

STATION NEWS

Vol. 45, No. 9.

September 19, 1945.

Geneva, N. Y.

The shape, color, size, flavor, and other characteristics of fruit varieties of the future will be under discussion tomorrow when the New York State Fruit Testing Cooperative Association holds its twenty-seventh annual meeting in Jordan Hall. The usual exhibit this year in view of some misgivings as to the crop failures that have marked the past season. Weather tours of the nursery of the Station orchards, the plantings of dwarf made during the morning, mal program beginning at Hall.

when the New York State its twenty-seventh annual fruit exhibit will be o'clock, altho there are extent of the of the fruit permitting, plantings and particularly trees, will be with the for- 1:30 in Jordan

Among the speakers scheduled for the afternoon will be Prof. M. A. Blake, and Prof. J. H. Clark of the New Jersey Experiment Station, Prof. W. P. Judkins of the Wooster, Ohio, Experiment Station, and Prof. E. F. Palmer of the Horticultural Experiment Station at Vineland, Ontario, Canada. Members of the Pomology Division and several growers will also report on the behavior of the new fruits under their observation. Mr. H. L. King, Manager of the Association, will summarize the business of the past year and Professor Richard Wellington will make the report of the Secretary-Treasurer. Mr. George Morse of Williamson is President. (Decorations for this number of the News by Miss Canne.)

TO ADDRESS SANITARIANS

Doctor Hucker will be in New York City Friday and Saturday for meetings of the New York City Food Sanitarians and the New York State Food and Dairy Sanitarians, where he will discuss sanitation problems in the light of wartime developments of germicides and sanitary practices. He will also lead the "Question Box" which is an important feature of the meetings of these organizations.

DR. TUKEY COMMENDED

Commenting editorially on Doctor Tukey's removal from New York State to Michigan, the Rural New-Yorker says in its current issue, "There may be some who will say that New York's loss will be Michigan's gain. That, in our opinion, is too narrow a view of Professor Tukey's abilities. We know that wherever he may be, his work and his reputation will not be restricted by state boundaries or by any other limitation. That's because he is that kind of person and we are justly proud to send such a man out to Michigan to continue his good work there."

A TOKEN OF ESTEEM

The entire Division of Food Science and Technology turned out last Friday afternoon for a farewell party for Professor H. G. Beattie and presented him with a wrist watch by way of remembrance. Professor Beattie left Sunday for New York City and his new job with the A. & P.

PREPARING BROADCAST

Mrs. H. S. Gabriel of the Department of Extension Teaching and Information at Ithaca, spent last Thursday at the Station acquiring information and "atmosphere" for the October 2nd radio broadcast on "What's New in Farm Research". This monthly feature, which is broadcast simultaneously over WHCU in Ithaca and WGY in Schenectady, will be built around work of this Station for the months of October, November, and December, with Doctor Heinicke serving as master of ceremonies and interviewing various members of the Staff on special fields of investigation. The October program will consist of an interview with Doctor Stotz on the food research program in general. Mr. Louis Kaiser in charge of radio activities at the College was also here part of the day.

MOVES TO FRESNO

Dr. Guy F. MacLeod, formerly member of the Entomology Division here and more recently chief of the Chemicals and Fertilizers Branch of the War Food Administration, on September 1st became general manager of the sulfur and insecticide departments of the Sunland Industries, Inc., in Fresno, Calif.

DR. TURK HEADS ANIMAL HUSBANDRY

Announcement has been made at Ithaca of the appointment of Dr. Kenneth L. Turk as head of the Department of Animal Husbandry, effective October 1st, to permit Professor F. B. Morrison to devote full time to research and writing. According to Extension Echoes, Professor Morrison, Director of this Station from 1927 to 1928 and head of the animal husbandry work at Ithaca since then, plans to rewrite his "Feeds and Feeding", to revise the "Morrison Standards for Livestock", and to prepare a series of encyclopaedic handbooks on livestock. He is also planning to develop and teach a graduate course in livestock feeding and applied animal nutrition.

STUDYING FACILITIES

A group of entomologists headed by Doctor Glasgow and including Dr. Chapman, Dr. Carruth, Dr. Hervey, and Professor Wheeler, is on a tour of eastern laboratories to obtain ideas for the new entomology and plant pathology building to be erected here as part of the State's post-war construction program. Points to be visited include the U. S. Dept. of Agriculture laboratories at Beltsville, Md., the U. S. Japanese Beetle Laboratory at Moorestown, N. J., laboratories of the DuPont and Rohm and Haas companies, and others.

FRENCH VISITORS

Dr. Henri Cheftel of Billancourt and Jean Maillet and Gustave Roebber of Paris called on Doctor Hucker last week to discuss work under way here on food poisoning organisms and on new germicides. They were also interested in the fruit juice investigations. Prof. Rene Chevalier of the French Agricultural Mission in Washington was also a recent visitor in the Division of Food Science and Technology.

A DINNER MEETING

Local members of the New York State Employees Association will hold a dinner meeting at Pronti's next Tuesday, September 25, with Mr. Hollister of Albany as the speaker. The chief purpose of the gathering, besides the eating of a good meal, is to consider the formation of a Geneva Chapter of the Association to include all State employees of the Geneva area. At present the local organization is a branch of the Ithaca Chapter. The Constitution will be presented for adoption and, also, there will be election of permanent officers.

FROM WESTERN RESERVE

Doctor Franklin J. Bacon, professor of botany at Western Reserve University in Cleveland, spent Monday in the Plant Pathology Division discussing recent developments in plant disease control.
