VOL II NO XLII

ONE DOLLAR PER YEAR

Dec. 5, 1916

TO THE MASSES.

"Uneasy lies the head that wears a crown" or other emblem of public responsibility. For behold - even our Student Government Presidency involves enough work and worry to infringe upon the Eight-hour Labor Law. And it is growing more complicated every year. According to the old adage -

"A coed works from sun to sun

"But Student Gov. work is never done."

In truth, we have invested this office with all the honor and power, that is in our hands to give. A girl who holds it, is representative of, and upholds by, all the women of the University. On her shoulders fall the responsibilities and perplexities of a large organization. Endless new and unprecedented problems present themselves at most inopportune moments. And they require immediate and careful consideration, regardless of whether this official has a prelim, next day or is about to retire for the night. In short our President of Student Government is allowed to enjoy but little privacy.

Can we, in all conscience, demand so much of a fellow student, without providing the bare necessities of any similar salaried position? Briefly stated these are a secretary in the form of a student assistant to do typewriting, some cubby-hole that can be called an Office for the transaction of Student Government business at stated hours and a telephone on a line that can not be everlastingly "busy please."

Both the "Bulletin" and "Review" are arriving in comfortable quarters. "Let-uce, oh lettuce", make Student Government thankful too by a Merry Xmas present!

Marjorie Sewell '17.
