INDEX.

A.

Abutting, resistance of earth, 20
Abutments, stability of, 31
--- piers, &c., 66
Animals, power of, 121
---, formulas for, 123
Arches, 27
---, line of pressure and resistance of, 28
---, loaded, 33
---, semi-circular arch, with parallel vaulted surfaces, table of, 37
---, arches, masonry at the back, of 45° inclination, table, 37
---, arches, with horizontal masonry above, table of, 38
---, tables of, 36
---, table of the relative dimensions of segmental, 39
---, vaulted arches, with parallel arched surfaces, table of, 38
Axles and gudgeons, 170

Buckets, form of, for water wheels, 174
---, construction of the, 271, 290
---, number of, for water wheels, 186
Burdin’s turbines, 236

B.

Backwater, 136
---, amplitude of, 144
---, swell, 146
Balance, common, 105
---, index or bent lever, 115
---, sensibility of, 107
---, spring, 116
---, stability and motion of, 108
---, unequal armed, 109
Batter, retaining walls with, 26
Beams, compound, 55
Borda’s turbine, 234
Braces or struts, 54
Brake, of friction, 119
Bridges, chain or suspension of, 59
---, of weigh, 111
---, of portable weigh, 113
---, timber, 48
---, tubular, 82-95
Bucket wheels, 165

C.

Cadiat’s turbine, 247
Capsian, vertical, 131
---, horse, 131
Centrifugal force, effect of, 188
Chain, or suspension bridges, 59
Chains and ropes, sectional dimensions of, 63
---, elongation of, 65
Chain wheel, 339
Cohesion of semi-fluids, 16
Combe’s reaction water wheel, 246
Compound beams, 55
Common balance, 105
Conduit pipes, 158
Conway Tubular Bridge, 82
Corn seeds, semi-fluid, 13
Coulomb’s experiments on the rigidity of hemp ropes, 102
Crushing, Table of the resistance of materials to, 69
Curl, construction of the, 202
---, wheels, mechanical effect of, 204
Cylinder, the working, 300
---, engine combined, 319

D.

Dams, 136
Darlington’s water-pressure engine, 319
Dimensions of parts of water wheels, 167
Dykes, 149
---, stability of, 150
---, offlet sluices of, 152
Dynamometer, 105, 116

E.

Earth, semi-fluid, 13
---, abutting resistance of, 20
---, pressure of, 14
---, surcharged masses of, 17
Elastic resistance, 77
Engine, Saxon water-pressure, 315, 317
Engines, water-pressure, 298
---, pipes of, 299
Equilibrium in reference to rotation, 30
Equilibration of arches, test of the, 34

F.
Fontaine's turbine, 283
Formula for total effect of water wheel, 206
Formulas for the power of animals, 123
Foundation, depth of, 21
Fourneyron's turbine, 248
Fracture, 78
Friction brake, 119

G.
Gear, the valve, 307
--- counter-balance, 308
--- auxiliary water-engine valve, 311
Girders, 81
Gudgeons, 170
--- friction of the, 191

H.
Heeling of retaining walls, 22
Huelgoat, water-pressure engine, 317
--- the balance, 322
--- throttle valves, 322
--- friction of the piston, 324
Hydraulic prejudicial resistance, 325
--- sectional areas, 327
--- formula for the useful effect, 328
--- adjustment of the valves, 331

I.
Impact, effect of, on water wheels, 181
Index balances, 115

J.
Jonval's turbine, 285

K.
King posts, 46

L.
Lever balances, bent, 175
--- the, 127
Loaded arches, 33
Losses of effect of the water wheel, 206

M.
Machines, 99
--- mechanical effects of, 99
--- useful and prejudicial resistance of, 100

Machines, working condition of, 102
--- work done by aid of, 125
Mills, of tread, 133
--- floating, wheels, 216
Modulus of rupture, 80
Morin's experiments on turbines, 281

P.
Parts of water wheels, dimensions of, 167
Pentroughs or penstocks, 177
Piers and abutments, 66
Pillars, strength of, 69
Pipes, conduit, for water, 158
Piston, the working, 302
--- rod and stuffing-box, 303
Planes, movable inclined, 134
Poncelet's tables, 25
--- wheels, 218
--- theory of, 210, 222
--- experiments with, 224
--- turbine, 257
Posts for bridges, 50
Postmills, 343
Pressure of earth, 14
--- and resistance of line of arches, 28
--- (prism of greatest), 15

R.
Rafters, supported, 45
Reservoirs, 148
Resistance, useful and prejudicial, 28
--- of line, of arches, and pressure, 28
--- elastic, 77
Remaining walls, 18
--- with batter, 26
Rotation, equilibrium in reference to, 30
Roofs, thrust of, 42
--- compound, 44
--- for bridges, 50

S.
Sail wheels, 342
Saxon water-pressure engine, 315
Semi-fluids (cohesion of), 16
Sluices (water), 177
--- overfall, 198
--- penstock, 200
Smockmills, 345
Spring balances, 116
Stability of abutments of arches, 31
Strength of cylindrical steam boilers, 95
Structures, wooden, 40
Struts or braces, 54
Swell, of, 136
--- height of, 139

T.
Table I Semi-circular arch with parallel vaulted surfaces, 37
INDEX.

Table II. Semi-circular arches, masonry at the back of 45° inclination, 37
Table III. Semi-circular arches, with horizontal masonry above, 38
Table IV. Vaulted arches with parallel arched surfaces, 38
Table of the relative dimensions of segmental arches, 39
— of nineteen experiments on windmill sails, 36
— of the resistance of materials to crushing, 69
— of the resistance of materials to rupture by tensile strain, 71
— of data connected with the elastic resistance of materials, 77
Tables of Poncelet, 25
— of arches, 36
Tensile strain, 71
Thermotension, 72
Timber bridges, 48
Tread-wheels or tread-mills, 133
Tubular bridges, 82—95
Turbines, Fontaine’s, 283

THE END.
BLANCHARD & LEA'S CATALOGUE
OF
EDUCATIONAL AND MISCELLANEOUS
PUBLICATIONS.

In presenting the following Catalogue, the publishers would remark that they will at all times take pleasure in answering inquiries relative to their publications, and in furnishing any information desired regarding them. Their works can be had of all booksellers throughout this country, or Canada, who can readily order any which may not be kept in stock.

Address,

BLANCHARD & LEA,
PHILADELPHIA.

Catalogues of our very numerous publications in Medicine and Science can be had on application, by mail or otherwise.

Professors and Principals of Academies desiring to examine any of the following educational works with a view to their introduction, can obtain copies, postage paid, on remitting one half of the retail price, in current funds or postage stamps.

A NEW AND COMPLETE CLASSICAL ATLAS—(Just Issued.)
AN ATLAS OF CLASSICAL GEOGRAPHY.

CONSTRUCTED BY WILLIAM HUGHIES, AND EDITED BY GEORGE LONG.

With a Sketch of Classical Geography, and other Additions,

BY THE AMERICAN EDITOR.

Containing Fifty-two Colored Maps and Plans on Twenty-two large imperial quarto Plates, BEAUTIFULLY ENGRAVED ON STEEL IN THE CLEAREST AND MOST FINISHED STYLE.

WITH AN INDEX OF PLACES.

Handsomely half-bound, with cloth sides, in one large volume. Price $3 00.

LIST OF PLATES.

1. THE GEOGRAPHY OF THE ANCIENTS—

THE WORLD ACCORDING TO HOMER (B. C. 800).—

THE WORLD ACCORDING TO HECATHEUS (about B. C. 500).—

THE WORLD ACCORDING TO HERODOTUS (about B. C. 440).—

THE WORLD ACCORDING TO DEMOCRITUS (about B. C. 300).—

THE WORLD ACCORDING TO ERATOPOINES AND STRABO (from about B. C. 200 to A. D. 20).—

WESTERN EUROPE ACCORDING TO STRABO.—THE WORLD ACCORDING TO PTOLEMY (about A. D. 150).—

INDIA ACCORDING TO PTOLEMY.—

BRITAIN ACCORDING TO PTOLEMY.

2. THE WORLD AS KNOWN TO THE ANCIENTS, WITH THE BOUNDARIES OF THE ROMAN EMPIRE UNDER CYRUS.

3. EMPIRE OF ALEXANDER THE GREAT, WITH THE ADJOINING REGIONS.

5. BRITANNIA.

6. GALLIA.

7. HISPANIA.

8. ITALIA (NORTHERN PART).

9. ITALIA (SOUTHERN PART) — CORSICA AND SARDINIA.

10. PLAN OF ROME.

11. THE ROMAN TERRITORY AND THE NEIGHBORING COUNTRY, ON AN ENLARGED SCALE.

12. SICILIA.

13. SYRACUSÆ — THE BAY OF NAPLES AND ADJACENT PART OF CAMPANIA.—THE TWO PORTS OF BRUNDISIUM.

14. MACEDONIA, THRACIA, ILLYRICUM, AND THE PROVINCES OF THE MIDDLE AND LOWER DANUBE.

15. MACEDONIA, THRACIA, ILLYRIA, AND THE PROVINCES OF THE UPPER DANUBE.

16. PART OF ATTICA, WITH BEEPIA, PHOCIS, LOCRIS, MEGARIS, &c., ON AN ENLARGED SCALE.

17. PLAN OF ATHENS—ATHENS AND ITS HARBORS.

18. PELOPONNESUS, WITH ATTICA AND PART OF BEEPIA.

19. THE COASTS AND ISLANDS OF THE EGEAN SEA.

20. PART OF MACEDONIA, THRACIA, ILLYRIA, AND THE PROVINCES OF THE UPPER DANUBE.

21. PALESTINA, WITH PART OF SYRIA.—PLAN OF JERUSALEM.

22. ASSYRIA AND THE ADJACENT COUNTRIES.

23. MAURITANIA, NUMIDIA, AND AFRICA.—THE AFRICAN COAST FROM THE SYRTIS MINOR TO EGYPT.—ENLARGED PLAN OF THE CARTHAGINIAN TERRITORY.

