

Public Access to Agricultural Data

Simon Liu, Ph.D.

Director, National Agriculture Library

July 22, 2013

Agenda

- Introduction
 - Public Access
 - Trends
- Opportunities & Challenges
- Approach & Strategies
- Action Plans
 - Scholarly Publications
 - Scientific Digital Data
- Q&A

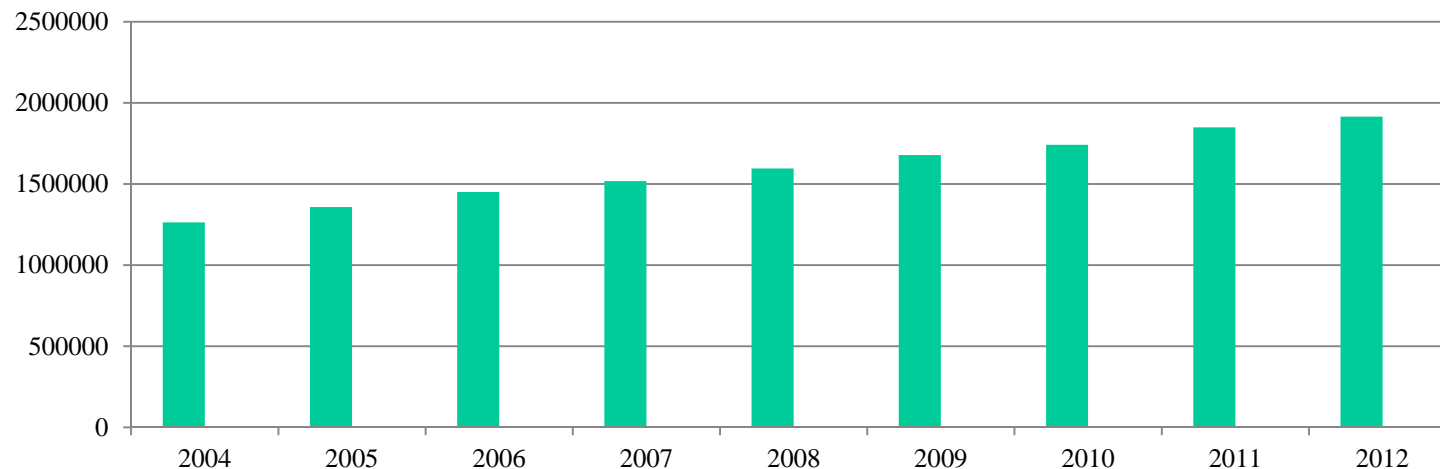

Introduction

- Public access
 - RCUK
 - CISTI
 - Wellcome Trust
- Public access in the US
 - NIH (2008)
 - America COMPETES Reauthorization Act (12/2010)
 - Office of Science & Technology Policy (OSTP) Public Access Memo (02/2013)
 - Fair Access to Science & Technology Research Act (02/2013)
 - Executive Order – Making Open and Machine Readable the New Default for Government Information (05/2013)
- Public access to research results
 - Scholarly publications
 - Scientific digital data

Scholarly Publication Trends

- Growing number
- Multimedia components
- Increasing interactivity & dialogue
- Linkages to content environments
- Mobilization

Scholarly Publishing (2004-2012)

Source:
Scopus

Scientific Digital Data Trends

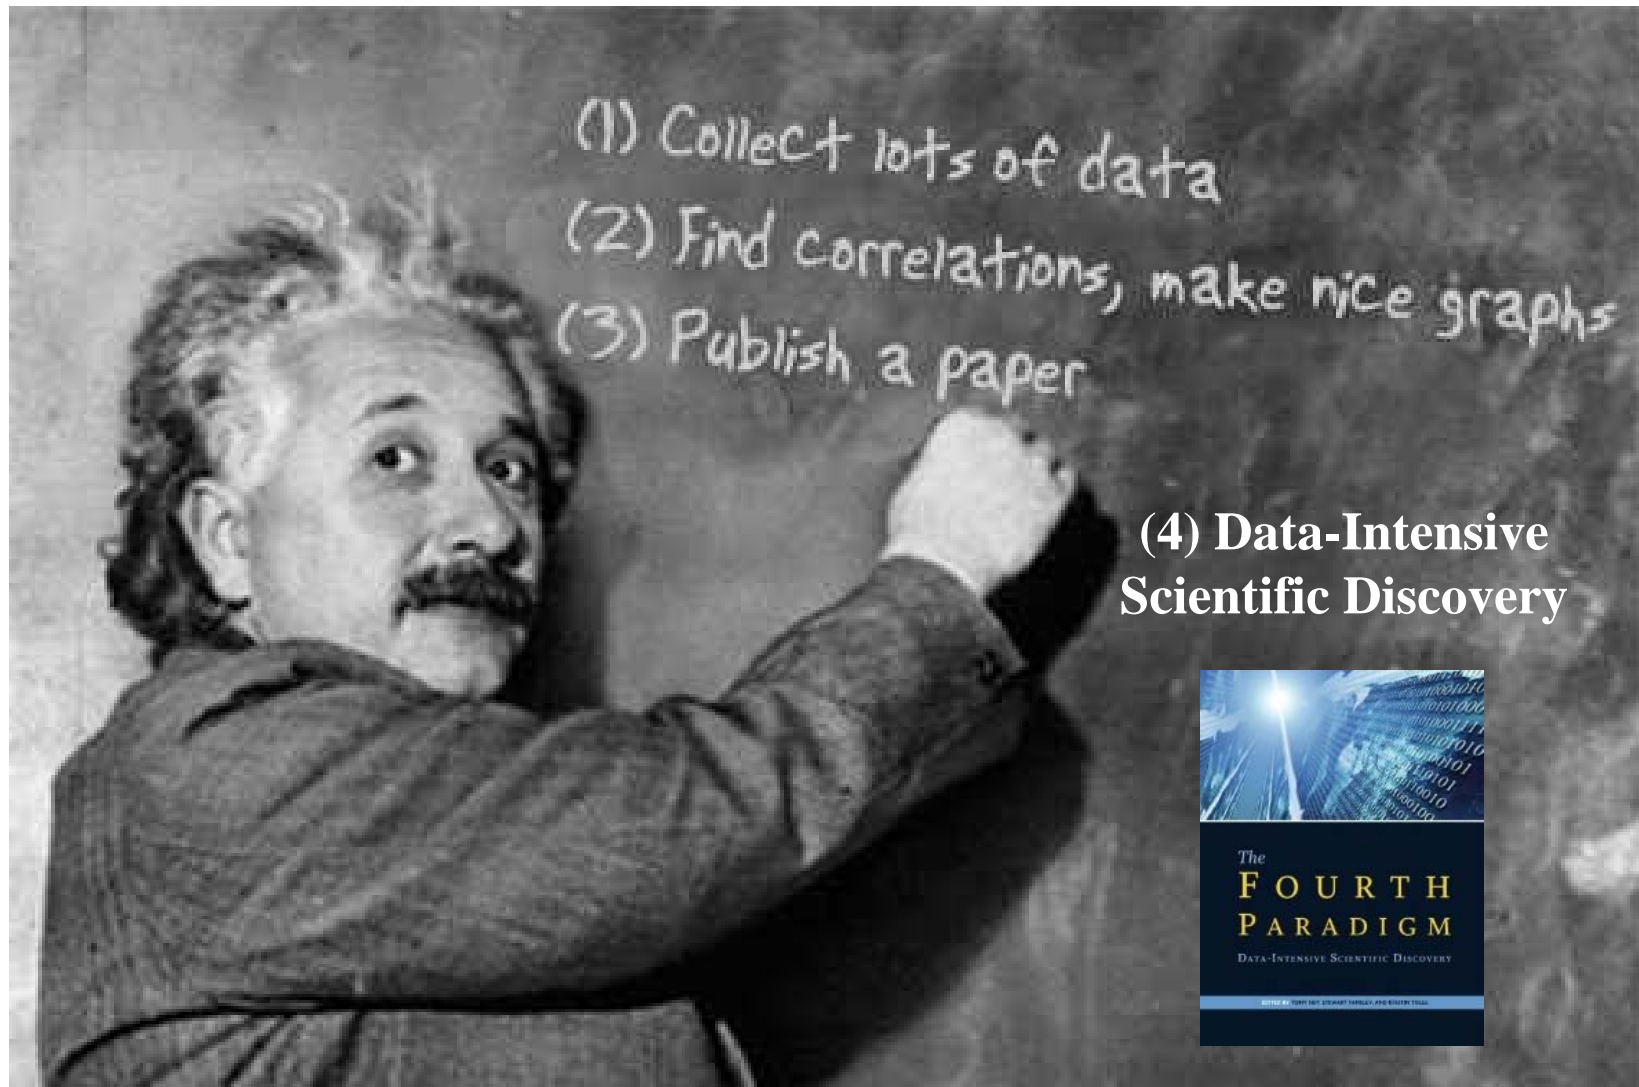

Data Desert

- Limited Data
- Expensive to collect
- Lack of automation
- Labor intensive
- Lack of exchange mechanisms
- Without sharing culture

