Jane Austen and zombies, A Christmas Carol in 3D, an orgy of PBS miniseries: why is it means to be a human being in theater. From there is a long tradition of "discovering" what it means to be a human being in theater. From Schönberg to the 1990s, often pairing a literary original with its filmic adaptation. We will be many craft lessons discussing narrative techniques, especially those used in film. We will watch a clip and break the scene down to figure out how a director is manipulating the narrative to tell a story. Then we will see the same manipulation being pulled off, only this time within a different medium, on paper. Good storytelling is good storytelling, and the same narrative techniques or, better said, tricks that are used in film can be applied to our fiction.

ENGL 3745 Fiction and Film Noir (also FILM 3745) (LA-AS)
Fall. 4 credits. I. Balfour.
Detectives, blondes, hired guns, cheap booze, and city streets "dark with something more than night": this course takes up examples of film noir and noir fiction, mostly from the 1940s and 1950s, often pairing a literary original with its film adaptation. We will be interested in the traffic between literature and film, as well as the specificity of the medium. Singular examples are read in the light of notions of "noir" as a genre and a style. Texts from Patricia Highsmith, Raymond Chandler, James Cain, and others are paired with films by Hitchcock, Hawks, the Coen Brothers, and more. Topics to include: corruption (governmental, individual), betrayal, guilt, the lures of ambiguity, the more or less mythical femme fatale, and other matters of life and death.

ENGL 3750 Studies in Drama and Theatre: 20th-Century Drama: Theatres of Selfhood (also THETR 3750) (LA-AS)
Spring. 4 credits. P. Lorenz.
There is a long tradition of "discovering" what it means to be a human being in theater. From the tragedies of Sophocles and Shakespeare that were so important to Freud, through Schiller's understanding of "the stage as a moral institution," to the alienation effect.
ENGL 3751 Magical Realism Revisited (CA-AS)

ENGL 3762 Law and Literature: The Jury as Audience (CA-AS)
Fall. 4 credits. B. Meyler.
The jury is purportedly "the bulwark of democracy," but it has also been seen as the most potentially destabilizing component of the Anglo-American legal system. Literature, drama, and TV crime shows have helped to form these competing views of the jury. How and why have plays compared jurors with spectators? How were 19th-century trial reports like不像 novels, and how did jurors read both? Has the alleged "CSI effect" really made contemporary American juries demand more forensic evidence? This course will explore these and related questions in historical and legal context. Works studied may include Shakespeare's Titus Andronicus, Daniel Defoe's Moll Flanders, Wilkie Collins's The Law and the Lady, Susan Glaspell's A Jury of Her Peers, Anna Deavere Smith's Twilight: Los Angeles, and CSI.

ENGL 3765 Literature of the Black Atlantic (also ASRC 3765) (LA-AS)
Spring. 4 credits. D. Woiwode.
This course will examine literature from the contemporary black Atlantic world, including Africa, the Caribbean, Europe, and North America. We will ask: what are the salient themes that define the writing of contemporary black authors? What are the different articulations of blackness that emerge in this wide constellation? What forms of differentiation, race, gender, sexuality, etc.—inform contemporary black identities? How are the different modes of globalization, such as satellite media, altering the intercourse between the various black Atlantic worlds? Authors will include Toni Morrison, Jamaica Kincaid, Thomas Glave, Edwidge Danticat, Derek Walcott, Isaac Julien, Ben Okri, Uzodinma Iweala, and Dinaw Mengistu.

ENGL 3773 The Harlem Renaissance and the Black Arts Movement (also AMST 3773) (CA-AS)
Spring. 4 credits. M. Crawford.
How do visual art, theater, music, poetry, and novels come together in particular cultural movements? How does the modernism of the 1920s and '30s differ from the experimentations that shaped the 1960s and '70s? How are artists influenced by social movements? How does art influence the very direction of social movements? This course will compare the 1920s and '30s Harlem Renaissance and the 1960s and '70s Black Arts movement. Both social movements produce a stunning interplay of words, images, music, dance, assimilation, and resistance. The selected artists may include Josephine Baker, Nella Larsen, Langston Hughes, Sun Ra, James Brown, Amiri Baraka, Gil Scott-Heron, Nikki Giovanni, Romare Bearden, and the AfriCobra collective.

ENGL 3790 Reading Nabokov (also RUSL 3385) (LA-AS)
Fall. 4 credits. G. Shapiro.
For description, see RUSL 3385.

ENGL 3801 Poetry and Poetics of the Americas (also COML/SPAN/LATA 3800, AMST 3820) (LA-AS)
Fall. 4 credits. J. Monroe.
For description, see COML 3800.

ENGL 3810 Reading as Writing (LA-AS)
See complete course description in section headed "Critical Writing and Literary Nonfiction."

ENGL 3820-3830 Narrative Writing (LA-AS)
See complete course description in section headed "Creative Writing."

ENGL 3840-3850 Verse Writing (LA-AS)
See complete course description in section headed "Creative Writing."

ENGL 3860 Philosophic Fictions (LA-AS)
See complete course description in section headed "Critical Writing and Literary Nonfiction."

ENGL 3880 The Art of the Essay (LA-AS)
See complete course description in section headed "Critical Writing and Literary Nonfiction."

ENGL 3980 Latina(o) Popular Culture (also LSP 3980, AMST 3981) (CA-AS)
Fall. 4 credits. M. P. Brady.
This course will explore Latino/a cultural work including music, film, websites, comics, television, lowriders, and art. We will consider how this work emerges in the context of U.S. engagements with Latin America and in the context of struggles for social and economic, noneconomic equality among ethnoric racial groups in the United States. We will also study the relationship between cultural production, representation, and public policy. U.S. Latino/a history is strongly recommended as a prerequisite, but not required.

Courses for Advanced Undergraduates

Courses at the 4000 level are open to juniors and seniors and to others by permission of instructor unless other prerequisites are noted.

ENGL 4020 Literature as Moral Inquiry (KCM-AS)
Fall. 4 credits. S. Mohanty.
What can literary works, especially novels, tell us about moral issues? Should they be seen as suggesting a form of moral inquiry similar to the kind of philosophical discussion we get in, say, Aristotle's Nicomachean Ethics? Can reading philosophical works in ethics together with novels that deal with similar themes help us understand these themes better? This course is an attempt to answer these questions. We will read selections from Aristotle, Kant, Marx, and Nietzsche, and use these works to help understand the nature of moral inquiry in novels like Elie's Night and the Eagle's Mishlamech, Coetzee's Disgrace, Morrison's Beloved, Woolf's Mrs. Dalloway, Conrad's Heart of Darkness, and Achebe's Things Fall Apart. Other writers we will most probably read include Nadine Gordimer, Doris Lessing, and Kazuo Ishiguro.

Fall. 4 credits. Next offered 2012–2013. R. Gilbert.

ENGL 4050 The Politics of Contemporary Criticism (LA-AS)

ENGL 4075 Secularism and Its Discontents (also RELST/GOVT/SHUM 4845)
Fall. 4 credits. E. Anker.
For description, see SHUM 4845.

ENGL 4076 The Poetics of Capital (also SHUM 4841)
Fall. 4 credits. J. Clover.
For description, see SHUM 4841.

ENGL 4077 Yellowface (also FILM/AAS/SHUM 4954, COML 4068)
Spring. 4 credits. Y. Huang.
For description, see SHUM 4954.

ENGL 4090 Theories of Popular Culture (also ENGL 6090) (CA-AS)
Fall. 4 credits. J. Jaffe.
Why study popular culture? Although it is often equated with mass culture and perceived to be unworthy of academic study, this course argues that popular culture is an important site for the production of both pleasure and politics. We consider a range of theoretical approaches and read a spectrum of cultural critics and theorists, from those who equate the popular with the "folk" and the marginalized to those who explore the highly mediated and commercialized aspects of the popular. We look across media and its sites—television, film, the porn industry, baseball, popular music, and Starbucks coffee shops. Studies of texts will be located in economic, political, and social contexts. Also, we ask what feelings of desire, pleasure, fear, and disgust does popular culture generate?

ENGL 4140 Bodies of the Middle Ages: Embodiment, Incarnation, Performance (also FGSS 4140) (LA-AS)
Spring. 4 credits. May be used as one of the three pre-1800 courses required of English majors. Next offered 2012-2013. M. Raskolnikov.

ENGL 4170 The Archaeology of the Text from Chaucer through the Renaissance (also ENGL 6170) (HA-AS)
Fall. 4 credits. May be used as one of the three pre-1800 courses required of English majors. Next offered 2012–2013. A. Galloway.

ENGL 4200 Renaissance Humanism (also ENGL 6240, COML 4520/6520) (LA-AS)
Spring. 4 credits. W. Kennedy.
For description, see COML 4520.

ENGL 4210 Shakespeare in (Con)Text (also THETR 4460, VISST 4546) (LA-AS)
Fall. 4 credits. B. Levitt.
For description, see THETR 4460.
ENGL 4211 Advanced Seminar in the Renaissance: Literature, Science, and Renaissance Curiosities # (LA-AS)
Fall. 4 credits. May be used as one of the three pre-1800 courses required of English majors. Next offered 2011–2012. J. Mann.

ENGL 4212 Literature and the Scientific Revolution in England # (LA-AS)
Spring. 4 credits. J. Mann.

I have nothing but on the faith of my eyes": Francis Bacon. This declaration became a central tenet of philosophical inquiry during the 17th century, as gentlemen and artisans began to collect specimens, dissect bodies, and survey the physical universe. This course explores how the new experimental "science" reverberated in imaginative productions in the age of Shakespeare and Milton. How did poetry and fiction find room for the growing domain of "fact"? Why did Englishmen focus this new scientific gaze on "curiosities" such as the human cadaver, the hermaphrodite, and the New World Indian? In surveying the major developments in English scientific thought before the Enlightenment, the interdisciplinary readings in this course will also introduce students to important literary and philosophical texts from the Renaissance.

ENGL 4270 Advanced Seminar in Shakespeare: Shakespeare and Marlowe (also THETR 4270) # (LA-AS)
Fall. 4 credits. Next offered 2011–2012. B. Correll.

ENGL 4450 Text Analysis for Production: How to Get from the Text onto the Stage (also THETR 4450)
Spring. 4 credits. B. Levitt.

For description, see THETR 4450.

ENGL 4500 History of the Book # (LA-AS)
Spring. 4 credits. K. Reagan.

This course provides an overview of the book as a material and cultural artifact. Focusing on the era of the printed book (post-1450) in Europe and America, we examine the invention and spread of printing and publishing, and the evolution of book design, illustration, and binding. The course places an emphasis on practical tools for the identification and analysis of books and other printed artifacts, especially for literary students. Investigations and assignments are built around hands-on interaction with examples of Cornell Library's rare books, manuscripts, and related materials. This course meets in the Carl A. Kroch Library.

ENGL 4507 Black Women Writers (also ASRC/FGSS 4507) (LA-AS)
Spring. 4 credits. C. Boyce Davies.

For description, see ASRC 4507.

ENGL 4508 The Harlem Renaissance (also ASRC 4508) (LA-AS)
Fall. 4 credits. Next offered 2011–2012. R. Richardson.

ENGL 4509 Toni Morrison's Novels (also ASRC 4509) (LA-AS)

ENGL 4515 Ariosto, Rabelais, Spenser (also ENGL 6515, COML/ROMS 4515/6515) (LA-AS)

ENGL 4530 20th-Century Women Writers of Color (also AAS/FGSS 4530) (LA-AS)
Fall. 4 credits. Next offered 2012–2013. S. Wong.

ENGL 4580 Imagining the Holocaust (also CONL 4630, GERST 4570, JWST 4563) (LA-AS)
Spring. 4 credits. D. Schwarz.

What is the role of the literary imagination in keeping the memory of the Holocaust alive for our culture? We shall examine major and widely read Holocaust narratives that have shaped the way we understand and respond to the Holocaust. We shall begin with first person reminiscences—Wiesel's Night, Levi's Survival at Auschwitz, and The Diary of Anne Frank—before turning to realistic fictions such as Keneally's Schindler's List (and Spielberg's film), Kertesz's Fatales, Kosinski's The Painted Bird, and Ozick's "The Shawl." We shall also read the mythopoeic vision of Schwarz-Bart's The Last of the Just, the illuminating distortions of Epstein's King of the Jews, the Kafkaesque parable of Appelfeld's Badesheim 1939, and the fantastic cartoons of Spiegelman's Maus books.

ENGL 4600 Melville (also AMST 4600) # (LA-AS)
Fall. 4 credits. B. Maxwell.

An American whose life and writing ranged over the globe, Herman Melville (in the estimation of C.L.R. James) "saw the tendency of things." Our study of the fiction and poetry will turn on some of those "things" of modernity that most obsessively engaged Melville's representational and critical capacities—slavery, illegitimate authority, exterminationist policy directed against American Indians; capitalism, orphanhood and homelessness; imperialism; the attempted occultation of women; the shifting terrain of male comradeship; and the ambivalent resort to religion. We will be interested in testing the premise that Melville charted the fault lines of his world with an "unenrolled" critical acuity unparalleled in United States literature.

ENGL 4601 Riddles of Rhythm (LA-AS)

ENGL 4610 The American Short Story: Where We've Been, Where We're Going (LA-AS)

ENGL 4620 The American Enlightenment (also AMST 4620)
Spring. 4 credits. May be used as one of the three pre-1800 courses required of English majors. M. Jonik.

This course is an interdisciplinary examination of the ideas that shaped American civil, cultural, and intellectual life, from late Puritanism to the emergence of Transcendentalism. Whereas many scholars have primarily dwelt on the political, religious, or historical aspects of what has come to be called "The American Enlightenment," we will explore how transatlantic exchanges of philosophy, poetry, natural science, medicine, etc. both reveal new contexts for understanding it, and themselves continue to challenge notions of revolution, slavery, sovereignty, empire, conceptions of the "human" and human rights, the body, natural and mental philosophy. In addition to works from Newton, Locke, Rousseau, Burke, Edwards, Franklin, Jefferson, and Paine, we will consider lesser-known texts from Cotton Mather, Cadwallader Colden, Samson Occam, Phillips Wheatley, and Olaudah Equiano.

ENGL 4631 ENTERING HISTORY, ENTERING FICTION: Gender, Race, and Nation in U.S. Fiction (also AMST/FGSS 4631) (LA-AS)
Fall. 4 credits. K. McCullough.

How have fictions of national identity been produced from diverse histories of the various peoples of the United States? Although categories of region, religion, and class figure in this national discourse, historically the terms of our internal difference have been understood primarily as those of ethnicity and race. In this course we will examine fiction and historical texts that engage in this conversation. We'll start by examining historical formations of categories of race and ethnicity, as well as some histories of entry of peoples into the United States. We'll also explore questions of gender's role in ethnic/racial identity; of race and gender's impact on citizenship; and of history's role as a tool for cultural survival and transformation, for accommodation and resistance to dominant norms. Readings from Alcott, Chopin, Chesnutt, and others.

ENGL 4640 Gossip (also ENGL 6640, THETR 4440/LAW/COML/ROMS/ASRC 4640) (LA-AS)
Spring. 4 credits. N. Salvato.

For description, see THETR 4440.

ENGL 4660 James on Film (LA-AS)
Spring. 4 credits. D. Fried.

Henry James's psychologically probing tales of betrayal, delusion, and tragically misdirected freedom pose a powerful challenge for screen adaptation. Analysis of selected films based on James's novels involves close reading of these extraordinary texts as well as examination of screenplay form, verbal and visual styles of narrative, and larger questions of the expectations of moviemakers and readers. Study of James's aspirations as a dramatist, his writings on theater, photography, painting, and fiction, and controversies about the interpretation of the novels contribute to understanding how James's stories have been retold by filmmakers. Novels/films may include Daisy Miller, Washington Square/The Heiress, The Bostonians, The Turn of the Screw/The Innocents, or The Portrait of a Lady or The Wings of the Dove.

ENGL 4662 Contemporary American Indian Poets (also AMST 4662) (LA-AS)

ENGL 4671 International Cultural Studies 1970 to Present (also ASRC 4671) (LA-AS)
Spring. 4 credits. G. T. Corbett.

This course will explore the internationalization of the field that marked Cultural Studies endeavors from the 1970s on, especially its articulation in sites such as Australia, the Far East (Hong Kong, among other centers) and, of course, the United States. How has the global reach of Cultural Studies changed how we think about culture, about the constructions of group identity, and about the social conditions under which artifacts are consumed and assigned value? The animating question for this course is: what is the standing of Cultural Studies for our moment? How can Cultural Studies provide us with the analytical tools for thinking about how we engage the world on an everyday basis?
American women writers of the mid- to late 20th century. We will look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region, and class. Readings may include work by Leslie Marmon Silko, Sandra Cisneros, Theresa Hak Kyung Cha, Jamaica Kincaid, Gwendolyn Brooks, Ann Petry, Fae Myenne Ng, Carolivia Herron, Helena Maria Viramontes, and Shani Mootoo. Course requirements will include class presentations, short responses to the readings, and a longer research essay.

ENGL 4920 Honors Seminar II Spring. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

Who are the “authentic” Romantics? Looking for an authentic voice when we read dates back to the Romantic period. In this seminar we will examine how the idea of authenticity appears in works by William Wordsworth, Percy Bysshe Shelley, John Keats, and a “pre-Romantic,” Jean-Jacques Rousseau. Rousseau’s Confessions subordinate the concept of truth versus falsehood to the concept of truth as authenticity. Wordsworth’s autobiographical poem, The Prelude, aims at authentically representing “the growth of a poet’s mind.” Shelley and Keats pursue other conceptions of an authentic language. We will look closely at how these texts raise questions about the self and language. Three papers, developing skills necessary for writing an Honors thesis.

Following the lead of Richard Hofstadter’s classic 1964 essay “The Paranoid Style in American Politics,” this course will examine the “paranoid style” in contemporary American fiction and film. The paranoid and plots we will encounter vary considerably (personal paranoia, political conspiracies, governments turned enemy, surveillance technology run amok, apocalyptic-millennial paranoia). Yet when viewed together they seem to cohere as a distinct style within post-WWII American narrative. We will ask how paranoid style responds to the contemporary American context and how the fears dominating these narratives shape their aesthetic form. Why has paranoia arisen as such a distinctively American attitude? What is the paranoid afraid of? (Should we be paranoid, too?) Novels by Nabokov, Pynchon, Reed, Dick, DeLillo, Didion, Roth; films by Coppola, Romero, Bigelow, Baldwin.

ENGL 4930 Honors Essay Tutorial I Fall or spring. 4 credits. Prerequisites: senior standing and permission of director of the Honors Program.

ENGL 4940 Honors Essay Tutorial II Fall or spring. 4 credits. Prerequisites: ENGL 4930 and permission of director of the Honors Program.

ENGL 4950 Independent Study Fall or spring. 2–4 credits. Prerequisites: permission of departmental advisor and director of undergraduate studies.
Feminist, Gender, & Sexuality Studies

Program Offerings

Feminist, Gender, & Sexuality Studies (FGSS) offers an undergraduate major, an undergraduate minor, and a graduate minor. Undergraduate students in the College of Arts and Sciences who wish to major in FGSS may apply directly to the program. Undergraduate students in other colleges at Cornell will need to work out special arrangements and should speak to FGSS's director of undergraduate studies (DUS).

The Undergraduate Major: FGSS

1. Prerequisite courses: Before applying to the major, the student must complete any two FGSS courses with a grade of B– or better. For FGSS courses that are cross-listed with another department, students may register through FGSS or the cross-listing department. Suggested entry-level courses include any FGSS course at the 2000 level, especially 2010 and 2020, both of which are required for completion of the major. FGSS courses at the 2000 level or above may count as both prerequisite and as part of the FGSS major. First-year writing seminars may count as prerequisites but not as part of the major.

2. Required course work:
   a. A minimum of 36 credits in FGSS courses with a grade of C– or higher is required for the major. For FGSS courses that are cross-listed, students may register through FGSS or the cross-listing department.
   b. These 36 credits must include the following three courses:
      - FGSS 2010 Introduction to Feminist, Gender, and Sexuality Studies
      - FGSS 2020 Introduction to Feminist, Gender, and Sexuality Theories
      - FGSS 4000 Senior Seminar in Feminist, Gender, and Sexuality Studies
   c. The 36 credits must also include at least one FGSS course with a significant focus on each of the following three categories: (Note: Although a given course may satisfy one, two, or even three of these categories, a given student must take at least two courses to fulfill this requirement):
      - Lesbian, Gay, Bisexual, and Transgender (LGBT) studies
      - Intersectional structures of oppression: race, ethnicity, and/or class (ISO)
      - Global perspectives: Africa, Asia, Latin America, or Middle East, by itself or in a comparative or transnational framework (GLOBAL)

A student with a double major may count up to three FGSS courses toward the FGSS major that she/he is simultaneously counting toward a second major.

The Honors Program: To graduate with honors, a student majoring in FGSS must complete a senior thesis under the supervision of an FGSS faculty member and defend that thesis orally before an honors committee. To be eligible, a student must have at least a cumulative 3.0 GPA in all course work and a 3.5 GPA in all courses applying to their FGSS major. Students interested in the honors program should consult the DUS late in the spring semester of their senior year, or very early in the fall semester of their senior year.

The FGSS Undergraduate Minor

Undergraduate students in any college at Cornell may minor in Feminist, Gender, & Sexuality Studies in conjunction with a major defined elsewhere in the university. The minor consists of five FGSS courses with a grade of C– or higher, through FGSS or the cross-listing department that are completed with a grade of C– or above, none of which may be counted toward the student's non–FGSS major. An exception to this rule may be made for students in the contract colleges, who may petition the FGSS DUS to count one course from their major toward the FGSS minor. First-year writing seminars may not be included within the five required courses. Students wishing to minor in FGSS should see the DUS. The five courses required for the FGSS Undergraduate Minor must include:

- FGSS 2010 Introduction to Feminist, Gender, and Sexuality Studies
- FGSS 2020 Introduction to Feminist, Gender, and Sexuality Theories

Any FGSS course that satisfies at least one of the three categories required for a major as defined above.

Any two additional FGSS courses of the student's choice.
The LGBT Studies Undergraduate Minor
FGSS serves as home to the Lesbian, Gay, Bisexual, & Transgender (LGBT) Studies Program, which offers an undergraduate minor as well as a graduate minor. The undergraduate minor consists of four courses. For a complete listing of all courses that will fulfill this minor please see the LGBT Studies portion of this catalog.

1. First-Year Writing Seminars
FGSS 1060 FWS: Women and Writing
(also ENGL 1060)
Fall and spring. 3 credits. Staff.

2. Courses
FGSS 2010 Introduction to Feminist, Gender, and Sexuality Studies
(CA-AS)
Fall and spring. 4 credits. Fall, J. Juffer; spring, K. McCullough.
Feminist, Gender, & Sexuality Studies is an interdisciplinary program focused on understanding the impact of gender and sexuality on the world around us and on the power hierarchies that structure it. This course focuses mainly on the experiences, historical conditions, and concerns of women as they are shaped by gender and sexuality both in the present and the past. Students read a variety of texts, personal narratives, historical documents, and cultural criticism across a range of disciplines. In doing so, students consider how larger structural systems of both privilege and oppression affect individuals’ identities, experiences, and options, and simultaneously examine forms of agency and action taken by women in the face of these larger systems.

FGSS 2020 Introduction to Feminist, Gender, and Sexuality Theories
(CA-AS)
Spring. 4 credits. H. Hoechst.
This course introduces students to the ways that scholars in different disciplines analyze power, inequalities, and subjectivity. It examines theoretical models for analyzing gender and sexuality at the intersections of class, race, ethnicity, religion, and other organizing constructs of modern societies. The course approaches theory as a mode of enquiry that aims to challenge and change cultural, social, and historical assumptions that constrict the ways that we think about and live gender and sexuality. The course investigates how scholars in different disciplines use theory as a tool for analyzing relations of power. It will pay particular attention to ongoing debates in contemporary feminist and queer theory.

FGSS 2290 Intro to LGBT Studies
(also FREN 2290)
Fall. 4 credits. Conducted in English. Students with knowledge of French may take FREN 3000, which includes French disc sec, for an additional credit. Recommended for students considering minor in LGBT Studies. C. Howie.
This course serves to introduce students to the disciplines of lesbian, gay, bisexual, and transgender studies. We will address categories such as gender, queerness, identity, desire, and kinship, and pay close attention to the texts, families, and traditions that articulate these categories. We’ll read some of the classic texts of LGBT studies (such thinkers as Michel Foucault, Judith Butler, Eve Sedgwick, and Leo Bersani) alongside classic texts of LGBT literature (from France’s earliest literary “lesbian,” Madeleine de l’Aubeespine, to more recent cultural phenomena such as Brokeback Mountain and Alison Bechdel’s Fun Home).

FGSS 2510 Introduction to Women Writers
(also ENGL 2511) (LA-AS)
Spring. 4 credits. K. McCullough.
For description, see ENGL 2511.

FGSS 2511 Black Women to 1900
(also AMST/HIST 2511) # (HA-AS)
Fall. 4 credits. M. Washington.
For description, see HIST 2511.

FGSS 2512 Black Women in the 20th Century
(also AMST/HIST 2512) (HA-AS)
For description, see HIST 2512.

FGSS 2730 Women in American Society, Past and Present
(also AMST/HIST 2730) # (HA-AS)

FGSS 2760 Desire
(also COML/ENGL 2760, THETR 2780) (LA-AS)
Spring. 4 credits. E. Hanson.
For description, see ENGL 2760.

FGSS 2780 Body as Text: Pleasure and Danger
(also ENGL 2780) (LA-AS)
Fall. 4 credits. M. Raskolnikov.
For description, see ENGL 2780.

FGSS 2840 Sex, Gender, and Communication
(also COMM 2840)
Fall. 3 credits. Next offered 2011–2012. L. Van Buskirk.

FGSS 3070 African American Women in Slavery and Freedom
(also AMST/HIST 3030) # (HA-AS)

FGSS 3130 Special Topics in Drama and Performance
(also ASRC/THETR 3130)
Fall and spring. 4 credits. Fall, S. Warner; spring, H. Yan.
For description, see THETR 3130.

FGSS 3210 Sex and Gender in Cross-Cultural Perspective
(also ANTHR 3421) @ (SBA-AS)
Fall. 4 credits. K. March.
For description, see ANTHR 3421.

FGSS 3220 Women in Ancient Israel
(also JWST 3620, NES/RELST 3720) Fall. 4 credits. L. Monroec.
For description, see NES 3720.

FGSS 3221 Lives of Scientists and Engineers
(also STS 3221) (HA-AS)
Spring. 4 credits. M. Rossiter.
For description, see STS 3221.

FGSS 3250 Queer Performance
(also THETR 3260) (LA-AS)

FGSS 3370 Contemporary American Theater
(also THETR/AMST 3370) (LA-AS)

FGSS 3440 Male and Female in Chinese Culture and Society
(also ANTHR 3554) @ (SBA-AS)
Fall. 4 credits. Next offered 2012–2013. S. Sangren.

FGSS 3450 American Film
(also AMST/ENGL/FILM 3440, VISST 3645) (LA-AS)

FGSS 3470 Asian American Women’s History
(also AAS/AMST/HIST 3470) (CA-AS)

FGSS 3480 Studies in Women’s Literature: Modern Women’s Literature
(also ENGL 3480) (LA-AS)
Fall. 4 credits. M. Crawford.
For description, see ENGL 3480.

FGSS 3500 Contemporary Issues in Women’s Health
(also PAM 3500)

FGSS 3510 Caribbean Literature
(also ASRC/ENGL 3510) @ (LA-AS)
Fall. 4 credits. C. Boyce Davies.
For description, see ASRC 3510.

FGSS 3530 Monsters A–X
(also FREN/COML 3530) # (CA-AS)
Spring. 4 credits. K. Long.
For description, see FREN 3530.

FGSS 3550 Decadence
(also COML/ENGL 3550) (LA-AS)

FGSS 3580 Theorizing Gender and Race in Asian Histories and Literatures
(also ASIAN 3388, COML 3980) @ (CA-AS)
Fall. 4 credits. N. Sakai.
For description, see ASIAN 3388.

FGSS 3590 Consuming Passions: Media, Space, and the Body
(also ENGL 3590) (CA-AS)
Spring. 4 credits. J. Juffer.
This course examines the intersections of gender, sexuality, space, and popular culture. Ranging across media—film, literature, television, and music—the class analyzes how these different forms represent and constitute gendered and sexed bodies. How does the Lifetime channel, for example, represent itself as a woman’s space? Spike as a man’s space? Are these distinctions breaking down, resulting in more hybrid genres? How do race, ethnicity, age, and class figure in? We connect media to sites of production, distribution, and consumption, such as the theater, the home, and cyberspace with particular emphasis on the affective and often passionate realm of

<td>Food, Gender, Culture (also ENGL 3721, AMST 3720) (LA-AS)</td>
<td>Fall. 4 credits. K. McCullough. In addition to nourishing the body, food operates as a cultural system that produces and reflects group and individual identities. In this class we will examine foodways—the behaviors and beliefs attached to the production, distribution, and consumption of food—to explore the way food practices help shape our sense of gender, race, sexual orientation, and national identity. In doing so we will focus primarily on literature and film but will also range into the fields of anthropology, sociology, and history. Some questions under discussion: How do factors such as gender, class, race, and religion shape the foods we eat and the circumstances in which we eat them? How do writers use the language of food to explore issues such as gender, sexuality, class, and race?</td>

[FGSS 4750] Senior Seminar in the 20th Century: Narratives of Loss (AIDS) (also ENGL 4750, AMST 4755)
D. Woubshet.

[FGSS 4791] Transgender and Transsexuality (also ENGL 4791)
Fall. 4 credits. Next offered 2011–2012.
M. Raskolnikov.

[FGSS 4912] Honors Seminar I: 20th-Century Women Writers (also AAS/ENG Lit 4910)
Fall. 4 credits. S. Wong.
For description, see ENGL 4910.

[FGSS 4950] Gender, Power, and Authority in England 1500–1800 (also HIST 4950) (LA-AS)
R. Weil.

[FGSS 4990/4991] Senior Honors Thesis
Fall and spring. 1–8 credits. Prerequisite: FGSS seniors only. Staff.
To graduate with honors, FGSS majors must complete a senior thesis under the supervision of an FGSS faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative GPA of 3.0 in all course work and a 3.3 average in all courses applying to their FGSS major. Students interested in the honors program should consult the DUS late in the spring semester of their junior year or very early in the fall semester of their senior year.

[FGSS 6040] Passionate Politics: Affect, Protest, Performance (also THETR 6060)
S. Warner.

[FGSS 6050] Camp, Kitsch, and Trash (also ENGL 6510, THETR 6050)
Fall. 4 credits. Next offered 2011–2012.
N. Salvato.

[FGSS 6060] Moral Psychology and Education (also EDUC 6160)
Fall. 3 credits. D. Schrader.
For description, see EDUC 6160.

[FGSS 6110] Devolution, Privatization, and the New Public Management (also AEM 6330, CRP 6120)
Fall. 4 credits. Next offered 2011–2012.
M. Warner.

[FGSS 6170] Feminist Methodology (also GOVT 6423)
Spring. 4 credits. S. Martin.
A feminist lens of analysis disrupts traditional categories that frame the questions we ask with implications for the answers that we find and how we find them. A sample of readings across the disciplines will allow us to explore how feminist scholarship has led to the reframing of big questions while stretching the boundaries of traditional methodological frontiers. This course seeks to familiarize students with primarily qualitative methodological tools to be applied to individual research questions.

[FGSS 6180] Psychology of Adolescence in Case Study (also EDUC 6170)
Spring. 3 credits. D. Schrader.
For description, see EDUC 6170.

[FGSS 6207] Black Feminist Theories (also ASRC/ENG Lit 6207, COML 6465)
Fall. 4 credits. Next offered 2011–2012.
C. Boyce Davies.

[FGSS 6232] Images of Women in Antiquity (also ARTH 6232, CLASS 7732)
A. Alexandridis.

[FGSS 6240] Epistemological Development and Reflective Thought (also EDUC 6140)
Fall. 3 credits. Next offered 2011–2012.
D. Schrader.

[FGSS 6260] Comparative History of Women and Work (also ILRIC 6360)
Spring. 4 credits. C. Boyce Davies.
For description, see ILRIC 6360.

[FGSS 6270] Parody (also THETR 6200)
Spring. 4 credits. N. Salvato.

[FGSS 6400] Historical Issues of Gender and Science (also HIST 6410, STS 6401)
Fall. 4 credits. Next offered 2012–2013.
S. Seid.

[FGSS 6420] Gossip (also THETR 6460, ENGL 6640)
Spring. 4 credits. N. Salvato.
For description, see THETR 6440.

[FGSS 6470] The Theatricality of Gender, Philosophy, and French Literature (also FREN 6470)
Fall. 4 credits. Next offered 2011–2012.
M. C. Vallois.

[FGSS 6510] Pan-Africanism and Feminism (also ASRC 6510)
Fall. 4 credits. C. Boyce Davies.
For description, see ASRC 6510.

[FGSS 6544] Gender and Politics (also GOVT 6544)
Fall. 4 credits. Next offered 2011–2012.
S. Martin and S. Mettler.

[FGSS 6551] Decadence (also ENGL 6551)
E. Hanson.

[FGSS 6580] Theorizing Gender and Race in Asian Histories and Literatures (also ASIAN 6888, COML 6680)
Fall. 4 credits. N. Sakai.
For description, see ASIAN 6888.

[FGSS 6700] Gender and Age in Archaeology (also ANTH/ARKEO 6269)
N. Russell.

[FGSS 6811] James Baldwin (also AMST/ENGL 6811)
Spring. 4 credits. D. Woubshet.

[FGSS 6990] Topics in Feminist, Gender, and Sexuality Studies
Fall and spring. Variable credit. Staff.
Independent reading course for graduate students on topics not covered in regularly scheduled courses. Students develop a course of readings in consultation with a faculty member in the field of Feminist, Gender, & Sexuality Studies who has agreed to supervise the course work.

GERMAN STUDIES
L. Adelson, B. Buettner, associate language program director; P. Gilgen, director of graduate studies; A. Groos, P. U. Hohendahl; C. Hosea (Dutch); G. Lischke, program director and director of undergraduate studies; G. Mathias; D. McBride; P. McBride; A. Schwarz, department chair; G. Waite. Emeritus: D. Batthrick, H. Deiner.
The Department of German Studies offers students a wide range of opportunities to explore the literature and culture of German-speaking countries, whether as part of their general education, a major in German Studies, a double major, or a German minor involving another discipline, or as preparation for graduate school or an international professional career. Courses are offered in German as well as in English; subjects range from medieval to contemporary literature and from film and visual culture to intellectual history, music, history of psychology, and feminist, gender, and sexuality studies.
The course offerings in German begin with GERST 1210–1220, 1230 (introductory language level). Students then continue with intermediate-level courses, which provide further grounding in the language and in German literature and cultural studies. GERST 2000 provides instruction for German in the culture of business, leading to certification. On the advanced level (3000 level or above), we offer thematically oriented courses that include intensive language work (3000–3200); literature and culture study courses in German, including the senior seminar; and seminars of interdisciplinary interest taught in English. Addressing a broad spectrum of topics in German culture, our courses appeal to German majors, minors, and other qualified students alike.
The department’s offerings in English begin with a series of first-year writing seminars introducing various aspects of German
literature (e.g., the fairy tale and Romantic consciousness or 20th-century writers such as Kafka, Hesse, Mann, Brecht), theorists such as Marx, Nietzsche, and Freud, issues in mass culture and modernity, problems of German national identity/ies, and cinema and society. Courses in German and English at the 3000 and 4000 levels explore such topics as the Faust legend, aesthetics from Kant to Heidegger, city topographies, Freud and his legacy, opera from Mozart to Strauss, the German novel, literature and philosophy, political theory and cinema, the Frankfurt School, migration and globalization, and feminist theory. It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

Sequence of Courses

Courses in German:

Introductory level: GERST 1210–1220, after completion, placement into GERST 1230 or 2000
Intermediate level: GERST 2000
Upper intermediate level: GERST 2020, 2040, and 2060
Advanced level: GERST 3010, 3020, 3060, 3070, 3080, 3100, and 4100

Courses taught in German that are numbered 3000 through 3200 focus on primarily language study; courses taught in German that are numbered 3210 through 3500 focus on studying literature and other forms of cultural expression.

Courses in German or English: further 3000- and 4000-level literature and culture courses (see course descriptions)

Advanced Standing

Students with an AP score of 4 or better can be granted 3 credits in German depending on placement test results. Students with an AP score of 3 or better, an LPG score of 65 or higher, or an SAT II score of 690 or higher must take the CASE exam for placement in courses above GERST 2000. Students coming to Cornell with advanced standing in German and another subject are encouraged to consider a double major or minor and to discuss the options with the director of undergraduate studies as early as possible.

Certificate in German Language Study

The Certificate in German Language Study is issued to recognize substantial language study beyond the GERST 2000 level in the Department of German Studies. Students are awarded the certificate after passing three German Studies courses held in German with a grade of B or above. Two of these courses must be at the 3000 level or above. No more than two of the three courses can be taken with the S–U option. Applications for the language certificate may be picked up in the Department of German Studies (183 Goldwin Smith Hall) in February.

Internships

The department works with the USA-Interns program to provide summer internships to qualified students with German companies and agencies. Interested students should contact the language program director, Gunhild Lischke (gls15@cornell.edu, G75

Goldwin Smith Hall, 255-0725), early in the fall semester.

Majors in German Studies

The department offers two options for the major: German literature and culture, and German area studies. The latter is a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines with those goals in mind. The department also encourages study abroad. For both majors, there is a wide variety of courses co-sponsored with other departments (Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Feminist, Gender, & Sexuality Studies).

The department encourages double majors and makes every effort to accommodate prospective majors with a late start in German. Students interested in a major should consult the director of undergraduate studies, Gunhild Lischke, G75 Goldwin Smith Hall.

German (Literature and Culture)

Students in this major select courses from the Department of German Studies and may use them to pursue individual interests in literature, film and visual culture, theater and performing arts, music, intellectual and political history, and gender studies, for example. Please consult with the director of undergraduate studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 2020, 2040, or 2060.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 3000-level courses with intensive language work (GERST 3000–3200) or the equivalent.

2. Complete six courses in the Department of German Studies at the 3000 level or above. One of these must be GERST 4100 Senior Seminar.

3. Select a faculty advisor from the department.

German Area Studies

Students select courses from the Department of German Studies as well as courses from a substantial German component from other departments, such as Comparative Literature; Government; History; Music; Theatre, Film, and Dance; and Feminist, Gender, & Sexuality Studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 2020, 2040, or 2060.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 3000-level courses with intensive language work (GERST 3000–3200) or the equivalent.

2. Complete six courses with a substantial German component at the 3000 level or above. Three of these must be in the Department of German Studies, including GERST 4100 Senior Seminar.

3. Select a committee of one or more faculty advisors to help formulate a coherent program of study. One of the advisors must be from the Department of German Studies.

Minor in German Studies

The undergraduate minor in German Studies is intended for students enrolled in any of the seven undergraduate majors at Cornell who wish to gain a broad understanding of the culture, literature, and society of German-speaking countries while they are refining their language competence. The minor is designed to provide for breadth while permitting flexibility to emphasize areas of interest in German studies.

To declare the minor, students must have completed GERST 2000 or equivalent. Students must complete a minimum of four courses at the 2000 level and above selected from the offerings of the German Studies Department. At least one of these courses must be taught in German at the 3000 level or higher. One of the four courses may be from another department as long as it has a substantial German component. No more than one course per semester taken as part of a study abroad program may be counted toward the minor. GERST 4510–4520 Independent Study may not be counted at all.

Interested students in the German Minor should consult with the department's director of undergraduate studies, Gunhild Lischke, G75 Goldwin Smith Hall.

Honors

Honors in German Studies are awarded for excellence in the major, which includes overall grade point average and completion of the honors thesis. Students are awarded either honors (cum laude), high honors (magna cum laude), or the highest honors (summa cum laude) in the program based on the advisors’ evaluation of the level and the quality of the work completed toward the honors degree. The honors distinction will be noted on the student's official transcript and will also be indicated on the student's diploma.

Prerequisites for admission. Students must have upperclass standing, an overall GPA of a B or higher, and a GPA of 3.5 or higher in the major. Students must first consult with the director of undergraduate studies in German Studies regarding eligibility for the honors program.

Procedure. Students who wish to be considered for honors ideally should apply to the director of undergraduate studies no later than the second term of the junior year. Students who are off campus in their junior year must apply by the third week of classes in the first semester of their junior year. Students should secure the consent of a faculty member to serve as the director of both the reading course (GERST 4530) and the writing of a thesis (GERST 4540). With the help of their thesis advisor, students choose an area of special interest and identify at least one other faculty member who is willing to serve on the honors committee. An oral thesis defense concludes the process.
Study Abroad in a German-Speaking Country

The Department of German Studies strongly supports study abroad as an opportunity for students to live and study in the German cultural context. The experience of living abroad promotes enduring personal growth, provides new intellectual perspectives through cultural immersion, and opens up academic and professional opportunities.

Students interested in studying abroad are encouraged to consider the Berlin Consortium, of which Cornell is a member. The program is run in conjunction with the Free University of Berlin and the Technical University of Berlin. Applicants are required to attend an orientation meeting. A six-week intensive pre-seminar on German and American culture is held at the Berlin Consortium center. A free placement test is offered.

Successful completion of GERST 1210, 1220, and 1230 satisfies Option 2.

Students interested in this or other study abroad options in Germany, Austria, or Switzerland should consult the language program director, Gunhild Lischke (G75 Goldwin Smith Hall, 255-0725, g15@cornell.edu).

First-Year Writing Seminars

Consult the John S. Knight Institute brochure for course times, instructors, and descriptions.

Courses Offered in German

GERST 1210 Exploring German Contexts I

Fall or spring. 4 credits. Intended for students with no prior experience in German or language placement test (LPG) below 37, or SAT II below 370. G. Matthias, and staff.

Students develop basic abilities in listening, reading, writing, and speaking German in meaningful contexts through interaction in small group activities. Course materials include videos, short articles, poems, and songs provide students with varied perspectives on German language, culture, and society.

GERST 1220 Exploring German Contexts II

Fall or spring. 4 credits. Prerequisite: GERST 1210, LPG 37–44, or SAT II 370–450. G. Matthias, G. Lischke, and staff.

Students build on their basic knowledge of German by engaging in intensive and more sustained study of the language. Students learn more advanced language structures allowing them to express more complex ideas in German. Discussions, videos, and group activities address topics of relevance to the contemporary German-speaking world.

GERST 1230 Exploring the German Economy

Fall or spring. 4 credits. Successful completion of GERST 1210, 1220, and 1230 satisfies Option 2. Prerequisite: study of German and LPG 45–55 or SAT II 460–580. Staff.

Students continue to develop their language skills by discussing a variety of cultural topics and themes in the German-speaking world. The focus of the course is on expanding vocabulary, reviewing major grammar topics, developing effective reading strategies, improving listening comprehension, and working on writing skills. Work in small groups increases the opportunity to speak in German and provides for greater feedback and individual help.

GERST 2000 Germany: Intercultural Context (CA-AS)

Fall or spring. 3 credits. Satisfies Option 1. Prerequisite: GERST 1230 or LPG 56–64 or SAT II 590–680, or placement by exam. Staff.

Context-based language course on the intermediate level. Students examine important aspects of present-day German culture while expanding and strengthening their reading, writing, and speaking skills in German. Materials for each topic are selected from a variety of sources (fiction, newspapers, magazines, and the Internet). Units address a variety of topics including studying at a German university, modern literature, Germany online, and Germany at the turn of the century. Oral and written work and individual and group presentations emphasize accurate and idiomatic expression in German. Successful completion of the course enables students to continue with more advanced courses in language, literature, and culture.

GERST 2020 Literary Texts and Contexts (LA-AS)

Fall. 3 credits. Satisfies Option 1. Prerequisite: GERST 2000 or equivalent or placement exam. Conducted in German. D. McBride.

Students in this intermediate course read and discuss a number of works belonging to different literary genres by major German-speaking authors such as Kafka, Walser, Brecht, Mann, Frisch, Dürenmatt, Bachmann, and others. They explore questions of subjectivity and identity in modern society, of human existence as existence in language, and of the representation of history in literary texts. Activities and assignments focus on the development of reading competency in different literary genres. Prerequisites: Proficiency in aural and reading comprehension, as well as speaking and writing skills, with emphasis on vocabulary expansion, advanced grammar review, and stylistic development. Recommended to students interested in a combined introduction to literature and high-level language training.

GERST 2040 Nazi Culture Through the Lens (CA-AS)

Fall. 4 credits. Satisfies Option 1. Prerequisite: GERST 2020, 2040, 2060, or placement exam. L. Kellogg.

Examines the influences of media, politics, and cultural responses and legacies relevant to spectatorial cultural production in the Third Reich.

GERST 3080 German Life Style 2.0 (CA-AS)

Spring. 4 credits. Satisfies Option 1. Prerequisite: GERST 2020, GERST 2040, GERST 2060, or equivalent or permission of instructor. Taught in German. This course may be counted toward the requirement for 3000-level language work in the major. G. Matthias.

In this course, we will encounter German culture of today in and through Web 2.0. No technical knowledge is required since, in the process, a solid base of knowledge concerning the use of media will be constructed. This knowledge will then be applied practically through class work on aspects of German culture visible in the World Wide Web. The highlight of the course will be an intercultural encounter with a German Class from the University of Osnabrück using Web 2.0 applications. In the produced content, students will become part of the Web 2.0 in German through an intercultural discussion of German life on the World Wide Web (WWW).

GERST 3430 How to Understand Understanding? Paul Celan's Poetry and Interpretation (also JWST 3430) (LA-AS) Spring. 4 credits. Satisfies Option 1. Prerequisites: any German course at 3000–3200 level or by placement exam. Taught in German. A. Glazova.

Paul Celan, arguably the most widely known poet writing in the German language after WWII, was once characterized by a hostile literary critic as the author of obscure, scandalously "hermetic" texts. Celan, however, insisted that his poems were open rather than hermetic. He believed his poetic task to consist in creating a language of witnessing; a language fit for preserving memories of the collective catastrophe. This language, with its hermetic structure, compact imagery, and surprising inner logic, poses a challenge to understanding, as it is "open for interpretation." Consequently, Celan's poems motivated many prominent thinkers and critics to seek new paradigms of interpretation. In this class, we will read Celan's poetic, prosaic, and theoretical texts in view of their literary, political, and historical significance. We will also read philosophical interpretations of Celan's texts, such as Jacques Derrida's "Shibboleth" and Maurice Blanchot's "The Last to Speak." Along with these thinkers, we will try, by way of reading Celan, to understand how we "understand" poetic texts. The language of reading and writing, and discussion in this seminar will be German.

GERST 4100 Senior Seminar: Prize-Winning German Prose (LA-AS) Fall. 4 credits. Satisfies Option 1. Senior seminar, texts and discussion in German. Prerequisites: any 3000-level course in German or equivalent or permission of instructor. Open to all students with an adequate command of German. A. Schwarz.

This seminar will focus on German literary works written by the three recent Nobel Prize winners Grass, Jelinek, and Herta Mueller. We will discuss the texts and the criteria of winning such prestigious awards. We will also include winners of other important literary awards, such as the Buchner and Bachmann prizes. Questions and topics: Do these works have qualities, formats, or topics in common? Who decides about "quality" in literature? Should the writing of literary works be awarded? Can literature be judged?

GERST 4170 Topics in German Philosophy (also PHIL 4240) Spring. 4 credits. M. Kosch. For description, see PHIL 4240.

GERST 4180 New German Literature: After the Wall (LA-AS) Spring. 4 credits. Satisfies Option 1. Prerequisite: any 3000-level course taught in German, or equivalent, or permission of instructor. Readings and discussion in German. Next offered 2011–2012. L. Adelson.

GERST 4430 Love as Fiction. German Novellas from Three Centuries Spring. 4 credits. Satisfies Option 1. Conducted in German. Prerequisite: any course at 3000 level taught in German or equivalent or permission of instructor. Readings and discussions in German. Next offered 2012–2013. A. Schwarz.

Courses conducted in English GERST 2250 Genius and Madness in German Literature (LA-AS) Summer, taught in first three weeks of six-week summer session. 3 credits. Taught in English. Does not count toward major or minor.

If you ever have thought that people of great achievement and ingenuity—such as great statesmen, artists, heroes, scientists—also exhibit a touch of madness, well, then you are not alone! Philosophers and poets for a few thousand years have contemplated the close kinship between madness and genius and have engaged in lively discussions about changing definitions of creativity as either ingenuity, inspiration, or insanity; as stemming from divine possession, originality, or fanatic enthusiasm. By reading philosophical and medical treatises, by examining texts of fiction and lyric poetry, as well as by including historical accounts, this course will find out when and why our culture decided to call a madman a genius and a genius mad. We shall trace the history of social and artistic transgression, and analyze when and why a culture considers great talent as "too different," as "pathological," or as "un-normal." You shall read texts ranging from Antiquity to the 18th and 20th centuries and encounter authors from Germany, France, Britain, and the United States. Guest lecturers from various Humanities departments will expand our view on genius as either a human condition, an artistic achievement and ingenuity—such as great

GERST 4350 Death of God (also FREN/HIST/JWST/RESLT 3342) (HA-AS) Fall. 4 credits. C. Robcis. For description, see HIST 3342.

GERST 3740 Opera and Culture (also MUSIC 3222) # (LA-AS) Next offered 2011–2012. A. Groos.

Advanced Undergraduate and Graduate Courses GERST 4050 Introduction to Medieval German Literature I # (LA-AS) 4 credits. Next offered 2012–2013. A. Groos.

GERST 4060 Introduction to Medieval German Literature II # (LA-AS) 4 credits. Prerequisite: GERST 4050 or equivalent or permission of instructor. Anchor course for the medieval period. Next offered 2012–2013. A. Groos.

GERST 4070 Teaching German as a Foreign Language Fall. 4 credits. Intended for graduate students preparing to teach German. G. Lischke. Designed to familiarize students with current ways of thinking in the field of applied linguistics and language pedagogy. Introduces different concepts of foreign language methodology as well as presents and discusses various techniques as they can be implemented in the foreign language classroom. Special consideration is given to topics such as planning syllabi, writing classroom tests, and evaluating students' performance. Participants conduct an action research project.

GERST 4150 Marx, Freud, Nietzsche (also COML 4250, GOVT 4735) # (CA-AS) Fall. 4 credits. Prerequisite: none. G. Waite. This is an introduction to the three "master thinkers" who have helped determine the discourses of modernity and post-modernity. We consider basic aspects of their work: (a) specific critical and historical analyses; (b) theoretical and methodological writings; (c) programs and manifestos; and (d) styles of argumentation, documentation, and persuasion. This also entails an introduction, for non-specialists, to essential problems of political economy, continental philosophy, psychology, and literary and cultural criticism. Second, we compare the underlying assumptions and the interpretive yields of the various disciplines and practices founded by Marx, Nietzsche, and Freud; (e) the historical materialism and communism, existentialism and power-knowledge analysis, and psychoanalysis, respectively. We also consider how these three writers have been fused into a single constellation, “Marx-Nietzsche-Freud," and how they have been interpreted by others, including L. Althusser, A. Badiou, A. Camus, H. Cixous, G. Deleuze, J. Derrida, M. Foucault, H.-G. Gadamer, M. Heidegger, L. Irigaray, K. Karatani, J. Lacan, P. Ricoeur, L. Strauss, S. Zizek. This is a lecture course but there will be plenty of time for discussion.
GERST 4200  Faust: Close Reading
(LA-AS)
Spring. 4 credits. Conducted in English.
G. Waite.
This is a close reading of Goethe's Faust (Parts I and II). Although our reading of
Goethe's masterpiece inevitably is informed by contemporary theoretical concerns (including
poststructuralism, deconstruction, psychoanalysis, feminism, gender and sexuality,
feminism, and Marxism) our approach will be primarily that of close reading. Each
week the amount of reading will be very small (sometimes only 10 or 15 lines at most)
but these lines we will read carefully.
Problems of translation will be crucial; annotated editions of the text will be available
in German and in English.

[GERST 4240  The Totalitarian Order: Vision and Critique (also GOVT 4255)
(CA-AS)]
Fall. 4 credits. Next offered 2011–2012.
P. U. Hohendahl.

[GERST 4260  The Animal (also COML 4240, ENGL 4260) (CA-AS)]

[GERST 4280  Genius and Madness in German Literature (LA-AS)]
Next offered 2011–2012. Offered as GERST 2250 in summer 2010 to introduce students to
German literature in a course surveying several centuries. Summer course will not
count toward the German major requirements. A. Schwarz.

GERST 4310  Theory of Theatre and Drama (also THETR 4310/6310) #
(LA-AS)
Fall. 4 credits. H. Yan.
For description, see THETR 4310/6310.

[GERST 4410  Introduction to Germanic Linguistics (also LING 4441) (HA-AS)]

GERST 4510–4520  Independent Study
4510, fall; 4520, spring. 1–4 credits each semester. Prerequisite: permission of
instructor.

GERST 4530  Honors Research
Fall. Staff.

GERST 4540  Honors Thesis
Spring. 8 credits. Prerequisite: GERST 4530. Staff.

GERST 4570  Imagining the Holocaust
(also COML 4830, ENGL/JWST 4580)
(LA-AS)
Spring. 4 credits. D. Schwartz.
For description, see ENGL 4850.

[GERST 4960  Theorizing the Public Sphere
Next offered 2012–2013. P. U. Hohendahl.]

Graduate Courses

Note: For complete descriptions of courses numbered 6000 or above consult the
appropriate instructor.

[GERST 6030  Literature of Fascism and Anti-fascism
Fall. 4 credits. Next offered 2011–2012.
P. McBride.]

GERST 6131  German Philosophical Texts
(also PHIL 6030)
Fall and spring. 1–4 credits, variable.
M. Kosch.
For description, see PHIL 6030.

[GERST 6140  The Man without Qualities and Theories of Narration (also
COML 6141)
P. McBride.]

[GERST 6150  Jews in German Culture Since 1945
L. Adelson.]

GERST 6160  Spaces of Literature (also COML 6130)
Spring. 4 credits. Discussion in English; texts available in both German and
English. A. Schwarz.
The seminar examines how space is represented in literary texts and pursues the
question whether literary language can be connected to spatial features that are unique
to prose, poetry and other poetic discourses. We shall review the tradition of literary
representations of space by discussing topics such as "the aesthetics of space," "landscape
and garden architecture," "the sublime," "the relationship between corporeality and external
worlds," "space and memory/commemoration," "distinctions between space, place, locale,
psychic and physical spaces." Ranging from antiquity to contemporary literary and
theoretical texts the seminar will approach "space" as a phenomenon that changes its
shape with changing analytical or poetic approaches while simultaneously changing the
shape of the inquiring or representing discourse. Other guiding questions will be:
does literature take on spatial forms? Is poetic language dependent on spatial orientation?
Does literature create space? Literature, philosophy, psychoanalysis will be the
disciplinary spaces under discussion. Readings include Aristotle, Plato, Longinus, Kant,
Goethe, Hölderlin, Novalis, E.T.A. Hoffmann, Stifter, Nietzsche, Benn, Heidegger, Freud,
Rilke, Bernhard, Bacheler, Blanchnot.

[GERST 6180  The Science of the Experience of Consciousness: Hegel's Phenomenology of Spirit (and Beyond) (also COML 6180)

[GERST 6190  Introduction to Systems Theory (also COML 6185)

Fall. 4 credits. Limited to 15 students. Next

[GERST 6220  Cultural Pessimism and the Fin-de-Siécle

[GERST 6270  Baroque
G. Waite.]

[GERST 6290  The Enlightenment

GERST 6300  Classicism and Idealism
Spring. 4 credits. Anchor course. Texts in
German. P. U. Hohendahl.

An introduction to some of the major poetic and philosophical texts generally considered
to be part of the period of German Classicism (1785–1805), while at the same time giving
reasons to call into question notions of periodization and the canon, particularly as
they have excluded women and lower social
classes. In addition to the basic problem of the appropration of classic antiquity at a time
marked by the transition to bourgeois modernity, special consideration will be given
to the emergence of modern aesthetic theory as well as its impact on literary production
and reception. Specifically the seminar will focus on the problem of subject formation in
the context of modernity as it is expressed in the concept of Bildung. Special emphasis will
be placed on the gendering of this concept. Readings will be taken from the works of
Goethe, Herder, Humboldt, Kant, Moritz, and Schiller among others. While the main focus
of the seminar will be on primary texts, we will also consider contemporary criticism of
the concept of Classicism and its problems.

GERST 6310-6320  Reading Academic German I and II
6310, fall; 6320, spring. 3 credits each semester. Prerequisites: graduate standing;
for GERST 6320, GERST 6310 or equivalent. Staff.
Intended primarily for beginners with little or no previous German knowledge. Emphasis in
6310 on acquiring basic German reading skills. Emphasis in 6320 on development of the
specialized vocabulary of student's field of study.

[GERST 6340  German Romanticism
G. Waite.]

[GERST 6370  19th-Century Fiction: The Realist Project
Spring. 4 credits. Anchor course. Next
offered 2012–2013. A. Schwarz.]

[GERST 6380  Readings of Recollection
(also COML 6601)
Fall. 4 credits. Next offered 2013–2014.
P. Gilgen.]

[GERST 6420  Operatic States: Imagining Community in Music-Drama (also MUSIC 7223)
Fall. 4 credits. Next offered 2012–2013.
A. Groos.]

GERST 6470  German Literature from 1949 to 1989
Fall. 4 credits. Prerequisite: reading
knowledge of German. P. Gilgen.
This seminar/anchor course will focus on
German literature during the immediate
aftermath of World War II, the period of the
Cold War between 1949 and 1989, and the
period from the fall of the Wall to the present.
The point of the course will be to trace major
themes and styles in German-speaking
literature in Germany, Austria, and Switzerland
in light of contemporaneous events of broad
cultural and political significance. Individual
texts will be examined in detail within their
specific aesthetic, historical, and geopolitical
contexts. The course will be organized
comparatively around critical debates
concerning such topics as: the social function
of literature; programs and theories of
literature; fictional representations of the
immediate past; attempts by minority/majority
voices to challenge and change the canon;
writing and social change; questions
concerning national cultural identities;
literature in the age of the media system; the
politics of postmodernity and postcolonialism.
Readings may include authors such as Theodor W. Adorno, Jean Améry, Alfred Andersch, Ingeborg Bachmann, Gottfried Benn, Max Bense, Thomas Bernhard, Marcel Beyer, Peter Bichsel, Heinrich Boll, Wolfgang Bochert, Johannes Bobrowski, Bertolt Brecht, Hermann Burger, Rolf Dieter Brinkmann, Jürgen Habermas, Peter Handke, Martin Heidegger, Helmut Heiligenbüttel, Wolfgang Hildebrands, Peter Huchel, Thomas Hürlimann, Ernst Jannd, Karl Jaspers, Elfriede Jelinek, Ernst Jünger, Wladimir Kaminer, Sarah Kirsch, Thomas Kling, Ruth Kluger, Alexander Kluge, Wolfgang Koeppen, Christian Kracht, Thomas Mann, Friederike Mayröcker, Nielsden Meienberg, Gerhard Meier, Robert Menasse, Heiner Müller, Herta Müller, Adolf Muschg, Hans Erich Nossack, Emine Sevgi Özdamar, Oskar Pastior, Christoph Ransmayr, Arno Schmidt, Peter Schneider, W. G. Sebalb, Verana Stefan, Botho Straus, Marlene Streeruwitz, Yoko Tawada, Martin Walser, Peter Weiss, Urs Widmer, Christa Wolf, Feridun Zaimoglu.

**GERST 6480 Critical Theory and Literature: Lukács, Benjamin, Adorno**

**GERST 6500 The Culture of Weimar Germany**

**GERST 6530 Opera**

**GERST 6560 Aesthetic Theory: The End of Art (also COML 6560)**

**GERST 6580 Old Nigh German, Old Saxon (also LING 6646)**

**GERST 6600 Visual Ideology (also ARTH/VISST 6060, COML 6600)**
Fall. 4 credits. G. Waite.
Some of the most powerful approaches to visual practices have come from outside or from the peripheries of the institution of art history and criticism. This seminar will analyze the interactions between academically sanctioned disciplines (such as iconography and connoisseurship) and innovations coming from philosophy, psychoanalysis, historiography, sociology, literary theory, mass media criticism, feminism, and Marxism. We will try especially to develop: (1) a general theory of “visual ideology” (the gender, social, racial, and class determinations on the production, consumption, and appropriation of visual artifacts under modern and postmodern conditions); and (2) contemporary theoretical practices that articulate these determinations. Examples will be drawn from the history of oil painting, architecture, city planning, photography, film, and other mass media.

**GERST 6620 Reassembling Culture: Montage and Collage in Weimar Germany**

**GERST 6630 Nietzsche and Heidegger (also COML 6630)**
Fall. 4 credits. G. Waite.
This graduate seminar provides a basic introduction to the thinking of Nietzsche and Heidegger, and to the latter’s interpretation, and appropriation of the former. A major concern is the articulation of philosophy and politics, particularly in the case of Heidegger. We are also interested in the types of argument and styles of writing of both thinkers, including in light of the hypothesis that they were working in the ancient tradition of prudent exotericism, viz. that they never wrote exactly what they thought and that they intended their influence to come slightly beneath the level of conscious apprehension. We also consider their impact on the long list of intellectuals across the “Left-Center-Right” spectrum, including (depending on seminar-participant interest): Adorno, Agamben, Bataille, Badiou, Bourdieu, Butler, Derrick, Deleuze, Foucault, Gadamer, Irigaray, Kosssowski, Löweth, Marcuse, Rorty, Leo Strauss, Vattimo, Zupancic. The readings are provided in German (and French or Italian in some cases) and in English translations, when these exist. Discussion and papers in English. Students from all disciplines are welcome.

**GERST 6650 Heidegger’s Literature (also COML 6235)**
Fall. 4 credits. Next offered 2012–2013. A. Schwarz.

**GERST 6680 Literature and the Uncanny (also COML 6015, GOVT 6746, PHIL 6239)**
Fall. 4 credits. Next offered 2012–2013. A. Schwarz.
This graduate seminar provides a basic introduction to the thinking of Nietzsche and Heidegger, and to the latter’s interpretation, and appropriation of the former. A major concern is the articulation of philosophy and politics, particularly in the case of Heidegger. We are also interested in the types of argument and styles of writing of both thinkers, including in light of the hypothesis that they were working in the ancient tradition of prudent exotericism, viz. that they never wrote exactly what they thought and that they intended their influence to come slightly beneath the level of conscious apprehension. We also consider their impact on the long list of intellectuals across the “Left-Center-Right” spectrum, including (depending on seminar-participant interest): Adorno, Agamben, Bataille, Badiou, Bourdieu, Butler, Derrick, Deleuze, Foucault, Gadamer, Irigaray, Kosssowski, Löweth, Marcuse, Rorty, Leo Strauss, Vattimo, Zupancic. The readings are provided in German (and French or Italian in some cases) and in English translations, when these exist. Discussion and papers in English. Students from all disciplines are welcome.

**GERST 6710 Postcolonial Theory and German Studies**

**GERST 6760 Althusser and Lacan (also COML 6860, GOVT 6795, FREN 6230)**

**GERST 6870 Theories of Ideology (also HIST 6470)**
Spring. 4 credits. C. Robcis.
For description, see HIST 6470.

**GERST 6890 The Aesthetic Theory of Adorno**

**GERST 6940 Kant’s Political Reason (also COML 6015, GOVT 6746, PHIL 6239)**
Spring. 4 credits. P. Gilgen.
In this course, we will examine the political stakes of Kant’s philosophical revolution. We will compare the political consequences of Kantian epistemology and ethics with Kant’s writings that deal explicitly with questions of politics and political theory. The latter are, as is well known, considerably more tentative and less systematic. In addition, they pose some extremely difficult hermeneutic challenges. The main focus of our readings will be (1) Kant’s position regarding political revolutions and (2) his theory of cosmopolitanism.

**GERST 6960 Rites of Contact: Emergent German Literatures and Critical Method**

**GERST 7530-7540 Tutorial in German Literature**
7530, fall; 7540, spring. 1–4 credits each semester. Prerequisite: permission of instructor.

**Dutch**

**DUTCH 1210–1220 Elementary/Continuing Dutch**
1210 (elementary), fall; 1220 (continuing), spring. 4 credits each semester. Prerequisite: permission of instructor. C. Hosea.
Intensive practice in listening, speaking, reading, and writing basic Dutch in meaningful contexts. The course also offers insight into Dutch language, culture, and society.

**DUTCH 2030 Intermediate Dutch**
Fall. 3 credits. Satisfies Option 1. Prerequisite: DUTCH 1220 or permission of instructor. Offered in Dutch. C. Hosea.
Improved control of Dutch grammatical structures and vocabulary through guided conversation, discussions, compositions, reading, and film, drawing on all Dutch-speaking cultures.

**DUTCH 3000 Directed Studies**
Spring. 1–4 credits, variable. Prerequisite: permission of instructor. Conducted in Dutch. C. Hosea.
Individualized advanced Dutch studies. Provides students with individualized programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research, literature, and history in support of all disciplines.

**Swedish**

**SWED 1210 Elementary Swedish**
Fall. 4 credits. Staff.
Participants gain fundamental Swedish language proficiency and functional communication skills, as well as cultural insights into Sweden and its Nordic context. Oral and written expression and skills in listening and reading are developed in an interactive immersion classroom, enriched by a textbook, additive multimedia and textual materials, as well as practical activities using web tools. Brief podcasts introduce issues of current interest, and participants explore Swedish or Scandinavian language, culture, and society in guided portfolios. Intended for students without prior experience in Swedish.

**SWED 1220 Continuing Swedish**
Spring 4 credits. Prerequisite: SWED 1210 or equivalent Swedish language background. Staff.
Participants expand their proficiency in speaking, listening to, reading, and writing Swedish by working with online resources, texts, media, and cinema. The first part of the course is dedicated to topics such as leisure activities, education, government, community, seasonal festivities, and traditions. During the second half of the course, participants read and converse about level-appropriate fiction and engage with complementary materials. Particular attention is paid to functional oral and written communication, enrichment of language structures, and vocabulary (including developing an understanding of comnotative meaning dimensions), and mastering authentic Swedish materials at the adequate proficiency level. The course continues to explore the culture and societal conditions of Swedish-speaking settings, while discovering the
Swedish-American experience. All instruction is in Swedish.

**SWED 2030 Intermediate Swedish**
Fall. 3 credits. Satisfies Option 1.
Prerequisite: SWED 1220 or equivalent Swedish language background. Staff.
By studying the Swedish language alongside cultural and societal content, participants further enhance their skills of the forms and functions of Swedish at the intermediate level, while enriching stylistic and expressive variation in their use of Swedish and strengthening their understanding of Sweden and its culture. Topics of exploration and discussion may include Norse mythology, the Swedish popular music industry, history of the Scandinavian languages, corporate practices in Swedish-speaking contexts, contemporary diversification of Sweden, and Swedish design. An interactive classroom that fully immerses participants in the Swedish language is combined with reading a novel, media, film, music, selections from factual and literary texts (including Norwegian and Danish samples in original version), web activities, and virtual fieldwork. Participants are given opportunities to develop specialized interests in language and culture creatively in an online collaborative writing project and in guided portfolios.

**SWED 3000 Directed Studies**
Fall. 1–4 credits. Variable. Prerequisite: permission of instructor. Times TBA with instructor. C. Alm.
Directed study of Swedish (or Scandinavian) topics that address particular student needs in relation to their field of studies. Topics might include, but are not limited to, extending Swedish language skills, studying translation or linguistic aspects of the Swedish speech community, cinematic/literary theories or directors/authors, historical developments, or particular technological, entrepreneurial, or social issues. Interested students are encouraged to contact the instructor to determine a directed plan of study.

**GOVERNMENT**
Web site: government.arts.cornell.edu

"Government" is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on power applied to public purposes. Some faculty concentrate on political science. The focus of this discipline is government. Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on power applied to public purposes. Some faculty concentrate on political science. The focus of this discipline is government.

**To be admitted to the major,** a student must pass two Cornell government courses.
**To complete the major,** a student must:
1. pass two of the introductory government courses (GOVT 1111, 1313, 1615, 1817);
2. pass an additional course in one of the remaining subfields (American government, comparative government, political theory, or international relations).
This course must be any course offered in the government department, including introductory courses, upper-level courses, or seminars but must be a minimum of 3 credits. Students are strongly advised to take at least one course in each of the four subfields;
3. accumulate an additional 28 credits of government course work at the 3000 level or above;
4. complete at least one seminar-style course in government that may be applied toward the 28 credits. These courses include those numbered 4000.XX to which students are admitted by application only; or other 4000-level GOVT courses in which no more than 15 students are enrolled.
5. accumulate 11 credits in upper-level courses in related fields (e.g., anthropology, economics, history, science and technology studies, psychology, and sociology). Upper-level courses are usually courses numbered at the 3000 level or above (2000-level courses are not considered upper-level). Students should consult with their major advisor to choose appropriate courses. All choices of related courses must be approved by the major advisor or the director of undergraduate studies;
6. all courses used to fulfill a government major must be passed with a letter grade. No S–U grades accepted.

To summarize, a total of 10 government courses and three additional courses (11 credits) of upper-level related courses are required to complete the major. For more information about the government major, please visit our web site: government.arts.cornell.edu.

**Cornell in Washington Program.**
Government majors may apply to the Cornell in Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

**European Studies Minor.**
Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein and S. G. Tarrow for advice on course selection and foreign study programs.

**Model European Community Simulation.**
Undergraduates with an interest in the European Union, public affairs, or debating may participate in an annual European Union simulation held, on an alternating basis, in April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the members states, to discuss issues and resolutions of current concern to the European Union.

To prepare for the simulation, a 2-credit course is offered by the Department of Government each year (GOVT 4513 or 4522). Participation in the simulation is open only to those who register for this course. Any interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255-7992.

**International Relations Minor.**
See the description under "Special Programs and Interdisciplinary Studies."

**Honors.** Application to the honors program is made in the early spring of the second semester of a student's junior year. For more information about the honors program and an application form, please visit government.arts.cornell.edu.

**First-Year Writing Seminars.** Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

**Major Seminars.** Fall or spring. 4 credits. These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given to majors over nonmajors and seniors over juniors. Topics and instructors change each semester. For more information, please visit the Department of Government at government.arts.cornell.edu/undergraduate/program/#seminars.

**Course Subfields.** Courses in the Department of Government are broken down into four subfields: American government, political theory, international relations, and comparative government. To determine in which category (or subfield) the following courses fall, please consult the Department of Government at government.arts.cornell.edu/undergraduate/program/#seminars.

**GOVT 1615 Introduction to American Government and Politics (SBA-AS)**
Spring and summer. 4 credits. T. Lowi.
Introduction to government through the American experience. Concentrates on analysis of the institutions of government and politics as mechanisms of social control. (AM)

**GOVT 1313 Introduction to Comparative Government and Politics (SBA-AS)**
Spring and summer. 4 credits. C. Anderson.
This course will introduce students to comparative politics—the study of the political institutions and processes of countries around the world. Emphasis is on how to make meaningful comparisons between systems in different countries. The course will cover conditions for and workings of democracy, with an emphasis on how different kinds of democracies work. Course will provide a framework for comparison, and students will choose specific countries to compare. The United States will be considered in comparative perspective. Important topics to be covered include the vibrancy of democracy, the centrality of political and electoral institutions, the possibility of revolution, and the power of ethnicity.

**GOVT 1615 Introduction to Political Philosophy 1 (HA-AS)**
Fall, spring, and summer. 4 credits. I. Kramnick.
Survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. Examination of the relevance of their ideas to contemporary politics. (PT)

**GOVT 1817 Introduction to International Relations (SBA-AS)**
Fall and summer. 4 credits. P. Katzenstein. Introduction to the basic concepts and practice of international politics. (IR)

**GOVT 1827 WIM Section: Introduction to International Relations**
Fall. 1 credit. Prerequisite: permission of instructor; GOVT 1817. Special, writing-intensive section of GOVT 1817, designed to provide a small number of students the opportunity to practice and improve their writing skills as they learn about world politics. Students complete a series of papers and are expected to take an active part in class discussion. (IR)

**GOVT 2225 Controversies About Equality** (also DSOC/ILROB/PAM/SOC 2220, PHIL 1905) (SBA-AS)
Fall. 4 credits. S. Morgan. For description, see SOC 2220.

**GOVT 2605 Social and Political Philosophy** (also PHIL 2420) (KCM-AS)
Fall. 4 credits. E. Taylor. For description, see PHIL 2420.

**GOVT 2626 French Thought After May '68 (also COML/HIST 2331) (HA-AS)**

**GOVT 2716 Politics of Violence in 20th-Century Europe** (also HIST 2711) (HA-AS)
Fall. 4 credits. H. Case. For description, see HIST 2711.

**GOVT 2729 Origins of the Social (also HIST 2330) (HA-AS)**

**GOVT 2747 History of Modern Middle East in 19th–20th Century** (also JWST/NES 2674) @ (HA-AS)
Fall. 4 credits. Next offered 2011–2012. Z. Fahmy.

**GOVT 2827 China and the World (also CAPS 2827) @ (CA-AS)**
Spring. 3 credits. A. Carlson. Study of the dramatic rise of China through reviewing major developments in contemporary Chinese foreign policy since the establishment of the People’s Republic of China (PRC), and concentrating more specifically on major developments in Chinese foreign policy during the 1980s and 1990s. Such a wide-ranging survey of Chinese foreign policy involves not only a consideration of the evolution of China’s relations with its major bilateral partners but also an investigation of how China has defined its broader relationship with the international system. In addition, students are asked to consider which causal factors have been of primary importance in motivating Chinese behavior. (IR)

**GOVT 2947 Global Thinking (also PHIL 1940) @ (KCM-AS)**
Spring. 4 credits. R. Miller. For description, see PHIL 1940.

**GOVT 3021 Social Movements in American Politics (also AMST 3021) (HA-AS)**
Spring. 4 credits. E. Sanders. Analyzing a variety of movements from the late 19th century to the present, this course seeks answers to the following questions: What social and political conditions gave rise to these movements? What determined success or failure, and how should those terms be defined? How do social movements affect political processes and institutions (and vice versa?) What is their legacy in politics and in patterns of social interaction? The major movements addressed include: urbanization, industrialization, anti-racism, social reform, physical fitness, labor; socialism, women's suffrage, the contemporary gender equality movement; protest movements of the 1930s; civil rights; SDS and antiglobal movements of the 1980s; environmentalism; the 1980s anti-nuclear (weapons) movement; gay rights; and Christian Evangelicals. Some theoretical works will be used, but most of our theoretical explorations will be inductively derived, from studies of actual movements and the difficulties they faced. (AM)

**GOVT 3031 Imagining America (also AMST 3031) (CA-AS)**

**GOVT 3063 Society and Party Politics** (also SOC 3070) (SBA-AS)
Spring. 4 credits. S. Van Morgan. For description, see SOC 3070.

**GOVT 3071 Introduction to Public Policy** (SBA-AS)
Summer. 4 credits. Offered in Cornell in Washington Program. S. Jackson. Public policy is shaped by many forces. This course will enhance your ability to understand those forces and the policies that they produce. It will provide you with tools for thinking about, assessing, and evaluating those policies. And it will introduce you to the substantive core of several major issues in America today. The course will have three segments. In the first, we will examine the relevant institutions, interests, and ideologies which operate in the policy arena and the debates about the impact of these forces which engage students of the policy process. In the second, we will consider two different lenses through which we might peer to evaluate policies. In the third, we will discuss the main lines of debate in contemporary American politics concerning four substantive issues: crime and punishment, education, the economy and foreign trade, and foreign policy. The course will meet four days a week for one hour. Based on assigned readings, the class sessions will mix lectures, discussions, group activities, and guest speakers.

**GOVT 3091 Science in the American Polity (also AMST/STS 3911) (SBA-AS)**
Spring. 4 credits. Next offered 2011–2012. Staff. For description, see STS 3911.

**GOVT 3111 Urban Politics (also AMST or 3111) (SBA-AS)**
Spring. 4 credits. M. Shefter. The major political actors, institutions, and political styles in large American cities: mayors, city councils, bureaucracies, ethnic and racial minorities, urban machine politics and the municipal reform movement. The implications of these political forces for policies pertaining to urban poverty, homelessness, and criminal justice.

**GOVT 3128 America’s Changing Faces** (also AMST 3128)
Summer. 2 credits. Offered in Cornell in Washington Summer Program. S. Jackson. A new generation of leaders has emerged in America’s political, economic, educational, and cultural institutions. Those leaders employ and explore in their work modern communications technologies such as the Internet. Thereby, they are changing both what is done and how things are done in the respective life spheres. This course explores the resulting changes in the nature of American life and asks questions about the interactions among the different realms of life. (AM)

**GOVT 3131 The Nature, Functions, and Limits of Law (also LAW 4131) (CA-AS)**
Spring. 4 credits. Prerequisite: undergraduate standing. A. Riles. For description, see LAW 4131.

**GOVT 3141 Prisons (also AMST 3141) (SBA-AS)**
Fall, winter, and summer. 4 credits. M. Katzenstein. The United States stands alone among Western, industrialized countries with its persistent, high rates of incarceration, long sentences, and continued use of the death penalty. In order to have the way toward the massive use of incarceration, ideas must develop about categories of people considered to be outlaws and about the relationship of these groups to those considered to be law-abiding. Our purpose in this course is to understand how social and political actors, through a range of categories and understandings involving ideas about rights, race, and responsibility, have enabled and/or deterred the rapid expansion of incarceration

**GOVT 3150 The American Legal System: Its Nature, Functions, and Institutions (CA-AS)**
Summer. 4 credits. Offered in New York City. C. Stewart. For description, see Summer Session link www.sce.cornell.edu.

**GOVT 3161 The American Presidency** (also AMST 3161) (SBA-AS)
Fall. 4 credits. E. Sanders. This course will explore and seek explanations for the performance of the 20th- to 21st-century presidency, focusing on its institutional and political development, recruitment process (nominations and elections), relationships to social groups, economic forces, and “political time”, and foreign and domestic policy-making.

**GOVT 3171 Campaigns and Elections** (also AMST 3171) (SBA-AS)
Fall. 4 credits. Prerequisite: GOVT 1111 or permission of instructor. Next offered 2011–2012. P. Enns.

**GOVT 3181 U.S. Congress (also AMST 3181) (SBA-AS)**
Fall. 4 credits. M. Shefter. The role of Congress in the American political system. Topics include: the political setting within which Congress operates, the structure of Congress, the salient features of the legislative process, and recent congressional behavior in a number of policy areas. (AM)
the semester, we will draw on examples from the entire region, but the course will focus on six main countries, namely Argentina, Brazil, Chile, Peru, Mexico, and Venezuela. Knowledge of Spanish or Portuguese is not required.

**GOVT 3303 Politics of the Global North (also ILRIC 4330)**

Fall and spring. 4 credits. L. Turner.

For description, see ILRIC 4330. (CO)

**GOVT 3313 Middle Eastern Politics (also NES 3850) @ (CA-AS)**

Spring. 4 credits. D. Patel.

This course provides an introduction to contemporary Middle Eastern politics. The goal is to provide students with historical background and theoretical tools to answer the following core questions: (1) Why do authoritarian political systems persist in the Middle East more than they do elsewhere? (2) Why have Islamist groups become prominent opposition forces in and across some countries? (3) Why do some Middle Eastern countries suffer from high levels of political violence while others are spared? (4) What accounts for the region’s current economic underdevelopment? (5) Would the adoption of Western-style political institutions improve governance and stability in the region? The course explicitly compares outcomes and explanations within the region, between the region and other world areas, and over time.

**GOVT 3323 Modern European Politics (SBA-AS)**

This course provides a broad overview of the political history of Western Europe from the early modern period to the present. The course will focus on key developments and themes in European politics, including the rise of popular politics in the 19th century, the consolidation of democratic institutions in the 20th century, and the challenges of European integration in the 21st century. The course will also examine the role of religion, nationalism, and other factors in shaping European politics.

**GOVT 3324 Inequality and American Democracy (also AMST 3241)**

(SBA-AS)

This course provides an introduction to the study of inequality and American democracy. The course will examine the relationship between inequality and politics, focusing on topics such as race, class, and gender. The course will also consider the role of political institutions in shaping inequality.

**GOVT 3328 Constitutional Politics: The Supreme Court (also AMST 3281)**

(HA-AS)

Spring. 4 credits. D. Chutkow.

The course investigates the role of the Supreme Court in American politics and government, examining the historical development of constitutional doctrine and the Court's institutional role in government. Discussed are major constitutional law decisions, their political contexts, and the social and behavioral factors that affect federal court jurisprudence.

**GOVT 3331 Comparative Politics of Latin America (also DSOC/LATA 3290) @ (SBA-AS)**

Fall. 4 credits. G. Flores-Macias.

This course is designed as an introduction to political, economic, and social issues in 20th-century Latin America. Topics are organized chronologically, beginning with the process of industrialization and incorporation of the popular sectors in the 1930s and 1940s, and ending with the recent rise of the left to power in the region. Among the main issues covered are populism and corporatism, dependency theory and import-substitution industrialization, revolutions, the breakdown of democracy, military rule, democratic transitions, debt crisis and market reforms, social movements, and migration. Throughout

**GOVT 3332 Modern European Politics (SBA-AS)**

This course provides a broad overview of the political history of Western Europe from the early modern period to the present. The course will focus on key developments and themes in European politics, including the rise of popular politics in the 19th century, the consolidation of democratic institutions in the 20th century, and the challenges of European integration in the 21st century. The course will also examine the role of religion, nationalism, and other factors in shaping European politics.

**GOVT 3334 Islamic Politics (also NES 3844) @ (SBA-AS)**

**GOVT 3353 African Politics @ (SBA-AS)**

Fall. 4 credits. Next offered 2011–2012. N. van de Walle.

**GOVT 3363 Postcommunist Transitions (SBA-AS)**

Fall 4 credits. V. Bunce.

The focus of the course is on political and economic developments since the collapse of communism in the former states that make up Eastern Europe and Eurasia. Topics include why democracy has developed in some countries, but not others in the region; differences in economic performance across the region; the causes of inter-ethnic cooperation and conflict; and the role of the United States and the European Union in promoting democratic governance. The geographical focus will shift, depending upon the topic at hand.

**GOVT 3383 Comparative Political Economy (SBA-AS)**

**GOVT 3403 China Under Revolution and Reform (also CAPS 3403) @ (SBA-AS)**

Fall. 4 credits. A. Mertha.

This course provides a broad overview of the evolution of Chinese politics from the early part of the 20th century to the present. It is roughly divided into three sections. The first traces the formation and the progression of modern state and party institutions following the collapse of the Qing Dynasty in 1911 through the communist rise to power and into the Mao era (1949–1976), culminating in the period of “opening up and reform” (1979–present). The second part of the course examines China’s institutional apparatus, focusing on mapping out the government, Party, and military bureaucracies; examining relations between Beijing and the localities; and on the institutionalization of the relationships and processes over time. The third part of the course combines the insights of the course thus far to illuminate some of the current “hot button” issues facing the Chinese state and the world, combining politics and policy and examining the relationships between the two. No prior knowledge of China is required or expected.

**GOVT 3413 Modern European Society and Politics (also SOC 3410) @ (SBA-AS)**

Fall. 4 credits. S. Van Morgan.

This survey course provides an interdisciplinary overview of European social and political issues. Themes of the course will include, but not be limited to, the political development of the nation-state, modes of governance, welfare state restructuring, party systems and elections, social movements, immigration and demography, culture and identity, external relations, and the special challenges posed by European political and economic integration. A series of background and contextual lectures will be complemented by presentations given by leading Europeanists.

**GOVT 3427 Germany and Europe (SBA-AS)**

**GOVT 3437 Politics of the European Union (SBA-AS)**

**GOVT 3443 Southeast Asian Politics (also ASIAN 3334) @ (HA-AS)**

Spring. 4 credits. T. Pepinsky.

This course will give students the historical background and theoretical tools to understand the politics of Southeast Asia, one of the world’s most diverse and fascinating regions. The first part of the course traces Southeast Asia’s political development from the colonial period to the present day, examining common themes such as decolonization, state building, war and insurgency, ethnic relations, and nationalism. The second part of the course focuses on key issues in contemporary Southeast Asian politics, including transitions to and away from democracy, representation and mass politics, corruption, economic development, globalization, regional politics, and civil violence. Our course will concentrate primarily but not exclusively on the six largest countries in the region—Burma, Indonesia, Malaysia, the Philippines, Thailand, and Vietnam—using the comparative method to understand variation across time, across countries, and within countries.

**GOVT 3463 Modern Japanese Politics (also ASIAN 3346, FGSS 3463) @ (SBA-AS)**

Spring. 4 credits. S. Martin.

In the 1980s, Japan was number one. The consolidation of its postwar democracy and rapid economic growth offered an alternative political economic model for emerging democracies. By the 1990s, the economic bubble burst and provided momentum for
reforming the Japanese way of doing politics. Whereas the U.S. sought to learn from Japan’s success in the 1980s, we now seek to apply lessons from its failures to politically resolving our own economic crisis. This course examines the rise and fall of the “1955 System” and Japan’s ongoing struggle to reach a new political equilibrium through reforms aimed at producing a better democracy. These broad themes will be addressed through a close analysis of citizen engagement with the institutional framework in an increasingly global context.

GOVT 3549 Capitalism Competition and Conflict in the Global Economy (SBA-AS)
Fall 4 credits. P. Katzenstein.
Unemployed auto workers in Detroit and the wood stoves in New England signal an important change in America’s relation to the world economy. This course characterizes these changes in a number of fields (trade, money, politics, technology), explains them as the result of the political choices of a declining imperial power that differs substantially from the choices of other states (Japan, Germany, Britain, France, the small European states, and Korea), and examines their consequences for America and international politics.

GOVT 3553 Issues Behind the News
Fall 2 credits. Prerequisites: AEM/ECON 2300 or ANTHR 1400 or GOVT 1817 or GOVT 2947/PHIL 1940, or permission of instructor J. Reppos.
This course will cover international current events as they unfold during the semester. Faculty from across the university will be invited to contextualize and deepen students’ understanding of elections, wars, complex humanitarian emergencies, international agreements, global health issues, and other relevant international events that are in the news. The course will respond flexibly to unforeseen events. Special attention will be devoted to U.S. foreign policy issues and how U.S. foreign policies are formulated and implemented. The course will strive to expose students to different points of view on these issues. (IR)

[GOVT 3605 Ideology (CA-AS)

[GOVT 3632 Politics and Culture (also SOC 2480) (HA-AS)
Fall 4 credits. M. Berezin.
For description, see SOC 2480.

GOVT 3635 Human Rights and Global Justice (also AMST 3635) (SBA-AS)
Spring 4 credits. A. M. Smith.
In this course, we will move between the study of (1) general concepts of justice and human rights; liberty rights; political rights; and social rights (such as the right to education); (2) concrete problems pertaining to the interpretation of international human rights agreements, and U.S. constitutional law; and (3) contemporary moral/legal controversies, including the legal vulnerability of the homeless and unauthorized immigrant children, and our moral duties toward them; the legal status of enhanced interrogation techniques, including torture; the normative debates on multiculturalism, women’s rights, and cosmopolitanism; and the moral obligations of citizens in the developed world with respect to the least advantaged in the developing countries.

[GOVT 3655 Politics and Literature (also AMST 3655) (LA-AS)
Fall. 4 credits. Next offered 2011–2012. J. Frank.]

[GOVT 3665 American Political Thought from Madison to Malcolm X (also AMST 3665, HIST 3160) # (HA-AS)
Fall. 4 credits. Next offered 2011–2012. I. Kramnick.]

[GOVT 3695 Marx and After # (KCM-AS)
We will read the texts of Marx that set the agenda for a century of political and theoretical debate, and key essays that have built on his dialectical materialist theory in the 20th century.]

[GOVT 3705 Political Theory and Cinema (also COML 3300, FILM 3290, GERST 3550) (CA-AS)
Spring. 4 credits. Next offered 2012–2013. G. Wátie.]

GOVT 3725 Ideology 2: Contemporary Continental Political Thought (also COML 3725) # (CA-AS)
Fall. 4 credits. D. Rubenstein.
This semester we will be examining everyday life, space, sexuality and language in the works of primarily French philosophers of the 20th century. Topics will be the critique of everyday life (Lefebvre, de Certeau), consumer society (Baudrillard, Barthes), psychogeography and situationalism (Debord, Vaneigem), sexuality (Barthes, Foucault, Deleuze and Guattari), language and postcolonialism (Derrida).

[GOVT 3735 Political Freedom (also AMST 3735) # (KCM-AS)

[GOVT 3847 Weapons of Mass Destruction @ (SBA-AS)

[GOVT 3857 American Foreign Policy (also CAPS 3857) (SBA-AS)
America is marked by multiple traditions and identities as well as a state on steroids, or imperium, and a nation on stilts, or civilization. These traits are reflected in its foreign policies. (IR)

GOVT 3867 The Causes of War (SBA-AS)
Fall. 4 credits. C. Way.
This course surveys leading theories of the causes of interstate war—that is, large-scale organized violence between the armed forces of states. Why is war a recurring feature of international politics? Are democracies more peaceful than other types of states, and if so what explains this “democratic peace”? Why do democratic publics seem to reward threats to use force by “rallying around the flag” in support of their governments? Does the inexorable pattern of the rise and fall of nations lead to cycles of great power wars throughout history? These and other questions will be examined in our survey of theories of war at three levels of analysis: the individual and small groups, domestic politics, and the international system. Topics include (1) theoretical explanations for war; (2) evaluation of the evidence for the various explanations; (3) the impact of nuclear weapons on international politics; (4) ethics and warfare; (5) the uses and limitations of air power; (6) international terrorism. (IR)

GOVT 3898 International Law (HA-AS)
Fall 4 credits. Taught in Washington, D.C. Is international law a pious delusion, helpless in the face of real power? Or is public policy becoming so entangled in international standards that international law is now eroding national sovereignty? This course surveys the theoretical foundation and general history of international law since the 17th century to highlight what is new in the doctrines and institutions by which it operates in the contemporary world. The course gives special attention to the relation between international and U.S. law and to the workings of international law in particular fields—including environmental and human rights protection, trade regulation, and control of terrorism. (IR)

GOVT 3937 Introduction to Peace and Conflict Studies (SBA-AS)
Spring and summer 4 credits. S. Kreps.
This course serves as an introduction to the study of war, peace, and peacemaking. We will study different theories of peace and war from a variety of disciplinary perspectives. The course will cover definitions of peace and war, causes of conflict, and modes of conflict prevention and resolution. The concepts will be applied to a range of historical and current conflicts. Students will prepare analyses of specific conflicts or instances of peacemaking for class presentation. (IR)

GOVT 3944 Domestic Sources of Foreign Policy @ (SBA-AS)
Spring. 4 credits. J. Weeks.
This course explores the relationship between domestic politics and foreign policy, studying how domestic political institutions, the media, misperceptions, moral values, and other factors affect leaders’ foreign policy decisions in a variety of countries and issue areas. (IR)

[GOVT 3957 New Forces in International Politics (SBA-AS)
Fall. 4 credits. Next offered 2011–2012. A. Carlson.]

[GOVT 3977 Israeli-Palestinian Conflict (also HIST/5070, JWST/NES 3967) @ (HA-AS)
Spring. 4 credits. Next offered 2011–2012. R. Brann.]

[GOVT 4032 Immigration and Politics Research Seminar (also AMST/LSP 4032) (SBA-AS)

[GOVT 4041 American Political Development in the 20th Century (also AMST 4041, AMST/GOVT 6121) (HA-AS)
Fall. 4 credits. Next offered 2011–2012. E. Sanders.
Examines major political reform periods leading to policy change in economic regulation, social welfare, and national security policy.]

[GOVT 4051 The Postmodern Presidency: Election 2008 (also AMST 4305) (CA-AS)
Fall. 4 credits. Next offered 2012–2013. D. Rubenstein.]
GOVT 4061 Politics of Slow-Moving Crisis (also AMST 4061/6061, GOVT 6161) (SBA-AS)
Spring. 4 credits. M. Jones–Correa.
An interdisciplinary seminar focusing on the political response to “slow-moving policy crises” such as population growth/change (aging, immigration), water availability and global warming. Each of these areas involves a policy arena where the need for policy coordination is clear but the pressures for coordination are not, since the consequences of policy action or inaction may be felt only years down the road, and the assessment of the risk posed by these threats is highly contested. How do politicians/societies successfully face up to the risks posed by slow-moving crises?

GOVT 4112 The Politics of Change
Spring. 4 credits. S. Mettler.
“Yes, we can!” President Barack Obama was elected amidst great hopes among Americans that the nation can, with good leadership, address pressing issues. In this course, we assess Obama’s domestic policy agenda’s prospects for success by considering the institutional and political context of recent years, the challenges and opportunities posed by existing policies, and past efforts to address key issues. In the first few weeks of the semester, students will learn about the institutional features of the relationship between the White House and Capitol Hill and the rise of partisan polarization in Congress in recent years. The body of the course will focus on prominent issue areas on which Obama aims to make a difference: taxes and inequality, health care, higher education, K−12 education, and the environment. In each case, we will examine the issue in historical perspective by analyzing past reform efforts, and we will examine the Obama administration’s record to date and consider the implications for success over the next few years. Students will have the opportunity to write in-depth research papers.

GOVT 4142 Causes and Consequences of American Foreign Policy (also AMST 4142, GOVT/AMST 6142) (SBA-AS)
Fall. 4 credits. Next offered 2011–2012. E. Sanders.
What is the impact of U.S. foreign policy on the world, U.S. society, and political institutions? What are the forces that drive U.S. foreign policy?

GOVT 4222 Political Culture (also AMST 4222)

GOVT 4231 The 1960s: Conceptualizing the Future from the Past (also AMST 4231) (CA-AS)

GOVT 4241 Contemporary American Politics (also AMST 4241, AMST/GOVT 6291) (HA-AS)
Spring. 4 credits. M. Shaffer.
Seminar analyzing some major changes in U.S. electoral and local politics in recent decades. Topics include: partisan realignment, the new conservatism, racial cleavages, “identity politics,” and democratic decline.

GOVT 4281 Government and Public Policy: An Introduction to Analysis and Criticism (also AMST 4281/6281, GOVT 7281) (SBA-AS)
Fall. 4 credits. T. J. Lowi.
Concentrates on theory and criticism of U.S. policies and the policies associated with them. Particular attention is given to the origins and character of the regulatory state and the welfare system. (AM)

GOVT 4293 Politics of Science (also STS/BSOC 4291) (SBA-AS)

GOVT 4303 Biotechnology and Development (SBA-AS)
Spring. 4 credits. R. Herring.
Of all the technological solutions to agronomic problems that have been proposed in the last few decades, none has created the level of backlash and controversy as those involving genetic biotechnology. Social protest and activist movements arise from ethical, cultural, religious, economic, environmental, and political stances with regard to the use of transgenic technologies, particularly in agricultural development in poor countries. In this course, we will explore the roots of these controversies and follow the logics and economics of their development and deployment. We will try to identify the fundamental underpinnings of various arguments for and against the use of transgenic crops as a tool for agricultural development. Discussions on selected topics and associated directed readings will be led by the course coordinators and invited speakers. Students will be assessed on their participation in discussions and on a written position paper in the subject area.

GOVT 4374 States and Societies in the Middle East (also GOVT 6474, NES 4874/6874) (SBA-AS)

GOVT 4403 War and the State @# (SBA-AS)
Fall. 4 credits. G. Flores-Macias.
The goal of the course is to introduce students to the study of the nexus between violence and the creation of the modern state. It is intended to familiarize students with the role that war and other forms of violence have played in shaping the state in comparative perspective. Relying on the emergence of the modern state in Western Europe as a point of departure, the course studies the processes of state formation and state building in Africa, Asia, Eastern Europe, Latin America, and the Middle East.

GOVT 4414 Political Violence in Cambodia and China @ (CA-AS)
Fall. 4 credits. A. Mertha.
This course traces the evolution of political institutions and agency within the Chinese Communist Party and the Khmer Rouge in China and Cambodia, respectively. In this course we analyze the role of violence in state-building and state dissolution. We also employ a structured comparison between these political entities to examine and explain their similarities and differences. Finally, we look at the legacies of past political violence on these political systems today.

GOVT 4585 American Political Thought (also AMST 4585, GOVT 6585) @ (HA-AS)

GOVT 4616 Interpreting Race and Racism: Du Bois (also AMST 4616) (HA-AS)
Seminar in critical race theory and the contemporary implications of Reconstruction Amendments to the Constitution, with a focus on the work of Du Bois.

GOVT 4625 Sexuality and the Law (also FGSS 4610/6762, GOVT 7625) (KCM-AS)
Feminist analysis of policy and legal issues central to gender justice: reproductive rights, HIV and AIDS, poverty policy, transnational women’s advocacy, prisons, same-sex marriage, etc. (PT)

GOVT 4646 Derrida and Philosophy of Hospitality (also GOVT/COML 6675, HADM 5590) (CA-AS)

GOVT 4655 Contemporary Political Philosophy (also PHIL 4470) (KCM-AS)
Spring. 4 credits. R. Miller.
For description, see PHIL 4470.

GOVT 4665 Islamism (also NES 4953) @ (CA-AS)
Fall. 4 credits. Prerequisite: graduate students or juniors and seniors who have taken GOVT 1615 or 3000-level course in political theory. Next offered 2011–2012. S. Buck-Mors.

GOVT 4705 Contemporary Reading of the Ancients (also COML 4750/6727, GOVT 6509) (CA-AS)
Fall. 4 credits. D. Rubenstein.
This semester we will be examining two figures who serve as models of political militancy or resistance: Antigone and St. Paul. Readers of Antigone will include feminists such as Judith Butler and Luce Irigaray; democratic theorists Patchen Markell and Bonnie Honig; psychoanalytic and deconstructive theorists: Joan Copjec, Jacques Lacan, and Jacques Derrida. St. Paul will be read in relation to contemporary readers such as Taubes, Badiou, Agamben, Zizek, as well as Kristeva and Derrida concerning hospitality.

GOVT 4715 Critical Reason, The Basics: Kant, Hegel, Marx, Adorno (also GERST 4710) (KCM-AS)

GOVT 4735 Marx, Freud, Nietzsche (also COML 4250, GERST 4150) # (CA-AS)
Fall. 4 credits. G. Waite.
For description, see GERST 4150.
generally. The tradition of realism in IR theory, both to find "Realism" is often invoked in international theory and political history to examine these remarkable films and the political context in which they were forged. The goal of the course is to take seriously both the films and their politics. (AM or PT)

GOVT 4809 Politics of '70s Films (also AMST 4809) (SBA-AS)
Spring. 4 credits. J. Krishner.
The 10 years from 1967 to 1976 were an extraordinary time both in the history of American politics and in the history of American film. In the same period that the country was rocked by the Vietnam War, the feminist and civil rights movements, Watergate and economic crisis, the end of Hollywood censorship along with demographic and economic change in the industry ushered in what many call "the last golden age" of American film. In this class we study both film theory and political history to examine these remarkable films and the political context in which they were forged. The goal of the course is to take seriously both the films and their politics. (AM or PT)

GOVT 4817 International Conflict and Laws of War (SBA-AS)

GOVT 4827 Unifying While Integrating: China in the World (also CAPS 4827, GOVT 6827) (HA-AS)
Spring. 4 credits. A. Carlson.
Seminar intended to examine the increasingly complex relationship that has evolved between China and the rest of the international system during the 1980s and 1990s. Emphasizes the international yet often contradictory, challenges facing Beijing in regard to the task of furthering the cause of national unity while promoting policies of integration with international society and interdependence with the global economy. Concentrates especially on ongoing controversies over the rise of Chinese nationalism and the persistence of "minority nationalism" in many regions within China. (IR)

GOVT 4837 The Military and New Technology (also STS 4831) (SBA-AS)
Fall. 4 credits. Next offered 2011–2012. Staff.
For description, see STS 4831.

GOVT 4842 Political Ecology of Imagination (also ANTHR 4082, STS/SHUM 4842)
Fall. 4 credits. T. Heatherington.
For description, see SHUM 4842.

GOVT 4845 Secularism and Its Discontents (also ENGL 4075, SHUM 4845)
Fall. 4 credits. E. Anker.
For description, see SHUM 4845.

