 219 or equivalent. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Z. Iguina. A conversation course with intensive oral practice obtained through the production of video programs. Study of the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. Weekly pronunciation labs.

**SPANR 311 Advanced Composition and Conversation I**
Fall or spring. 4 credits. Prerequisite: SPANR 218 or 219 or CASE Q++ or equivalent. Fall: M. Stycos and staff; spring: Z. Iguina. Advanced language skills, developed through reading, grammar review, and intensive practice in speaking, writing, and translation. Analysis of present-day Spanish usage in a wide variety of oral and written texts.

**SPANR 312 Advanced Composition and Conversation II**
Fall or spring. 4 credits. Prerequisite: SPANR 311 or permission of instructor. Fall: M. Stycos; spring: staff. Readings and class discussion focus on the stylistic analysis of modern texts. Increased emphasis, through weekly essays, on students’ development of an effective Spanish prose style.

**SPANR 366 Spanish in the United States (also LING 366 and LSP 366)**
Fall. 4 credits. Prerequisite: some knowledge of Spanish. M. Suher. Examination of major Spanish dialects in the United States from a linguistic perspective. Topics include: contrast with the standard language; borrowing, interference, and code switching; syntactic, morphological, and phonological characteristics; and sex-related phenomena.

**SPANR 630 Spanish for Reading**
Spring. 3 credits. Limited to graduate students. J. Routier-Pucci. Designed for those with little or no background in Spanish and little exposure to written Spanish, this course primarily aims to develop skill in reading Spanish. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. The types of texts covered depend on the interests of the students in the course.

**Literature**

**SPANL 218 Introduction to Hispanic Literature @ (IV)**
Fall or spring. 3 credits. Prerequisite: SPANL 200, or 207, or 209 or CASE Q++, or permission of coordinator. The course is divided into small sections and is taught mainly in Spanish. The literature course that normally follows SPANL 218 is either 316 or 318. C. Lawless and staff. An intermediate course designed to improve reading, writing, speaking, and comprehension skills in Spanish through the reading and discussion of contemporary literary works of various genres (narrative prose, drama, poetry) from Spain and Spanish America. Emphasis is placed on the development of fluency in reading and of critical and analytical abilities. The cultural, sociological, and aesthetic implications of texts by authors such as Borges, Cortázar, Fuentes, García Márquez, García Lorca, and Cela are considered.

**SPANL 246 Contemporary Narratives by Latina Writers (also LSP 246 and WOMNS 246) (IV)**
Fall. 3 credits. Conducted in English. L. Carrillo. This course offers a survey of narratives, including novels, short fiction, essays, political/feminist manifestoes and memoirs by representative Latina writers of various Latino ethnic groups in the United States and the Americas including, Chicana, Chilean, Cuban, Dominican, and Puerto Rican writers and others. We investigate the parallel development of a Latina perspective on personal, social and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960’s through to contemporary feminist activism and women of color movements. We investigate these works as artistic attempts to deal with issues of culture, language and bilingualism, family, gender, sexuality, and domesticity among others. We account for regional distinctions and contributions. Readings include works by Julia Alvarez, Elena Castedo, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Ana Lydia Vega, and others.

**SPANL 301 Hispanic Theater Production**
Fall or spring. 1–2 credits. E. Sánchez-Blake. Students involved in Hispanic Theater Production develop a specific dramatic text for full-scale production. The course involves selection of an appropriate text, close analysis of the literary aspects of the play, and group evaluation of its representational value and effectiveness. All students signing up for the course are involved in some aspect of production of the play, and write a final paper as a course requirement. Credit is variable depending upon the student’s role in the production: a minimum of 50 hours of work is required for one credit; a maximum of two credits will be awarded for 100 hours or more of work.

**SPANL 316 Readings in Modern Spanish Literature (IV)**
Fall or spring. 4 credits. Conducted in Spanish. Prerequisite: SPANL 218, 219 or CASE Q++, or permission of instructor. Fall: C. Arroyo and M. Stycos; spring:
and social peculiarities of the Caribbean area. Includes discussions of national identity and the emergence of alternative subcultures in the literature of the region. Topics include: racial, generic and sexual otherness; hybridity and translocality in the context of contemporary globalization; and postmodernity in the region. Authors such as Martí, Hostos, Ortiz, Guilleón, Palés Matos, Carpentier, Lezama Lima, Piura, Arenas, Sánchez, Ferré, Valdés, Estevez, Vergés, Veloz Maggiolo, Hernández, Díaz, Ramos Otero, Rodríguez Juliá, Vega, García Ramis, and Sánchez are included. Supplemental theoretical readings to include such authors as Ortiz, Cornejo Polar, Benítez Rojo, García Canclini, Ramos, Sommer, Bhadha, Butler.

SPANL 374 Caribbean Popular Culture (IV)
Spring. 4 credits. Conducted in Spanish. M. García-Calderón
Is the category of “popular” taken for granted? What do we in fact mean when we describe a particular clothing style, film, television show, or music video as “popular”? Can works of art be “popular”, or is this expression reserved for objects, practices, and images associated with the common and everyday? Do distinctions persist between high and low culture, or is every aspect of culture commercial? These questions spark the major tensions of this course. We investigate the concept of the popular historically as well as critically through the cultural representations of the Hispanic Caribbean. Our exploration into these cultural representations seeks to interrogate how far the culture has been studied, theorized, and defined within academic discourses to help locate the function of the popular within contemporary culture. Readings include theoretical texts by Benjamin, Adorno, Eco, Bennett, García Canclini, Marin Barbero, and others. Primary texts by Cabrera Infante, Ferré, Lugo Filippi, Vega Montero, Paz, Rodríguez Juliá, Sánchez, Vergés, Padura, Ramos Otero, and Valdés are discussed.

SPANL 399 Spanish Film (IV)
Fall. 4 credits. Conducted in Spanish. Prerequisite: SPANL 218 or 311 or permission of instructor. Screenings to be announced. J. R. Resina.
Examines the evolution of Spanish cinema since Franco’s death in 1975, both from a historical and a cinematic perspective. The focus is on documentary, fictional and allegorical reconstruction of the past, and on the images of the new democratic society which illustrate a postmodern aesthetic. Selected films include works by directors who started their careers under the dictatorship (Saura, Erice, Boraú) and by members of the younger generation, such as Almodóvar.

SPANL 403 After Immigration (also HUM S 403 and LSP 403) (IV)
Spring. 4 credits. D. Castillo.
Beginning with a close reading of Michael Jones-Correa’s seminal study of Latinos in New York, *Between Two Nations*, we focus class discussion on recent Latin American immigration to the United States through two complementary perspectives and meditations on the immigrant experience: that of the individuals who have arrived in the US, and that of individuals who have chosen to remain in the countries of origin. The class covers films like *Nueva Yol* and *Jardín de Eden*, Latin American authors like Carlos Fuentes, Ana Lydia Vega, and Ariel Dorfman, and US Latinos like Julia Alvarez, Francisco Goldman, and Cristina García. Students are encouraged to do individually-tailored research projects that may include autobiographical or ethnographic elements as well as literary analysis and theoretical inquiries.

SPANL 419-420 Special Topics in Hispanic Literature
419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of specific topics. For undergraduates interested in special problems not covered in courses.

SPANL 425 Prehispanic Mexico in Twentieth Century Mexican Literature (IV)
Spring. 4 credits. M. Valdes.
This course will examine the extensive research on prehispanic Mexico carried out by Miguel León Portilla and others in the last forty years and consider its incorporation into the work of Octavio Paz, Carlos Pellicer, Carlos Fuentes, Juan Rulfo and José Emilio Pacheco.

SPANL 429-430 Honors Work in Hispanic Literature
429, fall; 430, spring. 8 credits. Year-long course. R grade fall semester, letter grade spring semester. Limited to seniors with a superior academic record. Prerequisite: permission of instructor. C. Arroyo and staff.

SPANL 440 Medieval Spanish Literature # (IV)
Fall. 4 credits. Conducted in Spanish. C. Arroyo.
Readings from Mío Cid to Celestina. Emphasis is on concepts (learned vs. popular, topos vs. personalismo, pro-anti-feminism, courtly love) in European perspective. Considers cultural distance and “assimilation” through reading.

SPANL 447 The Spanish American Novel: Origins and Transformations (IV)
Fall. 4 credits. F. Unzueta.
This course presents a (critical) survey of the first 150 years of Spanish American novels (ca. 1820–1950), exploring its multiple transformations. It considers different theories of the novel, the major literary movements of the era (Neo-classicism, Romanticism, Realism, modernismo, the novela de la tierra and the New Novel), and documents containing a Spanish American poetics of the novel. Some other critical problems addressed are: genre theory, periodization and literary histories, the constitution of subjects, and the incorporation of history and “reality” in the novel.

SPANL 484 Nationalism and Literature (also COML 484) (IV)
Spring. 4 credits. Conducted in English. Prerequisite: demonstrated reading ability in Spanish. J. R. Resina.
What are nations? How did they form in history? What is their role in the present? How do they affect the cultural field and the formation of literary canons? What is the difference between the nation-state and stateless nations? How do they relate and sometimes clash, in the cultural arena? These and related questions are the focus of this course, in which theoretical readings are supplemented by literary texts, primarily but not exclusively from the Spanish literary tradition.
Catalan intellectual Santiago Ramon y Cajal the early twentieth century especially Miguel Martinez Ruiz and Miguel de Unamuno. Spanish perspective on the self will be included works of Leopoldo Alas, Benito Age Spanish theater, such as genre and reception theory, feminist and psychoanalytic analyses, among others, we study the Spanish comedia and their audien­ces, comedias texts, captivates plays, and dramatic productions on the New World in works by Cervantes, Lope de Vega, Tirso de Molina, Ruiz de Alarcón, María de Zayas, and Calderón.

**SPANL 653 Don Quijote: And the Theory of Reading a Classic**
Spring. 4 credits. Conducted in Spanish. M. A. Garces.

This course explores the rise and reign of Spain’s remarkable national theater in the sixteenth and seventeenth centuries, from the birth of the drama to the emergence of the comedia, which produced truly popular great art, to the highly intellectual and artful crafted drama of Calderón. Summarizing the most recent theoretical approaches to Golden Age Spanish theater, such as genre and performance studies, reception theory, feminist and psychoanalytic analyses, among others, we study the Spanish comedia and their audiences. Students planning to take the course, a small fee may be charged for photocopied texts for course work.

**SPANL 670 Constituting National Subjects**
Fall. 4 credits. F. Unzueta.

This course explores the constitution of "national subjects" in a range of 19th-Century Spanish American discourses, including novels, autobiographies, essays, and cuadros de costumbres. It will trace some of the transformations of hombres de bien into abstract citizens and a range of socially differentiated national subjects. We will seek theoretical articulations of the notion of the "subject," and study how subjects insert themselves in, or resist, dominant discourses, ideologies and hegemonic projects.

**SPANL 689 The Latin American "Boom"**

This course examines the writers of the "Boom", paying close attention to their experimentation with narrative form and their bold ambition to write "la novela total". We read essays and novels by García Marquez, Vargas Llosa, Cortazar, Cabrera Infante, and Fuentes. Due to the length of the novels, expect intensive reading.

**RUSSIAN**
N. Pollak, chair (226F Morrill Hall); P. Carden, director of undergraduate studies (literature), (226B Morrill Hall); S. Paperno, director of Russian Language Program (226E Morrill Hall); 255-8350; E. W. Browne, L. Paperno, S. Paperno, S. Senderovich, G. Shapiro, V. Tsimberov.

The Russian Major
Russian majors study Russian language, literature, and linguistics, and emphasize their specific interests. It is desirable, although not necessary, for prospective majors to complete RUSSA 121–122, 201–202, and 203–204 as freshmen and sophomores, since these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of RUSSA 122 or the equivalent. Students who elect to major in Russian should consult Professor Carden as soon as possible. For a major in Russian, students are required to complete (1) RUSSA 301–302 or 303–304 or the equivalent, and (2) 18 credits from 302- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

Certain courses may, with the permission of the instructor, be taken for one additional hour's credit. Such courses involve a one-hour section each week with work in the Russian language. Students may count two one-hour credits towards the 12 hours of Russian literature in the original language required for the major.

**Study Abroad**
Cornell is an affiliated institution with the Council on International Educational Exchange program for Russian language study at St. Petersburg State University. Cornell students also frequently attend the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from W. Browne, in the Department of Linguistics.

**Honor**. Students taking honors in Russian undertake individual reading and research and write an honors essay. Students planning to take honors should consult Professor Carden in their junior year.

**Fees**. Depending on the course, a small fee may be charged for photocopied texts for course work.

**Freshman writing seminar requirement**.
The following course satisfies the freshman writing seminar requirement: Russian 104. Not offered 2001–2002.

**Russian Language**
For details on all Russian language courses, see: http://russian.dml1.cornell.edu.
Taught on a specialized basis to address particular student needs usually related to a project or interests not addressed in other Russian courses.

**RUSSA 303-304 Advanced Composition and Conversation**
303, fall: 304, spring. 4 credits each term. Prerequisites: for RUSSA 303, RUSSA 204 or equivalent; for RUSSA 304, RUSSA 303 or equivalent. L. Papemo, S. Papemo, V. Tsimberov.

Course involves writing, reading, and conversation. Involves viewing and reading authentic language materials such as current Russian films (translation and documentary), newspapers, TV programs, and Russian web sites.

**RUSSA 305-306 Directed Study in Writing and Grammar**
305, fall: 306, spring. 2 credits each term. Prerequisite: placement by the department. Staff.

This course is intended for students with special needs (e.g., children of Russian immigrants who speak Russian at home but have not learned to read or write grammatically correct Russian) that cannot be met by any other Russian course.

**RUSSA 309-310 Advanced Reading**
309, fall: 310, spring. 4 credits each term. Prerequisites: for RUSSA 309, RUSSA 204; for RUSSA 310, RUSSA 309 or equivalent. L. Papemo, S. Papemo, V. Tsimberov.

The purpose of the course is to teach advanced reading skills. The weekly reading assignment is 20–40 pages of unabridged Russian prose and non-fiction. The discussion of the reading is conducted entirely in Russian and is centered around the content of the assigned selection. When possible, a special section for native speakers of Russian is taught, with larger reading assignments—up to 130 pages per week. This course cannot be used to satisfy the Humanities requirement.

**RUSSA 401-402 History of the Russian Language (also LING 417-418) (III)**
401, fall: 402, spring. 4 credits each term. Prerequisites: for RUSSA 401, permission of instructor; for RUSSA 402, RUSSA 401 or equivalent. Offered alternate years. Not offered 2001–2002. W. Browne.

Course considers phonological, morphological, and syntactic developments from old Russian to modern Russian.

**RUSSA 403-404 Linguistic Structure of Russian (also LING 443-444) (III)**
403, fall: 404, spring. 4 credits each term. Prerequisites: for RUSSA 403, LING 401 and permission of instructor, for RUSSA 404, RUSSA 403 or equivalent. Offered alternate years. Not offered 2001–2002. W. Browne.

A synchronic analysis of the structure of modern Russian. RUSSA 403 deals primarily with phonology and 404 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, tense, gender, number, nonuniversal categories, and the relation between morphology and syntax.

**RUSSA 413-414 Advanced Conversation and Stylistics**
413, fall: 414, spring. 2 credits each term. Prerequisites: for RUSSA 413, RUSSA 303–304 or the equivalent, for RUSSA 414, RUSSA 413 or equivalent. V. Tsimberov.

Discussion of authentic unabridged Russian texts and films (feature or documentary) in a variety of nonliterary styles and genres.

**RUSSA 601 Old Church Slavonic (also LING 661)**
Fall. 4 credits. Prerequisite: students should know a Slavic or classical Indo-European language. This course is prerequisite to RUSSA 602 and 651. Offered alternate years. W. Browne.

Grammar and reading of basic texts.

**RUSSA 602 Old Russian Texts (also LING 662)**
Spring. 4 credits. Prerequisite: RUSSA 601. Offered alternate years. W. Browne.

Grammatical analysis and close reading of Old Russian texts.

**RUSSA 633-634 Russian for Russian Specialists**
633, fall: 634, spring. 1–4 credits variable. Prerequisite: 4 years of college Russian. For graduate and advanced undergraduate students. L. Papemo, S. Paperno.

The course is designed for students who specialize in an area of Russian studies requiring fine active control of the language. Fine points of syntax, usage, and style are discussed.

**RUSSA 651-652 Comparative Slavic Linguistics (also LING 671-672)**
651, fall: 652, spring. 4 credits each term. Prerequisites: for RUSSA 651, RUSSA 601 taken previously or simultaneously or permission of instructor, for RUSSA 652, RUSSA 651 or permission of instructor. Offered alternate years. W. Browne.

Covers sounds and forms of the Slavic languages and of prehistoric common Slavic. Also covers main historical developments leading to the modern languages.

**RUSSA 700 Seminar In Slavic Linguistics**

Topics chosen according to the interests of staff and students.

**Russian Literature**
A variety of courses are offered in Russian Literature; some course readings are in English translation, others are in the original Russian, others use both. The connection between Russian history, society, and literature is particularly close, so instruction and discussion in class often include a variety of topics, such as culture and intellectual history, as well as literature. Several courses are interdisciplinary, cosponsored with the departments of History, Economics, Government, Comparative Literature, and others.

First-Year Writing Seminars: consult the John S. Knight Institute brochure for times, instructors, and descriptions.

**RUSSL 201-202 Readings in Russian Literature**
201, fall; 202, spring. 3 credits each term. Prerequisite: qualification in Russian. Open to freshmen. 201 is prerequisite to 202. Separate sections for native and nonnative speakers of Russian, each co-taught by language and literature faculty. For the native speaker section, proficiency in Russian is required. Proficiency is achieved by completing RUSS 203 or passing a placement test that is always given a few days before the beginning of the semester and is usually announced on the web site (russian.dml.cornell.edu) as well as in other ways. For the native speaker section, qualification in Russian is required, and proficiency is achieved by successfully completing RUSSL 201 or 202. N. Poliak.

These courses, the first that students take after qualification in Russian, serve as an introduction to Russian literature in its cultural context. Readings in prose and verse may include works by Pushkin, Lermontov, Tiutchev, T. Tolstoy, Chekhov, and others.

**RUSSL 207 Themes from Russian Culture # (IV)**

This course is based on lectures, discussions, and audio-visual presentations (slides, tapes, films). Included within its scope are various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought from the very end of the eighteenth century. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country which plays a major role in the world today. Russian culture is presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.

**RUSSL 208 Themes from Russian Culture II # (IV)**

This course is based on lectures, discussions, and audio-visual presentations (slides, tapes, films). Included within its scope are various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought from the very end of the eighteenth century. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country which plays a major role in the world today. Russian culture is presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.

**RUSSL 279 The Russian Connection, 1830–1867 (also COM L 279) # (IV)**

Russian prose began to find its voice, it responded with enthusiasm to the European prose tradition. One line of development in the Russian novel began with Rousseau’s division between the needs of individual growth, nourished by solitude and introspection, and the demands of society. Tolstoy’s War and Peace can be read as a summary and a testing of the novelistic tradition that grew out of the work of Rousseau, in both European and Russian literature. We follow the line that leads to Tolstoy’s multifaceted inquiry, beginning with two short novels that set the tone for the introspective novel in the two traditions, Constant’s Adolphe and Lermontov’s Theor u of Our Time. Looking at relevant excerpts from European prose writers, Rousseau, Musset, Goethe, Stendhal, Thackeray among others, we think about the possibilities and limitations of the introspective novel as a form, especially as manifested in one of the monuments of the genre, War and Peace.

**RUSSL 280 The Russian Connection, 1870–1960 (also COM L 280) # (IV)**
A survey of Russian poetry with primary emblematic of a novel that goes beyond the "Rameau's Nephew" may be taken as respects counter to the tradition that grew out of Diderot's "Rameau's Nephew." Dostoevsky was the inheritor of this line in the European prose tradition. His works, in particular Notes from Underground and The Idiot, are the focal point of our discussion. We follow up the tradition as Dostoevsky's influence returns the line to Europe in the works of writers like Camus and Sartre.

**RUSSL 331 Introduction to Russian Poetry # (IV)**
Fall. 4 credits. Prerequisites: RUSSL 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major.
S. Senderovich.
A survey of Russian poetry with primary emphasis on the analysis of individual poems by major poets.

**RUSSL 332 Russian Drama and Theatre (also THTR 322, COM L 322) # (IV)**
Spring. 4 credits. Not offered 2001–2002. Next offered 2002–2003. S. Senderovich. Covers selected topics. Includes discussion of a number of the most representative Russian plays of the nineteenth and twentieth centuries in chronological order. Offers introductions to the historical period, cultural atmosphere, literary trends, and crucial moments in the history of the Russian theater. Among the works studied are Gogol's Inspector General, Ostrovsky's The Storm, and Chekhov's The Cherry Orchard. All readings are in English translation. Additional assignments in critical literature are made for graduate students.

**RUSSL 333 Twentieth-Century Russian Poetry (IV)**
Spring. 4 credits. Prerequisite: RUSSL 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major.
P. Carden.
A survey of two centuries of Russian story telling. Emphasis is on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.

**RUSSL 334 The Russian Short Story (IV)**
Spring. 4 credits. Prerequisites: RUSSL 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major.
P. Carden.
A survey of two centuries of Russian story telling. Emphasis is on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.

**RUSSL 335 Gogol # (IV)**
P. Carden.
A major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human context is understood as a school in which we form ourselves. This all-encompassing vision of education has been embodied in the works of great philosophers such as Plato's Republic, Rousseau's Emile, and Tolstoy's War and Peace. Our aim is to understand how the discourse on education became a central part of our Western tradition.

**RUSSL 336 The Russian Novel (also COM L 367) # (IV)**
Fall. 4 credits. Special discussion section for students who read Russian. N. Pollak.

**RUSSL 337 Films of Russian Literary Masterpieces (also COM L 338) # (IV)**
War and Peace and Dr. Zhivago are well-known American films relating to Russian literature of the nineteenth and twentieth centuries. Russian literature has been a matter of great interest both in the West and East. A clear goal of cultural translation is presented by film versions of Russian literary masterpieces. We perform a comparative analysis of these works, which provides an excellent opportunity for discussing problems of translation between various media and of cultural translation.

**RUSSL 350 Education and the Philosophical Fantasies (also COM L 350) # (IV)**
A major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human context is understood as a school in which we form ourselves. This all-encompassing vision of education has been embodied in the works of great philosophers such as Plato's Republic, Rousseau's Emile, and Tolstoy's War and Peace. Our aim is to understand how the discourse on education became a central part of our Western tradition.

**RUSSL 367 The Russian Novel from 1917 to the Present (IV)**
Spring. 4 credits. Also open to graduate students. No prerequisites. There will be a special section for students who read Russian. Not offered 2001–2002. Staff.
Readings are done in English translation. Course works as a survey of Russian literature focusing on the most important writers. Among the themes explored are Russian Modernism, social command, socialist realism, the Thaw, dissident and emigre literature, and post-modernism. Writers include Blok, Mayakovsky, Babel, Oleksa, Platonov, Pasternak, Nabokov, Solzhenitsyn, the two Errofes, and contemporary women poets and short story writers.

**RUSSL 369 Dostoevsky (also COM L 332) # (IV)**
Spring. 4 credits. P. Carden.
This course involves close reading of novels and short works by Dostoevsky. Dostoevsky's fiction is in contentous dialogue with the literature and philosophy of the preceding century and opens out to the literature and philosophy of the following century. This course addresses the problem of Dostoevsky's fiction in contentous dialogue with the literature and philosophy of the preceding century and ends out to the literature and philosophy of the following century. This course is designed for nonspecialists as well as literature majors. All reading is in English translation.

**RUSSL 385 Reading Nabokov (also COM L 385 and ENGL 379) # (IV)**
This course offers an exciting trip into the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer, Nabokov, at the outbreak of World War II, came to the United States where he reestablished himself, this time as an American writer of world renown. In his analysis of the Nabokovian artistic universe, we focus on his Russian corpus of works, from Mary (1926) to The Enchanter (written in 1939), all in English translation, and examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell—Lolita (1955) and Pnin (1957).

**RUSSL 393 Honors Essay Tutorial # (IV)**
Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year. Credit for the first semester will be awarded upon completion of second semester. For information, please see Director of Undergraduate Studies.

**RUSSL 409 Russian Stylistics # (IV)**
We examine works by three poets in the first quarter of this century: Imokhentii Annenskii, the Symbolist whom the Acmeists considered their mentor; Osip Mandelstam, a founding Acmeist; and Boris Pasternak, associated, at least for a time, with the Futurists. Through close readings of their verse and also critical prose and manifestoes, we attempt to determine some of the general features that link poets of such diverse orientations in the years following the crisis of Symbolism. We also outline the features that distinguish them as representative of their respective movements.

**RUSSL 425 Vladimir Nabokov vs. Jean-Paul Sartre (also COM L 445) # (IV)**
Jean-Paul Sartre reviewed Nabokov's Les Derniers Hommes in 1938. Ten years later Nabokov returned the favor in his review of the English translation of Sartre's La Nausée. The apparent tension between the two celebrated men of European letters of the twentieth century allows us to look at the works of both through the eyes of the other, to go into the problems of Existentialist philosophy, into Nabokov's brand of it, and into responses to Sartre in Nabokov's works. The latter gives an excellent yet unexplored approach to the poetic world of the short story and painting of that era. The course is designed for nonspecialists as well as literature majors. All reading is in English translation.
literature and the arts. It began with the
The first decade of the twentieth century was

RUSSL 427 Russian Formalism (also
COM L 427) (IV)
N. Pollak.)

RUSSL 430 Practice in Translation (IV)
Spring. 4 credits. Prerequisites: proficiency in
Russian or approval of instructors. Not
W. Browne and S. Senderovich. A practical workshop in translation: documents, scholarly papers, literary works (prose and poetry). Translation mostly from Russian to English, partly from English to Russian. Attention is paid to problems and development of skills.

RUSSL 431 Contemporary Russian
Prose (IV)
Spring. 4 credits. Prerequisites: RUSSL 301–302 or 303–304, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. Graduate students may audit the course. Not offered 2001–2002. Staff.

RUSSL 432 Pushkin # (IV)
Spring. 4 credits. Prerequisites: RUSSL 202 or equivalent, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. S. Senderovich. Reading in the original language and discussion of selected works by Pushkin: lyrics, narrative poems, and Eugene Onegin.

RUSSL 441 Bakhtin as Reader (also
RUSSL 641, COM L 641) (IV)
Spring. 4 credits. Open to undergraduates with permission of instructor. Not offered 2001–2002. P. Carden.)

RUSSL 460 Short Works of Tolstoy and
Dostoevsky # (IV)
Staf.
Readings in Russian and in translation. Open to graduate students.

RUSSL 491 Reading Course: Russian
Literature in the Original Language
Fall or spring. 1 credit each term.
Prerequisite: permission of instructor. Staff. This course is to be taken in conjunction with any Russian literature course at the advanced level. Students receive one credit for reading and discussing works in Russian in addition to their normal course work.

RUSSL 492 Supervised Reading in
Russian Literature
Fall or spring. 1-4 credits each term.
Prerequisite: permission of instructor. Independent study. Students must find an adviser and submit a plan before signing up. Staff.

RUSSL 499 The Avant-Garde in Russian
Literature and the Arts (IV)
Open to any student who has completed a second-year course in Russian, or who has equivalent reading skills in Russian. May be used in satisfaction of the 12 hours of reading required for the Russian major.
The first decade of the twentieth century was perhaps the richest period ever in Russian literature and the arts. It began with the brilliant experimentation in poetry and prose of Andrei Bely, Blok, Remizov, and others. It continued with the breakthroughs in painting and sculpture of Malevich, Goncharova, Tatlin, etc. In the second decade the rambunctious Futurists take over in literature and establish a compact with theater and the visual arts in which all the art forms break down the barriers to produce a new kind of art. During this period Russian artists in every medium were on the cutting edge of the European art scene. After the Revolution Russian artists and writers of the avant-garde continued their dominance for a time, now including the developing medium of film.
In this course we read representative Russian texts by the major authors of the period and we also investigate developments in the theater and visual arts.

SCIENCE & TECHNOLOGY STUDIES

In today's world, issues at the intersection of the technical and the social arise continually in all aspects of life. Whether one looks at the role of computers in society, the history of evolutionary theory, the challenges of environmental controversies, the ethical dilemmas of biomedicine, or the military applications of scientific research, science and technology profoundly affect our lives—often in ways that we scarcely understand or only dimly perceive. The field of science and technology studies uses tools from the history, philosophy, sociology, and politics of science and technology to examine science and technology in their social and cultural context and to explore their political and policy implications. Systematic, integrated study of the origins and impacts of science and technology provides an understanding of the interactions among science, technology, and society and yields invaluable insights into the nature of the modern world.

The Science & Technology Studies Major

The major in Science & Technology Studies offers students wishing to pursue careers in such fields as law, public policy, health care, journalism, or management an opportunity to develop a full appreciation of the place of science and technology in society. The curriculum provides a strong foundation in the historical, social, political, and ethical aspects of science and technology for students to participate effectively in policy debates and decision making. S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology.

Themes of the Major

Students in the S&TS major develop a program individually tailored to their particular interests. To give their coursework a coherent focus, students select a theme that draws together a group of related courses. Possible themes include:

1. Science, Technology, and Public Policy. Many of the most important policy issues of our time involve science and technology. This theme offers students an opportunity to gain a deep appreciation of the problems this situation raises in democratic societies. Through courses that survey the place of science in American politics and courses that focus on such substantive areas as national technology policy or the politics of genetic engineering, this theme explores the tensions between expertise and democracy, the uses of scientific knowledge in making and legitimating policy, social movements that question technology and science, and contemporary debates over economics, innovation, and technology policy.

2. Technology, Culture, and Society. Students interested in this theme may examine the connections between technology and society by studying the manifold ways in which social groups (scientists, engineers, inventors, corporations, government agencies, and consumers) interact to construct technological artifacts and systems, and how the use of these artifacts and systems is related to social and cultural change. Areas of particular interest are: computers and society, the military and technological change, gender and technology, genomics and society, and telecommunication policy.

3. Environment, Science, and Society. By focusing on the relationship between scientific knowledge and political power, this theme offers unique insights into the making and implementation of environmental policy. Courses are available on such topics as American environmental politics, international environmental policy, science and the law, the history of agricultural science, and environmental communication. Students explore the causes and consequences of environmental controversies, the nature of risk and uncertainty in environmental issues, the roles of experts and the public in environmental decisions, and the challenges of global environmental policy.

4. History and Philosophy of Science and Technology. This theme provides students with an appreciation of science and technology in historical perspective and an understanding of the philosophical problems posed by scientific knowledge. Courses available range from broad surveys to intensive studies of focused subjects. Students in this theme address such topics as the emergence of modern science; gender and science; the goal of achieving valid knowledge and the philosophical and institutional problems that this entails; the issues for history and philosophy of science raised by the new sociology of scientific knowledge; the relationship between knowledge, technology, and ethics; and the impact of major institutions—such as religion, medicine, the military, and the modern consumer economy—on the development of the sciences.

Beyond the four themes described above, S&TS majors may also create their own themes, carefully tailored to their particular interests. Examples might include “Computers, Innovation, and Society” or “Science, Technology, and Globalization.”

Admission to the Major

Students intending to major in Science & Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student’s intellectual interests and why the major is consistent with the student’s academic interests and goals; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&TS requirements; and (4) an up-to-date transcript of work completed at Cornell University (and elsewhere, if applicable).

Acceptance into the major requires completion of the following prerequisites:

(a) two introductory courses in history, philosophy, sociology, government, anthropology, or other courses listed in the social sciences/history (Group III)
(b) the physical or biological science (Group I) requirement of the College of Arts & Sciences;
(c) mathematics or computer science courses in fulfillment of the Arts College Group II distribution requirement. These courses cannot be used to fulfill the core or other course requirements for the major and must be taken for a letter grade.

Sophomores in the process of completing these prerequisites may be admitted to the major on a provisional basis. Further information and application materials are available at 275 Clark Hall (255-6047).

Requirements

S&TS majors must complete the following requirements:

Note: All courses used to fulfill major requirements must be taken for a letter grade.

1. Core courses: one course in each of the following groups (a-c):

   (a) History of Science and Technology: S&TS 235 (Agriculture, History, and Society), S&TS 270 (Technology in Society), S&TS 281 (Science in Western Civilization), S&TS 282 (Science in Western Civilization), or S&TS 283 (The Sciences in the Twentieth Century); and

   (b) Philosophy of Science: S&TS 381 (Philosophy of Science: Knowledge and Objectivity) or S&TS 201 (What is Science? An Introduction to Social Studies of Science and Technology), and

   (c) Social Studies of Science and Technology: S&TS 390 (Science in the American Polity: 1800–1960), S&TS 391 (Science in the American Polity: 1960–now), or S&TS 442 (Sociology of Science).

2. Additional Science and Technology Studies courses: At least 21 credit hours of additional courses in Science and Technology Studies, subject to the following restrictions:

   (a) Breadth requirement: at least one course beyond the core courses in each of the three areas of concentration (history, philosophy, and social studies of science and technology);

   (b) Depth requirement: at least two courses in one area beyond the core courses and intended for advanced undergraduates or graduate students.

3. Science Requirement: in addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science). Mathematics sufficient to follow the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student’s major adviser and should be related to the theme selected by the student.
The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to do independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of their junior year. To qualify for the S&TS honors program, students must have an overall Cornell cumulative grade point average of at least 3.00 and a 3.50 cumulative grade point average in courses taken for the major. Additionally, the student must have formulated a research topic, and have found a project supervisor and a second faculty member willing to serve as the advisers. More information on the honors program is available from the S&TS undergraduate office at 275 Clark Hall (255-6047).

The Biology & Society Major

The Department of Science & Technology Studies also offers the Biology & Society major, which includes faculty from throughout the university. The Biology & Society major is designed for students who wish to combine the study of biology with exposure to perspectives from the social sciences and humanities. In addition to providing a foundation in biology, biology and society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology & Society major is offered to students enrolled in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences. The major is coordinated for students in all colleges through the Biology & Society Office. Students can get information, specific course requirements, and application procedures for the major from the office in 275 Clark Hall, 255-6047.

A full description of the Biology & Society major can be found in the Courses of Study section entitled Special Programs and Interdisciplinary Studies.

The Concentration in Science & Technology Studies

The concentration (or minor) in Science & Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from multiple disciplinary perspectives.

The concentration is intended for students who wish to develop an individualized program of study closely related to their major field. For example, students might use the S&TS concentration to focus on such topics as computers and society; gender and technology; science and law; biotechnology; science and politics; and environmental policy. By choosing courses in S&TS that fit their particular interests, students can tailor the concentration to provide breadth and depth in areas of special interest.

S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology. To satisfy the requirements for the S&TS concentration, students must complete with a letter grade a minimum of four courses selected from the course offerings listed for the major. At least one course should be chosen from the list of core courses. The remaining three courses should be chosen in consultation with an S&TS faculty adviser and must be drawn from at least two of the three areas. Interested students may obtain further information about courses by contacting the S&TS undergraduate office, 275 Clark Hall (255-6042).

Course offerings

Introductory Course

- History
- Philosophy
- Social Studies of Science

Independent Study

S&TS 101 Science and Technology in the Public Arena (III)
Fall. 3 credits. J. Reppy.
An introduction to public policy issues arising from developments in science and technology. We study such topics as the politics of expertise, the effect of technical change on workers, and the management of risk. The emphasis is on understanding the ways issues are framed and policy produced. We analyze selected cases, such as DNA fingerprinting, encryption on the internet, gendered design in automobiles, outbreaks of rare diseases, and nuclear waste disposal.

S&TS 250 Technology in Society (also ECE 250 and HIST 250) (III)
Fall. 3 credits. R. R. Kline.
For description, see ENEGR 250.

S&TS 281 Science in Western Civilization (also HIST 281) (III)
Fall. 4 credits. P. R. Dear.
For description, see HIST 281.

S&TS 282 Science in Western Civilization (also HIST 282) (III)
Spring. 4 credits. P. R. Dear.
For description, see HIST 282.

S&TS 283 The Sciences in the Twentieth-Century (also HIST 280) (III)
Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciences—physical and biomedical—during the twentieth century students learn about the reciprocal relations between science and society. Topics covered may include: the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Soviet Union, Nazi Germany, and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the transformation of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-Western cultures.

S&TS 287 Evolution (also BIOEE 207 and HIST 287) (I or III)
Fall. 4 credits. W. Provine.
For description, see BIOEE 207.

S&TS 292 Inventing an Information Society (also ECE 298 and ENGR 298 and HIST 292) (III)
Spring. 3 credits. R. R. Kline.
For description, see ENGR 298.

S&TS 355 Computers: From Babbage to Gates (III)
Fall. 4 credits. M. Dennis.
Computers have not always been the ubiquitous beige boxes gracing our desktops: in Victorian London, Charles Babbage attempted to build his analytical engine using brass gears and steel rods; and during World War II the Allied governments used sophisticated electro-mechanical and electronic "brains" to break Axis codes. Machines that once occupied entire rooms now travel in knapsacks. How did this technology advance considered esoteric and useful to only technical specialists, colonize industry, academia, the military, the federal government, and the home? Using primary historical materials, including diaries, archival documents, and other texts we follow computers from Babbage's Victorian dream of an analytical engine to the visions of contemporary moguls like Bill Gates whose goal is "information at your fingertips." We explore not only how computer technology affects society, but how culture and politics enable and sustain the development of the machine. This is a course in the history and sociology of computers with a background in computer science is not required. (No technical knowledge of computer use is presumed or required.)
ARTS AND SCIENCES - 2001-2002

[S&TS 433] International History of Science (also HIST 415, BIOEE 467) (I or III)
Spring. 4 credits. Limited to 18 students. S-U grades optional.
W. B. Provine.
For description, see BIOEE 467.

[S&TS 444] Historical Issues of Gender and Science (also WOMENS 444) (III)
Spring. 4 credits. Open to sophomores.
M. W. Rossiter.
One-semester survey of women's role in science and engineering from antiquity to the 1980s, with special emphasis on the United States in the twentieth century. Readings include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, students will have attained a broad view of the problems that have faced women entering science and those that still remain.

[S&TS 447] Seminar in the History of Biology (also B&SOC 447, HIST 415, and BIOEE 467) (I or III)
Fall and summer. 4 credits. Limited to 18 students. S-U grades optional.
W. B. Provine.
For description, see BIOEE 467.

[S&TS 473] Knowledge and Politics in Seventeenth Century England (also HIST 471) (III)
Spring. 4 credits. Limited to 15 students.
P. Dear.
England in the 17th century was a revolutionary ferment of political, religious, and philosophical conflict. This course examines the conflicts and arguments, and the means explored for their apparent resolution. These affected ideas of God and worship, the meanings of gender, conceptions of the natural world and its scientific appropriation, and the legitimacy and proper form of political power. The course focuses on the close study of primary source readings by many of the principal players in all these areas, including Francis Bacon, Thomas Hobbes, the Duchess of Newcastle, and John Locke.

[S&TS 487] Seminar in the History of the Environment (III)
Spring. 4 credits. Next offered spring 2003.
M. W. Rossiter.
This course is a one-semester survey of the general topic of the history of the environmental sciences, broadly defined, but mostly in the United States. Depending on the interests of the students, its topics may include clean water, clean air, the great outdoors, environmental disasters, and wildlife.

[S&TS 525] Seminar in the History of Technology (also HIST 525)
Spring. 4 credits. R. R. Kline.
An exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field are considered in selecting the topics for the seminar.

[S&TS 616] Enlightened Science (also HIST 616)
Fall. 4 credits. Limited to graduate students. Not offered 2001-2002.
P. R. Dear and M. Dennis.
For description, see HIST 616.

[S&TS 644] Topics in the History of Women in Science (also WOMENS 644)
M. W. Rossiter.
This is a one-semester graduate seminar on selected topics in the history of women and gender in science and technology, covering mostly the U.S. in the 20th century but broadly defined to include earlier periods and other countries. It seeks to acquaint advanced students with some of the best recent literature on this topic and to identify and explore possible new topics. Weekly readings and a research paper.

[S&TS 680] Seminar in Historiographical Approaches to Sciences (also HIST 680)
Fall. 4 credits. Not offered 2001-2002.
P. R. Dear.
For description, see HIST 680.

[S&TS 682] Topics in the Scientific Revolution (also HIST 682)
Fall. 4 credits. Not offered 2001-2002.
P. R. Dear.
For description, see HIST 682.

[S&TS 777] Science, Technology, and the Cold War
Fall. 4 credits. Permission of instructor required for undergraduate students. Next offered fall 2002.
M. Dennis.
This graduate seminar examines the historical transformation wrought on the organization and practice of the physical, biomedical, and environmental sciences since 1945. How did military and federal patronage affect the development of the sciences, the organization of the postwar university, and the armed services? Students read contemporary historical materials as well as primary texts to understand the development of particular institutions, technologies, and individuals. In addition to participation in the weekly discussion, each student prepares a research paper for presentation to the seminar.

[S&TS 201] What is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210) (III)
Spring. 3 credits.
T. Pinch.
This course provides an introduction to the ways in which medical practice, biomedical technology, and the medical profession are embedded in society and shaped by social phenomena. Accountability to patients and the public, and struggles over the control of medical practice in a world where medicine is connected to gender, class, race, and personal autonomy are important overarching themes. We examine the structure of the medical profession, medical training and professional socialization, the social organization of the hospital; and doctor-patient interactions. The course also explores how biomedical knowledge and technology get produced, assessed, and introduced into clinical practice. Topics may include the intensive care unit, the training of surgeons, the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and priority setting in biomedical science.

[S&TS 205] Ethical Issues in Health and Medicine (also B&SOC 205) (IV)
Fall. 4 credits.
E. Toon.
For description, see B&SOC 205.

[S&TS 206] Ethics and the Environment (also B&SOC 206 and PHIL 246) (IV)
Spring. 4 credits.
N. Sethi.
For description, see B&SOC 206.

[S&TS 286] Science and Human Nature (also PHIL 286) (IV)
Spring. 4 credits.
R. N. Boyd.
For description, see PHIL 286.

[S&TS 381] Philosophy of Science: Knowledge and Objectivity (also PHIL 381) (IV)
Fall. 4 credits.
R. N. Boyd.
For description, see PHIL 381.

[S&TS 681] Philosophy of Science (also PHIL 681)
R. N. Boyd.
For description, see PHIL 681.

Social Studies of Science

[S&TS 201] What is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210) (III)
Spring. 3 credits.
T. Pinch.
This course allows both science and nonscience majors to reflect a little on the nature of science and technology as activities. Why is science so successful? Has it always been that way? How different is science from other activities? How does a new invention come about?

In order to understand better what science is we look at what it is not. We also look at episodes of mainstream science along side science from science fiction. Throughout, we look at the infrastructure of science and technology—the bits that scientists, engineers, and their textbooks take for granted. No particular science or arts requirements are needed for this course. The materials are chosen so as to be understandable by all. We will use a variety of media, including still images, video, and computer simulations.

[S&TS 285] Communication in the Life Sciences (also COMM 285) (III)
Spring. 3 credits.
Staff.
For description, see COMM 285.

[S&TS 311] Sociology of Medicine (III)
Spring. 4 credits.
E. Toon.
This course provides an introduction to the ways in which medical practice, biomedical technology, and the medical profession are embedded in society and shaped by social phenomena. Accountability to patients and the public, and struggles over the control of medical practice in a world where medicine is connected to gender, class, race, and personal autonomy are important overarching themes. We examine the structure of the medical profession, medical training and professional socialization, the social organization of the hospital; and doctor-patient interactions. The course also explores how biomedical knowledge and technology get produced, assessed, and introduced into clinical practice. Topics may include the intensive care unit, the training of surgeons, the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and priority setting in biomedical science.

[S&TS 324] Environment and Society (also SOC 324 and SOC 324) (III)
Spring. 3 credits.
L. Glenn.
For description, see R SOC 324.
another special interest provide the central science as an autonomous republic and as just contradictions between the concepts of and regulatory agencies. The tensions and the state in America from I960 to the present. This course reviews the-changing political institutional settings, from Congress to courts S&TS 391 Science in the American disciplines for the development of university-intellectual spaces for research; the impor­

development of large-scale federally funded research or Big Science. Particular attention is the development of American science charts the development of American science 

in the early history of copyright to the ownership of life forms, airwaves, algorithms, artistic content, electronic databases, and the personal identities of celebrities.

