5029

Date 7/11/42 Accession No. 26526
From Mr. Lou Trudeau
Address 21 Jenkin St. Saranac Lake, N.Y.
Breed Reds No. 3 Age 4-5 wk.
Other Material dead
culture - S. pullorum
good pullorum lesions.

Diagnosis

Reported. Date

By

Pullorum disease
7/13/42 MST

Department of Pathology and Bacteriology
POULTRY DISEASES

5029

Date 7/11/42 Accession No. 26527

From J. Hartman. Report to J. C. Hutter.

Address —

Breed Red & wh. Leg. No. 2 Age 6 wks (wh. Leg.)
6 mos (Red)

Other Material Red - alive; wh Leg - dead.

wh Leg - decomposed - no visible lesions.

Red - lame - no nerve lesions - probably
jaw paralysis. There was history
of paralysis in flock.

Diagnosis —

Reported. Date 7/13/42 By MSH

Department of Pathology and Bacteriology
POULTRY DISEASES

5029

Date 7/11/42 Accession No. 26528

From C. A. Beard.

Address 11 Granger place Rochester ny.

Breed Wh. Leg. No. 3 Age 2-3 mos.

Other Material Alive.

1. Curly toes (curled inward).

2. one toe curled inward.

3. one toe slightly deformed.

two birds pasted - no internal lesions.

one carcass and one live bird taken to

Norris or Hensen at request of Hutter.