GOVT 4847 Realist Theories of International Relations (also GOVT 6847) (SBA-AS)
Fall. 4 credits. J. Krishner.
"Realism" is often invoked in international relations to mean many different things. By policymakers, it has been cited as a source of support—and opposition—to America's recent wars. By scholars, it is often used as a synonym for "structuralism," which it need not be. In this course, we will look closely at the tradition of realism in IR theory, both to find out why realism does stand for, and in order to better understand world politics more generally.

GOVT 4862 Classics and Early America (also CLASS 4683, HIST 4861) (HA-AS)
Spring. 4 credits. H. Rawlings.
For description, see CLASS 4683.

GOVT 4877 Asian Security (also CAPS 4870, GOVT 6877) (SBA-AS)

GOVT 4917 Ethics in International Relations (KCM-AS)
This course examines current and historical issues in international relations from the perspective of international law, norms, and ethics.

GOVT 4949 Honors Seminar: Thesis Clarification and Research
Fall. 4 credits. Prerequisite: acceptance into honors program. E. Sanders.
Designated to support the writers in the honors program during the early stages of their research projects.

GOVT 4959 Honors Thesis: Research and Writing
Spring. 4 credits. Prerequisite: successful completion of GOVT 4949. E. Sanders.

GOVT 4998 Politics and Policy: Theory, Research, and Practice (also ALS/AMST/CAPS 4956, PAM 4060)
Fall, spring. Offered in Cornell in Washington Program.
This required course forms the core of the Cornell in Washington program for students in the public policy option. The course objective is to provide students with the instruction and guidance necessary to analyze and evaluate their own chosen issue in public policy. Toward that end, the course has three components: (1) weekly lectures providing background on the structures and processes of national politics and policy as well as training in research methodology; (2) student externships; and (3) individual research papers or projects. All three components interrelate so as to provide students with a strategy and framework for integrating classroom based learning, field experience and individual research.

GOVT 4999 Undergraduate Independent Study
Fall or spring. 1–4 credits.
One-on-one tutorial arranged by the student with a faculty member of his or her choosing. Open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty sponsor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than 4 credits of independent study may count toward fulfillment of the major.

GOVT 6018 Methods of Political Analysis I
Fall. 4 credits. I. Kramnick.
Introduction to the quantitative analysis of political data, with an emphasis on probability theory, descriptive statistics, measures of association, and hypothesis testing.

GOVT 6019 Methods of Political Analysis II
Spring. 4 credits. P. Enns.
This course focuses on Ordinary Least Squares regression, with an emphasis on assumptions, diagnostics, and "solutions." The course also includes an introduction to statistical modeling and matrix algebra.

GOVT 6031 Field Seminar in American Politics
Spring. 4 credits. E. Sanders.
The major issues, approaches, and institutions of American government and the various subfields of American politics are introduced. The focus is on both substantive information and theoretical analysis, plus identification of big questions that have animated the field. (AM)

GOVT 6053 Comparative Method in International and Comparative Politics
Spring. 4 credits. D. Patel.
An in-depth, graduate-level introduction to qualitative and comparative methods of political analysis, with special emphasis on the application of these methods in comparative and international politics. Through readings, discussions, and written assignments, students will explore strategies for concept formation, theory construction, and theory testing, using the craft and tools of comparative political analysis.

GOVT 6067 Field Seminar in International Relations
Spring. 4 credits. S. Kreps.
General survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants are expected to do extensive reading in the literature as well as research. (IR)

GOVT 6072 Immigration and Immigrant Politics (also LSP 6072)
Spring. 4 credits. M. Jones-Correa.
This course offers an exploration of readings in immigrant politics and immigration policy, with particular emphases on membership and citizenship, nativism, transnationalism, immigrant political incorporation and socialization, assimilation and immigration policy. Readings will draw from both U.S. and comparative literatures on immigration.

GOVT 6075 Field Seminar in Political Thought: The Enlightenment
Fall. 4 credits. I. Kramnick.
The topic for the field seminar in political thought this year will be the Enlightenment. We will read and discuss central texts of 18th-century Enlightenment thought, including texts by Locke, Voltaire, Montesquieu, Rousseau, Condorcet, Hume, Smith, Burke, Paine, and Kant. We will explore the political dilemmas to which Enlightenment texts responded—such as political theology, feudalism, and absolutist monarchy—and critically evaluate their attempts to establish a more secular, rational, and democratic form of
politics. Was there a single Enlightenment? How do we characterize it? How do we assess its political, moral, and philosophical legacies?

[GOVT 6101 Political Identity: Race, Ethnicity, and Nationalism]

[GOVT 6121 American Political Development in the 20th Century (also AMST 6121, AMST/GOVT 4041)]
Fall. 4 credits. Next offered 2011–2012. E. Sanders.
For description, see GOVT 4041.

[GOVT 6132 The Politics of Inequality]

[GOVT 6142 Causes and Consequences of U.S. Foreign Policy (also AMST 4142/6142, GOVT 4142)]
Fall. 4 credits. Next offered 2011–2012. E. Sanders.
For description, see GOVT 4142.

[GOVT 6151 State and Economy in Comparative Perspective]
Fall. 4 credits. Next offered 2012–2013. R. Bensel.

GOVT 6171 Politics of Public Policy
Spring. 4 credits. S. Mettler.
Much of the literature that comprises the field of policy analysis is characterized by antipathy to politics: scholars attempt to excuse political battles and concerns from their studies in order to advance a “rational” portrayal of how policies do or should function. Yet, public policies are, in their nature, inherently political. They are defined through political processes, designed and implemented in the context of political institutions, and they in turn shape the character of politics and public life. This course entails the examination and evaluation of a variety of approaches to policy analysis, all of which are united by their inclination to take politics seriously. Readings have been included that comprise variations of rational choice, institutionalist, historical, behavioral, and interpretivist analyses. The first part of the course examines different models of the policy process that may inform policy analysis. The second part of the course investigates policymaking processes and institutions and examines stages of the policy process, including public mobilization, policy definition, agenda setting, and policy design and implementation. Special attention is given to the American system, focusing on policymaking institutions, processes and outcomes in that context, but students who focus on other nations or international system may also find the course useful. The course concludes with an examination of how policies, once created, may in turn restructure political processes and shape policies adopted subsequently.

[GOVT 6202 Political Culture (also AMST 6202)]

GOVT 6222 Political Participation
Fall. 4 credits. M. Jones-Correa.
This course is concerned with understanding how and under what conditions citizens seek to influence political elites through use, expansion, conversion or subversion of existing channels of political participation. Cases from a variety of institutional contexts over time will be used to examine how mediating institutions diminish and/or exacerbate social inequalities in the exercise of political voice. We will consider readings from both the United States and comparative contexts to examine and evaluate varying conceptions in the political participation literature.

GOVT 6274 People, Markets, and Democracy
Fall. 4 credits. C. Anderson.
This seminar is designed to introduce Ph.D. students to some of the major topics, theoretical approaches, and empirical findings in the relationship between people, states, and markets in democracies. These include prominently the links between the economy and political behavior and between democratic politics and economic behavior.

GOVT 6291 Contemporary American Politics (also AMST 4241/6291, GOVT 4241)
Spring. 4 credits. M. Shaffer.
For description, see GOVT 4241. (AM)

[GOVT 6301 Institutions (also AMST 6301)]

[GOVT 6324 Proseminar in Chinese Politics]

[GOVT 6334 Political Economy of Development]

GOVT 6353 Field Seminar in Comparative Politics
Fall. 4 credits. K. Roberts and T. Pepinsky.
This course provides a graduate-level survey of the field of comparative politics, introducing students to classic works as well as recent contributions that build upon those works. Readings will draw from leading theoretical approaches—including structural, institutional, rational choice, and cultural perspectives—and cover a broad range of substantive topics, such as democratization, authoritarianism, states and civil society, political economy, and political participation and representation.

GOVT 6373 Seminar in Political Violence
Spring. 4 credits. A. Mertha.
This course broadly examines the causes, consequences, and processes of political violence. The course surveys various theoretical approaches while also examining the empirical literature on political violence. Cases will be drawn from all over the world, and we will also draw from history in order to contextualize our contemporary conceptualizations of political violence.

[GOVT 6384 Democracy and the Media]

[GOVT 6393 Comparative Political Participation]

GOVT 6413 Revitalizing Labor: A Comparative Perspective (also ILRIC 6320)
Spring. 4 credits. L. Turner.
For description, see ILRIC 6320.

GOVT 6423 Feminist Methodology (also FGSS 6170)
Spring. 4 credits. S. Martin.
For description, see FGSS 6170.

[GOVT 6461 Public Opinion]

[GOVT 6474 States and Societies in the Middle East (also GOVT 4374, NES 4874/6874)]

GOVT 6494 Agrarian Political Economy
Spring. 4 credits. R. Herring.
Comparative political economy of pre-industrial and transitional societies, stressing alternative theories of dynamics of peasant society; rural development, environmental change and linkages to urban and industrial sectors and international system. We emphasize the impact of property systems and public law on human welfare and collective action. Theoretically, we explore the tensions between materialist political economy and competing interpretive frameworks.

GOVT 6509 Contemporary Readings of the Ancients
Fall 4 credits. D. Rubenstein.
For description, see GOVT 4705.

[GOVT 6523 Methods for Field Research]

[GOVT 6544 Gender and Politics (also FGSS 6544)]

[GOVT 6564 Comparative Political Representation]

[GOVT 6585 American Political Thought (also AMST 6585, AMST/GOVT 4585)]
For description, see GOVT 4585.

[GOVT 6603 States and Social Movements (also SOC 6600)]
This course is a broad examination of several types of contentious politics—social movements, civil wars, nationalist episodes and revolutions in different parts of the world. (COI)

GOVT 6635 Education, Social Justice, and the Law (also AMST 6635)
Spring. 4 credits. A. M. Smith.
An interdisciplinary seminar that addresses political philosophy debates on the right to education, with special reference to school funding standards; and major court decisions on education equity issues, especially racial segregation; gender discrimination; affirmative action and voluntary integrative enrollment schemes; and state court litigation pertaining to the education amendments in the state constitutions. Our readings will be primarily drawn out of a casebook (e.g., Gee and Daniel, Law and Public Education), but we will also read several articles by normative political theorists, such as Elizabeth Anderson, Debra Satz, Harry Brighouse, and Adam Swift, as well as the work of litigators and education
GOVT 6645 Democratic Theory (also AMST 6645)
Fall. 4 credits. Next offered 2011–2012. J. Frank.)

GOVT 6665 Media Theory (also COML 6665)
Spring. 4 credits. D. Rubenstein.
Is there a singular French theorization of tele-
tech? Or is what goes under the rubric of
French theory a particular approach to the
question of technology? We will examine this
question in relation to several theorists who
have written on film and photography; but
also earlier technologies of writing, drawing,
and painting. Authors will include Barthes,
Baudrillard, Bourdieu, Deleuze, Derrida,
Lacan, among others.

GOVT 6675 Derrida and Philosophy of
Hospitality (also GOVT 4646, HADM 5590, COML 6675)
Fall. 4 credits except for HADM, which is
For description, see GOVT 4646.

GOVT 6695 Modern Social Theory I
Fall. 4 credits. Next offered 2012–2013.
S. Buck-Mors.

GOVT 6705 Modern Social Theory II
S. Buck-Mors.

GOVT 6726 Psychoanalysis and
Ideology
D. Rubenstein.

GOVT 6745 Kant's Political Reason (also
GERST 6940, COML 6015)
Spring. 4 credits. P. Gilgen.
For description. see GERST 6940.

GOVT 6775 Language and Politics
J. Frank.

GOVT 6796 Justice and Equality (also
PHIL 6996)
Fall. 4 credits. A. M. Smith.
A normative political theory seminar
concentrating on the topics of distributive
justice, equality, and critical race theory.
We will begin with Rawls' Theory of Justice,
and then examine various criticisms, especially
those advanced by Nussbaum, Dworkin, Sen,
Cohen, and Barry. In the 2010 version of this
course, we will focus on the philosophical
debates pertaining to educational equity;
our readings in this section of the course
will include works by Elizabeth
Anderson, Stephen Macedo, Deborah Satz,
Harry Brighouse and Adam Swift, and critical
race theorists Danielle Allen and Derrick Bell.

GOVT 6807 Topics in Comparative and
International Political Economy
T. Pepinsky.
Seminar covering current research on political
economy, focusing on trade, finance,
production, migration, development, welfare,
and regime change.

GOVT 6827 Unifying While Integrating: China in the World (also CAPS/GOVT 4827)
Spring. 4 credits. A. Carlson.
For description, see GOVT 4827.

GOVT 6847 Realist Theories of
International Relations (also GOVT 4847)
Fall. 4 credits. J. Kirshner.
For description, see GOVT 4847.

GOVT 6857 International Political
Economy
Fall. 4 credits. P. Katzenstein.
Exploration into a range of contemporary
theories and research topics in the field of
international political economy. The seminar
covers different theoretical perspectives and
a number of substantive problems. (IR)

GOVT 6867 International Law, War, and
Human Rights
Fall. 4 credits. M. Evangelista.
This course examines the role of international
law in influencing states' behavior regarding
issues related to war and human rights. It
draws on literature in the fields of
international relations and law to study such
questions as: why states comply with
international law; under what conditions legal
norms become customary and widely
accepted; under what conditions long-standing
legal norms become undermined; and what
is the relative influence in shaping the law of
state practice, the efforts of non-state actors
and popular movements, and the opinions of
legal professionals? Much of the substantive
focus of the course will be on the
development of international humanitarian law
and human-rights law, and the impact of the
"War on Terror."

GOVT 6897 International Security
Spring. 4 credits. J. Weeks.
This advanced graduate seminar introduces
students to a variety of theoretical perspectives
and empirical approaches related to
international conflict, peace, and security. (IR)

GOVT 6927 Administration of Agriculture
and Rural Development (also IARD 6060)
Spring. 4 credits. N. Uphoff and
T. W. Tucker.
For description, see IARD 6030.

GOVT 6999 CIPAS Weekly Colloquium
Fall, spring. 1 credit. S–U grades only.
I. Lowi.
Colloquium is the weekly seminar series
hosted by the Cornell Institute for Public
Affairs (CIPA). It is also a required, 1-credit
course for all CIPA Fellows and is graded S–U
based on attendance. The colloquium series is
a collaborative effort between the CIPA
Colloquium Committee and the faculty and
staff of CIPA.

GOVT 7063 Labor in Global Cities (also
ILRCB 7060)
Fall. 4 credits. L. Turner.
For description, see ILRCB 7060. (CO)

GOVT 7073 Game Theory 1: Perfect
Information
Fall. 4 credits. K. Morrison.
This course introduces graduate students in
political science to game theory, a tool for
studying strategic interaction that is now used
throughout the discipline. The first part of the
course covers the tools for solving games of
perfect information. The second part is
focused on some broad classes of problems
about which the game theory learned in the
first part of the class gives particularly useful
insights. These include problems of collective
action, as well as issues of credibility and
commitment. The course requires only high-
school level mathematics, and no prior
training in game theory or formal methods.

GOVT 7074 Game Theory 2: Advanced
Topics
Spring. 4 credits. Prerequisite: GOVT 7073.
K. Morrison.
This is the second of two graduate courses on
game theory in the government department.
In the first half of this course, we will focus on
advanced topics, including coalitional games,
games of imperfect information, evolutionary
games, and bargaining. The second half of
the course will be focused on helping students
develop their own models, using the
techniques learned in both of the courses.

GOVT 7281 Government and Public
Policy (also AMST 4281/6281, GOVT 4281)
Fall. 4 credits. T. J. Lowi.
For description, see GOVT 4281. (AM)

GOVT 7606 Jurisprudence and
Normative Political Theory (also
LAW 7393)
Fall. 4 credits. A. M. Smith.
A seminar for graduate students in the
normative political theory field and law
students. We will begin with Hart's classic
work, The Concept of Law; and then consider
Dworkin's criticisms. Then we will make a
detour to the Rawls versus Sen debate to
place "meta" questions pertaining to
distributive justice, rights, and deliberation on
the table. Returning to legal theory, we will
consider Michelman's work on Rawls, social
rights, and the constitution, and Cover's theory
of plural normian fields. Dworkin's confidence
in the judiciary raises serious questions about
the role of judicial review in a liberal
democratic society; we will consider the
critical approaches of Waldron, Tushnet, and
Siegel in this regard. Finally, we will read
several works from the critical race theory
field; in the fall 2010 version of this course,
we will concentrate on the writings of Derrick
Bell.

GOVT 7625 Sexuality and the Law (also
FGSS 4610/7620, GOVT 4625)
A. M. Smith.
For description, see GOVT 4625.

GOVT 7999 Independent Study
Fall or spring. 4 credits. Not open to
undergraduates. Undergraduates wishing to
conduct supervised study should register
for GOVT 4999.
Individualized readings and research for
graduate students. Topics, readings, and
writing requirements are designed through
consultation between the student and the
instructor. Graduate students in government
who are looking to use this as an option to
fulfill their course requirements should check
with their chairs to be certain that the
program of study is acceptable for this
purpose. Applications must be completed and
signed by the instructor and by the chairs of
their special committees. They are available
from, and must be returned to, the graduate
assistant in 212 White Hall.

History

The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing; the reputation of the faculty for scholarship, teaching, and advising; and most of all, the intrinsic interest of the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

Advanced Placement
Students who pass the AP American and/or European History exam with a score of 4 or 5 have two options: (1) use the AP credits to fulfill the Arts and Sciences course credit requirements for graduation, or (2) take introductory American and/or European history courses.

The Major
To complete the history major, a student must fulfill the requirements listed below:

Entry requirement: completion of any two history courses excluding first-year writing seminars.

1. Take nine history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better. (Courses taken for entry may count toward fulfilling the major.)

2. Of the total nine courses:
   a. four must be in courses designated as outside U.S. history and
   b. three must be in courses designated as history before 1800.

Courses used to fulfill requirement (1) above may also be used to fulfill requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both requirements (2a) and (2b).

3. Two of the nine courses must be seminars, of which one must be a 4000-level seminar. HIST 4000, 4001, 4002, and service-learning 4000-level courses may not be used to fulfill the 4000-level seminar requirement.

Note: a single course may count to fulfill more than one of the requirements. For example, a course in medieval European history would count as both a course in history before 1800 and as a course outside of American history. A list of courses designated as "pre-1800" and "outside the U.S. history" is posted at the History office (450 McGraw Hall) and on our website.

HONORS
The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take HIST 4000 Honors Seminar during their junior year plus an additional 4000-level seminar seminarily during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second semester of the sophomore year or early in the junior year, interested students should speak to a faculty member or faculty advisor about the honors program.

Before the beginning of the senior year, the candidate presents, in conversation or in writing, a thesis proposal to an appropriate member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in HIST 4001, a seminar course in honors research. Any exceptions to this must be approved by the Honors Committee. HIST 4001 is a 4-credit course that permits honors candidates to conduct research and to begin writing the honors essay in a seminar environment. At the end of the first semester of the senior year, as part of the requirements for HIST 4001, the student submits to the supervisor a 10- to 15-page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole to the instructor of 4001 and to the student's supervisor. HIST 4002 is a 4-credit seminar course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the supervisor and a first reader selected by the student, in consultation with his or her supervisor.

The text of the honors essay may not exceed 60 pages except by permission of the chair of the Honors Committee and the student's supervisor. Three copies are due during the third or fourth week of April. In May, each honors candidate is given an oral exam administered by the supervisor; the exam focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, 17th-century science, 19th-century American politics).

To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral exam.

Note: History majors who wish both to study abroad (or in Cornell-in-Washington) and to enter the honors program should consult their advisors or the DUS as soon as possible after declaring a major. The department requires honors students to enroll in HIST 4000 before writing a thesis in their senior year, and only in exceptional cases are students allowed to enroll simultaneously in 4000 and 4001 (the first term of thesis-writing). So planning ahead is essential, if you intend to spend a full year abroad.

Cornell in Washington Program. History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Category Key: Courses in History are broken into different categories. To determine which category(s) a course falls in, please note the reference at the end of each course description. The key is as follows: AF = African History, AM = American History, AS = Asian History, CO = Comparative History, EA = Ancient European History, ER = Renaissance and Medieval History, EM = Modern European History, HS = History of Science, LA = Latin American History, NE = Near Eastern History, and HR = Honors, Reading, and Research.

First-Year Writing Seminars

 Topics to be considered include industrialization, the technology revolution, the evolution of marriage, consumerism, development, environmental ethics, humanitarianism, and what you had for breakfast this morning.

**HIST 1510 Introduction to Western Civilization # (HA-AS)**

Summer and fall. 4 credits. O. Falk. The West and its relations with the rest of the world are central topics today, but just what is the West and what is its history? This course surveys the history of the West from remote antiquity to the 21st century. We will consider developments in technology, economy, politics, religious institutions and faiths, cultural media and social ideals. Together, these themes add up to civilization in the west. We will acquaint ourselves with these dimensions of the past while seeking to acquire the basic skills professional historians use to learn about this past. (ER) (EM)

**HIST 1511 The Making of Europe (1500–present) # (HA-AS)**

Summer and spring. 4 credits. C. Robcis. How do we make sense of the recent controversies around Islam and the “veil” in France, the reform of the Welfare State in Great Britain, the anti-globalization protests in Davos, the rise of demagogic anti-immigrant parties from the Netherlands to Italy, or the fact that Swedes get more than thirty paid days off per year? This course seeks to answer these questions by exploring the history of modern Europe. Among other themes, we will discuss the Protestant Reformation, the rise of absolutism, the Enlightenment, the French Revolution, industrialism, colonialism, the Russian Revolution, the two world wars, decolonization and immigration, May ’68, and the construction of the European Union. In conjunction, we will examine how modern ideologies (liberalism, Marxism, imperialism, conservatism, fascism, totalitarianism) were developed and challenged. Through a wide array of historical documents (fiction, letters, philosophy, treatises, manifestoes, films, and art), we will consider why “old Europe” is still relevant for us today. (EM)

**HIST 1530 Introduction to American History (also AMST 1530) # (HA-AS)**

Fall and spring. 4 credits. HIST 1530 is not a prerequisite for HIST 1531. J. Parmenter.

This course introduces students to fundamental themes and trends in American history from the eve of the founding of European settlements in North America through the Civil War era. The course attends to issues of unity and diversity in American society, as well as the American nation’s emerging role in the world. The course emphasizes comparisons between different regions, interactions between peoples of different cultures, and the impact of new political, economic, and social institutions on the lives of everyday people. Readings will be drawn from primary documents, assigned texts, and significant essays. Course assignments aim at developing students’ ability to think and write critically and historically. (AM)

**HIST 1531 Introduction to American History, 1865-Present (also AMST 1531) (HA-AS)**

Summer and spring. 4 credits. HIST 1530 is not a prerequisite for HIST 1531. Next offered 2011–2012. Staff.

**HIST 1570 Fighting the Cold War at Home (HA-AS)**

Fall. 4 credits. Staff. This course considers the impact of the Cold War on life in the United States between 1945 and 1990. The political and ideological struggle between the United States and the Soviet Union played a decisive role in shaping the nation’s political, cultural, and social life. This course considers the impact of the cold war on the nation, considering topics such as political anti-communism, spy scandals, McCarthyism, popular culture, suburbia, and the links between the Cold War and the American family. We will consider a varied array of sources from the era, including books, films, magazine articles, detective novels, television shows, and popular music. (AM)

**HIST 1600 History of Law (HA-AS)**

Spring. 4 credits. H. Case and C. Verhoeven.

Topic for Spring 2011: Great Trials Through discussion of a variety of high-profile and lesser-known trials throughout history, this course will examine a range of issues in the history of law and criminality. We will study the nature of demonstrative justice, the relationship between ideology and law in different societies, the politics of trials, and the relationship of law and social marginalization. A preliminary list of cases to be covered includes Socrates, Jesus Christ, the Inquisition, the Salem Witch Trials, the French Revolutionary Terror, assassins’ trials, the Stalinist show trials, the war crimes trials at Nuremberg, culminating with more recent trials such as those of Charles Manson and Saddam Hussein.

**HIST 1620 Histories of the Future (also STS 1102) (CA-AS)**

Fall. 5 credits. S. Seth.

For description, see STS 1102.

**HIST 1700 History of Exploration (also ASTRO 1700) (HA-AS)**

Fall. 4 credits. M. B. Norton and S. Squyres.

From ancient Mediterranean seafarers to the Apollo astronauts, humans have for centuries explored the far reaches of our planet. Now we are venturing into the solar system and beyond. This course will examine the history of such human activity. Among the topics covered are motives for exploration, technological advances that assist exploration, obstacles that must be overcome, and positive and negative consequences of exploration. It is led by Steven Squyres of Astronomy and Mary Beth Norton of History; lecturers include a number of historians and a former director of the Shods Marine Laboratory.

**HIST 1800 U.S. Immigration History (also AMST/LSP 1800) (HA-AS)**

Spring. 4 credits. M. C. Garcia.

This course examines immigration as a major theme in U.S. history and culture. We will discuss immigration in different periods of our national history, from the early republican period to the present; and in different locations, from Boston and New York to San Francisco, and Honolulu. We will also examine these migrations in a global context since they were part of a worldwide migration that affected millions of people. Lectures, readings, and discussions will examine population, legal, and political responses to immigration, as reflected in legislation and policy, as well as film, art, literature, and the print media. (AM)

**HIST 1900 East Asia to 1800 (also ASIAN 1190) @ (HA-AS)**

Spring. 4 credits. T. J. Hinrichs and K. Hirano.

Survey of East Asian history from antiquity to around 1800. The primary purpose is to provide students with a basic literacy in East Asian history and cultures. Emphasis on comparison of phenomena between China and Japan, including state formation, barbarians and empire, roles of Confucianism and Buddhism, the emergence of new ruling classes, family and gender, peasant uprisings, urbanization and popular culture, and outlaws. (AS)

**HIST 1910 Introduction to Modern Asian History (also ASIAN 1191, CAPS 1910) @ (HA-AS)**

Fall. 4 credits. S. Cochran and D. Ghosh.

This introductory course follows the history of Asia-Pacific from the 19th century to the present, focusing on relations of China, India, Japan, South, and Southeast Asia. The course is intended for students wanting a broad historical overview of what makes Asia distinctive and important in a global economy and in world politics. (AS)

**HIST 1941 The History of Science in Europe: From the Ancient Legacy to Isaac Newton (also BSOC/STS 1941) # (HA-AS)**

Fall. 4 credits. P. Dear.

How did the approaches to knowledge of science that developed in medieval and early-modern Europe create an enterprise that associated the practical manipulation of nature with scientific truth? This course surveys intellectual approaches to the natural world from the theologically-shaped institutions of the Middle Ages to the Scientific Revolution of the 16th and 17th centuries. Ancient Greek authors such as Aristotle and Archimedes were used in diverse ways that came to usher in an era of European global expansion. By the late 17th century, a new kind of practically applicable science attempted to demonstrate Francis Bacon’s famous claim that “knowledge is power.” (HS)

**HIST 1942 The History of Science in Europe: Newton to Darwin; Darwin to Einstein (also BSOC/STS 1942) # (HA-AS)**

Spring. 4 credits. P. Dear.

What is modern science? And how did it get that way? This course examines the emergence of the dominant scientific worldview inherited by the 21st century, to trace how it, and its associated institutional practices, became established in largely European settings and contexts from the 18th to the early 20th centuries. It focuses on those broad conceptions of the universe and human knowledge that shaped a wide variety of scientific disciplines, as well as considering the twin views of science as “natural philosophy” and as practical tool. (HS)

**HIST 1950 Colonial Latin America (also LATA 1950) @ (HA-AS)**

Fall. 4 credits. Next offered 2012–2013. R. Craib.

**HIST 1960 Modern Latin America (also LATA 1960) @ (HA-AS)**

Spring. 4 credits. R. Craib.

A survey of the social, political, cultural, and economic history of Latin America from roughly 1800 to the present. Primary aim is to develop a mental map of the history of Latin America—of prominent themes issues; of
historical eras and trajectories. Given the vastness of Latin America, and its somewhat arbitrary composition as an object of study, the approach of the course is thematic and chronological rather than regional. We will pay attention to a number of more specific and interrelated themes: the development of, and relationship between, economies and processes of state formation; the complex roles Britain and the United States have played in the region, but always with an appreciation for how Latin Americans have shaped their own histories and those of the United States and Britain; the ways in which non-elites—slaves, workers, peasants, among others—have shaped history. By way of introducing students to the vastness of Latin America, and its somewhat arbitrary composition as an object of study, we will take a closer look at how Latin Americans have shaped their own histories and those of the United States.

**HIST 2001 Supervised Reading**

Fall or spring. 2 credits. Prerequisite: junior or senior standing. Permission of instructor required. Staff. (HR)

**Sophomore Seminars**

[HIST 2020 The Court, Crime, and the Constitution (also AMST 2022) (HA-AS)]

Fall. 4 credits. Permission of instructor required. Next offered 2011–2012. R. Folenberg.]

[HIST 2021 America and the “Good War”]

Fall. 4 credits. Staff.

This course considers the impact of the Second World War on the politics, society, and culture of the United States. The focus is on the consequences of total war on the political economy, the social structure, and the cultural life of the nation. We will pay particular attention to how the most traumatic events of the war, including the Holocaust, the internment of Japanese-Americans, and the dropping of the atomic bombs, affected the American moral imagination. (AM)

[HIST 2041 Asian American Communities (also AAS/AMST 2041) (HA-AS)]

Spring. 4 credits. D. Chang.

This seminar offers an examination of Asian American communities in particular and, more generally an analysis of the idea of community. We will use the community study as a lens to explore the development of Asian America. But we will also interrogate the very notion of community, focusing on community formation especially. (AM)

[HIST 2061 Small Wars in Greece and Rome (also CLASS 2686) (HA-AS)]

Fall. 4 credits. Next offered 2013–2014. B. Strauss.]

[HIST 2070 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also ASIAN 2206/S507, HIST 5070) (CA-AS)]

Fall. 4 credits. Prefer (but not required) that students have taken HIST 1910 or 3960. Letter grades only. T. Loos.

Travel can change our understanding of ourselves and the world. Throughout the course, we explore the connections between a writer's subjectivity and their experience of the world through their writing. We examine novels, diaries, short essays, and photographic collections by explorers, colonial officials, naturalists, and tourists who travel to and from Southeast Asia. To the extent we can, we also read works about Europe and America written by Southeast Asians. In addition to attending to a writer's subjectivity as it is produced through writing about others, we also consider the historical, political, and economic conditions that make travel possible. We will examine how travel writing is inflected with assumptions about the cultural values, race, class, and gender of both travelers and their domestic audience, on the one hand, and the people and places they write about, on the other. We will write about our own travel experiences and photos even as we critique the travel writing genre. The course ends by questioning the role of the internet in the future of tourism and travel in Southeast Asia. (AS)

[HIST 2081 Deviants, Outcasts, and Others (HA-AS)]

Fall. 4 credits. D. Corpis.

This course will examine the practice of “microhistory” as a way for understanding early-modern European culture and society. Microhistory as a genre of history writing has been most strongly developed by early-modern European historians and has largely dealt with the experiences of marginal but otherwise ordinary people—criminals, heretics, witches, lovers, peasants, and artisans. Students in this seminar will read exemplary contributions to the genre in an attempt to analyze the successes and shortcomings of this approach to history writing. Written assignments will ask students to theorize the relationship between everyday life and microhistorical phenomena, to analyze specific microhistories, and to write their own microhistories based on primary sources such as memoirs and court cases. (EM)

[HIST 2090 Seminar in Early American History (also AMST/FGS 2090) (HA-AS)]

Fall. 4 credits. M. B. Norton.

Topic for Fall 2010: The Salem Witchcraft Crisis of 1692 Even though a myriad of books have been written about this endlessly fascinating episode in American history, many aspects of it remain unexplored. After reading some of the latest scholarship on the subject and viewing contemporary depictions of it, students will focus on interpreting and analyzing original documents covering some of the lesser-known aspects of the crisis (for example, the involvement of large numbers of people from Andover, Mass.). Students will have opportunity to contribute their final work to the Salem Digital Archive on the web. (AM)

[HIST 2100 Seminar in Early American History (also AMST/FGS 2090) (HA-AS)]

Spring. 4 credits. M. B. Norton.

Topic for Fall 2010: The Salem Witchcraft Crisis of 1692. Even though a myriad of books have been written about this endlessly fascinating episode in American history, many aspects of it remain unexplored. After reading some of the latest scholarship on the subject and viewing contemporary depictions of it, students will focus on interpreting and analyzing original documents covering some of the lesser-known aspects of the crisis (for example, the involvement of large numbers of people from Andover, Mass.). Students will have opportunity to contribute their final work to the Salem Digital Archive on the web. (AM)

[HIST 2110 Black Religious Traditions: Sacred Space and Secular (also AMST/RELST 2110) (HA-AS)]

In this course, we will explore the historical, political, and economic conditions that have shaped the experiences of black people in America. The course will examine the ways in which black people have shaped the culture of the United States. The focus is on the development of African America. But we will also consider questions about community formation especially.

[HIST 2111 Black History Topics Through Film (also AMST 2111) (HA-AS)]

In this course, we will explore the historical, political, and economic conditions that have shaped the experiences of black people in America. The course will examine the ways in which black people have shaped the culture of the United States. The focus is on the development of African America. But we will also consider questions about community formation especially.

[HIST 2124 Culture of the Middle Ages (also MEDVL 2130) (HA-AS)]

Spring. 4 credits. P. Hyams.

For description, see MEDVL 2130.

[HIST 2162 Genocidal Regimes in Europe (HA-AS)]

Fall. 4 credits. J. Weiss.

Investigation of the origins, ideology, and tactics of genocidal regimes, the actions of their targeted populations, and the responses of witnessing states and groups of citizens. (EM)

[HIST 2170 Subversion as Foreign Policy (HA-AS)]

[HIST 2177 Topics in the Ancient Mediterranean (also CLASS 2677) (HA-AS)]

Fall. 4 credits. Staff.

For description, see CLASS 2677. (EA)

[HIST 2180 Seminar on Genocide (HA-AS)]

[HIST 2200 Travel in American History and Culture (also AMST 2200) (HA-AS)]

[HIST 2210 Pop Culture in China (also ASIAN 2210) (HA-AS)]

Fall. 4 credits. T. J. Huihui.

Exploration of the popular culture, society, and religion of Late Imperial China through reading of The Journey to the West (also known as Xiyouji, Hsi you chi, or Monkey) in translation and of scholarly works. Study of historical contexts in which this work was produced, performed, and read. Consideration of the emergence of a realm of “popular culture” in comparative perspective. (AS)

[HIST 2230 International Law (HA-AS)]

[HIST 2250 The United States-Mexico Border: History, Culture, Representation (also AMST/LSP 2250) (CA-AS)]

Spring. 4 credits. M. C. Garcia.

A writing-intensive, interdisciplinary sophomore seminar on the United States-Mexico border. The study of borders, and specifically of the United States-Mexico border, requires us to cross the disciplinary and methodological borders of academe itself. The proliferation of provocative writings on the border in recent years bears this assumption out: in no other field of study has the literature been so remarkably interdisciplinary; so methodologically eclectic; nor so theoretically provocative. This seminar intends to tap that literature to help students analyze and understand the histories, cultures and representations of the border that are so important to contemporary self-fashioning and policy-making in the United States and Mexico. Students can expect to write several papers of varying lengths that will develop their skills in historical research and textual criticism. (AM)
The course will explore a variety of historical, literary, and cinematic texts, produced by Africans, Asians and African Americans, that reveal as much about the producers of the texts as they do about “The European.” (AF)

HIST 2413 Monuments, Museums, and Public History (also ASRC 2413) (HA-AS)
Spring. 4 credits. S. Greene.
History museums and monuments to the past can be found in virtually every community and country. But who decides what to commemorate and what to ignore? Are exhibits suppose to reinforce or challenge common beliefs and understandings? Whose concerns should take priority when organizing exhibits, when deciding to erect a monument? What is a public historian and what is that person’s role in all this? This course addresses these questions by exploring a select number of controversies that have swirled around famous monuments and museums in the United States and in places overseas (Europe, Africa, and/or Asia).

HIST 2430 History of Things (HA-AS)

HIST 2431 Postcolonial Memories and Politics of History (HA-AS)
Fall. 4 credits. K. Hirano.
Postcolonial studies, which seek to uncover and (re-)articulate repressed voices, memories, and experiences of colonized peoples around the world, have altered the way we understand history. They have brought about the recognition that the historical profession and its mode of knowledge production have been deeply entwined with colonial strategies of domination and violence. This new recognition challenges the normative understanding of history as a discipline devoted to the objective reconstruction of the past enabled by scrupulous efforts to gather and verify facts. If historical knowledge is not as ‘objective’ as assumed, it follows that “date” and “facts” are not free from values and subjective judgment. Nor can history reveal the truth about the past. Rather, data/facts themselves constitute a certain type of narrative (that is, they are always already value-ridden) and authors of history select and combine facts and criteria in order to explain the causes, effects, processes, and consequences of events they study. In this seminar, by paying attention to this epistemological predicament of history, we will examine the relationship between history and colonialism, and try to imagine a critical and self-reflexive mode of historical inquiry based on the insights of Postcolonial Studies. (AS)

HIST 2461 Reading and Writing the African Diaspora (also ASRC 2309) (HA-AS)

HIST 2470 The Age of Charlemagne (HA-AS)
Fall. 4 credits. P. Hyams.
Charlemagne (Charles the Great, 775–814) is still revered as “the Father of Europe.” In his time as king of the Franks and then emperor of the West, we see for the first time with any clarity the shape of Europe as it would remain for a millennium and more, also of the structures and cultural mix that would characterize the West before there were a
France, Germany, or the United Kingdom. The “Carolingian Renaissance” promoted a brief but fruitful burst of writings and artifacts, including an intimate if slippery Life of Charlemagne and much better documentation of the public and to an extent even the everyday life of the age. By reading primary sources in translation, students can grasp a pivotal moment in Western Civilization, see how historians construct their categories, and learn the limitations of the historical craft. (ER)

[HIST 2492 Europe’s Asia: Modern European Discourse on History and Subjectivity (also ASIAN 2292) (HA-AS)] Spring. 4 credits. J. V. Koschmann. Integral to modern European philosophies of history and the human subject is an image of Asian societies (or the “Orient”) as static and despotic. G. W. H. Hegel posited that China was the “childhood of history,” a land where “nothing subjective is recognized.” Marx tried to account for the apparent absence of historical change in India by developing the model of an “Asiatic mode of production,” and Max Weber searched in vain through Chinese religion and ethics for an analogue to the Protestant ethic. In this seminar, we will consider the Hegelian, Marxian, and Weberian theses in some detail, and then turn to some more recent Western constructs of East Asia. Along the way, we will reflect critically upon intellectual history as an approach to the past, the epistemological functions of cultural opposites, the relationship between theories of history and the practice of imperialism, and other relevant questions. The seminar is meant to provide an open and nonthreatening context in which students can gain experience in the interpretation and analysis of complex texts that are not only difficult and problematical but of seminal importance in the ongoing process of human self-understanding. (AS)

Lecture Courses

[HIST 2500 Technology in Society (also ECE/ENGRG 2500, STS 2501) (HA-AS)] Fall. 3 credits. R. Kline. For description, see ENGRG 2500. (HS)

[HIST 2511 Black Women to 1900 (also AMST/FGSS 2511) # (HA-AS)] Fall. 4 credits. M. Washington. This course explores the social, cultural and communal lives of black women in North America, beginning with the transatlantic slave trade, and ending in 1900. Topics include Northern and Southern enslavement, first freedoms in the North, Southern emancipation, color consciousness, gender racially and issues of class. (AM)

[HIST 2512 Black Women in the 20th Century (also AMST/FGSS 2512) (HA-AS)] Spring. 4 credits. M. Washington. This course focuses on African American women in the 20th century. The experiences of black women will be examined from a social, practical, communal, and gendered perspective. Topics include the Club Woman’s movement, suffrage, work, family, black and white women and feminism, black women and radicalism, and the feminization of power. (ER)

[HIST 2530 Introduction to Islamic Civilization (also NES/RELST 2655) # (HA-AS)] Fall. 3 credits. D. Powers. For description, see NES 2655. (NE)

[HIST 2560 War and Peace in Greece and Rome (also HIST 2680) # (HA-AS)] Spring. 4 credits. J. Chen. This is a lecture and discussion course focusing on how China has encountered the world since the 17th century, with an emphasis on the late 19th and 20th centuries. In particular, it will analyze the age-old Chinese “Central Kingdom” conception and how the conception was challenged during modern times as the result of Western and Japanese incursion and China’s inability to deal with the consequences of the incursion. It will further analyze the impact of the Chinese “victim mentality” in order to pursue a deeper understanding of why radical revolutions have dominated China’s modern history. While the emphasis of this course is China’s external relations, foreign policy issues will be examined in the context of China’s political, economic and social developments in broader terms. The course’s purpose is not just to impart information but also to cultivate a basic understanding of the significance of the Chinese experience in the age of worldwide modernization. Grade in this class will be calculated on the basis of class participation, quizzes, midterm and final exams, and one essay assignment. (AS)

[HIST 2570 Periclean Athens (also CLASS 2676) # (HA-AS)] Fall. 4 credits. H. Rawlings. For description, see CLASS 2676. (EA)

[HIST 2571 China Encounters the World (also ASIAN 2257, CAPS 2570) # (HA-AS)] Fall. 4 credits. J. Chen. This is a lecture and discussion course focusing on how China has encountered the world since the 17th century, with an emphasis on the late 19th and 20th centuries. In particular, it will analyze the age-old Chinese “Central Kingdom” conception and how the conception was challenged during modern times as the result of Western and Japanese incursion and China’s inability to deal with the consequences of the incursion. It will further analyze the impact of the Chinese “victim mentality” in order to pursue a deeper understanding of why radical revolutions have dominated China’s modern history. While the emphasis of this course is China’s external relations, foreign policy issues will be examined in the context of China’s political, economic and social developments in broader terms. The course’s purpose is not just to impart information but also to cultivate a basic understanding of the significance of the Chinese experience in the age of worldwide modernization. Grade in this class will be calculated on the basis of class participation, quizzes, midterm and final exams, and one essay assignment. (AS)

[HIST 2580 Periclean Athens (also CLASS 2676) # (HA-AS)] Fall. 4 credits. Staff. For description, see CLASS 2676. (EA)

[HIST 2660 Everything You Know about Indians Is Wrong: Unlearning Native American History (also AIS/AMST 2660) # (HA-AS)] Spring. 4 credits. J. Parmenter.

[HIST 2675 American History (also AAS 2130, AMST 2660) # (HA-AS)] Spring. 4 credits. Open to freshmen. Staff. A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy; and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture. (EA)

[HIST 2680 Ancient Greece from Homer to Alexander the Great (also CLASS 2675) # (HA-AS)] Spring. 4 credits. Open to freshmen. Staff. A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy; and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture. (EA)
HIST 2670 History of Rome I (also CLASS 2581) # (HA-AS)
Fall. 4 credits. Staff.
For description, see CLASS 2581.

[HIST 2671 History of Rome II (also CLASS 2582) # (HA-AS)]

[HIST 2672 History of Modern Egypt (also NES 2670) @ (HA-AS)]

[HIST 2674 History of the Middle East: 19th–20th Centuries (also NES/JWST 2674, GOVT 2747) @ # (HA-AS)]
Fall. 3 credits. Next offered 2011–2012. Z. Fahmy.

HIST 2711 Politics of Violence in 20th-Century Europe (also GOVT 2716) (HA-AS)
Fall. 4 credits. H. Case.
This course provides a survey of Europe’s 20th-century history, with special emphasis on violence and its interpretation. Types of violence to be considered include warfare, terrorism, genocide, uprisings, and assassination, among others. Discussions of the First and Second World Wars and the political and ethnic clashes of the Cold War and decolonization will be supplemented by a series of case studies, which will focus on deciphering various political motivations behind calls for and interpretations of violence. (EM)

[HIST 2720 The Atlantic World from Conquest to Revolution (also AMST 2720) # (HA-AS)]

[HIST 2730 Women in American Society, Past and Present (also AMST/FGSS 2730) # (HA-AS)]

HIST 2740 Foodways: A Social History of Food and Eating (HA-AS)
Fall. 4 credits. S. Kaplan.
An interdisciplinary examination of the validity of the adage “woman/man is what she or he eats.” Among the topics: food and social relations, food and identity, food and symbolic thought, food and the construction of the state, feast and famine, food and gender, the politics of food control, food and modernization, taste making, and food in religion and literature, food and sustainable development/environment.

HIST 2750 History of Modern South Asia (also ASIAN 2275) @ # (HA-AS)
Spring. 4 credits. D. Ghosh.
This introductory course is a broad survey of the history of the Indian subcontinent from remnants of the Mughal empire through the end of the British empire into the postcolonial present. Prominent themes include the emergence of nonviolent protest, religious and regional identities, ethnic rivalries, social reform and the “woman question,” deindustrialization, nationalism and the place of democracy and militarism in a region that includes two nuclear powers, India and Pakistan. (AS)

[HIST 2770 Getting Medieval I: The Early Middle Ages (HA-AS)]

[HIST 2771 Getting Medieval II: The Age of Cathedral, Cartel, and Crossbow (HA-AS)]
Fall. 4 credits. Prerequisite: HIST 2620/HIST 2770 or permission of instructor. Next offered 2011–2012. O. Falk.

HIST 2791 International Humanitarianism (HA-AS)
Spring. 4 credits. J. Weiss.
This course studies international humanitarian and human rights activities from their origins to the present. The ideological and social roots of humanitarian thought and action receive attention, and where the often-overlapping, sometimes conflictual relationship between humanitarianism and human rights advocacy. Case studies will include the anti-slavery movement, the activities of faith-based groups, biographical studies of pioneering individuals, and the international response to various genocides. (EM)

[HIST 2850 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492 to 1789 (also JWST 2653, NES 2645) # (HA-AS)]
Spring. 4 credits. V. Caron.
This course examines the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics include the Spanish Inquisition, the establishment of Jewish communities in the West, the end of the “Golden Age” of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the 17th and 18th centuries; and the impact of the Enlightenment. (EM)

[HIST 2861 History of Zionism and the Birth of Israel (HA-AS)]
Spring. 4 credits. Next offered 2012–2013. V. Caron.

[HIST 2870 Evolution (also BIOEE 2070, STS 2871) (PBS)]
Summer and fall. 3 credits. W. Provine.
For description, see BIOEE 2070. (HS)

HIST 2890 The United States–Vietnam War (also ASIAN 2298) @ (HA-AS)
Spring. 3 credits. K. Taylor.
For description, see ASIAN 2298.

HIST 2891 Script and Culture in East Asia (also ASIAN 2299) @ # (LA-AS)
Fall. 3 credits. B. Rusk.
For description, see ASIAN 2299. (AS)

HIST 2910 Modern European Jewish History, 1789 to 1948 (also JWST 2900) (HA-AS)
Fall. 4 credits. V. Caron.
Jewish life in Europe experienced a profound transformation as a result the process of Jewish emancipation which began at the end of the 18th century. While emancipation offered Jews unprecedented social, economic and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course will examine the ways in which Jewish and non-Jewish societies responded to these new developments from the 18th century Enlightenment to the post–World War II era. Topics will include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation; the development of modern antisemitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era. (EM)

HIST 2920 Inventing an Information Society (also AMST/ECE/ENGRC 2980, STS 2921) (HA-AS)
Spring. 3 credits. R. Kline.
For description, see ENGRG 2980. (AM)

[HIST 2940 History of China in Modern Times (also ASIAN 2294, CAPS 2940) @ (HA-AS)]

HIST 2960 East Asian Martial Arts (also ASIAN 2290) @ (HA-AS)
Fall. 4 credits. T. J. Hinrichs.
Exploration of the social, political, and cultural contexts of martial arts practice, and historical dynamics behind their transmission, transformation, and spread. Examination of the emergence of martial artists as popular figures, and martial arts as distinct sets of practices in China and Japan. Study of the modern re-invention of these practices, and of their transmission to other parts of the world. Investigation of a local martial arts school, and of the question, “What is East Asian about East Asian martial arts in Ithaca?” (AS)

HIST 2969 Soviet History (HA-AS)
Fall. 4 credits. C. Verhoeven.
This course surveys the history of the world’s first socialist society from its unlikely beginnings in 1917 to its unexpected demise in 1991. Traditional topics such as the origins of the revolutions of 1917, Stalin’s Terror, WW II, Khrushchev’s Thaw, etc., will be covered, but lectures will emphasize the interaction between the political, socioeconomic, and especially the cultural spheres. A good deal of the materials we will study in this course will be drawn from the realm of literature, cinema, and art. (EM)

[HIST 2970 Imperial Russia: Peter the Great to the Revolution of 1917 (HA-AS)]
Fall. 4 credits. Next offered 2011–2012. C. Verhoeven.

HIST 2971 Crisis of Authority (HA-AS)
Fall. 4 credits. D. Corbin.
This course offers an overview of the “early modern” period of European history (c. 1500–1800) by charting the shifts and changes in religion, culture, politics, and economics during the 16th, 17th, and 18th centuries. Specific topics explored in weekly lectures will include the Reformation and Counter-Reformation, political centralization, intellectual fragmentation, the institutionalization of science, the Enlightenment, and political rebellion and revolution. In addition to focusing on some of the key developments in European history during this period, the design of the course...
recognizes the necessity of locating European history within a broader geographic world, so we will also explore the question of European contacts with other cultures, colonial expansion, and Atlantic slavery. (EM)

[HIST 2981  Power, Culture, and Heterogeneity in Premodern Japan, 1200–1850 (also ASIAN 2295) # (HA-AS)]

[HIST 3002  Supervised Research]
Fall and spring. 3 or 4 credits. Prerequisite: junior or senior standing. Permission of instructor required. Staff. (HR)

[HIST 3030  African American Women in Slavery and Freedom (also AMST 3030, FGPS 3070) # (HA-AS)]

[HIST 3050  Britain, 1660 to 1815 # (HA-AS)]

Fall. 4 credits. C. Robcis.

[HIST 3350  Modern Age (also STS 3350) (HA-AS)]
Spring. 4 credits. Offered in the Cornell in Washington Program. R. Bush.

[HIST 3391  Seminar on American Relations with China (also ASIAN 3305, CAPS 3000) (HA-AS)]
Fall. 4 credits. Offered in the Cornell in Washington Program. R. Bush.

[HIST 3400  Recent American History, 1925 to 1965 (also AMST 3400) (HA-AS)]

[HIST 3410  Recent American History, 1965 to the Present (also AMST 3410) (HA-AS)]
Spring. 4 credits. Offered in 2011–2012. Staff.

[HIST 3420  History of Modern South Asia, 1700 to 1947: From the Mughals to Midnight (also ASIAN 3342) # (HA-AS)]
A survey of the turning point of U.S. history: The Civil War (1861–1865) and its aftermath. Reconstruction (1865–1877). We will look at the causes, the coming, and the conduct, of the war, and the way in which it became a war for freedom. We will then follow the cause of freedom through the greatest slave rebellion in American history, and the attempts by formerly enslaved people to make freedom real in Reconstruction. And we will see how Reconstruction's tragic ending left questions open that are still not answered in U.S. society and politics. (AM)

Emphasis is placed on the close reading and the notion of a "Renaissance" in the period's generation of Machiavelli, Guicciardini and learning from Petrarch to Bruni, Alberti, Valla, stages of Italian Humanism's revival of ancient thought of Dante and Marsilius of Padua in "Renaissance"? This course explores the major 1300 and 1550 think of their age as a political theory. (EM)

Why did Italian intellectuals between roughly 1450–1850 mark the time when peoples, ideas, material goods, and beliefs began to move on a regular basis across the Atlantic, first between Africa and Europe, and then later between Africa, North and South America, and the Caribbean. This course traces these movements and explores how West Africans managed their relations with the West over a 400-year period. (AF)

What impact did Africa's involvement in the slave trade and its colonization by Europe have on its long-term economic health? What role have post-independence political decisions made within Africa and by multinational economic actors (the World Bank and the IMF, for example) had on altering the trajectory of Africa's economic history? Does China's recent heavy investment in Africa portend a movement away from or a continuation of Africa's economic underdevelopment? These questions and others will be addressed in this course. (AF)

What impact did Africa's involvement in the slave trade and its colonization by Europe have on its long-term economic health? the birthplaces of constitutional government and modern political thought, a major economic power throughout Western Europe and the Mediterranean, and a center of intellectual and artistic innovation that did much to shape the culture and historical memory of the modern West. This course examines the society, institutions, conflicts, and ideas that animated this experience, from the origins of the republic and its political and class struggles to the causes and consequences of the rise to power in this republican context of the Medicis family. Attention will focus on the attempts by Florentine writers—poets, chroniclers, humanists, and historians—to understand and represent their complex society. (ER)

[HIST 4040 United States-Cuba Relations (also AMST/LATA/LSP 4050/6050, HIST 6050) (HA-AS)]

[HIST 4050 The African American Workers, 1865 to 1910: The Rural and Urban Experience (also ILRSC 3850) (HA-AS)]
Fall. 3 credits. Junior or senior standing or permission of instructor. Next offered 2011–2012. N. Salvatore.

[HIST 4061 The New Cold War History (also HIST 6061) (HA-AS)]

[HIST 4067 The Second World War: Causes, Conduct, Consequences (HA-AS)]

[HIST 4068 American Experience (also GEOG 4100, HIST 4100) (HA-AS)]
Spring. 4 credits. Open to majors and nonmajors in history, and fall. 4 credits. Open to freshmen. Next offered 2012–2013. D. Corpis.

Undergraduate Seminars

[HIST 4030 History of the U.S. Senate in the 20th Century (also GOVT 4218) (HA-AS)]
Fall and spring. 4 credits. Offered in Cornell in Washington Program. B. Koed. This course will offer students an opportunity to view the process of shaping national debates from the perspective of the United States Senate. The modern Senate will serve as the point of reference for an inquiry into the development of the institution’s powers under the Constitution during the past 200 years. Class readings, lectures and discussions will focus on the themes of continuity and change, the role of individual senators, and the institutional evolution of the Senate. In addition to general class reading and written examinations, each student will write a short paper and participate in an oral presentation. (AM)

[HIST 4050 United States-Cuba Relations (also AMST/LATA/LSP 4050/6050, HIST 6050) (HA-AS)]

[HIST 4051 Contesting Identities in Modern Egypt (also NES 4065) (HA-AS)]
Fall. 4 credits. Next offered 2011–2012. Z. Fahmy.
HIST 4100 Archipelago: Worlds of Indonesia (also ASIAN 4409/6617, HIST 6100) # (HA-AS)
Spring. 4 credits. Open to undergraduates and graduate students, though with separate requirements. Limited to 15 students. Next offered 2012–2013. E. Tagliacozzo.

HIST 4101 Global Islam @ # (HA-AS)
Spring. 4 credits. E. Tagliacozzo.
This course looks at Islam as a global phenomenon, both historically and in the contemporary world. We spend time on the genesis of Islam in the Middle East, but then make a cross the Muslim world in various weeks (in Africa, Turkey, Iran, Eurasia, Southeast Asia, East Asia) and to the West to see how Islam looks across global boundaries. The course tries to flesh out the diversity of Islam within the central message of this world religion. (AS)

HIST 4111 Undergraduate Seminar: History of the American South (also AMST 4302) (HA-AS)

HIST 4120 The Scientific Revolution in Early—Modern Europe (also STS 4120) # (HA-AS)

HIST 4122 Darwin and the Making of Histories (also BSOC/STS 4122) (HA-AS)
Fall. 4 credits. P. Dear and S. Seth.
Who was Charles Darwin? What did he do, and how did he do it? And what did other people do with him? From Darwin’s own time to ours, there have been many people, scientists as well as non-scientists, who have been eager to show that what they wanted to say had also been said by him. This has also meant that many things Darwin said have been selectively ignored when it seemed convenient. The power of a name is sometimes as great as that of an idea. This course will study what made Darwin possible in his own time and how he became, then and now, an icon rather than just a Victorian naturalist. We will look at writings of Darwin himself, especially On the Origin of Species (1859), Descent of Man (1871), and his short autobiography, and attempt to understand what they meant in their own time, how Darwin came to write them, and how his contemporaries helped to shape their future. How did Victorian ideologies of gender, race, and class shape the production and reception of Darwin’s work? We will also examine the growth of “Darwinism” as a set of broader social and cultural movements, particularly in Britain and the United States, including the work of Herbert Spencer, Francis Galton, Alfred Russel Wallace, Karl Pearson, and other 19th- and early-20th-century figures. Were eugenics movements examples or perversions of Darwinism? Finally, we will consider how Darwin’s name has been used by more recent evolutionary biologists such as Steven Jay Gould, and by American anti-evolutionists. (HS)

HIST 4150 Seminar in the History of Biology (also BIOEE 4670, BSOC/STS 4017) (HA-AS)
Summer or fall. 4 credits. W. Provine.
For description, see BIOEE 4670. (HS)

HIST 4170 History of Jews in Modern France (also FREN 4130, JWST 4170) (HA-AS)
Spring. 4 credits. Permission of instructor required. Next offered 2011–2012. V. Caron.

HIST 4171 The Holocaust: The Personal and the Political (also JWST 4171) (HA-AS)
Spring. 4 credits. V. Caron.
This seminar will examine several of the major debates in the study of the Holocaust by using a variety of types of historical and literary sources. In addition to secondary historical texts, we will focus on recapturing the personal dimension of the history of the Holocaust by using a variety of printed primary sources: memoirs and diaries, novels and short stories; and films. We will also attempt to assess the diverse vantage points offered by these different sorts of sources. Finally, we will examine the historical memory of the Holocaust. A film series will be associated with this course. (EM)

HIST 4200 Asian American Communities (also AAS 4240, AMST 4200) (HA-AS)

HIST 4231 Gender and Technology (also BSOC/FGSS/STS 4231) (HA-AS)

HIST 4251 Ethics, Race, Religion, and Health Policy (HA-AS)
Fall. 4 credits. Offered in Cornell in Washington Program. A. Kraut. (AM)

HIST 4260 The West and Beyond: Frontiers and Borders in American History and Culture (also AMST 4260) (HA-AS)

HIST 4261 Commodification and Consumerism in Historical Perspective: Sex, Rugs, Salt, and Coal (also AMST 4261) @ # (HA-AS)

HIST 4270 Reading the Africa Diaspora (HA-AS)

HIST 4271 African Environmental History (also ASRC 4305) @ (HA-AS)

HIST 4272 Apartheid and Its Afterlives (also ASRC 4272) (HA-AS)
Fall. 4 credits. D. Magaziner.
Apartheid—white minority rule in South Africa—ended in 1994. Or did it? It began in 1948. Or in 1910. Or in 1652. This seminar interrogates the history, practice, and experience of white minority rule in South Africa, both before and after 1994. We will read memoirs, novels, and monographs, view movies, and critique and explore the contested politics and possibilities of modern South Africa. (AF)

HIST 4301 Black Leaders and Movements in African American History (also ASRC 4301) (HA-AS)
Spring. 3 credits. R. Harris.
For description, see ASRC 4301. (AF)

HIST 4320 Migrant Workers (also CRP 3850/5850, HIST 6310, ILRCB 4020, LSP 4100/6100) (HA-AS)

HIST 4360 Conflict Resolution in Medieval Europe # (KCM-AS)

HIST 4390 Reconstruction and the New South (also AMST 4039, HIST 6391) # (HA-AS)
Fall. 4 credits. Limited to juniors and seniors. M. Washington.
This course focuses on the American South in the 19th century as it made the transition from Reconstruction to new forms of social organization and patterns of race relations. Reconstruction will be considered from a sociopolitical perspective, concentrating on the experiences of the freed people. The New South emphasis will include topics on labor relations, economic and political changes, new cultural alliances, the rise of agrarianism, and legalization of Jim Crow. (AM)

HIST 4400 Undergraduate Seminar in Recent American History (also AMST 4400) (HA-AS)

HIST 4411 Fourth-Century and Early History of Greece (also CLASS 4410) # (HA-AS)

HIST 4421 To Be Enslaved Then and Now (also ASRC 4306) # (HA-AS)

HIST 4428 Formation of the Field (also ASIAN 4428) @ (HA-AS)
Spring. 4 credits. N. Sakai.
For description, see ASIAN 4428.

HIST 4450 Strategy in World War II (HA-AS)
Spring. 4 credits. Permission of instructor required. J. Weiss.
Strategic decision-making in World War II. The course will be organized into a “task force” addressing crucial problems faced by the European-American Allies in World War II: the invasion of northwest Europe, strategic bombing tactics, the rescue of European Jews, and coordination with the Soviet Union. Individual presentations/papers followed by meetings to draft group reports. (EM)

HIST 4502 Power and Popular Culture in Early Modern Japan @ # (HA-AS)

HIST 4520 History of the New Europe (HA-AS)
VISST 4951, COML 4067)

[HIST 4950 Gender, Power, and Authority in England, 1600 to 1800] (CA-AS)
Spring. 4 credits. Prerequisite: HIST 2940 or permission of instructor. S. Cochran.

[HIST 4911 Vietnam History: Trauma in Modern Vietnamese Culture] (also ASIAN 4429, HIST 6931) @ (HA-AS)
Fall. 4 credits. T. Loos and T. Chaloemtiarana.

[HIST 4900 Seminar on Thailand (also ASIAN 6601, HIST 6670) @ (HA-AS)]

[HIST 4920 India: Nation and Nationalism (also HIST 6921, ASIAN 4497) @ (HA-AS)]
Spring. 4 credits. D. Ghosh.
This advanced seminar for undergraduates and graduate students explores how colonial India became a modern nation in the 20th century. This seminar begins the nationalist struggle for independence against British colonialism and ends with discourses about India’s newfound economic power and nuclear authority. In following India’s progress through the 20th century, we will turn to partition—the division of the subcontinent into India and Pakistan—and the challenges that India has faced in integrating women, lower caste groups, minorities, and Muslims into its citizenry. (AS)

[HIST 4930 Problems in Modern Chinese History (also ASIAN 4493/6693, HIST 6930) @ (HA-AS)]
Fall. 4 credits. Prerequisite: HIST 2940 or permission of instructor. S. Cochran.
Conflicting interpretations of Chinese history during the late imperial period and the first half of the 20th century. (AS)

[HIST 4931 Vitality and Power in China (also RELST/CAPS 4931, STS/BSOC 4911, ASIAN 4429, HIST 6931)]
Spring. 4 credits. T. J. Hinrichs.
Chinese discourses have long linked the circulation of cosmic energies, political power, and bodily vitalities. In these models political order, spiritual cultivation, and health are achieved and enhanced through harmonizing these flows across the levels of Heaven, Earth, state, and humankind. It is when these movements are blocked or out of synchrony that we find disordered climates, societies, and illness. In this course, we will examine the historical emergence and development of these models of politically resonant persons and bodily centered politics, reading across primary texts in translation from these otherwise often separated fields. For alternate frameworks of analysis as well as for comparative perspectives, we will also examine theories of power and embodiment from other cultures, including recent scholarship in anthropology and critical theory. (AS)

[HIST 4950 Gender, Power, and Authority in England, 1600 to 1800] (CA-AS)
Spring. 4 credits. M. Reil.

[HIST 4951 Photography and Decolonial Imagination (also ART/ASRC/SHUM/ VISST 4951, COML 4067)]
Spring. 4 credits. J. Bajorek.
For description, see SHUM 4951.
**Graduate Seminars**

[HIST 6000] Graduate Research Seminar Spring. 4 credits. Staff. This seminar is devoted entirely to the writing of a substantive research paper. Students will share research proposals, annotated bibliographies, outlines and portions of rough drafts. Class meetings will be devoted to discussing what students have produced, and general issues associated with constructing research papers. (HR)

[HIST 6010] European History Colloquium Fall and spring. 2 credits each semester. Limited to graduate students. Fall, D. LaCapra; spring, D. Corpis. A research colloquium designed for European history graduate students. The colloquium will offer a forum for students to present papers and to discuss the work of visiting scholars. (EM)

[HIST 6020] Asian History Colloquium (also ASIAN 5599) Fall and spring. 2 credits. V. Koschmann. A forum for graduate students to present their work and discuss the work of others. (AS)

[HIST 6030] The Americas Colloquium Fall and spring. 4 credits. E. Baptist. A research colloquium designed for graduate students in U.S. and Latin American history. The colloquium will offer a forum for students to present papers and to discuss their work and that of occasional visiting scholars. (AM)

[HIST 6181] Confluence: Environmental History and Science & Technology Studies (also STS 6181) Spring. 4 credits. S. Pritchard.

[HIST 6190] History of Technology (also STS 6261) Fall. 4 credits. R. Kline. For description, see STS 6261.

[HIST 6380] Modernity and Modernism East and West Fall. 4 credits. C. Verhoeven. Graduate seminar on the history and historiography of "modernity." What is "modernity"? Where and when is "modernization"? And what is "modernism"?

The goal of the course is to become familiar with the predominant theories and concepts of the "modern" in the field of European history and to explore their applicability across the European continent, from West to East. (EM)

[HIST 6391] Reconstruction and the New South (also HIST/AMST 4039) Fall. 4 credits. M. Washington. For description, see HIST 4590. (AM)

[HIST 6470] Theories of Ideology (also FREN 6470, GERST 6870) Spring. 4 credits. C. Robcis. Why do people do the things they do? What is the relation between cognition and action, between knowing and doing? Are ideologies always historically specific or are they produced by more permanent structures? This graduate seminar will examine these questions by comparing various theories of ideology and subjectivity, with a special focus on Marxism, structuralism, and psychoanalysis. Readings will be both historical and theoretical (Marx, Freud, Althusser, Gramsci, Zizek, Arendt, Bourdieu, Butler, Deleuze, Fanon, Bersani, Mahmood, among others).

[HIST 6611] Conflict and Transformation in Early Modern Japan, 1700–1890 (also HIST 3611, ASIAN 3361) Spring. 4 credits. K. Hirano. For description, see HIST 3611. (AS)

[HIST 6621] The Enlightenment (also HIST 4621) Fall. 4 credits. S. Kaplan. For description, see HIST 4621. (EM)

[HIST 6650] Reading and Viewing Modern China (also CHIN 4426/6626, HIST 4650) Spring. 4 credits. Prerequisite: equivalent of three years Mandarin instruction. Permission of instructor required. Z. Chen. For description, see HIST 4650. (AS)

HIST 6720 Seminar in European Intellectual History (also COML 6720)  
D. LaCapra.

HIST 6730 Topics in Modern European Intellectual History (also COML 6730, JWST 6740)  
Fall: 4 credits. D. LaCapra.

HIST 6750 Genocidal Regimes  
J. Weiss.

HIST 6810 Intellectual History of Empire (also ASIAN 6681)  
J. V. Koschmann and N. Sakoi.

HIST 6820 Topics on Indian Ocean Studies  
E. Tagliacozzo.

HIST 6830 Seminar in American Labor History (also ILRGBC 7081)  
Fall: 3 credits. Prerequisite: graduate standing. Next offered 2011–2012.  
N. Salvatore.

HIST 6870 Seminar on Thailand (also ASIAN 6601, HIST 4870)  
T. Loos and T. Chaloemtiarana.

HIST 6921 India: Nation and Nationalism (also ILRGBC 7081)  
Spring: 4 credits. D. Ghosh.  
For description, see HIST 4920. (AS)

HIST 6930 Problems in Modern Chinese History (also ASIAN 4493/6693, HIST 4930)  
Fall: 4 credits. S. Cochran.  
For description, see HIST 4930. (AS)

HIST 6931 Vitality and Power in China (also HIST/RELST/CAPS 4931, STS/BSOC 4911, ASIAN 4429)  
Spring: 4 credits. T. J. Hinrichs.  
For description, see HIST 4931. (AS)

HIST 6940 Problems in Modern Chinese History (also ASIAN 4499/6694, HIST 4990)  
Fall: 4 credits. Prerequisite: HIST 2940 or permission of instructor. Next offered 2011–2012.  
S. Cochran.

HIST 6950 Premodern Southeast Asia (also ASIAN 3397, HIST 3950)  
Fall: 4 credits. E. Tagliacozzo.  
For description, see HIST 3950. (AS)

HIST 6960 Southeast Asian History from the 18th Century (also ASIAN 6696)  
Spring: 4 credits. T. Loos.  
Surveys the modern history of Southeast Asia with special attentions to colonialism, the Chinese diaspora, and sociocultural institutions. Considers global transformations that brought “the West” into people’s lives in Southeast Asia. Focuses on the developments of the modern nation-state, but also questions the narrative by incorporating groups that are typically excluded. Assigns primary texts in translation. (AS)

HIST 6961 History of Medicine and Healing in China (also ASIAN 4469, BSOC/HIST/STS 4961)  
T. J. Hinrichs.

HIST 6970 Jim Crow and Exclusion-Era America (also AAS/HIST 4970, AMST 4970/6970)  
D. Chang.

HIST 6980 Seminar in Japanese Thought (also ASIAN 6698)  
Spring: 4 credits. Prerequisite: reading knowledge of Japanese. J. V. Koschmann.  
In spring 2011, this seminar will begin with the question of why rationalistic social theorists and planners in Japan in the era of total war turned for inspiration to the works of Adam Smith and the idea of civil society. It then follows the work of those who came to be known as the Civic Society School into the post–World War II era. Along the way, we will reassess the notion of civil society in relation to Marxism, modernity and politics, including neo-liberalism. (AS)

HIST 7090 Introduction to the Graduate Study of History  
This course is designed to introduce entering graduate students to crucial issues and problems in historical methodology that cut across various areas of specialization. (HR)

HIST 8000-8007 Supervised Reading  
4 credits each semester. Prerequisite: graduate standing. Permission of instructor required. Staff. (HR)

HISTORY OF ART  

ARTH 2200 Introduction to Art History: The Classical World (also ARKEO/CAPS 2100, AMST 3100)  
Spring: 4 credits. M. Fernandez.  
For description, see AMST 3100.

ARTH 2000 Introduction to Visual Studies (also VISST/COML 2000, ENGL 2920) (LA-AS)  
Fall: 4 credits. B. Maxwell.  
For description, see COML 2200.

ARTH 2200 Introduction to Art History: The Classical World (also ARKEO/CLASS 2700#) (HA-AS)  
Fall: 4 credits. A. Alexandridis.  
The course is an overview of the art and archaeology of the Greek and Roman world,
covering the sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.

[ARTH 2227 Art and Archaeology in the Ancient Mediterranean World also CLASS 2727) (HA-AS) Fall. 3 credits. Next offered 2011–2012. For description, see CLASS 2727.]

ARTH 2350 Introduction to Art History: Islamic Art and Culture (HA-AS) Fall. 4 credits. C. Robinson. Spanning the years between the advent of Islam as one of the world's great religions in the early 7th century and the end of the 14th century. Assignments will include two in-class and two take-home exams plus two shorter writing assignments.

ARTH 2400 Introduction to Art History: Renaissance and Baroque Art (also VISST 2645) (HA-AS) Fall. 4 credits. Each student must enroll in a sec. C. Lazzaro. A survey of major works of European artists from 1400 to 1700, including all arts, with an emphasis on painting and on analysis of the artworks. As a frame for interpreting these works, we will emphasize the social, religious, and political contexts in which artists worked and the role of patrons in the creative process. The course will also serve as an introduction to the art historical approaches through which we interpret these works today.

ARTH 2402 Survey of European Art: Renaissance to Modern (CA-AS) Summer only. 3 credits. D. Royce-Roll. The major traditions and movements in western European art from the Renaissance to the modern period. Painting, sculpture, and architecture with an emphasis on painting. Each Friday class meets at the Herbert F. Johnson Museum of Art with gallery talks and viewing of relevant works that supplement the previous four days of classroom lectures.

[ARTH 2500 Introduction to the History of Photography (CA-AS) Fall. 4 credits. Next offered 2011–2012. I. Dadi.]

ARTH 2550 Introduction to Art History: Latin American Art (also LATA 2500) Summer. 4 credits. M. Fernandez. Introduces students to Latin American art from antiquity to present and explores broad theoretical problems in the field. The art of local cultures (e.g., Maya, Aztec, and Inca) is discussed as well as episodes in the arts of colonial and modern Latin America. Topics include cultural confluences and the concept of style, the representation of national identity, art and political resistance, intersections of high art and popular culture and the applicability of specific modern, postmodern, and postcolonial theories to Latin American art.

ARTH 2600 Introduction to Art History: The Modern Era (CA-AS) Spring. 4 credits. Not open to students who have taken ARTH 2601. Each student must enroll in a sec. J. Bernstock. Considers modern art in a historical and cultural context, from painting associated with the French Revolution through American pop art. The emphasis is on major movements and artists: Neo-Classicism (David), Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (Van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol). Different critical approaches are examined.

ARTH 2801 Script and Culture in East Asia (also ASIAN 2209) (LA-AS) Fall. 4 credits. B. Rush. For description, see ASIAN 2209.

ARTH 3171 Architectural History of Washington, D.C. (also HA-AS) Fall or spring. 4 credits. Prerequisite: students in Cornell in Washington program; nonarchitects. Staff. Historical and critical survey of the architecture of Washington. Attention is given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urbanscape of the nation's capital. The vocabulary of architectural analysis and criticism is taught. Field trips required.

ARTH 3320 Iconography of Greek Myth (also CLASS 3727) (HA-AS) Spring. 4 credits. A. Alexandridis. Myths are traditional tales. Their authority becomes apparent in that they were constantly adapted to changing social, political, cultural, etc. conditions. This seems to be widely accepted definition so far, it is deeply influenced by Greek tradition. Not only is the term myths (word, tale) Greek, but the ubiquity of Greek gods, heroes, and their deeds in ancient literature and material culture has given myths an importance they might not have had in other cultures. This class will give an overview of the most important Greek myths and mythological figures as depicted in Greek and Roman times. The chronological frame will range from the seventh century BC to the third century AD. We will discuss the iconography of the Olympian gods and their escorts; myths such as the loves of the gods; the battles between the Olympian Gods and the Giants, between Greeks and Amazons as well as between Lapiths and Centaurs; the Trojan War; the adventures of Odysseus; the heroic deeds of Heracles, Theseus and Perseus among others. By analyzing where and when mythological images were on display it will become clear how myths were adapted to their specific context as well as why certain myths were more often depicted or more popular than others.

ARTH 3350 Introduction to Dendrochronology (also ARKEO 3090, CLASS 3750) (HA-AS) Fall. 4 credits. S. Manning. For description, see CLASS 3750.

[ARTH 3300 Romanesque and Early Gothic Art and Architecture: Europe and the Mediterranean 900 to 1150 (also NES 3759) (LA-AS) Spring. 4 credits. Prerequisite: ARTH 2350 or ARTH 2355; freshmen enrollment with permission of instructor only. Next offered 2011–2012. C. Robinson.]

ARTH 3419 Rembrandt and His Circle: Technologies of Vision (also VISST 3419) (CA-AS) Fall. 4 credits. L. Pincus. The variety of visual experience in 17th-century Dutch art is legion: still life, portrait, self-portraiture, landscape, cityscape, genre, and architectural painting. New scientific technologies and trade routes, a robust economy, and bustling commerce also place their marks on the cultural and artistic production in the Netherlands. In this course, we will dip into these multiple facets of the Dutch scene, but in critical rather than a general way, in order to assess Dutch "technologies of vision" in picturing and describing their world. Also important will be our inquiry into the context of Dutch art production: the social, economic, and political factors that made the Dutch art market so unusually vital.

ARTH 3500 African American Art (also AMST/ASRC/VISST 3500) (LA-AS) Fall. 4 credits. C. Finley. This course investigates the different forms of African-American visual artistic traditions in relation to their historical origins and sociocultural context from the early days of slavery to the present time. We start with an overview of African art and the experiences of the Middle Passage and slavery in relation to African-American traditions in the decorative arts including: pottery, architecture, ironwork, quilt making, and basketry. This is followed by a fine-art survey starting with the 18th and 19th centuries and continuing through the early-20th-century Harlem Renaissance up to the present. Certain issues related to African-American arts and creativity such as improvisation, Black Aesthetic, and Pan Africanism also are explored. Slides, films, and filmstrips are used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

ARTH 3520 African American Cinema (LA-AS) Fall. 4 credits. S. Hassan. This course offers an overview of African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, different trends within African cinema will be explored, such as “Return to the Sources” and the rediscovery of the pre-colonial past; the “Social Realist” narrative and critique of post-independence Africa; reconstructing the story of colonialism from the perspective of the colonized; and the entertainment genre. Techniques, style, and aesthetics of African cinema will also be discussed. The course offers a unique opportunity of looking at African culture and society, and at issues of social change, gender, class, tradition, and modernization through African eyes.

ARTH 3605 U.S. Art from FDR to Reagan (also AMST 3605) (LA-AS) Fall. 4 credits. J. Bernstock. Considers the contextual features of American art from the 1930s through the late 1980s. Examines art in relation to contemporary politics, society and literature. A few of the developments on which the course focuses are: Abstract Expressionism, Pop Art, Earth Art, and Feminist Art. Examines various critical approaches.

[ARTH 3611 Art of South Asia, 1500–present (also ASIAN 3382) (CA-AS) Spring. 4 credits. Next offered 2011–2012. I. Dadi.]
ART 3650 History and Theory of Digital Art (also INFO 3660, VISST 3650) (CA-AS)
Students will examine the role of mechanical, electronic, and digital technologies in the arts of the late 20th and 21st centuries with emphasis on Europe and North America.

ART 3740 Painting 19th-Century America (also AMST/VISST 3740) # (LA-AS)

ART 3760 Impressionism in Society (also FREN 3610, VISST 3662) # (CA-AS)

ART 3762 The Art of the Historical Avant-Garde (also COML 3840, GERST/ROMS 3770, VISST 3672) (LA-AS)

ART 3800 Introduction to the Arts of China (also ASIAN 3383, ARKEO 3800) # (LA-AS)
This course offers a survey of the art and culture of China, from the Neolithic period to the 20th century.

ART 3820 Introduction to the Arts of Japan (also ASIAN 3344, 3381) # (LA-AS)
Spring. 4 credits. A. Pan.
As an island nation east of the Asian continent, Japan developed a unique culture that reflects both continental and indigenous characteristics. This course examines pre- and post-contact with continental culture and the process of artistic acculturation and assimilation in successive periods of Japanese art history.

ART 3850 The Arts of Southeast Asia (also ASIAN 3350, VISST 3696) # (CA-AS)
Spring. 4 credits. K. McGowan.
The arts of Southeast Asia will be studied in their social context, since art plays a role in most of the salient occasions in life in traditional societies. Special emphasis will be devoted to developments in Indonesia, Thailand, and Cambodia. Among topics covered will be the shadow puppet theater of Java, textiles, architecture, sculpture, and Bali’s performance tradition.

ART 3855 The House and the World: Architecture of Asia (also ASIAN 3339) # (ST 3636) (CA-AS)
Fall. 4 credits. K. McGowan.
In many Asian societies, houses are regarded as having a vitality of their own. This course will examine the role of the house as a living organism in Asia. Houses also function as storehouses for material and immaterial wealth; artifacts such as textiles, jewelry, sculptures, and masks function within the house as ancestral heirlooms, conveying their own cultural life force, the power from which serves to blend with the vitality of the house. The indigenous architectural traditions of India, Vietnam, Thailand, Indonesia, and the Philippines will be examined. By studying the inhabited spaces of others, divining their technologies of construction and their applied symbolologies, students will be provided with powerful tools for examining the visual skills and sensibilities of other cultures.

ART 3915 Art in the Modern World (also ANTHR 3415) (CA-AS)
Summer only. 4 credits. For description, see ANTHR 3415.

Seminars
Courses at the -4000 to 6000 level are open to juniors and seniors, majors, and graduate students unless specifically stated. All seminars involve the writing and presentation of research papers. Enrollment is limited to 15 students. Students may repeat courses that cover a different topic each semester.

ART 4100 Proseminar (also VISST 4200, ARTH 6100) (HA-AS)
Spring. 4 credits. Limited enrollment.
Prerequisite: history of art majors. Grad students should enroll in ARTH 6100. I. Dadi.
Works of art have always engendered political, social, and cultural meanings. This seminar introduces the methods that art historians have engaged in, studying the objects and ideas that constitute the historiography of their discipline. Challenged and enlarged by cultural debates over issues of class, ethnicity, nationality, sexual orientation, and gender, the field of art history is expanding to incorporate problems of assessing quality of intention and reception along with authorship, of artistic production in place of artistic creation, and of Western-oriented attitudes to race in reference to orientalism and colonialism. Readings focus on historically situating methods and the implications of their cross-cultural application. Papers encourage students to put methods into practice, realizing in the process that subject matter is not an isolated choice to which methods are applied, but something that profoundly affects the approach the researcher brings to the writing of art history. In addition to the seminar meeting from 2:30 to 4:30, students are required to attend the Visual Culture Colloquium held on most Mondays from 5 to 6:30 p.m.

ART 4107 The Museum and the Object (also VISST 4607) (CA-AS)
Fall. 4 credits. Prerequisite: history of art majors; freshmen and sophomores by permission of instructor. All classes meet in Johnson Art Museum study gallery. C. Finley.
Gives advanced students the opportunity to work directly with original objects from the collection in the Herbert F. Johnson Museum. Focuses on art and connoisseurship by questioning the ways quality is determined in works of art. Topics include methods of attribution, fakes and forgeries, technique and media, restoration and conservation, art education and theories of perception. Session leaders include the curatorial staff of the art museum.

ART 4144 Responsive Environments (also ARTH 6144, VISST 4144/6144) (CA-AS)
Spring. 4 credits. M. Fernandez.
This seminar will examine notions of interactivity, immersion, and responsiveness in works of art and architecture from the 1950s to present. Select historically significant works in traditional media, telematics, machine sculpture, interactive, and digital installation will be explored as well as more recent genres of artistic practice including interactive cinema, locative media, and video games. Theorizations of interactivity, addressing narrativity, performativity, embodiment, "liveliness" and the sensual and affective engagement of the user with the work will be discussed, as will the relation of art and surveillance, and the relation of "high art" interactivity with popular techno-cultural forms. The relevance of these topics to architecture will be a recurrent theme.

ART 4150 Intro to Critical Theory (also ARTH 6150, VISST 4150/6150) (CA-AS)
Fall. 4 credits. M. Fernandez.
This seminar will introduce students to theoretical texts relevant to multiple areas in the history of art and visual culture. Readings will include classic texts in post-structural theory and more recent writings in new areas of theory and artistic practice including digital art, cyberfeminism, globalization, museums and museology, architecture in/as visual space, biotechnology and artificial life as well as issues in cognitive science and human computer interaction centering on space and embodiment. Occasionally, the seminar will focus on a single topic of convergence for these diverse areas.

ART 4151 Topics in Media Arts (also ARTH 6151, VISST 4151/6151) (CA-AS)
Topic for spring 2012: Video Game Criticism.

ART 4155 Topics in Latin American Art (also ARTH 6155, VISST 4155/6155) # (CA-AS)

ART 4233/6233 Greek and Roman Art and Archaeology (also CLASS 4746/7746) # (HA-AS)
Fall and spring. 4 credits. A. Alexandridis.
Topic for spring 2011: Death in the Roman Empire

ART 4305 Looking for Love: Visual and Literary Cultures of Love in the Medieval Mediterranean 1100–1400 (also NES 4795) # (LA-AS)
Spring. 4 credits. C. Robinson. Prerequisite: permission of instructor. Next offered 2011–2012.

ART 4331 Topics in Islamic Art (also ARTH 6331, NES 4731/6731) # (HA-AS)

ART 4440 Constructing the Self in the 16th Century (also ARTH 6440) # (HA-AS)
Spring. 4 credits. C. Lazzaro.
Fall. 4 credits. C. Lazzaro.
This seminar examines cultural understandings of nature in early modern Europe, especially Italy. It considers concepts of nature, as well as "second nature," "cultural landscape," and "pastoral." The cultural significance of plants, animals, and collections of natural objects is considered, as well as the role of gardens and alterations to the land in the formation of...
national identity. The focus is on Italian gardens of the 16th and 17th centuries and some French gardens, especially the Versailles of King Louis XIV.

[ARTH 4451 Prints and Visual Culture in Early Modern Europe (also VISST 4451, ARTH 6451) # (HA-AS)]

ARTH 4508 Exhibiting Cultures: Museums, Monuments, Representations, and Display (also ARTH 6508, ASRC 4504/6508, AMST 4506/6508) (CA-AS)
Spring. 4 credits. Graduate students should enroll in 6508. C. Finley.
This seminar explores the ways in which our contemporary understanding of art, history, and culture is constructed and informed by the public display in museums, galleries, and the broader cultural landscape. Using a series of case studies, we consider issues of representation and display and the wider social context in which art and culture are presented. Topics include the "blockbuster" exhibition, cultural heritage museums, the effect of globalization on the museum industry, recent developments in the monument making and the UNESCO Slave Routes Project.

ARTH 4509 Black Arts Movement (also ASRC 4505, AMST 4509) (CA-AS)
Summer. 4 credits. C. Finley.
This distance learning course examines the art, music, literature and film of African Americans during the 1960s. The Black Arts Movement was an explosive cultural flourishing that emerged in the United States in the wake of African liberation and decolonization movements abroad in Civil Rights and Black Power movements locally and internationally.

ARTH 4526 Caribbean Dialogs: Online! (also VISST 4526) @ (CA-AS)
Summer only. 4 credits. P. Archer-Straw.
Using Caribbean art as a case study, the course explores themes such as new world history, colonialism, Diaspora, trauma, violence, and transition. Through an understanding of basic cultural theory, class members come to see how perceptions of Caribbean culture are historically fluid and subject to various categorizations and textualization. Similarly through active participation students are invited to question their own considerations of identity, culture, race and ethnicity. Caribbean Dialogs: Online! examines the imaginary, creative spirit of the region’s artists to show ways that they are reconfiguring themselves to meet the needs of a changing world at once apprehensive but also channeled by black culture.

ARTH 4570 Victorian Art (LA-AS)
Fall. 4 credits. C. Roach.
Surveys paintings, prints, and photographs of Victorian Britain, emphasizing exhibitions, audiences, reproduction, and images of contemporary life. Practitioners considered include J. M. W. Turner, John Everett Millais, William Henry Fox Talbot, Julia Margaret Cameron, Augustus Pugin, William Morris, and James McNeill Whistler, with readings by important authors from the period, including John Ruskin, Mary Elizabeth Braddon, and Charles Dickens.

ARTH 4600 Studies in Modern Art (also AMST 4610) (LA-AS)
Spring. 4 credits. J. Bernstock.
Topic for spring 2011: U.S. Art of the 1960s
This class will examine the 1960s as a decade of dramatic change in American art, paralleling the change in the American way of life. By 1960, many of the Post-war baby boomers were reaching adolescence, and led a movement away from the conservative lifestyle and attitudes of the 1950s. Minorities, women, and young people challenged the Establishment in all realms. Art during the decade will be seen to start with a critique of consumerism through Pop art, and evolve toward a widespread questioning of institutional authority of gender and racial stereotypes, of our involvement in Vietnam, and of the modernist canon.

ARTH 4602 Buildings and Bodies: Constructing Spaces in Early Modern Art (also ARTH 6602, VISST 4602/6602)
Spring. 4 credits. L. Pincus.
What visual roots inform our modes of habitation? Our occupation of space and production of place are always constructed, never natural or given. This course investigates early modern depictions of built environments from urban scale to domestic interior, from landscape, medieval pilgrimage routes, and the public arena to spaces of domesticity, creation, collection, and scientific inquiry. Issues explored will include the dialectical relation of inside/outside and the poetics of the box, boundary and containment, religious and profane space, the housing of gender, theaters of memory and anatomy, representations of light and visibility. As we study the social production of space Readings will include those by theorists Bachelard, de Certeau, Foucault, Lefebvre, Soja, and Tuan as well as those by art historians.

ARTH 4610 Women Artists (also FGSS 4040) (LA-AS)
Fall. 4 credits. J. Bernstock.
This seminar examines both feminist art criticism and the work of women artists from antiquity to the present. We consider the works of the most prominent women artists from each period in relation to the changing roles of women in society. The artists covered include Jennifer Barlett, Artemisa Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Kathe Kollwitz, Georgia O’Keefe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger.

ARTH 4690 Comparative Modernities (also ARTH 6690, VISST 4641) @ (CA-AS) Fall. 4 credits. I. Dadi.
Since the late 19th century, the effects of capitalism across the globe have been profoundly transformative and have intensified with the demise of the older colonial empires, the rise of nationalism and independent states, and the onset of neoliberal globalization. These transformations are manifested in the domains of high art, mass culture and popular culture, yet remain inadequately studied. This seminar theorizes and explores non-Western modernist and postmodernist art practice in a comparative framework. Taught as a seminar, it assumes active participation by advanced undergraduate and graduate students who have a prior knowledge of Euro-American modernism and art history, and who wish to better understand the great artistic and visual transformations in the 20th century in a global context.

[ARTH 4695 Studies in Global Modern Art (also ARTH 6695) @ (CA-AS)]

ARTH 4696/6696 The Art Market (also ARTH 6696) (LA-AS)
Spring. 4 credits. C. Finley.
This course will examine the history of the art market, from the 16th century to the present.

[ARTH 4761 Art and Social Histories (also VISST 4761) (CA-AS)]

[ARTH 4771 Indigenous Art, Film, and New Media: Anti-Colonial Strategies (also ARTH 6771, COML 4771/6771) (CA-AS)]
This course examines Indigenous art, new media, and film from three distinct interrelated perspectives of aesthetics/theory, technology, and history/culture.

[ARTH 4815 Buddhist Arts of China (also ARTH 6815) @ (CA-AS)]

[ARTH 4818 Exhibition Seminar (also ARTH 6818) @ (CA-AS)]
Students review past exhibitions and design a new exhibition based on the collection at the Herbert F. Johnson Museum of Art.

ARTH 4855 Threads of Consequence: Textiles in South and Southeast Asia (also ASIAN 4487)
Spring. 4 credits. K. McGowan.
This seminar explores how patterned cloths serve as a symbolic medium, functioning on multiple levels of understanding and communication. As spun, dyed, and woven threads of consequence, textiles can be seen to enter into all phases of social, economic, political, religious, and performance processes, often assuming unusual political and social attributes. As bearers of talismanic messages, signifiers of rank, and as the recipients of influences from maritime trade and touristic demand, textiles are read between the folds of complex exchange mechanisms in South and Southeast Asia.

[ARTH 4858 Dancing the Stone: Body, Memory, and Architecture (also ASIAN 4456)]

ARTH 4951 Photography and Decolonial Imagination (also SHUM/4951)
Spring. 4 credits. Limited to 15 students. J. Bajorek.
For description, see SHUM 4951.

ARTH 4953 The Political Lives of Things (also SHUM 4953)
Spring. 4 credits. Limited to 15 students. A. Smith.
For description, see SHUM 4953.

ARTH 4955 Sensation and Indigenous Intent (also SHUM/VISST 4955)
Spring. 4 credits. Limited to 15 students. J. Richard.
ARTH 4991 Independent Study  
Fall. 1–4 credits; may be repeated for credit. Prerequisite: permission of department faculty member. Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ARTH 4992 Independent Study  
Spring. 1–4 credits; may be repeated for credit. Prerequisite: permission of department faculty member. Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ARTH 4997 Honors Research  
Fall or spring. 2 credits. S-U grades only. Staff. The prospective honors student does rigorous independent readings supervised by a selected thesis advisor. By the end of the semester, an annotated bibliography and detailed outline of the thesis should be completed.

ARTH 4998 Honors Work I  
Fall. 4 credits. Intended for senior art history majors who have been admitted to the honors program.

ARTH 4999 Honors Work II  
Spring. 4 credits. Prerequisite: ARTH 4998. The student under faculty direction prepares a senior thesis.

ARTH 5991-5992 Supervised Reading  
Fall, 5991; fall, 5992, spring. 1–4 credits; may be repeated for credit. Prerequisite: graduate standing.

ARTH 5993-5994 Supervised Study  
Fall, 5993; fall, 5994, spring. 1–4 credits; may be repeated for credit. Prerequisite: graduate standing.

ARTH 6060 Visual Ideology (also COML/GERST 6600, VISST 6060)  
Spring. 4 credits. C. Waite. For description, see GERST 6600.

ARTH 6100 Proseminar (also ARTH 4100, VISST 4200)  
Spring. 4 credits. Limited enrollment. Undergraduates should enroll in ARTH 4100. I. Dadi. For description, see ARTH 4100.

ARTH 6150 Intro to Critical Theory (also ARTH 4150, VISST 4150/6150)  
Fall. 4 credits. M. Fernandez. For description, see ARTH 4150.

ARTH 6233 Greek and Roman Art and Archaeology (also ARTH 4233, CLASS 4746/7746)  
Fall and spring. 4 credits. A. Alexandria. For description, see ARTH 4233.

ARTH 6252 Research Methods in Archaeology (also ARKEO/CLASS 7742)  
Spring. 4 credits. S. Manning. For description, see CLASS 7742.

[ARTH 6331 Topics in Islamic Art (also ARTH 4331, NES 4731/6731)  
Fall. 4 credits. Next offered 2011–2012. C. Robinson.]

[ARTH 6440 Constructing the Self in the 17th Century (also ARTH 4440)  

ARTH 6445 Nature, Cultural Landscape, and Gardens in Early Modern Europe (also ARTH 4445)  
Fall. 4 credits. C. Lazzaro. For description, see ARTH 4445.

ARTH 6508 Exhibiting Cultures: Museums, Monuments, Representation and Display (also AMST 4508/6508, ARTH 4508, ARSC 4504/6508)  
Spring. 4 credits. Undergraduates should enroll in ARTH 4508. C. Finley. For description, see ARTH 4508.

ARTH 6602 Buildings and Bodies: Constructing Spaces in Early Modern Art (also ARTH 4602, VISST 4602/6602)  
Fall. 4 credits. L. Pincus. For description, see ARTH 4602.

ARTH 6690 Comparative Modernities (also ARTH 4690, VISST 4641)  
Fall. 4 credits. I. Dadi. For description, see ARTH 4690.

[ARTH 6695 Studies in Global Modern Art (also ARTH 4495)

[ARTH 6696 The Art Market (also ARTH 4696) 
Fall. 4 credits. Next offered 2011–2012. C. Finley. For description, see ARTH 4696.]

[ARTH 6771 Indigenous Art, Film, and New Media: Anti-Colonial Strategies (also ANTHR 4771/6471, ARTH 4771, COML 4771/6771)  
Fall–spring. Next offered 2011–2012. J. Riccard. For description, see ARTH 4771.]

[ARTH 6818 Exhibition Seminar (also ARTH 4818)  
Fall. 4 credits. Next offered 2011–2012. A. Pan.]

HUMAN BIOLOGY PROGRAM  
J. Haas, nutritional sciences, director (220 Savage Hall, 255–2665); A. Arcadi (anthropology); A. Clark (molecular biology and genetics); P. Cassano (nutritional sciences). B. Finlay (psychology); J. Fortune (physiology/women’s studies); R. Johnston (psychology); C. Lazzaro (anthropology); D. Levitsky (nutritional sciences); K. A. R. Kennedy (ecology and systematics/biology); R. Savin-Williams (human development), N. Russell (anthropology); R. Savin-Williams (human development), M. Small (anthropology).  

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology into a comprehensive study of biological diversity in Homo sapiens. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The curriculum of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology and evolutionary biology, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students who have a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity. Human biology is not a major but a curriculum of study that provides majors in various departments and colleges with a program for selecting elective courses that deal with the biology of the human species. Students after their freshman year may develop a program of study in human biology while majoring in any one of a number of different departmental fields.

Basic Requirements  
The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and biological diversity of the human species. Adjustments may be made in these requirements, depending on the student’s academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (BIOG 1101–1103 plus 1102–1104 or 1105–1106 or BIOG 1107–1108 offered during the eight-week Cornell Summer Session); one year of general chemistry (CHEM 2070–2080 or 2150–2160); one course of college mathematics (MATH 1110, 1106, or 1105 or equivalent); one course in genetics (BIOMG 2800 or 2810); one course in biochemistry (BIOMG 3300, 3310, 3320, or 3330 or NS 3200). It is recommended that students planning graduate study in biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty advisor in human biology for help in selecting appropriate courses.

Elective courses should be taken that enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major. Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by
specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty advisor representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisors in his or her department who is listed as faculty in human biology to be their principal advisor, or he or she may have an advisor in the department of the major and seek the advice of a human biology faculty advisor in matters pertaining to satisfaction of the requirements. In certain cases a faculty advisor may represent both the major and the curriculum of study in human biology.

Courses

Human Anatomy and Physiology

ANS C 4100 Nutritional Physiology and Metabolism Fall. 3 credits.

BIOAP 2140 Biological Basis of Sex Differences (also BSOC 2141, FGSS 2140) Spring. 3 credits.

BIOAP 3110 Introductory Animal Physiology, Lectures (also BIOMS/ VETPH 3460) Fall. 3 credits.

BIOAP 3190 Animal Physiology Experimentation (also BIOMS 3190) Fall. 4 credits.

BIOAP 4270 Fundamentals of Endocrinology (also ANSC 4270) Fall. 3 credits.

BIOAP 4580 Mammalian Physiology (also BIOMS 4580) Spring. 3 credits.

BIOMG 4340 Applications of Molecular Biology to Medicine, Agriculture, and Industry Fall. 3 credits.

BIOMG 4390 Molecular Basis of Human Disease Fall. 3 credits.

BIOMG 4870 Human Genomics Fall. 3 credits.

BIOMI 3310 General Parasitology (also BIOMS 3310) Spring. 2 credits.

BIOMI 4310 Medical Parasitology (also BIOMS 4310) Fall. 2 credits.

BIOMS 3150 Basic Immunology Fall. 3 credits.

FDSC 1500 Food Choices and Issues Spring. 2 credits.

FDSC 4270 Functional Foods and Nutraceuticals Spring. 2 credits.

FSAD 4390 Biomedical Materials and Devices for Human Body Repair (also BME 5390) Spring. 2–3 credits.

NS 1150 Nutrition, Health, and Society Fall. 3 credits.

NS 1220 Nutrition and the Life Cycle Spring. 3 credits.

NS 3150 Obesity and the Regulation of Body Weight (also PSYCH 3150) Spring. 3 credits.

NS 3220 Maternal and Child Nutrition Spring. 3 credits.

NS 3310 Physiological and Biochemical Bases of Human Nutrition Spring. 4 credits.

NS 3410 Human Anatomy and Physiology Spring. 3 credits.

NS 3420 Human Anatomy and Physiology Laboratory Spring. 2 credits.

NS 3610 Biopsychology of Normal and Abnormal Behavior (also PSYCH 3610) Spring. 3 credits.

NS 4210 Nutrition for Sport and Exercise Summer. 3 credits.

NS 4310 Mineral Nutrition and Chronic Disease Fall. 3 credits.

NS 4410 Nutrition and Disease Fall. 4 credits.

NS 4750 Mechanisms Underlying Mammalian Developmental Defects (also BIOAP 4750) Spring. 3 credits.

NS 6140 Topics in Maternal and Child Nutrition Fall. 3 credits.

PSYCH 3220 Hormones and Behavior (also BIONB 3220) Fall. 3 or 4 credits.

PSYCH 4250 Cognitive Neuroscience Fall. 4 credits.

Human Behavior

ANS C 1160 Animal Agriculture and Society: From Food to Medicine Fall. 4 credits.

ANTHR 3302 Anthropology of Everyday Life Fall. 4 credits.

ANTHR 3305 Anthropology of Parenting Summer. 3 credits.

ANTHR 3390 Primate Behavior and Ecology Spring. 4 credits.

ANTHR 4390 Topics in Biological Anthropology Fall. 4 credits.

BIONB 3310 Human Social Behavior and Evolution Spring. 3 credits.

BIONB 3920 Drugs and the Brain Fall. 4 credits.

BIONB 4205 Topics in Neurobiology and Behavior: Darwinian Medicine Seminar Summer. 3 credits.

BIONB 4210 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 4310/6310) Fall. 3 or 4 credits.

BIONB 4270 Darwinian Medicine Fall. 4 credits.

BIONB 4280 Clinical Neurobiology Fall. 3 credits.

BIONB 4310 Genes and Behavior Spring. 3 credits.

BIONB 4960 Biocoustic Signals in Animals and Man Fall. 3 credits.

BIOPL 2470 Plants and People Spring. 3 credits.

BIOPL 3480 The Healing Forest Spring. 2 credits.

BIOPL 3800 Strategies and Methods in Drug Discovery Spring. 2 credits.

BIOPL 4420 Current Topics in Ethnobiology Fall. 2 credits.

BSOC 2051 Ethical Issues in Health and Medicine (also STS 2051) Fall. 4 credits.

DEA 3250 Human Factors: Ergonomics—Anthropometrics Fall. 3 credits.

DEA 3500 Human Factors: The Ambient Environment Spring. 3 credits.

