Vol. 76 No. 27 10 October 1962 Geneva, New York

C. R. BIGELOW RETIRES

Official announcement has been made of the retirement of C. R. Bigelow, Department of Food Science and Technology. He first came to the Experiment Station in February, 1938 as a chemist in the Feed and Fertilizer Control Laboratory. With the exception of one year, 1939, when he engaged in advanced study at Cornell University, he worked as a chemist in this same general field until his retirement.

Bigelow received both his B. S. and M. A. degrees in chemistry and biology from Hobart College. He later attended Carnegie Institute of Technology, Pittsburgh, Pennsylvania, to study metallurgy and then returned to Hobart for some additional work in his original specialty.

An extremely faithful and proud investigator, Bigelow had a continuing interest in Station activities and devoted a great deal of his energies toward supporting the Station Club. He is also an extremely active member of the Episcopal Church, having served as a Vestryman for a number of years, and is a devoted Sunday school teacher.

His other activities include membership in Rotary Club. He is a past-President of the Waterloo organization, and upon transferring to the Geneva club some years ago became its Secretary, a position he still holds. He is an accomplished piano player and at one time taught music. He often led group singing at Station functions.

Bigelow and his wife, Frances, have one child, Beth, who is attending William Smith College. The Bigelows plan to spend their retirement at their home on Highland Avenue

FRANK BRENNAN DIES

Frank Brennan, father of Miss Patricia Brennan, Publications Office, died Tuesday night. He had been ill for several months. Funeral services will

be held sometime Friday and the burial will take place at St. Mary's Cemetery. The deepest sympathies of the Station are extended to Miss Brennan and the other members of the family.

ANNUAL STATION CLUB DINNER, 24 OCTOBER

Station staff members and their families are cordially invited to attend the Annual Station Club Dinner on 24 October. This is one of the outstanding events of the Station's social season and an entertaining program is planned, according to General Chairman S. E. Lienk. The dinner will be held at the American Legion Hall with a social hour starting at 6:30 p.m. Hors d'oeuvre and punch or juice will be served. Door prizes will also be given.

According to President E. H. Glass, tickets can be purchased from department representatives starting today. Price of the dinner for Station Club Members is \$2.25 and for non-members, \$2.75.

STATION EMPLOYEES RECEIVE SERVICE AWARDS

Two Station employees received 20 year pins at the Annual Service Emblem Award Meeting held in the School of Industrial and Labor Relations at Cornell University on Tuesday. Four others received 15 year pins, two received 10 year awards, and 10 were awarded 5 year pins. Members of the Station staff extend their fullest congratulations to these fellow employees for their service to the institution and science during the years.

20 Year Service

Maurice Campfield, Department of Food Science and Technology
N. W. Pedersen, Administration

15 Year Service

Mrs. Margaret Albury, Department of Food Science and Technology
R. G. Clark, Department of Food Science and Technology
Peter DeMaria, Administration
G. F. Rickey, Department of Food Science and Technology

10 Year Service

H. A. Amberg, Department of Pomology
S. R. Bishop, Jr., Department of Plant Pathology

5 Year Service

J. T. Armitage, Administration
Mrs. Dorothy Kline, Department of Seed Investigations
George Lafler, Department of Pomology
L. F. Landschoot, Administration
G. E. McGuigan, Administration
Mrs. Antonitte Morabito, Department of Plant Pathology
Mrs. Grace Parsons, Department of Food Science and Technology
Mrs. Kathryn Schurstedt, Plant Introduction Station
Mrs. Marie Teichner, Department of Plant Pathology
Miss Roberta Vickery, Department of Food Science and Technology

GERTRUDE CATLIN SPEAKS AT PHOTOGRAPHERS MEETING

Miss Gertrude Catlin, Department of Entomology, traveled to Syracuse this weekend to present a paper on "Photo Macrography" before the Professional Photographers Society of New York. Miss Catlin illustrated her talk with live and photographic material compiled from the entomology collection.

Jack Atkinson, also of the Department of Entomology, assisted Miss Catlin in her presentation.

NEW ARRIVAL

Mr. and Mrs. Maurice Neve were presented with a baby girl 25 September. Neve is employed in the Station's carpenter shop. The daughter's name is Linda Marie.

CERES CIRCLE OFFICERS ELECTED

Ceres Circle held its first meeting of the fall at the home of Mrs. Donald W. Barton last week. Principal business of the meeting was to nominate and elect officers. Mrs. I. J. Wahba, Department of Food Science and Technology, was elected President for the coming year. Mrs. Paris Trail, Publications Office, will serve as Vice-President, and Mrs. R. E. Krauss, also of Publications, will act as Secretary-Treasurer. The next meeting is scheduled for 3 December at the home of Mrs. Barton. Mrs. C. S. Amidon, Business Office, is hostess.

VISITORS ON CAMPUS

Two research foresters from the Northeast Forestry Experiment Station, Williamstown, Massachusetts, are spending today and Thursday on campus visiting C. E. Heit, Department of Seed Investigations. Purpose of their visit is to review research methods used by the Station on storage problems of coniferous and hardwood seed, tree seed testing methods, and seed source studies.

TV ADVISORY COMMITTEE MEETS

Members of the TV Film Advisory Committee met at the new TV Sound Stage, Cornell University, last week. R. E. Krauss, Publications Office, is serving as an ex officio member of that group.

Purpose of this committee is to aid the TV Film Center of Cornell in deciding what subjects would be most appropriate for portrayal in 1, 5, 15, and 30 minute film clips. Although the sound stage was just completed in June of this year, Cornell has been shooting programs since January. From all reports, acceptance of the film clips by television stations has been quite favorable.

The committee felt that a multitude of TV film material is available at our institution. Such subjects as the research involved in developing and processing tempeh, the life story of what happens to a seed from the time it is planted until it reaches the processor or supermarket, the meaning of agriculture today, and the history of the Experiment Station have all been suggested and considered as good potential material by the group. Because there is such a wealth of material at the Station suitable for TV programming, it would be appreciated if staff members would contact R. E. Krauss concerning possible subject matter.

WELLINGTONS CELEBRATE 50th ANNIVERSARY

Professor Emeritus and Mrs. Richard Wellington celebrated their 50th wedding anniversary Wednesday. Professor Wellington is the former Head, Department of Pomology. Members of the Station staff wish to extend to Professor and Mrs. Wellington their congratulations and kindest wishes for the future.
