

The Station News

Vol. XIII, No. 18.

October 23, 1929.

Geneva, New York

-----:
DAIRY SHOW : The Dairy Industries Exposition got under way in Toronto on Monday,
UNDER WAY :
-----: and several members of the Dairy and Bacteriology Divisions are attending the Exposition and the meetings of various trade organizations that convene at this time. As stated last week, Dr. Dahlberg will spend the entire week at the Exposition in charge of an exhibit sponsored by the American Dairy Science Association, while Mr. Henning and Mr. Marquardt will make brief visits to the Exposition. Dr. and Mrs. Breed and Dr. and Mrs. Hucker left for Toronto by automobile this morning, and Dr. Dorner and Mr. Hansen are also planning to make the trip.

-----:
MAKING PLANS : The dates for the winter meeting of the State Horticultural Society
FOR ROCHESTER:
-----: in Rochester have been set for January 15-17 which seems a long way off, but already plans are being made for exhibits from the Station and the College of Agriculture. Dr. Earl Bates, who will be in general charge of the College exhibits; R. H. Wheeler, of the Extension Service; and Dr. F. P. Bussell, of the Department of Plant Breeding at Ithaca called at the Station today to discuss certain details of the exhibits. The group, accompanied by Mr. Luckett, then went on to Rochester for a conference with Mr. McPherson, Secretary of the Horticultural Society, on the allotment of space for the exhibits. Several lines of work at the Station will be represented, and two or three members of the Staff will appear on the program.

-----:
BACTERIA : At the request of Dr. Hucker, chairman of the program committee of the
IN ACTION :
-----: University Club, Dr. S. Bayne-Jones, of the Department of Bacteriology and Pathology of the University of Rochester, demonstrated his motion pictures of the private life of bacteria before the members of the Club last night at the Seneca Hotel.

-----:
ORDER BOOKS : The attention of the Staff is directed to the procedure to be followed
THRU LIBRARY:
-----: in ordering books or periodicals. Requisitions for new books should be filed with the Librarian, who will check the request for possible duplication and who will record the order and then submit the requisition to the Director for final approval. Departure from this routine may lead to duplication or unnecessary delays.

-----:
MOVE INTO : Mr. Streeter has moved his family into the house formerly occupied by
NEW HOME :
-----: Mr. Wheeler and is rapidly assuming the responsibilities of a householder. We venture to remind Leon that in "the good old days" when the roof of a house was completed the owner opened up a keg for the benefit of all and sundry. The re-shingling of the Streeter home is well under way, but perhaps we have said enough.

-----:
MRS. BARSONY: Mrs. Barsony returned to her duties for the Stain Commission last Mon-
RETURNS :
-----: day, following a six weeks' visit to friends and relatives in Germany
and Czechoslovakia.

-----:
QUALITY : "Quality in Celery as Related to Structure" is the title of Illinois
IN CELERY :
-----: Experiment Station Bulletin No. 336 by C. B. Sayre which has just
come to hand. The bulletin represents studies made by Mr. Sayre in the preparation
of a thesis in partial fulfillment of the requirements for the Master's degree in the
Graduate School of the University of Illinois.

-----:
BACTERIOLOGI-: Following a custom established some time ago, the Bacteriology Divi-
CAL SYMPOSIA :
-----: sion is holding a symposium meeting each Monday at 1:30 p.m. in "Dag
guerre Hall", otherwise known as the attic in the Biology Building, to which all mem-
bers of the Staff are welcome. A program has been worked out for several weeks in
advance, and can be seen in the Bacteriology Laboratory or Miss Hogan's office.

-----: Reminded by certain unmistakable signs that the 1929 pheasant season
BY WAY OF :
SUGGESTION : is about to open, we are moved to call attention to several open
-----:
accounts for subscriptions to the NEWS and to remind our readers that payment in kind
is entirely acceptable.

-----:
NEWS FROM : Station folks wandering about in foreign lands were heard from the past
ABROAD :
-----: week. Mr. Stewart received a letter from Dr. Clayton telling of some
of his experiences in Holland and stating that Mrs. Clayton and he were setting out
for Denmark. Also, a brief message has been received from Dr. Glasgow relating his
experiences on his passage.

-----: Odds and ends of cookies of a popular brand, discarded by the maker as
SPOILING :
THE STORY : "culls", to the extent of some 200 pounds, were delivered recently to
-----:
expectant purchasers about the Station at the bargain price of 8 cents per pound. Now,
along comes a story that the same by-products can be obtained downtown at 4 cents per
pound. But then it must be remembered that we operate under a high-tariff system,
and doubtless the spread in price was absorbed by duties of some sort along the line.

-----: Difficulties in finding suitable names for the new arrivals in the
TROUBLE : family as they come along have often been the subject of jest, but
ENOUGH : members of the Dairy Division are finding that it is no joke to devise
-----: acceptable names for the additions to the Station herd. Just recently
several names were proposed to the American Jersey Cattle Club for new members of the
herd, only to have them returned as not quite suited to the tastes of the breed offi-
cials. It seems that of the thousands upon thousands of Jerseys registered with the
Club no two can have the same name, and since it is customary to have the name of both
the dam and the sire as part of the baby's name, the naming of Jersey calves has come
to be a fine art. Perhaps suggestions may be welcome by the members of the Dairy
Division, and then again maybe they would rather work it out for themselves.