Data Tsunami

- Large volumes
- High velocity
- Complex variety
- Unknown value

New Research Opportunities

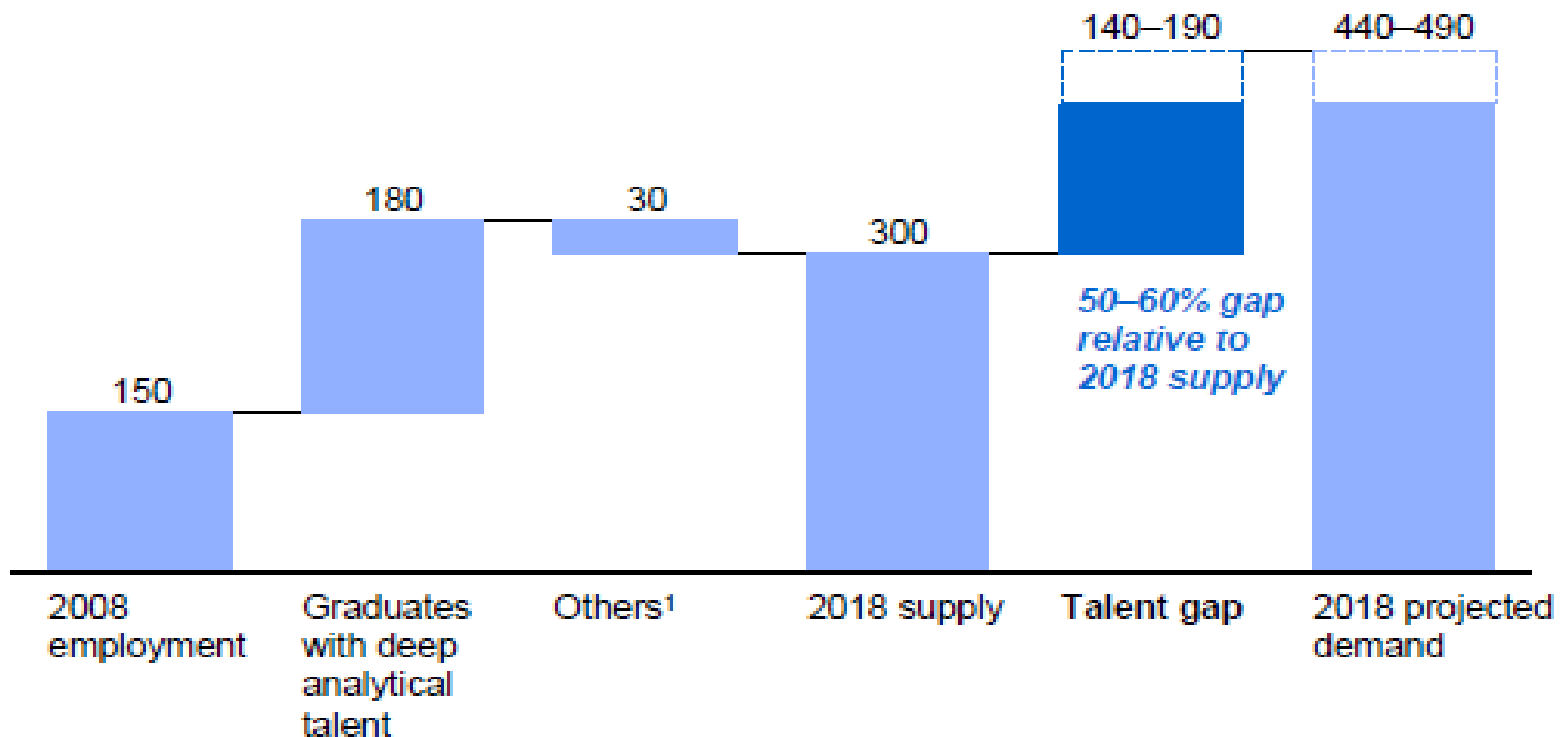

General Talent Shortage

Demand for deep analytical talent in the United States could be 50 to 60 percent greater than its projected supply by 2018

Supply and demand of deep analytical talent by 2018

Thousand people

¹ Other supply drivers include attrition (-), immigration (+), and reemploying previously unemployed deep analytical talent (+).

SOURCE: US Bureau of Labor Statistics; US Census; Dun & Bradstreet; company interviews; McKinsey Global Institute analysis

Unique Ag Data Challenges

Most agricultural data are generated & managed locally.

Unique challenges

- Data dispersion
- Data heterogeneity
- Data sharing

How to Respond?

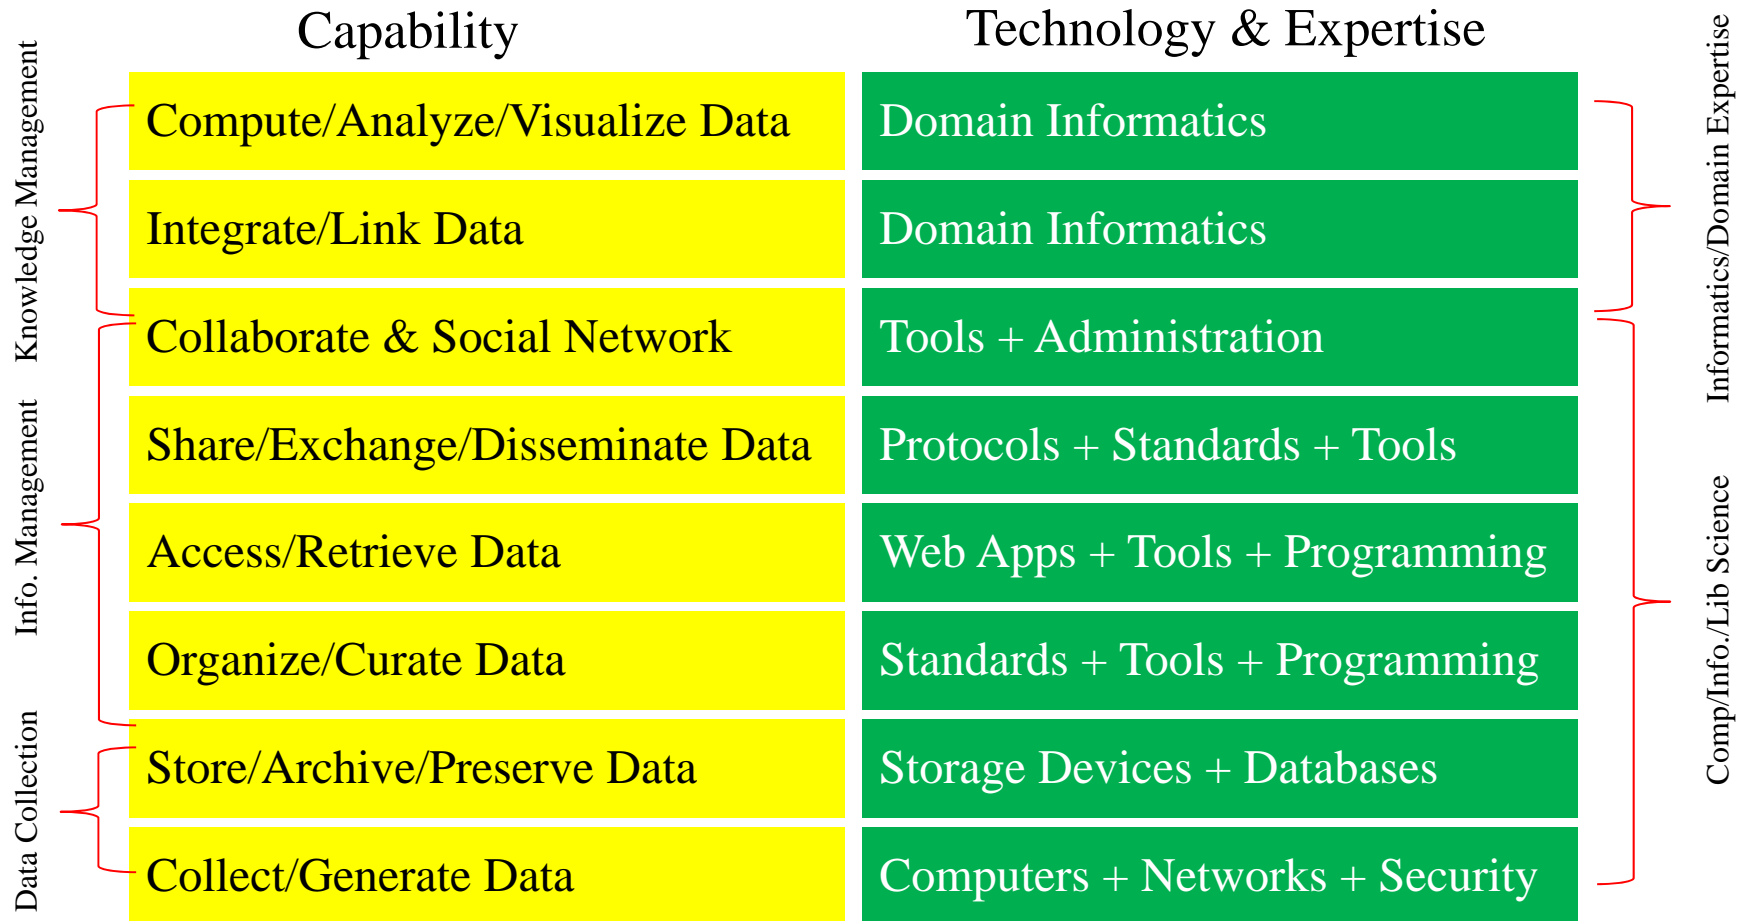

Business as usual?

A New Approach

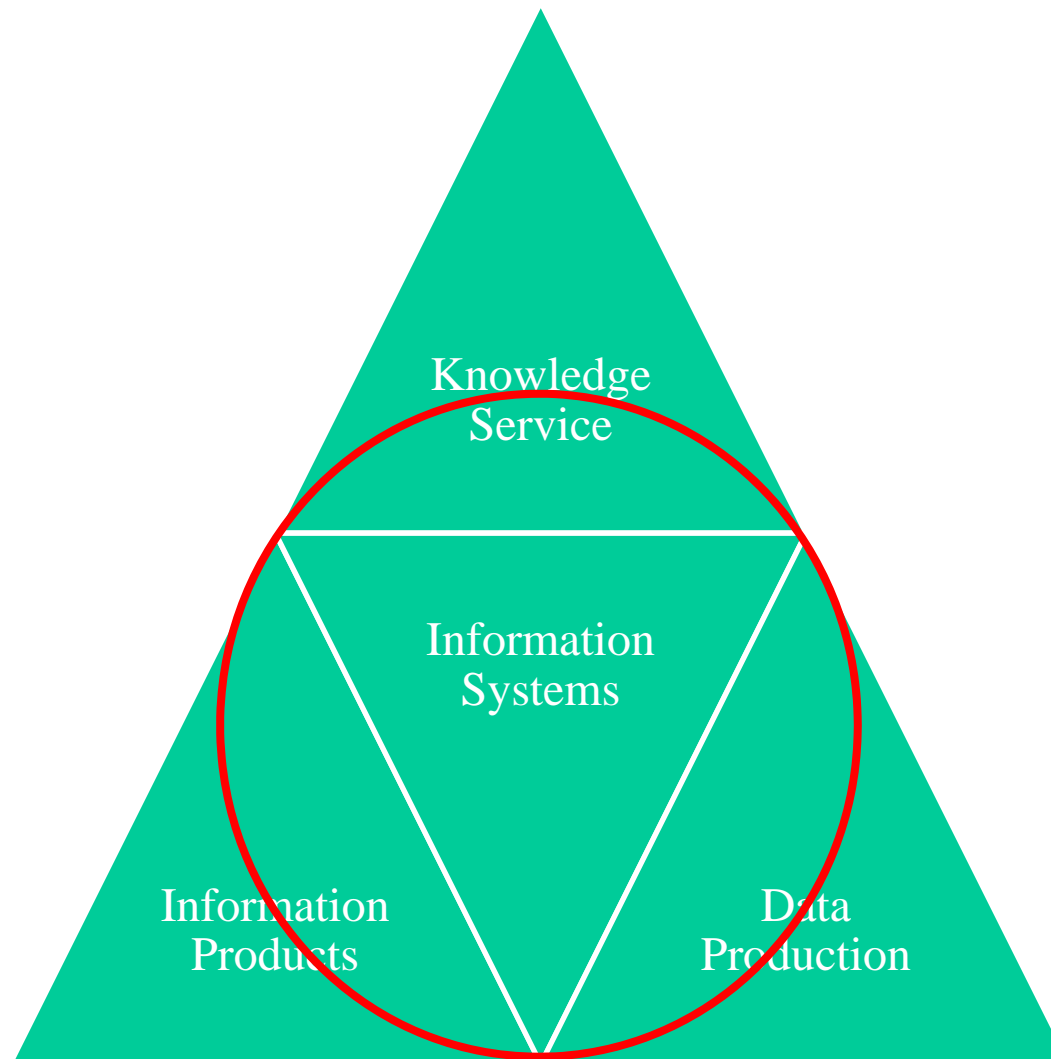

We need something better, Jim !

