

**1999 Golf Course IPM Implementation and Demonstration Project
in Orange County**

Project Leaders: Rosemarie Baglia, CCE Horticulture Agent; Teresa Rusinek, Orange and Ulster County IPM Coordinator; Gary Couch, IPM Area Specialist.

Cooperators: Rod Ferrentino, NY State Ornamentals IPM Coordinator; Michael Villani, Associate Professor, Entomology; Paul Robbins, Graduate Student; Debra Armstrong, Area Extension Specialist, Wallkill/Rondout Watershed USDA Demonstration Project.

Introduction:

The Golf Course IPM program housed in Orange County has introduced superintendents in the Hudson Valley to IPM principals and practices over the course of the past five years. Our goals for this year include; investigating life cycle and monitoring techniques for black cutworm; demonstrate the use of nematodes and Mach2 to control black cutworm and Japanese Beetle white grubs; participate as a site cooperator in *Phyllophaga* study; and to expand our established Golf Course Scouting program to include one private course in Orange County.
