Announcement of the  
**Two-Year Courses**  
in the New York State  
College of Agriculture  
for 1936-37

Ithaca, New York  
Published by the University  
May 15, 1936

## THE CALENDAR FOR 1936-37

### FIRST TERM

		1936	
Sept.	21	Monday	University entrance examinations begin.
Sept.	28	Monday	Academic year begins. Registration of new students.
Sept.	29	Tuesday	Registration of old students.
Oct.	1	Thurs. 8 a.m.	Instruction begins.
Oct.	22	Thursday	Last day for payment of tuition.
Nov.	26-29		Thanksgiving recess.
Dec.	19	Sat. 12.50 p.m.	Instruction ends.
			} Christmas recess.
Jan.	4	Mon. 8 a.m.	
Jan.	11	Monday	Birthday of Ezra Cornell. Founder's Day.
Feb.	1	Monday	Term examinations begin.

### SECOND TERM

Feb.	12	Friday	Registration of all students.
Feb.	15	Mon. 8 a.m.	Instruction resumed.
Feb.	15-20		Farm and Home Week.
Mar.	8	Monday	Last day for payment of second-term tuition.
Apr.	3	Sat. 12.50 p.m.	Instruction ends.
Apr.	12	Mon. 8 a.m.	Instruction resumed.
June	7	Monday	Term examinations begin.
June	21	Monday	Sixty-ninth Annual Commencement.

} Spring recess.

# NEW YORK STATE COLLEGE OF AGRICULTURE

## STAFF OF ADMINISTRATION AND INSTRUCTION IN THE TWO-YEAR COURSES

Livingston Farrand, A.B., M.D., L.H.D., LL.D., President of the University.  
Albert Russell Mann, A.M., D.Sc., D.Agr., LL.D., Provost of the University.  
Carl Edwin Ladd, Ph.D., Dean of the College of Agriculture and Director of  
Experiment Stations.  
Cornelius Betten, Ph.D., D.Sc., Director of Resident Instruction and Dean of the  
University Faculty.  
Lloyd R. Simons, B.S., Director of Extension and Professor in Extension Service.  
Olin Whitney Smith, B.S., Secretary.  
Anson Wright Gibson, M.S., Assistant Professor in Personnel Administration, in  
charge of Former Student Relations, Vocational Guidance, and Placement.  
Willard Waldo Ellis, A.B., LL.B., Librarian.  
George Wilson Parker, Bursar.

Raymond Clayton Allen, B.S., Instructor in Floriculture.  
†Sydney Arthur Asdell, Ph.D., M.A., Professor of Animal Physiology and Animal  
Physiologist in the Experiment Station.  
Winfred Enos Ayres, Assistant Professor of Dairy Industry.  
Ethel Belk, M.S., Assistant in Botany.  
Hilton Briggs, M.S., Assistant in Animal Husbandry and Assistant in Animal  
Husbandry in the Experiment Station.  
Harry Oliver Buckman, Ph.D., Professor of Soil Technology.  
Doak Bain Carrick, Ph.D., Professor of Pomology and Pomologist in the Experi-  
ment Station.  
Daniel Grover Clark, B.S., Assistant in Botany.  
Randall Knight Cole, B.S., Instructor in Poultry Husbandry and Assistant in  
Poultry Husbandry in the Experiment Station (first term).  
Otis Freeman Curtis, Ph.D., Professor of Botany and Plant Physiologist in the  
Experiment Station.  
Edward Sewall Guthrie, Ph.D., Professor of Dairy Industry and Dairy Tech-  
nologist in the Experiment Station.  
Goldan Orlando Hall, Ph.D., Assistant Professor of Poultry Husbandry and  
Assistant Poultry Husbandman in the Experiment Station.  
Harold Coleman Hallock, LL.B., M.S., Assistant in Entomology.  
Earle Volcart Hardenburg, Ph.D., Professor of Vegetable Crops and Investigator  
in Vegetable Crops in the Experiment Station.  
Merritt Wesley Harper, M.S., Professor of Animal Husbandry and Animal Hus-  
bandman in the Experiment Station.  
Edwin Shepherd Harrison, Ph.D., Professor of Animal Husbandry and Animal  
Husbandman in the Experiment Station.  
Elmer Louis Hartman, M.Sc., Instructor in Floriculture.  
Herbert Bertsch Hartwig, M.S., Assistant Professor of Field Crops.  
Arthur John Heinicke, Ph.D., Professor of Pomology and Pomologist in the Ex-  
periment Station.  
Barbour Lawson Herrington, Ph.D., Professor of Dairy Chemistry and Dairy  
Chemist in the Experiment Station.  
Gustave Frederick Heuser, Ph.D., Professor of Poultry Husbandry and Poultry  
Husbandman in the Experiment Station.  
Robert Byron Hinman, Ph.D., Assistant Professor of Animal Husbandry and  
Assistant Animal Husbandman in the Experiment Station.  
Robert Francis Holland, Instructor in Dairy Industry.  
Edwin Fraser Hopkins, Ph.D., Assistant Professor of Botany and Assistant  
Botanist in the Experiment Station.

---

†On leave second term.

