

New York State Cabbage Research Association

PROGRESS REPORT

DEVELOPMENT OF DISEASE-RESISTANT *BRASSICA* VEGETABLES

Principal Investigator

Dr. E.D. Earle, Dept. of Plant Breeding, Cornell University, Ithaca, NY

Cooperator

Dr. M. H. Dickson, Dept. of Horticultural Sciences, NYS Agricultural Experiment Station, Geneva, NY

Summary

During the past year, this project made substantial progress toward production of *Brassica oleracea* lines with resistance to crucifer diseases and insects through cell culture or gene transfer approaches. The improved materials developed could be useful in cabbage as well as other *Brassica* vegetables.
