

# The Station News

Vol. XVII, No. 21.

October 28, 1931.

Geneva, N.Y.

-----:  
TO CONFER IN : Arthur Clark leaves for Washington Sunday to attend the annual  
WASHINGTON : meeting of the Association of Official Agricultural Chemists  
-----: to be held in that city from November 2 to 4, together with the  
meetings of the Association of American Feed Control Officials which will be held  
on November 5 and 6. Mr. Clark is a member of two special committees of the latter  
organization.

-----:  
DR. HEDRICK : Dr. Hedrick is in Albany today for the final hearings on the  
IN ALBANY : 1932-33 budget requests. Following a week-end in New Haven, he  
-----: went to Albany the first of the week on several itmes of Station  
business, terminating with the hearings today. He is expected back in his office  
tomorrow morning.

-----:  
THIS SOUNDS : Dr. Hucker, chairman, of the Staff business committee, announces  
INTERESTING : the appearance of Dr. S. Bayne-Jones, Professor of Bacteriology  
-----: at the University of Rochester, at the November Staff meeting  
to be held Thursday, November 5. Dr. Bayne-Jones will have as his subject  
"Photomicrographic Moving Pictures", and those who have seen some of his films are  
most enthusiastic about them. Dr. Bayne-Jones is a past President of the Society  
of American Bacteriologists and not long ago was named a "Master" of one of the  
colleges of Yale University, effective next fall, when a new educational system  
goes into effect at Yale. The Staff meeting is scheduled for 3:30 p.m., in Jordan  
Hall, on Thursday of next week.

-----:  
NEWS FROM : A letter from Mr. Sayre to Dr. Hedrick conveys the information that  
THE FRONT : Mr. Sayre "is getting along", altho of course progress seems rather  
-----: slow to him, especially with the very restricted diet to which he is  
confined. It is good news, however, that there is noticeable progress.

-----:  
NEXT MONDAY : The November meeting of the University Club will be held next  
EVENING : Monday evening at the Pulteney Inn with an address on "Pre-Colum-  
-----: bian History of America as Set Forth in the Book of Mormon" by  
W.W. Beaf of Palmyra, as the special feature of the evening. Supper preceding the  
talk will be served at 6:30.

-----:  
ALLOTMENT : According to a recent newspaper story, this station has been  
ANNOUNCED : allotted \$6,000 out of the \$1,000,000 set aside for the use of  
-----: State insitutions from the appropriation of \$20,000,000 made at the  
special session of the Legislature for the relief of unemployment. In the absence  
of Dr. Hedrick, we cannot say just now this money will be used here. The appropria-  
tion is immediately available, of course.

-----:  
THE GREENS GO : Mr. Green and his family left last Saturday for Washington, D.C.  
TO WASHI LGTON : where Mr. Green will soon enter upon his new position with the  
-----: U.S. Department of Agriculture.

-----:  
MRS. WILLAMAN : We were sorry to learn indirectly last week that Mrs. J.J.  
IN HOSPITAL : Willaman was in a Philadelphia hospital for a sinus operation  
-----: following a rather prolonged period of sinus trouble. Nothing  
definite has been heard as to the outcome of the operation.

-----:  
OUR SINS : The old adage comes to mind that "doctors bury their mistakes,  
FIND US OUT: lawyers send their's to Jail, but editors publish their's for all  
-----: the world to see." In other words, we announced in these columns  
last week that our able correspondent, Mr.Marquardt, would adorn the meetings of  
the International Association of Milk Dealers in Atlantic City this week, only  
to discover at this writing that he is in Syracuse instead and had no intention  
of going to Atlantic City. We are sorry, but anyway the "retraction" is good for  
eight lines in this issue.

-----:  
ACCEPT THE : The new building has been officially accepted by the State in-  
BUILDING : spectors, altho they left a list of minor details that were to  
-----: be rectified by the contractor. Most of these,however, have  
to dowith things other than the structure itself. Also, the boilers have arrived  
and are in place in the basement of the Dairy Building where they are being  
connected up with the rest of the heating unit. Once again, therefore, we predict  
that the new building will be ready for occupancy within one or two weeks. Much  
furniture must be delivered before anyone can do serious work in the new offices  
and laboratories,however.

-----:  
FROSTED : An official opening and inspection of the hundreds of samples of  
FOODS : vegetablew and fruits frozen here last summer by the Frosted  
-----: Foods Corp., was held the first of the week at the home office in  
Gloucester, Mass., before a large group of those interested in the new process,  
including Mr.Wellington, Mr.Tapley, and Mr.Enzie.

-----:  
VISITING THE : On his return from Massachusetts, Mr.Wellington expects to  
HUDSON VALLEY : fisit Mr.Anderson at Hudson and inspect the Hudson Valley Fruit  
-----: Investigations being conducted by the Station at various points  
in the Valley.

-----:  
WILL INSPECT : Mr.Tapley and Mr.Enzie expect to stop off in Cambridge, N.Y.,  
SEED FARMS : on their way back to Geneva to inspect the trial grounds of  
-----: the Jerome B.Rice Seed Company, where they will see particularly  
the results of trials with corn and squash. The next part of the Vegetables of  
New York to be undertaken by the Vegetable Crops Division will deal with corn,  
hence the interest in this crop at this time.

-----:  
THE BOOK :  
ON BEANS : The second in the series of vegetable books, THE BEANS OF NEW YORK,  
-----: is rapidly rounding into shape. Most of the material is in page  
proof and the book itself will be available within a few weeks.

-----:  
DAIRY MEETINGS : Word has been received at the Station of the decision on the  
IN SYRACUSE : part of several dairy organizations in the State tohold their  
-----: annual meetings simultaneously in Syracuse in January. The  
groups agreeing to this procedure at this date are the State Dairymen's Association  
of which Dr.Hucker is Secretary and Dr.Breed,chairman of the program committee;  
the New York State Breeders Association, the New York State Holstein-Friesian  
Association, and the New York State Jersey Cattle Club. It is possible that the  
New York State Guernsey Cattle Breeders Association will also decide to meet in  
Syracuse at that time. The dates of the several meetings fall on January 13, 14,  
and 15, with a banquet on the evening of the 14th in which all of the groups will  
participate. It is probable that the Station and the College of Agriculture will  
be represented with exhibits of the dairywork at the two institutions. Details of  
the programs will be forthcoming later.