This course explicates the development of atomic weapons from early-twentieth-century ruminations about super bombs in science fiction through the Manhattan Project, the postwar development of thermonuclear weapons and civil defense, and more recent plans for strategic defense. Our focus expands to cover the lives of researchers at such institutions as Los Alamos during and after World War II, and the problems posed by the classification of technical knowledge. We seek to understand how the bomb became part of American culture through the use of literature and film, as well as readings in primary historical documents and secondary analyses. In addition to class meetings, there is also a required screening session. Films generally last less than two hours, but some are longer. Viewing the movies is an essential part of the course.

S&TS 352 Science Writing for the Mass Media (also COMM 352) (III) Fall. 3 credits. B. Levenstein.

For description, see COMM 352.

S&TS 353 Knowledge and Society (also SOC 353) (III)

Spring. 3 credits. C. Leuenberger.

For description, see SOC 353.

S&TS 360 Ethical Issues in Engineering (also ENGR 360) (III)

For description, see ENGR 360.

S&TS 390 Science in the American Polity, 1800–1990 (also GOVT 308, AM ST 388) (III)

How did America become a leading nation in scientific and technical research? This course charts the development of American science from its origins in gentlemanly societies in the early nineteenth century through the development of large-scale federally funded research or Big Science. Particular attention is paid to the importance of government patronage in creating new social and intellectual spaces for research, the importance of medicine and the biomedical disciplines for the development of university-based research capacity and the expansion of research in corporations; and the role of war in the political economy of American science.

S&TS 391 Science in the American Polity, 1960–Now (also GOVT 309, AM ST 389) (III)

Fall. 4 credits. M. Dennis.

This course reviews the changing political relations between science, technology, and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

S&TS 400 Components and Systems: Engineering in a Social Context (also MAE 401) (III) Spring. 3 credits. Z. Warhaft.

For description, see MAE 401.

S&TS 401 Biology and Society: The Social Construction of Life (also B&SOC 301) (III)

Fall. 4 credits. E. Toon.

For description, see B&SOC 301.

S&TS 406 Biotechnology and Law (also B&SOC 406) (III)

Spring. 4 credits. L. Palmer.

Biotechnology, with myriad applications in areas such as medicine and agriculture, is creating many challenges for basic social institutions. This course explores the use and potential abuse of biotechnology in areas such as genetic screening and counseling, reproductive technologies, intentional release of genetically engineered organisms, patents, and ownership of human tissue. Particular attention will be given to evolving legal and management strategies for regulating the applications of biotechnology. Readings are from science, medicine, law, and public policy. Several short written assignments as well as a research paper are required.

S&TS 407 Law, Science, and Public Values (also GOVT 407 and B&SOC 407) (III)

This course examines problems that arise at the interface of law and science. These problems include the regulation of novel technology, the role of technical expertise in public decision making, and the control over scientific research. The first part of the course covers basic perspectives in science and technology studies (S&TS) and how they relate to legal judgments in legal and legislative settings. The second part of the course covers a series of examples and legal cases on the role of expert judgments in legal and legislative settings, intellectual property considerations in science and medicine, and the political oversight of scientific research. The final part of the course examines social processes and practices in legal institutions, and relates these to specific cases of scientific and technological controversy. Lectures and assignments are designed to acquaint students with relevant ideas about the relationship between legal, political, and scientific institutions, and to encourage independent thought and research about specific problems covered in the course.

S&TS 409 From the Phonograph to the Technophobe (also SOC 409) (III)

Fall. 4 credits. Limited to 15. Permission of the instructor. T. Pinch.

In this seminar, we treat music and sound and the ways they are produced and consumed as socio-cultural productions. We specifically investigate the way that musical sounds are related to technology and how such technolo­
gies and sounds have been shaped by and have shaped the wider society and culture of which they are a part. We look at the history of sound technologies like the phonograph, the electronic music synthesizer, samplers, and the Sony walkman. Our perspective is drawn from social and cultural studies of science and technology. Students are encouraged to carry out a small original research project on their own favorite sound technology.

S&TS 411 Knowledge, Technology, and Property (III)

Spring. 4 credits. Prerequisites: at least 1 course in science and technology studies.

S. Hilgartner.

Should the human genome be treated as private property or a public resource? How should copyright be managed in the digital environment of the Internet? Is the term "sampling" high-tech theft or artistic expres­
sion? Does bioprospecting represent an enlightened strategy for preserving biodiversity or a post-colonial means for transferring resources from the developing world to the North? Debate about the nature and scope of intellectual property is an increasingly salient feature of contemporary politics. This course examines the ownership of knowledge and technology, exploring the fundamental tensions that intellectual property systems express and incompletely reconcile. Perspectives from science and technology studies, sociology, law, and economics inform the course. Case studies explore the construc­
tion of property in contexts ranging from the early history of copyright to the ownership of life forms, airwaves, algorithms, artistic content, electronic databases, and the personal identities of celebrities.

S&TS 427 Politics of Environmental Protection in America (also GOVT 427) (III)

An introduction to the distinctive feature of environmental protection in America, focusing particularly on the role of law, science, and citizen activism in public policymaking. Readings from law, political science, and policy analysis examine the changing role of expert agencies, courts, public interest groups, Congress, and the states in environmental politics since the late 1960s. Case studies of specific environmental controversies (nuclear power, siting, pesticides, endangered species) are used to explore dominant public conceptions of risk and safety, regulatory costs and benefits, and the goals and instruments of environmental policy.

S&TS 438 Minds, Machines, and Intelligence (also COGST 438) (III)

H. Miall.

Do machines think? Do they have minds? Are they intelligent? What can humans do that machines cannot do and vice versa? How do humans use machines and how do machines use humans? In this course we focus on how philosophers such as Turing, Searle, and Dreyfus have dealt with these questions. At the same time, however, we are also concerned with trying to rework the themes raised by these thinkers. We do this with an eye toward the work of social scientists who have studied how people and machines interact in social contexts, as for example, in a plane's cockpit or on the Internet. Topics may also include virtual reality, speech recognition, and expert systems in medicine.

S&TS 442 The Sociology of Science (also CRP 442, B&SOC 342, and SOC 442) (III)

Fall. 4 credits. T. Pinch.

A view of science less as an autonomous activity than as a social institution. We discuss such issues as controversies in science,
analysis of scientific text, gender, and the social shaping of scientific knowledge.

[S&T S 453 Reflections on Scientific Personae: Visibility and Invisibility of the Body (III)]
H. Mialet.
Who produces science? Rational, deliberative minds or brilliant, intuitive iconoclasts? Individuals or groups? Geniuses or ordinary practitioners? Human beings or assemblages of instruments? This course explores the question of where scientific intelligence resides. The mythical figure of the lone genius stands in sharp contrast to recent work in the social history and sociology of science that analyzes how scientific knowledge is produced in collectivities that weave together humans and nonhumans. We examine the process through which scientific competencies emerge from, and are incorporated into, “collective bodies” (e.g., Callon and Latour’s “actor-networks,” or Haraway’s “stuffed and hollowed-out”). The tensions between the human and the nonhuman and the individual and the collective run throughout the course and inform our analysis of the place, the role, and the representation of the body—or bodies—of the scientist.

[S&T S 466 Public Communication of Science and Technology (III)]
For description, see COMM 466.

[S&T S 467 Innovation: Theory and Policy (III)]
Fall. 4 credits. Open to upper-level undergraduates and interested graduate students. Prerequisite: ECON 182 or permission of the instructor. Not offered 2001–2002. J. Reppy.
In this course we study the innovation process (that is, the introduction of new technology into practice) through the critical analysis of selected theories of innovation and supporting empirical evidence. Economic theories are contrasted to the insights found in science and technology studies. The focus is on the context of interests and ideology in which the various theories have been framed and their differing interpretations of innovation and innovation policy. Authors covered include Schumpeter, Solow, Scherer, Nelson and Winter, and Bijker and Pinch.

[S&T S 469 Food, Agriculture, and Society (also B&SOC 469, and BIOEE 469) (I)]
A. Power.
For description, see BIOEE 469.

[S&T S 483 The Military and New Technology (III)]
Fall. 4 credits. J. Reppy.
For description, see GOVT 483.

[S&T S 490 The Integrity of Scientific Practice (III)]
Fall. 4 credits. Next offered fall 2002.
S. Hilgartner.
Recent scandals over scientific fraud, debates about financial conflicts of interest, disputes about the use of human and animal subjects, and tensions over ownership of data have raised concern about integrity in science. In addition, changes in the American research system—from the emergence of new university-industry relationships to the growth of electronic communication—pose new questions about who owns and controls research. This course addresses practices that present problems of integrity in research (e.g., fraud, secrecy, commercialization). It also examines how scientific practices affect the structural integrity of science as an institution. Through these complementary concepts of integrity, the course explores the connections between the conduct of science and its cultural authority.

[S&T S 492 Politics and the Public Health (III)]
Spring. 4 credits. E. Toon.
Who is responsible for the public’s health? Both now and in the past, the answer to that question has been a source of bitter debate. In the past three centuries, public health has become a contested mix of aims, advocates, and practices: it is simultaneously a field of scientific activity, a vehicle for social reform, and a site of political controversy. This course examines the history of American public health, with an eye to understanding how public health has been defined and how responsibility for the public’s health has been appropriated. Course readings and discussions focus on the evolution of this balance of science, reform, and politics in the United States, but it is not limited to public health in other national and cultural contexts.

[S&T S 493 Economics Meets Science Studies (III)]
This course covers a variety of possible interactions between the disciplines of economics and science and technology studies. Economists (at least some economists) are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motives and institutions to explain behavior in the production of scientific and technological knowledge. We explore ways in which economics can provide new questions and theoretical approaches for science and technology studies. From another perspective, the most “scientific” of the social sciences, itself is a subject for study. Internal critiques by economists are compared to external analyses in the science studies literature. Readings include works on the epistemology and us of economic analysis in the science studies literature.

[S&T S 532 Inside Technology: The Social Construction of Technology (also SOC 532)]
Rather than analyze the social impact of technology on society, in this course we investigate how society gets inside technology. In other words, is it possible that the very design of technologies embeds assumptions about the nature of society? And, if so, are alternative technologies possible which embody different assumptions about society? Do engineers have implicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments are illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.

[S&T S 625 Visualization and Discourse in Science]
This seminar covers two interrelated areas of science and technology studies: visualization and discourse. Visualization refers to the practices and technologies through which scientists and designers develop images, graphs, models, and other representations. Discourse refers, broadly, to practical uses of language. In the context of this course, discourse and visualization are treated as important aspects of the production of scientific data and technological artifacts. The course focuses mainly on historical and ethnographic studies that pay close attention to the material practices and linguistic repertoires through which scientific and technological innovations are made visible, palatable, and intersubjectively accountable.

[S&T S 631 Qualitative Research Methods for Studying Science (also SOC 631)]
P. R. Desai.
Much has been learned about the nature of science by sociologists and anthropologists studying lab coats and studying scientists in action. In this course we look at the methods used in this new wave of science studies. We examine what can be learned by interviewing scientists, from videos, and from detailed examinations of scientific texts. Students gain hands-on experience by conducting a mini-project in which they investigate some aspect of scientific culture.

[S&T S 645 Genetics: Politics and Society in Comparative Perspective (also GOVT 634)]
Spring. 4 credits. Limited to seniors and graduate students. S. Hilgartner.
Contemporary genetics and biotechnology are highly controversial, creating high hopes for some and deep anxieties for others. This course traces the conflicts and power struggles over genetic engineering, using it as a case to examine some crucial issues in the relationships among science, technology, and politics. In particular, the course focuses on three themes—the politics of property, the politics of identity, and the politics of risk—as they pertain to genetics. Topics may include the social shaping of biological research; eugenics and genetics; genetic selection; cultural study. The very words 'social construction' often provoke heated arguments, but exactly what these words mean or imply is seldom made clear. This course examines philosophical arguments, counterarguments, and empirical case studies associated with constructionism. The main focus is on constructionist approaches in the sociology of knowledge and science and technology studies, but other variants in sociology, psychology, and the humanities are also discussed. The aim is to develop a critical understanding of the arguments, narratives, and concepts that inform and identify these approaches.
More information and applications are available in S&TS 711. Undergraduate Independent Study students in their senior year by permission of the instructor. Not offered 2001–2002.

Theoretical developments in science and technology studies have called attention to the contingent and socially embedded character of both knowledge claims and technological systems. Drawing on literature from several disciplines, this seminar explores the consequences of these findings for social and political studies of science. Issues and problems considered include trust and skepticism, political and legal agency, reflexive institutions, relativism and social action, science and norms, and the co-production of knowledge and social order.

S&TS 700 Special Topic 2: Technology Transfer Issues

Spring. 4 credits. J. Reppy.

The goal of this course is to develop a coherent analytical framework for analyzing technology transfer, using insights from economics, sociology, history, and science and technology studies and to employ that framework to evaluate current policy issues. We study the process of technology transfer in different contexts, ranging from intra-firm and intra-industry to technology transfer between civil and military sectors, and between industrialized countries and LDCs. The readings will include a mix of theoretical writings and case studies.

S&TS 700 Special Topic 3: Issues in the Social and Cultural History of Technology (also HIST 700)

Fall. 4 credits. R. Kline.

This seminar focuses on different issues in the social and cultural history of technology. Students discuss readings in the first half of the course, then give presentations on their research papers. The topic for fall 2001 is Gender and Technology. We critique how scholars have examined this issue in the past decade.

S&TS 711 Introduction to Science and Technology Studies (also HIST 711)

Fall. 4 credits. P. R. Dean.

This introductory course provides students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants chart the terrain of this new field. Topics for discussion include, but are not limited to: historiography of science and technology and their relation to social studies of science and technology; laboratory studies; intellectual properties; science and the state; the role of instruments; fieldwork; politics and technological knowledge; philosophy of science; sociological studies of science and technology; and popularization.

Independent Study

S&TS 399 Undergraduate Independent Study

Fall or spring. 1–4 credits. No more than 8 hours total of independent study (not including honors) can count toward the S&TS major.

More information and applications are available in 275 Clark Hall.

S&TS 498–499 Honors Project I & II

Fall and spring. 3–5 credits each term. Open only to Science & Technology Studies students in their senior year by permission of the department. Applications and information available in 275 Clark Hall.

Students who are admitted to the honors program are required to complete two semesters of honors project research, and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upper-level course.

Students may take three to five credits per semester up to a maximum of eight credits in S&TS 498 & 499. Honors Projects I & II.

Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. S&TS 498 includes the fall Honors Seminar. The student and the project supervisor must reach agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of S&TS 498, Honors Project I, a letter grade is assigned and the advisers, in consultation with the Director of Undergraduate Studies, evaluate whether or not the student should continue working on an honors project. S&TS students who do continue in the honors program for the second semester receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

S&TS 699 Graduate Independent Study

Fall or spring. 2–4 credits.

Applications and information are available in 275 Clark Hall.

SINHALA (SINHALESE)

See Department of Asian Studies.

SOCIOLOGY

Sociology is the study of human social organization, institutions, and groups. The Department of Sociology offers courses in a number of key areas, including: comparative sociology, culture, economy and society, family and the life course, political behavior and public policy, organizations, rational choice, social inequality, social psychology and group processes, social and political movements, and social networks. A particular emphasis of the department is the linkage of sociological theory to issues of public concern such as ethnic conflict, drugs, poverty, and gender and race segregation. Interests of faculty members range from the study of interaction in small groups to the study of economic and social change in a number of different countries. The department offers the opportunity for students to develop fundamental theoretical insight and understanding as well as advanced research skills in quantitative and qualitative methods. Graduates of the department take up careers in university, government, and business settings, and enter professions such as law, management, urban policy, and others that seek men and women who demonstrate a disciplined understanding of society and complex social issues.
Career Opportunities for Graduates
An undergraduate degree in sociology is one of the most popular degrees with employers. After engineering and computer science, sociology is the most able to place graduates into jobs immediately after completing their Bachelor's Degree. This is not altogether surprising, since sociology can lead to a rewarding career in any of the following fields:

- **government**: urban/regional planning, affirmative action, foreign service, human rights management, personnel management
- **research**: social research, consumer research, data analysis, market research, survey research, census analysis, systems analysis
- **criminal justice**: corrections, criminology assistance, police work, rehabilitation counseling, criminal investigation, parole management
- **teaching**: public health education, school admissions, college placement
- **community affairs**: occupational counseling, career counseling, public health administration, hospital administration, public relations, social assistance advocacy, fund-raising, community organizing, social work
- **business**: advertising, sales, project management, sales representation, market analysis, real estate management, journalism, public relations, insurance, human resource management, production management, labor relations, quality control management

A large number of our majors also go onto graduate school and obtain advanced (i.e., Master's and Ph.D.) degrees in such varied fields as sociology, political science, philosophy, economics, and psychology. Many also complete professional degrees in education, law, social work, and business administration.

Requirements for the Major
In addition to the academic requirements established by the College of Arts and Sciences, you must also fulfill requirements towards a specified major. There are 10 courses required in the sociology major. All courses towards the major must be taken for a letter grade and students must maintain at least a 2.0 grade point average while enrolled in the major. The 10 courses required for the major are divided into the following categories:

- Sociology 101
- one additional introductory-level course in sociology (at the 100- or 200-level)
- two research methods courses (SOC 301 and 303)
- one advanced-level sociology course (400-level or higher)
- five additional (i.e., elective) courses in sociology

Declaring the Sociology Major
If you are a student in the College of Arts and Sciences and wish to declare a major in sociology, it is in your best interest to do so as soon as possible. If you are not currently in the College of Arts and Sciences, you need to be admitted to A&S before you can declare. In order to declare the sociology major, you need to take the following steps:

1. Obtain a campus copy of your transcript from Day Hall and bring it to the department office (311 Uris Hall).
2. Make an appointment for advising with the Undergraduate Coordinator, Heather Gowe, or visit her during her office hours (in 311 Uris Hall). During your meeting with her, you will fill out a major declaration form.
3. Leave this form and your transcript with the Undergraduate Coordinator. Your declaration will be reviewed by the Director of Undergraduate Studies, Szonja Szelenyi, and sent on to the College of Arts and Sciences for official notification that you have declared a major. Please allow two weeks for your declaration to be approved and entered into the campus computer.

A student file will be set up to maintain your records in the department. Once you are officially recognized as a major in sociology, the Sociology Department will receive a copy of your transcript at the end of each semester, which will be kept in your student file at 311 Uris Hall. Your records will be maintained until five years after you graduate.

Academic Advising in Sociology
As a student at Cornell, you are ultimately responsible for the policies, procedures, and requirements regarding your degree as stated in the current Courses of Study. After reading this document, you may find that you are still confused or unclear about some of the requirements, and you may have questions and concerns that pertain to your individual situation. Several sources of academic assistance and advice are available to you.

**College Adviser**: As a sociology major, you are a student in the College of Arts and Sciences. For assistance and advice, College Advisers are available to you by appointment in the Office of Undergraduate Admissions and Academic Advising (Goldwin Smith Hall). It is recommended that you consult with a College Adviser sometime before your last semester to discuss the completion of College requirements, graduation, and residency requirements.

**Undergraduate Program Coordinator**: The Undergraduate Program Coordinator (Heather Gowe) in the Sociology Department is located in Room 346, Uris Hall. She is available to provide assistance with the following:

- the process of declaring the sociology major.
- forms relating to transferring courses from other universities and/or other departments.
- other administrative matters or concerns (e.g., forms, adding and dropping courses).

**Director of Undergraduate Studies**: The Director of Undergraduate Studies (Szonja Szelenyi) is located in Room 346, Uris Hall. She is there to:

- provide information about departmental curricula and the requirements for the major.
- meet with applicants to the major.
- review applications for sociology majors and accept students into the program.
- assist students in finding an advisor in the sociology department.
- screen sociology classes taken outside Cornell for acceptance as Cornell credit.
- serve as the backup for faculty advisers who are absent during advising periods.

**Faculty Advising**: Once you are a declared sociology major, you will be assigned a faculty advisor within the Sociology Department. When you declare sociology as a major, you will be asked to name your preference for an adviser; however, if you are not sufficiently familiar with the program, the Director of Undergraduate Studies can assist you in selecting a faculty member to work with you. Faculty advisers are there to:

- discuss your education, career goals, and graduate school opportunities.
- meet with you to talk about courses and plan your program of study within the department.
- go over your academic program each semester and provide you with your Personal Identification Number (PIN) so that you can register for courses via the campus computer.

**Sociology Peer Advisers**: There are approximately 10 advanced sociology majors who serve as peer advisers in the department. These advisers change from year to year, but a complete list of their names and email addresses is available to you from the Undergraduate Program Coordinator in the sociology office (Room 311, Uris Hall). Peer advisers do not provide you with academic counseling; they are there to help you adjust to life in the major, as well as to let you know about the department's many support services and activities.

Research Opportunities
Qualified sociology majors are invited to participate with faculty members in conducting research. Such projects are usually initiated in one of two ways: the student may offer to assist the faculty member in an ongoing project, or the student may request that the faculty member supervise the execution of a project conceived by the student. In either case, the student should enroll in SOC 491 (Independent Study). Interested students may direct inquiries to any faculty member.

**The Sociology Honors Program**
Honors in sociology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. In addition to the regular requirements of the major, candidates for honors must maintain a cumulative grade point average of at least a B+ in all sociology classes, complete at least 2 credits of SOC 491 (in the junior year), complete SOC 495 and SOC 496 (in the senior year), and write an honors thesis.

Students are awarded either honors (cum laude), high honors (magna cum laude), or highest honors (summa cum laude) in the program based on the honors advisers' evaluation of the level and the quality of the work completed towards the honors degree.
Admission to the Honors Program

To qualify for entrance into the honors program, students must have at least a B grade point average overall and a B+ grade point average in the major. In addition, they must secure the consent of a faculty member in the Sociology Department who will guide their honors thesis.

Students who wish to be considered for honors should apply to the Director of Undergraduate Studies no later than the second term of their junior year. Honors program application forms are available in 311 Uris Hall. The application must include a copy of the student's undergraduate transcript, a brief description of the proposed research project, and the endorsement of a faculty member in the Sociology Department.

The Honors Thesis

During the senior year, each candidate for honors in sociology enrolls in a year-long tutorial (SOC 495 and SOC 496) with the faculty member who has agreed to serve as the student's thesis adviser. During the first term of their senior year, students determine the focus of their honors thesis, and submit a 10- to 15-page (or, alternatively, a preliminary draft) of the thesis to their adviser. During the second term, they complete their honors thesis and submit final copies to the department.

The text of the honors thesis may not exceed 60 pages except by permission of the honors adviser. Two copies of the honors thesis are due to the Undergraduate Program Coordinator (311 Uris Hall) during the third or fourth week of April. One of these copies will go to the student's thesis adviser and the other will remain on file in the department.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

Business and Organizational Studies Concentration

Majors who wish to prepare for postgraduate study in professional schools (business, management, or law) or a career in business or nonprofit organizations may elect to acquire a concentration in Business and Organizational Studies in sociology. This program provides Cornell students with training in economic sociology, organizational studies, and comparative societal analysis, all of which are useful areas of expertise in a world increasingly shaped by economic and social forces of a truly global dimension. In order to complete a concentration in Business and Organizational Studies, students must meet the following requirements:

- complete both of the required core courses in the concentration: SOC 105 and SOC 215, and
- complete four additional courses from the following list: SOC 217, 220, 222, 311, 315, 325, 326/526, 358/558, 370/570, 373, and 427.

Students completing the concentration receive a letter of recommendation from the chair based on their cumulative academic record in the concentration. Please contact Heather Gowe (Undergraduate Program Coordinator), or Szonja Szelenyi (Director of Undergraduate Studies) for additional information on the Business and Organizational Studies concentration.

SOCIOLOGY 573
ARTS AND SCIENCES - 2001-2002

religious groups foster ideals of family life or influence our beliefs about what are “good” families? How do people’s family experiences and family values influence their participation in organized religion? What models of family life are religious groups organized around? We begin to answer these questions by drawing on readings that explore the religion-family link in a variety of religious, ethnic, and social class contexts within the contemporary United States.

SOC 202 Population Dynamics (also R SOC 201) (III)
Spring. 3 credits. P. Eloundou-Enyeque. For course description, see R SOC 201.

SOC 203 Work and Family (also WOMNS 203) (III)
Spring. 4 credits. Staff. Family life is often portrayed in the popular media as a haven away from the harsh realities of public life, suggesting that work and family constitute separate and distinct spheres. By contrast, many sociologists point out the links between work and family, and how these links have different consequences for men and women. This course highlights the responses of individuals, employers, and governments to these issues in the United States and internationally, to the dilemmas posed by the interface between work and family.

[SOC 204 Race and Ethnic Relations (III)
4 credits. Prerequisite: SOC 101, SOC 103, or R SOC 101. Not offered 2001-2002. Staff. This course focuses on race and ethnic relations in contemporary perspective. It examines the social and behavioral implications of attributions of race and ethnicity in small group interaction, the world of work, and the larger society. Topics covered include: inequalities in income and employment, affirmative action, ethnic political mobilization, patterns of marriage, and family formation.

SOC 206 International Development (also R SOC 205) (III)
Spring. 3 credits. Staff. For course description, see R SOC 205.

SOC 207 Problems in Contemporary Society (III)
Fall. 4 credits. D. Heckathom. This course examines contemporary social problems, with a focus on their sources in the organization of society. Modern societies are based on three fundamental types of institutions—social norms, hierarchies, and markets. Each is subject to distinctive types of failures resulting in problems that include poverty, prejudice and discrimination, intolerance and hate, alcohol and drug abuse, physical and mental illness, crime and delinquency, and urban problems. In analyzing these problems we emphasize the institutions through which they are created and perpetuated, and the form of institutional change required to address them.

[SOC 208 Social Inequality (III)
4 credits. Not offered 2001-2002. Staff. This course reviews contemporary approaches to understanding social inequality and the processes by which it comes to be seen as legitimate, natural, or desirable. We address questions of the following kind: What are the major forms of stratification in human history? Are inequalities and poverty inevitable? How many social classes are there in advanced industrial societies? Is there a “ruling class”?

Are lifestyles, attitudes, and personalities shaped fundamentally by class membership? Can individuals born into poverty readily escape their class origins and move upward in the class structure? Are social contacts and “luck” important forces in bringing individuals to jobs and class positions? What types of social processes serve to maintain and alter racial, ethnic, and gender discrimination in labor markets? Is there an “underclass?” These and other questions are addressed in light of classical and contemporary theory and research.

SOC 215 Organizations: An Introduction (III)
Spring. 4 credits. D. Strong. Organizations provide the context for much of our everyday life, and are important not only in their own right but for their impact on our individual and collective choices. This course introduces the sociological study of organizations, from project teams to multinational corporations. Main issues include socialization and group processes within work settings; management and the distinctive role of the manager and the managed; the organization as a site of inequality and mobility; organizational decision-making; efforts to modify organizations by reforming bureaucracy and hierarchy; and comparisons across nations.

SOC 217 The Sociology of Markets (III)
Spring. 4 credits. M. Britton. The exchange of goods and services is a central topic in economics, but it has many social dimensions as well. This course examines how economic exchange is affected by the social and cultural contexts within which it occurs, and also explores the links between economic exchange and non-market forms of social interaction. The topics covered include: How does market exchange emerge? What types of social institutions are necessary to make economic exchange predictable and safe? Why do some services cost money in capitalist societies and others do not? How is “market value” determined? We explore these themes through reading studies that compare markets across time as well as across contemporary societies such as the U.S., Japan, China, and Russia.

SOC 219 Segregation (III)
Spring. 4 credits. R. Grannis. Over seven decades ago, Robert Park noted that “Physical distance is frequently the indices of social distances.” As we near the beginning of a new millennium, very little has changed. Segregation may have disappeared from our public discourse, but it is a very present reality in our cities. This course surveys residential segregation by asking some very basic questions: What does it mean to be segregated? How has segregation been different in different times and places? What are the consequences of segregation? Why does segregation occur? How can illegal segregation persist? What can be done about segregation?

SOC 220 Culture and Conflict in Organizations (III)
Spring. 4 credits. P. Becker. How do the organizations we belong to shape us? What is organizational identity and how does it come about? How do cultural beliefs shape organizations? What kinds of organizations strike us as legitimate and effective, and why? Organizations may be goal-directed problem solvers, but they also have roles in social identity and socialization processes, and play a central role in maintaining social order and stability.

SOC 221 Inequality and Social Science (III)
Spring. 4 credits. Enrollment limited to 20 students. K. Wedeen. What are the promises and limitations of social science as a tool for understanding the sources and consequences of social inequality? This course introduces the underlying logic of social scientific research in the context of contemporary debates about social inequality: e.g., educational testing and tracking, race-based affirmative action, and the roles of intelligence and parental resources in affecting what gets ahead. Its goals are to encourage students to be critical consumers of social scientific data, evidence, and discourse and to develop their own original explanations of social phenomena.

SOC 226 Drugs and Society (III)
Fall. 4 credits. D. Heckathom. The course focuses on drug use and abuse as a social problem and not as a medical or psycho-pathological phenomenon. Specifically, the course deals with the history of drug use and regulatory attempts in the United States and around the world; the relationship between drug use and racism/class conflict; pharmacology and use patterns related to specific drugs; perspectives on the etiology of drug use; abstinence and harm reduction interventions; drug-using subcultures; drug policy, drug legislation, and drug enforcement; and the promotion and condemnation of drug activities in the mass media.

[SOC 250 Religion and Public Life (also RELST 249) (III)
3 credits. Not offered 2001-2002. P. Becker. This course explores how religion provides a basis for moral critique, political mobilization, and social identity in a modern society. The first part introduces basic issues—definitions of religion, the sociological approach to the study of religion, and religion and modernity. The main body of the course, we read studies of specific religious groups and organizations in the contemporary United States, examining such questions as: How does religion provide a basis for gender identity and gender norms? What do religious groups and the issues of political mobilization and social identity within the communities?

SOC 251 Families and the Life Course (also HD 251) (III)
Spring. 3 credits. E. Wethington. For course description, see HD 250.

SOC 265 Latinos in the U.S. (also LSP 201 and R SOC 265) (III)
Spring. 3 credits (4-credit option available). F. Velez. This course is an exploration and analysis of the Hispanic experience in the United States. It examines the sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are
Intermediate Courses

**SOC 309 The Sociology of Marriage (also SOC 328)** (III)
Fall. 4 credits. Not offered 2001–2002. Staff. Contemporary debate on the nature of the family in the United States often assumes a simplistic decay of the “traditional marriage.” This course unpacks the myths and facts that undergird this model. We overview the historical patterns of marriage in the United States, examine data on contemporary union formation and dissolution and the consequences, and explore various theoretical models of marriage and its decline.

**SOC 311 Group Solidarity (III)**
Fall. 4 credits. Not offered 2001–2002. M. Macy. What is the most important group that you belong to? What makes it important? How does the group, pull apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

**SOC 316 Gender Inequality (III)**
Fall. 4 credits. S. Szelenyi. This course offers a comprehensive overview of historical and contemporary patterns of gender stratification. The first few weeks are devoted to the examination of different ideas (biological, functionalist, feminist) about gender inequality. The remainder of the course involves both theoretical analyses and empirical investigations of four substantive areas: the historical development of gender stratification, the nature of gender inequality in contemporary societies, cross-national comparison of gender inequality, and strategies for social change. Specific topics include: division of labor between men and women; relationship between social class and gender; dynamics of occupational sex segregation; gender differences in social mobility; socialization, and educational attainment; and racial and cross-national variations in gender inequality. Each section includes examination of key theoretical debates and a survey of recent feminist research that is relevant to those debates.

**SOC 323 Social Networks (also SOC 523)** (III)
Spring. 4 credits. R. Grannis. A critical survey of theories and techniques of structural analysis in sociology, centering on the usefulness of social network analysis in providing integration of studies at different levels of generalization. Applications in the areas of the sociology of organizations, community studies, social stratification, and dependence relations among nations. Emphasis on the mutual relevance of theories and operational research procedures.

**SOC 324 Environment and Society (also S&T 324 and R SOC 324)** (III)
Spring. 3 credits. L. Glenna For course description, see R SOC 324.

**SOC 325 Socialist Societies (III)**
3 credits. Not offered 2001–2002. S. Szelenyi. This course begins by surveying the idea of socialism from the Romantic tradition of William Morris to the scientific theory of Karl Marx and the unique doctrine of Mao Tsetung. These visions are contrasted to the realities of actually existing socialist societies—especially those of Eastern Europe. Some of the themes examined include: the problems of centrally managed economies, the extent and dynamics of social inequities, dissent and opposition under socialism, and strategies for economic reform. The course concludes by evaluating a number of alternative views on the nature of these societies and by discussing their post-communist transformation.

**SOC 326 Social Policy (also SOC 526)** (III)
Fall. 4 credits. S. Caldwell. The dramatic growth of the policy research sector as an institutional and intellectual force signals the changing relationship of social science to social policy in the United States. With an eye on that relationship, this course examines the development of social policy in selected areas, among them welfare, poverty, housing, crime, and health. The policy research sector itself—its scope, values, and institutions—is also surveyed.

**SOC 333 Primate Societies (III)**
3 credits. Not offered 2001–2002. R. Grannis. All primates (including humans) share a common social and cultural, as well as biological, heritage that was bequeathed to us by our common ancestor. This shared heritage is even more pronounced between humans and their closest nonhuman relatives, chimpanzees and gorillas. This course surveys the social behaviors and cultural forms of our primate cousins with a special focus on baboons, chimpanzees, and gorillas. We begin by reviewing the diversity of primates and their societies. We then look at primate socioecology including demography, hunting and gathering, and kinship. Next, we examine the politics, economics, communication, and culture of some of our more closely related primate cousins. In addition to sharing a common past, all primates (except for some recent humans) are hunter-gatherers with similar ecological capacities and needs who have solved similar socioecological problems. We end the course by considering the implications of these findings for our lives as human primates.

**SOC 340 Health, Behavior, and Health Policy (III)**
Spring. 4 credits. S. Caldwell. This course examines the social contexts of physical and mental health, illness and medical care; its purpose is to explore the contributions of social science to health promotion and health policy. Topic areas include: the social context of health, disease and illness; the social organization of health services; use of health services; effectiveness of health service use; health promotion and disease prevention; and national health care policies.

**SOC 341 Modern European Society and Politics (also GOVT 341)** (III)
Spring. 4 credits. S. Tarrow. For course description, see GOVT 341.
the significance of consumption in modern theoretical debates in cultural studies and to cultural studies. It provides an introduction to the field at the intersection of sociology and construction of self, bodies, and identities.

**[SOC 353 Knowledge and Society (III)]**
C. Leuenberger.

This course focuses on the historical evolution of the sociology of knowledge as a theoretical paradigm and an empirical research field. We examine the phenomenological origins of the sociology of knowledge and many of its central texts. We study how it has been applied to such areas as personhood, interaction, religion, on, identity, and the emotions. We also consider epistemological questions that arise, and cover various theoretical and empirical approaches which have been influenced by the sociology of knowledge such as ethnomethodology, conversation analysis, and the sociology of science and technology.

**[SOC 357 Schooling and Society (III)]**
Spring. 4 credits. S. Morgan.

After an examination of alternative theories of the development and changing function of educational institutions in society, this course examines explanations for why individuals obtain educational training, how an individual’s family background and race affect his or her trajectory through the educational system, and how and why society confers advantages on educated individuals. Following a review of recent empirical research on effective schools, the course concludes with an examination of current policy debates in the United States, focusing primarily on school choice, vouchers, and financial aid for a college education.

**[SOC 370 Careers (also SOC 570) (III)]**

By examining career pathways, we will consider the implications of career as a continuous process or as a sequence of positions. We will explore the differences and similarities among different career paths and lay out the patterns and structures of career formation from a sociological point of view. We will also discuss the settings in which career development takes place, giving some comparative attention to ways of organizing careers in other societies.

**[SOC 371 Comparative Social Stratification (also R SOC 370) (III)]**
Fall. 3 credits. M. Clakrman.

For course description, see R SOC 370.

**[SOC 375 Classical Theory (III)]**
S. Szelenyi.

The course introduces students to major macro-sociological paradigms and encourages them to participate in “cross-paradigm” debates. These paradigms and their theorists of sociology (i.e., Marx, Durkheim, and Weber) are compared with respect to their approaches to the social sciences, their views on human history, their conceptions of capitalist society, and their ideas on social change. The assigned readings focus on the original writings of these theorists, while the lectures provide the requisite socio-historical context.

**[SOC 380 Gender, Ideology, and Culture (also WOMNS 380) (III)]**
P. Becker.

This course explores representations of women in popular culture, including images, narratives, and religious practices. We examine the relationship between popular culture and ideology, and look at how women “read” popular culture. The aim of the course is to enable students to talk critically and analyze the effects of ideological representations of difference on personal identity construction, status, and power relationships. Readings are drawn mostly from the sociology of culture and cultural studies; most texts deal with popular culture and gender in the nineteenth- and twentieth-century United States.

**[SOC 393 Sociology of War and Peace (III)]**
R. M. Williams, Jr.

Every human group, community, or society presents many examples of altruism, helping, cooperation, agreement, and social harmony. Each grouping or society also manifests numerous examples of competition, rivalry, opposition, disagreement, conflict, and violence. Both conflict and cooperation are permanent and common aspects of the human condition. Collective conflicts, especially wars and revolutions, are frequent and dramatic events. But “peace” and “war” are equally active social processes and progressive developments. This course describes various commonly accepted but erroneous notions of the causes and consequences of war and deterrence. It deals with the major theories concerning the sources of war in international and intranational social systems. The last half of the course analyzes the modes, techniques, and outcomes of efforts to restrict, regulate, and resolve international conflicts.

**Advanced Courses**

The following courses are recommended for advanced undergraduates with substantial preparation, as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 400-level courses is one introductory course plus 301 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor.

**[SOC 404 Economy and Family—Collective Action (III)]**
Fall. 3 credits. P. Becker.

This course is designed to introduce students to qualitative research. We focus on interviewing, document review, and participant observation, although we also talk about validity, reliability, ethics, and research- development, issues that are applicable to qualitative research more broadly. Each student designs and carries out a semester-length research project, keeps a field journal, and completes a final research report.

**[SOC 419 Segregation (III)]**
Spring. 4 credits. R. Grannis.

For course description, see SOC 219.

**[SOC 427 The Professions: Organization and Control (also ILROB 427) (III)]**
Fall. 3 credits. Prerequisite: permission of the instructor. Not offered 2001–2002.
P. Tolbert.

For course description, see ILROB 427.

**[SOC 429 Culture and Agency (also SOC 529) (III)]**
Fall. 4 credits. P. Becker.

This course looks at the development of sociological thought and theories of culture and agency. Starting with various influential or materialist approaches to culture that center on the agency of the individual, we then follow the development of theories that explicitly link culture to actors and events in an attempt to account for both social reproduction and social change. The readings cover a broad time span and a variety of intellectual approaches, including critical theory and cultural studies, but center on the sociology of culture.

**[SOC 437 Social Demography (also R SOC 438) (III)]**
Fall. 3 credits. D. Gurak.

For course description, see R SOC 438.

**[SOC 438 Immigration and Ethnic Identity (III)]**

Immigration has been a central process in the peopling of American society. The early immigration to the United States involved primarily the migration and settlement of European national groups. Since 1965, the mix of immigration has shifted to include an increasing diversity of ethnic groups, especially from Latin America and Asia. As American society moves into an era of increasing ethnic diversity, issues of ethnic boundaries and identities become increasingly complex and problematic. This course seeks to examine the causes of international migration, the dynamics of immigrant incorporation into American society, and the making of new ethnic groups and identities.

**[SOC 457 Health and Social Behavior (also HD 457) (III)]**
Fall. 3 credits. Prerequisites: HD 250, SOC 101, R SOC 101, or SOC 251 and a course in statistics. Letter grades only.
E. Wethington.

For course description, see HD 457.

**[SOC 480/580 Identity and Interest in Collective Action (III)]**
M. Macy.
This seminar examines the problem of collective action from alternative theoretical perspectives: shared common interests, the other on common identities. The former claims that groups are held together because the members are interdependent and thus benefit from cooperating in a common endeavor. Others argue that effective mobilization may depend on affective ties among participants who share a salient demarcation. We explore this debate, and its possible resolution, through an examination of formal theoretical studies (especially computer simulation) as well as empirical research using experimentation and comparative case analysis. Key concepts addressed include social dilemmas (and game-theoretic analysis), the free-rider problem, rational choice theory, formal and informal social control, social identity theory, and the role of networks and institutions as mechanisms for reconciling the tension between individual self-interest and collective obligations.

**SOC 491 Independent Study**  
Fall or spring. 1–4 credits. This is for undergraduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure the agreement of a faculty member to serve as supervisor for the project throughout the term. Graduate students should enroll in 891–892.

**SOC 495 Honors Research**  
Fall or spring. 4 credits. Limited to sociology majors in their senior year. Prerequisite: permission of instructor.

**SOC 496 Honors Thesis: Senior Year**  
Fall or spring. 4 credits. Prerequisite: Sociology 495.

**Graduate Core Courses**

These courses are primarily for graduate students in sociology, but may be taken by other graduate students with permission of the instructor.

**SOC 501 Basic Problems in Sociology I**  
Fall. 4 credits. V. Nee. Analysis of theory shaping current sociological research. Examination of several central problems in sociological inquiry provides an occasion for understanding the tensions and continuities between classical and contemporary approaches, for indicating the prospects for unifying microsociological and macrosociological orientations, and for developing a critical approach of efforts to integrate theory and research.

**SOC 502 Basic Problems in Sociology II**  
Spring. 4 credits. D. Heckathorn. Continuation of SOC 501. Emphasis is on the logical analysis of theoretical perspectives, theories, and theoretical research programs shaping current sociological research. The course includes an introduction to basic concepts used in the logical analysis of theories and examines their application to specific theories and theoretical research programs. Theoretical perspectives include functionalism, social exchange, and interactionism.

**SOC 505 Research Methods I: The Logic of Social Inference**  
Fall. 4 credits. Prerequisite: a first course in statistics and probability. M. Clarkberg. This course is an introduction to techniques of social inference. We cover research methods, sources of evidence, model design, and questions of empirical validity.

**SOC 506 Research Methods II**  
Spring. 4 credits. S. Morgan. This is a course on advanced linear regression analysis in theory and practice. After a review of classical bivariate regression and elementary matrix algebra, the course progresses under the credible assumption that the most important fundamentals of data analysis techniques can be taught in the context of simple multivariate linear models. Accordingly, the course provides a relatively formal treatment of the identification and estimation of single equation OLS and GLS regression models, instrumental variable models, traditional path models, and multiple indicator models. Interspersed with this material, the course addresses complications of regression modeling for the practicing researcher including: missing data problems, measurement error, regression diagnostics, weighting, and inference for surveys. The course concludes with a brief introduction to nonlinear regression, counterfactual models of causality, Bayesian inference, and hierarchical models.

**Graduate Seminars**

These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. The seminars offered in each term are determined in part by the interests of students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each term.

**SOC 504 Economy and Family (also SOC 404)**  

**SOC 508 Qualitative Methods (also SOC 408)**  
Fall. 4 credits. P. Becker. For course description, see SOC 408.

**[SOC 509 The Sociology of Marriage (also SOC 309)]**  

**SOC 510 Seminar on Comparative Societal Analysis**  
Spring. 3 credits. Open to advanced graduate students throughout the social sciences, with permission of instructor. M. Brinton. This seminar is intended for advanced graduate students interested in comparative methods and research in the social sciences. It is offered in conjunction with the Comparative Societal Analysis seminar in the Einaudi Center for International Studies. Students enrolled for credit write critiques of papers presented at the seminar by faculty members and other graduate students, and work on their own project. Some weeks are devoted to collective reading and analysis of background work. Students may enroll for more than one semester.

**SOC 518 Social Inequality: Contemporary Theories, Debates, and Models**  
Fall. 4 credits. D. Grusky. This course serves as an introduction to contemporary theoretical debates, and models regarding the structure of social classes, the determinants of social mobility, the sources and causes of racial, ethnic, and gender-based inequality, and the putative rise of postmodern forms of stratification. The twofold objective is to both review contemporary theorizing and to identify areas in which new theories, hypotheses, and research agendas might be fruitfully developed.

**SOC 519 Workshop on Social Inequality**  
Spring. 4 credits. K. Weeden. This workshop provides a forum for students, faculty, and guest speakers to present and discuss their current research projects related to social inequality.

