ITHACA, N. Y., WEDNESDAY, OCTOBER 29, 1902.

PRICE TEN CENTS.

CORNELL'S NEW CAMPUS.

Reproduction of the plans adopted by the Board of Trustees for the location of proposed buildings. The buildings numbered in the drawing are as follows:
1. Sibley College. 2. Lincoln Hall. 3. Dairy Building. 4. Stimson Hall. 5. Boardman Hall. 6. Library. 7. Morrill Hall. 8. McGraw Hall. 9. White Hall. 10. Franklin Hall. 11. Morse Hall. 12. Veterinary College. 13. Sage College. 14. Barnes Hall. 15. Armory, Gymnasium. 16. Cascadilla Building. 17. Sage Chapel.

Perhaps the most important action that has been taken in years by the Board of Trustees of Cornell university was the adoption at its meeting Saturday of a plan for the future architectural development of the campus.

The great growth of the University during the last four years, which has been at the rate of from 200 to 250 students per year has over-taxed the present facilities of all departments and has made evident to everyone the need of the

immediate erection of several new buildings.

In the past structures on the campus have been erected with little if any consideration for the effect which their locations would have on the campus as a whole. As a result the campus of today, although one of the most beautiful in the country in its natural scenery, is far from perfect from an artistic viewpoint. No uniformity has been observed in the selection of the material, nor in the form,

size, or style of the buildings. Outside of the large rectangle the buildings have been located with reference only to the structure in immediate contemplation.

Through this lack of system full advantage has never been taken of the beautiful scenic view over the lake, hills and valleys, and attention has been confined to the one broad expanse of green between Sibley and Boardman hall.

The necessity for finding a desirable location for the Rockefeller

hall of physics made clearer than ever to the University authorities the hopelessness of going further without a definite plan for the future. Accordingly President Schurman called into consultation various members of the well-known architectural firm of Carrere and Hastings of New York and asked them to prepare a plan which might be followed for the next generation or two. After the most careful and painstaking investigation of all the

(Continued on Page 40)

INAUGURAL AT PRINCETON.

Professor Woodrow Wilson Installed—Advocates Broad Education of Professional Men.

On Saturday, October 25, Professor Woodrow Wilson was installed as president of Princeton university. Dean Crane attended as delegate from Cornell. As the event was of intercollegiate importance, we give below the substance of the two chief addresses of the occasion, those of former President Cleveland and President Wilson.

MR. CLEVELAND'S ADDRESS.

Former President Grover Cleveland delivered the address in behalf of the trustees of Princeton. After speaking of the strong impression made on him by the university in its present condition, the speaker traced the history of the Princeton charter. He said the original charter issued by King George still exists practically as it was a century and a half ago, and that all subsequent enactments in regard to it have been interpretations rather than alterations.

Mr. Cleveland spoke of the broad principles upon which Princeton was founded, and discussed, with justifiable pride her past attainments and future aims in the fields of education and theology.

In speaking of the modern tendency of rush and change, "when old ideas and processes are deemed too slow to meet the demands of modern progress," the speaker said:

"We hear much said in favor of but slight restriction on the election by students of the branches of study they will pursue. It is often said that the old course of study is too long and that students are thus belated in their entrance upon life's activities. Considerable discussion prevails in university and college circles concerning the extent and quality of instruction that should be afforded in preparatory schools."

The speaker asserted that Princeton's conservatism is one of her chief virtues but it is not of the stubborn sort that refuses consideration of changes which promise better educational results." He declared that at present the authorities hold it unwise to alter the method of election of studies; and intimated that a change, without serious contemplation and great inducement, would not be in accordance with the Princeton sentiment.

"If false educational notions should prevail, Princeton will bide her time until they are spent, and until saner judgment shall recognize her conscientious obedience to the demands of her charter, and appreciate her devotion to the bright standard which for more than a century and a half she has held aloft in the field where higher education has been courageous and triumphant."

PRESIDENT WILSON'S ADDRESS.

In his inaugural address, President Wilson of Princeton, emphasized the importance of our universities to the social and political life of what is called "modern progress," of the nation. He said that our colleges were not mere seminaries of scholars and never could be. The field of work of the college graduate is not limited by the narrow walls of his professional life,

but extends to every interest of his fellow men.

"The task of our universities," he said, "is twofold: the production of a great body of informed and thoughtful men, and the production of a smaller body of trained scholars and investigators."

Regarding technical schools, he spoke at some length on the necessity even there of a broad education underlying the specific training. He applied the same principles to the professional schools. He went to say that neither the technical nor professional schools could give their students the best training unless combined with a university. "The university," he said, "must stand in the midst, where the roads of thought and knowledge interlace and cross, and building on some coign of vantage, command them all."

Further, he dwelt on the unitary ground of all learning. He strongly berated the idea, advanced by some, that general study should be handed over after the German fashion, to the secondary schools; and advocated the extension still further of a general education as the basis of future specific training in every department of learning.

The college is not for the majority who carry forward the common labor of the world, nor even for those who work at the skilled handicrafts which multiply the conveniences and the luxuries of the complex modern life. It is for the minority, who plan, who conceive, who superintend, who meditate between group and group and must see the wide stage as a whole.

Continuing, President Wilson, spoke of the similarity between the final results of an education in the school of the world and an education in university halls. But these final results, he showed, came only in the world to the man of exceptional insight and after a lifetime's experience, whereas the college man achieved the same results during a four years' training. He further contended that this training in the college could not come from the old discipline of Greek, Latin, Mathematics, and English, owing

CHARLES S. FRANCIS, '77,
who recently resigned as minister to Greece.

to the enlargement in recent years of the circle of liberal studies and the area of general learning. The old discipline, he said, was well enough in the days of our grandfathers when all learning was literary and of the book; but in recent years science has broadened and transformed these old themes of study and created new themes and in consequence the boundaries of knowledge are altered.

From all this it would seem that President Wilson is strongly in favor of extending the elective system at Princeton; and it may not be a far cry to predict that the academic course of Princeton will in the near future be as wholly elective as it is now at Cornell. For the present, to be sure, President Wilson does not advocate this wholesale election of studies on the part of the student, but suggests rather a group of elective courses, any one of which shall touch upon all the general branches taught at Princeton.

In conclusion, the President spoke of the necessity in every college of the informing spirit of the teachings of Christ. This spirit, he said, had ever been, and he hoped forever would be, an essential characteristic of Princeton training.

Important Chemistry Work.

The United States government through the department of Interior has asked the department of chemistry of Cornell to co-operate with it in making some tests of the surface waters of New York state from a sanitary view-point.

No immediate results are expected, but it is hoped that in time valuable data will be collected which will aid the government in telling absolutely the quality of the water in each community of the United States. The department of sanitary chemistry will make monthly tests of the waters in the different parts of the state, and will analyze the samples procured.

Dr. Chamot and A. G. Lauder, assistant in the department, have charge of the work.

THE ALUMNI.

One purpose of THE ALUMNI NEWS is to keep Cornell men informed about one another. Every Cornell man, therefore, is invited to contribute to this column news concerning himself or any other student, and every contributor should remember that in sending news items he is conferring a favor upon other Cornellians.

'71 et al.—The following alumni were in Ithaca to witness the Carlisle game. They were the guests of Xi chapter of Chi Phi: Egbert Bagg, '71, Utica; W. E. Hill, '77, New York; W. Caryl Ely, '78, Buffalo; F. W. Barry, '94, Troy; C. F. Heyerman, '99, Detroit; J. A. Fronheiser, Johnstown, Pa.; L. S. Tracy, '00, Syracuse; E. L. Robertson, '01, Syracuse; A. W. Moller, ex-'03, Brooklyn; and J. S. White, '02.

'72, M. S.; '86, LL. D.—The American Naturalist for October contains an article by President David Starr Jordan, '72, entitled "The Colors of Fishes." This article is the result of an investigation made by President Jordan as a member of the United States fish commission and also of the Seal commission. "Animal Forms" by President Jordan and Mr. Heath has just been published by Appleton's.

Ex-'74.—The Hon. Joseph C. Hendricks was a recent visitor at the University. He is president of the National Bank of Commerce, one of the largest banks in America.

Ex-'74.—Judge Charles Grange Canfield is practicing law in Cleveland.

'76, A. B.—Theodore Stanton, of Paris, France, is in this country to see about placing his son in college and visited in Ithaca. On Sunday, October 26, his mother, Elizabeth Cady Stanton, died.

'77, A. B.—Miss M. Carey Thomas president of Bryn Mawr college, will address the association of preparatory schools and colleges which will convene at Johns Hopkins university the first week in November.

'78, A. B.—Miss Ruth Putnam was in Ithaca last week attending the meeting of the board of trustees. She has made history her study and has written the only authoritative history in English of William the Silent, Prince of Orange. She has also had great success as foreign correspondent for American magazines.

'79 et al.—W. C. Kerr, '79, of New York, Miss Ruth Putnam, '78, of New York, Judge F. H. Hiscock, '75, of Syracuse, Judge G. B. Turner, '73, of Auburn, and Dr. L. O. Howard, '71, of Washington, were present at the meeting of the board of trustees last Saturday.

'80, B. Lit.; '86, Ph. B.—Hiram J. Messenger is attorney of the Travelers' Insurance company of Hartford, Conn.