- Frederick Bruce Hutt, Ph.D., Professor of Poultry Husbandry and Animal Genetics and Poultry Husbandman and Animal Geneticist in the Experiment Station.
- Lewis Knudson, Ph.D., Professor of Botany and Plant Physiologist in the Experiment Station.
- Minna Frotscher Koch, Ph.D., Assistant in Botany.
- Welford Forrest Lamoreux, B.Sc., Instructor in Poultry Husbandry and Assistant in Poultry Husbandry in the Experiment Station (second term).
- Richard August Laubengayer, Ph.D., Instructor in Botany and Assistant in Botany in the Experiment Station.
- Alton Anthony Lindsey, A.B., Assistant in Botany.
- Ravenda Ladd McClain, M.S., Assistant in Plant Pathology.
- John Clarence McCurdy, B.S., C.E., Professor of Agricultural Engineering.
- Laurence Howland MacDaniels, Ph.D., Professor of Pomology and Pomologist in the Experiment Station.
- Richard Alan Mordoff, Ph.D., Professor of Meteorology.
- Clyde Hadley Myers, Ph.D., Professor of Plant Breeding and Plant Breeder in the Experiment Station.
- Joseph Oskamp, B.S., in Agr., Extension Professor of Pomology.
- Edward Marshall Palmquist, M.S., Instructor in Botany.
- George Eric Peabody, M.S., Assistant Professor of Extension Teaching.
- Loren Clifford Petry, Ph.D., Professor of Botany.
- Elmer Strobel Phillips, B.S., Instructor in Extension Teaching.
- Kenneth Post, M.S., Instructor in Floriculture and Assistant Floriculturist in the Experiment Station.
- Whiton Powell, Ph.D., Professor of Business Management and Investigator in Business Management in the Experiment Station.
- Myers Peter Rasmussen, Ph.D., Professor of Marketing and Investigator in Marketing in the Experiment Station.
- Philip Adna Readio, Ph.D., Professor of Economic Entomology and Entomologist in the Experiment Station.
- Philip Cullogen Reece, M.A., Assistant in Botany.
- Howard Wait Riley, M.E., Professor of Agricultural Engineering and Agricultural Engineer in the Experiment Station.
- Louis Michael Roehl, B.S., Professor of Farm Mechanics.
- Harold Ellis Ross, M.S.A., Professor of Dairy Industry.
- Glenn Wade Salisbury, Ph.D., Assistant Professor of Animal Husbandry and Assistant Animal Husbandman in the Experiment Station.
- Earl Frederick Savage, B.S., Assistant in Pomology.
- Elmer Seth Savage, Ph.D., D.Sc., Professor of Animal Husbandry and Animal Husbandman in the Experiment Station.
- Newell Allen Schappelle, Ph.D., Assistant in Botany.
- Cecil D. Schutt, Instructor in Animal Husbandry and Assistant in Animal Husbandry in the Experiment Station.
- Herbert Temple Scofield, A.B., Assistant in Botany.
- Henry Thomas Skinner, Propagator in Ornamental Horticulture.
- Osgood Reuel Smith, Ph.D., Instructor in Entomology.
- Harold Foster Spencer, M.S., Assistant in Botany.
- Leland Spencer, Ph.D., Professor of Marketing and Investigator in Marketing in the Experiment Station.
- Clifford Nicks Stark, Ph.D., Professor of Bacteriology and Bacteriologist in the Experiment Station.
- Finley Moore Steele, B.S., Assistant in Dairy Industry.
- George Edward Thompson, M.A., Instructor in Plant Pathology.
- Stanley Elliott Wadsworth, B.S., Instructor in Floriculture.
- Alfred Van Wagenen, Ph.D., Instructor in Marketing and Investigator in Marketing in the Experiment Station.
- Stanley Whitson Warren, Ph.D., Assistant Professor of Farm Management and Investigator in Farm Management in the Experiment Station.
- Donald Stuart Welch, Ph.D., Assistant Professor of Plant Pathology and Assistant Forest Pathologist in the Experiment Station.

Herbert Hice Whetzel, M.A., D.Sc., Professor of Plant Pathology and Plant Pathologist in the Experiment Station.

Edward Albert White, B.Sc., Professor of Floriculture and Ornamental Horticulture and Floriculturist in the Experiment Station.

William Lawrence White, B.S.A., Assistant in Plant Pathology.

Paul Stuart Williamson, Ph.D., Assistant Professor of Farm Management and Investigator in Farm Management in the Experiment Station.

John Peter Willman, Ph.D., Assistant Professor of Animal Husbandry and Assistant Animal Husbandman in the Experiment Station.

Paul Work, Ph.D., Professor of Vegetable Crops and Investigator in Vegetable Crops in the Experiment Station.

Forrest Blythe Wright, Ph.D., Assistant Professor of Agricultural Engineering.

## NEW YORK STATE COLLEGE OF AGRICULTURE

The New York State College of Agriculture is maintained by the State as one of three state colleges within Cornell University. It is equipped with a staff and facilities for teaching resident students of various types, for making investigations in all phases of agriculture and the underlying sciences, and for disseminating its teachings to the people of the State. The support of the State towards these ends is supplemented by substantial appropriations from the Federal Government, and by the land and other large facilities and services freely placed at the disposal of the College by Cornell University.

### COURSES AVAILABLE

The information contained in this announcement relates to the two-year courses first offered in 1929-30. These are designed for young men who expect to go into farming or into business closely allied thereto, and who desire agricultural training of college grade, but cannot devote more than two years to it. The College offers, in addition, a winter course beginning in November and running through twelve weeks; a summer session of six weeks; a four-year course, leading to the degree of bachelor of science; and graduate courses, leading to higher degrees. These offerings give preparation for different kinds and different levels of agricultural vocations and call for different prerequisites for admission. A separate printed announcement of each of these courses is available on application to the Secretary of the College of Agriculture, Roberts Hall, Ithaca, New York.

### REQUIREMENTS FOR ADMISSION

For admission to the two-year courses, candidates must offer: Fifteen units acceptable by the University of the State of New York toward a state diploma, or the equivalent by school certificates. English, 4 years, is counted as 3 units.

Approximately one year of practical experience on a farm or in a business related to the curriculum to be followed.

Certificates of good moral character.

All students matriculating in the University must present a satisfactory certificate of vaccination against smallpox. This certificate is considered satisfactory only if it certifies to a successful vaccination within five years, or certifies that at least three unsuccessful attempts have been made within the same period.

### THE APPLICATION FOR ADMISSION

Candidates for admission should address Dr. E. F. Bradford, Director of Admissions, Morrill Hall, Ithaca, New York, stating that

they desire to enter one of the two-year courses in the College of Agriculture. This should be done as early as possible, since the procuring of the necessary credentials often takes considerable time.

Every candidate for admission in September must make a deposit of \$25 before August 1. A check, draft, or money order should be made payable to Cornell University and sent to the Office of Admissions, Morrill Hall, Ithaca, New York.

If the candidate matriculates, the deposit will be credited to his account, \$10 for the matriculation fee, \$1 for examination books, and \$14 as a guaranty fund, which every two-year student is required to maintain, and which is to be refunded to him upon his permanent withdrawal, less any indebtedness to the University.

If admission is denied a candidate who has complied with these rules, the deposit is refunded in full at any time.

### CERTIFICATE ON COMPLETION OF COURSE

Students who satisfactorily complete the work of an approved two-year course with credit for at least sixty hours, will be granted an appropriate certificate.

