THAT NAME

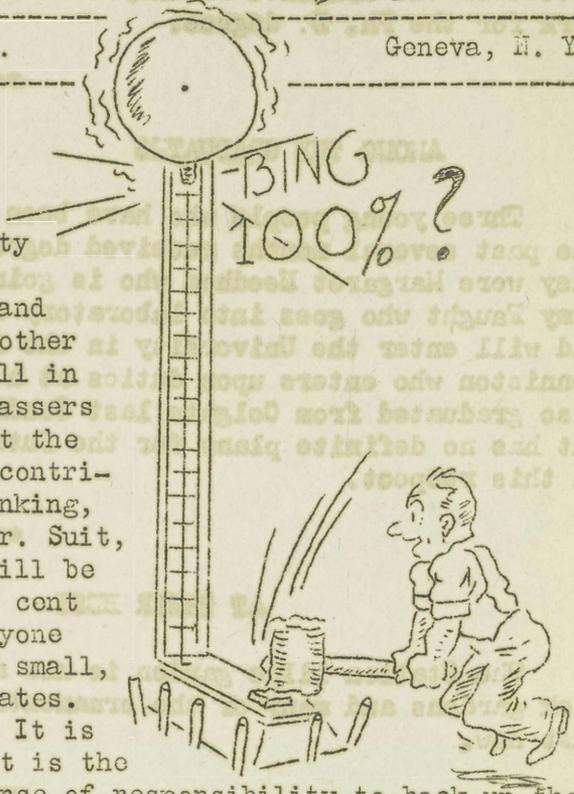

Vol. XXXVIII, No. 17.

May 13, 1942.

Geneva, N. Y.

## OFF TO A GOOD START

Dr. Reinking and his campaign committee are off to an excellent start on the War and Community Chest campaign. Two buildings, Jordan Hall and Entomology, have already completed their canvas and have exceeded their quotas. The "trend" in the other buildings and in Jim Hefferon's labor force is all in the direction of a successful outcome. The canvassers are making an effort to contact every employee at the Station, but if you are missed please make your contribution to one of the following persons: Dr. Reinking, Miss Jessie Sperry, Dr. Pederson, Mr. Everson, Dr. Suit, Dr. Chapman, Mr. Beattie, or Mr. Hefferon. It will be regrettable if the Station cannot report 100 per cent participation, for there can be no excuse for anyone to fail to make some contribution, no matter how small, if for no other reason than that patriotism dictates. After all this is a different kind of campaign. It is not so much the amount in dollars and cents as it is the spirit of unity underlying the effort and the sense of responsibility to back up the men who are doing the fighting that we cannot do ourselves. Your contribution, whether it is fifty cents or a hundred dollars, says that you are backing them up and doing your part. Let's make it unanimous!

## WHO WANTS TO DRIVE

The Central New York Branch of the Society of American Bacteriologists is to meet at the Veterinary College at Ithaca next Saturday, and we understand that they are matching pennies in the Bacteriology Division to find out whose gas ration card will be used for the trip. Station folks participating in the program include Miss Jean Conn, F. W. Tanner, Jr., Miss Thressa Campbell, Dr. Hofer, and Dr. McNow. Dr. Breed is to address a joint luncheon meeting of the Central Branch and the Western New York Section of the Society for Experimental Biology and Medicine. His subject will be "Bacteriological Problems in Cuba".

THE CLOSING SESSION

## DR. VAN SLYKE HONORED

The George M. Kober Medal, described by the New York Times as one of the highest honors in the medical profession, was awarded to Dr. D. D. Van Slyke, chief chemist at the Rockefeller Institute Hospital, last week. The award was made by the Association of American Physicians for Dr. Van Slyke's contributions to the treatment of diabetes and Bright's disease, together with his work on oxygen treatment of pneumonia. Dr. Van Slyke is well known at the Station where his father, Dr. L. L. Van Slyke was head of the Chemistry Division for many years.

\*\*\*\*\*

## AG STUDENTS

Students in agriculture from the Clyde High School spent a day at the Station last week.

\*\*\*\*\*

## SUMMER WORKERS

Among those recently employed for summer work at the Station are James Barrett, home from Rensselaer Polytech, who is working with Mr. Gloyer; Maynard Ungerer of Hobart College, who is assisting Dr. Carruth; and George Shorman, a Geneva High School student, who is working with Mr. Wheeler.

\*\*\*\*\*

## FINAL EXAMS

Mr. Robert Brooks formerly of the Bacteriology Division appeared before a committee of the Graduate Faculty at Cornell yesterday for the final examination on his work for the Ph. D. degree.

\*\*\*\*\*

## AMONG THE GRADUATES

Three young people who have been working at the Station in their spare time for the past several months received degrees from Hobart or William Smith last Monday. They were Margaret Needham who is going with the Taylor Instrument Company, Miss Aimy Faught who goes into laboratory work at the University of Pennsylvania Hospital and will enter the University in the fall for her Master's degree, and Donald Denniston who enters upon duties at a T.M.T. plant at Lewiston, N. Y. Dale Dahlberg also graduated from Colgate last Sunday. Dale has been specializing in chemistry, but has no definite plans for the future being subject to the wishes of Uncle Sam in this respect.

\*\*\*\*\*

## AT THEIR BEST

The Station lilac garden is now at its best and is well worth a visit. The rock gardens and many of the ornamentals around the grounds are also most attractive just now.

\*\*\*\*\*

## WEDDING BELLS

Announcements have been received at the Station of the marriage last week of Miss Edith Grace Coombs and Dr. James S. Lawson, both of Toronto. Dr. Lawson was at one time museum preparator here at the Station and produced many of the fine specimens in the present collection.

\*\*\*\*\*

## CHEESE RESEARCH

Mr. Marquardt is in Chicago this week attending a series of cheese conferences. Tomorrow he will address the Research Section of the National Cheese Institute.

\*\*\*\*\*

## THE CLOSING SESSION

The final meeting of Ceres Circle for the season will be held at the Director's residence next Wednesday afternoon, May 20th, at 3:30, when Mrs. Robert Thompson will present an illustrated talk on Hawaii. Mrs. L. O. Weaver will be hostess for the occasion and Mrs. L. B. Norton is in charge of the program.

\*\*\*\*\*

## THESE ARE NEW

The following publications were received from the printer the past few days:

Bulletin No. 701. Orchard Covers and Their Relation to Soil Conservation. R. C. Collison and E. A. Carleton.

Circular No. 193. Blackberries and Dewberries. G. L. Slate

\*\*\*\*\*

## THE BUS SERVICE

Bus service to the Station is now a reality. The city busses will stop at Collier Drive every hour at five minutes before the hour. The downtown terminus is the Corine Hotel at twenty minutes before the hour.