'80, B. S.—A. M. Tracy is now practicing medicine in Hudson, N. Y. His son entered Cornell this fall.

'85, Ph. B.—R. J. Bliss of New York, has returned to the University to take special work in the college of law.

'87, A. B.; '94, Ph. D.—Ellsworth D. Wright is teaching Greek and Latin in Appleton, Wis.

'87, A. B.—Dr. James E. Russell is dean of the teachers' college of Columbia university, which is to receive half a million dollars, conditionally, from John D. Rockefeller.

'89, A. B.; '91, LL. B.; and '02, LL. B.—Fred W. Hargraves is practicing law in Duluth, Minn. Associated with him is Joseph W. Cook, who graduated in law last year, and who was recently admitted to the bar of Minnesota.

'91, B. S. in Ag.—T. L. Lyon, who is now professor of agriculture in the University of Nebraska, recently visited the University and lectured before Professor Robert's classes on "Wheat Growing in the West." Professor Lyon is taking graduate work here this year.

'91, B. Y.—Miss O. B. Capron of Richmond Hill, N. Y., will enter the New York university for advanced work.

'91, M. E.—Louis W. Emerick is superintendent of the municipal electric lighting plant in Fulton. Mr. Emerick was formerly with the Salvay company in Syracuse. Mr. Emerick was coxswain of the crew.

'91, B. L.—J. S. Waterman, of the law firm of Holmes and Waterman, Worcester, N. Y., has been nominated on the Democratic ticket for district attorney of Otsego county.

'92, A. B.—E. C. Hills has recently been appointed to the chair of Romance languages in Colorado college, at Colorado Springs. For several years past Mr. Hills has held a similar position in Rollin's college, Winter Park, Fla.

'92, M. E.—Calvin H. Crouch is director of the college of Mechanical Engineering in the State university of North Dakota. W. G. Smith, '94, is to be Mr. Crouch's assistant during the coming year.

'92, B. L.—The engagement is announced of Frank Soule and Miss Edith Blackwelder. The wedding will take place November 11 in St. Louis. Mr. Soule is a member of the Zeta Psi fraternity. He is practicing law in New Orleans and is a member of the firm of Richardson and Soule.

'93, B. S. in Ag.—Dr. Herman Von Schrenk contributes an article on "The Bitter Rot Diseases of Apples" to the current issue of Science.

'94, A. B.—Jerome B. Laudfield, a lecturer on history and economics at the University of California, recently delivered a lecture before the college of commerce club at Berkeley, Cal. His subject was "Industrial and Commercial Russia."

'94, A. B.—Miss L. E. Lindsey is instructor in English in the Lockport high school.

'94, C. E.—John W. Towle is a civil engineer and contractor with offices in the Bee building, Omaha, Neb. He is general western agent for the Canton Bridge company.

'95, B. S.—G. P. Dyer, formerly of New York city, is in the bureau of supplies and accounts of the United States navy. This position is under the civil service.

'95, B. L., and '97, LL. B.—The University club of Brooklyn at its annual election of officers on Saturday, October 18, re-elected all the former officers. Among them

were two Cornell men, William F. Atkinson, '95, secretary, and F. O. Affeld, jr., '97, member of the committee on admissions.

'95, M. E.—W. E. Dunham is in the employ of the Chicago and Northwestern railway company with headquarters at Chicago.

'96, M. E.—T. S. Bailey of Newport News, has obtained a position with the Holland torpedo boat company. His address in the future will be New Suffolk, N. Y.

'97, E. E.; and '01, C. E.—Elmer D. Harshbarger, '01, is acting professor of civil engineering at the Missouri School of Mines and Metallurgy. He is taking the place held by I. W. McConnell, '97.

'97, LL. B.—F. O. Affeld, jr., of Brooklyn, N. Y., was in Ithaca Saturday, October 25, to attend the meeting of the athletic council. He represented the committee of alumni which has had in charge the raising of funds for the new athletic field. Mr. Affeld was captain of the 1897 baseball team, and is an enthusiastic supporter of athletics.

Ex-'97.—J. G. Sanderson, who is practicing law in Scranton, Pa., was in Ithaca a few days last week.

'97, Ph. B.; '02, Ph. D.—L. B. Walton has been given charge of the newly organized department of biology in Kenyon college, Kenyon, Ohio. After graduation in 1897, Dr. Walton left for Germany, where he studied in the University of Bonn. In the spring of 1898 he went to India for further work. In the summer of 1899 he was made assistant to Professor Packard. He received the degree of Master of Arts from Brown in the following year and was awarded the Goodwin Smith fellowship in biology.

'97, M. E.—Oliver Shiras is representing the Westinghouse electric company of Pittsburgh. He is stationed in London, Eng.

Ex-'96.—Guy Gundacker of Philadelphia, was in Ithaca Saturday to attend a meeting of the athletic council.

'98, B. S.—Miss Edith Read has been appointed teacher of Biology in the Girls' Technical high school in New York city.

'98, M. E.—V. N. McCarn, of Andover, N. Y., has been obliged to go to Colorado on account of his health.

'98, B. S.—Mabel Mead is teaching modern languages in the Colorado agricultural college, at Fort Collins, Colorado. Her home address is Greely, Colorado.

'98, B. S. A.; '01, M. S. A.—H. C. McLallen is an assistant in the agricultural department of the New Mexico college of agriculture and mechanic arts at Mesilla Park, New Mexico.

'98, M. E.—The engagement of William Willis to Miss Ingraham of Flushing has been announced.

'99, M. E.—Norman J. Gould has left his position in the New York offices of the Gould Manufacturing company and has returned to the main offices at Seneca Falls, N. Y.

'99, M. E.—The engagement of Robert H. Ripley to Miss Ada Story of Pasadena, Cal., has been announced.

'90, B. L.—Edward F. Brown has moved with his family to St. Louis, where Mr. Brown will teach in one of the city high schools.

'99, Ph. B.—Frances E. Chapman is in charge of the history de-

partment of one of the Greater New York high schools, located at Woodside, Long Island.

'99, B. Arch.—C. D. Eckler of Jamestown, N. Y., is the architect of the new Phi Sigma Kappa house.

'99, B. Arch.—H. M. Bowdoin, who is at present with the architectural firm of Stoughton Brothers of New York city, recently spent a few days in Ithaca.

'99, LL. B.—Leland A. Colton is in business in Skaneateles, N. Y.

'00, A. B.—James H. Gould took his LL. B. degree from the Columbia law school last June, and is now practicing in the offices of Butler, Notmar, Joline & Mynderse, 54 Wall street, New York.

'00, A. B.—M. Osgood Morgan graduated from the Columbia law school last June and now has a position in the offices of Hornblower, Miller, Byrne & Potter, 30 Broad street, New York.

'00, B. Arch.—F. Y. Johannes is head draftsman with a leading architectural firm of Norfolk, Va.

'00, C. E.—Carlton T. Chapman is draughtsman with the Owego Bridge Co., of Owego, N. Y.

'00, LL. B.—Leonard J. Reynolds is practicing law at 141 Broadway, New York city.

'01, LL. B.—Neil Andrews is with the firm of Patterson, Sterrett and Acheson, who are the attorneys for the Pennsylvania railroad at Pittsburg.

'01, M. E.—Herbert Coward has been engaged to represent the Buffalo cement company in Cleveland, Ohio.

'01, LL. B.—Acton M. Hill of Hornellsville has been spending part of his honeymoon in Ithaca. He is a partner of F. P. Whitman, '01, the blind graduate of the College of Law.

'01, A. B.—James McGunnegle is in the paymaster's department of the Pennsylvania railroad company. He is stationed at Pittsburg, Pa.

'01, M. E.—A. O. Berry is mechanical engineer in the employ of the Boston and Albany railroad. His residence is in Newton, Mass.

'01, M. E.—Harry R. Cobleigh has recently taken a position on the Engineering Record of New York.

'01, A. B.—Leroy K. Smith has been re-appointed to the position of general secretary of the Christian association of the University of Wisconsin.

'01, A. B.—G. T. Vail is with the First National bank of Michigan City, Indiana.

'01, M. E.—Wallace J. Childs, who has been employed for the past year in Pittsburg, has been transferred to the New York sales department of the Pressed Steel company.

'01, M. E.—H. C. Givens is with the Ridgway dynamo company of Ridgway, Pa.

'01, M. E.—Charles W. Cross is traveling manager of the Diamond rubber company of Akron, O.

'01, B. Arch.—F. L. Ackerman, who is with Butler and Rodman, of New York city, is meeting with unusual success for a recent graduate and has been at work on the plans of several large buildings.

'02, A. B.—A. Smith Petty, captain of last year's varsity crew, is traveling salesman for the Alberne traveling salesman for the Alberne He will confine his work to the state of Connecticut.

CORNELL'S NEW CAMPUS.

(Continued from Page 37)

possibilities and requirements the plan reproduced above was submitted to the Board of Trustees.

Mr. Carrere appeared at the meeting and personally explained the details of the plan. Although before the meeting was called some of the members openly expressed their opposition to breaking up the present quadrangle, yet when Mr. Carrere had finished his explanation there was not one who was not thoroughly satisfied that the plan fulfilled the fondest hopes of all the friends of the University who desire to see its campus unsurpassed in beauty and grandeur. During the explanation, as Mr. Carrere pointed out one advantage after another, the trustees showed great enthusiasm and when the matter was brought to a vote there was not a dissenting voice.

