Nov. 19	40	26	Fair
Nov. 20	35	31	1.3 inches of snow

Vol. 75 No. 39

November 22, 1961

Geneva, N. Y.

FRUIT SCHOOL

The County Agent's Fruit School was held at Cornell November 20th and 21st in the Plant Science Seminar Room. Station pomologists, entomologists, and plant pathologists were on the program. Drs. Smith, Palmiter, Schaefer, Braun, Taschenberg, Glass, Lienk, Dean, Szkolnik, Forshey, Cain, Brase, Curtis, Shaulis, Klein, and Lamb attended these meetings.

WESTERN NEW YORK MICROBIOLOGISTS MEET HERE

The Western New York Section of the American Microbiologists met in the new Food Research Building last Saturday. Marie Vorbeck presented a paper on Lipid Alterations in Lactic Fermentation of Vegetables. Co-authors were Margaret Albury and Dr. Pederson. After luncheon at the Geneva Country Club Dr. Hucker spoke on Highlights of the 40 year history of the organization.

SEED SCHOOL

The Twenty-third Annual Cornell Seed School was held in Ithaca on Monday and Tuesday. Staff members from Seeds and Vegetable Crops participated. Drs. Clark, Nittler, and Waters were on the program.

TO PRESENT SEMINAR AT CORNELL

Dr. Shallenberger will present a seminar at Ithaca next Monday on "The Role of Certain Plant Sugars in a Problem of Mental Health."

SPEAKS TO HARVARD CLASSES

Dr. Robinson spoke to the Harvard University School of Public Health, School of Nutrition. Robbie's topic was Food Technology Problems.

SCIENCE CLUB VISITS

The Science Club of the Seneca Falls Central School will visit the Station today. They will spend an hour in the Food Research Building and will tour the greenhouse.

APPOINTMENTS

Joyce Brodsky has received an appointment as 'Research Technician in the Food Science Department. She is working in Dr. Splittstoesser's Lab.

Robert Butts has received an appointment as Research Technician in the Food Science Department. He is working with Dr. Moyer.

SUMMIT CONFERENCE

Bill Blackburn, a fruit grower from Medina, really means business when he comes to the Station to see the pomologists. He wanted to see Leo Klein. Leo was on vacation, up on the roof of his house painting when he heard someone come up behind him. It was Mr. Blackburn after information.

MEMBERSHIP DRIVE

The first returns in from the Station Club membership drive are very encouraging. It looks as if we will have a substantial increase in membership this coming year. The membership drive ends today so sign up with your representative or any other Station Club officer.

NEW GRANDFATHER

Dr. Mack is a new grandfather. A daughter was born to Mr. and Mrs. Robert Lambert Jr. in Pittsburg, Pa. on November 12th. The baby weighed 6 lbs. 11 ounces and has been named Emily Dickensens Lambert. Mrs. Lambert is the former Dorothy Lee Mack. Mrs. Mack will be in Pittsburgh until after Thanksgiving.

NOTICE

A plant introduction Harvest Book has been lost. Will the finder please contact Bill Sherring.

SOCIAL NOTE

Betty Keplinger's parents, Mr. and Mrs. O. W. Bridge from Maryland, will be spending Thanksgiving with the Keplingers.

Five year old Keith Keplinger had his tonsils out last week. He is home from the hospital now and getting along fine.

MISSING

Two beaded screens: 40 by 40 inches - anyone knowing the whereabouts contact the Editor's office.

SQUASH CAKE

When Jerry Marx harvested his squash plots this fall, he had lots of squash on hand to evaluate. In line with this, Ginger Grippen baked a squash cake and served it at coffee break. The Veg. Croppers raved about it so by request we are printing the recipe.

SQUASH CAKE

3 CUPS FLOUR	2 CUPS SUGAR (COOLED)
2 TEASPOONS BAKING POWDER	2 CUPS STEAMED AND MASHED SQUASH
2 teaspoons SODA	1½ CUPS COOKING OIL
1 TEASPOON SALT	4 EGGS BEATEN
3 TEASPOONS CINNAMON	½ CUP NUTS CHOPPED

Sift flour, baking powder, soda, salt, and cinnamon together twice. Blend beaten eggs and sugar. Add squash and oil. Blend. Add flour mixture and nuts. Makes one large cake (tube pan) or 2 loaf cakes. Bake in a 350 degree oven; large cake about one hour and loaf cakes about 50 minutes. Frost if desired.

CHRISTMAS PARTY COMING

Save the Date, - The Station Christmas Party will be December 19th, at 6:30 P. M. More about this in next week's news.

BAGS A BUCK

Frank Harris is the only deer hunter to date to report success. He and Ronald Neville were hunting near Wayne on Monday and Frank shot a nice six point buck.

LIBRARY NOTICE

Because of the heavy Christmas mail there can be no interlibrary loans between Dec. 3 and Dec. 29.

JAMES DAVIS HARLAN

Head injuries suffered in an automobile accident in Newark on November 9 caused the death Saturday, November 18, of James D. Harlan of 66 Hillcrest Avenue, Geneva, in the Newark-Wayne Hospital.

Professor Harlan was born December 23, 1885 in Mt. Holly, Pennsylvania. He received his B. S. in Agronomy from the Pennsylvania State College and did graduate study at Cornell in Plant Breeding and Plant physiology. He came to the Experiment Station May 1, 1918 as an Assistant Agronomist and carried out experimentation on soils and fertilizers of tree fruits. In 1928 he transferred to the Pomology Department and came to be well known for his work on the production and quality improvement of hops. Hop growers and manufacturers relied on his recommendations and his efforts undoubtedly contributed to the expansion of the hop industry.

At the time of his retirement April 1, 1954, he was an Associate Professor of Pomology and received the title Professor of Pomology Emeritus.

Professor Harlan's retirement was marked by a full program of work and outside interests. He was a strong, active person and devoted his leisure to his interest in photography, working for a time in the local Camera Shop. Later he became a soil chemist at the Jackson and Perkins Nursery, where he was enroute when the accident occurred. He was keenly active in both the local Camera Club and the Kennel Club.

Professor Harlan was well liked by growers and colleagues alike. He was a quiet, reserved person, but always willing to lend a hand where needed. He is survived by his wife, Anna, to whom the Station offers its sincerest sympathy.