### RELATION TO THE FOUR-YEAR DEGREE COURSE

Except in respect to the items of administration and curriculum specifically covered in this announcement, students in the two-year course are governed by exactly the same conditions as are students of the four-year course. They should, therefore, consult the announcement of the latter course for further details of information and for the description of courses open to their election but not here listed or described.

Transfer to the degree course will be possible at the end of the two-year course for those who have given evidence of ability to carry advanced work. Students who qualify for such transfer will not be required to offer any further entrance credit. The transfer is possible solely on a basis of the full two-year record, which must be considerably better than the average of all two-year students. Students who transfer from the two-year to the four-year course are given full credit toward the degree for work satisfactorily passed in the two-year course.

Two-year students are registered as special students and are not eligible to represent the University in intercollegiate athletics.

### EXPENSES

#### TUITION

Tuition is free to two-year students in the New York State College of Agriculture, who at the beginning of the college year are, and for at least twelve months prior thereto have been, bona-fide residents of the State of New York. A student transferring from one college or course in the University to another, must pay for the hours credit

he receives in the latter college or course an amount corresponding to the difference in tuition; and no such transfer is allowed or credit given until such payment has been made.

Students in Agriculture who are not exempt under these provisions are required to pay \$200 for the full college year. This amount is payable in installments of \$110 at the beginning of the first term and \$90 at the beginning of the second term, but a student registered only for the second term of the academic year is required to pay at the rate of the first term.

Tuition and other fees become due when the student registers. The University allows twenty days of grace after the last registration day of each term of the regular session. The last day of grace is generally printed on the registration coupon which the student is required to present at the Treasurer's office. Any student who fails to pay his tuition charges, other fees, and other indebtedness to the University, or who, if entitled to free tuition, fails to claim it at the Treasurer's office and to pay his fees and other indebtedness, within the prescribed period of grace, is thereby dropped from the University unless the Treasurer has granted him an extension of time to complete payment. The treasurer is permitted to grant such an extension when, in his judgment, the circumstances of a particular case warrant his doing so. For any such extension the student is assessed a fee of \$5 for the first week and \$2 additional for each subsequent week in which the whole or any part of the debt remains unpaid, but the assessment in any case is not more than \$15. The assessment may be waived in any instance for reasons satisfactory to the Comptroller and the Registrar, when such reasons are set forth in a written statement.

Any tuition or other fee may be changed by the Board of Trustees to take effect at any time without previous notice.

#### OTHER FEES

A *matriculation fee* of \$10 is required of every student upon entrance into the University. A new two-year student who has made the required deposit of \$25 with the Treasurer does not make an additional payment of the matriculation fee, because the Treasurer draws on the deposit for this fee.

A *health and infirmary fee* of \$6 a term is required at the beginning of each term of every student. In return, a student, in case of illness, is, upon his physician's certificate, admitted to the University infirmary and receives, without charge, a bed in a ward, board, and ordinary nursing for a period not exceeding two weeks in any academic year. For such service beyond the period of two weeks, a charge of \$2 a day is made. Extra charges are made for private rooms, special food, and special nurses.

A *Willard Straight Hall membership fee* of \$5 is required at the beginning of each term. Its payment entitles the student to a share in

the common privileges afforded by the operation of Willard Straight Hall, subject to the regulations made by the Board of Managers.

A *physical recreation fee* of \$4, required at the beginning of each term, entitles the student to the use of a locker, bathing facilities, and towels, in the gymnasium, the New York State Drill Hall, or the Schoellkopf Memorial Building.

An *examination book fee* of \$1 is required of every student at entrance to pay for the examination books furnished to the student throughout his course. The charge is made against the student's deposit fee.

*Laboratory fees* are charged to cover the cost of materials used in certain courses that require laboratory and field work. A few of the courses involve out-of-town trips for the purpose of studying marketing and field conditions. Every student must pay his own travel and living expenses on these trips. The approximate total amount of the laboratory fees and trip expenses for each of the courses for two years is as follows:

	Laboratory fees	Trip expenses
Dairy Farming . . . . .	\$58.00	\$ 1.00
Other Livestock Farming . . . . .	53.00	6.00
Poultry Farming . . . . .	42.50	
Fruit Growing . . . . .	59.50	1.00
Vegetable Growing . . . . .	55.50	14.00
Marketing of Fruits and Vegetables . . . . .	59.00	14.00
Marketing of Dairy Products . . . . .	65.00	
Commercial Floriculture . . . . .	71.00	

## BOARD AND LODGING

The University is gradually adding to the number of residential halls for men; at present there are accommodations for about 725 students. For particulars, address the Manager of Residential Halls, Morrill Hall, Ithaca, New York.

Many private lodging houses near the University offer furnished rooms, with heat and light, at rates ranging from \$3 to \$5 a week for a single room. Before he rents a room in a private house, a student should make sure, by a personal inspection, that the sanitary arrangements of the house are good, and he should especially insist on a good fire escape. The University publishes a list of lodging houses that have been inspected and found to be satisfactory in the above respects; the list is ready for distribution on August 15. New students are advised to engage rooms at least a few days before the day set for registration. The Freshman Advisory Committee offers its help to new students, and sends them a circular letter of suggestions about September 1.

The number of private houses that offer both rooms and board is small, and many students get their meals outside the houses where they live. The University conducts a cafeteria in Willard Straight Hall, and the College of Home Economics also has a public cafeteria. There are other good cafeterias that are patronized mainly by students.

It is possible to obtain satisfactory board and lodging for the full college year for a total of \$400. Those with limited means will be able to save \$1 or \$2 a week from this amount by living in the cheaper rooms and buying less expensive meals.

The necessary college expenses for the two years, exclusive of clothes and travel, may average \$500 a year. The additional amount spent for clothes and incidentals will vary with the tastes and means of the student.

## THE TWO-YEAR CURRICULA

The two-year course has organized within it eight curricula giving preparation for the major types of farming in New York State and for certain allied businesses. A two-year student must select one of these curricula and follow closely the work as outlined. Changes from these outlines may be made with the consent of the Director of Resident Instruction and the faculty adviser to whom the student will be assigned when he registers.

Requests for further information regarding these curricula should be addressed to the Secretary of the College of Agriculture, Roberts Hall, Ithaca, New York.

