THEODORE COOPER,
Civil and Mechanical Engineer,
35 Broadway.
Eng' & Arch. Bridges & Buildings.

To Mr Orward Bates
Millbank
New York, June 29th 1889

Dear Sir

Mr Fred Smith draws my attention to an error of statement in my paper on RR bridges as to the second Cantilever bridge. He says the one built for your road at Minneapolis was the second & referred me to Mr Whittmore for the detail figures. Can you send me the lengths of the spans & date of construction so I can make correction before final publication? I would appreciate the courtesy if you will aid me in this matter.

Yours very truly
Theodore Cooper
