F. L. McEwen on Hawaii |
| | 7 | - 3:45 p.m. | - Conference Room, Food Science Building - Food
Science Seminar: Nutritive Value of Heat
Processed Protein Foods, L. R. Hackler |

AG FORUM HELD AT CORNELL

The Forum Committee for yesterday's program on, "New York's Development and One Man, One Vote," is to be highly commended for its outstanding efforts in getting together this year's program. For those of you who were unable to attend, scheduled to speak on the program were Senator Robert F. Kennedy, Governor Nelson A. Rockefeller, and Cornell University's President James A. Perkins. Incidentally, weather conditions prevented Senator Kennedy from attending and his speech was read by Director of Extension A. A. Johnson. The Cornell Agricultural Leaders' Forum is an annual event which has as its basic premise discussion of issues and problems facing New York State. This year, the Forum particularly sought to identify and review major issues involved in the State's development in light of re-apportionment and significant economic, social, and political changes that undoubtedly will follow.

Other than that, news is relatively light around the Experiment Station this week as many persons are getting the last days of their vacation in before the cut off date. So, be that as it may, we shall move forward with all intents of keeping you relatively bored this issue.

CERES CIRCLE MEETS

Please do not forget that Ceres Circle will meet at the home of Mrs. Donald Barton on April 4 at 8 p.m. Guest speaker is Mrs. Elizabeth White, the executive director and case worker of the Family Counseling Service for Ontario County.

MEETINGS

John Einset, John Cain, Chick Forshey, Roger Way, and Henry Bennett attended the March 13-16 Dwarf Fruit Tree Conference, Benton Harbor, Michigan.

Peter Calderon is currently attending the American Chemical Society Meetings in Pittsburgh.

Jim Moyer, Bob LaBelle, Dan Farkas, and Mr. Oda are attending the National Apple Industry Utilization Conference at College Park, Maryland. This Conference is co-sponsored by the U.S.D.A. and the University of Maryland.

Des Dolan gave two lectures on the Ithaca campus March 17 and 24 concerning plant introductions and the operation of Regional Project NE-9. Des presented these lectures at the request of Dr. H. A. MacDonald, Department of Agronomy, who is conducting a special topics course this term.

Claude Heit presented a seminar to the faculty and graduate students of the Floriculture and Ornamental Horticulture Department at Cornell on Tuesday, March 22. His subject was tree seed testing and investigations.

APPOINTMENTS AND RESIGNATIONS

Sung Ock Lee is a temporary service employee in Vegetable Crops working with Stan Shannon. Miss Lee received her B.S. Degree from Korea University and in 1964 got her M.S. Degree from Mississippi State University.

Janet Sallah is temporarily working with Lou Massey in Food Science. Janet and her husband recently moved to Geneva where he is employed by the Saga Dining Services at Hobart. Janet previously worked at Bristol Labs in Syracuse.

We welcome both these ladies to the Station family and hope they will enjoy their stay with us.

Carol Harnacker resigned her position effective March 10, 1966 in the

Department of Food Science and Technology. Carol had been working with Ross Hackler in the nutrition section. Carol and her husband are leaving Geneva since Coast Guard duty has called him out of the area.

TOUR OF HIGH SCHOOL CLASSES

Nine Geneva High School Biology Science classes will make their annual excursion to the Experiment Station on April 1, April Fool's Day by the way. Each class will have approximately 25 students and they will be shown Food Science, Entomology, grafting techniques, and some of Dick Robinson's tobacco mosaic research work on tomatoes. It is always a pleasure to have these classes visit the Station, and we hope they obtain useful information from their brief stay.

COMMUNITY CHEST BEGINS APRIL 6

Mike Dickson, Vegetable Crops, has been asked to serve as chairman of the Station's Community Chest Campaign this year. The education section of the drive, under which the Station falls, officially begins Wednesday, April 6. Quota for the Experiment Station this year is \$2,800 or approximately \$12 per employee. We will have additional information on this drive in the next issue of Station News, but we do encourage each of you to begin thinking about the various services that are covered by the Community Chest and the wonderful work that is done in the community by these organizations.

VISITOR

Dr. Frank Boyle, Director of the Fruit Processing Research Laboratories, Western Utilization Research Branch, U.S.D.A., visited the Food Science laboratories this week. Dr. Boyle is the official coordinator of the U.S.D.A.'s Research Center's contract on haze studies in wine. Dr. Boyle was at one time an Associate Professor in our Department of Food Science in the early 1950's and resigned in 1956 to go with Dole Pineapple in Hawaii.

COVER PHOTO

Our cover photo is pertinent to a day coming up next Friday when a good many Station people will take to the trout streams and try their luck. This particular photo taken last year on opening day of trout season shows Ray Mehlenbacher, Hank Rinick, and Jerry Gaff (a former instructor at Hobart College), with a pretty successful catch. Hank says that in order to get these fish, they had to kick the ice floes out of the way in order to make room to drop a line.
