Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 20, 1930 Accession No. 7038

From J.W. & Wilson & Son

Address Newark, Valley

Breed S.C.W.L. No. 4 Age 8 weeks.

Other Material

1. Duodenal coccidiosis

2. Cecal coccidiosis

3. Cecal coccidiosis

4. cecal coccidiosis.

Diagnosis Coccidiosis.

Reported. Date May 20. 1930 By W.H.J.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 20, 1930 Accession No. 7039

From J B Doig

Address Winchester Ky.

Breed S C W L. No. 4 Age Chicks

Other Material

Cultures + Lung lesions BWD.

Diagnosis BWD.

Reported. Date May 21, 1930 By E. F. B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 20, 1930 Accession No. 7040

From Mrs. E E Ackley

Address Avoca N Y

Breed Barred rock No. 4 Age chicks

Other Material

cultures - Leg lesions BWD.

Bact. [illegible]

Diagnosis BWD.

Reported. Date May 23 By EB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 20, 1930 Accession No. 7041

From Jeff James E Rice

Address Egg + Apple Farm - Jamesburg N J

Breed 3 S C W E No. 3 Age hens

Other Material

32794 - Large mass of coagulated yolk material in the abdominal cavity

34109 Nasal sinus filled with pus Bird in thin condition Beaded ribs evidence of previous rachitis Typical pullorum injected Tray

40700 negative

Diagnosis As above

Reported. Date May 21 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 21, 1930 Accession No. 7042

From Jesse W. MacConnell

Address Newburg RR#3

Breed S.C.W.L. No. 4 Age four days.

Other Material

Autopsies - suspicious lung lesions.

Cultures - B. pullorum

Diagnosis Pullorum disease

Reported. Date May 26, 1930 By E.L.B.
eeb.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 21, 1930 Accession No. 7043

From Clarence Johnson

Address Dean Bureau - Chemistry

Breed B. P. R. No. 5 Age ~~Farmers~~

Other Material

Autopsies - straw colored clear fluid in peritoneal cavity, liver swollen and firm.

Cultures - coli.

Diagnosis Ps. cholera (Phone)

Reported. Date May 26, By C C B

also written E. R. A. - C C B

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 21, 1930 Accession No. 7044

From D. Drayton

Address Rushville R#2

Breed S.C.W.L. No. 1 Age Juvenile.

Other Material

Autopsy - liver and cecal lesions of Blackhead.

Diagnosis Enteritis - Infectious.

Reported. Date May 22 By EWB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 21, 1930 Accession No. 7045

From Dr. Arch Dixon

Address Jeffersonville, N.Y.

Breed S.C.W.L. No. 4 Age Hus-

Other Material

#1- pec head- duodenal coccidiosis - few large roundworms.

#2- white - duodenal coccidiosis. few roundworms.

#3- malignant growth in lungs, liver, spleen, ovary and kidneys.

#4- universal cyst.

Diagnosis Parasites.

Reported. Date May 22 By EBB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 21, 1930 Accession No. 7046

From Fowler

Address City

Breed S.C.W.L. No. 3 Age four days.

Other Material

Autopsies - per lesions.

Cultures - negs

Diagnosis Mare made

Reported. Date By

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 23, 1930 Accession No. 7047

From B. R. Field

Address Rose Hill — Waverly, N. Y.

Breed S. C. R. I. R. No. 1 Age Ten.

Other Material

Mrs. Randall.

Autopsy — good flesh — fowl cholera,

confirmed yolk.

Diagnosis Peritonitis.

Reported. Date May 23 By EAB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 22, 1930 Accession No. 7048

From L. C. Morris

Address Poultry Dept.

Breed S. C. W. L. No. 1 Age Year

Other Material

Autopsy - ulcerating skin tumor. Liver, spleen and kidneys show some infiltration.

Diagnosis Tumor.

Reported. Date May 23 By EDB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 22, 1930 Accession No. 7049

From Francis F. Brown

Address Lake, N. Y.

Breed R. I. R. No. 1 Age Young

Other Material

Autopsy - catarrhal enteritis.

Diagnosis No value

Reported. Date May 23 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 22, 1930 Accession No. 7050

From Allen F. Rogers

Address Williamsville, N. Y.

Breed B. P. R. No. 1 Age 9 wks.

Other Material —

Many sparingly scattered and lower quantities.

Diagnosis Enteritis

Reported. Date May 23 By EBB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 22, 1930 Accession No. 7051

From Mrs. Ralph Pierce

Address Mt. Kisco, N. Y.

Breed S.C. W. L. No. 2 Age ~~four days~~

Other Material

Autopsies - Young Leghorns.

Cultures - Bacillary Pullorum

Diagnosis Pullorum disease

Reported. Date May 26, 1930 By E. L. B. elb.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 22, 1930 Accession No. 7052

From E. Henderson

Address Monticello, N. Y.

Breed R. I. R. No. 4 Age Sundays.

Other Material

Autopsies - Lung lesions.

Cultures - B. sanguinarium

Diagnosis Bacillosis Disease

Reported. Date May 26, 1930 By E. L. P. obe.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 22, 1930 Accession No. 7053

From Bert Ring

Address Smyrna, N. Y.

Breed S.C.W.L. No. 1 Age 1 yr

Other Material

Autopsy - nasal chambers filled with purulent material.

Diagnosis Ab. coryza

Reported. Date May 23 By EBB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 22, 1930 Accession No. 7054

From J. M. Ludwig

Address Waverly, N. Y.

Breed S. C. W. L. No. 2 Age Pullets.

Other Material

#1 - Duodenal coccidiosis.

#2 - nuc.

Diagnosis Coccidiosis

Reported. Date May 24, 1930 By E. L. A. cb.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 22, 1930 Accession No. 7055

From D. E. Shipley

Address Farm Bureau - Batavia

Breed S.C. W. L. No. 2 Age Hens.

Other Material

#1- Mic. tuberculosis.

#2- Mic. tuberculosis - pullorum

pericarditis. Ceca ulcerating.

Diagnosis Mic. tuberculosis

Reported. Date May 23 By EVB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 23, 1930 Accession No. 7056

From J. M. Ludwig

Address Waverly, N. Y.

Breed R. I. R. No. 4 Age 3 wks.

Other Material

#1- Suspicious lung lesion.

#2-#3- Crushed sternum.

#4- preg.

Cult - Bact. Pullorum.

Diagnosis Pullorum Infection.

Reported. Date May 28 By EWB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 23, 1930 Accession No. 7057

From L. M. Ludwig

Address Waverly, N. Y.