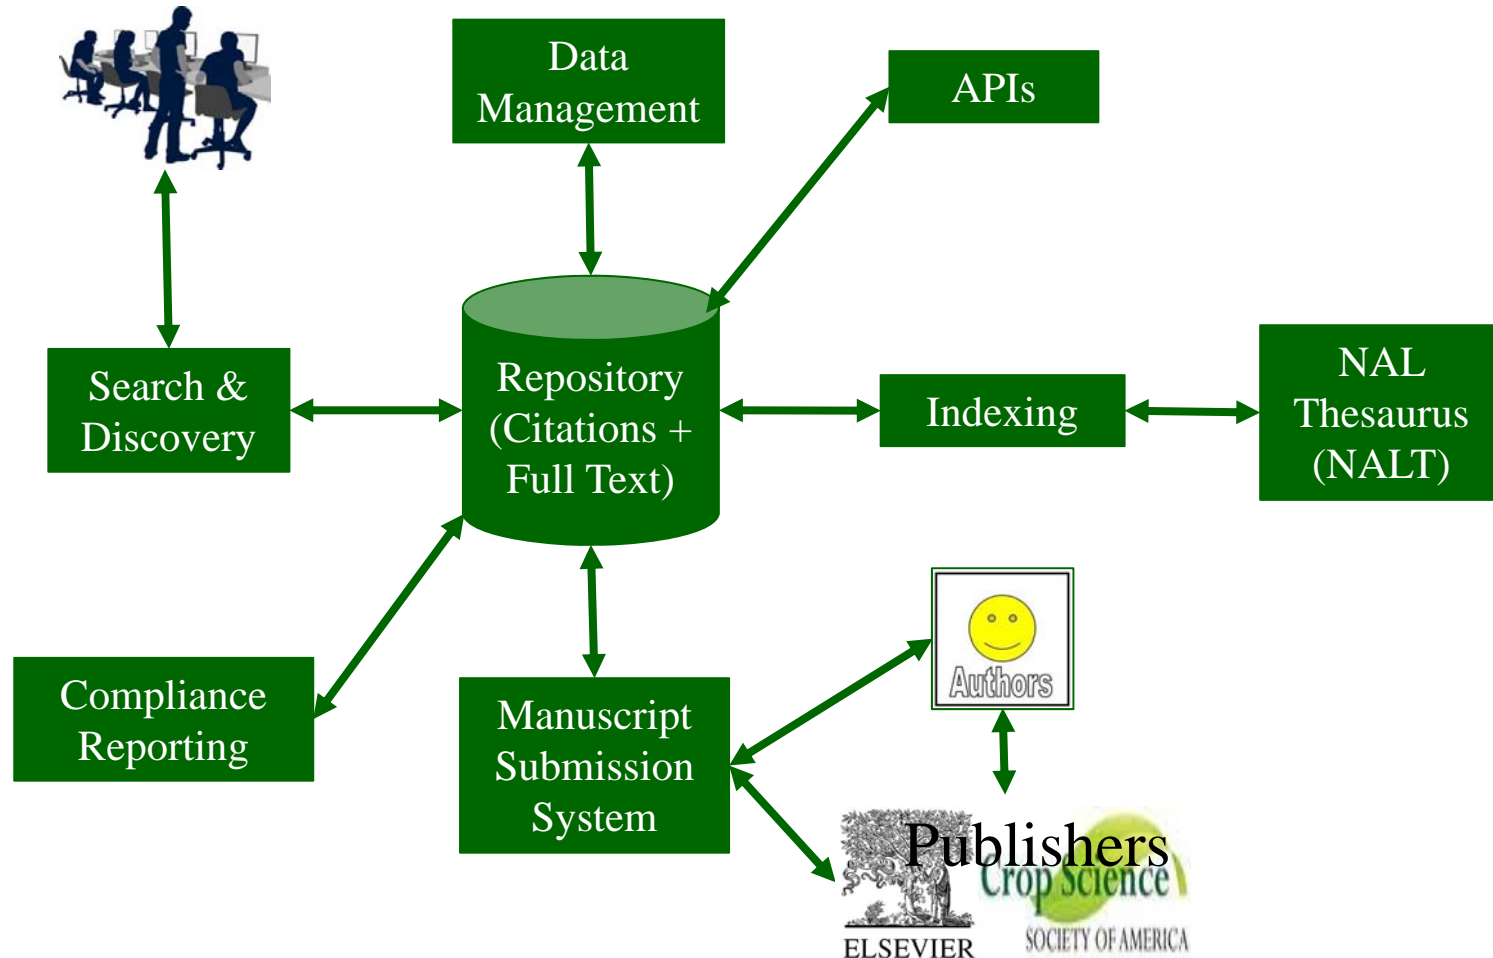

Needs Analysis

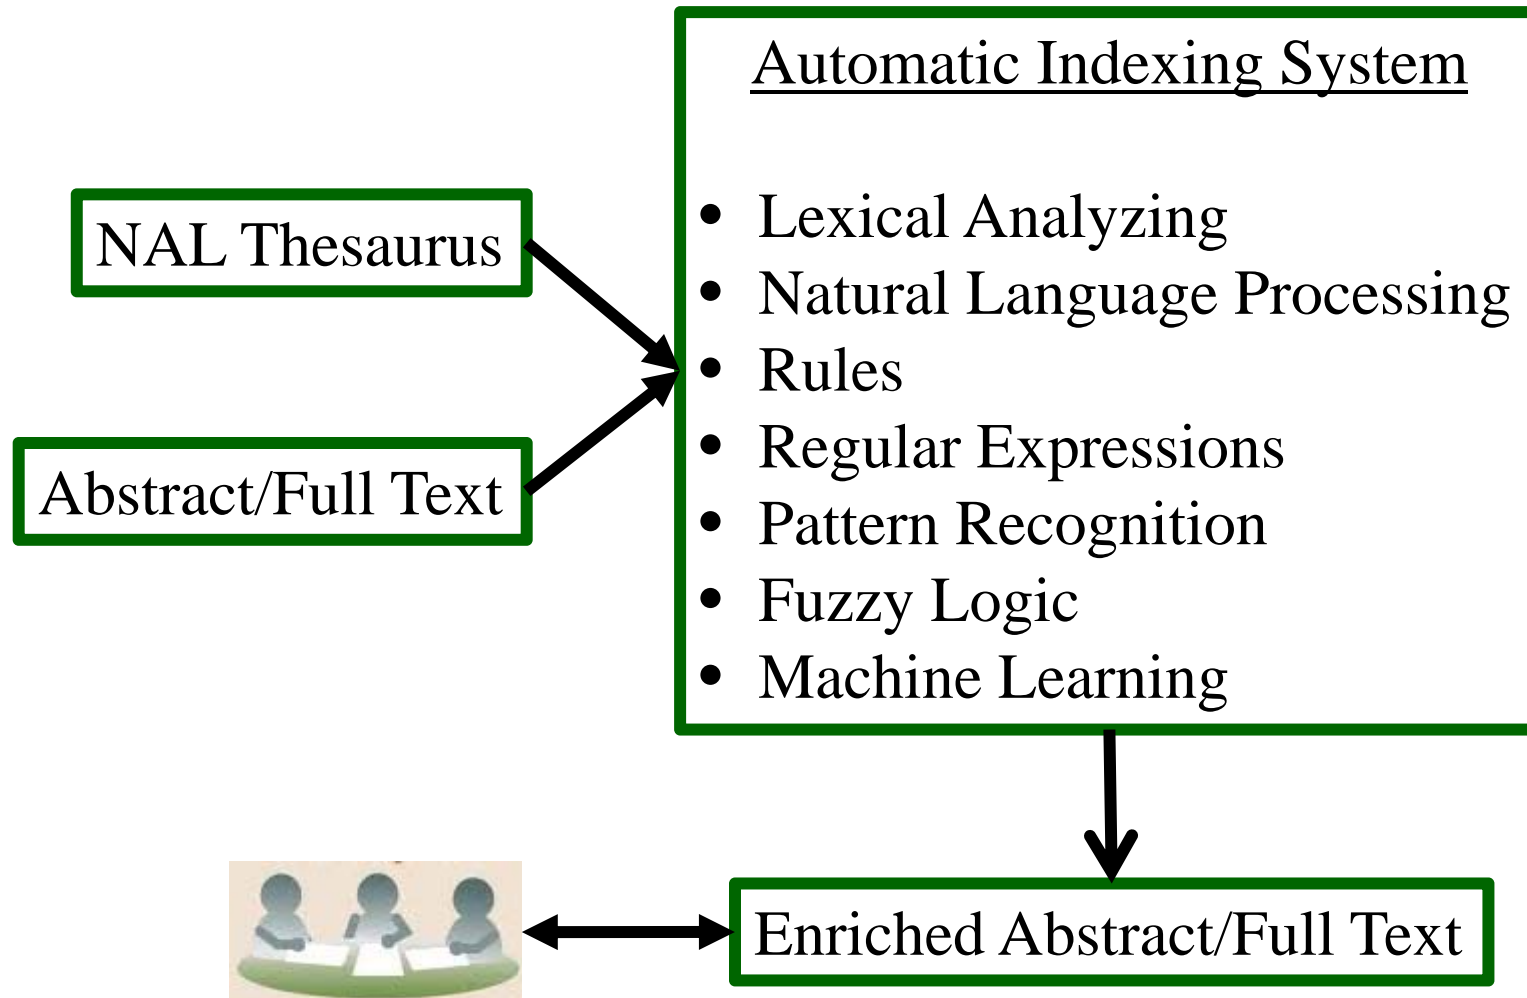

NAL New Organization

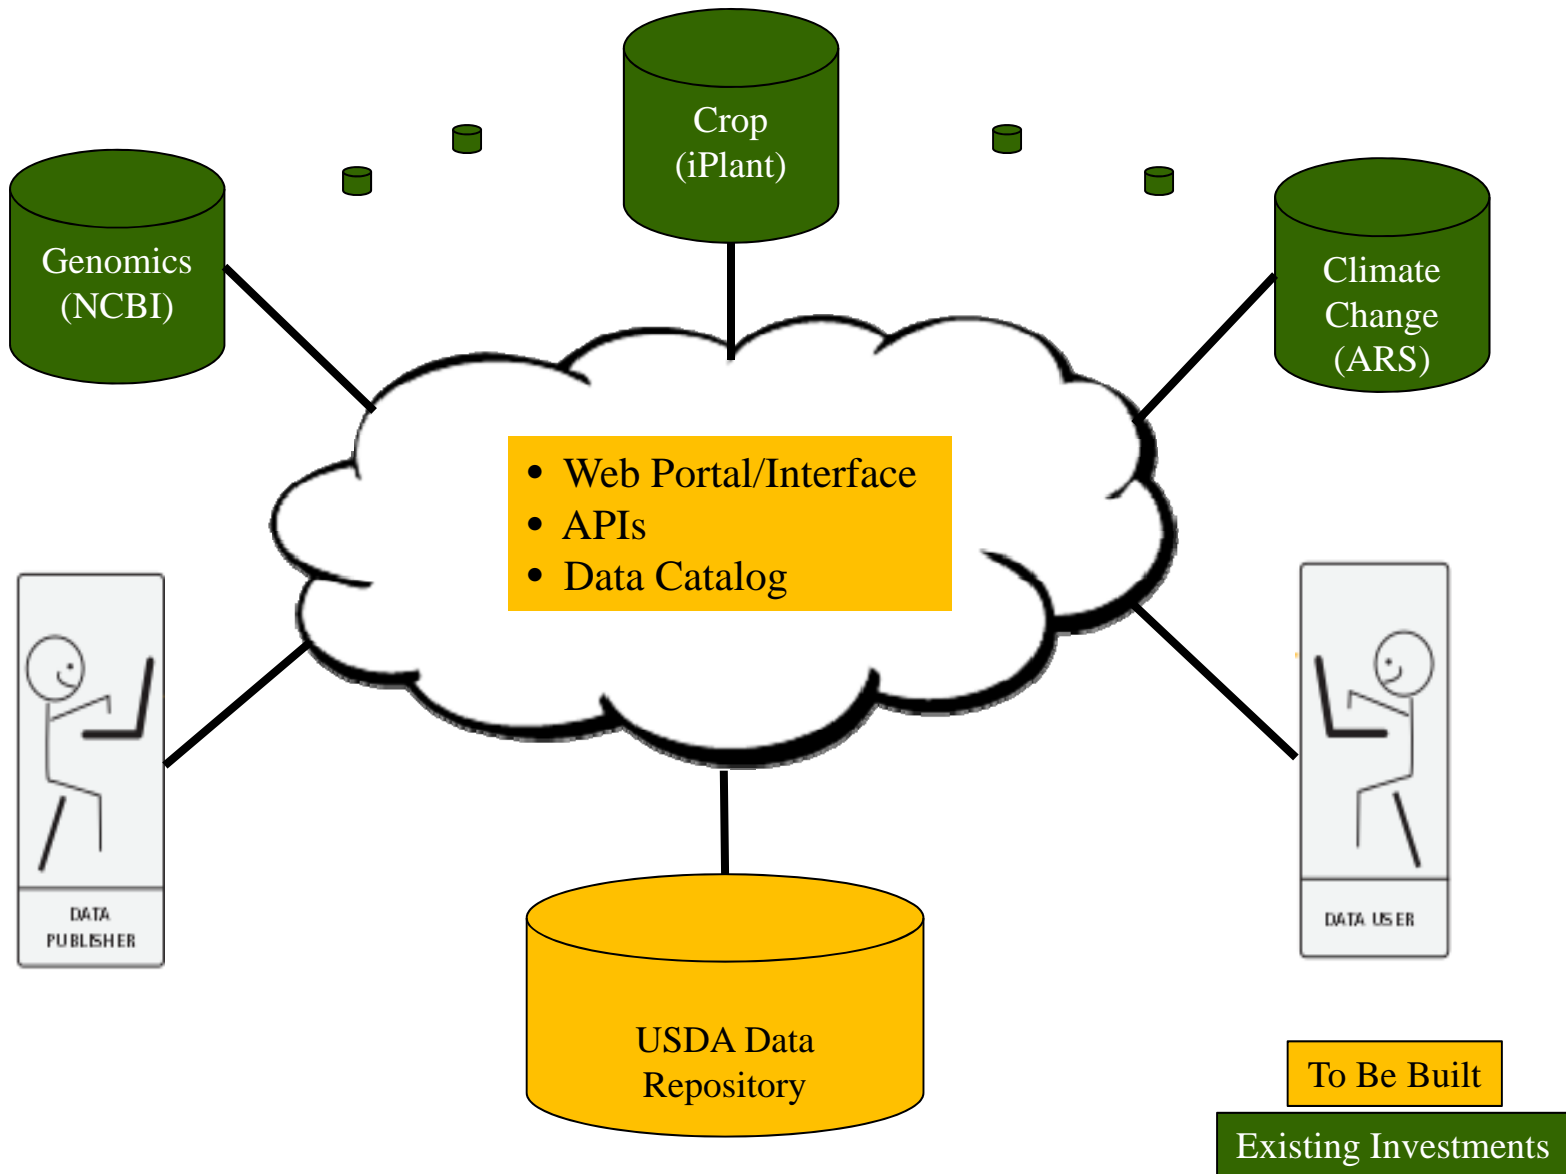

Pub Ag – Scholarly Publications

Automatic Indexing

Ag Data – Scientific Digital Data

A Practical Hybrid Approach

- Investments
 - Existing & new
 - USDA & external
- Centralized & Distributed
 - Centralized data catalog
 - Distributed data sets
- Standardized & Domain Specific
 - Standard data catalog metadata
 - Domain specific data formats
- Access – Centralized & distributed web portals/interfaces

Journey Together – IAALD

UNIVERSITY OFTM
KWAZULU-NATAL
INYUVESI
YAKWAZULU-NATALI

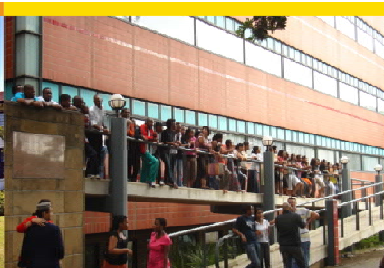

The African Centre for Crop Improvement (ACCI)