**SOC 523 Social Networks (also SOC 332)**  
Spring. 4 credits. R. Granov. For course description, see SOC 323.

**SOC 526 Social Policy (also SOC 326)**  
Fall. 4 credits. S. Caldwell. For course description, see SOC 326.

**[SOC 527 Artificial Social Life] (also SOC 429)**  
Fall. 4 credits. P. Becker. For course description, see SOC 429.

**SOC 531 Group Conflict and the Nation-State**  
4 credits. Not offered 2001–2002. D. Strang. The growth of nationalism and the conflict over which groups control the state and the upper classes in the global political order. Such conflicts appear particularly virulent today, when internal and ethnic cleansing are a large threat than inter-state war. We examine nationalism, group conflict, and the process of group formation. Questions include: Why and when do groups struggle for national independence? What leads some multiethnic societies to be stable and others not? How are high levels of conflict over ethnic/religious makeup of the state related to the expanding reach of the global market? And in what ways are national issues comparable with group formation and conflict in other settings, such as neighborhoods or academic disciplines?

**SOC 546 Economic Sociology**  
Spring. 4 credits. M. Brinton. This course introduces the field of economic sociology and covers major topics addressed by sociologists studying the intersection of economy and society. We begin with classic statements on economic sociology and then
This course provides an analysis of the years, reading works that have been instrumental in this invigoration. Consideration is given to the several variants of “institutionalism” that have informed the sociological study of markets, organizations, and economic exchange.

**SOC 570 Theories of the Family and the Life Course**
Spring. 4 credits. M. Clarkberg.
This course provides an analysis of the theoretical approaches informing sociological understandings of the family and the human life course. Approaches include power and exchange models, interactionism, the new family economics, and life course approaches. Emphasis is on understanding the conflict and congruence between existing theoretical frameworks, and on translating theoretical issues into empirical research questions.

**SOC 575 Seminar in Institutions and Rationality**
2 credits. Not offered 2001-2002. V. Nee. This year-long seminar examines the theoretical logic and assumptions of the new institutionalism in sociology and other social sciences. Understanding the part played by informal constraints of social norms and networks and by formal institutional arrangements (i.e., contracts, property rights, laws, regulations, and the state) is covered. The seminar focuses on comparative analysis and case studies illuminating and explaining the part played by institutions in structuring the economic and social transactions of society and specifying the causal mechanisms shaping path dependent institutional change.

**SOC 580 Simulating Social Dilemmas**
(Also SOC 480)

**SOC 583 Transitions to Market Economies in China and Eastern Europe**
4 credits. Not offered 2001-2002. V. Nee. This course examines the problems and prospects of transitions to market in China and Eastern Europe. It introduces concepts for understanding the transformation of state socialist economies and analyzes important social and economic developments since 1988. Topics include privatization, joint ventures, new capital markets, entrepreneurship, and labor relations in these changing economies.

**SOC 590 Special Topics: Research Methods**
Fall. 4 credits. M. Macy, D. Strang. This course covers special topics in the analysis of quantitative and qualitative data. The topics covered vary from year to year, but are typically chosen from such possibilities as: networks, social simulation, Bayesian methods, game theory, qualitative research methods, and laboratory experimentation. In fall 2001 the course will include a one-half semester module on event history analysis, and a one-half semester module on social simulation.

**SOC 591 Special Seminar in Sociology**
Fall and spring. 2-4 credits. These graduate seminars are offered irregularly. Topics, credit, and instructors vary from semester to semester. Students should look at the sociology department bulletin board for curricular information for each of the majors listed for the first time all the course and curricular information for each of the majors in three separate sections.

**THAI**
See Department of Asian Studies.

**THEATRE, FILM & DANCE**
D. Batnich, chair; R. Archer, S. Brookhouse, S. Chu, S. Cole, D. Feldhuhn, A. Fugelsanger, (director of the undergraduate program in dance); D. Fredericksen, (director of the undergraduate program in film); J. E. Gainor, (director of graduate studies); R. Goetz, D. Hall, E. Intemann, J. Kovar, B. Levitt (on leave fall 2001 and spring 2002), P. Lillard, B. Milles, J. Morgenroth, M. Rivchin, R. Schneider, J. Self, B. Suber, A. Van Dyke, (director of undergraduate studies); A. Villarejo

Through its courses and production laboratories, the department provides students with a wide range of opportunities in theatre, film, and dance. It offers a theatre arts major with concentration in theatre or film and a major in dance. Majors in these three areas educate students in accordance with the general liberal arts ethic of the college. The programs in dance and film and the advanced undergraduate theatre program give some measure of professional preparation in those arts as well. The department encourages academic and studio participation by students from all disciplines. In the coming year the Department will be changing over to separate major status in the areas of theatre and film, which up to now have been listed as concentrations within the Theatre Arts Major. (Dance has always had separate major status.) As part of the change-over process, this year's catalogue lists for the first time all the course and curricular information for each of the majors in three separate sections.

**Theatre Arts Major**

Theatre Studies
Theatre concentration offers studies in the history of theatre, dramatic theory and criticism, playwriting, acting, directing, design/technology, and stage management. Students interested in the Theatre Arts major should consult with Alison Van Dyke (Director of Undergraduate Studies, Theatre, Film & Dance).

Course requirements for theatre concentration:

1) **THETR 240** and **THETR 241** (two-semester introduction to theatre) 8
2) **THETR 250** Introduction to Theatre Design and Technology 4
   **THETR 280** Introduction to Acting 3
3) Four laboratory courses distributed as follows:
   **THETR 151** Production Lab I 1-3
   **THETR 153, 253, or 353** Stage Management Lab I, II, or III 1-3
   **THETR 155** Rehearsal and Performance or **THETR 151** in a different area 1-3
   **THETR 251** or **THETR 351** Production Lab II or III 1-4
4) Four courses in the area of Theatre Studies (see Theatre Studies section of
theatre courses) chosen in the following manner:

- one course must be at 300 level
- one course must be at 400 level
- two additional courses at the 300 or above level
- one of the four courses must be pre-twentieth century.

4) Three courses (at least 9 credits) in other Theatre courses chosen in consultation with the faculty adviser. Course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.

5) Courses in which a student receives a grade below "C" cannot be used to fulfill the requirements for a Theatre Arts major.

Honors
The Theatre Arts honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be part of the honors program the student must maintain a GPA of 3.5 in classes for the theatre major and an average of 3.0 in all courses. Students must consult with their advisers in the spring of their junior year in order to enroll in the honors programs.

The Advanced Undergraduate Theatre Program
The department offers advanced study in directing, playwriting, design/technology, and stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended "track" of courses or equivalent experience. (For recommended courses of study please see listing of courses at end of departmental listings.) Approval process will include a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

Independent Study, Internships and Honors

**THETR 300 Independent Study**
Fall, spring, or summer. 1-4 credits.

Independent study in theatre, film or dance allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 Schwartz Center.

**THETR 485 Undergraduate Internship**
Fall, spring, or summer. 1-3 credits.

To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice prior to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

**THETR 495 Honors Research Tutorial**
Fall, spring. 4 credits. Limited to Honors students in Theatre, Film and Dance. This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

**THETR 496 Honors Research Tutorial**
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance. This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

First-Year Writing Seminars
Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

General Survey Courses

**THETR 230 Creating Theatre (IV)**
Spring. 3 credits. Limited to 25 students.

D. Hall and faculty.

An introduction to theatrical production for the nonmajor. Students develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Center for Theatre Arts, and by attending department productions. Some writing is required.

**THETR 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also ENGL 301 and MUSIC 372) (IV)**
Spring. 4 credits. Limited to 40 students.

For description, see ENGL 301.

**THETR 430 Introduction to Theatre Management**
Fall. 4 credits. Limited to 15 students.

This class is designed to introduce students to the profession of theatre management. The class will be a project-oriented study of components of the field, such as marketing, fundraising, contracts, organizational structures, personnel management, accounting, and box office.

Theatre Studies Courses

**THETR 223 The Comic Theatre (also COM L 223 and CLASS 223) (IV)**

For description, see CLASS 223.

**THETR 240 Introduction to World Theatre I @ # (IV)**
Fall. 4 credits. R. Schneider.

A survey of the major developments and innovations in world theatre since 1642, exploring the evolution of naturalism, the birth of the director, as well as the emergence of the avant-garde in the West and its supposed demise today. This course examines the impact of colonialism on theatre practices around the world.

**THETR 320 Queer Theatre (also ENGL 352 and WOMNS 320) (IV)**
Spring. 4 credits. Limited to 20 students.

What is Queer Theatre and did it exist before the politicization of Queer Identity? Starting with the Renaissance in England, we examine critical, historical, and other writing as we pose questions about spectatorship, visibility and professionalism. Evening film screenings are required.

**THETR 322 Russian Drama and Theatre (also RUSSL 332) (IV)**

See RUSSL 322 for description.

**THETR 332 Medieval and Renaissance Theatre (also COM L 332) (IV)**
Spring. 4 credits. Prerequisites: THETR 240 or permission of instructor. Not offered 2001–2002. J. E. Gainor.

Besides the discussion of representative plays from these periods, this class may focus on questions such as the staging of medieval dramas, the relation between the church and the community, and the ways in which historians and critics have interpreted the Renaissance, especially in light of class, race, and gender on stage as well as in the audience.

**THETR 333 European Drama 1660–1900: Moliere to Ibsen (also ENGL 335 and COM L 336) (IV)**

See ENGL 355 for description.

**THETR 335 Modern Western Drama, Modern Western Theater: Theory and Practice (also COM L 335 and ART H 338) (IV)**
Fall. 4 credits. R. Schneider.

A study of drama and the cultural contexts of its performance from the mid-nineteenth century to the mid-twentieth century in Europe and America. We move from symbolism and naturalism through to constructivism, expressionism, dadaism, futurism, surrealism and on to Brecht and Artaud and a few of their more contemporary descendants. Students engage in performance projects as well as text analysis.

**THETR 336 American Drama and Theatre (also ENGL 336 and AM ST 334) (IV)**
Fall. 4 credits. Limited to 25 students.

Prerequisite: permission of instructor. J. E. Gainor.

**THETR 337 Contemporary American Theatre (also ENGL 337) (IV)**
Spring. 4 credits. Limited to 20 students.

J. E. Gainor.
A survey of American drama and theatre post-1960. Particular emphasis will be placed on plays by women and dramatists of color. We explore questions of identity and theatrical responses to contemporary American culture.

**THETR 339 The Avant-Garde: Dead or Alive?** (IV)

Spring. 4 credits. Limited to 15 students. R. Schneider.

This class will explore experimental performance today, with concentration on the performative bases of the European and American Avant-Garde in art and in theater. We engage in the debate about whether the "avant-garde" is not, based on contemporary examples. We also explore whether or not there was/is an "avant-garde" in other parts of the world—Africa, Japan, India, and so on. We begin by studying the historical avant-garde, but move quickly to the "neo-avant-garde" and to theories and practices of theatrical postmodernity and performative installation art. Students make performative/art work as well as engage in text analysis.

**THETR 345 The Tragic Theater** (also CLASS 345 and COM L 344) (IV)

See CLASS 345 for description.

**THETR 372 English Drama to 1700 (also ENGL 372)** (IV)

See ENGL 372 for description.

**THETR 373 English Drama from 1700 to the Present** (also ENGL 373) (IV)

See ENGL 373 for description.

**THETR 403 Ritual, Play, Spectacle, Act: Performance Culture** (also THETR 603) (IV)

Fall. 4 credits. Not offered 2001-2002. R. Schneider.

Taking a broad spectrum approach to performance, this course includes anthropological texts on ritual and play, sociological texts on performances in everyday life, literary studies texts on "performatives" in speech and writing, folklore studies on parades and reenactments, psychological and philosophical studies on the role of performance in the formation of identity, as well as standard texts of the theater. We consider the distinctions between play, ritual, spectacle, festival, theater, and the "visual" arts. We explore the difference between spectating and witnessing and examine studies on audience behavior. At the base of our inquiry is the broad issue of the role of representational practices within culture and among cultures. If, as Barbara Meyerson has written, we understand ourselves by showing ourselves to ourselves, what role does "showing" have in construction of the selves we seek to understand? Why is postmodern culture often called the "society of the spectacle" (Deborah) If, as Aristotle claimed, we are mimetic creatures at base, which comes first—representation or reality? Looking closely at the notion of "live" art, we weigh theorists who claim that performance is ephemeral and disappearing against those who claim that performance, such as art history, is resilient and enduring. Students have the opportunity to do fieldwork, create performative works, and engage in scholarly study.

**THETR 405 Operatic Contacts (also HUM 405, GERST 404, COM L 408)** (IV)

See Society for the Humanities for complete description.

**THETR 420 Brocht, Artaud, Mueller, Wilson (also GERST 430 and COM L 430)** (IV)

See GERST 430 for description.

**THETR 423/623 Translation for the Theatre** (also COM L 446/646) (IV)

Spring. 4 credits. Prerequisites: proficiency in language other than English, coursework in dramatic literature, directing, or playwriting. J. E. Gainor.

What is involved in the process of translation for the theatre and what makes translation effective on stage? What role did gender play into our selection or creation process for theatrical translations? Using a case-study format for the first half of the term, we examine important dramatic texts in their English translations to consider such issues as humor, colloquial language, political and cultural allusion, poetics, and the use of "literary translation." Dramatists considered may include Aristophanes, Moliere, Chekov, and others. We begin with an overview of translation theory and then move into specifically theatrical concerns, especially as directed, playwriting, and dramaturgical perspectives. The second half of the term focuses as a writing workshop, each student selects a script and, bearing in mind our theoretical and practical discussions, works towards developing a playable translation as a final project.

**THETR 424 Elizabethan and Jacobean Drama (also ENGL 425)** (IV)

See ENGL 425 for a complete description.

**THETR 425 Introduction to Dramaturgy and Dramatic Criticism** (IV)

What is dramaturgy? What does a dramaturg do? We examine this position in the theatre in both historical and practical modes. The class is primarily a practicum, involving dramaturgical work on departmental productions, participation with student playwrights on new script development, and practice in the writing of dramatic criticism.

**THETR 429 Seminar in Theatre History: The Provincetown Players and Greenwich Village, 1916-1922 (also AM ST 430.3 Honors Program; ENGL 426)** (IV)

This seminar explores a number of artistic, political, and social movements emanating from Greenwich Village with the 'teens and twenties, and explore their impact on the evolution of American drama. The Provincetown Players, the theatre company that first showcased O'Neill, Glaspell, Millay, and other important American writers, is the focus of our analysis. The seminar is designed as a case study in the critical practice of cultural studies.

**THETR 431 Theory of the Theatre and Drama** (also COM L 433) (IV)

Fall. 4 credits. Prerequisite: some theatre history and dramatic literature work at the 300 level or permission of instructor. D. Bathrick.

A survey of dramatic theory and theories of theatrical representation from Aristotle to the present.

**THETR 433 Dramaturgy: Play and Period (also ENGL 435)** (IV)

**THETR 435 Special Topics: The Victorian and Edwardian Drama (also ENGL 422)** (IV)

Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. Not offered 2001-2002. J. E. Gainor.

An in-depth exploration of theatre and drama in England from the mid-nineteenth through early twentieth centuries. Topics include melodrama, the social problem play, tenets (e.g., the popular stage, the conditions of theatrical production, and the impact of European theatre. Representative authors include Robertson, Pinero, Shaw, Wilde, Robins, Galsworthy, and St. John.

**THETR 436 The Female Dramatic Tradition** (also WOMNS 433) (IV)

Is there a "female dramaturgy"? What is the female tradition in the theatre? The course explores these questions through an investigation of texts by women dramatists, including Hrotsvitha, Alphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.

**THETR 438 East and West German Drama** (also GERST 438 and THETR 648) (IV)

Course covers major historical and textual developments in German theatre from the end of World War II to the present. Leading dramatists from West and East Germany, Switzerland, and Austria (Berger, Frisch, Durrenmatt, Weiss, Hochhuth, Muller, Braun, Kroetz, Handke, and others) are treated in the light of the political events and aesthetic-dramaturgical traditions from which they emerge and with which they are taking issue.

**THETR 439 Theatre of Commodity: Advertising, TV, and Performance (also WOMNS 441/641)** (IV)

This course explores the employment of bodies and objects as representational emblems of value in late capitalism. We analyze the ways in which desire circulates through print advertising, television, and the avant-garde. We examine socio-cultural constructions of the relationship between screen bodies and live bodies, especially as involves advertising and audience. We explore conceptual and culturally inscribed spaces between notions of desire, fulfillment, deferral, and value coding. Throughout, feminist analyses of gender construction and deployment in the realms of the market, popular culture, and "high" art frame our inquiry. Finally we ask questions about the problematic of interventiency in art and popular culture relative to consumption and commodity aesthetics. The
course draws on Williamson, Marx, Benjamin, Freud, Ingmar, de Certeau, Baudrillard, Dienst, Goldman, McClintock, Bordieu, Friedan, Haug, Lee, Fiske, Goffman, Lears, Murray, Taylor, and others as well as numerous print advertisements, television texts, and performance artworks.

**THETR 445 Text Analysis for Production: How to Get from the Text onto the Stage (IV)**

Fall. 4 credits. Prerequisite: THETR 240 or THETR 281 or THETR 250 or THETR 398, and permission of instructor. Limited to 15 students. S. Cole.

This course examines the play as the central, essential source for production decisions made by the actor, the director, the designer, and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer, or dramaturg, as well as through two to three papers.

**THETR 454 American Musical Theatre (also ENGL 454) (IV)**

Spring. 4 credits. Prerequisite: ENGL 272 or THETR 240 and 241 and ability to read music at the level of MUSIC 105. Not offered 2001-2002. S. McMillin. See ENGL 454 for description.

**THETR 459 Contemporary British Drama (also ENGL 459) (IV)**

**THETR 461 Asian American and Popular Culture (also AAS 461, AM ST 461, ENGL 461) (IV)**

Fall. 4 credits. S. Dave.

For description, see AAS 461.

**THETR 470 The Japanese Noh Theater and Modern Dramatists (also ASIAN 470 and COM L 470) @ (IV)**

For description, see ASIAN 470.

**THETR 471 Japanese Theatre (also ASIAN 471) @ (IV)**

For description, see ASIAN 471.

**THETR 483 Seminar in Comparative Twentieth-Century Anglophone Drama (also ENGL 483) (IV)**

Fall. 4 credits. Some knowledge of classical and avant-garde theories of drama and theatre would be useful, but is not a prerequisite. T. 2:30-4:25. Not offered 2001-2002. B. Jeyifo.

The course explores twentieth-century Anglophone drama in diverse areas of the English-speaking world. Through works of Irish, African, Caribbean, and U.S. playwrights like Friel, Soyinka, Fugard, Walcott, and Shange, the seminar is organized around two principal issues: the use of folk, ritual, vernacular, and carnivalesque performance idioms to transform the received genre of Western literary drama and themes of empire, colony, and postcolonial in the making of the modern world.

**THETR 600 Proseminar in Theatre Studies**

Spring. 4 credits. Limited to Theatre Arts graduate students.

An introduction to the theory and methods involved in the study of the theatre. Attention focuses on pedology and the profession in Part I. Part II explores current scholarly trends.

**THETR 637 Seminar in Dramatic Theory (also COM L 638)**

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001-2002. R. Schneider.

Topic varies each semester.

**THETR 640 East and West German Drama: Post-1945 (also THETR 438 and GERST 438)**

**THETR 660 Visual Ideology (also COM L 660 and GERST 660)**

For description, see GERST 660.

**THETR 679 Bertolt Brecht in Context (also GERST 679 and COM L 679)**

See GERST 679 for description.

**THETR 703 Theorizing Film (also ENGL 703 and FRLIT 695)**

See ENGL 703 for description.

### Acting

**THETR 155 Rehearsal and Performance**

Fall or spring. 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which credit is earned. Limited to students who have assigned roles after tryouts at the department's scheduled auditions. Students should add this course only after they have been assigned roles. S-U grades only.

The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

**THETR 205 Rehearsal Workshop**

Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production; and permission. Staff.

This course enables students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the class depends on the needs of a particular production (history, choreography, textwork, dramaturgy, etc).

**THETR 280 Introduction to Acting (IV)**

Fall or spring. 3 credits. Each section is limited to 16 students. Preregistration and registration only through roster in the department office, 225 Schwartz Center. Staff.

An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus is on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

**THETR 281 Acting I (IV)**

Fall or spring. 3 credits. Each section limited to 14 students. Prerequisites: THETR 280 and auditions. Registration only through roster in department office, 225 Schwartz Center. 281 is restricted to sophomores and above. B. Milles.

An introduction to Standard American Stage Speech. We study various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Chekhov, Voltaire, etc.

**THETR 282 Standard American Stage Speech (IV)**

Fall. 3 credits. Prerequisites: THETR 280 and permission of instructor. Limited to 10 students. A. Van Dyke.

An introduction to Standard American Stage Speech. We study various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Chekhov, Voltaire, etc.

**THETR 283 Voice and Speech for Performance (IV)**

Fall. 3 credits. Limited to 12 students.

Primarily for department majors. Prerequisite: permission of instructor. T. Huffman.

Registration only through department roster in 225 Schwartz Center. Development of the speaking voice with additional emphasis on dramatic interpretation.

**THETR 284 Speech and Dialects for Performance (IV)**

Spring. 3 credits. Limited to 10 students.

Primarily for department majors or advance undergraduate training program candidates. Prerequisites: THETR 281 and permission of instructor. A. Van Dyke.

Development of speech and dialects in dramatic text.

**THETR 287 Summer Acting Workshop**

Summer. 3 credits. Limited to 16 students in a section. B. Levitt and staff.

An introduction to the processes of acting. Practice in training techniques, rehearsal procedures, and methodology.

**THETR 380 Acting II (IV)**

Fall. 3 credits. Prerequisite: THETR 281 and auditions. Limited to 12 students. S. Cole.

A continuation of Acting I. Special consideration is given to a physical approach to characterization using the plays of Chekhov and Ibsen.

**THETR 381 Acting III: Advanced Scene Study (IV)**

Spring. 3 credits. Prerequisite: THETR 380 and audition. Limited to 10 students. Staff.

This course focuses on advanced problems in language and period style (movement, bows, curtsies, and period dances). Monologues and scenes are drawn from Shakespeare and Molieres.

**THETR 385 Advanced Studies in Acting Techniques (IV)**

Spring. 3 credits. Prerequisites: THETR 281, audition, and permission of instructor. Limited to 10 students. Topic varies each semester. May be repeated for credit.

B. Milles.

**THETR 387 Movement for the Actor**

Fall. 3 credits. Prerequisites: THETR 281 and permission of instructor. Limited to 10 students. Not offered 2001-2002. Staff.
A study of the art of acting in its historical and cultural context from the Greeks to the early twentieth century, with an emphasis on an analytical understanding of acting methodology in relation to social context. Lectures and film showings, with student papers and presentations required.

**Playwriting**

**THETR 348 Playwriting (IV)**
Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. B. Milles.
Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals, and write. The seminar culminates in the completion of a 20- to 30-minute one-act play.

**THETR 349 Advanced Playwriting (IV)**
Spring. 4 credits. Prerequisite: THETR 348 or permission of instructor. Not offered 2001–2002. Staff.
A continuation of THETR 348, emphasizing advanced techniques and culminating in the completion of a full-length play.

**THETR 497 Seminar in Playwriting**
This class is an extension of THETR 348 and 349. Students formulate a process for developing a full-length play, with which they develop over the course of the semester. The class meetings are made up of discussions about the students’ process and creative tactics, and reading of material generated by the playwrights.

**Design, Technology, and Stage Management**

**Design**

**THETR 250 Fundamentals of Theatre Design and Technology (IV)**
Fall and spring. 4 credits. Not open to first-term freshmen. Limited to 12 students. Registration only through department head in 225 Schwartz Center. A minimum of one credit of Production Lab (THETR 151 or 251) is strongly recommended concurrently. K. Goetz, E. Intemann.
An introduction to design and technology in the theatre. Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage. Students are required to purchase materials which the instructor will specify (approximate cost: $40).

**THETR 261 CAD Studio for the Theatre**
Spring. 3 credits. Limited to 20 students. S. Bernstein.
A continuation of THETR 250, emphasizing the use of computer-aided design software to explore the design process. The course is devoted to the design and creation of digital objects in the theatre. D. Feldshuh.

**THETR 345 The History of Acting (IV)**
Spring. 3 credits. Limited to 10 students. S. Cole.
A study of the art of acting in its historical and corporeal mime, and physical acting techniques.

**THETR 177 Student Laboratory Theatre Company**
Spring. 1–2 credits.
The Student Laboratory Theatre Company is a group of student-actors who earn credit by acting in three scenes directed by students taking THETR 498. Students enrolling in SLTC for credit will earn 1 credit for 2 projects and 2 credits for 3 projects. SLTC also meets with directors once a week.

**THETR 398 Fundamentals of Directing I (IV)**
Fall. 3 credits. Limited to 9 students. This course requires some ability to teach. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Students should see instructor one year in advance to sign up for course. D. Feldshuh.
Mathematical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student’s awareness of why and how certain stage events communicate effectively to an audience. Each student directs a number of exercises as well as a short scene.

**THETR 499 Practicum in Directing**
Fall or spring. 1–4 credits. Prerequisites: THETR 240, 250, 281, 398, 498, and permission of instructor. D. Feldshuh.
This course is designed to give students who have completed the prerequisites the opportunity to direct a full production of theatre in conjunction with a faculty mentor. It may also involve an internship with a prominent director on campus or the opportunity to assist direct a faculty or guest director.

**THETR 251 Fundamentals of Design and Technology (IV)**
Spring. 4 credits. Enrollment strictly limited. Prerequisite: THETR 280 and 398, and permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Recommended: THETR 250 and 281, D. Feldshuh.
This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student directs a series of projects and public presentations focusing on specific directorial challenges.

**THETR 366 Costume Design Studio (IV)**
Fall. 3 credits. Limited enrollment to 6 students. Prerequisite: THETR 250 or 251 or permission of instructor. Students are required to purchase materials which the instructor will specify (approximate cost: $50). Limited to 10 students. S. Bernstein.
Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style. May be repeated for credit.

**THETR 368 Sound Design Studio (IV)**
Fall. 3 credits. Limited enrollment to 6 students. Prerequisite: THETR 250 or 251 or permission of instructor. Students are required to purchase supplies (approximate cost $20). W. Cross.
The use of sound as a medium of design for the theatre; research and production of the theatrical sound score, digital recording and basic audio engineering techniques with projects in post production studio engineering and live recording. Emphasis is on producing viable sound designs for live theatre events.

**THETR 369 Digital Audio Studio (IV)**
Spring. 3 credits. Limited to 6 students. Prerequisite: THETR 368. Limited to 6 students. By permission of instructor only. W. Cross.
A project oriented course focusing on current techniques in digital audio recording, editing and processing for theatre, and video production. Students explore Digidesign's Pro Tools multilink environment, MOTU’s Digital Performer including basic MIDI operation and methods of synching audio to video. Some experience with audio recording, music, or video production is helpful but not necessary.
This course concentrates on designing lighting for different genres in various venues, developing the lighting designer as a versatile artist. Personal style and artistic commitment are stressed.

**THETR 464 Scene Design Studio II (IV)**
Spring. 3 credits. Prerequisite: THETR 364 or permission of instructor. Students are required to purchase materials which the instructor will specify (approximate cost $50). K. Goetz.
Projects and activities are tailored to the creative and developmental needs of the individual student with emphasis on developing professional standards and practices that would prepare the student for a major design assignment.

**Technology**

**THETR 252 Technical Production Studio I**
Fall. 3 credits. Limited to 6 students. D. Hall and F. Sellers.

Stage Lighting and Sound Technology: the practical aspects of lighting and sound technology including equipment setup, engineering, electricity, recording techniques, and production paperwork are explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of 50 hours for the semester.

**THETR 256 Technical Production Studio II**
Spring. 3 credits. Limited to 6 students. Students are required to purchase materials which the instructor will specify (approximate cost $50). Prerequisite: THETR 250 or permission of instructor. Additional hands-on time in prop and paint shops required, to be discussed.

**Painting**

Stage Properties: introduction to the basic techniques of painting scenery, including but not limited to the layout and painting of bricks, marble, stone, and wood grain for the theatre. Individual projects in scene painting and participation on paint crew for production projects are included. Stage Properties: introduction to the processes of prop making, including furniture construction and upholstery techniques, use of shop tools and materials, period research, and painting and finishing.

**THETR 340 Theatrical Drafting and Technical Drawing Studio**
Fall. 3 credits. Limited to 6 students. Prerequisite: THETR 250 or permission of instructor. S. Brookhouse.
Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept of an individual style in the approach to drafting for the theatre. Involves a series of projects to familiarize students with the convention and process of visualization and drafting.

**THETR 352 Themed Entertainment: The Technical Perspective**
Fall. 3 credits. Limited to 12 students. R. Archer.
Exploration into the integration of art and science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus is on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

**THETR 354 Stagecraft Studio**
Fall. 3 credits. A minimum of 1 credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. R. MacPike.
An exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

**THETR 356 Costume Construction Studio**
Spring. 3 credits. A minimum of 1 credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. Lab fee of $25 to be paid in class. R. MacPike.
A project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

**THETR 360 Costumes: Special Projects**
Fall. 3 credits. R. MacPike.
This course is designed for students who have completed a basic construction class (in THETR, TXA, or other) and are interested in acquiring skills beyond the basic techniques. The objectives are two-fold: (1) to introduce students to areas of costume that are not taught presently, such as millinery, corsetry, wig-styling, and underpinning-skills, that will make a costume student more marketable after graduation, and (2) to give students the opportunity (and satisfaction) of seeing their work on stage in an actual theatre production. Areas of focus for each semester are determined by particular production needs. For example, when we produce a period play like Amadeus, where hats and wigs are needed, the students research, explore, and construct them. If we were to produce a Commedia play, students would explore masks (history and construction). Along with the pieces constructed, students are asked to research and record their findings.

**Stage Management**

**THETR 153 Stage Management Production Laboratory I**
Fall and spring. 1-2 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center at 7:30 P.M. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.
Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

**THETR 353 Stage Management Laboratory III**
Fall and spring. 1-4 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center at 7:30 P.M. on the first Tuesday of classes. Prerequisite: permission of the instructor. P. Lillard.
Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

**THETR 357 Stage Management Laboratory IV**
Fall. 2 credits. Prerequisite: THETR 250 or 280 or permission of instructor. P. Lillard.
Introduction to the techniques and areas of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a working stage manager or assistant stage manager. THETR 153, 253, and 353 complement this course.

**THETR 453 Stage Management Laboratory V**
Fall and spring. 1-5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.
Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

**Production Laboratories**

**THETR 151 Production Laboratory I**
Fall and spring. 1-3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 P.M. in the Kiplinger Theatre at the Schwartz Center. P. Lillard, S. Brookhouse, F. Sellers.
This course provides practical experiences in theatrical production as student can work on scenery, costumes, properties, lighting, or stage crew. No prerequisites or experience required.

**THETR 251 Production Laboratory II**
Fall and spring. 1-3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 P.M. in the Kiplinger Theatre at the Schwartz Center. P. Lillard, S. Brookhouse, D. Hall, F. Sellers.
Practical experience in theatrical production as a light board operator, sound board operator, sound technician, head dresser or scenery/props special project.

**THETR 351 Production Laboratory III**
Fall and spring. 1-3 credits. May be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann, F. Sellers.
Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager, or assistant to a faculty or guest director or designer.

**THETR 451 Production Laboratory IV**
Fall and spring. 1–4 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Internmann.

Practical experience in theatrical production, in the position of designer, shop manager, technical director or sound engineer.

**Independent Study, Internships and Honors**

**THETR 300 Independent Study**
Summer, fall, or spring. 1–4 credits. Independent Study in the theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student’s instructor for the course, must approve the student’s program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 Schwartz Center.

**THETR 485 Undergraduate Internship**
Fall, spring, or summer. 1–3 credits. To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice prior to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

**THETR 495 Honors Research Tutorial**
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance. This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

**THETR 496 Honors Research Tutorial**
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance. This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

**Film**

D. Bathrick, D. Frederiksen (director of the undergraduate program in film), M. Rivchin, A. Villarejo

The study of film began in this department in the 1930s and continues to be based here. In the intervening years, however, it has also spread into a significant number of other departments in the College: Africana studies, anthropology, Asian studies, comparative literature, English, German studies, history, psychology, romance studies, and women’s studies. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film’s relationships to myth and ideology, the use of film as historical evidence, film’s efficacy as a rhetorical medium, and film’s contribution to perennial issues in aesthetics, the history of the arts, and studies in cognition. The foundational courses in film production and in the history, theory, and criticism of film as an art are centered in this department.

This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The three ways currently being used are as follows: (1) majoring in film within the Department of Theatre, Film & Dance; (2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); and (3) focusing on film as a College Scholar. Students interested in options 2 or 3 should consult Don Frederiksen (Theatre, Film & Dance) and Lynne Abel (director, College Scholar and Independent Major programs). Students interested in options 1 or 2 should contact Brett deBary, Asian Studies, its director.

**Film Major Requirements**

The department’s film major requires a total of 50 credits in film and related courses. Students should note that a number of film courses—including two required “core” courses: (THETR 277 and 377)—are offered in alternating years. This means that students cannot fulfill the requirements for the major in less than two years, and that they should plan accordingly, in consultation with their major advisor. In particular, students must plan to be in residence at Cornell during both their junior and senior year fall semester in order to take THETR 375 and 376. Without the “core” required courses, THETR 274, Introduction to Film Analysis, should be taken during the sophomore year.

Majors wishing to use the production courses in a substantial manner must plan carefully and work within certain limits. These courses are: THETR 277, 377, 383, 477, 478, 493. Enrollment in each of these courses is limited by the nature of the work and by facilities. Enrollment in THETR 477, 478, and 493 depends on the quality of previous work in THETR 277, 377, and/or 383; enrollment is not guaranteed. Majors without a strong interest in production can complete the production requirement with one course: THETR 277. Majors with a strong interest in production should begin instead with THETR 377, after they have taken THETR 274 in their sophomore year. The total credits in production courses cannot exceed 20 hours; this limit is strictly enforced.

1. A core of four film courses:

   **THETR 274 Introduction to Film Analysis** (offered every fall semester)

   **THETR 375 History and Theory of Commercial Narrative Film** (offered alternate fall semesters; offered 2001–2002)

   **THETR 376 History and Theory of Documentary and Experimental Film** (offered alternate fall semesters; offered 2001–2002)

   **THETR 277 Video Production I** (offered alternate spring semesters, and some summers; next offered spring 2003)

OR

   **THETR 377 Fundamentals of 16mm Filmmaking** (offered alternate semesters in every four years, offered fall 2001 and 2002, and spring 2004)

2. One of the following theatre courses:

   **THETR 250 Fundamentals of Theatre Design/Technology**

   **THETR 280 Introduction to Acting**

   **THETR 398 Directing I** (prerequisite: permission)

3. Four courses (15–16 credits) in film offered by Theatre, Film & Dance as below, or by other departments (with consent of adviser):

   **THETR 264 Interpreting Hitchcock** (Not offered 2001–2002)

   **THETR 277 Video Production I** (next offered spring 2003)

   **THETR 291 Filming Other Cultures** (offered spring 2002)

   **THETR 341 French Film (offered alternate years, not offered 2001-2002)**

   **THETR 369 Fast Talking Dames** (offered fall 2001)

   **THETR 378 Soviet Film of 20s and 30s** (offered occasionally; not offered spring 2001–2002)

   **THETR 379 Modern Documentary Film** (offered alternate spring semesters; offered spring 2002)

   **THETR 383 Screenwriting** (offered every spring semester)

   **THETR 386 Third Cinema** (offered alternate years; not offered 2001–2002)

   **THETR 391 Media Arts Studio I** (tentatively scheduled for fall semester 2001)

   **THETR 392 Media Arts Studio II** (not offered spring 2002)

   **THETR 395 Video: Art, Theory, Politics** (offered alternate years; not offered 2001–2002)

   **THETR 396 German Film** (offered occasionally; not offered 2001–2002)

   **AS&RC 435 African Cinema** (offered fall 2001)

   **THETR 450 Rescreening the Holocaust** (offered occasionally; not offered 2001–2002)

   **THETR 455 History of Modern Polish Cinema** (offered alternate spring semesters; next offered spring semester 2003)

   **THETR 473 Film and Spiritual Questions** (offered alternate spring semesters; offered spring 2003)
other American colleges and universities, The College of Arts and Sciences, through this film projects. Up to four such students will be given the Shavelson Award to help fund their advanced proposal (script or treatment) for a film or video project. Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center.

Film majors may also complement their Cornell film studies with work in the Intermediate and Advanced Film and Television Programs of the British American Film in London. Direct inquiries to Professor Fredericksen.

[THETR 264 Interpreting Hitchcock (also ENGL 263) (IV)]

[THETR 274 Introduction to Film Analysis: Meaning and Value (also THETR 274) (IV)]
Fall. 4 credits. Limited to 40 students. Graduate students should enroll in THETR 674, D. Fredericksen. An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

[THETR 277 Video Production I Spring. 3 credits. Offered alternate years and occasionally in summer. Limited to 12 students. Permission of instructor. Open to sophomores, juniors, and seniors. Next offered spring 2003. M. Rivchin. A hands-on, beginning video production course using Super-VHS cameras and editing equipment. Students learn camera, lighting, sound recording, editing, and digital effects through a series of technical exercises. Students develop two short, original video projects to be shown publicly at the end of the semester. A $100 equipment maintenance fee per student is collected in class. Cost for videotape approximately $50–100.]

[THETR 291 Filming Other Cultures (also ANTHR 291/691) @ (IV)]
Spring. 4 credits. Limited to 20 students, with preference given to those who have taken either ANTHR 102 or THETR 274. Fee for screening and maintenance, $35. R. Ascher. For description, see ANTHR 291.

[THETR 329 Political Theory and Cinema (also GERST 330, COM L 330 and GOVT 370) (III or IV)]
Fall. 4 credits. G. Waite. For description, see GERST 330.

[THETR 341 French Film (also FRLIT 336) (IV)]
Spring. 4 credits. Offered alternate years, not offered 2001–2002. T. Murray. For description, see FRLIT 336.

[THETR 369 Fast-Talking Dames: Hollywood Comedy (also ENGL 369) (IV)]
Fall. 4 credits. L. Bogel. See ENGL 369 for complete description.

Honors
Students who have maintained a GPA of 3.5 in their film major courses, and an average of 3.0 in all courses, may elect to work for honors in a semester during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in film. Honors projects are possible in filmmaking, screen writing, and film analysis.

The Advanced Undergraduate Filmmaking Program
The department offers advanced study in filmmaking to students who qualify on the basis of outstanding achievement in film studies and film production courses. Acceptance to the AUP and admission to the advanced film production course (THETR 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project. Up to four such students will also be selected to receive the Melville Shavelson Award to help fund their advanced film projects.

Film Study Abroad
The College of Arts and Sciences, through this department and in consort with a number of other American colleges and universities, offers up to a full year of study at the Paris Center for Critical Studies. The center's program is theoretical, critical, and historical. It is most useful to students whose major interest is in the academic study of film and serves as an intensive supplement to Cornell's film courses. Fluency in French is required. THETR 274 and 375 are prerequisites.

Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center. Film majors may also complement their Cornell film studies with work in the Intermediate and Advanced Film and Television Programs of the British American Film in London. Direct inquiries to Professor Fredericksen.

[THETR 375 History and Theory of the Commercial Narrative Film (IV)]
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite for film majors THETR 274. Offered alternate years; next offered fall 2002. A. Villarreal. Consideration of the broad patterns of narration in the history of the commercial narrative film. Emphases are placed on the early articulation of a cinematic means of narration, realism as an artistic style, the nature and functions of popular film, and the modes of modernist and post-modernist "art cinema" narration.

[THETR 376 History and Theory of Documentary and Experimental Film (IV)]
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 274 (or higher-level film studies course) and permission of instructor. Equipment fee, $100 (paid in class). The average cost to each student for materials and processing is $400. M. Rovchin.

A hands-on course in the basics of 16mm filmmaking techniques, requiring no prior production experience, emphasizing creative development of filmic ideas through critical discussion. Students may explore narrative, experimental, documentary, animation, and abstract genres, producing short exercises and a final sound film project (8–12 minutes) to be screened publicly.

[THETR 378 Soviet Film of the 1920s and French Film of the 1960s (IV)]
Spring. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 375 is strongly recommended, but not required. Offered occasionally; not offered 2001–2002. D. Fredericksen.

An intensive treatment of two distinct periods of radical innovation in film theory and history. Emphasis is on the animated relationship between theory and filmmaking during these two decades. Major figures include Eisenstein, Pudovkin, Vertov, Kuleshov, Dovzhenko, and Room, in the Soviet 1920s; Godard, Truffaut, Resnais, and Bazin in the French 1960s.

[THETR 379 Modern Documentary Film (IV)]
Spring. 4 credits. Prerequisite: THETR 376 is strongly recommended but not required. Fee for screening expenses, $10 (paid in class). Offered alternate spring semesters; offered spring 2002. D. Fredericksen.

An intensive consideration of canonical documentary films from 1945 to the present. Emphases are on the dramatic form of an artistic form with a distinct history and set of theoretical questions, as a sociopolitical force, as an ethnographic medium within and
THETR 383 Screenwriting (IV)
Spring. 3 credits. Prerequisite: THETR 274 and 277, or permission of instructor. Limited to 12 students. Staff.
Exercises in various genres of screenwriting. Note: this class is an intensive writing course that demands a great deal of outside work.

THETR 386 Third Cinema (IV)
Spring. 4 credits. Prerequisite: previous course in film history or analysis helpful, though not mandatory. Offered alternate years. Not offered 2001–2002; next offered spring 2003. A. Villarejo.
This course explores postcolonial film and video through the rule of "third cinema." We investigate the diverse historical, national, political, and generic commitments of films from Africa, South Asia, Latin America, the United States and the United Kingdom (Sembene. Ray, Brocka, etc.). Readings in film and postcolonial theory guide our critical analyses of the films.

THETR 391 Media Arts Studio I (also ART 391, ARCH 459, MUSIC 391) (IV)
Fall (tentative). 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum THETR 277 or 277, or dance studio courses. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin, THETR; M. Lyons, ART; J. Zissovici, ARCH; D. Borden, MUSIC.
A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of a high-speed internet connecting arts spaces on campus, by creating virtual and performative events.

THETR 392 Media Arts Studio II (also ART 392, ARCH 392, MUSIC 392) (IV)
Spring (tentative). 3 credits. Preference given to students who have completed Media Arts Studio I. See THETR 391 for prerequisites. $50 equipment fee (paid in class). Offered occasionally; not offered 2001–2002. Participating faculty include: M. Rivchin, THETR; M. Lyons, ART; J. Zissovici, ARCH; D. Borden, MUSIC.
A continuation of Media Arts Studio I. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of a high-speed internet connecting arts spaces on campus, by creating virtual and performative events.

THETR 395 Video: Art, Theory, Politics (also ENGL 395) (IV)
Fall. 4 credits. Offered alternate years; not offered 2001–2002. T. Murray. For description, see ENGL 395.

THETR 396 German Film (also COM 396 and GERST 396) (IV)
This course explores German film from the Weimar and Nazi periods to the present in relation to the cultural and sociopolitical context of which it was a part. Readings and lectures are devoted to formal and cultural developments historically as well as interpretive analysis of selected individual films.

THETR 450 Rescreening the Holocaust (also COM L 453 and GERST 449) (IV)
Rescreening the Holocaust offers a survey of the major films dealing with the Holocaust beginning with Night and Fog (1955) and including such films as Holocaust, Schindler's List, Shoah, Life is Beautiful, Sophie's Choice, Jacob the Liar, The Diary of Anne Frank, Kapo, My Mothers Courage, and others. The course focuses on major issues of debate around the possibilities and limits of representing the Holocaust cinematically as well as questions more specifically concerning commercialization, fictionalization, trivialization, documentation, visualization, and narrative in the making and distributing of films about this event. What are the concerns that have arisen over the years concerning the dangers of aestheticizing the Holocaust in works of literature and the visual arts? Is it possible to employ a comedic narrative to deal with such a topic, and, if so, what are the benefits and potential problems of such an approach? Is the very treatment of such a topic within the framework of the Hollywood entertainment industry itself a violation of respect for those who perished? The title of the course suggests a methodological approach to the notion that screenings of the Holocaust are at the same time often re-screenings, to the extent that they are built on, presuppose, or even explicitly cite or take issue with earlier cinematic renderings.