Breed S. C. W. L. No. 6 Age 6 wks.

Other Material

#1, #2, #3 – Blackhead lesions.

#4 – enlarged liver – cult – neg.

#5 + #6 – neg.

Stunted & poor growth & deformity.

Diagnosis As above

Reported. Date May 28 By EBB

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date May 23, 1930 Accession No. 7058

From Murray Couch

Address Odessa, N. Y.

Breed S. C. W. L. No. 2 Age ~~pullet~~ hen.

Other Material

#1 - good flesh - intestines - ruptured yolk.

#2 - good flesh - tear on lymphoma of the cardiac.

Cult. #1 —

Diagnosis —

Reported. Date By Carl (Ellis)

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 23, 1930 Accession No. 7059

From Harold W. Lewis

Address Bainbridge N. Y.

Breed R. I. R. No. 3 Age Chicks

Other Material No record

cultures - Neg.

Diagnosis Mass made

Reported. Date May 26, 1930 By E. L. B.
C.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 23, 1930 Accession No. 7060

From Dr. H. W. Sutton

Address Ulysses.

Breed S.C.W.L. No. 1 Age Juvenile.

Other Material

E Lockhead.

Diagnosis No colonies

Reported. Date May 26, 1930 By E. L. H. cor

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 23, 1930. Accession No. 7061

From Thos. J. McGrath

Address Valley Falls N.Y. R.F.D. #1

Breed R. I. R. No. 4 Age Chicks.

Other Material Decomposing

Lung lesions.

Cultures - Bact. pullorum

Diagnosis Pullorum disease

Reported. Date May 27 By EWB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 23, 1930 Accession No. 7062

From Oleans Co. Farm Bureau

Address Albion N. Y.

Breed Barred Rocks No. 2 Age ~~Chicks~~ Few weeks

Other Material Both sacrificed

Both negative for parasites.

One showed large ~~heart~~ liver

Probably nutritional.

Diagnosis No value

Reported. Date May 24 By EBS (card)

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 23, 1920 Accession No. 7063

From Floyd E. Johnson

Address Frewsburg N.Y.

Breed S.C.W.L. No. 2 Age Five weeks

Other Material Hemorrhagic enteritis.

Apparently duodenal coccidiosis.

Diagnosis Coccidiosis

Reported. Date May 26, 1920 By E. L. P. ele.

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date May 23, 1930 Accession No. 7064

From T. Kennedy

Address Westdale, N.Y.

Breed S. C. W. L. No. 3 Age Hen

Other Material Sacrificed

#1, Headed ibe

Egg material in abdominal cavity

#2 & 3 showed a few round worms.

Diagnosis Roundworms

Reported. Date May 26, 1930 By E. L. B.
C.E.B.

Department of Pathology and Bacteriology
POULTRY DISEASES

Date May 23, 1930 Accession No. 7065

From Edward W. Seidler

Address Germantown N. Y.

Breed B.R. I.S.C. W.C. No. 2 Age Hens

Other Material Barred rock too decomposed for examination.

Package addressed to Poultry Dept.

Leghorn decomposed also.

Diagnosis Impossible

Reported. Date May 26, 1930 By E.L.B. C.E.C.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 23, 1930 Accession No. 7066

From Albert Breiderhoff

Address Camillus, N. Y.

Breed S. C. W. L. No. 8 Age Chicks

Other Material Lung lesions

Cultures - Bact. pullorum

Diagnosis Pullorum disease

Reported. Date May 27 By EWB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 23, 1930 Accession No. 7067

From Herbert L. Penn.

Address Elmora, N.Y.

Breed S.C.W.L. No. 3 Age Chicks

Other Material Chicks alive & fairly lively.
No lesions
Cultures — neg.

Diagnosis Normal

Reported. Date May 26, 1930 By E.L.K.
cc

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 24, 1930 Accession No. 7068

From A. H. Zinger

Address Hudson, Mich.

Breed R. I. R. No. 2 Age four weeks.

Other Material

Enlarged liver - leg weakness -

Autopsy - pneg.

Diagnosis Nutritional.

Reported. Date May 26, 1930 By C. R. B.
C.O.E.

Department of Pathology and Bacteriology
POULTRY DISEASES

Date May 24, 1930 Accession No. 7069

From H. L. Page

Address Oswego N. Y.

Breed R. I. R. No. 2 Age Five weeks

Other Material decomposed & full of maggots.

Diagnosis unsuitable.

Reported. Date May 26, 1930 By E. L. H. COE.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 24, 1930 Accession No. 7070

From W. H. Palmer

Address Tremansburg, N. Y. R. F. D.

Breed S. C. W. L. No. 5 Age 5-6 wks

Other Material Three showed suspicious lesions of blackhead in the ceaca. Livers cultured — Neg.

Diagnosis [illegible]

Reported. Date May 26, 1930 By E. L. B. C.E.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 26, 1930 Accession No. 7071

From X

Address X

Breed S.C.W.L. No. 6 Age 4 wks.

Other Material

Autopsy - Intestines + gastritis - slight nat.

Diagnosis As above

Reported. Date ← By Carl Ellis ←

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 26, 1930 Accession No. 7072

From Clark Dunman

Address 207 N. Fairview St. City

Breed ..... No. ..... Age .....

Other Material liver - kidney

infiltrated with small light

areas -

Diagnosis Leukosis.

Reported. Date May 27 By EBB

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date May 26, 1930 Accession No. 7073

From Mrs. F. E. Crabtree

Address Morris, N. Y.

Breed S.C.W.L. No. 2 Age 2 wks.

Other Material

decomposed.

Diagnosis Infantile

Reported. Date May 27 By E.B.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 26, 1930 Accession No. 7074

From Mrs. H. A. Mountain

Address Cortland R#1

Breed B.P.R. No. 2 Age 4 weeks.

Other Material

Autopsies - Lung lesions.

Cultures -

Diagnosis Pullorum Disease

Reported. Date May 27 By EAB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 26, 1930 Accession No. 7075

From Mrs. Clarence H. Smith

Address Lawnsville, N. J.

Breed S.C.W. Ds No. 2 Age Pullets

Other Material

♀ (live) - pure. Tetrameres.

♀ (dead) - M. Cinerta - Lawnsville.

