

The Station News

Vol. XX No. 19.

May 10, 1933.

Geneva, N.Y.

-----:
1933 :
STATE FAIR : The Editor represented the Station at the meeting of representa-
-----: tives of State Institutions exhibiting at the State Fair. Those
called in conference at Albany last Friday morning included men from the State
College of Forestry at Syracuse, the State College at Ithaca, the Conservation
Department, the departments of Education, Labor, Health, Mental Hygiene, and
Agriculture and Markets of Albany as well as our own Station. Those who have given
much effort and time to State Fair projects will be interested to know that this
group still has high hopes for the new horticultural building for the Fair altho
it has not been definitely assured. News should be forthcoming very shortly as
to its status. The amount of money to be allotted to each exhibiting institution
was established and our fund available will be \$666.50 which represents a cut
of 33 1/3%. It is interesting to note in this connection that the amount we spent
last year for personal services incident to our exhibits equalled that amount
which will help to indicate the extent of our participation in the 1933 Fair.

-----:
PICKED UP : Mrs.Luckett and Charles accompanied Mr.Luckett to Albany last
BUG : week and after the State Fair meeting the Lucketts motored to
-----: Amherst where they called on the Thatchers. They report a very
pleasant visit and bring back the good news that Dr.Thatcher is busy with his
new work and seems to be quite well. While in the vicinity the Lucketts took a
little trip to Shrewsbury to call on Lida and her husband and "wonderful"baby,
with emphasis on the wonderful. We just know it is. Sorry to report that after
all this happy week end "Jim" picked up a bug enroute home which he has not been
able to throw off completely as yet. The last "bulletin",however,states that the
bug is getting weaker and weaker and "Jim" is getting stronger and stronger, so
that in a day or so he hopes to be back at his desk.

-----:
ALSO : Dr. and Mrs.Hucker have been in New York the past week where
TRAVELING : Dr.Hucker has been holding a series of conferences with some of
-----: the leading milk companies in regard to his work with Mastitis.
On their way home they are to stop at Princeton where they will visit the Walker
Gordon Laboratories and the Rockefeller Institute. They are expected to return
to Geneva in a day or so.

-----:
MEETING HERE : On Saturday morning of this week in Jordan Hall the Central
SATURDAY : New York Branch of the Society of American Bacteriologists will
-----: get under way for its spring meeting. The meeting is scheduled
for 9:00 A.M. and a goodly number is expected to attend. The election of officers
will be taken care of at this meeting and a number of interesting and valuable
papers have been arranged for. The local bacteriologists are very happy to
announce that at the noon luncheon at the Hotel Seneca, Dr. D.H.Bergey of
Philadelphia will speak. Dr.Bergey is known particularly for his "Manual of
Determinative Bacteriology". Following the afternoon session tea will be served
in the bacteriological department.

-----:
FROM : Prof.Murray from Canada is expected here on Saturday to confer
CANADA : with Dr.Bergey, Dr. Breed and Dr.Kelly, relative to the publication
-----: of Bergey's Manual.

-----:
TOMATO :
TALK : Those who listen to the noon broadcasts from the Cornell Station
-----: will hear "Bill" Tapley Friday noon talking on fertilizing
tomatoes.

-----:
PROF.PARROTT : At the annual dinner meeting of the Young Farmers Club of
TO SPEAK : the local High School, Prof.Parrott will address the boys. A
-----: number of the Station men have worked with the boys for the
last few years helping prepare them for the judging contests of Farmers Week
at Cornell. Prof.Stewart, Mr.Tapley, Mr.Hening and Mr. Van Alstyne have gladly
given their services.

-----:
8 IN : A number of the Station men and their wives and daughters are
1 : giving the distress signal for the Chest Drive this week. Altho
-----: the names of all those working is not available as we go to press
we have heard rumors that the Station is well represented on the list of workers.

-----:
NEARLY A : The end of the struggle is in sight for Donald Collins. He
Ph. D. : has completed and submitted for approval his thesis for his
-----: doctorate and we hope that it will not be long until we will
be able to congratulate him upon his degree.

-----:
A SHORT : Mr.Marquardt is celebrating the arrival of spring by taking a
REST : two weeks vacation. He with Mrs.Marquardt and son are spend-
-----: ing it at a cottage on the lake.

-----:
A LOOK : A look around the grounds reveals that the money of the
AROUND : "unemployed fund" is being used to good advantage. The old
-----: trolley tracks are no more and in their place will soon be
seen the evidence of a lovely green boulevard. This, of course, takes away the
parking space of a great many but in its stead behind the Dairy Building and on
the site of the old greenhouses is a very modern parking space set off by a
stone retaining wall which should serve adequately the needs of those from whom
parking space was suddenly snatched with the removal of the tracks.

The rock garden is particularly attractive just now and is being admired by many of our town friends as well as ourselves. It is gratifying to note the number who take Sunday afternoon walks to the Experiment Station to note the new bloom that is on each week.

The entomology department is responsible for the planting of 13,000 "Glad" bulbs. While these will be a lovely source of ornamentation, in addition, they will give Dr.Gambrell further data on "Glad" thrips. By the way, Dr.Gambrell has been flooded with requests for his mimeographed directions on his treatment for that pest.

-----:
BINDING : Miss Rogers is gathering together material to be bound and
AGAIN : asks that departments having material for binding get in touch
-----: with her soon.