24. ARABIA PETRAEA AND PART OF EGYPT, INCLUDING THE DELTA.

25. GERMANY MAGNA, WITH THE PROVINCES OF THE UPPER DANUBE.

26. TROJA—THERMOPYLÆ—MARATHON.

PLATÆA—MENTINEA—FLEXTRA—ROUTE OF XENOPHON—GRANICUS—ISSUS—ARBELA—THRACIAN BOSPORUS—ALEXANDRIA.

It will be observed that in addition to a very thorough series of maps of all the countries known to the ancients, the Atlas contains a large number of topographical plans on an enlarged scale,
Long's Classical Atlas—(Continued.)

of important places, elucidating in many ways, passages in the classical writers. In this manner it is believed that much assistance will be rendered to the student who desires to obtain a clear comprehension of ancient history.

In this presenting, at a very moderate price, an Atlas more complete in its scope than any other which have yet been offered to the American student, the publishers trust that their efforts have not been misdirected, and that they will be found to have succeeded in producing a work in every way suited to the increasing requirements of the advanced classical scholarship of the age.

A few of the recommendations with which it has been favored are subjoined:

From Prof. C. C. Felton, Cambridge, Mass.

It appears to me excellently adapted to the wants of schools, academies, and colleges. The maps are admirably executed, and the names on them are sufficiently numerous for all useful purposes, and at the same time sufficiently distinct to be easily found. The lexicographical arrangement is excellent, containing a full summary of Ancient Geography, and adds greatly to the value of the work.

I shall recommend this Atlas to my classes, being well satisfied of its substantial merits.

From Prof. J. J. Owen, N. Y. Free Academy.

The "Classical Atlas," for beauty of execution and fullness and correctness of detail, is far superior to anything of the kind which has hitherto been within the reach of students. The maps on the first page, which bring before the eye of the student the great events of history, are preludes to the development of geography, showing the birth of literature to the present time; those on the 26th, which present the great battle fields of history, as well as the separate maps of the Empires of Alexander and of the Romans, may be mentioned among its characteristic excellences. It would greatly lighten the labor of the teacher, and help the apprehension of the pupil to have it at hand in every stage of education.

From Prof. J. R. Bois, University of Michigan.

From the hasty examination which I have made, I judge it to be superior to any work of the kind in my library, and which I am acquainted. I shall recommend its use in the Free Academy.

From Prof. J. Proudfoot, Rutgers College, N. J.

I have devoted a few hours to an examination of its contents and a comparison with known data, and I am happy to say that your publication is a highly valuable contribution to the aids of classical education, and for the price, altogether the best which I am acquainted with can command. It should have a wide circulation.

From Prof. J. S. Hart, Philadelphia High School.

I have examined your edition of "Long's Classical Atlas," with special reference to the value and merits of the second and third departments. I think them improved by the addition of the separate maps of the Empires of Alexander and of the Romans, and by the preface sketch of Ancient Geography. The additional maps (Nos. I and 26), likewise containing new features of the work that will increase materially its popularity and value.

From Prof. A. S. Packard, Bowdoin College, Me.

I have examined "Long's Classical Atlas" with great care, and find that for neatness and beauty of execution, it is worthy of all praise; and the whole work is a very valuable addition to the apparatus of our students in the classics.

From Prof. W. L. Bouwell, Genesee College, N. Y.

It not only possesses that first quality of every work of the kind, great accuracy, so that the student may safely rely upon it, but it is so clear and distinct as to be within the reach of students. The maps showing the progress of geographical knowledge may be inscribed as particular excellences, and as adding greatly to the practical value of the work. I shall take pleasure in recommending it to our students.

I have examined the Atlas with considerable care, and am highly pleased with it. In point of accuracy, adaptation to the wants of students, and beauty of execution, I have seen nothing equal to it. I shall at once introduce it as a text-book in our school.

From Prof. C. D. Cleveland, Philadelphia.

Having examined it with considerable care, I have no hesitation in saying that it is altogether superior to any other work of the kind published in this country or in Europe. For clearness and beauty of execution, I consider it a triumph, and a great gain to classical literature in republishing it.

From Prof. B. Davis, McGill College, Montreal.

I have examined your edition of "Long's Classical Atlas," and I am highly satisfied that no other work has ever been so full, so reliable, and so useful, at the same moderate price. It deserves to become a general favorite in the best schools and colleges on this continent.

From Prof. M. D. Stover, Penn. College, Gettysburg.

As a guide to the classical student, as well as a book of reference to the advanced scholar, it possesses great value. It is an admirable work, and worthy of a place in every library. I trust it will receive a circulation corresponding to its merits.

From E. S. Dixwell, Pub. Latin School, Boston.

It is beautifully executed, and as far as I have been able in three days to examine it, I am much impressed with its correctness and superiority to the common atlases for schools and colleges. I shall recommend it hereafter to my pupils and others.

The publishers of this Atlas would have rendered an important service to the student of antiquity had they succeeded in producing an atlas so accurate and so well adapted to the use even of professors. The map of the kind, great accuracy, so that the student may safely rely upon it, but it is so clear and distinct as to be within the reach of students. The maps showing the progress of geographical knowledge may be inscribed as particular excellences, and as adding greatly to the practical value of the work. I shall take pleasure in recommending it to our students.

From Prof. J. W. Marshall, Dickinson College, Pa.

I am highly pleased with the plan and execution of the work. I have examined "Long's Classical Atlas," and the maps showing the progress of geographical knowledge may be inscribed as particular excellences, and as adding greatly to the practical value of the work. I shall take pleasure in recommending it to our students.

From the Hon. H. Barnard, Hartford, Conn.

From Prof. J. R. Boise, University of Michigan.

From Prof. C. C. Felton, Cambridge, Mass.

I think them improved by the addition of the separate maps of the Empires of Alexander and of the Romans, which have yet been offered to the American student, the publishers trust that their efforts have not been misdirected, and that they will be found to have succeeded in producing a work in every way suited to the increasing requirements of the advanced classical scholarship of the age.

A few of the recommendations with which it has been favored are subjoined:

From Prof. J. J. Owen, N. Y. Free Academy.

From Prof. J. Proudfoot, Rutgers College, N. J.

Having examined it with considerable care, I have no hesitation in saying that it is altogether superior to any other work of the kind published in this country or in Europe. For clearness and beauty of execution, I consider it a triumph, and a great gain to classical literature in republishing it.

From Prof. B. Davis, McGill College, Montreal.

I have examined your edition of "Long's Classical Atlas," and I am highly satisfied that no other work has ever been so full, so reliable, and so useful, at the same moderate price. It deserves to become a general favorite in the best schools and colleges on this continent.

From Prof. M. D. Stover, Penn. College, Gettysburg.

As a guide to the classical student, as well as a book of reference to the advanced scholar, it possesses great value. It is an admirable work, and worthy of a place in every library. I trust it will receive a circulation corresponding to its merits.

From E. S. Dixwell, Pub. Latin School, Boston.

It is beautifully executed, and as far as I have been able in three days to examine it, I am much impressed with its correctness and superiority to the common atlases for schools and colleges. I shall recommend it hereafter to my pupils and others.

The publishers of this Atlas would have rendered an important service to the student of antiquity had they succeeded in producing an atlas so accurate and so well adapted to the use even of professors.
The object of this work is to present to the student, within a moderate compass, a clear and connected view of the history and productions of English Literature. To accomplish this, the author has followed its course from the earliest times to the present age, seizing upon the more prominent Schools of Writing, tracing their causes and effects, and selecting the more celebrated authors as subjects for brief biographical and critical sketches, analyzing their best works, and thus presenting to the student a definite view of the development of the language and literature, with succinct descriptions of those books and men of which no educated person should be ignorant. He has thus not only supplied the acknowledged want of a manual on this subject, but by the liveliness and power of his style, the thorough knowledge he displays of his topic, and the variety of his subjects, he has succeeded in producing a most agreeable reading-book, which will form of the mind of the scholar, and relieve the monotony of drier studies.

From Prof. J. V. Raymond, University of Rochester.

It is an admirable volume, sufficiently full and comprehensive, as to make it the happiest book of reference in my department. The selection of materials is judiciously adapted to the subject; and the best of the book is the genial spirit, the genuine love of genius and its works which thoroughly pervades it and makes it just what you want to put in a pupil's hands.