Diagnosis Cinerta

Reported. Date May 27 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 26, 1930 Accession No. 7076

From [illegible]

Address Central Square

Breed R. I. R. No. 1 Age Hen

Other Material

Autopsy — Thin flesh — Intestines contained — fibrous adhesions Cultures

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 27, 1930 Accession No. 7077

From J B W Limberg

Address RFD, Cohoes N.Y

Breed Turkeys No. 2 Age ~~chicks~~ poults

Other Material

#1 Subcutaneous edema - lungs edematous catarrhal enteritis culture = B. sulbarum

#2 lungs edematous + catarrhal enteritis

Diagnosis Sulbarum hepatitis

Reported. Date May 30 By EDB

Department of Pathology and Bacteriology
POULTRY DISEASES

Date May 27, 1930 Accession No. 7078

From Louis Mandl

Address Callicoon N.Y.

Breed S.C.W.L. No. 2 Age chicks

Other Material

1 caeca hemorrhagic - catarrhal enteritis - coccysts present.

#2 caeca hemorrhagic catarrhal enteritis. unable to demonstrate coccysts. Not diagnostic of fleck condition.

Diagnosis Coccidiosis ?

Reported. Date May 28 By EBB

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date May 27, 1930 Accession No. 7079

From J. H. Graham

Address R.F.D. - Ithaca N.Y.

Breed No. Age

Other Material chicken - previously autopsied

The peritoneum is covered with a white lymphoid growth nodules in clusters.

Diagnosis Neoplasm.

Reported. Date May 28 By EWB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 27, 1930 Accession No. 7080

From C. C. Grant Forrard

Address 762 Harper St. Elmira N.Y.

Breed 1 c c w l. No. 1 Age chick

Other Material

Decomposing - cultures no lesions.

Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date May 30 By E.B.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 27, 1930 Accession No. 7081

From M. F Mansfield.

Address Ass. Co. Agent. Oswego N Y.

Breed R I R. No. 13 Age chicks

Other Material

cultures - no lesions found.

- Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date May 30 By E B

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 27, 1930 Accession No. 7082

From H. G. Wuerbach + Sons -

Address Westfield N.Y.

Breed SCWL No. 2 Age 15 weeks.

Other Material

#1 Pericarditis - cultures - examined. - Bad. sanguinarum from pericardium

2 Died: no lesions - examination for parasites negative. no lesions - Liver cultures.

Diagnosis Streptococcus

Reported. Date May 30 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 27, 1930 Accession No. 7083

From Genesee County Farm Bureau

Address Batavia N.Y.

Breed 3 SCWL No. 3 Age chicks

Other Material — Internal organs.

All birds show nasal chambers filled with purulent material. Some enteritis but unable to demonstrate oocysts.

Internal Organs. Liver — hr lesions

Spleen. mottled appearance.

Foreign body consist. of clot of blood.

Diagnosis Resp.

Reported. Date May 28 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 28, 1930 Accession No. 7084

From Miller L. Fleming

Address Park View Poultry Farm Lowville N.Y

Breed S C W L. No. 2 Age chicks

Other Material

no evidence of coccidiosis

no lesions of BWD - cultures —

Diagnosis None made

Reported. Date June 4 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 28, 1930 Accession No. 7085

From Mrs. James Ross.

Address Spencer N.Y.

Breed SCWL No. 2 o 1 Age 3 weeks & 2 week.

Other Material

(1) 2 SCWL 3 weeks. Large mortality. cultures
from cases lung lesions.
- Edd Guilbreau

(2) 1 SCWL 2 weeks - small mortality. cultures
cases filled with coagulated milk.
- Edd Guilbreau.

Diagnosis Pullorum disease

Reported. Date June 4 By EGB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 28, 1930 Accession No. 7086

From Mrs. Nancy Selfridge

Address South Hartford, N.Y.

Breed R.I.R. No. 2 Age chicks

Other Material

cultures - no lesions of B.W.D.

Diagnosis Normal growths

Reported. Date May 28 By EWB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 28, 1920 Accession No. 7087

From John Patterson

Address Clayton N.Y.

Breed R.I.R. No. 10 Age chicks

Other Material

cultures - Bact. pullorum

Lung lesions of B.W.D.

Diagnosis Pullorum disease

Reported. Date June 4 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 28/1930 Accession No. 7088

From Leland Close

Address Locke N.Y.

Breed R.I.R. No. 2 Age 8 weeks

Other Material

Liver cultured on both - also heart blood on one (number II) - good flesh - no lesions.

Diagnosis None made

Reported. Date May 30 By ELB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 28/1930 Accession No. 7089

From Lewis Thompkins.

Address Berkshire N.Y.

Breed S.C.W.L. No. 4 Age 4 weeks

Other Material

1 live - 3 dead -

Coccysts in coeca - Coccidiosis

Diagnosis Coccidiosis.

Reported. Date Same day By [illegible]

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 29/1930. Accession No. 7090

From H. J. Brown

Address Smithville Flats. N.Y.

Breed S.C.W.L. No. 9 Age 6 weeks.

Other Material

Duodenum coccidiosis -

Diagnosis As above

Reported. Date May 30 By ELB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 29/1930 Accession No. 7091

From Eugene Beaumont.

Address R.F.D #2 – Peru. N.Y.

Breed S.C. W.L. No. 1 Age pullet

Other Material

Duodenum/coccidiosis

Diagnosis As above

Reported. Date May 30 By E.B.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 29 1930 Accession No. 7092

From Bert King.

Address Smyrna. N.Y.

Breed S.C.W.L. No. 4 Age Pullets.

Other Material

1 - Blind - was sacrificed - macro tape worms.

2 - " " " " -

3 - Liver and spleen infiltrated with lymphoid tissue, - macro tape worms blind was sacrificed

4 - Blind, - was sacrificed - macros tape worms - all in good flesh

Diagnosis Parasitism

Reported. Date May 30 By E B

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 29/1930 Accession No. 7093

From L. M. Ludwig. (M. C. Cole)

Address Tioga Empire Feed – Waverly N.Y.

POULTRY DISEASES

Date May 29/1930 Accession No. 7097

From Thos. Edwards.

Address RD #3 - Brewster. N.Y.

Breed S.C.W.L. No. 2 Age chicks

Other Material

Livers cultured - no lesions.

Pullorum

Diagnosis Pullorum disease

Reported. Date June 4 By EB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 29/1930 Accession No. 7098

From G. H. Finigan

Address R. F. D #2 - Hudson N. Y.

Breed R I R and B R No. 4 Age chicks

Other Material

Lot 1 - liver cultured - no lesions. - cult-orig.

Lot 2 - liver cultured - lung and heart lesions - Pullorum

Diagnosis Pullorum Disease

Reported. Date June 4 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 29/1930 Accession No. 7099

From J. B. Fries.

Address Valmyra. N. Y.

Breed S. C. W. L. No. 2 Age chick.

