Our Mohawk bridge at Schenectady 5 spans of 105 ft each was built a form lattice - 1864. It was rebuilt in lattice by Mr. Helton. Continued 1876. It was strengthened by the introduction of a center truss and cut apart - 1884.

The old N.Y. Central bridge over Mohawk at Schenectady was built in 1835 or 1836. And was subsequently burned. Rebuilt of iron - continuous span. Subsequently reinforced 1886. The original iron bridge was built by men brought from England for that purpose.