From Prof. R. P. Dunn, Brown University.

I have used it for two years as a text-book, with the greatest satisfaction. It was a happy conception, admirably executed. It is all that a text-book on such a subject can or need be, comprising a judicious selection of materials, easily yet effectively wrought. The author attempts just as much as he ought to, and the best of all that he attempts; and the best of the book is the genial spirit, the genuine love of genius and its works which thoroughly pervades it and makes it just what you want to put in a pupil's hands.

From Prof. Gessner Harrison, University of Va.

I am very favorably impressed with "Shaw's English Literature," 9th revision; and am very favorably impressed with the work from what I have seen of it, and hope to find in it an important help for my class of history. Such a work is very much needed.

From Prof. J. A. Spencer, New York.

It is an admirable volume, sufficiently full and copious in detail, clear and precise in style, very scholar-like in its execution, genial in its criticism, and altogether displaying a mind well-flowered with the learning, and its works which thoroughly pervades it and makes it just what you want to put in a pupil's hands.

From Prof. Andrew D. White, University of Michigan.

Shaw's English Literature had already been introduced here. I know by personal examination the proficiency of Prof. Shaw's classes in St. Petersburg, and both from my observations there and here, I am sure that his manual is calculated to develop earnestness in the instructor, and enthusiasm in the student.

From D. Kimball, Esq., Williams Academy, Stockbridge, Mass.

I was so much pleased with "Shaw's English Literature," that I introduced it as a text-book as soon as I could obtain it. It possesses all the interest of a romance. The style is so fascinating, the arrangement so admirable, the facts which it embodies so accurate and comprehensive, as to make it the happiest introduction to English literature that has fallen under my notice.

From Prof. J. C. Pickard, Illinois College.

Of "Shaw's English Literature" I can hardly say too much in praise. I hope its adoption and use as a text-book will correspond to its great merits.

BROWNE'S CLASSICAL LITERATURE—(Now Ready.)

A HISTORY OF GREEK CLASSICAL LITERATURE.
SECOND AMERICAN, FROM A REVISED LONDON EDITION.

By The Rev. R. W. Browne, M.A.,
Professor of Classical Literature in King's College, London.

In one very handsome crown octavo volume, of about 500 pages. $1.50.

AND

A HISTORY OF ROMAN CLASSICAL LITERATURE.
SECOND AMERICAN, FROM A REVISED LONDON EDITION.

In one very handsome crown octavo volume, of about 500 pages. $1.50.

These two volumes form a complete course of Classical Literature, suited either for private reading or for collegiate text-books. Presenting in a moderate compass and agreeable style, the results of the most recent investigations of English and continental scholars, they give, in a succession of literary biographies and criticisms, a body of information necessary to all educated persons, and which cannot elsewhere be found in so condensed and attractive a shape.

From Prof. Gessner Harrison, University of Va.

I was much pleased with the work from what I have seen of it, and hope to find in it an important help for my class of history. Such a work is very much needed.

From Prof. J. A. Spencer, New York.

It is an admirable volume, sufficiently full and copious in detail, clear and precise in style, very scholar-like in its execution, genial in its criticism, and altogether displaying a mind well-flowered with the learning, and its works which thoroughly pervades it and makes it just what you want to put in a pupil's hands.
A NEW MANUAL OF ANCIENT GEOGRAPHY—(Now Ready.)

A MANUAL OF ANCIENT GEOGRAPHY.

BY LEONHARD SCHMITZ, Ph. D.,

Rector of the High School, Edinburgh, &c.

With a Map by General Montieth, showing the Retreat of the Ten Thousand.

In one neat royal 12mo. volume, of about 300 pages.

The object of the author has been to prepare a manual for the student, which, within convenient limits, shall present a clear and complete outline of the geography of the Ancient World. The recent investigations both of critics and travellers have opened new sources of information and corrected numerous errors, rendering comparatively useless many of the older authorities. On all these points full information will be found in the present volume, which is, therefore, well calculated to supply a want that has been long felt and acknowledged.

I have examined the work since the publication of the examination of the work, and think it admirably adapted to the purposes for which it was intended. It is both full and concise, and just what is needed by every student in an academic or collegiate course of classical study. I shall immediately adopt it in the Institute.

From D. P. Colburn, Esq., R. I. State Normal School.

From the hasty examination which I have been able to give, I am much pleased with its plan, arrangement, and execution, and think it a valuable addition to our list of school text-books.

From S. M. Capron, Esq., Hartford, Conn.

I have examined it with some attention, and am highly pleased with the general character of the book. I shall recommend it to my pupils as a book of reference, and an excellent companion to "Haird's Classical Manual."

A NEW TEXT-BOOK ON ANCIENT HISTORY—(Lately Published.)

A MANUAL OF ANCIENT HISTORY, FROM THE REMOTEST TIMES TO THE OVERTHROW OF THE WESTERN EMPIRE, A. D. 476.

BY DR. LEONHARD SCHMITZ, F. R. S. E.,

RECTOR OF THE HIGH SCHOOL OF EDINBURGH.

With Copious Chronological Tables.

In one handsome royal 12mo. volume of four hundred and sixty-six pages, extra cloth. $1.00.

The history is constructed with art, and every leading event is surrounded with such accessories as will force its importance clearly before the mind. The difficulty, rarely overcome by compilers of manuals, is, to present a broad historical view uniformly over a vast space of time, and including many nations and systems, and to reconcile the introduction of characteristic details with the general proportions of the narrative. Dr. Schmitz has happily surmounted these hardships of his task, and has produced a full and masterly survey of ancient history. His manual is one of the best that can be placed in the student's hands.—Athenaeum.

The work is all that, and more than, he represents it to be. The general accuracy of the work, therefore, seems to us unimpeachable, while the diction is concise, lucid, fluent, and vigorous. The chronological table appended is comprehensive and well arranged, and the minute index added in the volume one of the most valuable historical works of reference.—N. Y. Commercial Advertiser.

From Prof. Andre D. White, University of Michigan.

Schmitz's Manual of Ancient History I regard as the only one that I consider even comparable to the more ancient manuals, contains the results of the latest European researches.

From Prof. J. T. Chaplin, Watervliet College, Me.

I have no hesitation in saying that it is by far the best manual of Ancient History with which I am acquainted. The introduction of the history of the non-classical nations is an entirely new and important feature, and with the greater completeness of the chronological tables and the general excellence of the whole, cannot fail to command it to public favor. I shall recommend it to my classes with pleasure.

From W. J. Clarke, Esq., Georgetown, D. C.

One of the best compendia of Ancient History with which I am familiar. The most philosophical in its arrangement, it combines most admirably the two elements most difficult to unite—conciseness and fulness. I shall substitute it for the work at present used in my classes, to which I give it an immense preference.

CHEMICAL TEXT-BOOK FOR STUDENTS. Enlarged Edition—Now Ready.

ELEMENTARY CHEMISTRY. THEORETICAL AND PRACTICAL. BY GEORGE FOWNES, PH. D., &c.

From the seventh revised and corrected London edition. With numerous illustrations. Edited, with Additions, by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of 600 pages, clearly printed on small type, with 197 illustrations on wood; extra cloth, $1.50; or leather, $1.65.

Thoroughly brought up to the present state of the science, this work will be found in every way worthy to retain the high reputation which it has everywhere acquired.

We know of no better text-book, especially in the difficult department of organic chemistry, upon which it is particularly full and satisfactory. We would recommend it to preceptors as a capital "office book" for their students who are beginners in Chemistry. It is copiously illustrated with excellent wood-cuts, and altogether admirably "got up"—N. J. Medical Reporter.

A standard manual, which has long enjoyed the reputation of embodying much knowledge in a small space. The author has achieved the difficult task of condensation with mastery and tact. His book is correct without being dry, and lucid without being too dogmatical or general.—Virginia Med. and Surgical Journal.

The work of Dr. Fowmes has long been before the public, and its merits have been fully appreciated as the best textbook on Chemistry obtainable in this country. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Greguss, but we say that, as a work for students, it is preferable to any of them.—Lond. Journal of Medicine.
BOLMAR'S COMPLETE FRENCH SERIES.

Bolmar & Lea now publish the whole of Bolmar's Educational Works, forming a complete series for the acquisition of the French language, as follows:

BOLMAR'S COLLECTION OF COLLOQUIAL PHRASES, on every topic necessary to maintain conversation; arranged under different heads; with numerous remarks on the peculiar pronunciation and use of various words. The whole so disposed as considerably to facilitate the acquisition of a correct pronunciation of the French. In one 18mo. volume, half bound, 37½ cts.

BOLMAR'S EDITION OF FENELON'S AVENTURES DE TELEMAQUE. In one 12mo. volume, half bound, 55 cents.

BOLMAR'S KEY TO THE FIRST EIGHT BOOKS OF TELEMAQUE, for the literal and free translation of French into English. In one 12mo. volume, half bound, 55 cents.

