Theo. Cooper Esq.

Dear Sir:

The statement made by me at Seabright cover the following:

1. That lattice bridges (P.R.) over 180 long were built.

2. That for 17 years past on the N.Y. system there were lattice bridges exceeding 180 ft., the total length nearly to about 1,900 ft.

3. That 2 spans of 260 ft each on the Conn. River R.R., over Conno River at Bellows Falls V.; had been for some time were now standing.

4. That Hawkins built one span of 215 ft. on the Boston and Whitehall R.R. [This took the place of one that fell]

5. That Hawkins built one of 193 ft. on an Mass Central R.R.

6. That there was one in N.Y. state of 220 length.