### CURRICULUM IN DAIRY FARMING

#### FIRST YEAR

<i>First term</i>	<i>Hours credit</i>	<i>Second term</i>	<i>Hours credit</i>
Extension Teaching 1 (Oral and Written Expression) . . . . .	3	Extension Teaching 2 (Oral and Written Expression) . . . . .	3
Animal Husbandry 1 (Livestock Production) . . . . .	3	Animal Husbandry 10 (Livestock Feeding) . . . . .	4
Agricultural Engineering 40 (Farm Shop Work) . . . . .	2	Vegetable Crops 2 or elective . . . . .	3
Agricultural Economics and Farm Management 103 (Farm Records and Accounts) . . . . .	3	*Chemistry 101 (General, Lectures) . . . . .	3
Bacteriology 3 (Agricultural) . . . . .	3	*Chemistry 105 (General, Laboratory) . . . . .	3

#### SECOND YEAR

Animal Husbandry 20 (Animal Breeding) . . . . .	3	Agricultural Economics and Farm Management 102 (Farm Management) . . . . .	5
Animal Husbandry 30 (Health and Diseases of Animals) . . . . .	3	Animal Husbandry 50 (Dairy Cattle) . . . . .	3
Agronomy 11 (Production of Field Crops) . . . . .	4	Agronomy 6 (Soils) . . . . .	3
Agricultural Engineering 1 (Farm Mechanics) . . . . .	3	Dairy Industry 2 (Testing and Inspection) . . . . .	3
		Agricultural Economics and Farm Management 143 (Marketing Dairy Products) . . . . .	4

\*Those who offer Chemistry for entrance may substitute six credit hours of other courses for Chemistry 101 and 105.

## TWO-YEAR COURSES

11

### CURRICULUM IN OTHER TYPES OF LIVESTOCK FARMING

#### FIRST YEAR

<i>Hours credit</i>		<i>Hours credit</i>	
<i>First term</i>		<i>Second term</i>	
Extension Teaching 1 (Oral and Written Expression) . . . . .	3	Extension Teaching 2 (Oral and Written Expression) . . . . .	3
Animal Husbandry 1 (Livestock Production) . . . . .	3	Animal Husbandry 10 (Livestock Feeding) . . . . .	4
Agricultural Engineering 1 (Farm Mechanics) . . . . .	3	Animal Husbandry 70 (Swine) or Animal Husbandry 60 (Beef Cattle) . . . . .	3
Agricultural Engineering 40 (Farm Shop Work) . . . . .	2	*Chemistry 101 (General, Lectures) . . . . .	3
Agricultural Economics and Farm Management 103 (Farm Records and Accounts) . . . . .	3	*Chemistry 105 (General, Laboratory) . . . . .	3

#### SECOND YEAR

Animal Husbandry 20 (Animal Breeding) . . . . .	3	Agricultural Economics and Farm Management 102 (Farm Management) . . . . .	5
Animal Husbandry 30 (Health and Diseases of Animals) . . . . .	3	Agronomy 6 (Soils) . . . . .	3
Animal Husbandry 80 (Sheep) . . . . .	3	Elective . . . . .	9
Agronomy 11 (Production of Field Crops) . . . . .	4	Suggested Animal Husbandry 40, 70, 90 Agricultural Economics and Farm Management 126 Vegetable Crops 2	

### CURRICULUM IN POULTRY FARMING

#### FIRST YEAR

<i>Hours credit</i>		<i>Hours credit</i>	
<i>First term</i>		<i>Second term</i>	
Extension Teaching 1 (Oral and Written Expression) . . . . .	3	Extension Teaching 2 (Oral and Written Expression) . . . . .	3

Botany 31 (Plant Physiology). . . . .	4	Plant Pathology 1 (Plant Diseases)	3
		Entomology 42 (Insect Pests). . . . .	3

## DESCRIPTION OF COURSES

The courses described in the following pages are those required in one or more of the preceding curricula. With the exception of two courses in chemistry, they are all given by members of the staff of the College of Agriculture.

The administrative units of the College in charge of the various subject-matter fields are called *departments*. There are several departments whose work is not required in these two-year curricula, but the courses offered by them may be elected as time permits and if the prerequisites are met. For the description of these offerings, reference should be made to the announcement of the four-year courses.

The arrangement of the courses in the foregoing curricula is such that all prerequisites will have been met if the courses are taken in the order in which they are listed. Consult the four-year announcement for course prerequisites before making any change in the order of scheduling.

## AGRICULTURAL ECONOMICS AND FARM MANAGEMENT

102. **Farm Management.** Second term. Credit five hours. Lectures, M W F 10. Agricultural Economics Building 25. Laboratory, T W Th or F 1.40-3.40. Agricultural Economics Building 101. On days when farms are visited, laboratory periods will be from 1.40-6. Assistant Professor S. W. WARREN.

Farming as a business; types of farming; size of business; rates of production; labor efficiency; combination of enterprises; farm layout; building arrangement; machinery; forms of tenure and leases; choosing and buying a farm; use of capital and credit; planning, organization, and management of specific farms. One all-day trip and four half-day trips are taken during April and May to visit farms in near-by regions. These trips are taken on the day of the regular laboratory period. Fee for materials furnished and for transportation on trips, \$6.

**103. Farm Records and Accounts.** First term. Credit three hours. Lectures, T Th 8. Agricultural Economics Building 25. Laboratory, M T or W 1.40-4. Agricultural Economics Building 101 and 140. Assistant Professor WILLIAMSON.

Farm inventories; cash account; single-enterprise cost accounts; income-tax reports; complete farm cost accounts; interpretation of the results of cost accounts and their application in the organization and management of farms. Fee for materials furnished, \$2.

**121. Financial Statements.** First term. Credit three hours. Lectures, T Th 9. Agricultural Economics Building 225. Practice period, M T or W 1.40-4. Agricultural Economics Building 201. Professor POWELL.

Intended for those who wish to understand the customary financial statements of business concerns. The purpose, content, interrelationships, analysis, and interpretation of balance sheet, operating statement, and statement of surplus. Fee for materials furnished, \$2.

**126. Cooperative Marketing.** Second term. Credit three hours. Lectures, W F 8. Agricultural Economics Building 225. Discussion groups, M or T at hours to be arranged. Agricultural Economics Building 201. Professor POWELL.