BOLMAR'S SELECTION OF ONE HUNDRED OF PERRIN'S FABLES, accompanied with a Key, containing the text and a literal and a free translation, arranged in such a manner as to point out the difference between the French and the English Idiom; also, a figured pronunciation of the French. The whole preceded by a short treatise on the Sounds of the French language as compared with those of English. In one 12mo. volume, half bound, 75 cents.

BOLMAR'S BOOK OF FRENCH VERBS, wherein the Model Verbs, and several of the most difficult, are conjugated Affirmatively, Negatively, Interrogatively, and Negatively and Interrogatively, containing also numerous Notes and Directions on the Different Conjugations, not to be found in any other book published for the use of English scholars; to which is added a complete list of all the Irregular Verbs. In one 12mo. volume, half bound, 50 cents.

The long and extended sale with which these works have been favored, and the constantly increasing demand which exists for them, renders unnecessary any explanation or recommendation of their merits. The fact that over two hundred thousand volumes have been sold is the best evidence that their long-continued popularity is founded on their intrinsic merit and skillful adaptation to the wants of the student and teacher.

TEXT-BOOK OF SCRIP'TURE GEOGRAPHY AND HISTORY.

OUTLINES OF SCRIP'TURE GEOGRAPHY AND HISTORY.
Illustrating the Historical Portions of the Old and New Testaments.

BY EDWARD HUGHES, F.R.A.S., F.G.S.,
Head Master of the Royal Naval Lower School, Greenwich, &c.

BASED UPON COLEMAN'S HISTORICAL GEOGRAPHY OF THE BIBLE.

With twelve handsome colored Maps.

In one very neat royal 12mo. volume, extra cloth. $1.00.

We have given it considerable examination, and have been very favorably impressed with it as a work of rare excellence, and as well calculated to answer a demand, which, so far as our knowledge extends, has never yet been fully accomplished—Evangelical Repository.

A concise and very convenient condensation of just such facts and information as the Biblical student and general reader want always at hand. We commend it without reserve.—N. Y. Recorder.

We have read it with care, and can recommend it with confidence. Indeed, we do not know of a more convenient and reliable handbook for a pastor, Sunday-school teacher, or a general student to refer to for information in regard to Palestine, whether as to its physical features or its geography, its climate or its productions, its past history or its present condition.—Southern Presbyterian.

From Prof. Samuel H. Turner, N. Y. Theological Seminary.

It appears to contain in a compressed form a vast deal of important and accurate geographical and historical information. I hope the book will have the wide circulation which its merits entitle it to. I shall not fail to recommend it so far as opportunity offers.

From Rev. Eliphalet Nott, President of Union College, N. Y., Feb. 20, 1854.

We have long needed just such a book, and as soon as possible such a book as this. I believe it will be a text-book in all our theological institutions.

From Prof. E. Everett, New Orleans, Feb. 25, 1854.

I have studied the greater portion of it with care, and find it so useful as a book of reference that I have placed it on the table with my Bible as an aid to my daily Scripture readings. It is a book which ought to be in the hands of every biblical student, and I cannot but hope that it will have a wide circulation. To such a desire to borrow it as an aid to my daily study.
The publishers have much pleasure in announcing the conclusion of this Series, which now presents a set of class-books sufficient for a complete course of study in the Latin language. The very numerous recommendations which it has received from classical scholars and practical teachers, and its extensive introduction into many of our best seminaries and colleges, show that the objects of the distinguished editors have been fully carried out in its preparation. These objects have been to present a uniform set of text-books, based upon the most approved systems of modern education, conducting the student from the commencement of his studies to their conclusion on one definite plan, thus relieving the teacher from the annoyance of passing progressively through works based upon different and conflicting systems; a choice selection of classical authors has been made, which are printed from the most correct and approved texts, and are accompanied with biographical and critical notices, illustrations, and maps wherever necessary, and explanatory notes introduced sparingly, affording assistance where it is required, without overburdening the author with commentary.

In the typographical execution of the works everything has been done to adapt them to the wants of the teacher and student. Printed uniformly in a handsome royal 18mo. form, they are convenient for use, while at the same time the prices at which they are offered are unprecedentedly low. Every care has been taken to secure the verbal and literal accuracy necessary in educational works, while most of the volumes can be had in neat extra cloth, or strongly half bound, with leather backs and cloth sides.

The Series consists of the following works:

SCHMITZ’S ELEMENTARY LATIN GRAMMAR. To which is added a SERIES OF EXERCISES FOR PARSING AND TRANSLATION; with Vocabularies and Notes. Price 50 cents in cloth; half bound, 55 cents.

SCHMITZ’S ADVANCED GRAMMAR OF THE LATIN LANGUAGE. Half bound, price 60 cents.

ADVANCED LATIN EXERCISES, WITH SELECTIONS FOR READING. Revised, with Additions. Extra cloth, price 50 cents; half bound, 55 cents. (Now ready.)

This work is complete in itself, containing all the Rules of Syntax—Explanatory Notes—Directions for the Position of Words, &c. &c.

KALTSCHEIT’S SCHOOL DICTIONARY OF THE LATIN LANGUAGE. In two parts, LATIN-ENGLISH, and ENGLISH-LATIN. Complete in one very thick volume, of nearly 900 double-columned pages, full bound in strong leather. Price $1 30.

Also, PART I, LATIN-ENGLISH, sold separate, full bound. Price 90 cents.

PART II, ENGLISH-LATIN, sold separate, full bound. Price 75 cents.

CORNELII NEPOTIS LIBER DE EXCELLENTIBUS DUCIBUS EXTERARUM GENTIUM, CUM VITIS CATONIS ET ATTICIS. With Notes, &c. Price in extra cloth, 50 cents; half bound, 55 cts.

C. I. CÆSARIS COMMENTARII DE BELLO GALlico. With Notes, Map, and other illustrations. Price in extra cloth, 50 cents; half bound, 55 cents.

C. C. SALLUSTII DE BELLO CATILINARIO ET JUGURTHINO. With Notes, Map, &c. Price in extra cloth, 50 cents; half bound, 55 cents.

EXCERPTA EX P. OVIDII NASONIS CARMINIBUS. With Notes, &c. Price in extra cloth 60 cents; half bound, 65 cents.

Q. CURTII RUFI DE GESTIS ALEXANDRI MAGNI LIBRI VIII. With Notes, Map, &c. Price in extra cloth, 70 cents; half bound, 75 cents.

P. VIRGILII MARONIS CARMINA OMNIA. Price in extra cloth, 75 cents; half bound, 80 cts.

T. LIVII PATAVINI HISTORIARUM, LIBRI I., II., XXI., XXII. With Notes, two colored Maps, &c. Price in extra cloth, 70 cents; half bound, 75 cents.

M. T. CICERONIS ORATIONES SELECTÆ XII. With Notes, &c. Price in extra cloth, 70 cents; half bound, 75 cents.

ECLOGÆ EX Q. HORATII FLACCI POEMATIBUS. With Notes, &c. Price in extra cloth, 60 cents; half bound, 65 cents.

In its complete state, it will thus be seen that this Series presents a thorough and uniform course of instruction in Latin, from the rudiments to the lower collegiate classes.

From among many hundred recommendatory notices with which they have been favored, the publishers append a few.

From Prof. N. W. Benedict, Rochester University, N. Y.

I have taken pains to examine the works and am happy to find them very superior for the purposes designed. The selection made from Latin authors is a judicious one: the editorial labor is of the right kind; and the mechanical execution of the works, together with the low price at which they are afforded, constitute them a valuable aid towards the furtherance of classical studies in this country.

From Prof. W. H. Doherty, Antioch College, Ohio.

I greatly admire the beautiful and most useful series of Latin authors which you have published. I regard them as a real boon to all students of moderate means; they are so cheap, so comprehensive, and so correct. They constitute, in fact, an admirable course of Latin reading, and their wonderful cheapness places them within the reach of the humblest and poorest student.
Schmitz & Zumpt's Classical Series—(Continued.)

From Prof. J. J. Oren, N. Y. Free Academy.
With your classical series I am well acquainted, and have no hesitancy in recommending them to all my friends. In addition to your Virgil, which we use, we shall probably adopt other books of the series as we may have occasion to introduce them.

From Reginald H. Chase, Harvard University, Mass.
I have taken time to give the two Grammars a particularly careful examination, and I was not surprised to find them equally admirable in plan and execution with the other works of your series. They are precisely what I have been longing for. My pupils have provided themselves with them, and they will hereafter, in common with the other volumes of the series, be required as text-books with all my scholars. In our Latin course, no other will be introduced.

From Prof. A. Rolita, Delaware College.
I regard this series of Latin text-books as decidedly superior to any others with which I am acquainted. The Livy and Horace I shall immediately introduce for the use of the college classes.

From Prof. A. C. Knox, Hanover College, Ind.
Having examined several of them with some degree of care, I have no hesitation in recommending them in pronouncing them among the very best extant.

