# DXC Profile Assessment Dandelion@SITE YEAR

Version 1.0  
Month YEAR

# Summary

Initially, XX candidates were selected to attend the assessment. The assessment commenced with a target of XX JOB ROLE to be selected from the XX candidates attending the assessment.

During week four of the assessment, XX candidates were recommended for DXC job offers. The remaining candidates were deemed not suitable for a JOB role within HPE.

The candidates have a good spread of skills and abilities. There are very high levels of intelligence in some, with attention to detail and ability to manage within a work environment. A number of candidates that were recommended for DXC roles will need additional help from the DXC Autism Spectrum Consultant.

The candidates were evaluated for JOB roles. This was in line with the potential roles available at the CLIENT SITE and the high calibre of candidates in the assessment.