Other Material

Decomposed — no lesions

Diagnosis no lesions

Reported. Date May 30 By E L B

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 29/1930 Accession No. 7100

From Orleans County Farm Bureau

Address Albion. N.Y.

Breed B. R. No. 8 Age chicks

Other Material (All dead)

Liver cultured on two - hemorrhagic enteritis - liver show white lesions on three - no parasites

Cultures - Pullorum

Diagnosis Pullorum disease

Reported. Date June 4 By EB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 29/1930 Accession No. 7101

From Carl Wolfram.

Address Garrison. N. Y.

Breed S.C.W.L. No. 1 Age Pullet.

Other Material

Sacrificed – many oocysts in cocca-
cocca filled with basal material –

Diagnosis Coccidiosis

Reported. Date May 30 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 29/1930 Accession No. 7102

From M. F. Thompson

Address Otsego Farm Bureau Cooperative N.Y.

Breed S.C. W. L. No. 3 Age chicks

Other Material

One dead - 2 live were sacrificed -
Dead to decomposed for lesions
Two sacrificed - negative examination

Diagnosis Mesa Suada

Reported. Date May 30 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 30, 1930 Accession No. 7103

From Byron H Potts

Address Camden, N. Y. R.D. #2

Breed Barred Rock No. 1 Age 4 months.

Other Material

Tumor of Proventriculus which was enlarged & impacted.

Diagnosis Tumor

Reported. Date June 4 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 31, 1930 Accession No. 7104

From Mr. C. A. Lueder

Address Jacksonville

Breed S. C. W. L. No. 1. Age 8 wks

Other Material

Coccidiosis

Many oocysts in cea.

Diagnosis Coccidiosis Early

Reported. Date May 31, 1930 By C C B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date May 31, 1930 Accession No. 7105

From Mr. L. S. Taber

Address Penfield N. Y.

Breed J. C. W. L. No. 2 Age 5-wks

Other Material

Many oocytes in ceca.
Coccidiosis

Diagnosis Coccidiosis

Reported. Date May 31, 1930 By CCC (orally)

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date May 31, 1930 Accession No. 7106

From Leon E. Smith

Address Little York, N. Y.

Breed S. C. W. L. No. 1 Age 12 wks.

Other Material

Entero-hepatitis involving both liver & ceca.

Diagnosis Blackhead. (orally)

Reported. Date May 31, By C.C.B.

Department of Pathology and Bacteriology

189

POULTRY DISEASES

Date June 1/1930 Accession No. 7107

From Norman Hennig.

Address Stafford. N.Y.

Breed B. O. P. No. 2 Age 4 weeks.

Other Material

Liver cultured - suspicious lung lesions — Bact. Pullorum.

Diagnosis Pullorum disease

Reported. Date June 4 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 1/1930 Accession No. 7108

From L. Patch.

Address Binghamton. N.Y. R 2.

Breed S.C.W.L. No. 6 Age 4 week.

Other Material

Liver cultured. — no lesions

— Bact. pullorum.

Diagnosis Pullorum disease

Reported. Date June 4 By EB

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date June 2/1930 Accession No. 7109

From S. M. Vaughn.

Address Lunenburg N.S.

Breed S.C.W.L. and W.P.R. No. 5 Age chicks

Other Material

(4) S.C.W.L. - liver cultured - lung lesions — cult — neg.

W.P.R. & R. - liver cultured - no lesions cult — Staph. aureus

Diagnosis Bullorum disease

Reported. Date June 5 By EMB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 2/1930 Accession No. 7110

From Chas. Wittis Co. B. K. Field.

Address Kasco Mills - Waverly. N.Y.

Breed S. C. W. L. - No. 3 Age chicks.

Other Material

Livers cultured - lung lesions

- Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 5 By EWB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 21 1930 Accession No. 7111

From W. J. Knickerbocker

Address R. F. D. 2 – Pine Plains. N. Y.

Breed ~~S.C.~~ W. L. & B. R. No. 2 Age ~~Pullets~~ chick

Other Material

Liver cultured – lung lesions

– Bact. Pullorum –

Diagnosis Pullorum disease

Reported. Date June 6 By EMB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 2 1930 Accession No. 7112

From A. Kobel

Address Penfield. N.Y.

Breed S. C. W. L. No. 1 Age pullet

Other Material

Sacrificed - good flesh - intestine full with white diarhea - duodenum blood spots - nephritis - look to be nutrition trouble

Diagnosis Coccidiosis

Reported. Date June 4 By E B

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 2/1920 Accession No. 7113

From Chas. Desmond

Address Clyde. N.Y.

Breed S.C.W.L. No. 1 Age pullet

Other Material

Evisceration — rupture gall bladder?

Diagnosis Abscess

Reported. Date June 4 By EB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 3, 1930 Accession No. 7114

From Dr. J. W. Harris

Address Elbridge, N. Y.

Breed ..... No. ..... Age .....

Other Material - Intestine -
Intestine wall dried - Intestine
affected on a Capillaria.

Diagnosis As above

Reported. Date June 4 By EWB

Department of Pathology and Bacteriology 169

POULTRY DISEASES

Date June 3/1930 Accession No. 7115

From H. Hale

Address Newburgh N.Y.

Breed S.C.W.L. No. 4 Age chicks

Other Material

Liver cultured - suspicious lung lesions - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 6 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 3/1930 Accession No. 7116

From C. D. Hammond

Address R. #5 - Pulaski N.Y.

Breed S.C. W.L. No. 2 Age chick.

Other Material

Liver cultured - suspicious aspergillus lesions - C.D. Hammond

Diagnosis Pulmonary disease

Reported. Date June 6 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 3/1930 Accession No. 7117

From Ed Seidler

Address Germantown N. Y.

Breed R-C-R No. 1 Age Hen

Other Material

Pullorum infection lesions on ovary
impacted oviduct - suspicious le-
sions on heart - heart and liver
cultured - good flesh
Heart cultures - pullorum

Diagnosis Pullorum inf.

Reported. Date June 9 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 3/1930 Accession No. 7118

From Orleans County Farm Bureau

Address Albion. N.Y.

Breed S.C. W.L. No. 1 Age Pullet.

Other Material

Emaciation Bled and sacrificed — Tuberculosis.

Diagnosis B.B.

Reported. Date June 4 By EB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 4, 1930 Accession No. 7119

From Catskill Hdw. & Hdr. Co.

Address Catskill, N. Y.

Breed R. I. R. No. 2 Age four days.

Other Material

Suspicious lung lesion.

Cultures — neg.