The nature, purposes, extent, and legal background of the cooperative form of organization in agricultural business; the problems and practices of operation, finance, and organization, applicable to cooperative business. Fee for materials furnished, \$1.

**142. Marketing Fruits and Vegetables.** First term. Credit four hours. Lectures, M W F 9. Agricultural Economics Building 225. Laboratory, W 1.40-4. Agricultural Economics Building 140. Professor RASMUSSEN.

A study of the economic factors involved in the marketing of fruits and vegetables. Regional and seasonal competition; areas of distribution; methods of handling; costs of marketing; types of marketing organization; sales methods; transportation and carrier services; produce law and methods of credit rating; terminal problems. Fee for materials furnished, \$3.

**143. Marketing Dairy Products.** Second term. Credit four hours. Lectures, M W F 9. Agricultural Economics Building 225. Laboratory, F 1.40-4. Agricultural Economics Building 201. Professor SPENCER.

A study of the economic problems relating to the distribution of milk and other dairy products; also the factors affecting success in this branch of business enterprise. One all-day trip to visit milk plants is taken sometime in May. Fee for materials furnished and for transportation on trips, \$4.

**144. Marketing of Poultry Products.** Second term. Credit two hours. Lecture, T 10. Agricultural Economics Building 225. Laboratory, T 1.40-4. Agricultural Economics Building 140. Dr. VAN WAGENEN.

A study of the economic factors involved in the marketing of eggs and poultry, including: areas of production; distribution channels; sales methods; market costs; cold-storage operations; legislation; demand; terminal market and consumption problems. Fee for materials furnished, \$1.

## AGRICULTURAL ENGINEERING

**1. Farm Mechanics.** First or second term. Credit three hours. Lectures: first term, T Th 9, Dairy Industry Building 218; second term, T Th 10, Dairy Industry Building 119. Practice: first term, M T or W 1.40-4; second term, M or T 1.40-4. Agricultural Engineering Laboratories. Professor RILEY and Assistant Professor WRIGHT.

A course planned to give training in understanding the farm application of mechanical methods and appliances and to develop ability to think and reason in terms of these. Laboratory fee, \$2.

**21. Farm Engineering.** First or second term. Credit three hours. Lectures: first term, M W 9; second term, M W 10. Dairy Industry Building 119. Practice: M or T 1.40-4. Dairy Industry Building, Fourth Floor, and field. Professor MCCURDY.

A study of the practical solution of the elementary problems involved in connection with surveying and mapping the farm; leveling for farm drainage and water supply; laying out building foundations. Farm drainage, concrete, and sewage disposal are studied. Laboratory fee, \$2.

**40. Farm Shop Work.** First or second term. Credit two hours a term. First term, any four hours, M T Th 1.40-4; second term, T Th 1.40-4. Agricultural Engineering Laboratories. Professor ROEHL.

This course includes woodworking, with special jobs in carpentry, cabinet making, and fitting tool handles; metal working, with special jobs in saw fitting, tool grinding, cold-metal working, sheet-metal working, selecting and attaching builders' hardware; forge work, with special jobs in shaping and tempering tools; painting, with special jobs in repairing and refinishing furniture; harness repairing; problems in the use of rope. Mechanical drawing and free-hand sketching are done as they supplement the work. Laboratory fee, \$3.

### AGRONOMY

**6. Soils.** Second term. Credit three hours. Lectures and recitations, M T Th 11. Caldwell 100. Laboratory, M or T 1.40-4. Caldwell 49. Professor BUCKMAN.

A course dealing with the composition, properties, and plant relations of soils, with particular reference to the practical use of lime, fertilizers, and other means of maintaining soil fertility. Laboratory fee, \$3.

**11. Production of Field Crops.** First or second term. Credit four hours. Lectures, M W F 10. Caldwell 100. Laboratory: first term, T W or Th 1.40-4; second term T or W 1.40-4. Caldwell 250. Assistant Professor HARTWIG.

A course dealing principally with the crops that are used for feeding livestock. Emphasis is placed on the hay, silage, pasture, and grain crops of the North-eastern States. Cultural methods, crop rotation, fertilizer practices, soil and climatic adaption, and the better varieties of the important crops, are considered. Laboratory fee, \$3.

### ANIMAL HUSBANDRY

**1. Livestock Production.** First term. Credit three hours. Lectures, W F 10. Agricultural Economics Building 25. Laboratory, T Th or F 1.40-4, or W 11-1. Judging Pavilion. Professors M. W. HARPER, HARRISON, and SAVAGE, Assistant Professors HINMAN and J. P. WILLMAN, and assistants.

Introduction to types, breeds, judging, and management of livestock. Laboratory fee, \$2.

**10. Livestock Feeding.** First or second term. Credit four hours. First term: Lectures, M W F 11. Animal Husbandry Building A. Laboratory, Th or F 1.40-4. Animal Husbandry Building C. Second term: Lectures, M W F 9. Animal Husbandry Building A. Laboratory, T W Th or F 1.40-4. Animal Husbandry Building C. Assistant Professor SALISBURY and Messrs. BRIGGS and

The feeding of farm animals, including the general basic principles, feeding standards, the computation of rations, and the composition and nutritive value of livestock feeds.

**20. Animal Breeding.** First term. Credit three hours. Lectures, M W 9. Recitation, demonstration, or laboratory, M T or W 1.40-4. Animal Husbandry Building A and C. Professor ASDELL and assistant.

A general outline of the principles of physiology and heredity as applied to the breeding of farm animals. Laboratory fee, \$2.

**30. Health and Diseases of Animals.** First term. Credit three hours. Lectures, M W F 11. Veterinary College. Professor BIRCH.

The course is designed to give the student a clear conception of the causes and nature of the diseases of animals, with suggestions for their prevention. Special attention is given to the methods of preventing the spread of the infectious and epizootic diseases. Such information as is practicable is given for the treatment of slight injuries and for first aid in emergencies.

40. **The Horse.** Second term. Credit three hours. Lectures, T Th 9. Animal Husbandry Building B. Practice, W 1.40-4. Judging Pavilion. Professor M. W. HARPER.

