Department of Avian and Aquatic Animal Medicine

Date 21. VI. 82 Accession No. 76210

From Reynolds Game Farm Tel. 273-2768

Address c/o Mr. C. B. Danoung

Breed Pheasant Strain: Ringneck No. Age 3 wks.

Other Material 2 live birds
3 dead birds

Total population - 5000 birds. normally mortality is just 2/day.

Abnormal mortality, since yesterday - in 2 pens

28/day in Pen of 1400 birds

17/day in Pen of 500 birds

Clinical signs: depression, drowsiness, rapid breathing,
(2 live birds)
shivering, incoordination, ataxia, ruffled feathers.

Postmortem Findings:

3 dead birds - no visible lesions. One bird showed
slightly deformed keel.

1 live bird - liver w/ areas of necrosis

Diagnosis Hepatitis

Reported. Date and By M. C. P

Liver, brain and muscle of live birds submitted for
histopath.

Liver and heart of live birds - collected for
bacteriological exam.

23.VI.82

Five dead birds sent again.

6.5)

P. M. Findings:

All birds dehydrated

Three (3) birds showed distinct lobulation
of the kidney.

Two (2) birds showed gangrenous dermatitis
involving lateral part of thigh and both legs

Note:

kidney collected for histopath.

Breed W. L. (Hall Cross Cornish)

No. 1 line Age 8 weeks

Other Material

Total population: 27

Two (2) died already in 2 weeks time -

paralysis of legs, anorexia. Two days ago

^{this} bird showed similar symptoms - tremors,

drooping wings, paralytic. The rest of the

flock are still healthy.

Three weeks ago - feeding - switch from broiler (2-3%)

to finishing ration (14.5%).

Postmortem Finding:

1. Liver and spleen - swollen and cut surfaces are

granular in appearance

2. Fibrous exudates on peritoneal surface of liver

Diagnosis Marek's Disease w/ concurrent Bacterial Infection

Reported. Date 29. VI.

By M. C. J.

3. Lungs - showed consolidation on dorso medial

part of right lobe.

4. Kidneys - showed severe hydronephrosis?

Histopathologic Exam - sections of liver, spleen, lungs & kidneys.