Diagnosis Pullorum Disease

Reported. Date June 5 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 4, 1930 Accession No. 7120

From Wyoming Co. Farm Bureau

Address Warsaw, N. Y.

Breed D No. 1 Age Pullet

Other Material

Autopsy - pus lesions.

Culture pneg.

Diagnosis Pneumonia

Reported. Date June 5 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 4, 1930 Accession No. 7121

From D. C. Previlliger

Address Delaware

Breed ..... No. 1 Age Grown

Other Material

Autopsy - virgin and unfasted with fibrous material.

Diagnosis Sarcoma

Reported. Date June 5 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 4, 1930 Accession No. 7122

From Mrs. Frank Stamer

Address Lodi, N. J.

Breed S.C.W.L. No. 5 Age four days.

Other Material

Autopsies - Lung lesions.

Cultures - Pullorum

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 4, 1930 Accession No. 7123

From Chas H. Graham

Address Delaware R.#2.

Breed ..... No. ..... Age .....

Other Material Liver.

Necropsy unsatisfactory.

Diagnosis Not obtained

Reported. Date June 5 By EB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 4, 1930 Accession No. 7124

From Ontario Co. Farm Bureau

Address Canandaigua, N. Y.

Breed B. R. No. 1 Age Two

Other Material

Autopsy - visceral type.

Diagnosis Ulc. colon

Reported. Date June 5 By EBB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 4, 1930 Accession No. 7125

From Karl Wolfram % Ted Darling

Address Harrison, N. Y.

Breed S.C.W.L. No. 2 Age Pullets

Other Material Heart, liver and spleen, ovaries, intestine possible.

#1 - atypical Marble head lesion - small intestine enlarged.

#2 - small intestine enlarged.

Gall nodules, signs of Leukosis Infection Possibly Coccidiosis.

Diagnosis Mr Wolfram

Reported. Date June 5 By EWB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 4, 1930 Accession No. 7126

From H. T. Weisbach & Sons.

Address Westfield, N. Y.

Breed S.C.W.L. No. 5 Age pullets.

Other Material

#1 - mes. liver shows light areas.

#2 - died - pericarditis - B. sanguinarium

#3 - mes. - pericarditis - B. sanguinarium

#4 - died - pericarditis -

#5 - mes. - pericarditis -

Diagnosis Sanguinarium disease

Reported. Date June 9 By E.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 4, 1930 Accession No. 7127

From Chas. Wright

Address Hopewell Jct, N. Y.

Breed ..... No. 1 Age Hen

Other Material

Autopsy - internal organs

Diagnosis Ulcerative

Reported. Date June 5 By EWB

Department of Pathology and Bacteriology 169

POULTRY DISEASES

Date June 4, 1930 Accession No. 7128

From Mrs. E. D. Brewer

Address Waterloo, N. Y. R#3

Breed R. I. R. No. 2 Age four days

Other Material Suspicious lung lesions
Livers cultured — Bact. pullorum

Diagnosis Pullorum disease

Reported. Date June 9 By EDB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 4, 1930 Accession No. 7129

From Mrs. Mary F. E Inster

Address Newburgh, N. Y. R.#1

Breed S.C.W.L. No. 1 Age 4 mo.

Other Material Sample feed

Coccisti in ceca.

Diagnosis Mere pullet

Reported. Date June 5 By EWB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 30, 1930 Accession No. 7130

From Miss. McMillan

Address M. S. C. Exch.

Breed S.C.W.L. No. 4 Age Just Chicks.

Other Material

Lot #1 - 1 chick - decomposing - no specimens

Lung lesions.

Lot #1 - Tuberculosis.

Lot #2 - " and large roundworms.

Lot #2 -

Lot #1 - Heavy infestation with

large roundworms.

Diagnosis Coccidia.

Reported. Date June 6 By EJB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 5, 1930 Accession No. 7131

From Chas. Lowe

Address Trumansburg R#4

Breed S.C.W.L. No. 3 Age Chicks.

Other Material

Autopsies - cecal coccidiosis.

Diagnosis Ills above

Reported. Date June 6 By EBB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 5, 1930 Accession No. 7132

From Homer Hunter

Address Binghamton RFD #4

Breed R. I. R. No. 8 Age four days

Other Material

Autopsies - lung and liver lesions.

Diagnosis Bacillary disease

Reported. Date June 9 By EBB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 5, 1930 Accession No. 7133

From Mayfield

Address

Breed B. P. R. No. 3 Age Few days.

Other Material

Autopsies - Lung lesions.

Cultures - Pullorum

Diagnosis Pullorum disease.

Reported. Date June 6 By EBB (Phone)

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 5, 1930 Accession No. 7134

From L. J. Patterson

Address Clyde

Breed S.C.W.L. No. 1 Age Hen

Other Material

Autopsy - liver jaundiced -
not cultured.

Diagnosis As above

Reported. Date June 6 By EBB

Department of Pathology and Bacteriology

189

POULTRY DISEASES

Date June 5, 1930 Accession No. 7135

From Wyoming Co. Farm Bureau

Address Warsaw, N. Y.

Breed S.C. W. Leg. No. 1 Age Hen

Other Material Blind - eyeball - flesh - laying - no parasites found.

Diagnosis As above

Reported. Date June 6 By E B

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 6, 1930 Accession No. 7136

From Dr. T. W. Reynolds

Address Millbrook, N. Y.

Breed ..... No. ..... Age .....

Other Material Intestines - liver - gizzard -
Material in preserved -
Duodenum coccidiosis -

Diagnosis Adenocarcinoma

Reported. Date June 9 By EBB

To here -

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date June 6/1930 Accession No. 7137

From Mr. Lucke Mapleall

Address R # 8 - Ithaca, N Y.

Breed R. I. R. No. 3 Age chicks.

Other Material

Lues cultured - suspicious lung lesions - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 11 By E. K. P.
CEL

Department of Pathology and Bacteriology

189

POULTRY DISEASES

Date June 30 6/1930 Accession No. 7138

From Prof Myers - Referred to Mr Bennett.

Address Ithaca N.Y.

Breed J. G. No. 1 Age four weeks.

Other Material

Legs paralyzed - cultured liver -

Diagnosis None made.

Reported. Date June 7, 1930 By C.O.B. (Phone)

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 6/1930 Accession No. 7139

From Wallace Habecker.

Address Mendon N.Y.

Breed B.P.R. No. 2 Age chicks.

Other Material

Sranfield – suspicious lung lesions also liver lesions – liver cultured Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 11 By E. L. A. CEC.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 6/1930 Accession No. 7140

From Orleans Farm Bureau

Address Albion, N.Y.

