

# STATION NEWS

Vol. XXXIX, No. 5.

July 29, 1942

Geneva, N. Y.

## THE DIRECTOR MOVES OUT

Monday was moving day for Mr. Parrott when he moved most of his belongings to his new residence at 328 Castle Street. He is spending the nights at his camp and will probably take what vacation he can get at the camp during August. Dr. and Mrs. Heinicke are expected to move their effects into the Director's residence the first of August.

## CONGRATULATIONS!

The Director is a grandfather again! Last Sunday a daughter was born to Mr. and Mrs. Robert Holt of Montpelier, Vt.

## APPLE PRODUCTS

The International Apple Association meets in Buffalo next week and the Station will play a conspicuous part in the program. An exhibit of apple juice, apple juice blends, and apple products will be set up and supervised by Mr. Beattie. On Thursday, Dr. Tressler will lead a discussion on "Uses of the Apple", with a number of others scheduled to contribute to the discussion, including Dr. Heinicke, Dr. Kertesz, and Dr. Pederson.

## THE NEBELS RESIGN

Dr. and Mrs. Nebel have tendered their resignations from the Station, effective August 1st. Dr. Nebel holds the title of Assistant Professor and Mrs. Nebel, who is serving without pay, that of investigator. The Nebels have been associated with the Station since the fall of 1929. During that interval, Dr. Nebel has published over sixty scientific articles on his cytological investigations and Mrs. Nebel ten articles. Working jointly, they discovered the use of the drug colchicine as a plant breeding tool. Mrs. Nebel is employed at present by the well-known seed company of W. Atlee Burpee and Dr. Nebel is studying in the University of Rochester Medical School. We hope to have more information later about the Nebels' plans.

## TO WORK IN EASTERN NEW YORK

Mr. John J. McKelvey, Jr., arrived from Virginia yesterday to take up his duties as Investigator on the corn ear worm and corn borer project, with headquarters in the eastern part of the State. Mr. McKelvey is a native of the Empire State. He took his undergraduate work at Oberlin and has been engaged in graduate work at Virginia Polytechnic Institute.

## THE PARADE

Mr. Hening is serving as the Station representative on a citywide committee concerned with plans for what is described as a "mammoth parade" to be staged in Geneva on Labor Day.

\* \* \* \* \*

## BACK ON THE JOB

Mr. Kopko has returned to his duties in the Chemistry Division following a bout with lumbago.

## ENGAGEMENT ANNOUNCED

Mr. and Mrs. Wellington have announced the engagement of Marylizabeth to Dana I. Crandall of New York City. Mr. Crandall is a graduate of Columbia University and is now engaged in graduate work at the University of Pennsylvania where Marylizabeth is also a graduate student.

## FRUIT SALES

Shortage of labor and other difficulties have complicated the sale of Station fruit this season. With peaches beginning to come in now in quantity, Mr. Bennett is making arrangements to sell them in such a way as to serve the best interests of all concerned. With that in mind a few simple rules will be followed for the next few weeks, or as long as peaches are available:

1. Sales will be made only between 4:00 and 4:30 p. m.
2. All fruit will be sold in the room at the south end of the hall in the west basement of Hedrick Hall.
3. Notices will be telephoned to each building on the day that peaches will be available. On such days plums will also be offered for sale.
4. No orders will be taken, except for quantities of a half bushel or more for canning.
5. Due to shortage of supplies, a deposit of 5 cents will be required on 4-quart baskets and 10 cents on 12-quart baskets. Deposits will be redeemed at any sales period or the baskets accepted in exchange for other baskets containing fruit.
6. All sales will be cash on the line.

Cooperation on the part of "the trade" will be greatly appreciated.

## ON LEAVE

His many friends at the Station were delighted to have a brief visit this week with Dominic Serrett who is home on a furlough. Dom, who is now a corporal, will return the last of the week to Geiger Field near Spokane for aviation cadet training.

## A WAR CASUALTY

Extension Echoes has suspended publication, at least for the present and under the able editorship of Jimmy Knapp. Jimmy says he is taking a vacation and then maybe a new job or the army. Echoes has been a cheerful and welcome visitor to our office for more than eight years and we regret exceedingly any break in its publication. Next to Life and the New York Times it was our most important source of news and we trust that someone will "carry on" for Jimmy and the Extension Service. And for Jimmy we wish the best of luck in whichever it may be--a new job, or the army.

## AMONG THE VISITORS

Recent visitors to the Station include Prof. A. F. Barss, horticulturist at the University of Vancouver; Dr. G. N. Hofer of Lafayette, Ind., and Sam Graves of Washington, D. C., representatives of the American Potash Institute; and Mr. Tucker of Columbus, Ohio, representing the Synthetic Nitrogen Institute. The last three men spent some time going over Mr. Sayre's fertilizer placement experiments both on the canning crops farm and on outlying farms.