THETR 455 History of Modern Polish Film (IV)
Spring. 4 credits. Required of those who have taken THETR 376 (History and Theory of Documentary and Experimental Film), 379 (Modern Documentary Film), and either THETR 478, 479, or 480 (History of Film and Video Projects: Documentary and Experimental Workshop). Offered alternate spring semesters. D. Fredericksen.
Analysis of Polish film from 1945 to the present, within the context of Poland's post-war history. Topics include the period of socialist realism, the so-called "Polish School" (1955–1962), the cinema of moral anxiety, Solidarity cinema, and the Polish documentary tradition. Key directors to be considered include Ford, Wajda, Munk, Polanski, Skolimowski, Zanussi, Falk, Piwowarski, Bugajski, Krzysztof, Kijowski, Zaraos, Kieslowski, and Lozinska. Some attention is given to the development of Polish film theory. The extra-filmic context is set by such works as Norman Davies' Heart of Europe, Czeslaw Milosz' The Captive Mind, and Eva Hoffman's Exit into History.

THETR 473 Film and Spiritual Questions (also RELST 473 and College Scholar Seminar) (IV)
Spring. 4 credits. Limited to 20 students. Offered every spring. D. Fredericksen.
The use of film as a medium for the expression of spiritual questions has a long and rich history, although little attention is given to this fact in contemporary film studies. This seminar examines films and writings by filmmakers who are so inclined, including Baillie, Gardner, Bergman, Dreyer, Bresson, Godard, Scorcese, Brakhage, Belson, Whitney, Rouquier, Newby, Kubrick, and Aue Yong-Kyun. Special attention is given to the work of Andrey Tarkovsky, the Russian film director and theorist. Readings include Tarkovsky's Sculpting in Time, Grof's The Cosmic Game, Eliade's The Sacred and the Profane, Edinger's The Christian Archetype, Schrader's Transcendental Style in Film, and Watts and Locke's Women and the Sacred in Film.

THETR 474 Jung, Film, and the Process of Self-Knowledge (also College Scholar Seminar) (IV)
Spring. 4 credits. Limited to 20 students. Offered alternate spring semesters.

THETR 475 Seminar in the Cinema I (IV)

THETR 476 Seminar in the Cinema II (IV)

THETR 477 Intermediate Film and Video Projects: Documentary and Experimental Workshop (IV)
Fall. 4 credits. Limited to 8 students. Prerequisites: THETR 277 or 278 as minimum production; preference given to those who have taken THETR 376 (History and Theory of Documentary and Experimental Film), 379 (Modern Documentary Film), 386 (Third Cinema), or 291/691 (Filming Other Cultures); and permission of instructor based on project proposals. Equipment fee: $100 (paid in class). Film project costs: $300–1,000; video $100–200. Not offered 2001–2002. M. Rivchin.
An intensive course in 16mm filmmaking and digital video in which each student develops a significant documentary or experimental project both critically and creatively. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of: cinematography, lighting, sync-sound filming, and editing; research, working with labs and sound houses; digital video camera; and both analog and nonlinear (AVID) digital editing.
ANTHR 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's Where the Green Ants Dream, and, in consultation with the instructor, review films related to their special interests and major field of study.

**[THETR 699 German Film Theory (also GERST 699 and COM L 699)](THETR 699)** Fall. 4 credits. Offered every fourth year.

Not offered 2001–2002. D. Barthrick. This course critically examines major German film theories from the Weimar period to the present. Works by Balazs, Aribau, Kraus, Benjamin, Adorno, Horkheimer, Kluge, Syberberg, Koch, Elsaesser, and others are discussed in relation to the context in which they emerge as well as current debates in film theory.

**Dance**

Faculty: J. Chu, A. Fogelsanger (director of undergraduate program in dance), J. Kovar, J. Morgenstern, J. Self, B. Suber.

PLEASE NOTE: Courses offered in fall 2001 will still carry the designator THETR; courses offered in spring 2002 will carry the new designator DANCE.

The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, dance technology, and the history, theory, and criticism of dance. Technique courses include introductory dance technique, modern dance at three levels, and ballet at three levels. Other dance forms, such as Japanese No, Indian dance, and Javanese dance, are offered on a rotating basis. Courses in African and ballroom dance, taken through the Physical Education program, supplement these offerings. Technique courses develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to eight academic credits (one each semester) in technique courses. Students may also satisfy the physical education requirement by taking dance technique courses in the dance program. Students taking technique for academic credit must also register through their own colleges. Students who wish to enroll in nonintroductory level dance technique courses must attend a placement class at the beginning of each semester. The schedule for placement classes is available in the main office of the Sheila W. and Richard J. Schwartz Center for the Performing Arts.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance courses is by permission. Students may receive one academic credit (S-U grades only) when performing in student-faculty concerts by registering for THETR 155 (fall 2001) or DANCE 155 (spring 2002).

**The Dance Major**

Note: All courses designated DANCE below will still carry the THETR designator during the fall 2001 semester.

To be admitted to the major, students must have completed two technique courses in modern dance or ballet at level II or above, DANCE 210 (Beginning Dance Composition), and one semester DANCE 212 (Music Resources I), concurrently with DANCE 210. It is recommended that students take DANCE 201 (Dance Improvisation), the optional THETR 250 (Fundamentals of Theatre Design and Technology), and the optional music course before the junior year. The following requirements are expected of the major.

**Prerequisites for the Major:**

- **DANCE 210 Beginning Dance Composition** (offered every semester) 3
- **DANCE 212 Music Resources I** (offered every semester) concurrently with DANCE 210 1
- Two technique courses in modern dance or ballet at level II or above 2

**TOTAL** 6

**Requirements for the Major:**

- **Credits**
  - Two semesters each of ballet and modern dance (in addition to the prerequisite) 4
  - One academic or studio course in non-western form 0–4
  - **DANCE 155 Rehearsal and Performance** 1
  - **DANCE 201 Dance Improvisation** (offered every spring semester) 1
  - **DANCE 233 Explorations in Movement and Performance** (offered every fall semester) 1
  - Two courses from the following approved list selected in consultation with the student's advisor: 6–8
    - One of MUSIC 103 Intro to World Music I: Africa and the Americas, MUSIC 104 Intro to World Music II: Asia, MUSIC 105 Introduction to Music Theory (or substitute at the appropriate level), MUSIC 107 Hildegard to Handel, MUSIC 108 Mozart to Minimalism,
    - **THETR 250 Fundamentals of Design and Technology,**
    - **DANCE 258 Techno Soma Kinesics** (offered every spring semester),
    - **DANCE 319 Music, Dance & Light** (offered alternate fall semesters, not offered 2001–2002),
    - **DANCE 413** Film and Performance (offered occasionally; not offered 2001–2002),
    - **DANCE 310–311 Intermediate Dance Composition** (offered every semester) 6
    - **DANCE 312 The Moving Body** (offered every fourth or fifth semester; offered fall 2001) 3
    - **DANCE 314–315 Western Dance History** (offered alternate years; offered 2001–2002) 8
    - **DANCE 323 Music Resources II** (offered every spring semester) 2
    - **DANCE 418 Seminar in Dance Studies** or other 400-level academic dance course (offered alternate years; not offered 2001–2002) 4
    - **DANCE 491 Senior Project** (year-long course offered every year) 6

**TOTAL** 42–48
Students will be expected to perform in at least two concerts and to present at least two of their own dances, in addition to the senior project.

Honors
Students who have maintained a GPA of 3.5 in classes for the dance major and an average of 3.0 in all courses may elect to work for honors in dance during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in dance.

Courses
Note: All courses designated DANCE below which are offered in Fall 2001 will still carry the THEATR designator. The DANCE designation becomes effective in Spring 2002.

Movement Technique
The courses DANCE 122, 125, 231, 232, 233, 303, 304, 306, 307, 308, 309, and 316 are co-listed in the Department of Physical Education (PE) and the Dance major (DANCE) of the Department of Theatre. Film & Dance. Students may register for these courses either through PE in order to satisfy the university’s physical education requirement or through DANCE for 0 or 1 academic credit, with a limit of 1 credit per semester and 8 credits total. Students may not get DANCE and PE credit simultaneously for the same course.

The technique course co-requisite for DANCE 210, 310, 311, 410, and 411 may be fulfilled by DANCE 122, 231, 232, 233, 303, 304, 306, 308, 309, and 316. Students who wish to enroll in a non-introductory level technique course (DANCE 231, 232, 304, 306, 308, 309, and 316) must attend a placement class; pre-enrollment is not allowed. A placement class is held at the beginning of each semester; please contact the department registrar for more information.

Note: All DANCE listings were formerly listed as THEATR under the same numbers.

DANCE 122 Dance Technique I (also PE 160)
Fall and spring, 0 to 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Chu and J. Self; spring: J. Chu and J. Kovar. Entry level class. Covers the fundamentals of elementary dance training. Movement sequences focusing on rhythm, placement, and vitality of performance through an anatomically sound dance technique.

DANCE 125 Introduction to Tap Dancing (also PE 170)
Fall. 0 to 1 credit. Satisfies the PE requirement if taken as PE. Not offered 2001–2002.
This introduction to tap dancing is designed for beginners who have no previous experience with the genre. We begin with basic heel, toe, and ball work before progressing logically to the shuffle, the flap, and their concomitant variations. As one of our goals in tap dancing is to realize (just a few of the body’s percussive possibilities, uninhibited ankles and a sense of rhythm are strongly recommended.)

DANCE 155 Rehearsal and Performance
Fall and/or spring, 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned. Requests for retroactive credit will not be honored. Limited to students who are cast in faculty-choreographed dances. Students may add this course only after they have been assigned roles.
This course includes the study, development, and performance of roles in departmental dance productions.

DANCE 231 Dance Technique II/ Ballet (also PE 161)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Beginning Ballet technique intended for students with some dance training. Includes all basic barre and center work focusing on presence and presentation.

DANCE 232 Dance Technique II/Modern (also PE 162)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Kovar; spring: J. Morgenroth.
Beginning Modern technique intended for students with some dance training. Material covered includes specific spinal and center work with attention to rhythm, design, and movement expression.

DANCE 233 Explorations in Movement and Performance (also PE 168)
Fall. 0 or 1 credit. Limited to 16 students. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
A physically demanding exploration into various movement realms. Specific subjects covered are genderized movement, erotic power, spiritual power, ritual, and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagerness to investigate the nature of performance and explore unfamiliar territory in movement.

DANCE 303 Dance Technique Workshop (also PE 167)
Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
This class goes beyond the conventional modern dance class and looks into the very nature of technical training for dancers by studying and investigating a variety of movement forms including yoga, improvisation, classical, and modern western dance.

DANCE 304 Dance Technique II/Ballet (also PE 163)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Intermediate Ballet technique. Work is done on strengthening the body through a movement technique emphasizing presence and musicality based on harmonic muscular control.

DANCE 306 Dance Technique III/Modern (also PE 164)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Morgenroth; spring: J. Chu.
Intermediate modern technique focusing on rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students are challenged by complex phrases and musicality.

DANCE 307 Asian Dance and Dance Drama (also PE 427)
Sec. 01. Indian Dance. 0, 1, or 3 credits. Satisfies the PE requirement if taken as PE. Fall, D. Bor.
This course is designed to give the student a practical working knowledge of Indian classical dance, specifically in the indigenous style of Orissa known as Odissi. The technique strengthens the body and develops grace, rhythmic expression, and dexterity that can benefit all forms of dance.

DANCE 308 Dance Technique IV/Modern (also Physical Education 166)
Fall: 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Advanced and pre-professional Modern technique. A continuation of and supplement to DANCE 306.

DANCE 309 Dance Technique IV/Ballet (also PE 165)
Fall: 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Advanced and pre-professional Ballet technique. A continuation of and supplement to DANCE 304.

DANCE 316 Dance Technique IV/Western Classical (also PE 172)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
This course is new in the sense that it blends contemporary modern technical forms and “borrowed” traditional ballet forms into a hybridized mix of “contemporary western classical” technique, emphasizing speed in the feet and legs, flexibility in the trunk and upper body, and the ability to quickly change and reverse directions. Includes extensive use of the barre.

DANCE 317 Asian Dance II
0, 1, or 3 credits. Prerequisite: DANCE 307 or previous training in Odissi Classical Dance. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Not offered 2001–2002.
The continuation of DANCE 307, Odissi Classical Dance. Emphasis is mainly on choreography as well as continuing to refine and perfect the basic movements learned in the preliminary course. Meets twice weekly for movement classes; an extra class will be arranged to learn the art of makeup.
**DANCE Composition**

**DANCE 201 Dance Improvisation**  
Spring. 1 credit. Limited to 12 students. Attendance at dance concerts is required. J. Morgenroth.  
When the body knows where, why, and how to move without prior direction, we call that improvisation. This course coaxes inspiration, seeking to make you a role and to keep it surprising. It offers the possibility of “training” one’s movement instincts to respond relevantly and with spontaneity. Solo and group forms are covered. Live musical accompaniment.

**DANCE 210 Beginning Dance**  
Fall and spring. 3 credits. Concurrent enrollment in DANCE 212 and a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self. Weekly assignments of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through class improvisations. Informal showing at end of semester.

**DANCE 211 Dance Movement Workshop [IV]**  
Summer. 3 credits. Limited to 15 students. For students with varied levels of training, including those with no experience. J. Kowar. Students explore new ways of moving and creating dances and prepare short studies each week based on material covered in class. Modern dance technique, improvisation, and composition are covered. Students observe and discuss the main concerns of contemporary performance from the artist’s/performer’s perspective. Viewings of films, videotapes, and live performances.

**DANCE 212 Music Resources I**  
Fall and spring. 1 credit. MUSIC 105 is recommended as a prerequisite but not required. Attendance at dance concerts and music concerts is required. A. Fogelsanger. Intended to expand choreographers’ vocabulary and skills through a survey of contemporary music for dance, the study of music and dance collaborations, and rhythm studies. Includes discussing and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Concentrates especially on minimalism and polystilism in music, dance, the two considered together, and other arts singly and in combination.

**DANCE 301 Mind and Memory: History, Criticism, and Theory**  
Fall and spring. 3 credits. J. Morgenroth. This course examines the bodily systems involved in human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology and kinesiology. We will emphasize the relationships between bodily form and function. Includes guest lectures by experts in anatomy and health areas. Lab and oral analyses of human movement. Demonstration of dissection.

**DANCE 310 Intermediate Dance Composition I [IV]**  
Fall and spring. 3 credits. Prerequisite: DANCE 310 and DANCE 323, though DANCE 323 may be taken concurrently.

**DANCE 311 Intermediate Dance Composition II [IV]**  
Fall and spring. 3 credits. Prerequisite: DANCE 310 and DANCE 323, though DANCE 323 may be taken concurrently.

Attendance at dance concerts is required. Concurrent enrollment in a dance technique class at the appropriate level is required. Fall, B. Suber; spring, J. Self. A continuation of DANCE 310.

**DANCE 323 Music Resources II**  
Spring. 2 credits. Prerequisite: DANCE 212. MUSIC 105 is strongly recommended as a prerequisite but not required. Attendance at dance concerts and music concerts is required. DANCE 212 and DANCE 323 together count as a course for purposes of graduation. A. Fogelsanger. Intended to expand choreographers’ conceptions of music and its uses for dance, including serving as a source for ideas of choreographic organization. A continuation of DANCE 212 in its survey of contemporary music for dance and the study of music and dance collaborations, but also includes examples from film and the plastic arts. Reading topics include criticism and aesthetics of dance, music, and the arts in general. Includes discussion of and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Concentrates especially on minimalism and polystilism in music, dance, the two considered together, and other arts singly and in combination.

**DANCE 410 Advanced Dance Composition I [IV]**  
Fall and spring. 3 credits. Prerequisite: DANCE 410. Concurrent enrollment in a technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, B. Suber; spring, J. Self. A continuation of DANCE 410.

**DANCE 411 Advanced Dance Composition II [IV]**  
Fall and spring. 3 credits. Prerequisite: DANCE 410. Concurrent enrollment in a technique class at the appropriate level. Attendance at dance concerts is required. Fall, B. Suber; spring, J. Self.

**DANCE 491 Senior Project in Dance**  
Fall and spring. 6 credits per semester. Prerequisite: DANCE 418, senior standing. Attendance at dance concerts is required. Under faculty direction, the students write a senior paper in dance history, criticism, or theory.

**Interdisciplinary Courses**

**DANCE 258 Techno Soma Kinesics I: Technology and the Moving Body [IV]**  
Spring. 4 credits. Prerequisite: DANCE 201 or DANCE 210 (or equivalent) or permission of instructor; no freshmen. Limited to 12 students. B. Suber. Expanding on the specific aesthetic of formal concert dance, this studio class explores new forms of performance dealing with the moving body. Computer programs such as human form animation software (Life Forms and Poser), digital sound production (Prototol and Digital Performer), digital imaging (Photoshop and Premiere), as well as traditional lighting, set, and costume design and construction, and sound recording and design techniques, are all utilized to create experimental and/or conceptual multimedia performance/installation work. Theoretical texts on the body and technology are also used.

**DANCE 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also ENGL 301, MUSIC 372, S HUM 301, THETR 301) [IV]**  
Spring. 4 credits. For description, see ENGL 301.

**DANCE 314 Western Dance History I: Classical Ballet History as a Reflection of Western Ideology [IV]**  
Fall. 4 credits. Attendance at dance concerts is required. B. Suber. A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Through texts, videotapes, and live performance, the class explores how ballet has permeated or confronted social issues of race, class, gender, sexuality, the body, and abuse.

**DANCE 315 Western Dance History II: History of Modern Dance [IV]**  
Spring. 4 credits. Attendance at dance concerts is required. J. Chu. This class studies the course of modern dance in the twentieth-century United States. We examine each generation of dancers, starting with Isadora Duncan and ending with performers emerging today. Issues of gender, cultural identity, elitism, and democracy are discussed.

**DANCE 418 Seminar in Dance Studies [IV]**  

**DANCE 490 Senior Paper in Dance**  
Fall and spring. 4 credits. Prerequisite: DANCE 418, senior standing. Attendance at dance concerts is required. Under faculty direction, the students write a senior paper in dance history, criticism, or theory.

**History, Criticism, and Theory**

**DANCE 312 The Moving Body: Form and Function [IV]**  
Fall. 3 credits. J. Morgenroth. This course examines the bodily systems involved in human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology and kinesiology. We will emphasize the relationships between bodily form and function. Includes guest lectures by experts in anatomy and health areas. Lab and oral analyses of human movement. Demonstration of dissection.

**DANCE 418 Seminar in Dance Studies [IV]**  

**DANCE 490 Senior Paper in Dance**  
Fall and spring. 4 credits. Prerequisite: DANCE 418, senior standing. Attendance at dance concerts is required. Under faculty direction, the students write a senior paper in dance history, criticism, or theory.

**Interdisciplinary Courses**

**DANCE 258 Techno Soma Kinesics I: Technology and the Moving Body [IV]**  
Spring. 4 credits. Prerequisite: DANCE 201 or DANCE 210 (or equivalent) or permission of instructor; no freshmen. Limited to 12 students. B. Suber. Expanding on the specific aesthetic of formal concert dance, this studio class explores new forms of performance dealing with the moving body. Computer programs such as human form animation software (Life Forms and Poser), digital sound production (Prototol and Digital Performer), digital imaging (Photoshop and Premiere), as well as traditional lighting, set, and costume design and construction, and sound recording and design techniques, are all utilized to create experimental and/or conceptual multimedia performance/installation work. Theoretical texts on the body and technology are also used.

**DANCE 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also ENGL 301, MUSIC 372, S HUM 301, THETR 301) [IV]**  
Spring. 4 credits. For description, see ENGL 301.

**DANCE 314 Western Dance History I: Classical Ballet History as a Reflection of Western Ideology [IV]**  
Fall. 4 credits. Attendance at dance concerts is required. B. Suber. A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Through texts, videotapes, and live performance, the class explores how ballet has permeated or confronted social issues of race, class, gender, sexuality, the body, and abuse.

**DANCE 315 Western Dance History II: History of Modern Dance [IV]**  
Spring. 4 credits. Attendance at dance concerts is required. J. Chu. This class studies the course of modern dance in the twentieth-century United States. We examine each generation of dancers, starting with Isadora Duncan and ending with performers emerging today. Issues of gender, cultural identity, elitism, and democracy are discussed.

**DANCE 418 Seminar in Dance Studies [IV]**  

**DANCE 490 Senior Paper in Dance**  
Fall and spring. 4 credits. Prerequisite: DANCE 418, senior standing. Attendance at dance concerts is required. Under faculty direction, the students write a senior paper in dance history, criticism, or theory.

**Interdisciplinary Courses**

**DANCE 258 Techno Soma Kinesics I: Technology and the Moving Body [IV]**  
Spring. 4 credits. Prerequisite: DANCE 201 or DANCE 210 (or equivalent) or permission of instructor; no freshmen. Limited to 12 students. B. Suber. Expanding on the specific aesthetic of formal concert dance, this studio class explores new forms of performance dealing with the moving body. Computer programs such as human form animation software (Life Forms and Poser), digital sound production (Prototol and Digital Performer), digital imaging (Photoshop and Premiere), as well as traditional lighting, set, and costume design and construction, and sound recording and design techniques, are all utilized to create experimental and/or conceptual multimedia performance/installation work. Theoretical texts on the body and technology are also used.
DANCE 358 Techno Soma Kinesics II: The Moving Body and Technology (IV)
Spring. 4 credits. Prerequisite: DANCE 258 (or equivalent), or permission of instructor. Limited to 5 students. B. Suber. Reflecting the aesthetic of formal concert dance, and expanding on the work accomplished in DANCE 258, students work with more complex elements of multimedia interactive software to create more extensive projects in the field of dance and technology. As opposed to the smaller experimental projects accomplished in DANCE 258, DANCE 358 students are expected to complete substantial projects in interactive multimedia gallery installation/performance work as well as interactive multimedia CD ROM's and web projects, all focused on the moving body.

DANCE 391 Media Arts Studio I (also ART 391, ARCH 391, MUSIC 391) (IV)
Fall. 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum THETR 377 or 277, or DANCE 258. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin, THETR; S. Taft and M. Lyons, ART; J. Zissovici, ARCH; D. Borden, MUSIC. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of using arts spaces on campus, including virtual and performative events.

DANCE 392 Media Arts Studio II (also ART 392, ARCH 392, THETR 392, MUSIC 392) (IV)
Spring. 3 credits. Preference given to those who completed Media Arts Studio I. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of using arts spaces on campus, including virtual and performative events.

Tracks toward admission into the advanced undergraduate theatre program

Design, Technology, and Stage Management
Recommended for individuals interested in a Design, Technology, or Stage Management track:
THETR 250 Fundamentals of Theatre Design and Technology
THETR 151 and 251 Production Lab I and II (at least one credit of each)
Recommended for Scenic Design emphasis:
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Design Assistant)
THETR 354 Stagecraft Studio
THETR 364 Scene Design Studio
Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)
Recommended for costume design or costume shop management emphasis:
THETR 351 Production Lab III (as Design Assistant)
THETR 356 Costume Construction Studio
THETR 366 Costume Design Studio I
Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)
Recommended for Lighting Design or costume shop management emphasis:
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Design Assistant)
THETR 362 Lighting Design Studio I
Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)
Recommended for Sound Design emphasis:
THETR 251 Production Lab II (as Student Technician)
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Design Assistant)
THETR 368 Sound Design Studio
Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)

Recommended for Technical Direction emphasis:
THETR 252 Technical Production Studio I
THETR 256 Technical Production Studio II
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Assistant Technical Director)
THETR 354 Stagecraft Studio
Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)

Recommended for Stage Management emphasis:
THETR 253 or 353 Stage Management Lab II or III—two assignments
THETR 280 Introduction to Acting
THETR 370 Stage Management Studio
THETR 398 Fundamentals of Directing I
Upon admission to the program:
THETR 453 Stage Management Lab IV

Directing
Recommended for individuals interested in a directing track:
THETR 151 and THETR 251 Production Lab I and II (at least 2 combined credits)
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 398 Directing I
THETR 498 Directing II

Playwriting
Recommended for individuals interested in a playwriting track:
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 348 Playwriting
THETR 349 Advanced Playwriting

Students in the advanced undergraduate theatre program may also elect to take THETR 485 (Undergraduate Internship) in addition to or in place of one production assignment.

UKRAINIAN
See Department of Russian.

URDU
See Department of Asian Studies.

VIETNAMESE
See Department of Asian Studies.

WELSH
See Department of Linguistics.

WOMEN'S STUDIES MAJOR
See "Special Programs and Interdisciplinary Studies."
Students should submit:
1) a statement of why they want to be an Africana Studies major; 
2) a tentative outline of the area of study they are considering (African or African-American) for the undergraduate concentration, and 
3) a full transcript of courses taken and grades received.

The center's undergraduate faculty representative will review the applications and notify students within two weeks of the status of their request.

After acceptance as a major in the Africana Center, a student must maintain a C+ cumulative average in the center's courses while completing the major program. The Africana major must complete 36 credits in courses offered by the center, to include the following four core courses: AS&RC 205, 231, 290, and 422. Beyond the core courses, the student must take eight credits of center courses numbered 200 or above and 15 credits numbered 300 or above. The program of an undergraduate major may have a specifically Afro-American focus or a specifically African focus.

Joint Majors

The center encourages joint majors in the College of Arts and Sciences and in other colleges. Joint majors are individualized programs that must be worked out between the departments concerned. The center's undergraduate faculty representative, Professor Bekerie, will assist students in the design and coordination of joint major programs. However, in any joint major program, the center will require at least 16 credits be taken in Africana studies courses, including AS&RC 290.

Double Majors

In the case of double majors (as distinct from joint majors) students undertake to carry the full load of stipulated requirements for a major in each of the two departments they have selected.

Certificate in African Studies

In conjunction with the Institute for African Development, the Africana Studies and Research Center administers an undergraduate Certificate in African Studies program. The certificate is offered as a minor concentration available to students in all of the undergraduate colleges at Cornell. Many of the courses in the program might be used to fulfill other course distribution requirements. By pursuing this certificate, students acquire an interdisciplinary understanding of Africa. After developing a foundation of knowledge on the culture, society, and development of Africa in the core course "Africa: The Continent and Its Peoples," students pursue 15 credit hours in a humanities or development studies track or a combination of the two, including an additional core course, either "African Civilizations and Cultures" or "Contemporary African Development Issues." The requirements for the certificate are a minimum of 18 credit hours, including the core courses.

Students interested in the certificate program must contact Professor Bekerie (the center's undergraduate faculty representative) who will register them in the program and assign them a faculty adviser from their own college. The faculty adviser will be responsible for determining completion of the certificate requirements.

Honors

The honors program offers students the opportunity to complete a library research thesis, a field project in conjunction with a report on the field experience, or a project or experiment designed by the student. The requirements for admission to the honors program for all students—regular majors, joint majors, and double majors—are a B-cumulative average in all courses and a B+ cumulative average in the center's courses. Each student accepted into the honors program will have an honors faculty committee consisting of the student’s adviser and one additional faculty member, which is responsible for final evaluation of the student's work. The honors committee must approve the thesis or project before May 1 of the student’s junior year. The completed thesis or project should be filed with the student's faculty committee by May 10 of the senior year.

Language Requirement

Courses in Swahili may be used to satisfy the College of Arts and Sciences language requirement. In Swahili, successful completion of AS&RC 131, 132, 133, and 134 provides qualification, and the addition of 202 provides proficiency. AS&RC majors are not required to take an African language, but the center recommends the study of Swahili to complete the language requirement.

AS&RC 131 Swahili
Fall. 4 credits. Laboratory time TBA. A. Nanji. Beginner's Swahili. Part 1—Grammar for speaking, reading, and writing. Requires no knowledge of language. Swahili is spoken in the East and Central parts of Africa.

AS&RC 132 Swahili
Spring. 4 credits. Prerequisite: Swahili 131. A. Nanji. Continued study of the basic grammatical formation of the language and the introduction of reading material ranging from songs to short stories. A great many drills are used in this course to help develop the student’s comprehension of the language. Swahili tapes are utilized during all of these sequences.

AS&RC 133 Swahili
Fall. 4 credits. Prerequisites: Swahili 131 and 132. Language laboratory time TBA. A. Nanji. Advanced study in reading and composition.

AS&RC 134 Swahili
Spring. 4 credits. Provides language qualification. Prerequisite: Swahili 133. A. Nanji. In this course more emphases are placed on the development of reading ability and the acquisition of writing skills. Students are expected to read and comprehend selected Swahili stories and write compositions on chosen topics. Ample classroom discussion is given to oral practice in the classroom.

AS&RC 171 Black Families and the Socialization of Black Children
Fall. 3 credits. Staff. This course provides an examination of the evolution of the Black family from its roots in Africa, the evolution of the family forms, the impact of social policy, and a consideration of the literature stressing family and child well-being. Among the major topics considered are

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

Africana Studies and Research Center

The Africana Studies and Research Center is concerned with the examination of the history, culture, intellectual development, and social organization of Black people and cultures in the Americas, Africa, and the Caribbean. Its program is structured from an interdisciplinary and comparative perspective and presents a variety of subjects in focal areas of history, literature, social sciences, and African languages. African languages such as Swahili is consistently offered, fall and spring semesters and taught during summer/winter session.

The center offers a unique and specialized program of study that leads to an undergraduate degree through the College of Arts and Sciences and a graduate degree, the Master of Professional Studies (African and African-American), through the university's Graduate School.

A student may major in Africana Studies; however, another attractive alternative is the center's joint major program. This program enables the student to complete a major in any of the other disciplines represented in the college while at the same time fulfilling requirements for a major in Africana Studies. This requires only a few more credits than is usually the case when one completes a single major course of study. Courses offered by the center are open to both majors and nonmajors and may be used to meet a number of college distribution requirements, including historical/ temporal breadth (*) and geographical breadth (O) requirements, such as freshman writing seminars, language (Swahili), expressive arts, humanities, social sciences, and history.

The center also brings distinguished visitors to the campus, sponsors a colloquium series, and houses its own library.

The Africana Major

The undergraduate major offers interdisciplinary study of the fundamental dimensions of the African-American and African experiences. Because of the comprehensive nature of the program, it is to students' advantage to declare themselves Africana majors as early as possible. The following are prerequisites for admission to the major.

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

male/female relationships, childbearing and parental roles, the extended family, and economic and health issues. The component of the course focusing on youth primarily covers child and adolescent development.

AS&RC 172 The Education of Black Americans: Historical and Contemporary Issues (III)
Spring. 3 credits. Faculty.
This course is devoted to the history of educating Black Americans. Considerable attention is given to contemporary issues. The major topics of focus include an examination of the debates concerning the type of education needed, public and private school funding, efforts of the Africana Studies movement, community control issues, busing, affirmative action, regressive debaters and new initiatives in education including vouchers and charter schools.

AS&RC 191 Africa: The Continent and Its People (III)
Fall. 3 credits. L. Edmondson.
An introductory interdisciplinary course focusing on Africa's geographical, ecological, and demographic characteristics; indigenous institutions and values; the triple cultural heritage of Africanity, Islam, and Western civilization; major historical developments and transitions; and contemporary political, economic, social, and cultural change. Africa's ties with the United States (from trans-Atlantic slavery to the present); its impact on the emerging world order; and its contribution to world civilization are also explored.

AS&RC 202 Swahili Literature (III)
Fall. 4 credits. Prerequisite: Swahili 134. A. Nanji.
Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary forms.

AS&RC 204 History and Politics of Racialization: A Comparative Study (III)
Spring. 4 credits. A. Bekerie.
The primary focus of this course is on the historical and contemporary significance of racialisation in the United States and South Africa with regard to societal development and inter-relations. It includes an analysis of the historical development of racialised barriers as an instrument of power and privilege. The ways with which racialisation is used as an instrument of ideology to social status, cultural hierarchy and economic positions are also examined. Particular emphasis is given to the development and perpetuation of scientific racism in both places. The apparent success against Jim Crow form of racism in the United States and apartheid in South Africa appears to transform racism into subtle and 'scientific' sphere. This transformation and its continued impact in perpetuating social inequality are further analyzed.

AS&RC 205 African Cultures and Civilizations (III)
Spring. 3 credits. D. Ohadike.
This course is concerned with the peoples of Africa and the development of African cultures and civilizations from the earliest times to the present day. It focuses on the near modern civilizations of Africa south of the Sahara, and the ancient civilizations of Egypt and the Nile Valley, together with their contributions to the development of the major world civilizations. The course also deals with the socio-political organization of African societies, their kinship systems, cross-cutting ties, rites of passage, gender relations, and arts (including music, dance, folklore, architecture, sculpture, painting, and body decoration).

AS&RC 210 Major Works of Black World Writing (IV)
Fall. 3 credits. A. Adams.
This course surveys classic texts by African American, Caribbean, and African writers. The focus is on literary texts by authors such as Langston Hughes, Toni Morrison, James Baldwin, Maryse Conde, and Chinua Achebe, with a view toward analyzing common experiences, references, themes, and literary strategies across the Black world. The works of fiction, poetry, and drama that constitute the central material of the course are supplemented by essays and biographies from other authors who have influenced the creative vision and the movement of the peoples of Africa and the Diaspora, e.g., W. E. B. DuBois and Marcus Garvey, Nelson and Winnie Mandela.

AS&RC 231 African-American Social and Political Thought (III)
Spring. 3 credits. J. Turner.
This is an introductory course that reviews and analyzes the major theoretical and ideological foundations developed and espoused by African-Americans in the struggle for liberation. We focus specifically on the political philosophy and historical significance of Malcolm X, and the work and movement of Marcus Garvey, as the prime movers of nationalism and pan-Africanism among Black people in this century. Such themes as slave resistance, nationalism, Pan-Africanism, emigration, anti-imperialism, socialism and internal colonialism, and the political and social views of Black women are discussed. Black political thought is viewed in its development as responses to concrete conditions of oppression and expression.

AS&RC 271 Introduction to African Development (also CRP and GOVT 271) (III)
For description, see CRP 271

[AS&RC 280 Race, Power, and Privilege in the United States (formerly Racism in American Society) (III)
Fall. 3 credits. Not offered 2001–2002.
D. Barr and J. Turner.
This course is a topical treatment of the theory and history of racism in the United States. The course begins with an examination of basic concepts and theories of racism. From there we examine the history of racial groups in America—African Americans, Native Americans, Asian Americans, and the Hispanic groups. Particular emphasis is given to the political economy of racism and the sociological and psychological aspects of race relations in America, with specific reference to the differences and intersections of race, class, gender, and ethnicity.

[AS&RC 283 History of Resistance Movements in Africa and the Diaspora (III)
Fall. 3 credits. Not offered fall 2001.
D. Ohadike.
This course deals with the history of resistance and liberation movements in Africa, Brazil, the Caribbean, and Asia. It is concerned with the dialectical relationships between European domination and Black resistance. It examines the methods, strength, and complexity of Black resistance and liberation, together with the rise of revolution.

AS&RC 290 The Sociology of the African-American Experience (III)
Fall. 3 credits. J. Turner.
This is an introductory course to the field of Africana Studies. It assumes a historical/sociological approach to the examination of the African-American experience. The course surveys the African beginnings of human kind and the classical role of Black people in world civilization and the making of early culture. The course focuses on issues in the humanities, social sciences, and history. The course is required for all undergraduate students majoring at the Africana Center.

AS&RC 304 African American Art (IV)
Spring. 3 credits. S. Hassan.
This course investigates the different forms of African-American visual artistic traditions in relation to their historical origins and socio-cultural context from the early days of slavery to the present time. The course begins with an overview of African art and the experiences of the Middle Passage and slavery in relation to African-American traditions in the decorative arts including pottery, architecture, ironwork, quilts and basketry. This is followed by a fine art survey starting with the eighteenth and nineteenth centuries, continuing through the early twentieth-century Harlem Renaissance and the present. Certain issues related to African-American art and creativity such as "improvisation," "Black Aesthetic," and "Pan Africanism" are also explored. Slides, films, and film strips are used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

AS&RC 310 Art in African Culture and Society (IV)
Fall. 3 credits. Not offered fall 2001.
S. Hassan.
This course is a survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at investigating the different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism and complexity of traditional African art are explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular African societies is used to examine the relationship of the arts to indigenous concepts of time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and acculturation are also explored. These include tourist art, popular art, and elite art.

AS&RC 311 Government and Politics in Africa (III)
Fall. 3 credits. A. Mazur.
This course deals with power and political participation in Africa. Topics include: the colonial background and its political consequences; the pre-colonial continuities in the post-colonial polities; ethnicity and allegiance in the African polity; and the monarchical tendency in African political culture. Discussion covers a spectrum of
topics from the warrior tradition to the military coup in the post-colonial era; from the elder tradition to presidential gerontocracy; from the sage tradition to intellectual meritocracy.

Other major topics include class versus ethnicity in African politics; the one-party versus the multi-party state; socio-cultural versus socio-economic ideologies; the gender question in African politics; the soldier and the state; and the African political experience in a global context.

AS&RC 352 Pan-Africanism and International Politics (III) Spring. 3 credits. L. Edmondson.
Pan-Africanism addresses the shared experiences and aspirations of African people around the world, focused on a search for greater linkages and unifying measures. Informed by an exploration of the racial factor in international relations, this course examines Pan-African theories, ideologies, and movements, past and present, in their political, socio-economic, and cultural manifestations, focusing mainly on the African continent, the Caribbean, and Black America.

The course examines how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class is taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty member directing the course, the class considers such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; and the role of the state in constructing an engendered economy and polity.

AS&RC 390 African History: Earliest Times to 1800 (III) Fall. 5 credits. A. Bekerie.
As the second largest continent with vast and varying geographical and sociocultural conditions combined with recently established fact as an original home of human species, Africa provides a diverse oral and written early history. The course covers some of the major historical signposts from the origins of human species to 1800. Among the topics for discussion are: Historical Perspectives and Sources, The Nile River Cultural Complex, Berber, Carthage and Mughrebi of North Africa, Upper Guinea and Western Sudan of West Africa, Cities of the East African Coast, and Great Zimbabwe and other sites of Southern Africa.

AS&RC 404 Afrocentricity: Paradigm and Critical Readings (II) Fall. 4 credits. A. Bekerie.
What is Afrocentricity? It is a theoretical framework designed to study and interpret the histories and cultures of peoples of Africa and African Americans locating them at the center of their experiences. In other words, it is a method of knowing the life experiences of African peoples from the inside out. The course examines—through the writings of Asante, Kete, Clarke, Jean, Myers, Amin, Mazrui, Gates, Appiah, Richards, Schlesinger, and Thiongo—the conception and depth of the paradigm, its relevance in the production and utilization of knowledge, particularly emancipatory knowledge, the history of the paradigm, and its differences among a wide range of thinkers and scholars.

The central thesis of African American politics has been its movements for political change and democratic access and human rights. This development since eighteenth century is a complex political legacy. This course conducts a close study of African American political practice and theoretical analysis of the American political system. Implications of the political system for prospects and limitations to participation by Black people are analyzed. Critical historical stages in the process of Black politics are examined. The development of electoral offices in federal and statewide politics, and the significant urban political power bases giving rise to African American mayorality politics in critical industrial centers, as well as rural hamlets, center the course. Presidential politics—the Jesse Jackson campaigns—and new political formations including Black Republicans, conservatives constitute the emphasis on contemporary events. The course reviews the development of the literature in African American politics.

The socioeconomic conditions of the African-American urban community are the central focus of the course. Community development models are explored in relationship to the social needs of the African-American population. The changing configuration of internal organization of the African American community nationally is examined.

AS&RC 422 African Literature (IV) Spring. 4 credits. A. Adams.
With such great focus, both inside and outside Africa, on issues of Africa's "development," what place does "take this place" take in African literature influencing or influenced by the mundane realities of daily living faced by African people? Or does African literature concern itself with philosophical ideas and ideals that translate to the general human condition? Or, does it do both? The texts that we read in this course are approached in terms of these issues of "African development" and "the universal human experience."

AS&RC 435 African Cinema (also S HUM 435) (IV) Fall. 4 credits. S. Hassan.
This course offers an overview of African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, this course examines how trends within African cinema are explored, such as "Return to the Sources" and the rediscovery of the pre-colonial past; the "Social Realist" narrative and critique of post-independence Africa; reconstructing the story of colonialism from the perspective of the colonized; and the entertainment genre. Techniques, styles, and aesthetics of African cinema are also discussed. The course offers a unique opportunity of looking at African culture and society, and at issues of social change, gender, class, tradition, and modernization through African eyes.

AS&RC 451 Politics and Social Change in the Caribbean (I) Fall. 4 credits. L. Edmondson.
A study of the historical, geostrategic, political, economic, and social (including racial and cultural) forces affecting domestic and international experiences of Caribbean societies. Special attention is given to conflicting definitions and perceptions of the Caribbean; contending theories of Caribbean socio-economic ideology and models of development; the continuing salience of struggles for change and transformation; prospects of regional integration; and Caribbean challenges to the global system, especially with regard to the region's relations with the United States and the region's position in the Third World in the context of the North-South cleavage.

AS&RC 455 Caribbean Literature (IV) Fall. 4 credits. A. Adams.
This course examines the prose literature of the Caribbean islands. Through the reading of several novels and short stories from the various languages and cultural strains that comprise the Caribbean societies, students study the points of commonality and the diversity within this body of literature. The recurrence of certain historical, social, and cultural issues that have formed the multi-ethnic Caribbean perspective are analyzed in their varying manifestations across the linguistic and other boundaries to uncover the underlying shared experience.

AS&RC 459 Education in Africa and the Diaspora (III) Fall. 4 credits. N. Assie-Lumumba.
This course deals with educational innovations geared to promoting equal opportunity based on gender, race, and class in Africa and the African diaspora. After an introduction on the concepts of education and innovations and the states of innovation as planned change, the course focuses on concrete historical and contemporary cases of educational innovations. The case studies in the United States include the creation and expansion of historically black institutions such as Lincoln University, Spelman College, Tuskegee Institute (now Tuskegee University), and other schools in the South, and the Westside Preparatory School in Chicago. The African cases studied include African languages for instruction with a focus on a Nigerian case, Ujamaa and education for self-reliance in Tanzania, and the case of Cote d'Ivoire which adopted television as a medium of instruction.

AS&RC 468-469 Honors Thesis HOURS TBA. 468, fall; 469, spring. Africana Center faculty.
For senior Africana Studies majors working on honors theses, with selected reading, research projects, etc., under the supervision of a
ARTS AND SCIENCES - 2001-2002

member of the Africana Studies and Research Center faculty. Permission of the AS&RC director of undergraduate studies is required.

AS&RC 475 Black Leaders and Movements in African-American History I (III)
Fall. 4 credits. R. Harris.
The course analyzes the personalities, ideas, and activities central to the struggle for African-American liberation from the eighteenth century to the present. It examines theories of leadership and the structure of protest movements with the goal of understanding current leadership needs and trends among African Americans.

[AS&RC 478 Family and Society in Africa @ (III)]
Fall. 4 credits. Not offered fall 2001.
N. Assie-Lumumba.
The family as a social institution is structured according to socio-economic, historical, political, and cultural specifics. This is the frame in which the family in Africa and the African diaspora must be analyzed. The topics discussed in this course include the concepts of nuclear and extended family, the place and role of different age groups and generations in the family, marriage and its related issues, parent-child, gender roles, class differences, and “family planning.” This course also deals with the impact of westernization, urbanization, and modern economy on the structure of the family in Africa as well as the legacy of African family values in the African diaspora with a focus on the African-American case.

AS&RC 479 Women and Gender Issues in Africa @ (III)
Spring. 4 credits. N. Assie-Lumumba.
There are two contrasting views of the status and role of women in Africa. One view portrays African women as dominated and exploited by men. According to another view women have a favorable social position in Africa: indigenous ideologies consider women to be the foundation of society, they are economically active and independent and they have a decisive role in reproduction. In this seminar we discuss the status and role of women in Africa historically as well as in the contemporary period. Among the topics covered: women in non-westernized/ pre-colonial societies; the impact of colonial policies on the status of women; gender and access to schooling, participation in the economy and politics; women and the law; women and health issues; gender issues in southern Africa; womanism and feminism; the United Nations Decade of Women; and the four World Conferences on Women (Mexico 1975, Copenhagen 1980, Nairobi 1985, and Beijing 1995).

