

# The Station News

Vol. XXI, No. 6.

Aug. 9, 1933.

Geneva, N. Y.

-----:  
PLANS ARE : The program and special events for the second annual Dairy Day to  
DEVELOPING : be held at the Station on Thursday of next week are now fairly well  
-----: perfected. One of the most interesting features of the morning pro-  
gram will be a cattle judging contest among the boys and girls of the 4-H calf clubs  
in the surrounding counties and between "Young Farmers" interested in dairying from  
the high schools of this vicinity. Three rings of Jerseys will be provided from the  
Station herd and prizes will be awarded for the best scores. Also in the morning,  
older visitors will be entertained by numerous demonstrations and exhibits illustrat-  
ing important lines of dairy work under way here. No effort will be made this year  
to conduct parties on formal tours of the buildings and grounds, but before the day  
arrives each Division will be asked to designate certain representatives to whom vis-  
itors may be referred for information relating to the work of the Division. One of  
the high spots of Dairy Day last year was the serving of ice cream by the Dairy Divi-  
sion during the noon hour. This year the visitors will be given an opportunity to  
sample the new grape ice that Dr. Dahlberg and Mr. Hening have been working on late-  
ly. Following the noon hour, Commissioner Charles H. Baldwin of the Department of  
Agriculture and Markets at Albany will discuss the work of the Milk Control Board.  
Governor Lehman has been invited to be present, but with the Legislature in session  
it is rather improbable that he will be able to come to Geneva. Several entertain-  
ment features are contemplated for the afternoon, but have yet to be worked out in  
detail. The Station committee in charge of the arrangements for the day has receiv-  
ed considerable help from the Extension Office at Ithaca and others at the College  
of Agriculture, and every indication points to an excellent turn out if the weather  
is at all favorable.

\*\*\*\*\*

-----:  
MISS ELLEN : The death of Miss Ellen Stapleton last week came as a terrible  
STAPLETON : shock to her numerous friends and acquaintances at the Station  
-----: where she was a frequent visitor. The NEWS takes this opportunity  
to extend sincere sympathy to the Stapletons and particularly to Miss Flood in their  
bereavement.

\*\*\*\*\*

-----:  
A LONG WAY : Dr. and Mrs. L. K. Jones and children of Pullman, Washington, spent  
FROM HOME : a few days in Geneva last week. Dr. Jones was formerly in charge  
-----: of the investigations of canning crop diseases here, and is now  
Associate Professor in Plant Pathology at the State College of Washington.

\*\*\*\*\*

-----:  
RESTRICTED : Pursuant to a provision in recent legislation at Albany, the Sta-  
DISTRIBUTION : tion has drawn up a schedule of costs of publishing and distribu-  
-----: ting its available publications and has set a price on each bul-  
letin and circular which will be asked in the event of a request for more than one  
copy. The several Divisions should take note that the free distribution of Station  
publications is limited to one copy, and that where additional quantities are wanted  
the request should be referred to the Mailing Room for a quotation.

\*\*\*\*\*

-----:  
CAUSED A : When Dr. James M. Hamilton, who spends his summers in the Hudson Val-  
FLUTTER : ley, drove up to the Station in his Ford last Saturday accompanied by  
-----: a most attractive young lady, he set ablaze a trail of matrimonial  
rumors which have required the most astute sleuthing to run to ground what appears  
to be the actual facts of the case, namely, that the happy event has not yet taken  
place. As it was, we understand that the Doctor barely escaped having his car dec-  
orated with the appropriate symbols of the newly wed.

\*\*\*\*\*

-----:  
CALLED TO : Mr. Sayre, who holds a commission as Colonel in the Reserve Officers  
THE ARMY : Training Corps, has been summoned to participate in two weeks' train-  
-----: ing at Camp Dix, New Jersey. During that period he will command a  
brigade of artillery in tactical maneuvers and expects to be busier than the prover-  
bial paper hanger. He will leave for camp next Sunday. Mrs. Sayre is leaving on  
Saturday for a visit with her mother in Champaign, Ill.

\*\*\*\*\*

-----:  
VACATION : The list of vacationists has grown to considerable length during the  
NOTES : past week, including those who have just gone and those whose previous  
-----: departure did not find space in last week's NEWS. Dr. Conn and Mr.  
Stewart have resumed vacation periods interrupted by brief returns to the Station;  
Mr. and Mrs. Kokoski and son Faustin are spending two weeks in Amherst, Mass; Arthur  
Clark and his family are camping on Canandaigua Lake; Dr. and Mrs. Tukey are headed  
for Colorado; Mrs. Barrett is vacationing in the mountains; and Miss Corcoran and  
Miss Reilly are also listed as on vacation.

\*\*\*\*\*

-----:  
THE ROLOSON : Mr. Roloson who looks after the Station lawns has proved to be an  
SPRINKLER : especially good man to have around in dry weather. Many favorable  
-----: comments have been passed on the pipe line and sprinkler, an inven-  
tion of his, which has been keeping the brown spots in the lawns from getting much  
worse and which proved almost irresistible to many of the help during the hot days  
of the past week.

\*\*\*\*\*

-----:  
PROFOUND : Absolutely no response whatever has been heard to the suggestion in  
SILENCE : last week's NEWS that the time was approaching for making plans for the  
-----: State Fair, not even the editorial office having shown any signs of  
life. We should say, however, that the Dairy Division is known to be well along with  
its plans and that those plans contemplate some mouth-watering displays of fruit ice  
cream in both the artificial and the real state. We venture the prediction that Mr.  
Hening will have an abundance of help in dismantling his display cabinet when the  
Fair comes to a close.

\*\*\*\*\*

-----:  
ON BOARD : Mr. Marquardt has been notified of his appointment to the editorial  
OF EDITORS : board of Chemical Formulary, described as a new and revised edition  
-----: of The Book of Formulas and Processes. The proposed publication  
will contain the latest formulas and processes for the manufacture of a host of pro-  
ducts listed under 240 heads. Mr. Marquardt's duties will be to assemble material  
on dairy products. The work is to be available by 1936.

\*\*\*\*\*

-----:  
PEDESTRIANS : Complaints have come to the NEWS of so-called "wild" driving by  
BEWARE! : Station autoists up and down Castle Street and along North Street.  
-----: However, the complainants are pedestrians and for our part we have  
never been able to understand just why pedestrians should be tolerated anyway. If  
they can't keep out of the way of these snappy new Fords and Chevrolets and Plymouths,  
let them get a Studebaker and stay out in front of the parade.