The plan is so vast and complete that it is quite impossible to convey a clear idea of all the points involved without taking them up separately regardless of any definite order.

To make plain to the reader the significance of the drawing reproduced above, a system of notation has been adopted. The buildings now in existence are indicated in deep black; those which are in immediate prospect and which President Schurman mentions in his report as being urgently needed at once, are cross-hatched; those which will come in the more remote future are dotted; while still others are indicated in bare outline.

The first thing that will attract attention in looking at the plan is the location of the Rockefeller hall of physics directly across the quadrangle in front of Sibley and on a line running east and west between McGraw and Lincoln halls, covering the south end of Lincoln and extending across Reservoir avenue to join the Dairy building. An annex, one story high, for the heavy experimental machinery will extend along Central avenue directly in front of and parallel to White hall.

The physics building proper will be constructed of white sandstone similar to that used in the library, Boardman hall, the Dairy building and Stimson hall, thus making one large white sandstone quadrangle, the red sandstone in Lincoln hall being shut off from view.

The smaller quadrangle which will be formed between Rockefeller hall and Sibley college will probably be entered through an archway under Rockefeller hall, similar to those which are seen at Oxford. This archway would be situated at the north end of a wide avenue running directly south through the white sandstone quadrangle, midway between Boardman and Stimson halls. At the southern end of this avenue, which for the time being may be called Rockefeller avenue, on the sloping ground now occupied by the house of Professor Babcock, and midway between Sage college and Sage chapel and just east of Barnes hall will be erected, in the near future, a large auditorium and gymnasium, which will seat three thousand on the ground floor and a thousand or more in the galleries.

Returning to the quadrangle, of

which this avenue forms the central axis, we find on the southeast corner, just north of Stimson hall, the proposed administration building. This in size and form will correspond to the south wing of Rockefeller hall when it has absorbed the Dairy building. Midway between these two buildings will be found a new avenue running through the rectangle between McGraw and Morrill halls. At its eastern terminus will be located the court of arts surrounded on three sides by Goldwin Smith hall, which will be built at once at a cost of \$250,000. The plot of ground which this building will occupy is the present location of the residences of Professors Waite, Law, and Hewett.

Going back to the auditorium described above, we find another new avenue running east and west at right angles with Rockefeller avenue. The eastern terminus of this avenue is in the court in front of the Veterinary college. On either side of this court, and east of East avenue, are indicated sites for two new buildings to be erected in the near future, namely the new hall of agriculture on the north, and the hall of botany on the south. The former will occupy the plot of ground on which now stands the residence of Professor D. C. Lee; while the hall of botany will be located just north of Professor Thurston's house.

This long avenue which terminates at the Veterinary college on the east, and at Stewart avenue on the west, will be known as Cornell avenue, because it is the extension of the street of that name which separates the Ezra Cornell property from the city cemetery and will constitute the main approach to the campus from the west. As soon as it leaves Stewart avenue it runs through a large court, on each corner of which are indicated sites for four future dormitories. At its intersection with West avenue (the present western boundary of the campus, an extension of the avenue which passes the D. K. E. house and the Theta Delta Chi house) is shown a circular parkway wherein terminate two diagonal roads forming two sides of a diamond. One of these roads runs northeast to a point near University avenue, while the other extends in a southeasterly direction towards South avenue.

In the middle of this diamond it is proposed to build a series of buildings around a large court which will be bisected by Cornell avenue. The buildings to the north of Cornell avenue are planned to be used for general university purposes, while those to the south constitute a system of dormitories, in the midst of which will be located an immense dining hall.

The driveways which form the eastern sides of the diamond terminate in Cornell avenue at a point directly south of the library.

The road from the northwest extends across Cornell avenue to Central avenue, joining it at a point immediately in front of the present residence of Professor T. F. Crane, where will be constructed a large exedra. At this point another road will be constructed to run diagonally across the lawn between the chapel and Barnes hall to connect with Cornell avenue at the auditorium.

The scheme also provides for

the extension of President's avenue westward from the residence of former President Andrew D. White just north of the library through to Stewart avenue, and a parallel avenue which we have already mentioned running from the court of arts westward to the northern terminus of the diamond. This latter avenue will likely be called Goldwin Smith avenue as Goldwin Smith hall is at its eastern terminus.

It will also be noticed that an extension for Sibley college is provided for to run east from the old Sibley across Central avenue, thence south in front of the present residences of Professor Comstock, President Schurman, Professor Barr and Professor Roberts. An extension of Lincoln hall is likewise indicated to run north towards Sibley college.

The location of the physics building as decided upon will make necessary the removal of certain portions of the street railway which now crosses the campus, on account of the fact that the delicate instruments in the laboratory would be affected by the proximity of a high voltage current. Therefore it has been decided to take up the spur which at present runs from East avenue down President's avenue to the library and place it south of Stimson and Boardman halls between Boardman hall and Sage chapel.

As indicated by the dotted lines on the map the railroad will then run eastward past the northern front of the hall of agriculture to Garden avenue. It will follow Garden avenue past the present faculty tennis courts and run thence by a general curve westward, to the bridge over Fall creek, to Cornell Heights.

The proposed location for the athletic field is just east of Garden avenue with its northern boundary near the Veterinary college. The street car line will thus run close to the northern entrance to the new grounds, while the southern entrance will be in close proximity to the tracks at the corner of South and East avenues.

So much for the details of the plan. The effect of the scheme as a whole will be to substitute the the present limited north and south views by extensive vistas westward over Enfield valley, the city, Cayuga lake and the hills beyond. It will make the campus more beautiful than any one had heretofore realized would be possible. It will tend to concentrate departments and lessen the loss of time in traveling between buildings. And what is most remarkable it will accomplish all of this without disturbing to any great extent the University buildings already erected. It will, however, do away with several private residences, among which will be included the present Delta Upsilon and Sigma Phi fraternity houses, and the residences of Professors Nichols, McGilvary, Church, Gage, Jenks, Crane and Caldwell, besides those already mentioned. The Armory will when the auditorium and gymnasium is completed, be turned over to the military department as a drill hall.

'02, A. B.—C. K. Corbin is studying in the New York law school.

Freshmen Win at Base Ball.

In the final game Friday afternoon for the underclass baseball championship, the class of 1906 defeated the class of 1905 by the score of 10 to 6.

The playing was not up to the standard, owing to the cold wather which prevailed. The best work for the freshmen was done by Olmstead, the pitcher, but even he did not seem to be up to his usual good form. Wilson, the sophomore on first base, played well for 1905.

These games are a great aid to Coach Jennings in giving him an idea of the new material, and every year more and more interest is shown by the two under classes in supporting their teams. Captain Costello, '03 and "Jerry" Chase, '03, both of the varsity, umpired.

Score by innings:

	1	2	3	4	5	6	7	8	9	R.	H.	E.
1905	1	0	0	1	3	0	1	0	0	6	3	10
1906	2	2	1	2	0	0	3	0	0	10	7	5

TRUSTEES MEET.

University Board Transacts Large Amount of Important Business—Donors of Gift.

On Saturday, October 25, the Trustees of the University held their annual fall meeting at which the following out-of-town trustees were present: General S. L. Woodford, S. C. Kerr, '79, H. W. Sackett, '75, and Miss Ruth Putnam, '78, of New York; General A. C. Barnes and the Hon. Joseph C. Hendrix, of Brooklyn; Judge F. H. Hiscock, '75, of Syracuse; Judge G. B. Turner, '73, of Auburn; Dr. L. O. Howard, '77, of Washington; William H. Sage and Hon. Charles R. Skinner, of Albany; C. S. Shepard, of New Haven; and Hon. Henry M. Sage of Menands.

The volume and importance of the business transacted necessitated an unusually long session, from morning until after 7 o'clock in the evening, with only a short intermission for luncheon, at which the Trustees were entertained by President and Mrs. Schurman. The first business was the presentation of the reports of President Schurman and Treasurer Williams.

As was intimated in the second issue of the *News* for this year, the report of the president shows a rapidly increasing attendance, this year aggregating over 3,000 with a corresponding enlargement of the instructing staff and of the facilities for instruction. The latter has been made possible by the recent gifts to the University, including Mr. Rockefeller's \$250,000, which is to be used for the new hall of physics.

It will be remembered that one of the stipulations of Mr. Rockefeller's gift was that an equal amount to be raised before comment 1902. President Schurman announced at the alumni meeting last June that this amount had been raised; but the list of donors was not given out until last Saturday. It includes the late Dean Sage of Albany, Hiram W. Sibley of Rochester, the late James B. Guilford of Utica, and Cornelius N. Bliss, Henry Ickelheimer, '88, George C. Boldt, Jacob H. Schiff, and Oliver H. Payne of New York.

The location of the Rockefeller Hall of Physics was decided upon; and the building will be placed on a line running east and west between the present Lincoln and McGraw halls. This will practically divide the quadrangle in two parts. The erection of the new hall for the Arts and Humanities, which was decided upon at the recommendation of the president, will do much to relieve the congestion in these two departments.

The Arts building will be located on the plot of ground now occupied by the houses of Professors Wait, Law, and Hewitt. As has been stated elsewhere in this issue, Carrere and Hastings of New York, architects of the new building, submitted a plan for the development of the campus which was adopted in its general features.