DEA 4700 Applied Ergonomic Methods Spring. 3 credits.

HD 2200 The Human Brain and Mind: Biological Issues in Human Development (also CGST 2200) Fall. 3 credits.

HD 3200 Human Developmental Neuropsychology Spring. 3 credits.

HD 3440 Infant Behavior and Development Fall. 3 credits.

HD 4240 Stress, Emotions, and Health Fall. 4 credits.

HD 4330 Developmental Cognitive Neurosciences (also CGST 4330) Spring. 3 credits.

HD 4570 Health and Social Behavior (also BSOC 4570) Fall. 3 credits.

NS 2450 Social Science Perspectives on Food and Nutrition Fall. 3 credits.

NS 3470 Human Growth and Development: Biological and Behavioral Interactions (also BSOC 3471, HD 3470) Spring. 3 credits.
**NS 3610** Biopsychology of Normal and Abnormal Behavior (also PSYCH 3610)  
Fall. 3 credits.

**NS 4570** Health, Poverty, and Inequality (also ECON 4740)  
Fall. 3 credits.

**PAM 3800** Human Sexuality  
Spring. 4 credits.

**PLPA 4160** Microbes and Food: Contemporary Issues Affecting Humanity (also BIOC 4161)  
Spring. 4 credits.

**PSYCH 2230** Introduction to Biopsychology  
Fall. 3 credits.

**PSYCH 3260** Evolution of Human Behavior  
Spring. 4 credits.

**PSYCH 3320** Biopsychology of Learning and Memory (also BIONB 3280)  
Spring. 3 credits.

**PSYCH 4250** Cognitive Neuroscience (also BIONB 4230)  
Fall. 4 credits.

**PSYCH 4270** Evolution of Language (also COGST 4270)  
Fall. 3 credits.

**PSYCH 4380** Social Neuroscience  
Fall. 4 credits.

**PSYCH 4400** To Sleep, Dream, and Remember  
Fall. 4 credits.

**ANTHR 1300** Human Evolution: Genes, Behavior, and the Fossil Record  
Spring. 3 credits.

**ANTHR 2200** Early People: The Archaeological and Fossil Record (also ARKEO 2200)  
Spring. 3 credits.

**ANTHR 3230** Humans and Animals  
Fall. 4 credits.

**ANTHR 3305** Anthropology of Parenting  
Summer. 4 credits.

**ANTHR 3390** Primate Behavior and Ecology  
Spring. 4 credits.

**ANTHR 4390** Topics in Biological Anthropology  
Fall. 4 credits.

**BIOEE 2070** Evolution (also HIST 2870, STS 2871)  
Fall or summer. 3 credits.

**BIOEE 2780** Evolutionary Biology  
Fall or spring. 3 or 4 credits.

**BIOEE 3710** Human Paleontology (also ANTHR 3710)  
Fall. 4 credits.

**BIOEE 4640** Macromutation  
Spring. 4 credits.

**BIOEE 4690** Food, Agriculture, and Society (also BSOC/STS 4691)  
Spring. 3 credits.

**BIOEE 4790** Paleobiology (also EAS 4790)  
Spring. 4 credits.

**BIOMG 4810** Population Genetics  
Fall. 4 credits.

**BIOMG 4840** Molecular Evolution  
Spring. 3 credits.

**BIOMG 4870** Human Genomics  
Fall. 3 credits.

**BIOMS 4310** Medical Parasitology (also BIOMS 4310)  
Fall. 2 credits.

**BTRY 4830** Quantitative Genomics and Genetics  
Spring. 4 credits.

**DSOC 2010** Population Dynamics (also SOC 2202)  
Spring. 3 credits.

**DSOC 2200** Sociology of Health of Ethnic Minorities (also LSP 2200)  
Fall. 3 credits.

**DSOC 4100** Health and Survival Inequalities (also SOC 4100)  
Fall. 4 credits.

**ENTOM 2100** Plagues and People (also BSOC 2100)  
Fall 2 or 3 credits.

**ENTOM 3070** Pesticides, the Environment, and Human Health  
Fall. 2 credits.

**ENTOM 3520** Medical and Veterinary Entomology  
Fall. 3 credits.

**ENTOM 4100-4101** Malarial Interventions in Ghana  
Fall/spring. 2 credits each semester.

**NS 2060** Introduction to Global Health  
Spring. 3 credits.

**NS 2750** Human Biology and Evolution (also ANTHR 2750)  
Fall. 3 credits.

**NS 3060** Nutritional Problems of Developing Nations  
Fall. 3 credits.

**NS 3350** Epidemiology in Context  
Spring. 3 credits.

**NS 4130** Nutritional Genomics: Evolution and Environment  
Spring. 2 credits.

**NS 4500** Public Health Nutrition  
Spring. 2 credits.

**NS 4600** Explorations in Global Health  
Spring. 3 credits.

**NS 6250** Foundations of Epidemiology  
Summer. 3 credits.

**PAM 4380** Economics of Public Health  
Fall. 3 credits.

**PSYCH 3260** Evolution of Human Behavior  
Spring. 4 credits.

**PSYCH 4270** Evolution of Language (also COGST 4270)  
Fall. 3 credits.

**HUNGARIAN**

See “Department of Linguistics” and “Russian.”

**INDEPENDENT MAJOR PROGRAM**

J. Finlay, director, 55 Goldwin Smith Hall, 255-5004.

The Independent Major Program is described in the introductory section of “College of Arts and Sciences.”

**IM 3510 Independent Study**  
Fall or spring. 1–4 credits. Prerequisite: permission of program director.

**IM 4990 Honors Research**  
Fall or spring. 1–8 credits; max. of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit brief proposal approved by Honors Committee.

**INDEMNENSIAN**

See “Department of Asian Studies.”

**INEQUALITY MINOR**

365 Uris Hall  
www.inequality.cornell.edu  
254-8674

The study of inequality lies at the heart of current debates about segregation, affirmative action, the “glass ceiling,” globalization, and any number of other contemporary policy issues. In recent years, public and scholarly interest in issues of inequality has intensified, not merely because of historic increases in income inequality in the United States and other advanced industrial countries, but also because inequalities of race, ethnicity, and gender are evolving in equally dramatic and complicated ways.

The inequality minor allows undergraduate students to supplement their studies for their major with a coherent program of courses oriented toward the study of inequality. Although Cornell University is a leading center of scholarship on poverty and inequality, this strength is necessarily distributed across many departments and colleges; an interdisciplinary minor thus allows students to combine these resources into an integrated program of study. The institutional home for the inequality minor is the Center for the Study of Inequality (located at 365 Uris Hall and at www.inequality.cornell.edu).

The inequality minor is appropriate for students interested in government service, policy work, and related jobs in non-governmental organizations (NGOs) as well as students who wish to pursue post-graduate education in such fields as public policy, economics, government, law, history, psychology, sociology, anthropology, literature, and philosophy. In many of these fields, the study of inequality is becoming increasingly central and fundamental, and the inequality minor can therefore provide students with a valuable and unique foundation for further study.

The inequality minor is an interdisciplinary program that should be completed in conjunction with a major. The minor is open
to students enrolled in any of the seven Cornell undergraduate colleges. When the requirements of the minor are met, a certification is recorded on a student’s academic record.

Minors Requirements
The inequality minor exposes students to a breadth of approaches, methods, and topic areas while also allowing them to tailor a program to their particular interests. The requirements are as follows:

1. Overview Course
The required overview course may be selected from any of the eight courses listed below. When possible, the overview course should be completed early in the program, as it serves to define the field and to expose students to areas and topics that might be explored in future coursework.

- Comparative Social Inequalities (DSOC 3700 and SOC 3710)
- Families and Social Inequality (PAM/SOC 4470)
- Income Distribution (ILRLE 4410 and ECON 4550)
- Organizations and Social Inequality (ILROB 6260)
- Racial and Ethnic Differentiation (PAM/SOC 3570)
- Social Inequality (SOC 2208 and DSOC 2090)

2. Controversies About Inequality
(DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
This 3-credit course introduces students to current controversies in the study of inequality while facilitating interdisciplinary dialogue between concentrators and faculty members at Cornell University. Students are exposed to research on inequality under way at Cornell presented by guest lecturers and also participate in debates on pressing inequality-relevant issues (e.g., welfare reform, school vouchers, immigration policy, affirmative action).

3. Electives
In addition to the overview course and core course, students must select four electives from the list of qualified courses. This list can be viewed on the web site for the Center for the Study of Inequality, www.inequality.cornell.edu. Although students may tailor their programs to match their interests, the electives and overview course must be distributed across at least three departments (thereby ensuring breadth in the analytic approaches that are represented).

4. Lectures and Seminars
The Center for the Study of Inequality (CSI) hosts occasional lectures and symposia, and minors are expected to attend them when possible. These events will be announced via e-mail and are also listed on the center web site, www.inequality.cornell.edu.

Enrolling in the Minor
The web site for the Center for the Study of Inequality, www.inequality.cornell.edu, provides current information on the Inequality Minor. For students considering the minor, it may be useful to schedule a meeting with the assistant to the director (inequality@cornell.edu).

Sample Programs
The inequality minor allows students considerable flexibility in devising programs that reflect their interests. As examples of possible programs, we have listed below sample tracks, each comprising a different set of possible electives. The first program listed below is a general track that provides an overview of the field, while the remaining nine programs are more specialized and focus on particular issues within the field. This sampling of programs is obviously illustrative and does not cover the entire wide range of interests that may be addressed within the minor.

Globalization and Inequality
As a global economy takes hold, there has been increasing concern that economic inequalities will grow apace, especially North–South inequalities between rich and poor countries. The countervailing “optimistic view” is that between-country disparities will in the long run wither away and render inequality an entirely internal, within-country affair. These and related lines of argumentation can be explored in courses that address such topics as trends in income inequality, theories of economic development, emerging patterns of international migration, and globalization and gender.

1. Overview Course (choose any one)
2. Controversies About Inequality (DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
3. Possible Electives (choose any four):
   - Contemporary Controversies in the Global Economy (ECON 2000)
   - Economic Development (ECON 3710)
   - Education, Inequality, and Development (DSOC 3050)
   - Food Policy for Developing Countries (AEM 3600 and FGSS 3600)
   - Gender and Globalization (CRP 3650 and FGSS 3600)
   - Gender and International Development (CRP/FGSS 6140)
   - International Development (DSOC 2050 and SOC 2200)
   - International Planning and Development Workshop (CRP 5076)
   - Labor Markets and Income Distribution in Developing Countries (ILR/ILR/4350)
   - Rural Areas in Metropolitan Society (DSOC 3360)
   - Sex and Gender in Cross-Cultural Perspective (ANTH 3421/6421 and FGSS 3210/6210)

Social Policy and Inequality
In the modern period, inequalities generated in the market and through other social institutions are typically regarded as excessive, and the state is seen as the main tool for redistribution, discrimination abatement, equalization of life chances, and related forms of amelioration. The social policy and inequality track explores the role of the state in generating and reducing inequalities of various kinds.

1. Overview Course (choose any one)
2. Controversies About Inequality (DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
3. Possible Electives (choose any four):
   - Economic Analysis of the Welfare State (ECON 4600 and ILRHR 6420)
   - Economics of the Public Sector (PAM 2040)
   - Employment Discrimination and the Law (ILRHR 6420)
   - Ethics, Public Policy in American Society (PAM 5310)
   - Evolving Families: Challenges to Public Policy (PAM/SOC 3360)
   - Families, Poverty, and Public Policy (PAM 3350)
   - Health and Social Behavior (HD/SOC 4570)
   - Human Resource Economics and Public Policy (ILRHR 3600)
   - Introduction to Policy Analysis (PAM 2300)
   - Introduction to Public Policy (GOVT 3071)
   - Organizations and Social Inequality (ILROB 6260)
   - Policy Analysis: Welfare Theory, Agriculture, and Trade (AEM 3600 and ECON 4300)
   - Public Policy and the African American Urban Community (ASRC 4605)
   - Research on Education Reform and Human Resource Policy (ILRHR 6601)
   - Risk and Opportunity Factors in Childhood and Adolescence (HD 3530)
   - Urban Politics (AMST/GOVT 3111)

The Ethics of Inequality
Charges of social injustice are often charges of excessive inequality. What are the political, philosophical, and legal debates that are relevant to such judgments? Under what conditions should rich countries assist poor ones? At what point should governments step in to redistribute income? When should parents pass on their wealth to their children? The ethics of inequality track examines the conditions under which inequalities might be deemed legitimate or illegitimate, evaluates prevailing inequalities and social policy as against this yardstick, and explores the larger role of values in popular and scholarly judgments about inequality.

1. Overview Course: Inequality, Diversity, and Justice (CRP/GOVT/SOC 2930, PHIL 1930)
2. Controversies About Inequality (DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
3. Possible Electives:
   - Contemporary Moral Issues (PHIL 1450)
   - Ethical Issues in Health and Medicine (BSOC/STS 2051)
   - Ethics (PHIL 2410)
   - Ethics and the Environment (BSOC/STS 2061 and PHIL 2460)

INEquality MINor 599
8. Social Science Classes (choose two)
Select courses in consultation with advisor (see list of electives below).

Poverty and Economic Development
Over the past century, rich countries have of course become yet richer, while less developed countries remain burdened with massive poverty. The courses listed below examine the sources and causes of world poverty, the rise of global anti-inequality social movements, and the types of policy interventions that might stimulate economic development and reduce poverty.
1. Overview Course (choose one any)
2. Controversies About Inequality (DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
3. Possible Electives (choose any four):
   • Applied Economic Development (ECON 3720)
   • Economic Development (ECON 3710)
   • Families, Poverty, and Public Policy (PAM 3350)
   • Gender and International Development (CRP/FGSS 6140)
   • Health and Survival Inequalities (DSOC/FGSS/SOC 4100)
   • Health, Poverty, and Inequality: A Global Perspective (ECON 4740 and NS 4570)
   • Issues in African Development (CRP 4770/6770)
   • Social Justice and the City: Preparation for Urban Fieldwork (CRP 3510)

Social Movements and Inequality
The history of modern society may be seen in large part as a history of anti-inequality social movements (e.g., the Enlightenment, socialism, the union movement, the civil rights movement, feminism) interspersed with occasional inequality-inducing reactions (e.g., the post-socialist transition). The social movements track examines the causes, effects, and likely future of such social movements and the reactions they spawn.
1. Overview Course (choose any one)
2. Controversies About Inequality (DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
3. Possible Electives (choose any four):
   • Comparative Labor Movements in Latin America (ILRRC 6510)
   • Prisons (AMST/GOVT 3141)
   • Revitalizing Labor: A Comparative Perspective (GOVT 6413 and ILRRC 6530)
   • Social Movements (AIS/DSOC/LSP 3110)
   • Social Movements in American Politics (AMST/GOVT 3021)
   • States and Social Movements (GOVT 6603 and SOC 6600)
   • Theories of Industrial Relations Systems (ILRRC 6600)
   • Union Organizing (ILRRC 4000)
   • Utopia in Theory and Practice (SOC 1150)

Education and the Reproduction of Inequality
In the contemporary period, the study of inequality has increasingly turned on the study of formal education, as schools have become the main institutional locus for training and credentialing workers and for signaling potential employers about (putative) worker quality. The inequality and education track examines educational institutions and how they are organized, how they generate equality and inequality, and how possible institutional changes (e.g., vouchers, required testing) might affect the reproduction of inequalities.
1. Overview Course (choose any one)
2. Controversies About Inequality (DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
3. Possible Electives (choose any four):
   • Education and Development in Africa (ASRC 6600)
   • Education Innovation in Africa and the Diaspora (ASRC 4601 and EDUC 4590)
   • Education, Inequality, and Development (DSOC 3050)
   • Education, Technology, and Productivity (ILRHR 6950)
   • Research on Education Reform and Human Resource Policy (ILRHR 6601)
   • Schooling, Racial Inequality, and Public Policy in America (SOC 3570)
   • Social and Political Context of American Education (AMST/EDUC 2710 and SOC 2710/5710)
   • U.S. Education, Oppression, Resistance (ASRC 3604)

Race and Ethnicity in Comparative Perspective
This program of study examines the many forms of racial and ethnic inequality as revealed across different times and places. When race and ethnicity are examined from an explicitly comparative perspective, it becomes possible to identify regularities and better understand the forces of competition, conflict, and subordination among ethnic and racial groups. The courses listed below address such issues as the causes of discrimination, the implications of residential segregation for inequality, the sources of ethnic and racial differences in income, the effects of anti-inequality reform efforts (e.g., affirmative action), and the possible futures of ethnic and racial stratification.
1. Overview Course (choose any one)
2. Controversies About Inequality (DSOC/ILROB/PAM/SOC 2220, GOVT 2225, PHIL 1950)
3. Possible Electives (choose any four):
   • Afro-American Historiography (AMST/FGSS/HIST 2120)
   • Diaspora (ASRC 4601 and EDUC 4590)
   • Education, Inequality, and Development (DSOC 3050)
   • Education, Technology, and Productivity (ILRHR 6950)
   • Education Innovation in Africa and the Diaspora (ASRC 4601 and EDUC 4590)
   • Research on Education Reform and Human Resource Policy (ILRHR 6601)
   • Schooling, Racial Inequality, and Public Policy in America (SOC 3570)
   • Social and Political Context of American Education (AMST/EDUC 2710 and SOC 2710/5710)
   • U.S. Education, Oppression, Resistance (ASRC 3604)

General Courses
• Ethnicity and Identity Politics: An Anthropological Perspective (AAS 4790 and ANTHR 4749)
• Health and Survival Inequalities (DSOC/FGSS/SOC 4100)
• Introduction to American Studies: New Approaches to Understanding American Diversity; the 20th Century (AMST 1110)
• Political Identity: Race, Ethnicity, and Nationalism (GOVT 6101)
• Prisons (GOVT/AMST 3141)
• Race and Public Policy (PAM/SOC 3370)
• Racial and Ethnic Politics (AMST/GOVT/LSP 3191)
• Sociology of Health and Ethnic Minorities (DSOC/LSP 2200)

Immigration and Ethnicity
• Immigration and a Changing America (DSOC 2750)
• Introduction to American Studies (AMST 1101)
• Population Dynamics (DSOC 2010 and SOC 2202)
• Race and Ethnicity (SOC 1104)
• Strangers and Citizens: Immigration and Labor in U.S. History (ILLRC 3020)

Case Studies
• African American Social and Political Thought (ASRC 2601)
• African American Women in Slavery and Freedom (AMST/HIST 3030 and FGSS 3070)
• African American Women: 20th Century (AMST/FGSS/HIST 2120)
• Afro-American Historiography (AMST/HIST 6101)
• Asians in the Americas: A Comparative Perspective (AAS 3030 and ANTHR 3703)
• Introduction to American Indian Studies: Indigenous North America to 1890 (AIS 1100 and AMST 1600)
• Introduction to Asian American History (AAS 2130 and AMST/HIST 2640)
• Introduction to Asian American Studies (AAS 1100)
• Latinos in the United States (DSOC/SOC 2650 and LSP 2010)
• Latinos in the United States: 1898 to the Present (AMST/HIST/LSP 2610)
• Latinos in the United States: Colonial Period to 1898 (AMST 2599 and HIST/LSP 2600)
• Politics and Social Change in Southern Africa (ASRC 4605)
• Public Policy and the African American Urban Community (ASRC 4605)
• The African American Workers, 1865 to 1910: The Rural and Urban Experience (HIST 3750 and ILRRC 3850)
• The African American Workers, 1910 to The Present: Race, Work, and the City (HIST 3760 and ILRRC 3860)
Family and Inequality

- Black Families and the Socialization of Black Children (ASRC 1600)
- Cultural Sociology (SOC 6300)
- Economics of Family Policy (PAM 6250)
- Evolving Families: Challenges to Public Policy (PAM/SOC 3360)
- Politics and Culture (GOVT 3633 and SOC 2480)
- Social Gerontology: Aging and the Life Course (HD/SOC 2510)
- Women in the Economy (ECON 4750, FGSS 4460, and ILRLE 4450)
- Work and Family in Comparative Perspective (SOC 2205)

INFORMATION SCIENCE

The Major

Information Science (IS) is an interdisciplinary field that explores the design and use of information systems in a social context: the field studies the creation, representation, organization, application, and analysis of information in digital form. The focus of Information Science is on systems and their use rather than on the computing and communication technologies that underlie and sustain them. Moreover, Information Science examines the social, cultural, economic, historical, legal, and political contexts in which information systems are employed, both to inform the design of such systems and to understand their impact on individuals, social groups, and institutions.

Courses in the Information Science (IS) major are assigned to three area-based tracks:

Human-Centered Systems This area examines the relationship between humans and information, drawing from human–computer interaction and cognitive science.

Information Systems This area examines the computer science problems of representing, organizing, storing, manipulating, and accessing digital information.

Social Systems This area studies the cultural, economic, historical, legal, political, and social contexts in which digital information is a major factor.

Students must complete a set of 11 core courses: one introductory course, four courses in mathematics and statistics, and two courses from each of the three IS area-based tracks. Students must also obtain depth in two tracks—a primary and a secondary track—that together best represent their interests. In particular, completion of the major requires four advanced courses from the selected primary track and three advanced courses from the secondary track.

Requirements

Core (11 courses)

1. Introductory (one course):
   INFO 1300 Introductory Design and Programming for the Web
2. Math and Statistics (four courses):
   MATH 1110 Calculus I
   MATH 2310 Linear Algebra with Applications or MATH 2210 Linear Algebra and Differential Equations
   either INFO 2950 Mathematical Methods for Information Science or CS 2800 Discrete Structures
   either INFO 4320 or CS 5780, or either MATH 2310 or MATH 2210

One of the following:

- MATH 1710 Statistical Theory and Application in the Real World
- HADM 2201 Hospitality Quantitative Analysis
- AEM 2100 Introductory Statistics
- PAM 2100 Introduction to Statistics
- ENGRD 2700 Basic Engineering Probability and Statistics

- BTRY 3010 Statistical Methods I
- SOC 3010 Evaluating Statistical Evidence
- CEE 3040 Uncertainty Analysis in Engineering
- ILRST 3120 Applied Regression Methods
- ECON 3190 Introduction to Statistics and Probability

- PSYCH 3500 Statistics and Research Design

3. Human-Centered Systems (two courses):
   INFO 2140 Cognitive Psychology
   INFO 2450 Communication and Technology

4. Information Systems (two courses):
   CS 2110 Object-Oriented Programming and Data Structures
   *CS 2110 is an intermediate programming course that requires prior knowledge of Java. Students who have not learned Java can take CS 1130 after completing INFO 1300 and 2300 or they can take CS 1110.
   INFO 2500 Intermediate Design and Programming for the Web

5. Social Systems (two courses):
   INFO 2040 Networks
   one of the following: INFO 2921 Inventing an Information Society, INFO 3200 New Media and Society, INFO 3561 Computing Cultures
   Where options in the core courses exist, the choice will depend on the student’s interests and planned advanced courses for the selected primary and secondary tracks.

Tracks

- Students must complete four advanced courses in their primary track and three advanced courses in their secondary track, selected from those listed below.

All courses in the major must be taken for a letter grade. Students must earn a C- or better in all courses used for the major.

Courses taken to satisfy the core course requirements may not be used to fulfill the track requirements. Additional information on Information Science courses can be found below and in the “Computing and Information Science (CIS)” section of Courses of Study. Course information for all other courses in the major can be found in the relevant departments (e.g., AEM, CS, STS).

Human-Centered Systems

INFO 3400 Psychology of Online Relationships
PSYCH 3420 Human Perception: Applications to Computer Graphics, Art, and Visual Display*
INFO 3450 Human–Computer Interaction Design
INFO 3460 Online Communities
PSYCH 3470 Psychology of Visual Communications
INFO 3650 Technology and Collaboration
PSYCH 3800 Social Cognition*
PSYCH 4160 Modeling Perception and Cognition
INFO 4320 Introduction to Rapid Prototyping and Physical Computing*
INFO 4400 Advanced Human–Computer Interaction Design
INFO 4450 Computer-Mediated Communication
INFO 4500 Language and Technology
DEA 4700 Applied Ergonomic Methods
* Students who take PSYCH 3420 may also count its prerequisite, PSYCH 2050, toward the Human-Centered Systems primary or secondary track requirements. Similarly, students who take PSYCH 3800 may also count PSYCH 2800 toward the Human-Centered Systems primary or secondary track requirements. At most, one of PSYCH 2050 or PSYCH 2800 can be counted toward the primary or secondary track requirements.
*INFO 4320 may count toward the major as Human-Centered Systems or Information Systems but not both.

Information Systems

INFO 3300 Data-Driven Web Applications
LING 4424 Computational Linguistics
INFO 4300 Information Retrieval
INFO 4307 Learning From Web Data
INFO 4302 Web Information Systems
CS 4320 Introduction to Database Systems
INFO 4320 Introduction to Rapid Prototyping and Physical Computing
CS 4620 Introduction to Computer Graphics
CS 4700 Foundations of Artificial Intelligence
LING 4474 Introduction to Natural Language Processing
COMM 4650 Mobile Communication in Public Life
ORIE 4740 Statistical Data Mining
CS 4780 Machine Learning
ORIE 4800 Information Technology
CS 5150 Software Engineering
CS 5430 System Security
INFO 5300 Architecture of Large-Scale Information Systems
CS 5780 Architecture of Large-Scale Information Systems
*INFO 4320 may count toward the major as Human-Centered Systems or Information Systems but not both.
Social Systems
SOC 3040 Social Networks and Social Processes
INFO 3200 New Media and Society
AEM 3220 Internet Strategy
INFO 3490 Media Technologies
INFO 3561 Computing Cultures
INFO 3660 History and Theory of Digital Art
ECON 3680 Game Theory*†
STS 4111 Knowledge, Technology, and Property
INFO 4290 Copyright in a Digital Age
ORIE 4550 Introduction to Game Theory*
INFO 4144 Responsive Environments
SOC 4340 Online Social Media and Information Networks
INFO 4470 Social and Economic Data
ECON 4760 Decision Theory I
ECON 4770 Decision Theory II
HADM 4489 The Law of the Internet and E-Commerce
INFO 5150 Culture, Law, and Politics of the Internet
*Only one of ORIE 4350 and ECON 3680 may be taken for IS credit.
†Students who take ECON 3860 may also count its prerequisite, ECON 3130, toward Social Systems.

Admission
All potential affiliates are reviewed on a case-by-case basis relative to the following criteria:
• Completion of four core courses, one in each of the core course areas listed above (i.e., Math and Statistics, Human-Centered systems, Information Systems, and Social Systems). Courses must be taken for a letter grade.
• A grade of C or better in each of the completed core courses with an overall GPA for these courses of 2.5 or more.
Courses
For complete course descriptions, see the Information Science listings under Computing and Information Science (CIS).
INFO 1300 Introductory Design and Programming for the Web (also CS 1300)
Fall. 3 credits. For description, see INFO 1300 in CIS section.
INFO 2040 Networks (also CS 2850, ECON 2040, SOC 2090) (SBA-AS)
Fall. 4 credits. For description, see ECON 2040.
INFO 2140 Cognitive Psychology (also COGST 2140/6140, PSYCH 2140) (KCM-AS)
Spring. 4 credits. Limited to 175 students. Prerequisite: sophomore standing. For description, see PSYCH 2140.
INFO 2300 Intermediate Design and Programming for the Web (also CS 2300)
Spring. 3 credits. Prerequisite: INFO 1300 strongly recommended. Must be taken before INFO 3500.
For description, see INFO 2300 in CIS section.
INFO 2310 Topics in Web Programming and Design
INFO 2450 Communication and Technology (also COMM 2450) (SBA-AS)
Fall, summer. 3 credits. For description, see COMM 2450.
INFO 2921 Inventing an Information Society (also AMST/EC/EGRG 2980, HIST 2920, STS 2921) (HA-AS)
Spring. 3 credits. For description, see EGRG 2980.
INFO 2950 Mathematical Methods for Information Science
Spring. 4 credits. Corequisite: MATH 2310 or equivalent.
For description, see INFO 2950 in CIS section.
INFO 3200 New Media and Society (also COMM 3200) (CA-AS)
Spring. 3 credits. For description, see COMM 3200.
INFO 3300 Data-Driven Web Applications (also CS 3300)
Spring. 3 credits. Prerequisite: CS 2110 and (INFO 2500 or permission of instructor). Next offered 2011–2012.
For description, see INFO 3300 in CIS section.
INFO 3400 Psychology of Online Relationships (also COMM 3400)
Fall. 3 credits. Prerequisite: COMM/INFO 2450.
For description, see COMM 3400.
INFO 3450 Human-Computer Interaction Design (also COMM 3450)
Fall. 3 credits. Pre- or corequisite: INFO 2450.
For description, see COMM 3450.
INFO 3490 Media Technologies (also COMM 3490, STS 3491) (HA-AS)
Spring. 3 credits. Offered odd-numbered years.
For description, see COMM 3490.
INFO 3561 Computing Cultures (also COMM/VISST 3560, STS 3561) (CA-AS)
Spring. 4 credits. No technical knowledge of computer use presumed or required.
For description, see STS 3561.
INFO 3650 Technology and Collaboration (also COMM 3650)
Spring. 3 credits. Prerequisite: COMM/INFO 2450.
For description, see COMM 3650.
INFO 3660 History and Theory of Digital Art (also ARTH/VISST 3650) (CA-AS)
Fall. 4 credits. Next offered 2011–2012.
For description, see ARTH 3650.
INFO 4144 Responsive Environments
Spring. 4 credits. For description, see ARTH 4144.
INFO 4290 Copyright in the Digital Age (also COMM 4290) (CA-AS)
Fall. 3 credits. Offered odd-numbered years; next offered 2011–2012.
For description, see COMM 4290.
INFO 4300 Information Retrieval (also CS 4300)
Fall. 5 credits. Prerequisite: CS 2110 or equivalent.
For description, see INFO 4300 in CIS section.
INFO 4302 Web Information Systems (also CS 4302)
Spring. 3 credits. Prerequisites: CS 2110 and some familiarity with web site technology.
For description, see INFO 4302 in CIS section.
INFO 4307 Learning From Web Data
Fall. 5 credits. Prerequisites: CS 2110 and INFO 2950, or graduate standing.
For description, see INFO 4307 in CIS section.
INFO 4320 Introduction to Rapid Prototyping and Physical Computing
Spring. 3 credits. Prerequisites: INFO 1300 or equivalent or permission of instructor. Materials fee: $250.
For description, see INFO 4320 in CIS section.

Honor
To qualify for departmental honors, students must apply by the end of their seventh semester and meet the GPA requirement:
• a cumulative GPA greater than or equal to 3.5
OR
• a cumulative GPA greater than or equal to 3.0 in addition to contributions to the Information Science Program through research or other means, as detailed in their application.
Students intending to pursue honors must complete the following course work in addition to their IS major courses:
• Three additional credit hours of IS course work at or above the 5000 level; (graded courses only; no seminars or 2-credit project courses)
• Six credit hours of INFO 4900 Independent Study and Research with one or more IS faculty members, spread over at least two semesters and with grades of A– or better; it is expected that the INFO 4900 research will result in a project report.
Latin designations (appended to the degree) are based on final cumulative GPA, as follows:
• cum laude, 3.50 or above
• magna cum laude, 3.75 or above
• summa cum laude, 4.00 or above

The Minor
A minor in Information Science is also available to students in the College of Arts and Sciences, CALS, AAP (Architecture and Planning students only), Engineering, Human Ecology, Hotel, and ILR. The minor has been designed to ensure that students have substantial grounding in all three tracks: Human-Centered Systems, Information Systems, and Social Systems. Detailed information about the minor can be found in the CIS section of Courses of Study. Students are also referred to www.infosci.cornell.edu/ugrad for the most up-to-date description of the minor and its requirements.

The Minor
A minor in Information Science is also available to students in the College of Arts and Sciences, CALS, AAP (Architecture and Planning students only), Engineering, Human Ecology, Hotel, and ILR. INFO 4400 Advanced Human-Computer Interaction Design (also COMM 4400)  
Spring. 3 credits. Prerequisite: COMM/INFO 3450.  
For description, see COMM 4400.

INFO 4450 Computer-Mediated Communication (also COMM 4450)  
Spring. 3 credits. Prerequisites: COMM/INFO 2450.  
For description, see COMM 4450.

INFO 4470 Social and Economic Data (also IRMLE 4470)  
Spring. 4 credits. Prerequisites: one semester of calculus, IS statistics requirement, at least one upper-level social science course, or permission of instructor.  
For description, see INFO 4470 in CIS section.

INFO 4500 Language and Technology (also COMM 4500)  
Spring. 3 credits. Prerequisite: COMM/INFO 2450 or permission of instructor.  
For description, see COMM 4500.

INFO 4900 Independent Reading and Research  
Fall, spring. 1–4 credits.  
Independent reading and research for undergraduates.

INFO 5150 Culture, Law, and Politics of the Internet  
INFO 5300 The Architecture of Large-Scale Information Systems (also CS 5300)  
Spring. 4 credits. Prerequisite: CS/INFO 3500 or CS 3520.  
For description, see INFO 5300 in CIS section.

INFO 6140 Cognitive Psychology (also COGST 6140, PSYCH 2140/6140)  
Spring. 4 credits.  
For description, see PSYCH 2140.

INFO 6300 Advanced Language Technologies (also CS 6740)  
Fall. 3 credits. Prerequisite: permission of instructor. Neither CS/INFO 4500 nor CS 4740 are prerequisites.  
For description, see CS 6740 in CIS section.

INFO 6302 Web Information Systems  
Spring. 3 credits. Prerequisites: CS 2110 and some familiarity with website technology.  
For description, see INFO 4302 in CIS section.

INFO 6307 Learning From Web Data  
Fall. 3 credits. Prerequisites: CS 2110 and INFO 2590, or graduate standing.  
For description, see INFO 4307 in CIS section.

INFO 6341 Information Technology in Sociocultural Context (also STS 6341)  
INFO 6400 Human-Computer Interaction Design (also COMM 6400)  
Spring. 3 credits. Prerequisite: graduate standing or permission of instructor.  
For description, see COMM 6400.

INFO 6450 Computer-Mediated Communication (also COMM 6450)  
Spring. 3 credits. Prerequisite: graduate standing or permission of instructor.  
For description, see COMM 6450.

INFO 6500 Language and Technology (also COMM 6500)  
Spring. 3 credits. Prerequisite: graduate standing or permission of instructor.  
For description, see COMM 6500.

INFO 6648 Speech Synthesis (also LING 6648)  
Spring. 4 credits. Prerequisite: LING 4401, 4419, or permission of instructor. Next offered 2011–2012.  
For description, see LING 6648.

INFO 6850 The Structure of Information Networks (also CS 6850)  
Spring. 4 credits. Prerequisite: CS 4820.  
For description, see INFO 6850 in CIS section.

INFO 7050 Graduate Seminar  
Fall. spring. 1 credit.  
For description, see INFO 7050 in CIS section.

INFO 7090 IS Colloquium  
Fall. spring. 1 credit.  
For description, see INFO 7050 in CIS section.

INFO 7900 Independent Research  
Fall, spring. Variable credit. Prerequisite: permission of information science faculty member.  
Independent research for M.Eng. students and pre-A exam Ph.D. students.

INFO 9900 Thesis Research  
Fall, spring. Variable credit. Prerequisite: permission of information science faculty member.  
Thesis research for post-A exam Ph.D. students.

PROGRAM OF JEWISH STUDIES  
D. Starr, director (Modern Hebrew and Arabic Literature; Critical Theory, Middle Eastern Film), L. Adelson (German-Jewish Literature and Culture), R. Brann (Judeo-Islamic Studies), V. Caron (Modern French and European-Jewish History), H. Case (History of Modern East-Central Europe), M. Diesing (Yiddish Language and Linguistics), Z. Fahmy (Modern Middle Eastern History), K. Haines-Eitzen (Early Judaism and Early Christianity), G. Herman (Jewish History, Culture, and Literature), R. Hoffmann (Holocaust Studies), P. Hohendahl (German Literature), P. Hyams (Medieval Jewish History), A. Kleinerman (Assyriology), D. LaCapra (Holocaust Studies), M. Migiel (Italian Literature), C. Monroe (Near Eastern Mediterranean Studies; Nautical Archaeology), L. Monroe (Hebrew Bible Studies), D. I. Owen (Ancient Near Eastern History and Archaeology; Assyriology; Biblical History and Archaeology), R. Polenberg (American-Jewish History), D. Powers (Judeo-Islamic Studies), E. Rebillard (Jews in the Roman Empire), C. Robcis (European Cultural and Intellectual History), N. Scharf (Hebrew Language), D. Schwarz (Anglo-Jewish Literature), E. Shapiro (Jews in American Literature and Film), G. Shapiro (Russian Jewry), S. Shoer (Hebrew Language), P. Stevens (curator), S. Zacher (Old and Middle English literature). J. Zorn (Biblical Archaeology). Emeritus: D. Barthrick, N. Furman, J. Porte, E. Rosenberg, Y. Szekely.

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976.

The program has grown out of the conviction that Jewish civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges. The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies, with particular emphasis on the interrelationship between Judaism, Christianity, and Islam.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; ancient, medieval, and modern European and Middle Eastern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

For more information, please visit www.arts.cornell.edu/jws/index.html.

Courses Offered  

JWST 1101–1102 Elementary Modern Hebrew I and II (also NES 1101–1102)  
Fall, spring. 4 credits. Letter grades only. S. Shoer.  
For description, see NES 1101–1102.

JWST 1103 Elementary Modern Hebrew III (also NES 1103)  
Fall. 4 credits. S. Shoer.  
For description, see NES 1103.

JWST 1104 Beginners Intensive Hebrew (also NES 1104)  
Summer. 3 credits. S. Shoer.  
For description, see NES 1104.

JWST 1105 Hebrew Summer Follow-Up (also NES 1105)  
Fall. 1 credit. S. Shoer.  
For description, see NES 1105.

**J. Carrick** (Writing Workshop), **D. Evans** (Writing Workshop), **D. Faulkner** (Writing Workshop), **K. Hjortshøj** (Writing in the Majors), J. Martin (Writing Workshop), J. Pierpont (Writing Workshop), E. Shapiro (Writing in the Majors).

The John S. Knight Institute helps to coordinate the teaching of writing in all undergraduate schools and colleges (the School of Industrial and Labor Relations; the School of Hotel Administration; and the colleges of Agriculture and Life Sciences; Architecture, MT, and Planning; Arts and Sciences; Engineering; and Human Ecology). The program administers writing seminars for first-year and upperclass students, discipline-based seminars in its Writing in the Majors Program, tutorial writing classes, and seminars in the teaching of writing. More than 30 academic departments and programs participate in the program.

### First-Year Writing Seminars

For first-year students the Institute offers the First-Year Writing Seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prose that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All seminars pursue this common aim through small classes and adherence to a program-wide set of guidelines:

- Seminars should require at least six—and at most nine—formal essays on new topics, totaling 25–30 pages of polished prose.
- No fewer than three of the six to nine required essays should go through a process of development under the instructor's guidance (e.g., revision, peer review, responses to readings, conferences).
- All seminars should spend ample classroom time on work directly related to writing.
- Reading assignments in the course subject should be kept under ca. 75 pages per week to permit regular, concentrated work on writing.
- All students should meet in at least two individual conferences with the instructor.

Offerings change from semester to semester. Each semester's First-Year Writing Seminars are described on the web at www.arts.cornell.edu/knight_institute/FWS/FWS.htm.

First-Year Writing Seminars aim to ensure that students will enjoy the benefits of small classes. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out an application for transfer evaluation. How these credits may be applied to first-year writing or other distribution requirements is determined by the student's college and score. All students who score 5, except Architecture majors, may apply their 5 credits toward the writing requirements of their college. Of students who score 4, only Agriculture and Life Sciences students may apply their 3 credits toward the writing requirements of their college. Students should always consult their college registries to be certain that they understand their writing requirements.

Students who have already taken a First-Year Writing Seminar, or who score 4 or 5 on the Princeton AP exam, or 700 or better on the English Composition or CEEB tests, may enroll, space permitting, in the following upper-level First-Year Writing Seminar: ENGL 1270.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to First-Year Writing Seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course (e.g., it is not sufficient to write one 30-page term paper.) Students in the College of Engineering and the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a First-Year Writing Seminar to satisfy part of their writing requirement. The John S. Knight Institute must approve all such petitions in advance.

For information about the requirements for First-Year Writing Seminars and descriptions of seminar offerings, see the John S. Knight Institute web site at www.arts.cornell.edu/knight_institute.

**ENGL 2880-2890 Expository Writing**

Expository Writing helps students write with more confidence and skill in all disciplines. It is open to Cornell sophomores, juniors, and seniors who have completed their colleges' first-year writing requirements or have the permission of the instructor. ENGL 2880–2890
courses explore themes shaped by a genre or use of expository writing, by the common concerns of several disciplines, or by an interdisciplinary topic intimately related to the written medium. Although English department instructors make up roughly half the staff, the Knight Institute enables the course to extend and diversify its offerings in separately defined, 18-member sections that appeal to the varied interests and needs of students in many areas of study. Students may choose among a variety of sections focusing on such themes as "A Boy Named Sue: Biology, Gender, and Sexual Orientation," "Urban Imaginings," and "TV Nation: Television and Identity in America." All staff are selected because their special interests and their training and experience in First-Year Writing Seminars promise original course design and superior performance.

Teaching Writing

Each summer and fall, the institute offers instruction in the teaching of writing to new staff members in the First-Year Writing Seminars and other interested instructors. Teaching Writing, offered in the summer or fall, is a pre-course for graduate students. The program also sponsors a summer apprenticeship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

WRIT 7100 Teaching Writing

Summer and fall. 1 credit. S-U grades only. This course prepares graduate instructors of Cornell's First-Year Writing Seminars to teach courses that both introduce undergraduates to particular fields of study and help them develop writing skills they will need throughout their undergraduate careers. Seminar discussions and readings on pedagogical theories and practices provide an overview of the teaching of writing within a disciplinary context. Participants develop written assignments to be used in their own First-Year Writing Seminars.

Writing in the Majors

Spanning the humanities, social sciences, and sciences, the Knight Institute's upper-level, Writing in the Majors courses do not satisfy formal writing requirements, but faculty participation is entirely voluntary. While all Writing in the Majors courses include extensive writing, usually with guided revision, they also emphasize other forms of active, interactive learning essential to scholarship and careers in the disciplines. Writing in the Majors initiatives have included individual and collaborative research projects, collaborative writing, oral presentations, group oral exams, field studies, authentic student-designed laboratory experiments, debates, analytical and critical reading exercises, topical symposia, conversation groups, student-led discussions, poster sessions, and many kinds of informal writing, including online exchanges. Varying radically in design and size, from enrollments of fewer than 10 students to more than 300, Writing in the Majors courses over the past 20 years have involved collaboration with 175 faculty members and more than 350 graduate teaching assistants to enrich learning in 101 upper-level courses offered in 34 departments. Since 2007–2008, the Knight Institute has substantially increased the number of Writing in the Majors courses offered to the 2000 level. These courses are intended to provide students who are still in the early stages of their academic careers with opportunities to engage with disciplinary subject matter through writing.

WRIT 7101 Writing in the Majors Seminar

Fall and spring. 1 credit. S-U grades only. Teaching assistants assigned to Writing in the Majors projects enroll in a six-week course on teaching strategies in advanced instruction.

Writing Workshop

The John S. Knight Institute offers a First-Year Writing Seminar, "An Introduction to Writing in the University," for first-year students (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

WRIT 1370 and 1380 are graded S–U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL) should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The workshop also offers a Walk-In Service (see below) to help students work on writing assignments. The workshop director is Joe Martin, senior lecturer in the Writing Workshop. The workshop offices are in 174 Rockefeller Hall, 255-6349.

The Writing Walk-In Service

Through the Writing Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Writing Walk-In Service has tutors available during the academic year in 174 Rockefeller Hall and North and West Campus residential areas. The director is Tracy Carrick. For information, contact the Writing Workshop, 174 Rockefeller Hall, 255-6349.

WRIT 1011 Academic Writing

Summer. 3 credits. Not a First-Year Writing Seminar. (Will appear on transcript; does not count toward graduation). Prerequisite: placement by exam. Staff. Academic writing with an emphasis on improving organization, grammar, vocabulary, and style through the writing and revision of short papers. Frequent individual conferences supplement class work. This course is suitable for students who are still in high school or have just graduated and whose schooling has been in languages other than English.

WRIT 1370–1380, 1340 An Introduction to Writing in the University

150, fall; 1380, spring; 1340, summer. 3 credits each semester. A First-Year Writing Seminar. Limited to 12 students per sec in fall and spring, 6 in summer. Prerequisite: permission of instructor. S–U grades only. This writing seminar is designed for students who need more focused attention to master the expectations of academic writing. Emphasizes the analytical and argumentative writing and critical reading essential for university-level work. With small classes and weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

WRIT 1390 Special Topics in Writing

Fall and spring. 3 credits. Cannot fulfill writing or distribution requirements. Prerequisites: undergraduate standing; permission of instructor. S–U grades only. These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction in weekly tutorials. Interested students should go to 174 Rockefeller for more information.

WRIT 7102 Graduate Writing Workshop

Fall and spring. 3 credits. Limited to 10 students per sec. Prerequisites: graduate standing; permission of instructor. S–U grades only. This workshop gives graduate students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects to work on. Instruction is in weekly tutorials. Interested students should go to 174 Rockefeller Hall for further information.

WRIT 7103 Work in Progress

Fall and spring. 3 credits. Limited to 10 students per sec. Prerequisites: graduate standing; permission of instructor. S–U grades only. A writing seminar for graduate students who have substantial work in progress, such as professional articles, theses, or dissertations. In the first two weeks students discuss rhetorical and stylistic features of scholarly writing and methods of composing and revising, with relevant readings. Remaining weeks emphasize exchange and discussion of drafts, supplemented by individual conferences. The course goal is the improvement and completion of student writing projects.

Courses in Community Literacy

Writing outreach has become an increasingly important feature of writing programs in various campuses. Cornell's rich opportunities in service learning are formed on the assumption that learning by doing has a valid place in a university curriculum; they include volunteer activities and for-credit courses that span colleges and departments, as well as a concentration in Public Service Scholarship, which is sponsored by the Public Service Center. The courses listed below all concern writing as an interaction with community members outside Cornell, in the form of oral interviews, mentoring, or other collaborative work. For other writing courses with outreach components, see the First-Year Writing Seminar WRIT 1400 Common Ground: Cornell and Ithaca Students in Collaboration and ENGL 2890 Fieldwriting, Telling Community Stories, a section of ENGL 2890 Expository Writing. For opportunities to receive training and practice as a writing tutor working with Cornell undergraduates, contact Tracy Hamler Carrick, director of the Writing Walk-In Service.

WRIT 4100 Learning Behind Bars

Fall and spring. 4 credits. P. Sawyer. A service learning course offered in conjunction with the Basic Writing course of the Prison Education Project. Course work includes tutoring inmates once a week at Auburn Correctional Facility in addition to regular class meetings at Cornell.
WRIT 4130 Service Learning and Democratic Citizenship: The Literature of Social Action and Social Vision
Spring. 3 credits. G. Aching.
To what extent is civic engagement fundamental to democratic citizenship? This course seeks to answer that question by exploring the components of service learning as a discipline and to strengthen the intellectual foundation of students who wish to incorporate civic engagement into their curriculum. Students will become familiar with the history of service learning, explore competing theories of social justice and social inequality, and develop a framework for social action that exists at the juncture of theory and practice. Readings will include texts by Dewey, Freire, bell hooks, Franklin, Jefferson, Thoreau, Fanon, Addams, Baldwin, King, Dorothy Day, and Fanon. Weekly seminar papers as well as a term paper through which students develop their own philosophy of civic engagement.

WRIT 4180 Audio Documentary (KCM-AS)
Spring. 3 credits. A. Hammer.
For description, see LA 4180.

LATIN AMERICAN STUDIES PROGRAM
190 Uris Hall
Debra Ann Castillo, Romance Studies; Comparative Literature, Director, Latin American Studies; Lourdes Beneria, City and Regional Planning; Bruno Bosteels, Romance Studies; Maria Loretta Cook, ILR, Collective Bargaining, Law and History; Raymond Grabil, History; Maria De Santos, Development Sociology; Maria Fernandez, History of Art; Gary Fields, International Labor Relations; Economics; Gustavo Flores-Macías, Government; Maria Antonia García, Romance Studies; Maria Cristina García, History; Frederic Gleach, Anthropology; William W. Goldsmith, City and Regional Planning; Angela Gonzales, Development Sociology; John S. Henderson, Anthropology; Luz Horne, Romance Studies; Eduardo Inigo-Elias, Laboratory of Ornithology; Steven Kyle, Applied Economics and Management; Cecilia Lawless, Romance Studies; Julia Olivera, Romance Studies; Pilar Parra, Human Ecology, Nutritional Science; Edmundo Paz Soldán, Romance Studies; Pedro David Perez, Applied Economics and Management; Mary Kay Redmond, Romance Studies; Kenneth Roberts, Government; Eloy Rodriguez, Plant Biology; Jeanine Routier-Pucci, Romance Studies; Arturo Sanchez, City and Regional Planning; Vilma Santiago-Errazuriz, Anthropology; Rebecca Stoltzfus, Nutrition; Monroe Weber-Shirk, Civil and Environmental Engineering; Stephen Younger, Human Ecology Nutritional Science. Gerard Aching, Romance Studies; Jere Haas, Human Ecology, Nutritional Science; Director, Human Biology Program; Teresa Jordan, Earth and Atmospheric Sciences; David Lee, Applied Economics Management; Alison Power, Ecology and Evolutionary Biology/Science & Technology Studies; Dean, Graduate Programs in the Life Sciences; Roberto Sierra, Department of Music, Composition; Amy Villarreal, Comparative Literature; Jean-Pierre Habicht, Human Ecology, Epidemiology; Gretel Pelto, Human Ecology; Billie Jean Issell, School of Continuing Education and Summer Sessions; Wendy Wolford, Development Sociology.

Cornell’s Latin American Studies Program (LASP), founded in 1961, has become one of the nation’s premier Latin American centers. Today, as part of the Mario Einaudi Center for International Studies, LASP provides a focus for all activities on the Cornell campus oriented towards Latin America. Latin Americans are active in most of Cornell’s colleges and schools, with diverse strengths including agricultural sciences, anthropology, art history, city and regional planning, government, history, labor relations, languages, literature and nutrition.

LASP’s mission is to stimulate learning about Latin America by supporting Cornell’s Latin America curriculum; nurturing faculty and student research; sponsoring events on and off campus; sponsoring visiting scholars from Latin America; and establishing relationships with universities and other institutions in Latin America. LASP offers a minor in Latin American Studies for undergraduate and graduate students, fellowships, summer programs, and more.

Undergraduate Minor
The undergraduate minor in Latin American Studies is earned with a minimum of 15 credits in Latin American Studies courses and with acquired facility in Spanish or Portuguese. Language facility is demonstrated by successful completion of SPAN 2190 or PORT 2190 or the equivalent. Course selections must represent at least two fields, including one course at an advanced level. The complete list of approved courses is available at www.einaudi.cornell.edu/latamericana/academics/student.asp. This list includes all LATA courses and others across colleges and schools with at least 50 percent Latin American content.

Courses
LATA 1950 Colonial Latin America (also HIST 1950) @ (HA-AS)
Fall. 4 credits. R. Craib.
For description, see HIST 1950.

LATA 1960 Modern Latin America (also HIST 1960) @ (HA-AS)
Spring. 4 credits. R. Craib.
For description, see HIST 1960.

LATA 2150 The Tradition of Rupture (also SPAN 2150) @ (LA-AS)
Fall. Spring. 4 credits. M. A. Garcés, spring. J. Pinet.
For description, see SPAN 2150.

LATA 2170 Early Hispanic Modernities (also SPAN 2170) @ (LA-AS)
Fall. 4 credits. M. A. Garcés.
For description, see SPAN 2170.

LATA 2200 Perspectives on Latin America (also SPAN 2200) @ (CA-AS)
Spring. 3 credits. B. Bosteels and C. Lawless.
For description, see SPAN 2200.

LATA 2201 Perspectives on Brazil (also PORT 2280)
Spring. 4 credits. G. Furtado.
For description, see PORT 2280.

LATA 2240 Perspectives on the Caribbean (also ASRC/SPAN 2240) (CA-AS)
Fall. 4 credits. G. Aching.
For description, see SPAN 2240.

LATA 2308 Caribbean History (also ASRC 2308) (HA-AS)
Fall. 4 credits. Next offered 2011–2012.
J. Byfield.
For description, see ASRC 2308.

LATA 3020 Spanish in the Disciplines (also SPAN 3020)
Fall and spring. 1 credit. Sections will be offered with the following courses in 2010–2011: GOVT 1313 (Spanish), HIST 1960 (Spanish), GOVT 3293 (Spanish), ECON 1120 (Spanish), GOVT 3295 (Portuguese). Staff.
For description see SPAN 3020.

LATA 3060 Intro to Hispanic Linguistics (also LING/SPAN 3060) (KCM-AS)
Fall. 4 credits. D. Cruz.
For description, see SPAN 3060.

LATA 3130 Latin American Forms of Colonial Possession (also ANTHR 3130) @ & (CA-AS)
Fall. 4 credits. C. Garces.
For description, see ANTHR 3130.

LATA 3256 Archaeology of the Andes (also ANTHR/ARKEO 3256) @ & (HA-AS)
Spring. 4 credits. J. Henderson.
For description, see ARKEO 3256.

LATA 3290 Comparative Politics of Latin America (also GOVT 3293) @ (SBA-AS)
Fall. 4 credits. K. Roberts.
For description, see GOVT 3293.

LATA 3550 Ancient Mexico and Central America (also ANTHR/ARKEO 3255) (HA-AS)
Fall. 4 credits. J. Henderson.
For description, see ARKEO 3255.

LATA 3734 Brazil: Many Cultures, One Nation (also ANTHR 3734) @ (CA-AS)
Spring. 4 credits. J. Fajans.
For description, see ANTHR 3734.

LATA 3760 Latino/Latin American Cities (also CRP 3760)
Fall. 3 credits. A. Sanchez.
For description, see CRP 3760.

LATA 4010 Experience Latin America I (also IARD 4010)
Fall. 2 credits. D. Castillo and T. Tucker.
For description see IARD 4010.

LATA 4170 Shipwrecks, Disasters, Deliverance, and Capitalism (also SPAN/FREN 4170)
Fall. 4 credits. G. Aching.
For description, see SPAN 4170.

LATA 4170 Shipwrecks, Disasters, Deliverance, and Capitalism (also SPAN/FREN 4170)
Fall. 4 credits. G. Aching.
For description, see SPAN 4170. 
LATA 4310 Migrant Workers (also LSP/HIST 4310) (HA-AS)
For description see LSP 4310.

LATA 4335 The Mexican Revolution at 100: Politics, Economy, and Society (also ILRIC 4335) (CA-AS)
Fall. 4 credits. M. Cook.
For description, see ILRIC 4335.

LATA 4910 Latin American Literature and Mass Media (also SPAN 4910) (CA-AS)
Spring. 4 credits. E. Paz-Soldan.
For description, see SHUM 4956.

LATA 4956 Transatlantic Decadence (also LSP/MIG 4956) (CA-AS)
Spring. 4 credits. B. Bostock.
For description, see HUM 4956.

LATA 4960 International Internship in Latin America (also ILRIC 4960)
Fall. 4 credits. J. Henderson.
For description see IARD 4960.

LATA 4970 Independent Study in LATA
All semesters. 1–6 credits. Staff.

LATA 5190 Urban Theory and Spatial Development (also CRP 5190)
Spring. 3 credits. W. W. Goldsmith.
For description, see CRP 5190.

LATA 6000 Contemporary issues in Latin-Latino America (also LSP 6000, ANTHR 6200) (CA-AS)
Fall and spring. 1 credit. D. Castillo. An exploration of critical topics in the anthropology, art, economics, history, literature, political science, and sociology of Latin American and U.S. Latino contexts. Course features guest speakers from Cornell and other institutions.

LATA 6010 Experience Latin America II (also IARD 6010)
Spring. 3 credits. D. Castillo and T. Tucker.
For description see IARD 6010.

LATA 6256 Maya History (also ANTHR/ARKEO 6256) (CA-AS)
Fall. 4 credits. J. Henderson.
For description, see ANTHR 6256.

Spring. 4 credits. Prerequisite: ILRLE 2400 or ILRLE 5400 or ECON 3130. G. Fields.
For description, see ILRIC 6350.

LATA 6481 Seminar in Latin American History (also HIST 6481) (CA-AS)
Fall. 4 credits. Next offered 2012–2013. R. Crab.

LATA 6600 Brazilian Literature Since 1850s (also PORT 6600) (CA-AS)
Fall. 4 credits. L. Horne.
For description, see PORT 6600.

LATA 6740 Transformations in the Global South (also CRP 6740) (CA-AS)
Spring. 4 credits. W. W. Goldsmith.
For description, see CRP 6740.

LATA 6760 Latino/Latin American Cities (also CRP 6760) (CA-AS)
Fall. 3 credits. A. Sanchez.
For description, see CRP 6760.
LSP 4050/6050 United States–Cuba Relations (also AMST/HIST/LATA 4050/6050)

LSP 4230 Borders (also COML 4230, SPAN 4900)

LSP 4850 Immigration Since 1965 (also AMST/HIST 4850)

LSP 4851 Refugees (also HIST/AMST 4851)

LSP 6000 Contemporary Issues in Latino/Latin America (also LATA 6000)

LSP 6010 Crossing Borders: Migrations in Comparative Perspective

LSP 6072 Immigration and Immigrant Politics (also GOVT 6072)

LSP 6640 Borderworks (also SPAN 6640, COML 6355)

Other elective courses will be determined each semester.

Graduate Minor

The Latino Studies Program at Cornell offers Latino Studies as a minor field in graduate studies. Graduate students select a faculty member from the field of Latino Studies to serve as a minor member on their special committee. Faculty expertise spans multiple fields, including anthropology, history, literature, law, sociology, government, education, planning, and human development, enabling students to develop programs that meet their specific interests.

Requirements: Students wishing to complete a graduate minor in Latino Studies need to formally register with the Latino Studies Program office, take an upper-level seminar as well as work intensively with a faculty member outside of their major field. Over the course of their study they will be expected to take two other Latino Studies graduate or advanced undergraduate courses outside of their major field. In lieu of available courses, the student and his or her minor field advisor might design a special project that culminates in a paper given at a conference or presented for publication. Each special project will require the approval of the director of graduate studies for the minor field.

www.gradschool.cornell.edu/fields.php?id=MF

Library

The Latino Studies Program library in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The library maintains print and media material pertinent to U.S. Latino issues including a collection of books, research material, archives, and films. The library and conference room also provide meeting space for more than 25 Latino student organizations.

Courses

LSP 1101 Research Strategies in Latino and Africana Studies (also ASRC 1900)

(Spring half-semester course: starts 3/8/2011) 1 credit. T. Cosgrove and E. Acee.

The digital revolution has made an enormous amount of information available to research scholars, but discovering resources and using them effectively can be challenging. This course introduces students with research interests in Latino and Africana Studies to search strategies and methods for finding materials in various formats (e.g., digital, film, and print) using information databases such as the library catalog, print and electronic indexes, and the World Wide Web. Instructors provide equal time for lecture and hands-on learning. Topics include government documents, statistics, subject-specific online databases, social sciences, the humanities, and electronic citation management.

LSP 1301 Introduction to World Music: Africa and the Americas (also MUSIC 1301) (CA-AS)

Spring. 3 credits. 1-hour disc. S. Pond. For description, see MUSIC 1301.

LSP 1800 Immigration in U.S. History (also HIST/AMST 1800) (HA-AS)

Spring. 4 credits. M. C. Garcia. For description, see HIST 1800.

LSP 2010 Latinos in the United States (also DSOC/SOC 2650, AMST 2655) (SBA-AS)

Spring. 3 credits; 4-credit option available. H. Velez.

For description, see SOC 2650.

LSP 2020 Spanish for Heritage Speakers (also SPAN 2000)

Fall. 4 credits. D. Cruz de Jesus. For description, see SPAN 2000.

LSP 2200 Sociology of Health and Ethnic Minorities (also DSOC 2200) (SBA-AS)

Fall. 3 credits. P. Parra.

Discusses the health status of minorities in the United States. Specifically explores intragroup diversity such as migration, economic status, and the influence of culture and the environment on health status and access to health care. Although special attention is given to Latino populations, discussion encompasses other minorities who face similar problems.

LSP 2250 United States–Mexico Border: History, Culture, Representation (also AMST/HIST 2250) (CA-AS)

Spring. 4 credits. M. C. Garcia. For description, see HIST 2250.

[LSP 2300 Latino Communities (also AMST/DSOC 2300) (SBA-AS)

3 credits. Next offered 2011–2012. R. Mize. For description, see DSOC 2300.]

[LSP 2400 Intro to Latino Literature (also AMST 2401, ENGL 2400) (LA-AS)

Fall. 4 credits. Next offered 2011–2012. M. P. Brady.]

LSP 2721 Anthropological Representation: Ethnographies on Latino Culture (also AMST/ANTHR 2721) (CA-AS)

Fall. 3 credits. V. Santiago-Irizarry.

For description, see ANTHR 2721.

LSP 3010 Hispanic Theatre Production (also SPAN/LATA 3010)

Spring. 1–5 credits, variable. D. Castillo.

LSP 3060 Introduction to Spanish Linguistics (also SPAN/LING 3060) (KCM-AS)

Fall. 4 credits. D. Cruz de Jesus.

LSP 3180/5180 Politics of Community Development: Transnational Latino and the U.S. City (also CRP 3180/5180) (SBA-AS)

Spring. 3 credits. A. Sanchez.

For description, see CRP 3180/5180.

LSP 3191 Racial and Ethnic Politics (also AMST/GOVT 3191) (SBA-AS)

Fall. 4 credits. M. Jones-Correa.

LSP 3550 Latinos, Law, and Identity (also AMST/DSOC 3550) (SBA-AS)

Fall. 3 credits. R. Mize.

For description, see DSOC 3550.

LSP 3750 Comparative U.S. Racial and Ethnic Relations (also AMST/DSOC 3750) (SBA-AS)

Spring. 3 credits. R. Mize.

For description, see DSOC 3750.

LSP 3760/6760 Latin/Latino American Cities (also CRP 3760/6760)

Fall. 3 credits. A. Sanchez.

For description, see CRP 3760/6760.

[LSP 3777 The United States (also AMST/ANTHR 3777) (CA-AS)

Fall. 3 credits. Next offered 2011–2012. V. Santiago-Irizarry.]

LSP 3800 Latino America (also HIST/AMST 3800)

Fall. 4 credits. M. C. Garcia.

For description, see HIST 3800.

LSP 3950/6590 Immigrant Entrepreneurship, Markets, and the Restructured U.S. City: The Latino Case (also CRP 3111/6111) (SBA-AS)

Spring. 3 credits. A. Sanchez.

For description, see CRP 3111/6111.

LSP 3980 Latina/o Popular Culture (also AMST 3981, ENGL 3980) (CA-AS)

Fall. 4 credits. M. P. Brady.

For description, see ENGL 3980.

[LSP 4032 Immigration and Politics (also AMST/GOVT 4032) (SBA-AS)

[LSP 4050 United States–Cuba Relations (also AMST/HIST/LATA 4050/6050) (HA-AS)

4 credits. Next offered 2012–2013. M. C. Garcia.]

LSP 4200–4210 Undergraduate Independent Study

Fall and spring. 2–4 credits. Prerequisite: permission of instructor.

Guided independent study.

[LSP 4301 Queering Latinidad (also ENGL/AMST 4301)

[LSP 4310/6310 Migrant Workers (also HIST 4310/6310, ILRCB 4020) (HA-AS)

Emphasis is on migrant farmworkers in the United States, mostly from the Caribbean and mainland Latin America, with an increasing focus as the semester progresses on farmworkers in central and upstate New York. Course requirements: analytical essays, a final paper, and participation in a service-learning project that are arranged in conjunction with the instructor.)

LSP 4510 Multicultural Issues in Education (also AMST/EDUC 4510) (SBA-AS)

Spring. 3 credits. S. Villenas.

For description, see EDUC 4510.

LSP 4520 Multicultural Issues in Secondary Education (also EDUC 4520)

Spring. 1 credit. S. Villenas.
the minor. The benefits of a student's participation depend on the particular courses and events selected, and the effort and interest invested.

Registration
To allow sufficient time for a coherent program of study to be developed and completed, students who have an interest in the law and society minor are required to register before the start of the second semester of their junior year. Under extenuating circumstances, late registrations may be accepted at the discretion of the directors, but only if the registrant has a plan already formulated for completing the minor's requirements. Late registrants can use the standard online registration form but should also submit the online completion plan at the time of registration. Information about, and forms required for, the law and society minor can be found at www.arts.cornell.edu/epl/lawso/c.htm.

The law and society minor is administered by the Ethics and Public Life Program office. For more information, contact the EPL administrative assistant at 218 Goldwin Smith Hall, epl@cornell.edu, 255-3289, rll5@cornell.edu.

Co-directors: M. Lynch (science and technology studies), 302 Rockefeller Hall, 255-7294, mel278@cornell.edu, and R. Lieberwitz (ILR), 361 Lives Hall, 255-3289, dl8@cornell.edu.
Advisers: G. Alexander (law), E. Anker (English), D. Dunning (psychology), M. Evangelista (government), C. Grumbach (Ethics & Public Life Program), G. Hay (law), S. Hilgartner (science and technology studies), P. Hyams (Economics), M. E. Kams (ILR), M. Katzenstein (government), R. Miller (philosophy), M. B. Norton (history), D. Powers (Near East studies), A. Riles (law), V. Santiago-Irizarry (anthropology), E. Taylor (philosophy).

The Law and Society minor provides an opportunity for focused study of the interaction between law and society from an interdisciplinary perspective predominantly rooted in the social sciences and humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology.

The Law and Society minor is open to all undergraduates. Though many of those who register for the minor have intentions of going on to law school or a law-related profession, Law and Society is not designed as a minor only for students interested in entering law school. The best candidates for the Law and Society minor are students interested in broader relations between legal institutions and historical and contemporary societies. This broader topic is, and should be, of interest to many students, regardless of whether they intend to enter the legal profession. A large selection of courses and on-campus events is available for completing the minor. The benefits of a student's participation depend on the particular courses and events selected, and the effort and interest invested.

Courses

ANTHR 2400 Cultural Diversity and Contemporary Issues @ (SBA-AS)
Fall. 3 credits. Staff.
For description, see ANTHR 2400.

ANTHR 3421 Sex and Gender in Cross-Cultural Perspective (also FGSS 3210) @ (SBA-AS)
Fall. 4 credits. K. March.
For description, see ANTHR 3421.

ENGL 2760 Desire (also COML/FGSS 2760, THETR 2780) (LA-AS)
Spring. 4 credits. E. Hanson.
For description, see ENGL 2760.

ENGL 2780 Body as Text: Pleasure and Danger (also FGSS 2780) (LA-AS)
Fall. 4 credits. M. Raskolnikov.
For description, see ENGL 2780.

ENGL 3550/6551 Decadence (also COML/FGSS 3550/6551) (LA-AS)

ENGL 4750 Senior Seminar in the 20th Century: Narratives of Loss (AIDS) (also AMST 4755, FGSS 4750)

ENGL 4791 Transgender and Transexuality (also FGSS 4791) (LA-AS)

ENGIL 6811 Baldwin (also AMST/FGSS 6811)
Spring. 4 credits. D. Woubshet.

FGSS 2010 Introduction to Feminist, Gender, and Sexuality Studies (CA-AS)
Fall and spring. 4 credits. Fall, J. Juffer; spring, K. McCullough.
For description, see FGSS 2010.

FGSS 2020 Introduction to Feminist, Gender, and Sexuality Theories (CA-AS)
Spring. 4 credits. H. Hoeffst.
For description, see FGSS 2020.

FGSS 2290 Intro to LGBT Studies (also FREN 2350)
Fall. 4 credits. C. Howie.
For description, see FGSS 2290.

FGSS 4000 Senior Seminar in Feminist, Gender, and Sexuality Studies
Fall. 4 credits. S. Martin.
For description, see FGSS 4000.

[GOVT 4625 Sexuality and the Law (also FGGS 4610) (KCM-AS)]

HD 3840 Gender and Sexual Minorities (also FGSS 3850)
Fall. 3 credits. K. Cohen.
For description, see HD 3840.

[THETR 4200/6200 Parody (also FGSS 4370/6370) (LA-AS)]

[THTR 6050 Camp, Kitsch, and Trash (also ENGL 6510, FGSS 6050)]
Linguistics
ling.cornell.edu
D. Zec, chair (219 Morrill Hall); M. Weiss, director of graduate studies (218 Morrill Hall); W. Harbert, director of undergraduate studies (210 Morrill Hall); D. Abusab, J. Bowers, W. Bruce, A. Cohen, M. Diesing, J. Hale, S. Hertz, A. Nussbaum, M. Rooth, C. Rosen, J. Whitman.

Why Linguistics?
Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences. Much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and colleagues in other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning in human languages, social variation and other Foundation Courses in B.

A. Prerequisites: LING 1101 plus one of the other Foundation Courses in B.

B. Foundation Courses: Majors must complete all of the following courses.
LING 1101 Introduction to Linguistics
LING 3302 Introduction to Phonetics and Phonology
LING 3303 Introduction to Syntax and Semantics
LING 3514 Historical Linguistics

C. Core Courses: Majors must complete three courses from the following list, chosen in consultation with their advisors.
LING 3553 Problems in Semantics
LING 4400 Language Typology
LING 4401 Phonology I
LING 4403 Syntax I
LING 4419 Phonetics I
LING 4421 Semantics I
LING 4423 Morphology
LING 4424 Computational Linguistics
LING 4425 Pragmatics
LING 4436 Language Development
LING 4474 Introduction to Natural Language Processing
LING 6600 Field Methods

D. Elective Courses: Majors must complete three elective courses chosen in consultation with their advisors. These can be selected from among the remaining courses listed in the Core Courses category, or other courses in linguistics or another department with a substantial linguistic content, including courses on the linguistics of specific languages. Two of these must be at the 2200 level or higher. One must be at the 3300 level or higher.

E. Ancillary Skills Courses: Majors must complete two semesters of study in one or more of the following areas, selected in consultation with their advisors. This requirement is intended to equip them with practical skills relevant to their particular interests in linguistics. The Ancillary Skills Course requirement may be waived for students who are majoring in more than one field.
Statistics
Logic
Computer programming

First-Year Writing Seminars
For descriptions, consult the John S. Knight brochure for times, instructors, and descriptions.

Courses
LING 1101 Introduction to Linguistics (KCM-AS)
Fall or spring. 4 credits each semester. Fall, S. Murray; spring, W. Harbert.
Overview of the science of language, especially its theoretical underpinnings, methods, and major findings. Areas covered include: the relation between sound and meaning in human languages, social variation in language, language change over time, universals of language, and the mental representation of linguistic knowledge. Students are introduced to a wide variety of language phenomena, drawn not only from languages resembling English, but also from many that appear to be quite unlike English, such as those native to the Americas, Africa, Asia, Australia, and the South Pacific.

LING 1109 English Words: Histories and Mysteries (also CLASS 1699) (HA-AS)
Spring. 3 credits. A. Nussbaum. Where do the words we use come from? This course examines the history and structure of the English vocabulary from its distant Indo-European roots to the latest in technical jargon and slang. Topics include formal and semantic change, taboo and euphemism, borrowing, new words from old, “learned” English loans from Greek and Latin, slang, and society.

The Linguistics Major
For questions regarding the linguistics major, contact Professor Wayne Harbert, 210 Morrill Hall, 255-8441, (weh2@cornell.edu).

Hons
Many linguistics majors choose to write a senior honors thesis. Applications for honors should be made during the junior year or by the start of fall term of the senior year. Candidates for admission must have a 3.0 (B) average overall and should have a 3.5 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete an honors thesis and take a final oral examination in defense of it. Students are expected to give an oral presentation on their thesis topic during the department’s year-end undergraduate honors colloquium, and to deposit a copy of the final thesis with the department. The thesis is usually written during the senior year but may be started in the second term of the junior year when the student’s program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis advisor and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. LING 4493 and 4494 may be taken in conjunction with the thesis research and writing but are not required.

LINGUISTICS
611
LING 1111 American Sign Language I
Summer only. 4 credits. T. Galloway.
Students with no previous background in American Sign Language (ASL) are introduced to the nature of a signed language and develop expressive and receptive skills in ASL. Basic grammar and vocabulary are covered, including explanations of the fundamental parts of a sign, proper use of fingerspelling, and the signification of nonmanual features. Instruction is supplemented with videotapes allowing students to begin to explore the visual literature of the Deaf community in the United States—stories, poems, and jokes that are unique to Deaf culture. Readings and class discussions of Deaf students with the causes of deafness, the historical development of ASL and its linguistic status, and characteristics of deaf education both throughout history and in the present day.

LING 1112 American Sign Language II
Summer only. 4 credits. Prerequisite: LING 1111 or permission of instructor. T. Galloway.
In this intermediate course, students continue to develop expressive and receptive fluency in ASL. Focus is on greater descriptive skill, developing intermediate-level narratives, and enhancing conversational ability. Advanced grammar and vocabulary is supplemented with further instruction in the linguistic structure of ASL. Readings, class discussions, and videotapes containing samples of the visual literature of the United States Deaf community continues students' investigation into American Deaf history and the shaping of modern Deaf culture.

LING 1131–1132 Elementary Sanskrit
(also CLASS 1331–1332, SANSK 1131–1132)
1131, fall; 1132, spring. 4 credits each semester. A. Ruppel.
For description, see SANSK 1131–1132.

LING 1170 Introduction to Cognitive Science (also COGST 1101, CS 1710, PHIL 1910, PSYCH 1102) (KCM-AS)
Fall. 4 credits. J. Hale.
For description, see COGST 1101.

LING 2215 Psychology of Language (also COGST/PSYCH 2150) (KCM-AS)
Spring. 3 credits. M. Christiansen.
For description, see PSYCH 2150.

LING 2217 History of the English Language to 1300 (also ENGL 2170) (HA-AS)
Fall. 4 credits. W. Harbert.
Explores the development of the English language from its Indo-European beginnings through the period of Early Middle English. Topics include linguistic reconstruction, changes in vocabulary and grammatical structure, external influences, and Old and Early Middle English language and literature. This course forms a sequence with LING 2218, but the two may be taken independently.

LING 2218 History of the English Language since 1300 (also ENGL 2181) (HA-AS)
Spring. 4 credits. W. Harbert.
Traces English from Chaucer to the present, including the development of standard English and dialects, and the rise of English as a world language.

LING 2219 Language and History in the British Isles # (HA-AS)
Spring. 4 credits. W. Harbert.
This course examines themes in historical linguistics, language contact, and sociolinguistics, in the context of the complex linguistic history of the British Isles.

LING 2221 Language and Society (CA-AS)
Fall. 4 credits. A. Cohn.
We will explore how language and society affect each other. How do class, age, ethnicity, gender, and geography affect the way people speak? Why are some ways of speaking considered prestigious and others stigmatized? How are power relations captured in language? How do ideologies—e.g., "English-only" policies—affect both politics and language use? What are the linguistic issues behind the Ebonics debate? In this course we will address these questions both in the context of the United States and other parts of the world.

LING 2236 Introduction to Welsh
Introduction to the Welsh language, with discussion of its history, structure, and current status.

LING 2238 Introduction to Welsh
Fall. 3 credits. W. Harbert.
Introduction to the Welsh language, with discussion of its history, structure, and current status, and a brief introduction to Welsh literature.

LING 2241 Yiddish Linguistics (also JWST 2271) (SBA-AS)
Fall. 3 credits. No previous knowledge of Yiddish required. M. Diesing.
Yiddish language and linguistics, including aspects of its morphology, syntax, and phonology. Also the history of the Yiddish language, and sociolinguistic topics such as Yiddish as a minority language, and the influence of Yiddish on American English.

LING 2246/5546 Minority Languages and Linguistics (SBA-AS)
Examines minority languages from linguistic, social, and political perspectives, including such issues as language death, language maintenance, bilingualism, language policy, and language rights.

LING 2251–2252 Intermediate Sanskrit
(also CLASS 2251–2252, SANSK 2251–2252) #
2251, fall; 2252, spring. 3 credits each semester. 2251 satisfies Option 1. A. Nussbaum; spring. Staff.
For description, see SANSK 2251–2252.

LING 2251/4461 Introduction to Indo-European Linguistics (HA-AS)
Fall. 4 credits. Graduate students register under LING 6661. A. Nussbaum.
An introduction to the phonology, morphology, and syntax of Proto-Indo-European and the chief historical developments of the daughter languages.

LING 2285/5585 Linguistic Theory and Poetic Structure (also ENGL 2960/5850) (LA-AS)
The aim of this course is to show how certain results of modern linguistics can usefully be applied to the analysis and interpretation of poetry.

LING 3040 Introduction to Italian Linguistics (also ITAL 3060) (KCM-AS)
Spring. 4 credits. T. Allaire.
For description, see ITAL 3060.

LING 3060 Introduction to Hispanic Linguistics (also SPAN 3060) (KCM-AS)
Fall. 4 credits. D. Cruz de Jesus.
For description, see SPAN 3060.

LING 3080 Introduction à la linguistique française (also FREN 3080) (KCM-AS)
Spring. 4 credits. T. Allaire.
For description, see FREN 3080.

LING 3300 Field Methods for Undergraduates (KCM-AS)
Spring. 4 credits. Prerequisite: students should normally have completed (or be concurrently enrolled in) LING 3301, 3302, 3303, 3304. Next offered 2011–2012. W. Harbert.
A hands-on course in which students gain experience in eliciting linguistic data from a native speaker of an unfamiliar language, organizing and analyzing those data and producing descriptions of the lexicon, phonetics, phonology, morphology, syntax, and texts in the language on the basis of them.

LING 3302 Introduction to Phonetics and Phonology (KCM-AS)
Spring. 4 credits. Prerequisite: LING 1101 or permission of instructor. Staff.
This course is an introduction to both phonetics (the study of the physical properties of the sounds of human language) and phonology (the organization and patterning of those sounds). The first part of the course focuses on the main areas of phonetics—articulation, acoustics and perception—and tools and skills used to study phonetics, such as production and perception of sounds, transcription using the International Phonetic Alphabet, and basic introspective analysis of speech. In the second part of the course we consider the concepts of phonology, including rules and representations, and analysis of a sound system. We will do this through investigating the sound systems of English and a wide range of languages of the world.

LING 3303 Introduction to Syntax and Semantics (KCM-AS)
Fall. 4 credits. Prerequisite: LING 1101 or permission of instructor. M. Diesing.
This course explores both syntax (how words and phrases are combined into sentences) and semantics (how the meanings of words, phrases, and sentences are interpreted). The course aims to give students the ability to address questions regarding syntactic and semantic properties of languages in a rigorous and informed fashion. Topics covered include phrase structure, grammatical relations, transformations, semantic composition, modification, quantification, and the syntax/semantics interface. Emphasis throughout the course is placed on forming and testing hypotheses.
LING 3308 Readings in Celtic Languages
Fall or spring, depending on demand. 1 credit. Prerequisite: permission of instructor. S–U grades only. W. Harbert. Reading/discussion groups in Welsh or Scottish Gaelic.

LING 3314 Introduction to Historical Linguistics (also ROMS 3314) Spring. 4 credits. Prerequisite: LING 1101 or permission of instructor. M. Weiss. Survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

LING 3315–3316 Old Norse
3315, fall; 3316, spring: 4 credits each semester. A. Håkonarson.
Old Norse is a collective term for the earliest North Germanic literary languages: Old Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic is the center of attention, and the purpose is twofold: the students gain knowledge of an ancient North Germanic language, important from a linguistic point of view, and gain access to the medieval Icelandic (and Scandinavian) literature. 3315: The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a 13th-century narrative based on the Eddaic poetry. 3316: Extensive reading of Old Norse texts, among them selections from some of the major Icelandic family sagas: Njals saga, Grettis saga, and Egils saga, as well as the whole Hrafnkels saga.

LING [3321]–3322 History of the Romance Languages (also ROMS 3321–3322) [HA-AS]
[3321], spring; 3322, fall: 4 credits each semester. Prerequisites: for LING 3321, LING 1101, or equivalent and qualification in any Romance language; for LING 3322, LING 3321, or permission of instructor. C. Rosen.
3321 covers popular Latin speech, early documentary sources, Pan-Romance phonological changes, regional divergence, early external borrowings, and non-Latin influences.] 3322 covers the shaping of Romance morphological systems, changes in the lexicon, medieval diglossia, and the emergence of Romance standards. 3321 and 3322 both prepare selected readings in the earliest Romance texts.

LING 3332 Philosophy of Language (also PHIL 3710)
Spring. 4 credits. M. Eklund. For description, see PHIL 3710.

LING [3333] Problems in Semantics (also COGST 3330, PHIL 3700) (KCM-AS)
Fall. 4 credits. Prerequisite: logic or semantics 3324 course or permission of instructor. Next offered 2011–2012. D. Abusch.
Looks at problems in the semantic analysis of natural languages, critically examining work in linguistics and philosophy on particular topics of current interest.

LING 3390 Independent Study in Linguistics
Fall or spring. 1–4 credits, variable. Prerequisite: LING 1101 and permission of instructor. Staff.
Independent study of linguistics topics not covered in regular curriculum for undergrads.

LING 4270 Entering a Virtual Linguistic Lab: New Cyber Tools for the Scientific Study of Language Acquisition (also HD 4270, COGST 4278)
Fall. 4 credits. Recommended prerequisites: HD 4370/PSYCH 4370/COGST 4500/LING 4450 and HD 3370/COGST 3570/LING 4450/PSYCH 4560; permission of instructor. B. Lišč. For description, see HD 4270.

LING 4310 Topics in Cognitive Studies (also COGST/BIONB/PSYCH 4310) Fall. 4 credits. S. Edelman.
For description, see COGST 4310.

LING [4400] Language Typology (KCM-AS)
Studies a basic question of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts are made to formalize universals of syntax and to characterize the total repertory of constructions available to natural languages. Common morphological tools to their syntactic correlates are covered. Emphasis is on systems of case, agreement, and voice.

LING 4401–4402 Phonology I, II (KCM-AS)
4401, fall; 4402, spring: 4 credits each semester. Prerequisites: for LING 4401, LING 3302 or equivalent; for LING 4402, LING 4401 or permission of instructor. Fall, D. Zec; spring, A. Cohn.
4401 provides a basic introduction to phonological theory. The first half of the course focuses on basic principles of phonology, patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 4402 provides further refinement of the issues investigated in 4401, focusing in particular on metrical theory, lexical phonology, autosegmental phonology, and prosodic morphology.

LING 4403–4404 Syntax I, II (KCM-AS)
4403, fall; 4404, spring: 4 credits each semester. Prerequisites: for LING 4403, LING 3302 or equivalent; for LING 4404, LING 4403 or permission of instructor. Fall, J. Bowers; spring, D. Zec.
4403 is an advanced introduction to syntactic theory within the principles and parameters/ minimalist frameworks. Topics include phrase structure, argument structure (unaccusative verbs, intransitive verbs, double object constructions), principles of word order, and the binding theory. 4404 is a continuation of 4403, focusing on syntactic dependencies, including the theory of control, an examination of locality constraints on movement, covert versus overt movement, and the syntax of quantification. The purpose of the course is to develop the background needed for independent syntactic research.

LING 4409 Structure of Italian (KCM-AS)
Fall. 4 credits. Prerequisites: LING 1101 and qualification in any Romance language. C. Rosen.
Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modals, clitics, reflexive constructions, agreement, impersonal constructions, and causatives.

LING 4411 History of the Japanese Language (also ASIAN 4411, JAPAN 4410) (HA-AS)
Overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

LING 4412 Linguistic Structure of Japanese (also ASIAN 4412) (KCM-AS)
Spring. 4 credits. Prerequisites: JAPAN 1102 or permission of instructor and LING 1101. Next offered 2011–2012. J. Whitman.
Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

LING 4416 Structure of the Arabic Language (also NES 4206) (KCM-AS)
Spring. 4 credits. J. Palmer. For description, see NES 4206.

LING 4417 History of the Russian Language (also RUSSA 4401) (HA-AS)
Phonological, morphological, and syntactic developments from Old Russian to modern Russian.

LING 4419 Phonetics I (KCM-AS)
Spring. 4 credits. Prerequisite: LING 3301 or permission of instructor. Staff.
Provides a basic introduction to the study of phonetics. Topics include anatomy and physiology of the speech production apparatus, transcription and production of some of the world’s sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, and stress and intonation.

LING 4420 Phonetics II (KCM-AS)
Combination of Phonetics I, providing a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of “hands-on” projects are part of the course.

LING 4421 Semantics I (KCM-AS)
Fall. 4 credits. Prerequisite: LING 3303. D. Abusch.
Introduces methods for theorizing about meaning within generative grammar. These techniques allow the creation of grammars that pair syntactic structures with meanings. Students look at several empirical areas in detail, among them complementation (combining heads with their arguments), modification, conjunction, definite descriptions, relative clauses, traces, bound pronouns, and quantification. An introduction to logical and mathematical concepts used in linguistic semantics (e.g., set theory, functions and their types, and the lambda notation for naming linguistic meanings) is included in the course.
LING 4422 Semantics II (KCM-AS)
Spring. 4 credits. Prerequisite: LING 4421 or permission of instructor. M. Rooth. Uses the techniques introduced in Semantics I to analyze linguistic phenomena, including quantifier scope, ellipsis, and referential pronouns. Temporal and possible worlds semantics are introduced and used in the analysis of modality, tense, and belief sentences. The phenomena of presupposition, indefinite descriptions, and anaphora are analyzed in a dynamic compositional framework that formalizes the idea that sentence meaning effects a change in an information state.

LING 4423 Morphology (KCM-AS)
Spring. 4 credits. Prerequisite: LING 1101 or permission of instructor. S. Murray. Addresses the basic issues in the study of words and their structures. Provides an introduction to different types of morphological structures with examples from a wide range of languages.

LING 4424 Computational Linguistics (also COGST 4240, CS 3740) (KCM-AS)
Fall. 4 credits. Recommended: previous course work in linguistics or programming. M. Rooth. Introduces methods for doing a language computationally, including parsing and representation of syntactic analyses; computational morphology; probabilistic grammars; feature constraint formalisms for syntax; treebank methodology.

LING 4425 Pragmatics (also PHIL 4720) (KCM-AS)
Spring. 4 credits. Prerequisite: LING 3303 or PHIL 2310, or permission of instructor. S. Murray. Introduction to aspects of linguistic meaning that have to do with context and with the use of language.

[LING 4427 Structure of Hungarian (also HUNGR 4427) (KCM-AS)]

LING 4428/6628 Connectionist Psycholinguistics (also COGST 4280, PSYCH 4280/6280)
Fall. 3 credits. M. Christiansen. For description, see PSYCH 4280.

[LING 4430 Structure of Korean (also ASIAN/KOREA 4430) (KCM-AS)]
Spring. 4 credits. Prerequisite: KOREA 1102 or linguistics course. No previous knowledge of Korean required. Next offered 2012–2013. J. Whitman. Intensive examination of the syntax and phonology of a non–Indo-European language with the objective of testing principles of current linguistic theory.

[LING 4432 Middle Korean (also KRLIT 4432) @ # (LA-AS)]
Spring. 4 credits. Offered alternate years. Prerequisite: KOREA 2202 or equivalent. Next offered 2012–2013. J. Whitman. Introduction to the premodern Korean language. Focuses on the earliest hangeul texts of the 15th century, but also introduces materials written in Korean using Chinese characters before the 15th century, including byangga. No previous background in linguistics is required, but students should have a command of written Korean of at least the third-year level.

LING 4436 Language Development (also COGST/HD 3370, PSYCH 4360) (KCM-AS)
Spring. 4 credits. B. Lust. For description, see COGST 3370.

[LING 4441 Introduction to Germanic Linguistics (also GERST 4410) (HA-AS)]

LING 4443 Linguistic Structure of Russian (also RUSSA 4403) (KCM-AS)
Fall. 4 credits. Prerequisites: reading knowledge of Russian. W. Browne. A synchronic analysis of the structure of modern Russian. This course deals primarily with phonology and its relation to morphology.

LING 4450 Lab Course: Language Development (also COGST 4500, HD 4370)
Fall. 2 credits. B. Lust. For description, see HD 4370.

[LING 4451 Greek Comparative Grammar (also GREEK 4411) (KCM-AS)]
Fall. 4 credits. Next offered 2011–2012. A. Nussbaum or staff.

[LING 4452 Latin Comparative Grammar (also LATIN 4452) (KCM-AS)]
Fall. 4 credits. Next offered 2011–2012. A. Nussbaum or staff.

[LING 4453 Structure of Latin (also LATIN/ROMS 4453) # (KCM-AS)]
Fall. 4 credits. Prerequisite: a basic knowledge of Latin forms and constructions or some previous work in Romance and/or general linguistics. Next offered 2011–2012. A. Nussbaum or staff. An analysis of the phonology, morphology, and syntax of Latin from a synchronic point of view.

[LING 4455 Greek Dialects (also GREEK 4455) (KCM-AS)]
Fall. 4 credits. Next offered 2012–2013. A. Nussbaum or staff.

[LING 4456 Archaic Latin (also LATIN 4456) # (LA-AS)]

[LING 4457 Homeric Philology (also GREEK 4457) # (LA-AS)]
Spring. 4 credits. Next offered 2012–2013. A. Nussbaum or staff.

[LING 4459 Mycenaean Greek (also GREEK 4459) (LA-AS)]
Spring. 4 credits. Next offered 2012–2013. A. Nussbaum or staff.

[LING 4460 Sanskrit Comparative Grammar (also CLASS 4490) (KCM-AS)]
Fall. 4 credits. Prerequisite: reasonable familiarity with classical Sanskrit morphology. Next offered 2012–2013. A. Nussbaum or staff.

LING 4473 Introduction to Natural Language Processing (also COGST/CS 4740)
Spring. 4 credits. C. Cardie. For description, see CS 4740.

[LING 4476 Statistics for Linguists]
Spring. 4 credits. Next offered 2011–2012. J. Hale. Introduces distributions, sampling, and hypothesis testing as tools for linguistic research. Students learn to use appropriate software, and as time permits, craft predictive theories using probabilistic grammars and linear models. Only high math presupposed.

LING 4485 Topics in Computational Linguistics (MQR)
Spring. 4 credits. J. Hale. Laboratory course concerned with broad-coverage computational grammars, computational methodology for addressing linguistic questions, and programming and experimental environments for computational linguistics. Course work includes an experimental project.

LING 4493 Honors Thesis Research
Fall. 4 credits. Staff. May be taken before or after LING 4494, or may be taken independently.

LING 4494 Honors Thesis Research
Spring. 4 credits. Staff. May be taken as a continuation of, or before, LING 4493.

LING 6600 Field Methods
Spring. 4 credits. Prerequisites: LING 4401, or 3302 and 4403 or 3303, or permission of instructor. Next offered 2011–2012. Staff. Elicitation, recording, and analysis of data from a native speaker of a non-Western language not generally known to students.

LING 6601 Topics in Phonological Theory
Fall. 4 credits. Variable. Prerequisites: LING 4401 and one higher-level phonology course. A. Cohn. Selected topics in current phonological theory.

LING 6602 Topics in Morphology
Spring. 4 credits. Prerequisites: LING 4401 or 4403 or permission of instructor. Next offered 2012–2013. J. Bowers. Selected topics in current morphological theory.

LING 6604 Research Workshop
Fall. 2 credits. Requirement for third-year linguistics graduate students. S–U grades only. J. Bowers. Provides a forum for presentation and discussion of ongoing research, and development of professional skills. Participants must enroll in a concurrent independent study with a special committee member, or a relevant workshop.

LING 6606 Historical Syntax
Fall. 4 credits. Prerequisite: LING 4403. Next offered 2012–2013. J. Whitman.
LING 6615  Topics in Semantics  Fall. 4 credits. Prerequisite: LING 4421 or permission of instructor. Next offered 2012–2013. M. Rooth.
Selected topics in semantic theory, focusing on recent literature.

LING 6616  Topics in Syntactic Theory  Spring. 4 credits, variable. Prerequisite: LING 4404 or permission of instructor. Staff.
Examination of recent developments in syntactic theory, including “minimalist” approaches to phrase-structure, derivations/representations and the nature of economy conditions, and parametric differences.

LING 6617–6618  Hittite 6617, fall, 6618, spring. 4 credits each semester. Prerequisites: for LING 6617, permission of instructor; for LING 6618, LING 6617 or permission of instructor.
Introduction to the cuneiform writing system and the grammar of Hittite, followed by the reading of selected texts.

LING 6619  Rigveda  Fall. 4 credits. Prerequisite: permission of instructor. Next offered 2012–2013. Staff.

LING 6623–6624  Old Irish I, II 6623, fall; 6624, spring. 4 credits each semester. Prerequisite: for LING 6624, LING 6623 or permission of instructor. M. Weiss.
Introduction to the grammar of Old Irish. Reading from selected Old Irish glosses and prose works.

LING 6625  Middle Welsh  Spring. 4 credits. Prerequisite: permission of instructor. Next offered 2011–2012.
Students develop a reading knowledge of Middle Welsh through translating selections from prose and poetry. No familiarity with Welsh is assumed.

LING 6628  Connectionist Psycholinguistics 4 credits. Prerequisite: permission of instructor. Next offered 2011–2012. B. Lust.
For description, see PSYCH 4280.

LING 6633  Language Acquisition Seminar 4 credits. Prerequisite: LING 4436 or permission of instructor. Next offered 2011–2012. B. Lust.
This seminar reviews and critiques current theoretical and experimental studies of first language acquisition, with a concentration on insights gained by cross-linguistic study of this area. Attention is also given to the development of research proposals.

LING 6635–6636  Indo-European Workshop  Fall; 6635, fall; 6636, spring. 4 credits each semester. Prerequisite: permission of instructor. Next offered 2011–2012. M. Weiss.
An assorted of subjects intended for students with previous training in Indo-European linguistics.

LING 6645  Gothic  Fall. 4 credits. Prerequisite: LING 1101. Offered every three years; next offered 2012–2013. W. Harbert.
Linguistic structure of Gothic, with extensive readings of Gothic texts.

LING 6646  Old High German, Old Saxon (also GERST 6580)  Spring. 4 credits. Prerequisite: LING 1101. Highly recommended: reading knowledge of Modern German. Offered every three years; next offered 2011–2012. W. Harbert.
Combines a survey of the linguistic history and structure of Old High German and Old Saxon with extensive readings from the major documents in which they are recorded.

LING 6648  Speech Synthesis 4 credits. Prerequisite: LING 4401, 4419, or permission of instructor. Offered alternate years; next offered 2011–2012.
S. Hertz.
Investigates the nature of the acoustic structure of speech synthesis. The course may also be of interest to students in psychology, computer science, and cognitive science.

LING 6649  Structure of Old English 4 credits. Prerequisite: LING 4401. Offered every three years; next offered 2011–2012.
W. Harbert.
Linguistic overview of Old English, with emphasis on phonology, morphology, and syntax.

LING 6662  Old Russian Texts (also RUSSA 6602)  Spring. 4 credits. Prerequisite: LING 6663.
W. Browne.
Grammatical analysis and close reading of Old Russian texts.

LING 6663  Old Church Slavonic (also RUSSA 6601)  Fall. 4 credits. Prerequisite: knowledge of Slavic or ancient Indo-European language. Prerequisite to LING 6662 and 6671.
W. Browne.
Grammar and reading of basic texts.

LING 6671  Comparative Slavic Linguistics (also RUSSA 6651)  Fall. 4 credits. Prerequisites: LING 6663 taken previously or simultaneously, or permission of instructor. Offered alternate years; next offered 2011–2012.
W. Browne.
Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.

LING 7701–7702  Directed Research 4 credits. Times TBA. Staff.

LING 7710–7720  Seminar  Fall or spring. Credit TBA.
Seminars are offered according to faculty interest and student demand. Recent topics include: semantics; computational linguistics; language acquisition; and the nature of the interfaces between phonetics, phonology, and syntax.

Department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help. Students who want to take any of the courses numbered 3000 or above are invited to confer with the instructor before enrolling.

Course Numbering System
The first digit of the course number indicates the level of the course: roughly, 1 and 2 indicate undergraduate courses; 3 and 4, upperclass courses; 5, professional-level and mathematics education courses; 6 and 7, graduate courses. Within the MATH subject area, the second digit often indicates the subject matter: 0, general; 1 and 2, analysis; 3 and 4, algebra and combinatorics; 5 and 6, topology and geometry; 7, probability and statistics; 8, logic; 9, other.

Advanced Placement
Freshmen who have had some calculus should carefully read “Advanced Placement,” p. 8. Those who have not taken an advanced placement exam should take a placement test at Cornell during fall orientation. For guidance in selecting an appropriate course, please...
Major in Mathematics
The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike, and can be broad or narrow. It can also be combined easily with serious study in another subject in the physical, biological, or social sciences by means of a double major and/or concentration. (See “Double Majors” below for more information.) Questions concerning the major should be brought to a member of the Mathematics Major Committee.

Prerequisites
Students are admitted to the major after successfully completing a semester of multivariable calculus and a semester of linear algebra. The department recommends either MATH 2210–2220 or 2230–2240 with grades of B– or better. Alternative prerequisites are MATH 1920 and 2940 with grades of B– or better or MATH 2130 and 2310 with grades of B+ or better. A 3- or 4-credit computer programming course with a grade of C– or better is also required for acceptance to the major. Eligible courses include: CS 1110, 1112, 1113, 1114, and 2110.

Requirements
Students must complete nine courses, as described in items 1–5 below, under the following constraints:

• At least two of the MATH courses taken must be at the 4000 level (or above).

• A course may be counted toward the major only if it is taken for a letter grade and a grade of C– or better is received for the course.

• No course may be used to satisfy more than one requirement for the major.

• 2-credit courses count as half courses.

• MATH courses numbered between 3000 and 5999 do not count toward the major. Major advisors may make adjustments to the major requirements upon request from an advisor, provided the intent of the requirements is met. In particular, many suitable graduate courses are not listed here.

1. Two courses in algebra. Eligible courses are: MATH 4310 or 4330, MATH 4320 or 4340, MATH 4370, MATH 4500; MATH 5520; MATH 5560.

2. Two courses in analysis. Eligible courses are: MATH 4110; MATH 4120; MATH 4200, 4220, 4240, 4250 (also CS 4210), 4260 (also CS 4220), 4280.

