

# STATION NEWS

Vol 26.

July 7, 1937.

Geneva, N. Y.

## THE GLORIOUS 4TH

The Station celebrated the glorious 4th on the 5th this year with the annual meeting and picnic of the New York State Goat Breeders Association. It is estimated that there were 100 in attendance. Among those present was Mrs. C. D. Tyler of Niagara, Ontario, Canada. Mrs. Tyler has attained a world wide reputation as a judge of milk goats and was asked by the Association to judge the entries at the State Fair and the Rochester Exposition this year.

Dr. Dahlberg spoke on animal breeding and Mr. Marquardt reported on the goat milk contests.

## TO AND FROM WATERVILLE

Dr. Reinking, Dr. Horsfall and Mr. Cooley were in Waterville last week investigating special problems in the Station hop work there. Dr. and Mrs. Magie spent the weekend in Geneva. Dr. Magie is located in Waterville for the summer months looking after the hop experiments.

\*\*\*\*\*

## IMPROVING RAPIDLY

Word from Mr. Luckett in Indiana reveals that Charles left the hospital Saturday and was feeling quite all right. The Lucketts expect to leave Lafayette on the 12th. Mr. and Mrs. Williams will accompany them to Geneva where they will spend the summer months.

\*\*\*\*\*

## FORMER STAFF MEMBER

Dr. M. J. Prucha of the Dairy Husbandry division of the Illinois Station visited the dairy and bacteriology divisions here on Wednesday. Dr. Prucha was formerly a member of the staff of this Station, being appointed in 1903 and resigning in 1911. He was enroute home from New York City where he had been attending the meeting of the Committee on Standard Methods of the American Public Health Association of which Dr. Breed is chairman.

\*\*\*\*\*

## RETURNED

Mr. W. C. Haynes is back in the bacteriology division after spending 8 months at Cornell. Mr. Haynes is assisting in the mastitis work.

\*\*\*\*\*

## SOIL CONSERVATIONIST

Dr. C. S. Slater of the U. S. Department of Agriculture Soil Conservation Service has set up his laboratory in Hedrick Hall where he will work in cooperation with Mr. Collison on soil conservation problems. To begin with samples will be sent here from New York erosion centers, Geneva, Hammondsport and Marcellus where qualitative as well as quantitative determinations will be made. Mr. Lawrence Ainsley is assisting Dr. Slater in the laboratory.

Dr. and Mrs. Slater and their three children come here from Statesville, North Carolina, where Dr. Slater was in the Conservation Service. They will reside at 70 Jefferson Avenue.

NAMED IN THEIR HONOR

Mr. and Mrs. Slate were in Ottawa for the weekend to see the famous lily gardens of Miss Isabella Preston who is well known for her work in lily breeding and for her book on lilies. Mr. Slate was much interested in a book of lily varieties developed by Miss Preston and found on thumbing through the pages a list of hybrid rose seedlings. Among the names two stood out, Dr. U. P. Hedrick and Mrs. U. P. Hedrick. Upon inquiry Miss Preston told of a visit of the Hedricks to her garden and of their particular fancy for these two roses which she forthwith named for them. Altho this was done some few years ago it is the first time that it has come to our attention and we pass it on to the readers of the NEWS.

RECOGNITION

A letter from the editorial board of the International Medical Digest brings the word that a recent article on the Control of Septic Sore Throat by Dr. G. J. Hucker has been printed in full in the last issue. The letter continued to say that the Board felt that this work conveyed a very important message to practicing physicians.