The athletic field committee submitted a proposition, which, as noted in another column was referred to a special committee of the Trustees, consisting of President Schurman, and Messrs. Halliday, Sackett, Ickelheimer, and R. H. Treman, with instructions to

report at the next meeting of the trustees to be held next February. Another important measure was the adoption of a plan for the superannuation of professors at the age of seventy, details to be arranged by the executive committee. The resolution as passed is given in column four.

Whether there will be a pension fund, as President Schurman recommended in an elaborate report some time ago, or whether special arrangements with each individual retiring professor, has not yet been determined; but President Schurman expressed the confident belief that, even if his pension plan is not finally adopted, at least no professor who has served Cornell university faithfully for many years will be exposed to the risk of pecuniary embarrassments in his old age.

Masque Affairs.

The Masque has been reorganized for the year, and is starting out the season with its usual brilliant prospects.

Several of the men of last season's cast will be back, but the loss

J. L. MOTHERSHEAD, '03,
President of the Cornell Masque.

of some of the Masque's strongest members will be sorely felt.

At a recent meeting the following officers were elected: President, J. L. Mothershead, '03, vice-president, R. C. Fenner, '03, secretary, R. P. Morse, '03. At the same meeting, H. I. Schenck, '03, E. B. Nell, '03, and R. S. Cooper, '03, were elected to membership.

Uniform Entrance Exams.

Thomas S. Fiske, the secretary of the college entrance examination board has just made public his second annual report. In it he states the aim of the board and the results of the examinations already held.

The board plans to hold examinations for entrance to the colleges represented, in all the larger towns of the country. Tests have been held in 130 cities of the country this year, as against 69 last year, and 1,362 candidates who applied for admission to 35 colleges were examined.

The system has several advantages over the old method of conducting examinations in a few places. It promotes co-operation between colleges and between the college and the preparatory school; it insures uniformity in the subjects and in academic standards, and saves money and time for the student.

FOR ATHLETIC FIELD.

Text of Proposition Submitted to Board of Trustees by the Alumni Association.

New York, Oct. 23, 1902.

To the Honorable Board of Trustees, of Cornell University, Ithaca, N. Y.:

GENTLEMEN—The Alumni association of Cornell university at its annual meeting held June 19th, 1901, appointed a committee of five to raise funds for the purpose of building and equipping an athletic field and play-ground upon or near the University campus; it being the hope and anticipation of the alumni that, when they had secured a substantial amount in subscriptions, the Board of Trustees of the University would lend itself to this undertaking and donate the requisite amount of land therefor.

The Alumni Athletic Field committee has secured in subscriptions for the building and equipping of this field, up to October 7th, 1902, \$32,585.00, and is assured that this amount can be increased to at least \$40,000.00 within a reasonable time if your honorable body agrees to donate the land required.

We beg, therefore, to submit you, on behalf of the Alumni association, the following proposition:

1st. That the Board of Trustees endorse the project of the Alumni association for an athletic field and play-ground upon or near the University campus, substantially as planned in prospectus hereto attached, and donate a tract of land large enough to accommodate the present number of students, designating the location of same; this tract of land to be located upon or near the campus, and to comprise not less than twenty acres, and if possible, in the judgment of the trustees, thirty acres.

2nd. The Alumni Athletic Field committee on behalf of the Alumni association agrees to pay a committee of the trustees and alumni hereinafter named, in a manner to be designated, \$40,000.00 in cash for the preparation and equipment of this field, said sum to be payable as follows:

\$10,000.00	within 90 days after the donation and designation of location, of the field by the trustees.
\$15,000.00	within one year after date of said donation.
\$15,000.00	within three years after date of said donation.
\$40,000.00	Total.

3rd. The preparation of all plans for this field and play-ground and the expenditure of all moneys therefor, to be vested in a committee composed of the president of the University, a representative of the Board of Trustees, a representative of the alumni, and a representative of the Athletic council of the University.

The suggestion of the committee as to the location of the field and play-ground is a part of the tract of land on the University farm immediately east of Former President Andrew D. White's residence, and lying south towards South avenue.

Respectfully submitted on behalf of the Alumni association,

The Alumni Athletic Field Committee,

GEO. W. BACON,
Chairman.

PROFESSORS TO RETIRE.

Board of Trustees Passes Important Resolution Superannuating Faculty Members.

At a meeting of the Board of Trustees, held Saturday, Oct. 25th, 1902, the following action was taken:—

Resolved, That hereafter the term of employment of every professor of this University end at the June commencement of the calendar year in which his 70th birthday falls, and that this rule apply to those professors who have already passed that age, the date of the termination of their employment being the close of the present University year; and

WHEREAS, by reason of poor health, physical infirmity or otherwise, it may happen that some professor may be rendered unable to perform satisfactorily some or all of his duties as such before he arrives at the age of 70, it is hereby further

Resolved, That in such case the executive committee is hereby authorized and directed to retire such professor, the date of retirement being not earlier than the June commencement following the action of the executive committee in regard thereto; and it is further

Resolved, That the foregoing is hereby determined upon and decided as the fixed policy of the University, and the executive committee is hereby directed to adhere to and enforce the same.

AND WHEREAS such enforcement in the case of a retirement before the age of 70, may, in some cases warrant special consideration regarding some worthy professor who has faithfully served the University for many years, it is further

Resolved, That the executive committee is hereby authorized and empowered to employ the professor thus retired to perform other or such portions of his former duties as the president may direct and under such title as may be agreed upon, and to pay him therefor such compensation and for such length of time as the circumstances and situation in each case may demand.

AND WHEREAS in the case of a professor whose term has expired by reason of the age limit as provided herein, it may be desirable to continue his services in the performance of a portion of his duties; it is further

Resolved, That the executive committee be and hereby is authorized and empowered to continue the employment of such professor in the performance of a portion of his former duties, and under such title as may be agreed upon or designated by the president, and to pay him therefor such portion of his former salary, as the circumstances and situation in each case may demand.

Resolved, That any action which may be taken under the foregoing preambles and resolutions shall not affect the salary of any professor before July 1st, 1904.

Resolved, That the executive committee be requested to ascertain the feasibility of a pension system for retired professors and recommend a plan for the same at the next meeting of this Board.

E. L. WILLIAMS, Sec'y.

Owing to an error in the mailing department two copies of some issues of the *Alumni News* have been going to some subscribers. All copies of the issue No. 3 of the present volume have been exhausted and the demand for more copies cannot be filled. If those who have extra copies of the third issue will return them they will confer a great favor on the management as well as on alumni who wish to complete their files.

This issue of the *Alumni News* is being sent to a large number of Cornell men who are not subscribers, in order to give them an idea of what the paper is like.

The aim of the promoters of the *Alumni News* is to fill a long felt want of an organ for alumni, a paper which will keep Cornell men in touch with each other and in touch with the University.

A decided effort will this year be made to improve the paper in every way, but in order to carry out the present plans the paper must receive the support of the men and women for whom it is published.

The subscription price is \$2 a year payable in advance.

CORNELL'S NEW CAMPUS.

We take pleasure in reproducing in this issue the map showing the Cornell campus as it will be when buildings now in mind are erected. The plan is described in detail in another column and needs no further comment here.

That the plans as arranged by the architects will meet with the unqualified approval of a large majority of Cornell men we feel sure. They are the work of one of the most distinguished firms in America, and are the result of most careful study. They satisfied the trustees in every respect, and when everything provided for is taken into consideration, there is little room for favorable criticism.

The plans may seem extravagant to the more skeptical, but when the great growth of the University during the past thirty years is contemplated, it is clear that the most optimistic view of the future is warranted. In any event it is well to follow some definite plan in the material growth of the University. If such a plan had been in existence only thirty years ago the Cornell campus might have been even more beautiful than it is now.

The action taken by the Board of Trustees marks an epoch in the history of Cornell and gives all friends of the University just cause for rejoicing.

NEW ATHLETIC FIELD.

In another column of this issue is printed the communication from the Alumni Athletic Field committee, which was presented to the Board of Trustees of the University at its meeting last Saturday. The prospectus referred to in the communication was printed in full in the issue of the *Alumni News* for October 23, 1901. After the reading of the communication the matter was referred without discussion to a committee composed of the President of the University, Samuel D. Halliday, Robert H. Tremen, Henry W. Sackett and Henry R. Ickelheimer, to consider the proposition submitted by the field committee and report its conclusions thereon at the next full meeting of the Board of Trustees which will be held next February.

The committee is in every respect an admirable one, and cannot fail to win at once the confidence of all Cornellians. The most ardent advocates of the new field may rest assured that their interests will be given as full consideration as the larger interests of the University itself.

It is undoubtedly true that the deliberations of the committee will be influenced, and legitimately so, by the interest which the alumni manifest in the movement for the new field. A large increase in the

amount of money subscribed between now and the meeting of the Board of Trustees in February will have much weight in persuading the committee to report favorably on the proposition contained in the communication. Fortunately, the field committee at the very start proposed a scheme of payment of subscriptions which will enable everyone to subscribe, no matter what his financial condition may be. This scheme is set out as follows in the prospectus above referred to:

"We ask that you subscribe now and propose three methods of payment. No call for cash will be made until \$40,000 is subscribed.

(A) Total subscription in cash on call.

