**Note:**
- The table above shows data for various dates and Venus intensities.
- The data seems to be related to astronomical observations or measurements.

**Explanation:***
- The table entries indicate a pattern or measurement for each date, with '+' and '-' symbols possibly representing positive or negative results.
- The values on the right side of the table (1/640 to 1/1280) might be ratios or normalized intensities.
Date: 16-XI-50

POULTRY DISEASES

Date 27-1-51     Accession No. 8172
From Frank Abbott
Address Geneva St, Jamaica, N.Y., U.S.A.
Breed New Zealand White Rabbit
No. 1     Age 10 mos.
Other Material Liver submitted
          White streak - near margins
          - accept demonstration
          Cult on blood agar - NSG
Diagnosis E. stiedae
Reported Date End By Sig
Date: 29-7-51
Accession No.: 3173

From: C. S. Nauman

Address: R.D. 1, North Tonawanda, N.Y.

Breed: Wyandotte x Rock

No.: 24
Age: 3 wk

Other Material: Wience [?], Vineland, N.J.

1/250. Some sneezing & gasping since then.

Had infectious bronchitis July 1950 - Died.

Previously exposed not affected at present time

Diagnosed with Irgin Rex vaccine in Nov.

Blood for HFI

Diagnosis: E. tenella

Reported. Date: 2-8-51 By: [Signature]

(?)
Turkey from Ethelma Hatch - McLeanboro ill
Red x Leghorn
1/100 - Few with ruffled feathers
Few excepts - etc.
