

STATION NEWS

Vol. XXX, No. 24.

June 15, 1938.

Geneva, N. Y.

SALIENT FACTS

The following are the important things to remember about that big Station picnic tomorrow afternoon:

THE PLACE: Cayuga Lake State Park.

TRANSPORTATION: If you are not already taken care of, please get in touch with Miss Sharpe who will make connections for you. There are ample transportation facilities available, so do not hesitate to thumb a ride.

SPECIAL EVENTS: With Miss Weimer in charge of a special play program for the smaller children, with Mr. Jenkins in charge of the traditional "Ball Game", and with Dr. Pederson looking after the recreational activities of the younger boys and girls, there will be no dull moments. There will be two ball games—one for the younger boys before supper and the "big" game after supper. Officials at the Park state that the swimming season is open and that many persons have already availed themselves of the early swimming afforded by the warm water found at Cayuga Lake Park. Well-equipped locker rooms are available for the swimmers and the shallow water and sandy beach hold attractions for the "paddlers".

THE MAIN EVENT: Dinner will be served at 5:30, and with 165 signed up at this writing, it will behoove one and all to be on hand when the cook gives the word. Please remember to bring KNIFE, FORK, SPOON, CUP, and PLATE.

"FRESH AIR" YOUNGSTERS

The local committee in charge of arrangements for the entertainment of children from New York City who are to be given a two weeks' vacation Upstate is desirous of learning of homes which will take in one or more of these youngsters. The group assigned to Geneva is expected to arrive here on July 26. Anyone interested in helping in this very worth while enterprise is requested to get in touch with Rev. Fred Harper, local chairman.

IN NEW QUARTERS

The Hudson Valley Laboratory formerly located on the campus of Vassar College has been moved to new quarters on Marple Road near Poughkeepsie on account of the wrecking of the old quarters in connection with a building program under way at Vassar. This Laboratory, which is little known to most of us here at the Station, now has a staff of eight persons, including four summer assistants; Dr. D. H. Palmiter, pathologist; Dr. O. H. Hammer and R. W. Dean, entomologists; and D. W. Hamilton, assistant entomologist for the U. S. Dept. of Agriculture, who is cooperating with Dr. Chapman on some special problems in the Hudson Valley. Dr. J. M. Hamilton, while now making his headquarters here at the Station, is also directing work at the Laboratory.

AGRONOMISTS

A group of eight agronomists from the American Agricultural Chemical Company of New York City, with Mr. Myron Hazen in charge, is spending today at the Station inspecting the fertilizer experiments on the canning crops farm and other lines of work of an agronomic nature in progress here.

AT HAMILTON

Mr. Parrott was in Clinton on Monday to attend exercises at Hamilton College where John was a member of the graduating class. John will be in Geneva for the summer in the employ of the Geneva Preserving Company and plans to enter the School of Business Administration at Harvard in the fall.

OTHER GRADUATES

The Van Eseltines also witnessed graduation exercises this week at Oberlin where their son Robert completed his work; while the Dahlbergs are planning to go to Pottstown, Pa., the last of this week to see Dale graduate from the Hill School and the Conns will be in Ithaca next week for Jean's graduation from Cornell.

AMONG OTHER HONORS

Among other honors conferred upon youngsters within the Station group at colleges, prep schools, and elsewhere this spring, should be noted the election of Alice King and John van Alstyne as charter members of the recently organized Geneva High School chapter of a national honorary scholarship fraternity.

A GRANDFATHER AGAIN

Mr. Stewart is receiving congratulations upon the arrival of a daughter in the home of Dr. and Mrs. Worthington of New Haven, Conn., Mrs. Worthington being better known in Geneva as Charlotte Stewart.

MR. STEELE SURPRISED

On his birthday on June 2 and immediately following his retirement from the Station, Mr. Steele was agreeably surprised with the presentation of a traveling bag and a small sum of money by his associates. We understand that Volney expects to make good use of both the bag and the money on several trips planned for the near future.

FROM ILLINOIS

Miss Joellen MacKenzie of DeKalb, Illinois, a niece of Mrs. Hucker has arrived in Geneva for an extended visit with Dr. and Mrs. Hucker.

MOVING TO REDWOOD

The Yales are moving to Redwood, N. Y., in Jefferson County, next Saturday for the summer. Dr. Yale will be engaged in special studies in cheese factories in that region that will keep him occupied until September.

FROM THE WEST

Mr. Miller of the Milton Nursery Company of Oregon and Mr. Masure of Wenatchee, Wash., were recent visitors at the Station and were especially interested in the plant propagation and rootstock work.

TO ATTEND DAIRY MEET

Mr. Parrott has been invited to attend the annual meeting of the Dairymen's League to be held in Syracuse tomorrow.