A general course treating of the horse and the mule. Judging, scoring, care and management, economy in feeding, breeding, and stable management, including harnessing, hitching, and the like. Origin, history, and development of the breeds of horses. Laboratory fee, \$2.

50. **Dairy Cattle.** Second term. Credit three hours. Lectures, T Th 10. Animal Husbandry Building A. Practice, M or Th 1.40-4. Animal Husbandry Building A and Judging Pavilion. Professors SAVAGE and HARRISON, and assistants.

Origin, history, and development of the breeds of dairy cattle; methods of breeding; economy of feeding; production of milk; care, management, and sanitation of the dairy herd. Practice in judging, scoring, tracing pedigrees, and keeping records. Laboratory fee, \$2.

60. **Beef Cattle.** Second term. Credit three hours. Lectures, W F 10. Animal Husbandry Building C. Practice, W 1.40-4. Beef Cattle Barn. Assistant Professor HINMAN.

Origin, history, and development of the breeds of beef cattle; herd management; feeding for fattening; practice in judging. Lectures, recitations, discussions, reports, tracing of pedigrees, and field trips. Estimated cost of trips, \$6. Laboratory fee, \$2.

70. **Swine.** Second term. Credit three hours. Lectures, W F 11. Animal Husbandry Building C. Practice, T 1.40-4. Judging Pavilion. Assistant Professor J. P. WILLMAN.

Origin, history, and development of the breeds of swine; herd management; practice in judging swine; and reports on assigned topics. Lectures, recitations, discussions, and field trips intended to give the student a knowledge of the feeding, management, production, and marketing of swine. Estimated cost of trips, \$4. Laboratory fee, \$2.

80. **Sheep.** First term. Credit three hours. Lectures, T Th 10. Animal Husbandry Building B. Practice, M 1.40-4. Judging Pavilion. Assistant Professor J. P. WILLMAN.

Origin, history, and development of the breeds of sheep; flock management; feeding and fattening lambs; practice in judging. Lectures, recitations, discussions, reports, and field trips intended to give the student a knowledge of the management, production, and marketing of sheep and lambs. Estimated cost of trips, \$4. Laboratory fee, \$2.

90. **Meat and Meat Products.** First or second term. Credit three hours. Lecture, M 8. Animal Husbandry Building B. Two laboratory periods a week, W 1.40-4 and a choice of M or T 1.40-4. Animal Husbandry Building B and Meat Laboratory. One required inspection trip to Buffalo stockyards and slaughterhouses. Assistant Professor HINMAN and Mr. SCHUTT.

A course in the slaughtering of farm animals, the cutting of carcasses, and the preparation and curing of meats. Laboratory fee, \$2.

## BACTERIOLOGY

3. **Agricultural Bacteriology.** First term. Credit three hours. Lectures, M W F 9. Dairy Industry Building 218. Professor STARK.

The elements of bacteriology, with a survey of the relation of microorganisms to agriculture.

## BOTANY

1. **General Botany.** First and second terms. Credit three hours a term. Lectures, T Th 9 or 11. Plant Science 233. Laboratory, one period of two and one-half hours. Plant Science 240, 242, 262. Professor PETRY, Drs. LAUBENGAYER, KOCH, and SCHAPPELLE, Messrs. REECE, LINDSEY, and SPENCER, and Miss BELK.

A survey of the fundamental facts and principles of plant life. The work of the first term deals with the structures and functions of the higher plants, with special emphasis on their nutrition. The work of the second term traces the evolution of the plant kingdom, as illustrated by representatives of the principal groups, and concludes with a brief introduction to the principles of classification of the flowering plants. Laboratory fee, \$3.50 a term.

**31. Plant Physiology.** First or second term. Credit four hours. Lectures, T Th 10. Plant Science 143. Laboratory, T Th 1.40-4 or W F 1.40-4. Plant Science 227. Professor KNUDSON or Professor O. F. CURTIS, Assistant Professor HOPKINS, and Messrs. CLARK and SCOFIELD.

This course is designed to acquaint the student with the general principles of plant physiology. Topics such as water relations, photosynthesis, translocation, digestion, respiration, mineral nutrition, growth, and reproduction are studied in detail. In both laboratory and recitations emphasis is placed on discussion of the principles taught and on their applications. Laboratory fee, \$4; deposit, \$3.

## DAIRY INDUSTRY

**1. Introductory Dairy Science.** First or second term. Credit three hours. Lectures, T Th 11. Dairy Industry Building 218. Laboratory: first term, M or F 1.40-4.30 or S 9-12; second term, M or Th 1.40-4.30. Dairy Industry Building 209. Professor HERRINGTON and Messrs. HOLLAND and STEELE.

The scientific and practical aspects of milk, and a survey of the dairy industry. Especial attention is given to the composition of milk and its physical and chemical properties, quantitative tests for fat and other constituents, and qualitative tests for preservatives and adulterants. Laboratory fee, \$7.

**2. Elementary Dairy Industry.** Second term. Credit three hours. Lecture and laboratory practice, S 8-1. Dairy Industry Building 119. Professor GUTHRIE. A special course in milk testing, dairy inspection, and market dairying adapted to the needs of non-degree students in dairy farming. Laboratory fee, \$7.

**102. Market Milk and Milk Inspection.** Second term. Credit five hours. Lecture and laboratory practice, T Th 1-6. Dairy Industry Building 218 and 146. Professor ROSS and Assistant Professor AYRES.

Attention is given to the production and control of market milk, with special reference to its improvement; milk as food; shipping stations; transportation and sale; pasteurizing; standardizing; clarification; certified milk; milk laws; commercial buttermilk; methods of cooling; harvesting and storage of ice; duties of milk inspectors; apparatus and buildings. The practice includes visits to dairies in the vicinity of Ithaca. A required two-day inspection trip in the neighboring counties may be arranged. Laboratory fee, \$10.

**103. Milk-Products Manufacturing.** First term. Credit five hours. Lectures, recitations, and laboratory practice, T Th 12-5. Dairy Industry Building 120. Professor GUTHRIE, and Assistant Professor AYRES.

The principles and practice of making butter, cheese, and casein, including a study of the physical, chemical, and biological factors involved. Consideration is given also to commercial operations and dairy-plant management. Laboratory fee, \$10.