Breed S.C.W.L. - (B.R.) No. 3 Age two weeks

Other Material

Liver cultured on no lesions — negative

B.K. — Sacrificed - paralysis — negative examination

Diagnosis Normal

Reported. Date June 9 By EBB

Department of Pathology and Bacteriology
POULTRY DISEASES

Date June 6/1930 Accession No. 7141

From H. G. Shutes.

Address R. D. #3 - Waverly. N.Y.

Breed W. R. No. 7 Age Cockerel

Other Material

Dead - infection following castrating operation - Strangulation and peritonitis

Diagnosis As above.

Reported. Date June 6/1930 By L. L. B. jrs.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 6/1930 Accession No. 7142

From J. V. Morse.

Address Loomis. N. Y.

Breed S. C. W. L. No. 2 Age Hen -

Other Material

1 - Black head - Microscopic tape worms - few round worm. good flesh - Legs paralyzed.

2 - No head - microscopic tape worm - Legs paralyzed - good flesh

Diagnosis Trichinosis

Reported. Date June 9 By E B B

Department of Pathology and Bacteriology

Other Material

Decomposed - liver cultured - suspicious lung lesions - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 12, By CCB

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 6/1930 Accession No. 7144

From Wm G. Jones

Address Trupton N.Y.

Breed S. C. W. L. No. 9 Age chicks

Other Material

Lot-1-from pen 1-3 weeks succumbed
liver cultured-many diodenum
coccidiosis-no intestine lesions
Lot 2-from pen 2-4 weeks-sacrificed.
liver cultured-many coccidiosis-
no intestine lesions

Diagnosis Coccidiosis(?)

Reported. Date June 9 By EBB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 6/1930 Accession No. 7145

From E. W. Hoffman - Farm Bureau

Address Ithaca N.Y.

Breed S. C. W. L. No. 2 Age Juvenile

Other Material

1 - Dead - hemorrhagique liver - abscess growth on proventriculus - necrotic areas on liver -

2 - Sacrificed - few round worms negative examination

Diagnosis Blackhead None

Reported. Date June 7, 1930 By C.E.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 7, 1930 Accession No. 7146

From Floyd Yoakes

Address Watkins N. Y.

Breed B. P. R No. 2 Age Chicks

Other Material decomposed.
Suspicious lung lesions.
Livers netted. —

Diagnosis Mareks Disease

Reported. Date June 9 By EWB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 7, 1920 Accession No. 7147

From Warren L. Parker

Address Locke, N. Y.

Breed S. C. W. L. No. 2 Age Chick

Other Material No lesions

Livers cultured. - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 11 By E. K. M.
cc.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 8, 1930 Accession No. 7148

From Schuyler County Farm Bureau

Address (Owner - Andrew Nordquist)

Breed S. C. W. L. No. 2 Age Pullets.

Sacrificed.

Other Material Walls of duodenum thickened & hemorrhagic.

Many oocytes in duodenum.

Diagnosis Dr. coccidiosis.

Reported. Date June 9 By E L B

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 9/1930 Accession No. 7149

From L. B. Skewes.

Address Dryden N.Y.

Breed S.C.W.L. No. 1 Age hen

Other Material

Impacted oviduct - yolk material in abdominal cavity - kidneys enlarged - look to be nephritis - no parasites

Diagnosis Impacted oviduct.

Reported. Date June 10 By EBB (oral)

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 9/1930 Accession No. 7150

From L. H. Graham

Address R.F.D. #5 - Ithaca N.Y.

Breed ..... No. ..... Age .....

Other Material Head of a turkey -
No lesions - no enough material
for examination -

Diagnosis None made

Other Material One dressed hen - to decomposed for examination.

Diagnosis Impossible -

Reported. Date June 14, By C.C.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 18/1990 Accession No. 7176

From Howard F. Dodds - Hackensack and J. C. Hoover of Poultry Husbandry

Address Cambridge N.Y.

Breed S.C.W.L. No. 4 Age 8 weeks -

Other Material

Dead - Sciatic nerve enlarged.

Neuritis

Diagnosis Neuritis

Reported. Date June 14 By CEC

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 18/1920 Accession No. 7177

From Doctor Chs. Lynch.

Address Dept of Agriculture - Albany N.Y.

Breed B.R. No. 1 Age pullet.

Other Material Pair No #1 -

Good flesh - dead - liver cultured - Neg.

ulcers in gizzard - few capillaries

Diagnosis As above

Reported. Date June 16 By CCC

Department of Pathology and Bacteriology
POULTRY DISEASES

Date June 13/1930 Accession No. 7178

From E. D. Lockwood.

Address South Waterlo. N. Y.

Breed S. C. W. L. No. 4 Age pullet.

Other Material

Bled and sacrificed.

1- Blew bant- heavy infestation macroscopic tape worms- kidneys tumors

2- Black bant heavy infestation macroscopic tape worm- kidneys tumors

3- Green bant- heavy infestation macroscopic tape worms

4- No bant- heavy infestation macroscopic tape worms

Diagnosis Taeniasis

Reported. Date June 14 By C.E.C.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 13, 1930 Accession No. 7179

From O. V. Jolley

Address Williamson N. Y.

Breed R. I. R. No. 5 Age Chicks

Other Material Lung lesions on all five,
livers cultured. - Bact. Pullorum.

Diagnosis Pullorum disease

Reported. Date June 16, By CCE

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 13, 1930 Accession No. 7180

From G. W. Peters

Address 18 Broad Ave. Binghamton

Breed S. C. W. L. No. 4 Age 5 wks.

Other Material One dead.

Three sacrificed.

All showed many oocysts in duodenum which was hemorrhagic & swollen.

Diagnosis Duodenal Coccidiosis (early)

Reported. Date June 13, By C.C.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 14/1930 Accession No. 7181

From Harold McGuire

Address Bath, N.Y.

Breed R.I.R. No. 2 Age seven days

Other Material Dead

Liver cultured - heart and lung

lesions - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 17, By C.C.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 14/1930 Accession No. 7182

From Elmer Crippen

Address R. D. #1 - Wilson. N.Y.

Breed S.C.W.L. No. 1 Age hen

Other Material

Impacted crop & gizzard with coarse feed. Heart and liver cultured negative

Diagnosis As above.

Reported. Date June 14, By CCB (Lovely)

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 16, 1930 Accession No. 7183

From Mattie Levander

Address Spencer - R.D. #1

Breed S.C.W.L. No. 2 1 Age 14 wks Sheet

Other Material Veins showed many microscopic tape worms.