(B) Twenty per cent. cash and twenty per cent. each succeeding year for four years; and, if necessary, the committee will accept

(C) Twenty per cent. cash and ten per cent. each succeeding year for eight years."

The annual burden of even a large subscription under the above scheme may be made so light that no one interested in the movement can justify his action in refusing to subscribe. The importance of

subscribing at this critical time in the development of the movement ought to be realized by all our readers. Subscriptions may be sent to George W. Bacon, chairman Athletic Field Committee, 149 Broadway, New York city.

Obituary.

LYLE B. CRUIKSHANK, '02.

The death of Lyle B. Cruikshank occurred at his father's home in Carthage, N. Y., on October 10. The year after graduation, Mr. Cruikshank went to Brooklyn, where he had resided ever since. Soon after coming to New York he became mechanical engineer for the Hazleton Boiler company, and continued in this business connection up to the time of his death. He was a member of the American Society of Mechanical Engineers and the Cornell University club.

Three years ago he contracted a cold, and last year he spent some time in Europe and Texas in the endeavor to regain his health. He was 35 years old at his death, and unmarried. His brother John M. Cruikshank, '92, is a well known political writer on the *Brooklyn Eagle*.

'97, A. B. A. M.; '97.—B. Powell was recently appointed to a professorship of Greek and Latin in the Mercersburg academy in Pennsylvania.

GRADUATE MANAGER'S REPORT

Receipts and Expenditures of the First Year Under New Management for Athletic Finances.

At a meeting of the Athletic Council held Saturday, October 11, Graduate Manager Senior presented his report for the past year. A mere summary was given out at that time. The full report has just been issued. It covers the year from August 1, 1901, to August 31, 1902. The total expenses were \$77,830.43, and the receipts, \$77,804.25. The deficit is thus \$26.19.

The deficiency will doubtless be made up by subscriptions. One gift was received at this meeting from E. G. Wyckoff, ex-'98, for \$100.

A comparison of this year's budget with that of 1900 shows an advance in both receipts and expenditures all along the line.

For the navy the receipts this year were \$3,701.34 and expenses, \$10,-

the totals were \$14,159.82 and \$17,651.44.

Lacrosse was given support by the Council last year for the first time. The expenses of the team were \$397.35 and the receipts but \$57.60. The gate receipts were but \$43.

The Interscholastic league was also financed by the Council for the first time. The expenditures were \$174.44, of which the principal item was for prizes. The receipts were \$49.10.

Owing to the flood last fall, which necessitated a great many repairs, the expenses of Percy field were unusually large, being \$3,919.10. The item for flood repairs was \$1,024.61. The receipts were \$95.40. The expenditures in 1900 were about \$1,200, and receipts just about the same.

The boat-building account is about the same as usual—\$2,093.28 expended, and \$1,581.15 received.

The general account covers the subscriptions from the town, \$708, and students, \$152.50; benefit performance, \$918.69; Sophomore cottillion, \$307.88, and \$173.91 from the Junior "prom." The musical clubs contributed \$300. The total receipts were \$6,769.93. The principal single expenditure was \$1,000 for graduate manager, the total being \$3,046.70.

The sale of season tickets brought \$7,810.40. These admit the bearer to all games at Percy field and are sold for \$10. Last spring a few tickets for the half year were sold for \$5.

Debating Arrangements.

One of Cornell's two annual debates is now definitely settled. Cornell will meet Pennsylvania on December 12 at Ithaca. The debate will probably be held in the Lyceum as heretofore.

Considerable interest is being manifested in the competition for places on the team. There are four places to be filled and only one of last year's team, Carlisle, in the field, which leaves an opening for three other men. Contrary to previous custom, there will be only one competition, instead of a series. This will be held on October 28, and will be open to all debaters in the University. In view of the fact that this is the only preliminary contest, and the team will be chosen immediately hereafter, it is expected that the number of candidates will be large. Those interested expect at least fifty competitors, a thing unprecedented in Cornell's debating history. The question for the competition is "Resolved, That the principle of national ownership and operation of public utilities should be extended."

The question for the Pennsylvania debate has not yet been decided upon. It will be some phase of the tariff question, and will be submitted in the very near future.

The freshman club was organized last week, and there was such a strong competition that the membership was made thirty instead of twenty-five as formerly. This is a splendid showing, and augurs well for Cornell's debating for the next few years. There is plenty of good material in embryo, both the underclasses being unusually strong and apparently taking a much greater interest in debating than heretofore.

'02, B. Arch.—Douglas Mackintosh, who, during the summer, was with Claude Fayette Bragdyn, an architect of Rochester, has obtained a leave of absence and returned to the University for graduate work.

'02, Grad.—Miss Elfrieda Hochbaum, who specialized in Germanics in the University last year, is professor of German in Wells college.

'02, M. E.—Reginald Traut-schold is with the Marine Engine and Elevator company of New York.

Ex-'02.—W. W. Mack, formerly a member of the *Era* board, who has been for the past year on the local reportorial staff of the *New York Sun*, recently resigned his position to go on the literary staff of

an insurance newspaper of high standing in the metropolis, with which Mr. Mack's father, the late John W. Mack, '72, was connected for ten years.

'02, M. E.—A. C. Williams, known to undergraduates as "Shor-ty" Williams, is living in Hinsdale, Ill.

'02, A. B.—Miss Agnes G. Smith is teaching in the high school in Sandy Creek, N. Y.

'02, M. E.—E. L. Wilder has a position with the Westinghouse company of Pittsburg, Pa.

'02, M. E.—Frank Teagle, former manager of the Cornell navy, is with the Buffalo Forge company.

'02, LL. B.—C. Tracy Stagg has opened a law office in the supreme court chambers in the court house in Elmira. He is also secretary to Justice Walter Lloyd Smith.

Ex-'02.—E. C. Batchelor is assistant superintendent of the Charlevoix plant of the Pittsburg plate glass company.

'02, C. E.—Murray F. Crossette is in the office of the city engineer of Chicago.

Graduate Manager John L. Senior, '01.

962.01. In 1900 the receipts were \$5,043.47 and expenditures \$3,841.31. This great difference is explained by the fact that in 1900 the second crew race was held in Ithaca, while this year not only were the expenses of a crew to Philadelphia incurred, but the expenses of the Harvard crew in the Memorial Day race at Ithaca had to be guaranteed. The receipts from the Ithaca race, through sale of tickets on the observation train, were \$1,328. The principal items of expenditure were training table, which cost \$1,600 more than the amount received from the crew men for board, the salary of C. E. Courtney \$1,500 and of F. D. Colson, \$300. The large totals may be slightly misleading because \$828, which is the sum realized by the sale of tickets to the Poughkeepsie race for the West Shore railroad, is entered on both sides of the account.

In baseball the receipts were \$4,495.40 as against \$4,940.14 in 1900, and expenditures this year \$6,174.70 and that year \$5,119.26. The chief additional item of expenditure is the salary of Coach Jennings, for which \$755 is charged to the account.

The expenditure for track has risen from \$1,961.08 to \$4,716.57, and the receipts from \$1,163.59 to \$1,647.68.

Football is by far the largest item in the account. It cost \$18,059.15 to support the team, and the receipts were \$20,223.78. In 1890

A View from the Inside

A College making no provision for the social and active religious life of its students would merit the fate which unpopularity would surely impose.

It is of the utmost importance, therefore, that Barnes Hall which is the only Organization in Cornell catering to the social and active religious life of the students should be recognized as one of the important factors contributing to the welfare of the University.

At this time particularly, when the attention of the entire country is centered upon the wonderful growth of Cornell and its future prospects, it is eminently fitting to call attention, not only to the past work of the Cornell Christian Association, but to advance steps that must be taken.

*As Seen by the Man
Behind the Desk*

Barnes Hall is one of the most beautiful and imposing homes occupied by any of the college associations. Erected through the munificence of Alfred S. Barnes with the co-operation of Trustees of Cornell University

and the heroic efforts of a band of students, it has stood since 1889 as a noble memorial to its donor and as an indispensable and effective agent in the "promotion of God's truth among men."

By reference to the plans for the enlarged University it will be at once observed that Barnes Hall will occupy the most strategic position on the Campus. It will flank the effluence of Central Ave. as it throws out its branches to all parts of the University grounds and particularly to the proposed Gymnasium and Auditorium, the Dormitory grounds and the Library. Its accessibility will thereby be greatly enhanced making it a place of popular student resort.

If any criticism can be brought against Barnes Hall in its present condition, it is that students regard it as a place for meetings and not for social intercourse. It is not used as a club house. The reading room is in constant use by the students but is not used as a lounging and conversational room. A sentiment is growing for the transformation of the dormitory rooms in the basement into rooms devoted to student interests and for the purpose of

amusement, conference, etc. This is an excellent idea and if carried out will satisfy the greatest need of the student body to-day. The change can be easily and quickly effected as soon as the funds are forthcoming to cover the income derived from the present rental of these rooms.

Plans are already drawn for the fitting up of a large room on the first floor as a lounging room. This is the room commonly known as the South Dome and is a large, semi-circular room well supplied with large plate glass windows. It is proposed to put in handsome window seats, easy chairs and to place in the room the trophies from the present crowded trophy room. This room can be fitted up handsomely for \$500. The gift of this sum by some alumnus would win the greatest appreciation from the student body.