## ENTOMOLOGY

**42. Elementary Economic Entomology.** Second term. Credit three hours. Lectures, T Th 9. Practical exercise, T 1.40-4. Comstock 100. Professor READIO and Messrs. O. R. SMITH and HALLOCK.

The course includes lectures, conferences, and discussions, on the life histories and habits of injurious insects, together with methods of control. The practical exercises include a study of the more important insecticides and of as many of the common pests as time permits. Laboratory fee, \$2.

## EXTENSION TEACHING

1. **Oral and Written Expression.** First term. Credit three hours. Lectures and practice, M W F 8 or 9, Roberts 131; M W F 8, Roberts 392. Criticism, by appointment, daily 8-1. Assistant Professor PEABODY, and Messrs. PHILLIPS and \_\_\_\_\_.

Practice in oral and written presentation of topics in agriculture, with criticism and individual appointments on the technic of public speech. Designed to encourage interest in public affairs, and, through demonstrations and the use of graphic material and other forms, to train for effective self-expression in public. Special training is given to competitors for the Eastman Prizes for Public Speaking and the Rice Debate Stage. In addition, some study is made of representative works in English literature.

2. **Oral and Written Expression.** Second term. Credit three hours. Continuation of course 1. M W F 8 or 9, Roberts 131; M W F 8, Roberts 392. Assistant Professor PEABODY, Messrs. PHILLIPS and \_\_\_\_\_.

Part of the work of this course is a study of parliamentary practice.

## FLORICULTURE AND ORNAMENTAL HORTICULTURE

1. **Principles and Methods of the Propagation and Management of Greenhouse Crops.** First term. Credit three hours. Lectures, M W 10. Plant Science 37. Practice, T or Th 1.40-4. Plant Science 15 and greenhouses. Professor WHITE and Mr. WADSWORTH.

An elementary course in commercial flower growing, intended to acquaint students with the scientific principles and floricultural methods governing the propagation and culture of flowers under glass. The construction, heating, and equipment of greenhouses is also studied. Laboratory fee, \$2.50.

3. **Herbaceous Plant Materials.** Second term. Credit three hours. Lectures, T Th 8. Plant Science 37. Practice, Th 1.40-4. Plant Science 15 and gardens. Messrs. ALLEN and WADSWORTH.

A study of the identification and culture of annuals, herbaceous perennials, and garden roses. The aim is to give the student an intimate knowledge of those forms of annual and herbaceous plants that may be used in garden planting, either on home grounds or in public parks. An excellent collection of plant material is available for demonstration work in this course. All members of the class are required to participate in an excursion to the Rochester parks and gardens. Laboratory fee, \$3.

7. **Plant Propagation.** First term. Credit three hours. Lecture, T Th 11. Practice, S 10.30-12.50. Plant Science 40, greenhouses, and nurseries. Mr. SKINNER.

This course is planned for both the general students and those specializing in floriculture and ornamental horticulture. It consists of a study of the elementary methods of plant propagation, and the care of the plant stocks produced. All members of the class are required to participate in an excursion to nurseries in Newark or vicinity early in November. Laboratory fee, \$4.

101. **Commercial Floriculture.** First and second term. Credit four hours a term. Lectures and recitations, M W F 9. Plant Science 22. Practice, W 1.40-4. Greenhouses. Mr. POST.

The first term consists of a comprehensive study of the principles underlying the culture of greenhouse plants. The second term is devoted to a study of the culture of greenhouse crops such as are grown by florists for commercial growers. Special attention is given to the methods of culture, timing the crop, packing, shipping, and to the cost of production. The class is required to participate in a fall and spring trip to near-by commercial greenhouses. Laboratory fee, \$3 a term.

103. **Wholesaling and Retailing Flowers.** Second term. Credit two hours. Lectures, M 11. Practice, M 1.40-4. Plant Science 22. Mr. E. L. HARTMAN.

This course is planned with the view of giving students a thorough knowledge of methods of retail-store management, store equipment, salesmanship, business methods, delivery, decorating for all functions, flower arrangement and the mak-

ing of designs, methods of conducting cooperative flower exchanges, and wholesale markets. A required trip to Rochester, to visit wholesale establishments and retail stores, is made about May 1. Laboratory fee, \$5.

### METEOROLOGY

1. **Elementary Meteorology.** First or second term. Credit three hours. Lectures, T Th 11. Plant Science 143. Laboratory, T W or Th 1.40-4. Plant Science 114. Professor MORDOFF.

A course designed to acquaint the student with the principles of the general and secondary circulation of the atmosphere; the elements of weather and climate; practical weather forecasting from weather maps and local observations. Laboratory fee, \$2.

### PLANT BREEDING

103. **Plant Breeding.** Second term. Credit three hours. Lectures, T Th 8. Lecture and practice, S 8-10. Plant Science 141. Professor C. H. MYERS.

A general study of the principles and practices of plant breeding; hybridization, selection, seed production, and distribution in relation to crop improvement; development of methods for different types of plants; lectures supplemented by periods in the greenhouse and experimental fields.

### PLANT PATHOLOGY

1. **General Plant Pathology.** First or second term. Credit three hours. Lecture, W 8. Plant Science 336. Practice and conferences, any two periods, T W Th F 1.40-4. Plant Science 341, 343, and 362. Professor WHETZEL, Assistant Professor WELCH, and Messrs. THOMPSON, McCLAIN, and W. L. WHITE.

A fundamental course treating of the nature, cause, and control of plant diseases, illustrated by studies of the commoner diseases of cultivated crops. Laboratory fee, \$4.50; breakage deposit, \$3.

### POMOLOGY

1. **General Pomology.** Second term. Credit three hours. Lectures, T Th 8. Plant Science 233. Laboratory, M T W Th or F 1.40-4, or S 10-12.30. Plant Science 114. Professor CARRICK and Messrs. SAVAGE and ———.

A study of the general principles and practices in pomology; propagation and care of orchard trees and small fruits; harvesting, storing, and marketing fruit; practical work in budding, grafting, pruning, and planting; study of varieties, growth, and fruiting habits. Laboratory fee, \$1.50.

2. **Fruit Varieties.** First term. Credit two hours. Lecture and laboratory, Th 8-10. Plant Science 107. Professor MACDANIELS and Mr. SAVAGE.