From Prof. R. N. Nevell, Masonic College, Tenn.
I can give you no better proof of the value which I set on them than by making use of them in my own classes, and recommending their use in the preparatory Latin school. I have read them through carefully that I might not speak of them without due examination, and I flatter myself that my opinion is fully borne out by fact, when I pronounce them to be the most useful and the most correct, as well as the cheapest edition of Latin Classics ever introduced in the country. The Latin and English Dictionary contains as much as the student can want in the earlier years of his course; it contains more than I have ever seen compressed into a book of this kind. I sought to be the student's constant companion in his recitations. It has the extraordinary recommendation of being at once portable and comprehensive.

Among the various editions of the Latin Classics, Schmitz and Zumpt's, so far as yet published, are at all times preferred, and students are requested to procure no other.—Announcement of Emory College, Va.

But we cannot forbear commending especially, both to instructors and pupils, the whole of the series edited by accomplished scholars. Drs. Schmitz and Zumpt. Here will be found a set of text-books that combine the excellences so long desired in this class of works. They will not cost the student, by one-half at least, that which he must expend for some other editions. And who will not say that this is a consideration worthy of attention? For the cheaper our school-books can be made, the more widely will they be circulated and used. Here you will find, too, no useless display of notes and of learning, but in foot-notes on each page you have everything necessary to the understanding of the text. The difficult points are sometimes elucidated, and often is the student referred to the places where he can find light, but not without some effort of his own. We think that the punctuation in these books might be improved; but taken as a whole, they come nearer to the wants of the times than any within our knowledge.—Southern College Review.

Uniform with Schmitz & Zumpt's Classical Series.

This little volume has been prepared to meet the recognized want of an Epitome which, within the compass of a single small volume, should contain the information requisite to elucidate the classics of Greece and Rome. It will most readily find its place as a companion to the other volumes of your series. The aim of the author has been to embody in it such details as are important and necessary for the junior student, in a form and space capable of rendering them easily mastered and retained; and he has consequently not incurred it with a mass of learning which, though highly valuable to the advanced student, is merely perplexing to the beginner. In the amount of information presented, and the manner in which it is conveyed, as well as its convenient size and exceedingly low price, it is therefore admirably adapted for the younger classes of our numerous classical schools.

Although issued but very recently, this little work has commanded universal approbation; and its immediate introduction into a large number of our best educational institutions, sufficiently proves that the author has succeeded in filling a vacancy among our classical text-books.

From Prof. J. S. Hart, Principal of the Philadelphia High School.
"Baird's Classical Manual" is an admirable compendium of the knowledge most indispensable to the student of Greek and Roman antiquities.

From Prof. P. B. Spear, Madison University, N. Y.
I am persuaded from the examination which I have given it, that if a class were to be drilled upon such an "Epitome" as this, nothing better would lay a foundation for a full and accurate knowledge of the Geography, Chronology, Mythology, and Antiquities of the Greeks and Romans.

From Prof. R. W. Nevell, Masonic College, Tenn.
I cannot help thinking that in none of your works have you so effectually provided for the wants of the poor student as in this.

From Reginald H. Chase, Harvard University.
That invaluable little work, the Classical Manual, has been used by me for some time. I would not on any account be without it. You have not perhaps been informed that it has recently been introduced in the High School at Litchfield. Its typographical accuracy is remarkable.

Butler's Ancient Atlas.

An Atlas of Ancient Geography.

By Samuel Butler, D. D., Late Lord Bishop of Litchfield.

In one handsome octavo volume, half bound, containing twenty-one colored Maps, and an Accentuated Index. $1 50.
NOW COMPLETE.

A SERIES OF TEXT-BOOKS ON PHYSICAL SCIENCE.

HANDBOOKS OF NATURAL PHILOSOPHY AND ASTRONOMY.

BY DIONYSIUS LARDNER, D. C. L.,
Formerly Professor of Natural Philosophy and Astronomy in University College, London.

This valuable series is now complete, consisting of three Courses, as follows:—

FIRST COURSE,
MECHANICS, HYDROSTATICS, HYDRAULICS, PNEUMATICS, SOUND, AND OPTICS.
In one large royal 12mo. volume, of 750 pages, with 424 illustrations. $1 75.

SECOND COURSE,
HEAT, MAGNETISM, COMMON ELECTRICITY, AND VOLTAIC ELECTRICITY.
In one royal 12mo. volume, of 450 pages, with 244 illustrations. $1 25.

THIRD COURSE,
ASTRONOMY AND METEOROLOGY.
In one very large royal 12mo. volume, of nearly 800 pages, with 37 plates and over 200 illustrations. $2 00.

These volumes can be had either separately or in uniform sets, containing About two thousand pages, and nearly one thousand Illustrations on Steel and Wood.

To accommodate those who desire separate treatises on the leading departments of Natural Philosophy, the First Course may also be had, divided in three portions, viz:—

Part I. MECHANICS.
Part II. HYDROSTATICS, HYDRAULICS, PNEUMATICS, and SOUND.
Part III. OPTICS.

It will thus be seen that this work furnishes either a complete course of instruction on these subjects, or separate treatises on all the different branches of Physical Science.

The object of the author has been to prepare a work suited equally for the collegiate, academic, and private student, who may desire to acquaint himself with the present state of science, in its most advanced condition, without pursuing it through its mathematical consequences and details. Great industry has been manifested throughout the work to elucidate the principles advanced by their practical applications to the wants and purposes of civilized life, a task to which Dr. Lardner’s immense and varied knowledge, and his singular felicity and clearness of illustration render him admirably fitted. This peculiarity of the work recommends it especially as the text-book for a practical age and country such as ours, as it interests the student’s mind by showing him the utility of his studies, while it directs his attention to the further extension of that utility by the fulness of its examples. Its extensive adoption in many of our most distinguished colleges and seminaries is sufficient proof of the skill with which the author’s intentions have been carried out.

From Prof. Kirkwood, Delaware College.

After a careful examination, I am prepared to say that it is the most complete "Handbook of Astronomy" with which I am acquainted. I trust the demand for the work will be commensurate with its merits.

From Prof. A. Cassell, Brown University.

I regard it as a very useful and very convenient popular compend of the sciences of which it treats. It is full of information and well illustrated. It deserves a place among the best educational treatises on Astronomy and Physics.

From Prof. W. L. Brown, Oakland College, Mass.

I consider them most admirably suited for the purposes designed by the author—indeed, as the very best popular works on physical science with which I am acquainted. The "Third Course" on Astronomy, is especially valuable; its magnificent engravings and lucid explanations make it a most desirable text-book.

From Prof. R. Z. Mason, McKendree College, Ill.

In my judgment it contains the best selection of compact demonstrations and popular illustrations that we have yet received on the subject. Dr. Lardner has preserved it somewhat from the dry details of Mathematics, and yet there is such a close adherence to severe methods of thought as to satisfy the most rigid and careful analyst.

Lardner’s Meteorology and Astronomy is a fit companion for his First and Second Course. It is wonderfully minute, and yet not prolix. The principles of Astronomy are probably as clearly defined and judiciously arranged in this book as they can be. I expect to introduce it in my school.

From S. Schoeller, Esq., Hanover Academy, Va.

The three volumes constitute a body of information and detail on nearly the whole range of physical science which is not to be found together in any other publication with which I am acquainted. I hope that these works may be the means of inducing many of our youth to devote themselves to the development of the Laws of Nature, and the application of them to industry, and that they may be the vehicle for conveying sound information and food for thought to every man who aspires to be well educated.

From M. Conant, State Normal School, Mass.

This is a treatise admirably adapted to its purpose. For the accurate knowledge it untolds, and the very popular, it is very popular, I think I have met with nothing like it. I shall advise the students of the Normal School to add this to your edition of Lardner’s Mechanics, &c.

From Prof. E. Everett, New Orleans.

I am already acquainted with the merits of this book, having had occasion to consult it in teaching the branches of which it treats, and I cannot give you a stronger assurance of my high opinion of it than the simple fact that I have selected it as the textbook of Physics in the course of study which I have just fixed upon for a new college to be established here.
NEW AND MUCH IMPROVED EDITION.

PHYSICAL GEOGRAPHY.
BY MARY SOMERVILLE.

A new American, from the third and revised London edition.

WITH NOTES AND A GLOSSARY,
BY W. S. W. RUSCHENBERGER, M. D., U. S. NAVY.

In one large royal 12mo. volume, of nearly 600 pages. In extra cloth, $1 25.
Half bound in leather, $1 35.

Eulogy is unnecessary with regard to a work like the present, which has passed through three editions on each side of the Atlantic within the space of a few years. The publishers therefore only consider it necessary to state that the last London edition received a thorough revision at the hands of the author, who introduced whatever improvements and corrections the advance of science rendered desirable; and that the present issue, in addition to this, has had a careful examination on the part of the editor, to adapt it more especially to this country. Great care has been exercised in both the text and the glossary to obtain the accuracy so essential to a work of this nature; and in its present improved and enlarged state, with no corresponding increase of price, it is confidently presented as in every way worthy a continuation of the striking favor with which it has been everywhere received.

From W. H. Allen, President of Girard College, Philada.

I thank you for the "Physical Geography," it is a general text-book in this institution. I have read it and like it so much that I have made it a school-book for my children, whom I am teaching. There is, in my opinion, no work upon that interesting subject which its treatises—Physical Geography—that would make a better text-book in our schools and colleges. I hope it will be adopted as such generally, for you have Americanized it and improved it in other respects.

