

THE STATION NEWS

Vol. I, No. 8.

August 21, 1923.

Geneva, N.Y.

DR. THATCHER leaves Friday of this week for an extended trip thru Utah and Montana. He will return to Geneva about the 12th of September.

HAROLD G. BEATTIE, Assistant Chemist, on last Wednesday was married to Miss Marian Potter of Geneva. Mr. and Mrs. Beattie will make their home at 620 Castle Street.

ON TUESDAY LAST Prof. W. Paddock and family visited the Station. Prof. Paddock was at one time associated with Prof. Beach in horticultural work at this Station. He is now chief of the horticultural department at Ohio State University at Columbus.

HERE'S CONFIDENCE in the News Service ! The Editor of the Connecticut Station at Storrs sends in this one. He says it shows what Connecticut can do both with poultry and with the English language. A recent letter received by him reads as follows:

"Storrs Agricultural School, Storrs, Conn. Sir: if you are interested in a Chick with 4 legs, I have one. the Chick was hatched the 22nd of last month, and is living and well with the rest of the chickes. here was to see it some time ago, a reporter of the Evening Sentinel, and even took a Picture of the chick, but, never was Published of in the Paper. I think that by sending you this letter it will be put in every Newspaper of the Country and some interesting party may come here and buy the little Cick. N. B. with 2 legs walks, and with the others 2 he drags em, one is out side of the right walking leg, and the other is right in the center of both walking legs. It is an interesting thing to see, for never before any body have seen or read any thing like it. Confident that this letter will appear in the News Paper soon, remain yours, Bruno Latasse."

DR. THATCHER has been invited by Harold G. Black of the Hollywood (Calif.) High School to prepare a chapter on Why I Should Study Agriculture to appear in a volume Mr. Black is editing for use by beginners in the secondary schools of America.

FAIRFAX BROS. of Geneva have been awarded the contract for painting the Station buildings. Work has been begun on the job.

PROF. R. C. WALTON of Penn State will be in Geneva a short time, assisting Dr. Young in collecting data on his sulfur investigations.