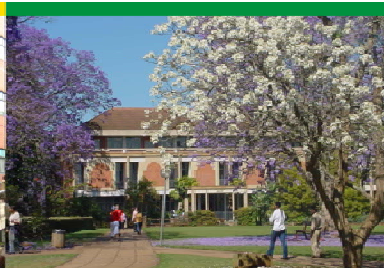

EDGEWOOD CAMPUS

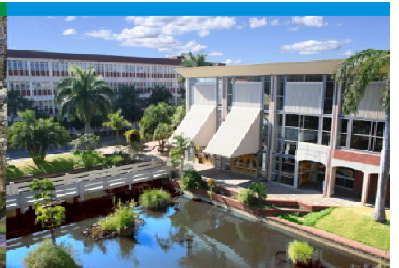

HOWARD COLLEGE CAMPUS

NELSON R MANDELA SCHOOL OF MEDICINE

PIETERMARITZBURG CAMPUS

WESTVILLE CAMPUS

INSPIRING GREATNESS

Location of ACCI

- A specialist unit at the University of KwaZulu-Natal, Republic of South Africa

Mission of ACCI

- Est. 2001 with core-funding from the Rockefeller Foundation; now funded by the Alliance for a Green Revolution in Africa (AGRA – a proxy of BMGF)
- Mission – to train PhD level African plant breeders, on African crops, in Africa, on food security crops
- Students from 14 Eastern & Southern African countries
- Mandate to train >80 PhDs in plant breeding at world class level