3. Five further high-level mathematical courses. The seven alternatives (a–g) below do not exhaust the possibilities. A mathematics major interested in a concentration in a subject different from those below may develop a suitable individual program in consultation with his or her major advisor.

a. Concentration in Mathematics:
   i. Four additional MATH courses numbered 3000 or above. For students graduating in May 2011 or later, at least one of the four courses must be among the following: MATH 3560, 4500, 4510, 4520, 4530, 4540, 4550.
   ii. One course dealing with mathematical models. Any course from outside mathematics with serious mathematical content and dealing with scientific matters. Serious mathematical content includes, but is not limited to, extensive use of calculus or linear algebra. Eligible courses include any course from another department that would satisfy one of the concentrations, as well as CS 2110, MATH 3840/PHIL 3300, MATH 4810/PHIL 4310, MATH 4820/PHIL 4311, MATH 4830/PHIL 4312, PHYS 1110, PHYS 2208, PHYS 2211, and PHYS 2221. Other 1000-level physics courses and PHYS 2207 may not be used, but some courses in other fields may be accepted.

b. Concentration in Computer Science:
   Five additional courses from (ii) and (iv) below, of which at least one is from (iii) and three are from (iv).

   i. MATH courses numbered 3000 or above.
   ii. Computer science courses with significant mathematical content. Eligible courses are: CS 3220, 3810, 4110, 4210 (also MATH 4250, 4320 (also MATH 4260), 4520, 4620, 4700, 4740, 4780, 4812, 4820, 4830, 4850, and 4860.

   c. Concentration in Economics:
   Five additional courses from (vi) and (vii) below, as follows: one course from (v), three courses from (vi), and a fifth course from any of (v), (vi), or (vii).

   v. MATH courses numbered 3000 or above.
   vi. Economics courses with significant mathematical content. Eligible courses are: ECON 3190/6190, 3200/6200, 3250, 3680, 4160, 4190, 4760/6760, 4770/6770, 6090, 6100, 6110, 6130, 6140, 1710, 7180, 7480, 7490, 7560. Only two of the econometrics courses (3200/6200, 3250, 7480, 7490) are allowed.
   vii. Courses in operations research with significant mathematical content and dealing with material of interest to economists. Eligible courses are: ORIE 3300, 3310, 4320, 4350, 4600, 4710, 4740, 5600, 5610, and 5640.

d. Concentration in Mathematical Biology:
Five additional courses from (vii) and (ix) below, with three courses from (ix) and two courses from (ix). Biology courses that have mathematical content or provide background necessary for work at the interface between biology and mathematics. Eligible courses are: BIOE/MATH 3620, BIOE 4600, BIONB 4220, BTRY 4080, 4090, 4820, 4830, 4840.

ix. MATH courses numbered above 5000. Particularly appropriately are MATH 4200 and 4710.

e. Concentration in Mathematical Physics: Five additional courses from (x) and (xi) below, of which at least one is from (x) and three are from (xi).

   x. MATH courses in analysis, geometry, algebra and combinatorics, probability and statistics, and mathematical logic. Eligible courses are: MATH 3110, 3210, 3230, 4010, 4130, 4140, 4200, 4180 or 4220, 4240, 4250 (also CS 4210), 4260 (also CS 4220), 4280, 4310 or 4320, 4340 or 4340, 4370, 4410, 4420, 4500, 4510, 4520, 4530, 4540, 4550, 4710, 4720, 4810, 4820, 4850, 4860.

   xi. Physics courses that make significant use of advanced mathematics. Eligible courses are: PHYS 3314, 3316, 3318, 3323, 3527, 3531, 4443, 4444, 4445, 4454, 4455, 4480, 4481.

f. Concentration in Operations Research: Five additional courses from (xii) and (xiii) below, of which at least one is from (xii) and three are from (xiii).

   xii. MATH courses numbered 3000 or above.
   xiii. Courses in operations research in which the primary focus involves mathematical techniques. Eligible courses are: ORIE 3300, 3510, 3550, 3510, 4320, 4330, 4350, 4360, 4370, 4520, 4540, 4600, 4630, 4710, 4740, 4850, 5600, 5610, and 5640.

g. Concentration in Statistics: Five additional courses from (xiv), (xv), and (xvi) below, as follows.

   xiv. Both MATH 4710 and 4720.

   xv. One additional MATH course numbered 3000 or above.

   xvi. Two courses in other departments with significant mathematical content in probability and statistics, complementing (xv). Eligible courses are: BTRY 3020, 4790, 4820, 6020, 6030, 6040; ORIE 3510, 4520, 4540, 4600, 4630, 4710 (half course), 4740, 5600, 5610; ILRST 3120, 4100, 4110; and ECON 3200.

   MATH 1710 is also recommended for students who have not had experience with real-world data, although it will not count toward any of the math major requirements. It should be taken or audited before or concurrent with MATH 4710.

Double Majors
A double major with computer science, economics, or physics can be facilitated by the corresponding concentrations described above. The Departments of Computer Science and Economics permit double majors to use courses in the corresponding concentrations to satisfy the requirements of both majors. The Physics Department also permits double
counting, but only if the student completes the mathematics major with an inside concentration. Students should consult the appropriate departments for any further conditions.

**Senior Thesis**
A senior thesis can form a valuable part of a student's experience in the mathematics major. It is intended to allow students to conduct an in-depth investigation not possible in regular course work. The work should be independent and creative. It can involve the solution of a serious mathematics problem, or it can be an expository work, or variants of these. Conducting independent research, paying careful attention to exposition in the finished written product, and the delivery of an optional oral presentation can have a lasting positive impact on a student's educational and professional future.

**Honors**
The Department of Mathematics awards honors (cum laude) and high honors (magna cum laude and summa cum laude) to graduating mathematics majors who have performed outstandingly in the major program. The awards are determined by the Mathematics Major Committee in the latter part of the semester before graduation. The committee will primarily be looking for excellent performance in mathematics courses, particularly in challenging courses at the 4000 level or beyond. Participation in the honors seminar (MATH 4010) for one semester, or independent study at a high performance level can also contribute to honors. Students interested in any level of honors should consult their major advisors or a member of the Mathematics Major Committee concerning suitable courses. Outstanding performance in graduate classes or an excellent senior thesis can contribute to high honors.

**Teacher Education in Mathematics**
For information on the various possibilities for students considering teaching mathematics in schools, go to www.math.cornell.edu/Undergraduate/Teaching.

**Minor in Mathematics**
The Mathematics Department is in the process of developing a minor in mathematics. Information will be posted in the Undergraduate section of the Mathematics Department web site (www.math.cornell.edu) as it becomes available.

**Precalculus**
Students who need to take Calculus I (MATH 1106 or 1110) but are lacking the necessary prerequisites may take MATH 1009 or 1101 to prepare. MATH 1009 does not carry credit toward graduation.

**Calculus and Linear Algebra**
Students should consult their advisors and keep major prerequisites in mind when planning a suitable program. The following are general recommendations. Consult First Steps in Math (www.math.cornell.edu/Courses/FSM) for more detail. The director of undergraduate studies will gladly meet with students to offer further advice.

1. Students who expect to major in mathematics or a science for which a strong math background is recommended should take MATH 1110–1220 or MATH 1110–1220 and continue with MATH 2210–2220 or 2230–2240.
2. MATH 1910–1920–2930–2940 is required for students in the engineering college and recommended by some advisors in fields strongly related to the mathematical and physical sciences, such as astronomy, computer science, physics, and physical chemistry.
3. MATH 1110–1220 and 2130 or 2310 is a good choice for students who need to master the basic techniques of calculus but whose majors will not require a substantial amount of mathematics.
4. MATH 1110–2310 is an option for students who need some linear algebra but not a full year of calculus.
5. Students who are undecided about their future study at Cornell but think they may involve a substantial amount of math, should keep their options open by taking Calculus I (MATH 1110 or AP credit), Calculus II (MATH 1120 or 1220 or AP credit), and Linear Algebra (MATH 2210). Multivariable Calculus (MATH 2220) would be the next step for students who are still leaning in the direction of a math-related major and may wish to take more advanced mathematics.

**Switching between calculus sequences is often difficult, especially at the 2000 level. Students should not attempt such a switch without consulting the director of undergraduate studies.**

**Special-Purpose Sequences**
Students who will take no more than two semesters of mathematics can gain a broader view of the subject by taking one semester of calculus and one non-calculus mathematics course. The following options are particularly useful for students in the life and social sciences and will satisfy the mathematics requirement for most medical schools.

1. MATH 1105–1106 provides a one-year introduction to the mathematical topics that are most useful to biologists and social scientists. (MATH 1110 may be substituted for MATH 1106.)
2. An introductory statistics course (MATH 1710, for example), taken before or after a semester of calculus (MATH 1106 or MATH 1110), teaches students how to work with data and can be more useful in some disciplines than a second semester of calculus.

Students who want two semesters of calculus are advised to take the first two semesters of one of the calculus sequences, but students with excellent performance in MATH 1106 may follow that course with MATH 1120 or 1220.

**Courses with Overlapping Content**
Because the department offers many courses with overlapping content, students must choose their courses carefully to ensure that they will receive credit for each course they take. Listed below are groups of courses that have similar content. Students will receive credit for only one of the courses in each group.

---

**Undergraduate Course Offerings**
Please visit www.math.cornell.edu for further information and up-to-the-minute corrections. For guidance in selecting an appropriate course, please consult First Steps in Math, published on the mathematics department web site under “Courses.”

Foundation courses: 1105, 1106, 1110, 1120, 1220, 1910, 1920, 2130, 2210, 2220, 2240, 2310, 2930, 2940
Mathematics Education: 4510
History of Mathematics: 4050
General and Liberal Arts Courses: 1300, 1340, 1350, 1710, 3040, 4010
Analysis: 3110, 3210, 4130, 4140, 4180
Algebra and Number Theory: 3320, 3360, 4310, 4320, 4330, 4340, 4370, 4500
Combinatorics: 4410, 4420, 4550
Geometry and Topology: 3560, 4500, 4510, 4520, 4530, 4540
Probability and Statistics: 1710, 2710, 4710, 4720, 4740
Mathematical Logic: 2810, 3840, 4810, 4820, 4860
Applied Analysis and Differential Equations: 3230, 3620, 4200, 4220, 4240, 4250, 4260, 4280

**MATH 1006 Academic Support for MATH 1106**
Spring. 1 transcript credit (will appear on transcript, does not count toward graduation). Credit may be used toward good academic standing for students in Architecture, Art, and Planning; Engineering, Hotel Administration; and Human Ecology; but not for students in Agriculture and Life Sciences, Arts and Sciences, and Industrial and Labor Relations.

Reviews material presented in MATH 1106 lectures, provides problem-solving techniques and tips as well as prelim review. Provides further instruction for students who need reinforcement. Not a substitute for attending MATH 1106 lectures or discussions.

**MATH 1009 Precalculus Mathematics**
Summer. 3 transcript credits (will appear on transcript; does not count toward graduation). Designed to prepare students for MATH 1110. Reviews algebra, trigonometry, logarithms, and exponentials.
MATH 1011 Academic Support for MATH 1110
Fall, spring. 1 transcript credit (will appear on transcript; does not count toward graduation). Credit may be used toward good academic standing for students in Architecture, Art, and Planning, Engineering, Hotel Administration, and Human Ecology but not for students in Agriculture and Life Sciences, Arts and Sciences, and Industrial and Labor Relations.
Reviews material presented in MATH 1110 lectures, provides problem-solving techniques and tips as well as prelim review. Provides further instruction for students who need reinforcement. Not a substitute for attending MATH 1110 lectures.

MATH 1012 Academic Support for MATH 1120
Fall, spring. 1 transcript credit (will appear on transcript; does not count toward graduation). Credit may be used toward good academic standing for students in Architecture, Art, and Planning, Engineering, Hotel Administration, and Human Ecology but not for students in Agriculture and Life Sciences, Arts and Sciences, and Industrial and Labor Relations.
Reviews material presented in MATH 1120 lectures, provides problem-solving techniques and tips as well as prelim review. Provides further instruction for students who need reinforcement. Not a substitute for attending MATH 1120 lectures or discussions.

MATH 1101 Calculus Preparation
Fall, spring. 1 credit. Due to an overlap in content, students will forfeit credit for MATH 1101 upon completion of MATH 1106 or 1110.
Introduces a wide variety of topics of algebra and trigonometry to prepare students for calculus. Emphasis is on the development of linear, polynomial, rational, trigonometric, exponential, and logarithmic functions. Due to the strong emphasis on graphing, students will have a better understanding of asymptotic behavior, techniques of graphing and their applications to calculus. The course includes a brief graphical introduction to basic concepts of differential calculus, including limits, continuity, and the derivative. The calculus content of the course is similar to 1/3 of the content covered in MATH 1106 and 1110.

MATH 1102 Quantitative Methods for the Life Sciences
Fall. 1 credit. Due to an overlap in content, students will forfeit credit for MATH 1102 upon completion of MATH 1105 or an introductory statistics course such as MATH 1710.
Introduces a variety of topics of algebra and prepares students for statistics and finite mathematics. Emphasis is on the development of linear, polynomial, exponential, and logarithmic functions and their applications to curve fitting. The course includes basic probability laws, descriptive statistics, linear regression, and discrete and continuous probability distributions. The probability and statistics content of the course is similar to 1/3 of the content covered in MATH 1105 and various introductory statistics courses.

MATH 1105 Finite Mathematics for the Life and Social Sciences (MQR)
Fall. 3 credits. Prerequisite: three years of high school mathematics, including trigonometry and logarithms. Introduction to basic concepts of probability, and Markov chains that develops the parts of the theory most relevant for applications. Specific topics include equations of lines, the method of least squares, solutions of linear systems, matrices, basic concepts of probability, permutations, combinations, binomial distribution, mean and variance, and the normal approximation to the binomial distribution. Examples from biology and the social sciences are used.

MATH 1106 Calculus for Life and Social Sciences (MQR)
Spring. 3 credits. Prerequisite: three years of high school mathematics (including trigonometry and logarithms) or a precalculus course (e.g., MATH 1009 or 1101). For students planning to take MATH 1120, MATH 1110 is recommended rather than 1100. Students may not receive credit for both MATH 1106 and MATH 1110.
Introduction to differential and integral calculus, partial derivatives, elementary differential equations. Examples from biology and the social sciences are used.

MATH 1110 Calculus I (MQR)
Fall, spring, summer. 4 credits. Prerequisite: three years of high school mathematics (excluding trigonometry and logarithms) or a precalculus course (e.g., MATH 1009 or 1101). Students may not receive credit for both MATH 1110 and MATH 1106.
Topics include functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic, and exponential functions; applications of differentiation, including graphing, max–min problems, tangent line approximation, implicit differentiation, and applications to the sciences; the mean value theorem; and antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus and their applications to the sciences. Areas under a curve. Graphing calculators are used, and their pitfalls are discussed, as applicable to the above topics. MATH 1110 can serve as a one-semester introduction to calculus or as part of a two-semester sequence in which it is followed by MATH 1120 or 1220.

MATH 1120 Calculus II (MQR)
Fall, spring, summer. 2 credits. Prerequisite: MATH 1110 with grade of C or better or excellent performance in MATH 1106. Those who do well in MATH 1110 and expect to major in mathematics or strongly mathematics-related fields should take 1220 instead of 1120. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 1120, MATH 1220, MATH 1910.
Focuses on integration: applications, including volumes and arc length; techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separation of variables, initial conditions, systems, some applications). Also covers infinite series and sequences: definition and tests for convergence, power series, Taylor series with remainder, and parametric equations.

MATH 1220 Honors Calculus II (MQR)
Fall. 4 credits. Prerequisite: one semester of calculus with high performance or permission of department. Students planning to continue with MATH 2130 are advised to take 1120 instead of this course. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 1220, MATH 1120, MATH 1910.
Takes a more theoretical approach to calculus than MATH 1120. Topics include differentiation and integration of elementary transcendental functions, techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems.

MATH 1300 Mathematical Explorations (MQR)
Emphasizes ideas and imagination rather than techniques and calculations. Homework involves students in active participation with mathematical ideas. Topics vary. Some assessment through writing assignments.

MATH 1340 Mathematics and Politics (MQR)
Spring, summer. 3 credits.
We apply mathematical reasoning to some problems arising in the social sciences. We discuss game theory and its applications to political and historical conflicts. Power indices are introduced and used to analyze some political institutions. The problem of finding a fair election procedure to choose among three or more alternatives is analyzed.

MATH 1600 Totally Awesome Mathematics
Spring. 2 credits. Prerequisite: three years high school mathematics.
Examines classical and modern methods of message encryption, decryption, and cryptanalysis. Mathematical tools are developed to describe these methods (modular arithmetic, probability, matrix arithmetic, number theory), and some of the fascinating history of the methods and people involved is presented.

MATH 1710 Statistical Theory and Application in the Real World (MQR)
Fall, spring, summer. 4 credits. Prerequisite: high school mathematics. No previous familiarity with computers presumed. No credit if taken after ECON 3190, 3200, or 3300.
Topics include vector algebra, linear transformations, matrices, determinants, orthogonality, eigenvalues, and eigenvectors. Applications are made to linear differential equations.

**MATH 2220 Multivariable Calculus (MQR)**

Fall, Spring. 4 credits. Prerequisite: MATH 2210. Recommended for students who plan to major in mathematics or a related field. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 2220, MATH 2230, MATH 2240, MATH 2310, MATH 2240. Differential and integral calculus of functions in several variables, line and surface integrals as well as the theorems of Green, Stokes, and Gauss.

**MATH 2230 Theoretical Linear Algebra and Calculus (MQR)**

Fall, 4 credits. Prerequisite: two semesters of calculus with grade of A– or better, or permission of instructor. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 2230, MATH 2210, MATH 2240, MATH 2940. MATH 2230–2240 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses. The material is presented at a higher theoretical level than in 2210–2220. Topics in 2230 include vector spaces, matrices, and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals.

**MATH 2240 Theoretical Linear Algebra and Calculus (MQR)**

Spring, 4 credits. Prerequisite: MATH 2230. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 2240, MATH 2120, MATH 2230, MATH 2240. Topics include vector fields; line integrals; differential forms; line integral transformations; linear algebra of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals.

**MATH 2210 Linear Algebra with Applications (MQR)**

Fall, spring. 3 credits. Prerequisite: MATH 1110 or equivalent. Students who plan to major in mathematics should take MATH 2210 or 2940. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 2210, MATH 2230, MATH 2240, MATH 2940. Introduction to linear algebra for students who wish to focus on the practical applications of the subject. A wide range of applications are discussed and computer software may be used. The main topics are systems of linear equations, matrices, determinants, vector spaces, orthogonality, and eigenvalues. Typical applications are population models, input/output models, least squares, and difference equations.

**MATH 2270 A Second Course in Statistics (MQR)**

Fall. 4 credits. Prerequisite: two semesters of calculus (MATH 1110–1120 or equivalent) or permission of instructor. Recommended: an introductory statistics course such as AP statistics, MATH 1710, ILRST 2100, or similar. Next offered 2011–2012. Designed for students who wish to build on their knowledge of basic statistics to obtain a more modern and advanced perspective on the field.

**MATH 2810 Deductive Logic (also PHIL 3310) (MQR)**

Spring. 4 credits. For description, see PHIL 3310.
MATH 3110 Introduction to Analysis (MQR)
Fall, spring. 4 credits. Prerequisites: MATH 2210–2220, 2230–2240, or 1920 and 2940. Students may not receive credit for both MATH 3110 and MATH 4130 if either course is taken fall 2010 or later.
Provides a transition from calculus to real analysis. Topics include rigorous treatment of fundamental concepts in calculus: including limits and convergence of sequences and series, compact sets; continuity, uniform continuity and differentiability of functions. Emphasis is placed upon understanding and constructing mathematical proofs.

MATH 3210 Manifolds and Differential Forms (MQR)
Fall. 4 credits. Prerequisites: multivariable calculus and linear algebra (e.g., MATH 2210–2220, 2230–2240, or 1920 and 2940).
A manifold is a type of subset of Euclidean space that has a well-defined tangent space at every point. Such a set is amenable to the methods of multivariable calculus. After a review of some relevant calculus, this course investigates manifolds and the structures that they are endowed with, such as tangent vectors, boundaries, orientations, and differential forms. The notion of a differential form encompasses such ideas as surface and volume forms, the work exerted by a force, the flow of a fluid, and the curvature of a surface, space, or hyperspace. The course re-examines the integral theorems of vector calculus (Green, Gauss, and Stokes) in the light of differential forms and apply them to problems in partial differential equations, topology, fluid mechanics, and electromagnetism.

MATH 3230 Introduction to Differential Equations (MQR)
Fall. 4 credits. Prerequisites: multivariable calculus and linear algebra (e.g., MATH 2210–2220, 2230–2240, or 1920 and 2940), or permission of instructor. Students may not receive credit for both MATH 3230 and MATH 4280.
Intended for students who want a brief one-semester introduction to the theory and techniques of both ordinary and partial differential equations. Topics for ordinary differential equations may include initial-value and two-point boundary value problems, the basic existence and uniqueness theorems, continuous dependence on data, stability of fix-points, numerical methods, special functions. Topics for partial differential equations may include the Poisson, heat and wave equations, boundary and initial-boundary value problems, maximum principles, continuous dependence on data, separation of variables, Fourier series, Green's functions, numerical methods, transform methods.

MATH 3240 Introduction to Number Theory (MQR)
Fall. 4 credits. Prerequisite: MATH 2210, 2230, 2310, or 2940.
An introductory course on number theory; the branch of algebra that studies the deeper properties of integers and their generalizations. Usually includes most of the following topics: the Euclidean algorithm, continued fractions, Pythagorean triples, Diophantine equations such as Pell's equation, congruences, quadratic reciprocity, binary quadratic forms, Gaussian integers, and factorization in quadratic number fields. May include a brief introduction to Fermat's Last Theorem.

MATH 3360 Applicable Algebra (MQR)
Spring. 4 credits. Prerequisite: MATH 2210, 2230, 2310, or 2940.
Introduction to the concepts and methods of abstract algebra and number theory that are of interest in applications. Covers the basic theory of groups, rings and fields and their applications to such areas as public-key cryptography, error-correcting codes, parallel computing, and experimental designs. Applications include the RSA cryptosystem and use of finite fields to construct error-correcting codes and Latin squares. Topics include elementary number theory, Euclidean algorithm, prime factorization, congruences, theorems of Fermat and Euler, elementary group theory, Chinese remainder theorem, factorization in the ring of polynomials, and classification of finite fields.

MATH 3560 Groups and Geometry (MQR)
Fall. 4 credits. Prerequisite: MATH 2210, 2230, 2310, or 2940. Prior knowledge of group theory is not a prerequisite.
A geometric introduction to the algebraic theory of groups, through the study of symmetries of planar patterns and 3-dimensional regular polyhedra. Besides studying these algebraic and geometric objects themselves, the course also provides an introduction to abstract mathematical thinking and mathematical proofs, serving as a bridge to the more advanced 4000-level courses. Abstract concepts covered include: axioms for groups; subgroups and quotient groups; isomorphisms and homomorphisms; conjugacy; group actions, orbits, and stabilizers. These are all illustrated concretely through the visual medium of geometry.

MATH 3620 Dynamic Models in Biology (also BIOEE 3620) (MQR)
Spring. 4 credits. Prerequisite: two majors-level biology courses and completion of math requirements for biological sciences major or equivalent. For description, see BIOEE 3620.

MATH 3840 Foundations of Mathematics (also PHIL 3300) (MQR)
Fall. 4 credits. For description, see PHIL 3300.

MATH 4010 Honors Seminar: Topics in Modern Mathematics (MQR)
Spring. 4 credits. Prerequisite: two mathematics courses numbered 3000 or higher or permission of instructor. Next offered 2011–2012. Participatory seminar aimed at introducing senior and junior mathematics majors to challenging problems and areas of modern mathematics. Helps students develop research and expository skills.

MATH 4030 History of Mathematics I (MQR)
Spring. 4 credits. Prerequisite: two mathematics courses above 3000, or permission of instructor. Next offered 2011–2012.
Survey of the development of mathematics from antiquity to present, with an emphasis on the achievements, problems, and mathematical viewpoints of each period and the evolution of basic concepts.

MATH 4130 Honors Introduction to Analysis I (MQR)
Fall, spring. 4 credits. Prerequisite: high level of performance in MATH 2210–2220, 2230–2240, 1920 and 2940 and familiarity with proofs. Students who do not intend to take MATH 4140 are encouraged to take MATH 4130 in the spring. Students may not receive credit for both MATH 3110 and MATH 4130 if either course is taken fall 2010 or later.
Introduction to the rigorous theory underlying calculus, covering the real number system and functions of one variable. Based entirely on proofs. The student is expected to know how to read and, to some extent, construct proofs before taking this course. Topics typically include construction of the real number system, properties of the real number system, continuous functions, differential and integral calculus of functions of one variable, sequences and series of functions.

MATH 4140 Honors Introduction to Analysis II (MQR)
Spring. 4 credits. Prerequisite: MATH 4130. Provides a base for further topics in analysis. Topics may include the Lebesgue measure and integration, functions of several variables, differential calculus, implicit function theorem, infinite dimensional normed and metric spaces, Fourier series, ordinary differential equations.

MATH 4180 Introduction to the Theory of Functions of One Complex Variable (MQR)
Spring. 4 credits. Prerequisite: MATH 2250–2240, 3110, or 4130 or permission of instructor. Students may not receive credit for both MATH 4180 and MATH 4220 if either course is taken fall 2010 or later.
Theoretical and rigorous introduction to complex variable theory. Topics include complex numbers, differential and integral calculus for functions of a complex variable including Cauchy's theorem and the calculus of residues, elements of conformal mapping. Students interested in the applications of complex analysis should consider MATH 4220.

MATH 4200 Differential Equations and Dynamical Systems (MQR)
Fall. 4 credits. Prerequisite: high level of performance in MATH 2210–2220, 2230–2240, 1920 and 2940, or permission of instructor.
Covers ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical methods. Emphasis is on differential equations as models and the implications of the theory for the behavior of the system being modeled and includes an introduction to bifurcations.

MATH 4220 Applied Complex Analysis (MQR)
Spring. 4 credits. Prerequisite: MATH 2210–2220, 2230–2240, 1920 and 2940, or 2310 and 2510. Undergraduates who plan to attend graduate school should take MATH 4180. Students may not receive credit for both MATH 4180 and MATH 4220 if either course is taken fall 2010 or later.
Covers complex variables, Fourier transforms, Laplace transforms and applications to partial differential equations. Additional topics may include an introduction to generalized functions.
MATH 4240 Wavelets and Fourier Series (MQR)
Spring. 4 credits. Prerequisite: MATH 2210–2220, 2250–2240, 1920 and 2940, or permission of instructor.
Both Fourier series and wavelets provide methods to represent or approximate general functions in terms of simple building blocks. Such representations have important consequences, both for pure mathematics and for applications. Fourier series use natural sinusoidal building blocks and may be used to help solve differential equations. Wavelets use artificial building blocks that have the advantage of localization in space. A full understanding of both topics requires a background involving Lebesgue integration theory and functional analysis. This course presents as much as possible on both topics without such formidable prerequisites. The emphasis is on clear statements of results and key ideas of proofs, working out examples, and applications. Related topics that may be included in the course: Fourier transforms, Heisenberg uncertainty principle, Shannon sampling theorem, and Poisson summation formula.

MATH 4250 Numerical Analysis and Differential Equations (also CS 4210) (MQR)
Fall. 4 credits. Prerequisites: MATH 2210 or 2940 or equivalent, one additional mathematics course numbered 3000 or above, and knowledge of programming. Introduction to the fundamentals of numerical analysis: error analysis, approximation, interpolation, numerical integration. In the second half of the course, the above are used to build approximate solvers for ordinary and partial differential equations. Strong emphasis is placed on understanding the advantages, disadvantages, and limits of applicability for all the covered techniques. Computer programming is required to test the theoretical concepts throughout the course. MATH 4250 (CS 4210) and MATH 4260 (CS 4220) provide a comprehensive introduction to numerical analysis; these classes can be taken independently from each other and in either order.

MATH 4260 Numerical Analysis: Linear and Nonlinear Problems (also CS 4220) (MQR)
Spring. 4 credits. Prerequisites: MATH 2210 or 2940 or equivalent, one additional mathematics course numbered 3000 or above, and knowledge of programming. Introduction to the fundamentals of numerical linear algebra: direct and iterative methods for linear systems, eigenvalue problems, singular value decomposition. In the second half of the course, the above are used to build iterative methods for nonlinear systems and for multivariate optimization. Strong emphasis is placed on understanding the advantages, disadvantages, and limits of applicability for all the covered techniques. Computer programming is required to test the theoretical concepts throughout the course. MATH 4250 (CS 4210) and MATH 4260 (CS 4220) provide a comprehensive introduction to numerical analysis; these classes can be taken independently from each other and in either order.

MATH 4280 Introduction to Partial Differential Equations (MQR)
Spring. 4 credits. Prerequisite: MATH 2210–2220, 2250–2240, or 1920 and 2940, or permission of instructor. Students may not receive credit for both MATH 3230 and MATH 4280.
Topics are selected from first-order quasilinear equations, classification of second-order equations, with emphasis on maximum principles, existence, uniqueness, stability, Fourier series methods, approximation methods.

MATH 4310 Linear Algebra (MQR)
Fall. 4 credits. Prerequisite: MATH 2210, 2220, 2310, or 2940. Undergraduates who plan to attend graduate school in mathematics should take MATH 4350–4340. Students may not receive credit for both MATH 4310 and MATH 4330.
Introduction to linear algebra, including the study of vector spaces, linear transformations, matrices, and systems of linear equations. Additional topics are quadratic forms and inner product spaces, canonical forms for various classes of matrices and linear transformations.

MATH 4320 Introduction to Algebra (MQR)
Spring. 4 credits. Prerequisite: MATH 3320, 3350, 4330, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take MATH 4350–4340. Students may not receive credit for both MATH 4320 and MATH 4340.
Introduction to various topics in abstract algebra, including groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated abelian groups. Optional topics are modules over Euclidean domains and Sylow theorems.

MATH 4330 Honors Linear Algebra (MQR)
Fall. 4 credits. Prerequisite: high level of performance in MATH 2210, 2220, 2310, or 2940. Students may not receive credit for both MATH 4310 and MATH 4330.
Honors version of a course in advanced linear algebra, which treats the subject from an abstract and axiomatic viewpoint. Topics include vector spaces, linear transformations, polynomials, diagonalization, symmetric matrices, and wedge products, canonical forms, inner product spaces, and bilinear forms. Emphasis is on understanding the theory of linear algebra; homework and exams include at least as many proofs as computational problems. For a less theoretical course that covers approximately the same subject matter, see MATH 4310.

MATH 4340 Honors Introduction to Algebra (MQR)
Spring. 4 credits. Prerequisite: MATH 4330 or permission of instructor. Students may not receive credit for both MATH 4320 and MATH 4340.
Honors version of a course in abstract algebra, which treats the subject from an abstract and axiomatic viewpoint, including universal mapping properties. Topics include groups, groups acting on sets, Sylow theorems; rings, factorization: Euclidean rings, principal ideal domains and unique factorization domains, the structure of finitely generated modules over a principal ideal domain, and Galois theory. The course emphasizes understanding the theory with proofs in both homework and exams. An optional computational component using the computer language GAP is available.

For a less theoretical course that covers similar subject matter, see MATH 4320.

MATH 4370 Computational Algebra (MQR)
Spring. 4 credits. Prerequisite: linear algebra (MATH 2940, or MATH 2210, or MATH 4310).
Introduction to Gröbner bases theory, which is the foundation of many algorithms in computational algebra. In this course, students learn how to compute a Gröbner basis for polynomials in many variables. Covers the following applications: solving systems of polynomial equations in many variables, solving diophantine equations in many variables, 3-colorable graphs, and integer programming. Such applications arise, for example, in computer science, engineering, economics, and physics.

MATH 4410 Introduction to Combinatorics I (MQR)
Fall. 4 credits. Prerequisite: MATH 2210, 2220, 2310, or 2940.
Combinatorics is the study of discrete structures that arise in a variety of areas, particularly in other areas of mathematics, computer science, and many areas of application. Central concerns are often to count objects having a particular property (e.g., trees) or to prove that certain structures exist (e.g., matchings of all vertices in a graph). The first semester of this sequence covers basic questions in graph theory, including extremal graph theory (how large must a graph be before one is guaranteed to have a certain subgraph) and Ramsey theory (which shows that large objects are forced to have structure). Variations on matching theory are discussed, including theorems of Dilworth, Hall, König, and Birkhoff, and an introduction to network flow theory. Methods of enumeration (inclusion/exclusion, Möbius inversion, and generating functions) are introduced and applied to the problems of counting permutations, partitions, and triangulations.

MATH 4420 Introduction to Combinatorics II (MQR)
Fall. 4 credits. Prerequisite: MATH 2210, 2220, 2310, or 2940.
Continues 4410, although formally independent. Latin squares, compositions, Young tableaux, majorization, Latin hypercubes, combinatorial designs, classical finite geometries and combinatorial geometries (matroids). Partially ordered sets, lattices, Möbius inversion. Polyhedral counting theory.)

MATH 4450 Matrix Groups (MQR)
Spring. 4 credits. Prerequisite: MATH 2210–2220, 2250–2240, or 1920 and 2940.
An introduction to Lie algebras (which are an extension of the notion of vector multiplication in three-dimensional space), the exponential mapping (a generalization of the exponential function of calculus), and representation theory (which deals with the different ways in which groups can be represented by matrices). Concrete examples will be emphasized. Background not included in the prerequisites will be developed as needed.
MATH 4510  Euclidean and Spherical Geometry (MQR)
Fall. 4 credits. Prerequisite: MATH 2210, 2250, 2310, or 2940, or permission of instructor.
Covers topics from Euclidean and spherical (non-Euclidean) geometry. Nonlecture, seminar-style course organized around student participation.

MATH 4520  Classical Geometries (MQR)
Spring. 4 credits. Prerequisite: MATH 2210, 2250, 2310, or 2940, or permission of instructor. Not offered 2011-2012. Introduction to hyperbolic and projective geometry—the classical geometries that developed as Euclidean geometry was better understood.

MATH 4530  Introduction to Topology (MQR)
Fall. 4 credits. Prerequisite: MATH 2210, 2250, 2310, or 2940, plus at least one mathematics course numbered 3000 or above, or permission of instructor. Topology may be described briefly as qualitative geometry. This course begins with basic point-set topology, including connectedness, compactness, and metric spaces. Later topics may include the classification of surfaces (such as the Klein bottle and Möbius band), elementary knot theory, or the fundamental group and covering spaces.

MATH 4540  Introduction to Differential Geometry (MQR)
Spring. 4 credits. Prerequisites: MATH 2210–2220, 2230–2240, or 2930–2940, plus at least one mathematics course numbered 3000 or above. MATH 4530 is not a prerequisite. Differential geometry involves using calculus to study geometric concepts such as curvature and geodesics. This introductory course focuses on the differential geometry of curves and surfaces. It may also touch upon the higher-dimensional generalizations, Riemannian manifolds, which underlie the study of general relativity.

MATH 4550  Applicable Geometry (MQR)
Spring. 4 credits. Prerequisite: good introduction to linear algebra (e.g., MATH 2210, 2250, 2310, or 2940) or permission of instructor. Does not assume students know the meaning of all words in the following description. Introduction to the theory of n-dimensional convex polytopes and polyhedra and some of its applications, with an in-depth treatment of the case of three dimensions. Discusses both combinatorial properties (such as face counts) as well as metric properties (such as rigidity). Covers theorems of Euler, Cauchy, and Steinitz, Voronoi diagrams and triangulations, convex hulls, cyclic polytopes, shellability and the upper-bound theorem. Relates these ideas to applications in tiling, linear inequalities and linear programming, structural rigidity, computer science, and philosophy. First course in mathematical logic providing precise definitions of the language of mathematics and the notion of proof (propositional and predicate logic). The completeness theorem says that we have all the rules of proof we could ever have. The Gödel incompleteness theorem says that they are not enough to decide all statements even about arithmetic. The Godel completeness theorem exploits the finiteness of proofs to show that theories have unintended (nonstandard) models. Possible additional topics: the mathematical definition of an algorithm and the existence of noncomputable functions; the basics of set theory to cardinality and the uncountability of the real numbers.

MATH 4710  Basic Probability (MQR)
Fall. 4 credits. Prerequisites: one year of calculus. Recommended: some knowledge of multivariate calculus. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 4710, ECON 3190, BTRY 4080. Introduction to probability theory, which prepares the student to take MATH 4720. The course begins with basics: combinatorial probability, mean and variance, independence, conditional probability, and Bayes formula. Density and distribution functions and their properties are introduced. The law of large numbers and the central limit theorem are stated and their implications for statistics are discussed.

MATH 4720  Statistics (MQR)
Spring. 4 credits. Prerequisites: MATH 4710 and knowledge of linear algebra (e.g., MATH 2210). Recommended: some knowledge of multivariable calculus. Due to an overlap in content, students will receive credit for only one course in the following group: MATH 4720, ECON 3190, BTRY 4080. Statistics have proved to be an important research tool in nearly all of the physical, biological, and social sciences. This course serves as an introduction to statistics for students who already have some background in calculus, linear algebra, and probability theory. Topics include parameter estimation, hypothesis testing, and linear regression. The course emphasizes both the mathematical theory of statistics and techniques for data analysis that are useful in solving scientific problems.

MATH 4740  Stochastic Processes (MQR)
Spring. 4 credits. Prerequisites: MATH 4710, BTRY 4080, ORIE 3600, or ECON 3190 and some knowledge of matrices (multiplication and inverses). A one-semester introduction to stochastic processes which develops the theory together with applications. The course will always cover Markov chains in discrete and continuous time and Poisson processes. Depending upon the interests of the instructor and the students, other topics may include queueing theory, martingales, Brownian motion, and option pricing. This course may be useful to graduate students in the biological sciences or other disciplines who encounter stochastic models in their work but who do not have the background for more advanced courses such as ORIE 6500.

MATH 4810  Mathematical Logic (also PHIL 4310) (MQR)
Fall. 4 credits. Prerequisites: MATH 2220 or 2250 and preferably some additional course involving proofs in mathematics, computer science, or philosophy. First course in mathematical logic providing precise definitions of the language of mathematics and the notion of proof (propositional and predicate logic). The completeness theorem says that we have all the rules of proof we could ever have. The Gödel incompleteness theorem says that they are not enough to decide all statements even about arithmetic. The Gödel completeness theorem exploits the finiteness of proofs to show that theories have unintended (nonstandard) models. Possible additional topics: the mathematical definition of an algorithm and the existence of noncomputable functions; the basics of set theory to cardinality and the uncountability of the real numbers.

MATH 4820  Topics in Logic (also PHIL 4311) (MQR)
Spring. 4 credits. For description, see PHIL 4311.

MATH 4860  Applied Logic (also CS 4860) (MQR)
Fall. 4 credits. Prerequisites: MATH 2210–2220, 2230–2240, or 1920 and 2940; CS 2800 or equivalent (e.g., MATH 3320, 3360, 4320, 4340, or 4810); and additional course in mathematics or theoretical computer science. Covers propositional and predicate logic; compactness and completeness by tableaux, natural deduction, and resolution. Other possible topics include equational logic; Herbrand Universes and unification; rewrite rules and equational logic, Knuth-Bendix method and the congruence-closure algorithm and lambda-calculus reduction strategies; topics in Prolog, LISP, ML, or Nuprl; and applications to expert systems and program verification.

MATH 4900  Supervised Reading and Research
Fall, spring. 1–6 credits. Supervised reading and research by arrangement with individual professors. Not for material currently available in regularly scheduled courses.

Professional-Level and Mathematics Education Courses
MATH 5080  Mathematics for Secondary School Teachers
Fall, spring. 3 credits. Meets two Saturdays per semester. Target audience: secondary mathematics teachers and others interested in issues related to teaching and learning secondary mathematics (e.g., mathematics pre-service teachers, mathematics undergraduate and graduate students, and mathematicians). Examines principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics, technology, and mathematics education research. One credit is awarded for attending three of the four Saturday workshops per year (dates are posted at www.math.cornell.edu/Community/community.html). Other credit options are available by permission of instructor for students completing additional work (e.g., independent study projects or presentations).

Graduate Courses
Many of our graduate courses are topics courses for which descriptions are not included here; however, during each pre-enrollment period a schedule of graduate courses to be offered the following semester is posted at www.math.cornell.edu under "Courses." This web site includes course descriptions that are often more detailed than those included here, as well as a means for interested students to participate in the process of scheduling meeting times.

MATH 6110  Real Analysis
Fall. 4 credits. MATH 6100–6120 are the core analysis courses in the mathematics graduate program. 6110 covers measure and integration and functional analysis.

MATH 6120  Complex Analysis
Spring. 4 credits. MATH 6100–6120 are the core analysis courses in the mathematics graduate program. 6120 covers complex analysis, Fourier analysis, and distribution theory.
MATH 6130-6140  Topics in Analysis  
6130, fall: 6140, spring. 4 credits each.  
Next offered 2011–2012]

MATH 6170  Dynamical Systems  
Fall. 4 credits. Generally offered every two years.  
Topics include existence and uniqueness theorems for ODEs, Poincaré-Bendixon theory and manifolds of nonhyperbolic systems; relations between entropy, exponents, and dimensions.

MATH 6180  Smooth Ergodic Theory  
Spring. 4 credits.  
Topics include invariant measures; entropy; Hasse–Dodge dimensions and related concepts; hyperbolic invariant sets: stable manifolds, Markov partitions and symbolic dynamics; ergodic measures of hyperbolic attractors; ergodic theorems; Pesin theory; stable manifolds of nonhyperbolic systems; Lusin’s exponents; and relations between entropy, exponents, and dimensions.

MATH 6190-6200  Partial Differential Equations  
6190, fall: 6200, spring. 4 credits each semester. Next offered 2011–2012.

MATH 6210  Measure Theory and Lebesgue Integration  
Fall. 4 credits.  
Covers basic theory of partial differential equations.

MATH 6220  Applied Functional Analysis  
Spring. 4 credits.  
Covers basic theory of Hilbert and Banach spaces and operations on them. Applications.

MATH 6280  Complex Dynamical Systems  
Fall. 4 credits. Prerequisite: MATH 4180.

[MATH 6310-6140  Topics in Analysis  
6130, fall: 6140, spring. 4 credits each.  
Next offered 2011–2012]

MATH 6320  Algebra  
Spring. 4 credits. Prerequisite: MATH 6310.  
MATH 6310–6320 are the core algebra courses in the mathematics graduate program. 6320 covers Galois theory; representation theory of finite groups; introduction to homological algebra. Familiarity with the material of a standard undergraduate course in abstract algebra will be assumed.

MATH 6330  Noncommutative Algebra  
Covers Wedderburn structure theorem, Brauer group, and group cohomology.

MATH 6340  Commutative Algebra  
Spring. 4 credits.  
Covers Dedekind domains, primary decomposition, Hilbert basis theorem, and local rings.

MATH 6490  Lie Algebras  
Fall. 4 credits.  
Topics include nilpotent, solvable and reductive Lie algebras; enveloping algebras; root systems; Coxeter groups; and classification of simple algebras.

MATH 6500  Lie Groups  
Topics include topological groups, Lie groups; relation between Lie groups and Lie algebras; exponential map; homogenous manifolds; and invariant differential operators.

[MATH 6510  Algebraic Topology  
Spring. 4 credits.  
One of the core topology courses in the mathematics graduate program. An introductory study of certain geometric processes for associating algebraic objects such as groups to topological spaces. The most important of these are homology groups and homotopy groups, especially the first homotopy group or fundamental group, with the related notion of covering spaces and group actions. The development of homology theory focuses on verification of the Hurewicz theorem and on effective methods of calculation such as simplicial and cellular homology and Mayer–Vietoris sequences. If time permits, the cohomology ring of a space may be introduced.

MATH 6520  Differentiable Manifolds I  
Fall. 4 credits. Prerequisites: advanced calculus, linear algebra (MATH 4310), point-set topology (MATH 4530).  
One of the core topology courses in the mathematics graduate program. Introduction to geometry and topology from a differentiable viewpoint, suitable for beginning graduate students. The objects of study are manifolds and differentiable maps. The collection of all tangent vectors to a manifold forms the tangent bundle, and a section of the tangent bundle is a vector field. Alternatively, vector fields can be viewed as first-order differential operators. Students study flows of vector fields and prove the Frobenius integrability theorem. In the presence of a Riemannian metric, the notions of parallel transport, curvature, and geodesics are developed. Students examine the tensor calculus and the exterior differential calculus and prove Stokes’ theorem. If time permits, de Rham cohomology, Morse theory, or other optional topics are introduced.

MATH 6530  Differentiable Manifolds II  
Spring. Prerequisite: MATH 6520 or equivalent. Next offered 2011–2012.  
Advanced topics from differential geometry and differential topology selected by instructor. Examples of eligible topics include transversality, cobordism, Morse theory, classification of vector bundles and principal bundles, characteristic classes, microlocal analysis, conformal geometry, geometric analysis and partial differential equations, and Atiyah-Singer index theorem.

MATH 6610  Geometric Topology  
Spring. 4 credits.  
Introduction to some of the more geometric aspects of topology and its connections with group theory. Possible topics include surface theory, 3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, and hyperbolic manifolds.

[MATH 6620  Riemannian Geometry  
This introductory course covers basic materials of Riemannian geometry, starting from connections and curvatures, ending with a discussion of the relations between topology and geometry of positive (or negative) curvature.

MATH 6710  Probability Theory I  
Fall. 4 credits. Prerequisite: knowledge of Lebesgue integration theory, at least on real line. (Students can learn this material by taking parts of MATH 4130–4140 or 6210.)

MATH 6720  Probability Theory II  
Spring. 4 credits. Prerequisite: MATH 6710.  
Conditional expectation, martingales, Brownian motion. Other topics such as Markov chains, ergodic theory, and stochastic calculus depending on time and interests of the instructor.

MATH 6740  Introduction to Mathematical Statistics  
Spring. 4 credits. Prerequisites: MATH 6710 (measure theoretic probability) and ORIE 6700, or permission of instructor.  
Topics include an introduction to the theory of point estimation, hypothesis testing and confidence intervals, consistency, efficiency, and the method of maximum likelihood. Basic concepts of decision theory are discussed; the key role of the sufficiency principle is highlighted and applications are given for finding Bayesian, minimax, and unbiased optimal decisions. Modern computer-intensive methods like the bootstrap receive some attention, as do simulation methods involving Markov chains. The parallel development of some concepts of machine learning is exemplified by classification algorithms. An optional section may include nonparametric curve estimation and elements of large sample asymptotics.
MATH 6810 Logic
Spring. 4 credits.
Covers basic topics in mathematical logic, including propositional and predicate calculus; formal number theory and recursive functions; completeness and incompleteness theorems, compactness and Skolem-Lowenheim theorems. Other topics as time permits.

MATH 7110–7120 Seminar in Analysis
7110, fall; 7120, spring. 4 credits.

[MATH 7130 Functional Analysis
Covers topological vector spaces, Banach and Hilbert spaces, and Banach algebras. Additional topics selected by instructor.]

MATH 7150 Fourier Analysis
Spring. 4 credits.

[MATH 7170 Applied Dynamical Systems (also TAM 7760)
Applied topics in dynamical systems theory: bifurcations, normal forms, complex invariant sets, numerical methods, multiple time scale systems, symmetric systems, biological and physical examples.]

MATH 7290 Seminar on Scientific Computing and Numerics (also CS 7290)
Fall, spring. 1 credit.
For description, see CS 7290.

MATH 7310–7320 Seminar in Algebra
7310, fall; 7320, spring. 4 credits each semester.

MATH 7350 Topics in Algebra
Fall. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 7370 Algebraic Number Theory
Fall. 4 credits.

MATH 7390 Topics in Algebra
Fall, spring. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Content varies.

MATH 7400 Homological Algebra
Spring. 4 credits.

MATH 7510–7520 Berstein Seminar in Topology
7510, fall; 7520, spring. 4 credits each semester.

[MATH 7530 Algebraic Topology II
Fall. 4 credits. Next offered 2011–2012.
Continuation of 7510. The standard topics most years are cohomology, cup products, Poincaré duality, and homotopy groups. Other possible topics include fiber bundles, fibrations, vector bundles, and characteristic classes. May sometimes be taught from a differential forms viewpoint.]

MATH 7550–7560 Topology and Geometric Group Theory Seminar
7550, fall; 7560, spring. 4 credits each semester.

MATH 7570–7580 Topics in Topology
7570, fall; 7580, spring. 4 credits each semester.
Selection of advanced topics from modern algebraic, differential, and geometric topology. Content varies.

MATH 7610–7620 Seminar in Geometry
7610, fall; 7620, spring. 4 credits each semester.

MATH 7670 Algebraic Geometry
Spring. 4 credits.

MATH 7710–7720 Seminar in Probability and Statistics
7710, fall; 7720, spring. 4 credits each semester.

[MATH 7740 Statistical Learning Theory
Fall. 4 credits. Prerequisites: basic mathematical statistics (MATH 6740 or equivalent) and measure theoretic probability (MATH 6710). Next offered 2011–2012.
The course aims to present the developing interface between machine learning theory and statistics. Topics are classification and pattern recognition, support vector machines, neural networks, tree methods, and boosting.]

MATH 7750 Statistical Theories Applicable to Genomics
Fall. 4 credits.
Focuses on statistical concepts useful in genomics (e.g., microarray data analysis) that involve a large number of populations. Topics include multiple testing and closed testing (the cornerstone of multiple testing), family-wise error rate, false discovery rate (FDR) of Benjamini and Hochberg, and Storey’s papers relating to pFDR. Also discusses the shrinkage technique or the Empirical Bayes approach, equivalent to the BLUP in a random effect model, which is a powerful technique, taking advantage of a large number of populations. A related technique, which allows use of the same data to select and make inferences for the selected populations (or genes), is discussed. If time permits, there may be some lectures about permutation tests, bootstrapping, and QTL identification.

MATH 7770–7780 Stochastic Processes
7770, fall; 7780, spring. 4 credits each semester. 7780 next offered 2011–2012.

MATH 7810–7820 Seminar in Logic
7810, fall; 7820, spring. 4 credits each semester.

[MATH 7830 Model Theory
Introduction to model theory at the level of the books by Hodges or Chang and Keisler.]

MATH 7840 Recursion Theory
Fall. 4 credits.
Covers theory of effectively computable functions; classification of recursively enumerable sets; degrees of recursive unsolvability; applications to logic; hierarchies; recursive functions of ordinals and higher type objects; generalized recursion theory.

MATH 7870 Set Theory
Spring. 4 credits.
First course in axiomatic set theory at the level of the book by Kunen.

[MATH 7880 Topics in Applied Logic
Fall. 4 credits. Next offered 2011–2012.
Applications of mathematical logic. Recent topics: automata theory, automatic structures, automatic theorem proving, formal semantics of programming and specification languages, linear logic, constructivism/intuitionism, nonstandard analysis.]

MATH 7900 Supervised Reading and Research
Fall, spring. 1–6 credits.

MEDIEVAL STUDIES

Undergraduate Study in Medieval Studies
Undergraduate students may pursue an undergraduate minor in medieval studies, for which they must complete five courses at the 2000 level or above in at least two different disciplines, of which up to two may also count toward their major. Students should seek out an advisor, and may wish to consult with the director. Those completing a minor will receive a notification on their transcripts and a certificate signed by the director and the dean of the college; students who are completing undergraduate minors are currently eligible for the Miller Scholarship offered by the Telluride Association, funding a year at the Central European University in Budapest, Hungary.

Students derive many other benefits from pursuing such a minor, as they do from taking courses in medieval cultures, languages, and literature generally. The Medieval Studies Program houses a lively undergraduate association, Quodlibet, which arranges frequent lectures on medieval topics and an annual celebratory reading of prose and poetry in many medieval languages. Cornell’s students and scholars pursuing varied interests in these many realms constitute a strong and supportive community. Course work in medieval studies enhances the student’s enjoyment and understanding of the artistic and material relics of the Middle Ages: Gregorian chant, illuminated manuscripts and stained glass windows, Gothic cathedrals, Crusader castles, and picturesque towns cramped within ancient walls. The student will discover the serious realities involved in, and shaped by, Arthurian tales of knights and ladies, dungeons, dragons, and other marvels. Students can analyze and appreciate the horrors of the Black Death, triumphs in courtly love and pitched battle, swords and scimitars, caliphs and popes, face of demons and djinns, and angels. The period saw many of the foundational choices that have, for good and ill, made the world what it is today. Many of our current challenges in the fields of law, human rights, attitudes toward power, authority, gender relations, and sexual mores.
derive from the ways in which these and other questions were formulated a millennium ago. Many of the courses listed by the Medieval Studies Program pertain specifically to these fields, as well as to the interdisciplinary combinations for which the program is noted.

Medieval Languages
Medieval texts (like all others) become most lively and informative when read in the original, and Cornell fortunately offers many courses for students interested in acquiring the relevant skills: Medieval Latin, Old English, Middle English, Gothic, Old Saxon, Old High German, Middle High German, Old Norse-Icelandic, Old Irish, Middle Welsh, Old Occitan (Provençal), Old French, Medieval Spanish, Medieval Italian, Old Russian, Old Church Slavonic, Classical Arabic, Medieval Hebrew, Classical Chinese, and Classical Japanese.

Some medieval languages require study of a modern language (e.g., French for Old Occitan and Old French) or a classical language (Classical Latin for Medieval Latin) as background. Students interested in an undergraduate minor in medieval studies should begin the study of a medieval language as early as possible, so that they may be able to study texts in the original before they graduate. Students are advised to consult the sponsoring departments for information about the prerequisites for various medieval languages.

Graduate Study
The Medieval Studies Program offers both an interdisciplinary and a literary comparative Ph.D. in medieval studies. Disciplinary fields of concentration offered within the Field of medieval studies are medieval archaeology, medieval history, medieval history of art, medieval literature, medieval music, medieval philology and linguistics, and medieval philosophy. Information about the graduate program in medieval studies is available from the field coordinator (medievalst@cornell.edu), and at Cormicopia, the program's web site (www.arts.cornell.edu/medieval).

Medieval Studies Courses: Graduate and Undergraduate
Courses in various aspects of medieval studies are offered every year in several cooperating departments, including Art History, Asian Studies, Classics, Comparative Literature, English, German Studies, History, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature, and by the Society for the Humanities. For Romance Studies, Russian Literature, and by English, German Studies, History, Linguistics, Classics, Comparative Literature, departments, including Art History, Asian are offered every year in several cooperating courses in various aspects of medieval studies:

**CLASS 3603 Medieval to Renaissance in Greek Literature (also COML 3825, NES 3705)**
Fall. 4 credits. K. Yavias.

**CLASS 3750 Introduction to Dendrochronology (also ARTH 3250, ARKEO 3090, 5090)**
Fall. 4 credits. S. Manning.

**CLASS 7742 Research Methods in Archaeology (also ARTH 6252, ARKEO 7742)**
Spring. 4 credits. S. Manning.

**ENGL 2100 Medieval Romance: Voyage to the Otherworld**
Spring. 4 credits. T. Hill.

**ENGL 2740 Scottish Literature and Culture**
Fall. 5-4 credits. T. Hill and H. Shaw.

**ENGL 3110/6110 Old English**
Fall. 4 credits. T. Hill.

**ENGL 3120/6120 Beowulf**
Spring. 4 credits. S. Zacher.

**ENGL 3190 Chaucer**
Spring. 4 credits. M. Raskolnikov.

**ENGL 4500 History of the Book**
Fall. 4 credits. K. Reagan.

**ENGL 6150 Piers Plowman and the Works of the Pearl-pot**
Fall. 4 credits. M. Raskolnikov.

**FREN 4420 Sex in French (also FGSS 4320)**
Fall. 4 credits. C. Howie.

**FREN 6770 Four Literary Theologians**
Spring. 4 credits. C. Howie.

**HIST 1900 East Asia to 1800 (also ASIAN 1900)**
Spring. 4 credits. T. J. Hinrichs.

**HIST 2470 The Age of Charlemagne**
Fall. 4 credits. P. Hyams.

**HIST 3500 The Italian Renaissance (also ITAL 3500)**
Fall. 4 credits. J. Najemy.

**HIST 3680 Marriage and Sexuality in Medieval Europe (also FGSS/RELS 3680)**
Fall. 4 credits. P. Hyams.

**HIST 4680 The Family in Renaissance Italy (also ITAL 4680)**
Fall. 4 credits. J. Najemy.

**HIST 4931/6931 Vitality and Power in China (also ASIAN/CAPS/BSOC 4931)**
Spring. 4 credits. T. J. Hinrichs.

**ITAL 4450/6450 Boccaccio**
Fall. 4 credits. M. Migiel.

**LING 2217 History of the English Language to 1300 (also ENGL 2170)**
Fall. 4 credits. W. Harbert.

**LING 2218 History of the English Language since 1300 (also ENGL 2180)**
Spring. 4 credits. W. Harbert.

**LING 2238 Introduction to Welsh**
Fall. 5 credits. W. Harbert.

**LING 3315–3316 Old Norse I and II**
3515, fall; 3316, spring. 4 credits each semester. Staff.

**LING 6623–6624 Old Irish I and II**
6623, fall; 6624, spring. 4 credits each semester. M. Weiss.

**LING 6662 Old Russian Texts (also RUSSA 6602)**
Spring. 4 credits. W. Browne.

**LING 6663 Old Church Slavonic (also RUSSA 6601)**
Fall. 4 credits. W. Browne.

**MEDVL 2130 Cultures of the Middle Ages (also HIST 2142) (HA-AS)**
Spring. 4 credits. F. Hyams.

This course introduces intriguing and important samples of literature, and other writings—some of them very nonliterary—created before 1500 in terms of the cultures in which each was written. Authors, works, and genres vary with individual instructors but may include poetry and history writing, epic and drama, originally in Latin, French, Old English, Medieval English, and Italian, along with secondary reading to help students explore the texts and the world that produced them. No previous knowledge of this material is required, but regular writing, and some forms of research, are. This year's course (Spring 2011) will focus on Feudalism, a simple model of what today's democracies are not, and Magna Carta, 1215, one of the foundations of our Western freedoms.

**[MEDVL 4103/6103 Survey of Medieval Latin Literature (also LATIN 4213/7213) (LA-AS)]**
Fall. 4 credits. Next offered 2012–2013. This survey is designed to introduce students to characteristic genres and discourses of Medieval Latin.

**[MEDVL 4201/6201 Topics in Medieval Latin Literature (also LATIN 4223/7223) (LA-AS)]**

**MEDVL 6102 Latin Paleography (also LATIN 7222)**
Fall. 4 credits. Staff.

This course will engage several facets of the complex and fascinating history of Western writing and handwritten texts. We will, in part, follow a chronological survey of different scripts from antiquity through to the age of the printing press. Students will learn to recognize, to localize, and to date different script-types, and they will become familiar with conventions of detailed codicological description. But our interests are deeper than technical description alone. We will explore the cultural and social environments in which texts were written and copied. And we will examine other larger issues, such as the transmission and editing of texts and how the material composition of texts informs interpretations and meanings. Further, we will consider the history of writing and reading in the context of the ongoing digital revolution: What do past textual forms, such as we will be studying in detail, tell us about modern digital media? What light can modern media shed on historical texts? What is the future of texts, writing, and reading?

**MEDVL 7777 Medieval Studies Proseminar**
Fall. 2 credits. Staff.

This course is designed to introduce graduate students to some of the bibliography and approaches available for studying the Middle Ages.
MUSIC
Office: 255-4097
Web site: www.music.cornell.edu

**Musical Performance and Concerts**
Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music-making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

- **Vocal ensembles**
  - Chamber Singers
  - Chorale
  - Chorus
  - Glee Club
  - World Music Choir

- **Instrumental ensembles**
  - Chamber Music Ensembles
  - Chamber Orchestra
  - Symphony Orchestra
  - Jazz Ensembles
  - Jazz Combos
  - Chamber Winds
  - Wind Ensemble
  - Wind Symphony
  - Gamelan Ensemble
  - Middle Eastern Music Ensemble
  - World Drum and Dance Ensemble
  - Steel Band
  - Percussion Ensemble

Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall semester and, where appropriate, each spring semester as well.

The university is also home to many student-run musical organizations not affiliated with the Department of Music, including the Big Red Marching Band and Big Red Pep Band, and several a cappella groups. Information is available directly from each group.

The Department of Music and the Faculty Committee on Music sponsor more than 100 formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artists. The great majority of these concerts are free and open to the public. Lectures and concerts are listed at www.music.cornell.edu. Additional information is available through the events office (255-4760).

**Nonmajors**
In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information consult Professor X. Bjerken, director of undergraduate studies (255-3425), or the department office, 101 Lincoln Hall (255-4097).

**The Minor**
For those non-majors across the university whose involvement with the music department forms an essential aspect of their undergraduate study, the undergraduate minor in Music gives both formal recognition and structural coherence to their musical studies. The Music minor is designed to provide for breadth by requiring involvement in each of the three principal subdisciplines (music theory, music history, and musical performance), while at the same time permitting enough flexibility that each student can emphasize the area or areas that interest him or her most.

The following courses are required to fulfill the undergraduate minor in Music:

1. One course in music theory: MUSIC 1101 (3 credits), 1105 (3 credits), or 2101/2103 (3 credits).
2. One course in music history and culture, drawn from courses listed in Courses of Study as Music in History and Culture (3 credits) and those listed as Music History Courses for Majors and Qualified Non-Majors (3–4 credits).
3. Four credits in performance, drawn from those courses listed as Musical Instruction (i.e., private lessons in voice or another instrument), or Musical Organizations and Ensembles, or both. Since these are 1- and 2-credit courses, students may achieve their total of 4 credits in various ways: two semesters of 2-credit lessons, four semesters of 1-credit ensembles, or a combination of the two.
4. In addition to these 10–13 credits, an additional 8 credits of elective courses from any Music subdiscipline, including Electroacoustic Music, of which at least 3 credits must be in a classroom (not performance) course.

**The Major**
The major carries the study of music to an advanced level through the integration of performance, music theory, and music history. It is designed to accommodate both students who are oriented toward eventual graduate or professional work in music and those who wish to take a more general approach, often in conjunction with a major in another department.

Students contemplating a major in music should arrange for placement examinations and advising in the department as early as possible, preferably during the freshman orientation period. Information is available from the director of undergraduate studies. Prerequisites for admission to the major are completion of MUSIC 2102 and 2104, preferably by the end of the freshman year, with an overall grade of B– or better in each course. In consultation with the director of
undergraduate studies, students are expected to have chosen an advisor from among the department faculty before acceptance into the major; admission to the major is decided by the faculty as a whole. Students majoring in music then design their course of study with their advisor.

Music majors must complete the Core Curriculum plus at least two electives. The electives allow students to focus in specific areas, such as composition, performance, jazz studies, vernacular music, Western art music, or Asian music. Students may, however, choose electives that reflect a more broadly based study. Those intending to pursue graduate study or professional work in music are advised to take further courses in addition to the two required electives.

The Core Curriculum consists of courses:

1. in music theory: MUSIC 3101, 3102, 3103, 3104
2. in music history: MUSIC 3201, 3202, 3211, 4211
3. in performance: four semesters of participation in a musical organization or ensemble sponsored by the department of music (MUSIC 3602 through 3634 and 4601 through 4651)

Electives: at least 8 credits from the following:

1. in music theory: courses among the theory listings above 3104
2. in music history: MUSIC 3222 through 3901, or 4301 and above.
3. in performance: MUSIC 3502 or 4501

Honors. The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. In their senior year, candidates enroll in MUSIC 4911–4912 with the chair of the honors committee as instructor. Candidates are encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities. A dissertation in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. An oral examination on the honors project will be administered by the candidate's committee not later than April 20. The level of honors conferred is based primarily on the candidate's performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

Computing in the Arts Undergraduate Minor

A minor in Computing in the Arts with an emphasis on music is available both to music majors and to students majoring in other subjects. For more information, please consult www.cs.cornell.edu/ComputingArts, or contact the director, Professor Graeme Bailey.

Distribution Requirement

College of Arts and Sciences students may apply either one or two music department courses toward the distribution requirement in Literature and the Arts (LA) or Cultural Analysis (CA), as noted. Neither first-year seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least 5 credits, and it may not be in musical performance (MUSIC 3501, 3502, or 4501) or in organizations and ensembles (MUSIC 3601 through 3654 and 4601 through 4651). Any two of the 2-credit courses MUSIC 3112, 3113, 3114 count as one course for this purpose.

If two music courses are counted for distribution in LA, they must total at least 6 credits, and at least one of the courses must be academic (as described in the preceding paragraph), not performance-oriented. The second “course,” however, may comprise either up to 4 credits earned in performance (MUSIC 3501, 3502, or 4501) or up to 4 credits earned in organizations and ensembles (MUSIC 3602 through 3654 and 4601 through 4651), but not both.

Facilities

Music Library. The Sidney Cox Library of Music and Dance in Lincoln Hall has an excellent collection containing periodicals, books, scores, parts, sound and video recordings, microforms, rare materials, and electronic resources. Its depth and breadth serve the needs of a wide variety of users on the campus and its listening and video viewing facilities are open to all members of the Cornell community.

Concert Halls. The Department of Music sponsors more than 100 concerts annually. Cornell’s principal concert halls are Bailey Hall Auditorium (about 1,400 seats), Sage Chapel (about 800), and Barnes Hall Auditorium (about 280).

Rehearsal Spaces and Practice Rooms.

Departmental ensembles rehearse primarily in Lincoln Hall, Barnes Hall, and Sage Chapel. Twenty-six studios in Lincoln Hall are available for individual practice by pianists, vocalists, and instrumentalists who are members of the Cornell community. Of these, seven have grand pianos, six have upright pianos, and two have percussion instruments.

For information about access to the practice rooms, see www.music.cornell.edu/performance-space-rooms or contact the department office.

Instruments. Six concert grand pianos are available for performances in the various concert halls, plus several historical keyboard instruments, including fortepianos, harpsichords, and clavichords. Four distinctive organs are available to qualified individuals for lessons and practice. In addition, the music department owns a limited number of string, wind, and percussion instruments that may be rented by members of the department's ensembles.

Cornell Electroacoustic Music Center (CEMC). The Cornell Electroacoustic Music Center comprises four project studios, a 14-workstation teaching lab in the Music Library, and a primary multichannel studio. Several live performance and recording rigs are also available, from hand-held to solid state. A combination of commercial and open-source software solutions service an array of student and faculty interests, including sound manipulation and sound spatialization, live performance, multimedia, intelligent music systems (adaptive and algorithmic), music notation, sound art and experimentation, and high-resolution recording. The center operates its own web server with space for web hosting, data backup, and remote login. CEMC's facilities are state-of-the-art and can accommodate almost any creative inclination.

Courses

Music Theory

Students contemplating the music major are strongly advised to take MUSIC 2101, 2102, 2103, and 2104 in the freshman year; in any case MUSIC 2102 and 2104 must be completed no later than the end of the sophomore year.

MUSIC 1100 Elements of Musical Notation

Fall or spring, weeks 2–5. 1 credit. Corequisite: any 3-credit music course and permission of instructor. Staff.

This four-week course, given at the beginning of each semester, fulfills the requirement of basic pitch, rhythm, and score-reading skills needed for some introductory courses and 2000-level courses with prerequisites.

MUSIC 1101 Fundamentals of Music (LA-AS)

Spring. 3 credits. No previous training in music required. M. Hatch.

An introduction to the theory of music from around the world: the structures of melody and rhythm (pulse, meter, scales, modes, texture, timbre, harmony, form) and the influences of audiences, music technologies (including instruments), reasons, and contexts for music making on instrumental and vocal music from classical, folk, traditional, and popular music of Asia, Africa, Europe, and the Americas. Extensive listening and video examples.

MUSIC 1105 Introduction to Music Theory (LA-AS)

Fall. 3 credits. Recommended: experience in reading music; students may take MUSIC 1100 concurrently. J. Webster.

An elementary, self-contained introduction to the theory of Western tonal music: Fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads; basic concepts of tonality and form; analysis of representative works. Coverage primarily of "classical" (concert) music, with some attention to popular music and jazz.

MUSIC 1466 Physics of Musical Sound (also PHYS 1204) (PBS)

Spring. 3 credits. K. Selby.

For description, see PHYS 1204.

MUSIC 2101 Tonal Theory I (LA-AS)

Fall. 3 credits. Prerequisites: admission by departmental diagnostic exam and concurrent enrollment in or previous credit for MUSIC 2103, or equivalent. Intended for students expecting to major in music and other qualified students. D. Yearsley.

Detailed study of the fundamental elements of modal and tonal music: rhythm, scales, intervals, triads; melodic principles and two-part counterpoint; diatonic harmony and four-part voice leading; basic formal structures. Study engages different repertories, including Western art music as well as non-Western and popular traditions.
Sight singing: melodies in four clefs, including chromatic modulation; analysis of binary and ternary forms as well as jazz, blues, and pop phrase models.

MUSIC 2103 Musicianship I

MUSIC 2104 Musicianship II
Spring. 2 credits. Pre- or corequisite: MUSIC 2102. Intended for students expecting to major in music and other qualified students. A grade of B– or better in MUSIC 2104, and failure in no individual musicianship components of the course, are required for admission to the music major. R. Sierra. Sight singing: longer melodies in three clefs, including diatonic modulation. Keyboard: diatonic chord progressions and sequences. Dictation: intervals, rhythms; longer melodies; chorale phrases with diatonic modulation. Score reading: three parts using treble, alto, and bass clefs. Transcriptions of pop, jazz, and other genres.

MUSIC 3101 Tonal Theory III (LA-AS)
Fall. 3 credits. Prerequisites: MUSIC 2102 and 2103 or equivalent. Corequisite: MUSIC 3103 or D. Yeansley. Continuation of diatonic and introduction to chromatic harmony; species counterpoint; composition in small forms.

MUSIC 3102 Tonal Theory IV (LA-AS)
Spring. 3 credits. Prerequisites: MUSIC 3101 and 3103 or equivalent. Corequisite: MUSIC 3104. Staff. Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

MUSIC 3103 Musicianship III

MUSIC 3104 Musicianship IV
Spring. 2 credits. Pre- or corequisite: MUSIC 3102. Staff. Sight singing: melodies in four clefs, including modality and chromatic modulation. Keyboard: chromatic sequences, chromatic modulations, improvised modulations employing diatonic pivot chords. Dictation: intervals, rhythms, short melodies, and short, diatonic choral phrases. Score reading: four parts, including transposing instruments. Musical terms: other terms in French, German, and Italian.

MUSIC 3112 Jazz Improvisation II
Fall. 3 credits. Prerequisite: MUSIC 3111. P. Merrill. Continuation of jazz theory, technique, and applied skills.

MUSIC 3113 Jazz Improvisation III
Spring. 3 credits. Prerequisite: MUSIC 3112. Next offered 2012–2013. P. Merrill. Class work and assignments emphasize Coltrane and post-Coltrane harmony, advanced rhythmic development, augmented vocabulary, and an introduction to playing “free.”

MUSIC 4101 Counterpoint # (LA-AS)
Spring. 4 credits. Prerequisite: MUSIC 2101 or permission of instructor. Next offered 2011–2012. S. Stucky.

MUSIC 4102 Topics in Music Analysis (also MUSIC 7102) (LA-AS)

MUSIC 4121 Conducting (LA-AS)
Fall. 4 credits. Prerequisite: MUSIC 3101 or equivalent. Next offered 2011–2012. C. Johnston Turner. Covers fundamentals of score reading, score analysis, rehearsal procedures, and conducting technique; instrumental and choral contexts.

Music in History and Culture

MUSIC 1201 Hildegard to Handel # (LA-AS)
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 1100. Next offered 2011–2012. R. Harris-Warrick.

MUSIC 1202 Monteverdi to Minimalism # (LA-AS)
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 1100 or successful completion of another college-level music course: N. Zaslav. A synoptic romp through the history of Western art music from the late Renaissance to the day before yesterday. Works emphasized: Monteverdi’s Orfeo (1607), Handel’s Messiah (1742), Mozart’s Don Giovanni (1787), Beethoven’s Ninth Symphony (1824), Berlioz’s Symphonie fantastique (1830), Wagner’s Das Rheingold (1876), Stravinsky’s Rite of Spring (1913), Bartók’s Concerto for Orchestra (1943), the sinfonias of Roberto Sierra, and new works commissioned by and for the class.

MUSIC 1301 Introduction to World Music I: Africa and the Americas (also LSP 1301) (LA-AS)
Spring. 3 credits. No previous training in music required. S. Pond.

This course centers on folk, popular, and traditional musical genres of the Western Hemisphere, particularly the African diaspora. It examines both the elements of musical styles and the features of society that influence music. Listening and writing assignments are major components of the course.

MUSIC 1302 Introduction to World Music II: Asia (also ASIAN 1192) (CA-AS)

An exploration of folk, popular, and traditional musical genres from South, Southeast, and East Asia.

MUSIC 1311 Popular Music in America: A Historical Survey (also AMST 1311) (LA-AS)

This is a general introductory course addressing the broad range of styles described as popular music, as it has developed in the United States.

MUSIC 1312 History of Rock Music (also AMST 1312) (LA-AS)
Spring. 3 credits. No previous training in music required. J. Peraino.

This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to alternative rock and hip hop. The course concludes with the year 2000.

MUSIC 1313 A Survey of Jazz (also AMST 1313) (LA-AS)
Fall. 3 credits. No previous training in music required. S. Pond.

This course addresses jazz from two perspectives: the various sounds of jazz, as well as the historical streams—musical and cultural—that have contributed to its development. Listening and writing assignments are major components of the course.

MUSIC 1341 Gamelan in Indonesian History and Cultures (also ASIAN 2245, VISST 2245) (LA-AS)
Fall or spring. 3 credits. Prerequisite: permission of instructor. No previous knowledge of musical notation or performance experience necessary. C. Miller.

An introduction to Indonesia through its art. Elementary techniques of performance on the Indonesian gamelan; a general introduction to Indonesian history and cultures, and the sociocultural contexts for the arts there.
The music of, and the social structures supporting, large instrumental ensembles in the Western world from the 16th century to the present.

**MUSIC 2245** Choral Music
Spring, 3 credits. Prerequisite: ability to read music or permission of instructor. R. Harris-Warrick.
This course takes a thematic approach to studying a cross-section of works composed for group singing over several centuries and cultures: sacred music; folk traditions; amateur music-making; and music as a marker of social identity. Repertoire for the course will be integrated with local concert offerings and student-generated topics will be included in the curriculum.

**MUSIC 2303** Music and Human Life
Spring, 3 credits. E. Bates.
An introduction to the study of music in cross-cultural perspective, through an exploration of three themes: the perception and cognition of music; the construction and contestation of nationalism, race, ethnicity, and folklore; and the effect of paradigm shifts in musical and non-musical technologies on music, musical instruments and society. Through this course, students will develop skills in doing ethnographic writing about music and culture.

**MUSIC 3303** Discovering Hip-Hop: Research and the Cornell Hip-Hop Collection (also AMST 3303) (CA-AS)
Spring, 3 credits. Limited to 15 students. Prerequisite: permission of instructor. S. Pond.
The course addresses research issues and methodologies through the lens of Cornell’s Hip-Hop Collection, a gift of collector and author Johan Kugelberg, which is housed in Cornell Library’s Division of Rare and Manuscript Collections. The collection features a significant archive on the history of hip-hop and rap music, documenting its emergence in the Bronx in the 1970s and early 1980s. It includes sound recordings, a key photographic archive, text-based works, magazines, and more than five hundred original flyers. The course provides opportunities to gain new insights into hip-hop culture, while also introducing them to research and curatorial methodologies and goals.

**MUSIC 3305** Music of Egypt and Turkey
Spring, 4 credits. E. Bates.
In this seminar we begin with the contemporary music cultures of Egypt and Turkey as our point of departure. The course has units on music fundamentals (systems of melody, meter, and musical form); popular music genres and their relation to folkloric and secular music; the construction and contestation of music; the effect of paradigm shifts in musical and non-musical technologies on music, musical instruments and society. Through this course, students will develop skills in doing ethnographic writing about music and culture.

**MUSIC 3513** Music and Choreography (also DANCE 3530) (LA-AS)
Fall, 3 credits. Attendance at dance concerts and music concerts required. A. Fugelsanger.
For description, see DANCE 3530.

**MUSIC 4125** Musical Avant-Gardes (also SHUM 4843)
Fall, 4 credits. Limited to 15 students. A. McGraw.
For description, see SHUM 4843.
For description, see PSYCH 4180.

UNCANNY, GOTHIC, AND GROTESQUE

1800. Topics include theory of Fantastic, musical, literary, and visual culture around historical changes in the performance of traditional music-historical periods of Western performance of music from each of the historical performance practices. An exploration of the monstrous and fantastical in popular writing. Intended for music majors and qualified non-majors.

MUSIC 3901 Supplemental Study in Music History
Fall or spring. 1 credit. Prerequisite: MUSIC 2101 or permission of instructor. Corequisite: enrollment in an approved 1000- or 2000-level 3-credit music history course. Staff. Intended primarily for music majors, this option allows students enrolled in an approved 1000- or 2000-level 3-credit music history course to study the material at a more advanced level through supplementary reading, discussion, and writing, by arrangement with the professor. Advanced study of various topics in music history. Students enrolling in MUSIC 3901 also register for an approved 2000-level music history course and pursue independent research and writing projects.

MUSIC 4181 Psychology of Music (also PSYCH 4180/6180) (KCM-AS)
Fall. 3 or 4 credits, depending on whether student elects to do an independent project. Next offered 2011–2012. C. L. Krumhansl. For description, see PSYCH 4180.

MUSIC 4211 Senior Seminar
Fall. 4 credits. Prerequisite: MUSIC 3211. Next offered 2011–2012. N. Zaslaw. The possibilities and limitations of the study of historical performance practices. An investigation of one controversial aspect of the performance of music from each of the traditional music-historical periods of Western music, finishing with a comparative study of historical changes in the performance of Indonesian gamelan music.

MUSIC 4222 Music and Monstrous Imaginings # (LA-AS)
Spring. 4 credits. Prerequisite: ability to follow a musical score. Next offered 2012–2013. A. Richards. Explores the monstrous and fantastical in musical, literary, and visual culture around 1800. Topics include theory of Fantastic, Uncanny, Gothic, and Grotesque.

MUSIC 4231 Music and Queer Identity (CA-AS)

MUSIC 4232 Women and Music (also FGSS 4233) (CA-AS)
Spring. 4 credits. J. Peraino. This course examines music as a discourse of gender, with a particular focus on women’s participation in Western European and American musical traditions (including classical and popular music). Topics include women as composers and performers, as muses and Sirens, as metaphor, and as theoretical construct. This class will also survey feminist musicology.

MUSIC 4244 The Organ in Western Culture # (LA-AS)
Fall. 4 credits. Prerequisite: permission of instructor. A. Richards and D. Yarnsley. This course surveys the history of the organ from antiquity until the present. A technological and architectural marvel, the organ has the oldest and broadest repertoire of any Western instrument. Among the topics crucial to the organ’s history are its use and status in the Christian church; the development of keyboards, pedals, stops, and various forms of pipes; the disparate national traditions in playing and building; and its unique modes of performance with all four limbs. Our reading, listening, and discussions will range from the earliest repertoire of the 14th century, through the epoch-making works of J. S. Bach, to contemporary developments. The course will include not only an in-depth examination of music and literature for and about the instrument, but will also involve work with the reconstruction now nearing completion in Arabel Taylor Chapel of the famed organ from 1708 in Berlin’s Charlottenburg Castle Church.

MUSIC 4301 Introduction to Ethnomusicology (also MUSIC 6301) @ (SBA-AS)
Spring. 4 credits. M. Hatch. For description, see MUSIC 6301.

Music Composition

MUSIC 4421 Introduction to Computer Music (LA-AS)

MUSIC 1421 ORCHESTRATION
Spring. 4 credits. Prerequisite: MUSIC 3101 or permission of instructor. S. Stucky. Orchestration based on 19th- and 20th-century models.

MUSIC 4111 Composition (LA-AS)
Spring. 4 credits. Prerequisite: MUSIC 3101 or permission of instructor. S. Stucky. Principles of composition, approached through traditional forms (variation, sonata) and through the imitation of specific 20th-century styles. May be taken more than once for credit, by permission and if taught by a different instructor.

MUSIC 4122 Orchestration (LA-AS)
Spring. 4 credits. Prerequisite: MUSIC 3101 or permission of instructor. S. Stucky. Orchestration based on 19th- and 20th-century models.

MUSIC 4123 Jazz Arranging (LA-AS)
Fall. 4 credits. Prerequisite: MUSIC 3111 or permission of instructor. P. Merrill. A survey of jazz arranging techniques for the big band.

Independent Study and Honors

MUSIC 4901 Independent Study in Music
Fall or spring. 1–6 credits. Prerequisite: departmental approval; experience in proposed area of study. Staff. Independent study affords students the opportunity to pursue special interests or research not treated in regularly scheduled courses. A faculty member, who becomes the student’s instructor for the independent course, must approve the proposed study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, forms are available in the Office of Undergraduate Admissions and Advising, 55 and 172 Goldwin Smith Hall.
MUSIC 4911–4912 Honors in Music
Fall and spring. 8 credits per year.
Prerequisite: senior honors candidates.
Staff.
See "Honors" under "The Major" at the beginning of the MUSIC listings.

Musical Instruction
Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, violin, viola, cello, percussion, and some brass and woodwind instruments to those students advanced enough to do college-level work in these instruments.
Lessons are available by audition only. They may be taken either without credit (MUSIC 3501) or with credit (MUSIC 3502 or 4501). All students studying with Cornell faculty members must enroll in MUSIC 3501, 3502, or 4501. Instruments may sometimes be studied for noncredit or credit outside Cornell, but also by audition only (see MUSIC 3501, 3502, 4501, Secs 8, 9, and 10). For more information, please go to www.music.cornell.edu.

Lessons for beginners. The Department of Music does not offer lessons for beginners, but can recommend teachers outside Cornell for those who wish to begin studying voice or an instrument.

Auditions. Auditions are held at the beginning of each semester for lessons for advanced students. Contact the music department office in 101 Lincoln Hall for information.

Earning academic credit for lessons. For every 4 credits earned in MUSIC 3502, the student must have earned, or currently be earning, at least 3 credits in another music course (excluding MUSIC 3502, 4501, 3601–3611, or 4601–4631). These 3 credits must be earned before, or simultaneously with, the first 2 credits in 3502; they cannot be applied retroactively. Only music courses taught at Cornell (or approved transfer courses from other colleges or universities) may be used to satisfy this requirement.

Fees. For information about the fee structure for lessons, see the department’s web site or contact the music department office. All fees are nonrefundable once lessons begin, even if the course is subsequently dropped.

Lessons taken outside Cornell. Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of MUSIC 3501, 3502, and 4501, Secs 8, 9, and 10, and contact the Music Department office.

Scholarships. Music majors who demonstrate an advanced level of performance in an audition may be granted a waiver of lesson fees per semester. All scholarships are intended only for lessons in the student’s primary performing medium. Scholarship/registration forms, available in the music department office, are to be returned to the office within the first three weeks of classes.

Individual Instruction in Musical Composition
Analogously to private instruction in performance, Cornell faculty members and outside instructors offer private instruction in musical composition. Music majors may receive a waiver in lesson fees, just as for performance lessons. For nonmajors, fees are structured just as for performance study. Lessons may also be taken outside Cornell, for credit or otherwise. Students may register for these courses in successive semesters or year although individual instruction may not be available during semester where classroom composition courses are offered simultaneously.

The faculty members authorized to supervise composition study, both within Cornell and outside, are K. Ernest; P. Merrill, R. Sierra, and S. Stucky.

Prerequisites: Satisfactory completion of MUSIC 2102 and 2104.

Auditions: Students must present a portfolio of previous compositions in order to assist the faculty in determining placement.

MUSIC 3501, 3502, and 4501 Individual Instruction
Prerequisite: advanced students only; may register after successful audition with instructor, or if student needs to study outside Cornell, with appropriate faculty sponsor. Students should contact instructor or music department office for audition information. Students may register for these courses in successive semesters or years.

MUSIC 3501
Fall or spring. 0 credits each semester. See section listing below for instructors. Students who pass a successful audition to study with Cornell faculty, but either wish to take only a half-hour lesson per week or cannot receive credit for lessons, must enroll in MUSIC 3501. S–U grades only.

MUSIC 3502
Fall or spring. 2 credits each semester. See section listing below for instructors. Students earn 2 credits each semester for a one-hour lesson (or two half-hour lessons) per week, accompanied by an appropriate practice schedule. Credit may be earned only in conjunction with academic music courses; see “Earning Academic Credit for Lessons,” above. Letter grades only.

MUSIC 4500
Fall or spring. 4 credits each semester. See section listing below for instructors. Open only to undergraduates majoring in music and graduate students in music. The section numbers listed below apply to MUSIC 3501, 3502, or 4501, depending on the instrument studied.
Sec 01 Voice. J. Kellock.* See 02 Organ. A. Richards and D. Yearsley.
Sec 05 Piano. B. Bjerkun and Staff.
Sec 04 Harpsichord. A. Richards and D. Yearsley.
Sec 05 Violin or Viola. J. Lin.
Sec 06 Cello. J. Haines-Eitzen.
Sec 08, 09, and 10 Individual Instruction
Outside Cornell.

All the standard orchestral and band instruments, keyboard instruments, guitar, and voice may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and when there is limited enrollment in MUSIC 3501 and 3502. Prior approval and audition by a member of the faculty in the department are required, and credit may be earned only as described under “Earning academic credit for lessons,” above. Additionally, a departmental petition must be completed by the end of the third week of classes. For information and a list of approved teachers, consult the department office, 101 Lincoln Hall.

* Students taking voice lessons for credit are required to attend Prof. Kelkcon’s weekly studio class.

Musical Organizations and Ensembles
Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only (usually at the beginning of each semester), except that the World Music Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than 8 credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit. In that case, students should register for 0 credits with a pass/fail grade option.

MUSIC 3602 Chorus
Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester.
Prerequisite: successful audition. Fall: staff; spring: S. Tucker.
A treble-voice chorus specializing in music for women’s voices and in mixed-voice repertory.

MUSIC 3603 Glee Club
Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester.
Prerequisite: successful audition. Fall: staff; spring: S. Tucker.
A male-voice chorus specializing in music for men’s voices and in mixed-voice repertory.

MUSIC 3604 Chorale
Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester.
Prerequisite: successful audition. Staff. Study and performance of selected choral music for mixed voices.

MUSIC 3610 Gamelan Ensemble
Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester.
Prerequisite: permission of instructor. C. Miller.
Advanced performance on the Indonesian gamelan. Tape recordings of gamelan and elementary number notation are provided. Some instruction by visiting Balinese artist.

MUSIC 3611 World Music Choir
Spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester.
Prerequisite: permission of instructor. Staff.
A mixed-voice chorus whose repertoire is drawn from Africa, Central America, South America, the Caribbean, Eastern Europe, and Asia. Music reading skills are not necessary, but a good ear is essential.

MUSIC 3612 World Drum and Dance Ensemble
Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester.
Prerequisite: permission of instructor. T. Feeney.
WDDE focuses in 2009–10 on traditional music and dance of the Anlo-Ewe culture of southern Ghana. WDDE rehearses weekly for performance as ready throughout the semester.
No prior experience is necessary, and all members of the group will sing, drum, and dance.

**MUSIC 3613 Cornell Steel Bands**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: audition with instructor. T. Feeney.

The Cornell Steel Bands perform traditional music from Trinidad for steel pans, including calypso and soca, as well as repertoire expanding the boundaries of the instruments. The group includes the standard steel pan orchestra, as well as an “engine room” consisting of drumset, congas, iron (brake drums), and other percussion instruments.

One or more sections will form in 2009–10, dependent on demand and ability. The groups rehearse weekly, and perform as ready throughout the semester. Prior musical experience is necessary, though not limited to percussion, and participants must audition.

**MUSIC 3614 Middle Eastern Music Ensemble (also NES 3914)**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: permission of instructor.

G. Holst-Warhaft.

Performance of diverse musical traditions from the Middle East. Instruction in individual instruments (oud, ney, kanoun, and percussion) and group rehearsals, culminating in one or two performances per semester. Songs are taught in several languages, with the assistance of local language and diction teachers.

**MUSIC 3615 Jazz Ensemble II**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. P. Merrill.

Study and performance of classic and contemporary big band literature. Rehearsal once a week with one to two performances a semester.

**MUSIC 3621 Symphony Orchestra**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. C. Kim; spring, staff.

Study and performance of a broad repertoire of orchestral works from Beethoven to Beethoven to the present.

**MUSIC 3631 Wind Symphony**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. Fall, C. Johnston Turner.

**MUSIC 3632 Music Leadership and Service**

The goal of this music performance and service learning course is to provide the opportunity in which learning experiences address human and community needs, and to allow the necessary time for reflection on those experiences. The focus of the course is on musical and personal leadership within communities—from the local to the foreign and from the known to the unknown. Communities in this context are defined by the community of students and musicians within the wind ensemble, the local communities in Ithaca and other New York state schools, and school, conservatory, and municipal communities in Costa Rica.

**MUSIC 3633 Wind Ensemble**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition; previous background in percussion. Fall, C. Johnston Turner; spring, staff.

**MUSIC 3634 Percussion Ensemble**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: audition with instructor. Corequisite: enrollment in a Cornell large ensemble (orchestras, wind ensemble/symphony, jazz bands, or choral group). Previous background in percussion is required. Next offered 2011–2012. T. Feeney.

The Percussion Ensemble performs pieces from the growing percussion repertory, exploring the breadth and depth of its possibilities for percussionists. Concerts might involve collaborations with composers and other instrumentalists, improvisation, or student-initiated ideas for performance.

**MUSIC 4601 Chamber Singers**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. A. Amler; spring, staff.

A mixed-voice chamber choir specializing in Renaissance and 20th-century music.

**MUSIC 4615 Jazz Ensemble I**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. P. Merrill.

Study and performance of classic and contemporary small-group jazz.

**MUSIC 4621 Chamber Orchestra**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. C. Johnston Turner; spring, staff.

Study and performance of chamber orchestra works from the baroque period to the present.

**MUSIC 4631 Chamber Winds**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Corequisites: enrollment in a Cornell large ensemble (orchestras, wind ensemble/symphony, jazz band, or choral group), or permission of instructor. Coordinator: C. Johnston Turner and J. Pepinsky.

Flexible instrumentation ensembles perform original windwood, brass, and percussion music. The ensembles participate in Wind Symphony and Wind Ensemble concerts in addition to several chamber concerts throughout the year.

**MUSIC 4641 Instruction in Gamelan Instruments**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Limited enrollment. Prerequisite: permission of instructor. C. Miller.

Concentrated instruction for students in advanced techniques of performance on Indonesian gamelan instruments.

**MUSIC 4651 Chamber Music Ensembles**

Fall and spring. Either 0 credits, S–U, or 1 credit, letter grade, each semester. Prerequisite: successful audition. Coordinator: M. Yampolsky.

Study and performance of chamber music works from duos to octets, for pianists, string, and wind players.

**Graduate Courses**

Open to qualified undergraduates by permission of instructor.

**MUSIC 6101 Analytical Technique (also MUSIC 4102)**

**MUSIC 6201 Introduction to Bibliography and Research**

Fall. 4 credits. B. Boetcher.

This course explores the nature of the discipline and introduces the many types of bibliographic tools, both printed and electronic, needed to pursue research in music.

**MUSIC 6301 Introduction to Ethnomusicology**

Spring. 4 credits. M. Hatch.

This course introduces the terminology for and approaches to describing and analyzing the varieties of music in the cultures of the world. First, a survey of the repertories of music that ethnomusicologists have recorded and written about and the methods that they have used. Then, tailored to the interests of each student in the class, a more systematic consideration of the music in one or another region or culture in the world.

**MUSIC 6420 Techniques for Computer Music**

Fall. 4 credits. Prerequisite: permission of instructor. K. Ernste.

A course on composing electroacoustic music with an emphasis on real-time performance, historical models, and aesthetics. Other topics dependent on students’ backgrounds and interests.

**MUSIC 6421 Electroacoustic Composition**

Spring. 4 credits. K. Ernste.

Intended principally for doctoral students in music composition but open to others by permission. Depending on students’ backgrounds and interests, the course may include an introduction to electroacoustic composing, an emphasis on aesthetic issues associated with the field, interactivity and real-time performance, software instrument design, performance controllers, or other topics.

**MUSIC 7101 Topics in Tonal Theory and Analysis**

Topic: Sonata—form theory.

**MUSIC 7102 Topics in Post-Tonal Theory and Analysis (also MUSIC 4103)**

**MUSIC 7111 Composition**

Fall and spring. 4 credits each semester. S. Stucky.

**MUSIC 7121 Advanced Orchestral Technique**

Intensive analysis of orchestral scores from the past hundred years, with an emphasis on modern instrumental techniques, gestures, and textures.]

[MUSIC 7201 Seminar in Medieval Music
Fall. 4 credits. Next offered 2013–2014.
J. Peraino.
Topic: The Music of the Troubadours and Trouvères. This course will familiarize the students with this extensive repertory of secular love songs, introducing the many genres, distinct notation, and issues of melodic and textual analysis, and performance practice issues.]

[MUSIC 7202 Seminar in Renaissance Music
Spring. 4 credits. R. Harris-Warrick.
Topic: Josquin]

[MUSIC 7203 Seminar in Baroque Music
R. Harris-Warrick.
Topic: The operas of Jean-Philippe Rameau.
This seminar investigates the multiple components (musical, textual, choreographic, scenographic) from which Rameau's operas were constructed, as well as the aesthetic controversies that surrounded them.]

[MUSIC 7204 Seminar in 18th-Century Music
Spring. 4 credits. J. Webster.

[MUSIC 7205 Seminar in 19th-Century Music
Fall. 4 credits. Staff.]

[MUSIC 7206 Seminar in Music of the 20th Century
R. Sierra.
Topic: Ligeti.]

[MUSIC 7211 Seminar in Performance Practice
Fall. 4 credits. Next offered 2012–2013.
N. Zaslav.
Topic: The music of Mozart and his contemporaries.]

[MUSIC 7221 Mozart: His Life, Works, and Times
Fall. 4 credits. Next offered 2011–2012.
N. Zaslav.]

[MUSIC 7223 Operatic States: Imagining Community in Music-Drama (also GERST 6420)
Fall. 4 credits. Next offered 2012–2013.
A. Groos.]

[MUSIC 7231 Music and Postmodern Critical Theory
Fall. 4 credits. Next offered 2011–2012.
J. Peraino.]

[MUSIC 7232 History and Criticism
Fall. 4 credits. A. Richards.
Topic: The musical portrait.]

[MUSIC 7240 Film and Music
Fall. 4 credits. Next offered 2012–2013.
D. Yeoasly.
Topic: Film and music.]

[MUSIC 7301 Topics in Ethnomusicology
Fall. 4 credits. Also open to graduate students in anthropology, linguistics, psychology, sociology, Africana Studies, Asian Studies, and other cognate fields by permission of instructor. S. Pond.

[MUSIC 7303 Music, Technology, and Society (also MUSIC/SHUM 4303)
Fall. 4 credits. E. Bates.
For description, see MUSIC 4303.]

[MUSIC 7501 Historical Performance
Fall and spring. 4 credits each semester.
Prerequisite: permission of instructor. Staff.
Lessons on the major instrument with supplementary study and research on related subjects.]

[MUSIC 7901 Independent Study and Research
Fall and spring. Credit TBA. Staff.]

[MUSIC 9901 Thesis Research
Fall and spring. Up to 6 credits each semester, TBA. S–U grades only.
Limited to doctoral students in music who have passed the Admission-to-Candidacy exam.]

NEAR EASTERN STUDIES

The Department
The Department of Near Eastern Studies (409 White Hall, 255-2575) offers courses in Near Eastern civilization including archaeology, history, religions, languages, and literatures. These course offerings treat the Near East from the dawn of history to the present and emphasize methods of historical, cultural, and literary analysis. Students are encouraged to take an interdisciplinary approach to the religions and cultures of the region and their articulation during antiquity, late antique, medieval, and modern times. For more information, please visit www.arts.cornell.edu/nes.

The Major
A major in Near Eastern Studies offers students the opportunity to explore the languages, literatures, cultures, religions, and history of the Near East/Middle East from antiquity to the modern day. The major is designed both to acquaint students broadly with the region and its cultures as well as to study a particular subfield in depth.

Prerequisites
• The applicant for admission to the major in Near Eastern Studies (NES) must have completed at least two Near Eastern Studies content courses, one of which can be a language course. Students are strongly encouraged to enroll in language courses and/or NES 2574 or 2751 even before signing into the major or early on in their major. Prospective majors must meet with the director of undergraduate studies before submitting a major application.
• To qualify as a major, a cumulative grade average of C or better is required.

Major Requirements
The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's advisor. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S–U option not permitted):

1. Two years of one Near Eastern language or, in exceptional cases, one year of two Near Eastern languages.

2. Nine 3- or 4-credit NES courses, which must include the following:
   a. NES 2571 Judaism, Christianity, and Islam or NES 2754 Introduction to Near Eastern Civilizations
   b. NES 4560 Junior/Senior Proseminar: Theory and Method in Near Eastern Studies
   c. Seven additional courses, of which three must fulfill temporal breadth, defined as: one course whose chronological parameters fall within the period 3000 BCE to 600 CE, one course whose chronological parameters fall within the period 600 CE to 1800 CE, and one course whose chronological parameters fall between 1800 CE and the present. The following are examples (a complete list may be obtained in the department office):

3000 BCE to 600 CE

NES 2623 Introduction to the Hebrew Bible

NES 2629 Introduction to the New Testament

NES 2644 Introduction to Ancient Judaism

NES 2661 Ancient Scafairing

NES 2666 Jerusalem through the Ages

NES 3594 Gender, Sexuality, and the Body in Early Christianity ®

NES 3623 Reinventing Biblical Narrative ®

NES 3664 Ancient Iraq I

NES 3665 Ancient Iraq II

NES 3720 Women in the Hebrew Bible ®

600 CE to 1800 CE

NES 2214 Qur'an and Commentary

NES 2556 Introduction to the Qur'an

NES 2634 Muslims and Jews in Confluence and Conflict

NES 2655 Introduction to Islamic Civilization

NES 2673 History of the Middle East: 13th to 18th Centuries

NES 3539 Islamic Spain ®

NES 3651 Law, Society, and Culture in the Middle East

NES 4618 Seminar in Islamic History ®
1800 CE to the present
NES 2635 Jews and Arabs in Contact and Conflict: The Modern Period
NES 2674 History of the Modern Middle East: 19th to 20th Centuries
NES 3685 Middle Eastern Cities (CA)®
NES 3693 History of Jews and Christians in the Modern Middle East
NES 3697 History of the Israeli–Palestinian Conflict
NES 3703 Cosmopolitan Alexandria (CA)®
NES 3719 Crime and Conflict in the Modern Arabic Novel

ii. A maximum of three of these seven courses can be at the 2000 level; a minimum of four must be at the 3000 level or above.

iii. One of the 3000-level or above courses must be a research seminar (courses are designated with ®) The following are examples (a complete list can be found in the department office):

- NES 3539 Islamic Spain: Culture and Society
- NES 3594 Gender, Sexuality, and the Body in Early Christianity
- NES 3685 Middle Eastern Cities: History, Society, and Culture
- NES 4657 Formation of Islamic Law
- NES 4727 New York, Paris, Baghdad: Poetry of the City

iv. Note: a maximum of two independent studies can be applied to the major; a maximum of two non-cross-listed courses may be applied to the major; a maximum of two courses may receive credit for more than one major; a maximum of 15 credits of relevant, departmentally approved course work taken overseas or at another university may be applied to the major.

Honors. Each fall, a small number of highly qualified seniors enter the Near Eastern Studies Honors Program. The Honors Program is open to NES majors who have done superior work and who wish to devote a substantial part of their senior year to advanced, specialized, independent research and writing of a thesis.

Note well: Successfully completing an honors thesis will require sustained interest, exceptional ability, diligence, and enthusiasm. Students must also take two honors courses (NES 4998 in fall and NES 4999 in spring), in addition to the regular major requirements. While admission to the Honors Program and completion of a thesis do not guarantee that students will be awarded honors in Near Eastern Studies, most students find the experience as intellectually rewarding as it is rigorous.

Requirements. In order to be considered for the Honors Program, candidates must fulfill all of the following requirements:

- Minimum grade point average of 3.5 in the Near Eastern Studies major;
- Superior performance overall at Cornell (minimum 3.3 GPA);
- Completion of at least four semesters or equivalent in a relevant Near Eastern language;
- Satisfactory completion of an NES research paper ("®" course);
- Completion of at least one course in the subfield relevant to the proposed thesis (e.g., early Islamic history, modern Hebrew literature);
- Prospective honors students are strongly encouraged to take NES 4560 (NES Proseminar) in their junior year.

Study abroad. Students are encouraged to consult with their advisor about options and eligibility to study abroad. With appropriate advance consultation and approval upon return, NES will accept credits earned abroad toward the major. Students are reminded that the College of Arts and Sciences requires that they carry a minimum of 15 credits during a semester abroad.

First-Year Writing Seminars
Consult the John S. Knight Institute brochure for descriptions, times, and instructors.

Language Courses
Arabic

NES 1201–1202 Elementary Arabic I and II (also ASRC 1201/1202)
1201, fall; 1202, spring or summer. 4 credits each semester. Limited to 18 students per sec. Prerequisite: for NES 1201, NES 1201 or permission of instructor. M. Younes and staff. Provides a thorough grounding in all language skills: listening, speaking, reading, and writing. It starts with spoken Arabic and gradually integrates Modern Standard Arabic in the form of listening and reading texts. Emphasis is on learning the language through using it in meaningful contexts. Students who successfully complete the two-semester sequence are able to: (1) understand and express himself or herself in Arabic in situations beyond the basic needs; (2) read and comprehend written Arabic of average difficulty; (3) write a letter, a summary of a report, or a reading selection. An appreciation of Arabic literature and culture is sought through the use of authentic materials.

NES 2203 Elementary Arabic for Native Speakers

NES 2204 Introduction to Quranic Arabic (also ASRC 2106, RELST 2204) (LA-AS)

NES 2301–2302 Advanced Intermediate Arabic I and II (also ASRC 3100–3101) @ (CA-AS)
2301, fall; 3102, spring. 4 credits each semester. NES 3201 satisfies Option 1. Limited to 15 students. Prerequisite: for NES 3201, NES 2200 or permission of instructor; for NES 3202, NES 3201 or permission of instructor. Letter grades recommended. M. Younes and staff. Introduces students to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis is on developing fluency in oral expression through discussion of issues presented in the reading selections. There is more focus on the development of native-like pronunciation and accurate use of grammatical structures than on elementary and intermediate Arabic. A primary objective of the course is the development of writing skill through free composition exercises in topics of interest to individual students.