[AS&RC 483 History of African Political Thought @ # (III)]
Fall. 4 credits. Not offered fall 2001.
D. Obadika.
The purpose of this course is to provide students with a thorough knowledge of the history of African political thought and ideologies, from ancient times to the present. The course is divided into two broad sections. The first section looks at the history of African political thought and institutions in ancient and near modern times and explains the functioning of African communalism. It then goes on to show how political thought in the nineteenth and early twentieth centuries inspired the revival of such ideas as Uhuru, Negritude, and African Humanism. The second section traces the history of anti-colonial political thought. It explain why the colonial intelligentsia and radical African nationalists developed such political ideologies as African socialism, Lumumbism, and Nkrumahism. The course also looks at socio-political theories and the structure of the African diaspora must be analyzed. The topics discussed in this course include the concept of apartheid and the challenges of transformation toward a post-apartheid society in South Africa. Topical emphases include: the rise and decline of apartheid, the historical continuity of Black resistance to Western racism, women under, against, and after apartheid, South Africa’s relations with its neighbors, geo-political, economic, and racial dimensions of the American connection, politics of negotiation and transformation, the prospects for stability, democracy, and equality, and South Africa’s new role in the African continental and global arenas. Instructor's lectures are supplemented by films and class discussions.

AS&RC 498-499 Independent Study
498, fall; 499, spring. Hours TBA. Africana Center faculty.
For students working on special topics, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty.

AS&RC 501 Global Africa: Comparative Black Experience
Spring. 4 credits. A. Mazzu.
This seminar traces diasporas in the Black experience: the diaspora of enslavement concerns slaves and descendants of slaves in both the Western and Eastern Diaspora. The diaspora of colonization concerns demographic dispersal as a result of colonial policies. Black Africans are part of the Diaspora of Enslavement. Recent Algerian immigrants into France are part of the Diaspora of Colonization. Jamaicans and Trinidadians in Britain are part of the double diaspora—products of both enslavement and colonialism. The course addresses these areas of Black comparison: Comparative Slavery—A Triple Heritage; Race and Race Mixture in Four Traditions; Comparative Resistance against Racism; Comparative Liberation from Colonization; Comparative Struggle for Civil Rights; The Gender Question in Global Africa; and Comparative Quest for Global Equality.

[AS&RC 510 History and Sources: The Development of African-American History]
Spring. 4 credits. Permission: upperclass or graduate standing or permission of instructor. Not offered 2001–2002.
R. Harris.
The course studies the way Black historians in particular have explored the African-American past. It examines the development of writing African-American history during the twentieth century, and seeks to determine the principles for interpreting African-American history. Participants are acquainted with the methodologies and sources central to understanding the African-American experience.

AS&RC 504 Political Change in Africa
Fall. 4 credits. A. Mazzu.
The study of Africa can be approached dialectically (focusing on the tension between opposing forces) or thematically (focusing on themes as chapters of experience). This course borrows from both those approaches. In their class assignments and examinations students are free to use either approach. The first approach explores the connection between continuity and change; tradition and modernity; dependency and liberation; foreign and indigenous influences; anarchy and order; political decay and political development; democracy and authoritarianism; and socialism and capitalism. The thematic approach examines African Nationalism; race consciousness and Pan-Africanism; political parties and interest groups; executive power; ethnicity in politics; class-formation; civil military relations; economic and cultural dependency; sub-regional and continental Pan-Africanism; crisis of the African state; and Africa in World Politics.

[AS&RC 510 History and Sources: The Development of African-American History]
Spring. 4 credits. Permission: upperclass or graduate standing or permission of instructor. Not offered 2001–2002.
R. Harris.
The course studies the way Black historians in particular have explored the African-American past. It examines the development of writing African-American history during the twentieth century, and seeks to determine the principles for interpreting African-American history. Participants are acquainted with the methodologies and sources central to understanding the African-American experience.
AS&RC 530 Womanist Writing in Africa and the Caribbean
Spring. 4 credits. A. Adams.
Theoretical essays on the nature, relevance, and articulation of feminist thought from African and Caribbean writers complement literary texts, as manifested both at home and in emigrant situations abroad are examined in texts by such writers as Sistren, Conde, Dangarembga, Aidoo, Warner-Vicrya, Ba, Emecheta, Kincaid, and W. Mandela. (Francophone works may be read in the original by individuals who so desire.)

AS&RC 598-599 Independent Study
598, fall, 599, spring. Variable credit. For graduate students.

AS&RC 601-602 Africana Studies Graduate Seminar
601, fall, 602, spring. 4 credits. Africana Studies faculty.
This course, which is conducted as a seminar, is designed for first-year AS&RC graduate students. It is coordinated and supervised by one professor but team-taught by three or four faculty members per semester. Each participating faculty member is responsible for a topical segment of the course related to her/his areas of specialization or an area of interest pertaining to theory and methodology of Africana Studies.

AS&RC 698-699 Thesis
698, fall, 699, spring. Limited to Africana Studies and Research Center graduate students.

Agriculture, Food, and Society Concentration
Agriculture, Food, and Society is an interdisciplinary concentration that is designed to introduce students to the study of agricultural and food issues from diverse perspectives within the liberal arts. The Agriculture, Food, and Society concentration seeks to make available to students a coherent program of study in which the role of agriculture in modern or prehistorical-historical and developed or developing societies can be understood in both biological, social, and humanistic perspectives. The concentration draws on courses in several colleges— particularly, the Colleges of Arts and Sciences, Agriculture and Life Sciences, and Human Ecology.

American Studies

Honors
Candiates for honors must maintain an average of B+ in courses pertinent to the major and have taken at least one course in which they wrote a research paper. Normally, the program requires that they wish to write a senior honors essay must approach a member of the American Studies Program Faculty and discuss their ideas for a project. With approval from the faculty member students may then register in the fall of their senior year for AM ST 493, the honors essay tutorial. At the end of the fall semester, students who complete the honors essay tutorial and have a second member of the American Studies faculty to discuss their progress. If satisfactory, students will complete their honors essays in the spring by enrolling in AM ST 494.

Prerequisite Courses (see also under appropriate departments)
In this interdisciplinary course we analyze American values and behavior as the intersection of culture, politics, literature, and society. We do so by examining eight "great" texts written between 1776–1900. The historical context of these texts is explored in lectures and the texts are studied as literature and historical/cultural documents. Texts include: Common Sense by Thomas Paine; The Blithedale Romance by Nathaniel Hawthorne; The Lincoln–Douglas Debates; Henry James' The Ambassadors; Mark Twain's Huckleberry Finn; F. Scott Fitzgerald's The Great Gatsby; William Faulkner's Sound and the Fury; Richard Wright's Black Boy; John Updike's Rabbit Run; and Philip Roth's American Pastoral.

AM ST 103 is not a prerequisite of AM ST 102.

AM ST 102 Introduction American Studies: History and Literature, the Twentieth Century (III)  

This course examines the first century-and-one-half of American national life and asks a series of interrelated questions about the changing meaning of national identity during this time. What did it mean to become an American, a process often urged on immigrants, in light of the values and perceptions immigrants brought with them? What did democracy, a core element of becoming that American, mean if one were African or Native American? Or German? Jewish or Chinese? In what ways did racial and ethnic perceptions help structure political and cultural life during this period, and how does understanding the diversity of races and ethnicities aid us in understanding the complexity of American life? This is an interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.

AM ST 109 Introduction to American Studies: New Approaches to Understanding American Diversity, the Nineteenth Century # (III or IV)  
Fall. 4 credits. N. Salvatore.

The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the northern hemisphere, both West and East: The Four Seasons. The view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attentions to the Old World origins, dispersion, and local permutations of this motif, more than half of the seminar is given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations.

AM ST 110 Introduction to American Studies: New Approaches to Understanding American Diversity, the Twentieth Century (also LSP 110) (III or IV)  

AM ST 430 American Studies 430 Seminars  
Section One: The Politics of the American Civil War (also ENGL 308)  
Spring. 4 credits. Prerequisite: permission of instructor. R. Bensel.

The Civil War, along with the founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American Political development. Aiming at ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention is paid to: the political economy and culture of plantation slavery in the antebellum South, the apparent inevitability of collision between the slave and free states and their respective societies; the military, political, and economic strategies that determined, on both sides, the course and duration of the war; the limits and possibilities of reform of southern Reconstruction; and the impact of the Civil War on the subsequent development of the United States.

Section Two: The Four Seasons Motif in American Culture (also S HUM 405 and HIST 455)  
Fall. 4 credits. Prerequisite: permission of instructor. M. Kammen.

The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the northern hemisphere, both West and East: The Four Seasons. The view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attentions to the Old World origins, dispersion, and local permutations of this motif, more than half of the seminar is given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations.

Section Three: Literature as History: The Americas (also ENGL 430)  
Fall. 4 credits. Prerequisite: permission of instructor. M. Kammen.

Beginning with William Carlos Williams' In the American Grain (1925), this course considers modernist innovations in the telling of history by literary means. Responding to what they felt as the "deadness" of conventional historiography, writers such as Williams, Charles Reznikoff, John Sanford, Muriel Rukeyser, Melvin Tolson, and Paul Metcalf produced imaginative American histories that made a new world of historical narration, and in the process found new objects of historical attention. One of these was the plural, transnational America of the hemispheric Americas. This reconfiguration anticipated and in some cases shaped recent revisionist critiques of the Eurocentric presence on American soil (Edward Galeano, Leslie Marmon Silko, David Stannard, Ward Churchill, Noam Chomsky, Ana Castillo); accordingly students read examples, some polemical, of that later work.

Section Four: Detroit: Nowhere to Run, Nowhere to Hide (also ANTHRO 301)  
Spring. 4 credits. Prerequisite: permission of instructor. N. Salvatore.

This is an interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.

American violence in 1967 created as well a widespread national belief that this largely African-American population could not successfully adapt to contemporary urban life. Yet those images conflict with others of even longer standing, of Detroit, Motown, as a source of national culture, of progressive, interracial unionism; of a strong black religious community; and of the city as an incubator of diverse movements supporting black nationalism, civil rights, and black entrepreneurship. Taking our lead from one of Martha and the Vandellas' great hits, we explore these multiple images and the even more complex realities of this city during the post-1945 era. We do so, moreover, in an interdisciplinary fashion that seeks to understand the images of Detroit in the context of national events.

Anthropology, Sociology, and Economics

AM ST 150 Introduction to American Religion (also SOC 150 and RELST 150) (III)

AM ST 252 Twentieth-Century Women Novelists (also ENGL 252) (IV)  
Spring. 4 credits. S. Samuels.

For description, see ENGL 251.
SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

AM ST 262 Asian American Literature (also ENGL 262, AAS 262) (IV)
Spring. 4 credits. S. Wong.
For description, see ENGL 262.

AM ST 266 Asian American Women and Literature (also AAS 266, ENGL 266) (IV)
Fall. 4 credits. S. Dave.
For description, see AAS 266.

AM ST 268 The Culture of the 1960s (also ENGL 268) (IV)
Spring. 4 credits. P. Sawyer.
The course argues that the 1960s help define the 1990s, but that as we look back, the 1950s help define the 1960s. Were the sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an impassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, war, the counterculture, the New Left, and the woman's movement. Texts include *The Autobiography of Malcolm X*, *The Electric Kool-Aid Acid Test*, *Dispatches*, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, manifestoes, and memoirs. The term paper explores students' special interests.

AM ST 275 The American Literary Tradition (also ENGL 275) (IV)
H. Spillers.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

AM ST 276 Literature in the Cold War Culture (also ENGL 276) (IV)
B. Maxwell.
For description, see ENGL 276.

AM ST 291 American 1920s: Literature and Culture (also ENGL 291) (IV)
B. Maxwell.
For description, see ENGL 291.

AM ST 318 Queer Theatre (also THETR 320) (IV)
E. Gainor.
For description, see THETR 320.

AM ST 326 Imagining America: French Travel Writing from de Tocqueville to Baudrillard (also FR LIT 324) (IV)
Fall. 4 credits. D. Rubenstein.
For description, see FR LIT 324.

AM ST 334 American Drama and Theatre (also THETR 334 and ENGL 337) (IV)
Fall. 4 credits. E. Gainor.
For description, see THETR 334.

AM ST 335 Contemporary American Theatre (also THETR 337 and ENGL 337)
Spring. 4 credits. E. Gainor.
For description, see THETR 337.

AM ST 338 American Indians and Film (also THETR 338) (IV)
L. Black.
For description, see THETR 338.

AM ST 361 Early American Literature (also ENGL 361) (IV)
Fall. 4 credits. J. Porte.
For description, see ENGL 361.

AM ST 362 The American Renaissance (also ENGL 362) (IV)
J. Porte.
For description, see ENGL 362.

AM ST 363 The Age of Realism and Naturalism (also ENGL 363) (IV)
For description, see ENGL 363.

AM ST 365 American Literature Since 1945 (also ENGL 365) (IV)
For description, see ENGL 365.

AM ST 366 The Nineteenth-Century American Novel (also ENGL 366) (IV)
Fall. 4 credits. D. McColl.
For description, see ENGL 366.

AM ST 367 The Modern American Novel (also ENGL 367) (IV)
Spring. 4 credits. D. McColl.
For description, see ENGL 367.

AM ST 368 The American Novel Since 1950 (also ENGL 368) (IV)
Fall. 4 credits. P. Sawyer.
For description, see ENGL 368.

AM ST 369 Survey of African American Literature to 1917 (also ENGL 375) (IV)
For description, ENGL 375.

AM ST 370 Survey in African American Literature: 1918 to Present (also ENGL 376) (IV)
Spring. 4 credits. H. Spillers.
For description, see ENGL 376.

For description, ENGL 374.

AM ST 385 Policing and Prisons in American Culture (also ENGL 397) (IV)
Spring. 4 credits. B. Maxwell.
For description, see ENGL 397.

AM ST 403 Studies in American Poetry: Great Books, 1855-1926 (also ENGL 403) (IV)
R. Gilbert.
For description, see ENGL 403.

AM ST 461 Asian Americans and Popular Culture (also AAS 461, ENGL 461, THETR 461) (IV)
Fall. 4 credits. S. Dave.
For description, see AAS 461.

AM ST 465 Proseminar in American Studies (also ENGL 465) (IV)
J. Porte.
For description, see ENGL 465.

AM ST 469 William Faulkner (also ENGL 469) (IV)
Fall. 4 credits. H. Spillers.
For description, see ENGL 469.

AM ST 470 Studies in the Novel: Forms of American Fiction: The Short Story as Novel (also ENGL 470) (IV)
Fall. 4 credits. L. Herrin.
For description, see ENGL 470.

AM ST 473 American Indian Autobiography (also ENGL 473) (IV)
L. Donaldson.
For description, see ENGL 473.

AM ST 475 Seminar in Cinema I (also THETR 475) (IV)
Fall. 4 credits. D. Frederickson.
For description, see THETR 475.

AM ST 479 Jewish-American Writing (also ENGL 479 and JWST 478) (IV)
J. Porte.
For description, see ENGL 479.

Government and Public Policy

GOVT 111 Introduction to American Government and Politics (III)
Fall. 3 credits. T. J. Lowi.
An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

AM ST 302 Social Movement in American Politics (also GOVT 302) (III)
Fall. 4 credits. M. E. Sanders.
For description, see GOVT 302.

AM ST 305 Public Opinion and Political Participation (also GOVT 304) (III)
J. Cowden.
For description, see GOVT 305.

AM ST 310 Civil Liberties in the United States (also GOVT 327) (III)
J. Rabkin.
For description, see GOVT 327.

AM ST 315 Prisons (also GOVT 314) (III)
M. Katzenstein.
For description, see GOVT 314.

AM ST 316 The American Presidency (also GOVT 316) (III)
M. E. Sanders.
For description, see GOVT 316.

AM ST 319 The American Congress (also GOVT 318) (III)
Spring. 4 credits. M. Shefter.
For description, see GOVT 318.

AM ST 328 Constitutional Politics: The United States Supreme Court (also GOVT 328) (III)
J. Rabkin.
For description, see GOVT 328.

AM ST 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also S&TS 350, GOVT 350) (III)
M. Dennis.
For description, see S&TS 350.

AM ST 353 Feminism Movements and the State (also GOVT 353, WOMNS 353) (III)
M. Katzenstein.
For description, see GOVT 353.
AM ST 376 American Political Thought from Madison to Malcolm X (also GOVT 366 and HIST 316) # (III)
Fall. 4 credits. I. Kramnick.
For description, see GOVT 366.

AM ST 388 Science in the American Polity, 1800-1960 (also S&TS 390, GOVT 308) (III)
M. Dennis
For description, see S&TS 390.

AM ST 389 Science in the American Polity, 1960–Now (also S&TS 391, GOVT 309) (III)
Fall. 4 credits. M. Dennis.
For description, see S&TS 391.

AM ST 409 Racial Prejudice and Political Intolerance (also GOVT 409) (III)
For description, see GOVT 409.

AM ST 428 Government and Public Policy: An Introduction to Analysis and Criticism (also GOVT 428) (III)
Fall. 4 credits. T. Lowi.
For description, see GOVT 428.

AM ST 429 Government and Public Policy: An Introduction to Analysis and Criticism (also GOVT 429) (III)
Spring. 4 credits. 428 and consent of instructor are required for 429. T. Lowi.
For description, see GOVT 429.

History

AM ST 103 Introduction to American History (also HIST 101) # (III)
Fall. 4 credits. M. B. Norton.
A survey of American history from the beginning through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, antebellum reform movements, and the coming of the Civil War.

AM ST 104 Introduction to American History (also HIST 102) (III)
Spring. 4 credits. Staff.
An introductory survey of the development of the United States since the Civil War.

AM ST 124 Democracy and its Discontents: Political Traditions in the United States (also HIST 124) (III)
Summer. 3 credits. N. Salvatore.
An examination of democracy and its critics. The course explores the evolution of democracy in America, focusing on some of the dramatic and important episodes in American history. It considers the struggles over the emancipation of slaves in the nineteenth century, free-speech issues, the civil-rights movement, religious-based critiques of American culture, and conservative critiques of American liberalism. The course serves as an investigation of the ways in which political expression takes forms in modern American culture. In addition to lectures, the course features several afternoon programs. These programs include guest lecturers and hands-on instruction in how to use the modern electronic research library.

AM ST 201 Popular Culture in the United States, 1900-1945 (III or IV)
G. Alscher.
American Studies 201 deals with American popular culture in the period between 1900 and the end of World War II. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines, and music, we try to better understand the ways in which popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and the less powerful, seek to "control" images and themes. Topics for 201 include: the Western, Cultural Heroes and the Cult of Individualism in the 1920s; The Hays Code and the Black Sox scandal; Mae West and the "New Women"; Advertising in an Age of Consumption; Gangsters and G-Men; and Jackie Robinson and the American Dilemma.

AM ST 202 Popular Culture in the United States, 1945-Present (III or IV)
G. Alscher.
American Studies 202 treats the period from 1945 to the present. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines, and music, we try to better understand the ways in which popular culture shapes and/or reflects American values. The course also depicts popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and less powerful, seek to "control" images and themes. Topics for 202 include: The "Honeymoons" and 1950s Television, soap operas; "Gross-out" movies; Elvis; The Beatles, and Guns 'n Roses, Gothic Romances, and People Magazine and USA Today.

AM ST 204 Comparative Migration in the Americas (also HIST 202) (III)
M. C. Garcia.
For description, see HIST 202.

AM ST 208 Seminar: Era-Franklin D. Roosevelt (also HIST 208) (III)
Fall. 4 credits. R. Polenberg.
For description, see HIST 208.

Fall. 4 credits. N. Salvatore.
In this seminar we read a variety of texts that underscore the fierce struggle to define the meaning of civil rights in American society during this era. We explore this from multiple perspectives through readings of historical, legal, political, theological, and literary readings.

AM ST 212 African American Women: Twentieth Century (also HIST 212 and WOMNS 212) (III)
For description, see HIST 212.

AM ST 214 Seminar on American Foreign Policy (also HIST 214) (III)
Fall. 3 credits. Prerequisite: permission of instructor. W. LaFeber.
For description, see HIST 214.

AM ST 219 Mexican Immigration to the United States (also HIST 219, LSP 219) (III)
Fall. 4 credits. J. Cardenas.
For description, see LSP 219.

AM ST 241 History of Childhood in the United States (also HD 241 and HIST 271) (III)
J. Brumberg.
For description, see HD 241.

AM ST 251 Black Religious Traditions from Slavery to Freedom (also HIST 251 and RELST 251) (III)
M. Washington.
For description, see HIST 251.

AM ST 258 Historical Development of Women as Professionals, 1800 to Present (also HD 258, HIST 239, WOMNS 238) (III)
J. Brumberg.
For description, see HD 258.

AM ST 259 Introduction to U.S. Latino History, Part I (also HIST 260, LSP 260) (III)
M. C. Garcia.
For description, see HIST 260.

AM ST 261 Introduction to U.S. Latino History, Part II (also HIST 261, LSP 261) (III)
Spring. 4 credits. M. C. Garcia.
For description, see HIST 261.

AM ST 272 American Indian History, 1500-1850 (also HIST 276 and AIS 276) (III)
D. Usner.
For description, see HIST 276.

AM ST 273 Women in American Society, Past and Present (also HIST 273) # (III)
M. B. Norton.
For description, see HIST 273.

AM ST 277 American Indian History Since 1850 (also HIST 277 and AIS 277) (III)
D. Usner.
For description, see HIST 277.

AM ST 303 African American Women in Slavery and Freedom (also HIST 303) # (III)
M. Washington.
For description, see HIST 303.

AM ST 304 American Culture in Historical Perspective, 1880-1980 (also HIST 304) (III)
M. Kammen.
For description, see HIST 304.

AM ST 311 Structure of American Political History (also HIST 311) # (III)
J. Silbey.
For description, see HIST 311.

AM ST 312 Structure of American Political History (also HIST 312) (III)
J. Silbey.
For description, see HIST 312.
[AM ST 314] History of American Foreign Policy, 1912 to the Present (also HIST 314) (III)
For description, see HIST 314.1

[AM ST 317] American Constitutional Development (also HIST 318) (III)
Fall. 4 credits. R. Polenberg.
For description, see HIST 318.

[AM ST 320] Understanding Work in America, 1800–1990 (also HIST 319) (III)
This course explores both the experience and the perception of work in American life in the century framed by two fundamental formations: the emergence of a system of industrial capitalism largely nationalist in its orientation and the development of a more international economic system in more recent times. Among the topics considered are the effects of technological change, its impact on the experience of work across numerous occupational categories, and the changing perceptions of work as reflected in contemporary cultural expression, literature, and commentary across the century.

[AM ST 321] Colonial North America to 1763 (also HIST 321) # (III)
For description, see HIST 321.

[AM ST 322] Age of the American Revolution, 1763–1815 (also HIST 322) (III)
Spring. 4 credits. M. B. Norton.
For description, see HIST 322.

[AM ST 324] Varieties of American Dissent, 1880–1990 (also HIST 324) (III)
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course explores the varieties of economic, political, and cultural dissent in American between 1880 and 1990, and examines how understanding dissent in its specific historical context illuminates major aspects of American life and culture.

[AM ST 327] American Frontier History before 1850 (also HIST 327) # (III)
For description, see HIST 327.

[AM ST 329] Indians, Settlers, and Slaves in the Early South (also HIST 329, AIS 329) # (III)
Spring. 4 credits. D. Usner.
For description, see HIST 329.

[AM ST 330] The Age of Jackson, 1813–1850 (also HIST 330) # (III)
For description, see HIST 330.

[AM ST 331] American Civil War and Reconstruction, 1850–1877 (also HIST 331) (III)
Fall. 4 credits. J. Silbey.
For description, see HIST 331.

[AM ST 332] The Urbanization of American Society, 1600 to 1860 (also HIST 332) # (III)
For description, see HIST 352.

Spring. 4 credits. S. Blumin.
For description, see HIST 333.

[AM ST 336] Capitalism and Society in Developing America, 1607–1877 (also HIST 336) # (III)
For description, see HIST 336.

[AM ST 337] Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840–2000 (also HIST 337) (III)
For description, see HIST 337.

For description, see HIST 340.

[AM ST 341] Recent American History, 1960–Present (also HIST 341) (III)
Spring. 4 credits. R. Polenberg.
For description, see HIST 341.

[AM ST 345] Intellectual/Cultural Life of Nineteenth-Century Americans (also HIST 345 and RELST 345) # (III)
For description, see HIST 345.

[AM ST 346] Modernization of the American Mind (also HIST 346) (III)
For description, see HIST 346.

[AM ST 347] American Environmental History (also HIST 347) (III)
Fall. 4 credits. F. Dunaway.
For description, see HIST 347.

[AM ST 359] American Families in Historical Perspective (also HD 359 and WOMNS 357)
For description, see HD 359.

[AM ST 378] Topics in U.S. Women's History (also HIST 378 and WOMNS 378) (III)
For description, see HIST 378.

[AM ST 406] The Immigrant City 1990–2000 (also S HUM 406, LGP 406, and HIST 412) (III)
For description, see S HUM 406.

[AM ST 411] Seminar: American Political History (also HIST 411) (III)
Spring. 4 credits. Prerequisite: permission of instructor. J. Silbey.
For description, see HIST 411.

[AM ST 417] History of Female Adolescence (also HD 417, HIST 458, WOMNS 438) # (III)
For description, see HD 417.

[AM ST 419] Seminar in American Social History (also HIST 419) (III)
Spring. 4 credits. Taught in Washington, D.C. S. Blumin.
For description, see HIST 419.

[AM ST 421] Undergraduate Seminar in American Cultural History (also HIST 421) (III)
For description, see HIST 421.

[AM ST 439] Reconstruction and the New South (also HIST 439) (III)
Fall. 4 credits. Limited to 15 students. M. Washington.
For description, see HIST 439.

[AM ST 440] Undergraduate Seminar in Recent American History (also HIST 440) (III)
For description, see HIST 440.

[AM ST 486] Seminar on the 1960s (also HIST 486) (III)
Fall or spring. Offered in Cornell-in-Washington Program only. S. Blumin and others.
For description, see HIST 486.

[AM ST 500] Research Seminar in American Studies (also HIST 500)
Fall or spring. Offered in Cornell-in-Washington Program only. S. Blumin and others.
For description, see HIST 500.

[AM ST 501] Politics and Policy: Theory, Research, and Practice (also GOVT 500, ALS 500, and PAM 406)
Fall, spring. Offered in Cornell-in-Washington Program only. S. Jackson.
For description, see GOVT 500.

Music and Visual Studies

[AM ST 105] Popular Music in America: 1850–1985 (also MUSIC 101) (IV)
Spring. 3 credits. S. Pond.
For description, see MUSIC 101.

[AM ST 222] A Survey of Jazz (also MUSIC 222) (IV)
Fall. 3 credits. S. Pond.
For description, see MUSIC 222.

[AM ST 223] History of Rock Music (also MUSIC 223) (IV)
For description, see MUSIC 223.]
There is no special undergraduate degree program in applied mathematics. Undergraduate students interested in an application-oriented program in mathematics may select an appropriate program in the Department of Mathematics, the Department of Computer Science, or some department of the College of Engineering.

A listing of selected graduate courses in applied mathematics can be found in the description of the center in "Interdisciplinary Centers, Programs, and Studies."

**Archaeology Program**

**Courses and Programs**

Courses basic to the discipline of archaeology are marked with the word "Basic" after the number of credit hours. It is recommended that majors who are planning to pursue graduate study take at least two of the basic courses in each category. Further courses in languages and geology are also recommended.

**Honors**

Honors in archaeology are awarded on the basis of the quality of an honors essay and the student's overall academic record. Prospective honors students should have at least a 3.5 grade point average in the major and a 3.0 grade point overall. They should consult with the director of undergraduate study before the beginning of the senior year. The honors essay is normally prepared over two semesters in consultation with a faculty adviser during the senior year. Students may enroll in Archaeology 481 (fall) or Archaeology 482 (spring) for this purpose.

**Fieldwork**

Every student should gain some practical experience in archaeological fieldwork on a project authorized by his or her adviser. This requirement may be waived in exceptional circumstances. The Jacob and Hedwig Hirsch bequest provides support for a limited number of students to work at excavations sponsored by Cornell and other approved institutions.

**The Concentration**

Students in Cornell schools and colleges other than Arts and Sciences may elect a concentration in archaeology. To concentrate in archaeology, the student must complete five courses, all with a grade of C or better. The five courses must consist of either (1) Archaeology 100 and four other courses from categories B-D (described above), at least three of which must be basic courses, or (2) five courses from categories B-D, at least four of which must be basic courses. Concentrators are encouraged to gain some fieldwork experience. They are eligible for Hirsch Scholarships in support of fieldwork on the same basis as majors.

**First-Year Writing Seminars**

For course descriptions, see the first-year writing seminar brochure.

**A. Introductory Courses and Independent Study Courses**

**ARKEO 100 Introduction to Archaeology (also ANTHR 100) @ (III or IV)**

Fall, 3 credits. Basic. J. Henderson.

**ARKEO 201 Lost Tribes and Sunken Continents (also ANTHR 201) @ # Summer only, 3 credits. D. Evett.**

An examination of popular theories about past highlights, differences among them, and the kinds of explanations offered by archaeologists. Emphasis is on the ways archaeologists interpret the past. Case studies include Atlantis, Stonehenge, Egyptian and Mexican pyramids, and the history of contacts between the Old World and the Americas.
ARKEO 300 Individual Study in Archaeology and Related Fields
Fall and spring. Credit TBA. Prerequisite: ARKEO 100 or permission of instructor. Students pursue topics of particular interest under the guidance of a faculty member.

ARKEO 481-482 Honors Thesis
481, fall; 482, spring. 4 (V) credits. S-U only. Prerequisite: admission to Honors Program. The student, under faculty direction, prepares a senior thesis.

ARKEO 600 Special Topics in Archaeology
Fall and spring. 4 (V) credits. Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 681-682 Master's Thesis
681, fall; 682, spring. 4 (V) credits. S-U only. Limited to students admitted to Master's Program in Archaeology. Students, working individually with faculty member(s), prepare a Master's Thesis in Archaeology.

B. Anthropological Archaeology

ARKEO 202 Interpretive Archaeology (also ANTHR 202) (III)
For description, see ANTHR 202.

ARKEO 203 Early People: The Archaeological and Foossil Record (also ANTHR 203) (III)

ARKEO 204 Ancient Civilizations (also ANTHR 204) # (III)

ARKEO 215 Stone Age Art (also ANTHR 215) # (III)
For description, see ANTHR 215.

ARKEO 255 Great Empires of the Andes (also ANTHR 255) @ # (III)
Summer only. 3 credits. M. Malpass. The Andes region of South America, stretching from northern Colombia to Tierra del Fuego, saw the rise and fall of some of the world's most spectacular societies, from the Moche of the north Peruvian coast to the Incas. Not only were the cultures of this area highly developed, but many of the technologies—metalurgy, textiles, ceramics, and stonemasonry—to name just four—were unusually sophisticated. The Andean region saw the indigenous domestication of plants and animals as well as the rise of state-level societies. This course introduces students to the cultural developments of this fascinating area, from the earliest times to the fall of the Incas in AD 1543.

ARKEO 317 Stone Age Archaeology (also ANTHR 317) (III)
For description, see ANTHR 317.

ARKEO 355 Ancient Mexico and Central America (also ANTHR 355) @ # (III)
For description, see ANTHR 355.

ARKEO 409 Approaches to Archaeology (also ARKEO 409, and ANTHR 409/609) (III)
For description, see ANTHR 409.

ARKEO 459 Archaeology of the Household (also ARKEO 459, and ANTHR 459/659) (III)
For description, see ANTHR 459.

ARKEO 466 Humans and Animals (also ARKEO 466 and ANTHR 466/666) @ (III)

ARKEO 493 Seminar in Archaeology (also ANTHR 493)

ARKEO 494 Seminar in Archaeology: The Archaeology of Human Origins (also ANTHR 494)
For description, see ANTHR 494.

ARKEO 495 Population of Mycenaean Greece (also ARKEO 495, and ANTHR 495) (III)
For description, see ANTHR 495.

ARKEO 496 Approaches to Archaeology (also ARKEO 496, and ANTHR 496/609)
For description, see ANTHR 496.

ARKEO 497 Contemporary Archaeological Theory (also ANTHR 467)
Spring. 4 credits. Prerequisite: undergraduate by permission of instructor. Limited to 14 students. N. Russell.
For description, see ANTHR 467.

ARKEO 500 Special Topics in Archaeology
Fall and spring. 4 (V) credits. Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 600 Special Topics in Archaeology
Fall and spring. 4 (V) credits. Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 681-682 Master's Thesis
681, fall; 682, spring. 4 (V) credits. S-U only. Limited to students admitted to Master's Program in Archaeology. Students, working individually with faculty member(s), prepare a Master's Thesis in Archaeology.

ARKEO 686 Humans and Animals (also ARKEO 466 and ANTHR 466/666) @ (III)

ARKEO 700 Archaeology: The Archaeology of Human Origins (also ANTHR 700)
For description, see ANTHR 700.

ARKEO 355 Ancient Mexico and Central America (also ANTHR 355) @ (III)
For description, see ANTHR 355.

ARKEO 409 Approaches to Archaeology (also ARKEO 409, and ANTHR 409/609) (III)
For description, see ANTHR 409.

ARKEO 459 Archaeology of the Household (also ARKEO 459, and ANTHR 459/659) (III)
For description, see ANTHR 459.

ARKEO 466 Humans and Animals (also ARKEO 466 and ANTHR 466/666) @ (III)

ARKEO 493 Seminar in Archaeology (also ANTHR 493)

ARKEO 494 Seminar in Archaeology: The Archaeology of Human Origins (also ANTHR 494)
For description, see ANTHR 494.

ARKEO 495 Population of Mycenaean Greece (also ARKEO 495, and ANTHR 495) (III)
For description, see ANTHR 495.

ARKEO 496 Approaches to Archaeology (also ARKEO 496, and ANTHR 496/609)
For description, see ANTHR 496.

ARKEO 497 Contemporary Archaeological Theory (also ANTHR 467)
Spring. 4 credits. Prerequisite: undergraduate by permission of instructor. Limited to 14 students. N. Russell.
For description, see ANTHR 467.

ARKEO 500 Special Topics in Archaeology
Fall and spring. 4 (V) credits. Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 600 Special Topics in Archaeology
Fall and spring. 4 (V) credits. Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 681-682 Master's Thesis
681, fall; 682, spring. 4 (V) credits. S-U only. Limited to students admitted to Master's Program in Archaeology. Students, working individually with faculty member(s), prepare a Master's Thesis in Archaeology.

ARKEO 686 Humans and Animals (also ARKEO 466 and ANTHR 466/666) @ (III)

ARKEO 700 Archaeology: The Archaeology of Human Origins (also ANTHR 700)
For description, see ANTHR 700.

ARKEO 355 Ancient Mexico and Central America (also ANTHR 355) @ (III)
For description, see ANTHR 355.

</table>
Asian American Studies Program

The Asian American Studies Program is a university-wide academic program housed administratively within the College of Arts and Sciences. Its aim is to promote teaching, research, and educational activities related to Asian Americans and to serve as a resource to the campus and regional communities. The program's undergraduate courses, offered within the program and cross-listed with departments in various colleges, meet distribution requirements and count toward a concentration in Asian American Studies. The program does not offer a graduate course of study, but students can undertake graduate work in Asian American Studies within selected disciplines of the university.

Undergraduate Concentration

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Asians in America. The course of study stresses developments within the United States, but also underscores the transnational and comparative contexts of Asian American and the field's connections with African American, American Indian, Latino, and Women's Studies. Students must work with a faculty adviser from among the program's affiliated faculty and must complete at least 15 units of credits as follows: (a) AAS 110 and two additional courses in Asian American Studies; (b) one course in Africana, American Indian, Latino Studies, or Women's Studies; and (c) One course in East Asian, South Asian, or Southeast Asian studies. These courses must be approved by the student's faculty adviser, and they should address issues of race, gender, or the histories and cultures of Asian peoples. Students must file an application for the concentration with the Asian American Studies Program.

Research

The program encourages faculty and student research on Asian Americans by sponsoring guest lectures, conferences, film festivals, readings, and exhibits. It also funds research projects and student travel to conferences and research sites. The Asian American Studies Workshop is the program's principal research initiative, engaging Cornell's faculty and students with invited faculty from other universities in a year-long intensive study of selected themes.

Affiliated Faculty

T. Chaloeintarani (Southeast Asia Program), B. de Bary (Asian studies), S. Han (sociology), V. F. Kayashita (Koch Library), J. V. Koschmann (Eugenics), L. C. Lee (human development), V. Munasinghe (anthropology), V. Nee (sociology), R. E. Rippke (education), N. Sakai (Asian studies), S. Samuels (English), A. M. Smith (government), K. W. Taylor (Asian studies), Wai-Kwong Wong (Gannett Health Center), S. Wong (director, Cornell Library) D. Yeh (vice president/student-academic services)

Courses

AAS 110 Introduction to Asian American Studies (III or IV)
Spring. 3 credits. This course can be used to satisfy either a social science or humanities distribution requirement. S. Davé.

AAS 262 Asian American Literature (IV)
Spring. 4 credits. W. Wong.

AAS 266 Asian American Women and Literature (also AM ST 266, ENGL 266 and WOMNS 266) (IV)
Fall. 4 credits. S. Davé.

AAS 412 Undergraduate Seminar in Asian American History (also HIST 412) (III)
Spring. 4 credits. Not offered 2001–2002. For description, see HIST 412. A reading and research seminar that covers various topics in Asian American history.

AAS 438 Immigration and Ethnic Identity (III)

AAS 461 Asian Americans and Popular Culture (also AM ST 461, ENGL 461, and THETR 461) (IV)
Fall. 4 credits. S. Davé.

AAS 478 Self and Nation in Asian-American Literature (also ENGL 478) (IV)
4 credits. Not offered 2001–2002. A study of the ways in which Asian American writers have constructed discourses of self and nation. Topics include nationalism, feminism, identity politics, and theories of minority discourse. In our reading of selected works of prose, poetry, and drama by Chinese American, Filipino American, Japanese American, and Korean American writers, we ask questions about the relation of these works to the moment of their production and reception, and the manner in which these textual representations engage with shifting cultural and political systems. Written work may include: Carlos Bulosan, Theresa Hak Kyung Cha, Frank Chin, Jessica Hagedorn, and David Henry Hwang, Maxine Hong Kingston, Joy Kogawa, and David Mura.

AAS 485 South Asian Formations and Asian American Studies (also ENGL 485) (IV)
Spring. 4 credits. S. Davé.

This course examines and discusses the emergence and recent explosion of South Asian American literature and research in...
relation to the field of Asian American Studies. We read some of the recent literature published by Lahiri’s Pulitzer prizewinning Interpreter of Maladies as well as examining the historical and political nature of the community of South Asians in the U.S. Course topics include mass media, literature, gender and sexuality, history, theoretical essays, and a session attendance at the South Asian Studies Conference in Madison in October. We use both a comparative approach to other ethnic communities within the Asian Pacific American community and we explore the history of issues within the South Asian American community. Course covers a variety of works by authors such as Chandra Mohanty, Bharati Mukherjee, Yen Espiritu, Biju Matthew, Vijay Prasad, Sonia Shah, and Urvashi Vaid.

[AAS 492 Twentieth-Century Women Writers of Color

Spring. 4 credits. Not offered 2001–2002. This course explores a range of writing—novels, stories, poems, essays—by American women writers of color in the twentieth century. We look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region, and class. Readings may include works by Joy Harjo, Leslie Marmon Silko, Sandra Cisneros, Gloria Anzaldúa, Theresa Hak Kyung Cha, Sigríður Núñez, Jamaica Kincaid, Maxine Hong Kingston, and Gwendolyn Brooks.]

AAS 495 Independent Study

Fall or spring. 1–4 credits. Topic and credit hours to be mutually arranged between faculty and student. Independent Study Forms must be approved by the Asian American Studies Program Office.

Biology & Society Major

The Biology & Society major, which involves faculty from throughout the university, is offered by the Department of Science & Technology Studies. Students in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences are eligible for the major. The major is coordinated in all colleges through the Biology & Society Office. Students can get information, specific course requirements, and application procedures for the major from the Biology & Society office in 275 Clark Hall, 255-6047.

Because the major is multidisciplinary, students must attain a broad understanding of the several disciplines it comprises. The curriculum includes courses in ethics, mathematics, statistics, history, philosophy, and social studies of science and biology; and basic biology (e.g., genetics and development; biochemistry and molecular-cell biology; ecology; evolutionary biology), as well as integrative courses offered through Biology & Society. In addition, majors are required to take a core course and must develop a theme: an intellectually coherent grouping of courses representative of their special interest in biology and society. Recommended themes in the Biology & Society major include biology, behavior, and society; biology and human population; biology and public policy; environment and society; food agriculture and society; and health and society. Students may also develop their own individually tailored themes (which in recent years have included topics such as biotechnology and society and agriculture, environment, and society). In consultation with their faculty adviser, students select courses that meet the foundation and core course requirements so as to build a coherent theme. Sample curricula for the recommended themes and for several student-developed themes are available in the Biology & Society Office.

There are student advisers and faculty available (according to posted office hours or by appointment) in the Biology & Society Offices, 275 Clark Hall or 278 Clark Hall, to answer questions and to provide assistance.

Admission to the Major

All students should have completed a year of college-level biology before submitting an application during their sophomore year. Juniors are considered on a case-by-case basis. Upper-division applicants should realize that acceptance is granted upon satisfactory completion of the course sequence in introductory biology. The application includes (1) a one-page statement explaining the student’s intellectual interests in the Biology & Society major and why the major is consistent with the student’s academic goals and interests; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling Biology & Society requirements, including courses taken and those the student plans to take in the future; and (4) a transcript of work completed at Cornell University and elsewhere, if applicable, current as of the date of application.

Acceptance into the major requires completion of the course sequence in introductory biology. Sophomores in the process of completing this prerequisite may be admitted to the major on a provisional basis. It is the student’s responsibility to assure that final acceptance is granted upon satisfactory completion of the introductory biology sequence. Although only introductory biological science is a prerequisite for acceptance, students will find it useful to have completed some of the other requirements (listed below) by the end of their sophomore year, preferably by the end of the first semester. Students who are considering the major may also find it beneficial to take "S&TS 201, What is Science?" in their freshman or sophomore year. Human Ecology students should also consult the current Human Ecology Guide and meet with the college advising coordinator, Nancy Brezn, 287A Martha Van Rensselaer Hall, 255-1928.

Major Requirements

No single course may satisfy more than one major requirement.

1) Basic courses

A. Bio S 101–104 or 105–106 or 107–108 (prerequisite for admission to Biology and Society).

B. College calculus (one course)* MATH 106, 111, 112 or any higher level calculus.

Recommended but not required:

General chemistry (one year sequence) (prerequisite to biochemistry and other chemistry courses): CHEM 103–104, 207–208, or 215–216.

2) Foundation Courses (should be completed by end of junior year).

These courses must be above the 100-level, at least three credit hours, and taken for a letter grade.

A. Ethics: one course; B&SOC 205 (also S&TS 205) or B&SOC 206 (also S&TS 206).**

B. Social sciences/humanities foundation: two courses; one from any two of the following subject areas: History, Philosophy of Science; Sociology of Science; Politics of Science; and Science Communication.**

C. Biology foundation (breadth requirement): three courses; one each from three of the following subject areas: Ecology (BIO ES 261); Evolutionary Biology (BIO ES 278); Biochemistry, Molecular and Cell Biology (BIO BM or NS 320, 330 or 331 or 333); Microbiology (BIO MI 250); Genetics and Development (BIO GD 281 or 282 or Plant Breeding 225); Neurobiology and Behavior (BIO NB 221 or 222); Botany (BIO PL 241); and Anatomy and Physiology (BIO AP 311 or NS 341 but NOT BIO AP 212).

D. Biology foundation (depth requirement): one biology course for which one of the above (2C) is a prerequisite.

E. Statistics: one course selected from:

MATH 171, ILR 210, BTRY 215, AG EC 310, EDUC 353, SOC 301, PSYCH 350, ECON 319, OR&IE 370, BTRY 601, CRP 520, PAM 210.
Application forms for the honors program are due at the end of the junior year.

B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 401); or PHIL 286 Science and Human Nature (also S&TS 286).

Theme (five courses that correspond to the theme selected by the student). These courses must be above the 100-level, at least three credit hours, and taken for a letter grade. Choose these courses as follows:

A. Natural Science Issues/Biology Elective (two courses). Select from the list of B&SOC approved Natural Science Issues courses or choose courses with introductory biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTR, FOOD, HD, HS, NTRES, PL BR, PL PA, PSYCH, VTMED.

