

THE STATION NEWS

Vol. IX, No. 22.

June 1, 1927.

Geneva, N.Y.

THE JUNE Staff meeting is scheduled for next Monday at 4:00 P.M. in the Library.

Mr. G. P. Van Eseltine will discuss "Some Problems in Botanical Classification and Nomenclature" and Mr. W. O. Gloyer will talk on "Hard Shell in Beans". This will probably conclude the Staff meetings until Fall.

AN IRIS show, the second in the series of flower shows planned for this season, will probably be held the latter part of next week. Emphasis will be placed on collections of varieties of iris and on special arrangements of iris alone and with other flowers as table decorations.

THE TIME is drawing near to think of picnics and the Station Club Social Committee states that it is giving deep and careful considerations to plans for the annual Station outing. In all probability the affair will be held the latter part of this month.

THE TEACHERS' Training Class from the local High School have made arrangements for a tour of the Station buildings and grounds today.

BIDS for the printing of the Station bulletins for the fiscal year 1927-28 were opened in the Director's office this morning. It is evident from the figures given that the contract will again be awarded to Mr. W. F. Humphrey of Geneva as low bidder. Mr. Humphrey has been publishing the bulletins and circulars of the Station for the past several years.

MR. AND MRS. Pederson and children left Saturday for a month's vacation in Wisconsin.

MISS MARY Darrow is also vacationing at this time.

LAST Sunday's edition of the New York WORLD contained a feature article on Dr. Anderson's work at New Haven. It dealt with much the same material as appeared in a recent number of SCIENCE.