Vision of ACCI

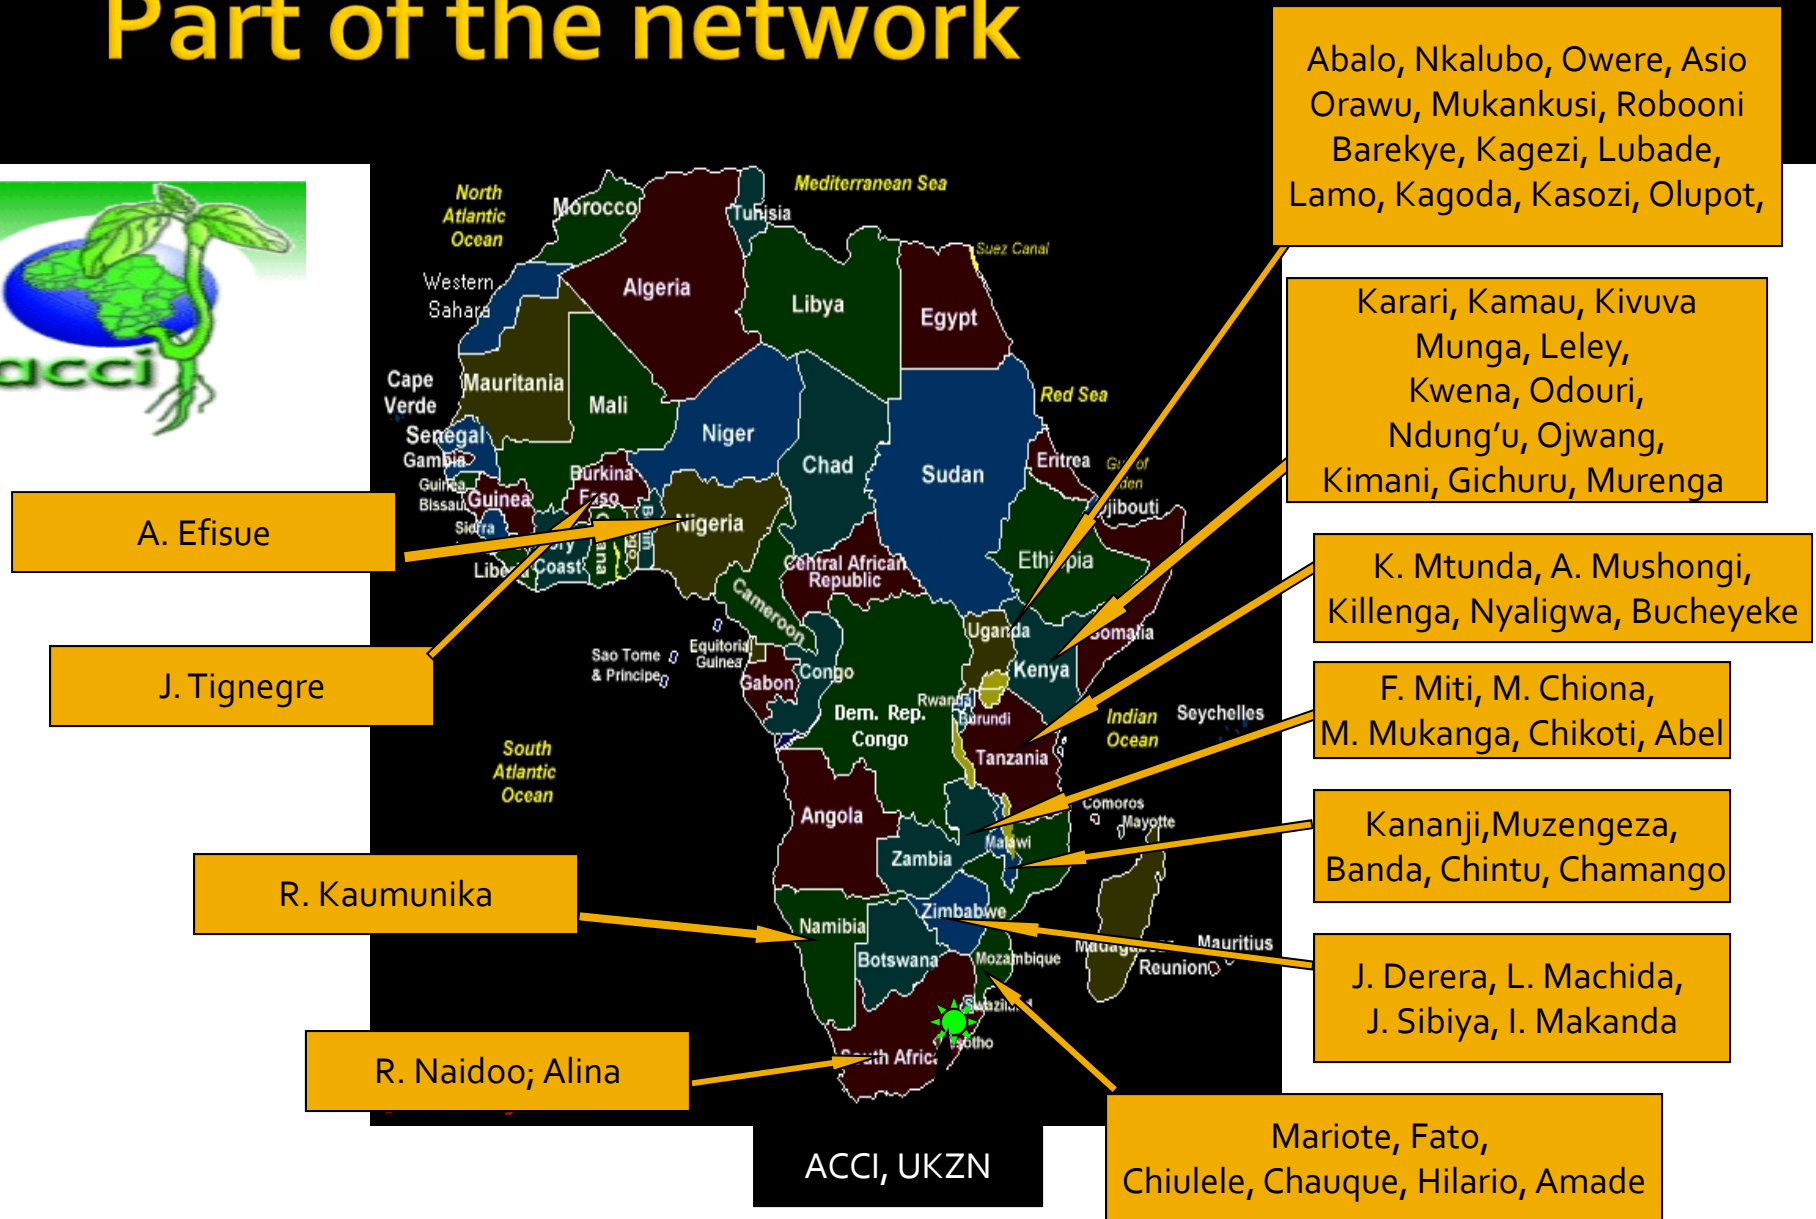

- To produce world class plant breeders, who will succeed in Africa, despite tough working environments, limited resources
- That all of the graduates will succeed in their home country, at their home research station
- That each student's PhD study is just the start of a much bigger, long-term breeding program, conducted in their home country;

That all of students have to graduate on time & serve

The ACCI program

- Unique structure in South African context
 - Coursework in SA (1/2 years)
 - Research in-country (3 years)
- Unique supervision arrangements
 - Staff full-time supervisors
 - Supervise in RSA and in-country
 - Also In-Country Co-Supervisors
- Broad training as plant breeding leaders, & specialist research tools

Part of the network

- Library loan services
- Students conduct literature search
- Then send e-mail request to Mann Library
- Within a day or 2 they get a pdf copy or scanned copy of the paper

CHALLENGES: lack of funding due to budget cuts at AGRA threatens this facility

Support by Cornell

- Coordination of research proposal reviews
- Research proposal review through video conferences – students defend proposals
- Facilitated by Vernon Gracern & Stefan Einarson
- Training students in data bases & Communication by Baseema

Support by Cornell

- Research proposals integrate socio-economic with plant breeding research problems
- Research proposal linked with breeding program – providing solutions for Africa
- Research proposals are subjected to rigorous review by international experts
- Independent reviewers selected by Cornell
- Students defend proposals in a Video conference with Panellists sitting at Cornell University

Challenges: publications

- >100 articles published in peer reviewed journals
- The Literature Reviews & Participatory Rural Appraisals by 4 student Cohorts published in an annual yearbook of the ACCI
- >100 abstracts in conference proceedings etc

Challenges: Access to information

- Lack of suitable/accredited local journals for students to publish “local” African information
- Limited connectivity in many research stations across Africa limit access to e-learning resources
- Situate in South Africa, the ACCI PhD program does not have access to free Teal
- 10% budget cut on library services may reduce access to information data bases & journal subscription

Opportunity for e-learning resources

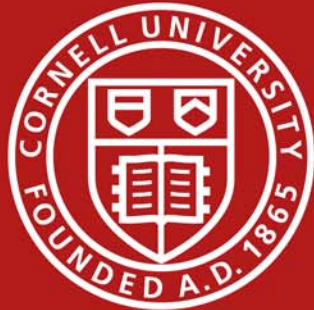

- The BMG foundation is giving a grant to Iowa State University to develop e-lectures for a new MSc program in commercial plant breeding
- Proposal development still in progress
- New MSc program to be launched at 3 universities – KNUST (Ghana), Makerere (Uganda) & KwaZulu-Natal (South Africa)

Graduation – 50 plant breeders but not assured of continuity; many challenges?

Transnational Learning

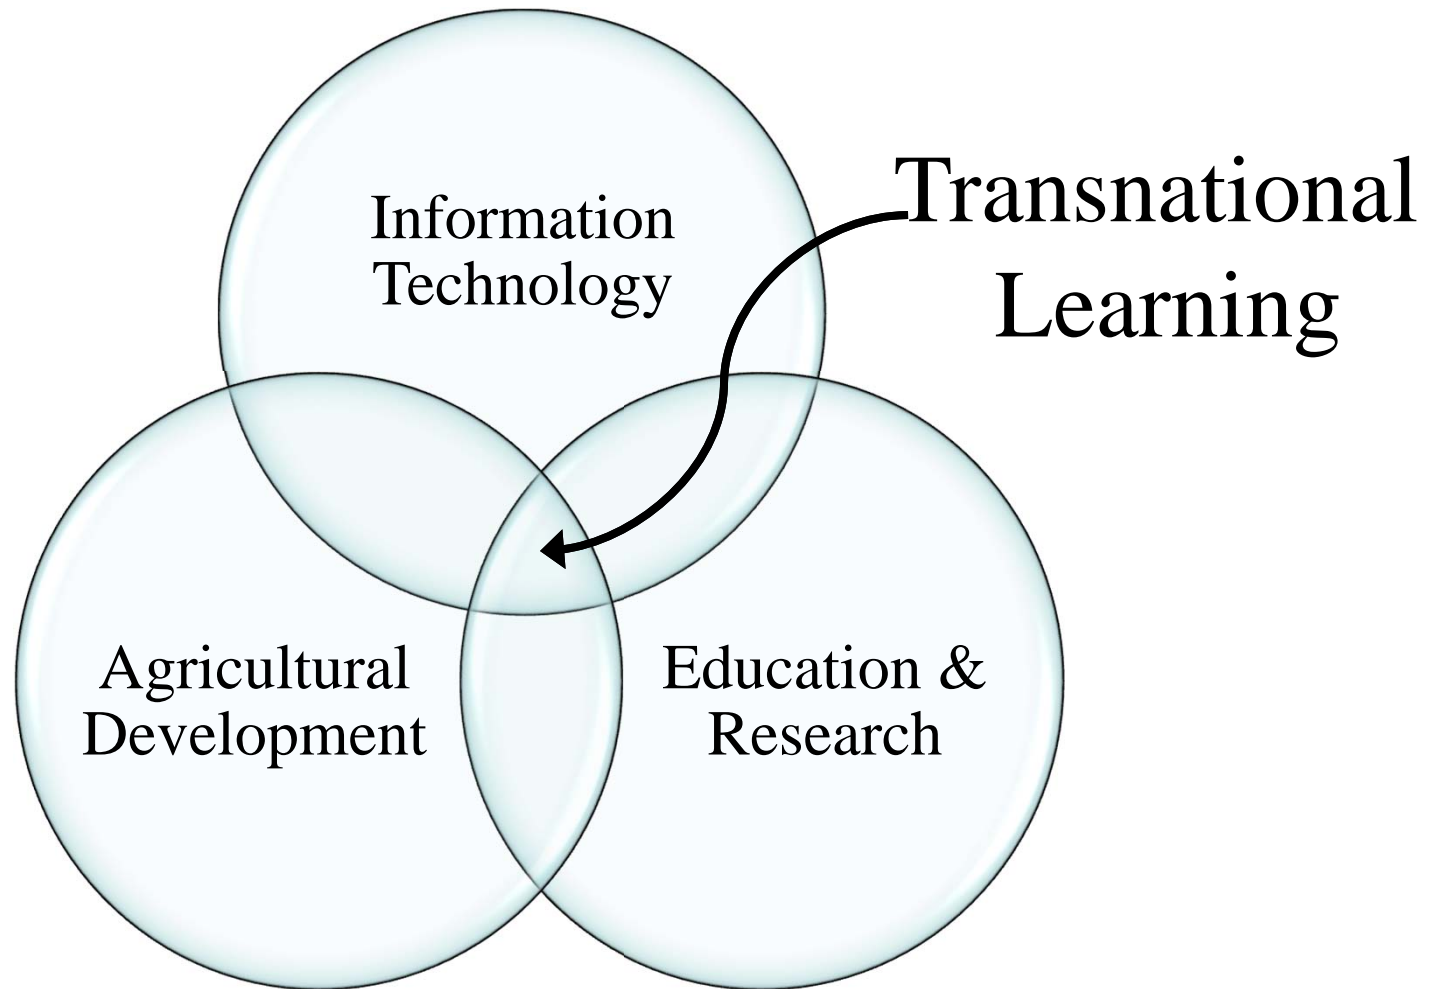

A program that leverages experience and resources from Cornell University's College of Agriculture and Life Sciences to work with partner institutions, mainly in the developing world, with the aim of increasing food security.

