

# The Station News

Vol. XXIII, No. 14.

October 3, 1934.

Geneva, N. Y.

-----:  
VOL. 1, : This is News! The first edition of "Farm Research" is just off the press  
NO. 1. : and is being sent to all farmers on our mailing list. "Farm Research" is  
-----: the result of a fine idea our Editor had some little time ago and has  
gradually worked over and dreamed over until today you have seen the results of his  
efforts. Of course he has had the cooperation of all the contributors and is asking  
for that from every member of the staff for future numbers. According to present  
arrangements "Farm Research" is to be a quarterly and the first date of publication  
is October 1. "Farm Research" represents another effort to bring to the farmers of  
New York State and other states as well results of research in a direct and concise  
form and at a time when the information is most needed. New work will be given the  
preference together with timely suggestions and results of seasonal interest. The  
first number carries something from each of the seven research divisions of the Sta-  
tion. As Dr. Hedrick says in his introductory statement, "Here, then, is 'Farm Re-  
search', a new medium to tell the farmers of the State what the Station is doing."

\*\*\*\*\*

-----:  
MILK : Today, tomorrow and Friday the New York State Association of Dairy and  
INSPECTORS : Milk Inspectors will meet at the Hotel Syracuse in Syracuse. Dr.  
-----: Dahlberg and Dr. Hucker will appear on the program while Dr. Breed, Mr.  
Marquardt, Mr. Henning, Dr. Yale and Mr. Eglinton will attend various sessions during  
the week.

October has been proclaimed "milk month" so we judge the Station herd will be  
called upon for more than the usual amount of that rich creamy product. The slogan  
is one pint for every adult and one quart for every child every day. In this con-  
nection it is interesting to note that Dr. Breed and Dr. Hucker have received notices  
that they are to act as "minute men" so to speak at the various local milk meetings  
which may be held in the community. Dr. Dahlberg is a member of the local committee  
for "Milk Month". Mr. Marquardt will speak at the Rotary Club of Seneca Falls next  
Tuesday on the subject, "Milk," while Dr. Dahlberg will speak at a meeting of the  
P. T. A. on the same subject.

Next week, The International Association of Dairy and Milk Inspectors will meet  
in Boston, Mass., and Dr. Breed and Dr. Hucker will attend these meetings and are  
scheduled for papers on the program.

\*\*\*\*\*

-----:  
TO : When the Hemlock Fair opens for the 67th. year, Mr. Tapley is the man who  
JUDGE : will be held responsible for the blue, red and yellow ribbons on the grange  
-----: exhibits. No simple matter it is to judge the multitudinous items that go  
to make up a grange exhibit which must receive "a placing" as a whole. Each item  
entered must be gone over and given its rating and then the whole exhibit "placed"  
according to the best judgment of the judge. "Bill" has no easy task for Friday of  
this week.

\*\*\*\*\*

-----:  
OCTOBER : Tomorrow night we are asked to appear at 6 o'clock for the dinner and an-  
4 : nual meeting of the Station Club. We learn that the election may be hotly  
-----: contested as the nominating committee is presenting two slates. The pic-  
ture is all set to run off and it sounds as if it would be too bad to miss the event  
tomorrow night.

\*\*\*\*\*

-----:  
ROBERT : That is his name and his weight is seven pounds-seven ounces, that is, it  
DUNBAR : was last Thursday when he arrived to make Mr. Jenkins the proudest father  
-----: of the week. Our heartiest congratulations!

\*\*\*\*\*

-----:  
VISITS : Mr. H. H. Mottern, assistant chemist, Bureau of Chemistry and Soils,  
CHEMISTRY : Washington, D. C., spent some time Monday in the Division of Chemistry.  
DIVISION :  
-----:

\*\*\*\*\*

-----:  
BACK FROM : The home ranks are being swelled these days by the addition of those  
THE VALLEY : who have been in the outlying territories. Dr. and Mrs. Chapman are  
-----: here and are moving to 78 Highland Ave. Dr. Hamilton returned last  
Friday and Mr. Mundinger and family will take up their residence in Geneva this winter.  
Mr. Cooley and family will also move in from Fredonia for this winter.

\*\*\*\*\*

-----:  
DR. DI TOMASI : Dr. Di Tomasi is at present taking over the work Mrs. Hansen has  
HERE : been doing for Dr. Conn. Mrs. Hansen will be leaving with Dr. Hansen  
-----: very soon for Denmark where Dr. Hansen will take up his new position  
with Dr. Orla-Jensen in Copenhagen. Dr. Di Tomasi has been at Cornell some little  
time and as his duties here will take only part of his time after he becomes thorely  
acquainted with the technique he will continue his work at Ithaca also. Dr. Conn is  
chairman of the Commission for the Standardization of Biological Stains and editor of  
the Journal for that Commission.

\*\*\*\*\*

-----:  
DR. AND MRS. : Dr. and Mrs. Breed returned last Saturday from California where Dr.  
BREED : Breed attended the Public Health Association meetings. We believe  
-----: that the Breeds hold the record for the number of foreign countries  
visited this year. While enroute on this particular trip they visited Mexico and  
Canada so that added to their journeys of the winter just about gives them the record.  
It is a bit of a coincidence that Dr. Breed and Dr. Conn traveled over a certain  
stretch of road in New Mexico, the one going west and the other east, only three days  
apart. They did not meet, however, at any point on their respective trips.

\*\*\*\*\*

-----:  
THE : Mr. Sayre is progressing nicely from his recent operation and Mr. Tukey con-  
SICK : tinues to improve. The only thing that seems to be bothering both of them is  
-----: the fact that they have to "stay put" for a little while. It is rather hard  
to keep good men down as both Mrs. Sayre and Mrs. Tukey will testify, if you ask them.  
We are sorry to have to add the name of Mrs. Eglinton to the hospital list this  
week. We hope that next week we may report that she has returned home with nothing  
serious to talk about.

\*\*\*\*\*

-----:  
FROM THE : Mr. Eddy of the Eddy Tree Breeding Station of Placerville, California,  
FAR WEST : was at the Station last Wednesday afternoon. Mr. Eddy was interested in  
-----: looking over the breeding work under way here. Dr. Milton J. Webber of  
the Roubideau Laboratory of Riverside, California, spent some time this week with Dr.  
Nebel. Dr. Webber is a cytologist working with cotton.

\*\*\*\*\*

-----:  
DR. CARL : Dr. Carl Sax of Harvard University conferred with Dr. Nebel this week.  
SAX : Dr. Sax is now senior cytologist with the Arnold Arboretum.

\*\*\*\*\*

-----:  
ADVERTISING : Mr. Slate is exceedingly busy these days getting under way a "nut con-  
MANAGER : test", for the Nut Growers Association. Yes, that is just what it is.  
-----: Mr. Slate wants the judges to be swamped with thousands and thousands  
of nuts from all over the U. S. A. There have been nut contests before but this, ac-  
cording to George, must be the biggest nut contest that has ever been put on. Judg-  
ing by the channels that are being opened and worked it will be.

\*\*\*\*\*

-----:  
MILK : Each year the boys in the agricultural class of the high school bring in  
JUDGING : samples of milk which are brought to the Station for judging. This year  
-----: there were 42 samples entered and Mr. Marquardt, Mr. Hening and Mr. Durham  
have judged them all with a view to deciding which boy brought in the best sample of  
milk.
