ST. VALENTINE

"In the long ago there were three friends, Pietro, Luigo, and Valentine. One was a great preacher, one a wonderful singer, but Valentine was only a gardener. When his flowers bloomed they found their way to the bedside of the sick and the room of the discouraged. At last he became too old to bend over his beloved flower beds; still he could use his hands, so he wrote love messages to go with the flowers. So many were the hearts he healed, and so much love he spread about that his name has become a symbol of love while his two friends are lost in oblivion."