Cornell University

Area of Concentration

Cornell University

Transnational Learning

Three program examples:

- Working with University Partners – to help support their local teaching with e-learning from Cornell
- Working with Peer Organizations – helping them to establish streaming media production platforms
- Providing a Conduit to Cornell's Mann Library – to provide a mechanism for utilizing Mann's extensive resources for partner institutions

Cornell University

Transnational Learning

The project has expanded to providing content and interactions in:

- 11 African countries
- Thailand
- Philippines
- India
- Mexico

Cornell University

IP-CALS
International Program
College of Agriculture and Life Sciences

Transnational Learning

Selected topics (over 1,000 modules):

- Mendelian, quantitative, and population genetics
- Plant reproductive biology
- Experimental design and statistics
- Molecular genetics, molecular markers, and applied genomics
- Plant pathology, entomology, and IPM
- Cell and tissue culture methods
- Transformation, transgene construction and analysis
- Variety release, registration, IPR, and distribution

Cornell University

Example Digital Class

Cornell University

IP-CALS
International Program
College of Agriculture and Life Sciences

AIP Project

Establishing e-learning centers at:

- BHU
- AAU
- SVAPUT – Meerut

Teaching them about e-learning

Helping them create e-learning platforms

Help them learn to create e-learning content

Cornell University

AIP Project

Establishing OLAT as a learning platform

- Assignments
- Readings
- Chat with professors
- Quizzes
- Extra materials for independent learning
- Forum for students to help each other
- Calendar for when things will happen

Cornell University

Summary of E-Learning Africa Report 2013

Survey:

- 42 African countries
- 413 respondents
- Targeted at practitioners involved in e-learning

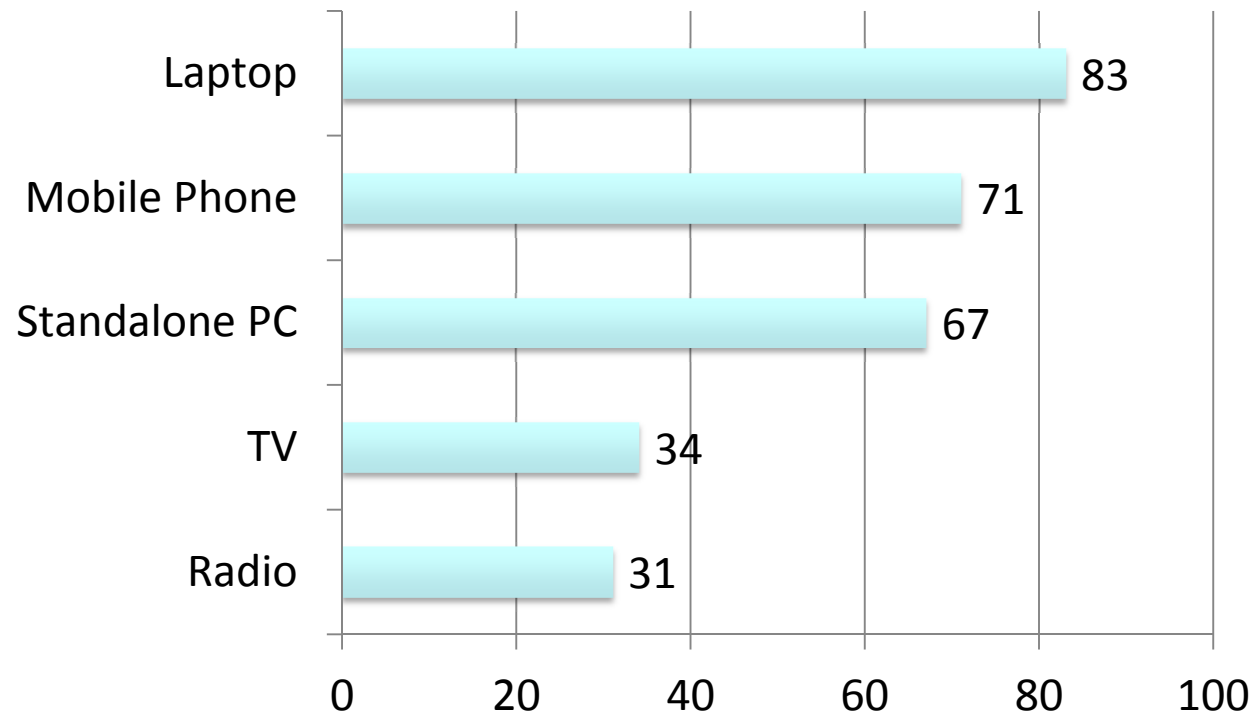

Cornell University

Summary of E-Learning Africa Report 2013

Technologies to Support Learning

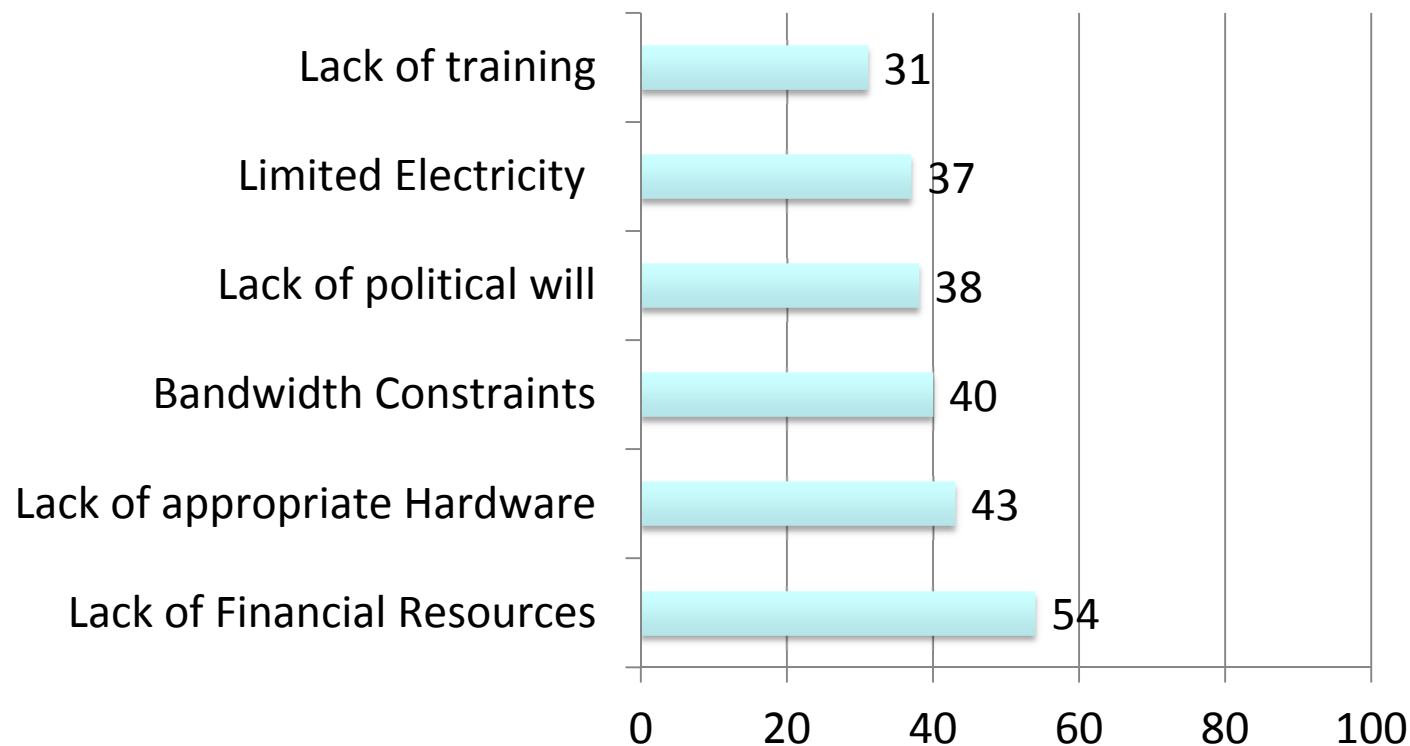

Cornell University

Summary of E-Learning Africa Report 2013

Top constraints in the use of digital technologies for learning

Summary of E-Learning Africa Report 2013

Over 50% said that they had experienced some form of failure with respect to e-learning

CHALLENGES AND OPPORTUNITIES?

- **THE FUTURE ROLE OF LIBRARIES**
- **THE OPENNING OF ACCESS TO SCIENTIFIC LITERATURE**
- **THE INTENSIVE USE OF ICT FOR AGRICULTURE**

Articulated the Challenges

- CHALLENGE 1: The future of specialized agricultural Libraries.
- CHALLENGE 2: Access to free relevant content, preservation of institutional memories and better agricultural publishing.
- CHALLENGE 3: Better use of Information, Communication and Technology in Agriculture.

THE STATE OF INFORMATION LITERACY POLICY: A GLOBAL PRIORITY

*Sharon Weiner, EdD, MLS
Professor, W. Wayne Booker Chair in Information Literacy
Purdue University, USA
Vice-President, National Forum on Information Literacy*

IAALD, 7/22/2013

Outline

W. Wayne Booker Chair in Information Literacy

The State of IL Policy: A Global Priority:

Developing a Common Understanding

What is Information Literacy (IL)?

What is Information Policy?

Information Policy and Global Challenges

International IL Policy

Taking Action: Addressing the Issues!