Pullet - anemic.

Diagnosis As above

Reported. Date June 16 By C.C.C.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 16, 1930 Accession No. 7184

From Lydia M Corbin

Address R.D.#1 Petersburg, N.Y.

Breed Buff Rock No. 1 Age 2 mo.

Other Material Badly decomposed.
Cecal coccidiosis

Diagnosis Cecal coccidiosis C

Reported. Date June 17. By C.C.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 17 '30 Accession No. 7185

From Hank Tuma,

Address Horseheads NY

Breed ..... No. ..... Age .....

Other Material

9 S.C. White Leghorns Old birds.

(1) Dead. Whitish tumors in kidney & heart. Gizzard impacted with chopped hay.

(2) Destroyed. Gizzard impacted. Liver mottled. Body cavity filled with yolk material.

(3) Destroyed Gizzard impacted. Body cavity filled with ruptured yolk. Whitish tumors along intestines.

Diagnosis Impaction of gizzard.

Reported. Date ..... By Wint

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 16, 1930 Accession No. 7186

From W. A. Jones

Address Truxton N. Y.

Breed S. C. W. L. No. 6 Age

Other Material Ceca filled with blood.
Many other oocysts.

Diagnosis Cecal Coccidiosis

Reported. Date June 17, By C C E. (orally)

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 17, 1930 Accession No. 7187

From Rudolph Korbel

Address Newfield N. Y.

Breed S. C. W. L. No. 2 Age Hens.

Other Material

Apparently colds.

Diagnosis None Made (orally)

Reported. Date June 17, By C.C.E.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 17/1930 Accession No. 7188

From J. M. Thurgood.

Address Box 46 - Bombay N.Y.

Breed S.C.W.L. No. 5 Age four days.

Other Material

Dead - Lives cultured - suspicious lung lesions - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 20, By C.C.B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 17/1930 Accession No. 7189

From Orleans County Farm Bureau

Address Albion. N.Y.

Breed S.C.W.L. No. 3 Age two days.

Other Material

Dead - Livers cultured - lung and heart lesions - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 20, By C.E.S.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 17/1930 Accession No. 7190

From St Lawrence State Hospital

Address Ogdensburg. N.Y.

Breed R. I. C. W. L. No. 2 Age 9 and 7 weeks.

Other Material

Older show duodenum coccidiosis

Younger no lesions - liver cultured negative.

on both - were dead

Diagnosis Duodenal Coccidiosis

Reported. Date June 18, By C C B

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 17/1930 Accession No. 7191

From A. J. Aldrich.

Address Dewittville. N. Y.

Breed S.C. W.L. No. 1 Age 3 months

Other Material

Sacrificed - Duodenum/coccidiosis

Diagnosis Duodenal Coccidiosis

Reported. Date June 18, By C.C.P.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 12/1930 Accession No. 7192

From Frank J. Groth.

Address East Pembrook N. Y.

Breed S. C. W. L. No. 6 Age 13 weeks

Other Material

Sacrificed - All showing duodenum coccidiosis.

Diagnosis Duodenal Coccidiosis

Reported. Date June 17 By C E E (orally)

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 18, 1930 Accession No. 7193

From Karco Mills

Address Waverly.

Breed S. C. W. L. No. 2 Age Pullet Cockerel

Other Material Pullet - Many microscopic tapes

Cockerel - Some micro. tapes.

Paralysis or range paralysis.

Diagnosis Taenicis + Neuretis.

Reported. Date June 18, By C.E.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 18/1930 Accession No. 7194

From Clarks Poultry Supply House

Address Binghamton N.Y.

Breed R.I.R. No. 7 Age four days

Other Material

Dead - Liver cultured - lung and heart lesions - Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 21 By C.C.C.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 18/1930 Accession No. 7195

From Robert L. Jones.

Address R # 2- Edmeston. N.Y.

Breed S.C.W.L. No. 9 Age few days

Other Material

Dead- Liver cultured- heart lesion

ow one ~Bact. Pullorum

Diagnosis Pullorum disease

Reported. Date June 21, By CCB.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 18/1930 Accession No. 7196

From Carl J. Carlson.

Address 106 Falconer St - Frewsburg N.Y.

Breed R I R No. 3 Age few days

Other Material Dead - liver cultured - decomposed - no lesions - Yeq.

Diagnosis None made

Reported. Date June 21, By CCB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 19/1930 Accession No. 7197

From John Stephenson

Address Geneva N. Y.

Breed B. R. No. 4 Age pullets

Other Material

Sacrificed - show tuberculous lesions on face - liver, spleen - intestines showing lesions

Diagnosis T. B.

Reported. Date June 20, By C C B.

Department of Pathology and Bacteriology
POULTRY DISEASES

Date June 19/1930 Accession No. 7198

From Elmer L. Cooley.

Address R #2 – Scottsville N. Y.

Breed S. C. W. L. No. 4 Age pullets.

Other Material

Bones softed and beaded ribs –
Heavy infestation of tape worms
ow four (macroscopic)

Diagnosis Tenia + Rickets

Reported. Date June 20, By CCB.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 19, 1930 Accession No. 7199

From Victor E. Sanguinet

Address West Burlington, N. Y.

Breed S. C. W. L. No. 4 Age Few days

Other Material

Decomposed

Diagnosis impossible.

Reported. Date June 20, By C.C.B.

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date June 20/1930 Accession No. 7200

From W. F. Kohman

Address R.D. #3 - Waterloo N.Y.

Breed N. H. W. L. No. 3 Age 8 weeks

Other Material 4 eggs

Liver cultured Coccidia and liver show blackhead lesion

Diagnosis Blackhead

Reported. Date June 21 By C.C.S.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 20/1930 Accession No. 7201

From K. F. Grant

Address N.Y. State School of Ag - Canton. N.Y.

Breed S.C. W.L. No. 2 Age 7 weeks

Other Material

Coeca and duodenum coccidiosis

coeca hemorrhagic

Reported also to L. W. Egan. Theresa. N.Y.

Diagnosis Acute coccidiosis

Reported. Date June 21 By C.C.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 20/1930 Accession No. 7202

From L. B. Brigden.

Address Marathon N.Y.

Breed S. C. W. L. No. 4 Age Pullet.

Other Material

2 were examined — one showed very thick wall of coeca. — Negative examination decomposed.

Diagnosis None made

Reported. Date June 21 By C.C.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 20/1930 Accession No. 7203

From Emmett Wilcox

Address Tract Road - Webster, N.Y.