We have introduced your edition of Mrs. Somerville's "Physical Geography" into our school, and find it an admirable work.

From Thomas Sherwin, High School, Boston.

I hold it in the highest estimation, and am confident that it will prove a very efficient aid in the education of the young, and a source of much interest and instruction to the adult reader.

A COMPLETE COURSE OF NATURAL SCIENCE.

THE BOOK OF NATURE;
AN ELEMENTARY INTRODUCTION TO THE SCIENCES OF Physics, Astronomy, Chemistry, Mineralogy, Geology, Botany, Zoology, and Physiology.

BY FREDERICK SCHOEDLER, Ph. D.,
Professor of the Natural Sciences at Worms.

FIRST AMERICAN EDITION,
WITH NOTES AND A GLOSSARY,
TRANSLATED FROM THE SIXTH GERMAN EDITION,
BY HENRY MEDLOCK, F. C. S., &c.

ILLUSTRATED BY SIX HUNDRED AND SEVENTY-NINE ENGRAVINGS ON WOOD.

In one handsome volume, crown octavo, of about seven hundred large pages, extra cloth. $1 80.

The necessity of some acquaintance with the Natural Sciences is now so universally admitted in all thorough education, while the circle of facts and principles embraced in the study has enlarged so rapidly, that a compendious Manual like the Book of Nature cannot fail to supply a want frequently felt and expressed by a large and growing class.

Composed by the same distinguished author, all the departments have a uniformity of style and illustration which harmoniously link the entire circle together. The utility of such a connected view of the physical sciences, and on such an approved basis, is beyond price; and places their acquisition within the reach of a vastly increased number of inquirers. Not only to such is it valuable, but to those who wish to have at hand the means of refreshing their memories and enlarging their views upon their favorite studies. Of such a book we speak cordially, and would speak more at length, if space permitted. —Southern Methodist Quarterly Review.

From W. II. Allen, President of Girard College, Philada.

Though a very comprehensive book, it contains about as much of the details of natural science as general students in this country have time to study in a regular academical course; and I am so well pleased with it that I shall recommend its use as a text-book in this institution.

From Prof. Johnston, Wesleyan University, Ct.

I do not know of another book in which so much that is important on these subjects can be found in the same space.

From Prof. Allen, Oberlin Institute, Ohio.

As a work for popular instruction in the Natural and Physical Sciences, it certainly is unrivalled, so far as my knowledge extends. It admirably combines perspicuity with brevity; while an excellent judgment and a rare discrimination are manifest in the selection and arrangement of topics, as well as in the description of objects, the illustration of phenomena, and the statement of principles. A more careful perusal of the departments of the work to which my studies have been particularly directed has been abundantly sufficient to satisfy me of its entire reliableness—that the object of the author was not so much to amuse as to instruct.
HERSCHEL'S ASTRONOMY.

OUTLINES OF ASTRONOMY.

BY SIR JOHN F. W. HERSCHEL, BART. F. R. S., &c.

A NEW AMERICAN, FROM THE FOURTH AND REVISED LONDON EDITION.

In one handsome crown octavo volume, with numerous plates and wood-cuts.

Extra cloth, $1 60 ; or, half bound, leather backs and cloth sides, $1 75.

The present work is reprinted from the last London edition, which was carefully revised by the author, and in which he embodies the latest investigations and discoveries. It may therefore be regarded as fully on a level with the most advanced state of the science, and even better adapted than its predecessors, as a full and reliable text-book for advanced classes.

A few commendatory notices are subjoined, from among a large number with which the publishers have been favored.

From Professor D. Olmstead, Yale College.

"A rich mine of all that is most valuable in modern Astronomy."

From Prof. A. Casswel, Brown University, R. I.

"As a work of reference and study for the more advanced pupils, who yet are not prepared to avail themselves of the higher mathematics, I know of no work to be compared with it."

From Prof. Samuel Jones, Jefferson College, Pa.

"This treatise is too well known, and too highly appreciated in the scientific world to need new praise. A distinguishing merit in this, as in the other productions of the author, is that the language in which the profound reasonings of science are conveyed is so perspicuous that the writer's meaning can never be misunderstood."

From Prof. J. F. Crocker, Madison College, Pa.

"I know no treatise on Astronomy comparable to Herschel's Outlines. It is admirably adapted to the necessities of the student. We have adopted it as a text-book in our College."

From Prof. James Curley, Georgetown College.

"As far as I am able to judge, it is the best work of its class in any language."

From Prof. N. Tillinghast, Bridgewater, Mass.

"It would not become me to speak of the scientific merits of such a work by such an author; but I may be allowed to say, that I most earnestly wish that it might supersede every book used as a text-book on Astronomy in all our institutions, except perhaps those where it is studied mathematically."

We now take leave of this remarkable work, which we hold to be, beyond a doubt, the greatest and most remarkable of the works in which the laws of Astronomy and the appearance of the heavens are described to those who are not mathematicians nor observers, and recalled to those who are. It is the reward of men who can descend from the advancement of knowledge to care for its diffusion, that their works are essential to all, that they become the manuals of the proficient as well as the text-books of the learner. —Evangelical Review.

There is, perhaps, no book in the English language on the subject, which, whilst it contains so many of the facts of Astronomy (which it attempts to explain with a suitable technical language as possible), is so attractive in its style, and so clear and forcible in its illustrations.—Evangelical Review.

Probably no book ever written upon any science, embraces within so small a compass an entire epitome of everything known within all its various departments, practical, theoretical, and physical.—Examiner.

ARNOT'S ELEMENTS OF PHYSICS.

ELEMENTS OF PHYSICS; OR, NATURAL PHILOSOPHY, GENERAL AND MEDICAL.

Written for Universal Use in Plain or Non-Technical Language.

BY NEILL ARNOT, M. D.

In one octavo volume, leather, with about two hundred illustrations. $2 50.

NEW PHYSIOLOGICAL TEXT-BOOK.

PHYSIOLOGY OF ANIMAL AND VEGETABLE LIFE. A Popular Treatise on the Phenomena and Functions of Organic Life. To which is prefixed A Brief General View of the Great Departments of Human Knowledge. By J. S. Bushman, M. D. In one handsome royal 12mo. vol., of 324 pages, with over 100 illustrations. 80 cents.

Written by a man of Science, this work, though popular in its form and elementary in its teachings, avoids the objections usually urged against similar treatises, of superficiality and incorrectness. While its language and arrangement are such as to render it easily understood by the youthful student or general reader, its basis is strictly scientific, and on every point it will be found on a level with the most advanced state of knowledge.

MULLER'S PHYSICS.

PRINCIPLES OF PHYSICS AND METEOROLOGY.

BY PROF. J. MULLER.

EDITED, WITH ADDITIONS, BY R. E. GRIFFITH, M. D.

In one large and very handsome octavo volume, with 550 wood-cuts, and two colored plates. $3 50.

BIRD'S NATURAL PHILOSOPHY.

ELEMENTS OF NATURAL PHILOSOPHY; being an Experimental Introduction to the Physicall Sciences. Illustrated with over 300 wood-cuts. By Goldin Bird, M. D., Assistant Physician to Guy's Hospitals. From the Third London edition. In one neat volume, royal 12mo, Extra cloth, $1 25; strong leather, $1 60.
H. St. John, M. D. Illustrated

The delay which has existed in the appearance of this work has been caused by the very thorough revision and remodelling which it has undergone at the hands of the author, and the large number of new illustrations which have been prepared for it. It will, therefore, be found almost a new work, and fully up to the day in every department of the subject, rendering it a reliable text-book for all students engaged in this branch of science. Every effort has been made to render its typographical finish and mechanical execution worthy of its exalted reputation, and creditable to the mechanical arts of this country.

This work stands without its fellow. It is one few men in Europe could have undertaken; it is one, no man, we believe, could have brought to so successful an issue as Dr. Carpenter. We feel that this abstract can give the reader a very imperfect idea of the fulness of the work, and no idea of its unity, of the admirable manner in which material has been brought, from the most various sources, to conduct to its completeness, of the lucidity of the reasoning it contains, or of the clearness of language in which the whole is clothed. Not the profession only, but the scientific world at large, must feel deeply indebted to Dr. Carpenter for this great work. It must, indeed, add largely even to his high reputation.—Med. Times.

CARPENTER ON THE MICROSCOPE.—(Just Issued.)

THE MICROSCOPE AND ITS REVELATIONS. By WILLIAM B. CARPENTER, M. D., author of "Principles of Human Physiology," &c. With an Appendix containing the Applications of the Microscope to Clinical Medicine, &c. By F. G. Smith, M. D. Illustrated by four hundred and thirty-four beautiful engravings on wood. In one large and very handsome octavo volume, of 724 pages, extra cloth, $4.60; leather, $4.80.