W. Wayne Booker Chair in IL

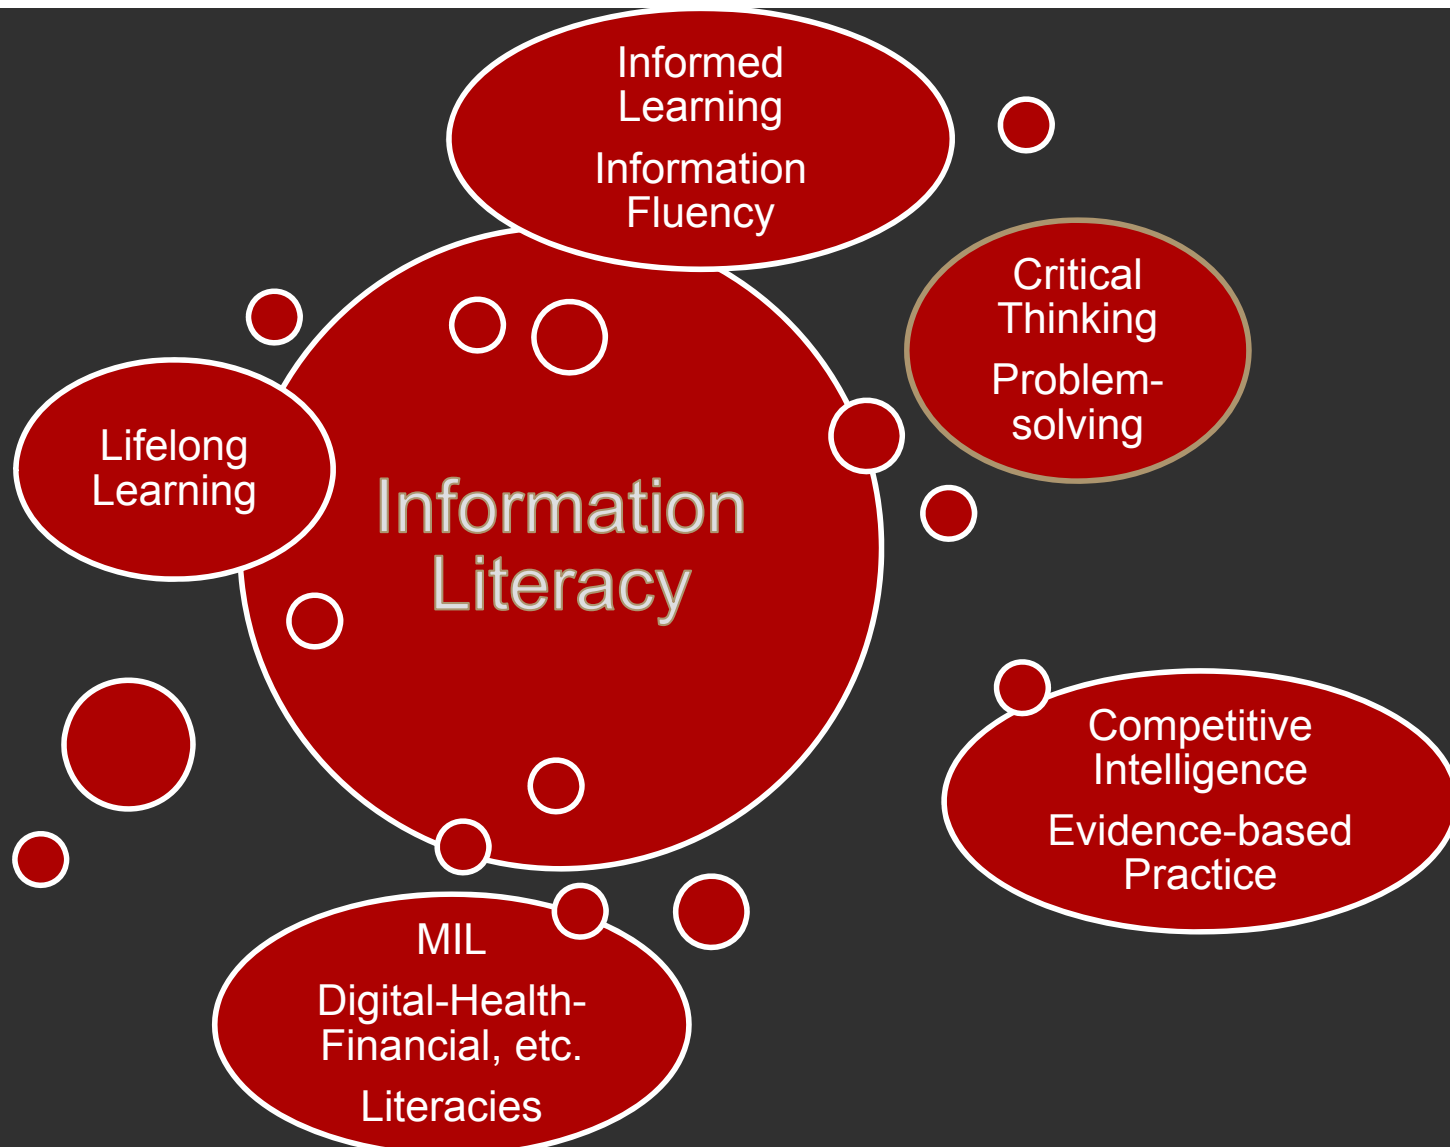

W. Wayne Booker

Opportunities and challenges...

- Advocacy for IL, outside of libraries and academia
- Research on IL, organizational and policy aspects, integration into teaching and curricula, IL outside libraries
- IL Handbook Series (Purdue University Press)
- International collaborations
- Workforce and everyday life
- Mentoring, consulting, writing, program development and assessment

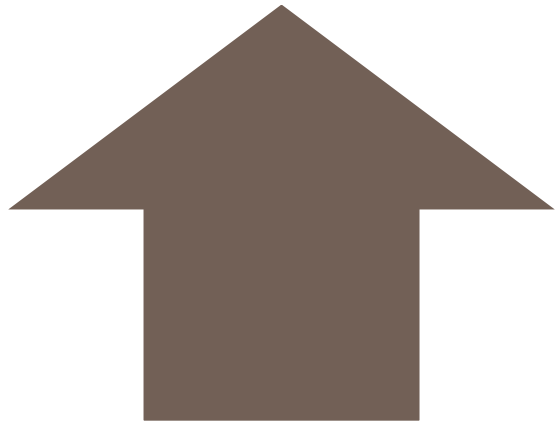

What is IL?

What is IL?

NARROW CONCEPTION OR BROAD CONCEPTION?

Teaching skills—
course success

Teaching range of
competencies—life
success

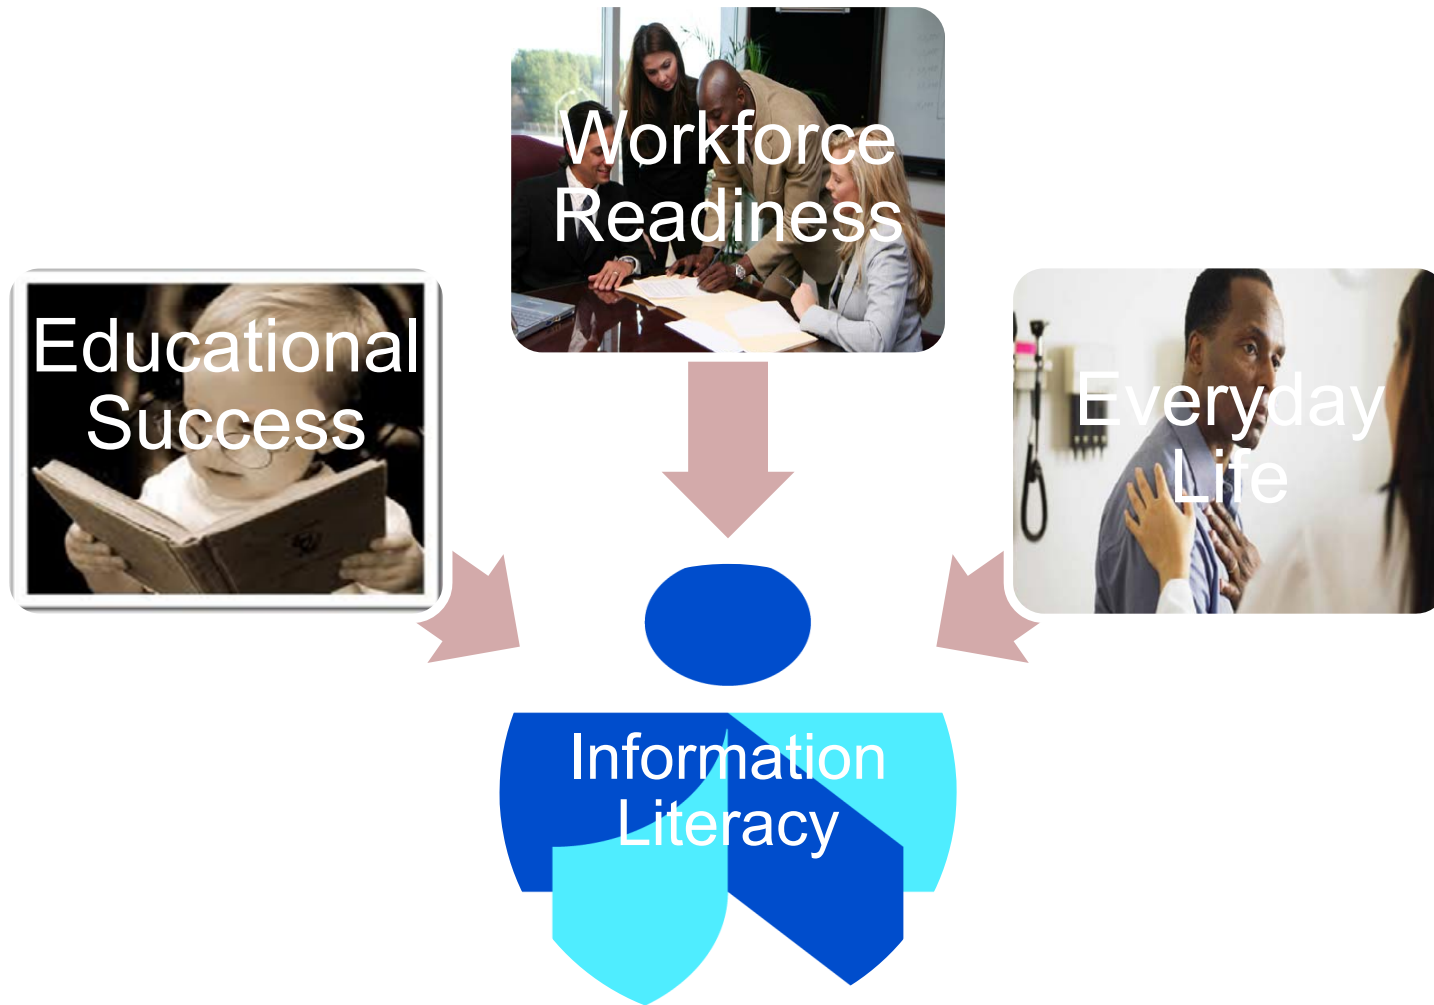

What is IL?

*Information literate people are those who **have learned how to learn**. They know how to learn because they know how knowledge is organized, how to find information, and how to use information... They can always find the information needed for any task or decision at hand.*

.

ALA 1989

A critical competency

What is information policy?

Encompasses

- Laws
- Regulations
- Doctrinal positions
- Other societal decisions

Related to

- Info Creation
- Processing
- Flows
- Access
- Use

Information policy

- Involves technology, communications, law, government, medicine, education, business, economics
- Complex and multi-dimensional
- Information policies can facilitate access to and use of information or they can restrict it

Information policy

Weiner's categories...

Information Infrastructure

- technologies that allow for access to information

Information Resources

- knowledge content
- accessibility through open access
- legal and ethical use

Information Literacy

- competencies to effectively and efficiently find, use, manage, and communicate information for specific purposes

Information policy

- Varies considerably from one nation to other, and even within nations
- May be inconsistent; over-regulated; or completely lacking
- Develop as needed or as problems arise, rather than in coordinated, cohesive manner with all major stakeholders participating

