

THE STATION NEWS

Vol. II, No. 25.

June 18, 1924.

Geneva, N.Y.

THE MANY friends of Mr. and Mrs. Arthur Clark sympathize keenly with them in the recent death of Arthur's father.

MR. EINSET expects to sail for Norway in the near future and upon his return intends to bring his family with him. According to present plans he expects to arrive back in Geneva the latter part of July.

JUST TOO late for last week's NEWS came the word of the arrival of Dorothea Streeter. The trio of Station babies, together with their mothers, are reported to be doing splendidly.

DOCTOR G. J. HUCKER, it is now, if you please, and the NEWS takes pleasure in extending congratulations to its eminent Associate Editor.

WALTER GLOYER AND "ROBBIE" have returned from their sojourn at the College at Ithaca and will now be found in their usual haunts. Both report a profitable period of study.

MR. RAYMOND C. BENDER joined the Staff as Assistant Chemist in the Inspection Laboratory this week. Mr. Bender comes to Geneva fresh from Penn. State College of Agriculture where he just recently completed his undergraduate work. Mr. Bender fills the vacancy caused by Mr. Beattie's resignation.

ABOUT FIFTY Grange lecturers held a conference in Jordan Hall yesterday.

MR. GILLETTE, Statistician for the Department of Farms and Markets at Albany, was a visitor at the Station recently.

THE MISSES GLASGOW, Dr. Glasgow's sisters, paid a short visit to the Station today.

MISS LIDA THATCHER returned home from Ann Arbor for the summer vacation yesterday.

MR. DAHLBERG AND MR. LUCKETT spent Monday in Syracuse with Mr. Brew of the College of Agriculture and several representatives of the Department of Farms and Markets going over plans for a joint dairy exhibit of the three agencies. If present plans materialize, New York's dairy industry will receive a spectacular boost at the coming Fair, to say the least.

RUFUS MILLIE G.B.B., 3 years, 11 months of age, has achieved a remarkable record. She is the first Station cow to make 800 lbs. of butter in a year and is the highest producing animal the Station has ever owned. Millie is well on her way to qualify for the silver medal awarded by the Jersey Cattle Club to cows of her class which make certain records.

AN OPEN meeting of the Station Staff will be held in the near future when Dr. A. B. Stout of the New York Botanical Gardens will give an illustrated talk on California. Those who have heard Dr. Stout before will know better than to miss this and those who have not heard him have a treat in store. Wives are particularly invited.