Dr. Carpenter's position as a microscopist and physiologist, and his great experience as a teacher, eminently qualify him to produce what has long been wanted—a good text-book on the practical use of the microscope. In the present volume his object has been, as stated in his Preface, "to combine, within a moderate compass, that information with regard to the use of his tools, which is most essential to the working microscopist, with such an account of the objects best fitted for his study, as might qualify him to comprehend what he observes, and might thus prepare him to benefit science, whilst expanding and refreshing his own mind." That he has succeeded in accomplishing this, we are acquainted with his previous laborious labors, and with his previous experience.

Every care has been taken in the mechanical execution of the work, which is confidently presented as no respect inferior to the choicest productions of the London press.
HANDBOOK OF CHEMISTRY, Theoretical, Practical, and Technical. By A. F. ARNOL. F.C.S. and C. L. BLOXAM. With a Recommendatory Preface by Dr. HOFMANN, and numerous illustrations on wood. In one large and handsome octavo volume, of 602 pages, extra cloth.

It must be understood that this is a work fitted for the earnest student, who resolves to pursue for himself a steady search into the chemical mysteries of creation. For such a student the "Handbook" will prove an excellent guide, since he will find in it, not merely the most approved modes of analytical investigation, but descriptions of the apparatus necessary, with such manipulatory details as rendered Faraday's "Chemical Manipulations" so valuable at the time of its publication. Beyond this, the importance of the work is increased by the introduction of much of the technical chemistry of the manufacturer.—Athenæum.

THE PRINCIPAL FORMS OF THE SKELETON, AND THE FORMS AND STRUCTURE OF THE TEETH. By PROFESSOR R. OWEN. In one very handsome royal 12mo. volume, with numerous illustrations on wood.

This volume will present in a concise and popular form a complete view of the most recent state of comparative osteology; the correctness of which is sufficiently vouched for by the name of the distinguished author. A subject of so much interest to the man of science, and more especially to the geologist, cannot fail to attract general attention.

TECHNOLOGY:
OR, CHEMISTRY APPLIED TO THE ARTS AND TO MANUFACTURES. By DR. F. KNAPP. Edited, with numerous Notes and Additions, by DR. EDMUND RONALDS and DR. THOMAS RICHARDSON. With additional Notes by PROF. WALTER R. JOHNSON. In two large and very handsome octavo volumes, with about five hundred splendid illustrations.

PRINCIPLES OF THE MECHANICS
OF MACHINERY AND ENGINEERING. By PROF. JULIUS WEISBACH. Translated and edited by PROF. GOODE, of Glasgow. With Additions, by PROF. WALTER R. JOHNSON. In two large and very handsome octavo volumes, with about one thousand beautiful illustrations.

CARPENTER ON ALCOHOL.

This new edition has been prepared with a view to an extended popular circulation of this valuable work, the notes by DR. Condie containing explanations of the scientific terms employed. Copies in flexible cloth may be had free of postage by mail on remitting 50 cents to the publisher. A very liberal deduction will be made when quantities are taken for distribution by societies or individuals.

DE LA BECHE'S GEOLOGY.
THE GEOLOGICAL OBSERVER. By SIR HENRY T. DE LA BECHE, C. B., F. R. S., Director-General of the Geological Survey of Great Britain. In one large and handsome octavo volume, extra cloth, of seven hundred pages, with over three hundred wood-cuts. This volume will be found to present a very complete summary of what has already been accomplished in the science of geology, while at the same time it indicates to the student the mode and direction in which future researches should be pursued.

BOYLMAN'S HANDBOOK OF PRACTICAL CHEMISTRY, including Analysis. In one neat royal 12mo. volume, extra cloth, with numerous illustrations.

BEALE ON THE LAWS OF HEALTH IN RELATION TO MIND AND BODY.
A Series of Letters from an old Practitioner to a Patient. In one neat royal 12mo. volume, extra cloth.

BUSHNAN'S POPULAR PHYSIOLOGY
OF ANIMAL AND VEGETABLE LIFE. In one handsome royal 12mo. volume of 200 pages, with over 100 engravings on wood. Seep. 10.

PHYSICAL GEOGRAPHY.
By MARY SOMERVILLE. A new American, from the last and Revised London Edition. With Notes and a Glossary, by W. S. W. RUSCHENBERGER, M. D., U. S. N. In one large royal 12mo. volume, extra cloth, (Seep. 8.)

DANA ON ZOOHYTES AND CORALS. Being a portion of the scientific publications of the U. S. Exploring Expedition. In one large quarto volume, extra cloth, with an Atlas of sixty magnificent colored plates, handsomely and strongly bound in half morocco.

EVANS' YOUNG MILLWRIGHT'S AND MILLER'S GUIDE. Fourteenth Edition. Edited by THOMAS F. JONES. In one octavo volume, leather, with numerous plates.

GREGORY'S LETTERS TO A CANDID ENQUIRER ON ANIMAL MAGNETISM. In one large royal 12mo. volume, extra cloth.

HUMBOLDT'S ASPECTS OF NATURE IN DIFFERENT LANDS AND DIFFERENT CLIMATES. Translated by Mrs. SAYR. In one large royal 12mo. volume, extra cloth.

HALE'S ETHNOGRAPHY AND PHILOLOGY OF THE UNITED STATES EXPLORING EXPEDITION. In one large imperial quarto volume, extra cloth.

LARDNER'S NATURAL PHILOSOPHY AND ASTRONOMY. In three very large royal 12mo. vols., of 2008 pages, with 1000 illustrations. Seep. 8.

SCHÖDELLER'S BOOK OF NATURE. A Popular Introduction to the Sciences of Physics, Astronomy, Chemistry, Mineralogy, Geology, Botany, Physiology, and Zoology. In one large crown octavo volume, with nearly 700 illustrations. Seep. 9.
LIVES OF THE QUEENS OF ENGLAND,
FROM THE NORMAN CONQUEST:
WITH ANECDOTES OF THEIR COURTS.

Now first published from Official Records, and other Authentic Documents, Private as well as Public.

NEW EDITION, WITH ADDITIONS AND CORRECTIONS.

BY AGNES STRICKLAND.

Complete in six very handsome crown octavo volumes, containing over thirty-six hundred pages, and for sale in various styles of binding, at very reasonable prices.

The publishers have great pleasure in presenting to the public this work in a complete form. During the long period in which it has been issuing from the press, it has assumed the character of a standard work, and as occupying ground hitherto untouched; as embodying numerous historical facts heretofore unnoticed, and as containing vivid sketches of the characters and manners of the times, with anecdotes, documents, &c. &c., it presents numerous claims on the attention of both the student of history and the desultory reader.

A valuable contribution to historical knowledge. It contains a mass of every kind of historical matter of interest, which industry and research could collect. We have derived much entertainment and instruction from the work.—Adventurers.

This interesting and well-written work, in which the severe truth of history takes almost the wildness of romance, will constitute a valuable addition to our biographical literature.—Morning Herald.

These volumes have the fascination of a romance united to the integrity of history.—Times.

Also, to be had separate,

STRICKLAND'S LIVES OF THE QUEENS OF HENRY VIII., and of his Mother, ELIZABETH OF YORK. Complete in one very neat crown octavo volume, extra cloth, of over four hundred pages.

STRICKLAND'S MEMOIRS OF ELIZABETH, Second Queen Regnant of England and Ireland. Complete in one very neat crown octavo volume, extra cloth, of nearly six hundred pages.

INTRODUCTORY VOLUME TO THE QUEENS OF ENGLAND—(Just Issued.)

LIVES OF THE QUEENS OF ENGLAND BEFORE THE NORMAN CONQUEST.

BY MRS. MATTHEW HALL.

Complete in one handsome crown octavo volume, various styles of binding, to match Miss Strickland's Work.

This book, embracing a period anterior to that selected by Miss Strickland, becomes a necessary introduction to her charming volumes. Those who possess the latter can obtain it bound to match, and in every way uniform in style.

HISTORY OF THE PROTESTANT REFORMATION IN FRANCE. By Mrs. Marsh, author of "Two Old Men's Tales," &c. In two very handsome royal 12mo. volumes, extra cloth.

PULSKY'S MEMOIRS OF AN HUNGARIAN LADY. In one neat royal 12mo. volume, extra cloth.

RUSSEL'S LIFE OF FOX—(Just Issued)

MEMORIALS AND CORRESPONDENCE OF CHARLES JAMES FOX.

Edited by the Rt. Hon. Lord John Russell, M. P. In two handsome royal 12mo. volumes, extra cloth.

The work is deeply interesting, as it throws light upon the career of a great man, and reveals the private sentiments of many eminent British statesmen in regard to our revolutionary struggle, and in regard to the wars waged against the French Republic. The correspondence presents Mr. Fox in the attitude of a friend to the colonists, not only on general principles, but as one whose feelings were strongly enlisted in their cause. There are occasional letters in these volumes, which, if they had fallen into the hands of the British government at that time, would probably have caused the author some trouble, though it was a period when party spirit ran very high, and statesmen took the largest license.—N. Y. Commercial Advertiser.

HISTORY OF TEN YEARS, 1830-1840; OR, FRANCE UNDER LOUIS PHILIPPE. By Louis Blanc. In two handsome volumes, crown Svo., extra cloth.

RANKE'S HISTORY OF THE REFORMATION IN GERMANY. Parts I., II., and III.
Campbell's Chancellors and Chief Justices.