B. Humanities/social sciences electives (two courses). Courses from the list of Senior Seminars may be used as theme electives if not used to meet another requirement.

C. Senior Seminar (One course taken senior year). Courses change yearly.

* Students may petition to take a second statistics course (an advanced course, in sequence with the statistics course taken in the foundation) in place of the calculus requirement.

** Among the courses taken to meet the social sciences and humanities requirements (2 A, 2 B, 3, and 4 C), a minimum of two social science courses and two humanities courses must be chosen.

Independent Study
Projects under the direction of a Biology & Society faculty member are encouraged as part of the program of study in the student's theme area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1 to 4 credits in B&SOC 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology & Society Office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

The Honors Program
The honors program is designed to provide independent research opportunities for academically talented undergraduate students whose major is Biology & Society (B&SOC). Students who enroll in the honors program are expected, with faculty guidance, to do independent study and research dealing with issues in biology and medicine. Students participating in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career.

Biology & Society majors are considered for entry into the honors program at the end of the second semester of the junior year. Application forms for the honors program are available in the Biology & Society Office, 275 Clark Hall. The honors program is available to Biology & Society majors who are ethical lists whose major is Biology & Society in the Colleges of Human Ecology and Agriculture and Life Sciences; Biology & Society majors in the Colleges of Human Ecology and Agriculture and Life Sciences must be selected by an honors committee within their college. To qualify for the Biology & Society honors program, students must have an overall Cornell cumulative grade-point average of at least 3.3, have formulated a research topic, and have found a project supervisor (with a Cornell appointment) and a Biology & Society faculty member willing to serve as their adviser. Applications will be reviewed by a committee headed by the director of undergraduate studies, who will notify students directly of the outcome. Students will be permitted to register for the honors program only by permission of the department. Students must enroll for at least five credits per semester up to a maximum of eight credits in B&SOC 498 and 499, Honors Project I and II. More information on the honors program is available in the Biology & Society Office, 275 Clark Hall (255-6047).

I. First-Year Writing Seminars

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

II. Foundation Courses

A. Ethics (one course)

B&SOC 205 Ethical Issues in Health and Medicine (also S&TS 205) (IV)

Fall. 4 credits. Limited to 150 students.

Open to sophomores, juniors, and seniors.

Prerequisites: none. E. Toon.

In today's rapidly changing world of health care, and biomedical research, ethical issues arise in many contexts—from the private, interpersonal interactions between doctor and patient to the broad, mass-mediated controversies that make medicine into headline news. This course examines ethical issues that arise from the practice of medicine and policy issues that arise in contemporary medicine, health care, and biomedical research. Tools for ethical analysis are applied to a variety of cases and fundamental questions in bioethics. Perspectives from social science, history, and law also inform the course. We explore ethical questions that arise in a number of substantive contexts, including the doctor-patient relationship, medical decision making near the end of life, human experimentation, genetics and reproductive technology, public health, and the allocation of scarce resources.

B&SOC 206 Ethics and the Environment (also S&TS 206 and PHIL 246) (IV)

Spring. 4 credits. Limited to 60 students.

Open to all undergraduates; permission of instructor required for freshmen. N. Sethi.

The aim of this course is to acquaint students with current issues that arise in the context of the environment and environmental policy. Our concerns about the environment bring to our attention the importance of economic, epistemological, legal, political and social issues in assessing our moral obligations to other humans and the natural world. Our attempt is then to explore how different factors come into play in defining our responsibilities to the environment and to examine the grounds for our environmental policy decisions. A background in basic ecology or environmental issues or ethics is helpful.

B. Social Sciences/Humanities Foundation (two courses, one from any two areas)

I. History of Science

[S&TS 233 Agriculture, History, and Society: From Squanto to Squanto (also S&TS 233)]

Fall. 3 credits. Not offered 2001-2002.

M. Rossiter.

For description, see S&TS 233.

[S&TS 282 Science in Western Civilization (also HIST 282)]

Spring. 4 credits. Limited to 50 students.

B. W. Provine.

For description, see HIST 282.

[S&TS 283 The Sciences in the Twentieth Century (also HIST 280)]

M. Dennis.

For description, see S&TS 283.

[S&TS 287 Evolution (also BIOEE 207 and HIST 287)]

Fall or summer. 3 credits. May not be taken for credit after BIOEE 278.

W. B. Provine.

For description, see BIOEE 207.

[S&TS 355 Computers: From Babbage to Gates]

Fall. 4 credits. M. Dennis.

For description, see S&TS 355.

[S&TS 390 Science in the American Polity: 1800-1960 (also GOVT 308, AM ST 388)]

Fall. 4 credits. Not offered 2001-2002.

M. Dennis.

For description, see S&TS 390.

[S&TS 433 Comparative History of Science]

M. Rossiter.

For description, see S&TS 433.

[S&TS 444 Historical Issues of Gender and Science (also WOMNS 444)]

Spring. 4 credits. M. Rossiter.

For description, see S&TS 444.
2. Philosophy of Science

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210) Spring. 3 credits. T. Pinch. For description, see S&TS 201.

S&TS 286 Science and Human Nature (also PHIL 286) Spring. 4 credits. May be used to meet the philosophy of science requirement if not used to meet the core course requirement. R. Boyd. For description, see PHIL 286.

S&TS 381 Philosophy of Science: Knowledge and Objectivity (also PHIL 381) Fall. 4 credits. R. Boyd. For description, see PHIL 381.

3. Sociology of Science

B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 401) (III) Fall. 4 credits. May be used to meet the sociology of science requirement if not used to meet the core course requirement. E. Toon. See Core Courses for description.

B&SOC 342 Sociology of Science (also S&TS 442, SOC 442, and CRP 442) (III) Fall. 4 credits. T. Pinch. For description, see S&TS 442.

R SOC 208 Technology and Society Fall. 3 credits. C. Geisler. For description, see R SOC 208.

S&TS 201 What Is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210) Spring. 3 credits. T. Pinch. For description, see S&TS 201.

S&TS 311 The Sociology of Medicine Spring. 4 credits. E. Toon. For description, see S&TS 311.

S&TS 411 Knowledge, Technology, and Property Spring. 4 credits. S. Hilgartner. For description, see S&TS 411.

[SOC 434 The Sociology of Reproduction (also WOMNS 435) Spring. 4 credits. Not offered 2001–2002. Staff. For description, see SOC 434.]

4. Politics of Science

B&SOC 406 Biotechnology and Law (also S&TS 406) (III) Spring. 4 credits. L. Palmer. For description, see S&TS 406.

CRP 380 Environmental Politics Fall. 4 credits. R. Booth. For description, see CRP 380.

S&TS 324 Environment & Society (also R SOC 324 and SOC 324) Spring. 3 credits. L. Gienna. For description, see R SOC 324.

5. Science Communication

COMM 260 Scientific Writing for Public Information Fall or spring. 3 credits. Limited to 25 non-freshman or graduate students per section. L. Cowdery. For description and prerequisites, see COMM 260.

[COMM 421 Communication and the Environment Spring. 3 credits. May be used in Foundation only if not taken as senior seminar. Not offered 2001–2002. J. Shanahan. For description, see COMM 421.]

S&TS 285 Communication in the Life Sciences (also COMM 285) Spring. 3 credits. B. Lewenstein. For description, see COMM 285.

S&TS 352 Science Writing for the Mass Media (also COMM 352) Fall. 3 credits. B. Lewenstein. For description and prerequisites, see COMM 352.

[S&TS 466 Communication of Science and Technology (also COMM 466) Fall. 3 credits. Limited to 15 students. May be used in Foundation only if not taken as senior seminar. Not offered 2001–2002. B. Lewenstein. For description and prerequisites, see COMM 466.]  

C. Biology foundation (breadth requirement): Three courses: one from three of the following subject areas:

1. Biochemistry, Molecular and Cell Biology

BIOBM 330 Principles of Biochemistry, Individual Instruction Fall or spring. 4 credits. Blankenship, Hinkle, staff. For description and prerequisites, see BIOBM 330.

BIOBM 331 Principles of Biochemistry: Proteins and Metabolism Fall. 3 credits. May not be taken for credit after BIOBM 330 or 333. G. Feigenson. For description and prerequisites, see BIOBM 331.

BIOBM 333 Principles of Biochemistry, Lectures Summer. 4 credits. H. T. Nivison. For description and prerequisites, see BIOBM 333.

NS 262 The Cell and the External World Spring. 3 credits. N. Noy. For description and prerequisites, see NS 262.

NS 320 Introduction to Human Biology Fall. 4 credits. W. Arion and P. Stover. For description and prerequisites, see NS 320.

2. Ecology

BIOEE 261 Ecology and the Environment Fall or summer. 4 credits. Not open to freshmen. N. G. Hairston. For description and prerequisites, see BIOES 261.

3. Genetics and Development

BIOGD 281 Genetics Fall. spring, or summer. 5 credits. Not open to freshmen fall semester. Limited to 200 students. P. Bruns. For description and prerequisites, see BIOGD 281.

BIOGD 282 Human Genetics Spring. 2 or 3 credits (2 cr. if taken after BIOGD 281). Limited to 25 per discussion group. M. Goldberg. For description and prerequisites, see BIOGD 282.

4. Evolutionary Biology

BIOEE 278 Evolutionary Biology Fall or spring. 3 or 4 credits. M. Geber. For description, see BIOES 278.

5. Microbiology

BIOMI 290 General Microbiology Lectures Fall, spring, or summer. 2 or 3 credits. S. Merkel, Winans, Helmann. For description and prerequisites, see BIOMI 290.

6. Neurobiology and Behavior

BIONB 221 Neurobiology and Behavior I: Introduction to Behavior Fall, 3, 4, or 5 credits. P. W. Sherman. For description and prerequisites, see BIONB 221.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology Spring. 3 or 4 credits. A. Bass. For description and prerequisites, see BIONB 222.

7. Botany

BIOPL 241 Introductory Botany Fall. 3 credits. K. J. Niklas. For description, see BIOPL 241.

8. Physiology and Anatomy

BIOAP 311 Introductory Animal Physiology, Lectures (also VET MED 346) Fall. 3 credits. E. Loew or staff. For description and prerequisites, see BIOAP 311.

NS 341 Human Anatomy and Physiology Spring. 4 credits. Permission only. Must preregister for lab in 309 MVR during Course Enrollment. U. E. Wood. For description and prerequisites, see NS 341.

D. Biology foundation (depth requirement): one course for which one of the above breadth requirement courses (2C) is a prerequisite.

E. Statistics (one course)

AEM 210 Introductory Statistics Fall. 4 credits. C. VanFossen. For description and prerequisites, see AEM 210.

BTRY 261 Statistical Methods I Fall. 4 credits. R. Lloyd. For description and prerequisites, see BTRY 261.
CRP 223 Introduction to Statistical Reasoning for Urban and Regional Analysis
Fall. 3 credits. J. Lobo.
For description, see CRP 223.

ECON 319 Introduction to Statistics and Probability
Fall. 4 credits. Y. Hong.
For description and prerequisites, see ECON 319.

ILRST 211 Statistics: Statistical Reasoning
Fall. 3 credits. T. Staff.
For description, see ILRST 210.

MATH 171 Statistical Theory and Application in the Real World
Spring. 4 credits. S. Stern.
For description, see MATH 171.

PAM 210 Introduction to Statistics
Spring. 4 credits. K. Joyner.
For description, see PAM 210.

PSYCH 350 Statistics and Research Design
Fall. 4 credits. T. Gilovich.
For description, see PSYCH 350.

SOC 301 Evaluating Statistical Evidence (also R SOC 302)
Fall. 4 credits. T. Gilovich.
For description, see SOC 301.

III. Core Courses

B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 401) (III)
Fall. 4 credits. Prerequisite: 2 semesters of social science of humanities and 1 year of introductory biology or permission of instructor. Limited to 75 students. E. Toon. Critical thinking about the diverse influences shaping the life sciences. Topics include evolution and natural selection, heredity and genetic determinism, biotechnology, and reproductive interventions. We interpret episodes, past and present, in biology in light of scientists' historical location, economic and political interests, use of language, and ideas about causality and responsibility. Readings, class activities, and written assignments are designed so that students develop interpretive skills and explore their own intellectual and practical responses to controversies in biology and society.

S&TS 286 Science and Human Nature (also PHIL 286)
Spring. 4 credits. R. Boyd and N. Sturgeon.
For description, see PHIL 286.

IV. Themes

A. Natural Science Issues/Biology Elective (two courses). Select from the following list of B&SOC approved Natural Science Issues courses or choose course(s) with intro biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VET MED.

B&SOC 214 Biological Basis of Sex Differences (also BIOAP 214 and WOMNS 214) (I)
Fall. 3 credits. Next offered spring 2003. J. Fortune.
For description, see BIOAP 214.

B&SOC 347 Human Growth and Development: Biological and Behavioral Interactions (also HD 347 and NS 347)
Spring. 3 credits. Offered alternate years. J. D. Haas and S. Roberson.
For description and prerequisites, see HD 347.

BIOE 275 Human Biology and Evolution (also ANTHR 275 and NS 275)
Fall. 3 credits. Not offered 2001–2002.
K. A. R. Kennedy.
For description, see BIOE 275.

BIOE 474 Laboratory and Field Methods in Human Biology (also ANTHR 474)
K. A. R. Kennedy.
For description, see BIOE 474.

BIOE 673 Human Evolution: Concepts, History, and Theory (also ANTHR 673)
For description, see BIOE 673.

BIOL 247 Ethnobiology
Fall. 3 credits. D. M. Bates.
For description, see BIOL 247.

HD 266 Emotional Functions of the Brain
Fall. 3 credits. R. Depue.
For description, see HD 266.

HD 344 Infant Behavior and Development
Fall. 3 credits. Not open to freshmen.
S. Robertson.
For description and prerequisites, see HD 344.

HD 370 Adult Experimental Psychopathology
Spring. 3 credits. Limited to sophomores, juniors, and seniors. S. Bem.
For description, see HD 370.

HD 436 Language Development (also LING 436, PSYCH 436, and COGST 436)
Spring. 4 credits. B. Lust.
For description, see HD 436.

NS 222 Maternal and Child Nutrition
Fall. 3 credits. Limited to 20. C. Garza.
For description and prerequisites, see NS 222.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits. M. Stipanuk.
For description and prerequisites, see NS 331.

NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361)
Fall. 3 credits. Limited to juniors and seniors only. B. J. Strupp.
For description and prerequisites, see NS 361.

NS 452 Molecular Epidemiology and Dietary Markers of Chronic Disease
Spring. 3 credits.
For description and prerequisites, see NS 452.

PSYCH 326 Evolution of Human Behavior
Spring. 4 credits. R. Johnston.
For description and prerequisites, see PSYCH 326.

Examples of biology electives

AN SCI 300 Animal Reproduction and Development
Spring. 3 credits.
For description, see AN SCI 300.

HD 366 Psychobiology of Temperament and Personality
Spring. 3 credits.
For description, see HD 366.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits.
For description, see NS 331.

B. Humanities/Social Science elective (two courses)

Courses listed earlier as social science/humanities foundation courses (2H) are particularly appropriate as social science/humanities electives. However, a single course cannot be used to meet both requirements. Examples of recommended social science or humanities electives are listed below. A more complete list is available in 275 Clark Hall.

Examples of social science electives

AEM 464 Economics of Agricultural Development
Spring. 3 credits. R. Christy.
For description, see AEM 464.

ANTHR 211 Nature and Culture
For description, see ANTHR 211.

CRP 380 Environmental Politics
Fall. 4 credits. R. S. Booth.
For description, see CRP 380.

HD 251 Social Gerontology
Spring. 3 credits.
For description, see HD 251.

NS 245 Social Science Perspectives on Food and Nutrition
Fall. 3 credits. J. Sobal.
For description, see NS 245.

NS 450 Public Health Nutrition
Spring. 3 credits.
For description, see NS 450.

NTRES 400 International Environmental Issues
Spring. 4 credits. R. McNeil.
For description, see NTRES 400.

PAM 303 Ecology and Epidemiology of Health
Spring. 3 credits.
For description, see PAM 303.

[PAM 380 Human Sexuality
A. Parrot.
For description, see PAM 380.

PAM 435 U.S. Health Care System
Fall. 3 credits.
For description, see PAM 435.

R SOC 205 Rural Sociology and International Development (also SOC 206)
Spring. 3 credits.
For description, see R SOC 205.
Examples of humanities electives

**R SOC 220 Sociology of Health and Ethnic Minorities (also LSP 220)**
Fall. 5 credits. P. Parra.
For description, see R SOC 220.

**R SOC 490 Society and Survival**
Fall. 3 credits. Not offered 2001–2002.
For description, see R SOC 490.

**S&T 324 Environment and Society (also R SOC 324 and SOC 324)**
Spring. 3 credits. L. Glenn.
For description, see R SOC 324.

**SOC 340 Health, Behavior, and Policy**
Spring. 4 credits. S. Caldwell.
For description, see SOC 340.

**Examples of humanities electives**

**NTRES 407 Religion, Ethics, and the Environment**
Fall. 4 credits. R. Baer.
For description, see NTRES 407.

**PHIL 241 Ethics (by petition for breadth requirement)**
Spring. 4 credits. N. Sturgeon.
For description, see PHIL 241.

**PHIL 368 Global Climate and Global Justice (also GOVT 468)**
For description, see PHIL 368.

**S&T 681 Philosophy of Science (also PHIL 681)**
Spring. 4 credits. R. Boyd.
For description, see PHIL 681.

**S&T 696 Seminar in Environmental Ethics**
Fall. 3 credits. R. Baer.
For description, see S&T 696.

**B&SOC 375 Independent Study**
Fall or spring. 1–4 credits. Prerequisite: must have written permission of faculty supervisor and Biology & Society major. Projects under the direction of a Biology & Society faculty member are encouraged as part of the program of study within the student's concentration area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1–4 credits in B&SOC 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Students may elect to do an independent study project as an alternative to, or in advance of, an honors project. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology & Society Office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

**B&SOC 400 Undergraduate Seminar**
Fall or spring. Variable credit. May be repeated for credit.
From time to time different seminars on topics of interest to undergraduates are offered. Topics and instructors are listed in the Biology & Society supplement issued at the beginning of each semester.

**B&SOC 498/499 Honors Project I & II**
Fall and spring. 3–5 credits each term.
Open only to Biology & Society students in their senior year by permission of the department. Please apply in 275 Clark Hall. Students who are admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upper-level course.

Students may take three to five credits per semester up to a maximum of eight credits in B&SOC 498 & 499, Honors Projects I & II. Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. S&T 498 includes the fall Honors Seminar. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of B&SOC 498, Honors Project I, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Biology & Society students who do continue in the
honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

Applications and information are available in the Biology & Society Office, 275 Clark Hall.

Cognitive Studies Program

S. Edelman (psychology); R. Hoy (neurobiology and behavior); J. Halpern (computer science); M. Spivey (psychology); G. Gay (communication); C. Cardie, R. Constable, J. Halpern, D. Hutenlocher, L. Lee, B. Selman, R. Zabih (computer science); A. Hedge (design and environmental analysis); R. Basu, J. Blume, D. Easley (economics); J. Dunn, R. Ripple, D. Schrader (education); S. Wicker (electrical engineering); R. Canfield, S. Ceci, B. Klosowski, B. Lust, S. Robertson, E. Wetherington, W. Williams (human development); K. O'Connor, J. Russo (Johnson Graduate School of Management); J. Bowers, A. Cohn, M. Diesing, J. Gair, W. Habert, S. McConnell-Ginet, C. Rosen, M. Rooto, Y. Shira, J. Whitman, D. Zec (linguistics); A. Nerode, R. Shore (mathematics); R. Harris-Warrick, A. Howard, R. Hoy, H. K. Reeve (neurobiology and behavior); R. Boyd, C. Ginet, H. Hodes, S. Shoeemaker, Z. Szabó (philosophy); J. Cutting, R. Darlington, T. DeVoogd, D. Dunning, S. Edelman, D. Field, B. Finlay, T. Gilovich, B. Halpern, A. Isen, S. Johnson, R. Johnston, C. Krumhansl, U. Neisser, M. Owren, E. Adkins-Kegan, M. Spivey (psychology); M. Macy (sociology); G. Babbes, B. Hefie, S. Herz (associate members).

Cognitive studies is comprised of a number of disciplines that are linked by a major concern with fundamental capacities of the mind, such as perception, memory, reasoning, language, the organization of motor action, and their neural correlates. In the College of Arts and Sciences these disciplines are represented in the departments of Computer Science, Economics, Linguistics, Mathematics, Neurobiology and Behavior, Philosophy, Psychology, and Sociology. Elsewhere in the university they are represented in the Departments of Design and Environmental Analysis and Human Development (College of Human Ecology), the Departments of Communication and Education (College of Agriculture and Life Sciences), and the Johnson Graduate School of Management.

The issues addressed in cognitive studies arise at several levels. At the broadest level are problems of characterizing such basic notions as "mind," "knowledge," "information," and "meaning." At a more specific level are questions regarding the abstract operating principles of individual components of the mind, such as those underlying visual perception, language ability, and understanding of concepts. These principles concern the organization and behavior of the components and how they are biologically represented in the brain. At the most specific level are questions about the properties of the elementary computational structures and processes that constitute these components.

Important insights into issues of these kinds have been achieved in recent years as a result of the various cognitive studies disciplines converging in their theoretical and methodological approaches. It is this convergence, in fact, that warrants grouping the disciplines together under the single term "cognitive studies." Even greater progress can be expected in the future as a consequence of increasing cooperation among the disciplines.

Undergraduate Concentration

An interdisciplinary undergraduate concentration in Cognitive Studies is available to Cornell University undergraduates in the College of Arts and Sciences. Students from other colleges who seek such a concentration should discuss such possibilities with the Cognitive Studies office, which will provide information and contacts concerning such concentrations.

The undergraduate concentration in Cognitive Studies is designed to enable students to engage in a structured program directly related to the scientific study of cognition and the mind. The concentration provides a framework for the design of structured supervised programs of study in this growing interdisciplinary field. Such programs of study serve as complements to coursework in a single discipline as represented by an individual department. It is considered crucial that students gain a strong background in their major, independent of their work in the concentration. Independent majors and college scholars may also apply. Colleges vary in their procedures for formal recognition of this concentration (contact the Cognitive Studies office for details). The Cognitive Studies Program faculty have designed five structured "tracks" that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration adviser. The courses listed under each track are program suggestions. The student should consult with his/her Cognitive Studies adviser to develop a more customized curriculum. In some cases, students may want to combine or cross tracks.

In general, it is expected that students in the concentration will take COGST 101, a lab course such as COGST 201, and three courses at the 300 or 400 level in at least two departments. Even though only five courses are required to complete the concentration, we expect that students interested in cognitive studies will often end up taking more, and we encourage them to do an independent research project (COGST 470) and a research workshop such as COGST 471.

The five typical tracks are as follows. The first track involves a particular approach to the study of cognition. The other four tracks are structured around specific content domains and consist of sets of suggested course clusters. Please note that many of these courses have substantial prerequisites.

Foundational issues in cognitive science are intimately relevant to real world settings. The Cognitive Studies in Context track offers students the opportunity to learn and independently explore how theory and research on the mind can help us better understand how we use information in much of our daily activities, whether it be the workplace, the classroom, or any other aspect of everyday life. Students will come to better understand the cognitive ergonomics of such diverse settings as an aircraft cockpit, a quality control station on an assembly line, or an anesthesia station in a surgical suite. They will come to better understand the perceptual constraints that help tailor the nature of visual communication systems, or the linguistic constraints that help tailor text-based communication. They will come to see how the functional architecture of human memory guides the presentation and use of information in a wide array of settings. They will also learn how design constraints on computer hardware and software interact with human capacities and biases.

COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

In addition, three more upper-level approved courses in Cognitive Studies areas will normally be expected.

2. Perception and Cognition

This track focuses on psychological, computational, and neurobiological approaches to the interface between perception and cognition. Students will develop a grasp of the continuum between sensory impressions and complex thought.

COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

COGST 416/PSYCH 416, Modeling Perception and Cognition

COGST 435/HD 437/LING 450/PSYCH 437, Lab Course: Language Development

BION 326, The Visual System

PSYCH 305, Visual Perception

PSYCH 316, Auditory Perception

PSYCH 412, Laboratory in Cognition and Perception

PSYCH 418, Psychology of Music

PSYCH 419, Neural Networks Laboratory

3. Language and Cognition

This track focuses on the representation, processing, and acquisition and learning of language, as well as its role in cognition and culture. Students will acquire skills and knowledge in formal and applied linguistic theory, psycholinguistic experimentation, and computational modeling techniques.

COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

COGST 270/LING 270/PHIL 270, Truth and Interpretation

COGST 416/PSYCH 416, Modeling Perception and Cognition

COGST 435/HD 437/LING 436/PSYCH 436, Language Development
COGST 450/HD 437/LING 450/PSYCH 437, Lab Course: Language Development
COM S 411, Programming Languages and Logics
LING 203, Introduction to Syntax and Semantics
LING 301–302, Phonology I & II
LING 303–304, Syntax I & II
LING 309, Morphology
LING 319–320, Phonetics I & II
LING 325, Pragmatics
LING 463, Introduction to Applied Linguistics
LING 421–422, Semantics I & II
PHIL 332, Philosophy of Language
PSYCH 415, Concepts, Categories, and Word Meanings

4. Cognition and Information Processing

This track focuses on how the mind (or a computer) can encode, represent, and store information. Students will develop an understanding of concepts, categories, memory, and the nature of information itself.

COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

COGST 201/PSYCH 201, Cognitive Science in Context Laboratory

COGST 414/PSYCH 414, Comparative Cognition

COGST 416/PSYCH 416, Modeling Perception and Cognition

COGST 450/HD 437/LING 450/PSYCH 437, Lab Course: Language Development

COM S 211, Computers and Programming

COM S 212, Structure and Interpretation of Computer Programs

COM S 472, Foundations of Artificial Intelligence

COM S 473, Practicum in Artificial Intelligence

PHIL 262, Philosophy of Mind

PHIL 362, Philosophy of Mind

PSYCH 311, Introduction to Human Memory

PSYCH 412, Laboratory in Cognition and Perception

PSYCH 413, Information Processing: Conscious and Nonconscious

PSYCH 415, Concepts, Categories, and Word Meanings

PSYCH 417, The Origins of Thought and Knowledge

5. Cognitive Neuroscience

This track focuses on neurobiological and computational approaches to understanding how perception and cognition emerge in the human brain. Students will acquire knowledge of what neural structures subserve what perceptual/cognitive processes, and how they interact.

COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

COGST 416/PSYCH 416, Modeling Perception and Cognition

COM S 401, Programming Languages and Software Engineering

PSYCH 332/BIONB 328, Biopsychology of Learning and Memory

PSYCH 396/BIONB 396, Introduction to Sensory Systems

PSYCH 419, Neural Networks Laboratory

PSYCH 425, Cognitive Neuroscience

PSYCH 440, The Brain and Sleep

A Cognitive Studies undergraduate laboratory and computer facility is available for all students in a Cognitive Studies concentration. This facility will help link resources from different laboratories across the Cornell campus as well as providing a central location for developing and conducting experimental research in cognitive studies.

Students who complete the concentration requirements will have their concentration in Cognitive Studies officially represented on their transcript. In addition, students who have made very substantial progress towards completing their concentration will be eligible for enrollment in the graduate courses in Cognitive Studies during their senior year.

Concentration Application Procedures

Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Studies Program coordinator, Linda LaVan, cogst@cornell.edu, 255-6431, who will provide application materials and set up a meeting with a relevant member of the Undergraduate Concentration Committee. This Committee will assist the student with selection of a concentration advisor with expertise in the student's main area of interest.

To formally initiate the concentration in Cognitive Studies, a student must gain approval for a selection of courses from a concentration advisor (one of the program faculty). The courses selected must form a coherent cluster that is sensitive to both the adviser and the student. To be admitted to the concentration, the student must submit this plan of study to the Cognitive Studies undergraduate faculty committee for final approval.

In addition to assisting in and approving the student's selection of courses, the concentration advisor serves as a general source of information about the field of cognitive studies, relevant resources around the university, and job and graduate school opportunities. Often, the adviser can help the student develop independent research experience.

Independent Research

The concentration encourages each student to be involved in independent research that bears on research issues in cognitive studies, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.

The Committee for Undergraduate Concentration in Cognitive Studies consists of: Bart Selman, computer science; 5-5643, 4144
Upson Hall, selman@cs.cornell.edu; Dragá Zec, linguistics; 5-0728, 217 Morrill Hall, DZ17@cornell.edu; Zoltán Szabó, philosophy; 5-6024, 218 Goldwin Smith, ZS15@cornell.edu; Michael Owens, psychology; 5-3935, 224 Uris Hall, MO9J@cornell.edu. The current Director of Undergraduate Studies is Dragá Zec.

Graduate Minor

For information, consult the program office (282 Uris Hall, 255-6365, cogst@cornell.edu) or the directors of graduate studies, Shimon Edelman and Ron Hoy, 255-6365 or 254-4318; se578@cornell.edu or rh3@cornell.edu.

Courses

COGST 101 Introduction to Cognitive Science (also COM S 101, LING 170, PHIL 191, and PSYCH 102) (III)

Fall. 3 or 4 credits. (4-credit option involves a writing section instead of taking exams). M. Spivey.

This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language; vision, learning and memory, action, and artificial intelligence.

COGST 111 Brain, Mind, and Behavior (also BIONB 111 and PSYCH 111) (I)

Spring. 3 credits. Letter grade only. Intended for freshman and sophomores in the humanities and social sciences; seniors by permission only. Not recommended for psychology majors; biology majors may not use the course for credit toward the major. R. Hoy and E. Adkins Regan. Understanding how the brain creates complex human behavior and mental life is a great scientific frontier of the next century. This course enables students with little scientific background from any college or major to appreciate the excitement. What are the interesting and important questions? How are researchers trying to answer them? What are they discovering? Why did the brain evolve this remarkable capacity?

COGST 201 Cognitive Science in Context Laboratory (also COM S 201 and PSYCH 201) (III)

A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and student-developed experiments. Use of digital computers as well as the Internet, e-mail, and web sites are integral components of the course.

The focus is on human-computer interactions that are intended to admit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings. Students are
expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities are available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data will be facilitated.

COGST 214 Issues in Cognitive Psychology (also PSYCH 214 and 614) (III)
Fall. 3 or 4 credits. The 4-credit option involves some participation in COGST/PSYCH 501. Sophomore standing required. Limited to 150 students. S. Edelman.

The course serves as a broad overview of problems arising in the study of cognition and of the information-processing, or computational, approaches to solving these problems, in natural and artificial cognitive systems. Theoretical and experimental challenges posed by the understanding of perception, attention and consciousness, memory, thinking, and language are discussed and analyzed. Participants acquire conceptual tools essential for following the current debates on the nature of mind and its relationship to the brain.

COGST 264 Language, Mind, and Brain (also LING 264) (III)

An introductory course that emphasizes the formal structure of natural language in the Minimalist framework. The following topics are covered: the formal representation of linguistic knowledge, principles, and parameters of Universal Grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. The course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics and its relation to the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.

COGST 270 Truth and Interpretation (also LING 270 and PHIL 270) (III or IV)

COGST 333 Problems in Semantics—Quantification in Natural Language (also LING 333 and PHIL 333) (III or IV)
Spring. 4 credits. Prerequisites: a previous course in formal semantics (e.g., LING 421) or logic (e.g., PHIL 231) or permission of instructor. Not offered 2001–2002. S. McConnell-Ginet and Z. G. Szabo.

This course looks at problems in the semantic analysis of natural languages, critically examining works and philosophy on particular topics of current interest. The focus is on quantification. Languages offer a variety of resources for expressing generalizations: some, every, no, many, and other quantifying expressions are employed in inside noun phrases; always, never, occasionally, and other adverbial quantifying expressions not associated with particular nominals; constructional resources of various kinds (e.g., English free relatives like whatever she cooks). How different are these resources and what might they imply about basic cognitive and linguistic capacities?

COGST 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH 342 and 642) (III)
Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: PSYCH 101 or permission of instructor. PSYCH 205 strongly recommended. D. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics covered include: "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

COGST 414 Comparative Cognition (also PSYCH 414 and 714) (III)
Spring. 3 credits. Prerequisites: PSYCH 205, 209, 214, or permission of instructor. M. Owen.

This course examines some of the conceptual and empirical work resulting from and fuelling the recent surge of interest in animal cognition. Specific topics may include whether nonhumans behave intentionally, whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" plays a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.

COGST 416 Modeling Perception and Cognition (also PSYCH 416 and 616) (III)
Spring. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. M. Spivey.

This course offers a survey of several computational approaches to understanding perception and cognition. We explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. The goal is to understand how complex sensory information gets represented in these models, as well as how it gets processed. This course covers computational accounts of language processing, language acquisition, vision, and visual development, among other topics. Students complete a final project that applies a computational model to some perceptual/cognitive phenomena.

COGST 424 Computational Linguistics (also COM S 424 and LING 424) (III)
Spring. 4 credits. Prerequisite: LING 203. Labs involved. Prerequisite: LING 203, or permission of instructor. M. Rooth.

Steady progress in formalisms, algorithms, linguistic knowledge, and computer technol-
High-level vision is a field of study concerned with functions such as visual object recognition and categorization, scene understanding, and reasoning about visual structure. It is an essentially cross-disciplinary endeavor, drawing on concepts and methods from neuroanatomy and neurophysiology, cognitive psychology, applied mathematics, computer science, and philosophy. The course concentrates on a critical examination of a collection of research publications, linked by a common thread, from the diverse perspectives offered by the different disciplines. Students write bi-weekly commentaries on the assigned papers, and a term paper integrating the material covered in class.

**COGST 470 Undergraduate Research in Cognitive Studies**
Fall or spring. 1-4 credits. S-U grades optional. Prerequisite: permission of major adviser; written permission of Cognitive Studies faculty member who will supervise the research and assign the grade. Hours TBA. Cognitive Studies faculty. Experience in planning, conducting, and reporting independent laboratory, field, and/or library research in an interdisciplinary area relevant to cognitive studies.

**COGST 471 Cognitive Studies Research Workshop**
Fall or spring. Credits variable. Prerequisite: student must be enrolled in an independent research course (either in Cognitive Studies, e.g., COGST 470, or in a related department), or in honors thesis research in one of the departments relevant to Cognitive Studies. Staff. (Interdisciplinary faculty from Cognitive Studies Program). This course provides a research workshop in which undergraduate students who are engaged in research in a particular area relevant to cognitive science can meet across disciplines to learn and practice the essentials of research, using interdisciplinary approaches. In this workshop, students critique and discuss the existing literature in a field of inquiry, individual students present their research designs, methods, and results from their independent research studies, debate the interpretation of their research results, and participate in the generation of new research hypotheses and designs, in a peer group of other undergraduate students involved in related research.

**COGST 474 Introduction to Natural Language Processing (also COM S 474 and LING 474)** (III)
Spring. 4 credits. M. Rooth. The course presents formalisms, algorithms, and methodology for manipulating natural languages computationally. It emphasizes parts of natural language (syntax and morphology, but not semantics) where algorithms and scientific understanding make it possible for us to create and implement approximately complete accounts of linguistic phenomena and also manipulate large samples of language use (a million or a billion words). Most of the methods are not only useful for engineering applications but also advance our scientific understanding of human languages.

**Computer Science**
- **COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, PHIL 191, and PSYCH 102)**
  Fall. 3 or 4 credits. M. Spivey.
- **COM S 201 Cognitive Science in Context Laboratory (also COGST 201 and PSYCH 201)**
  Spring. 4 credits. D. Field and staff.
- **COM S 211 Computers and Programming**
  Fall, spring, or summer. 3 credits.
- **COM S 312 Structure and Interpretation of Computer Programs**
  Fall or spring. 4 credits.
- **COM S 361 Introduction to Theory of Computing**
  Fall or spring. 4 credits.
- **COM S 392 Topics in High-Level Vision (also COGST 465 and PSYCH 450)**
  Fall. 4 credits. S. Edelman.
- **COM S 411 Programming Languages and Logic**
  Fall. 4 credits. Not offered every year.
- **COM S 424 Computational Linguistics (also COGST 424 and LING 424)**
  Spring. 4 credits. M. Rooth.
- **COM S 472 Foundations of Artificial Intelligence**
  Fall. 3 credits.
- **COM S 473 Practicum in Artificial Intelligence**
  Fall. 2 credits.
- **COM S 474 Introduction to Natural Language Processing (also COGST 474 and LING 474)**
  Spring. 4 credits. M. Rooth.
- **COM S 478 Machine Learning**
  Spring. 3 credits.

  Spring. 4 credits. Y. Shirai.
LING 415 Second Language Acquisition II (also ASIAN 417)  
Spring. 4 credits. Y. Shirai.

LING 421 Semantics I  
Spring. 4 credits.

LING 422 Semantics II  
Fall. 4 credits.

LING 424 Computational Linguistics (also COGST 424 and COM S 424)  
Spring. 4 credits. M. Rooth.

LING 425 Corpora and Applied Linguistics (also ASIAN 425)  
Fall. 4 credits. Not offered 2001-2002.

LING 436 Language Development (also COGST 436, HD 436, and PSYCH 436)  
Spring. 4 credits. B. Lust.

LING 450 Lab Course: Language Development (also COGST 450, HD 437, and PSYCH 437)  
Spring. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436, Language Development. B. Lust.

LING 474 Introduction to Natural Language Processing (also COGST 474 and COM S 474)  
Spring. 4 credits. M. Rooth.

Mathematics  
MATH 281 Deductive Logic (also PHIL 331)  
Fall. 4 credits. H. Hodes.

MATH 384 Foundations of Mathematics (also PHIL 344)  
Fall. 4 credits. H. Hodes.

MATH 481 Mathematical Logic (also PHIL 431)  
Spring. 4 credits.

MATH 482 Topics in Logic (also PHIL 432)  
Spring. 4 credits. H. Hodes.

MATH 483 Intensional Logic (also PHIL 436)  
Spring. 4 credits. Z. Szabo.

MATH 486 Applied Logic (also COM S 486)  
Spring. 4 credits.

Neurobiology and Behavior  
BIONB 111 Brain, Mind, and Behavior (also COGST 111 and PSYCH 111)  
Spring. 3 credits. R. Hoy and E. Adkins Regan.

BIONB 221 Neurobiology and Behavior I: Introduction to Behavior  
Fall. 3 or 4 credits.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology  
Spring. 3 or 4 credits.

BIONB 326 The Visual System  
Spring. 4 credits. H. Howland.

BIONB 328 Biopsychology of Learning and Memory (also PSYCH 332)  
Spring. 3 credits. T. DeVooogd.

BIONB 392 Drugs and the Brain  
Spring. 4 credits. R. Harris-Warrick.

BIONB 396 Introduction to Sensory Systems (also PSYCH 396)  
Spring. 3 or 4 credits. B. Halpern.

BIONB 421 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and 831)  
Fall. 3 or 4 credits. Not offered 2001-2002. B. Halpern.

BIONB 424 Neuroethology (also PSYCH 424)  
Spring. 4 credits.

BIONB 426 Animal Communication  

BIONB 482 Sensory Function (also PSYCH 492)  

BIONB 496 Bioacoustic Signals in Animals and Man  

Philosophy  
PHIL 191 Introduction to Cognitive Science (also COGST 101, COM S 101, LING 170, and PSYCH 102)

Graduate Courses and Seminars

The following courses and seminars are generally for graduate students only. However, some may be appropriate for advanced undergraduates. The director of the concentration must approve an undergraduate's use of any of these for satisfying the concentration requirements.

COGST 501 Cognition (also PSYCH 501)
Fall. 4 credits. Concurrent or prior registration in COGST 101 (also COM S 101, LING 170, PHIL 191, and PSYCH 102) Introduction to Cognitive Science, is required. COGST 414, Issues in Cognitive Psychology. S. Edelman.

This course introduces graduate students interested in cognition (especially those who plan to pursue the Cognitive Studies minor) to the central issues in computational cognitive psychology. It consists of a series of advanced-level discussions of selected examples from the material covered in COGST 101 (also COM S 101, LING 170, PHIL 191, and PSYCH 102) and COGST 214 (also PSYCH 214/614).

The material from those courses includes perception, attention and consciousness, memory, thinking, and language. The course focuses on the development of skills required for critical evaluation of research in cognitive sciences, backed by an in-depth understanding of the relevant concepts and theories.

COGST 530 Representation of Structure in Vision and Language (also LING 530 and PSYCH 530)
Spring. 4 credits. Graduate seminar. Enrollment limited to 13 graduate students. Prerequisites: a course each in cognitive psychology, linguistics, and computer science, or permission of instructor. S. Edelman.

The seminar concentrates on the nature of the representation of visual objects and scenes in the brain and compares it with the structural framework that serves as the main explanatory tool in current theories of language processing. Data and ideas are drawn from visual psychophysics, neurophysiology, psycholinguistics, computational vision and linguistics, and philosophy. Students present published research papers and preprints, which are then discussed and critiqued.

COGST 531 Topics in Cognitive Studies (also LING 531 and PSYCH 531)
Spring. 4 credits. Cognitive Studies Program staff.

This seminar series takes advantage of the wide range of expertise and research interests of the faculty members of the Cognitive Studies Program. Every time it is offered, the seminar concentrates on a cluster of issues that span disciplines from Neurobiology and Behavior, through Psychology and Linguistics, to Computer Science and Philosophy. Each meeting consists of a short background presentation, followed by a seminar-style discussion of a chosen issue, exemplified by a current research publication. Students submit weekly essays discussing the assigned publications, and a term paper integrating the various topics covered.

COGST 633 Language Acquisition Seminar (also LING 633)
Fall. 4 credits. Prerequisite: COGST/HD/LING/PSYCH 436 or equivalent, or permission of instructor. B. Lust.

[COGST 773-774 Proseminar in Cognitive Studies I and II (also COM S 773/774, LING 773/774, PHIL 773/774, and PSYCH 773/774)]

The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar provides a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that comprise the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty from the field introduce theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they introduce various labs in which active research is being conducted in their field at Cornell, and current issues of interdisciplinary interest.

The proseminar includes suggestions from faculty in each field for further advanced interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It concludes (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade is assigned in the fall semester, and an S-U grade only will be assigned in the spring semester.

COM S 664 Machine Vision
Spring. 4 credits.

COM S 671 Introduction to Automated Reasoning
Fall. 4 credits.

COM S 672 Advanced Artificial Intelligence
Spring. 4 credits. Prerequisite: COM S 472.

COM S 674 Natural Language Processing
Spring. 4 credits. Prerequisite: COM S 472.

[COM S 676 Reasoning about Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered 2001–2002. J. Y. Halpern.]

[COM S 677 Reasoning about Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered 2001–2002. J. Y. Halpern.]

COM S 772 Seminar in Artificial Intelligence
Fall and spring. 2 credits. B. Selman.

COM S 775 Seminar in Natural Language Understanding
Fall and spring. 2 credits.

EDUC 611 Educational Psychology
Fall. 3 credits. Undergraduates admitted with permission from instructor. R. Ripple.

EDUC 614 Gender, Context, and Epistemological Development (also WOMNS 624)
Fall. 3 credits. D. Schrader.

EDUC 714 Moral Development and Education
Spring. 3 credits. D. Schrader.

HD 600/700 Graduate Seminars
LING 530 Representation of Structure in Vision and Language (also COGST 530 and PSYCH 530)  
Spring. 4 credits. S. Edelman.

LING 531 Topics in Cognitive Studies (also COST 531 and PSYCH 531)  
Spring. 4 credits. Cognitive Studies Program staff.

LING 609 Second Language Acquisition and the Asian Languages (also ASIAN 610)  
Fall. 4 credits. Prerequisite: LING 414–415. V. Shirai.

LING 633 Language Acquisition Seminar (also COGST 633)  
Fall. 4 credits. Prerequisite: COGST/HD/LING/PSYCH 436 or equivalent. B. Lust.

LING 700 Graduate Seminars

MATH 681 Logic  
Spring. 4 credits.

MATH 781-782 Seminar in Logic  
Fall and spring. 4 credits each.

MATH 788 Topics in Applied Logic  
Fall. 4 credits.

NBA 663 Managerial Decision Making  
Fall. 3 credits. J. Russo.

PHIL 633 Philosophy of Language—Propositions and Events  
Spring. 4 credits.

PHIL 662 Philosophy of Mind  
Fall. 4 credits. Z. Szabó.