NES 3220 Advanced Arabic Literature
Fall. 4 credits. Satisfies Option 1. Prerequisite: Advanced Intermediate Arabic II (NES 3202), a grade of no less than "A" in Advanced Intermediate Arabic I (NES 3201), OR permission of instructor. H. Al-Masri. The course is an introductory survey to different genres in modern Arabic literature (poetry and prose). It aims at improving the four language skills at an advanced level, as well as encouraging students to appreciate Arabic literature. All readings will be in Arabic. The readings are selected from among the most salient literary texts by major writers from the 20th century.

NES 4206 Structure of the Arabic Language (also LING 4416) @ (KCM-AS)
Spring. 4 credits. Prerequisite: one year of Arabic or linguistic background. J. Palmer. The course consists of a brief history of Arabic and its place in the Semitic language family, the sociolinguistic situation in the Arab world (diglossia), Arabic phonology (sounds, emphasis, syllable structure, and related processes), morphology (verb forms and derivational patterns), and syntax (basic sentence structures, cases, and moods).
[NES 4211 Readings in Arabic Literature @ # (LA-AS)
Fall. 4 credits. Prerequisite: NES 3202, a 4000-level Arabic course, or permission of instructor. Next offered 2011–2012. S. M. Toorawa.
This course introduces students to Arabic prose literature through a close reading of selections by classical, medieval, and modern writers. The emphasis is on grammar and vocabulary.]

Intensive Arabic Program (IAP)
Modeled in part on the FALCON program in Chinese at Cornell University, the Intensive Arabic Program is designed to help students attain proficiency in Arabic in both its spoken and written forms in a condensed period of time. The program consists of three phases: (1) The first phase covers the equivalent of elementary Arabic I and II, and can be taken during the fall and spring semesters of the academic year, or as part of the Arabic summer intensive program. (2) The second phase covers the equivalent of Intermediate Arabic I and II and Advanced Arabic I and II and is taken in a total immersion environment at Cornell. During this phase, up to 12 students will study only Arabic classes for the duration of the fall semester. (3) The third phase takes place at the Hashemite University in Jordan during the following spring semester. The students who successfully complete the second phase will spend the spring semester at the Hashemite University with one of the teachers in the Cornell Arabic program. The course work will be taught entirely in Arabic and will focus on Arab society and culture, the Arabic language, and the modern Middle East.

Credits for Cornell Undergraduates
The fall and spring semesters will each be the equivalent of 16 credits for Cornell undergraduates. Ideally, students would enroll in the yearlong program during their junior year, but the other years are also a possibility. The program will enable students to fulfill their language requirement and, depending on their major, they would have the option of applying the other courses toward their major. For Near Eastern Studies majors, all the courses would go toward the major (beyond the NES 1103 language course). Nonmajors will be able to count the spring courses toward the geographic breadth requirements. Upon their return, students would have the option of continuing their study of Arabic by enrolling in 4000-level Arabic courses in NES.

Cornell undergraduates seeking degrees in colleges other than Arts and Sciences, please note that you will be transferred to the College of Arts and Sciences during IAP. This means that all costs will be assessed according to Arts and Sciences rates, not those of your “home” college.

For further information, contact the Department of Near Eastern Studies, 409 White Hall, 255-6275 or visit our web site, www.arts.cornell.edu/nes.

NES 3206 Intensive Arabic Program (IAP)
Fall. 16 credits. Satisfies Option 1. M. Younes and H. Al-Masri.
In the first half of this 16-credit total immersion course, we will continue to develop the four language skills of listening, speaking, reading, and writing through the extensive use of graded materials on a wide variety of topics (e.g., education, food, health, sports, religion, politics, economics). In the second half, students will be introduced to authentic, unedited Arabic language materials ranging from short stories, poems, and songs to newspaper articles dealing with social, political, and cultural issues related to the Arab world and the Middle East. While more attention is given to developing native-like pronunciation and grammatical accuracy than in NES 1201–1202, the main focus of the course will be on encouraging fluency and facility in understanding the language and communicating ideas in it. Building on the foundation started in NES 1201–1202, the course will continue the practice of introducing Arab society, history, and culture. Oral and written expression will be developed through discussions of issues presented in the reading selections which will be followed by free composition exercises built around topics of interest to individual students.

NES 3207 Current Events in Arabic Media (IAP) @ (CA-AS)
Spring. 8 credits. M. Younes and staff.
In this 8-credit, one-semester, topic-based course, students will be introduced to authentic, unedited Arabic language materials from Arabic newspapers, magazines, TV broadcasts and interviews, and online media. Topics will include, among other things, politics, economics, business, sports, and women’s issues. Students can suggest other topics that interest them to the teacher. Emphasis will be on developing fluency in oral and written expression through discussions, debates, presentations, and written work. The order of activities for each topic will be: reading or listening to a selection before coming to class, class discussion and/or debate, an oral presentation by the students, and, finally, a written homework assignment about the same topic. All activities are conducted entirely in Arabic. There will be more focus on the development of native-like pronunciation and accurate use of grammatical structures than at the lower levels.

NES 3213 Introduction to Jordanian Society (IAP) @ (SBA-AS)
Spring. 4 credits. M. Younes and staff.
Selected readings and discussions on the following topics: (1) the history of the Hashemite Kingdom of Jordan; (2) urban, rural, and bedouin communities, and urbanization; (3) Palestinians and other Arab refugees in Jordan; (4) the Jordanian/Arab family (structure, responsibilities, functions); (5) marriage (and divorce); (6) women and gender roles; (7) the role of religion in the society.

NES 4204 Arabic Grammar (IAP) @ (CA-AS)
Spring. 4 credits. M. Younes and staff.
A systematic and comprehensive examination of all aspects of Arabic grammar: phonology (the sound system, morphology (word formation), and syntax (sentence structure)). All the readings and discussions will be in Arabic. References in English will be used for research purposes.

Greek
NES 1340–1341 Elementary Modern Greek I and II (also GREEK 1141–1142)
1340, fall; 1341, spring. 4 credits. Prerequisite: NES 1340/GREEK 1141 or placement by departmental exam. K. Yiavis.
For description, see GREEK 1141–1142.

NES 1342–2324 Intermediate Modern Greek I and II (also GREEK 1143–2144)
Fall. 4 credits. NES 2324/GREEK 2144 satisfies Option 1. Prerequisite: NES 1341/GREEK 1142 or placement by departmental exam. K. Yiavis.
For description, see GREEK 1143–2144.

Hebrew
NES 1101–1102 Elementary Modern Hebrew I and II (also JWST 1101–1102)
1101, fall; 1102, spring. 4 credits each semester. Limited to 18 students per sec. Prerequisite: for NES 1102, NES 1101 with grade of C– or better or permission of instructor. Letter grades only. S. Shoer.
Intended for beginners. Provides a thorough grounding in reading, writing, grammar, oral comprehension, and speaking. Students who complete the course are able to function in basic situations in a Hebrew-speaking environment.

NES 1103 Elementary Modern Hebrew III (also JWST 1103) (CA-AS)
Fall. 4 credits each semester. Limited to 15 students per sec. Prerequisite: NES 1102 with grade of C– or better or permission of instructor. Letter grades recommended. S. Shoer.
Sequel to NES 1101–1102. Continued development of reading, writing, grammar, oral comprehension, and speaking skills.

NES 1104 Beginning Intensive Hebrew (also JWST 1104)
Summer. 3 credits. S. Shoer.
This course will be taught in Israel as part of the University of Haifa Summer Hebrew Program. The curriculum is comparable to the current Cornell University course NES 1101 or JWST 1101 (Elementary Modern Hebrew I). After completing this program, students will be able to continue and join the Elementary Modern Hebrew II class (NES 1102 or JWST 1102) in the spring 2010 semester. The class is taught using Ivrit B’Ivrit (Teaching Hebrew Using Hebrew) and is part of a comprehensive, integrated skills curriculum based on Hebrew as a living language.

Students are encouraged to use Hebrew from the moment they wake up, during their meals, and throughout the day. Students study grammar, reading, writing, structure of the language, listening, and conversation.

NES 1105 Hebrew Summer Follow-Up (also JWST 1105)
Fall. 1 credit. S. Shoer.
This course is an advanced study of classical Arabic through a close reading of selected chapters of the Qur’an, together with the Qur’anic commentary (tafsir) and other relevant literature. Special attention is given to grammar, syntax, and lexicography.
NES 2100 Intermediate Modern Hebrew: Special Topics in Hebrew (also JWST 2100) @ (CA-AS)
Spring. 4 credits. Satisfies Option 1. Prerequisite: NES 3103 with grade equivalent to C− or above or permission of instructor. Letter grades recommended. N. Scharf.
The course is aimed at training students in exact and idiomatic Hebrew, expanding vocabulary and usage of grammatical knowledge, and acquiring facility of expression in both conversation and writing. Uses written and oral exercises built around the texts. Reading and discussion of selections from Hebrew literature and Israeli culture through the use of texts and audiovisual materials. See web site: http://irc.cornell.edu/hebrew/nest2100.

NES 2125 Mishnaic Hebrew (also JWST 2125)
Spring. 3 credits. G. Herman.
In this course we shall learn and experience the rudiments of Mishnaic Hebrew whilst studying a select tractate of the Mishnah. This course is intended for students who have completed a “beginners” course in Biblical Hebrew or the equivalent.

NES 3101 Advanced Intermediate Modern Hebrew I: Aspects of Israeli Society (also JWST 3101) @ (CA-AS)
Fall. 4 credits. Satisfies Option 1. Limited to 15 students. Prerequisite: for 3101, NES 2100 with grade of C− or above or permission of instructor. N. Scharf.
Advanced study of the Hebrew language both orally and through the analysis of mostly unedited texts of social, political, and cultural relevance, with less emphasis on the study of grammar. Students are introduced to articles published in Israeli newspapers and magazines, works by authors, and movies. Students develop composition and advanced writing skills by studying language structure, idioms, and various registers of style.

NES 3102 Advanced Intermediate Modern Hebrew II: Aspects of Israeli Culture (also JWST 3102) @ (CA-AS)
Spring. 4 credits. Satisfies Option 1. Limited to 15 students. Prerequisite: NES 3101 with grade equivalent to C− or above or permission of instructor. Letter grades recommended. N. Scharf.
This course is a continuation of work done in NES/JWST 3101, with less emphasis on the study of grammar. We will read and discuss texts of cultural relevance using articles published in Israeli newspapers, web sites, and works by authors in each of the three principal genres: poetry, theater, and novels. See web site: http://irc.cornell.edu/hebrew/nest3102.

NIS 3103 Love, Wine, Death, and In Between (also JWST 3103) @ # (CA-AS)
Fall. 4 credits. Prerequisite: NES 3102 or permission of instructor. Letter grades recommended. Next offered 2011–2012. S. Shoer.

NIS 3108 Intensive Conversational Hebrew II (also JWST 3108)
Fall. 2 credits. Prerequisite: NES 3102, NES 3105, or permission of instructor; non-native speakers only. N. Scharf.
Intended to continue the development of all aspects of the language. Emphasis, however, is placed on speaking skills and understanding by using text material relevant to Israeli contemporary society. The instructor is sensitive to individual student needs.

NIS 4101 Modern Hebrew Literature (also JWST 4101) @ (LA-AS)

NIS 4102 Biblical Hebrew Prose—Genesis (also JWST/RELST 4102) @ # (LA-AS)
Fall. 4 credits. Satisfies Option 1. Prerequisite: one year of biblical or modern Hebrew. Next offered 2011–2012. L. Monroe.

Hindi–Urdu

NIS 1312–1313 Elementary Urdu Reading and Writing I and II (also URDU 1125)
Fall. 1 credit. S. Singh.
For description, see URDU 1125.

NIS 2201–2202 Intermediate Urdu Reading and Writing I and II (also URDU 2225–2226)
2201, fall; 2202, spring. 2 credits. Prerequisites: HINDI 1102 or HINDI 1110; and URDU 1125 or permission of instructor. Letter grades only. S. Singh.
For description, see URDU 2225–2226.

Persian

NIS 1320–1321 Elementary Persian I and II
1320, fall; 1321, spring. 4 credits each semester. Limited to 15 students. I. Gocheleishvili.
Designed for students who want an effective and comprehensive approach to learning Persian that will enable them to progress in the language skills of speaking, listening, reading, and writing. At the completion of this course, students are prepared to deepen their comprehension of Persian through literature and the media.

NIS 1322–2322 Intermediate Persian I and II (CA-AS)
1322, fall; 2322, spring. 4 credits. NIS 2322 @ satisfies Option 1. Prerequisite: one year (two semesters) elementary Persian or permission of instructor. I. Gocheleishvili.
A continuation of NIS 1320–1321. Continued development of speaking, listening, reading, and writing skills.

Turkish

NIS 1330–1331 Elementary Turkish I and II
1330, fall; 1331, spring. 4 credits each semester. Limited to 15 students. E. Ozdogan.
Intended for students with no experience in Turkish. The goal is to provide a thorough grounding in the Turkish language with an emphasis on communication. Small class size provides intensive practice in speaking, writing, and listening/comprehension. The course is cosponsored by the Institute for European Studies.

NIS 1332–2332 Intermediate Turkish I and II
1332, fall; 2332, spring. 4 credits. NIS 2332 satisfies Option 1. Prerequisite: one year (two semesters) elementary Turkish or permission of instructor. Staff.
A continuation of NIS 1330–1331. Continued development of speaking, listening, reading, and writing skills.

Ancient Near Eastern Languages

Hieroglyphic Egyptian

NIS 3450–3451 Hieroglyphic Egyptian I and II (3451, CA-AS)

NIS 3453 Essentials of Hieroglyphic Egyptian
Spring. 4 credits. A. Kleinerman.
Who really built the pyramids? What hung in the garden of Babylon? After a general introduction to the history of Egypt and the ancient Near East, this course focuses on the culture and society of Egypt and Mesopotamia. Topics include education and literacy, science and technology, family, life, fashion and feasting, religion, and economy. Case studies include the workers’ village excavated alongside the Valley of the Tombs in Egypt and the activities of cloistered priestesses in Mesopotamia.

Topics Courses

NIS 2212 Qur'an and Commentary (also RELST 2212) @ (LA-AS)
Spring. 4 credits. D. Powers.
This course is an advanced study of classical Arabic through a close reading of selected chapters of the Qur'an, together with the Qur'anic commentary (tafsir) and other relevant literature. Special attention is given to grammar, syntax, and lexicography.

NIS 2537 Ninth-Century Baghdad and Its "Bad Boys and Girls" (also JWST 2567) @ (CA-AS)
Fall. 3 credits. For description, see NIS 3453.

NIS 2587 Great Books of Islamic Culture
Spring. 3 credits. S. Toorawa.
Isamicate culture has produced numerous works that would make it onto almost anyone’s list of great books. In this introductory/survey course, students read a selection of those books and study the literary and intellectual cultures that produced them in an attempt to deepen and nuance their understanding of Islamic civilization.

NIS 2611 Prophecy in Ancient Israel (also JWST/RELST 2611)

NIS 2629 Introduction to New Testament and Other Early Christian Literature (also CLASS 2613, JWST/RELST 2629) @ (HA-AS)

NIS 2644 Introduction to Judaism (also RELST/JWST 2644)
Spring. 3 credits. L. Monroe.
This course is designed to acquaint students with the varieties of Judaism from ancient times to the early modern period. A strong emphasis will be placed on ancient Jewish civilization, and how ancient structures shaped
later religious, social, and political trends. Particular attention will be devoted to moments of continuity and change in ideas and practices in each major phase of their historical development. Students will learn to analyze material evidence and primary texts in translation, to engage with the questions brought to bear on this material by contemporary scholars, and to generate their own critical questions. This course will also explore the ways Judaism and the Jewish people have been understood through various interpretive lenses, including sociology, religious studies, anthropology, musicology, women's studies, and film studies. Students will be encouraged to think creatively and to engage in experiential and hands-on investigation of particular issues.

NES 2650 Ancient Iraq (also JWST/ARKEO 2650)

Spring. 3 credits. D. I. Owen. Provides an introductory survey of the history, archaeology, and culture of Sumer and Babylonia from the dawn of writing to the rise of Persia.

NES 2651 Judaism, Christianity, and Islam (also JWST/RELST 2651) # @ (HA-AS)

Fall. 3 credits. K. Haines-Eitzen. Have you ever wondered how Jews, Christians, and Muslims can worship the same universal deity, yet find themselves in conflict with one another, often to the point of demonizing adherents of another tradition? How can Jews consider Abraham the first Jew, Christians regard him as the first Christian, and Muslims look upon him as the first Muslim? How can each put forth exclusive claims to truth, to what is required of women and men, and to control of sacred sites such as Jerusalem? This course explores the ways in which communities of Jews, Christians, and Muslims came to define themselves and by extension those outside their religious community through the production and subsequent interpretation of “authoritative texts,” including the Hebrew Bible, the (Christian) Bible, and the Arabic Qur’an. We will try to understand their tremendous diversity and elasticity, the features that unify adherents; and how views of the ‘other’ from within each tradition vary across time.

NES 2655 Introduction to Islamic Civilization (also HIST 2530, RELST 2655) @ (HA-AS)

Fall. 3 credits. D. Powers. Considers the major themes of Islamic civilization as they developed from the lifetime of Muhammad until the 20th century. While the readings provide the student with the chronology of Islamic history, lectures are devoted to an analysis of thematic units, such as art and architecture, science, and cities. The class meets three times weekly, and the classroom format is that of a lecture/discussion in which students are encouraged to participate actively. Lectures are accompanied by slide presentations when appropriate.

NES 2661 Ancient Ships and Seafaring—Introduction to Nautical Archaeology (also ARKEO/JWST 2661) # @ (HA-AS)

Fall. 4 credits. C. Monroe. A survey of the history and development of ships and seafaring as revealed by shipwrecks, boat burials, texts, art, and other evidence. The role of nautical technology and seafaring among the maritime peoples of the ancient Mediterranean world—Canaanites, Minoans, Mycenaeans, Phoenicians, Hebrews, Greeks, and Romans—and the riverine cultures of Mesopotamia and Egypt is addressed. The survey stretches from the earliest evidence for Mediterranean seafaring around 10,000 BCE to the first millennium BCE. In the first century CE, including Arab, Viking, and European explorers, and the birth of modern capitalism in the Italian Maritime Republics. Along the way, economic, political, and social interaction, contact, Minoans, Mycenaeans, Phoenicians, Hebrews, Greeks, Romans, Mesopotamia, and Egypt, are discussed.

NES 2668 Ancient Egyptian Civilization (also ARKEO/JWST 2668) # @ (HA-AS)

Spring. 3 credits. C. Monroe. The course surveys the history and culture of pharaonic Egypt from its prehistoric origins down to the early first millennium BCE. Within a chronological framework, the following themes or topics will be considered: the development of the Egyptian state (monarchy, administrative organization, class, gender and family, slavery, economic factors, and empire and international relations).

NES 2674 History of the Modern Middle East: 19th-20th Centuries (also JWST 2674, GOVT 2747) @ (HA-AS)

Fall. 3 credits. Z. Fahmy. This course will study themes in the political, social, cultural, and religious history of the Jews of the Middle East (3rd-6th centuries CE). Utilizing rabbinic sources (primarily from the Palestinian Talmud); material sources (such as synagogues, mosaics, inscriptions, and artifacts), but also piyut, Roman, and Christian sources, and lists of the priestly courts, it will explore the evolution of the Jewish settlement in this region. Topics to be studied will include synagogue and communal structure, Jewish priesthood, Hellenism, rabbinization, Christianization; the patriarchate, revolts, ethnic and social tensions; and attitudes toward the Roman Empire.

NES 2677 The Jewish Galilee in Late Antiquity (also ASIKEU/JWST/RELST 2677, CLASS 2637) @ (HA-AS)

Fall. 3 credits. G. Herman. This course will study themes in the political, social, cultural, and religious history of the Jews of the Galilee in late antiquity (3rd-6th centuries CE). Utilizing rabbinic sources (primarily from the Palestinian Talmud); material sources (such as synagogues, mosaics, inscriptions, and artifacts), but also piyut, Roman, and Christian sources, and lists of the priestly courts, it will explore the evolution of the Jewish settlement in this region. Topics to be studied will include synagogue and communal structure, Jewish priesthood, Hellenism, rabbinization, Christianization; the patriarchate, revolts, ethnic and social tensions; and attitudes toward the Roman Empire.

NES 2699 History of the Ottoman Empire, 1300-1922 # (HA-AS)

Spring. 3 credits. A. Karakaya-Stump. The Ottoman Empire was one of the longest-lasting empires in world history, ruling over a large portion of the Middle East and the Balkans for nearly six centuries. It figures as a major power in the history of both Europe and the Islamic world. This course is an introductory survey of the history of the empire from its origins as a small principality in medieval Anatolia to a leading world power in the 16th century that succumbed to its eventual disintegration by the end of World War I. It explores the major events of Ottoman political history, the main economic, social, and cultural institutions of the Ottoman state and society, and some recent trends in Ottoman historiography including debates on the origins and decline of the Ottomans, and the growing research on Ottoman women.

NES 2724 Introduction to Hebrew Bible (also JWST/RELST 2724) (LA-AS)

Fall. 3 credits. L. Monroe. The Hebrew Bible (also Testament) is a repository of ancient Israelite religious, political, social, historical, and literary traditions. For the modern reader these ancient traditions are often obscured by a focus on the text as revelation. The purpose of this course is to introduce students to the biblical world by reading the Hebrew Bible in translation, on its own terms, as a body of literature that evolved in an ancient Near Eastern context. The Bible itself will be the primary text for the course, but students will also be exposed to the rich and diverse textual traditions of the ancient Near East, including Mesopotamia, Egypt, Mesoopotamia, and Ugarit. In addition, this course will explore the impact of early biblical interpretation on shaping the monotheistic traditions inherited in the West. As participants in a secular course on the Bible, students will be challenged to question cultural assumptions about the composition and authorship of the Bible, and will be expected to differentiate between a text's content and its presumed meaning.

NES 2728 Introduction to Modern Middle Eastern Literature (also COML 2728) (LA-AS)

NES 2735 Jews and Arabs in Contact and Conflict (also JWST 2735, COML 2450) @ (CA-AS)

Spring. 3 credits. D. Starr. An introduction to representations of Jewish-Arab relations from the beginning of the 20th century to the aftermath of the 1967 Arab-Israeli War. We will discuss the historical and social contexts of these relations beginning with the cultures of the Jews in the Arab World, and the rise of nationalist movements among Jews and Arabs. We will then focus on length on the repercussions of two watershed moments that transformed the nature of interactions between Jews and Arabs: the Arab-Israeli wars of 1948 and 1967. The majority of class time will be devoted to discussing literary works and films by and about Jews from Arab countries, Zionist immigrants to Palestine, and Israelis from a variety of backgrounds, as well as Palestinians in Mandatory Palestine, in Israel, in the diaspora, and under Israeli occupation. Readings include the novels My Name is Mary Arons by O'Farrell, The Outrigger by Sahar Khalifeh, as well as poetry, short stories, and memoirs. We will also discuss feature films such as Hill 24 Doesn't Answer, Chronicle of a Disappearance, and Summer in La Goulette. These texts will provide the groundwork for understanding how these cultures see and represent themselves and the “other” at critical historical moments. Primary source documents and critical studies will also provide the historical, cultural, and political frameworks for our discussions.

NES 2734 Introduction to Near Eastern Civilization: The Literature of Princes, Prophets, and Poets (also COML 2734) @ (LA-AS)

Fall. 3 credits. Next offered 2011-2012. S. M. Toorawa.

NES 2793 Middle Eastern Cinema (also COML/FILM 2930, JWST 2793, VISST 2193) @ (LA-AS)

NES 3505 By the Rivers of Babylon (also ARKEO/JWST/RELST 3505)

Spring. 4 credits. G. Herman. This course will introduce and explore the history and culture of Babylonian “talmudic” Jewry from the formative Parthian era until the Muslim conquest. Among the sources to be
studied: Josephus, the Palestinian and Babylonian Talmuds, Aramaic incantation bowls, Zoroastrian and eastern Christian sources, as well as archaeological evidence and Sassanian epigraphic sources and images. Topics to be addressed will include communal organization and Persian culture among the Jews, religious tolerance and intolerance, Jewish leadership, relations with Palestine. Methodological issues taught will include the use of rabbinic sources for historical analysis, earlier and current approaches to the use of rabbinic material.

[NES 3524/6524] Israelite Prophecy (also JWST/RELST 3524) @ # (LA-AS) Spring. 4 credits. Next offered 2011–2012. L. Monroe.]

[NES 3551] Law, Society, and Culture in the Middle East (also HIST 3651/6551, NES 6551) @ # (CA-AS) Spring. 4 credits. No prerequisites. Next offered 2011–2012. D. Powers.]

[NES 3555] Science Fiction: Medieval and Modern # (CA-AS) Fall. 4 credits. S. Toorawa. Many prominent writers of science fiction, fantasy, and alternate history have long had recourse to the texts, cultures, and topographies of the Near and Middle East, and many early Near Eastern texts and tales are examples of speculative fiction. In this course, we will survey the science fiction genre through works from, about, and depicting the Near East. Our journey will begin with material from medieval and classical Jewish, Christian, and Islamic tradition. Modern readings and viewings will include Neil Gaiman’s graphic novel Sandman; Frank Herbert’s Dune; episodes of the TV series Trek: The Next Generation; Ursula Le Guin’s Wizard of Earthsea; The Matrix; and stories and novels by George Alec Effinger, Leila Aboulela, Jon Courtenay Grimwood, and Philip K. Dick. All material will be in English.

[NES 3587] Quran and Its Interpreters (also REL 3587) @ # (CA-AS) Fall. 4 credits. D. Powers. In this course, we will read and analyze the Qur’an (in English translation), with attention to the following topics: the collection and redaction of the text; Qur’an recitation, structural, linguistic, and literary features of the text; occasions of revelation and abrogation; major themes; law in the Qur’an; and modes of interpretation. Knowledge of Arabic is not required.

[NES 3588] Biblical Archaeology (also JWST/RELST 3588) @ # (CA-AS) Spring. 4 credits. L. Monroe. The purpose of the course is to place the Bible within the context of a larger ancient world that can be explored by systematic excavations and research. Students will become familiar with archaeological excavations and finds from ancient Syria-Palestine from 10,000 BCE to 586 BCE. We will explore this archaeological evidence on its own terms, taking into consideration factors such as archaeological method and the interpretive frameworks in which the excavators themselves work, as well as the implications of this body of evidence for understanding the complexity and diversity of biblical Israel.

[NES 3600] History of the Holocaust (also HIST/JWST 3700) (HA-AS) Spring. 4 credits. V. Caron. For description, see HIST 3700.

[NES 3633] Christianization of the Roman World (also CLASS/HIST/RELST 3625) @ # (LA-AS) Fall. 4 credits. Next offered 2012–2013. E. Rebillard.

[NES 3661] Sumerian Language and Culture I (also ARKEO/JWST 3661/6661, HIST/RELST 6661) @ # (LA-AS) Fall. 4 credits. D. I. Owen. This course focuses on an intensive introduction to Sumerian language and grammar with additional readings in literature in translation. Particular emphasis will be placed on the reading and interpretation of original texts from the Cornell collection and their use in the reconstruction of Mesopotamian history and culture in the third millennium BCE.

[NES 3662] Sumerian Language and Culture II (also JWST/ARKEO 3662) @ # (LA-AS) Spring. 4 credits. Prerequisite: NES 3661. D. I. Owen.

[NES 3670] History of Modern Egypt (also HIST 3760) (HA-AS) Spring. 3 credits. Z. Fahmy. This lecture course will explore the sociocultural history of modern Egypt from the late 18th century to the present. We will explore Egyptian history under the Ottomans and the Mamluks, the unsuccessful French attempt to colonize Egypt, and the successful British occupation of the country. We will then examine the development of Egyptian nationalism from the end of the 19th century through Nasser’s pan-Arabism to the current Mubarak regime. We will accomplish this with the aid of a variety of texts and media, including novels and films.

[NES 3690] History and Culture of Ur (also ARKEO/JWST 3690) @ # (HA-AS) Fall. 4 credits. D. I. Owen.

Ur was one of the major cities in Sumer and Babylonia for nearly two millennia. The course will focus on the city and its history and culture of the region, the biblical tradition, and particularly the third Dynasty of Ur.

[NES 3697] Israeli-Palestinian Conflict (also GOVT 3977, HIST/SOC 3970, JWST 3697) @ # (HA-AS) Spring. 4 credits. Next offered 2011–2012. R. Brann.

[NES 3720] Women in Ancient Israel (also JWST/RELST 3670, FGSS 3220) @ (LA-AS) Fall. 4 credits. Prerequisite: at least one college-level course on the Bible. L. Monroe.

This course will employ a range of methods in approaching the subject of women in ancient Israel. We will use biblical, archaeological, and ancient Near Eastern textual evidence to re-examine aspects of the lives of Israelite women, concentrating on their economic, religious, social, and political roles. We will analyze the portrayals of women in biblical prose and poetry and will consider the ways in which women function in biblical narrative, from a literary critical standpoint. In addition, this course will examine how the roles of women in ancient Israel have been understood and integrated in later Jewish and Christian thought, and it will address the strengths and weaknesses of so-called ‘feminist’ approaches to the Hebrew Bible.

[NES 3723] The Arabian Nights: Then and Now (also COML 3723/6723, NES 6723) @ # (LA-AS) Spring. 4 credits. No prerequisites. S. M. Toorawa.

The medieval Arabic cycle of stories known as The Arabian Nights on The Thousand and One Nights is a classic of world literature. In the first half of the course we will read the Nights and discuss both its dominant themes—deceit, love, sex, revenge, violence, and justice—and its storytelling contexts and antecedents (e.g., the Sanskrit Jataka Tales and the Middle Persian Tales of Bidpai). And in the second half, we will explore the ways in which its themes and tales have been adapted and appropriated by authors such as Jan Potocki in Polish, Edgar Allan Poe and John Barth in English, Jorge Luis Borges in Spanish, and Naguib Mahfouz in Arabic itself. All material is in English translation.

[NES 3742] Arab Women Writers (also COML/FGSS 3742, NES 6742) Spring. 4 credits. D. Stark.

In this course, we will discuss a selection of works of modern fiction, nonfiction, and poetry by female Arab writers. These readings address a range of issues that have motivated women writers and thinkers in the Arab world through the 20th century and into the 21st century. Among the themes we will trace across the texts are Arab feminisms; appeals for political and social freedoms; confrontations with violent states, in migration, displacement, exile; women’s bodies and sexuality; family life; and the pressures and comforts of religion, tradition, and community. While the majority of the course will be devoted to analyzing texts originally written in Arabic, we will also...
discuss some significant works by Arab women who write in French and English. Readings will include the novels *The Open Door* by Latifa al-Zayyat, *The Story of Zahra* by Hanan al-Shaykh, *Fantasia* by Assia Djebar, and *Memory in the Flesh* by Ailam Musulmahan. All readings will be in English.

**NES 3747 Hollywood on the Nile**

Fall. 4 credits. D. Starr.

Through the 20th century, Cairo was an important center of media production for the entire Arab world. The productions of the film industry in its early decades—from the 1930s to the 1950s—reflect the impact of American cinema, earning Cairo the reputation as “Hollywood on the Nile.” This course will trace the development of the Egyptian film industry from those early years, through the “Golden Age” during the Nasser era, to the rise of gritty urban films in the 1970s and beyond. We will conclude with a discussion of the present-day crisis in the Egyptian film industry. Along the way, we will pay particular attention to the lengthy career of Egypt’s most well-known director, Youssef Chahine. We will discuss films representing a range of genres produced from the 1940s to the present. This course offers two tracks that will meet simultaneously under the same course number.

Track 1 (English): All films will be screened with English subtitles and all readings will be in English. No knowledge of Arabic is required. Track 2 (for advanced Arabic students): Students in track 2 will participate in class discussions in English with students from track 1. Track 2 students will be assigned additional reading in Arabic, appropriate to their language level, and will meet regularly with the professor outside of class. For purposes of assessment, readings in Arabic are considered the equivalent of one paper; students in track 2 will be exempt from one writing assignment.

**NES 3759 Romanesque and Early Gothic Art and Architecture: Europe and the Mediterranean, 900-1150**

Fall. 4 credits. D. Patel.

For description, see ARTH 3300.

**NES 3799 Imagining the Other: Jews and Arabs in Contemporary Latin America**

Fall. 4 credits. Next offered 2011–2012.

For description, see COM/LJST 3799.

**NES 3844 Islamic Politics (also GOVT 3344)**

Fall. 4 credits. Next offered 2011–2012.

For description, see GOVT 3344.

**NES 3850 Middle Eastern Politics (also GOVT 3313)**

Spring. 4 credits. D. Patel.

For description, see GOVT 3313.

**NES 3905 Music of Egypt and Turkey**

Spring. 4 credits. E. Bates.

For description, see MUSIC 3305.

**NES 3914 Middle Eastern Music Ensemble (also MUSIC 3614)**

Fall and spring. 1 credit each semester. Limited to 40 students. Prerequisite: permission of instructor. G. Holst-Warhaft.

For description, see MUSIC 3614.

**NES 4101 Modern Hebrew Literature (also JWST 4101)**

Spring. 4 credits. Satisfies Option 1. Prerequisite: NES 4100 or equivalent. Students who successfully completed 3102 may enroll with permission of instructor. Next offered 2011–2012. Staff.

**NES 4501 Islam in Africa and Diaspora**

Spring. 4 credits. A. Mazrui.

For description, see ASRC 4201.

**NES 4550 The World of the Phoenicians (also JWST 4550)**

**NES 4560 Theory and Method in Near Eastern Studies (CA-AS)**

Spring. 4 credits. Requirement for NES majors. Z. Fahmy.

Seminars offering advanced Near Eastern Studies students the opportunity to read and discuss the range of theories and methods that have been employed by scholars in the interdisciplinary area of Near Eastern Studies. After giving attention to the historical development of area studies programs—and their current status and relevance—students will read a wide range of highly influential works in Near Eastern Studies. Literary theory, historiography, post-colonialism, archaeology, gender theory, and comparative religions are a few of the approaches, methods, and theories explored. Authors include Talal Asad, Homi K. Bhabha, Mircea Eliade, Timothy Mitchell, Mary Douglas, Zachary Lockman, Edward Said, and J. Z. Smith.

**NES 4605 Contesting Identities in Modern Egypt (also HIST 4091)**

Fall. 4 credits. Next offered 2011–2012. Z. Fahmy.

**NES 4630 Women and Gender in Middle Eastern History (also FGSS 4632)**

Fall. 4 credits. A. Karakaya-Stump.

The focus of this course will be on the lives of women in premodern Islamicate societies of the Middle East. It will examine changes in gender concepts and relations from a historical perspective and with an eye on the diversity of women's experiences, depending on regional background, ethnicity, religious affiliation, and socioeconomic class in rural and urban settings. Topics to be considered include ideal models for womanhood and gender relations according to Islamic precepts and how they were negotiated across time and space; elite women versus ordinary women in terms of their constraints, rights, and opportunities; politics of marriage and reproduction; gendered spaces and popular culture; Western images of Muslim women; the impact of European imperialism upon gender relations in Middle Eastern societies; and women's press and feminist movements during the late 19th and early 20th centuries.

**NES 4639 Readings in Arabic Historical Texts (also RELST 4639)**

**NES 4640 Suffering and the Early Christian Imagination:**

Apocalypticism, Gnosticism, and Asceticism (also JWST/RELS 4640)

Spring. 4 credits. K. Ham Ritten.

How is it that religion may be both a cause of and cure for suffering? In what ways might different religious ideologies be understood as responses to suffering? Such questions are the big issues at stake in this course, which focuses very specifically on three ideologies that emerged in early Christianity: apocalypticism, “gnosticism,” and asceticism. Although we might normally think of persecution and martyrdom as fundamental to early Christianity, ideologies that emphasized the coming end of the world, those that emphasized the divine element within humans, and those that disciplined the body through celibacy, fasting, and other practices came to shape diverse responses to pain, alienation, and suffering in early Christianity. Our readings will focus on some of the writings in the New Testament, the “gnostic” literatures, and monastic texts as well as theoretical writings on the problem of suffering and religion.

**NES 4642 Women in the Modern Middle East (also FGSS 4640, HIST 4642)**

**NES 4644 Late Bronze Age World of Ugarit (also ARKEO/HIST/JWST 4644, CLASS 4744)**

**NES 4666 Mass Media and Identities in the Modern Middle East (CA-AS)**

Fall. 4 credits. Next offered 2011–2012. Z. Fahmy.

**NES 4670 Power and Wealth in the Ancient Near East (also JWST 4670)**

Fall. 4 credits. C. Monroe.

How were wealth and power created and distributed in the ancient Near East and neighboring regions? This seminar addresses this question by using archaeological, anthropological, sociological, and historical approaches to problematize the rise and fall of early civilizations. The course begins by introducing students to the intellectual development of historical materialism in Smith, Marx, Weber, Sombart, and Mauss, and traces their influence on later socioeconomic historians such as Polanyi, Finley, Braudel, and Wallerstein. Current approaches deriving from world-systems, economic anthropology, and game theory are also applied to case studies and comparisons thereof. Case studies will likely include 4th-millennium Mesopotamia (Uruk), the Ur III state, Hittite and Old Assyrian trade, pharaonic Egypt, the late Iron Age, Aegean palatial civilization, and the Phoenicians. The instructor will provide context and clarification for the specialist readings on these civilizations, but prior course work in ancient studies will be advantageous in the preparation of presentations and discussions.

**NES 4717 Medieval Arabic Poetry (also NES 6717)**

Fall. 4 credits. S. Toyoura.

In this course we explore the splendor of medieval Arabic poetry—in English translation—through 12 poets in the pantheon, including the Arabian al-Khansa, renowned for elegies on her brothers slain in battle; the
Baghdad poets Abu Nuwas, lover of wine and boys, and Abu Tammam, patronized poet of the Abbasid court; al-Mutanabbi, the Syrian “would-be-prophet,” praiser, and satirizer of princes; the Iberian Ibn Zaydun, one-time vizier and lover of the poetess Waladla; and the Egyptian mystical poet, Ibn al-Farid. In addition to learning about the lives and milieu of these and other poets, we will focus on one or more of their most celebrated poems. (An option will be available for students interested in reading the poems in Arabic.)

PHILOSOPHY

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 1000s or 2000s is suitable for beginning study in the field. Sections of PHIL 1100, 1120, and 1130 are part of the first-year writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (17 students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take PHIL 1100, but many students with special interests may find that the best introduction to philosophy is a 2000-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to first-year students.

The Major
Students expecting to major in philosophy should begin their study of it in their freshman or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student’s work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses, taken for a letter grade, are required for the major. They must include at least one course on ancient philosophy (PHIL 2200, or a course with a large component on Plato or Aristotle), at least one course on classical modern metaphysics and epistemology from Descartes through Kant (e.g., PHIL 2220, or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 3000. Students admitted to the major are required to take a minimum of six philosophy courses numbered above 2000 and may not count more than one section of PHIL 1110, 1120, or 1130 toward the major. Courses numbered in the 1900s, 2000s, and 3900s do not count toward the major. A course in formal logic (e.g., PHIL 2310), while not required, is especially recommended for majors or prospective majors.

Philosophy majors must also complete at least 8 credits of course work in related subjects approved by their major advisor. Occasionally majors may serve as teaching or research aides, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B– or better for all work in philosophy. In either or both semesters of the senior year a candidate for honors enrolls in PHIL 4900/4901 and undertakes research leading to the writing of an honors essay by the end of the final semester. Honors students normally need to take PHIL 4900/4901 both semesters of their senior year to write a satisfactory honors essay. PHIL 4900/4901 does not count toward the eight philosophy courses required for the major. Prospective candidates should apply at the Department of Philosophy office, 218 Goldwin Smith Hall.

Fees
In some courses a small fee may be charged for photocopying materials to be handed out to students.
Aristotle.

A survey of Western philosophy in the 17th and 18th centuries: Descartes, Locke, Spinoza, Leibniz, Berkeley, Hume, and Kant. We focus largely on epistemology (ideas, skepticism, belief, knowledge, science) and metaphysics (bodies, minds, God, causation, natural laws, afterlife, personal identity). Some of the ethical implications of these systems will also be mentioned in passing.

Intermediate and Advanced Courses

PHIL 3200 Plato (also CLASS 3669) # (KCM-AS)
Fall. 4 credits. Prerequisites: at least one previous course in philosophy at 2000 level or above; or permission of instructor. T. Brennan.

We will study several of Plato's major dialogues, including the Apology, the Meno, Phaedo, and Republic. Topics include knowledge and reality; morality and happiness; and the nature of the soul.

PHIL 3203 Aristotle (also CLASS 3664) # (KCM-AS)
Spring. 4 credits. Prerequisite: at least one previous course in philosophy at the 2000 level or above; or permission of the instructor. T. Brennan.

We will study several of Aristotle's major works, including the Categories, Physics, Posterior Analytics, Metaphysics, and Nicomachean Ethics. Topics include nature and change, form and matter, the nature of happiness, the nature of the soul, and knowledge and first principles.

PHIL 3210 Medieval Philosophy (also RELST 3150) # (KCM-AS)
Spring. 4 credits. G. Brenkman.

A selective survey of Western philosophical thought from the fourth to the fourteenth century. Topics include the problem of universals, the theory of knowledge and truth, the nature of free choice and practical reasoning, and philosophical theology. Readings (in translation) include Augustine, Boethius, Anselm, Abelard, Aquinas, Scotus, and Ockham. Some attention will be given to the development of ideas across the period and the influence of non-Western traditions on the West.

PHIL 3221 Modern Empiricism
Spring. 4 credits. N. Sturgeon.

For description, see department web site.

PHIL 3230 Kant # (KCM-AS)
Fall. 4 credits. M. Kosch.

An intensive study of the metaphysical and epistemological doctrines of the Critique of Pure Reason. Some editions of the course may also consider Kant's ethical views as laid out in the Groundwork of the Metaphysics of Morals and related works.

PHIL 3300 The Foundations of Mathematics (also MATH 3840) (MQR)
Fall. 4 credits. H. Hodges.

This will be a course on the set theory of Zermelo and Fraenkel: the basic concepts, set-theoretic construction of the Natural, Integral, Rational and Real Numbers, cardinality, and time permitting, the ordinals. Text: Enderton's Elements of Set Theory.

PHIL 3310 Deductive Logic (also MATH 2810) (MQR)
Spring. 4 credits. Prerequisite: PHIL 2310 or permission of instructor. H. Hodges.

A mathematical study of the formal languages of propositional and predicate logic, including their syntax, semantics, and deductive systems. Various formal results will be established, most importantly soundness and completeness.

PHIL 3410 Ethical Theory (KCM-AS)
Spring. 4 credits. N. Sturgeon.

Topic: Consequentialism and Its Critics. This course will examine one of the deepest divides in modern philosophical debates about ethics,
between those who think the moral evaluation of acts, character traits, and social institutions ultimately depends solely on their good or bad consequences, and critics who find this approach fundamentally misguided.

[PHIL 3700 Problems in Semantics (also COGST 3330, LING 3333) (KCM-AS)]
Fall. 4 credits. Next offered 2011–2012. D. Abusch. For description, see LING 3333.

PHIL 3710 Philosophy of Language (also LING 3332)
Spring. 4 credits. M. Eklund.
An introduction to some of the main issues in the philosophy of language. Topics may include names, definite descriptions, belief ascriptions, truth-conditional theories of meaning, pragmatics, and metaphor. Both historical and contemporary readings are considered.

PHIL 3810 Philosophy of Science (also STS 3811) (KCM-AS)
Fall. 4 credits.
This course will cover various topics in the philosophy of science.

PHIL 3900 Independent Study
Fall or spring. Variable credit.
To be taken only in exceptional circumstances. Must be arranged by the student with his or her advisor and the faculty member who has agreed to direct the study.

Advanced Courses and Seminars

These courses are offered primarily for majors and graduate students.

PHIL 4003 German Philosophical Texts
Fall and spring. 4 credits. Prerequisites: basic reading (not necessarily speaking) knowledge of German and permission of instructor. Open to upper-level undergraduates. M. Kosch.
Reading, translation, and English-language discussion of important texts in the German philosophical tradition. Readings for a given term are chosen in consultation with students.

PHIL 4200 Topics in Ancient Philosophy (also CLASS 4662) (KCM-AS)
Fall and spring. 4 credits. M. Koch.
Advanced discussion of topics in ancient philosophy.

PHIL 4240 Topics in German Philosophy (also GERST 4170)
Spring. 4 credits. M. Koch.
See department web site for description.

PHIL 4310 Mathematical Logic (also MATH 4810) (MQR)
Fall. 4 credits. Prerequisites: MATH 2220 or 2250 and preferably some additional course involving proofs in mathematics, computer science, or philosophy.
For description, see MATH 4810.

PHIL 4311 Topics in Logic (also MATH 4820) (MQR)
Fall. 4 credits. H. Hodes.
This course will focus on intuitionistic logic, including (1) its relationships to classical logic, some “intermediate logics” between intuitionistic and classical, and a modal logic. We’ll consider (2) both proof-theoretic and model-theoretic characterizations of the consequence relations for these logics, (3) algebraic/topological (and time permitting, categorical) characterizations of intuitionistic consequence. (4) We’ll also look at how certain mathematical theories have been developed on the basis of intuitionistic logic.

PHIL 4460 Topics in Political Philosophy (KCM-AS)
Fall. 4 credits. E. Taylor.
Advanced discussion of topics in political philosophy.

PHIL 4470 Contemporary Political Philosophy (also GOVT 4655) (KCM-AS)
Spring. 4 credits. R. Miller.
See department web site for description.

PHIL 4610 Epistemology (KCM-AS)
Spring. 4 credits. Co-meets with PHIL 6610. N. Silins.
An intensive seminar on a special topic in epistemology to be determined by the instructor. Potential topics include: What are the limits of knowledge? What is the extent and nature of our knowledge of our own minds? How do we gain knowledge through particular sources such as perception, testimony, memory, reason? Readings may be drawn from historical or contemporary sources.

PHIL 4640 Topics in Metaphysics (KCM-AS)
Spring. 4 credits. D. Pereboom.
Advanced discussion of a topic in metaphysics.

PHIL 4720 Pragmatics (also LING 4425) (KCM-AS)
Spring. 4 credits. Prerequisite: LING 3303 or PHIL 2310, or permission of instructor. D. Abusch.
For description, see LING 4425.

PHIL 4810 Problems in the Philosophy of Science (also STS 4811) (KCM-AS)
Fall. 4 credits. R. Boyd.
Advanced discussion of some problem or problems in the philosophy of science. Topic: Neo–Kantian/Hegelian Analytic Philosophy.

PHIL 4900/4901 Informal Study for Honors
Fall and spring. 4 credits. Prerequisite: senior honors students.
See “Honors” at the beginning of the Philosophy section.

PHIL 5030 German Philosophical Texts (also GERST 6131)
Fall and spring. Variable credit. Open to upper-level undergraduates. Prerequisite: basic reading (not necessarily speaking) knowledge of German. M. Kosch.
Reading, translation, and English-language discussion of important texts in the German philosophical tradition. Readings for a given term are chosen in consultation with students.

PHIL 6200 Seminar in Ancient Philosophy (also CLASS 7173)
Fall, spring. 4 credits. Fall, G. Fine; spring, T. Brennan.
Graduate seminar covering a topic in ancient philosophy.

PHIL 6210 Seminar in Medieval Philosophy
Fall and spring. 4 credits. G. Pini.
Graduate seminar covering a topic in medieval philosophy.

PHIL 6239 Kant’s Political Reason (also GERST 6940)
Spring. 4 credits.
For description, see GERST 6940.

PHIL 6410 Seminar in Ethics and Value Theory
Fall. 4 credits. N. Sturgeon.
Graduate seminar covering a topic in ethics and value theory.

PHIL 6430 Seminar in Social and Political Philosophy
Spring. 4 credits. Prerequisite: permission of instructor. R. Miller.
This seminar will address the leading questions of what we should do about climate change. What level of climate change is sufficiently safe? What level of CO2 is a feasible goal? What are the requirements of equity—social, international, and intergenerational—in climate change policy? What ways of assessing costs and benefits are economically, ecologically, and ethically defensible? What kinds of policies and technologies are best suited to meeting the greenhouse challenge? How will social, economic, and political processes, national and international, shape the response? The seminar will be highly interdisciplinary and will include both graduate students and faculty, from many relevant departments.

Graduate students are expected to come to all meetings, faculty to come to at least half.) Major figures in the global response to climate change will come to Cornell to lead half of the seminar discussions. Each will also give a public lecture (typically on Monday) and will be available for informal interaction with members of the seminar and the Cornell community as a whole.

PHIL 6996 Justice and Equality (also GOVT 6796)
Fall. 4 credits. A. Smith.
For description, see GOVT 6796.

PHYSICS

The concepts and methods of physics have an impact on nearly all areas of human endeavor. Thus, the Department of Physics offers courses in physics for the entire Cornell community. There are general education courses for nonscientists, well-designed introductory sequences for science and engineering majors, more advanced courses for physics majors, and rigorous programs of graduate study, up to doctoral-level independent research.

Undergraduate and graduate students benefit from an outstanding faculty and world-class research facilities in the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Elementary Particle Physics
Courses for Non-Physics Majors

- PHYS 1101–1102 is a self-paced auto-tutorial course sequence designed for students who recognize the need for a basic understanding of physics, but who do not have preparation in calculus and who do not intend to take further physics courses.
- PHYS 2207–2208 and 1112–2213–2214 are introductory physics courses for students who need a solid grounding in physics and a chance to develop their calculus-based problem-solving skills. Nonmajors considering more advanced work in physics are encouraged to take 1112–2213–2214.
- Courses beyond the introductory level that may be of interest to nonmajors include PHYS 3316 Modern Physics I, PHYS 3321 Modern Experimental Optics, and PHYS 3360 Electronic Circuits.
- General education courses currently include PHYS 1201 Why the Sky Is Blue: Astronomy, Physical World, PHYS 1203 Physics of the Heavens and Earth, and PHYS 1204 The Physics of Musical Sound.

Students may obtain advanced placement and credit, as outlined in "Advanced Placement of credit," as discussed in "Physics and mathematics courses at Cornell with all coursework at the B- level or higher. Grades of at least C- (or S for S-U only courses) are required in all courses counting toward the physics major.

Advising
Prospective majors are urged to meet with the Physics director of undergraduate studies for advice on advanced placement credit and on program planning. Based on their specific interests, students will be matched with a major advisor and form one of the undergraduate studies program. The student and major advisor will then work out the details of the major course program.

Courses for Physics Majors

The Physics Core—All physics majors must complete a core of physics and mathematics courses, as follows.

- A three-semester introductory physics sequence, either PHYS 1112–2213–2214, or its more analytic "honors" version 1116–2217–2218. PHYS 2207 students with life/chemical/health science interests who decide to switch to the physics major may complete 2207–2213–2214. A transition from 2208 to 2214 is also possible for students with very strong math backgrounds.
- Mathematics courses covering single and multivariable calculus, linear algebra, series representations, and complex analysis: MATH 1160 or 1120; 1920 or 2220 or 2240; 2940; and 2940 or 2210 or 2290; or their equivalents. Inside concentrators should complete at least one additional year of applicable mathematics such as AEP 3210 and 3220.
- Five upper-level courses beyond the three-semester introductory sequence, consisting of (1) the two-course sequence in modern physics (PHYS 3316–3317), (2) at least three semester hours of laboratory work selected from PHYS 3310, 3330, 3350, 4410, or ASTRO 4410 or AEP 2640; (3) an intermediate course in classical mechanics (PHYS 3314 or 3318); and (4) an intermediate course in electrodynamics (PHYS 3323 or 3327). Students who complete the 1112–2213–2214 introductory sequence are advised to complete the 1-credit course PHYS 2216 before taking PHYS 3316.

In addition to the core, each physics major must complete at least 15 semester hours of credit in an area of concentration that has been agreed upon by the student and major faculty advisor.

Concentration within Physics

Students planning professional or graduate work in physics are encouraged to take the more advanced and analytically rigorous versions of the core courses PHYS 1116, 2217, 2218, 3318, and 3327. Students with weaker high school preparation may start in PHYS 1112 and then switch to the advanced sequence in later semesters. The best-prepared students, who may qualify for advanced placement credit for PHYS 1112 and/or 2213, are still strongly encouraged to start with 1116.

For a concentration within physics, the minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 3000 or ASTRO 3332, ASTRO 4431–4432, or AEP 4340. These 15 hours must include the senior laboratory course PHYS 4410 in addition to one of the lab courses listed for the core, so that a physics concentration requires a minimum of 7 credit hours of laboratory work. The accompanying table shows some typical course sequences that fulfill the major requirements. The sequence followed by each student will depend upon his or her interests and precollege preparation, and will be determined in consultation with the major advisor. Students are advised to strongly consider taking PHYS 3341 and 4443. Majors are strongly encouraged to participate in the department’s research activities. If this activity is done as an independent project, PHYS 4490, up to 8 credit hours can be applied toward the concentration.

Concentration outside of Physics

For outside concentrations, the courses to be counted in the minimum 15 credit hours beyond the core must have internal coherence and lead to mastery in the area of concentration. The concentration must be worked out with and approved by the major faculty advisor. At least 8 of the 15 credit hours must be in courses numbered above 3000. Past areas of concentration include astronomy, business, chemical physics, computer science, econometrics, education, geophysics, history, and philosophy of science, law, meteorology, and public policy. A combined biology/physics concentration is common for premedical students or those who wish to prepare for work in biophysics. The department particularly wishes to encourage students with an interest in science education. Physics majors may obtain teaching certification by concentrating in education and then completing a one-year master of arts in teaching (M.A.T.) degree. Information about the education concentration and M.A.T. can be obtained from the Department of Education’s Cornell Teacher Education Program, from the physics department’s Teacher in Residence, or from the Physics director of undergraduate studies.

The core for students with outside concentrations may follow either PHYS 1112—
2213–2214, 3314, and 3323 or the advanced
1116–2217–2218, 3318, and 3327. Students
concentrating in astronomy who might
continue on to graduate school in that field
are encouraged to include ASTRO 4410, 4431,
and 4432 within the concentration.

Honors
A student may be granted honors in physics
upon the recommendation of the Physics
Advisors Committee of the physics faculty.
There is no particular course structure or
thesis requirement for honors.

Double Majors
Students are welcome to pursue a physics
major concurrently with another major; either
are encouraged to include ASTRO 4410, 4431,
courses that develop mastery in the needed
concentrating in astronomy who might
PHYS 1012 PHYS 1112 Supplement

Courses with Overlapping Content
The grouped courses listed in the chart below
have largely similar content. Students should
select courses for their academic program
carefully, as they may receive credit for only
one course in each group.

PHYS 1101, 1112, 1116, 2207
PHYS 1102, 2208, 2213, 2217
PHYS 2214, 2218
PHYS 3314, 3318
PHYS 3323, 3327
PHYS 1116, 2216
PHYS 2206, GOVT 3847

In addition, students with credit for PHYS
1101, 1112, 1116, or 2207, or an advanced
placement equivalent who wish to enroll in
PHYS 1201–1204 must obtain written
permission from the instructor and the Physics
director of undergraduate studies.

Course Prerequisites
Achieving success in a physics course is easier
if you have the proper preparation. Each
physics course description lists prerequisite
courses that develop mastery in the needed
mathematics and physics. Students who wish
to enroll in a course but lack the listed
prerequisites can often succeed with an
appropriate work plan, especially if they have
other relevant prior experience. These
students must discuss their preparation with
the course instructor and with their advisor
before enrolling.

Courses
PHYS 1012 PHYS 1112 Supplement
Spring. 1 transcript credit (will appear on
transcript, does not count toward
graduation). Counts toward semester's good
standing for students in Colleges of
Architectural Art and Planning,
Engineering, Hotel Administration,
and Human Ecology; does not count toward
semester's good standing for students in
Colleges of Agriculture and Life Sciences,
Arts and Sciences, and Industrial and Labor
Relations. S–U grades only. R. Lieberman.
Provides backup instruction for PHYS 1112.
Recommended for students who either feel
insecure about taking PHYS 1112 or simply
want to develop their problem-solving skills.
Emphasis is on getting the student to develop
a deep understanding of basic concepts in
mechanics. Much class time is spent solving
problems and applications.

PHYS 1013 PHYS 2213 Supplement
Fall. 1 credit. 1 transcript credit (will
appear on transcript, does not count toward
graduation). Counts toward semester's good
standing for students in Colleges of
Architectural Art and Planning,
Engineering, Hotel Administration,
and Human Ecology; does not count toward
semester's good standing for students in
Colleges of Agriculture and Life Sciences,
Arts and Sciences, and Industrial and Labor
Relations. S–U grades only. R. Lieberman.
Provides backup instruction for PHYS 2213.

PHYS 1101 General Physics I (PBS)
Fall, summer (eight-week, six-week, or
first four weeks only for those doing PHYS
1102 in the second four weeks). 4 credits.
Enrollment may be limited. (See list of
overlapping physics courses.) General introductory
physics for nonphysicists majors. Prerequisites:
three years high school mathematics,
including trigonometry. Students without
high school physics should allow extra time
for PHYS 1101. Includes less mathematical
analysis than PHYS 2207 but more than
PHYS 1201–1204. A. Giambattista.
Emphasizes quantitative and conceptual
understanding of the topics of introductory
physics developed without use of calculus.
The course is taught in a mastery-oriented
format with eight subject units and a final
retention (review) unit. Most instruction occurs
in the learning center where individualized
tutoring is available. Readings, problems,
laboratory exercises, videotaped lectures,
online tutorials, and sample tests are assigned
with a flexible schedule of deadlines. Unit tests
can be repeated with a limit of three test tries
per unit. Major topics for 1101: kinematics,
forces and dynamics, momentum, energy, fluid
mechanics, waves and sound, thermal physics,
kINETIC, and thermodynamics. At the
level of College Physics, third ed., by
Giambattista, Richardson, and Richardson.

PHYS 1102 General Physics II (PBS)
Spring, summer (eight-week, six-week, or
second four weeks only for those doing
PHYS 1101 in first four weeks). 4 credits.
Enrollment may be limited. (See list of
overlapping physics courses.) Prerequisite:
PHYS 1101 or 1112 or 2207. Includes less
mathematical analysis than PHYS 2208 but
more than PHYS 1201–1204. Staff.
Emphasizes quantitative and conceptual
understanding of the topics of introductory
physics developed without use of calculus.
The course is taught in a mastery-oriented
laboratory exercises, videotaped lectures,
online tutorials, and sample tests are assigned
with a flexible schedule of deadlines. Unit tests
can be repeated with a limit of three test tries
per unit. Major topics for 1102: electricity and
magnetism, optics, relativity, quantum, nuclear,
and particle physics. At the level of College
Physics, third ed., by Giambattista, Richardson,
and Richardson.

• For majors with concentrations outside physics, there is wide variation in individual programs,
arranged to best match the field of concentration.

• Crossovers between the two sequences 1112–2213–2214 and 1116–2217–2218 are possible,
although the combination 1112–2213–2218 is difficult. PHYS 2207 may be substituted for
PHYS 1112. Students taking 2217 after 1112 must co-register for 2216.

• Students taking the honors sequence 1116–2217–2218 are strongly encouraged to start with
PHYS 1116. Exceptionally well-prepared students may be able to begin work at Cornell with
PHYS 2217. Such students should visit the Director of Undergraduate Studies for advice in
planning a course program.

• Physics electives for the major include 3310, 3330, 3341, 3360, ASTRO 3352, 4431–2; AEP
4340, and all physics courses labeled 4000 and higher, the senior seminars 4481–4489, ASTRO
3332 or 4431–4432, and AEP 4340.

• One semester of intermediate laboratory, listed here as 3x05, is required.

• Well-prepared sophomores wishing to take PHYS 3318 should consult the instructor before
registering.

• Students interested in graduate work in physics immediately after Cornell are advised to begin
the introductory physics sequence in their first semester.
PHYS 1112 Physics I: Mechanics (PBS)
Fall, spring, summer (six-week session). 4 credits. Primarily for engineering students and prospective physics majors. (See list of overlapping physics courses.) Prerequisite: MATH 1910 or 1120. Recommended: coregistration in MATH 2010. Coregistration with MATH 1910 may be allowed by instructor in exceptional circumstances. Fall, P. Krasicky; spring, staff.

Contemporary physics includes the mechanics of particles with focus on kinematics, dynamics, conservation laws, central force fields, periodic motion. Mechanics of many-particle systems: center of mass, rotational mechanics of a rigid body, and static equilibrium. At the level of University Physics, Vol. 1, by Young and Freedman, 12th ed.

PHYS 1116 Physics I: Mechanics and Special Relativity (PBS)
Fall, spring. 4 credits. More analytic than PHYS 1112, intended for students who are comfortable with deeper, somewhat more abstract approach; intended mainly but not exclusively for prospective majors in physics, astronomy, or applied and engineering physics. (See list of overlapping physics courses.) Prerequisite: good secondary school physics course, proficiency with basic calculus (at level of MATH 1910 or 1120), and enjoyment of puzzle-solving. Corrective transfers between PHYS 1116 and PHYS 1112 (in either direction) encouraged during first three weeks of instruction. Fall, K. Shen; spring, staff.

At the level of An Introduction to Mechanics by Kleppner and Kolenkow.

PHYS 1117 Concepts of Modern Physics
Fall. 1 credit. Enrollment may be limited. Corequisite: PHYS 1112 or 1116 or 2213 or 2217. For freshmen who plan to major in physics, applied and engineering physics, or astronomy. S–U grades only. A. Sadoff.

Intended for freshmen who plan to major in physics or a closely related field (i.e., applied and engineering physics or astronomy) and would like to learn about the concepts of modern physics early in their physics education. Prerequisites: topics of discussions are scientific methodology, symmetry and conservation laws, quantum theory, the unification of forces and matter in the Standard Model, and big-bang cosmology.

PHYS 1190 Introductory Laboratory (Transfer Supplement)
Fall, spring. 1 credit. Limited enrollment. Prerequisites: 3 transfer credits for introductory physics lecture material; a degree requirement for laboratory component of that introductory course; approval of director of undergraduate studies; and permission of lecturer of that course at Cornell. Students must file PHYS 1190 permission form in 121 Clark Hall with physics department course coordinator. S–U grades only. Times TBA with instructor. Students perform the laboratory component of one of the introductory courses (PHYS 1112, 2207, 2208, 2213, 2214) to complement the lecture-related course credit acquired elsewhere. Those wishing to take equivalent of one of these introductory courses at another institution should receive prior approval from the physics director of undergraduate studies.

PHYS 2207 Fundamentals of Physics I (PBS)
Fall. 4 credits. Prerequisites: high school physics plus MATH 1110 or 1106, or solid grasp of basic notions of introductory calculus. (See list of overlapping physics courses.) M. Liepe.

PHYS 2207–2208 is a two-semester introduction to physics with emphasis on tools generally applicable in sciences, intended for students majoring in physical science, mathematics, or analytically oriented biological science. The combination of lectures illustrated with applications from the sciences, medicine, and everyday life, weekly labs tightly coupled to lectures that introduce
computer-aided data acquisition and analysis, and recitations that emphasize cooperative problem-solving, provide a rich exposure to the methods of physics and the basic analytical and scientific communication skills required by all scientists. Topical coverage includes mechanics, conservation laws, waves, and topics from thermal physics, fluids, acoustics, and materials physics. At the level of Fundamentals of Physics, Vol. I, eighth ed., by Halliday, Resnick, and Walker.
PHYS 2216 Introduction to Special Relativity
Fall, spring; classes held in first 5–7 weeks.
1 credit. Enrollment may be limited.
Coregistration in this course is a prerequisite for registration in PHYS 2217, unless student has taken a relativity course at level of PHYS 1116 or ASTRO 1106. Students cannot get credit for PHYS 2216 if they have taken PHYS 1116. (See list of overlapping physics courses.) Prerequisites: PHYS 1112 or 2207 or permission of instructor. S–U grades only.
Introduction to Einstein's Theory of Special Relativity, including Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum and energy, and relativistic invariance in the laws of physics. At the level of Introduction to Relativity by J. B. Kogut.

PHYS 2217 Physics I: Electricity and Magnetism (also AEP 2170) (PBS)
Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 1112 or 1116 and in mathematics and who desire more analytic treatment than that of PHYS 2213. Prospective physics majors and engineering physics majors encouraged to register. (See list of overlapping physics courses.) Prerequisites: MATH 1920, 2220, or 2240. Vector calculus is taught in this course, but previous contact, especially with the operations grad, div, and curl, is helpful. Therefore, coregistration with MATH 1920 may be allowed subject to instructor approval. It is assumed the student has seen special relativity at the level of PHYS 1110 or is currently enrolled in PHYS 2216. Fall, M. Wang; spring, C. Femino.

PHYS 2218 Physics II: Waves and Thermal Physics (PBS)
Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 1116 and 2217 and in mathematics and who desire more analytic treatment than that of PHYS 2213. Prospective physics majors are encouraged to register. (See list of overlapping physics courses.) Prerequisite: PHYS 2217 (with grade of B or higher). Students may benefit from exposure to differential equations at the level of MATH 2930 and/or concurrent enrollment in linear algebra (MATH 2940, 2210, or 2230). Fall, J. C. Davis; spring, staff.
The first part of the course introduces thermodynamics including heat engines, the Carnot cycle, and the concepts of temperature and entropy at the level of Thermal Physics by Schroeder. It continues with an introduction to statistical thermodynamics at the level of Statistical Mechanics by Glazer and Wark. The second part gives a thorough discussion of wave equations, including traveling waves, standing waves, energy, momentum, power, reflection, and transmission, interference, and diffraction. Wave equations on strings, sound, elastic media, and light. Covers solutions of these wave equations and Fourier series and transforms.

PHYS 3310 Intermediate Experimental Physics (PBS)
Spring, 3 credits. Enrollment may be limited. Prerequisite: PHYS 2208 or 2213. Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the PHYS 4410 lab are available for some experiments.

PHYS 3314 Intermediate Mechanics (PBS)
Spring, 4 credits. (See list of overlapping physics courses.) Prerequisites: PHYS 2208 or 2214; 2210 and MATH 2940 (or equivalent). Assumes prior introduction to linear algebra and Fourier analysis. Intended for physics majors. PHYS 3310 covers similar material but is aimed at students with exceptional backgrounds in physics/math. H. Tye. Topics include Lagrangian mechanics, Newtonian mechanics based on a variational principle, conservation laws from symmetries; two-body orbits due to a central force; analysis of scattering experiments; small amplitude oscillating systems including normal mode analysis; rigid body motion; motion in non-inertial reference frames; and non-linear behavior including chaos. Students not only become more familiar with analytic methods for solving problems in mechanics but also gain experience with computer tools. At the level of Classical Mechanics by John B. Taylor.

PHYS 3316 Basics of Quantum Mechanics (PBS)
Fall, spring. 3 credits. Prerequisites: PHYS 2214 or 2218, PHYS 1116 or 2216; and coregistration in at least MATH 2940 or equivalent. Assumes that majors registering in PHYS 3316 will continue with PHYS 3517. Fall, P. Wittich; spring, M. Liepe. Topics include breakdown of classical concepts in microphysics; light quanta and matter waves; Schrödinger equation and solutions for square well, harmonic oscillator, and the hydrogen atom; wave packets, scattering and tunneling effects, angular momentum, spin, and magnetic moments. At the level of An Introduction to Quantum Physics by French and Taylor.

PHYS 3317 Applications of Quantum Mechanics (PBS)
Fall, 3 credits. Prerequisite: PHYS 3316. I. Bazarov.
Covers a number of applications of quantum mechanics to topics in modern physics. Topics include: the single and multi-electron atoms, quantum statistical mechanics, molecular structure, quantum theory of metals, band theory of solids, superconductivity, nuclear structure, radioactivity, nuclear reactions, and elementary particle physics.

PHYS 3318 Analytical Mechanics (PBS)
Spring, 4 credits. (See list of overlapping physics courses.) Prerequisite: PHYS 1116 or permission of instructor; AEP 4210 or appropriate course(s) in mathematics. Intended for students with exceptional background in physics/math. PHYS 3314 covers similar material, while assuming less prior knowledge. Assumes prior exposure to Fourier analysis, linear differential equations, linear algebra, and vector analysis. Staff.
Covers Newtonian mechanics of particles and systems of particles, including rigid bodies, oscillating systems, gravitation and planetary motion, moving coordinate systems, Euler's equations, Lagrange and Hamilton formulations, normal modes and small vibrations, and perturbation theory. At the level of Classical Mechanics by Goldstein, Mechanics by Landau and Lifshitz, and Analytical Mechanics by Hand and Finch.

PHYS 3323 Intermediate Electricity and Magnetism (PBS)
Fall. 4 credits. (See list of overlapping physics courses.) Prerequisites: PHYS 2208 or 2213/2214 (or equivalent) and MATH 2930/2940 (or equivalent). Recommended: coregistration in AEP 4210 or appropriate mathematics course. Intended for physics majors. PHYS 3327 covers similar material, but is aimed at students with exceptional backgrounds in physics/math. H. Tye. Topics include electro/magnetostatics, boundary value problems, dielectric and magnetic media, Maxwell's Equations, electromagnetic waves, including guided waves, and sources of electromagnetic radiation. At the level of Introduction to Electrodymanics by Griffiths.

PHYS 3327 Advanced Electricity and Magnetism (PBS)
Fall. 4 credits. (See list of overlapping physics courses.) Prerequisites: PHYS 2217/2218 or permission of instructor. Corequisite: AEP 3210 or appropriate mathematics course(s) recommended for students with exceptional backgrounds in physics/math. PHYS 3327 covers similar material while assuming less prior knowledge. Makes extensive use of vector calculus, and some use of Fourier transforms and complex variables.
I. Cohen.
Covers electro/magnetostatics, vector and scalar potentials, multipole expansion of the potential solutions to Laplace's Equation and boundary value problems, time-dependent electrodynamics, Maxwell's Equations, electromagnetic waves, reflection and refraction, wave guides, retarded potential, antennas, relativistic electrodynamics, four vectors, Lorentz, and transformation of fields. At the level of Classical Electromagnetic Radiation by Heald and Marion.

PHYS 3330 Modern Experimental Optics (also AEP 3300) (PBS)
Fall. 4 credits. Limited enrollment. Prerequisite: PHYS 2214 or equivalent. G. Hoffstaetter.
A practical laboratory course in basic and modern optics. Students use lasers and basic optical bench equipment to cover a wide range of topics from geometrical optics to interference, diffraction, and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. Students are also introduced to digital imaging and image processing techniques. Five projects are prescribed and one last project defined and designed by the student with help from the instructor. At the level of Optics by Hecht.

PHYS 3341 Thermodynamics and Statistical Physics (PBS)
Fall. 4 credits. Prerequisites: PHYS 2214/2218, 3310, and MATH 2940/2210/2220/2310/2330/2340.
Covers statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Also covers concepts of temperature, laws of thermodynamics, entropy,
thermodynamic relations, and free energy. Applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems, and introduction of treatment of Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of Fundamentals of Statistical and Thermal Physics by Reif.

**PHYS 3360 Electronic Circuits (also AEP 3630) (PBS)**

Fall, spring. 4 credits. Prerequisites: undergraduate course in electricity and magnetism (e.g., PHYS 2208, 2215, or 2217) or permission of instructor. No previous electronics experience assumed, although course moves quickly through introductory topics such as basic DC circuits. Fall semester usually has smaller enrollment. S–U grade option available by permission of instructor for students who do not take the course for major. Fall, E. Kirkland; spring, I. Bazarov.

Practical electronics as encountered in a scientific or engineering research/development environment. Analyze, design, build, and test circuits using discrete components and integrated circuits. Analog circuits: resistors, capacitors, operational amplifiers, feedback amplifiers, oscillators, comparators, passive and active filters, diodes, and transistor switches and amplifiers. Digital circuits: combinational and sequential logic (gates, flip-flops, registers, counters, timers), analog to digital (ADC) and digital to analog (DAC) conversion, signal averaging, and computer architecture and interfacing. Additional topics may include analog and digital signal processing, light wave communications, transducers, and noise reduction techniques and computer-aided circuit design. At the level of Art of Electronics by Horowitz and Hill.

**PHYS 4400 Informal Advanced Laboratory**

Fall, spring. 1–3 credits. Variable. Prerequisites: two years physics or permission of instructor. P. McEuen. Experiments of widely varying difficulty in one or more areas, as listed under PHYS 4410; may be done to fill the student's special requirements.

**PHYS 4410 Advanced Experimental Physics (PBS)**

Fall, spring. 4 credits. Prerequisites: senior standing or permission of instructor; PHYS 2214 (or 3510 or 3660) plus 3518 and 3527, or permission of instructor. P. McEuen.

Selected topics in experimental concepts and techniques. About 60 different experiments are available in mechanics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. The student performs three to four different experiments, depending on difficulty, selected to meet individual needs and interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

**PHYS 4433 Introduction to Cosmology (also ASTRO 4433) (PBS)**

Spring. 4 credits. Prerequisites: math/calculus at 2000 level, physics at 3000 level. R. Bean.

For description, see ASTRO 4433.

**PHYS 4443 Intermediate Quantum Mechanics (PBS)**

Spring. 4 credits. Prerequisites: PHYS 3316, 3525, or 3527 or AEP 4210 or appropriate mathematics course(s); coregistration in PHYS 3314 or 3518; or permission of instructor. Assumes prior experience in linear algebra, differential equations, and Fourier transforms. Staff.

Provides an introduction to concepts and techniques of quantum mechanics, at the level of An Introduction to Quantum Mechanics by Griffiths.

**PHYS 4444 Introduction to Particle Physics (PBS)**

Spring. 4 credits. Prerequisite: PHYS 4443 or permission of instructor. Staff.

Covers the standard model of particle physics: behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors; and general symmetries and conservation laws. At the level of Introduction to Elementary Particles by Griffiths or Modern Elementary Particle Physics by Kane.

**PHYS 4445 Introduction to General Relativity (also ASTRO 4445) (PBS)**

Fall. 4 credits. Offered as an alternative to the more comprehensive, two-semester graduate sequence PHYS 6553 and 6554. L. McAllister.

One-semester introduction to general relativity that develops the essential structure and phenomenology of the theory without requiring prior tensor analysis. General relativity is a fundamental cornerstone of physics that underlies several of the most exciting areas of current research, including relativistic astrophysics, cosmology; and the search for quantum theory of gravity. The course briefly reviews special relativity, introduces basic aspects of differential geometry, including metrics, geodesics, and the Riemann tensor, describes black hole spacetimes and cosmological solutions; and concludes with the Einstein equation and its linearized gravitational wave solutions. At the level of Gravity: An Introduction to Einstein's General Relativity by Hartle.

**PHYS 4454 Introductory Solid-State Physics (also AEP 4500) (PBS)**

Fall. 4 credits. Prerequisite: PHYS 4443, AEP 3610, or CHEM 7930 highly desirable but not required. C. Fennie.

Introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, and/or superconductivity. At the level of Solid State Physics by Ashcroft and Mermin.

**PHYS 4455 Geometrical Concepts in Physics I**

Spring. 4 credits. Prerequisite: PHYS 3323 or equivalent and at least coregistration in PHYS 3318 or permission of instructor.

Usually offered every other spring. Most nonquantum theoretical theories are based on one or another form of geometry: Newtonian mechanics on Euclid, electromagnetism on Minkowski, general relativity on Riemann, string theory on higher dimensional geometries. This course surveys the unification of classical physics that accompanies the application of Hamilton's principle of least action to these various geometries. At the level of Geometric Mechanics by Talman.

**PHYS 4456 Introduction to Accelerator Physics and Technology (also PHYS 7656) (PBS)**

Spring. 3 credits. Prerequisites: PHYS 3323 or 3327 and PHYS 3514 or 3518. Next offered 2013–2014.

This course covers fundamental physical principles of particle accelerators and enabling technologies, with a focus on basic effects in linear and circular accelerations as used for elementary particle collision experiments and for X-ray sources. At the level of The Physics of Particle Accelerators by K. Wille.

**PHYS 4480 Computational Physics (also ASTRO 7690, PHYS 7680) (PBS)**

Spring. 3 credits. Assummes familiarity with standard mathematical methods for physical sciences and engineering (differential equations, Fourier transforms, and linear algebra) and with some form of computer programming (e.g., C++, Octave, Mathematica, or Python). J. Sethna.

Coveres numerical methods for ordinary and partial differential equations, linear algebra and eigenvalue problems, integration, nonlinear equations, optimization, and fast Fourier transforms. Find out how and why the "black-box" numerical routines you use work, how to improve and generalize them, and how to fix them when they don’t. Based on the text Numerical Recipes by William H. Press, Saul A. Teukolsky, William T. Vetterling, and Brian P. Flannery.

**PHYS 4481 Quantum Information Processing (also CS 4812, PHYS 7681) (PBS)**

Spring. 3 credits. Prerequisite: familiarity with theory of finite-dimensional vector spaces over complex numbers.

A technology that successfully exploits fundamental principles of quantum physics can spectacularly alter both the nature of computation and the means available for the transmission of information.

**PHYS 4484 Teaching and Learning Physics (also PHYS 7684)**

Fall, spring. 1 credit. Prerequisites: none. R. Thorne.

This 1.5-hour weekly seminar provides undergraduate and graduate students with an introduction to core concepts of teaching and learning. Participants discuss articles and videos drawn from physics and science education research and from cognitive science, and engage in collaborative activities that help them become more effective teachers and learners. This seminar is especially valuable for those considering teaching physics at some point in their careers. Topics include: Questioning Strategies, Classroom Discourse and Bloom’s Taxonomy, Learning Theory, Conceptions and Conceptual Change, Epistemology, Metacognition, and Cooperative Learning. Text: Articles from science, engineering, and math education journals.

**PHYS 4488 Topics in Accelerator Physics (also PHYS 7668) (PBS)**

Spring. 3 credits. S–U grades only. G. Hofstatter.

After an introduction to the history of particle accelerators and to their fundamental physical principles, special topics in accelerator physics will be covered. Such topics are microwave structures in particle acceleration, linear and nonlinear beam dynamics, collective effects and beam instabilities, characteristics of synchrotron radiation, a project in storage ring design, and experiments with charged particle beams at Cornell's accelerator laboratory.
include a pinball game analogy to the Bohr motion with water, and energy conversion in experiments of widely varying difficulty in one or more areas, as listed under PHYS 6510, may be done to fill special requirements.

PHYS 6500 Informal Graduate Laboratory Fall. Variable. Variable to 2 credits. Prerequisite: permission of instructor. P. McEuen. Experiments of widely varying difficulty in one or more areas, as listed under PHYS 6510, may be done to fill special requirements.

PHYS 6501 Contemporary Physics for Teachers Summer. 2 credits. Lectures are given by Cornell faculty on topics including atomic-scale imaging, the Standard Model, and nanofabrication of integrated circuits. Hands-on activities developed by Cornell scientists working with teachers are presented by teachers. Activities are tied to the New York State Physics Core Curriculum where possible.

PHYS 6502 Topics in Physics for Teachers Summer. 1 credit. This is a lecture and laboratory course open to Center for Nanoscale Systems Institute for Physics Teachers alumni and other high school physics teachers. The course is organized around daily themes that may include atomic games, physics with water, and disreputable events. Lectures are given by Cornell faculty; hands-on activities developed by Cornell scientists working with teachers are presented by teachers. Lab activities may include a pinball game analogy to the Bohr model, interference in thin films, projectile motion with water, and energy conversion in a mousetrap. Activities are tied to the NYS Physics Core Curriculum where possible.

PHYS 6510 Advanced Experimental Physics Fall, spring. 3 credits. Optional lab associated with PHYS 4410 available. P. McEuen. About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. Students perform three to four experiments selected to meet individual needs. Independent work is stressed. Lectures include techniques used in experiments in the advanced laboratory and on current research topics.

PHYS 6520 Projects in Experimental Physics Fall, spring. Variable to 3 credits. Prerequisite: PHYS 6510. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible for project. Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in PHYS 6510.

PHYS 6525 Physics of Black Holes, White Dwarfs, and Neutron Stars (also ASTRO 6511) Fall. 4 credits. Next offered 2011–2012. Prerequisite: none. D. Liu. A comprehensive introduction to Einstein's theory of relativistic gravity. This course focuses on the general structure of the theory.

PHYS 6554 General Relativity II (also ASTRO 6510) Spring. 4 credits. Prerequisite: PHYS 6553 or permission of instructor. A continuation of PHYS 6553 and ASTRO 6509 that covers a variety of advanced topics and applications of general relativity in astrophysics, cosmology, and high-energy physics.

PHYS 6561 Classical Electrodynamics Fall. 3 credits. C. Csaki. Covers special relativity, Maxwell's equations, electromagnetic potentials, conservation laws, Green's functions, electromagnetic wave guides, radiation theory, antennas, and scattering. The practical application of appropriate mathematical methods is emphasized. At the level of Classical Electrodynamics by Jackson.

PHYS 6562 Statistical Physics I Spring. 4 credits. Primarily for graduate students. Prerequisite: good knowledge of quantum mechanics, classical mechanics, and undergraduate-level thermodynamics or statistical mechanics class. Staff. Starts with the fundamental concepts of temperature, entropy, and free energy, defining the microcanonical, canonical, and grand canonical ensembles. Touches upon Markov chains, random walks, diffusion equations, and the fluctuation-dissipation theorem. Covers Bose-Einstein and Fermi statistics, black-body radiation, Bose condensation, superfluidity, metals, and white dwarves. Discusses fundamental descriptions of phases, and introduces Landau theory, topological order parameters, and the homotopy classification of defects. Briefly studies first-order phase transitions and critical droplet theory and concludes with a discussion of critical phenomena, scaling, universality, and the renormalization group.

PHYS 6572 Quantum Mechanics I Fall. 4 credits. D. Rubin. Covers the general principles of quantum mechanics, formulated in the language of Dirac. Includes propagator and path integral formulation. Covers systems with few degrees of freedom such as hydrogen atom, including fine and hyperfine structure. Theory of angular momentum, symmetries, perturbations, and collisions are developed to analyze phenomena displayed by these systems. At the level of Quantum Mechanics: Fundamentals by Gottfried and Yan. A knowledge of the subject at the level of PHYS 4443 is assumed, but the course is self-contained.

PHYS 6574 Applications of Quantum Mechanics II Spring. 4 credits. Knowledge of concepts and techniques covered in PHYS 6561 and 6572 and of statistical mechanics at undergraduate level assumed. Possible topics include identical particles, many electron atoms, second quantization, quantization of the electromagnetic field, scattering of complex systems, radiative transitions, and introduction to the Dirac equation.

PHYS 6599 Cosmology (also ASTRO 6599) Spring. 4 credits. Next offered 2011–2012. For description, see ASTRO 6599.

PHYS 7635 Solid-State Physics I Fall. 3 credits. Prerequisites: good undergraduate solid-state physics course (e.g., PHYS 4454), undergraduate statistical mechanics, and familiarity with graduate-level quantum mechanics. A. Sievers. Survey of the physics of solids: crystal structures, X-ray diffraction, phonons, and electrons. Selected topics from semiconductors, magnetism, superconductivity, disordered materials, dielectric properties, and mesoscopic physics. The focus is to enable graduate research at the current frontiers of condensed matter physics.

PHYS 7636 Solid-State Physics II Spring. 3 credits. Prerequisite: PHYS 7635. Staff. Continuation of PHYS 7635. Topics from quantum condensed-matter physics not included in that course, which may include Fermi Liquid Theory, magnetism, superconductivity, broken symmetries, elementary excitations, topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, Anderson localization, and other metal insulator transitions.

PHYS 7645 An Introduction to the Standard Model of Particle Physics Spring. 3 credits. A. Ryd. This course is an introduction to the Standard Model of particle physics. Familiarity with Feynman rules, Lagrangians, and relativistic wave equations at the level of PHYS 7651 is assumed. Topics covered include strong and electroweak interactions, Higgs mechanism, and phenomenology of weak interactions, the quark model, and particle accelerators and detectors. The course is taught at the level of Electroweak Interactions: An Introduction to the Physics of Quarks and Leptons by Peter Renton, Introduction to High-Energy Physics by Donald H. Perkins, and The Standard Model: A Primer by Cliff Burgess and Guy Moore.

PHYS 7646 Topics in High-Energy Particle Physics Spring. 3 credits. Staff. Covers topics of current interest, such as high-energy electron and neutrino interactions, electron positron annihilation, and high-energy hadronic reactions.
PHYS 7651 Relativistic Quantum Field Theory I
Fall, 3 credits. Undergraduates, letter grades only; graduate students, S–U or letter grades. M. Perelstein.
Topics include consequences of causality and Lorentz invariance, quantization of Klein-Gordon and Dirac fields, perturbation theory, Feynman diagrams, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and interactions. At the level of An Introduction to Quantum Field Theory by Peskin and Schroeder.

PHYS 7652 Relativistic Quantum Field Theory II
Spring, 3 credits. Staff
A continuation of PHYS 7651. Introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-Abelian gauge theories, renormalization, and renormalization group theories, spontaneous symmetry breaking, anomalies, solitons, and instantons. Instead of the standard model of strong and electroweak interactions, some applications to condensed-matter physics will be discussed. At the level of An Introduction to Quantum Field Theory by Peskin and Schroeder.

PHYS 7653 Statistical Physics II
Fall, 3 credits. Prerequisites: quantum mechanics at level of PHYS 6572, statistical physics at level of PHYS 6562. J. Sethna.
Survey of topics in modern statistical physics selected from phase transitions and the renormalization group; linear response and fluctuation-dissipation theories; quantum statistical mechanics; nonequilibrium statistical mechanics; and soft matter and/or biological applications.

PHYS 7654 Basic Training in Conditional Matter Physics
Spring, 3 credits. Prerequisites: PHYS 6562, 6574, 7635, 7636, and 7653, or permission of instructor. S–U grades only. Staff
Advanced topics in condensed-matter physics are taught by several members of the faculty. Past modules include random matrix theory, the quantum Hall effect, disordered systems and computational complexity, asymptotic analysis, superfluid physics, generalized rigidity, many-body methods applied to nanotubes, constraint problems, quantum optics, Luttinger liquids, and quantum antiferromagnets. Future topics may include dilute cold gases and exotic quantum phenomena, thermodynamic Green's functions, 1/N expansions, density functional theory, instantons, dynamical mean-field theory, conformal field theory, Fermi liquid theory and superconductivity, localization and disordered metals, renormalization groups, duality transformations, and Chern-Simons gauge theory. Detailed course content will be announced at the end of the fall semester.

PHYS 7661 Advanced Topics in High-Energy Particle Theory
Fall, 3 credits. Prerequisite: PHYS 7652. Y. Grossman.
Presents advanced topics of current research interest. Subject matter varies from year to year. Some likely topics are models of electroweak symmetry breaking, collider physics, flavor physics, topics in string theory and string cosmology, and conformal field theories and their applications.

[PHYS 7665 Seminar: Astrophy Gas Dynamics (also ASTRO 7699)]
Next offered 2011–2012. For description, see ASTRO 7699.

PHYS 7667 Theory of Stellar Structure and Evolution (also ASTRO 6560)
Fall, 4 credits. D. Chernoff.
For description, see ASTRO 6560.

PHYS 7680 Computational Physics (also ASTRO 7690, PHYS 4480)
For description, see PHYS 4480.

PHYS 7681 Quantum Information Processing (also CS 4812, PHYS 4481)
For description, see PHYS 4481.

[PHYS 7682 Computational Methods for Nonlinear Systems (also CIS 6229)]
Fall, 3 credits. Enrollment may be limited. Next offered 2011–2012. E. Mueller.
Graduate computer laboratory, focusing on tools for computation, simulation, and analysis of complex, nonlinear systems arising in a broad range of fields.

PHYS 7683 Special Topics
Offerings are announced each semester. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

PHYS 7684 Teaching and Learning Physics (also PHYS 4484)
For description, see PHYS 4484.

PHYS 7688 Topics in Accelerator Physics (also PHYS 4468)
For description, see PHYS 4488.

PHYS 7690 Independent Study in Physics
Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S–U grades only.
Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

PSYCHOLOGY

The major areas of psychology represented in the department are perception, cognition, and development (PCD), behavioral evolutionary neuroscience (BEN), and social and personality psychology. These areas are very broadly defined, and the courses are quite diverse. BEN includes animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. PCD includes such courses as cognition, perception, memory, and psycholinguistics. Social and personality psychology is represented by courses in social psychology and personality (e.g., Psychology and Law, Judgment and Decision Making), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department emphasizes the statistical and logical analysis of psychological data and problems.

The Major

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C– or better. Provisional admission requires two such courses. To apply to the major, a student must have a major advisor and a major application form may be obtained from the department office (211 Urs Hall) and should be completed and taken to one of the faculty members whose name is listed on the form.

Requirements for the major are:
1. a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisors, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); for any courses taken in 2009–2010 or later to count toward the 40 required credits, the student must earn a grade of C– or better; and
2. demonstration of proficiency in statistics before the beginning of the senior year. (See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:
1. Perception, cognition, and development: PSYCH 1102, 2050, 2090, 2140, 2150, 3050, 3160, 3420, 4120, 4180,

3. Social and personality psychology: PSYCH 2650, 2750, 2800, 2820, 3250, 3270, 3280, 3800, 3850, 4530, 4520, 4810, 4820, 4850, 4930, 4980.

4. Other courses: PSYCH 1101, 1990, 3470, 3500, 4101, 4700, 4710. The major advisor determines which to group, if any, these courses may be applied.

With the permission of the advisor, courses in other departments may be accepted toward the major requirements.

Fieldwork, independent study, and teaching. The department requires students to observe or participate in fieldwork, independent study, and teaching.
1. Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.
2. An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

Statistics requirement. Proficiency in statistics can be demonstrated in any one of the several ways listed below.
1. Passing PSYCH 3500.
2. Passing an approved course or course sequence in statistics in some other department at Cornell.
3. Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or this sequence must be equivalent to at least 6 semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.
4. Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology. Psychology majors interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology; the physical sciences, including at least introductory chemistry; and mathematics. Students will design with their advisors an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her biopsychology advisor.

Concentration in social and personality psychology. Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration are permitted to include some major courses in sociology and related fields. Advisors will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the instructor.

Undergraduate honors program. The honors program is designed for exceptional students who wish to pursue an intensive and independent program of research in psychology. Successful participation serves as evidence of the student's facility in the two most important skills required of an academic psychologist: namely, the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to devise and execute a creative empirical research project.

The honors program offers students the closest contact and consultation with faculty they will likely experience while at Cornell, and all qualified majors who are planning graduate work in any academic field should consider applying. However, it should also be noted that conducting honors research and completing a thesis is an extremely demanding undertaking, both in time and effort. Due to the demands of both research and writing, it is expected that after the Christmas break, honors students will return to campus as early as possible to continue their work, as well as remain on campus through all of spring break.

The focus of the honors program is conducting an experiment, analyzing the data that result, and describing the project in a thesis that closely approximates a professional-level research report both in form and quality. The research project is to be conducted under the close supervision of a faculty member. Subject to approval, the sponsor need not be in the psychology department per se. Students who successfully complete the honors program graduate with a certain level of honors, which is noted on their diplomas. The customary level is cum laude, awarded to approximately two-thirds of psychology honors graduates. Approximately one-third receive the next highest level of honors, which is magna cum laude. A student who has both an unusually strong academic record in psychology and completes a thesis of exceptionally high quality will be considered for summa cum laude, the highest level of honors. However, those are unusual cases. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year. Students in the program register for 3 or 4 credits of PSYCH 4710 Independent Study in both fall and spring semesters. Format and binding of the thesis follows guidelines for the doctoral dissertation and master's thesis, outlined by the Cornell University Graduate School. Stylistic format is APA style. Alternative style formats are possible, if approved in advance.

Computing in the Arts Undergraduate Minor
A minor in Computing in the Arts with an emphasis on psychology is available both to psychology majors and to students majoring in other subjects.

Courses
PSYCH 1101 Introduction to Psychology: The Frontiers of Psychological Inquiry (SBA-AS) Fall, summer (six-week). 3 credits. Attendance at lec mandatory. Students who wish to take disc seminar should also enroll in PSYCH 1103. J. B. Maas. The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

PSYCH 1102 Introduction to Cognitive Science (also COGST 1101, CS 1710, LING 1170, PHIL 1910) (KCM-AS) Fall, summer (six-week). 3 or 4 credits (4-credit option involves writing sec instead of exams). Staff. For description, see COGST 1101.

PSYCH 1103 Introductory Psychology Seminars
Fall. 1 credit. Limited to 200 students. Consequence: PSYCH 1101. 12 different time options. J. B. Maas and staff. Weekly seminar that may be taken in addition to PSYCH 1101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a semester paper related to the seminar topic. Choice of seminar topics and meeting times are available at the second lecture of PSYCH 1101.

PSYCH 1110 Brain, Mind, and Behavior (also BION/COGST 1110) (PBS) Spring. 3 credits. Prerequisite: PSYCH 1101. 12 different time options. J. B. Maas and staff. Weekly seminar that may be taken in addition to PSYCH 1101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a semester paper related to the seminar topic. Choice of seminar topics and meeting times are available at the second lecture of PSYCH 1101.

PSYCH 1550 Computing in the Arts (also CIS/CS/ENGRI 1610, DANCE 1540, FILM 1750, MUSIC 1465) (LA-AS) Fall. 3 credits. G. Bailey. For description, see CS 1610.

PSYCH 2050 Perception (also PSYCH 6050) Fall. 3 credits. Open to all students. Graduate students, see PSYCH 6050. J. E. Cutting. One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual and auditory perception are discussed in detail.
One of four introductory courses in cognition and perception, this course introduces students to the scientific study of linguistic phenomena. It is a broad range of topics from psycholinguistics, including the nature of language, the different components of language (phonology, morphology, syntax, and semantics), processes involved in reading, computational modeling of language processes, the acquisition of language (both under normal and special circumstances), and the brain bases of language.

PSYCH 2230 Introduction to Biopsychology (PBS: supplementary list)
Fall. 3 credits. Prerequisites: none. May be used to satisfy psychology major breadth requirement and as alternative prerequisite for upper-level biopsychology courses.
D. Smith.
Introduction to psychology from a biological perspective, which focuses on brain mechanisms of behavior. Topics include the structure and function of the nervous system, physiological approaches to understanding behavior, hormones and behavior, biological bases of sensation and perception, learning and memory, cognition, emotion, and communication.
Introductory courses in social and personality psychology. Each of the following three courses (2650, 2750, 2800) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none have any prerequisites.
Students may take any one of the courses or any combination of them (including all three). Courses may be taken in any order or simultaneously.

PSYCH 2610 Development of Social Behavior (also HD 2610) (SBA-AS)
Fall. 3 credits. Prerequisites: HD 1150, PSYCH 1101. Staff.
For description, see HD 2610.

PSYCH 2650 Psychology and Law (SBA-AS)
Examines the implications of psychological theory and methods for law and the criminal justice system.

PSYCH 2750 Introduction to Personality Psychology (also HD 2600) (SBA-AS)
Fall. 3 credits. Prerequisite: introductory psychology or human development.
In this undergraduate-level course, we will review the major theories and research paradigms (e.g., trait, biological, cognitive, humanistic) of modern-day personality psychology.

PSYCH 2800 Introduction to Social Psychology (SBA-AS)
Spring, summer (three-week). 3 or 4 credits (4 credit option involves writing sec instead of a lab section). Introduction to research and theory in social psychology.
Topics include social influence, persuasion, and attitude change; social interaction and group phenomena; altruism and aggression, stereotypes, and prejudice; and everyday reasoning and judgment.

PSYCH 2820 Community Outreach (also HD 2820)
Fall. 2 credits. Prerequisites: PSYCH 1101 or HD 1150. H. Segal.
Provides students with information and perspectives essential to volunteer fieldwork with human and social service programs in the community. Readings are drawn from the field of community psychology and include analyses of successful programs, such as Head Start, as well as a review of the methods by which those programs are developed and assessed. Although students are not required to volunteer, the instructor provides students with a list of local agencies open to student placements.

PSYCH 3010 Health Psychology (SBA-AS)
Spring. 3 credits. Prerequisites: at least two psychology courses.
Overview of health psychology: the scientific study of behaviors and cognitive processes related to health states. Students will learn about the biological, psychological, and social aspects of experience as related to health.
The biological mechanisms by which social experiences and stress get “under the skin” and influence health outcomes across the life span will be examined. Understanding the interactions between social and physical experience on individuals’ health states is a key element in developing effective health communication and intervention programs.
Students will learn about critical topics in health psychology such as the interaction between mental and physical health, health promotion, health-compromising and enhancing behaviors, stress management, coping strategies, patient-provider relations, utilization of health services, pain management, coping with disease, addictions, careers in health psychology, and a discussion about the complexity and challenges that await health psychologists in the future.
This course is taught from a diversity-focused perspective; understanding the intersection between health and underrepresented minority status is a key element of this course. Students approach all course topics from both theory-driven and applied perspectives.

PSYCH 3050 Visual Perception (also VISST 3305)
Spring. 4 credits. Limited to 25 students.
Prerequisite: PSYCH 2050 or permission of instructor. J. E. Cutting.
Detailed examination of pictures and their comparison to the real world. Linear perspective in Renaissance art, photography, cinema, and video is discussed in light of contemporary research in perception and cognition.

PSYCH 3150 Obesity and the Regulation of Body Weight (also NS 3150)
Spring. 3 credits. Limited to 30 students.
Prerequisites: one course each in psychology and nutrition; undergraduates by permission of instructor. S–U or letter grades. Offered alternate years.
D. A. Levitsky.
Multidisciplinary discussion of the causes, effects, and treatments of human obesity.
Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

PSYCH 3160 Auditory Perception (also PSYCH 7160) (KCM-AS)
Spring. 4 credits. Limited to 15 students.
Prerequisite: PSYCH 1102, 2050, 2090, or 2140 (or other similar engineering, physics, linguistics, or biology courses).
Graduate students, see PSYCH 7160. Next offered 2011–2012. C. L. Krumhansl.
Lab course introducing students to experimental methods in auditory perception and cognition.

PSYCH 3220 Hormones and Behavior (also BIONB 3220, PSYCH 7220) (PBS)
Fall. 3 credits. Two lec plus sec in which students read and discuss original papers in the field, give an oral presentation, and write a term paper. Prerequisites: junior or senior standing; any one of the following: PSYCH 2230, BIONB 2210 or 2220, or one year introductory biology plus psychology course.
Graduate students, see PSYCH 7220. Next offered 2011–2012. E. Adkins Regan.
Covers comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.

PSYCH 3240 Biopsychology Laboratory (also BIONB 3240) (PBS)
Fall. 4 credits. Limited to 20 students.
Prerequisites: junior or senior standing, PSYCH 2230 or BIONB 2210 or 2220, and permission of instructor. Lab fee: $50.
T. J. DeVoogd.
Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, animal species, and behavior patterns are included.
PSYCH 3250 Adult Psychopathology (also HD 3700) (SBA-AS)
Spring. 3 credits. Prerequisites: sophomore, junior, or senior standing; any one course in psychology or human development. Letter grades only. H. Segal.
A theoretical and empirical approach to the biological, psychological, and social (including cultural and historical) aspects of adult psychopathology. Readings range from Freud to topics in psychopharmacology. The major mental illnesses are covered, including schizophrenia as well as mood, anxiety, and personality disorders. Childhood disorders are not covered.

PSYCH 3260 Evolution of Human Behavior (PBS: Supplementary List)
Spring. 4 credits. Prerequisite: PSYCH 2250, or introductory biology, or introductory anthropology. R. Johnston.
Broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics vary but include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior, reproduction, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, and warfare.

PSYCH 3270 Field Practicum I (also HD 3270) (SBA-AS)
Fall only. 3 credits. Limited enrollment. Prerequisites: PSYCH 3250 or HD 3700 (or taken concurrently), and permission of instructor. Students must commit to taking PSYCH 3280 in spring semester. Letter grades only. H. Segal.
Composed of three components that form an intensive undergraduate field practicum. First, students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff. Second, the instructor provides additional weekly individual, clinical supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical techniques and organization, and current research issues. Students write one short paper, two final take-home exams, and present an account of their field experience in class.

