

T. Lavigne  
CCE - Albany County

**Tri County Field Crops IPM Enhancement Program  
(Covering Albany, Rensselaer, and Schenectady Counties)**

**Final Report**  
Non-technical Abstract

The requested funding by Cornell Cooperative Extension of Albany County in the amount of \$4992 was used for the purpose of increasing farmer awareness of Integrated Pest Management practices in general and to the IPM/ICM programs offered in tri-county area through an educational outreach program. In addition, the funding was used to upgrade worn out equipment and to add equipment needed for the program.

It was anticipated that the outreach program would reach at least 20 area farmers and provide them with the necessary information to understand the goals of IPM/ICM management and the skills to be able to scout their own fields and make appropriate treatment decisions using IPM guidelines (such as early cutting and crop rotation) when possible.