PHIL 700 Graduate Seminars

PSYCH 501 Cognition (also COGST 501)  

PSYCH 521 Psychobiology (Developmental Seminar)  
Fall and spring. 4 credits each. B. Finlay.

PSYCH 530 Representation of Structure in Vision and Language (also COGST 530 and LING 530)  
Spring. 4 credits. S. Edelman.

PSYCH 531 Topics in Cognitive Studies (also COGST and LING 531)  
Spring. 4 credits. Cognitive Studies Program staff.

PSYCH 550 Special Topics in Cognitive Science  
Spring. 4 credits. M. Spivey.

[PSYCH 601 Computational Models of Language  
Spring. 4 credits. Prerequisite: consent of instructor. Not offered 2001–2002. M. Spivey.]

PSYCH 614 Issues in Cognitive Psychology (also COGST 214 and PSYCH 214)  

PSYCH 616 Modeling Perception and Cognition (also COGST 416 and PSYCH 416)  
Spring. 4 credits. M. Spivey.

PSYCH 618 Psychology of Music (also PSYCH 418)  
Spring. 4 credits. C. Krumhansl.

[PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421 and PSYCH 431)  
Fall. 3 or 4 credits. Not offered 2001–2002. B. Halpern.]

PSYCH 691 Research Methods in Psychology (also PSYCH 491)  
Spring. 4 credits. D. Dunning.

PSYCH 714 Comparative Cognition (also COGST 414 and PSYCH 414)  
Spring. 3 credits. M. Owren.

PSYCH 716 Auditory Perception (also PSYCH 316)  
Fall. 4 credits. C. Krumhansl.

College Scholar Program

L. Abel, director, 172 Goldwin Smith Hall, 255-3386.

K. Gabard, director, 55 Goldwin Smith Hall, 255-5792.

The College Scholar Program is described in the introductory section of Arts and Sciences.

COLLS 397 Independent Study  
Fall or spring. 1–4 credits. Prerequisite: permission of program office.

COLLS 499 Honors Research  
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

East Asia Program

140 Uris Hall

The East Asian Program draws together faculty from departments and fields throughout the university who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through departments in the humanities and social sciences, as well as in the fields of business, city and regional planning, biology of the human species. Students in various departments with a program for the human biology curriculum at the University of Rochester.

The East Asian Program offers courses in languages, literatures, cultures of East Asia. Courses are offered through departments in the humanities and social sciences, as well as in the fields of business, city and regional planning, international and comparative labor relations, and rural sociology. The Department of Asian Studies offers language courses in Mandarin, Cantonese, Korean, and Japanese, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin.

Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may work toward an M.A. in East Asian studies, a dual M.B.A./M.A. degree or an M.A./Ph.D. Degree in a discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology.

Graduate students concentrating on East Asia may apply for a variety of fellowships and travel grants offered by the East Asia Program. The formal program of study is enriched by numerous events and extracurricular activities, including films, workshops, an exhibit, lectures, symposia, and cultural and artistic performances on East Asia. With a half million holdings in Chinese, Japanese, Korean, and western languages, the Wason Collection in Kroch Library is a major national resource for research on East Asia. A 5,000 piece collection representing the full range of Chinese, Japanese, and Korean art may be seen at the George and Mary Rockwell Galleries in the Herbert F. Johnson Museum of Art.

First-Year Writing Seminars

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, see the John S. Knight Institute for Writing in the Disciplines section, and consult the John S. Knight Institute brochure, available for your department registrars in August for the fall term and on the web in late October for the spring term.

Human Biology Program

J. Haas (nutritional sciences), director, 127 Savage Hall, 255-8001; B. Finlay (psychology), J. Fortune (physiology/women's studies), E. Frongillo (nutritional sciences), R. Johnston (psychology), K. A. R. Kennedy (ecology and systematics/anthropology), D. Levitsky (nutritional sciences), P. W. Nathanielz (physiology), D. L. Pelletier (nutritional sciences), W. Provine (ecology and systematics/history), R. Robertsaw (physiology), S. Robertson (human development), R. Savin-Williams (human development), M. Small (anthropology).

Human biology integrates the methods and theories of many disciplines, such as ecological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology into a comprehensive study of biological diversity in Homo sapiens. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The curriculum of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology and evolutionary biology, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students with a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity. Human biology is not a major but a curriculum of study that provides majors in various departments with a program for selecting elective courses that deal with the biology of the human species. Students in their junior year may develop a program of study in human biology while majoring in a number of different departmental fields.
Basic Requirements
The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and physical diversity of the human species. Adjustments may be made in these requirements, depending on the student’s academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (BIO S 101–103 plus 102–104 or 105–106 or BIO S 107–108 offered during the eight-week Cornell Summer Session); one year of general chemistry (CHEM 207–208 or 215–216); one year of college mathematics (MATH 111–112 or 105–106 or 111–105); one course in genetics (BIO S 281 or 282); one course in biochemistry (BIO S 330, 331, 332, or 335 or NS 320). It is recommended that students planning graduate study in biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty adviser in human biology for help in selecting appropriate courses.

Elective courses should be taken that will enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major. Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty adviser representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisers in his or her department who is listed as faculty in human biology to be their principal adviser, or he or she may have an adviser in the department of the major and seek the advice of a human biology faculty adviser in matters pertaining to satisfaction of the requirements. In certain cases a faculty adviser may represent both the major and the curriculum of study in human biology.

Courses

Human Anatomy and Physiology
BIO AP 214 Biological Basis of Sex Differences (also B&SOC 214 and WOMNS 214) Fall. 3 credits.

BIO AP 311 Introductory Animal Physiology, Lectures (also VET BMS 346) Fall. 4 credits.

BIO AP 319 Animal Physiology Experimentation Fall. 4 credits.

BIO AP 458 Mammalian Physiology Spring. 3 credits.

BIO EE 274 The Vertebrates: Structure, Function, and Evolution Spring. 4 credits.

BIO EE 474 Laboratory and Field Methods in Human Biology (also ANTHR 474) Spring. 5 credits.

NS 115 Nutrition and Health: Concepts and Controversies Fall. 3 credits.

NS 222 Maternal and Child Nutrition Spring. 3 credits.

NS 315 Obesity and the Regulation of Body Weight Fall. 3 credits.

NS 331 Physiological and Biochemical Bases of Human Nutrition Spring. 4 credits.

NS 341 Human Anatomy and Physiology Lab Spring. 4 credits.

NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361) Fall. 3 credits.

NS 441 Nutrition and Disease Fall. 4 credits.

PSYCH 322 Hormones and Behavior (also BIONB 322) Spring. 3 or 4 credits.

PSYCH 425 Cognitive Neuroscience Fall. 3 or 4 credits.

VETMI 431 Medical Parasitology Fall. 2 credits.

Human Behavior
ANTHR 390 Primate Behavior and Ecology Spring. 4 credits.

ANTHR 490 Primates and Evolution Spring. 4 credits.

B&SOC 301 Biology and Society I: The Social Construction of Life (also S&T&S 401) Fall. 4 credits.

BIO NB 421 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and 631) Fall. 3 or 4 credits.

BIO NB 427 Animal Social Behavior Fall. 4 credits.

HD 344 Infant Behavior and Development Fall. 3 credits.

PAM 380 Human Sexuality Spring. 3 credits.

NS 245 Social Science Perspectives of Food and Nutrition Fall. 3 credits.

NS 347 Human Growth and Development: Biological and Behavioral Interactions (also HD 347 and B&SOC 347) Spring. 3 credits.

NS 361 Biology of Normal and Abnormal Behavior Fall. 3 credits.

PSYCH 326 Evolution of Human Behavior Fall. 4 credits.

PSYCH 425 Cognitive Neuroscience Fall. 3 or 4 credits.

R SOC 408 Human Fertility in Developing Nations Spring. 3 credits.

R SOC 438 Social Demography Fall. 3 credits.

Human Evolution and Ecology
ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind Fall. 3 credits.

ANTHR 203 Early People: The Archaeological and Fossil Record (also ARKEO 203) Spring. 3 credits.

ANTHR 390 Primate Behavior and Ecology Spring. 4 credits.

ANTHR 391 The Evolution of the Human Life Cycle Spring. 3 credits.

ANTHR 490 Primates and Evolution Spring. 4 credits.

BIO EE 261 Ecology and the Environment Fall or summer. 4 credits.

BIO EE 272 Functional Ecology of Vertebrates Spring. 4 credits.

BIO EE 275 Human Biology and Evolution (also ANTHR 275 and NS 275) Fall. 3 credits.

BIO EE 278 Evolutionary Biology Fall or spring. 3 or 4 credits.

BIO EE 371 Human Paleontology (also ANTHR 371) Fall. 4 credits.

BIO EE 461 Population and Evolutionary Ecology Spring. 4 credits.

BIO EE 464 Macroevolution Spring. 4 credits.

BIO EE 471 Mammalogy Fall. 4 credits.
The International Relations Concentration is not a major or a department, but rather a structured yet flexible program for undergraduates to take advantage of the vast resources available at the university for studying the politics, economics, history, languages, and cultures of the countries and regions of the world.

Graduates of the program have gone on to pursue further education in fields such as political science and anthropology to successful careers in international law, economics, agriculture, trade, finance, and government service, among others. They have gone on to work in international and nongovernmental organizations, in cross-cultural affairs, in journalism, and in education.

The International Relations Concentration is not a major or a department, but rather a program offering a selection of courses reaching across colleges and departments. Students pursue the International Relations Concentration in addition to their regular degree. International Relations Concentrators have majored in fields ranging from anthropology, city and regional planning, communications, government, and history to natural resources, industrial and labor relations, and computer science. International coursework and language study add a global and cross-cultural dimension to those majors. Some students even design an independent major in some aspect of international relations or comparative social or cultural studies. Spending a semester or year of study abroad can contribute to meeting the course requirements of the IR Concentration, including the language requirement.

Course Requirements

These requirements are designed to expose students to a broad range of perspectives in international relations while allowing them to tailor their course selections to specific interests. Courses throughout the university are grouped into four subject areas including:

1) International Economics and Development;
2) World Politics and Foreign Policy;
3) Transnational Processes and Policies;
4) Cultural Studies.

Within these four subject areas, courses are also identified as "core" or "elective." Spending a semester or year of study abroad can contribute to meeting the course requirements of the IR Concentration, including the language requirement.

Objective

The International Relations Concentration is an interdisciplinary program for undergradu-

ate students enrolled in any of the seven Cornell undergraduate colleges. The International Relations Concentration provides a structured yet flexible program for undergraduates to take advantage of the vast resources available at the university for studying the politics, economics, history, languages, and cultures of the countries and regions of the world.

SPANL 346 Hispanic Caribbean Culture and Literature
THETR 240 Introduction to World Theatre I
THETR 274 Introduction to Film Analysis

Language Requirement
IR Concentrators are expected to complete additional language study beyond the College of Arts and Sciences degree requirement. This study can be accomplished in one of two ways: 1) two years of one foreign language (proficiency plus one course) or 2) two languages at proficiency.

Study Abroad
IR Concentrators are strongly encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with courses taken abroad. Students are encouraged to contact the Administrative Coordinator prior to departure.

Completion
Transcripts will reflect successful completion of the requirements for the concentration. In addition, students will receive a special certificate and a letter of confirmation signed by the director of the international relations concentration.

Enrollment
To obtain course lists, to enroll and for all further information, please contact: *Administrative Coordinator: Hyek Yonk Kwon, the Mario Einaudi Center for International Studies, 156 Uris Hall, hyk1@cornell.edu, Tel: 254-5004

Program of Jewish Studies

D. J. Owen, director (Ancient Near Eastern and Biblical History and Archaeology), L. Adelson (German-Jewish Literature and Culture), G. Altshuler (American-Jewish History and Culture), D. Bastrick (Holocaust Film Studies), R. Brann (Judeo-Arabic Studies), V. Caron (Modern French and European-Jewish History), M. Diesing (Yiddish Language and Linguistics), N. Furman (French Holocaust Literature), R. Hoffmann (New Testament and Early Christianity), R. Hoffmann (Holocaust Studies), P. Hyams (Medieval Jewish Studies), M. Migiel (Italian Literature), R. Polenberg (American-Jewish History), D. Starr (Modern Hebrew and Arabic Literature), M. Steinberg (German-Jewish History and Culture), Y. Szeledek (Judaica Bibliography), S. Toorawa (Minorities in Islamic Hands), J. Zorn (Biblical Archaeology)

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976. The program has grown out of the conviction that Jewish civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges. The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies, with particular emphasis on the interrelationship between Judaism, Christianity, and Islam.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; medieval and modern Hebrew literature; ancient, medieval, and modern European and Middle Eastern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

Courses Offered

JWST 105–106 Elementary Modern Hebrew I and II (also NES 101–102)
Fall 105; 106 spring; 6 credits. S. Shoer.
For description, see NES 101–102.

JWST 163 Things the Prophets Never Told You: Archaeology and the Religion of Ancient Israel (also NES 163)
Fall 3 credits. J. Zorn.
For description, see NES 163.

JWST 201–202 Intermediate Modern Hebrew I and II (also NES 201–202)
Fall 201, Spring 202; 4 credits. D. Starr.
For description, see NES 201–202.

JWST 235 Jews and Arabs in Conflict: The Modern Period (also NES 235)
Spring 3 credits. D. Starr.
For description, see NES 235.

JWST 239 Cultural History of the Jews of Spain (also NES 239, COM L 239, RELST 239, SPAN L 239)
Spring 3 credits. M. Segol.
For description, see NES 239.

JWST 246 Jewish Mysticism (also RELST 246, NES 246)
Fall 3 credits. M. Segol.
For description, see NES 246.

JWST 252 Modern European Jewish History, 1789–1948 (also HIST 291)
Fall 4 credits. V. Caron.
For description, see HIST 291.

JWST 254 Anti-Semitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (also HIST 235)
Spring 4 credits. V. Caron.
For description, see HIST 235.

JWST 256 Introduction to the Q’uran (also RELST 256, NES 256)
Spring 3 credits. S. Toorawa.
For description, see NES 256.

JWST 257 Ethics of Imagining Holocaust (also GERST 221, ENGL 221) Fall 4 credits. D. Schwartz.
For description, see ENGL 221.

JWST 263 Introduction to Biblical History and Archeology (also RELST 264, ARKEO 263, and NES 263) Spring 3 credits. J. Zorn.
For description, see NES 263.

JWST 268 Ancient Egyptian Civilization (also NES 268, ARKEO 268) Spring 3 credits. G. Kadish.
For description, see NES 268.

JWST 294 Imagining the Modern Middle East (also NES 294, HIST 288, GOVT 358) Fall 4 credits. S. Alfatou.
For description, see NES 294.

JWST 301–302 Advanced Modern Hebrew I and II (also NES 301–302) 301 fall; 302, Spring 4 credits. N. Scharf.
For description, see NES 301–302.

JWST 339 Islamic Spain: Culture and Society (also RELST 334, SPANL 339, COM L 334, NES 339) Fall 4 credits. R. Brann.
For description, see NES 339.

JWST 360 Origins of Mesopotamian Civilization (also NES 360, ARKEO 360) Fall 4 credits. D. I. Owen.
For description, see NES 360.

JWST 361 Sumerian Language and Culture (also NES 361, ARKEO 361) Spring 4 credits. D. I. Owen.
For description, see NES 361.

JWST 394 Gender, Sexuality, and the Body in Early Christianity (also NES 394, WOMNS 394, RELST 394) Spring 3 credits. K. Haines-Eitzen.
For description, see NES 394.

JWST 400 Seminar in Advanced Hebrew (also NES 400) Fall 4 credits. Enrollment limited to 15 students. N. Scharf.
For description, see NES 400.

JWST 401 Topics in Modern Hebrew Literature (also JWST 401) Spring 4 credits. D. Starr.
For description, see NES 401.

JWST 406 Jewish Culture and Modernity (also S HUM 406) Fall 4 credits. M. Steinberg.
For description, see S HUM 406.

JWST 409 Season of Migration (also SOC H 409, RELST 409) Fall 4 credits. S. Toorawa.
For description, see SOC H 409.
The John S. Knight Institute helps to coordinate the teaching of writing for undergraduates in six of the university's schools and colleges (the School of Industrial and Labor Relations and the colleges of Agriculture and Life Sciences; Architecture, Art, and Planning; Arts and Sciences; Engineering; and Human Ecology). The program administers writing seminars for first-year and upperclass students, tutorial writing classes, and seminars in the teaching of writing. More than thirty academic departments and programs participate in the program.

First-Year Writing Seminars

For first-year students the Institute offers the first-year writing seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prose that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All seminars pursue this common aim through small classes, with a maximum of 17 students, and adherence to a program-wide set of guidelines:

- Seminars require at least six—and at most 12—formal essays on new topics. (While these assignments should total about 30 pages, some of the 30-page total may include major drafts which receive commentary from the instructor and are later significantly revised.) Assignments form a logical sequence.

- At least three of the 6–12 required essays are developed through several stages of revised drafts under the instructor’s guidance. Guidance may include, in addition to written comments, conference drafts, individual conferences, in-class group work, peer commentary, reading responses, journals, and so on.

- Ample classroom time is spent on work directly related to writing.

- Reading assignments in the course subject are kept under 75 pages per week to permit regular, concentrated work on writing.

- All students meet in at least two individual conferences with the instructor.

Offerings change from semester to semester. Each term’s first-year writing seminars are described in a brochure available from college registrars in the fall and on the web in the spring.

To ensure that students will enjoy the benefits of small writing classes, first-year writing seminars are limited to no more than 17 students. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out ballots available from their college registrars in the fall and on the web in the spring. Over 90 percent receive one of their top three choices. Students may change their writing seminars each semester at the First-Year Writing Seminar Exchange. Changes can also be made at special First-Year Writing Seminar add/drop
The colleges and the school served by the Institute accept first-year writing seminars in fulfillment of their individual graduation requirements in categories referred to variously as "first-year writing," "oral and written exercises," or even "writing." The Knight Institute does not decide whether students may graduate: it makes courses available. Individual colleges and schools administer their own graduation requirements.

Currently, most undergraduate students are required to take two first-year writing seminars. Archivists, however, need only one. Hotel students fulfill their requirement through HADM 165, which should be taken with HADM 265 during the first two semesters at Cornell. Agriculture and Life Sciences students can take first-year writing seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score "4" or "5" on the Princeton Advanced Placement Examination in English receive three credits. Such credits are awarded automatically: no application to the John S. Knight Institute or the Department of English is necessary. These credits may be applied to first-year writing or other distribution requirements depends on the student's college and score. All students who score "5," except Architecture majors, may apply their three credits towards the writing requirements of their college. Of students who score "4," only Agriculture and Life Sciences students and Industrial and Labor Relations students may apply their three credits toward the writing requirements of their college.

Students should consult their college registrars to be certain that they understand their writing requirements.

Students who have already taken a first-year writing seminar, or who score "4" or "5" on the Princeton AP exam, or "700" or better on the English Composition or CEEB tests, may enroll, space permitting, in the following upper-level first-year writing seminars: ENGL 270, 271, or 272.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to first-year writing seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course. (It is not sufficient to write, for example, one 30-page term paper.) Students in the College of Engineering, the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a first-year writing seminar to satisfy part of their writing requirement. The John S. Knight Institute must approve all such petitions in advance.

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, consult the John S. Knight Institute brochure, available from college registrars in August for the fall term and on the web in late October for the spring term.

English 288-289: Expository Writing

English 288-289, "Expository Writing," helps students write with more confidence and skill in all disciplines. Open to Cornell sophomores, juniors, and seniors, ENGL 288-289 courses explore themes shaped by a genre or use of expository writing, by the common concerns of the discipline, or by an interdisciplinary topic intimately related to the written medium. Although English department instructors make up roughly half the staff, the Knight Institute's involvement enables the course to extend and amplify its offerings in separately defined, 16-member sections that appeal to the varied interests and needs of students in many areas of study. Students may choose among a variety of sections focusing on such themes as "Miming the Body," "The Essay: Personal to Public," "Issues, Audiences, and Ourselves," "Reading the News, Understanding the Media," and "Myths of the City." All staff are selected because their special interests and their training and experience in First-Year Writing Seminars promise original course design and superior performance.

Sophomore Writing Seminars

In the spring of 2002 the Knight Institute will launch the first set of courses in its Sophomore Seminars initiative, a distinctive new tier of electives sponsored by the Institute that will involve a wide range of disciplines across the Arts College and the University. Building on the introductory exposure to discipline-specific approaches to writing gained by students in their two required First-Year Writing Seminars, Sophomore Seminars will offer students the opportunity to benefit from early mentoring experiences in small, faculty-taught classes that will help them prepare for the more advanced, increasingly specialized work in which they will be engaged in their chosen fields as juniors and seniors. With a limited enrollment of 15 students per class, each Sophomore Seminar is intended to serve as a gateway course to a particular major within an expressly interdisciplinary context. The first two Sophomore Seminars will be offered in spring 2002. Additional seminars will be offered each year, with a total of 30 seminars annually by 2006.

Writing in the Majors

Spanning the humanities, social sciences, and sciences, the Knight Institute's upper-level, Writing in the Majors courses do not satisfy formal writing requirements, and faculty participation is entirely voluntary. While all Writing in the Majors courses include extensive writing, usually with guided revision, they also emphasize other forms of active, interactive learning essential to scholarship and careers in the disciplines. Writing in the Majors initiatives have included individual and collaborative research projects, collaborative writing, oral presentations, group oral exams, field studies, authentic student-designed laboratory experiments, debates, analytical and critical reading exercises, topical topics, step-by-step models, student-led discussions, poster sessions, and many kinds of informal writing, including online exchanges. Varying radically in design and size, from enrollments of fewer than 10 students to more than 300, Writing in the Majors courses over the past twelve years have involved collaboration with 100 faculty members and more than 140 graduate

Teaching Writing

Each summer and fall, the Institute offers instruction in the teaching of writing to new staff members in the first-year writing seminars and to other interested instructors. Teaching Writing, offered in the summer or fall, is primarily a course for graduate students. The program also sponsors a summer apprentice-ship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

WRIT 700 Teaching Writing

Summer and fall. 1 credit. S-U grade only. Teaching Writing introduces new instructors of Cornell's First-Year Writing Seminars to the challenges of teaching writing in courses that both introduce students to particular fields of study and develop the sophisticated writing skills students will need throughout their undergraduate careers and beyond. An overview of methodologies involved in the teaching of writing within a disciplinary context is provided by readings representing a range of pedagogical theories and practices, seminar discussions, and a variety of models of faculty, visiting scholars in the field, and experienced TAs. Participants in the course prepare written assignments designed to prepare them for the actual work of their First-Year Writing Seminars. In addition, written critiques and explanatory rationales of those assignments provide an opportunity for reflection on the methods chosen and on the principles underlying them.

Writing Workshop

The John S. Knight Institute offers "An Introduction to Writing in the University" for first-year students (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

WRIT 137 and 138 are graded S-U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate, including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL), should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The Workshop also offers a Walk-In Service (see below) to help students work on writing assignments. The director is Joe Martin, senior lecturer in the Writing Workshop. The Workshop offices are in 174 Rockefeller Hall, 255-6349.

The Walk-In Service

Through the Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Walk-In Service has tutors available during the academic year in 174 Rockefeller and north- and west-campus seminar discussions, and presentations of Gilliland. For information contact the Writing Workshop, 174 Rockefeller Hall, 255-6349.
WRIT 137-138, 134 An Introduction to Writing in the University
137, fall, 138, spring, 134, summer. 3 credits each term. Each section limited to 12 students in the fall and spring, 6 students in the summer. S-U grades only. Prerequisite: permission of instructor. This writing seminar is designed for students who need more focused attention to master the expectations of academic writing. The course emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

WRIT 139-239 Special Topics in Writing
Fall, spring. 139, undergraduate students only; 239, graduate students only. 3 credits. Prerequisite: permission of instructor. These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction is in weekly tutorials. Interested students should come to 174 Rockefeller for more information.

Latin American Studies
190 Uris Hall

The Latin American Studies Program encourages and coordinates faculty and student interests in Latin America. A variety of special lectures, films, and seminars supplement the regular course offerings. Graduate students may pursue a minor in Latin American Studies, while majoring in the field of their choice.

Undergraduate Concentration
Undergraduate students may fulfill a Latin American Studies Concentration by completing a minimum of 15 credits in Latin American Studies courses combined with language proficiency in Quechua, Spanish, or Portuguese. Latin American courses are offered in the College of Agriculture and Life Sciences, the College of Architecture, Art, and Planning, the College of Arts and Sciences, the College of Human Ecology, the School of Hotel Administration; and the School of Industrial and Labor Relations.

For further information and a current course listing, students should contact the program office at 255-5345, or visit 190 Uris Hall.

Latin American Studies Core Courses
It is strongly recommended that undergraduate concentrators take the interdisciplinary core course, SPAN 320/LASP 301 Perspectives on Latin America.

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

**Undergraduate Concentration**

The Latino Studies Program offers an interdisciplinary academic program that focuses on the contributions, concerns, and welfare of those persons of Latino origin who reside in the United States. It includes support for historical, linguistic, literary, social, economic, and political studies of this diverse group of Americans. To this end the program objectives are (1) to expand the available course curriculum by providing both undergraduate and graduate courses pertaining to Latino subject matters; (2) to enlarge the size of the Latino faculty at Cornell through permanent appointments visiting scholars, and post-doctoral fellowships; and (3) to enhance the academic environment on campus through support of such activities as lectures, conferences, seminars, exhibits, and research activities.

**Undergraduate Concentration**

The Latino Studies Program offers an undergraduate concentration in Latino Studies which consists of an interdisciplinary course of study primarily in history, sociology, anthropology, literature and language. To complete the concentration, students must take at least five courses (minimum total of 15 credits) in Latino Studies, including “Latinos in the United States” (LSP 201/SOC 265) offered each spring semester. Students are required to include at least two courses at the 300 or 400 levels. Students who are interested in the concentration must meet with the LSP adviser, senior lecturer Loretta Carrillo, and file an application with the Latino Studies Program office by the beginning of their junior year. A maximum of one independent study, which requires the approval of the LSP adviser, will be accepted to fulfill the requirements of the concentration. The FWS does not count towards fulfilling concentration requirements.

**Graduate Minor**

Students wishing to complete a graduate minor in Latino Studies need to formally register with the Latino Studies Program office, take an upper level seminar (400/600) tentatively entitled “Introduction to Latino Studies: History and Methodologies,” and work intensively with a faculty member outside of their major field. Over the course of their study they will be expected to take two other Latino Studies graduate or advanced undergraduate courses outside of their major field. In lieu of available courses, the student and his or her minor field adviser may design a special project that culminates in a paper given at a conference or presented for publication. Each special project requires the approval of the director of graduate studies for the minor field. In addition, graduate students will participate in the annual Latino Studies Colloquium. Upon completion of the minor, students receive a Certificate from the program. Students wishing to pursue the Graduate Minor Field in Latino Studies must file an application at the Latino Studies Program, 434 Rockefeller Hall.

**Library**

The Latino Studies Program Resource Center in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The Resource Center maintains print and media material pertinent to U.S. Latino issues and also provides a meeting space for more than 25 Latino student organizations.

**Courses**

**LSP 100 Introduction to World Music: Africa and the Americas (also MUSIC 103)**

Exploration of folk, popular, and traditional genres of the Western Hemisphere, particularly the African diaspora. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

**[LSP 110 Introduction to American Studies: New Approaches to Understanding American Diversity: The Twentieth Century (also AM ST 110 And HIST 111)]**

This course examines American national life in the twentieth century and asks questions about the changing meaning of national identity. What does it mean to be an American in the twentieth century? What does it mean to assimilate? Can we assimilate structurally and yet maintain a distinct cultural identity? In what ways do racial and ethnic perceptions structure political, economic, and cultural life? This is a team-taught interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.

**LSP 201 Latinos in the United States (also SOC 265 and RSOC 265)**

Exploration and analysis of the Hispanic experience in the United States. An examina-
tion of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

LSP 202 Spanish for English/ Spanish Bilinguals (also SPANR 200)
Fall and spring. 3 credits. T R 11:40–12:55.
N. Maldonado-Mendez
A course designed to expand bilingual student's knowledge of Spanish providing them with ample opportunities to develop and improve each of the basic language skills.

LSP 203 Comparative Migration to the Americas (also HIST 202 and AM ST 204)
M. C. Garcia.
This seminar examines migration both within and to the Americas in the nineteenth and twentieth centuries. Topics discussed include the reasons for population movements; immigration and emigration; social, economic, and political accommodation; nativist and restionist responses; and women and migration, remittances, and transnationalism. Among the immigrant-receiving nations studied are Argentina, Brazil, Canada, Cuba, Mexico, and the United States.

LSP 219 Mexican Immigration to the United States (also HIST 219, AM ST 219, LSP 215)
Fall. 4 credits. T-R 1:25–2:40. J. Cárdenas.
This seminar explores the historical and contemporary conditions and expressions of Mexican immigrants in the twentieth century. We discuss issues such as: the history of the Southwest, historical ideologies and theories of immigration and national identity; socio-economic conditions; cultural displays of identity; the Mexican migration and activism; adaptation and resistance of Mexican immigrants and their children to "mainstream" culture; economic and social policies and their effects upon the Mexican immigrant communities; and trans-national identities and globalization.

LSP 220 Sociology of Health and Ethnic Diversity (also AM ST 220)
Fall. 3 credits. T-R 10:10–11:25.
P. Parra.
Discusses the health status of minorities in the United States. Specifically, we explore intragroup diversity such as migration, economic status, and the influence of culture and the environment on health status and access to health care. Although special attention is given to Latino populations, discussion encompasses other minorities who face similar problems.

LSP 221 Anthropological Representation: Ethnographies on Latino Culture (also AM ST 221, ANTHRO 221)
V. Santiago-Infarary
Representation is basic to anthropology. In translating cultures, anthropologists produce authoritative representations of and about other people's lives. In this course, we examine with a critical eye, the production of representations about U.S. Latino cultures, as they are embodied in anthropological texts. Issues explored include the relation between the ethnographer and the people he or she is studying, the contexts in which ethnographic texts are produced, and the way they may position different cultural groups within the larger national context.

[LSP 240 Survey in U.S. Latino Literature (also ENGL 240)]
M. P. Brady.

LSP 246 Contemporary Narratives by Latina Writers (also SPANL 246, WOMNS 246)
Fall. 3 credits. T-TH 1:25–2:40. L. Carrillo.
This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups. Among the topics addressed are: Chicana, Chilena, Cuban, Dominican, and Puerto Rican. We investigate the parallel development of a Latina perspective on personal, social and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We investigate these works as artistic attempts to deal with such issues as culture, language and bilingualism, family, gender, sexuality, and domesticity. We account for regional distinctions and contributions. Readings include works by Julia Alvarez, Gloria Anzaldúa, Elena Castedo, Ana Castillo, Denise Chávez, Sandra Cisneros, Judith Ortiz Ocof, Cristina Garcia, Nora Glickman, Nicholasa Mohr, Cherré Moraga, Archy Obejas, Esmeralda Santiago, Ana Lydia Vega, and Helena María Viramontes.

[LSP 260 Introduction to U.S. Latino History, Part I (also HIST 260, AM ST 259)]
M. C. Garcia.

LSP 261 Introduction to U.S. Latino History, Part II (also HIST/AM ST 261)
Spring. 4 credits. T R 1:25–2:40.
M. C. Garcia.
This course, part II of a two-semester sequence, introduces students to the history of Latinos in the United States. In LSP/HIST/AM ST 261 we focus on Puerto Ricans, Cubans, and the Dominicans in the United States. (LSP/HIST 260; AM ST 259 focuses on Mexican Americans/Chicanos and Central Americans). Among the topics addressed are: historical immigration patterns and reasons for migration; the social and political events that shaped the evolution of these communities; the role of cultural identity, race, class, and gender in shaping experience; and the intercession of U.S. foreign policy and immigration policy.

[LSP 300 Latina Activism Feminist Theory]

[LSP 306 Latino Politics in the United States (also GOVT 306)]

[LSP 319 Minority Politics in the United States (also GOVT 319)]
Spring. 4 credits. T R 1:25–2:40.
M. Jones-Correa.
In 1965 the landscape of American politics changed dramatically with the passage of the Voting Rights Act. That same year, Congress passed the Immigration Reform Act, which though little heralded at the time, arguably had equally profound effects. This course provides a general survey of minority politics in the United States, focusing on the effects of these two key pieces of legislation. The course highlights the relationships between immigrants and minorities, electoral politics and protest politics, and between cooperation and competition within and among minority groups. The purpose of the course is not only to pinpoint the similarities and differences in the agendas and strategies adopted by minority groups, but to indicate the interaction between "minority" politics and American politics as a whole.

[LSP 366 Spanish in the United States (also LING 366 and SPANR 366)]
Fall. 4 credits. Prerequisite: some knowledge of Spanish. T-R 10:10–11:25.
M. Suner.
This course provides an examination of major Spanish dialects in the United States from a linguistic perspective. Contrast is made to the standard language. Topics include borrowing, interference, and code switching. Special emphasis is on syntactic, morphological, and phonological characteristics.

[LSP 377 The United States (also ANTHR/AM ST 377)]
Fall. 4 credits. T R 11:40–12:55.
V. Santiago-Infarary.
The anthropological inquiry into one's culture is never a neutral exercise. This course explores issues in the construction of the United States as a "pluralistic" society. We look at the ideological context for the production of a cultural profile predicated upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality. And the way these are applied in practice. The course readings include historic documents and accounts, popular writings, and recent ethnographies on the United States.

[LSP 396 U.S. Latino Prose Fiction (also SPANL 396)]
D. Castillo.

[LSP 400 Border Cultures]
This course centers the "border" as a physical, spatial, and cultural entity, taking as its starting point the belief that it is "not just a place on the map," as Adrienne Rich has suggested, but also "a place in history." In examining this "place," we focus on exploring the border as a site of transformative possibilities, one which opens up, complicates, and makes visible certain social tensions and intercultural exchanges. Throughout the semester we investigate several different aspects and moments of this exchange, beginning with a set of theoretical and conceptual readings that outline the themes guiding our approach to the "border." Primary emphasis is given to works that examine these issues in historical time and space.
whom are they constructed (or by what)? What purposes do these constructions serve? What constrains/structures these constructions? Should we treat them as primordial or as social constructions? Much of the recent research in ethnography, anthropology, and literary studies has been devoted to analyzing the signifying practices and cultural production of ethnicities. This course examines the questions and explores how these categories have been used and to what effect, and how have these changes been reflected or restricted in Latino cultural production? How do cultural practices like music and film produce space? What do freeways, zoning laws, advertising codes, and hiking trails have to do with literature? How have changing urban demographics and immigration shaped, even “Latinoized,” cities, and how have these changes been reflected or restricted in Latino cultural production? How does paying attention to space change our reading practices? This interdisciplinary course examines these questions and explores how place and space shape Latina cultures and how Latina cultures shape place and space.

The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. Students who wish to graduate with a concentration in law and society should consult the director of the program or one of the advisers listed above to plan a coherent program of study. Admission to the concentration has to be approved by the director of the program. Such a program should ordinarily include at least four courses from the following list. At least two of the courses should fall outside the student's major. Particular attention is drawn to GOVT 313 and PSYCH 265, which past students have often taken. Other courses may be substituted with the approval of the adviser. The Law and Society Program is an activity of the Program on Ethics and Public Life. Inquiries can be directed to: the EPL Administrative Assistant, 240 Goldwin Smith Hall, 255-8515, epl@cornell.edu.

[SLP 660 Latino Languages, Ideology, and Practice (also ANTHR 660)
V. Santiago-Infanzón.
Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course looks at the place of language as a signifying practice in the United States by focusing on the experience of Latino communities. Topics explored include linguistic diversity and change, accommodation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.]

Law and Society
F. Fineman, co-director, 208 Myron Taylor Hall, 255-2622, fineman@law.mail.cornell.edu; Mary Kattenstein, co-director, M105 McGraw Hall, 255-8965, mk24@cornell.edu, R. Breiter (sociology), C. Carmichael (comparative literature), D. A. Dunning (psychology), G. Hay (economics), P. Hyams (history), R. Liebertwitz (LLR), R. Miller (philosophy), M. B. Norton (history), R. Polenberg (history), D. Powers (Near Eastern studies), J. Rabkin (government), V. Santiago-Infanzón (anthropology), H. Shue (ethics and public life)
The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. Students who wish to graduate with a concentration in law and society should consult the director of the program or one of the advisers listed above to plan a coherent program of study. Admission to the concentration has to be approved by the director of the program. Such a program should ordinarily include at least four courses from the following list. At least two of the courses should fall outside the student's major. Particular attention is drawn to GOVT 313 and PSYCH 265, which past students have often taken. Other courses may be substituted with the approval of the adviser. The Law and Society Program is an activity of the Program on Ethics and Public Life. Inquiries can be directed to: the EPL Administrative Assistant, 240 Goldwin Smith Hall, 255-8515, epl@cornell.edu.

Lesbian, Bisexual, and Gay Studies

The field of Lesbian, Bisexual, and Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LBG Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms.

In addition to offering a graduate minor, the field of LBG Studies now offers an undergraduate concentration, which is administered under the auspices of the Women's Studies Program and which consists of four courses from the list below. Although most of the courses in LBG Studies (including those on men) generally fall under the aegis of the Women's Studies Program and are hence crosslisted with it, not all of the courses in Women's Studies are sufficiently focused enough on the social construction of sexuality per se to be part of the LBG Studies concentration. In order to qualify for the concentration, courses must devote a significant portion of their time to sexuality and to questioning the cultural and historical institution of exclusive heterosexuality. Students selecting their four courses from the LBG Studies subset must identify their concentration as either LBG Studies or Women's Studies, they cannot double-count their credits and thereby use the same courses for both concentrations. Students interested in the LBG Studies concentration should contact the Lesbian, Bisexual, and Gay Studies Office in 379 Uris Hall.

Courses

ANTHR 200 Cultural Diversity and Contemporary Issues
Fall. 3 credits. J. Borneman.
For description, see ANTHR 200.

ANTHR 321/621 Sex and Gender in Cross-Cultural Perspective (also WOMNS 321/631)
Fall. 4 credits. D. Douglass.
For descriptions, see ANTHR 321/621.

[ENGL 278 Queer Fiction (also WOMNS 279)] Not offered 2001-2002. E. Hanson.

[ENGL 327 Shakespeare: Gender and Society (also WOMNS 327)] Not offered 2001-2002. B. Correll.

[ENGL 355 Decadence (also WOMNS 355)] Not offered 2001-2002. E. Hanson.

[ENGL 377 Gay Fiction (also WOMNS 376)] Not offered 2001-2002. E. Hanson.

[ENGL 654 Queer Theory (also WOMNS 654 and COM L 654)] Not offered 2001-2002. E. Hanson.

[ENGL 655 Decadence (also WOMNS 656 and COM L 655)] Not offered 2001-2002. E. Hanson.

[ENGL 660 Cinematic Desire (also AM ST 662 and WOMNS 661)] Not offered 2001-2002. E. Hanson.

[ENGL 703 Theorizing Film: Race, Nation, and Psychoanalysis (also FRLIT 695)] Not offered 2001-2002. T. Murray.

GERST 641 The Gay Critic
Fall. 4 credits. P. Rehberg.
For description, see GERST 641.

[GOVT 415 Race, Gender, and Organization (also WOMNS 415)] Not offered 2001-2002. M. Katzenstein and J. Reppy.

[GOVT 467 Radical Democratic Feminisms (also WOMNS 467)] Not offered 2001-2002. A. M. Smith.

[HD 464 Sexual Minorities and Human Development (also WOMNS 467)] Spring. 4 credits. R. Savin-Williams.
For description, see HD 464.

[LING 244 Language and Gender (also WOMNS 244)] Not offered 2001-2002; next offered fall 2002. S. McConnell-Ginet.

While this concentration provides strong interdisciplinary breadth to majors in classics, any of the modern languages, history, music, philosophy, etc., and is excellent preparation for graduate study in a medieval field, it could complement a science major as well. Many students feel bound to choose their majors with an eye to future careers and earning potential. The program provides encouragement, guidance, and an avenue for intelligent enjoyment of an important part of all our past.

This concentration offers something different and extra. Coursework in Medieval Studies enhances the student's enjoyment and understanding of the artistic and material relics of the Middle Ages: Gregorian chant, manuscripts and stained glass windows, Gothic cathedrals, Crusader castles, and picturesque towns cramped within ancient walls. The student will discover the serious realities involved in, and shaped by, Arthurian tales of brave knights and fair ladies, dangers, dragons, and other marvells. Students can analyze and appreciate the horrors of the Black Death, triumphs in courtly love and pitched battle, swords and scimitars, caliphs and popes, fear of demons and djinns, and the reassuring presence of angels.

The period saw many of the foundational choices that have, for good and ill, made the world what it is today. Many of our current challenges in the fields of law, human rights, attitudes toward power, authority, gender relations, and sexual mores are derived from the ways in which society was formulated a millennium ago. The Medieval Studies Program houses a vital undergraduate association, Quodlibet, that arranges frequent lectures on medieval topics and Readings of prose and poetry in many medieval languages.

Undergraduates who wish to undertake an independent major or concentration in Medieval Studies should consult the director of the program, 259 Goldwin Smith Hall, 255-8545, medievalists@cornell.edu.

Modern Languages

Medieval texts (like all others) become most lively and informative when read in the original, and Cornell fortunately offers many courses for students interested in acquiring the relevant skills: Classical Arabic, Medieval Hebrew, Medieval Latin, Classical Chinese, Historical Sino-Japanese (Kambun) 700-1300 and Historical Sino-Japanese 1300-1600, Old English, Middle English, Gothic, Old Saxon, Old High German, Middle High German, Old Norse-Icelandic, Old Irish, Middle Welsh, Old Occitan (Provençal), Old French, Medieval Spanish, Medieval Italian, Old Russian, and Old Church Slavonic.

Some medieval languages require study of a modern language (e.g., French for Old Occitan and Old French) or a classical language (Classical Latin for Medieval Latin) as background. Students interested in a concentration in Medieval Studies should begin the study of a medieval language as early as possible, so that they may be able to study texts in the original before they graduate. Students are advised to consult the sponsoring departments for information about the prerequisites for various medieval languages.

Graduate Study

The Medieval Studies Program offers both an interdisciplinary and a literary comparative Ph.D. in Medieval Studies. Disciplinary fields of concentration offered within the Field of Medieval Studies are: Medieval Archaeology, Medieval History, Medieval History of Art, Medieval Literature, Medieval Music, Medieval Philology and Linguistics, and Medieval Philosophy. Information about the graduate program in Medieval Studies is contained in the catalog of the Graduate School, in a brochure on Medieval Studies available from the field coordinator, and at “Cornucopia,” the program’s web site, www.arts.cornell.edu/medieval.

Medieval Studies Courses: Graduate and Undergraduate

Courses in various aspects of Medieval Studies are offered every year in several cooperating departments, including Asian Studies, Classics, Comparative Literature, English, German Studies, History, History of Art, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature, and by the Society for the Humanities. The current year’s offerings are:

*ART H 230 Monuments of Medieval Art (also RELST 230) Spring. 4 credits. R. G. Calkins.

*ART H 332 Medieval Architecture (also ARCH 382, RELST 332) Fall. 4 credits. R. G. Calkins.

*ART H 337 The Medieval Illuminated Book (also RELST 337) Fall. 4 credits. R. G. Calkins.

*ART H 531 Problems in Medieval Art and Architecture (also RELST 531) Spring. 4 credits. R. G. Calkins.

CHLIT 213 Classical Chinese Fall. 3 credits. R. McNeal.

CHLIT 307 Readings in Classical Chinese Literature Fall. 4 credits. D. Warner.

CLASS 331 Goths, Vandals, Franks, and Romans Fall. 4 credits. D. R. Shanzer.

CLASS 363 Intensive Medieval Latin Summer. 4 credits. D. R. Shanzer.

CLASS 403 Independent Study—Sanskrit Fall. Variable credit. C. Minkowski.

ENGL 274 Scottish Literature and Culture Fall. 3 or 4 credits. H. Shaw and T. Hill.

ENGL 308 Icelandic Family Saga Fall. 4 credits. T. Hill.

ENGL 311/611 Old English Fall. 4 credits. R. Farrell.

ENGL 312/612 Beowulf Spring. 4 credits. T. Hill.