Missionary Department

One of the remarkable features of the Fall's work has been in the Mission Study Department. Already some seventy-five students are meeting in five classes each week to engage in this work. At the present time a large force of students is engaged in raising money for the support of Cornell's representative in Japan, Mr. Galen M. Fisher, who is the Student Secretary of the Christian Association Union of Japan. This committee plans and expects to raise \$1000.00 this year. Last year about forty students were in classes and a little over \$300.00 was raised.

The First Report for 1902-03

It is difficult to indicate so early in the year just what has been accomplished, for the committee reports are not complete. But indications are that never before has the organization accomplished as much as it is doing to-day. The growth in membership, the increased interest in Bible Study, in Missions and Philanthropic Work all indicate this.

The General Secretary

The growth of the University has made it necessary to employ a secretary to devote his entire time to the work and S. Edward Rose, '98 was called to this position this year to succeed Benjamin R. Andrews, '01. Experience has led the Trustees to believe that it is no longer possible for a student to discharge the duties of the Secretaryship and carry on much work in the University, and do justice to either.

Work for New Students

President Schurman has stated that nine-tenths of the students at Cornell are either self-supporting or their education is necessitating sacrifices at home. This startling statement which undoubtedly accounts for the high standard of scholarship at Cornell is not surprising to the man who greets Freshmen at Barnes Hall. Already inquiries from prospective next year students desiring work have been received, and these will increase in number until many hundreds are on file.

This fall the Secretary directed an unusually large number of men to work and hundreds were assisted out of the various dilemmas in which Freshmen are apt to be situated. The little hints and advice given to new students regarding boarding places, companions, habits of life, etc., affect the destiny of more lives than people are aware of. This work was followed by a systematic canvass of the class in which the students were personally called upon and invited to the social and religious functions of the Associations. Already about two hundred Freshmen have joined the organization.

Religious Meetings

This includes Wednesday evening meetings and occasional Sunday evening meetings. The men and women meet separately in the Wednesday evening meetings and the Freshmen separately, from both. The average attendance last year was about ninety.

On Sunday evenings there have been lectures and talks by chapel preachers and professors bringing before the students many sides of Christian thought and activity. The average attendance last year was two hundred seventy-two. Among the large meetings this year have been the Freshmen "Decision Meetings,"

the Bible Study and the Mission Study addresses.

Owing to the numerous opportunities for religious service afforded by the city churches and the University Chapel, more emphasis is placed by the Association on Bible study and other forms of religious life than on its meetings.

Philanthropic Work

is a title applied to the meetings and Sunday schools carried on in the school houses and chapels located in the country districts surrounding Ithaca, and also the effort being made to better the condition of poor boys living in the slums of Ithaca.

A large number of men are engaged in this work, many of them being those to whom the ordinary fields of religious effort do not appeal. There is a large opportunity here for such men to interest themselves in.

Social Life The majority of students at Cornell are absolutely without social opportunities. More people have died from homesickness and loneliness than from suicide.

The Association opens wide its doors for such and by the means of large, informal receptions and frequent socials, introduces the student to his future friends and affords him a social home.

Five hundred Freshmen attended the the Men's Campus meeting in September at which time they learned the college yells, and songs and were addressed by the Athletic Captains, President of the University and others.

Finance The Association has made good financial progress during the last few years. On August 1, 1898, there was a debt of \$700.00. On August 1, 1901, there was a balance in the treasury with all the bills paid.

The enlarged work of this year however, requires an increase in income of at least \$500.00. The Association greatly needs an endowment, which would relieve the Secretary and the officers from the grind of raising money and give them more time for individual work amongst students, which is a work necessarily neglected. Contributions from Alumni of \$2.00, \$5.00, \$10.00, \$25.00, per year would be of the greatest help in this work, relieving many poor students from paying dues who can ill afford to do so.

The Budget for this year is about \$2100.00. Last year \$205.00 came from the Alumni; \$350.00 from the Faculty; and \$750.00 from Membership and \$300.00 from miscellaneous sources.

OBERLIN DEFEATED.

Cornell's Football Team Rolls up Big Score of 57 Points in One-sided Game.

The football team defeated Oberlin last Saturday by a score of 57 to 0. In view of the fact that this was the last game before the team meets Princeton, it was of peculiar interest.

Too much significance, however, should not be attributed to the high score made by Cornell, as the Oberlin team was weak, and the members of the varsity were smarting under the defeat at the hands of the Indians the week previous. Nevertheless the team as a whole and its individual members showed marked improvement. Should this be continued through this week, the Princeton game will be a struggle.

There were several notable features in the Oberlin game. The interference, especially on kick-offs, was much better than it has been, the men coming together and keeping their feet well. The line men were strong, and Oberlin could not gain through them. In fact throughout the game the visitors gained very little.

For Cornell several long runs were made by the backs. Coffin at one time secured the ball at the fifteen yard line on the kick-off and, aided by excellent interference, ran the length of the field for a touchdown.

After the lifeless play in the Indian game, the snap and dash which the men displayed were a pleasure to see. The plays were executed quickly and every man played hard. Oberlin started the game in a determined fashion, but Cornell soon scored, and by the end of the first half had rolled up 39 points.

The improvement in team play was very marked. For the first time this year Hunt was tried at fullback in a game. He has made a good record at guard, and was last year selected by Casper Whitney for a place on the All-American team; but the scarcity of material for fullback, and injuries to Burns and Halliday, the most available candidates, induced the coaches to play Hunt in the position. He did well, his great weight telling in plunging through the line.

The removal of Hunt from guard

"SANDY" HUNT, '04,
the well known right guard who is being
tried at fullback.

to fullback shows a commendable sacrifice of individual distinction to the welfare of the team as a whole. Stace and Webb were tried against Oberlin in Hunt's place at guard and both did fairly well.

The most regrettable feature of the game was the frequent fumbling, few of those who ran with the ball being free from the fault. It was more noticeable than at any previous time and must be eradicated before next Saturday. Mention should be made of the individual work of some of the men. Warner as usual was in prominence. His ability to break through almost at will and his speed in getting down the field on punts was as noticeable as ever. Brewster's punting was uniformly good, as was his skill in running back the Oberlin fullback's kicks. Larkin and Tydeman at end were much superior to their opponents and played consistently.

The line-up:

Cornell (57)	Oberlin (0).
Larkinl.e.....	Bradley
(Hackstaff)	(Funk)
Lueder (Costello) l.t...	Hillis (capt.)
Warner (Seix) ..l.g.....	Shepler

Sheble, Hunt. Goals from touch-	
downs, Coffin 3, James 3, Brewster.	
Place-kick from field, Brewster. Ref-	
eree, Mr. Evans of Williams. Um-	
pire, Mr. Cook of Hobart. Time of	
halves, 30 and 25 minutes.	

The American Antiquists' society, made up almost entirely of Europeans who desire to study the evidences of American archaeology, held its first American session in New York city October 21. A reception committee composed of representatives of all the universities was appointed. Dean T. F. Crane served for Cornell.

Owing to the crowded condition of the dynamo laboratory, the department of physics has been authorized to appoint an additional assistant for that work. No appointment has yet been made.

"HEINE" SCHOELLKOPF, '02.

GRADUATE COACHES.

Wyckoff, '96, Lee, '97, and Schoelkopf, '02. Return to Aid in Developing the Team.

The last week of preparation for the Princeton game has brought several graduate coaches to Ithaca. Among them is Clinton R. Wyckoff, '96.

CLINTON R. WYCKOFF.

Mr. Wyckoff needs no introduction to the alumni of Cornell. His winning of the place of quarterback on the All-American team in 1895 signalized the fact that Cornell was no longer a "small one" but was thereafter a factor to be reckoned with in deciding the intercollegiate football championship.

During his freshman and sophomore years Wyckoff played quarter on his class team. In 1893 he was tried as an experiment in the quarterback position on the varsity and soon demonstrated that he was a "find." He never lost his head; and in many a game his unvarying coolness when the battle was going against the team turned defeat into victory. His passing was quick and accurate and his signals were given without hesitation. He also played baseball, holding the position of shortstop on the varsity for two years.

In his senior year Wyckoff was chosen captain of the football team. But his duties as leader in no degree affected his skill in running the team, for his brilliant generalship and consistent playing won him the position on the All-American team in his senior year.

The presence of such a player cannot help but act as a tonic for the team. His proved capacity in football generalship will also be of marked value in devising new methods of attack and defense and his instruction as to the duties of quarterback should, barring accidents, make that position one of the strongest on the team.

HAROLD LEE.

Harold Lee, '97, arrived in Ithaca last Saturday and will assist in coaching until after the Princeton game. Lee entered Cornell from Yale, where he received the degree of Ph. B. in '96; he spent one year and part of another at Cornell graduating in mechanical engineering. He played left end on the varsity for two years. He is at present secretary of the Maine Construction and Dry Dock company on Staten Island.

HENRY SCHOELLKOPF, '02.

Henry Schoelkopf, '02, arrived in Ithaca the first part of the week to aid in the final preparation of the football team for the Princeton game. He is registered in the Harvard law school. He was in Ithaca just after the Williams game but at that time was able to give but little attention to the team.

He has planned to spend the whole week at Ithaca, and will pay especial attention to the backfield.