Breed S.C.W.L. No. 2 Age 8 weeks

Other Material

One dead — one sacrificed.

Blackhead lesions on both

Diagnosis Blackhead

Reported. Date June 21 By CCB

Department of Pathology and Bacteriology
POULTRY DISEASES

Date June 20/1930 Accession No. 7204

From Charles Lommes

Address North Branch. N.Y.

Breed S.C.W.L. No. 2 Age pullet.

Other Material one dead - one sacrificed

To decomposed - coccea coccidiosis

Diagnosis As above

Reported. Date June 21 By CCB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 20/1930 Accession No. 7205

From J. L. Case

Address Cazenovia. N. Y.

Breed S. C. W. L. No. 2 Age pullet

Other Material

1 - Sacrificed - heavy infestation of macroscopic tape worms.

2 - Dead - Duodenum coccidiosis also macroscopic tape worms. - liver show nephritis

Diagnosis Tenuiasis

Reported. Date June 21, By C C B

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 21/1930 Accession No. 7206

From Roy C. Turner

Address R. D. #1 — Horseheads. N. Y.

Breed S. C. W. L. No. 1 Age 3 months.

Other Material

Dead - Caeca and duodenum coccidiosis

Liver stencil about coccidiosis

Diagnosis Coccidiosis

Reported. Date same day By C. C. Ellis per
A Lyon Jr Asst

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date June 23/1930 Accession No. 7207

From Mrs. Gibson Malone.

Address R.F.D #1 - Ithaca, N.Y.

Breed A.O.P. No. 6 Age Hen and chicks

Other Material

5-chicks autopsied - livers cultured - 2 neg. one with lung? lesions - others show air sacs infection - probably cold. Hen - show gasping breath - symptoms of cold

Diagnosis as above

Reported. Date June 23, By C.C.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 23/1930 Accession No. 7208

From W. J. Mason

Address Wyoming Co. Farm Bureau-Warsaw N. Y.

Breed R. I. R. No. 3 Age chicks

Other Material

Liver cultured - lung lesions

Diagnosis Pullorum disease

Reported. Date June 26, By C.E.C.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 30/1930 Accession No. 7209

From F. C. VanNoy.

Address 33 Pine Street. Waverly. N.Y.

Breed R.I.R. No. 4 Age 12 weeks.

Other Material

No lesions- look to be nutrition disease.

Diagnosis Nutrition Disease

Reported. Date Same Day By C.C.C. per Pajotte Dem

Department of Pathology and Bacteriology
POULTRY DISEASES

189

Date June 29/1930 Accession No. 7210

From Felice M. Broken

Address Interlaken. N.Y.

Other Material One intestine tuft one caeca material

Not enough for examination

Diagnosis As above

Reported. Date June 24, By C.E.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 23/1930 Accession No. 7211

From Fulton Lewis

Address R. D #8 – Oswego N.Y.

Breed S.C.W.L. – No. 2 Age chicks.

Other Material

Liver cultured – heart lesions

On one

Diagnosis Pullorum disease

Reported. Date June 26, By CEB.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 23/1930 Accession No. 7212

From Donald J. Cutter.

Address R.D. #1 - Penfield - N.Y. 5-F-23

Breed S.C.W.L. No. 6 Age chicks.

Other Material

3 dead. 3 sacrificed.

Every one show bloody coeca

Heavy infestation of coccidiosis

Diagnosis Acute Coccidiosis

Reported. Date June 24 By C.C.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 24 1930 Accession No. 7213

From Geneva State Hospital

Address Helmuth N. Y.

Breed ..... No. ..... Age Several dieased.

Other Material Decomposed

Diagnosis Unsatisfactory.

Reported. Date June 25, By CCB

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 24/1930 Accession No. 7214

From Truman Wheeler

Address Deposit N.Y.

Breed S.C.W.L. No. 2 Age chick.

Other Material

to decomposed for examination

Diagnosis impossible

Reported. Date June 25, By CCC

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 24/1930 Accession No. 7215

From Mrs Anna Updike.

Address Tunnelburg R.D #1. N.Y.

Breed S.C.W.L. No. 1 Age chick.

Other Material

Liver cultured negative examination

Diagnosis Negative

Reported. Date June 25 By C.C.B.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 24/1930 Accession No. 7216

From Thomas K. Leonard

Address R.D. #1 - Lunenburg. N.Y.

Breed L.B.W.L. No. 1 Age chick

Other Material

Examined - coeca coccidiosis

Diagnosis Acute Coccidiosis

Reported. Date June 25, By C.C.S.

Department of Pathology and Bacteriology 189

POULTRY DISEASES

Date June 24/1930 Accession No. 7217

From Oscar C. Corby

Address Honeoye Falls, N.Y.

Breed S.C.W.L. No. 1 Age pullet

Other Material

Sacrificed - poor flesh - heavy infestation of microscopic tape worms

Diagnosis Tapeworms

Reported. Date June 25 By CEC

Department of Pathology and Bacteriology
POULTRY DISEASES

Date June 24, 1930 Accession No. 7218

From Elmer Crispen

Address Alpine, NY R7D1

Breed S C W L No. 1 Age hen

Other Material Nephritis
Visceral gout.

Diagnosis As above (partly)

Reported. Date June 24, By C C B.

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 23 1930 Accession No. 7219

From Mrs. F. Van Epps.

Address Rushville. N.Y.

Breed S.C.W.L. No. 2 Age chicks.

Other Material

Sacrificed - duodenum wall thickened - coccidiosis - many oocysts

Diagnosis duodenal Coccidiosis

Reported. Date June 26, By C.C.S.

Department of Pathology and Bacteriology

189

POULTRY DISEASES

Date June 23 / 1930 Accession No. 7220

From Cross Cumstock.

Address R. F. D #1 — Rome N. Y.

Breed S-C-W-L- No. 2 Age pullets.

Other Material

Sacrificed — both show macroscopic tape worms — poor flesh

Diagnosis Teniasis

Reported. Date June 26, By C C B

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 25/1930 Accession No. 7221

From Clarence Johnson - Farm Bureau

Address Schenectady, N. Y.

Breed S. C. W. L. - No. 4 Age chicks

Other Material 2 received - 2 dead -

1 - show infestation coccidiosis.

2 - No lesions - impacted gizzard, look to be nutrition trouble

3 - same as number two

4 - No lesions - intestins show catharal condition.

Diagnosis As above

Reported. Date June 26, By C E E

Department of Pathology and Bacteriology

POULTRY DISEASES

Date June 26/1930 Accession No. 7222

From D. A. Sine

Address Coldwater. N. Y.