A new volume, now ready.

LIVES OF THE LORD CHANCELLORS
And Keepers of the Great Seal of England,

FROM
THE Earliest Times To THE Reign OF King George IV.

BY Lord Chief-Justice Campbell, A.M., F.R.S.E.

Second American, from the Third London edition.

COMPLETE IN SEVEN HANDSOME CROWN OCTAVO VOLUMES, EXTRA CLOTH, OR HALF MOROCCO.

ALSO, TO MATCH.

LIVES OF THE CHIEF-JUSTICES OF ENGLAND,
From the Norman Conquest to the Death of Lord Tenterden.

In three very neat volumes, crown octavo, extra cloth, or half morocco.

ALSO, NOW READY, AND FOR SALE SEPARATE, TO COMPLETE SETS—

VOL. III., CONTAINING THE LIVES OF LORDS KENYON, ELLENBOROUGH, AND TENTERDEN. Crown Svo., various styles of binding, to match sets.

The price of Vol. III. in extra cloth is $2 00, on receipt of which it will be sent by mail, free of postage, to any address in the United States.

Of the solid merit of the work our judgment may be gathered from what has already been said. We will add, that from its infinite fund of anecdote, and happy variety of style, the book addresses itself with equal claims to the mere general reader, as to the legal or historical inquirer; and while we avoid the stereotyped commonplace of affirming that no library can be complete without it, we feel constrained to bestow a higher tribute by pronouncing it entitled to a distinguished place on the shelves of every scholar who is fortunate enough to possess it.—Fraser's Magazine.

Some days of unexpected leisure have given me an opportunity of reading the 'Lives of the Lord Chancellors,' and I feel irresistibly impelled to signify to your Lordship the pleasure and profit which the perusal of the volumes has afforded me. The subject is a noble one, and has been treated according to its merits. The work may be read with advantage by all political and all professional men. The lives which have most interested me are those of Ellsmere and Bacon, Charles York and the incomparable Somers.—Daniel Webster.

A work of sterling merit—one of very great labor, of richly diversified interest, and of lasting value and estimation.—Quarterly Review.

I scarcely need advise every reader to consult Lord Campbell's excellent work.—Macaulay's History of England.

Lord Campbell has rendered a very acceptable service, not only to the legal profession, but to the history of the country.—Law Review.

We have not the least hesitation in saying that these Lives will be found to deserve a solid and permanent place in English biography.—Examiner.

A work which will take its place in our libraries as one of the most brilliant and valuable contributions to the literature of the present day.—Atheneum.

The brilliant success of this work in England is by no means greater than its merits. It is certainly the most brilliant contribution to English history made within our recollection. It has the charm and freedom of Biography combined with the elaborate and careful comprehensiveness of History.—N. Y. Tribune.

LECTURES ON ANCIENT HISTORY:

COMPRISING

The History of the Asiatic Nations, the Egyptians, Greeks, Macedonians, and Carthaginians.

BY B. G. NIEBUHR.

TRANSLATED FROM THE GERMAN, BY DR. L. SCHMITZ.

WITH ADDITIONS FROM MRS. IN THE EXCLUSIVE POSSESSION OF THE EDITOR.

In three very handsome crown octavo volumes, extra cloth.

The extraordinary familiarity of Niebuhr with the literatures of all nations, his profound knowledge of all political and human affairs, derived not only from books, but from practical life, and his brilliant powers of combination, present to us in these Lectures, as in those on Roman history, such an abundance of new ideas, startling conceptions and opinions, as are rarely to be met with in any other work. They are of the highest importance and interest to all who are engaged in the study, not only of antiquity, but of any period in the history of man.
NARRATIVE OF THE UNITED STATES EXPEDITION
TO THE DEAD SEA AND RIVER JORDAN.

BY W. F. LYNCH, U. S. N.,
Commander of the Expedition.

In one very large and handsome octavo volume with twenty-eight beautiful plates, and two maps.

This book, so long and anxiously expected, fully sustains the hopes of the most sanguine and fastidious. It is truly a magnificent work. The type, paper, binding, style, and execution, are all of the best and highest character, as are also the maps and engravings. It will do more to elevate the character of our national literature than any work that has appeared for years. The intrinsic interest of the subject will give it popularity and immortality at once. It must be read extensively, and valued, both in this and other countries.—Lady's Book.

Also, to be had—

CONDENSED EDITION, in one neat royal 12mo. volume, extra cloth, with a map.

MEMOIRS OF THE LIFE OF WILLIAM WIRT.

BY THE HON. JOHN P. KENNEDY.
SECOND EDITION, REVISED.
WITH A PORTRAIT, AND FAC-SIMILE OF A LETTER FROM JOHN ADAMS.

In two large and handsome royal 12mo. volumes, extra cloth.

In its present neat and convenient form, the work is eminently fitted to assume the position which it merits as a book for every parlor-table and for every fireside where there is an appreciation of the kindliness and manliness, the intellect and the affection, the wit and liveliness which rendered William Wirt at once so eminent in the world, so brilliant in society, and so loving and loved in the retirement of his domestic circle. Uniting all these attractions, it cannot fail to find a place in every private and public library, and in all collections of books for the use of schools and colleges, for the young can have before them no brighter example of what can be accomplished by industry and resolution, than the life of William Wirt, as unconsciously related by himself in these volumes.

DON QUIXOTE DE LA MANCHA. Translated from the Spanish of Miguel de Cervantes Saavedra, by CHARLES JARVIS, Esq. Carefully revised and corrected, with a Memoir of the Author and a notice of his works. With numerous illustrations, by Tony Johannot. In two beautifully printed volumes, crown octavo, various styles of binding.

The handsome execution of this work, the numerous spirited illustrations with which it abounds, and the very low price at which it is offered, render it a most desirable library edition for all admirers of the immortal Cervantes.

PICCIOLA, THE PRISONER OF FENESTRELLA, OR, CAPTIVITY CAPTIVE. By X. B. SAINTINE.

New edition, with illustrations. In one very neat royal 12mo. volume, paper covers, price 50 cents, or extra cloth.

YOUATT AND LEWIS ON THE DOG.

THE DOG. By William Youatt. Edited by E. J. Lewis, M. D. With numerous and beautiful illustrations. In one very handsome volume, crown 8vo., crimson cloth, gilt.

YOUATT AND SKINNER ON THE HORSE.

THE HORSE. By William Youatt. A new edition, with numerous illustrations; together with a general history of the Horse; a Dissertation on the American Trotting Horse; how trained and jockeyed; an Account of his Remarkable Performances; and an Essay on the Ass and the Mule. By J. S. Skinner, Assistant Postmaster-General, and Editor of the Turf Register. In one handsome octavo volume, extra cloth, with numerous illustrations. Price $1 60.

THE LANGUAGE OF FLOWERS, with Illustrative Poetry. To which are now added the Calendar of Flowers, and the Dial of Flowers. Ninth American, from the Tenth London edition. Revised by the editor of "Forget-me-Not." In one elegant royal 13mo. volume, extra crimson cloth, gilt, with beautiful colored plates.

GRAHAME'S UNITED STATES.

HISTORY OF THE UNITED STATES, from the Plantation of the British Colonies till their Assumption of Independence. Second American edition, enlarged and amended, with a Memoir by President Quincy, and a Portrait of the author. In two very large octavo volumes, extra cloth.

WILLIAM PENN:

AN HISTORICAL BIOGRAPHY, from new sources; with an extra Chapter on the Macaulay Charges." By W. HEYWORTH DIXON, author of "John Howard, and the Prison World of Europe," &c. In one very neat volume, royal 12mo., extra cloth.
SMALL BOOKS ON GREAT SUBJECTS:
A Series of Essays, by a few Well-Wishers to Knowledge.

FLETCHER'S NOTES FROM NINEVEH, AND TRAVELS IN MESOPOTAMIA, ASSYRIA, AND SYRIA. In one neat royal 12mo. volume, extra cloth.

MODERN COOKERY, comprising the bones and flesh and blood of times, ages, and the sentiments of the metaphysician; bound to no particularship and pledged to no theories; he has enjoyed the advantages of knowledge, immortality, and singleness; and the result is a faithful portrait of the times, animated with a wise and truthful spirit, and showing in all its colors and textures the hand of a skilful master. — Philadelphia North American.

ACTON'S COOKERY.
MODERN COOKERY IN ALL ITS BRANCHES, reduced to a System of Easy Practice, for the Use of Private Families; in a Series of Practical Receipts, all of which are given with the most minute exactness. By ELIZA ACTON. With numerous wood-cut illustrations; to which is added a Table of Weights and Measures. The whole revised, and prepared for American housekeepers, by Mrs. SARAH J. HALE. From the second London edition. In one large 12mo. vol.

FLETCHER'S NOTES FROM NINEVEH, AND TRAVELS IN MESOPOTAMIA, ASSYRIA, AND SYRIA. In one neat royal 12mo. volume, extra cloth.

SMALL BOOKS ON GREAT SUBJECTS:
A Series of Essays, by a few Well-Wishers to Knowledge. In three neat royal 18mo. volumes, extra cloth.