PSYCH 3280 Field Practicum II (also HD 3280) (SBA-AS)
Spring. 3 credits. Limited enrollment. Prerequisites: PSYCH 3270 taken previous semester, PSYCH 3250 or HD 3700 (or taken concurrently), permission of instructor. Letter grades only. H. Segal.
Continues the field practicum experience from PSYCH 3270.

PSYCH 3300 Introduction to Computational Neuroscience (also BION/BME/COGST 3300) (PBS)
Fall. 3 or 4 credits. C. Linster.
For description, see BIONB 3300.

PSYCH 3320 Biopsychology of Learning and Memory (also BION 3280, PSYCH 3280, COGST 3320) (SBA-AS)
Spring. 3 credits. Limited to 60 students. Prerequisites: one year of biology and either a biopsychology course or BIONB 2220. Graduate students, see PSYCH 6320.
T. J. DeVoogd.
Surveys the approaches that have been or are currently being used to understand the biological bases for learning and memory.

PSYCH 3340 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also COGST 3420, PSYCH 6420, VISST 3342) (KCM-AS)
Fall. 3 or 4 credits; 4-credit option involves term paper. Highly recommended: PSYCH 2050. Graduate students, see PSYCH 6420.
D. J. Field.
Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics include "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

PSYCH 3470 Psychology of Visual Communications (SBA-AS)
Spring. 3 credits. Limited to 15 students. Prerequisites: PSYCH 1101 and permission of instructor. J. B. Maas.
Exploration of theories of education, communication, perception, attitude, and behavior change as they relate to the effectiveness of visually based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages. A digital camera with manual control of f-stops and shutter speed is mandatory.

PSYCH 3500 Statistics and Research Design (MQR)
Fall, summer (three-week). 4 credits. Limited to 120 students. T. Cleland.
Acquaints the student with the elements of statistical description (e.g., measures of average, variation, correlation) and, more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

PSYCH 3610 Biopsychology of Normal and Abnormal Behavior (also NS 3610) (PBS: Supplementary List)
Spring. 3 credits. Limited to 50 students in psychology and 50 students in nutritional sciences. Prerequisites: junior or senior standing; introductory biology and introductory psychology or permission of instructor. S–U or letter grades. Next offered 2011–2012. B. J. Strupp.
For description, see NS 3610.

PSYCH 3800 Social Cognition (SBA-AS)
Fall. 3 credits. Prerequisites: junior or senior standing. M. Segal.
What are the causes and consequences of our own and other’s judgments, feelings, attitudes, and behaviors? This course introduces students to social cognition, which is a research perspective that uses both cognitive and social psychological theories and methodologies to explain such social phenomena.

PSYCH 3850 The Psychology of Emotion (SBA-AS)
Spring. 3 credits. D. Pizarro.
We’ve all been mad, sad, happy, and disgusted. Some of us get nostalgic at times, and some of us are gladly embarrassed. We’ve been feeling these emotions nearly our whole lives, and this makes us all emotion experts of a sort. Nonetheless, these feelings can be mysterious. Where do they come from? Do people across all cultures experience similar emotions? How can we regulate our emotions? Do emotions make us less rational? Do they make us smarter? What triggers certain emotions? Are there gender differences in emotions? The science of emotion is fairly young, but there has been an enormous amount of progress in understanding emotional phenomena in the last few decades. In this course, we will tackle the aforementioned questions and more. By the end of the course you should be familiar with the most influential theories of emotion—from the evolutionary explanations of emotion to the developmental and social factors involved in making us emotional creatures. So while we are all intuitive experts on emotion, by the end of the course you will have a different kind of expertise—one grounded in the most recent scientific discoveries in this exciting field.

PSYCH 3860 Self-Regulation and the Will (SBA-AS)
Spring. 3 credits. Limited to 15 students, by application; priority given to junior and senior psychology majors. Prerequisite: PSYCH 2800. D. Regan.
This seminar examines the explosion of recent social psychological work on self-control (i.e., what it is, how it works, and when and why it fails) and relates it to issues revolving around the will, including the meaning (and possible existence, in a sense that is psychologically coherent) of "free will." Readings will include chapters in two recent books: Handbook of Self-Regulation by R. Baumeister and K. Vohs (eds.) and Are We Free? Psychology and Free Will by J. Baier, J. Kaufman, and R. Baumeister (eds.). These chapters may be supplemented by relevant recent empirical articles. Students will come to class prepared to discuss the readings and will write a term paper on a self-regulatory issue of their own choosing. No exams.

PSYCH 3960 Introduction to Sensory Systems (also BIONB 3960) (PBS)
Somesthetic, auditory, and visual system neuroscience principles and methods of study are taught using the Socratic method. Original literature read and discussed.

PSYCH 4050 Intuitive Judgment (SBA-AS)
Fall. 4 credits. Limited to 18 students by application. Priority given to senior psychology majors. Prerequisites: at least one course in each of social and cognitive psychology. Next offered 2011–2012. T. Gilovich.
This course examines classic and contemporary scholarship on the subject of how people make judgments and decisions in their everyday and professional lives.
after a historical overview, students will discuss cutting-edge literature on the hippocampal role in spatial navigation, learning, and memory, and context processing.

[PSYCH 4240 Neuroethology (also BIONB 4240) (PBS)]
Fall. 4 credits. Prerequisites: BIONB 2210 or 2220 or BIOG 1101–1102 and permission of instructor. Student must select topics. Offered 2011–2012 C. D. Hopkins. Described, see BIONB 4240.

[PSYCH 4250 Cognitive Neuroscience (also BIONB 4230, PSYCH 6250) (KCM-AS)]
Fall. 4 credits. Prerequisites: introductory biology; biochemistry or neurobiology (e.g., PSYCH 2230 or BIONB 2210, 2220); and an introductory course in perception, cognition, or language (e.g., PSYCH 1100, 2090, 2140, or 2150). Graduate students, see PSYCH 6250. S–U or letter grades. Offered alternate years. B. L. Finlay. Studies the relationship between structure and function in the central nervous system, stressing the interplay of evolutionary and mechanistic approaches for understanding the human behavior and cognition.

[PSYCH 4260 Learning Language (also COGST 4260, PSYCH 7260) (KCM-AS)]
Spring. 4 credits. Prerequisite: PSYCH 2140 or permission of instructor. Letter grades only. S. Eidelman. A survey of a promising new synthesis in the understanding of the cognitive function that is at the core of the human nature: language. The material focuses on two aspects of the study of language—linguistic data and their interpretation, and (2) algorithmic studies and computational modeling. In psycholinguistics, students will read key papers that shed light on the nature of linguistic knowledge ("grammar") possessed by normal adult speakers, and on the learning of this knowledge by children. In computation, the focus is on learning grammar from raw data. The common thread to this course is realism: in particular, we shall consider only those results obtained empirically by established psychological procedures (as opposed to intuition, either of experts or of lay speakers); in computation, the only approaches that we embrace are those that are algorithmically tractable; and that are effective when applied to realistic data.

[PSYCH 4270 Evolution of Language (also COGST 4270, PSYCH 6270) (SBA-AS)]
Fall. 3 credits. Prerequisite: junior or senior standing; any one course in psychology or human development. Graduate students, see PSYCH 6270. S–U or letter grades. Offered alternate years; next offered 2011–2012. M. Christiansen. Seminar surveying a cross-section of modern theories, methods, and research pertaining to the origin and evolution of language.

[PSYCH 4280 Connectionist Psycholinguistics (also COGST 4280, LING 4428/6628, PSYCH 6280)]
Fall. 3 credits. Prerequisite: senior standing or permission of instructor. Graduate students, see PSYCH 6280. S–U or letter grades. Offered alternate years. M. Christiansen. Connectionist psycholinguistics involves using (artificial) “neural” networks, which are inspired by brain architecture, to model empirical data on the acquisition and processing of language. As such, connectionist psycholinguistics has had a far-reaching impact on language research. This course surveys the state of the art of connectionist psycholinguistics, ranging from speech processing and word recognition, to inflectional morphology, sentence processing, language production, and reading. An important focus of this course is on methodological and theoretical issues related to computational modeling of psychological data. Furthermore, the course discusses the broader implications of connectionist models of language, not only for psycholinguistics, but also for computational and linguistic perspectives on language.
**PSYCH 4320 Topics in Cognitive Science (also BIONB 4330, COGST/LING 4310)**

Fall. 4 credits. Prerequisite: COGST/INFO/PSYCH 2140/6140. S. Edelman.
For description, see COGST 4310.

**PSYCH 4340 Sensory Construction (also PSYCH 6340)**

Spring. 3 credits. Prerequisites: one introductory course in neurobiology (PSYCH 2250 or BIONB 2220) and one introduction to perception or cognition (PSYCH 1101, 2210, 2230, or 2301) or permission of instructor. Offered alternate years; next offered 2011–2012. T. Cleland.
Is it true that everything you encounter is stored somewhere in your memory, if only you could recall it? How does that information get into your brain in the first place? This course investigates how coherent sensory percepts are constructed from the physical features of sensory stimuli, the properties of animal sensors and neural circuits, the active allocation of cognitive and physiological resources to selective sampling, and the integration of sampled data, prior knowledge, and expectations. Emphasis is placed on integrating multiple approaches—including biophysical, neurobiological, evolutionary, cognitive, social, and legal—to the problem of complex perception, cognition, and memory.

**PSYCH 4350 Olfaction, Pheromones, and Behavior**

Fall. 4 credits. Prerequisites: introductory biology and course in neurobiology and behavior or psychobiology or 3000-level course in psychobiology or permission of instructor. Offered alternate years. R. Johnston.
Covers chemical signals, olfaction, and behavior in vertebrates (including humans), as well as the neurobiology of olfaction and odor-mediated behaviors. Behavioral topics may vary from year to year but include evaluation of and advertisement for mates, aggression and territorial behavior, parental-young interactions, social recognition (species, sex, individual, kin reproductive status), memory for odors, odor and endocrine interactions, imprinting, and homing and navigation. Basic aspects of the structure and function of the olfactory system are also covered, including the molecular biology of chemosensory olfactory coding, and higher-order processing in the central nervous system. The format includes lectures, discussions, and student presentations.

**PSYCH 4360 Language Development (also COGST/HD 3370, LING 4436) (KCM-AS)**

Spring. 4 credits. B. Lust. Open to undergraduate and graduate students. Graduate students should also enroll under HD 6530/LING 4700/PSYCH 6000, supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S–U or letter grades. B. Lust.
For description, see HD 3370.

**PSYCH 4370 Lab Course: Language Development (also COGST 4500, HD 4570, LING4436) (KCM-AS)**

Fall. 2 credits. Offered in conjunction with COGST/HD 4360 and LING 4436, Language Development. B. Lust.
Optional supplement to the survey course Language Development (HD 3370, COGST/LING/PSYCH 4360). Provides students with a hands-on introduction to scientific research, including design and methods, in the area of first-language acquisition. For description, see HD 4370.

**PSYCH 4380 Social Neuroscience**

Fall. 4 credits. Prerequisite: PSYCH 2230, 3220, 3520, or 3260. Offered alternate years; next offered 2011–2012. B. Johnstone.
Comparative approach to the neural and endocrine mechanisms of social behavior in animals and humans.

**PSYCH 4400 To Sleep, Dream, and Remember (also PSYCH 6400)**

Fall. 4 credits. Prerequisites: at least PSYCH 2250 or BIONB 2210. Recommended: additional course in biology, biopsychology, or neurobiology. S–U or letter grades. Graduate students, see PSYCH 6460. H. S. Porte.

What brain events instigate, maintain, and switch the states of sleep? How does the brain construct a dream? What brain events produce and sustain a night terror? Does the sleeping brain work for memory or against it? These questions will be considered in the context of cognitive neuroscience. Students must be conversant with brain anatomy and brain physiology.

**PSYCH 4410 Laboratory in Sleep Research (also PSYCH 6410)**

Spring. 4 credits. Lab fee: $30. Graduate students, see PSYCH 6410. H. S. Porte.
Emphasizing the neurobiology of sleep state, this course introduces students to the laboratory study of human sleep and its psychological correlates. Serving as both experimenter and subject, each student learns the physical rationale and techniques of electroencephalography and other biologic measures of behavioral state. Analyzing data they have collected themselves, students work in small groups to complete a collaborative term project. Overnight sleep recording sessions are required.

**PSYCH 4440 Neural Computation (also BIONB 4440) (PBS)**

Spring. 3 credits. Limited to 10 students. Prerequisites: PSYCH 2250 or BIONB 2220, or permission of instructor. S–U or letter grades. Offered alternate years. T. Cleland.
Lecture and computer lab course covering the biophysical mechanisms underlying neural computation and information coding by neurons and networks. Students will study and develop computational models of single neurons and small neural networks. An independent modeling project will be required.

**PSYCH 4650 Topics in High-Level Vision (also COGST 4650, PSYCH 6650) (PS) (also BIONB 4440)**

Spring. 4 credits. Graduate students, see PSYCH 6650. Offered alternate years. T. Cleland.
The focus is on current readings, namely selected articles from very recent issues of the best social psychological journals. Readings are chosen for their importance, their readability, and the likelihood that they will generate stimulating discussion. Students write brief ‘thought papers’ before each class in which they offer suggestions for class discussion based on their close reading of the day’s assigned articles. They also write a term paper on a social psychological topic of their own choosing. No exams.

**PSYCH 4700 Undergraduate Research in Psychology**

Fall or spring. 1–4 credits. Prerequisite: written permission from staff member who will supervise work and assign grade must be included with course enrollment material. Students should enroll in section listed for that staff member; sec list available from Department of Psychology. S–U or letter grades. Staff.
Practice in planning, conducting, and reporting independent laboratory, field, and/or library research.

**PSYCH 4710 Advanced Undergraduate Research in Psychology**

Fall or spring. 1–4 credits. Prerequisite: written permission of staff member who will supervise work and assign grade must be included with course enrollment material. Students should enroll in section listed for that staff member; sec list available from Department of Psychology. S–U or letter grades. Staff.
Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research. One, and preferably two, semesters of PSYCH 4700 is required. The research should be more independent and/or involve more demanding technical skills than that carried out in PSYCH 4700.

**PSYCH 4780 Parenting and Child Development (also HD 4440, PSYCH 6780) (KCM-AS)**

Fall. 4 credits. Limited to 25 students. Intended for seniors and graduate students. Graduate students, see PSYCH 6780. M. Goldstein.

**PSYCH 4810 Advanced Social Psychology (also PSYCH 6810)**

Fall. 4 credits. Limited to 15 students, by application. Priority given to senior psychology majors. Graduate students, see PSYCH 6810. D. T. Regan.
The focus is on current readings, namely selected articles from very recent issues of the best social psychological journals. Readings are chosen for their importance, their readability, and the likelihood that they will generate stimulating discussion. Students write brief ‘thought papers’ before each class in which they offer suggestions for class discussion based on their close reading of the day’s assigned articles. They also write a term paper on a social psychological topic of their own choosing. No exams.

**PSYCH 4820 Automaticity (also PSYCH 6820) (SBA-AS)**

Spring. 4 credits. Prerequisites: PSYCH 2800; at least one course in cognitive psychology or permission of instructor. Next offered 2011–2012. M. Ferguson.
Critical review of research showing that classic social psychological phenomena can occur without one’s awareness, intention, effort, or control.

**PSYCH 4840 Goals, Needs, and Desires (also PSYCH 6840)**

Spring. 4 credits. M. Ferguson. Limited to 15 students, by application. Grad students, see PSYCH 6840.
Covers recent social psychological research on human goals and desires. We will examine the meaning and similarity of the constructs of goals, motivation, desires, wants, and needs.
Our discussion will extend to the relevant topics of self-control, free will, nonconscious goal pursuit, liking versus wanting, motivation in nonhuman animals, and the development of goals. We will focus on the social psychological literature, but also will consider recent work in cognitive, social neuroscience, and developmental psychology.

**PSYCH 4850 The Self (also PSYCH 6850) (SBA-AS)**

Spring. 4 credits. Limited to 15 students. Prerequisite: PSYCH 2750 or 2800 or permission of instructor, with priority given to seniors and graduate students. D. Dunning.

An enduring task in psychological inquiry has been to survey the ways in which a person's self-image influences emotion, thought, and action. What is self-esteem, and is it a good or a bad thing? How do concerns over self-image motivate people? Do people really know themselves accurately? How does a person's sense of self develop, and does it differ across cultures? Students will be introduced to these and other topics by reading original research articles, and should expect to take part in class discussions of the issues raised.

**PSYCH 4910 Research Methods in Psychology (also COGST 4910, COGST/PSYCH 6910)**

Spring. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. V. Zayas.

Research methods are the tools that allow psychologists to test the validity of hypotheses. This course provides a survey of the methods used by scientists in personality and social psychology as well as related behavioral sciences to empirically test hypotheses. Specifically, this course will discuss the following topics: (1) philosophy of science; (2) research designs and methods; (3) data collection, analysis, and validity; (4) report writing; and (5) recurrent and emerging trends and issues in the field of research methods and quantitative analysis. Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

**PSYCH 4920 Sensory Function (also BIONB 4920, PSYCH 6920) (PBS)**

Spring. 4 credits. Limited to 35 students. Prerequisites: 3000-level neuroscience course, or BIONB 2220 or BIOAP 3110, or equivalent; knowledge of elementary physics, chemistry, and behavior. 3–U or letter grades. Graduate students, seniors, and juniors. T. C. Christiansen. Spring. 4 credits. Limited to 35 students. Prerequisites: PSYCH 6200. Offered alternate years; next offered 2012–2013. B. P. Halpern.

In general, this course has covered classical topics in sensory function such as vision, hearing, touch, and balance, as well as sensory processing and location of stimulus sources in space.

**Advanced Courses and Seminars**

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each semester is determined by the needs of the students.

A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Urs Hall). The following courses may be offered either semester and carry 4 credits unless otherwise indicated.

- **PSYCH 6000 General Research Seminar**
- **PSYCH 6050 Perception (also PSYCH 2050)** Fall. 4 credits. Non-arts graduate students only. J. E. Cutting.
- **PSYCH 6100-6110 Perception**
- **PSYCH 6120 Perception Lunch Seminar** Spring and fall. J. Cutting.
- **PSYCH 6121 Laboratory in Cognition and Perception (also PSYCH 4120)** Spring. 4 credits. D. J. Field.
- **PSYCH 6140 Cognitive Psychology (also COGST/PSYCH 2140, COGST 6140)** Spring. 4 credits. S. Edelman.
- **PSYCH 6180 Psychology of Music (also MUSIC 4181, PSYCH 4180)** Fall. 4 credits. Next offered 2011–2012. C. Kruman.
- **PSYCH 6181 Topics in Psycholinguistics**
- **PSYCH 6200 Advanced Neurobiology and Memory (also PSYCH 4200)** Spring. 3 credits. D. Smith.
- **PSYCH 6210 Behavioral and Brain Sciences** Fall and spring. 4 credits each semester.
- **PSYCH 6220 Topics in Perception and Cognition**
- **PSYCH 6250 Cognitive Neuroscience (also PSYCH 4250)** Fall. 4 credits. B. L. Finlay.
- **PSYCH 6270 Evolution of Language (also COGST/PSYCH 4270)** Fall. 3 credits. Next offered 2011–2012. M. Christiansen.
- **PSYCH 6271 Topics in Biopsycho** Fall or spring. Staff.
- **PSYCH 6280 Connectionist Psycholinguistics (also COGST/PSYCH 4280, LING 4428/6628)** Fall. 3 credits. M. Christiansen.
- **PSYCH 6300 Moral Reasoning (also PSYCH 4300)** Fall. 4 credits. D. Pizarro.
- **PSYCH 6310 Effects of Aging on Sensory and Perceptual Systems (also BIONB 4310)** Fall. 4 credits. B. P. Halpern.
- **PSYCH 6320 Biopsychology of Learning and Memory (also BIONB 3280, PSYCH 3320)** Spring. 4 credits. T. J. DeVoogd.
- **PSYCH 6340 Sensory Construction (also PSYCH 4340)** Spring. 3 credits. T. Cleland.
- **PSYCH 6350 Evolutionary Perspectives on Behavior**
- **PSYCH 6400 To Sleep, Dream, and Remember (also PSYCH 4400)** Fall. 4 credits. H. S. Porte.
- **PSYCH 6410 Laboratory in Sleep Research (also PSYCH 4410)** Spring. 4 credits. H. S. Porte.
- **PSYCH 6420 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH/COGST 4320, VISSL 3342)** Fall. 4 credits. D. J. Field.
- **PSYCH 6430 Statistics in Current Psychological Research**
- **PSYCH 6500 Special Topics in Cognitive Science (also COGST 5500)**
- **PSYCH 6560 Topics in High-Level Vision (also PSYCH/COGST 4650)** Spring. 4 credits. Offered alternate years. S. Edelman.
- **PSYCH 6780 Parenting and Child Development (also PSYCH 4780, HD 4440)** Fall. 4 credits. M. Goldstein.
- **PSYCH 6800 Experimental Social Psychology**
- **PSYCH 6810 Advanced Social Psychology (also PSYCH 4810)** Fall. 4 credits. D. T. Regan.
- **PSYCH 6830 Affects and Cognition** Fall. 4 credits. A. M. Isen.
- **PSYCH 6840 Goals, Needs, and Desires (also PSYCH 4840)** Spring. 4 credits. M. Ferguson. Limited to 15 students, by application.
- **PSYCH 6850 The Self (also PSYCH 4850)** Spring. 4 credits. D. Dunning.
- **PSYCH 6910 Research Methods in Psychology (also COGST/PSYCH 4910)** Spring. 4 credits. V. Zayas.
- **PSYCH 6920 Sensory Function (also BIONB/PSYCH 4920)** Spring. 4 credits. Offered alternate years; next offered 2013–2014. B. P. Halpern.
- **PSYCH 7000 Research in Biopsycho**
- **PSYCH 7090 Developmental Psychology (also PSYCH 2090)** Spring. 4 credits. M. Goldstein.
- **PSYCH 7100 Research in Human Experimental Psychology (also COGST 7100)**
- **PSYCH 7130 Information Processing: Conscious and Nonconscious** Spring. 4 credits. R. Staff.
PSYCH 7200 Research in Social Psychology and Personality

[PSYCH 7220 Hormones and Behavior (also BIONE/PSYCH 3220)]

PSYCH 7250 Learning Language (also COGST/PSYCH 4260)

PSYCH 7750 Proseminar in Social Psychology I

Fall 2 credits. Limited to 10 students. Prerequisites: graduate students in social psychology; permission of instructors. D. A. Dunnin, M. Ferguson, T. D. Gilovich, D. Pizarro, D. T. Regan, and V. Zayas. First semester of a yearlong discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. Emphasizes social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, and emotional experience, are covered.

PSYCH 7760 Proseminar in Social Psychology II

Spring. 2 credits. Limited to 10 students. Prerequisites: graduate students in social psychology; permission of instructors. D. A. Dunnin, M. Ferguson, T. D. Gilovich, D. Pizarro, D. T. Regan, and V. Zayas. Second semester of a yearlong discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. Emphasizes social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, and emotional experience, are covered.

PSYCH 9000 Doctoral Thesis Research in Biopsychology

PSYCH 9100 Doctoral Thesis Research in Human Experimental Psychology

PSYCH 9200 Doctoral Thesis Research in Social Psychology and Personality

Summer Session Courses

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses are offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 1101 Introduction to Psychology: The Frontiers of Psychological Inquiry

PSYCH 1102 Introduction to Cognitive Science

PSYCH 1128 Introduction to Psychology: Personality and Social Behavior

PSYCH 1990 Sports Psychology

PSYCH 2230 Introduction to Biopsychology

PSYCH 2800 Introduction to Social Psychology

PSYCH 3500 Statistics and Research Design

RELIGIOUS STUDIES MAJOR

The Religious Studies Program, an academic unit providing a major in the scholarly study of religion, offers a wide variety of courses addressing various approaches to, and topics in, the study of religion.

The Religious Studies Program is designed to meet the needs of three classes of students: (1) students planning to pursue advanced degrees in the academic study of religion or allied disciplines or subdisciplines (e.g., history of religions, religion and literature, religion and psychology, ethics, theology, area studies); (2) students seeking courses on topics relating to religion to fulfill distribution requirements; and (3) students desiring a more systematic exposure to the academic study of religion as a significant component of a liberal arts education. To all students, our program offers an excellent opportunity to develop a deeper understanding and appreciation of the complex ways in which religious traditions inform human thought and behavior. The courses offered through our program are built on the established scholarly tradition of the study of religion as an academic, as opposed to confessional, pursuit. Religious traditions are explored in all of their complexity through comparative contextual (in specific historical or cultural contexts), and thematic studies. The program also hosts lecture series, conferences, symposia, and periodic social gatherings for faculty members and students throughout the academic year to foster a sense of intellectual community.

The Major in Religious Studies

Signing into the major: To sign into the major in Religious Studies, a student must have completed at least one course in Religious Studies before scheduling an appointment with the program director. Here is the process:

1. Schedule an appointment with the director of the Religious Studies Program, whose name and e-mail address can be found on the Religious Studies web site.
2. In addition to a copy of the current Cornell transcript (the informal one students regularly receive is acceptable), students should bring to their meeting with the director all of these forms, available in the Religious Studies office, 409 White Hall:
   a. a completed Religious Studies major application form
   b. a proposed “course of study,” which will be used as a guide in the student’s conversation with the director and revised for formal submission to the program upon his or her entrance as a major

   c. a College of Arts and Sciences advisor/major form, which will be signed by the director and advisor. The advisor will be assigned in this meeting, based on interest.

Advising in the Religious Studies Program: Upon entering the major in Religious Studies, a student is assigned a faculty advisor whose area of expertise most closely matches the proposed interest of the student. An up-to-date approved advisor list is available in the Religious Studies office. Note that not all faculty members who cross-list courses with RELST can serve as RELST advisors. Working closely with one’s RELST advisor when selecting courses is an important component of this program, enabling students to fulfill the requirements for the major while creating an integrated and coherent course of study out of our large number of multidisciplinary course offerings.

To graduate as a major in Religious Studies, a student must (1) complete with letter grades the program’s three core courses, RELST 2250 Introduction to Asian Religions; RELST 2651 Judaism, Christianity, and Islam; and RELST 4449 History and Methods of the Academic Study of Religion; and (2) complete with letter grades seven additional courses approved for the major.

Students must complete 10 courses cross-listed with Religious Studies:

Three Core Courses:

RELST 2250 Introduction to Asian Religions
RELST 2651 Judaism, Christianity, and Islam
RELST 4449 History, Theory, and Methods in the Academic Study of Religion

The requirement for either or both RELST 2250 and 2651 may be satisfied by taking two or more courses in the relevant traditions with some attention to breadth. The requirement for RELST 2250 may be satisfied by taking at least one course on South Asian traditions AND one course on East Asian traditions. The requirement for RELST 2651 may be satisfied by taking at least one course in each of two or more of the traditions of Near Eastern origin (Judaism, Christianity, and Islam). Absolutely no student will be exempted from RELST 4449.

Seven Additional Courses

In selecting their additional courses for the major, students are expected to consult closely with their advisors to ensure that their programs have adequate breadth in Religious Studies generally and depth in a particular tradition, cultural area, or approach to the field. Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences. A comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program, 409 White Hall.

Graduating with Honors in Religious Studies: General Information

1. Eligibility. 3.0 cumulative average and 3.5 average inside the major with no grade in the major below B−. Program director notifies eligible candidates during the spring semester of the junior year or before commencement of final year.
2. **Honors Courses.** Candidates must sign into RELST 4995 Senior Honors Essay for 8 credits (two courses) for two semesters. After the first semester, an R in the transcript indicates that this course (usually for 8 credits) is a yearlong course. When the project is completed at the end of the second semester, the grade recorded counts for all 8 credits. (The 8-credit limit is the result of the conviction that earning more than 8 credits for a single piece of one's undergraduate education is unwise.)

   The student submits the honors proposal (with and according to the program's instruction/cover sheet) to the Religious Studies administrator before the end of the spring semester of the junior year, or not later than Sept. 15 of the final year. The administrator then approves the student's signing into the honors courses.

3. **Honors Committee—three faculty members.** While students are required to have three faculty members on their committee at the time of the submission of the final draft, only two of them must be identified when the proposal is submitted. In the event the advisor is on leave, the program will assign a committee member from the list of approved RELST advisors. The three members should be:

   a. The professor who has agreed to work closely with the student over the year and to be the supervisor/grader of the project is chair of the committee.

   b. The student’s Religious Studies major advisor (required)

   c. Another knowledgeable faculty member

   Sometimes the advisor is the supervisor/ 
   chair. If that is the case, the student needs 
   two additional knowledgeable professors for the committee of three.

**Courses Approved for the Major**

4990, fall; 4991, spring. 2–4 credits each semester. For majors in Religious Studies; permission of director required. Staff.

RELST 4995 Senior Honors Essay
Fall and spring (two semesters). 8 credits. Requirement for honors in Religious Studies. Staff.

ROMANCE STUDIES

Languages: Francophone, Italian, Luso-Brazilian, and Hispanic; and linguistics and semiotics. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

French

The Major
French is a national language in 26 countries and is spoken widely in at least 18 more. The French brought the world the Bayeux Tapestry (arguably the world’s first comic strip), Versailles, Impressionism, Surrealism, New Wave cinema, Poststructuralist Theory, and many other movements and works that have been influential for world culture.

The major in French is divided into two tracks: French literature and French cultural studies. Prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad. For further information, students are asked to consult the director of undergraduate studies.

Track 1: French Literary Studies
This option is designed to give students mastery of the oral and written language, as well as knowledge and understanding of French and Francophone literatures and cultures, and to develop their skills in literary analysis.

Prerequisite
FREN 2190

Shared Core Courses
FREN 2210
FREN 3120

Core Courses
FREN 3210
FREN 3220

Elective Courses
Five (5) literature, culture, or linguistic courses

Track 2: French Cultural Studies
This option is designed to give students mastery of the oral and written language, as well as a broader knowledge of French and Francophone culture in an interdisciplinary context.

Prerequisite
FREN 2190

Shared Core Courses
FREN 2210
FREN 3120

Core Courses
FREN 2240, or 2270
FREN 3380

Electives
Five (5) literature, culture, or linguistic courses

The Following Rules Apply to Both Tracks
Three of the non-core courses must be in French (either taught in Romance Studies or in a Cornell-approved study abroad program in a Francophone country) and be on Francophone subjects. Only courses above the level of FREN 3130 can count toward the major. Two courses may be in English and/or in related fields (e.g., History, Art History, Government, Anthropology, Sociology); 50 percent of the subject matter in these courses must be related to France or the Francophone worlds (e.g., French, History).

One of these courses must be on pre-1789 literature or culture; one must be on Francophone literature or culture; and one must be at the 4000 level. Please note that in some classes, one course may cover two of these requirements (for example, a 4000-level course may also be on a pre-1789 topic, such as Medieval or Early Modern literature or culture).

Students are encouraged to study abroad through Cornell-sponsored or Cornell-approved programs, such as EDUCO in Paris. When appropriate, this work can be counted toward the required course work for the major. Students should consult with the director of undergraduate studies of Romance Studies, the Study Abroad advising dean, and Cornell Abroad, as well as with their faculty advisor before taking courses abroad to assure that they are appropriate.

Administration of the French Major
Students are admitted to the major by the director of undergraduate studies but are guided by their individual advisors. A copy of each student’s progress is given to the director of undergraduate studies for approval and safe-keeping.

Minor in French Studies
The purpose of the minor in French Studies is to supplement a student’s major with a complementary focus or concentration that is indicated on the graduate’s transcript. Organized by the interdisciplinary Program in French Studies, it is designed to be compatible with all kinds of majors and is open to students in all the undergraduate colleges. The minor promotes broad understanding of French culture, as well as Francophone literatures, societies, and their political/economic systems; it also encourages students to refine and practice their language skills. Students pursuing the minor must attain proficiency (by taking a placement exam or completing a 2000-level course in French) and must take the core course. The French Experience (FREN 2240) or an approved equivalent of the core course (approved alternatives will be listed on the program web site). Students may also petition the program director to use an advanced course conducted in French as their core course. Completion of the minor requires, in addition to the core, three nonlanguage courses on French and Francophone topics. Only one of the four courses required for the minor can be taken for S–U grades.

Applications for the minor are accessible at the French Studies web site, www.einaudi.cornell.edu/french-studies/about/index.asp, and should be submitted to the Department of
Students interested in studying in France are strongly recommended. Taking FREN 3010 or 3050, or even 3120 or 3130, is, however, strongly recommended. Students interested in studying in France are encouraged to consider the special benefits offered by EDUCO, the program in Paris cosponsored by Cornell, Emory, and Duke Universities. EDUCO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program may spend the year or the semester as fully matriculated students at the Universities for the Fall or Spring terms.

The program in Paris, offered by EDUCO, the program in Paris, is unique in its emphasis on the integration of academic and cultural experience. Students are encouraged to participate in all aspects of campus life, including participation in student clubs, sports, and social activities. The program also offers a variety of excursions and cultural events, including visits to museums, galleries, and theaters.

EDUCO maintains a center in Paris with full support staff. The resident director, chosen annually from the Cornell, Emory, and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

HONORS. The honors program encourages well-qualified students majoring in French literature and culture to do independent work in French beyond the required course work for the major. The preparation of the senior honors essay, generally spread over two semesters, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers. To be eligible for honors, students must have a general grade point average of at least 3.0 and a grade point average of at least 3.5 in the major.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisors who have agreed to supervise their work. They may receive course credit by enrolling in FREN 4200–4300. However, independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty advisor and two other faculty members. The senior essay is to be made available for reading by the jury on or before April 15. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

Courses in the French Program
Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance at the first scheduled class session. Because of the high demand for language courses, a student who fails to attend the first class meeting will be dropped so others may register.

Note: Students placed in the 2000-level courses have the option of taking language and/or literature courses.

FREN 1210-1220 Elementary French
Fall, 1210; Spring, 1220. Credit for 1210 or 1220 is not given if the student has already received credit for FREN 1210 or 1220 elsewhere. Prerequisite for 1210: LPF score 42–55; for 1220: LPF score 56–64, or SAT II 600–680. Conducted in French.

FREN 1230 Continuing French
Fall or Spring. 4 credits.

FREN 2210 Reading, Looking, Thinking: Introduction to Interpretation
Fall or Spring. 4 credits. Satisfies Option 1 of language requirement.

FREN 2090 French Intermediate Composition and Conversation I
Fall, Spring, or Summer. 4 credits. Satisfies Option 1 of language requirement.

FREN 2100 Pronunciation of Standard French
Fall, Spring. 3 credits. Cannot serve to fulfill language requirement.

FREN 2190 French Intermediate Composition and Conversation II
Fall or Spring. 4 credits. Satisfies Option 1 of language requirement.

FREN 2210 Reading, Looking, Thinking: Introduction to Interpretation (LA-AS)
Fall or Spring. 3 credits. Satisfies Option 1 of language requirement.
French and Francophone world. Emphasizes the development of analytical skills, in particular close readings by a variety of authors from different periods.

FREN 2270 Versions of Versailles # (LA-AS)
Fall. 4 credits. Conducted in English. Used as introduction to French Studies major. T. Perri and R. Klein.
This course will consider the chateau of Versailles as an index of modern French civilization from its political and aesthetic origins at the court of Louis XIV to the present. We will examine the role played by the chateau in the history of France, particularly at decisive moments. Versailles will be taken, as well, as a cultural icon reflecting, in literature, cinema, and fashion, widely held myths and conceptions of France.

FREN 2280 Introduction to LGBT Studies (also FGSS 2290)
Fall. 4 credits. C. Howie.
For description, see FGSS 2290.

FREN 3010 Advanced French Composition and Conversation
Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 2190 or CASE Q++. Recommended courses after FREN 3010: FREN 2210, 3120, or above. FREN 2210 may also be taken concurrently with 3010. Students who have taken FREN 3050 are not eligible to take FREN 3120 for credit. S. LoBello (course coordinator) and staff.
In this course, oral communication skills, writing practice, and a comprehensive review of fundamental grammatical structures are integrated with readings of short stories and articles on current events taken from French magazines or newspapers, chosen for thematic or cultural interest. Students write weekly papers (essays or translations) and give at least one oral presentation in class.

FREN 3050 Advanced French through Film
Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 2190 or CASE Q++. Recommended courses after FREN 3010: FREN 2210, 3120, or above. FREN 2210 may also be taken concurrently with 3010. Students who have taken FREN 3010 are not eligible to take FREN 3050 for credit. C. Waldron.
This language course provides students with opportunities to further develop their written and oral communication, as well as their listening and reading skills, through the use of French contemporary films, related readings, and presentations by guest speakers. Particular emphasis is given to the cultural and historical context within viewed films, as it relates to contemporary French society.

FREN 3080 Introduction to French Linguistics (also LING 3080) (KCM-AS)
Spring. 4 credits. Prerequisite: FREN 2190 or CASE Q++ or permission of instructor. T. Alkire.
Linguistics is the study of human languages—how they are structured and how those structures are put to use. This course aims to introduce students to the fundamental notions of linguistics analysis (phonetics, phonology, morphology, syntax, semantics) using French as the language of instruction, and to provide a complete overview of the French language at a level suitable for nonnative speakers and nonlinguists.

FREN 3120 Advanced French Stylistics
Fall. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 3010 or 3050, or CASE Q++. Students who have taken FREN 3130 are not eligible to take FREN 3120 for credit. T. Alkire.
This course is designed to help students develop a richer, more nuanced and idiomatic command of both the spoken and written language. The study of grammar is discontinued as more attention is devoted to such topics as descriptive and prescriptive stylistics, authorial style, varieties of spoken French and their literary representations, and rhetorical figures and mood. In addition, students will be exposed in class discussion to the development of analytical skills, in textual analysis and translation theory. Writing exercises include literary pastiche, isosyntactic imitation, intralingual translation, an exercise de style, stylistic analysis, and critical translation. Additional exercises will target vocabulary development and contrastive grammar. Seminar-style participation in class discussions is expected.

FREN 3130 Advanced French through News
Spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 3010 or 3050, or placement by CASE. C. Waldron.
This course prepares students for interacting at an advanced level of proficiency in both speaking and writing. Students will increase their vocabulary and knowledge of idiomatic French, while discussing and debating topics of current interest as they are presented in French televised news broadcasts and other media. A flexible approach allows students to improve their language skills on an individualized basis.

FREN 3210 Readings in Modern French Literature and Culture (LA-AS)
Fall. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 2210, 3010, or 3050, or CASE Q++ placement. Conducted in French. T. McNulty.
This course is designed to teach ways of reading and understanding works created from the Romantic period to the present day, in their cultural context. A range of texts from various genres is selected, and students refine their analytical skills and their understanding of various methodologies of reading. Texts by authors such as Balzac, Baudelaire, Cixous, Duras, Genet, Mallarmé, Michaux, Proust, Rimbaud, Sarrute, and Sartre.

FREN 3220 Readings in Early Modern French Literature and Culture # (LA-AS)
Spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 2210, 3010, or 3050, or CASE Q++ placement. Conducted in French. C. Howie.
This course is designed to familiarize students with works from the Renaissance, the Classical period, and the Enlightenment, as well as the cultural and historical context in which these texts are created, reflecting a dynamic period of significant change for France. Texts by such authors as Ronsard, du Bellay, Montaigne, Molière, Molière des débuts, Corneille, Diderot, de Lafayette, Racine, Perrault, and Rousseau. Students may read texts in the original languages or in translation.

FREN 3370 The Algerian Experience # (LA-AS)
Spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 2210, 3010, or 3050, or CASE Q++, or permission of instructor. D. Fieni.
Throughout its history, Algeria has played host to a succession of empires, invaders, freebooters, and other nomads who have transformed the land into a living laboratory for political, religious, artistic, and literary adventures of all sorts. This course introduces students to a range of core issues in this social and cultural crucible at the crossroads of Africa, Europe, and the Middle East. While we will focus particularly on the period that begins with French colonization (1830–), we will also examine periods (Roman, Islamic, and Ottoman Empires). A broadly comparative framework will allow us to analyze intersections between Berber, Arab, Islamic, and Jewish cultures of the Maghreb, including Morocco and Tunisia. We will look at French colonialism from multiple perspectives, delve into anti-colonial engagement and trace Algerian influences and diasporas in France and beyond. Authors studied include (Saint) Augustine of Hippo, Ibn Khaldan, Abdel-Qadir, Eugène Fromentin, Isabelle Eberhardt, Albert Camus, Abdelhamid Ben Badis, Kateb Yacine, Rachid Mimouni, Frantz Fanon, Yamina Mechackra, Tahar Djout, Waciny Lâredj, Leïla Sebbar Maïssa Bey, and Salim Bachi. We will screen films by cinéastes such as Merzak Allouache, Assia Djebar, Abdelatif Kechiche, and Rachid Bouchareb.

FREN 3530 Monsters A–X (Arthur–X–files) (also COML/FGSS 3530) # (CA-AS)
Spring. 4 credits. K. Long.
This course will explore the history of notions of monstrosity, a concept that takes on a wide range of meanings over the course of thousands of years. We will discuss why monstrosity is so often linked to questions of gender and racial difference, from the classical period to the present day, how it is played up in the early modern era monstrosity becomes linked to class tensions, the relationship between monstrosity and bodily difference (deformity, “birth defects,” and injuries), and the representation of moral transgression (particularly cruelty but also fraud). We will also consider how monstrosity stands at the borders of life, and helps us to define (and question) not only what is human, but what may constitute life itself. We will contemplate the epistemology of the monstrous, that is, monstrosity as a model for constructing or creating information, and as a means of questioning the possibility of knowing.
FREN 3680 Passion for Poetry (LA-AS) Spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 3210, 3220, or permission of instructor. L. Dubreuil. Yes, passion, for modern poetry. The class is a rare opportunity to study all major aspects of poetry in French from the second part of the Middle Ages to the present. While the course will indeed provide breadth and coverage as well as insights on the way to read and write a poem in French, another goal is to create or strengthen a personal taste for poetry among students. This is why the course progression will be centered on existential problems and nations that are at stake in poetry and in our lives—e.g., passionate love and friendship, carpe diem, eroticism, marginality, and extraordinary ways of life. We’ll read poems by authors such as Villon, Ronsard, Louise Labbé, Baudelaire, Cézanne, Georges Bataille, Jean Genet, Victor Hugo, or Marguerite de Navarre. Assignments will be diverse and will include exercises such as reading verses aloud, writing a sonnet, commenting on a text, collecting poems on a key theme, or even co-organizing a poetry festival.

FREN 3740 Being Bad in the Renaissance (LA-AS) Fall. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: FREN 3210, 3220, or permission of instructor. K. Long. This course follows the tradition of the histoires tragiques, short stories that served as sources for a number of Shakespeare’s plays (Hamlet, Romeo and Juliet, Macbeth, among others) and that foreground bad behavior—murder, sexual transgressions, power struggles, and general mayhem. In our analysis of the Heptameron of Marguerite de Navarre, and the Histoire tragiques of Matteo Bandello, Pierre Bousistau, and François de Belleforest, we will also consider the hold that these bleak views of human nature had on the early modern imagination, and ponder the nature of evil in the early modern universe. All texts will be in French; the course will be conducted in French.

FREN 4170 Shipwrecks: Disaster, Deliverance, and Capitalism (also LATA/SPAN 4170) (LA-AS) Fall. 4 credits. G. Archin. For description, see SPAN 4170.

FREN 4190-4200 Special Topics in French Literature 4190, fall: 4200, spring. 2–4 credits each semester. Prerequisite: permission of instructor. Staff. Guided independent study of special topics.

FREN 4290-4300 Honors Work in French 4290, fall: 4300, spring (yearlong). 8 credits. R grade given at end of fall semester and final grade at end of spring semester. Open to juniors and seniors. Consult director of honors program for more information. Staff.

FREN 4420 Sex in French (LA-AS) Fall. 4 credits. Satisfies Option 1 of language requirement. Prerequisites: FREN 3100, 3120, or permission of instructor. C. Howie. Does a close investigation of French culture sustain its reputation for sexual provocation? From the medieval querelle de la rose to the recent best-seller la série sexuelle de Catherine M., the boundaries representing sex and philosophizing about it are more or less constantly permeable. We’ll look at a few particularly fraught moments in this history of permeability, beginning with the medieval dirty stories known as fabliaux and the debates that grew out of the Roman de la rose; Sade’s L’Histoire de la légèreté, Cocteau’s Le livre blanc; Genet’s Miracle de la rose, Bataille’s Érotisme; Duras’ Les yeux bleus chéreux noirs; and films by Patrice Chereau, Cyril Collard, Catherine Breillat, and François Ozon.

FREN 4540 Montaigne and Skepticism (also FREN 6540) (KCM-AS) Spring. 4 credits. Satisfies Option 1 of language requirement. Conducted in French. K. Long. How does philosophy respond to widespread and continuous disaster? The Wars of Religion in France and throughout Europe offer the context of continual violence, trauma, and social upheaval, and the Essais of Michel de Montaigne respond to this context by elaborating a new form of skepticism, based on classical models, which creates a space for more humane ethics (including some of the earliest discussions of religious and racial tolerance) and for the freedom of thought (a relatively new concept in the Western World), by means of radical questioning of the functioning of political, religious, and intellectual authority. What Montaigne offers is both a practical and intellectual model for coping with extreme and omnipresent violence and social conflict, a model that presents difference as a necessary condition of physical and psychic survival. All texts will be in French; course will be conducted in French.

FREN 4556 Transatlantic Decadence (also SPAN/SHUM 4956) Spring. 4 credits. B. Bosteels. For description, see SHUM 4956.

FREN 6130 Francophonie and the Inventions of the Maghreb Fall. 4 credits. Conducted in English. D. Fieri. This course examines the politics of French in the Maghreb as it engages with other languages in the battle for cultural capital and the right to represent a variety of interests (e.g., national, religious, class, gender, aesthetic). We’ll explore the legacy of French colonial language politics in the Maghreb since 1830, the development of Arabization (and its discontents), and a range of postcolonial language wars and contestations. An important aim of this course will be to complicate the meanings attributed to global French by considering the ways that Arabic and Berber languages can be said to trouble not just the older concept of francophonie but also the more recent idea of littérature-monde. Readings will include fiction and poetry written in the French language from writers such as Malek Haddad, Mohammed Dib, Assia Djebar, Rachid Boudjedra, Yamina Mechakra, Abdelkhir Khatibi, Edmond Amran Elmaleh, and Abdelwahab Meddeb; works translated from the Arabic by Tahir Wattar and Ahlem Mostaghfane; and texts by Francz. Fanon, Jacques Derrida, Hélène Cixous, Réda Bensmaïa, Paulette Casanova, Ranjana Khanna, and Ronald Judy, among others.

FREN 6300 French Reading for Graduates Spring. 3 credits. Prerequisite: graduate standing. T. Alkire. Designed for those with little or no background in French. Aims primarily to develop skill in reading French. Covers grammar basics, extensive vocabulary, and strategies for reading in a foreign language. Some flexibility in selecting texts according to field of interest.

FREN 6360 The Refusal of Politics Spring. 4 credits. Conducted in French. L. Dubreuil. Graduate and senior seminar on negative relations between literature and politics. It will include a reading of some theories of engagement and degagement (or retreat) from the last decades. We will compare these theories with the discrete and problematic solutions that literary oeuvres have invented. We shall focus on the literary refusal of society in 19th-century France and will consider different ways of living in an “ivory tower.” Studied writers could include Mme. De Stael, Vigny, Hugo, Baudelaire, Flaubert, Maupassant, Mallarmé, or Zolo.

FREN 6390-6400 Special Topics in French Literature 6390, fall: 6400, spring. 2–4 credits each semester. Staff. Guided independent study for graduate students.

FREN 6431 Aesthetic of Excess: Psychophenomenological Approaches to Technology (also SHUM 6341) Fall. 4 credits. T. M. Williams. For description, see SHUM 6341.

FREN 6450 Montaigne and Skepticism (also FREN 4540) Spring. 4 credits. Conducted in French. K. Long. For description, see FREN 4540.

FREN 6475 Theories in Ideology (also HIST 6475) Fall. 4 credits. C. Robcis. For description, see HIST 6475.

FREN 6660 The Poetic Vocation of Philosophy Fall. 4 credits. Conducted in French. C. Doumet. An interrogation of the ancient division between poetry and philosophy, exploring the territories constituted by this division and interactions between them. How do supposedly poetic features such as image, metaphor, and the play of the signifier animate philosophical discourse and how do concepts enter into the composition of the poem and come to function there? We will examine critical moments in philosophical discourse where the elaboration of concepts passes through fiction and image and the inventiveness of language. In addition to some classic philosophical texts, including Descartes, we shall consider work by such contemporary philosophers as Derrida, Ranciere, Badiou, Nancy, Jean-Louis Citrèen, and Michel Duquét.

FREN 6770 Four Literary Theologians Spring. 4 credits. C. Howie. This course engages with the literary articulation of ideas about God (but also, let it be said, with love, embodiment, and language) in premodern and modern literature, with special emphasis on four writers who are also theologians: Augustine, Bernard of Clairvaux, Pascal, and Kierkegaard. As we read them, we’ll also be reading some of the work done by contemporary
philosophers and theologians (such as Catherine Keller, Mark Jordan, Jean-Louis Chrétien, Graham Ward, Jean-Luc Nancy, and Karmen MacKendrick) on what it means to think, and speak, theologically, even as we ask questions about how literature, and the arts more generally, may embody various modes of resistance to anything like a straightforward account of what—with or without the name of God—informs, exceeds, and drives them.

FREN 6920 Psychoanalysis and Sexual Difference (also CONL 6779)
Fall, 4 credits. Conducted in English. T. McNulty.
This course will serve as a theoretical introduction to psychoanalytic treatments of sexual difference, especially in the work of Sigmund Freud, Jacques Lacan, and their successors. Distinct from both biological sex and social gender, masculinity and femininity are understood psychoanalytically as two positions that the subject of the unconscious may take up with respect to castration, each of which involves a particular ethical response to the death drive and to the signifier or law that seeks to limit its insistence. The first half of the course will examine the logics of femininity and masculinity in their cultural contexts; the second half will explore their implications for politics, aesthetics, and logic.

Italian

The Major
The Italian section offers a major in Italian with tracks in Italian literature and culture and Italian studies. The first track is designed for students who wish to study Italian language, literature, and culture through the works of writers, artists, and cultural figures who have developed rich and varied aesthetic traditions. The second track in Italian studies includes a broader progression of courses that entails work in related disciplines. Both are designed to provide students with proficiency in reading, speaking, and writing in Italian, to familiarize students with Italian culture, and to assist them in analyzing Italian texts in related fields. For further information, students are asked to consult the director of undergraduate studies.

Track 1: Italian Literature and Culture
Track 1 is designed for students who: (1) wish to study Italian language, literature, and culture through the works of writers, artists, and cultural figures; and (2) wish to do most of their course work in Italian.

Admission: the prerequisite for official admission to Track 1 of the Italian major is successful completion of any ITAL course at the 2000 level or higher conducted in Italian.

Students who wish to follow Track 1 in Italian are advised to consult with the director of undergraduate studies, who will take into account the student's interest, preparation, and career goals and assign the student to an advisor. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary and cultural history, and to develop some skill in textual and cultural analysis. In conjunction with the major advisor, the student will craft an individualized plan of studies that will meet the minimum requirements for Track 1 as listed here:

- At least 10 Italian literature or culture courses at the 2000 level and higher (the prerequisite may be counted toward this requirement if the 1-credit Italian practicum and the 1- or 2-credit independent study options do not count as full courses). One of these courses must be at the 4000 level and one must focus on Italian texts before the 19th century. With the permission of the advisor, the student may substitute for two of these courses other courses that are deemed relevant to the student’s study of Italian (e.g., a course in another national literature, a course in critical theory, or a course in European history).
- At least 20 credits in courses conducted entirely in Italian. The Italian practica may be used to fulfill 3 of these credits. Twelve of these credits must be in courses in Italian at the 3000 level or above.
- Competency in the Italian language (as demonstrated by examination or by course work approved by the director of undergraduate studies).

ITAL 4040 History of the Italian Language and ITAL 4050 Linguistics Structure of Italian may be counted toward this requirement.

Track 2: Italian Studies
Track 2 in Italian Studies is designed primarily for students who wish to pursue individual interests that do not fall within Track 1 of a major. Students select courses from Italian as well as courses from other departments that have a substantial Italian component, such as History of Art, Architecture, Government, Music, and Comparative Literature. For the list of approved Italian studies courses, please see the director of undergraduate studies.

Admission: By the end of their sophomore year, prospective majors in Track 2 should have taken ITAL 2190 Intermediate Conversation, a course that demonstrated the equivalent level of fluency.

To complete the program, students must:
1. Demonstrate competence in the Italian language by completing ITAL 3130 Advanced Conversation and Composition, or its equivalent (such as ITAL 3500 Italian Writing Workshop);
2. Complete the core series of Italian Studies courses: ITAL 2900 Perspectives in Italian Culture (fall), and ITAL 2970 Introduction to Italian Literature (spring);
3. Complete at least five courses (20 credits) from the approved list of Italian Studies courses at the 3000 level or above from no more than three departments. Students planning on studying abroad for a year or a semester in Italy should plan their course work to emphasize their individual interests. Note: Students must maintain a B– in each of five Italian Studies courses; and
4. Select a committee of one or more faculty advisors to help formulate a coherent program of study. One of the advisors must come from the Italian section.

Minor in Italian Studies
In order to complete an undergraduate minor in Italian Studies, students must take at least five courses (a minimum of 15 credits) by selecting courses in consultation with the minor advisor, one of which must be ITAL 2900 Perspectives in Italian Culture. These courses must be allocated among three Cornell departments and must include one introductory course and one course at the advanced level. Language competence must be demonstrated by successfully completing ITAL 2190. Please note that courses taken as part of a study abroad program approved by the study abroad dean may count toward meeting the above requirements.

Students wishing to enroll in the minor must register their intent by contacting the director of undergraduate studies, who will assign a faculty advisor to students.

Study Abroad in Italy: Italian studies faculty members strongly encourage students to consider studying abroad in Italy. Students will have the opportunity to immerse themselves in Italian and gain a singular perspective on the Italian cultural context.

Students are urged to consider the Bologna Cooperative Studies Program (BCSP), of which Cornell is an associated member. BCSP offers qualified undergraduate students an opportunity to study for a full academic year or a semester at the University of Bologna for credit. During each semester of the academic year, which begins in October and extends through June, BCSP students enroll in one or two regular University of Bologna courses with Italian students. Students may also take special courses in Italian literature, language, art history, film studies, and contemporary politics.

Enrollment in a language course is conditional upon the student’s eligibility for the particular level and on attendance at the first scheduled class meeting. Beginning students are required for languages courses, a student who fails to attend the first class meeting will be dropped so others may register.

Note: Students placed in the 2000-level course have the option of taking language and/or literature courses.

ITAL 1210-1220 Elementary Italian
1210, fall; 1220, spring; 4 credits each semester. Prerequisite: ITAL 1210 or LPI 37-44 or SAT II 370-450. Intended for beginners or students placed by examination. At the end of ITAL 1220, students who score lower than 56 on the LPI take ITAL 1230; those with 56 or higher may enter the 2000-level sequence.

Fall, L. Balardi; spring, K. Serafin and staff. ITAL 1210 and 1220 are fast-paced, introductory-level courses designed for students with no previous knowledge of Italian (1210), and those with some basic knowledge of the language (1220). Students will be guided in developing four language skills (listening, speaking, reading, and writing) in the context of everyday topics (e.g., school, housing, travel, personal...
prefer, simple exchanges about past, future and possible events). They will also be introduced to culturally acceptable modes of oral and written communication in Italian, some fundamentals of Italian history, and select current social and political issues.

ITAL 1230 Continuing Italian
Fall or spring. 4 credits. Prerequisites: score of 45-55 at the final examination in ITAL 1220; LPI score of 45–55, or 460–580 on SAT II. Qualified students are strongly encouraged to take this course as soon as possible after completing ITAL 1220, or as early in the course of their undergraduate studies as possible. K. E. Bättig von Wittelsbach.

This course is designed to accommodate students who have fair knowledge of Italian vocabulary and structure, but are not ready for ITAL 2090. It aims to help students further develop their intercultural, reading, listening, speaking, and writing skills, and increase their confidence in communicating in Italian.

Course materials and assignments provide ample opportunity for vocabulary building and grammar review. Intercultural awareness is cultivated through a variety of short readings, films, discussions, class presentations, and group work.

ITAL 2090 Italian Intermediate Composition and Conversation I
Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: ITAL 1220 or LPI 56-64 or SAT II 590-680. Qualified students are strongly encouraged to take this course as soon as possible after completing ITAL 1220. Fall. K. Serafin; spring: F. Cervesi.

The goal of this course is the development of all language skills at an intermediate level, with an emphasis on accurate, idiomatic, and culturally appropriate communication in Italian. Students will improve their language abilities through readings and other material related to common Italian cultural practices and daily life, guided compositions and other written assignments, directed conversation on topics relevant to understanding modern Italy, grammar review, and a variety of vocabulary-building tasks. Class presentations, discussions, and group assignments are an integral part of this course.

ITAL 2140 World News, Italian Views (CA-AS)
Spring. 4 credits. Satisfies Option 1 of language requirement. Limited to 18 students. Prerequisite: ITAL 2090 or permission of instructor. Designed to improve students' proficiency in Italian. Special attention will be given to writing. Conducted in Italian. M. Migiel.

In this seminar, we will read, discuss, and write about a variety of global and transnational issues that get debated in the Italian media. Topics will take into account student interests and are likely to include changing family structures, Islam and the West (particularly after September 11), immigration policies, international politics, developments in science and technology, economic and business ventures, cultural events, and sports.

ITAL 2190 Italian Intermediate Composition and Conversation II
Spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisites: ITAL 2090 or equivalent (LPI score of 65 or above, SAT II 600 or above). Students pursuing a minor in Italian Studies are required to demonstrate their language competence by successfully completing this course. K. E. Bättig von Wittelsbach.

An intermediate-level course that aims to further develop intercultural, reading, listening, speaking, and writing abilities acquired in ITAL 2090. Students will be guided in perfecting their communication skills, improving their writing proficiency, and developing a critical eye toward printed and visual material drawn from literature, history, politics, science, and arts in the Italoophone world. Conversation skills will be practiced in daily discussions and in individual or group projects and presentations. A variety of written assignments will help students increase the range, accuracy, and stylistic appropriateness of their writing. Review of select grammar topics is part of this course, as is reading a short contemporary novel.

ITAL 2900 Perspectives in Italian Culture (CA-AS)
Spring. 3 credits. "Core course" in track two of the Italian major, offered every year. Conducted in English with discussion section in Italian. Staff.

This course aims to provide students with the tools necessary to understand the most important social, political, and artistic developments occurring in contemporary Italian culture. These include the nature of geographic and national fragmentation in post-Risorgimento "ITALY"; the "Southern" question and the phenomenon of "Costa Nostra"; Italian contributions to world cinema; and the politics of food. By providing students with interdisciplinary perspectives on Italian culture, they will be introduced to how Italian culture is produced and consumed globally today. Primary readings include selections from Peter Robb, Leonardo Sciascia, and Tim Parks, and films from Rossellini, de Sica, Sergio Leone, and Benigni. A group of secondary readings stimulates the discussion of the historical and cultural panorama of contemporary Italy.

ITAL 2950 The Cinematic Eye of Italy (CA-AS)
Fall. 3 credits. Satisfies Option 1 of language requirement. Prerequisite: ITAL 2190 or permission of instructor. M. Migiel.

This seminar introduces students to select masterworks of Italian postwar cinematography and熟悉izes students with the vocabulary and the structures needed to analyze films and critique them. We will examine the films' cultural and sociopolitical contexts as well as their formal aspects.

ITAL 2970 Introduction to Italian Literature (LA-AS)
Spring. 3 credits. Satisfies Option 1 of language requirement. "Core course" in Italian Studies major. Prerequisite: ITAL 2090 or permission of instructor. Conducted in Italian. Staff.

The course aims to introduce students to Italian literature, mainly through readings in prose and poetry of the 20th century. The course includes significant practice in grammar, vocabulary building, and composition, and to this end, students are required to write five papers of medium length over the course of the semester.

ITAL 3010 Screening Cosa Nostra: The Mafia and the Movies from Scarface to The Sopranos (also FILM 3010) (CA-AS)
Fall. 4 credits. T. Campbell.

From Al Capone to Tony Soprano, the mafia has been the subject of numerous films over the course of 70 years, so many in fact that one might well speak of a "mafia obsession" in American popular culture. Drawing upon a large number of American and Italian films, this course examines the cultural history of the mafia through film. We will explore issues related to the figure of the gangster, the gender and class assumptions that underpin it, and the portrayal—almost always stereotypical—of Italian-American immigrant experience that emerges from our viewings.

The aim will be to enhance our understanding of the role of mafia plays in American and Italian culture in the 20th and 21st centuries. Film screenings will include Little Caesar; Scarface, Shame of the Nation, The Godfather Parts I and II, Goodfellas, The Funeral, Donnie Brasco, episodes from The Sopranos, and Gomorrah.

ITAL 3020 Italian Practicum
Spring. 1 credit. Staff.

Students enrolled in an Italian literature or culture course that is conducted in English may opt to take this practicum provided that they have already attained proficiency in the language.

ITAL 3130 Advanced Italian: Language in Italian Culture (LA-AS)
Fall. 4 credits. Satisfies Option 1 of language requirement. Students pursuing the Italian Major Track 2 (Italian Studies) are required to demonstrate their competence in the Italian language by successfully completing this course. Prerequisite: ITAL 2190 or equivalent. Conducted in Italian. K. Bättig von Wittelsbach.

This course is designed to develop accuracy and fluency in oral and written expression, and to sharpen awareness of idiomatic and stylistic nuances in present-day Italian. The material discussed is drawn primarily from a wide range of social and cultural issues in modern Italy, and in the areas of Europe where Italian is an official (Switzerland) or a regional minority language (Istria). Some of the topics discussed are the role of Italy in the European Community, the place of the minorities (especially that of more recent, non-European immigrants) in Italian public life, the importance of art and artists in contemporary Italian society, and the changing Italian language and its regional variants. Listening and speaking skills are cultivated through the frequent use of authentic and visual materials. Readings range from fictional to analytical and argumentative, with writing assignments frequently emulating the text being read. Presentations and grammar review are also an important component of this course.
ITAL 3300  Italian Writing Workshop (LA-AS)  
Spring. 4 credits. Satisfies Option I of language requirement. Prerequisite: ITAL 2090 or permission of instructor. M. Migiel.  
Aimed at helping students to improve their writing abilities in Italian, this course will focus on writing to narrate, writing to persuade, writing to entertain, and writing for social change. Topic for spring 2011: Alessandro Manzoni's Promessi sposi. This 19th-century historical novel is one of two Italian classics that Italian secondary school students are required to study in depth (the other being Dante's Commedia). In reading this novel ourselves, alongside selections from 20th-century reworkings of it, we will ask: How did Promessi sposi contribute to the development of the Italian language, to the unification of Italy, to the Romantic movement, and to the understanding of Italian Catholicism? In this novel about "the betrothed," why does Manzoni avoid love scenes, and what does it mean for 20th-century writers (including writers under Fascism) to parody and eroticize Manzoni? How did Manzoni's Promessi sposi help Italians define themselves in the 19th century and how does it help them to define themselves now? Students will have the opportunity to write in a variety of genres.

ITAL 4190-4200  Special Topics in Italian Literature  
4190, fall; 4200, spring. 2–4 credits each semester. Prerequisite: permission of instructor. Staff. Guided independent study of special topics.

ITAL 4290-4300  Honors Work in Italian  
4200, fall; 4300, spring (yearlong). 8 credits. R grade given at end of fall semester and final grade at end of spring semester. Open to juniors and seniors. Consult director of honors program for more information. Staff.

ITAL 4450  Decameron (also ITAL 4450) (LA-AS)  
Fall. 4 credits. Conducted in English. M. Migiel. This seminar will be dedicated to a reading of Boccaccio's Decameron (1349–51). Particular attention will be dedicated to exploring how the stories of the Decameron represent competing notions of love, marriage, sexuality, truth, and honor, as well as how the Decameron represents a world caught between aristocratic ideals and the interests of a new mercantile and business class.

ITAL 4660  War and Modernity: The Italian Experience (LA-AS)  
Fall. 4 credits. T. Campbell. This course will examine a selection of modern Italian war narratives within the context of contemporary theorizations on trauma. We will begin with the First World War, and Emilio Lussu's Un anno sull'altipiano, the classic memoir of Italian defeat at Caporetto, and then follow it up with other brief accounts of war in the trenches. In the second half, we will shift our attention to the war in Ethiopia and World War II. Questions to be addressed include how literature approximates the trauma of war; the relation among media, subjectivity, and getting people to die for you; and how modern narratives measure and commemorate their distance from combat. Authors include Flaiano, Primo Levi, Recelli, Salsa, and Tobino.

ITAL 4720  Federico Fellini (CA-AS)  
Spring. 4 credits. Satisfies Option I of language requirement. K. Pinkus. Born to a middle class family in the small seaside town of Rimini, Federico Fellini became one of the most imaginative and powerful filmmakers in the history of cinema. How was he drawn to cinema? What rules did he break with his idiosyncratic working method? Why did he call himself "a born liar"? The course will move between close readings of his extraordinary films and studies of cultural context in which they were produced. Films will include The White Sheik, I Vitelloni, La Dolce Vita, Nights of Cabiria, Amarcord, Matrimonial Agency, The Telephone of Dr. Antonio, 8/12. Ginger and Fred, various TV commercials; as well as sections from films by Roberto Rossellini, Pier Pasolini, and others.

ITAL 6390-6400  Special Topics in Italian Literature  
6390, fall; 6400, spring. 2–4 credits each semester. Staff. Guided independent study for graduate students.

ITAL 6450  Decameron (also ITAL 4450) (LA-AS)  
Fall. 4 credits. Conducted in English. M. Migiel. For description, see ITAL 4450.

ITAL 6850  Precarietà/Precariousness  
Spring. 4 credits. Conducted in either Italian or English, depending on enrollment. K. Pinkus  
"Precariousness" is a key in contemporary Italian thought. Normally it refers to the economic and social condition of young people who work in precarious jobs (such as call centers) without the kind of social welfare and security enjoyed by previous generations. This course will expand outward from an examination of precarietà in the peculiar Italian context. Does precariousness share an organic tie with literature and literary language? Is it possible or useful to speak of precariousness as a more general condition of labor and affect linked to literature since the Unification of Italy? What is the relation between the term and alienated labor, especially under Fascism? And why does precariousness erupt during the so-called Postfordist era, not only in Italy but in a global context? Although the course will focus primarily on Italy, students with other areas of concentration are welcome. Readings will be in Italian (with optional readings in English, Spanish, and French).

PORT 2090–2190  Intermediate Brazilian Portuguese for Spanish Speakers  
I–II @ 2090, fall; 2190, spring. 4 credits each semester. PORT 2090 satisfies Option I of language requirement. Prerequisite: for 2090, PORT 1220; for 2190, PORT 2090 or permission of instructor. J. Oliveira. A full-year course intended for students who have already taken the full level of Portuguese, or as an intensive introductory course for those who are native/near native speakers of Spanish. An all-skills course with particular emphasis on Brazilian Portuguese spoken within the context of its culture. It presents a fast-paced review focused on improving grammatical accuracy, pronunciation, and on enriching vocabulary.

PORT 2800  Perspectives on Brazil (also LATA 2201) (CA-AS)  
Spring. 4 credits. Staff. This course provides an introduction and overview of Brazilian culture. It will study different periods of Brazilian history, through the analysis of films, literature, essays, visual arts, and music. Students will explore different definitions of Brazilian identity and "Brazilianness" focusing on key topics including the formation of the colonial Brazil as a tropical paradise; slavery and abolition; the particularities century; and the contradictions of the modernization process throughout the 20th century. We will consider elements of Brazilian popular culture such as Carnival, Samba, and "telegenovels," and some of the most important cultural movements of the 20th century, such as "Modernismo," "Cinema Novo," and "Tropicalla." The primary objective of the course is to provide students with the relevant background to understand Brazilian cultural history.

Romance Studies  
Faculty. D. Cruz de Jesús.

ROMS 5070  Methodology of Romance Language Learning and Teaching  
Spring. 3 credits. Required for all graduate TAs who will be teaching Romance languages for the first time at Cornell. D. Cruz de Jesús. Focuses on language teaching as facilitation of learning, thus on the learner's processing of language acquisition and the promotion of reflective teaching. Pedagogical approaches will be addressed from a learner-centered perspective involving effective language learning strategies and analysis.

ROMS 5080  Pedagogic Practicum  
Fall. 1 credit. Required for all graduate TAs teaching language for the first time in the Department of Romance Studies. Staff. This practicum is designed to better enable the TAs to meet the needs of their students in the understanding and acquisition of the linguistic forms, notions, and functions covered in their course.

Spanish  
The Major

The Spanish major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic cultures, and to develop their skills in literary and linguistic analysis. Satisfactory completion of the major should enable students to meet cultures, and to develop their skills in literary language, to acquaint them with Hispanic literature and to satisfy standards for acceptance into the major.

Minor in Spanish

The minor promotes a broad understanding of Spanish and Spanish American culture, literature, and society; it also encourages students to refine and practice their language skills. In order to complete the minor, students must take a minimum of 5 courses (15 credits), distributed as follows: Language competence must be demonstrated by successfully completing either SPAN 3060 (Introduction to Hispanic Linguistics), SPAN 3100 (Advanced Spanish Conversation and Pronunciation), or SPAN 3110 (Advanced Spanish Writing Workshop). Students pursuing a minor must furthermore complete either SPAN 2290 (Perspectives on Latin America), SPAN 2240 (Perspectives on the Caribbean), or SPAN 2290 (Perspectives on Spain), as well as three elective courses in consultation with the student's advisor. Among those electives, students are strongly encouraged to take at least one course at the advanced 3000–4000 level.

Students wishing to enroll in the minor must register their intent by contacting the director of undergraduate studies, who will assign a faculty advisor to each student.

Academic Year Only in Spain: Cornell, the University of Michigan, and the University of Pennsylvania co-sponsor an academic year in Spain program. Students enrolled in this program spend the first month before the fall semester begins in an orientation session at the University of Seville, where they take courses in Spanish language and culture and take advantage of special lectures and field trips. Once the semester begins, students enroll in regular classes at the University of Seville and at the program’s center facility. Center courses are designed for the program and include a seminar offered by the resident director, from the faculty of either Cornell, Michigan, or Pennsylvania. Other center courses typically include history of art, history of the Mediterranean region, a literature course, and Spanish composition and syntax.

In Seville, students live in private homes and a rich array of cultural activities and excursions are organized every semester.

Applicants are expected to have completed SPAN 2190 before departure. Completion of SPAN 3110 is highly recommended. Students are strongly encouraged to study abroad for the entire year rather than one semester. Students interested in the study abroad program should visit Cornell Abroad in 474 Uris Hall and see the Cornell Abroad website: www.einaudi.cornell.edu/cuabroad.

Summer Program in Madrid: A six-week intensive summer program in Madrid, designed to enhance language skills in a cultural context. The 4-credit courses offered satisfy the language requirement of Cornell's College of Arts and Sciences, and SPAN 2250 may count toward the major/minor in Spanish. Courses taught exclusively by Cornell faculty, the courses are complemented by field trips in and outside Madrid. Interested students should contact Cornell's Summer Program in B20 Day Hall and visit www.sce.cornell.edu/Madrid.

Honor: Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty to supervise their work and the writing of their honors essay (see SPAN 4290–4300).

Courses in the Spanish Program

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance at the first scheduled class session. Because of the high demand for language courses, a student who fails to attend the first class meeting will be dropped so others may register.

Note: Students placed in the 2000-level course have the option of taking language and/or literature courses.

SPAN 1120 Elementary Spanish: Review and Continuation

Fall, 4 credits. Students may not receive credit for both SPAN 1120 and 1220. Prerequisite: LPS 37–44 or SAT II 370–450. Students who have taken SPAN 1210 may enroll. Meets five times a week: four class sessions and one lecture. B. Teutl.

Using an integrated approach, this course develops listening, speaking, reading, and writing skills in a cultural context. It begins with a basic vocabulary and grammar review and then introduces new materials. Class sessions are in Spanish, and the language is actively used in communicative and creative activities. Students develop writing skills through composition and read short cultural and literary texts to foster vocabulary acquisition and improve reading strategies. Lectures introduce and clarify grammatical structures. After 1210, students may take 1230, 2070, or 2090 depending on their LPS score at the end of the course.

SPAN 1210–1220 Elementary Spanish I and II

1210, fall, 4 credits. Prerequisite: students with no previous knowledge of Spanish, up to two years of high school Spanish, LPS score 57–59 or lower, or SAT II 370–450. Fall, M. K. Redmond and staff; spring, T. Beviá and staff.

Using an integrated approach, this two-course sequence develops listening, speaking, reading, and writing skills in a cultural context. Both courses meet five times a week, with four class sessions and one lecture. Class sessions are in Spanish, and the language is actively used in communicative and creative activities. Students develop writing skills through compositions and read short cultural and literary texts to foster vocabulary acquisition and improve reading strategies. Lectures introduce and clarify grammatical structures. After 1210 students may take 1220 (fall) or 1220 (spring). After 1220, students may take 1230, 2070, or 2090 depending on their LPS score at the end of this course.

SPAN 1230 Continuing Spanish

Fall, spring, or summer, 4 credits. Prerequisite: SPAN 1120, 1220, or LPS 45–55, or SAT II 460–580. Meets four times a week: Fall and spring, S. Amigo-Silvestre and staff.

Romance Studies

Area Studies Option (Spanish, Latin American, or U.S. Latino Studies): At least 15 credits of courses at the 3000 level and above in any of those focus areas beyond the core, all courses to be approved through consultation with the major advisor. Courses should reflect interdisciplinary interests in the area and may include up to three other academic fields of interest. For example, a student interested in Latin American studies may want to include courses on such topics as Latin American history, government, rural sociology, and economics; students who want to specialize in U.S. Latino issues may want to include such topics as sociology of Latinos, Latino history, and Latino medical issues in addition to further studies in literature.

Students are encouraged to enrich the major program by including a variety of courses from related fields or by combining Spanish with related fields such as history, philosophy, sociology, anthropology, art, music, classics, English, comparative literature, and other foreign languages and literatures.

The J. G. White Prize and Scholarships are available annually to undergraduate students who achieve excellence in Spanish.

Courses in the Spanish Program

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance at the first scheduled class session. Because of the high demand for language courses, a student who fails to attend the first class meeting will be dropped so others may register.

Note: Students placed in the 2000-level course have the option of taking language and/or literature courses.

SPAN 1120 Elementary Spanish: Review and Continuation

Fall, 4 credits. Students may not receive credit for both SPAN 1120 and 1220. Prerequisite: LPS 37–44 or SAT II 370–450. Students who have taken SPAN 1210 may enroll. Meets five times a week: four class sessions and one lecture. B. Teutl.

Using an integrated approach, this course develops listening, speaking, reading, and writing skills in a cultural context. It begins with a basic vocabulary and grammar review and then introduces new materials. Class sessions are in Spanish, and the language is actively used in communicative and creative activities. Students develop writing skills through composition and read short cultural and literary texts to foster vocabulary acquisition and improve reading strategies. Lectures introduce and clarify grammatical structures. After 1210, students may take 1230, 2070, or 2090 depending on their LPS score at the end of the course.

SPAN 1210–1220 Elementary Spanish I and II

1210, fall, 4 credits. Prerequisite: students with no previous knowledge of Spanish, up to two years of high school Spanish, LPS score 57–59 or lower, or SAT II 370–450. Fall, M. K. Redmond and staff; spring, T. Beviá and staff.

Using an integrated approach, this two-course sequence develops listening, speaking, reading, and writing skills in a cultural context. Both courses meet five times a week, with four class sessions and one lecture. Class sessions are in Spanish, and the language is actively used in communicative and creative activities. Students develop writing skills through compositions and read short cultural and literary texts to foster vocabulary acquisition and improve reading strategies. Lectures introduce and clarify grammatical structures. After 1210 students may take 1220 (fall) or 1220 (spring). After 1220, students may take 1230, 2070, or 2090 depending on their LPS score at the end of this course.

SPAN 1230 Continuing Spanish

Fall, spring, or summer, 4 credits. Prerequisite: SPAN 1120, 1220, or LPS 45–55, or SAT II 460–580. Meets four times a week: Fall and spring, S. Amigo-Silvestre and staff.
The goal of this low-intermediate course is to achieve a higher level of comprehension as well as to advance oral and written expression in a cultural context. Classes are in Spanish and the language is actively used in communicative and creative activities. Students engage in interactive and literary analysis of texts to acquire new vocabulary, complete analytical exercises, and develop reading strategies. Students continue developing writing skills through composition, give oral presentations, and review grammatical structures independently with some clarification by the instructor as needed. After this course, students may take SPAN 2140, 2150, 2170, or 2190.

SPAN 2000 Spanish for Heritage Speakers (also LSP 2020) Fall. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: LSP 56 or higher, SAT II 590 or higher, CASE placement, or permission of instructor. Not open to students who have taken SPAN 2070 or 2090. D. Cruz de Jesús. Designed to expand bilingual students’ knowledge of Spanish by providing them with ample opportunities to develop and improve each of the basic skills, with a particular focus on writing vocabulary. After this course students may take SPAN 2140, 2150, 2170, or 2190.

SPAN 2070 Intermediate Spanish for the Medical and Health Professions Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 1230, LPS 56–64, or SAT II 590–680, Q on CASE exam. Students who have taken SPAN 2000 or 2090 should speak to instructor. M. Beviá. This intermediate-level course develops accurate and idiomatic oral and written expression in a medical context. Students read authentic texts on health-related topics, write compositions, and give oral presentations. Attention is given to relevant cultural differences and how they may affect medical care and doctor-patient communication. The course provides practice in real-life applications, such as taking a medical history and speaking to a Spanish-speaking patient in a culturally acceptable manner. Classes are in Spanish, and the language is actively used in communicative and creative activities. Students review grammar structures on their own, with clarification and support of the instructor. After this course students may take 2140, 2150, 2170, or 2190.

SPAN 2090 Intermediate Spanish I (Composition and Conversation) Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 1230, or LPS 56–64, or SAT II 590–680, or CASE Q. Not open to students who have taken SPAN 2000 or 2070. Class meets three times a week. J. Routier-Puerta and staff. This intermediate-level course develops accurate and idiomatic oral and written expression in a cultural context. Students achieve a higher level of syntactical and lexical competence throughout composing essays and literary texts and viewing films. Particular emphasis is on writing and editing academic essays with peer/instructor feedback. Classes are in Spanish and the language is actively used in oral and communicative, creative, and critical-thinking activities. Students review grammar structures on their own with clarification and support of the instructor. After this course, students may take SPAN 2140, 2150, 2170, or 2190.

SPAN 2140 Modern Spanish Survey (LA-AS) Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 2070 or 2090, or CASE Q+, or permission of instructor. Conducted in Spanish. Fall, M. Balsa and staff, spring, P. Keller and staff. Introductory survey of modern Spanish literature. Students develop their analytical skills and learn basic literary concepts such as genre (drama, lyric, short story, and novel) and style (romanticism, realism, etc.) as well as male/female perspectives and the translation of literature to film language. The course introduces students to Spain’s cultural complexity through readings of works by authors representative of its diverse linguistic and literary traditions.

SPAN 2150 Contemporary Latin American Survey (also LATA 2150) @ (LA-AS) Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 2070 or 2090, or CASE Q+, or permission of instructor. Conducted in Spanish. E. Paz-Soldán. Readings and discussion of representative texts of the 19th and 20th centuries from various regions of Spanish America. Among the authors considered are Sarmento, Hernández, Marit, Dario, Agustini, Cortázar, García Márquez, Pontoniowska, and Valenzuela.

SPAN 2170 Early Modern Iberian Survey (also LATA 2170) # (LA-AS) Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisites: SPAN 2070 or 2090, or CASE Q+, or permission of instructor. Conducted in Spanish. S. Pinet and staff. This course explores major texts and themes of the Hispanic tradition from the 11th to the 17th centuries. We will examine general questions on literature and the relationship between literature and history around certain events, such as medieval multicultural Iberia, the creation of the Spanish Inquisition in the 15th century, and the expulsion of the Jews in 1492, the encounter between the Old and the New Worlds; and the “opposition” of high and low culture, and of the secular and the sacred in poetry and prose. Issues of representation regarding gender, identities, and subjectivity may also be studied. Readings may be drawn from medieval short stories and miracle collections; chivalric romances; Columbus, and the literary as well as geographic discovery; and Lazarillo de Tormes, Cervantes, Lope de Vega, Calderón, and Sor Juana Inés de la Cruz, among others.

SPAN 2190 Intermediate Spanish II (Composition and Conversation) Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 2070 or 2090, or CASE Q+. Class meets three times a week. T. Beviá and staff. This advanced-intermediate course is designed to prepare students for study abroad, entry into the major, and advanced-level courses. Students study stylistics, analyze and discuss texts, view films, and acquire advanced reading strategies. Continued emphasis is on writing and editing academic essays with peer and instructor feedback. Classes are in Spanish and the language is actively used in oral presentations and communicative, creative, and critical-thinking activities. Students review grammar structures on their own, although the instructor may clarify as needed. The course is required for the major and should be taken concurrently with SPAN 2140, 2150, or 2170.

SPAN 2200 Perspectives on Latin America (also LATA 2200) @ (CA-AS) Spring. 3 credits. Highly recommended for Latin American studies concentrators. Conducted in English. 1-credit disc sec conducted in Spanish. E. Paz-Soldán. Interdisciplinary course offered every spring. Topics vary by semester, but readings always focus on current research in various disciplines and regions of Latin America. The range of issues addressed include the economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instructors and guest lecturers facilitate student discussions. This course satisfies the main requirement to participate in all class discussions and write a research paper in their chosen focus area.

SPAN 2230 Perspectives on Spain (LA-AS) Fall. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 2190 or permission of instructor. Conducted in Spanish. P. Keller. An introduction to Spain's history, plural cultures, and present-day society. Through a series of key literary works, films, and other visual representations we will explore such topics as the place of tradition, religion, and the family in modern Spain. Our focus will be on the transformation of Spain from an authoritarian state under General Franco's dictatorship (1939–1975) into a remarkably diverse and pluralistic nation in which linguistic, cultural, political, and gender differences have been consecrated in a very progressive legislation. This course satisfies the main requirement for the minor in Spanish, may be used as an elective for the major, and is crucial to those planning to study abroad in Spain in the near future.

SPAN 2240 Perspectives on the Caribbean (also ASRC/LATA 2240) (CA-AS) Fall. 4 credits. Prerequisite: SPAN 2190 or permission of instructor. G. Aching. This course examines the Caribbean as a site where challenges to and within Western thought emerged. We analyze the ways in which freedom is described in revolutionary thinking by interrogating the following themes in four sections. In the first section, we analyze the difficulties that 16th-century theologians experienced in determining if the “Indian” possessed a soul and if the Spanish crown could wave a “just war” against indigenous “pagans”; this debate was crucial for the New World origins of disciples such as anthropology and international relations. In the second section, we examine the Haitian Revolution in order to describe and interrogate the philosophical and historical relations between master and slave, and in the third section, we look at writings such as the Communist Manifesto and Che Guevara’s essays in order to analyze the difficulties of articulating the relationship between man and socialism in Cuba. In the final section, we consider the problems designating who constitutes the native “we” and the foreign “them” in the
neoliberal economic revolution that is taking place in Jamaica: for this discussion, we read Jamaica Kincaid's *A Small Place* and view Stephanie Black's film *Life and Debt.*

**SPAN 3010 Hispanic Theatre Production (also LATA 3010)**  
Spring. 1–3 credits, variable. 3 credits satisfies Option 1 of language requirement and fulfills (LA-AS). D. Castillo.

Students develop a specific dramatic text for full-scale production. The course involves selection of an appropriate text, close analysis of the thematic and narrative aspects of the play, and group evaluation of its representational value and effectiveness. All students in the course are involved in some aspects of production of the play, and write a final paper as a course requirement. Credit is variable depending upon the student’s role in play production: a minimum of 50 hours of work is required for 1 credit; a maximum of 5 credits are awarded for 100 hours or more of work.

**SPAN 3020 Spanish in the Disciplines (also LATA 3220)**  
Fall or spring. 1 credit. Staff.  
Spanish-language discussion section supplementing the course materials during the lecture section including conversation in Spanish and discussion of course lecture in Spanish.

**SPAN 3060 Introduction to Hispanic Linguistics (also LSP/LING 3060) (KCM-AS)**  
Fall. 4 credits. Prerequisites: SPAN 2190 or CASE Q++ or permission of instructor. D. Cruz de Jesús.  
Linguistics is the study of human languages—what they are composed of and how they are used. This course provides an introduction to Spanish linguistics and establishes the basis for future application of linguistic principles. The course begins with an exploration of the sound system of Spanish and its theoretical representation. Building on this, the discussion continues with topics in Spanish morphology such as word formation and verbal reflection. This is followed by issues in syntax and semantics that are analyzed both in isolation and in terms of relationship to each other. The goal of this course is to provide students with a level of knowledge that will enable them to make connections between the structure of Spanish and relevant issues in contemporary Hispanic linguistics, such as language variation, bilingualism, and Spanish in the United States.

**SPAN 3100 Advanced Spanish Conversation and Pronunciation**  
Spring. 3 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 2190 or CASE Q++. B. Teufli.  
Conversation course with intensive oral practice and exposure through the production of video programs. Students practice the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. There are weekly pronunciation labs.

**SPAN 3110 Advanced Spanish Writing Workshop**  
Fall or spring. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 2190 or CASE Q++ or equivalent. C. Lawless and staff.  
This course, which is required for the major, is designed to help the learner develop increased accuracy and sophistication in writing in Spanish for academic purposes and continued oral practice in Spanish. To this end, there will be ample writing and revising practice; with a focus on specific grammatical and lexical areas, customized to the needs of the students enrolled in the course. A number of literary and popular texts are included as well as films. SPAN 3110 may be taken concurrently with SPAN 2140, 2150, or 2170.

**SPAN 3150 Translating from Spanish (also COML 3140) (LA-AS)**  
Spring. 4 credits. Prerequisites: SPAN 3100 or 511, or permission of instructor. J. Routier-Pucci.  
This seminar-type course, open to students who have successfully passed a 3000-level language course, will focus on translating from the source language (Spanish) into the target language (English). The purpose of the course is to learn and practice the skill of translation, and investigate the various technical, stylistic, and cultural difficulties encountered in the process.

**SPAN 3170 Creative Writing Workshop (in Spanish)**  
Fall. 4 credits. Satisfies Option 1 of language requirement. Prerequisite: SPAN 2140, 2150, 2170, or 2190, or CASE Q++, or permission of instructor. Conducted in Spanish. E. Paz-Soldán.  
Focuses on the practice of narrative writing in Spanish. Explores what makes a novel and a short story work, paying close attention to narrative structure, plot, beginnings/endings, character development, theme, etc. Students read classic novels and short stories as points of departure for the discussion. Because the course is a workshop, students are expected to write their own fiction.

**SPAN 3320 Latin American Science Fiction (also LATA 3320)**  
Fall. 4 credits. Prerequisite: SPAN 2150 or permission of instructor. E. Paz-Soldán.  
Popular genres such as detective and science fiction have a distinguished tradition in Latin America. In this course we will explore the origins, development, and consolidation of science fiction, from the end of the 19th century until today, placing particular emphasis on the Southern Cone (Argentina and Chile). We will also encounter works with magical realism and the “neofantástico,” and analyze how the genre has allowed writers freedom to tackle relevant political and social issues.

**SPAN 3990 More Than Meets the Eye: Spanish Theater and Early 20th-Century Thought (LA-AS)**  
Fall. 4 credits. M. Balca.  
On the basic premise that ideas can appear to us on stage and on screen just as productively as they can be found on the pages of a book, this course proposes a study of various leitmotifs with emphasis on Western thought through a series of analyses of Spanish theater plays played in dialogue with texts and films from the period. In this vein, we will focus on a selection of works by major playwrights such as Unamuno (1864), García Lorca (El public, 1935), Casanova (La Sirena Varada, 1929), or Valle-Inclán (Luces de Bohemia, 1920). Our perspectives on plays will be enriched by an exploration of Freud’s *Civilization and Its Discontents,* Breton’s *Surrealist Manifestoes,* and Marx’s and Engels’ *Communist Manifesto,* as well as films such as *Un chien andalou* (Dali and Charles Buñuel, 1929), *Metropolis* (Fritz Lang, 1927), *Frankenstein* (James Whale, 1931), and *Modern Times* (Charles Chaplin, 1936).

**SPAN 4040 The Task of the Cleric**  
Spring. 4 credits. S. Pinet.  
This seminar will explore three main topics—translation, cartography, and economy—through two 19th-century Spanish works of *mester de clerecía: The Libro de Alexandre* and the *Libro de Apolonio.* While all of these are decidedly Spanish (Castilian) works, their obvious links to a general Western European romance and epic tradition offer ample opportunity to reflect on questions of source, authority, and reliability, as well as the close analysis of the practices that reveal developments—especially in the visual arts, politics, and economy—contemporary to their composition. Readings will include a variety of theoretical materials on translation, space/place, cartography, and political economy by authors such as Michel de Certeau, Marcel Mauss, Paul Zumthor, George Steiner, Walter Benjamin, and Frederic Jameson, among others.

**SPAN 4170 Shipwrecks, Disaster, Deliverance, and Capitalism (also FREN/LATA 4170) (LA-AS)**  
Fall. 4 credits. G. Aching.  
This course examines actual and imagined shipwrecks as the means by which ships, survivors, writers, and artists reflect on the relations between disaster and deliverance, civilization and barbarism, and the relationship between necessity, freedom, and contingency in capitalism. The course begins with classic readings on shipwrecks and castaways, such as selections from Homer’s *Odyssey,* the shipwreck of St. Paul, and Horace’s shipwrecked sailor. Subsequent readings focus principally on shipwrecks within colonial frameworks, such as Alvar Núñez Cabeza de Vaca’s *Castaways,* Luis de Góngora’s *Solitudes,* William Shakespeare’s *The Tempest,* Daniel Defoe’s *Robinson Crusoe,* and Jean-Baptiste Savigny’s and Alexandre Comèt’s *Narrative of a Voyage to Senegal* in 1816, as well as on Herman Melville’s *Moby Dick.* Critical readings include selections from Marx’s *Capital,* Peter Linebaugh’s and Marcus Rediker’s *The Many-Headed Hydra,* and C. L. R. James’ *Sunflower.*

**SPAN 4190-4200 Special Topics in Spanish Literature**  
4190, fall; 4200, spring. 2–4 credits each semester. Prerequisite: permission of instructor. Staff.  
Guided independent study of special topics.

**SPAN 4290-4300 Honors Work in Spanish**  
4290, fall; 4300, spring (yearlong). 8 credits. R grade given at end of fall semester and final grade at end of spring semester. Open to juniors and seniors. Consult director of honors program for more information. Staff.

**SPAN 4610 Ghostly Figures in Contemporary Spanish Film (LA-AS)**  
Spring. 4 credits. T. Fournier.  
With the help of texts by thinkers like Michel Foucault, Walter Benjamin, and Roland Barthes, who have theorized the importance of the phantasmagoric in the ways in which most of us see, remember, and make our life experiences, this course proposes an exploration of the diverse roles that spectral figures of various kinds play in the works of prominent contemporary Spanish filmmakers. Our viewing list will include video
SPAN 4780 The Seven Deadly Sins (LA-AS)  
Fall. 4 credits. Mandatory senior seminar.  
Conducted in Spanish. S. Pinet.  
After a brief historical and philosophical exploration of the concept of sin, we will trace the development of the list of seven deadly sins from Evagrius and Cassian to Gregory I. We will then explore each of the sins—lust, gluttony, greed, acedia or sloth, pride, envy, and wrath—in an Iberian context through works of art and literature that may include Libro de buen amor, Libro de Alexandre, Berceo, Bosch, and Libro de la infancia y muerte de Jesús, and will end with contemporary versions, such as Se7en.

SPAN 4910 Latin American Literature and Mass Media (also LATA 4910)  
Spring. 4 credits. E. Paz-Soldán.  
An analysis of Latin American literary texts and their relationship with the changing media landscape of the 20th century. We will explore how Latin American authors have engaged thematically and formally with the impact of mass media and new technologies. Some of the writers we will read are Huidobro, Cabrera Infante, Cortazar, Puig, and Fuguet.

SPAN 4956 Transatlantic Decadence (also FREN/SHUM 4956)  
Spring. 4 credits. E. Pitol.  
For description, see SHUM 4956.

SPAN 6390-6400 Special Topics in Spanish Literature  
6390, fall; 6400, spring. 2–4 credits each semester.  
Guided independent study for graduate students.

SPAN 6560 The Cross and the Crescent in Iberia  
Fall. 4 credits. Conducted in Spanish. M. A. Garcés.  
This course concentrates on the twin themes of cultural frontiers and exchanges in the early modern Mediterranean, where the writer Miguel de Cervantes played an important role as a soldier and captive. We will explore contacts between Muslims and Christians in texts produced after the conquest of Granada in 1492, as well as in later Iberian works centered on Algiers, Sicily, Cyprus, and Constantinople in the 16th and 17th centuries. Particular attention will be paid to the dynamic improvisation of identities who converted to Islam and fled to Ottoman territories. Course readings will include Spanish reports of captivity and plays, novels, and eyewitness accounts of life in Granada, Algiers, and Constantinople by Busbecq, Calderón, Cervantes, Lope de Vega, Diego Gálán, Núñez-Muley, Pérez de Hita, and Antonio de Sosa, among others. Course selections will be supplemented with an ample range of critical approaches.

SPAN 6640 Borderworks (also COML 6335, ASIAN 6633, LSPI/LATA 6640)  
Fall. 4 credits. D. Castillo and A. Banerjee.  
For description, see COML 6555.

SPAN 6820 The Architecture of Desire—Luis Buñuel and Film Theory  
Spring. 4 credits. Conducted in Spanish. P. Keller.  
An advanced graduate course that explores the films of renowned auteur Luis Buñuel in conjunction with different theories of film, aesthetics, and politics. Tracing his work from the inception of surrealism to the final stage of his career in the late 1970s, the course proposes an in-depth study of the Bruñuelian canon, placing his work in dialogue with contemporary debates, and sexuality. In addition to scholarship on Buñuel, we will read works by Kracauer, Deleuze, Tarkovsky, Theweleit, Ranciere, Mulvey, Eisenstein, Foucault, and Kizek.

RUSSIAN  
N. Pollak, fall; G. Shapiro, spring, director of undergraduate studies (226 Morrill Hall, 255-8550); S. Paperno, director of Russian language program (226F Morrill Hall).  
W. Browne, R. Krivitsky, G. Shapiro, V. Tsitsernov.  
Visiting: K. Bättig von Wittelsbach, C. Golkowski, S. Senderovich  
For updated information, consult our web sites:  
(literature) www.arts.cornell.edu/russian  
(language) russian.cornell.edu

The Russian Major  
Students wishing to major in Russian should discuss options with the DUS.

Satisfying the Foreign Language Requirement  
1. Options 1a and 1b:  
1a. Any Russian-language (RUSSA) course totaling 3 or 4 credits at the 2000 level or above (with the exception of RUSSA 3000 Directed Study) satisfies the Arts and Sciences language requirement under Option 1a.  
1b. After completing the prerequisites RUSSA 1121 and RUSSA 1122, students may satisfy the language requirement by taking RUSSA 2209. Other RUSSL courses that are taught in Russian may also be used when appropriate.

2. Option 2:  
• In two semesters: RUSSA 1103 and 1121 in the fall, RUSSA 1104 and 1122 in the spring.  
• In three semesters: RUSSA 1121 in the fall, 1122 in the spring, 2203 the following fall.  
• In four semesters: RUSSA 1121 in the fall, 1122 in the spring, 1125 the following fall, 1126 the following spring

Study Abroad  
Students from Cornell frequently participate in the Council on International Educational Exchange and the American Council of Teachers of Russian programs for language study, as well as other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from Professor Wayles Browne in the Department of Linguistics (220 Morrill Hall) and from the Cornell Abroad Office.

Honor's Russian. Students taking honors in Russian do individual reading and research and write an honors essay. Students planning to take honors should consult the director of undergraduate studies in their junior year.

Russian Language  
Detailed information and schedules of the Russian language courses, as well as office hours of the instructors, are available at: russian.cornell.edu.  
Suggested tracks for first- and second-year Russian language study:
• First-year intensive: 1103 + 1121 in the fall, 1104 + 1122 in the spring  
• First-year non-intensive: 1121 in the fall, 1122 in the spring  
• Second-year intensive: 1125 + 2203 in the fall, 1126 + 2204 in the spring  
• Second-year non-intensive: 2203 in the fall, 2204 in the spring  
• Second-year “mostly reading; lighter load”: 1125 in the fall, 1126 in the spring

RUSSA 1103–1104 Conversation Practice  
1103, fall; 1104, spring. 2 credits each semester. Students must enroll in one sem. of 1103 and one sem. of 1121 in fall, and one sem. of 1104 and one sem. of 1122 in spring. R. Krivitsky.  
Reinforces the speaking skills learned in RUSSA 1121 and 1122. Homework includes assignments that must be done in the language lab or on the students' own computers.

RUSSA 1121–1122 Elementary Russian through Film  
1121, fall; 1122, spring. 4 credits each semester. Prerequisite: for RUSSA 1122, RUSSA 1121. R. Krivitsky, S. Paperno, and V. Tsitsernov.  
Gives a thorough grounding in all the language skills: listening, speaking, reading, and writing. Course materials include clips from original Russian films and television programs. Homework includes assignments that must be done in the language lab or on the students' own computers.

RUSSA 1125–1126 Reading Russian Press  
1125, fall; 1126, spring. 2 credits each semester. sem. 101 for non-native speakers of Russian; sem. 102 for native speakers of Russian. Prerequisite for 1125 sem. 101: RUSSA 1122 or placement by department; prerequisite for 1126 sem. 101: RUSSA 1125 or placement by department; prerequisite for 1125 and 1126 sem. 102: placement by department. Times TBA with instructors.* See starred (*) note at end of RUSSA section. S. Paperno and V. Tsitsernov.  
The emphasis is on reading unabbreviated articles on a variety of topics from current Russian periodicals and web pages and translating them into English; a certain amount of discussion (in Russian) may also be undertaken.
RUSSA 2203–2204 Intermediate Composition and Conversation
2203, fall; 2204, spring. 4 credits each semester. Satisfies Option 1. Prerequisite: for RUSSA 2203; RUSSA 1122 and 1104, or RUSSA 1301 with grade higher than B, or placement by department; for RUSSA 2204, RUSSA 2203 or equivalent. R. Krivitsky. Guided conversation, translation, reading, pronunciation, and grammar review; emphasizing the development of accurate and idiomatic expression in the language. Course materials include video clips from an original Russian feature film and work with Russian web sites, in addition to the textbook.

RUSSA 2300 Directed Studies
Fall or spring. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.* See starred (*) note at end of RUSSA section. Staff. Taught on a specialized basis for students with special projects (e.g., to supplement a nonlanguage course or thesis work).

RUSSA 3303–3304 Advanced Composition and Conversation
3303, fall; 3304, spring. 4 credits each semester. Either RUSSA 3303 OR 3304 satisfies Option 1. Prerequisite: for RUSSA 3303 by dept. 2204 or equivalent; for RUSSA 3304, RUSSA 3303 or equivalent. R. Krivitsky, S. Paperno, and V. Tsimberov. Reading, writing, and conversation: current Russian newspapers, television programs, and Russian web sites, and other materials are used. In some years, completing interviews with native speakers of Russian is a component of RUSSA 3304.

RUSSA 3305–3306 Reading and Writing for Heritage Speakers of Russian
3305, fall; 3306, spring. 2–3 credits, variable. Prerequisite: placement by department. Times TBA with instructor.* See starred (*) note at end of RUSSA section. S. Paperno and V. Tsimberov. Intended for students who speak grammatically correct Russian but do not know Russian grammar and have not learned to read or write Russian well (or have not learned written Russian at all). The two courses are very similar and do not constitute a sequence. Each may be taught slightly faster or slower in a given year, depending on the needs and interests of the students. Two classes a week teach writing and grammar and include related reading. These classes are required, and the students who take them receive 2 credit hours. The third (optional) class teaches reading and discussion, and grants an additional credit hour.