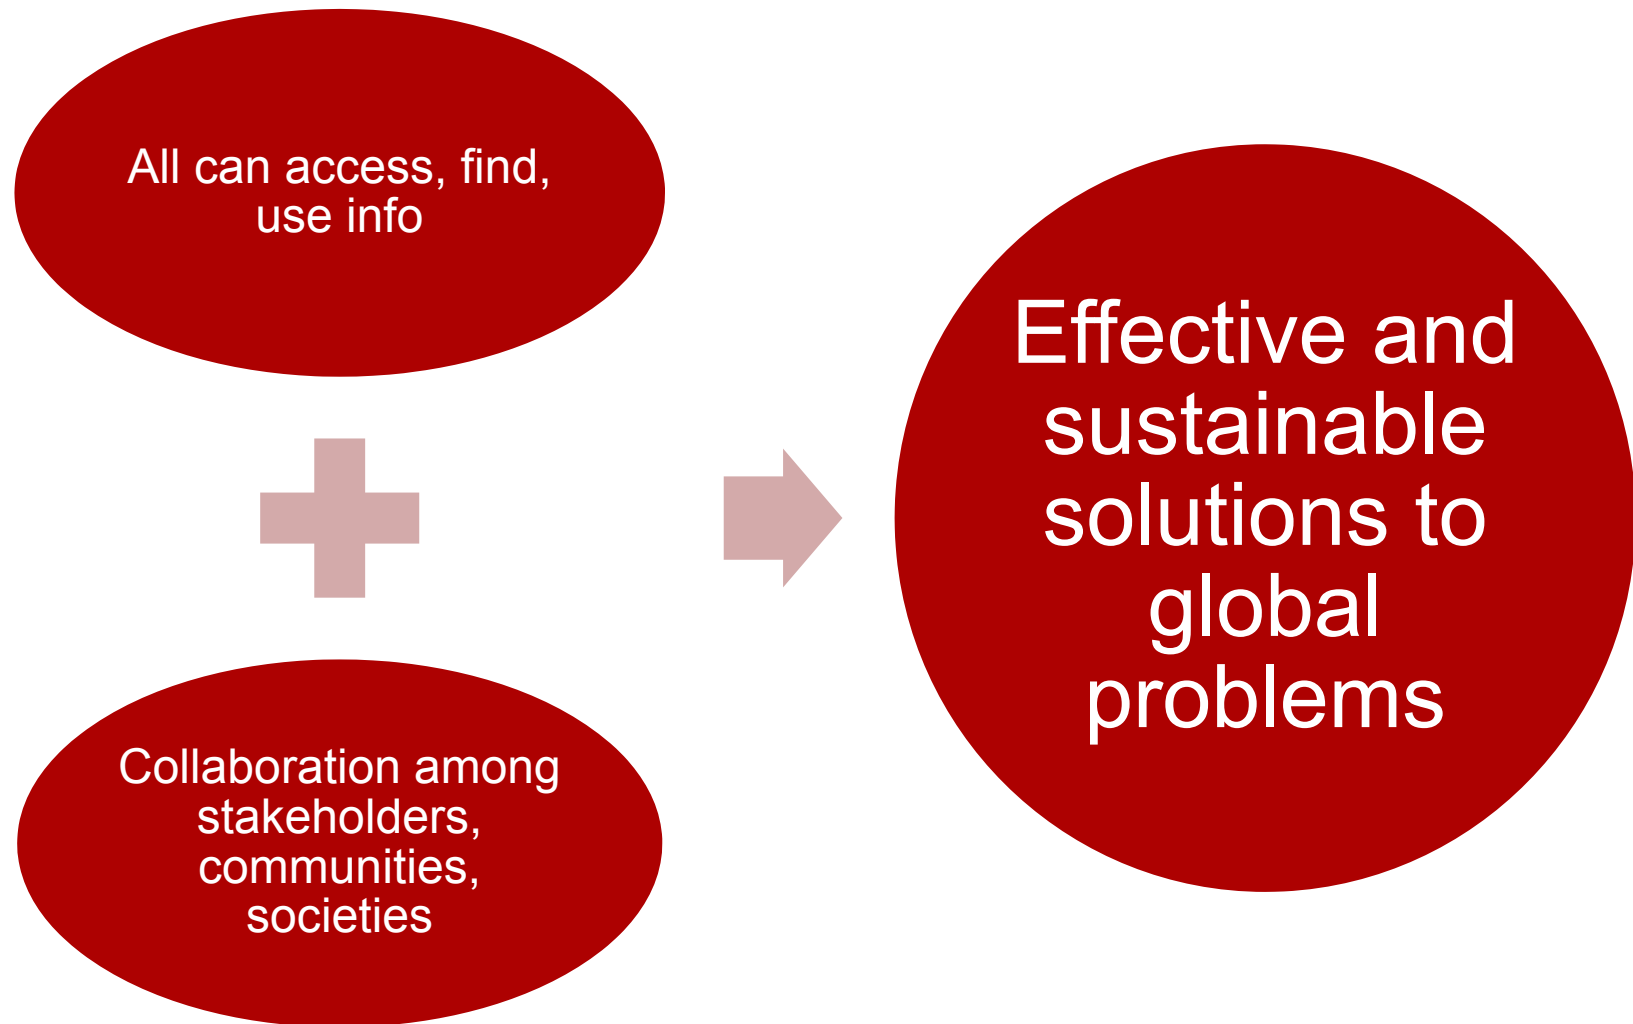

Information policy and global challenges

*How well an individual, an organization, and an entire society can harness, access, share, and make use of available information will ultimately decide their ability to **generate economic growth** and to **enhance the quality of life** for all.*

Gwang-Jo Kim

Director of UNESCO Bangkok (Karan, 2011)

Information policy and global challenges

Information policy and global challenges

Inequity in access to information and inadequate training in how to use information worldwide **hampers the collective problem-solving that could lead to dynamic, innovative results.**

Weiner 2013

Information policy and global challenges

Information policy and global challenges

Information policy and global challenges

Teach to the needs and challenges of the 21st century?

International IL policy

Many issues...

- Lack of recognition of relevance of info in development
- ICT is not enough! Does not ensure that people can effectively find and use information
- Limited capacities, resources, and infrastructure
- Restricted access to information
 - Restrictions on access to info in some locations and sectors
 - Limited info in the public domain

International IL policy

What are the issues?

- Better organization for existing resources needed
 - [DataBib](#)
- Insufficient libraries and databases of industrial, scientific and statistical information
- Opinions on who should be responsible for information literacy vary: Govt? Education? Workplace? Personal responsibility?

International IL policy

What are the issues?

- Need for respect for cultural and linguistic diversity
 - English-speakers have access to more info in most fields
- Lack of awareness of long-term preservation of info
- Lack of cross-sector and interdisciplinary stakeholder collaboration
- Changes of personnel in policymaking positions

International IL policy

- NGOs have long history of developing **recommendations** related to information policy
- Most countries do not have a coordinated, well-planned strategy involving multiple stakeholders, prioritization, and sufficient funding to address ICT, creation of relevant information resources, or IL

International IL policy

A sampling...USA

- No central coordinating body for info policy
- Different organizations, agencies, states create policies that can be incompatible, redundant, or conflicting
- Many educational institutions and accrediting organizations include IL as a standard

International IL policy

A sampling...USA

- Information Literacy Proclamation Project
 - Encourage IL advocates in each state and territory to request proclamation from governor on October as IL Month
 - Recognize IL as societal issue, not just library or school issue
 - Increase visibility of IL outside of libraries
 - Give policymakers notice about emerging issue

International IL policy

A sampling...USA

The ability to seek, find, and decipher information can be applied to countless life decisions, whether financial, medical, educational, or technical.

Obama 2009

International IL policy

A sampling...Wales

- Information Literacy Framework for Wales
 - Unified approach to embedding IL in education and training
 - U.K. Seven Pillars model: identify, plan, scope, gather, evaluate, manage, present
 - Mapped IL to national curriculum
 - Credit and Qualifications Framework for Wales—throughout life

International IL policy

A sampling...Africa

- Francophone Africa, ICT and digitization not well developed, so IL training covers the use of print resources.
- No national info policy, but govt recognizes importance for problem-solving and economic development

International IL policy

A sampling...Latin America

- Postsecondary institutions, though not usually part of curriculum
- Little IL activity in schools and none in public libraries or the private sector

International IL policy

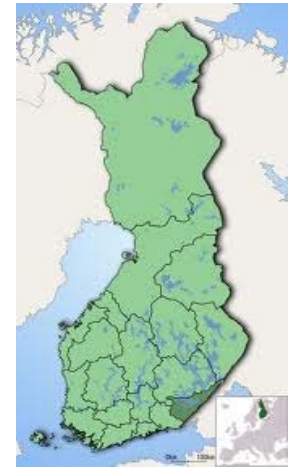

A sampling...Europe

- [European Network on IL](#) posts links to policy info for countries
- U.K. incorporated info policy functions into Cabinet Office
- Departments address developing citizens' skills, promoting media literacy, and libraries, museums, and broadcasting

International IL policy

A sampling...Finland

- Leading knowledge-based economy since 1990s
- Occurred because of strong educational system and institutions for formation of national consensus
- Leaders attended programs in economic policy management and national strategy issues-helped to conceptualize and implement change
- PM chaired Information Society Council that included key representatives of public administration, private sector enterprises, interest groups, and organizations

Addressing the issues...

- Think about what you can do...
- Professionally, societally, personally

Addressing the issues...

- Education policy
 - Consider education a progressive continuum through life rather than as segmented courses, modules, learning outcomes to be mastered and forgotten
 - Include expectation of IL in teacher education, for teachers-in-training, for teachers-of-teachers, students, throughout lifespan

Addressing the issues...

- Communicate importance of IL to stakeholders
- Work with communities
- Need stories of how IL affects decisions and problem-solving, lack of IL hinders it

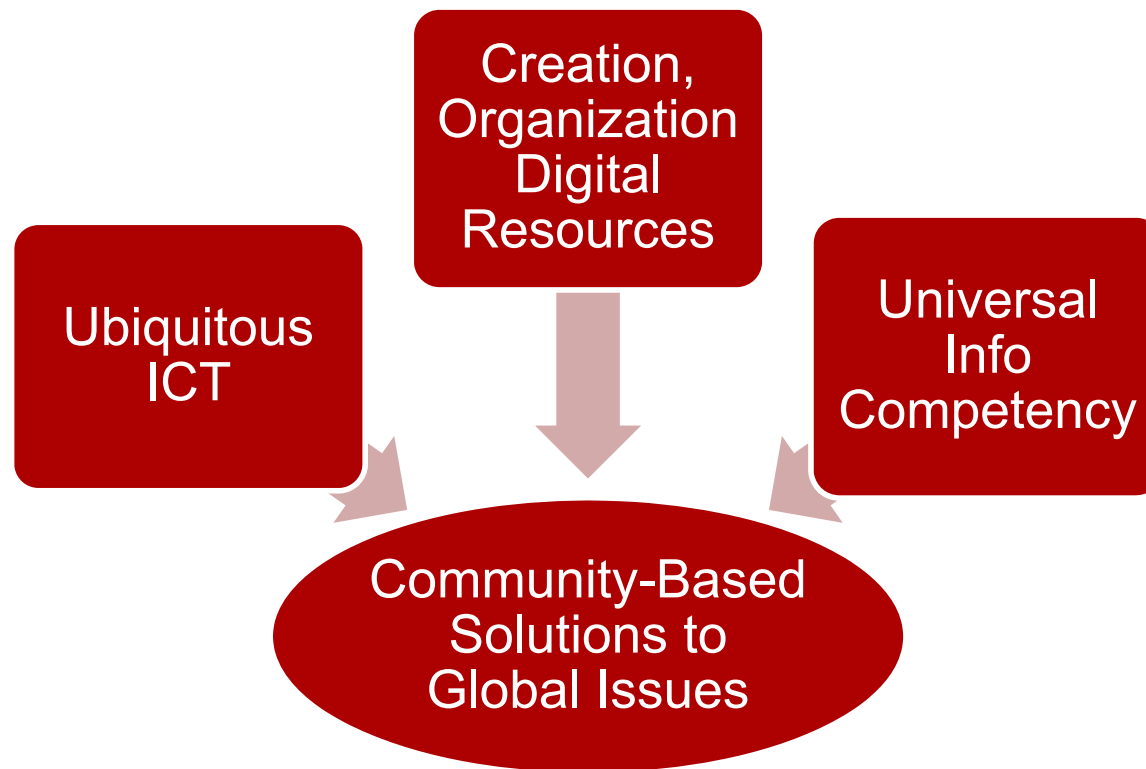

Addressing the issues...

- Need data on the cost of **lack** of IL
 - Standard of living related to financial resources + financial literacy
 - Lower health literacy = difficulty controlling chronic illnesses, less likely to participate in disease prevention programs, more likely to be hospitalized, greater mortality

In conclusion...mixed success

Conference theme:

Emerging Priorities for Scientific Information, Food Security

In conclusion...concerted effort needed

- What are the emerging priorities for scientific information?
 - Creation and organization of digital resources
 - Information literacy—how to find and use **information** (in all of its forms) for a specific purpose
- What can you influence your professional organizations to do?
- How can you influence your communities, societies, governments?

Thank you!