A study of the most important varieties of apples, pears, peaches, plums, grapes, and small fruits from the standpoint of their identification, growth, characters, regional adaptation, season of ripening, storage quality, and other matters of a similar nature. A part of the time is given to the judging of exhibition fruit, and the Farm and Home Week fruit exhibit is set up by the students in this course. Laboratory fee, \$1.50.

111. **Packing and Storage of Fruit for Market.** First term. Credit two hours. S 8-1. Plant Science 114 and the packing house. Professor CARRICK and Mr. SAVAGE.

The important factors in harvesting and handling fruit that affect quality and marketability are studied. Particular emphasis is placed on packing apples, in barrels, baskets, boxes, and other retail packages, but the work covers also such fruits as peaches, pears, and grapes, in so far as these are available. The effect of grades and packages on distribution and marketing is fully discussed, and consideration is given to some of the problems of market inspection. The principles and practices of common, cold, and freezing storage are considered.

**112. Advanced Laboratory Course.** Second term. Credit two hours. S 8-1. Plant Science 107. Professors HEINICKE, MACDANIELS, OSKAMP, and CARRICK.

This course is designed to give more extended practice in the various orchard operations than can be given in course 1. Special attention is given to problems of pruning, tree surgery, bracing, orchard-soil selection and management, and pest control.

### POULTRY HUSBANDRY

**1. Farm Poultry.** First term. Credit three hours. Lectures, M W F 10. Poultry Husbandry Building 300. One recitation to be arranged. Poultry Husbandry Building 305. Professors HEUSER and HUTT, Assistant Professors BRUNETT and HALL, and Mr. LAMOREUX.

A general course dealing with the practical application of the principles of poultry husbandry to general farm conditions.

**110. Poultry Nutrition.** Second term. Credit three hours. Lectures, T Th 9. Laboratory, Th 1.40-4. Poultry Husbandry Building 305. Professor HEUSER.

The principles of poultry nutrition and their application to poultry-feeding management.

**20. Poultry Breeds, Judging and Breeding.** First term. Credit three hours. Lectures or recitations, M W 11. Poultry Husbandry Building 305. Laboratory, M or T 1.40-4. Breed-Observation House. Assistant Professor HALL.

The origin, history, and classification of breeds of domestic poultry; introduction to breeding; judging the principal breeds. A trip is made to one of the leading poultry shows. Laboratory fee, \$2.

**30. Poultry Incubation and Brooding.** Second term. Credit two hours. Lecture, Th 11. Laboratory, F 1.40-4. Poultry Husbandry Building 305. Mr. LAMOREUX.

Principles and practice of incubation and brooding and problems of hatchery management.

**50. Market Eggs and Poultry.** First term. Credit two hours. Lecture, F 11. Laboratory, Th or F 1.40-4. Poultry Husbandry Building 100. Assistant Professor HALL and Mr. COLE.

A detailed study of the interior and exterior qualities of eggs; abnormalities; egg grades and standards; practice in candling, grading, and packing. Grades and standards of market poultry; killing, dressing, and packing. General market information. Laboratory fee, \$2.

**170. Poultry Hygiene and Disease.** First term. Credit two hours. Lectures, T Th 10. James Law Hall. Assistant Professor BRUNETT.

The course deals with the nature of the infectious and parasitic diseases of poultry and with the principles of hygiene applicable to poultry farming, for the prevention and control of diseases.

### VEGETABLE CROPS

**1. Vegetable Crops.** Second term. Credit three hours. Lectures, M W 11. East Roberts 222. Laboratory, M T or W 1.40-4. Vegetable greenhouses and East Ithaca gardens. Professor WORK.

A general study of the principles of vegetable growing and handling, giving a comprehensive survey of the industry. Intended for the student who desires a brief general course, and as an introductory course for the student who wishes to specialize in commercial vegetable growing. Economic importance, geography, cultural requirements, marketing, storage, and uses, of the important vegetables. A one-day trip is required; approximate cost, \$4. Laboratory fee, \$2.

**2. Special Cash Crops.** Second term. Credit three hours. Lectures, T Th 10. East Roberts 222. Laboratory, T W or Th 1.40-4. East Roberts 232. Professor HARDENBURG.

A study of those crops that are grown in New York principally as cash crops and for manufacture, including potatoes, field beans, field cabbage, and the important canning crops, peas, tomatoes, sweet corn, and snap beans. About one-half of the term's work is devoted to potatoes. A visit to near-by bean elevators is required; approximate cost, \$1. Laboratory fee, \$2.

**12. Grading and Handling Vegetable Crops.** First term. Credit three hours. Lectures, T Th 10. East Roberts 222. Laboratory, T W or Th 1.40-4. East Roberts 232. Professor WORK.

Geography of vegetable production and distribution, factors of environment, culture, and handling as affecting quality, condition, and marketing of vegetable crops. Harvesting, grades and grading, packing, shipping-point and terminal-market inspection, transportation, refrigeration, and storage are discussed with reference to the various crops. A two-day trip is required; approximate cost, \$9. Laboratory fee, \$2.50.

**113. Types and Varieties of Vegetables.** First term. Credit three hours. Lecture and laboratory, M 1.40-4. East Ithaca gardens or East Roberts 223. Professor WORK.

One week of laboratory work preceding the beginning of regular instruction is required, from September 24 to 30, 1936. Report at East Ithaca at 9 a. m., September 24. The department should be notified of intention to register in this course.

This course deals with the taxonomy, origin, history, characteristics, adaptations, identification, classification, exhibition, and judging, of kinds and varieties of vegetables. Attention is given also to the characteristics, production, and handling of vegetable seeds. The leading varieties of the vegetable crops are grown each year. The value of the course depends to a great extent upon gaining an acquaintance with the plant material as it grows. For this reason, part of the laboratory work is done in the gardens prior to and during registration week. Laboratory fee, \$2.

#### COURSES IN OTHER COLLEGES

**101. General Chemistry.** First or second term. Credit three hours. Lectures: two sections, M W F 11 or T Th S 11. Baker. Main Lecture Room. Professor BROWNE and Assistant Professor LAUBENGAYER.

**105. General Chemistry.** First or second term. Credit three hours. Recitation, one hour a week, to be arranged. Laboratory sections, M F 1.40-4; T Th 1.40-4; W 1.40-4; S 8-10.20. Baker 150. Assistant Professor LAUBENGAYER and assistants.