RUSSA 3308 Russian through Popular Culture
Spring. 2–3 credits, variable. Prerequisite: RUSSA 304 for nonnative speakers of Russian; RUSSA 3305 or 3306 for heritage speakers of Russian; for all others with advanced knowledge of Russian, placement by department. Not open to fluent native speakers of Russian (recommended: RUSSA 3305/3310 and RUSSL courses). Conducted in Russian. Times TBA with instructor.* See starred (*) note at end of RUSSA section. R. Krivitsky. Aims to expand the students’ vocabulary and their comprehension, speaking, reading, and writing skills, as well as cultural competence, through a mosaic study and discussion of a variety of styles in contemporary Russian popular culture (1970s through the present). Course materials include traditional and urban folklore, film, animation, published texts (prose and poetry), and recordings of songs. Includes at least three essays or similar writing assignments. Work is distributed so that a student may attend all three weekly meetings for 3 credit hours or only two of the meetings for 2 credit hours.

RUSSA 3309–3310 Advanced Reading
3309, fall; 3310, spring. 4 credits each semester. Satisfies Option 1. Sem. 101 for nonnative speakers of Russian; sem. 102 for native speakers of Russian. Prerequisites: for sem. 101 of RUSSA 3309, RUSSA 2204; for RUSSA 3310, RUSSA 3309 or equivalent; for sem. 102 of 3309 and 3310, placement by department. Two meetings per week. Times TBA with instructors.* See starred (*) note at end of RUSSA section. May be canceled if enrollment is insufficient. S. Paperno and V. Tsimberov. Designed to teach advanced reading and discussion skills. In seminar 101, weekly reading assignments include 20–40 pages of unabridged Russian fiction or nonfiction. In seminar 102, the weekly assignments are 80–100 pages. Discussion of the reading is conducted entirely in Russian and centered on the content and analysis of the assigned selection.

RUSSA 4401 History of the Russian Language (also LING 4417) (MA-AS)

RUSSA 4403 Linguistic Structure of Russian (also LING 4443) (KC-AS)
Fall. 4 credits. W. Browne. For description, see LING 4443–4444.

RUSSA 4413–4414 Advanced Conversation and Stylistics
4413, fall; 4414, spring. 2 credits each semester. Prerequisites: for RUSSA 4413, RUSSA 3304 or equivalent; for RUSSA 4414, RUSSA 4413 or equivalent. Times TBA with instructor.* See starred (*) note at end of RUSSA section. V. Tsimberov. Involves discussion of authentic Russian texts and films (feature or documentary) in a variety of nonliterary styles and genres.

RUSSA 4491 Reading Course: Russian Literature in the Original Language
Fall or spring. 1 credit each semester. Prerequisite: permission of instructor. Times TBA with instructor.* See starred (*) note at end of RUSSA section. Staff. To be taken in conjunction with any Russian literature course at the advanced level. Students receive 1 credit for reading and discussing works in Russian in addition to their normal course work.

RUSSA 6601 Old Church Slavonic (also LING 6663)
Fall. 4 credits. W. Browne. For description, see LING 6663.

RUSSA 6602 Old Russian Texts (also LING 6662)
Spring. 4 credits. W. Browne. For description, see LING 6662.

RUSSA 6623–6624 Russian for Russian Specialists
6623, fall; 6624, spring. 1–4 credits, variable. Prerequisite: four years of college Russian or equivalent. Times TBA with instructor.* See starred (*) note at end of RUSSA section. Course will be cancelled if enrollment is insufficient. Staff. Designed for students whose areas of study require advanced active control of the language. Fine points of translation, usage, and style are discussed and practiced. Syllabus varies from year to year.

RUSSA 6661 Comparative Slavic Linguistics (also LING 6671)
Fall. 4 credits. Next offered 2011–2012. W. Browne. For description, see LING 6671.

RUSSA 6671 Comparative Slavic Linguistics (also LING 6671)
Fall. 4 credits. Next offered 2011–2012. W. Browne. For description, see LING 6671.

* For RUSSA courses marked “Time to be arranged with instructor,” students should bring their class schedules to the organizational meeting, usually held on the second or third day of the semester, where class meeting times will be chosen so as to accommodate as many students as possible. The date, time, and place of the organizational meeting is announced at russian.cornell.edu, and posted at the Russian Department office (226 Morrill Hall). Students may also contact the department office at 255-8550 or e-mail russiandpt@cornell.edu.

** For TBA courses taught by Wayles Browne, contact Professor Browne (ewb2@cornell.edu) or 255-0712.

Russian Literature
A variety of courses is offered in Russian literature. Readings may be in English translation or in the original Russian or both (see course descriptions). Instruction often encompasses culture and intellectual history as well as literature. Some courses are cross-listed with appropriate departments.

RUSSL 2207–2208 Themes from Russian Culture # (LA-AS)
Spring. 3 credits. In translation. Offered alternate years; next offered 2012–2013. G. Shapiro. These courses are based on lectures, discussions, and audiovisual presentations and cover various aspects of Russian culture, such as literature, art, architecture, music, religion, philosophy, and social thought. RUSSL 2207 extends through the 18th century, and RUSSL 2208 covers the 19th and 20th centuries.

RUSSL 2209 Readings in Russian Prose and Poetry # (LA-AS)
Fall. 3 credits. Reading in Russian; discussion in English. Satisfies Option 1. Prerequisite: for students with 2+ semesters of Russian language (RUSSA 1121/1122 or equivalent). N. Pollak. Short classics of the 19th and early 20th centuries. Authors may include Pushkin, Lermontov, Tolstoy, Chekhov, Blok, and Akhmatova. Assignments adjusted for native fluency. May be used as a prerequisite for RUSSA 3300–4400 courses with reading in Russian.

RUSSL 2212 Readings in 20th-Century Russian Literature (LA-AS)
literature in the original and improves Russian reading and writing skills.

[RUSSL 2279 The Russian Connection, 1820 to 1867 (also COML 2790) # (LA-AS)]
Examines Russian prose of mid-19th century (Lermontov, Tolstoy) against the background of European prose (Rousseau, Musset, Stendhal, Thackeray, et al.]

[RUSSL 2280 The Russian Connection, 1870 to 1960 (also COML 2800) # (LA-AS)]
Examines the Dostoevskian novel against the background of European prose (Diderot, Camus, Sarraute, et al.)

[RUSSL 3331 Introduction to Russian Poetry # (LA-AS)]
Fall. 4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. May be counted toward 12 credits of Russian literature in original language for Russian major. Next offered 2011–2012. N. Pollak.
A survey of Russian poetry, with primary emphasis on the analysis of individual poems by major poets.

[RUSSL 3332 Russian Drama and Theater (also THETR 3220) # (LA-AS)]
Covers 19th- to 20th-century plays (Gogol, Ostrovsky, Chekhov), including historical period, cultural atmosphere, and literary trends.

[RUSSL 3333 20th-Century Russian Poetry (LA-AS)]
4 credits. Reading in Russian; discussion in English. May be counted toward 12 credits of Russian literature in original language for Russian major. Next offered 2011–2012. N. Pollak.
Close readings of lyrics by major 20th-century poets.

[RUSSL 3334 The Russian Short Story # (LA-AS)]
4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. May be counted toward 12 credits of Russian literature in original language for Russian major. G. Shapiro.
Survey of two centuries of Russian storytelling. Analysis of individual stories by major writers. Emphasis on narrative structure and on related landmarks of Russian literary criticism.

[RUSSL 3335 Gogol # (LA-AS)]
Fall. 4 credits. G. Shapiro.
Selected works of Gogol are read closely in translation and viewed in relation to his life and to the literature of his time.

[RUSSL 3337 Films of Russian Literary Masterpieces (LA-AS)]
Comparative analysis of American films based on the Russian novels War and Peace and Dr. Zhivago. Discusses problems of translation between media and cultures.

[RUSSL 3338 Lermontov’s Hero of Our Time # (LA-AS)]
4 credits. Reading in Russian; discussion in English. Next offered 2012–2013. N. Pollak. Hero of Our Time has been called the first major Russian novel. (Close reading, attention to linguistic and literary problems.)

[RUSSL 3367 The Russian Novel # (LA-AS)]
The rise of the Russian novel in the 19th century: Pushkin, Lermontov, Dostoevsky, Tolstoy, Chekhov.

[RUSSL 3368 20th-Century Russian Literature (LA-AS)]
Spring. 4 credits. In translation. Students who read Russian may sign up for discussion of Russian text for 1 credit (RUSSA 4491). G. Shapiro.
Survey of 20th-century Russian prose, including such writers as Bunin, Bulgakov, and Nabokov, as well as Solzhenitsyn, Shalamov, and Voinovich.

[RUSSL 3369 Dostoevsky # (LA-AS)]
A survey of Dostoevsky’s major novels: Notes from Underground, Crime and Punishment, The Idiot, and The Brothers Karamazov.

[RUSSL 3373 Chekhov in the Context of Contemporary European Literature and Art # (LA-AS)]
Anton Chekhov’s stories in the context of the European art of the short story and contemporary paintings. Readings in English translation.

[RUSSL 3385 Reading Nabokov (also ENGL 3790) (LA-AS)]
Fall. 4 credits. In translation. G. Shapiro.
Nabokov’s Russian works in translation from Mary to the Enchanter, and two novels he wrote in Ithaca while teaching literature at Cornell, Lolita and Pnin.

[RUSSL 3393 Honors Essay Tutorial Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year; credit for first semester is awarded upon completion of second semester. For information, see director of undergraduate studies. Times TBA with instructor. Staff.

[RUSSL 4409 Russian Stylistics (LA-AS)]
Spring. 4 credits. Also open to graduate students. Prerequisite: proficiency in Russian or permission of instructor. Course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Next offered 2012–2013. Staff.
Beyond normative grammar. Introduction to idiomatic Russian (morphology, syntax, vocabulary, phraseology) and genres of colloquial and written language. Development of writing skills.

[RUSSL 4415 Post-Symbolist Russian Poetry (LA-AS)]
4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Next offered 2012–2013. N. Pollak.
Verse, critical prose, and literary manifestos by selected early 20th-century Russian poets, including Annenskii, Pasternak, and Mandelstam.

[RUSSL 4430 Practice in Translation (LA-AS)]
Spring. 4 credits. Prerequisite: proficiency in Russian or permission of instructors. Next offered 2012–2013. Staff.
Practical workshop in translation: documents, scholarly papers, literary works (prose and poetry). Mostly Russian to English, some English to Russian.

[RUSSL 4432 Pushkin # (LA-AS)]
Spring. 4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. May be counted toward 12 credits of Russian literature in original language for Russian major. Next offered 2011–2012. N. Pollak.
A selection of short stories and short novels in Russian. Attention to style, themes, idioms. Assignments adjusted to students’ language capabilities.

[RUSSL 4433 Short Works of Tolstoy # (LA-AS)]
4 credits. Reading in Russian; discussion in English. Prerequisite: RUSSL 2209 or 2212 or equivalent mastery of Russian language skills. Next offered 2012–2013. N. Pollak.
A selection of short stories and short novels in Russian. Attention to style, themes, idioms. Assignments adjusted to students’ language capabilities.

[RUSSL 4492 Supervised Reading in Russian Literature Fall or spring. 1–4 credits each semester. Independent study. Prerequisite: students must find an advisor and submit a plan before signing up. Times TBA with instructor. Staff.

[RUSSL 4493 Anton Chekhov # (LA-AS)]
4 credits. Reading in Russian; discussion in English. Prerequisite: proficiency in Russian or permission of instructor. Next offered 2011–2012. Staff.
Major works of Chekhov in Russian; focus on style and language. Readings include stories (“Anna on the Neck,” “Darling,” “Steppe”) and plays (“Uncle Vanya” and Seagull).
Czech

CZECH 3300 Directied Studies
Spring. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Staff.
Taught on a specialized basis to address particular student needs.

POLISH 3301 Polish Through Film and Literature (LA-AS)
Fall. 3 credits. Satisfies Option 1.
Prerequisite: POLISH 1134 or permission of instructor. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. C. Golkowski.
Language proficiency and insight into Polish culture through videos, films, and contemporary texts. Listening and reading comprehension, conversation, grammar review.

Hungarian

[HUNGR 1131-1132 Elementary Hungarian
1131, fall; 1132, spring. 3 credits.
Prerequisite: for 1132: HUNGR 1131 or permission of instructor. Offered alternate years; next offered 2011–2012. Staff.
Teaches the basic grammar of Hungarian. Designed to aid the student in all facets of language acquisition: speaking, listening comprehension, reading, and writing. Second-semester Hungarian (1132) teaches more advanced grammar of the language at an intermediate level.]

[HUNGR 1133-1134 Continuing Hungarian
1133, fall; 1134, spring. 3 credits.
Prerequisite: for 1133: HUNGR 1132 or permission of instructor; for 1134, HUNGR 1133 or permission of instructor. Offered alternate years; next offered 2012–2013. Staff.
Conversation and reading course designed to aid the student in speaking, listening comprehension, reading, and writing. 1134 teaches more advanced instruction of the language at an intermediate level.]

[HUNGR 3300 Directed Studies
Fall or spring. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Next offered 2011–2012. Staff.
Taught on a specialized basis to address particular student needs.

[HUNGR 4427 Structure of Hungarian (also LING 4427) [KGM-AS]

Polish

POLISH 1131-1132 Elementary Polish
1131, fall; 1132, spring. 3 credits each semester. Prerequisite: for POLISH 1132, POLISH 1131 or equivalent. Offered alternate years. Staff.
Covers all language skills: speaking, listening comprehension, reading, and writing.

[POLISH 1133-1134 Continuing Polish
1133, fall; 1134, spring. 3 credits each semester. Prerequisites: for 1133, POLISH 1132 or permission of instructor; for POLISH 1134, POLISH 1133 or equivalent. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Staff.
An intermediate conversation and reading course.]

POLISH 3300 Directed Studies
Fall or spring. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Staff.
Taught on a specialized basis to address particular student needs.

See "Asian Studies."

SCIENCE AND TECHNOLOGY STUDIES

In today’s world, issues at the intersection of the technical and the social arise continually in all aspects of life, from the role of computers in society, the history of evolutionary theory, and the challenges of environmental controversies, to the ethical dilemmas of genomics and biomedicine. The field of science and technology studies (S&T&S) addresses such issues through the study of the social aspects of knowledge, especially scientific and technological knowledge. S&T&S explores the practices that shape science and technology, examines their social and cultural context, and analyzes their political and ethical implications. S&T&S provides a strong liberal arts background from which students can go on to careers in law, medicine, environmental policy, business, and a variety of other professions where the social aspects of science and technology loom large.

The Science and Technology Studies Major

The Department of Science and Technology Studies has revised the major for students applying to the major, effective fall 2008. Admission to the major requires successful completion of one S&T&S course. First-Year Writing Seminars may count as the prerequisite, but not as part of the major.

There are no other prerequisites, but students should plan to fulfill the science PBS and quantitative MQR requirements of the College of Arts and Sciences early in their college careers in order to be in a position to take additional science or engineering courses as outlined below.

Students intending to major in Science and Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student’s intellectual interests and why the major is consistent with the student’s academic interests and goals; (2) a tentative plan of courses fulfilling S&T&S requirements; and (3) an up-to-date transcript of work completed at Cornell University (and elsewhere, if applicable). Further information and application materials are available in 306 Rockefeller Hall (255-6047).

Requirements

S&T&S majors must complete the following requirements:

8350) for time and place of organizational meeting(s).

Satisfies Option 1.

Prerequisite: for BC5 1132, BC5 1131 or equivalent. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Staff.
Covers all language skills: speaking, listening comprehension, reading, and writing. Includes Bosnian.

Bosnian-Croatian-Serbian

[BCS 1131-1132 Elementary Bosnian-Croatian-Serbian
1131, fall; 1132, spring. 3 credits each semester. Prerequisite: for BCS 1132, BCS 1131 or equivalent. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Staff.
Covers all language skills: speaking, listening comprehension, reading, and writing. Includes Croatian.

Bosnian-Croatian-Serbian

[BCS 1133-1134 Continuing Bosnian-Croatian-Serbian
1133, fall; 1134, spring. 3 credits each semester. Prerequisite: BCS 1133, BCS 1132 or equivalent; for BCS 1134, BCS 1133 or equivalent. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Staff.
An intermediate conversation and reading course.

BSC 3300 Directed Studies
Fall or spring. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.** See double-starred (***) note at end of UKRAN section. Staff.
Taught on a specialized basis to address particular student needs.

BSC 3302 Advanced Bosnian-Croatian-Serbian Through Literature and Film
Fall. 3 credits. Satisfies Option 1.
Prerequisite: for BCS 1132, BCS 1131 or permission of instructor. Meeting times TBA with instructor.** See double-starred (***) note at end of UKRAN section. K. Battig von Wittelsbach.
This is a third-year course with intensive speaking and writing practice. Selections from a variety of fictional and argumentative texts, as well as films illustrative of contemporary South Slavic societies (Croatia, Bosnia and Herzegovina, Serbia, Montenegro), will provide the basis for discussions and essays. Review of select grammar topics is included. The student’s grade will be based on participation, compositions, oral presentations, grammar exercises, and a final exam.

Ukrainian

UKRAINIAN 3300 Directed Studies
Spring. 1–4 credits, variable. Prerequisite: permission of instructor. Times TBA with instructor.** See double-starred (***) note at end of section. Staff.
Taught on a specialized basis to address particular student needs.

**For these courses, contact the Russian department (russiandept@cornell.edu) or 8350 for time and place of organizational meeting(s).
The core course (STS 2011)

2. Three additional 2000-level courses selected from the following list: STS 2021, 2051, 2061, 2331, 2501, 2851, 2861, 2871, 2921.

3. Additional S&TS courses to total 34 credit hours in the major. Four of these courses must be 3000 level or above and a minimum of two of these must be 4000 level or higher. STS 1101 and/or 1102 may be used to meet major requirements only if taken before joining the major or during your first two semesters in the major. Only one independent study (STS 3991) of no more than 4 credit hours may be taken to meet major requirements.

4. Science requirement: In addition to the science requirement of the College of Arts and Sciences, Science & Technology Studies majors are required to take an additional two courses in natural science or engineering (including computer science). Mathematics sufficient to provide background for the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student’s major advisor.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to engage in independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the second semester of their junior year. To qualify for the S&TS honors program, students must have an overall Cornell cumulative grade point average (GPA) of at least 3.00 and a 3.30 cumulative GPA in courses taken for the major. Additionally, the student must have formulated a research topic, and have found a project supervisor and a second faculty member willing to serve as the advisors; at least one of these must be a member of the S&TS department. More information on the honors program is available from the S&TS undergraduate office at 306 Rockefeller Hall (255-6047).

The Biology and Society Major

The Department of Science and Technology Studies also offers the Biology and Society major, which includes faculty from throughout the university. The Biology and Society major is designed for students who wish to combine the study of biology with exposure to perspectives from the social sciences and humanities. In addition to providing a foundation in biology, Biology and Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues. The Biology and Society major is offered to students enrolled in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the office in 306 Rockefeller Hall, 255-6047.

A full description of the Biology and Society major can be found on p. 507 of this catalog.

The Minor in Science and Technology Studies

T. Pinch, acting chair (309 Rockefeller Hall, 255-6043); K. Vogel, director of undergraduate studies; R. Boyd, P. R. Dear, S. Hilgartner, R. Kline, C. Leuenberger, B. V. Levenstein, M. Lynch, T. J. Pinch, A. G. Power, R. Prentice, S. Pritchard, M. W. Rossiter, P. J. Sengers, S. Seth, Emeritus: W. R. Lynn, J. V. Reppy, L. P. Willard. The minor in Science & Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The minor is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from an S&TS perspective.

To satisfy the requirements for the S&TS minor, students must complete, with a letter grade of C– or above, a total of four courses selected from the course offerings listed for the major, excluding first-year writing seminars. The four courses must include STS 2011 and at least one course at the 3000 or 4000 level. No more than one course can be at the 1000 level. Interested students may obtain further information about courses and a list of course descriptions by contacting the S&TS undergraduate office, 306 Rockefeller Hall (255-6047).

Graduate Field of Science & Technology Studies

Students may obtain further information about the field and course offerings by contacting the S&TS graduate field office, 306 Rockefeller Hall (255-3810).

First-Year Writing Seminars

Consult the John S. Knight Institute web site for times, instructors, and descriptions: www.arts.cornell.edu/Knight_institute/index.html.

Introductory Courses

STS 1101 Science, Technology, and Politics (SBA-AS)

Fall. 3 credits. STS 1101 and 1102 may be taken separately or in any order. Recommended as introduction to field; not required and may not be used to fulfill a major requirement. R. Prentice.

From global warming to surveillance of citizens to health-care reform, issues in science, technology, and medicine also are political issues. This course uses contemporary scientific controversies to explore the intersections of science and politics. Issues explored may include the role of the military and private sector in funding research, the politics of experts and expertise, computer privacy and national security, and environmental politics.

STS 1102 Histories of the Future (also HIST 1620) (CA-AS)

Spring. 3 credits. Recommended as introduction to field; not required and may not be used to fulfill a major requirement. STS 1101 and 1102 may be taken separately or in any order. S. Seth.

From Frankenstein to The Matrix; science fiction and film have depicted contemporary science, technology, and medicine for almost two centuries. This course introduces students to historical and social studies of science and technology using science fiction and novels, as well as key readings in science and technology studies. What social questions can fictional accounts raise that factual ones can only anticipate? How have “intelligent machines” from Babbage’s Analytical Engine to Hal raised questions about what it means to be human? What can Marvel Comics teach us about changes in science and technology? When can robots be women and, in general, what roles did gender play in scientific, technological, and medical stories? How was the discovery that one could look inside the human body received? How do dreams and nightmares of the future emerge from the everyday work of scientific and technological research?

STS 1941 The History of Science in Europe: From the Ancient Legacy to Isaac Newton (also HIST 1941) (HA-AS)

Fall. 3 credits. P. Dear.

For description, see HIST 1941.

STS 1942 The History of Science in Europe: Newton to Darwin, Darwin to Einstein (also HIST 1942) (HA-AS)

Spring. 3 credits. P. Dear.

For description, see HIST 1942.

Core Courses

STS 2011 What Is Science? An Introduction to the Social Studies of Science and Technology (also SOC 2100) (CA-AS)

Spring. 3 credits; also offered as Writing in the Majors 4-credit option, by permission only; and limited to 15 students. T. Pinch.

Introduces some of the cultural dynamics in the field of S&TS. As well as serving as an introduction to students who plan to major in Biology and Society or in Science and Technology Studies, the course is aimed at students with backgrounds in the sciences or the humanities who are challenged to think more critically about what we mean by science, what counts as scientific knowledge and why, and how science
technology intervene in the wider world. The course is a mixture of lecture, discussion, and other activities. The discussion sections are an integral part of the course and attendance is required. In addition, a series of written assignments throughout the semester and a take-home final during exam week compose the majority of the grade.

**S&T Courses**

**STS 2051** Ethical Issues in Health and Medicine (also BSOC 2061) (KCM-AS)
Fall. 4 credits. Limited to 150 students. K. Vogel.
For description, see BSOC 2051.

**STS 2061** Ethics and the Environment (also BSOC 2061, PHIL 2460) (KCM-AS)
Spring. 4 credits. S. Pritchard.
For description, see BSOC 2061.

**STS 2331** Agriculture, History, and Society: From Squanto to Biotechnology (also AMST 2331) (HA-AS)
Fall. 3 credits. M. Rossiter.
Surveys the major themes in the development of agriculture and agribusiness in the United States in the 19th and 20th centuries. These include particular individuals (e.g., Liberty Hyde Bailey, Luther Burbank, G. W. Carver, Henry A. Wallace, and Norman Borlaug), the rise of government support and institutions (including U.S.D.A. and Cornell), noteworthy events (the dust bowl, World War II, and the environmental movement), and the achievements of the Green and “Gene” Revolutions.

**STS 2501** Technology in Society (also ECE/ENGRG/HIST 2500) (HA-AS)
Fall. 3 credits. D. Kline.
For description, see ENGRG 2500.

**STS 2851** Communication, Environment, Science, and Health (also COMM 2850)
Spring. 3 credits. B. Lewenstein.
For description, see COMM 2850.

**STS 2871** Evolution (also BIOEE 2070, HIST 2870) (PBS)
Fall. 3 credits. W. Provine.
For description, see BIOEE 2070.

**STS 2921** Inventing an Information Society (also ECE/ENGRG 2920, HIST 2920) (HA-AS)
Spring. 3 credits. R. Kline.
For description, see ENGRG 2920.

**STS 3011** Life Sciences and Society (also BSOC 3011) (SBA-AS)
Fall. 4 credits. M. Lynch.
For description, see BSOC 3011.

**STS 3111** Sociology of Medicine (also SOC 3130) (SBA-AS)
Fall. 4 credits. Not open to freshmen. C. Leuenberger.
This course provides an introduction to the ways in which medical practice, the medical profession, and medical technology are embedded in society and culture. We will ask how medicine is connected to various sociocultural factors such as gender, social class, race, and administrative cultures. We will examine the rise of medical sociology as a discipline, the professionalization of medicine, and processes of medicalization and demedicalization. We will look at alternative medical practices and how they differ from and converge with the dominant medical paradigm. We will focus on the rise of medical technology in clinical practice with a special emphasis on reproductive technologies. We will focus on the body as a site for medical knowledge, including the medicalization of sex differences, the effect of culture on nutrition, and eating disorders such as obesity and anorexia nervosa. We will also read various classic and contemporary texts that speak to the illness experience and the culture of surgery, hospitals, and patients, and we will discuss various case studies in the social construction of physical and mental illness.

**STS 3181** Living in an Uncertain World: Science, Technology, and Risk (also HIST 3181) (HA-AS)
Fall. 4 credits. Next offered 2011–2012. S. Pritchard.
This course explores the history, sociology, and ethics of risk. In particular, we will focus on the complex and often ambiguous relationship between science, technology, and risk. A historical perspective shows how science and technology have generated risks while they have also played key roles in managing and solving those very risks. By examining several case studies, including 19th-century technologies (the 1911 Titanic fire), nuclear science, the space shuttle disasters, asbestos litigation, Hurricane Katrina, and the contemporary financial crisis, we will consider how risk and ideas about risk have changed over time. By exploring different historical and cultural responses to risk, we will examine the sociopolitical dimensions of the definitions, perceptions, and management of risk both in the past and the present.

**STS 3221** Lives of Scientists and Engineers (also FGSS 3221) (HA-AS)
Spring. 4 credits. M. Rossiter.
This course will explore the lives of a variety of scientists and engineers—American, international, men, women, and minorities—through readings of biographies, autobiographies, and other sources. The goal will be to examine the obstacles overcome, opportunities offered, and choices made; the reasons and rationalization given; and the uses made of idealized biographies in science, education, requirement, myth-making, and national prestige. Weekly readings, discussion, and research paper required.

**STS 3241** Environment and Society (also DSOC/SOC 3240) (SBA-AS)
Fall. 3 credits. C. Greider.
For description, see DSOC 3240.

**STS 3301** Making Modern Science (also HIST 3302) (HA-AS)
Fall. 4 credits. Next offered 2012–2013. S. Seth.
Examines the history of the physical sciences in Europe and the United States from 1800 to the present. Students study such topics as the development of thermodynamics and electrodynamics, the quantum and relativity theories, science during the world wars, and post-war “big science.” As well as a history of ideas, the course emphasizes the broader historical contexts in which physical science has been produced, focusing on issues raised in relation to Romanticism, the first and second industrial revolutions, social statistics, train travel, and the military-industrial-scientific complex, among others. Reading for the course ranges from primary source material (original papers by Thomson, Helmholtz, Planck, and Einstein) to extracts from Mary Shelley’s Frankenstein and Michael Frayn’s Copenhagen.

**STS 3311** Environmental Governance (also BSOC 3311, NTRES 3310) (HA-AS)
For description, see NTRES 3310.

**STS 3460** Anthropology of the Body (also ANTHR 3460, DSOC 3465, BSOC 3460, STS 6460) (CA-AS)
Fall. 4 credits. S. Langwick.
For description, see ANTHR 3465.

**STS 3491** Media Technologies (also COMM/INFO 3490) (HA-AS)
Spring. 3 credits. Offered odd-numbered years. T. Gillespie.
For description, see COMM 3490.

**STS 3521** Science Writing for the Mass Media (also COMM 3520)
Fall. 3 credits. Students who take STS 3521 may not receive credit for COMM 2000, 2030, or 3520. B. Lewenstein.
For description, see COMM 3520.

**STS 3561** Computing Cultures (also COMM/VISST 3560, INFO 3561) (CA-AS)
Spring. 4 credits. No technical knowledge of computer use presumed or required. STS 3551 and 3561 may be taken separately or in any order. R. Prentice.
Computers are powerful tools for working, playing, thinking, and living. Laptops, PDAs, webcams, cell phones, and iPods are not just devices, they also provide narratives, metaphors, and ways of seeing the world. This course critically examines how computing technology and society shape each other and how this plays out in our everyday lives. Identifies how computers, networks, and information technologies reproduce, reinforce, and rework existing cultural trends, norms, and values. Looks at the values embodied in the cultures of computing and considers alternative ways to imagine, build, and work with information technologies.

**STS 3601** Ethical Issues in Engineering Practice (also ECE/ENGRG 3600)
Spring. 3 credits. Limited to juniors and seniors only. P. Doig.
For description, see ENGRG 3600.

**STS 3811** Philosophy of Science: Knowledge and Objectivity (also PHIL 3810) (KCM-AS)
Fall. 4 credits. R. Boyd.
For description, see PHIL 3810.

**STS 3871** The Automatic Lifestyle: Consumer Culture and Technology (also INFO 3871)
Spring. 4 credits. P. Sengers.
For description, see INFO 3871.

**STS 3911** Science in the American Polity, 1960 to Now (also AMST 3911, GOVT 3911, DSOC 3911) (SBA-AS)
This course reviews the changing political relations between science, technology, and the state in America from 1960 to the present. It focuses on policy choices involving science and technology in different institutional settings, such as Congress, the court system, and regulatory agencies. The tension between the concepts of science as an autonomous republic and as just another interest group is a central theme.]
[STS 4001 Components and Systems: Engineering in a Social Context (also MAE 4000/4010)]
Fall. 3 credits. Offered alternate years; next offered 2011–2012. Z. Warhaft.
For description, see MAE 4000.

[STS 4021 Bodies in Medicine, Science, and Technology (also BSOC/FGSS 4021) (CA-AS)]
Spring. 4 credits. Limited to 15 students.
Every day we are barraged with cultural messages telling us to eat better, get more exercise, stop smoking, and practice safe sex. These messages make us insecure about our bodies: Am I thin enough, ripped enough, sexy enough? They are also contradictory: Fish makes you smarter, mercury in fish makes you sick. Many of these messages use the language of science and medicine: There are obesity “epidemics” and chocolate “addictions.” Our bodies are described and treated like machines: transplant surgeons talk about our “spare parts”; computer programmers describe their brains as “wetware.” Our sense of our bodies may feel impoverished, created on the fly from a collage of scientific, medical, cultural, and advertising snapshots. This course draws from literature in science and technology studies, anthropology, and feminist and gender studies to examine how bodies emerge from the shifting lessons of science, technology, and medicine, as well as how cultural and political concerns express themselves in and through bodies.

STS 4071 Law, Science, and Public Values (also BSOC 4071) (SBA-AS)
Spring. 4 credits. M. Lynch.
Examines problems that arise at the interface of law and science. These problems include the regulation of novel technology, the role of technical expertise in public decision making, and the control over scientific research. The first part of the course covers basic perspectives in STS and how they relate to legal decisions and processes. The second part covers a series of examples and legal cases on the role of expert judgments in legal and legislative settings, intellectual property considerations in science and medicine, and legal and political oversight of scientific research. The final part examines social processes and practices in legal institutions, and relativistic cases of scientific and technological controversy. Lectures and assignments are designed to acquaint students with relevant ideas about the relationship between legal, political, and scientific institutions, and to encourage independent thought and research about specific problems covered in the course.

[STS 4120 The Scientific Revolution in Early-Modern Europe (also HIST 4120) # (HA-AS)]

[STS 4121 Science, Technology, and Culture (also COML 4100) (CA-AS)]
Fall. 4 credits. Next offered 2012–2013. A. Banerjee.

STS 4122 Darwin and the Making of Histories (also HIST 4122) (HA-AS)
Fall. 4 credits. P. Dear and S. Seth.
For description, see HIST 4122.

[STS 4131 Comparative Environmental History (also BSOC 4131) (HA-AS)]
Fall. 4 credits. Next offered 2011–2012. S. Pritchard.
One of the most troubling realizations of the 20th century has been the extent to which human activities have transformed the environment on a global scale. The rapid growth of human population and the acceleration of the global economy have meant that the 20th century, in environmental terms, has been unlike any other in world history: This course takes a comparative approach, examining crucial themes in the environmental history of the 20th-century world in different times, places, and ecologies.

STS 4221 New York Women (also FGSS 4220) (HA-AS)
Fall. 4 credits. Limited to 15 students. M. Rossiter.
Over the centuries New York State has been the site of activity for a great many women of consequence. This course is a one-semester survey of the past and present activities and contributions of rural and urban women in a variety of fields of interest. Core students: politics, medicine, law, the environment, business (including hotels), entertainment, communications, government, labor, religion, athletics, the arts, and other areas. Weekly readings and discussion and a paper, possibly using local or university archives.

[STS 4231 Gender and Technology in Historical Perspectives (also BSOC/FGSS/HIST 4231) (HA-AS)]

Why are some technologies such as cars and computers associated with men and masculinity? How did vacuum cleaners and sewing machines become gendered female? How do technological artifacts and systems constitute, mediate, and reproduce gender identities and gender relations? How do technologies uphold gender hierarchies and thus social inequalities? This class explores the relationship between gender and technology in comparative cultural, social, and historical perspective. Specific themes include meanings, camouflaging, and display; socialization; industrialization, labor, and work; technologies of war; the postwar workplace; sex and sexuality; and reproductive technologies. Most course materials focus on Western Europe and the United States since the late 18th century, but the issues raised in this class will prepare students to think about the relationship between gender and technology in other contexts including our own.

[STS 4291 Politics of Science (also BSOC 4291, GOVT 4293) (SBA-AS)]

[STS 4311 From Surgery to Simulation (also BSOC 4311) (SBA-AS)]
A cliche among medical professionals says, “If you have a hammer, every problem looks like a nail.” In other words, treatment decisions are often dictated by available technologies. This course looks at medical technologies from dissection to X-rays to antidepressants and the ways they shape how medical professionals look at and practice upon the human body. Takes a broad view of technology, encompassing systems of practice that shape how work is conducted and the body is understood, as well as specific machines and treatments with specific uses. Considers how these technologies are not only treatments for individual patients but also metaphors for larger cultural questions.

[STS 4331 Global History of Science # (HA-AS)]
Survey of the major scientific events and institutions in several foreign nations, including developing countries. Covers the period 1660 to the present and gives some attention to the people who in each country becomes a scientist, who rises to the top, and who emigrates. Weekly readings and a research paper.

[STS 4341 The Sociology of Science (also BSOC 4421, SOC 4420) (SBA-AS)]
A view of science less as an autonomous activity than as a social institution. Discusses such issues as controversies in science, analysis of scientific text, gender, and the social shaping of scientific knowledge.

STS 4441 Historical Issues of Gender and Science (also FGSS 4440) (CA-AS)
Spring. 4 credits. Not open to freshmen. M. Rossiter.
A one-semester survey of women’s role in science and engineering from antiquity to the present, with special emphasis on the United States in the 20th century. Readings include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, students attain a broad view of the problems that have faced women entering science and those that still remain.

STS 4471 Seminar in the History of Biology (also BIOEE 4670, BSOC 4471, HIST 4150) (PBS)
Summer or fall. 4 credits. Limited to 18 students. S–U or letter grades. W. Provine.
For description, see BIOEE 4670.

STS 4581 Knowledge and Society (also SOC 4580) (CA-AS)
Spring. 4 credits. Limited to 15 students. C. Lemenberger.
What is reality? How is one to know? In this course we explore these questions by focusing on the intersection between knowledge, society, culture, and politics. Knowledge is central to the organization of society. It not only constitutes everyday, common-sense, and indigenous practices, but also professional and scientific endeavors. We will discuss theoretical debates and empirical studies of how knowledge partakes in the construction and experience of reality, personhood, identity, interaction, religion, and the emotions, and how it builds and sustains the artistic, scientific, and technical professions.

[STS 4661 Public Communication of Science and Technology (also COMM 4660)]
Spring. 3 credits. Limited to 15 students. Offered even-numbered years; next offered 2011–2012. B. Lewenstein.
For description, see COMM 4660.
STS 491/4992 Honors Project
Fall and spring (yearlong). Prerequisites: senior S&TS students by permission of department; overall Cornell cumulative GPA of 3.00 and 3.30 cumulative GPA in courses taken for major. Apply in 306 Rockefeller Hall.

Students admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research, and the completed work should be of wider scope and greater originality than is normal for an upper-level course. The student must find a project supervisor and a second faculty member willing to serve as faculty reader; at least one of these must be a member of the S&TS department.

*Students must register for 4 credits each semester, for a total of 8 credits. After the fall semester, students will receive a letter grade of ‘R’ for the first semester with a letter grade for both semesters. At the end of the second semester whether or not they complete a thesis, and whether or not they are recommended for honors. Minimally, an honors thesis course and bibliography should be completed during the first semester. In consultation with the advisors, the director of undergraduate studies will evaluate whether the student should continue working on an honors project. Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. If students do not complete the second semester of the honors project, they must change the first semester to independent study to clear the ‘R’ and receive a grade. Otherwise, the ‘R’ will remain on their record and prevent them from graduating.

Summer Course

STS 1451 Body, Mind, and Health: Perspectives for Future Medical Professionals (also BIOC 1451) # (CA-AS)
Summer. 3 credits. Open to high school students. D. Caurso.

In this three-week program, you’ll explore the fascinating past, present, and future of medicine in the United States. Examine the ways in which medicine and its practitioners have impacted—and been impacted by—American social, political, cultural, and economic development; build a solid base of knowledge for enriching your own perspective as a future health or medical professional; and gain a semester’s worth of experience with college-level work. You’ll begin by studying the development of medicine as a profession in the late 19th and early 20th centuries; investigating how pharmaceuticals transformed medical practice in the second half of the 20th century; and interpreting why the best doctors were not always seen as the medical experts, nor hospitals as the place to go when suffering a severe illness or trauma, and how our current health care system began to take shape in the early- to mid-20th century. Using a rich variety of sources, you’ll examine how gender issues and beliefs about disease have crafted new roles for people within medicine and American society. And, you’ll see how the personal experiences of patients of patients caused public health professionals and medical researchers to reconsider health policy and medical experimentation in the United States. This program also serves as an excellent introduction to college-level work. You’ll use a wide range of materials throughout the session—from scholarly and scientific articles to children’s literature, publications in magazines and popular journals, and documentary and popular films—and you’ll learn to integrate these materials with daily lectures. In addition, you’ll participate in discussion sections with teaching assistants to talk about assignments and in writing seminars to learn the basics of college-level writing. You’ll be evaluated based on your writing assignments, your participation in lectures and discussion sessions, and your performance on in-class quizzes and exams.

Graduate Seminars

STS 6181 Confluence: Environmental History and Science & Technology Studies (also HIST 6181)
Spring. 4 credits. Pritchard.

This course uses water to examine the confluence of two fields: environmental history and the social and historical studies of science and technology. Although preliminary scholarship has begun to demonstrate the fruitful integration of these fields, a number of methodological and theoretical tensions remain. Some of these tensions include the social construction of “nature” versus the historical actor, accounts of the emergence of “environmental” problems, constructivist models of science and technology, and scholars’ use of technoscientific sources to assess environmental change. This class, therefore, examines a number of scholarly debates about key terms, definitions, and categories (both historical actors’ and analysts’), knowledge-making about “nature” and human interactions with nonhuman nature, and the concept of agency. Weekly seminars are organized around readings in environmental history, science studies, and/or their intersection that explore these issues in diverse ways while using various aquatic environments in comparative historical and cultural perspective.

STS 6271 Making People through Expert Knowledge

This seminar explores how the human and social sciences have provided the knowledge and categories we use to make sense of human beings and their behavior. Looking across a range of disciplines—including sociology, psychology, anthropology, geography, cultural studies, social history, and bioethics—we look at how humans have become objects of scientific investigation. We will examine the ways in which medicine and its practitioners have impacted—and been impacted by—American social, political, cultural, and economic development; build a solid base of knowledge for enriching your own perspective as a future health or medical professional; and gain a semester’s worth of experience with college-level work. You’ll begin by studying the development of medicine as a profession in the late 19th and early 20th centuries; investigating how pharmaceuticals transformed medical practice in the second half of the 20th century; and interpreting why the best doctors were not always seen as the medical experts, nor hospitals as the place to go when suffering a severe illness or trauma, and how our current health care system began to take shape in the early- to mid-20th century. Using a rich variety of sources, you’ll examine how gender issues and beliefs about disease have crafted new roles for people within medicine and American society. And, you’ll see how the personal experiences of patients caused public health professionals and medical researchers to reconsider health policy and medical experimentation in the United States. This program also serves as an excellent introduction to college-level work. You’ll use a wide range of materials throughout the session—from scholarly and scientific articles to children’s literature, publications in magazines and popular journals, and documentary and popular films—and you’ll learn to integrate these materials with daily lectures. In addition, you’ll participate in discussion sections with teaching assistants to talk about assignments and in writing seminars to learn the basics of college-level writing. You’ll be evaluated based on your writing assignments, your participation in lectures and discussion sessions, and your performance on in-class quizzes and exams.

Independent Study

STS 3991 Undergraduate Independent Study
Fall, spring. 1–4 credits. More information and applications available in 306 Rockefeller Hall.

STS 2991 Undergraduate Independent Study
Fall, spring. 1–4 credits. More information and applications available in 306 Rockefeller Hall.
and science and technology studies that treat the self as a social construction. The course focuses on how culture, politics, science, as well as bureaucratic and economic imperatives help shape modern and postmodern conceptions of the self.

**STS 6301 Social Theory In Formation**

Spring. 4 credits. R. Prentice.

Sociologist Craig Wright Mills challenged his readers to develop their "sociological imagination" to understand the social and historical forces at work in seemingly individual events, such as the receipt of a pink slip, a draft card, or a drug prescription.

Within science and technology studies, scholars have documented how social issues can become scientific, technological, or medical, often appearing to leave the social realm naturalized, normalized, or pathologized. This course introduces graduate students to classic texts and concepts in social theory with a focus on how scholars apply such themes to empirical research. It will consider major thinkers and schools of social thought, such as Marx, Weber, Durkheim, Mannheim, Foucault, and the Frankfurt School. It will also consider how a nuanced interpretive framework can bring critical insights to both theoretical and empirical understandings of the world. The course is relevant for students in sociology, history, and anthropology who are interested in social theory.

**STS 6311 Qualitative Research Methods for Studying Science (also SOC 6310)**

Spring. 4 credits. T. Pinch.

Much has been learned about the nature of science by sociologists and anthropologists doing lab venues and studying scientists in action. This course looks at the methods used in this new wave of science studies. Examines what can be learned by interviewing scientists, from videos, and from detailed examinations of scientific texts. Students gain hands-on experience by conducting a mini-project in which they investigate some aspect of scientific culture.

**STS 6321 Inside Technology: The Social Construction of Technology (also SOC 6320)**

Spring. 4 credits. T. Pinch.

Rather than analyze the social impact of technology upon society, this course investigates how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies, which embody different assumptions about society, possible? Do engineers have implicit theories about technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments are illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.

**STS 6341 Information Technology in Sociocultural Context**

P. Sengers.

Analyzes information technology using historical, qualitative, and critical approaches. Discusses questions such as: In what ways is information technology—often portrayed as radically new—actually deeply historical? How do information technologies represent and intervene in debates and struggles among people, communities, and institutions? How is the design of information technology tools entangled in the realms of law, politics, and commerce? In what ways are the social consequences of information technologies produced as much by the claims we make about the technologies as about the raw functionality of the tools themselves? This course investigates these issues through the lenses of long-standing debates and current controversies.

**STS 6401 Science, Technology, Gender: Historical Issues (also FGSS 6400, HIST 6410)**

Fall. 4 credits. Next offered 2012–2013. S. Seth.

This course explores five, often interrelated, aspects of the literature on gender, science, and technology: (1) The historical participation of women (and men) in scientific work; (2) the embodiment of scientific, medical, and technical knowledge; (3) the scientific construction of the object; (4) the gendering of technological systems and artifacts; and (5) feminist critiques of scientific knowledge. We begin with an analysis of reason, gender, and sexuality in the classical and late-antique Western world before moving on to an examination of the origins of modern western science in the scientific revolution, considering the claim that “science,” by its very nature, is an androcentric enterprise. The rise of scientific and medical disciplines and professions in the 19th century will provide a focus for discussions of the systematic exclusion of women from the production of scientific knowledge at precisely the point that women’s bodies became the object of intensive scientific study. Drawing on a range of material, the course considers the construction of homosexual and intersexual individuals in scientific discourse. In later weeks, we will discuss so-called “postmodernist” critiques of science, and debate the possibilities for “feminist science.”

**STS 6460 Anthropology of the Body (also ANTHR 3465/6465, STS 3460)**

Fall. 4 credits. S. Langwick.

For description, see ANTHR 3465.

**STS 6661 Public Communication of Science and Technology (also COMM 6660)**

Fall. 4 credits. B. Lewenstein.

For description, see COMM 6660.

**STS 6751 Science, Race, and Colonialism**

Spring. 4 credits. S. Seth.

Scholarly work in the last two decades has increasingly focused on the oft-neglected linkages between technology and science on the one hand and the discourses and practices of colonialism and imperialism on the other. Texts of broad perspective like Michael Adas’ Machines as the Measure of Men and Gyan Prakash’s recent Another Reason have made an attempt to provide an overview of many of the issues involved, but the field awaits a genuinely synthetic treatment. This course will aim to provide the framework for such a treatment by looking at a number of key areas of current interest. The first half of the course begins with a survey of the history of ideas of race and the development of “race-sciences” in the 19th century, including a sampling of primary materials on Darwinian theories of race and later formulations of social Darwinism. The latter part of the course will explore a number of specific themes, including the importance of social statistics and technologies of identification (fingerprinting), medicine and hygiene, scientific nationalism and nationalist science, the periphery as laboratory, and gender, savagery, and criminality. Readings will comprise a mixture of primary and secondary sources, and students are encouraged to contribute topics and texts of particular interest.

**STS 6801 Historical Approaches to Science (also HIST 6800)**

Fall. 4 credits. Prerequisite: graduate standing. Next offered 2011–2012. P. Dear.

Examines philosophical, sociological, and methodological dimensions of recent historiography of science.

**STS 6811 Philosophy of Science (also PHIL 4810, STS 4811)**

Fall. 4 credits. R. Boyd.

For description, see PHIL 4810.

**STS 7003 Special Topic 3: Issues in the Social and Cultural History of Technology**

This seminar focuses on different issues in the social and cultural history of technology each semester. Typical issues include Gender and Technology, Rethinking Technological Determinism, Was there an Information Revolution?, Consumerism, and the Military and Technology in the United States. Students read and discuss exemplary books and articles on a topic for the first half of the course, then give presentations on their research papers.

**STS 7111 Introduction to Science and Technology Studies (also HIST 7110)**

Fall. 4 credits. M. Lynch.

Provides students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants chart the terrain of this new field. Topics for discussion include, but are not limited to, historiography of science and technology and their relation to social sciences, science and technology, laboratory studies, intellectual property, science and the state, the role of instruments, fieldwork, politics and technical knowledge, philosophy of science, sociological studies of science and technology, and popularization.

**Independent Study**

**STS 6991 Graduate Independent Study**

Fall or spring. 2–4 credits. Permission of department required.

Applications and information are available in 306 Rockefeller Hall.

**SCIENCE OF EARTH SYSTEMS**

See “Department of Earth and Atmospheric Sciences.”

**SERBO-CROATIAN**

See “Department of Russian.”

**SINHALA (SINHALESE)**

See “Department of Asian Studies.”
This course will be a critical discussion concerning the history and development of musical experimentalism, broadly defined, as we identify its emergence in world cultures beginning in the early 20th century. We will interrogate a variety of discourses that have developed around the notion of "experimental," "avant-garde," "new," "contemporary" (etc.) musics, noting that while all expressions are localized, nearly all self-consciously experimental musics worldwide are linked through an engagement with modernity, colonization/post-coloniality, antagonism, urbanization and "the other." Experimentalism often represents a tactic in the effort to deal with the problems of culture, hegemony and inequity. Through an examination of local experiments we will theorize issues of musical meaning, change, influence, appropriation, dialogue, interculturalism, and misunderstanding.

SOCIETY FOR THE HUMANITIES
Timothy Murray, Director

Fellows for 2010–2011
Elizabeth Anker, Jennifer Bajorek, Bruno Bosteels, Joshua Clover, Kay Dickinson, Tracey Heatherington, Yunte Huang, Lawrence McCreas, Andrew McGraw, James McGraw, Jolene Rickard, Adam Smith

The society annually awards fellowships for research in the humanities. The fellowships offer, in line with their research, seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students and fully qualified undergraduates. The theme for 2010–11 is "Global Aesthetics."

SHUM 4841 The Poetics of Capital (also ENGL 4076)
Fall. 4 credits. Limited to 15 students. T 12:20–2:15, J. Clover. Marxist literary studies, fascinated by "poetics," has had relatively little to say about poetry in the last several decades. This course takes up the possibility that poetry is peculiarly well-suited to conceptualizing the matters that concern Marxian analysis (especially those of political economy), and vice versa. While the readings will cover a broad scope, particular attention will be given to the "late modern" and contemporary periods. A familiarity with basic categories of Marxian political economy will be useful but not requisite; the David Harvey introductory lectures to accompany Capital, available at davidharvey.org or on iTunes, are an excellent resource.

SHUM 4842 Political Ecology of Imagination (also ANTHR 4082, GOVT/STS 4842)
Fall. 4 credits. Limited to 15 students. M 12:20–2:15, T. Heatherington. The world wars, and global, environmental imaginaries evolve. Epistemic shifts supplant the natural richness of biodiversity with the artificial wealth of neoliberal economics, and overwrite traditional forms of cultural inhabitation with naïve fictions of wilderness. Changing representations of culture and environment have compelling implications for human rights and indigenous sovereignties over land, water and natural resources. This course will consider how visions and aesthetics of landscape in the 21st century are engaged with transforming frameworks of environmental security, governance, and power. Blending literary and ethnographic perspectives with media studies and critical social theory, we will develop a series of cases to reflect upon relevant cultural approaches to political ecology in national and transnational contexts.

SHUM 4843 Musical Avant-Gardes (also MUSIC 4843)
Fall. 4 credits. Limited to 15 students. W 2:30–4:25, A. McGraw.

This course will treat the classical Indian tradition as a case study in comparative poetics. We will read works of Sanskrit poetry in translation, along with selections from the works of both modern and early modern writers and contemporary Western literary and aesthetic theorists. We will look at the way contemporary developments in aesthetics have shaped the reception of Sanskrit poetry and poetic theory over the past two centuries, as well as using parallel readings in classical Indian and contemporary theory to explore the broader normative question of how theoretical resources should be deployed in the interpretation of other, particularly classical, literatures.

SHUM 4951 Photography and Decolonial Imagination (also VISST/ARTH/ASRC/HIST 4951, COML 4067)
Spring. 4 credits. Limited to 15 students. M 12:20–2:15, J. Bajorek. This seminar will examine the role played by photography—historically and in the present—in the complex and layered visual, public, and political spaces of several modern West African polities. We will draw on recent work in art history, visual anthropology, urban sociology, African studies, while also attending to the social, cultural, and political dimensions of aesthetic and philosophical approaches to photography. Historical data will be considered in light of broader theoretical questions, including questions about photography's power to foster investments by non-state actors in official and state-sponsored practices of the image and its power, alternatively, to produce visual publics with non-state investments; the aesthetics of anti-colonial and independence movements; the relationship between popular and state-sponsored practices; questions about cultural and political dimensions, as well as technical or technological dimensions, of memory regimes.

SHUM 4952 Exotic Scents: Cross-Cultural Aesthetics of Smell (also ASIAN 4495)
Spring. 4 credits. Limited to 15 students. T 10:10–12:15, J. McHugh. This course is a cross-cultural exploration of the aesthetics of smell, the technologies of affecting smell (i.e., perfumery), and the demand for exotic aromatics. We will consider the theory of the aesthetics of smell in a variety of regions and periods including, for example, the work of Kant, early South Asian ex votos, as well as more contemporary studies by perfumers, philosophers, and anthropologists. We also explore the long-globalized art of perfumery and the important international demand for exotic aromatics such as musk and sandalwood. Texts will include a variety of approaches to smell, aromatics, and the exotic by scholars such as Clare Batty, Alain Corbin, Paul Freedman, David Howes, and Edward Schafer.

SHUM 4953 The Political Lives of Things (also ANTHR/ARKEO 4153, CLASS 4602, ARTH 4953)
Spring. 4 credits. Limited to 15 students. W 2:30–4:25, A. Smith.

Our political lives are rife with objects (red tape, rubber stamps, etc.). Yet we rarely inquire as to how these things have shaped our sense of authority and our attachment to the polity. This seminar explores the materiality of political life by drawing broadly on contemporary works in art history, social thought, media studies, archaeology, sociocultural anthropology, and literary theory to piece together a sense of the political lives of things. The goal of the course is to juxtapose the sense, sensibility, and sentiments of objects with the production and reproduction of authority. In so doing, the course opens an interdisciplinary dialogue on
both the nature of our relationship with things and our ties to our political communities.

SHUM 4954 Yellowface (also ENGL 4077, COML 4068, FILM/AAS 4954)
Spring. 4 credits. Limited to 15 students. T 2:30–4:25. Y. Huang
This seminar is a study of the cross-cultural flows between China and the West via literature, translation, and cinema. It focuses on yellowface as racial ventriloquism performed by writers, translators, actors, directors, and other cultural go-betweens. The most notable yellowface performance is obviously in Hollywood films (Charlie Chan, Fu Manchu, and David Carradine’s Kung Fu series), but it is also increasingly evident in the self-representations by contemporary Chinese filmmakers. We will also examine poetic translations, wisdom products (philosophy, aphorisms, and fortune cookies), and other areas of culture, high and low, elite and popular.

SHUM 4955 Sensation and Indigenous Intent (also ARTH/VISST/AMST 4955)
Spring. 4 credits. Limited to 15 students. R 10:10–12:05, J. Rickard
Encounter/counter visual expressive Indigenous cultures as part of a global aesthetic of repossession. Indigeneity today is about voices that the street but not main-street. Throat singers meet hip-hop, Maori moko confronts colonialism, Kayapo viral media subverts dispossession and all through the visual mark, spoken word, or performed act. Embedded in Indigenous cultures globally are radical challenges to the West’s imaginary of itself and others. The rise of experimental films, performances, and expressive acts based on observations of the physical and a speculative world reveal content impacted by colonial narratives, yet anticipatory of an unexpected future. Emergent theories on indigeneity will be connected to current theoretical concerns. This class will be taught within the ancestral homelands of the Cayuga Nation (Haudenosaunee) requiring interaction with contemporary Indigenous artists locally and globally.

SHUM 4956 Transatlantic Decadence (also FREN/SPAN 4956, COML 4069)
Approaching decadence and dandyism from a global perspective informed by imperial and colonial dynamics, we will read canonical statements from Baudelaire, Barbery d’Aurevilly, Marx, Nietzsche, and Dostoievsky. This course will also be a rich introduction to many works that focus on the intimate family to the hostile mob, from organized crime to religious cults; from the divisions of race, gender, and social class to the shared beliefs of a common human act from the sociology of work to the sociology of sports. In fact, few fields have such broad scope and relevance for research, theory, and application of knowledge.

Sociology provides many distinctive perspectives on the world, generating new ideas and critiquing the old. The field also offers a range of research techniques that can be applied to virtually any aspect of social life: street crime and delinquency, corporate downsizing, how people express emotions, welfare or education, families differ and flourish, or problems of peace and war. Because sociology addresses the most challenging issues of our time, it is a rapidly expanding field whose potential is increasingly tapped by those who craft policies and create programs.

Requirements
In addition to the academic requirements established by the College of Arts and Sciences, students must also fulfill requirements for the Sociology major. Ten courses are required in the sociology major. All courses toward the major must be taken for a letter grade, and students must earn a C– or higher in each course. The courses required for the major are divided into the following categories:

- SOC 1101 Introduction to Sociology
- SOC 3750 Classical Theory, SOC 3190 Contemporary Sociological Theory
- SOC 3010 Evaluating Statistical Evidence
- seven additional (i.e., elective) courses in sociology

The Honors Program
Honors in sociology are awarded for excellence in the major, which includes overall GPA and the quality of an honors thesis. In addition to the regular requirements of the major, candidates for honors must maintain a cumulative GPA of at least an A– in all sociology classes, complete SOC 4950 and 4960 (in the senior year), and write an honors thesis.

Students are awarded either honors (cum laude), high honors (magna cum laude), or highest honors (summa cum laude) in the program based on the director of undergraduate studies and the honors advisors’ evaluations of the level and the quality of the work completed toward the honors thesis and the quality of the course work. The honors distinction will be noted on the student’s official transcript and it will also be indicated on the student’s graduation announcement.

Complete information on the major can be found on the department’s undergraduate program web page: www.soc.cornell.edu/undergrad. In addition to regularly updated course lists, the web page provides an overview of the discipline of sociology, procedures for declaring the major and applying to the honors program, and strategies for locating research opportunities. The main department web site, www.soc.cornell.edu, provides an overview of the department’s faculty members, their research, and the department’s affiliated research centers.

Introductory Courses
SOC 1101 Introduction to Sociology (SBA-AS)
Fall, spring. 3 credits. Students may not receive credit for both SOC 1101 and DSOC 1101. B. Cornwall.
This course introduces students to sociological perspectives and methodologies. We will begin by considering sociological perspectives that focus on macro-level spheres of society (e.g., the economy, polity) and sweeping societal changes that have occurred within them over the past couple of centuries. The remaining bulk of the course introduces alternatives to these macro-oriented models of society. First, we will cover arguments that address the causes and consequences of individuals’ integration into and contributions to society, and attempt to answer such questions as: Why do people follow seemingly irrational social norms? We will then complicate matters by considering explanations that assume that there is some measure of individual rationality behind individuals’ behavior. Finally, we will consider how larger social forms, especially social networks, emerge through both rational and nonrational processes.

SOC 1104 Race and Ethnicity (SBA-AS)
Fall. 3 credits. I. Brashears.
This course explores race and ethnicity from a sociological viewpoint. Topics will include, but aren’t limited to: the social construction of race and ethnicity in the United States over time; historical and contemporary racism; prejudice, and discrimination; the relationships between race/ethnicity and educational achievement/attainment, occupational prestige, income, wealth, and health; racial and ethnic identity; and current national debates regarding race/ethnicity, such as affirmative action and immigration. Throughout the course, we will address these issues in light of contemporary and classical sociological theory.

SOC 1150 Utopia in Theory and Practice (SBA-AS)
Spring. 3 credits. D. Strang.
People have always sought to imagine and realize a better sort of society, with both inspiring and disastrous results. In this course, we discuss the literary utopias of More, Bellamy, and the dystopias of Huxley, Orwell, and Zamyatin. We also examine real social experiments, including 19th-century intentional communities, 20th-century
socialisms and religious cults, and modern ecological, political, and millennial movements. Throughout, the emphasis is on two sociological questions. What kinds of social relationships appear as ideal? How can we tell societies that might work from those that cannot?

**General Education Courses**

**SOC 2070 Problems in Contemporary Society (also DSOC 2070) (SBA-AS)**

Fall. 4 credits. Next offered 2011–2012. Staff.
For description, contact department.

**SOC 2090 Networks (also CS 2850, ECON/INFO 2040) (SBA-AS)**

Fall. 4 credits. D. Easley and J. Kleinberg.
For description, see ECON 2040.

**SOC 2100 What Is Science? (also STS 2011) (CA-AS)**

Spring. 3 credits. K. Vogel.
For description, see STS 2111.

**SOC 2130 Research Methods (also PAM 2150) (SBA-AS)**

Spring. 3 credits. K. Musick.
For description, see PAM 2150.

**[SOC 2150 Organizations: An Introduction (also DSOC 2150) (SBA-AS)]**

Fall. 4 credits. Next offered 2011–2012. Staff.
For description, contact department.

**SOC 2160 Health and Society (SBA-AS)**

Spring. 4 credits. E. York Cornwell.
This course will examine how social factors shape physical and mental health. First, we will review social scientific research on the relationship between health and status characteristics, neighborhood and residential context, employment, social relationships and support, religion, and health-related behaviors. We will devote particular attention to the development of research questions and methodological approaches in this work. Next, we will directly examine the relationship between health and social factors using data from a nationally representative survey. Course instruction will include statistical analysis of survey data and social scientific writing. Students will develop their own research exploring how social factors contribute to health.

**SOC 2180 American Community and Society (SBA-AS)**

Fall. 4 credits. M. Brashears.
This course will explore what we mean by community and society and present a number of different explanations for their development and operation.

**SOC 2190 Introduction to Economic Sociology (SBA-AS)**

Fall. 3 credits. V. Nee.
What is the driving force behind economic growth? How do people find jobs? Does culture matter for economic action? What exactly is a market? Why is there a concentration of high-tech firms in Silicon Valley? Why has entrepreneurial capitalism emerged in China? These are some of the questions that this course will explore through the theoretical lens of economic sociology.

**SOC 2200 Population Dynamics (also DSOC 2010) (CA-AS)**

Fall. 3 credits. L. Williams.
For description, see DSOC 2010.

**SOC 2206 International Development (also DSOC 2050) (HA-AS)**

Spring. 3 credits. P. McMicheal.
For description, see DSOC 2050.

**SOC 2208 Social Inequality (also DSOC 2090) (SBA-AS)**

For description, contact department.

**SOC 2220 Controversies about Inequality (also DSOC/IRROB/PAM 2220, GOVT 2225, PHIL 1950) (SBA-AS)**

Fall. 4 credits. M. E. Smith.
Introduces students to contemporary debates and controversies about the underlying structure of inequality, the processes by which it is generated and maintained, and the mechanisms through which it comes to be viewed as legitimate, natural, or inevitable, and the forces making for change and stability in inequality regimes. These topics are addressed through readings, class discussion, and written assignments. Course topics include theories of the law's role in the perpetuation of social inequalities, and debates between those who take opposing positions on pressing inequality-relevant issues (e.g., welfare reform, school vouchers, immigration policy, and affirmative action). Although this course is required for students in the Inequality Concentration, it is also open to other students who have completed prior coursework relevant to issues of inequality.

**SOC 2250 Schooling and Society (SBA-AS)**

Spring. 4 credits. L. Brashears.
This course will use classical and contemporary theory/research to explore several questions relating to the institution of education. The following are examples of topics to be covered in this course: the exploration of education as an institution that has changed over time; the purpose of education; issues of inequality and upward mobility in the education system, and its relationship to inequality in the larger societal context; the school experience for individuals with different demographic characteristics (i.e., race/ethnicity, social class, and gender), both in terms of academic performance and psychological well-being; and a sociological understanding of current educational policies, such as No Child Left Behind.

**SOC 2460 Drugs and Society (SBA-AS)**

Spring. 4 credits. D. Heckathorn.
The course focuses on drug use and abuse as a social rather than a medical or psycho-pathological phenomenon. Specifically, the course deals with the history of drug use and regulatory attempts in the United States and around the world; the relationship between drug use and racism/class conflict; pharmacology and use patterns related to specific drugs; perspectives on the etiology of drug use/abuse; AIDS prevention and harm reduction interventions; drug-using subcultures; drug policy, drug legislation, and drug enforcement; and the promotion and condemnation of drug activities in the mass media.

**SOC 2480 Politics and Culture (also GOVT 3633) (HA-AS)**

Fall. 4 credits. M. Berezin.
Focuses on currently salient themes of nationalism, multiculturalism, and democracy. It explores such questions as: what is a citizen; what is a nation; what is a political institution; and how do bonds of solidarity form in modern civil society. Readings are drawn principally from sociology and applicable from political science and history. Journalist accounts, films, and web site research supplement readings.

**SOC 2510 Social Gerontology: Aging and the Life Course (also HD 2510)**

Spring. 3 credits. E. Wethington.
For description, see HD 2510.

**SOC 2560 Sociology of Law (SBA-AS)**

Fall. 4 credits. E. York Cornwell.
This course provides an introduction to the sociological perspectives of law and legal institutions in modern society. A key question is the extent to which the law creates and maintains social order. And, what is its role in social change? We will review theoretical perspectives on the reciprocal relationship between law and society, and consider how this relationship is reflected in contemporary legal issues. Empirical research covered in this course will examine social interactions among actors within legal institutions (including the criminal courts, law school classrooms, and the jury room), and how individuals experience and utilize the law in everyday life.

**SOC 2650 Latinos in the United States (also DSOC 2650, LSP 2010, AMST 2655) (SBA-AS)**

Spring. 3 credits; 4-credit option available. H. Velez.
Exploration and analysis of the Hispanic experience in the United States. Examines the sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

**SOC 2710 Social and Political Context of American Education (also AMST/ EDUC 2710/5710, SOC 5710) (SBA-AS)**

Fall. 3- or 4-credit option. J. Sipple.
For description, see EDUC 2710.
Methods and Statistics Courses

SOC 3010 Evaluating Statistical Evidence (also SOC 6010) (MQR)  
Fall. 4 credits. Prerequisite: Arts and Sciences students only. M. Brashers.  
This course will introduce students to the theory and mathematics of statistical analysis. Many decisions made by ourselves and others around us are based on statistics, yet few people have a solid grip on the strengths and limitations of these techniques. This course will provide a firm foundation for statistical reasoning and logical inference using probability. While there is math in this course, it is not a math class per se, as a considerable amount of attention is devoted to interpreting statistics as well as calculating them.

SOC 3040 Social Networks and Social Processes (SBA-AS)  
For description, contact department.[

SOC 3070 Society and Party Politics (also GOVT 3070) (SBA-AS)  
Spring. 4 credits. S. Van Morgan.  
This course will focus on the role that society plays in the emergence and functioning of political parties. In addition to investigating different types of party systems, the societal roots of political parties, and the influence of institutions on electoral politics, the course will also examine contemporary debates, such as the relationship between culture and electoral behavior. Case studies will be drawn from a number of Western and non-Western settings.

Intermediate Courses

SOC 3110 Group Solidarity (SBA-AS)  
Fall. 4 credits. M. Macy.  
What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? This course explore these questions from an interdisciplinary perspective, drawing on sociology, economics, and social psychology, as it applies alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communities, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

SOC 3130 Sociology of Medicine (also STS 3111) (SBA-AS)  
Fall. 4 credits. C. Leuenberger.  
For description, see STS 3111.

SOC 3190 Contemporary Sociological Theory (SBA-AS)  
Fall. 4 credits. D. Strang.  
Introduction to the main ideas and lines of research in contemporary sociology, from the emergence of the field in the American academy to the present. We read the work of seminal theorists and researchers such as Robert Merton, Erving Goffman, James Coleman, Harrison White, and Theda Skocpol. Topics include the development of distinctive lines of argument in areas like the study of the face-to-face group, the modern organization, social movements and social revolutions, inequality, and social mobility. The course considers the relationship between intellectual challenges, techniques of social inquiry, and the social context within which ideas are put forward and take hold.

SOC 3240 Environment and Society (also DSOC 3240, STS 3241) (SBA-AS)  
Fall. 3 credits. Staff.  
For description, see DSOC 3240.

SOC 3270 Tolerance and Fundamentalism (SBA-AS)  
For description, contact department.[

SOC 3360 Evolving Families: Challenges to Public Policy (also PAM 3360) (SBA-AS)  
Spring. 3 credits. K. Musick.  
For description, see PAM 3360.

SOC 3370 Race and Public Policy (also PAM 3370) (SBA-AS)  
Spring. 3 credits. S. Sassler.  
For description, see PAM 3370.

SOC 3410 Modern European Society and Politics (also GOVT 3413) (SBA-AS)  
Fall. 4 credits. S. Van Morgan.  
For description, see GOVT 3413.

SOC 3500 Sociology of China’s Transition to Capitalism (SBA-AS)  
For description, contact department.[

SOC 3570 Schooling, Racial Inequality, and Public Policy in America (SBA-AS)  
Spring. 4 credits. S. Morgan.  
For description, contact department.

SOC 3620 Employment Inequality and the Law (SBA-AS)  
Fall. 4 credits. Next offered 2011–2012. Staff.  
For description, contact department.[

SOC 3710 Comparative Social Inequalities (also DSOC 3700) (SBA-AS)  
Spring. 3 credits. T. Hirschl.  
For description, see DSOC 3700.

SOC 3750 Classical Theory # (SBA-AS)  
Spring. 3 credits. Staff.  
Introduction to the classics in sociology, primarily works by Karl Marx, Max Weber, Emile Durkheim, and Georg Simmel. Students also study the works of Alexis de Tocqueville, Montesquieu, and Joseph Schumpeter. Special emphasis is put on the concepts, ideas, and modes of explanation that characterize the classics. Students also look at these writers’ empirical material, and what may be termed the social construction of the classics. Course requirements include active class participation and three tests in class.

SOC 3950 Advanced Economic Sociology (SBA-AS)  
For description, contact department.[

SOC 3970 Israeli–Palestinian Conflict (also GOVT 3977, HIST 3970, JWST/INES 3697) (HA-AS)  

Advanced Courses

The following courses are intended for advanced undergraduates with substantial preparation, as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 4000-level courses is one introductory course plus 3010 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor.

SOC 4000 Qualitative Methods (also SOC 5080) (SBA-AS)  
For description, contact department.[

SOC 4100 Health and Survival Inequalities (also DSOC/FGSS 4100) (SBA-AS)  
Fall. 3 credits. A. Gonzales.  
For description, see DSOC 4100.

SOC 4250 Artificial Societies (also SOC 5270) (SBA-AS)  
For description, contact department.

SOC 4340 Online Social and Information Networks  
For description, contact department.[

SOC 4420 The Sociology of Science (also BSOC/STS 4421) (SBA-AS)  
For description, see STS 4421.

SOC 4470 Families and Inequality (also PAM 4470)  
Fall. 4 credits. K. Musick.  
For description, see PAM 4470.

SOC 4510 Special Topics in Social Psychology: Social Structure and Personality  
For description, contact department.[

SOC 4530 Knowledge and Society (also STS 4531) (CA-AS)  
Spring. 4 credits. C. Leuenberger.  
For description, see STS 4531.

SOC 4570 Health and Social Behavior (also HD 4570)  
Fall. 3 credits. Prerequisites: HD 2500, SOC 1101, DSOC 1101, or SOC 2500 and a course in statistics. Letter grades only. Next offered 2011–2012. E. Wethington.  
For description, see HD 4570.

SOC 4780 The Family and Society in Africa (also ASRC 4606) @ (SBA-AS)  
Fall. 4 credits. N. Assi-Lumumba.  
For description, see ASRC 4606.

SOC 4910 Independent Study  
Fall or spring. 1–4 credits. For undergraduates who wish to obtain research experience or do extensive reading on a special topic. Prerequisites: acceptable prospectus and agreement of a faculty member to serve as supervisor for project throughout semester. Graduate students should enroll in 8910–8920.

SOC 4920 Economic Sociology of Entrepreneurship (SBA-AS)  
Fall. 4 credits. V. Nee.  
This course introduces the classical and contemporary writings on the rise of entrepreneurial capitalism in the West and the global diffusion of the modern entrepreneurial spirit and firm. Classical approaches pioneered
the sociological study of modern entrepreneurship in its rational orientation to profit-making and innovative drive to apply new technologies and ideas to production. Contemporary approaches shift the emphasis away from analysis of individual attributes and agency to focus on examining the role of social networks, organizational forms, and institutional environment in facilitating the entrepreneurs and the firm. In the second part of the course, we will examine case studies of entrepreneurs, drawing selectively from novels, movies, and autobiographies.

SOC 4950 Honors Research
Fall or spring. 4 credits. Prerequisite: sociology seniors; permission of instructor.

SOC 4960 Honors Thesis: Senior Year
Fall or spring. 4 credits. Prerequisite: SOC 4950.

Graduate Core Courses

These courses are primarily for graduate students in sociology but may be taken by other graduate students with permission of the instructor.

SOC 5010 Basic Problems in Sociology I
Fall. 4 credits. B. Cornwell. Analysis of theory shaping current sociological research. Examination of several central problems in sociological inquiry provides an occasion for understanding tensions and continuities between classical and contemporary approaches, for indicating the prospects for unifying microsociological and macrosociological orientations, and for developing a critical appreciation of efforts to integrate theory and research.

SOC 5020 Basic Problems in Sociology II
Fall. 4 credits. D. Heckathorn. For description, contact department]

SOC 5060 Research Methods II
Spring. 4 credits. Staff. This course provides an in-depth examination of linear modeling. We begin with the basics of linear regression, including estimation, statistical inference, and model assumptions. We then review several tools for diagnosing violations of statistical assumptions and what to do when things go wrong, including dealing with outliers, missing data, omitted variables, and weights. Finally, we will explore extensions of the linear regression model, including models for categorical outcomes and hierarchical linear modeling. While statistical modeling is the focus of the course, we proceed with the assumption that models are only as good as the theoretical and substantive knowledge behind them. Thus, in covering the technical material, we will spend considerable time discussing the link between substantive knowledge and statistical practice.

Graduate Seminars

These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. The seminars offered in each semester are determined in part by the interests of students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each semester.

[SOC 5080 Qualitative Methods (also SOC 4080)
Spring. 4 credits. Next offered 2012–2013. M. Berezin. For description, contact department.]

[SOC 5100 Seminar on Comparative Societal Analysis
Spring. 3 credits. Prerequisites: advanced graduate students throughout social sciences; permission of instructor. Next offered 2011–2012. M. Berezin. For description, contact department.]

[SOC 5180 Social Inequality
Fall. 4 credits. Next offered 2012–2013. S. Morgan. For description, contact department.]

[SOC 5190 Workshop on Social Inequality
Fall. 4 credits. Prerequisites: SOC 5180; sociology Ph.D. students, or permission of instructor. K. Weeden. For description, contact department.]

[SOC 5270 Artificial Societies (also SOC 4250)
Spring. 4 credits. Next offered 2011–2012. M. Macy. For description, contact department.]

[SOC 5280 Conflict and the Nation-State
Fall. 4 credits. Next offered 2011–2012. D. Strange. For description, contact department.]

[SOC 5400 Organizational Research
Spring. 4 credits. D. Strange. This seminar focuses on contemporary sociological research on organizations. It centers theoretically on the interplay of institutional, ecological, and choice-theoretic accounts of organizational structure and action. Subjects include organizational founding and mortality, change in organizational practices over time, the relationship between organizations and their legal, social, and cultural environment, and stratification and mobility within organizations.

[SOC 5710 Social and Political Context of American Education (also AMST/EDUC 2710/5710, SOC 2710)
Fall. 3- or 4-credit option. J. Sipple. For description, see EDUC 2710.]

[SOC 5800 Identity and Interest in Collective Action
Fall. 4 credits. Offered alternate years; next offered 2011–2012. M. Macy. For description, contact department.]

[SOC 6010 Evaluating Statistical Evidence (also SOC 3010)
Fall. 4 credits. M. Brashears. For description, see SOC 3010.]

[SOC 6060-6070 Sociology Colloquium
Fall and spring. 0 credits. Requirement for sociology graduate students. Staff. A series of talks representative of current research interests in sociology, given by distinguished visitors and faculty members.

[SOC 6080 Proseminar in Sociology
Fall. 1 credit. Prerequisite: first-semester sociology graduate students. Staff. Discussion of the current state of sociology and of the research interests of members of the graduate field; taught by all members of the field.

[SOC 6090 Special Topics in Methodology
Spring. 2 credits. Next offered 2011–2012. S. Morgan. For description, contact department.]

[SOC 6100 The Sociological Classics
Spring. 3 credits. Next offered 2011–2012. R. Swedberg. For description, contact department.]

[SOC 6110 Introduction to Network Theory and Methods
Spring. 4 credits. Intended as an introduction for students who have not had exposure to network analysis previously or who are interested in the historical role of networks in sociology: Next offered 2011–2012 M. Brashears. For description, contact department.]

[SOC 6180 AIDS and Society
Fall. D. Heckathorn.

AIDS is a disease for which sociology is especially relevant. Unlike influenza that spread through mere proximity or casual contact, AIDS is spread through social networks—typically sexual or drug-using networks. The first recognition of the network-based of HIV transmission occurred in the early 1980s when the CDC established a task force to investigate a puzzling syndrome involving weakened immune systems. A sociologist on the team, William Darrow, suggested asking patients whether they knew one another. Their answers revealed a network linking patients within the East and West Coast sites where early cases where found, and also linking them across the two coasts. In this way, the network-based of HIV transmission became clear.

[SOC 6250 Controversies in Economic Sociology
Fall. 4 credits. Next offered 2011–2012. R. Swedberg. For description, contact department.]

[SOC 6300 Cultural Sociology
Spring. 4 credits. Next offered 2011–2012. M. Berezin. For description, contact department.]

[SOC 6320 Inside Technology: The Social Construction of Technology (also STS 6321)
Fall. 4 credits. Staff. For description, see STS 6321.]

[SOC 6350 Network Sampling and Network Structure
Fall. 4 credits. Next offered 2011–2012. D. Beckathorn.]
The university-wide Department of Statistical Science offers undergraduate and graduate degrees in Statistical Science (B.A.), Applied Statistics (M.S./Ph.D.). The Statistical Science undergraduate major, open to students in Arts and Sciences, provides an interdisciplinary academic program in the study of empirical quantitative reasoning in its scientific and social context. The Statistical Science major has been designed to ensure that students have a firm grounding in both the major area as well as substantial depth in a particular applied area.

The Major

Statistical Theory (8 courses)
CS 1112 or 1110 Introduction to Computing Using JAVA or MATLAB
MATH 2210–2220 or 2230–2240 or 2930–2940 or 2130 and 2310: Second-Year Calculus and Linear Algebra
PHIL 2510: Deductive Logic, or PHIL 2610: Knowledge and Reality
STSCI 2200: Biological Statistics I (cross-listed as BTRY 3010)
STSCI 3200 Biological Statistics II (cross-listed as BTRY 3020)
STSCI 4080 (cross-listed as BTRY 4080) or MATH 4710: Theory of Probability
STSCI 4090 (cross-listed as BTRY 4090) or MATH 4720: Theory of Statistics

Statistical Applications (3 courses)
Three (3) additional courses from among:
STSCI 3100: Statistical Sampling (cross-listed with BTRY/ILRST 3100)
ORIE 3510: Stochastic Processes
STSCI 4100: Multivariate Analysis (cross-listed with BTRY/ILRST 4100)
STSCI 4110: Categorical Data (cross-listed with BTRY 6050, ILRST 4110)
STSCI 4120: Applied Experimental Design (cross-listed with BTRY 6060)
ORIE 4740: Statistical Data Mining (prereq: ORIE 3600, MATH 2940)
CS 4780: Machine Learning (prereq: CS 2110, CS 2120, CS 2800, CS 3110)
BTRY 6520 Computationally Intensive Statistical Inference**

** comparable courses are being developed at the 4000 level

External Specialization (3 courses)
Three 300+ related courses that are outside of Statistical Science and total at least nine credits (3 credit min per course). At least one course to include a paper, a project, or research with substantive, nontrivial application of statistical methods to subject-related data.

Admission
Prerequisites to apply for the major include a minimum 2.50 cumulative GPA over at least two (2) semesters at Cornell University; and grades of C or higher in at least three (3) of the following courses to ensure foundational mathematical, computational, and/or statistical ability.

Calculus I (MATH 1110)
Calculus II (MATH 1120)
Introduction to Computing (CS 1110 or CS 1112)
Statistical Methods I (STSCI 2200, BTRY 3010)
Statistical Methods II (STSCI 3200, BTRY 3020)

Courses
For complete course descriptions, see "Statistical Science" under Computing and Information Science (CIS)."
Theatre major requirements

1. THETR 2400 and 2410  8
2. THETR 2500 Introduction to Theatre Design and Technology  4
3. THETR 2800 Introduction to Acting  3

4. Four laboratory courses distributed as follows:
   - THETR 1510 Production Lab I 1–3
   - THETR 1530, 2530, or 3530 Stage Management Lab I, II, or III 1–4
   - THETR 1550 Rehearsal and Performance or THETR 1510 in a different area 1–3
   - THETR 2510 or 3510 Production Lab II or III 1–3

3. Four courses in the area of theatre studies (see “Theatre Studies” section of theatre courses) chosen in the following manner:
   - one course must be at 3000 level
   - one course must be at 4000 level
   - two additional courses at the 3000 or above level
   - one of the four courses must be pre-20th century.

4. Three courses (at least 9 credits) in other theatre courses chosen in consultation with the faculty advisor. A course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.

5. Courses in which a student receives a grade below C cannot be used to fulfill the requirements for a Theatre major.

Honors
The theatre honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be part of the honors program the student must maintain a GPA of 3.5 in classes for theatre major and an average of 3.0 in all courses. Students must consult with their advisor in the spring of their junior year to enroll in the honors program.

The Advanced Undergraduate Theatre Program
The department offers advanced study in directing, playwriting, design/technology, and stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended “track” of courses or equivalent experience. (For recommended courses of study see listing of courses at end of departmental listings.) Approval process includes a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

Minor in Theatre
The Theatre Minor is divided into three tracks in order to allow students to focus in the area that interests them most within the theatre discipline. The Theatre Studies Track is the most generalized, providing an introductory exposure to performance and production studies, with the remaining courses taken in theatre history, theory, and criticism. The Theatre Performance Track is tailored to students who wish to focus their studies in the areas of acting and directing. And the Theatre Production Track is tailored to those students interested in exploring more specifically theatre design and technology.

The Theatre minor is open to any student in the university, including those outside the College of Arts and Sciences, with the approval of the director of undergraduate studies.

Requirements:

**Theatre Studies Track**
1. THETR 2400 or 2410: Introduction to World Theatre I or II
2. THETR 2800: Introduction to Acting
3. one production studio course
4. one theatre studies course at any level
5. one 3000-level theatre studies course
6. 1–3 credits of THETR 1510, 2510, or 3510: Production Laboratory I, II, or III

**Theatre Performance Track**
1. THETR 2400 or 2410: Introduction to World Theatre I or II
2. THETR 2800: Introduction to Acting
3. three acting or directing courses
4. 1–3 credits of THETR 1510, 2510, or 3510: Production Laboratory I, II, or III

**Theatre Production Track**
1. THETR 2400 or 2410: Introduction to World Theatre I or II
2. THETR 2500: Fundamentals of Theatre Design and Technology
3. any three production studio courses
4. 1–3 credits of THETR 1510, 2510, or 3510: Production Laboratory I, II, or III
5. Courses in which a student receives a grade below a C cannot be used to fulfill the requirements for the Theatre Minor.

Information on current courses that can be used to satisfy requirements of the above minors can be obtained at 223 Schwartz Center, or online at www.arts.cornell.edu/theatrearts/academics/theatre/TheatreMinorRequirements.asp.

Independent Study, Internships, and Honors

**THETR 3000 Independent Study**
Fall, spring, or summer. 1–4 credits.
Independent study in theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 223 Schwartz Center.

**THETR 4850 Undergraduate Internship**
Fall, spring, or summer. 1–3 credits.
Prerequisite: majors or concentrators in the department.
Students are responsible for arranging their own internships in consultation with the faculty in their area of choice before pre-registration for the semester in which the internship is planned to take place. To receive credit for this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

**THETR 4950 Honors Research Tutorial**
Fall. 4 credits. Prerequisite: honors students in theatre.
First of a two-semester sequence (the second is THETR 4960) for seniors engaged in an honors project.

**THETR 4960 Honors Research Tutorial**
Spring. 4 credits. Prerequisite: honors students in theatre.
Second of a two-semester sequence (the first is THETR 4950) for students engaged in an honors project.

**THETR 7210 Independent Study for Graduate Students in Theatre**
Fall and spring. 1–4 credits. Staff.
Independent study in theatre allows graduate students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 223 Schwartz Center.

First-Year Writing Seminars
Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

Theatre Studies

**THETR 2150 The American Musical (also AMST 2105, ENGL 2150, MUSIC 2250) (LA-AS)**
Spring. 3 credits. N. Salvato.
The musical is a distinct and significant form of American performance. This course will consider the origins, development, and internationalization of the American musical and will emphasize the interpretation of the history of musical theatre with the history of the United States in the 20th century and beyond. We will investigate how political, social, and economic factors shape the production of important American musicals—and how, in turn, musicals shape expressions of personal identity and national ideology. Key texts include Oklahoma!, Guys and Dolls, West Side Story, Hair, and Rent.

**THETR 2160 Television (also AMST/ENGL/FGSS/FILM/VISST 2160) (LA-AS)**
Fall. 4 credits. N. Salvato.
In this introductory course, participants will study the economic and technological history of the television industry, with a particular emphasis on its manifestations in the United States and the United Kingdom; the changing shape of the medium of television over time and in ever-wider global contexts; the social meanings, political stakes, and ideological effects of the medium; and the major methodological tools and critical concepts.
used in the interpretation of the medium, including Marxist, feminist, queer, and postcolonial approaches. Two to three hours of television viewing per week will be accompanied by short, sometimes dense readings, as well as written exercises.

**THETR 2230** The Comic Theater (also CLASS 2651, COML 2230) (LA-AS)
Spring. 3 credits. J. Rusten.
For description, see CLASS 2651.

**THETR 2360 Public Voice and Civic Gesture (also DANCE 2450, VISST 2360)**
Fall. 1 credit. Next offered 2011–2012. B. Suber.
For description, see DANCE 2450.

**THETR 2400 Introduction to World Theatre I—Antiquity Through 1500 @ (LA-AS)**
Fall. 4 credits. N. Salvato.
A survey of practices, literatures, and themes of global performance in Africa, America, Asia, and Europe from antiquity through 1500. Examines case studies from ancient Egypt, Greece, Rome, the Near East, India, China, Japan, and England, continuing up to the age of European imperialism. Looks at issues of masking and identity, storytelling and ritual, stage and society, tradition and modernity. Lectures are combined with periodic student projects.

**THETR 2410 Introduction to World Theatre II—NeoClassical to the Present @ (LA-AS)**
Spring. 4 credits. S. Warner.
A survey of practices, literatures, and themes of global performance from around 1600 to the present. Examines the development of European and Asian vernacular and national theatrical traditions; recent ethnic and popular performance traditions of Europe, Asia, Africa, and meso-America; recurring issues of realism and theatricality; avant-garde innovations; colonial expansion and marginalization; intercultural and transnational exchanges. Lectures are combined with periodic student projects.

**THETR 2605 Theater, Sport, and Spectacle: Performance and Competition in Greece and Rome (also CLASS 2605) @ (CA-AS)**
Fall. 3 credits. J. Rusten.
For description, see CLASS 2605.

**THETR 2730 Opera (also MUSIC 2241) @ (LA-AS)**
Spring. 3 credits. R. Harris-Warrick.
For description, see MUSIC 2241.

**THETR 2770 Shakespeare (also ENGL 2270) @ (LA-AS)**
Fall. 4 credits. B. Cornell.
For description, see ENGL 2270.

**THETR 2780 Desire (also COML/ENGL/FGSS 2760) @ (LA-AS)**
Spring. 4 credits. E. Hanson.
For description, see ENGL 2760.

**THETR 3130 Special Topics in Drama and Performance (also ENGL 3760, FGSS 3130)**
Fall. Spring. 4 credits. Fall. S. Warner; spring. H. Yan.

**THETR 3190 Music, Dance, and Light (also DANCE 3590, VISST 3519) (LA-AS)**
For description, see DANCE 3590.

**THETR 3240 Comparative Renaissance Drama: “Blood Politics” @ (LA-AS)**
Spring. 4 credits. P. Lorenz.
For description, see ENGL 3240.

**THETR 3260 Queer Performance (also FGSS 3250) (LA-AS)**
What constitutes queer performance? What is queer's relationship to lesbian and gay? What is performance's relationship to theatre? Is sexuality all we mean by queer?

**THETR 3350 Performance Modernism (also ENGL 3350, VISST 3735) (LA-AS)**
This course investigates drama and the cultural contexts of its performance from the mid-19th century to the mid-20th century in Europe and the United States.

**THETR 3360 American Drama and Theatre (also AMST 3360) (LA-AS)**
Fall. 4 credits. Prerequisite: permission of instructor. Limited to 25 students. S. Warner.
Explores major American playwrights from 1900 to 1960, introducing students to American theatre as a significant part of modern American cultural history. We will consider the ways in which theatre has contributed to the construction and deconstruction of a national identity. We will pay special attention to the social, political, and aesthetic themes of the period and discuss the shifting popularity of dramatic forms, including melodrama, realism, expressionism, absurdism, and the folk play, in the American theatre canon. Authors include O’Neill, Glaspell, Odets, Rice, Hellman, Hughes, Hurston, Hansberry, Miller, Williams, and Albee, among others.

**THETR 3370 Contemporary American Theatre (also AMST/ENGL 3370) (LA-AS)**
In this course we will examine major trends in American drama from 1960 to the present.

**THETR 3400 The Tragic Theatre (also CLASS 3645, COML 3440) @ (LA-AS)**
For description, see CLASS 3645.

**THETR 3470 On the Fringe—New Plays in Development (LA-AS)**
Spring. 4 credits. B. Levitt.
A laboratory approach to new plays involving text analysis, scene work, and interactions with the authors of unproduced work. Authors who agree to participate with the class will submit plays for study and rehearsal. Authors will be included in discussions of the work via SKYPE and other Internet tools. The course will work with various theatres and new play networks in selecting plays and authors. At least one Cornell playwright will be included in each semester. Whenever possible, international writers will be part of the makeup of the class.

**THETR 3720 Medieval and Renaissance Drama (also ENGL 3720) @ (LA-AS)**
For description, see ENGL 3720.

**THETR 3750 Studies in Drama and Theatre: Modern Drama (also ENGL 3750) (LA-AS)**
Spring. 4 credits.
For description, see ENGL 3750.

**THETR 4030 Ritual, Play, Spectacle, Act: Performing Culture (also THETR 6030) (LA-AS)**
Spring. 4 credits. S. Warner.
 Takes a broad-spectrum approach to performance. Includes anthropological texts on ritual and play, sociological texts on performances in everyday life, literary studies texts on “performatives” in speech and writing, folklore studies on parades and reenactments, psychological and philosophical studies on the role of performance in the formation of identity, and standard texts of the theatre. Considers the distinctions between play, ritual, spectacle, festival, theatre, and the visual arts. Explores the differences between being a spectator and witnessing and examines studies on audience behavior. At the base of the inquiry is the broad issue of the role of representational practices within culture and among cultures. If, as Barbara Meyerhoff has written, we understand ourselves by showing ourselves to others, what role does “showing” have to construction of the selves we seek to understand? Why is postmodern culture often called the “society of the spectacle” (Debord)? If, as Aristotle claimed, we are mimetic creatures at base, which comes first—representation or reality? Looking closely at the notion of “live” art, students weigh theorists who claim that performance is ephemeral and disposable against theorists who claim that performance, such as oral history, is resilient and enduring. Students have the opportunity to do fieldwork, create performative works, and engage in scholarly study.

**THETR 4070 Transnational Imagination: A Seminar on Modern Theatre and Cultural History (also THETR 6070) (LA-AS)**
Spring. 4 credits. H. Yan.
This course will explore 20th-century Anglophone drama in diverse areas of the English-speaking world. Through works by playwrights from Irish, African, Caribbean, U.S., and other regions (e.g., Friel, Soyinka, Aidoo, Walcott, and Shange), the seminar will be organized around two principal issues: the performative transformation of the received genre of European literary drama; themes of empire, colony and postcolony, and theatrical agency in the making of the modern world.

**THETR 4200/6200 Parody (also ENGL/FGSS 4270/6370) (LA-AS)**
This course examines a number of recent imitative texts in order to distinguish the rich variety of political agendas and aesthetic rationales for postmodern parody.
workshop format as actors and writers, we translate inspiration into tangible (or theatre pieces based on a variety of sources.

Yuqian, Hong Shen, Cao Yu, Guo Moruo, and Chinese authors such as Hu Shi, Ouyang
Japanese theatres will be introduced and used.

century. DVDs and other visual materials are international modernisms. The aesthetic, Seiichi Yashiro will be examined with special
Masakazu Yamazaki, Minoru Betsuyaku, and Kishida Kunio, Kubo Sakae, Yukio Mishima, Masakazu Yamazaki, Minoru Betsuyaku, and Seiichi Yashiro will be examined with special attention paid to the transformative ways in which those artists engage their respective traditions and the cultural forces of international modernisms. The aesthetic, social, and political cross-currents between these two historically distinctive Asian dramatic cultures will be further explored in their differential relationships with, and shifting placements in, the changing force fields of globalization.

THETR 4260 Adaptation: Text/ Theatricality (also VISST 4260) (LA-AS)
Spring. 4 credits. Prerequisite: permission of instructor. B. Milles. Mounting a script into a show is a process of adaptation from page to stage. This course challenges the boundaries of text to discover the possibilities of performance. Asks: How do we translate inspiration into tangible (or intangible) theatrical imagery? Working in workshop format as actors and writers, students explore the process of developing theatre pieces based on a variety of sources.

THETR 4270 Advanced Seminar in Shakespeare: Shakespeare and Marlowe (also ENGL 4270) # (LA-AS) Fall. 4 credits. Next offered 2011–2012. B. Correll.

THETR 4310 Theory of the Theatre and Drama (also GERST 4310, THETR 6310) # (LA-AS) Fall. 4 credits. H. Yan.
This course is a survey of dramatic theory and theories of theatrical representation from Aristotle to the present. Although covering a span of over two thousand years, the point will be to focus our analysis on a smaller number of key representative texts from the European, American, and postcolonial traditions. In so doing we will seek to develop a close reading of each text, while at the same time exploring both their reception within the context in which they emerged as well as their importance in the ever-evolving process of the institutions of theatre and drama over greater periods of time. Participants will be expected to read carefully the primary and background texts assigned for each session and come to class prepared to raise and answer questions about the material at hand.

THETR 4320 Theatre and Society: A Comparative Study of Asian Dramatic Cultures (also ASIAN 4435/6632, THETR 6320) @ (CA-AS) Fall. 4 credits. H. Yan.
This course is a study of Chinese and Japanese theatres with an emphasis on the profound ruptures and variable continuities between the "traditional" and the "modern" aesthetic practices as embodied in the dramatic movements in both countries since the beginning of the 20th century. While major traditional forms of Chinese and Japanese theatres will be introduced and studied in the course, plays by modern Chinese authors such as Hu Shi, Ouyang Yuqian, Hong Shen, Cao Yu, Guo Moruo, and Lao She, modern Japanese authors such as Kishida Kunio, Kabo Sakae, Yukio Mishima, Masakazu Yamazaki, Minoru Betsuyaku, and Seiichi Yashiro will be examined with special attention paid to the transformative ways in which those artists engage their respective traditions and the cultural forces of international modernisms. The aesthetic, social, and political cross-currents between these two historically distinctive Asian dramatic cultures will be further explored in their differential relationships with, and shifting placements in, the changing force fields of globalization throughout the century. DVDs and other visual materials are used.

Is there a "female dramaturgy"? What is the female tradition in the theatre? This course explores these questions through an investigation of texts by women dramatists, including Hrotsvitha, Aphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.

THETR 4440 Gossip (also ENGL 4440/6440, THETR 6440) (LA-AS) Spring. 4 credits. N. Salvato.
Literary and cultural theorist Eve Kosofsky Sedgwick has described gossip as a "devalued art" that ought to be revalued for "projects of nonce taxonomy, of the making and unmaking and remaking and redissolution of hundreds of old and new categorical imaginations concerning all the kinds it may take to make up a world." In this graduate seminar, we will focus attention on the philosophical traditions in which gossip has been devalued, as well as on its more recent revaluations by theorists like Sedgwick. As we investigate the ways in which gossip may produce provisional maps of the world, we will occasionally pair philosophical and theoretical texts with their literary, theatrical, and filmic complements. Key authors include Kant, Kierkegaard, Freud, Benjamin, Heidegger, and Barthes.

THETR 4450 Text Analysis for Production: How to Get from the Text onto the Stage (also ENGL 4450, VISST 4450) Spring. 4 credits. Limited to 15 students. Prerequisite: THETR 2500 or 2610 or 3980, or permission of instructor. B. Levitt.
Examines the play as the central, essential source for production decisions made by the actor, the director, the designer, and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer, or dramaturg, as well as through two to three papers.

THETR 4460 Shakespeare in (Con)Text (also ENGL 4210, VISST 4546) # (LA-AS) Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. B. Levitt.
Examines how collaboration among stage directors, designers, and actors leads to differing interpretations of plays. The course focuses on how the texts themselves are blueprints for productions with particular emphasis on the choices available to the actor inherent in texts.

THETR 4470 Hamlet: The Seminar (also ENGL 4820) # (LA-AS) Fall. 4 credits. Limited to 15 students. Prerequisites: THETR 2400, 2410, 2420 or equivalent and permission of instructor. Next offered 2011–2012. B. Levitt.
Through research and assigned readings the course tests theoretical viewpoints about the play against the text itself by reading the theory in relationship to the production history.

THETR 4600 Proseminar in Theatre Studies Fall. 4 credits. Prerequisite: graduate standing.
An introduction to the theory and methods involved in the study of the theatre. Attention focuses on pedagogy and the profession in Part I. Part II explores current scholarly trends.

THETR 6030 Ritual, Play, Spectacle, Act
Spring. 4 credits. S. Warner.
Takes a broad-spectrum approach to performance. Includes anthropological texts on ritual and play, sociological texts on performances in everyday life, literary studies texts on “performatives” in speech and writing, folklore studies on parades and reenactments, psychological and philosophical studies on the role of performance in the formation of identity, and standard texts of the theatre. Considers the distinctions between play, ritual, spectacle, festival, theatre, and the visual arts. Examines the differences between being a spectator and witnessing and examines studies on audience behavior. At the base of the inquiry is the broad issue of the role of representational practices within culture and among cultures. If, as Barbara Meyerhoff has written, we understand ourselves by showing ourselves to ourselves, what role does “showing” have to construction of the selves we seek to understand? Why is postmodern culture often called the “society of the spectacle” (Debord)? If, as Aristotle claimed, we are mimetic creatures at base, which comes first—representation or reality? Looking closely at the notion of “live” art, students weigh theorists who claim that performance is ephemeral and disappearing against those who claim that performance, such as oral history, is resilient and enduring. Students have the opportunity to do fieldwork, create performative works, and engage in scholarly study.

This seminar investigates histories of taste; the traffic between popular culture and “high art” and the relationships among material artifacts, identity politics, and community formations.

THETR 6060 Passionate Politics (also FGSS 6040) Fall. 4 credits. Next offered 2011–2012. S. Warner.
Complete Course Title: Passionate Politics: Affect, Protest, Performance. This course explores the relationship between affect, performance, and political engagement.

THETR 6070 Transnational Imagination: A Seminar on Modern Theatre and Cultural History (also THETR 4070) Spring. 4 credits. H. Yan.
For description, see THETR 4070.

THETR 6300 Melodrama, Modernism, and Modernity (also ENGL 6300) Fall. 4 credits. Next offered 2011–2012. N. Salvato.
This course examines the history of melodrama and the various theories, often sharply divergent, that have developed about and around it.

THETR 6310 Theory of Theatre and Drama (also COML 6051, GERST/ THETR 4310) Fall. 4 credits. H. Yan.
For description, see THETR 4310.
THETR 6230 Theatre and Society: A Comparative Study of Asian Dramatic Cultures (also ASIAN 4435/6632, THETR 4320) Fall. 4 credits. H. Yan. For description, see THETR 4320.

THETR 6440 Gossip (also ENGL 4640/6640, THETR 4440) Spring. 4 credits. N. Salvato. For description, see THETR 4440.

THETR 7100 The Pedagogy of Theatre Fall. 4 credits. Corequisite: relevant undergraduate class and permission of instructor. Staff. Provides graduate students in the field of theatre an opportunity to work directly with a faculty member to explore pedagogical theory and practice for undergraduate theatre classes in all areas of the curriculum.

Acting

THETR 1550 Rehearsal and Performance Fall or spring. 1–2 credits; 1 credit per production experience per semester up to 2 credits per semester. Students must register for course in semester in which credit is earned. Prerequisite: students who are assigned roles after tryouts at department's scheduled auditions. Students should add this course only after they have been assigned roles. S–U grades only. The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

THETR 2050 Rehearsal Workshop Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production and permission of instructor. Staff. Enables students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the course depends on the needs of a particular production (e.g., history, choreography, textwork, dramaturgy).

