AgNIC Project Objectives

- Preserve State History of Agriculture & Rural Life
- 1820-1945 Literature
- Analytic Records
- 927 monographs, 170 Serials
- Digitize Microfilm Documents
- Publicize Collection
USAIN AgNIC Project Team

- Systems Coordinator
- Cataloging
- Voyager System Coordinator
- Subject Specialist
- Web Designer
- Govt. Docs. Librarian
- Student Assistants
Project Approach

1. Create template for metadata and database entries
2. Load files create AGRI database
3. Test the database
4. Mount the completed database on local servers
5. Load AGRI data into AUBIECat
6. Digitize publications, add full-text catalog and database
7. Create website highlighting collections AgNIC portal
8. Create user guides of Database & OPAC Content
9. Provide end-of-project report

Piano Bench Collection

The Librarian Interface
Helps you create new collections, modify or add to existing ones, or delete collections

Administration Page
Allows you to add new users, summarizes the collections in the system, gives technical information on the Greenstone installation

About Greenstone
Tells you about the Greenstone software and the New Zealand Digital Library Project where it originated

Greenstone Documentation
Greenstone manuals

Greenstone is a suite of software for building and distributing digital library collections. It provides a new way of organizing information and publishing it on the Internet or on CD-ROM. Greenstone is produced by the New Zealand Digital Library Project at the University of Waikato, and developed and distributed in cooperation with UNESCO and the Human Info NGO. It is open-source software, available from http://greenstone.org under the terms of the GNU General Public License.