"Heine" is one of the best fullbacks that ever wore the Cornell uniform. He succeeded Starbuck in 1901 and in many respects his playing was patterned after that of his former captain. He invariably hit the line with great force and could generally be relied upon for a gain when it was most needed. He was a swift runner and was as

quick as a flash in choosing an opening in the opposing line.

Fullback is one of the unsettled positions on the team. With his knowledge of the requirements of the position, Schoelkopf's aid will prove of great value in selecting a capable line-plunger, and in inculcating the fine points of play.

New Boat For Sage.

The new four-oared shell for the rowing club has been received from Mr. Hoyle and is now in the boat house on Beebe lake. The club now owns two boats and hopes to institute class races within a year or two.

A considerable amount was owing on the new boat and the boat house. To raise this deficit a mass meeting was held in Sage gymnasium. Practically all the women attended. Speeches were made and class subscriptions raised.

Before adjournment three-fourths of the necessary amount had been pledged. The rest will be raised by a benefit performance.

(Continued from Page 44)

Bible Study Over two hundred students are already enrolled in the Bible Study classes and are following the systematic, intelligent courses as outlined by the International Committee. There are a dozen

Freshmen sections which meet every Sunday morning at various places in the city and on the Hill.

This kind of Bible Study deals with the fundamental problem in life, that of forming character, and its results are bound to be seen in the lives of these students.

Freshmen Course....The Life of Christ
Sophomore Course.....Studies in the Acts and Epistles
Junior Course.... Old Testament Studies
Senior Course..... Teachings of Jesus and His Apostles

The Barnes Hall reference library of 1100 volumes is constantly used and is unquestionably of great value in our Bible Study work.

The future of the Cornell Association is fraught with large and wonderful opportunities.

The degree to which it takes advantage of these depends not only upon the faithfulness of the student workers here but upon the support co-operation of the friends in distant places.

Cornell University is destined to become one of the greatest, if not the greatest, educational center in America and it is of the utmost importance that its only organization which stands distinctively for righteousness should keep pace with the growing University.

BASEBALL PROSPECTS.

Coach Jennings Says Outlook Is Bright for Excellent Nine This Year.

Coach Jennings of the baseball team has at the request of the *News* made the following statement:

The prospects for a good baseball team this year are brighter than ever before. All the old men are back except Captain Whinery at the position of catcher, Brown at second, and Henderson as pitcher. There is also a good deal of good material in the freshman class and if all goes well the team of 1903 should be a winner.

A regular man will be used in center field this year, instead of a pitcher. Bigler, '06, Noyes, '06, Boyer, '03, Thompson, '06, Dederer, '06, Cameron, '05, and Gail, '05, are all likely candidates. Bigler, last year's captain of Mercerburg academy, has had considerable experience and should make a good showing.

Brewster, '04, will take care of left field, and for right field there is Drake, '04, who played in that position last year, and two substitutes of last year's team, G. C. Patterson, '04, and A. A. Costello, '04.

Brown will be missed very much at second, but from Howland, '03, Mantel, '05, Gephart, '05, and Renner, '06, a good substitute should be developed.

Captain Costello will cover third and Lewis shortstop. For first base there is Ferguson, '03, Harris, P. G., Wilson, '05, Sweeney, '06, and Deitz, '05.

The pitching staff will be a great deal stronger this year than last, with Chase, '03, Bristol, '04, Bergman, '05, Lefebore, '05, Olmstead and Fennell, '06.

Among the promising candidates for catcher are Merrill, '03, Hunt, '04, Pease, '04, Larkin, '06, Welch, '06, Helm, '06, and Maxwell, '05.

It is a little early yet to speak about spring baseball, but the prospects are certainly very bright.

HUGH JENNINGS, (Coach.)

Cross Country News.

Cornell's chances for winning the Intercollegiate cross country race this year are not very encouraging.

Captain Foster, '04, and R. A. Gardner, '05, are the only members of last year's team in college. There is some good new material, but when running against the veteran teams of Yale and Pennsylvania, it cannot be depended upon.

The dual meet with Pennsylvania will be held November 15. Pennsylvania has practically the same team as last year and will put up a hard fight. Fourteen men will start in the race and the first four on each team will score.

The Intercollegiate meet will be held at Morris park, New York city, the afternoon of November 30. Sixty-three men will start in this race, seven each from Yale, Princeton, Harvard, Cornell, Pennsylvania, Williams, Syracuse, New York university, and Columbia. The first four men of each team will score.

The most promising of the Cornell squad are, besides Captain T.

M. Foster, '04, L. A. Cazenove, G. R. A. Gardner, '05, F. W. Poate, '04, M. C. Overman, '05, H. F. Plumer, '05, H. B. Vincent, '04, K. W. Woodward, '03, H. A. Gilbert, '05, E. R. Davis, '05, M. B. Robinson, '06.

A handicap five mile race for all members of the Cross Country club will be held Saturday, December 6.

Baseball Schedule.

The baseball management has departed this year from its policy in not playing matches with professional teams and has decided to schedule a game with the Philadelphia Athletics.

In several other respects the schedule of games to be played next spring differs from that which has been followed for some years past. Several colleges which have heretofore been on the list have been cut from the schedule of the southern trip, and some additional one have been taken on.

The games with the University of Georgia, University of North Carolina, Clemson college, and Mercer college will be replaced by three games in Birmingham, Alabama, and by an extra contest with the University of Virginia at Charlottesville, Va.

The games after the Easter recess will be played with the teams of the Eastern league and the State league until the opening of their seasons, instead of with those of the smaller colleges of New York and Pennsylvania.

By this arrangement it is thought that more time will be made available for practice, and, especially in the professional games, it is expected that the weaker points will be more clearly shown than in the games with the smaller colleges which in past years have been scheduled.

Tickets for the Game.

Tickets in the Cornell section for the Princeton-Cornell football game at Princeton on Nov. 1 can be obtained from the secretary of the New York Cornell club, 49 West 43rd street, New York city, E. S. Sanderson, secretary of the Philadelphia Cornell Alumni association at 1934 Market street, Philadelphia, Pa., or from the Cornell University athletic association, 139 East State street, Ithaca.

The price of tickets, including seat and admission is \$1.50. Tickets will be on sale at the above places until Wednesday night, October 29th, at which time the unsold tickets will be returned to Princeton, where seats can be obtained by application to George R. Murray, general treasurer, Princeton athletic association, First National bank building, Princeton, N. J.

The *News* is in receipt of information from George W. Boyd, assistant general passenger agent of the Pennsylvania railroad, that arrangements have been made for running special trains to Princeton from New York and Philadelphia on account of the game, and a round trip rate of \$1.90 declared from Philadelphia to Princeton and return, and a round trip rate from New York of \$2.15.

"CORNELL'S Largest Fitting School."

CHANCE FOR FILIPINOS.

President Schurman Says Cornell Will Aid Those Who Come Here.

A movement is on foot to secure free transportation to the United States for any Filipinos desirous of an education in America. Among those who have given sanction to the movement are President Schurman and Senator Proctor. This plan has been formulated in a petition which is to be presented by the Federal party of the Philippines to the Philippine commission.

In reply to an inquiry in regard to this movement, President Schurman said:

"I have at different times expressed a desire that Filipino teachers might come to this country to receive instruction at our schools and colleges. In accordance with this desire I recommended last spring to the Board of Trustees that free tuition in the University be granted to two Filipinos each year. The recommendation was accepted, and commencing this fall two scholarships are offered each year, making a total of eight students that are furnished with free tuition.

"I should think it an excellent thing for Filipinos to avail themselves of the free transportation offered by the commission. It is of the utmost importance that the natives of our new possessions should come to the United States to study in our institutions of learning. Such men can do far more for their country than American teachers who are unacquainted with the character and life of the people. In the long run the schools will be in the hands of natives, and it is important that they should have drunk at the fountain of American knowledge, and have had practical experience of the working of our political institutions.

"Cornell University, it may be safely said, will grant free tuition to as many Filipinos as present themselves for admission. The reason for limiting the number of scholarships in the original grant was that only two candidates were then in sight. If the Filipinos are not prepared to meet the entrance requirements, the Faculty will undoubtedly pass exceptional legislation providing for their admission as special students."

Bodleian Library Celebration.

After an absence of nearly a month, Librarian Harris, who represented Cornell at the celebration of the 300th anniversary of the founding of the Bodleian Library at Oxford October 8 and 9, returned to the University last Friday.

He reported that the celebration was a success in every way. Over one hundred universities from all parts of the world were represented, the delegates wearing the gowns of their several institutions. At the magnificent dinner which was given in Christ church, nearly three hundred guests had places at the tables.

Vice-Chancellor Murray, the well-known classical scholar, presided and gave the first toast to "The Guests." Former President Andrew D. White, who represented Yale, had the post of honor at his right and responded.

Mr. Harris's address, with those of the other representatives present, will appear in a volume soon to be issued by the Oxford university press.

MARRIAGES.

LANGDON-SAYLES.

The marriage of Jervis Langdon, '97, to Miss Eleanor Lee Sayles occurred on Thursday, October 2, at the First Presbyterian church in Elmira, N. Y.