THETR 2800 Introduction to Acting (LA-AS) Fall and spring. 3 credits. Limited to 16 students per sec. Preregistration and registration only through roster in department office, 223 Schwartz Center. No online registration. Staff. An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus is on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

THETR 2810 Acting I (LA-AS) Fall and spring. 3 credits. Limited to 14 students per sec. Prerequisites: sophomore standing and above; THETR 2800 and audition. Registration only through roster in department office, 223 Schwartz Center. Practical exploration of the actor's craft through exercises in physical and psychological action, improvisation and scene study.

THETR 2820 Standard American Stage Speech (LA-AS) Fall. 3 credits. Limited to 10 students. Prerequisites: THETR 2800 and permission of instructor. A. Van Dyke. Introduction to Standard American Stage Speech. Study of various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet as a way to designate the vowel, diphthong, and consonant sounds of spoken English.

THETR 2830 Voice and Speech for Performance (LA-AS) Spring. 3 credits. Limited to 12 students. Prerequisite: permission of instructor. M. Dreyer. Development of the speaking voice with additional emphasis on dramatic interpretation. Registration only through department roster, 223 Schwartz Center.

THETR 2840 Speech and Dialects for Performance (LA-AS) Spring. 3 credits. Limited to 10 students. Primarily for department majors. Prerequisites: THETR 2800 and permission of instructor. A. Van Dyke. Development of speech and dialects in dramatic text.

THETR 2880 Acting II (LA-AS) Fall. 3 credits. Limited to 12 students. Prerequisite: THETR 2810 and audition. B. Miles. Continuation of Acting I. Special consideration is given to a physical approach to characterization.

THETR 2810 Acting II: Advanced Scene Study (LA-AS) Spring. 3 credits. Limited to 10 students. Prerequisite: audition. Strong priority given to those who have taken THETR 4460. Staff. Focuses on advanced problems for the stage. Monologues and scenes are drawn from Shakespeare and classical sources.

THETR 3840 Commedia: A Contemporization of Physical Acting Styles and Theatric Approach (also VISST 3850) (LA-AS) Spring. 3 credits. Limited to 10 students. Prerequisite: THETR 2810, and permission of instructor. B. W. Miller. A wholly physical acting course based in the practices of Commedia dell’arte—stock characters, physical lazi, improvisation, street theatre—using improvisation, some mask work, clown and viewpoint training. An exploration of how to use the body to illuminate text, and how to mine text to maximize comedy.

THETR 3850 Advanced Studies in Acting Techniques (LA-AS) Fall or spring. 3 credits, may be repeated for credit. Limited to 8 students. Prerequisites: THETR 2810, 2840, audition, and permission of instructor. Next offered 2011–2012. A. Van Dyke. Scene study using plays that require the accents studied in THETR 2840.

THETR 3860 Solo Performance (LA-AS) Fall. 4 credits. Prerequisites: THETR 2800, 2810, and permission of instructor. B. Levitt. THETR 3860 was designed to explore the evolution and performance of material from nonscripted texts and focus on the performance of those texts by the solo performer. Material may be drawn from newspapers, novels, poetry, nonfiction, biography, autobiography, and interviews.

THETR 3970 Movement for the Actor Fall. 3 credits. Prerequisite: permission of instructor. M. Dreyer. Physical skills for the actor are developed through work with LeCog-based Neutral Mask corporeal mine and physical acting techniques.

THETR 4810 Senior Seminar in Theater Exploration (LA-AS) Spring. 3 credits. Prerequisites: 3000-level acting course and/or senior theatre student by permission of instructors. Next offered 2011–2012. B. Levitt and A. Van Dyke. This seminar will re-explore and summarize the techniques taught in acting and theatre classes related to performance and serve as a culminating experience for those undergraduates whose major study of interest during their four years at Cornell has been in the performance side of Theatre Arts.

THETR 6770 Seminar in Theatre: The Question of Sovereignty: Theatre, Theory, Form (also ENGL 6770) Fall. 4 credits. For description, see ENGL 6770.

Directing

THETR 1770 Student Laboratory Theatre Company Spring. 1–2 credits. D. Feldshuh. The Student Laboratory Theatre Company (SLTC) is a group of student-actors who earn credit by functioning in three scenes directed by students taking THETR 4980. Students enrolling in SLTC for course credit earn 1 credit for two projects and 2 credits for three projects. SLTC also meets with directors once a week.

THETR 2980 Fundamentals of Directing I (also VISST 3798) (LA-AS) Fall. 3 credits. Limited to 9 students. Prerequisite: permission of instructor. Special consideration given to students who have completed THETR 2800 or are intending to continue in area of stage or screen directing. Students should see instructor one year in advance to sign up for course. D. Feldshuh. Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student's awareness of why and how certain stage events communicate effectively to an audience. Each student directs a number of exercises as well as a short scene.

THETR 4980 Fundamentals of Directing II (LA-AS) Spring. 4 credits. Limited enrollment. Prerequisite: THETR 2980 and 3980, and permission of instructor. Recommended: THETR 2500 and 2810. D. Feldshuh. Builds on the staging techniques learned in Fundamentals of Directing I. In this course each student directs a production with the Student Laboratory Theatre Company in a series of projects and public presentations focusing on specific directorial challenges.

THETR 4990 Practicum in Directing Fall or spring. 1–4 credits. Prerequisites: THETR 2400, 2500, 2800, 3980, 4980, and permission of instructor. D. Feldshuh. Allows the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in
conjunction with a faculty mentor. May also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

**Playwriting**

**THETR 3480 Playwriting (LA-AS)**
Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. B. Millies. Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals, and write. The semester culminates in the completion of a 20- to 30-minute one-act play.

**THETR 3490 Advanced Playwriting (LA-AS)**
Spring. 4 credits. Prerequisite: THETR 3480 or permission of instructor. Next offered 2011–2012. B. Millies. Continuation of THETR 3480. An intensive writing class. Students are encouraged to explore a rich creative landscape culminating in the completion of a full-length play.

**THETR 4970 Seminar in Playwriting**
Fall or spring. 1–4 credits. Prerequisite: THETR 3480 and 3490 and permission of instructor. Next offered 2011–2012. Staff. Extension of THETR 3480 and 3490. Students formulate a process for developing a full-length play, which they develop over the course of the semester.

**Design, Technology, and Stage Management**

**THETR 2500 Fundamentals of Theatre Design and Technology (LA-AS)**
Fall. 3 credits. Limited to 12 students. Not open to first-semester freshmen. Registration through department roster only in 223 Schwartz Center. Highly recommended: concurrent enrollment in 1 credit of Production Lab (THETR 1510 or 2510). Students required to purchase materials that instructors specify (approx. cost $50). K. Goetz, W. Cross, E. Intemann, and S. Bernstein. Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage.

**THETR 2540 Theatrical Makeup Studio**
Spring. 3 credits. Limited to 10 students. Prerequisite: permission of instructor. Registration only through department roster in 223 Schwartz Center. Students are required to purchase makeup kits that instructor provides (approx. cost $50). It is expected that any interested student will have taken courses within the department in any of the areas of design, acting, dance, or film, or will have completed rehearsal and performance (THETR 1550) credit. S. Bernstein. Basic techniques of makeup design and application for the stage including corrective, old age, likeness, and animals; use of some three-dimensional makeup and false facial hair.

**THETR 3190 Music, Dance, and Light (also DANCE 3590, VISST 3519) (LA-AS)**
Fall. 3 credits. Limited to 12 students. Attendance at dance concerts and music concerts required. Next offered 2011-2012. E. Intemann and A. Fogelsgaard. For description, see DANCE 3590.

**THETR 3410 CAD Studio for Theatre Design (LA-AS)**
Fall or spring. 3 credits. Prerequisite: THETR 2500 and 3490 and permission of instructor. Registration only through department roster in 223 Schwartz Center. Experience in theatre production and graphic communication helpful but not essential. Fall, K. Goetz; spring, S. Brokhous. Students will utilize commercially available computer assisted design software to explore the process of designing scenery, costume and lighting for the live theatre. AutoCad, Vectorworks and Photoshop are some of the applications utilized.

**THETR 3430 Costume History: From Fig Leaf to Vanity # (LA-AS)**
Fall. 3 credits. Limited to 20 students. S. Bernstein. Offered as an overview of the history of clothing from the first signs of clothing to the early 20th century. It investigates social, political, economic, technological, geographic, ecological, and artistic influences on costume.

**THETR 3620 Lighting Design Studio I (also DANCE 3660, VISST 3620) (LA-AS)**
Fall. 3 credits. Limited to 6 students. E. Intemann. The theory and practice of lighting design as a medium for artistic expression. This course explores the aesthetic and mechanical aspects of light and their application in a variety of disciplines. Emphasis is on understanding lighting's function in an environment and manipulating light effectively. Artistic style and viewpoint are also covered.

**THETR 3640 Scenic Design Studio (LA-AS)**
Fall and spring. 3 credits. Limited to 10 students. Prerequisite: THETR 2500 and 3490 or permission of instructor. Experience in theatre production and drawing skills is helpful but not essential. Students are required to purchase materials that instructor will specify (approx. cost $50). Course co-meets with THETR 4640. K. Goetz. An exploration of the scenic design process for the live theatre. Students will execute design projects employing various media (e.g., sketches, paper models, computer graphics) that examine how elements of stage craft, architecture, and interior design can be employed to support and enhance the action of dramatic texts.

**THETR 3650 Automated Lighting and Control**
Fall. 3 credits. Limited to 8 students. E. Intemann. Covers the understanding and application of light control technologies, including electrical systems, color, optics, dimming protocols, and console programming. Students complete a series of projects culminating in the programming and testing of moving fixtures and lighting visualization software.

**THETR 3660 Costume Design Studio (LA-AS)**
Spring. 3 credits; may be repeated for credit Limited to 10 students. Students are required to purchase materials that instructor will specify (approx. cost $70). S. Bernstein. Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style.

**THETR 3680 Sound Design and Digital Audio (also DANCE 3660, MUSIC 3431) (LA-AS)**
Fall and spring. 3 credits. Prerequisite: permission of instructor. Recommended: some experience with audio/video recording or editing, W. Cross. Basics of digital audio, psychoacoustics, and sound design as they apply to theatre, film, and music production. Weekly projects require time spent in the studio outside of class. Students create soundtracks for text and moving image, with final projects in 5.1 surround sound, using Pro Tools and Digital Performer.

**THETR 3690 Interactive Performance Technology (also DANCE 3560, MUSIC 3441) (LA-AS)**
Spring. 3 credits. Laptop computer and Max 5 software required, see http://cycling74.com/shop/discounts for student pricing. (As of April 17, 2010, a one-time, nine-month Max 5 authorization costs $59.) Lab performance at end of semester. A. Fogelsgaard. Introduction to the multimedia programming platform Max 5 and its application to computer-interactive dance (interactive dance technology). Intended to bring together programmers and dancers. Each student will create software patches and movement pieces and collaborate with others on a final project focusing on the input, manipulation, and output of movement, sound, video, graphics, and lighting in live dance performance. Topics include digital audio/video processing, MIDI control, sensor use, electroacoustic music, history of computer to body tech (interactive dance and dance, gestural expression, choreography, composition, design, and aesthetics. There will be assigned online readings.

**THETR 3710 Costume Design Studio II (LA-AS)**
Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 3660, or THETR 3050 and permission of instructor. Students are required to purchase materials that instructor will specify (approx. cost $50). S. Bernstein. Explores unconventional costume designs for theatre and dance. Deals with the special considerations found in many plays and performance pieces, such as the theatricalization of nonhuman subjects (e.g., animals, plants, machines, magical creatures), the visualization of music, or the support or enhancement of movement. Also covers alternative (some non-Western) ways to create character through costume, makeup, masks, and wearable forms of puppetry.

**THETR 4620 Lighting Design Studio II (also DANCE 4660, VISST 4563) (LA-AS)**
Spring. 4 credits. Limited to 6 students; may be repeated for credit. Prerequisite: THETR 2500 or 3620 or permission of instructor. E. Intemann.
Concentrates on designing lighting for different genres of performance in various venues. Emphasis is placed on developing both the visual sophistication and the technical artistry of the lighting designer. Commitment, personal style, and professional presentation are stressed.

**THETR 4640 Scene Design Studio II (LA-AS)**

Fall and spring. 3 credits. Limited to 10 students. Prerequisite: THETR 3640 or permission of instructor. Students are required to purchase materials that instructor will specify (approx. cost $50). Course co-meets with THETR 3640.

K. Goetz.

Builds on the techniques learned in THETR 3640. Students will execute more complex design projects tailored to their particular skills, goals, and interests, with emphasis on developing professional standards and practices that would prepare the student for a major design assignment on a department production.

**Technology**

**THETR 3400 Theatrical Drafting and Technical Drawing Studio**

Fall. 3 credits. Limited to 5 students. Prerequisite: permission of instructor. S. Brookhouse.

Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept of an individual style in the approach to drafting for the theatre. Includes a series of projects to familiarize students with the convention and process of visualization and drafting, using both mechanical drafting techniques and AUTOCAD.

**THETR 3410 CAD Studio for Theatre Design (LA-AS)**

Spring. 3 credits. Prerequisite: THETR 2500 and 3400 and permission of instructor. Registration only through department roster in 223 Schwartz Center. Experience in theatre production and graphic communication helpful but not essential. S. Brookhouse and staff.

Students will utilize commercially available computer-assisted-design software to explore the process of designing scenery, costume, and lighting for the live theatre. AUTOCAD, Vectorworks, and Photoshop are some of the applications utilized.

**THETR 3520 Themed Entertainment: The Technical Perspective**

Fall. 3 credits. Limited to 12 students. R. Archer.

Exploration into the integration of art and science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus is on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

**THETR 3540 Stagecraft Studio**

Fall. 3 credits. Prerequisite: THETR 2500 or permission of instructor. Highly recommended: concurrent enrollment in at least 1 credit of THETR 1510 or 2510. R. Archer.

Exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

**THETR 3560 Costume Construction Studio**

Spring. 3 credits. Highly recommended: concurrent enrollment in at least 1 credit of THETR 1510 or 2510. Lab fee: $100 (paid in class). R. MacPike. Project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

**THETR 3600 Costumes: Special Projects**

Fall. 3 credits; may be repeated for credit. Prerequisite: permission of instructor. Lab fee: $150 (paid in class). R. MacPike.

Designed for students who have completed a basic construction class (in THETR or FSAD, or another department). Each fall, this project-oriented course focuses on one of the following areas of costume crafts: millinery, fabric modification, or mask making. Students should check with the instructor to find out each fall which topic is being offered. Fall 2009 special project is mask-making.

**Stage Management**

**THETR 1530 Stage Management Production Laboratory I**

Fall and spring. 1–2 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 p.m. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or SLTC under the supervision of the faculty production manager. THETR 3700 complements this course.

**THETR 2530 Stage Management Laboratory II**

Fall and spring. 1–5 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 p.m. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 3700 complements this course.

**THETR 2560 Stage Management Laboratory III**

Fall and spring. 1–3 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 p.m. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as stage manager for a dance theatre concert or an AUTP production under the supervision of the faculty production manager. THETR 3700 complements this course.

**THETR 3530 Stage Management Laboratory IV**

Fall and spring. 1–4 credits; may be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.

Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

**Production Laboratories**

**THETR 1510 Production Laboratory I**

Fall and spring. 1–3 credits; may be repeated for credit. No prerequisites or experience required. Orientation meeting at 7:30 p.m. first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard, S. Brookhouse and R. MacPike.

Provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew.

**THETR 2510 Production Laboratory II**

Fall and spring. 1–3 credits; may be repeated for credit. Prerequisite: permission of instructor. Orientation meeting at 7:30 p.m. on first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard, D. Hall, W. Cross, and R. MacPike.

Practical experience in theatrical production, as a light board operator, sound board operator, video operator, follow-spot operator, sound technician, head dress designer or scenery/props special project.

**THETR 2510 Production Laboratory III**

Fall and spring. 1–3 credits; may be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, D. Hall, E. Intemann, and S. Bernstein.

Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager, or assistant to a faculty or guest director or designer.

**THETR 4510 Production Laboratory IV**

Fall and spring. 1–4 credits; may be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Bernstein, D. Hall, W. Cross, and E. Intemann.

Practical experience in theatrical production, in the position of designer, shop manager, technical director, or sound engineer.

**Independent Study, Internships, and Honors**

**THETR 3000 Independent Study**

Summer, fall, or spring. 1–4 credits. Independent study in the theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 223 Schwartz Center.
THETR 4850 Undergraduate Internship
Fall, spring, or summer. 1–3 credits. To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice before pre-registration for the semester in which the internship is planned to take place. To receive credit for this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 4950 Honors Research Tutorial
Fall or spring. 4 credits. Prerequisite: honors students in theatre. First of a two-semester sequence (the second is THETR 4960) for seniors engaged in an honors project.

THETR 4960 Honors Research Tutorial
Fall or spring. 4 credits. Prerequisite: honors students in theatre. Second of a two-semester sequence (the first is THETR 4950) for students engaged in an honors project.

THETR 7210 Independent Study for Graduate Students in Theatre
Fall and spring. 1–4 credits. Independent study in theatre allows graduate students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 223 Schwartz Center.

Film
Faculty: A. Villarejo, D. Fredericksen, S. Haenri (director of graduate studies), L. Patti, M. Rivchin.

The study of film began in this department in the 1930s and continues to be based here. In the intervening years, however, it has also spread into a significant number of other departments in the College, including Africana studies, anthropology, Asian studies, comparative literature, English, German studies, government, history, psychology, Romance studies, and FGS. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film's relationships to myth and ideology, the use of film as historical evidence, film's efficacy as a rhetorical medium, and film's contribution to perennial issues in aesthetics, the history of the arts, and studies in cognition. However, foundational courses in film production and in the history, theory, and criticism of film as an art are centered in this department.

This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The three ways currently being used are: (1) majoring in film within the Department of Theatre, Film, and Dance; (2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); and (3) focusing on film as a College Scholar. Students interested in options 2 or 3 should consult both Don Fredericksen and the director of the College Scholar Program or the director of the Independent Major program.

Students who do not wish to major in film may elect to minor in film under guidelines approved by the College of Arts and Sciences. Details of this new option are described below. In addition, students should be aware that the college has a five-course minor in visual studies, which can be taken independently of, or in conjunction with, a major in film. Students interested in the visual studies minor should contact the undergraduate coordinator, Jessica Smith, in the Department of Art History and Visual Studies.

Film Major Requirements
The department's film major requires a total of 50 credits in film and related courses. Students should note that a number of film courses—including two required “core” courses (FILM 3750 and 3760)—are offered in alternating years. This means that students cannot fulfill the requirements for the major in less than two years and that they should plan accordingly, in consultation with their major advisor. In particular, students must plan to be in residence at Cornell during the fall semesters of both their junior and senior years to take FILM 3750 and 3760. Within the “core” required courses, FILM 2740, Introduction to Film Analysis, is to be taken during the sophomore year. Note: Prospective majors must earn a grade of B (not B–) or higher in FILM 2740 to be accepted into the major. Students may not enter the major until they have completed FILM 2740 in the fall semester of their sophomore year.

Majors wishing to use the production courses in a substantial manner must plan carefully and work within certain limits. These courses are FILM 3240, 3250, 3770, 3771, 3830, 4220, 4780, and 4930. Enrollment in each of those courses is limited by the nature of the work and by facilities. Enrollment in FILM 4220, 4780, and 4930 depends on the quality of previous work in FILM 3770, 3771, and/or 3830; enrollment is not guaranteed. Majors without a strong interest in production can complete the production requirement with one of the following courses: FILM 3770, 3771, 3240, or 3250, after they have taken FILM 2740 in their sophomore year. The total credits in production courses cannot exceed 20 hours; this limit is strictly enforced.

1. A core of four film courses:
   FILM 2740 Introduction to Film Analysis (offered every fall semester) 4
   FILM 3750 History and Theory of Commercial Narrative Film (offered alternate fall semesters; offered fall 2010 and 2012) (prerequisite for film majors: FILM 2740) 4
   [FILM 3760 History and Theory of Documentary and Experimental Film (offered alternate fall semesters; next offered fall 2011) (prerequisite for film majors: FILM 2740)] 4
   FILM 3770 Introduction to 16mm and Digital Filmmaking (offered fall 2010) 4 or FILM 3771 Introduction to 16mm and Digital Filmmaking: Documentary Projects (offered spring 2011) 4

2. One of the following theatre courses:
   THETR 2500 Fundamentals of Theatre Design/Technology (offered every semester) 4
   THETR 2800 Introduction to Acting (offered every semester) 3
   THETR 3980 Directing I (prerequisite: permission) (offered every fall semester) 3

3. Four courses (15–16 credits) in film offered by Theatre, Film and Dance as below, or (with permission of advisor) by other departments:
   FILM 2550 The Crime Film (offered fall 2010) 4
   FILM 2850 Stardom (offered fall 2010) 4
   [FILM 2760 Survey of American Film (offered alternate years; next offered fall 2011)] 4
   FILM 2765 Cinema and Migration (offered fall 2010) 4
   ITAL 2950 Cinematic Eye of Italy 3
   [FILM 3050 Americans Abroad (next offered spring 2012)] 4
   FILM 3290 Political Theory and Cinema 4
   FILM 3330 Korean History, Society, and Film 3
   FILM 3420 Edge Cities: Celluloid New York and Los Angeles (offered spring 2011) 3
   [FILM 3440 American Film Melodrama (next offered spring 2012)] 4
   FILM 3520 Short Cinema 4
   FILM 3790 Modern Documentary Film (offered alternate spring semesters; next offered spring 2012) 4
   [FILM 3850 Screenwriting (offered TBA)] 4
   FILM 3901 Brazilian Cinema: 1960s to Present 4
   [FILM 3930 International Film of the 1970s (next offered fall 2011)] 4
   FILM 4220 Cinematography (offered alternate years; offered fall 2010) 4
   ASIAN 4410 Chinese Film 4
   ASIAN 4436 Topics in Indian Film 4
   [FILM 4550 Film/History/Ideology: The Polish Example (offered alternate years; next offered fall 2011)] 4
   [FILM 4730 Film and Spiritual Questions (offered alternate spring semesters; next offered spring 2012)] 4
   FILM 4740 Jung, Film, and the Process of Self-Knowledge (offered alternate years; offered spring 2011) 4
   FILM 4750 Seminar in the Cinema I (offered most years; offered fall 2010: topic: cinematic structures and viewer psychology) 4
   FILM 4760 Seminar in the Cinema II (offered spring 2011 and 2012; topic for spring 2011: film eco-criticism) 4
   [FILM 4780 Intermediate Film and Video Projects: Workshop (offered alternate years; next offered 2011–2012)] 4
GOVT 4809 Politics of "70s Film

FILM 4930 Advanced Film and Video Projects (offered every spring)

4. 15 credits of related course work inside or outside the Department of Theatre, Film, and Dance, as approved by the major advisor. The courses chosen to fulfill this requirement should reinforce each major's particular interest in film and will not necessarily be film courses per se. For example, a student interested in the psychology of film, or in ethnographic film, or in film vis-à-vis intellectual or social history, or in film and social change will be encouraged to choose related course work in those areas.

5. Students must earn at least a B (not B–) in FILM 2740 to enter the major. In all subsequent courses used for the major a grade of C (not C–) must be achieved. Courses in which these minimums are not achieved must be repeated, if the student is to receive credit in the major.

6. Course work in production cannot exceed 20 credit hours.

Film Minor

The Film Minor serves students in other majors who wish to undertake, and have noted on their transcripts, some substantial study in film. The one path excluded from the minor is the one in film production; in this regard the film minor differs from the theatre and dance minors. The film program is not able to accommodate further demands upon the current film production faculty, facilities, and equipment. It is the judgment of the film faculty that minors need to have a general knowledge of film analysis/theory and film history, thus the prescribed courses in Requirements One and Two. In addition film minors will choose three elective courses devoted to the history, theory, or criticism of film.

The Film minor is open to any student in the university outside the College of Arts and Sciences, with the approval of the director of undergraduate studies.

Requirements:

1. FILM 2740 Introduction to Film Analysis

2. Either FILM 3750 History and Theory of Narrative Film, or FILM 3760 History and Theory of Documentary and Experimental Film

3. Three additional film courses, chosen from the list of film courses suitable for satisfying Requirement Three in the film major, excluding—except in very special and limited cases—FILM 3770 and 3771 Intro to 16mm and Digital Filmmaking, FILM 4220 Cinematography, FILM 4780 Intermediate Film and Video Projects, and FILM 4930 Advanced Film and Video Projects. Also, Freshman Writing Seminars focused on film cannot be used to satisfy this requirement.

4. To enter the minor, a student must earn a C or higher in FILM 2740. (To enter the film major a student must earn a B or higher in this course.)

5. The film minor students cannot be accommodated in the film production sequence (FILM 3770, 3771, 4220, 4780, and 4930), given current demands upon those courses by the film majors. This restriction does not presently apply to FILM 3240 Animation Workshop, FILM 3250 Animation History and Practice, or FILM 3830 Screenwriting.

For more information, visit our web site at www.cis.cornell.edu/ComputingArts.

FILM 2740 Introduction to Film Analysis:

Meaning and Value (also FILM 6740, VISST 2174/6174) (LA-AS)

Fall. 4 credits. Limited to 40 students. Graduate students must enroll in FILM 6740. D. Frederickson.

Intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial, minority, art cinema, documentary, and personal film modes. Prospective film majors must enroll in their sophomore year.

FILM 2765 Cinema and Migration (also AMST 2765) (CA-AS)

Fall. 4 credits. S. Haenni.

For description, see AMST 2765.

FILM 2850 Stardom (CA-AS)

Fall. 4 credits. L. Patti.

From heavenly creatures to tabloid trash, this course will explore stardom in cinema, television, and new media. Framed by approaches from semiotics, psychoanalysis, economics, and cultural studies, we will examine histories and theories of stars and star systems, investigating the importance of aesthetic strategies (from three-point lighting to the close-up), technological innovations (from sound to high-definition), industrial formations (from United Artists to SAG), the mass media (from studio publications to online tabloids), and fandom (from autograph auctions to fan fiction). We will discuss Hollywood stardom in tandem with both other national star systems and the transnational circulation of stars. An emphasis on the importance of race and sexuality in the production and reception of stardom will guide our inquiries.

FILM 2930 Middle Eastern Cinema (also JWST/NEST 2793, VISST 2193) @ (LA-AS)

FILM 3000 Independent Study

Fall, spring, or summer. 1–4 credits. Independent study in film allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student’s instructor for the course, must approve the student’s program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 223 Schwartz Center.

FILM 3240 Animation Workshop, FILM 3250 Animation History and Practice, or FILM 3830 Screenwriting.

For more information, visit our web site at www.cis.cornell.edu/ComputingArts.

FILM 3240 Animation Workshop

Advanced study in their creative work.

FILM 3250 Animation History and Practice

FILM 3830 Screenwriting

非法交易、黑帮电影、黑帮电影和间谍电影往往描绘不同的国家背景：黑帮电影，劫案，武器，电视剧，节日，等等。我们可能会考虑不同类型的非法活动。阅读和讨论将集中在非法活动和文化活动的影响，以及如何将这些非法活动纳入社会结构和文化活动的日常形式。
[FILM 3050 Americans Abroad (also AMST 3050, VISST 3605) (CA-AS)]
For description, see AMST 3050.

[FILM 3115 Video and New Media: Art, Theory, Politics (also COML/ENGL/ VISST 3115)]
Spring. 4 credits. T. Murray.
For description, see COML 3115.

[FILM 3240 Animation Workshop: Experimental and Traditional Methods (LA-AS)]
The art of animation involves many dimensions, including time and motion. This course introduces students to the fundamentals of traditional animation and the mechanics used to create the illusion of movement.

[FILM 3250 Animation History and Practice (LA-AS)]
Beginning with the pre-history of animation, optical toys and magic lantern projections, and continuing through a century of animation history to contemporary work, this course investigates the history of animation from around the world, through a variety of hands-on production projects, as well as lectures, discussions, research, and screenings. Combining tactile and digital methods, students create weekly collaborative and individual animated films, incorporating lessons from the historical work studied.

[FILM 3290 Political Theory and Cinema (also COML 3300, GERST 3550, GOVT 3705) (CA-AS)]
Spring. 4 credits. Next offered 2012–2013. G. Waite.[]

[FILM 3440 American Film Melodrama (also AMST/ENGL 3440, FGSS 3450, VISST 3450) (LA-AS)]
Melodramatic styles and themes from the early 20th century to the present; melodrama as a "mode of excess" that registers ideological contradictions and powerfully affects film audiences.

[FILM 3520 Short Cinema (CA-AS)]
Spring. 4 credits. L. Patti.
This course will bring into dialogue a variety of contemporary commercial and experimental cinema and new media to explore the theoretical and historical boundaries of "short cinema" as a genre. We will watch cartoons, music videos, commercials, trailers, webisodes, DVD bonus features (including interviews and outtakes), Youtube clips, cell phone films, Oscar-nominated shorts, and anthology films in order to map the broad terrain of short cinema. Readings will emphasize the industrial and technological underpinnings of short cinema and the commercial, critical, and popular reception of short cinema as we discuss the viability of theorizing short cinema as counter-cinema or minor cinema.

[FILM 3745 Fiction and Film Noir (also ENGL 3745)]
Fall. 4 credits. I. Balfour.
For description, see ENGL 3745.

[FILM 3750 History and Theory of the Commercial Narrative Film (also VISST 3175) (LA-AS)]
Fall. 4 credits. Prerequisite for film majors: FILM 2740. Offered alternate years. S. Haenni.
A survey of narrative cinema from around the world, with emphasis on early narrative cinema, cinematic realism, interwar European modernist cinema, popular American film, post–World War II art cinema, and recent global cinema.

[FILM 3760 History and Theory of Documentary and Experimental Film (also VISST 3176) (LA-AS)]
Fall. 4 credits. Highly recommended: FILM 2740. Offered alternate years; next offered 2011–2012. A. Villarejo.
Analyzes canonical works in documentary film to World War II, and canonical works in the avant-garde/experimental/personal film tradition(s) in Europe and the United States from the 1920s to the present.

[FILM 3770 Introduction to 16mm and Digital Filmmaking (LA-AS)]
Fall (2010, 2011), spring (2012). 4 credits. Limited to 12 students. Intended primarily for juniors and, in spring, second-semester sophomores (who may need to sign up a year or more in advance), with priority given to film majors. Prerequisite: FILM 2740 (or higher-level film studies course) and permission of instructor. Equipment fee: $150 (paid in class). Average cost to each student for materials and processing is $500. M. Rivchin.
Creative, hands-on production course in filmmaking, emphasizing the development of original ideas and the acquisition of basic technical skills in digital video and 16mm formats: cinematography, lighting, sound recording, and digital editing. Students complete several exercises and two short projects exploring narrative, documentary, experimental, or animation forms, and a final project, which is shown in a public, open-campus screening at the end of the semester.

[FILM 3771 Introduction to Digital Filmmaking: Documentary Workshop (LA-AS)]
Spring. 4 credits. Prerequisite: permission of instructor. M. Tomlinson.
This is an interdisciplinary course in documentary/nonfiction digital filmmaking for film majors and nonmajors. Students will learn basic methods of research, writing, interviewing, digital video production and postproduction through exercises and readings as well as through critiques of contemporary nonfiction examples. Students will then work in groups and crews to develop and produce three to four distinct projects from the following subject areas and issues: social/political; arts/performance; science/engineering; or special events or other humanities.

[FILM 3790 Modern Documentary Film (LA-AS)]
Spring. 4 credits. Recommended: previous completion of FILM 3760. Offered alternate years; next offered 2011–2012. D. Fredericksen.
An intensive consideration of canonical documentary films from 1945 to the present. Emphasis is on the documentary film as an artistic and rhetorical form with a distinct history and set of theoretical questions.

[FILM 3830 Screenwriting (LA-AS)]
Fall or spring. 4 credits. Limited to 12 students. Offered occasionally. Staff.
This course explores the fundamentals of traditional Hollywood and independent screenplays.

[FILM 3930 International Film of the 1970s (also AMST/COML/VISST 3930) (LA-AS)]
This course considers how the social, political, and cultural upheavals of the late 1960s (e.g., the student movement, Watergate, Vietnam, terrorism) affected film aesthetics, narrative, and style.

[FILM 4220 Cinematography (LA-AS)]
Fall. 4 credits. Limited to 8 students. Pre-or corequisite to FILM 4990. Prerequisite: permission of instructor. Letter grades only. Camera, lighting, and directing techniques, designed for students who have taken at least FILM 3770 or FILM 3771. Course includes a focus on shooting and directing for the camera (with up to six film students and six acting students); consult the instructor. Offered alternate years. M. Rivchin.
Students work in groups on a series of tests, short exercises, and scene projects using 16mm cameras, digital video cameras, HD camera movement apparatus, a range of lighting instruments, filters, and gels to expand their knowledge of the technical and aesthetic aspects of cinematography. The course will focus on acting and directing for the camera through scene work.

[FILM 4550 Film/History/Ideology: The Polish Example (LA-AS)]
Fall. 4 credits. Prerequisite: some film analysis or European history course work. Offered alternate years; next offered 2011–2012. D. Fredericksen.
What happens when a state attempts to erase a nation’s history and impose an alien ideology upon it? This was the situation faced by Poland and other eastern European countries in the aftermath of World War II and the progressive imposition of communist rule. This course will study Polish film from 1945 to 1989 within this context, to include the period of socialist realism, the “Polish school,” the cinema of moral concern, Solidarity cinema, and beyond. Readings from Polish history (Norman Davies), film history, state documents (The Black Book of Polish Censorship), cultural analysis (Milosz: The Captive Mind), and others.

[FILM 4730 Film and Spiritual Questions (LA-AS)]
Spring. 4 credits. Limited to 20 students. Offered alternate years; next offered 2012–2013. D. Fredericksen.
The use of film as a medium for the expression of spiritual questions. Special attention is given to the work of Andrey Tarkovsky, the Russian film director and theorist.

[FILM 4740 Sing, Film, and the Process of Self-Knowledge (LA-AS)]
Spring. 4 credits. Limited to 20 students. Offered alternate years. D. Fredericksen.
"Know thyself" is one of the oldest and most enduring imperatives of the human spirit. This seminar details the Jungian approach to this imperative and then tests its critical capacities with respect to films.
Rhetorical, and poetic structuring in film, as forms of narrative, thematic, affective, relationship between cinematic structures and personal film modes. Focus is also upon the manifested in narrative, documentary, and following texts, among others: Bordwell's Cinema, or Cinema, and Narrative Comprehension in Film, Structure and the Emotion System.

FILM 4760  Seminar in Cinema II (LA-AS)
Spring. 4 credits. D. Frederickson.
Film eco-criticism is a register of film studies still in the process of generating salient questions. Thus, while tending closely to individual films as exemplars of the possible relationships among humanity, nature, and technology, the seminar's readings will cast a wide net among, for example, nature writers (Thoreau, Austin, Muir, Carson, Leopold, Berry), philosophy (Rousseau, Heidegger, Bachelard, E. Casey), poetry (Wordsworth, R. Jeffers, Roethke, Snyder), deep ecology (Sessions, Naess), depth psychology (Jung, Hillman, Romanday, Tacey, Rowland), and eco-psychology (Roszak)—in this manner, seeking those salient questions for film eco-criticism that lead ultimately to the issue of terrestrial sustainability.

[FILM 4780  Intermediate Film and Video Projects: Narrative Workshop (LA-AS)]
Fall. 4 credits. Limited to 8 students. Intended for juniors and seniors, with priority given to film majors. Prerequisites: FILM 3770 or FILM 3771 as minimum in production; priority given to those who have also taken FILM 3830; THETR 3980 or FILM 4220, and permission of instructor based on proposals. Equipment fee: $150 (paid in class). Digital video projects costs: $100–$200. Offered alternate years. M. Ritchin.
This narrative workshop will focus on original group productions from developing original scripts to directing, shooting, and digital editing and sound mixing.

FILM 4844  Strategies in “World Cinema” (also SHUM 4844)
Fall. 4 credits. Limited to 15 students. K. Dickinson.
For description, see SHUM 4844.

FILM 4850  Undergraduate Internship
Fall or summer. 1–3 credits.
To be eligible to enroll and receive credit for an internship, students must either be majors or minors in the department. Students are responsible for arranging their own internships. To receive credit within the course, the internship must be unpaid. Students must follow the rules and procedures stated on the departmental internship form.

FILM 4930  Advanced Film and Video Projects (LA-AS)
Spring. 4 credits. Limited to 6–8 students. Intended for seniors, with priority given to film majors. Permission only. Prerequisite: minimum FILM 3770 or FILM 3771, priority given to those who have taken 3240, 4220, or 4780. Recommended: FILM 3830 and THETR 3980. Equipment fee: $150. Project costs: $100–$300 in digital video. Offered every spring. M. Ritchin.
Intensive filmmaking course in which students focus on developing and producing a single, already-proposed (15–25 min.) digital video project over the semester (HD and 16mm are options as well). Students direct and edit their own (or collaborative) projects working in crews for digital narrative films or documentaries, or individually for experimental or animation work, and in small groups for technical exercises and assisting others in projects. Readings, revision; directing; scene breakdowns, auditions, and casting; cinematography, lighting, location recording, digital video cameras; sound and editing techniques; and digital editing (e.g.: Final Cut Pro, Color AVID, ProTools).

FILM 4950  Honors Research Tutorial
Fall. 4 credits. Prerequisite: honors students in Film. First of a two-semester sequence (the second is FILM 4960) for seniors engaged in an honors project.

FILM 4954  Yellowface (also SHUM 4954)
Spring. 4 credits. Limited to 15 students. Y. Hua.
For description, see SHUM 4954.

FILM 4960  Honors Research Tutorial
Spring. 4 credits. Prerequisite: honors students in film. Second of a two-semester sequence (the first is FILM 4950) for students engaged in an honors project.

FILM 6740  Introduction to Film Analysis: Meaning and Value (also FILM 2740, VISST 211/46174)
Fall. 4 credits. Limited to 10 graduate students. D. Frederickson.
Intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Graduate students who intend to teach film at the undergraduate level are especially welcome. In addition to full participation in the work of FILM 2740, graduate students read and discuss primary sources in film theory in weekly group tutorials.

FILM 6750  History and Theory of the Commercial Narrative Film
Fall. 4 credits. Prerequisite for film majors: FILM 2740. Offered alternate years. S. Haenni.
A survey of narrative cinema from around the world, with emphases on early narrative cinema, classical realism, interwar European modernist cinema, popular American film, post–World War II art cinema, and recent global cinema.

FILM 6760  History and Theory of Documentary and Experimental Film
Fall. 4 credits. Highly recommended: FILM 2740. Offered alternate years; next offered 2011–2012. A. Villarejo.
Analyses canonical works in documentary film to World War II, and canonical works in the avant-garde/experimental/personal film tradition(s) in Europe and the United States from the 1920s to the present.

FILM 7220  Independent Study in Film for Graduate Students
Fall or spring. 1–4 credits. Staff.

Related Courses in other Departments
Not all courses are offered in 2010–2011. Consult instructors and departments.

Fall. 4 credits. Cutting.

VISST 2000  Introduction to Visual Studies
Spring. 4 credits. Fernandez.

Dance
The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, dance technology, music for dance, and the history, theory, and criticism of dance. Technique courses include introductory dance technique, modern dance at three levels, and Western classical dance at three levels. (Other dance forms, such as Indian dance, and capoeira, are offered periodically. A variety of courses in other dance idioms, taken through the Physical Education program, supplement these offerings.) Technique courses develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with
clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to 16 academic credits (2 each semester) in technique courses. Students may also satisfy the physical education requirement by taking dance technique courses or other movement courses in the dance program. Students taking technique for academic credit must also register through their own colleges. The schedule for all dance technique courses is available in the main office of the Sheila W. and Richard J. Schwartz Center for the Performing Arts.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance courses is by permission. Students may receive one academic credit per semester (3–U grades only) when performing in student-faculty concerts by registering for DANCE 1250.

Major in Dance Requirements

Prerequisites: 2 credits in category I below and one course in category II below.

Prerequisites count toward the 40 credits fulfilling the major.

The major: 40 credits (toward which the prerequisites for the major count) are required of all students majoring in dance as follows.

I. 6 credits: six 1-credit movement courses chosen from Dance Technique (DANCE 1200, 2200, 2210, 2220, 2240, 3210, 3220, 4210, and 4220), Explorations (DANCE 2410, 3410), Improvisation (DANCE 2480), Indian Dance (1320), World Dance Techniques (1300), and other courses approved by the dance faculty. The 6 credits must include at least 2 from Dance Technique courses, and at least 2 from Explorations and Improvisation courses. Any two of these courses taken to satisfy the university's Physical Education requirement may be counted toward the major, thus decreasing the number of academic credits possibly as low as 38. Movement courses taken for 0 academic credits do not count toward the major.

II. 14 credits: Dance composition (DANCE 2500 and 3500) and history/theory (DANCE 3141 and 4690 or other 4-credit, 4000-level DANCE seminar course).

III. 2 credits: 1 credit of performance (DANCE 1250) and 1 credit of production (DANCE 1610, 1630, 2610, or 2630).

IV. 18 credits: selected from Dance and related fields, including: at most two additional 1-credit movement courses beyond those required in category I; at most 4 credits in DANCE 1250, 1610, 1630, 2610, 2630, and 3240 beyond those required in category III; and at most two courses outside of Dance, which may include courses on sound, music, light, world movement forms, design, performance and visual studies, and must be approved by the dance faculty. Otherwise any Dance courses may be used to satisfy category IV.

In all classes used for the dance major, a grade of C (not C-) must be achieved.

Dance Minor

The Dance Minor is open to any student in the university, including those outside the College of Arts and Sciences, with the approval of the Director of Undergraduate Studies.

1. DANCE 2500 Beginning Composition (3 credits).

2. DANCE 3141 History (4 credits).

3. Other DANCE courses totaling a minimum of 11 credits.

In all courses used for the Dance Minor that offer letter grades, a grade of C (not C-) must be achieved. Courses in which this minimum is not achieved must be repeated if the student is to receive credit in the Minor. For additional information please go to 223 Schwartz Center.

Computing in the Arts Undergraduate Minor

A minor in Computing in the Arts with an emphasis on dance is available both to dance majors and to students majoring in other subjects. For more information, see "Computing in the Arts Undergraduate Minor" under "Departments, Programs and Courses" in the "College of Arts and Sciences," or contact the Director of Undergraduate Studies in Dance, danceprogram@cornell.edu. Information is also online at www.cis.cornell.edu/ComputingArts.

Theatre, Film and Dance Summer Study in Rome and/or Paris/Dublin

Many of the dance courses are also offered during a summer program in Rome, Paris, and Dublin. For more information see www.arts.cornell.edu/theatrearts/academics/dance/roma2.pdf, or contact the program director, Byron Suber, at pbs60@cornell.edu.

Dance Technique

Students may register for any Western dance technique course (DANCE 1200, 2200, 2210, 2220, 2240, 3210, 3220, 4210, and 4220) for 1 academic credit, with a limit of 6 credits total above. All these courses may be repeated for credit, and students will usually be placed in a given course for at least two semesters.

Dance Improvisation (DANCE 2480), Explorations in Movement and Performance (DANCE 2410), World Dance Techniques (DANCE 1300), and Indian Dance (DANCE 1320) may be taken for 1 academic credit, which does not count as part of the 2 credit per semester and 16 credits total limit above.

Students also have the option to receive physical education (PE) credit for most of the courses above to satisfy the university’s physical education requirement. Students may not get Dance and PE credit simultaneously for the same course.

The courses Dance Technique I (DANCE 1200), World Dance Technique (DANCE 1300), Dance Improvisation (DANCE 2480), and Explorations in Movement and Performance (DANCE 2410) are introductory courses open to all students. Students registering in Dance may pre-enroll, enroll online, or sign up with the Department of Theatre, Film, and Dance registrar in 223 Schwartz Center before the end of the add period; they will need a drop/add slip. Students registering in PE may pre-enroll, or add during the one- or two-day PE run-out period.
registration before the first day of classes; afterward, registration is not allowed.

The nonintroductory dance technique courses (DANCE 2200, 2210, 2220, 2240, 3210, 3220, 4210, and 4220) allow online preenrollment and online enrollment, but the instructor will ultimately use his or her own discretion to determine the right classes for a student to attend. All students, and new students in particular, should be prepared for the possibility of being asked to switch courses during the first few weeks of the semester.

The advanced dance technique courses (DANCE 2240, 3210, 3220, 4210, and 4220) may be taken with an additional 1-credit academic component, Writing Dance Criticism (DANCE 3240). Students may also receive credit for performing by being cast in a faculty-choreographed dance (DANCE 1250). Any two 1-credit dance courses may be aggregated to count as one-half course for the purpose of satisfying the College of Arts and Sciences 34-course requirement. They do not satisfy a distribution requirement.

DANCE 1200 Dance Technique I (also PE 1183)
Fall and spring. 0 to 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S–U grades only. Fall, J. Kovar; spring, J. Chu.

Entry-level class. Covers the fundamentals of elementary dance training. Movement sequences focusing on rhythm, placement, and vitality of performance through an anatomically sound dance technique.

DANCE 1250 Dance Rehearsal and Performance
Fall, spring, and summer. 1 credit. Students must register for course in semester in which credit is earned; requests for retroactive credit are not honored. Prerequisite: students cast in faculty-choreographed dances. Students may add this course only after they have been assigned roles. S–U grades only. Faculty. Includes the study, development, and performance of roles in departmental dance productions.

DANCE 1320 Indian Classical Dance (also PE 1190)
Fall. 1 credit. D. Bor.
For description, see PE 1190.

DANCE 2200 Dance Technique II (also PE 1181)
Spring. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S–U grades only. J. Self.

Introductory dance technique intended for students with some dance training. Material covered includes attention to rhythm, design, and movement expression.

DANCE 2210 Dance Technique II/Classical (also PE 1182)
Spring. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S–U grades only. B. Suber.

Introductory Western classical technique intended for students with some dance training. Includes basic barre and centre work focusing on presence and presentation.

DANCE 2220 Dance Technique II/Modern (also PE 1183)
Fall, summer. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S–U grades only. J. Morgenroth.

Introductory modern technique intended for students with some dance training. Material covered includes specific spinal and center work with attention to rhythm, design, and movement expression.

DANCE 2240 Dance Technique Workshop (also PE 1188, VISST 2540)
Spring and summer. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. Beginners and those with prior dance experience are welcome. Requirements include attendance at performances with written responses. S–U grades only. Spring: sec 1, J. Self; sec 2, J. Kovar; summer, B. Suber.

Get comfortable with classic and contemporary dance moves, feel more at ease when out with friends, and loosen up those hips and legs. Dance to the most current pop and club music and have a great time earning 1 credit. No experience necessary.

Topic for spring 2011, sec 2: Dancing to Music
Music produces a kind of pleasure that human nature cannot do without. This course will take a journey through movement using music as its driving force. The rhythms of International, Trance, didgeridoo, percussion, and other World Music, both traditional and recorded, will be used to create receptivity to the flow of energy within the body and to channel it into movement. Explorations will include structured improvisation, solo and partner work, and group choreography, as well as movement games inspired by modern dance and Tai Chi.
Beginners and those with prior dance experience are welcome.

DANCE 2410 Explorations in Movement and Performance (also PE 1191)
Fall. 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S–U grades only. J. Self.

A physically demanding exploration into various movement realms. Specific subjects covered are gendered movement, erotic power, spiritual power, ritual, and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagerness to investigate the nature of performance and explore unfamiliar territory in movement.

DANCE 2430 Hip-Hop, Hollywood, and Home Movies: Exploring Movement and Media (also VISST 2430) (LA-AS)
Fall and summer. 3 credits. Permission of instructor. Attendance at performances with written responses, selected readings, and home-movie production. Letter grades. Letter grades. J. Self.
This course is a laboratory for generating and exploring contemporary dance forms. Monday sessions are devoted to viewing media and discussion. We will be looking at early B-boy films, recent dance-at-battle documentaries, classic dance clips from Hollywood films, and other related pieces (Black Dance, Show Dance, Art Dance). Wednesday is a laboratory for trying out movements and creating simple dance/music videos (home-movies). This course will be of special value for choreographers using popular dance forms and those interested in the history of popular culture. Everyone must be willing and able to improvise dance moves, teach classmates and exchange movement ideas.

DANCE 2450 Public Voice and Civic Gesture (also THETR 2360)
Fall and summer. 1 credit. Next offered 2011–2012. B. Suber.
This course combines acting and movement techniques encouraging process-oriented work.

DANCE 2480 Dance Improvisation
Fall and summer. 1 credit; may be repeated. Limited to 12 students. Attendance at dance concerts required. S–U grades only. A. Fogelsanger.
The training and practice of skills for the spontaneous collaborative composition of movement performance. Students hone their abilities to invent and respond to each other and their environment to produce dances that engage their audience. This course coaxes inspiration, seeking to make it reliable and to keep it surprising. It offers the possibility of ‘training’ one’s movement instincts to respond relevantly and with spontaneity.

DANCE 3210 Dance Technique III/Classical (also PE 1184)
Fall, spring, and summer. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S–U grades only. B. Suber.
Intermediate Western classical technique. Work is done on strengthening the body through a movement technique emphasizing presence and musicality based on harmonic muscular control.

DANCE 3220 Dance Technique III/Modern (also PE 1185)
Fall, spring, and summer. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S–U grades only. Fall, J. Chu; spring, J. Morgenroth; summer, B. Suber.
Intermediate modern technique focusing on rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students are challenged by complex phrases and musicality.

DANCE 3340 Writing Dance Criticism
Fall and spring. 1 credit; may be repeated. Corequisite: DANCE 2240, 3210, 3220, 4210, or 4220. Attendance at two or three concerts required. Fall, J. Chu, B. Suber, or J. Self; spring, J. Self, B. Suber, J. Morgenroth, J. Chu, or J. Kovar.
Dance criticism for incorporation with technique. Topics rotate depending on instructor, class focus, and relevance to guest dance companies. Attendance at two or three concerts required (same theme, technique), additional readings and/or viewing of recorded performances as assigned by instructor, and three five- to seven-page analytic papers.

DANCE 3350 Repertory
Reconstructs a dance by an important modern dance choreographer. Through a close examination of the composition process, and with readings, the course studies the historical and aesthetic role of this work and its continued influence today.

[DANCE 3410 Explorations in Movement and Performance II: Masculine, Feminine, or Neutral] Spring. 1 credit. Limited to 16 students. Prerequisite: DANCE 2410, 2480, or permission of instructor. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. Next offered 2011–2012. J. Self.

Continues themes from Explorations in Movement and Performance (DANCE 2410), with special emphasis on the differences and similarities between "masculine" or "feminine" expressions in movement and performance.

DANCE 4210 Dance Technique IV/Classical (also PE 1186, VISST 4210) Fall and spring. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. B. Suber.

Advanced and pre-professional Western classical. A continuation of and supplementation to DANCE 3210.

DANCE 4220 Dance Technique IV/Modern (also PE 1187, VISST 4220) Fall and spring. 1 credit; may be repeated. Satisfies PE requirement if taken as PE. Attendance at dance concerts required. S-U grades only. J. Self; spring, J. Chu.

Advanced and pre-professional Modern technique. A continuation of and supplementation to DANCE 3220.

DANCE 4290 Dance Technique in New York City Fall and spring. 1–2 credits. Students take DANCE 4290 during the semester they participate in the Urban Semester Program offered by the College of Human Ecology, and in addition to the 15 credits taken for that program, S-U grades only. Dance faculty.

Allows a student to receive up to 2 credits for taking professional dance technique courses while in residence in New York City. The semester before participating in the Urban Semester Program, the student writes a proposal under the guidance of a member of the dance faculty detailing the dance classes, dance teachers, and dance institutions which the student plans to include in a regular program of dance technique. While the proposal may be revised during the semester in residence in New York, the dance faculty advisor must approve any changes. Credit will not be given retroactively.

[DANCE 4399 Early Dance (also MUSIC 4511)] Fall. 1 credit. R. Next offered 2012–2013. Harris-Warrick.

For description, see MUSIC 4511.

Dance Composition

DANCE 2500 Beginning Dance Composition (also VISST 2511) (LA-AS) Fall, spring, and summer. 3 credits. Attendance at dance concerts required. Fall: J. Morgenroth; spring: J. Chu; summer: B. Suber or J. Kovar.

Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through class improvisations. Informal showing at end of semester. Includes informal showing of work.

DANCE 3500 Intermediate Dance Composition I (LA-AS) Fall, spring, and summer. 3 credits. Prerequisite: DANCE 2500. Fall: J. Morgenroth; spring: J. Chu; summer: B. Suber or J. Kovar.

Intermediate choreographic projects are critiqued in progress by faculty and peers. Consideration of design problems in costing and staging. For full description, see DANCE 2500.

DANCE 3510 Intermediate Dance Composition II (LA-AS) Fall, spring, and summer. 3 credits. Prerequisite: DANCE 3500. Co- or prerequisite: DANCE 3530. Attendance at dance concerts required. Fall: J. Morgenroth; spring: J. Chu; summer: B. Suber or J. Kovar.

Continuation of DANCE 3500. For full description, see DANCE 2500.

DANCE 3530 Music and Choreography (also MUSIC 3513) (LA-AS) Fall. 3 credits. Attendance at dance concerts and music concerts required. A. Fogelsanger.

Intended to expose students to music they probably have not heard and are unlikely to seek out on their own, particularly contemporary "classical" music and music used in modern concert dance; to mark out the possible relationships between music and dance when combined in concert; and to pull apart the compositional construction of musical pieces to consider what musical structuring ideas might be profitably applied by choreographers to making dances. The course also considers examples from film and the plastic arts, provides students with some experience making sound and movement, and includes discussion of and writing about concerts, and audio and video recordings. Reading topics include: "classicism" and aesthetics of dance, music, and the arts in general, in particular concentrating on counterpoint, minimalism, improvisation, and polyrhythm.

DANCE 4010 Senior Project in Dance Fall and spring. 3 credits; students receive grade when DANCE 4020 is completed. Prerequisite: DANCE 3510; senior dance majors. NOTE: This course is being phased out and replaced by DANCE 4011 Advanced Project in Dance.

Open only to students graduating by May 2010.

First of a two-semester sequence (the second is DANCE 4020) for senior dance majors. Students create a project in choreography and performance, dance, film or video, dance pedagogy, or other appropriate area agreed on with their senior project advisor and committee. In addition, there is a 15-page paper that expands their work into a historical, theoretical, or aesthetic context. For guidelines see the director of undergraduate studies in dance.

DANCE 4011 Advanced Project in Dance Fall and spring. 4–6 credits, variable. Students create a dance project. Possibilities include a choreographic project for performance/presentation, community performance with specific work, interdisciplinary collaboration, community teaching, conference organizing, or other proposals. The student chooses a project advisor, who need not be the student’s academic advisor. A proposal is due April 1 if the project will take place in the fall and due November 1 if the project will take place in the spring.

DANCE 4020 Senior Project in Dance II Fall or spring. 3 credits. Prerequisite: DANCE 4010. NOTE: This course is being phased out and replaced by DANCE 4011 Advanced Project in Dance. Open only to students graduating by May 2010.

Second of a two-semester sequence (the first is DANCE 4010) for senior dance majors.

DANCE 4500 Advanced Dance Composition I (LA-AS) Fall, spring, and summer. 3 credits. Prerequisite: DANCE 3510. Attendance at dance concerts required. Fall: J. Morgenroth; spring: J. Chu; summer: B. Suber or J. Kovar.

Students work on advanced choreographic problems, to be presented in performance. Work in progress is critiqued by faculty members on a regular basis. For full description, see DANCE 2500.

DANCE 4510 Advanced Dance Composition II (LA-AS) Fall, spring, and summer. 3 credits. Prerequisite: DANCE 4500. Attendance at dance concerts required. Fall: B. Suber; spring: J. Self; summer: B. Suber or J. Kovar.

Continuation of DANCE 4500. For full description, see DANCE 2500.

History, Criticism, and Theory

DANCE 3120 The Moving Body: Form and Function (PBS supplementary list) Fall. 4 credits. J. Morgenroth.

Examines the bodily systems involved in human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology, and kinesiology.

DANCE 3141 History: The Body in Performance (LA-AS) Fall. 4 credits. Prerequisites: readings, viewing of videos, and attendance at live performances. Letter grades only. J. Chu.

How does the social production of dance reflect its historical context? What is the meaning of the "beautiful" in dance? Beginning with 16th-century court dances, we will explore how aesthetics have been aligned both with and against politics in various periods and genres of the performing body, looking at dance as insiders’ diplomacy and outsiders’ rebellion. Is postmodern dance a discourse of its past? What is the contemporary relationship among African, European, and stubbornly American traditions? This course is designed to promote a critical appreciation of dance, its values and its ambitions, by developing an historical and cultural understanding.

DANCE 3730 Special Topics in Dance Research Spring. 3 credits. J. Self.

A project-based research course focusing on an intensive study of a specific choreographer, period, or form of dance. Topics, prerequisites, and formats will vary from year to year.

Topic for 2011: Archiving Hip Hop Dance Students collaborate on a project documenting dance moves from the Hip Hop vocabulary and creating a database that will be available to researchers and scholars through the Cornell
DANCE 2550 Technology and the Moving Body I (LA-AS)
Fall. 4 credits. B. Suber.
Formally titled "technosomatikingesis," this class works to expand the specific aesthetics. Included in the process is the analysis of built environments that both inspire and are designed to be inhabited by these disciplines. This studio course explores the resulting neo-performance forms being created within the range of digital media processing such as gallery installations, dance-theatre, personal interactive media (games and digital art) and web projects. Computer-imaging and sound-production programs are examined and used in the class project [human form-animation software [Life Forms], vocal recording and digital editing [Protocols and Hyperpencil], digital-imaging tools [Photoshop, Final Cut Pro, Flash, Dreamweaver, and Director]. The new control of digital performance raises questions concerning the use of traditional lighting, set, costume, and sound-design techniques that are examined as they are repositioned by digital-translation tools with the results of re-inscribing experimental and/or conceptual multimedia performance and/or installation work. Theoretical texts on dance and theatrical performance, film studies, the dynamic social body, architecture, and digital technology are used to support conceptual creative work.

DANCE 3250 Music, Dance, and Light (also THETR 3190, VISST 3519) (LA-AS)
Spring. 3 credits. Attendance at dance concerts and music concerts required. E. Intemann and A. Fogelsanger.
Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of these design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes are devoted to creating sound, movement, and lighting.

DANCE 4377 Ritual Puppetry in a Global Context (also ASIAN/RELST 4444) @ 8 (CA-AS)
Fall. 4 credits. J. M. Law.
For description, see ASIAN 4444.

DANCE 4550 Techno Soma Kinesics II: Repositioning the Performing Body in Space through the Lenses of Digital Media (LA-AS)
Spring. 4 credits. B. Suber.
Continuation of DANCE 3550. DANCE 4550 expands on principles using more complex and interactive software using MAX/MSP and Jitter, Director, DVD Studio Pro, and Dreamweaver.

DANCE 4555 Transpositioning the Body II
Fall and spring. 2 credits. B. Suber.
Intended for advanced students, this course continues the work done in Transpositioning the Body I. At an advanced level, this course will further explore the choreographic and design principles of contemporary choreographer, William Forsythe, who begins his tenure as an A.D. White Professor-at-Large in 2010. The course will begin by using tools developed by Forsythe in his CD ROM Improvisation Technologies and will continue to be structured through student and faculty consultation with Mr. Forsythe in his visits to Cornell. The long-term goal is to establish curriculum that can continue Forsythe's absence fostering new performance and installation work based on Forsythe's work.
philosophies in his various fields of interests and how they relate to concert dance. Collaborations between fields such as dance, architecture, engineering and other design fields will be cultivated.

DANCE 4848 Communities in Multicultural Practice (also HE 4800)
Fall and spring. 6 credits. S. Beck. This course is the same as HE 4800 but the DANCE number is for DANCE students from the Department of Theatre, Film and Dance who wish to participate in the Urban Semester Program, or for other students in the College of Arts and Sciences who wish to receive credit within the college. Students from DANCE will, whenever possible, have their community service assignments within appropriate dance organizations or activities. For these purposes, the instructor will be assisted by various DANCE faculty and alumni.

DANCE 4849 Multicultural Practice (also HE 4900)
Fall and spring. 6 credits. S. Beck. This course is the same as HE 4900 but the DANCE number is for DANCE students from the Department of Theatre, Film and Dance who wish to participate in the Urban Semester Program, or for other students in the College of Arts and Sciences who wish to receive credit within the college. Students from DANCE will, whenever possible, have their internship assignments within appropriate dance organizations or activities. For these purposes, the instructor will be assisted by various DANCE faculty and alumni.

Production

DANCE 1610 Dance Production Laboratory I
Fall and spring. 1–3 credits; may be repeated for credit. Prerequisite: permission of instructor. No experience required. Orientation meeting at 7:30 p.m. first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard.

DANCE 1620 Dance Stage Management Production Laboratory I
Fall and spring. 1–2 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 p.m. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

DANCE 2620 Dance Production Laboratory II
Fall and spring. 1–3 credits; may be repeated for credit. Prerequisite: permission of instructor. Orientation meeting at 7:30 p.m. on first Tuesday of classes each semester in Kiplinger Theatre at Schwartz Center. P. Lillard, D. Hall, F. Sellers, and R. MacPike.

DANCE 2630 Dance Stage Management Laboratory II
Fall and spring. 1–4 credits; may be repeated for credit. Before registering, students must attend orientation meeting at 7:30 p.m. in Kiplinger Theatre at Schwartz Center on first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard. Practical experience in theatrical production as assistant stage manager for the dance mainstage concert under the supervision of the faculty production manager. THETR 3700 complements this course.

DANCE 2660 Lighting Design Studio I (also THETR/VISST 3620) (LA-AS)
Fall. 4 credits. E. Intemann. For description, see THETR 3620.

DANCE 3680 Sound Design and Digital Audio (also MUSIC 3431, THETR 3680) (LA-AS)
Fall and spring. 3 credits. W. Cross. For description, see THETR 3680.

DANCE 4660 Lighting Design Studio II (also THETR 4620, VISST 4563) (LA-AS)
Spring. 4 credits. C. Intemann. For description, see THETR 4620.

Independent Study, Internships, and Honors

DANCE 3000 Independent Study
Summer, fall, or spring. 1–4 credits. Independent study in the dance allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study, which is available in 223 Schwartz Center.

DANCE 4050 Honors Research Tutorial I
Fall or spring. 4 credits. Prerequisite: honors students in dance.

DANCE 4060 Honors Research Tutorial II
Fall or spring. 4 credits. Prerequisite: honors students in dance.

DANCE 4850 Undergraduate Internship
Fall, spring, or summer. 1–3 credits. To be eligible to enroll and receive credit for an internship, students must be majors in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice before pre-registration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

Tracks toward admission into the advanced undergraduate theatre program

Design, Technology, and Stage Management
Recommended for individuals interested in a Design, Technology, or Stage Management track.

THETR 2500 Fundamentals of Theatre Design and Technology
THETR 1510 and 2510 Production Lab I and II (at least 1 credit of each)
Recommended for Scenic Design emphasis:

THETR 3400 Theatrical Drafting and Technical Drawing Studio

THETR 3510 Production Lab III (as design assistant)

THETR 3540 Stagecraft Studio

THETR 3640 Scene Design Studio

Upon admission to the program:

THETR 4510 Production Lab IV (at least 1 credit)
Recommended for Lighting Design or costume shop management emphasis:

THETR 3510 Production Lab III (as design assistant)

THETR 3560 Costume Construction Studio

THETR 3600 Costume Design Studio I

THETR 3710 Costume Design Studio II

Upon admission to the program:

THETR 4510 Production Lab IV (at least 1 credit)
Recommended for Sound Design emphasis:

THETR 2510 Production Lab II (as student sound technician)

THETR 2520 Technical Production Studio I

THETR 3510 Production Lab III (as design assistant)

THETR 3660 Sound Design Studio

Upon admission to the program:

THETR 4510 Production Lab IV (at least 1 credit)
Recommended for Technical Direction emphasis:

THETR 2520 Technical Production Studio I

THETR 2560 Technical Production Studio II

THETR 3400 Theatrical Drafting and Technical Drawing Studio

THETR 3510 Production Lab III (as assistant technical director)

THETR 3540 Stagecraft Studio

Upon admission to the program:

THETR 4510 Production Lab IV (at least 1 credit)
Recommended for Stage Management emphasis:

THETR 2550 or 3530 Stage Management Lab II or III—two assignments

THETR 2800 Introduction to Acting

THETR 3700 Stage Management Studio

THETR 3990 Fundamentals of Directing I

Upon admission to the program:

THETR 4530 Stage Management Lab IV
Directing
Recommended for individuals interested in a directing track:
THETR 1510 and THETR 2510 Production Lab I and II (at least 2 combined credits)
THETR 2400/THETR 2410 Introduction to Western Theatre (one semester only)
THETR 2500 Fundamentals of Design and Technology
THETR 2800 Introduction to Acting
THETR 3980 Directing I
THETR 4980 Directing II

Playwriting
Recommended for individuals interested in a playwriting track:
THETR 2400/2410 Introduction to Western Theatre (one semester only)
THETR 2500 Fundamentals of Design and Technology
THETR 2800 Introduction to Acting
THETR 3480 Playwriting
THETR 3490 Advanced Playwriting

Students in the advanced undergraduate theatre program may also elect to take FILM 4850 (Undergraduate Internship) in addition to or in place of one production assignment.

Interdisciplinary Graduate Concentration
The concentration in visual studies is not meant to substitute for disciplinary training, which will not be waived by the addition of interdisciplinary courses. The "Course List in Visual Studies for 2010–2011" alerts incoming students to courses that may be relevant to their interests, and aids them in discovering the network of professors working in visual studies, spanning multiple departments and schools at Cornell.

VISIST 1101 Design Studio I (also DEA 1010)
Fall. 3 credits. J. Elliott. For description, see DEA 1010.

VISIST 2000 Introduction to Visual Studies (also ARTH/COML 2000, ENGL 2920) (LA-AS)
Spring. 4 credits. Requirement for undergraduate concentrators.
M. Fernandez.
Provides a broad introduction of modes of vision and the historical impact of visual images, visual structures, and visual space on culture, communication, and politics. The question of "how we see" is discussed in terms of (1) procedures of sight (from optical machines to the psychology of vision and the philosophy of aesthetics); (2) spaces of vision (from landscapes to maps to cities); (3) objects of vision (from sacred sites to illuminated books to digital art); and (4) performances of vision (race, sexualities, ethnicities, cultures). Of importance to the course is the practical and conceptual relation of 20th-century visual technologies (photography, cinema, video, and computing) to their historical corollaries in the arts. The course draws on the visual traditions of both Western and non-Western societies and study texts that have defined the premises and analytic vocabularies of the visual. Through viewings, screenings, collaborative writing, and art projects, students develop the critical skills necessary to appreciate how the approaches that define visual studies complicate traditional models of defining and analyzing art objects. Guest lecturers occasionally address the class. Requirements: two objective midterm exams; occasional labs; two five-page papers.

VISIST 2160 Television (also AMST/ENGL/FGS/FILM/THETR 2160) (LA-AS)
Fall. 4 credits. N. Salvato.
For description, see THETR 2160.

VISIST 2174/5174 Introduction to Film Analysis: Meaning and Value (also FILM 2740/6740) (LA-AS)
Fall. 4 credits. Limited to 40 students. Graduate students should enroll in FILM 6740. D. Fredericksen.
For description, see FILM 2740.

VISIST 2190 Thinking Surrealism (also ARTH 2019, COML 2200) (LA-AS)
Fall. 4 credits. B. Maxwell.
For description, see COML 2200.

VISIST 2300 Survey of American Film (also AMST/FILM 2760) (LA-AS)

VISIST 2360 Public Voice and Civic Gesture (also DANCE 2450, THETR 2360)
Fall. 1 credit. Next offered 2011–2012.
For description, see DANCE 2450.

VISIST 2430 Hip Hop Hollywood (also DANCE 2430) (LA-AS)
Fall and summer. 3 credits. J. Self.
For description, see DANCE 2430.

VISIST 2511 Beginning Dance Composition (also DANCE 2500) (LA-AS)
Fall, spring, and summer. 3 credits.
For description, see DANCE 2500.

VISIST 2530 Explorations in Movement and Performance (also DANCE 2410, PE 1191)
Fall. 1 credit. J. Self.
For description, see DANCE 2410.

VISIST 2540 Dance Technique Workshop (also DANCE 2240, PE 1188)
Spring and summer. 0–1 credit. S–U grades only.
For description, see DANCE 2240.

VISIST 2550 The Crime Film (also AMST/COML/FILM 2550)
Spring. 4 credits. S. Haenni.
For description, see FILM 2550.

VISIST 2595 Intro to Art History: Renaissance and Baroque (also ARTH 2400) # (HA-AS)
Fall. 4 credits. Each student must enroll in a sec. C. Lazzaro.
For description, see ARTH 2400.

VISIST 2744 Gamelan in Indonesian History and Cultures (also ASIAN 2245, MUSIC 1341) (LA-AS)
Fall and spring. 3 credits. No previous knowledge of musical notation or performance experience required. C. Miller.
For description, see MUSIC 1341.

VISIST 2765 Cinema and Migration (also AMST/FILM 2765) (CA-AS)
Fall. 4 credits. S. Haenni.
For description, see AMST 2765.

VISIST 3115 Video and New Media: Art, Theory, Politics (also COML/ENGL/FILM 3115)
Spring. 4 credits. T. Murray.
For description, see COML 3115.

VISIST 3175 History and Theory of Commercial Narrative Film (also FILM 3750) (LA-AS)
Fall. 4 credits. Fee for screening expenses: $10 (paid in class). S. Haenni.
For description, see FILM 3750.
VISST 3176 History and Theory of Documentary and Experimental Film (also FILM 3760/6760) (LA-AS)
Fall. 4 credits. Next offered 2011–2012. Fee for screen expenses: $10 (paid in class).
A. Villarreal.
For description, see FILM 3760.

VISST 3210 Ancient/Modern Corporate-Realities (also DANCE 3580, FILM ITAL 32709) (LA-AS)
Summer. 4 credits. B. Suher, J. Rhodes, and B. Mille.
For description, see DANCE 3580.

VISST 3305 Visual Perception (also PSYCH 3050)
Spring. 4 credits. Limited to 20 students.
Prerequisite: PSYCH 2050 or permission of instructor. J. Cutting.
For description, see PSYCH 3050.

VISST 3318 Literature and Media in Japan (also ASIAN 3318, COML 3150) @ (CA-AS)
Spring. 3 credits. Next offered 2011–2012.
B. deBary.

VISST 3342 Human Perception: Application to Computer Graphics, Art, and Visual Display (also COGST/PSYCH 3420, PSYCH 6420) (KCM-AS)
Fall. 3 or 4 credits. 4-credit option involves term paper. Prerequisite: PSYCH 1101 or permission of instructor. PSYCH 2050 strongly recommended. D. Field.
For description, see PSYCH 3420.

VISST 3419 Rembrandt’s Circle: Technologies of Vision (also ARTH 3419) @ (CA-AS)
Fall. 4 credits. L. Pincus.
For description, see ARTH 3419.

VISST 3443 Leonardo, Michelangelo, and Raphael (also ARTH 3440) @ (HA-AS)
C. Lazzaro.

VISST 3500 African American Art (also AMST/ARTH/ASRC 3500) (LA-AS)
Fall. 4 credits. C. Finley.
For description, see ARTH 3500.

VISST 3519 Music, Dance, and Light (also DANCE 3590, THETR 3190) (LA-AS)
Spring. 3 credits. Next offered 2011–2012.
E. Intemann and A. Fogelsanger.
For description, see DANCE 3590.

VISST 3560 Computing Cultures (also COMM 3560, INFO/STS 3561) (CA-AS)
Spring. 4 credits. R. Prentice.
For description, see STS 3561.

VISST 3620 Lighting Design Studio I (also DANCE 3660, THETR 3620) (LA-AS)
Fall. 4 credits. E. Intemann.
For description, see THETR 3620.

VISST 3645 American Film Melodrama (also AMST/ENGL/FILM 3440, FGSS 3450) (LA-AS)
Spring. 3 credits. Next offered 2011–2012.
S. Haenni.

VISST 3650 History and Theory of Digital Art (also ARTH 3650, INFO 3660) (CA-AS)
Fall. 4 credits. Next offered 2011–2012.
M. Fernandez.
For description, see ARTH 3650.

VISST 3655 The House and the World: Architecture of Asia (also ARTH 3855, ASIAN 3394) @ (HA-AS)
Fall. 4 credits. K. McGowan.
For description, see ARTH 3855.

VISST 3662 Impressionism in Society (also ARTH 3760) @ (CA-AS)
Spring. 4 credits. Not open to freshmen.

VISST 3672 The Art of the Historical Avant-Garde (also ARTH 3672, COML 3840, GERST/ROMS 3770) (LA-AS)
P. McBride.
For description, see GERST 3770.

VISST 3696 Arts of Southeast Asia (also ARTH 3850, ASIAN 3350) @ (CA-AS)
Spring. 4 credits. K. McGowan.
For description, see ARTH 3850.

VISST 3735 Performative Modernism (also ENGL/THETR 3350) (LA-AS)
Fall. 4 credits. Next offered 2011–2012.
N. Salvalto.

VISST 3740 Painting 19th-Century America (also AMST/ARTH 3740) @ (CA-AS)
Fall. 4 credits. Next offered 2011–2012.
L. Meixner.

VISST 3758 Technology and the Moving Body I (also DANCE 3550/4550, VISST 4758) (LA-AS)
Fall. 5 credits. P. Suher.
For description, see DANCE 3550.

VISST 3798 Fundamentals of Directing I (also THETR 3980) (LA-AS)
Fall. 3 credits. Limited to 30 students.
Prerequisite: permission of instructor. Special consideration given to students who have completed THEIR 2800 or intend to continue in area of stage or screen directing. Students should see instructor one year in advance to sign up for course. D. Feldshuh.
For description, see THETR 3980.

VISST 3812 Edge Cities: Celluloid New York and Los Angeles (also AMST/ARTH 3812) (CA-AS)
Spring. 3 credits. S. Haenni and M. Woods.
For description, see AMST 3812.

VISST 3850 Commedia: A Contemporization of Physical Acting Styles and the Comic Approach (also THETR 3840) (LA-AS)
Spring. 4 credits. B. Milles.
For description, see THETR 3840.

VISST 3851 Partition/Fiction and Film (also ASIAN 3389, COML 3850) @ (HA-AS)
Fall. 4 credits. Next offered 2011–2012.
A. Banerjee.

VISST 3870 Literature and Film of South Asia (also ASIAN 3387, COML 3860) @ (LA-AS)
A. Banerjee.

VISST 4144 Responsive Environments (also VISST 6144, ARTH 4144/6144) (CA-AS)
Spring. 4 credits. M. Fernandez.
For description, see ARTH 4144.

VISST 4150 Intro to Critical Theory (also VISST 6150, ARTH 4150/6150) (CA-AS)
Fall. 4 credits. M. Fernandez.
For description, see ARTH 4150.

VISST 4151 Topics in Media Arts (also VISST 6151, ARTH 4151/6151)

VISST 4155 Topics in Latin American Arts (also VISST 6155, ARTH 4155/6155)

VISST 4200 Proseminar (also ARTH 4100/6100) (HA-AS)
Spring. 4 credits. Limited enrollment.
Prerequisite: History of Art majors only.
I. Dadi.
For description, see ARTH 4100.

VISST 4210 Dance Technique IV/Classical (also DANCE 4210, PE 1186)
Fall and spring. 1 credit. May be repeated.
Satisfies PE requirement if taken as PE.
Attendance at dance concerts required. S–U grades only. J. Chu and J. Self.
For description, see DANCE 4210.

VISST 4220 Dance Technique IV/Modern (also DANCE 4220, PE 1187)
Fall and spring. 1 credit. By placement only; no pre-enrollment. Attendance at dance concerts required. J. Chu and J. Self.
For description, see DANCE 4220.

VISST 4260 Adaptation: Text(Theatrically (also THETR 4260) (LA-AS)
Spring. 4 credits. B. Milles.
For description, see THETR 4260.

VISST 4410 Chinese Film (also ASIAN 4410)
Fall. 4 credits. E. Gunn.
For description, see ASIAN 4410.

VISST 4436 Topics in Indian Film (also ASIAN 4436) @ (LA-AS)
Fall. 4 credits. Next offered 2011–2012.
D. Gold.

VISST 4445 Nature, Cultural Landscape, and Gardens in Early Modern Europe (also ARTH 4445/6445, VISST 6445) Fall. 4 credits. C. Lazzaro.
For description, see ARTH 4445.

VISST 4451 Prints and Visual Culture in Early Modern Europe (also ARTH 4451/6451) @ (HA-AS)
C. Lazzaro.

VISST 4455 Text Analysis for Production: How to Get from the Text onto the Stage (also ENGL 4441, THETR 4450)
Spring. 4 credits. Limited to 15 students.
Prerequisite: THEIR 2500 or 2810 or 3890, or permission of instructor. B. Levitt.
For description, see THETR 4450.

VISST 4456 Shakespeare in (Con)text (also ENGL 4420, THETR 4460) @ (LA-AS)
Fall. 4 credits. B. Levitt.
For description, see THETR 4460.
VISST 4563 Lighting Design Studio II (also DANCE 4660, THETR 4620) (LA-AS)
Spring. 4 credits. Limited to 6 students; may be repeated for credit. Prerequisite: THETR 2500 or 3620, or permission of instructor E. Intemann.
For description, see THETR 4620.

VISST 4580 Seminar in Dance Studies (also DANCE 4080) (CA-AS)
Spring and summer. 4 credits. Limited to 15 students. Spring. J. Chu; summer, B. Suber and J. J. Smith. For description, see DANCE 4080.

VISST 4602 Buildings and Bodies: Constructing Spaces in Early Modern Art (also VISST 4602, ARTH 4602/6602)
Spring. 4 credits. L. Pincus. For description, see ARTH 4602.

VISST 4607 The Museum and the Object (also ARTH 4107) (CA-AS)
Fall. 4 credits. Not open to freshmen or sophomores without permission of instructor. All classes meet in Johnson Art Museum Study Gallery. G. Finley. For description, see ARTH 4107.

VISST 4641 Comparative Modernities (also ARTH 4690/6690, COML 4910) (CA-AS)
Fall. 4 credits. I. Dadi. For description, see ARTH 4690.

VISST 4761 Art and Social Histories (also ARTH 4761) (CA-AS)
Fall and spring. 4 credits. Permission of instructor required; auditing not permitted. Not open to freshmen. Next offered 2011–2012. L. Meixner.

VISST 4951 Photography and Decolonial Imagination (also ARTH/ASRC/HIST/SHUM 4951, COML 4067)
Spring. 4 credits. Limited to 15 students. J. Bajorek. For description, see SHUM 4951.

VISST 4955 Sensation and Indigenous Intent (also ARTH/SHUM 4955)
Spring. 4 credits. Limited to 15 students. J. Rickard. For description, see SHUM 4955.

VISST 5060 Visual Ideology (also ARTH 5060, COML 6660, GERST 6600)
Spring. 4 credits. G. Waite. For description, see GERST 6600.

VISST 6144 Responsive Environments (also VISST 4144, ARTH 4144/6144)
Spring. 4 credits. M. Fernandez. For description, see ARTH 4144.

VISST 6150 Intro to Critical Theory (also VISST 4150, ARTH 4150/6150)
Fall. 4 credits. M. Fernandez. For description, see ARTH 4150.

VISST 6151 Topics in Media Arts (also VISST 4151, ARTH 4151/6151)

VISST 6155 Topics in Latin American Art (also VISST 4155, ARTH 4155/6155)

VISST 6174 Introduction to Film Analysis (also FILM 2740/6740, VISST 2174)
Fall. 4 credits. D. Frederiksen. For description, see FILM 2740.

VISST 6341 Aesthetic of Excess: Psychophysical Approaches to Technology (also COML 6341)
Fall. 4 credits. T. Murray. For description, see COML 6341.

VISST 6445 Nature, Cultural Landscape, and Gardens in Early Modern Europe (also ARTH 4445/6445, VISST 4445)
Fall. 4 credits. C. Lazzaro. For description, see ARTH 4445.

VISST 6602 Buildings and Bodies: Constructing Spaces in Early Modern Art (also VISST 4602, ARTH 4602/6602)
Spring. 4 credits. L. Pincus. For description, see ARTH 4602.

Chignell, Andrew, Ph.D., Yale U. Asst. Prof., Philosophy
Chuck, Paul J., Ph.D., California Inst. of Technology. Prof., Chemistry and Chemical Biology
Christiansen, Morten, Ph.D., U. of Edinburgh (UK). Assoc. Prof., Psychology
Chu, Junay Ruth, B.A., U. of California, Berkeley. Sr. Lec., Theatre, Film and Dance
Cisne, John L., Ph.D., U. of Chicago. Prof., Earth and Atmospheric Sciences/INSTOC®
Claxton, Clinton Kean M., Ph.D., Johns Hopkins U. Prof., Classics
Cleland, Thomas, Ph.D., U. of California. Asst. Prof., Psychology
Coate, Stephen, Ph.D., Northwestern U. Kiplinger Professor of Economic Policy, Economics
Coates, Geoffrey, Ph.D., Stanford U. Prof., Chemistry and Chemical Biology
Cochrane, Sherman, Ph.D., Yale U. Hushih Professor of History, History
Cohen, Ira, Ph.D., U. of Chicago. Asst. Prof., Physics/LASS®
Cohen, Walter I., Ph.D., U. of California, Berkeley. Prof., Comparative Literature
Cohn, Abigail C., Ph.D., U. of California, Los Angeles. Prof., Linguistics
Colby-Hall, Alice M., Ph.D., Columbia U. Prof., Emerita, Romance Studies
Collum, David B., Ph.D., Columbia U. Prof., Chemistry and Chemical Biology
Colucci, Stephen J., Ph.D., SUNY Albany. Prof., Earth and Atmospheric Sciences
Connelly, Robert, Ph.D., U. of Michigan. Prof., Mathematics
Constable, Robert L., Ph.D., U. of Wisconsin. Prof., Computer Science
Cooke, W. Donald, Ph.D., U. of Pennsylvania. Prof., Emeritus, Chemistry and Chemical Biology
Cordes, James M., Ph.D., U. of California, San Diego. Prof., Astronomy/NAIC
Connelly, Benjamin, Ph.D., U. of Chicago. Asst. Prof., Sociology
Corpas, Duane J., Ph.D., New York U. Asst. Prof., History
Correll, Barbara, Ph.D., U. of Wisconsin. Math. Assoc., English
Corson, Dale R., Ph.D., U. of California, Berkeley. Prof., Emeritus, Physics
Cotts, Robert M., Ph.D., U. of California, Berkeley. Prof., Emeritus, Physics/LASSP*
Craib, Raymond, Ph.D., Yale U. Assoc. Prof., History
Crane, Brian R., Ph.D., Scripps Research Inst.
Cross, Warren Dennis, B.A., SUNY Stony Brook. Sr. Lec., Theatre, Film, and Dance
Cruz de Jesús, David, Ph.D., U. of Chicago. Asst. Prof., Chemistry and Chemical Biology
Darlington, Richard B., Ph.D., U. of Minnesota. Prof., History
Dadi, Iftikhar, Ph.D., Cornell U. Asst. Prof., Economics
DeGaetano, Arthur T., Ph.D., Rutgers U. Prof., Earth and Atmospheric Science
Dennis, K. Keith, Ph.D., Rice U. Prof., Mathematics
Derry, Louis A., Ph.D., Harvard U. Assoc. Prof., Earth and Atmospheric Sciences
Deyo, Timothy J., Ph.D., U. of Illinois. Prof., Psychology
Dichtel, William R., Ph.D., U. of California, Berkeley. Asst. Prof., Chemistry and Chemical Biology
Dietle, Gregory, Ph.D., North Carolina State U. Adj. Asst. Prof., Earth and Atmospheric Sciences
DiSalvo, Francis J. Jr., Ph.D., Stanford U. John A. Newman Professor of Physical Science, Chemistry and Chemical Biology
Divo, Stephanie Alison, Ph.D., Cornell U. Sr. Lec., Asian Studies
Donaldson, Laura, Ph.D., Emory U. Prof., English
Dreyer, Melanie, M.F.A., Northwestern U. Asst. Prof., Theatre, Film, and Dance
Dubreuil, Laurent, Ph.D., U. of Paris VIII (France). Math., Romance Studies/Comparative Literature
Dugan, Gerald F., Ph.D., Columbia U. Prof., Mathematics
Dunning, David, Ph.D., Stanford U. Prof., Psychology
Durrett, Richard T., Ph.D, Stanford U. Prof., Mathematics
Dynkin, Eugene B., Dr. of Sci., Moscow U. (Russia). Abram R. Bullis Professor of Mathematics
Ealick, Steven, Ph.D., U. of Oklahoma. Prof., Chemistry and Chemical Biology
Earle, Clifford J., Ph.D., Harvard U. Prof., Emeritus, Mathematics
Easley, David P., Northwestern U. Henry Scarborough Professor of Social Sciences, Economics
Edelman, Shimon, Ph.D., Weizmann Inst. of Science (Israel). Prof., Psychology
Edmondson, Locksley G., Ph.D., Queens U. (Canada). Prof., Africana Studies and Research Center
Elgert, Christian, Ph.D., U. of Wisconsin. Prof., Industrial and Labor Relations/Economics
Eklund, Matti, Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Physics/LEPP
Ellis, John, Ph.D., U. of California, Berkeley. Asst. Prof., Chemistry and Chemical Biology
Enns, Peter, Ph.D., U. of North Carolina. Asst. Prof., Government
Ernst, Kevin, D.M.A., Eastman School of Music. Asst. Prof., Music
Esman, Milton J., Ph.D., Princeton U. John Schaefer Professor of International Studies, Emeritus, Government
Evangelidis, Constantinos, Ph.D., Cornell U. President White Professor of International and Political Science, Government
Evans, Gregory S., Ph.D., Oxford U. (UK). Prof., Chemistry and Chemical Biology
Fajans, Jane, Ph.D., Stanford U. Assoc. Prof., Anthropology
Fall, Oren, Ph.D., U. of Toronto (Canada). Assoc. Prof., History
Falk, Louis, M.A., Harvard U. Sr. Lec., Economics
Fallman, Tamra, M.A., Columbia U. Lec., Romance Studies
Fan, K-Y Daisy, Ph.D, Cornell U. Lec., Computer Science
Farred, Grant A., Ph.D., Princeton U. Prof., Africana Studies and Research Center/English
Farrell, Roger H., Ph.D., U. of Illinois. Prof., Emeritus, Mathematics
Faulkner, David A., M.A., Princeton U. Sr. Lec., Knight Institute for Writing in the Disciplines/English
Fay, Robert C., Ph.D., U. of Illinois. Prof., Emeritus, Chemistry and Chemical Biology
Feeney, Timothy, D.M.A., Yale U. Lec., Music
Field, David, Ph.D., University of Illinois, Urbana-Champaign. Prof.
Feldshuh, David, Ph.D., U. of Minnesota. Prof., Theatre, Film and Dance
Ferguson, Melissa, Ph.D., New York U. Assoc. Prof., Psychology
Fernández, María, Ph.D., Columbia U. Assoc. Prof., History of Art
Field, David J., Ph.D., U. of Pennsylvania. Prof, Psychology
Fine, Gail J., Ph.D., Harvard U. Prof., Philosophy/Classics
Finlay, Barbara L., Ph.D., Massachusetts Inst. of Technology. William R. Kenan, Jr. Professor of Psychology
Finley, Cheryl, Ph.D., Yale U. Asst. Prof., History of Art
Fiskesjö, Magnus, Ph.D., U. of Chicago. Asst. Prof., Anthropology
Flanagan, Emma E., Ph.D., California Inst. of Technology. Prof., Physics/Astronomy/LEPP
Flores-Macias, Gustavo A., Ph.D., Georgetown U. Asst. Prof., Government
Fogel, Samuel L., Ph.D., Cornell U. Sr. Lec., Theatre, Film and Dance
Fontaine, Michael, Ph.D., Brown U. Asst. Prof., Classics
Foster, Nate, Ph.D., U. of Pennsylvania. Asst. Prof., Computer Science
Franch, Carl, Ph.D., Princeton U. Assoc. Prof., Physics/LASSP*
Frank, Jason, Ph.D., Johns Hopkins U. Gary S. Fais Ass. Professorship of the History of Political Thought, Government
Fredericksen, Donald L., Ph.D., U. of Iowa. Prof., Theatre, Film and Dance
Freed, Jack H., Ph.D., Columbia U. Prof., Chemistry and Chemical Biology
Fried, Debra, Ph.D., Yale U. Assoc. Prof., English
Fullbright, Robert, Ph.D., U. of Michigan. Sr. Lec., Physics
Fulton, Alice, MFA, Cornell U. Ann S. Bowers Professor of English
Furman, Nelly, Ph.D., Columbia U. Prof., Emerita, Romance Studies
Gainor, Ellen J., Ph.D., Princeton U. Prof., Theatre, Film, and Dance
Gair, James W., Ph.D., Cornell U. Emeritus, Linguistics
Galloway, Andrew, Ph.D., U. of California, Berkeley. Professor of English
Gamens, Bruce, Ph.D., Columbia U. Franz and Elisabeth Roessler Professor of Chemistry and Chemical Biology
Garcés, Maria Antonia, Ph.D., Johns Hopkins U. Assoc. Prof., Romance Studies
García, María Cristina, Ph.D., U. of Texas. Austin. Prof., History/Latino Studies
Gehrke, Johannes, Ph.D., U. of Wisconsin, Madison. Prof., Computer Science
Ghosh, Durba, Ph.D., U. of California, Berkeley. Assoc. Prof., History
Giambratina, Alan G., M.S., Cornell U. Sr. Lec., Physics
Gibbons, Lawrence K., Ph.D., U. of Chicago. Assoc. Prof., Physics/LEPP
Gilson, Eleanor J., Ph.D, Yale U. Susan Linn Sage Professor of Psychology Emeritus, Psychology
Giersch, Peter J., Ph.D., Harvard U. Prof., Astronomy/CRSR
Gilbert, Roger S., Ph.D., Yale U. Prof., English
Giggenbach, John, Ph.D., Stanford U. Assoc. Prof., German Studies
Glovich, Thomas, Ph.D., Stanford U. Prof., Psychology
Ginet, Carl A., Ph.D., Cornell U. Prof., Emeritus, Philosophy
Ginsberg, Paul, Ph.D., Cornell U. Prof., Physics/CIS
Isen, Alice M., Ph.D., Stanford U., Prof., Johnson Graduate School of Management/Psychology
Jagacinski, Ngampit, Ph.D., Ohio State U. Sr. Lec., Asian Studies
James, Doug L., Ph.D., U. of British Columbia (Canada). Assoc., Professor, Computer Science
Janowitz, Phyllis, M.F.A., U. of Massachusetts. Prof., Emerita, English
Joachims, Thorsten, Ph.D., U. of Dortmund (Germany). Assoc., Professor, Computer Science
John, James J., Ph.D., U. of Notre Dame. Professor Emeritus, History
Johnston, Robert E., Ph.D., Rockefeller U. Prof., Psychology
Johnson, Timothy W., D.M.A., Eastman School of Music. Asst. Prof., Music
Jones, Wendy, Ph.D., Cornell U. Sr. Lec., English
Jones-Correa, Michael, Ph.D., Princeton U. Prof.
Jordt, Kurt, Ph.D., Columbia U. Asst. Prof., Anthropology
Jordan, Teresa E., Ph.D., Stanford U. Prof., Earth and Atmospheric Sciences/INSTOC®
Kahn, Alfred, Ph.D., Yale U. Robert Julius Thorne Professor of Political Economy Emeritus, Economics
Kahn, Peter J., Ph.D., Princeton U. Prof., Mathematics
Kallas, Rayna, Ph.D., U. of Pennsylvania. Assoc. Prof., English
Kammer, Michael G., Ph.D., Harvard U. Newton C. Farr Professor Emeritus of American History and Culture, History
Kanbur, Ravi, Ph.D., Oxford U. (UK). T. H. Lee Professor, Economics, Economics
Kanematsu, Janice, Ph.D., U. of California, Berkeley. Asst. Prof., Asian Studies
Kaplan, Steven L., Ph.D., Yale U. Goldwin Smith Professor of History Emeritus, History
Karg, Daniel E., Ph.D., U. of California, San Diego. Prof. Emeritus, Earth and Atmospheric Sciences
Kaske, Carol V., Ph.D., Johns Hopkins U. Prof. Emerita, English
Kawasaky, John, Ph.D. Yale U. Asst. Prof., Mathematics
Katzenstein, Mary F., Ph.D., Massachusetts Inst. of Technology. Stephen and Evelyn Milman Professor of American Studies, Government
Katzenstein, Peter J., Ph.D., Harvard U. Walter S. Carpenter, Jr. Professor of International Studies, Government
Kay, Robert W., Ph.D., Columbia U. Prof., Earth and Atmospheric Sciences/INSTOC®
Keller, Patricia, Ph.D., U Michigan. Asst. Prof. Romance Studies
Kelley, Michael C., Ph.D., U. of California, Berkeley. Prof., Earth and Atmospheric Sciences/Electro and Computer Engineering
Kellock, Judith, M.M., Boston U. Assoc. Prof., Music
Kendall, William J., Ph.D., Yale U. Prof., Comparative Literature
Kesten, Harry, Ph.D., Cornell U. Goldwin Smith Prof. Emeritus, Mathematics
Kiefer, Nicholas M., Ph.D., Princeton U. Ta-Chung Liu Prof. of Economics
Kim, Chris Y., M.M., U. of Michigan, Ann Arbor. Asst. Prof. Music
Kim, Eun-Ah, Ph.D., U. of Illinois. Asst. Prof., Physics/LASSP
Kinoshita, Tochiro, Ph.D., Tokyo U. (Japan). Goldwin Smith Professor of Physics Emeritus/LEPP®
Kirshner, Jonathan, Ph.D., Princeton U. Prof., Government
Klein, Richard J., Ph.D., Yale U. Prof., Romance Languages
Kleinberg, Jon, Ph.D., Massachusetts Inst. of Technology. Tisch University Professor of Computer Science
Kleinberg, Robert, Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Computer Science
Kline, Ronald, Ph.D., U. of Wisconsin. Sue G. and Harry E. Boyav Jr. Professor of History and Ethics of Engineering, Science and Technology
Knapp, Warren W., Ph.D., U. of Wisconsin. Prof. Emeritus, Earth and Atmospheric Sciences
Koch, Christoph, Ph.D., T. U. Vienna (Austria). Assoc. Prof., Computer Science
Koch, Michael M.F.A., Wichita State U. Sr. Lec., English
Kosch, Michelle, Ph.D., Columbia U. Assoc. Prof., Philosophy
Koschin, J. Victor, Ph.D., U. of Chicago. Prof., History
Kovar, Janice Sue, B.S., U. of Illinois. Sr. Lec., Theatre, Film and Dance
Kozien, Dexter, Ph.D., Cornell U. Joseph N. Pew Professor of Engineering/Computer Science
Kramnick, Isaac, Ph.D., Harvard U. Richard J. Bernstein Professor of Government
Krauss, Philip, Ph.D., Cornell U. Sr. Lec., Physics
Krep, Sarah, Ph.D., Georgetown U. Asst. Prof., Government
Krivitsky, Raissa, M.A., Odessa U. (Ukraine). Sr. Lec., Russian Studies
Krumhansl, Carol L., Ph.D., Stanford U. Prof., Psychology
Kugler, Bert, Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Kuhn, Donald W., Ph.D., U. of Pennsylvania. Asst. Prof., Comparative Literature
Laidler, Daniel, Ph.D., U. of Wisconsin, Madison. Prof. Sociology/Policy Analysis and Management
Laepe, Matthias, Ph.D., U. Hamburg (Germany). Assoc. Prof., Physics/LEPP®
Lall, Sabina S., M.A., Virginia Tech. Sr. Lec., Theatre, Film and Dance
Langer, M. L., Ph.D., Columbia U. Asst. Prof., History
Larson, Rowena B., Ph.D., Cornell U. Asst. Prof., Earth and Atmospheric Sciences
Lasko, Peter J., Ph.D., Asst. Prof., Psychology
Leavitt, Thomas W., Ph.D., Harvard U. Prof. Emeritus, History of Art
Leciejewicz, Claudia, Ph.D., Princeton U. Prof., History of Art
LeClair, Andrea R., Ph.D., Harvard U. Prof., Physics/LEPP®
Lee, David M., Ph.D., Yale U. James Gilbert White Distinguished Professor in the Physical Sciences Emeritus, Physics/LASSP®
Lee, Lilian, Ph.D., Harvard U. Prof., Computer Science
Lee, Stephen, Ph.D., U. of Chicago. Prof., Chemistry and Chemical Biology
Lee, Richard L., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Lepage, G. Peter, Ph.D., Stanford U. Prof., History
Leuenberger, Christine A., Ph.D., U. of Konstanz (Germany). Sr. Lec., Science and Technology Studies
Levitsky, David A., Ph.D., Rutgers U. Prof., Nutritional Sciences/Psychology
Levitt, Bruce, Ph.D., U. of Michigan. Prof., Theatre, Film and Dance
Lewin, Bruce, Ph.D., U. of Pennsylvania. Assoc. Professor and Technology Studies/Communication
Lewis, Chad, Ph.D., Yale U. Asst. Prof., Chemistry and Chemical Biology
Lewis, Philip E., Ph.D., Yale U. Prof. Emeritus, Romance Studies
Lichter, Daniel, Ph.D., U. of Wisconsin, Madison. Prof. Sociology/Policy Analysis and Management
Liepe, Matthias, Ph.D., U. Hamburg (Germany). Assoc. Prof., Physics/LEPP®
Lillard, Pamela S., M.F.A., Virginia Tech. Sr. Lec., Theatre, Film and Dance
Lin, Hening, Ph.D., Columbia U. Asst. Prof., Chemistry and Chemical Biology
Liu, Joseph B.A., Harvard U. Asst Prof. Music
Lischke, Gunhild Iris, Zweites Staatsexamen, Ministry of Education, Hamburg (Germany). M.A. Cornell U. Sr. Lec., German Studies
Liu, Petrus, Ph.D., U. of California, Berkeley. Asst. Prof., Comparative Literature
Livesay, G. Roger, Ph.D., U. of Illinois. Prof. Emeritus, Mathematics
Lloyd, James P., Ph.D., U. of California, Berkeley. Asst. Prof., Astronomy/CSR®
Lobello, Susan, M.A., U. of Kansas. Sr. Lec., Romance Studies
Logevall, Fredrik, Ph.D., Yale U. Prof., History
Lohnan, Rowena B., Ph.D., California Inst. of Technology. Asst. Prof., Earth and Atmospheric Sciences
Lung, Kathleen P., Ph.D., Yale U. Prof., Romance Studies
Loos, Tamara L., Ph.D., Cornell U. Assoc. Prof., History
Lorenz, Philip, Ph.D., New York U. Asst. Prof., English
Loring, Roger F., Ph.D., Stanford U. Prof., Chemistry and Chemical Biology
Lovelace, Richard V. E., Ph.D., Cornell U. Prof., AEP/Astronomy/CSR®
Lowi, Theodore J., Ph.D., Yale U. John L. Senior Professor of American Institutions, Government
Lukas, Joanna G., Ed.M., Boston U. Sr. Lec., Romance Studies
Lurie, Alison A.B., Radcliffe Coll. Frederic J. Whiton Professor of American Literature Emerita, English
Lynch, Michael, Ph.D., U. of California, Irvine. Prof., Science and Technology Studies

</tbody>
</table>

*Exams begin Wednesday at 7:00 p.m.

†Access via Student Center (studentcenrcornell.edu)

The dates shown in this calendar are subject to change at any time by official action of Cornell University.

In this calendar, the university has scheduled classes, laboratories, and examinations on religious holidays. It is the intent of the university that students who miss those activities because of religious observances be given adequate opportunity to make up the missed work.

The Law School and College of Veterinary Medicine calendars differ in a number of ways from the university calendar. Please consult the catalogs of those colleges for details.

The courses and curricula described in this catalog, and the teaching personnel listed herein, are subject to change at any time by official action of Cornell University.

The rules and regulations stated in this catalog are for information only and in no way constitute a contract between the student and Cornell University. The university reserves the right to change any regulation or requirement at any time.

This catalog was produced by the Office of Publications and Marketing at Cornell University.