ENGL 319/619 Chaucer Fall. 4 credits. R. Farrell.
Modern European Studies Concentration

Susan Tarrow, coordinator

Students from any college may choose an undergraduate concentration in Modern European Studies to complement any major in any college. The purpose of the concentration is to provide a coherent structure for students with an interest in interdisciplinary study in the field of European studies.

The concentration has three tracks: European politics, economics, and society; modern European history; and European culture. The requirements for the concentration are:

1) Competence in at least one modern European language, Romance, Germanic, or Slavic (i.e., completion of a 300-level course or equivalent with a grade of at least B-, or demonstration of an advanced level of competence in an oral proficiency interview test where available).

2) Completion of two interdisciplinary core courses:
   - GOVT 341/SOC 341: Modern European Society and Politics
   - COM L 353/HIST 363: European Cultural History 1870-1945

Spring 2002. 4 credits. S. G. Tarrow.

Under certain conditions, students may be permitted to substitute other courses for those listed above.

3) Completion of one course in modern (post-1789) European history.

4) Two additional courses in any of the three areas, which may include a senior seminar (400 level).

Only two courses may be used to satisfy requirements for both the major and the concentration. Courses satisfying the breadth and distribution requirements in the College of Arts and Sciences, however, may be applied to the concentration. Students interested in completing a research project under the European Summer Research Program may apply for The Wood Fellowship in their junior year. All concentrators are encouraged to participate in the Language House Program, and to spend a semester or more in a program of study in Europe. Courses taken abroad may be applied to the concentration if they are approved for Cornell credit.

Undergraduates in the College of Arts and Sciences may choose an independent major in European Studies through the Independent Major or College Scholar programs.

Departmental advisers include: D. Greenwood (anthropology); C. Otto (architecture); L. Abel (College Scholars, Independent Majors); S. Christopherson (CRP); G. Fields (economics); D. Schwarz (English); A. Schwarz (German studies); J. Pontusson (government); J. Weiss (history); C. Rosen (linguistics); M. Sufer (linguistics); N. Zaslav (music); S. Tarrow (romance studies); G. Shapiro (Russian literature); S. G. Tarrow (sociology); D. Bathrick (theatre, film, dance).

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 120 Uris Hall (telephone 255-7592, e-mail SRT2@cornell.edu).

Religious Studies

The Religious Studies Program, an academic unit providing a major in the scholarly study of religion within the College of Arts and Sciences, offers a wide variety of courses. In addition to courses addressing with various approaches to and topics in the study of religion, we have integrated curricula within our program for in-depth studies of Judaism, Christianity, the Hindu tradition, and Buddhism. We also offer an increasing number of courses on Islam.
The Religious Studies Program is designed to meet the needs of three classes of students: (1) students planning to pursue advanced degrees in the academic study of religion or allied disciplines or subdisciplines (history of religions, religion and literature, religion and psychology, ethics, theology, area studies, etc.); (2) students seeking courses on topics relating to religion to fulfill distribution requirements; and (3) those students desiring a more systematic exposure to the academic study of religion as a significant component of their liberal arts experience. To all students, our program offers an excellent opportunity to develop a deeper understanding and appreciation of religious traditions in all of their complexity through comparative, contextual (in specific historical or cultural contexts), and thematic studies. The program also hosts lecture series, conferences, symposia, and periodic social gatherings for the many students throughout the academic year to foster a sense of intellectual community among our students and faculty.

### The Major in Religious Studies

#### Signing into the major:

**To sign into the major in Religious Studies, a student must have completed at least one course in Religious Studies prior to scheduling an appointment with the program director. Here is the process:**

1. **Schedule an appointment with Professor Jane-Marie Law, Director of Religious Studies; please contact her by e-mail: jmll6@cornell.edu**
2. **In addition to a copy of your current Cornell transcript (the informal one you regularly receive is acceptable), please bring to your meeting with Professor Law all of these forms, which are available in the Religious Studies office:**
   - a completed Religious Studies Major Application Form (available in Rockefeller 182)
   - b) a proposed "Course of Study," which will be used as a guide in your conversation with the director and revised for formal submission to the program upon your entrance as a major
   - c) a College of Arts & Sciences Adviser/Major form which will be signed by the director and your adviser.

#### Advising in the Religious Studies Program

**Upon entering the major in Religious Studies, a student is assigned a faculty adviser whose area of expertise most closely matches the proposed interest of the student. An up-to-date approved adviser list is available in the Religious Studies office. Please note that all faculty who cross-list courses with RELST can serve as an RELST adviser. Working closely with one's RELST adviser when selecting courses is an important component of advising students in order to ensure they fulfill the requirements for the major while creating an integrated and coherent course of study out of our large number of interdisciplinary course offerings.**

To graduate as a major in Religious Studies, a student must (1) complete with letter grades the program's three core courses, RELST 250, Intro to Asian Religions; RELST 251, Intro to Judaism, Christianity, and Islam; and RELST 449, History and Methods of the Academic Study of Religion. These three core courses can not be waived; and (2) complete with letter grades seven additional courses approved for the major, at least four of them at the 300 level or above. The following specifications of this second requirement are designed to promote breadth (2a) and depth (2b) of study.

**(2a) At least four of a major's seven additional courses are to be selected to ensure some familiarity with two or more in special cases different religious traditions or phenomena. These courses may be at the introductory or advanced levels, though depth work at the 300 level or above is advised. For example, "Introduction to Asian Religions" (RELST 250) might lead a student to undertake "Religions of the Ancient Near East" (RELST 355), and then combine these with two courses on Judaism, "Introduction to Ancient Judaism" (RELST 244) and "Cultural History of Jews of Spain" (RELST 239).**

**(2b) At least two of these seven additional courses are to be selected to ensure depth of coverage in one religion or a group of closely related religious traditions or phenomena. In the first illustrative case described above, the student might combine "The Religious Traditions of India" with "Tantric Traditions" (RELST 547) or "Indian Devotional Poetry" (RELST 348) to acquire a measure of specialist strength in the religions of India. Alternatively, that student might combine "Introduction to Asian Religions" with one or more courses dealing with Buddhism, such as "Chinese Buddhism" (RELST 357) or "Tibetan Buddhism" (RELST 400), to develop an appropriate depth along a different dimension. No more than one of the courses chosen to meet requirement 2a may be used to satisfy requirement 2b. Routinely, survey courses (which in our program are offered at the 200 level) should be combined with geographically specific offerings at the 300 and 400 level to satisfy this aspect of the requirements.**

To engage in the kind of focused study envisioned under 2b, a student will be expected to attain proficiency in a language other than English to gain access to relevant sources, primary or secondary. For example, a knowledge of Greek or Latin might be required for the study of Christianity (as well as Greek or Roman religions); of Hebrew or Aramaic for Judaism; of Arabic for Islam; of Sanskrit or Hindi for Hinduism; or of Sanskrit, Pali, Chinese, or Japanese for Buddhism. In certain cases, nonclassical European languages can be used to fulfill this requirement. Religious phenomena like shamanism or totemism, though less firmly rooted in literary traditions, have generated substantial bodies of important scholarship in French and German, and an undergraduate major concentrating in these areas of Religious Studies should be equipped to make independent use of such material. Customarily, courses used to satisfy this foreign language proficiency requirement may not be applied to the course requirements described under 2a and 2b. Choice of language to fulfill this requirement is determined by the student in consultation with his or her adviser and is decided at the time the student enters the major.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences; a comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program, 182 Rockefeller Hall.

### Graduating with Honors in Religious Studies

**GENERAL INFORMATION**

1. **Eligibility:** 3.0 cumulative average and 3.5 average inside the major with no grade in the major below B-. Program Director notifies eligible candidates during the spring semester of the junior year, or prior to commencement of final year.

2. **Honors Courses.** Candidates must sign into RELST 495 (Senior Honors Essay) for up to eight credits (two courses) for two semesters with variable credit. This two-semester sequence is recommended but not required. After the first term, an R in the transcript indicates that this course (usually for 8 credits) is a yearlong course. When the project is completed at the end of the second semester, the grade recorded counts for all eight credits. (The eight-credit limit is the result of the conviction/belief that earning more than eight credits for a single "piece" of your undergraduate education is unwise.)

You submit your honors proposal (with and according to the program's instruction/cover sheet) to the Religious Studies administrator before the end of the spring term of your junior year, or not later than Sept. 15 of the final year. She/he then approves your signing into the honors courses.

3. **Honors Committee—three faculty members.** While you are required to have three faculty members on your committee at the time of the submission of the final draft, we only require that two of them be identified when you submit your proposal. In the event the adviser is on leave, the program will assign a committee member from the list of approved RELST advisers. The three members should be:
   - a) The professor who has agreed to work closely with you over the year and to be the supervisor/grading of your project is chair of the committee.
   - b) Your Religious Studies major adviser (not optional)
   - c) Another knowledgeable faculty member

Sometimes your adviser is the supervisor/chair. If that is the case, you need two additional knowledgeable professors for your committee of three.

### Courses Approved for the Major

**Sponsored by Religious Studies**

RELST 123–124 Elementary Biblical Hebrew I and II (also NES 123–124, JWST 123–124)

123, fall; 124, spring. 3 credits. Enrollment limited to 17 students. Not offered 2001–2002. Staff. For description, see NES 123–124.

For description, see ASIAN 449.

RELST 460 Indian Meditation Texts (also ASIAN 460)
Fall. 4 credits. D. Gold.
For description, see ASIAN 460.

RELST 490-499 Directed Study
490, fall; 491, spring. 2–4 credits each term.
For majors in Religious Studies; permission of director required. Staff.

RELST 495 Senior Honors Essay
Fall and spring. Variable up to 8 credits.
Required for honors in Religious Studies. Staff.

RELST 531 Problems in Medieval Art and Architecture (also ART H 531)
Spring. 4 credits. R. G. Calkins.
For description, see ART H 531.

Additional courses offered by cooperating departments may also be approved through petition for the major in Religious Studies. For details see the program director, Jane Marie Law, 125 Rockefeller Hall or e-mail her at jmll6@cornell.edu.

Science of Earth Systems
The full faculty of the Department of Earth and Atmospheric Sciences (see page 448) plus the following: W. Brutsaert (civil and environmental engineering); P. Gierasch (astronomy); M. Kelley (electrical engineering); J.-Y. Parlangue (agricultural and biological engineering); J. Yavitt (natural resources).

The Science of Earth Systems (SES) is the study of the interactions among the atmosphere, oceans, biosphere, and solid Earth; these dynamic interactions control the global environment. The interdisciplinary, basic science approach of SES incorporates major components of geology, ocean and atmospheric sciences, terrestrial hydrology, biogeochemistry, and ecology into an integrated study of Earth as a complex system. Earth system science presents one of the outstanding intellectual challenges in modern science and is the primary foundation for the future management of our home planet.

The Major
The major in Science of Earth Systems emphasizes a rigorous, objective study of the Earth and its systems with broad preparation in basic sciences and mathematics, followed by the choice of an area of concentration for study in greater depth. The Science of Earth Systems program seeks to train students in a strong set of fundamental skills that will allow them to approach with quantitative rigor a wide range of questions about the Earth and its environment, and to adapt those skills rapidly to new areas of inquiry as they arise. The major in Science of Earth Systems is by nature interdisciplinary, and involves faculty from the College of Arts and Sciences, the College of Engineering, and the College of Agriculture and Life Sciences. In the College
of Arts and Sciences the program is administered by the Department of Earth and Atmospheric Sciences in collaboration with the Departments of Astronomy, and Ecology and Evolutionary Biology.

The SES curriculum begins with a series of courses designed to provide preparation in fundamental science and mathematics necessary for a rigorous study of Earth Systems. This preparation is followed by three SES core courses providing breadth and integration. An additional set of four intermediate to advanced courses is selected to provide depth and a degree of specialization.

Students in the College of Arts and Sciences choosing to pursue the Science of Earth Systems major are required to take the following courses: PHYS 207–208 (or 112–213), CHEM 207–208, BIOSCI 101-103/102-104 (or 109–110), and MATH 111–112 (or 121–122, or 190/191-192). Three additional 3-4 credit hour courses in mathematics, physics, chemistry, or biology are required; these additional courses may require one or more of the basic courses listed above as a prerequisite. One of the courses must be either EAS 201 or BIOES 261. Both EAS 201 and BIOES 261 can be chosen. Mathematics at the level of MATH 221 or 293 is strongly recommended for all SES students, and those choosing areas of concentration in Atmospheric Sciences, Environmental Geophysics, or Hydrology should take MATH 222 or 294.

The three required SES core courses include the following:

**EAS 331/ASTRO 331** Climate Dynamics

**EAS 302** Evolution of the Earth System

**EAS 321/NTRES 321** Introduction to Biogeochmistry

Four additional 3-4 credit classes selected from 300- and 400-level courses, approved for an SES concentration, are required. These courses will ordinarily be organized around one of the SES areas of specialization. Areas of specialization include, but are not limited to, the following: Marine Dynamics, Ocean Science, Environmental Geology, Environmental Biophysics, Biogeochmistry, Soil Science, Ecological Systems, Hydrological Science.

Further information and applications contact Kerry H. Cook, kkc@cornell.edu. Also see the SES web site at [www.eas.cornell.edu](http://www.eas.cornell.edu) for up-to-date information. Administrative offices are located at 2122 Snee Hall.

### Society for the Humanities

**Dominick LaCapra** Director

Fellows for 2001–2002

**Avtar Brah** (University of London)

**Ross Brann** (Cornell University)

**Debra Castillo** (Cornell University)

**Vitaly Chernetsky** (Columbia University)

**Elizabeth Deloughrey** (Cornell University)

**Francois Jullien** (Univiersite Paris 7)

**Michael Kammen** (Cornell University)

**Tracy McNulty** (Cornell University)

**Viranjini Munasinghe** (Cornell University)

**John Noyes** (University of Cape Town)

**Zita Nunes** (University of Maryland)

**Julia Offen** (California Institute for the Humanities)

**Gary Peatling** (University of Wales, Aberystwyth)

**Sandhya Shukla** (Columbia University)

**Michael Steinberg** (Cornell University)

**Shawkat Toorawa** (Cornell University)

**Robert Ziomkowski** (Pontifical Institute of Mediaeval Studies)

The Society annually awards fellowships for research in the humanities. The Fellows offer, in line with their research, informal seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students, suitably qualified undergraduates, and interested auditors. Students who want credit for a seminar should formally register in their own college. Others persons other than those officially enrolled may attend as visitors with permission of the Fellow. The theme for 2001–2002 is “Dispersion and the Critical Imagination.”

**S HUM 401** The Soul in Medieval Culture

(Also WIST 404 and RELST 401)

Fall. 4 credits. Limited to 15 students. R 12:20–2:15. R. Ziomkowski

This course studies the medieval reception of mythological themes in Plato’s philosophy, particularly the world-soul and the transmigration of souls, as these appear in the *Timaeus* (the only dialogue of Plato known in the Latin West throughout the Middle Ages). In focusing on the nature of the soul, we study the tension between theology and philosophy concerning the central importance to medieval Christian culture, as well as one that the ancient world had developed to a high degree of sophistication. We look at texts written during the first thirteen centuries of the Christian era, with particular emphasis on the twelfth century. The course is conducted as intellectual history, inasmuch as we study the reception of Plato’s *Timaeus* across time and across a range of literary genres (dialogues, theological treatises, cosmological and philosophical compositions), with particular attention to works of Menippean satire such as Boethius’ *Consolation of Philosophy*, Bernardus Silvestris’ *Cosmographia*, and Alan of Lille’s *Plant of Nature*. Theoretical perspectives are drawn from works of literary criticism, particularly from Mikhail Bakhtin’s theories of Menippean satire. All texts are read in translation, although the ability to read Latin may broaden one’s research options.

**S HUM 402** Democracy and the City (also ASIAN 428)

Fall. 4 credits. Limited to 15 students. M 2:30–4:25. F. Jullien.

Approaching the subject as a philosopher and a sinologist, we deal primarily with Greece and Ancient China. In adopting this dual approach, the seminar illustrates the difference between their ways of thinking and tends to an examination of what constitutes the essence of the city in the West and of the strong link between the city, the form of democracy, and the ideal of liberty. It concludes with a consideration of the contemporary construction of the city-as instanced in today’s East Asian megalopolises—and, in light of this, poses the question of the future of democracy itself.

**S HUM 403** After Immigration (also LSP 403 and SPANL 403)

Beginning with a close reading of Michael Jones-Correa’s seminal study of Latinos in New York, *Between Two Nations*, we focus class discussion on recent Latin American immigration to the United States through two complementary perspectives and mediations on the immigrant experience: that of the individuals who have arrived in the US, and that of individuals who have chosen to remain in their countries of origin. The class studies films like *Nueva Yol* and *Jardín de Edén*, Latin American authors like Carlos Fuentes, Ana Lydia Vega, and Ariel Dorfman, and US Latinos like Julia Alvarez, Francisco Goldman, and Cristina Garcia. Students are encouraged to do individually-tailored research projects that may include autobiographical or ethnographic elements as well as literary analysis and theoretical inquiries.

**S HUM 404** Displacement, Desire, Identity (also RUSSL 403)

Fall. 4 credits. Limited to 15 students. T 8:30–10:25. A. Noyes.

This seminar focuses on the ways in which authors whose backgrounds tie them to a part of the world that served as a source of several major waves of diasporic displacement over the past century—East Central Europe and the former Russian/Soviet empire—reflected on displacement and the diasporic experience. In particular we focus on their impact on the construction and performance of identities and on manifestations of desire. We explore these experiences through the mass emigration from the Russian and Austro-Hungarian empires in the years preceding their collapse and the concomitant revolutions and civil wars, to the continuous waves of refugees and displaced persons as a result of the revolutions, civil wars, the two world wars, and most recently the collapse of the “communist” regimes and the implosion of Yugoslavia. We consider how these experiences impacted the construction and performance of such aspects of identity as nation, gender, and sexuality. Readings include selections from the fiction, diaries, essays, and poetry by Joseph Conrad, Vladimir Nabokov, Witold Gombrowicz, Yuri Andrukhovych, Dubravka Ugresic, and others. The seminar endeavors to bring this discourse into a dialogic contact with its counterparts in contemporary postcolonial studies and feminism scholarship.

**S HUM 405** The Four Seasons Motif in American Culture (also HIST 455 and AM ST 430.2)

The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the Northern Hemisphere, both West and East: The Four Seasons. We view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attentions to the Old World origins, dispersion, and local permutations of this motif, the seminar is given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations.
S HUM 406 Biblical Diasporas in France (also COM L 488 and FRLIT 406) Fall. 4 credits. Limited to 15 students. F 12:20-2:15. T. McNulty. This course examines the use of the concept of "diaspora" in contemporary French thought, considering how such notions as deterritorialization, homelessness, the uncanny, and the "ungrounding" of identity. We focus our attention on a group of authors whose uses and adaptations of the concept of "diaspora" are heavily indebted to theories such as Judaism and mysticism. Can we locate in modern philosophy the "diaspora" of a certain kind of theological thought? What is its relationship to Jacobsonian discourses in which it takes up residence? The first part of the course considers the problems of estrangement, nomadism, and diaspora in the Bible, examining how the Hebrew patriarchs, Jewish prophets, and Christian apostles use these themes to define their position with regard to God and their different attitudes toward the law, the word, and the book. We then explore how these themes are developed in works by Blanchot, Buber, Deluze, Derrida, Levinas, Lyotard, Scholem and Rosenzweig. Students may read all works in the original languages or in translation.

S HUM 408 Jewish Culture and Modernity (also HIST 405, JWST 408, GERST 420) Fall. 4 credits. Limited to 15 students. M 2:30-4:25. M. Steinberg. With an emphasis on Germany but with materials drawn also from England, France, and the United States, this seminar analyzes the intersections and mutual production of modern Jewish culture and general structures and discourses of modernity. It takes up the category of "Jewish culture" as distinct from "Judaism," as the focus is less on a religious tradition than on a cultural and historical identification whose sacred/secular boundaries are fluid and contestable. Thus, the boundaries between the sacred and the secular become a central debate both within Jewish culture and its multiple, mutual interactions with the non-Jewish world, which may be constituted in terms of modern nationalities, as Christian, secular, or anti-Semitic.

S HUM 409 Seasons of Migration (also NES 409, RELST 409, and COM L 499) Fall. 4 credits. Limited to 15 students. R 2:30-4:25. S. Toorawa. Muslim Literature and Film of the Diasporic Imagination. How and where does—indeed, can—one write the story of a diaspora of the Muslim creative and critical imagination? How do contemporary diasporic Muslim writers and filmmakers problematize, with the impossible longing to belong, with the loss of 'home' (when 'home' is where they already are...)? Guided by the critical work of Ahmed, Erickson, Hawley, Rusdhie, and Subramani, we will work with Abdulali, Zulfikar Ghose, Abdulrazak Gurnah, Aamer Hussein, Farida Karodia, Adib Khan, Waqas Ahmad Khwaja, Hanif Kureishi, Yasmin Ladhia, and others; and watch Bhaji on the Beach, Masala, My Beautiful Laundrette, Surviving Sabrina and other films drawn from the United States and other parts of the world. We critique, evaluate, and enjoy these works through the lens of the diasporic condition, by paying special attention to the effects of displacement and its impact on articulations of faith, history, identity, memory, mythologies, nationality(s), subjugation, the postmodern, and the (post)colonial. We try to understand how the 'expatriate' Muslim writes herself, her world, and her condition.

S HUM 410 The Transoceanic Imagination (also ENGL 401/601) Fall. 4 credits. Limited to 15 students. T 2:30-4:25. Z. Nunes. This course focuses on diasporic literatures of "crossing the water" and examines the historical, political and social factors that shape the inscriptions of these journeys. Since the etymological root of "diaspora" derives from the scattering of "seed," we examine the gendering of dispersal narratives of Atlantic and Pacific travellers including seamen, pirates, missionaries, slaves and sailors in order to interrogate the relationship of primarily male shipboard communities to nationalism, gender, sexuality, diaspora and resistance. We pay particular attention to the material and gendered divisions between public and private both on the ship and in relation to its various ports. We cover diverse travel itineraries from the Mediterranean to the Americas and the Caribbean, and in doing this attempt to unpack the relationship between travellers and place and to examine the consequences of destabilizing territorial, ethnic, and national identities. Readings may include works by Mary Seacole, E. F. Emah, Antonio Benitez-Rojo, J. S. Kanwal, Albert Wendt, and Derek Walcott.

S HUM 411 Performing Community Fall. 4 credits. Limited to 15 students. W 2:30-4:25. J. Offen. This seminar explores imaginations, performances, and experiences of "community" in the European diaspora and other cultural performances. We examine collective identities (gender, ethnicity, race, nationality, class, sexuality, community, and others) and inequalities as they are expressed and negotiated through public culture and discourse. We consider critical social theories, representations in popular culture, and ethnographic explorations. Requirements include active participation, critical short essays, and a final creative project.

S HUM 415 Creolization, Syncretism, Hybridity (also ANTHR 415) Spring. 4 credits. Limited to 15 students. T 10:10-12:05. V. Murasinghe. The concepts Creolization, Hybridity, and Syncretism all convey a sense of 'mixture.' This course explores theories and empirical case studies of processes of racial, cultural and religious mixture from an inter-disciplinary perspective. The course explores the interconnections among concepts denoting 'mixture' that have diverse originary points. The overarching line of inquiry is to explore the genealogy of the concepts as necessary precursor to understanding how these terminologies may, in concert, illuminate different aspects of the dynamic structuring processes of mixture in different historical and ethnographic settings. Here, the course asks how ideologies of mixture articulate with nationalist and ethnic ideolog(ies). Do sites of mixture afford possibilities for alternative nationalist imaginings that undermine the imperial logic of nation-building? Do ideologies of mixture necessarily deny the existence of essentialisms, and if so, are some of the political implications for peoples embodying mixture in this historical moment when identity politics in multi-cultural nations grounds essentialist identities? Why are some diasporic groups represented as suitable for mixture but not others? And what are the socio/political/economic consequences of such representations? These are some of the questions this course addresses through an examination of not only specific empirical case studies but also interdisciplinary theorizations of the three concepts. The aim of this course is to critically engage various theorizations of 'mixture' both in relation to one another and in relation to specific empirical situations in order to conceptualize processes of mixture that build on but also go beyond the insights generated by these three concepts.

S HUM 418 Racial Democracy in the Americas (also ENGL 416/613 and COM L 432) Spring. 4 credits. Limited to 15 students. T 12:20-2:15. Z. Nunes. This course addresses democracy and its capacity for representing various racial positions in the Americas. We discuss national and transnational identities defined according to concepts of mixture and to a politics of democracy and inclusion. We turn to anthropophilia, mestizaje, créolité, transculturation, multiculturalism and hybridity. Readings are drawn from literary and theoretical texts.

S HUM 419 Modern Nomads (also GERST 419) Spring. 4 credits. Limited to 15 students. T 12:20-2:15. J. Noyes. Nomadism has always been an issue that reminded sedentary cultures of their opposite, their outside, their failure to control the world in its entirety. And yet, sedentary and nomadic cultures have always depended on an "ambivalent relationship, and this in turn marks the fictions of modernity in decisive ways. This is particularly evident in German culture, where issues of imperialism and territoriality were constantly displaced from the political to the cultural arena. Fictional and critical texts play a key role in this process, since they stake out the imaginary dimensions of subjectivity in relation to culture and territory. In this seminar we will examine how, in the wake of Enlightenment, German cultures of modernity attempted to negotiate the ambivalence of nomadic mobility. We analyse key fictional and critical texts chosen from moments in German history when mobility and territoriality were particularly important in the public imagination.

S HUM 420 Cross-culturality in the Caribbean (also ANTHR 410) Spring. 4 credits. Limited to 15 students. W 2:30-4:25. S. Shukla. This seminar takes as its inspiration the literary and sociopolitical imaginary of Guyanese writer Wilson Harris, who has elaborated the concept of "cross-culturality." Here, the model of diversity being elaborated is rather different from the multiculturalism we are familiar with, in the United States (or Britain or Canada, for that matter), where cultures are seen to function as discrete parts of the whole. Cross-culturality promises that indigenous racial or cultural cultures are partial and reinv Inventory through dialogues with other cultures. Perhaps this broad and flexible concept can only emerge from the Caribbean, a hyper-theorized space of hybridity. But is this because the constitutive ideas, of race, nation, and migration, are different in West Indian countries from those that operate in the North American context? Can they be traced historically, in relation to political develop-
ments, of colonialism, postcolonialism and regionalism? And what happens to these concepts when they move across the border of the nation-state?

S HUM 421 Contexts of Irish Diaspora
The aim of this seminar is to encourage examination in social-historical uses of the concept of “diaspora” through a critical contextualisation. This is attempted principally in relation to Irish diaspora communities in the United Kingdom and the United States, but comparative perspectives and observations are encouraged.

S HUM 423 Culture, Identity, and Diaspora
Spring. 4 credits. Limited to 15 students. R 12:20-2:15, A. Braha.
This seminar explores theoretical and substantive issues raised by the debates surrounding identity, difference, and diaspora. It examines the use of these concepts in the work on “intersectionality” of race, class, ethnicity, gender, and sexuality. The course draws upon material from Britain, continental Europe, and North America, with a significant focus on feminist work. We address questions of difference, diversity and differentiation; identification and subjectivity; and, those of solidarity and social transformation. How do questions of ‘national’ belonging differ in European settler societies such as that of the United States? What effects has “differential racialisation” of groups such as African, South Asian, Irish, and Jewish descent groups in Britain and the United States had on questions of identity, inequity and inequality? What impact have diasporas made on transforming our sense of ‘local’ and ‘global’ relations?

S HUM 459 Opera, History, Politics, Gender (also WOMNS 454, COM L 459, HIST 460, MUSIC 474, ITAL 458)
Spring. 4 credits. Steinberg and S. Stewart.
See HIST 460 for full course description.

South Asia Program

The South Asia Program coordinates research, teaching, and special campus events relating to Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program faculty include members from a variety of disciplines, including agricultural economics, agricultural engineering, anthropology, architecture, art, city and regional planning, comparative religion, ecology and systematics, economics, English, geology, government, history, history of art, human ecology, industrial and labor relations, international agriculture, linguistics, literature, and rural sociology. Undergraduates with a special interest in the region may major in Asian Studies with a South Asia concentration, or complete a South Asia concentration with any other major. Graduate students may pursue the M.A. degree in Asian Studies with a concentration in South Asia.

Languages offered are Bengali, Hindi, Nepali, Sinhala, and Sanskrit. Foreign Language and Area Studies scholarships are available to graduate students who are U.S. citizens or permanent residents. Cornell is a member of the American Institutes of Bangladesh, Indian, Pakistan, and Sri Lankan studies. For details on the major, see the Department of Asian Studies listing in this volume. For courses available in South Asian studies, or for further information on research opportunities, direct questions to the South Asia Program Office, 170 Uris Hall.

Southeast Asia Program

Southeast Asia studies at Cornell is included within the framework of the Department of Asian Studies. Seventeen core faculty members in the colleges of Arts-Sciences, Business and the Johnson Graduate School of Management, the School of Industrial and Labor Relations, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. Courses are offered in such fields as anthropology, Asian studies, economics, finance, government, history, history of art, labor relations, linguistics, music, and rural sociology. Instruction is also offered in a wide variety of Southeast Asian languages, including Burmese, Cambodian (Khmer), Cebuano, Cebuano (Bisayan), Indonesian, Javanese, Tagalog, Thai, and Vietnamese, for which Foreign Language and Area Studies Fellowships are available to U.S. citizens. In addition, faculty from other disciplines also provide area instruction on Southeast Asia. The formal program of study is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar, an exhibit at the Johnson Museum, and concerts of the Gamelan Ensemble. The George McT. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities relating to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this region in America.

Undergraduates may major in Asian studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asia studies with any other major by completing 18 credits of course work. Graduate students may work toward an M.A. degree in Southeast Asian studies or pursue a Master of Professional Studies in another school with a concentration in Southeast Asian studies. Ph.D. students specializing in Southeast Asia receive a doctorate in a discipline such as history, history of art, anthropology, government, music, economics, or city and regional planning.

For courses available in Southeast Asian studies and details on the major, see the Department of Asian Studies listing in this volume. Additional information is available on the Internet at: www.einaudi.cornell.edu/southeastasia. Inquiries for further information should be directed to the program office, 180 Uris Hall, (607) 255-2578 or SEAP@cornell.edu.

Statistical Science Department

The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the section, “Interdisciplinary Centers, Programs, and Studies,” in the front of this catalog.

Visual Studies Concentration

Visual Studies is a concentration that provides students with an interdisciplinary approach to visual art, media (including digital works), performance, and perception. Faculty from departments throughout the university offer courses toward the concentration, drawing on such various disciplines as the history of art, film, literary studies, psychology, theatre, and others. Requirements for the concentration include selection of one from two possible core courses (the two core courses may be offered in tandem or on an alternating basis depending on the availability of staff), which introduce students to critical thinking about visual studies as well as close textual analysis in social and historical contexts. Responsibility for teaching the core course will rotate among faculty affiliated with the concentration, and the course will, as much as possible, entail interdisciplinary collaboration in the form of team-teaching or visiting lectures. In addition to the core course, students must choose four Cornell courses from among the different categories of courses offered in the concentration. One of the four courses must include a significant component of practical work (such courses are designated with a “¢©” in the course listing, indicating courses completed for a letter grade).

Students interested in pursuing the concentration should discuss it with their advisers, and then contact the director of the concentration. The director will register students in the concentration and assign each student an adviser selected from among the concentration’s affiliated faculty. Advisers should forward a copy of each adviser’s transcript to the director, indicating courses completed for the concentration.

Director and Affiliated Faculty

Director, Brett de Bary, Asian Studies and Comparative Literature

Affiliated Faculty:

Robert Ascher, Anthropology
David Bahrkrist, Theatre, Film, and Dance
Robert Bertola, Art
Susan Buck-Morss, Government
Robert G. Calkins, History of Art

ARTS AND SCIENCES - 2001-2002
James Cutting, Psychology
David Field, Psychology
Donald Fredericksen, Theatre, Film, and Dance
Werner Goehner, Architecture
Jacqueline Goldsby, English
Salah Hassan, Africana Studies
Ellis Hanson, English
Marcia Lyons, Art
Laura Meixner, History of Art
Kaja McGowan, History of Art
Timothy Murray, English
Marilyn Rivchin, Theatre, Film, and Dance
Rebecca Schneider, Theatre, Film, and Dance
Michael Steinberg, History
Amy Villarejo, Theatre, Film, and Dance
Geoff Waite, German Studies

Visual Studies Concentration Course List
VISST 200 Introduction to Visual Studies (IV)
   Spring. 4 credits. Requirements: two objective midterm exams; occasional
   listserve postings; two five page papers.
   T. Murray.
   Introduction to Visual Studies will provide
   a broad introduction of modes of vision and the
   historical impact of visual images, visual
   structures, and visual space on culture,
   communication, and politics. The question of
   “how we see” will be discussed in terms of (1)
   procedures of sight (from optical machines to
   the psychology of vision and the philosophy
   of aesthetics); (2) spaces of vision (from
   landscapes to maps to cities); (3) objects of
   vision (from sacred sites to illuminated books
to digital art); and (4) performances of vision
   (race, sexualities, ethnicities, cultures). Of
   importance to the course will be the practical
   and conceptual relation of twentieth-century
   visual technologies (photography, cinema,
   video, and computing) to their historical
   corollaries in the arts.
   The course will draw on the visual traditions
   of both Western and non-Western societies
   and study texts that have defined the premises
   and analytic vocabularies of the visual.
   Through viewings, screenings, collaborative
   writing, and art projects, students will develop
   the critical skills necessary to appreciate how
   the approaches that define visual studies
   complicate traditional models of defining and
   analyzing art objects. Guest lecturers will
   occasionally address the class.

2. New Media

Spring. M. Rivchin.

Women's Studies Program

Introduction to the Program

Women's Studies is an interdisciplinary program that seeks to deepen understanding of women's lives, culture, and history, in all their complex multiplicities. Transformative as well as additive, women's studies challenges us to re-examine much of what we think we already know by providing an intellectual—and critical—framework through which to view the many interconnections among gender, knowledge, and power. Thus, central to the curriculum in women's studies are such overarching notions as these:

(a) that definitions of gender—including those that privilege exclusive heterosexuality—are not natural or universal but are instead social constructions that vary across time and place, serve political ends, and have ideological underpinnings;

(b) that systems of gender inequality interact with other social inequalities, including those of class, race, ethnicity, sexual preference, and Western vs. non-Western cultures; and

(c) that even the most current knowledge derived from the humanities, social sciences, and natural sciences is not as impartial, objective, or neutral as has traditionally been thought but instead emerges out of particular historical and political contexts.

Although all Women's Studies courses except writing seminars count toward the major, they do not all satisfy distribution requirements or count toward the total hours required in Arts and Sciences; if a course is not cross-listed with another Arts and Sciences department, be sure to check with college offices about whether it will satisfy distribution or our requirements for Arts and Sciences.

Program Offerings

The Women's Studies Program offers an undergraduate major, an undergraduate concentration, and a graduate minor. Undergraduate students in the College of Arts and Sciences who want to major in women's studies can apply directly to the program. Undergraduate students in other colleges at Cornell will need to work out special arrangements and should speak to the Director of Undergraduate Studies (DUS) in Women's Studies.

The Undergraduate Major

The questions posed by feminist inquiry cannot be answered from within any single discipline or even from a simple combination of two or more disciplines. For that reason, the women's studies major provides students with a basic grounding in the interdisciplinary field of women's studies and then requires each student to construct an advanced and individually tailored program of study on a topic, in a discipline, or in a combination of disciplines of special interest to the student alone.
Rather than specifying a particular sequence of required courses for each and every student, the women's studies major gives students a starting point in women's studies, an active advisory structure to help them shape a curriculum, and an ongoing impetus to reflection about their entire program of undergraduate study.

In designing their major, students should keep in mind that there are comparatively few graduate programs offering a degree in women's studies itself. Accordingly, undergraduates wishing to major in women's studies should talk at length with their faculty adviser about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women's studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major. Students wishing to apply their interest in Women's Studies to other professional arenas may similarly select focused coursework in their fields or consider supplementing their studies through internships or other work experiences.

Requirements for a Women's Studies Major

1. Prerequisite courses: before applying to the major, the student must complete any two Women's Studies courses with a grade of B- or better. Suggested entry-level courses for 2001–2002 include: any class at the 200 level, especially 210 and 211. These courses would count both as prerequisites and as part of the women's studies major. First-Year writing seminars, in contrast, would count as prerequisite courses but not as part of the major.

2. Required course work:
   a. A minimum of 36 credits in women's studies is required for the major. No course in which the student has earned less than a C- can count toward these 36 credits. Although there is no single women's studies course that is required of all students, every major must complete a program of study that is both graduated in difficulty and interdisciplinary in scope—a program, in other words, that reflects both the breadth and the depth of women's studies scholarship. This program of study should be developed in consultation with the director of undergraduate studies and must include advanced work at the 300 level or above.
   b. Students may count up to three courses outside women's studies toward the major if those courses are approved by the director of undergraduate studies as constituting a meaningful component of the student's women's studies curriculum. To facilitate the coordination of a women's studies major with other majors in the college, students may also count toward the major up to three women's studies courses that are simultaneously being counted toward a second major.

3. The Honors Program: to graduate with honors, the major in women's studies must complete a senior thesis under the supervision of a women's studies faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative grade point average of 3.0 in all coursework and a 3.3 average in all courses applying to their women's studies major. Students interested in the Honors Program should consult the Director of Undergraduate Studies (DUS) late in the spring semester of their junior year or very early in the fall semester of their senior year. For more information about the Honors Program, see WOMNS 400 and the “Guidelines For a Senior Honors Thesis” available in the Women's Studies Program office.

The Women's Studies Concentration

Undergraduate students in any college at Cornell can elect to concentrate in Women's Studies in conjunction with a major defined elsewhere in the university. The concentration consists of four courses in Women's Studies completed with a grade of C- or above, no more than two of which may be from a single discipline and none of which should overlap with the major. In rare cases, the DUS may allow one course from within a student's major to count toward the requirements for the concentration. Students should not assume the waiver will be granted, and they must petition the DUS with this request before the beginning of their final semester of study. Freshman writing seminars cannot be included within the four required courses. Students wishing to concentrate in Women's Studies should see the DUS.

The LBG Concentration

Women's Studies serves as home to the Lesbian, Bisexual, and Gay Studies Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. The Women's Studies courses that may be used to fulfill the LBG concentration are 210, 244, 262, 277, 285, 321, 353, 355, 376, 413, 415, 427, 433, 450/650, 441/641, 465, 467, 468, 493, 621, 626, 654, 656 and 661. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies portion of this catalog.

4 credits. Not offered 2001–2002. A. Villarrejo. This course introduces students to critical approaches in feminist scholarship to the cultural, socioeconomic, and political situation(s) of women. Particular attention is paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings draw on work in various disciplines and include literary texts and visual images.

Fall. 3 credits. K. McCollough. Introduction to Women's Studies is a multidisciplinary approach to understanding the experiences, historical conditions, and concerns of women, both in the present and the past. As the academic manifestation of feminism, women's studies offers a range of perspectives (from liberal to radical) but focuses, in general, on understanding the sources of women's oppression in order to eliminate these sources.

This course is a seminar on television as technology and cultural form, focusing on the “domestic” as a synonym for gendered value-coding, an axis of the international division of labor and questions of television’s dissemination and circulation, and a site for historical exploration. The course balances readings in television and cultural theory (Spigel, Dienst, Merck, Williams, Feuer, Modleski, Mellencamp, Shattuck, Spivak, and others) with close analysis of television as information, entertainment, furniture, technology, text, genre, flow, channel, and circuit of production of the commodity audience. Students may enroll in either undergraduate or graduate level with graduate students submitting a longer paper and doing supplementary readings.
thought, many of which remain unfamiliar. This seminar explores developments in crucial junctures in Second Wave feminist could be considered canonical texts and lesbian thought when "queer theory" emerges? What happens to the relationship between feminist theory and examine its status in current constructions in feminist theories over that same time period also trace the changing status of "lesbianism" from the 1950s through the mid-1990s. We feminist theory, primarily in the United States, without sacrificing the complexity of any for graduate minors in Women's Studies and single topic from interdisciplinary perspectives While many of our graduate courses train students in highly specialized areas of feminist theory to a variety of topics or questions. The purpose of this course is to expose graduate students to interdisciplinary approaches in Women's Studies and feminist theory to a variety of topics or questions. Without sacrificing the complexity of any students with a specialized interest in feminist theory. Although it is not required, the course is strongly recommended for students obtaining a graduate minor in Women's Studies.

[WOMNS 610 Sexuality and the Politics of Representation 4 credits. Not offered 2001–2002. A. Villarejo. The seminar explores contexts for critical work on sexuality and film/video. Beginning with the texts of Foucault, Freud, Lacan, Jacqueline Rose, and Jeffrey Weeks, the course examines the uses and abuses of psychoanalytic theory, as well as the regulation of sexuality in the past century. “Sexuality” is not, however, a simple abstraction, and its coherence is put to the test through the dual lenses of Marxism and poststructuralism throughout the second half of the course, with readings from Gramsci, Deleuze and Guattari, Lyotard, and others. Films include Blonde Venus, Trash, The Night Porter, All That Heaven Allows, The Soul, Written on the Wind, and others.]

[WOMNS 612 Population and Development in Asia (also R SOC 612) Spring. 3 credits. L. Williams. For description, see R SOC 612.]

[WOMNS 624 Epistemological Development and Reflective Thought (also EDUC 614) Fall. 3 credits. D. Schrader. For description, see EDUC 614.]

[WOMNS 625 Self and Interpersonal Development (also EDUC 615) Spring. 4 credits. D. Schrader. For description, see EDUC 615.]

WOMNS 670 Feminist Political Theory (Graduate Seminar) (also GOVT 671) Fall. 4 credits. N. Hirschmann. For description, see GOVT 671.

WOMNS 671 Feminist Methods (also R SOC 671) Fall. 4 credits. S. Feldman. For description, see R SOC 671.

WOMNS 699 Topics in Women's Studies Fall and spring. Variable credits. Staff. Independent reading course for graduate students on topics not covered in regularly scheduled courses. Students develop a course of readings in consultation with a faculty member in the field of Women's Studies who has agreed to supervise the course work.

vacant, vice president for financial affairs and university controller
J. Robert Cooke, dean of the university faculty
Walter I. Cohen, vice provost
Cutberto Garza, vice provost
Robert L. Harris, Jr., vice provost
Robert C. Richardson, vice provost
Mary J. Sansalone, vice provost
John Silcox, vice provost

It is the policy of Cornell University actively to support equality of educational and employment opportunity. No person shall be denied admission to any educational program or activity or be denied employment on the basis of any legally prohibited discrimination involving, but not limited to, such factors as race, color, creed, religion, national or ethnic origin, sex, sexual orientation, age, or handicap. The university is committed to the maintenance of affirmative action programs that will assure the continuation of such equality of opportunity. Sexual harassment is an act of discrimination and, as such, will not be tolerated. Inquiries concerning the application of Title IX can be referred to the director of the Office of Workforce Diversity, Equity, and Life Quality, Cornell University, 1017 Day Hall, Ithaca, NY 14853-2801 (telephone: 607 255-4076; TDD: 607 255-7060).

Requests for information about services for Cornell faculty and staff members, applicants for employment, and visitors with disabilities who have special needs, as well as related questions or requests for special assistance, can be directed to the Office of Workforce Diversity, Equity, and Life Quality, Cornell University, 1017 Day Hall, Ithaca, NY 14853-2801 (telephone: 607 255-4076; TDD: 607 255-7060). Students with disabilities should contact Student Disability Services, Center for Learning and Teaching, Cornell University, 405 Computing and Communications Center, Ithaca, NY 14853-2601 (telephone: 607 254-5454; TDD: 607 255-7665).

For Cornell University directory information or general information, call 607 255-2000 or 607 254-INFO. The web page for 2001-2002 Courses of Study has been made available at cuinfo.cornell.edu/Academic/Courses/.

To obtain a copy of this catalog, please follow these guidelines:

If you are a prospective undergraduate student and do not have web access, please contact the Undergraduate Admissions Office, Cornell University, 410 Thurston Ave., Ithaca, NY 14850-2488, 607 255-5241.

If you are a prospective graduate student, please consult the listing of the course catalog on the web (see above for address).

If you are a currently enrolled student, please contact your college registrar.

All others please contact the Office of the University Registrar, Cornell University, 107 Day Hall, Ithaca, NY 14853-2801, 607 255-4242.