The ceremony was performed by the Rev. Wilton Merle Smith of New York, uncle of the bride, assisted by the Rev. Isaac Jennings, pastor of the church. The wedding party included E. E. Loomis, New York, C. R. Wyckoff, '96, of Buffalo, J. A. Seubert, '97, Syracuse, L. A. Fuertes, '97, Ithaca, H. B. Lee, '99, Buffalo, and Dr. A. W. Booth, A. D. Falck, and H. B. Sayles, Elmira.

The body of the church was filled with guests, among those from out of town being Dr. and Mrs. J. G. Schurman, Ithaca; Major Isaac Brewer, U. S. A.; Judge and Mrs. Charles Parker, Owego, N. Y.; Mrs. McAlpine, Brighton, England; Mrs. William Miller, the Misses Miller, Miss Halsey, Mr. and Mrs. Mynderse Van Cleef, '74, Mr. and Mrs. C. E. Treman '89, Professor and Mrs. D. C. Lee, C.H. Blood, '88, and the Rev. C. H. McKnight, '91, of Ithaca.

One of the delightful features of the wedding was the rendering of Alma Mater by the organist as a part of the musical prelude to the ceremony.

Mr. Langdon is well-known among the alumni, having been popular and influential as an undergraduate, and maintaining an active interest in the University since he took his degree in '97. His business interests are in Elmira with the coal dealing firm of which his grandfather was a founder, and with which his father continues, that of J. Langdon & Co. Mr. and Mrs. Langdon left immediately after the ceremony upon a trip through New England, and will be at home after December 1, at 362 West Church street, Elmira.

SMITH-WEBSTER.

Announcement has been received of the marriage in Buffalo on October 9th of Edmund Sewall Smith, '99, and Miss Emily Webster Day. Mr. Smith was assistant in the chemistry department of the University during the year 1899-1900, and was manager of the varsity baseball team in 1899. Mr. and Mrs. Smith will be at home after November 12 at Niagara Falls.

CURTIS-GOODRICH.

The marriage of Henry P. Curtis, Cornell, '96, and Miss Edith Goodrich Stickney was solemnized at Buffalo Wednesday evening, September 24. Mr. Curtis was a well known athlete and student leader during his term in college. Frederick B. Matthews, a well known Cornell crew man, was one of the ushers.

DAVENPORT-TABER.

K. W. Davenport, '90, of the college of Civil Engineering married, on October 17, in Holyoke, Mass., Miss Pearl Taber, a graduate of Holyoke college. A. O. Berry, '01, who was a cross country runner during his college course, was one of the ushers.

FINEREN-LUND.

W. W. Fineren, '02, recently married, in the city of Oswego, Miss Lund of that place. Mr. Fineren has a desirable position in Oswego.

NEW FRATERNITY HOUSE.

Sigma Alpha Epsilon Move Into New Home Near Campus.

The Sigma Alpha Epsilon fraternity is now comfortably settled in their new residence—Hill Crest, the house overlooking Stewart avenue, which was formerly owned by Mrs. Adaline Prentiss. The house is pleasantly located at the extreme end of the line of chapter houses in the new fraternity district now building up. The property runs down on two sides of Stewart avenue, and adjoins the Alpha Delta Phi grounds. It is at almost the highest elevation near the Campus, overlooking Fall creek gorge, and commanding an excellent view up and down the lake valley and over the surrounding country.

The fraternity moved out of its former quarters on Seneca street last summer, and came into possession of the new house in September just before registration. Since then various alterations have been made in the interior of the building in fitting up an adequate cuisine and dining room. A new system of heating will shortly be installed, steam heat being substituted for hot air.

The entrance to the grounds is by a winding drive from Stewart avenue, passing under the porte cochere in front of the house. While built for a private residence the building is very well arranged to accommodate a fraternity. On the ground floor is a drawing room and a music room on the north side, and also a library and two large studies. There are three studies on the second floor and two baths, besides an inclosed porch on the northwest corner overlooking the lake. There are other balconies on the south and west sides of this floor. In the third story there are two studies and the sleeping rooms arranged in a dormitory system.

The house is fitted throughout with gas and electricity, and is handsomely finished and furnished in dark oak. It will at present accommodate nineteen men.

The full text of Professor J. W. Jenks' report to the government is being issued this week by the war department at Washington. The official title is: "A report on the industrial questions in the English and Dutch colonies of the Orient." As stated in a recent number of the *News* this work is the result of an extended inquiry which Professor Jenks was commissioned to make for the United States government in his trip around the world.

Arts Course Stiffened.

The University Faculty has recently made a slight change in the requirements for work in the academic department which, although hardly noticed by the industrious student, has spread dismay among the ranks of those who are looking for "cinches." It means that hereafter leisure will not be the main occupation of a certain class of so-called students, but that in the future they will be compelled to make work their pastime.

Hereafter students in the Arts department will be required to pass up 12 hours of work, each term, instead of 10 hours as heretofore. The committee on doubtful cases has asked that more students be reported to them to have their record examined.

As a result those who have not passed up twelve hours of work, and have failed in more than two courses of study will be reported to the committee. The committee will then make a searching examination of each case, and if the circumstances warrant it, the student will be suspended or dismissed from the University.

At a recent competition for the Masque the following men were chosen to membership:

L. Bompelly, Jr.; R. F. Mundy, '03; W. F. Woodward, '03; T. J. VanAlstyne, '03; T. K. Webster, Jr., '03; D. E. Burr, '03; R. H. Bourne, '04; A. V. Coxe, '05; J. F. Brauner, '05; A. McDonald, '05; S. H. Ehrich, '05; R. E. Hoskot, '05; S. S. Oberrender, '06; W. H. Forbes, '06; R. H. Coit, '06, and W. J. Wise, '06.

In the November issue of the "Bulletin of the American Mathematical Society" there is an article by Professor G. A. Miller of Leland Stanford University on "Recent Progress in the Theory of Groups of Finite Order." Professor Miller was formerly an instructor at Cornell. In the October number of the *Transactions of the American Mathematical Society* appears an article on the Group Theory, also from the pen of Professor Miller.

Professor Horatio S. White is already identifying himself with the athletic interests of Harvard. He was recently elected a member of the athletic advisory committee. The chairman of the committee is Professor Hollis, and its makeup is said to indicate that a conference between Yale and Harvard will soon be held upon the athletic agreement.

College Living and Athletics.

(President Harper of University of Chicago in Educational Review.)

A recent discussion in the *Century* magazine, on the growth of luxury in student life, seems to have shown that, in so far as there has been a growth in this particular, it has not exceeded the similar growth in ordinary American life.

Student life in our colleges and university differs very slightly from the life of young men and women in any sphere. Nowhere is life more democratic. It is impossible in student life that the influence of wealth should be felt. In most institutions the man who earns his livelihood by waiting on table occupies as high a position in the estimation of his fellows, if he is himself worthy of it, as does the man whose father is worth millions.

The passing year has furnished no evidence that our higher institutions are moving further away from the people. The fact that entering classes have been larger than ever indicates a confidence on the part of the American public in the purposes of the college, and a faith in its ability to work out these purposes.

The much-discussed subject of college athletics has received no important contributions during the year. Three things may perhaps be noted: first, the more stringent rules adopted by the Western colleges for the regulation of intercollegiate athletic work, and the general opinion that Western college athletics are now practically free from professionalism; second, the policy of many institutions to organize games between different divisions of the university work; third, a growing feeling that the charging of large fees for admission to games savors too much of professionalism.

It may be feared that within a comparatively short time the rivalry between closely located institutions, East and West, has developed some antagonism. In not a few institutions there seems to exist a strong spirit of personal hostility toward other institutions with which competition in athletics is undertaken. Some of this same spirit has been manifested by home teams toward visiting teams, as well as by visiting teams toward the teams on whose grounds the games have been played.

The Hon. David B. Hill gave a campaign speech last Saturday night in the Lyceum. He was tendered a reception at the Clinton house by enthusiastic students. Professor Lee of the department of oratory presided at the mass meeting in the evening.

Weddings.

SAMPLE-HATHAWAY.

The marriage of Miss Ada M. Hathaway and Morris De Frees Sample, '94, was solemnized on September 20, at Clinton, N. Y.

WILCOX-BEECHER.

The marriage of Merritt S. Wilcox, '92, and Miss Janet S. Beecher was solemnized at Sandusky, O., on October 1.

HASKELL-BAYLIS.

The marriage of Miss Aleda Cunningham Baylis to Reuben Locke Haskell, both of Brooklyn, was solemnized at the church of the Incarnation at high noon October 8. The bride's sister, Miss Anna White Baylis, acted as maid of honor and her brother, Edward Seymour Baylis, of Chicago, gave the bride away. The best man was John J. Kuhn, '98, of Brooklyn, and the ushers were Frazer Brown, '98, Harrison C. Glore, Albert V. T. Day, and Edwin Webb. The groom is a graduate of Cornell, class of '98, a veteran of the Spanish war, as a member of the Thirtieth regiment. The bridal couple will make their home at 791 Sterling place.

Andrew Carnegie, trustee of Cornell, has been made Lord Rector of St. Andrew's university in Scotland. His inaugural address, entitled "America vs. Europe," will be printed in the November number of the *World's Work*.

Former President Andrew D. White will give a series of lectures during the coming year to the students of the college of commerce and administration of the University of Chicago on "Our Diplomatic Service."

The Tennis club, by increasing its membership, expects to be able to construct two new courts. These will in all probability be located on the slope west of the library.
