Announcement of the New York State Veterinary College for 1935-36

Ithaca, New York
Published by the University
February 15, 1935

THE UNIVERSITY CALENDAR FOR 1935-36

1935

FIRST TERM

Sept. 16, <i>Monday</i> ,	Entrance examinations begin.	
Sept. 23, <i>Monday</i> ,	} Registration and assignment of new students.	
Sept. 24, <i>Tuesday</i> ,		
Sept. 24, <i>Tuesday</i> ,	} Registration and assignment of old students.	
Sept. 25, <i>Wednesday</i> ,		
Sept. 26, <i>Thursday</i> ,	Instruction begins at 8 A. M.	
Oct. 18, <i>Friday</i> ,	Last day for payment of tuition for the first term.	
Nov. 27, <i>Wednesday</i> ,	Instruction ends at 6 P.M.	} Thanksgiving Recess
Dec. 2, <i>Monday</i> ,	Instruction resumed at 8 A.M.	
Dec. 21, <i>Saturday</i> ,	Instruction ends at 1 P.M.	} Christmas Recess

1936

Jan. 6, <i>Monday</i> ,	Instruction resumed at 8 A.M.)	
Jan. 11, <i>Saturday</i> ,	Founder's Day.	
Jan. 25, <i>Saturday</i> ,	Instruction ends.	
Jan. 27, <i>Monday</i> ,	Term examinations begin.	
Feb. 5, <i>Wednesday</i> ,	Term ends.	
Feb. 6, <i>Thursday</i> ,	A holiday.	

SECOND TERM

Feb. 7, <i>Friday</i> ,	Registration of all students.	
Feb. 10, <i>Monday</i> ,	Instruction begins at 8 A.M.	
Mar. 2, <i>Monday</i> ,	Last day for payment of tuition for the second term.	
Mar. 28, <i>Saturday</i> ,	Instruction ends at 1 P.M.	} Spring Recess
April 6, <i>Monday</i> ,	Instruction resumed, 8 A.M.	
May —, <i>Saturday</i> ,	Spring Day: a holiday.	
June 1, <i>Monday</i> ,	Term examinations begin.	
June 9, <i>Tuesday</i> ,	End of term examinations.	
June 15, <i>Monday</i> ,	COMMENCEMENT.	

NEW YORK STATE VETERINARY COLLEGE

FACULTY

LIVINGSTON FARRAND, A.B., M.D., L.H.D., LL.D., President of the University.
ALBERT RUSSELL MANN, A.M., D.Sc., D.Agr., LL.D., Provost of the University.
SIMON HENRY GAGE, B.S., Professor of Histology, Emeritus.
WALTER LONG WILLIAMS, Professor of Obstetrics and Research and Professor in the Diseases of Breeding Cattle, Emeritus.
GRANT SHERMAN HOPKINS, B.S., D.Sc., D.V.M., Professor of Veterinary Anatomy, Emeritus.
WILLIAM ARTHUR HAGAN, D.V.M., M.S., Professor of Bacteriology and Dean of the College.
DENNIE HAMMOND UDALL, B.S.A., D.V.M., Professor of Veterinary Medicine and Director of the Ambulatory Clinic.
HOWARD JAY MILKS, D.V.M., Professor of Therapeutics and Director of the Small Animal Clinic.
JAMES NATHAN FROST, D.V.M., Professor of Veterinary Surgery and Director of the Surgical Clinic.
RAYMOND RUSSELL BIRCH, B.S.A., D.V.M., Ph.D., Professor and Superintendent of the Veterinary Experiment Station.
HENRY HUGH DUKES, B.S., D.V.M., M.S., Professor of Veterinary Physiology.
EARL SUNDERVILLE, D.V.M., Professor of Veterinary Anatomy and Secretary of the Faculty.
CHARLES ERNEST HAYDEN, A.B., D.V.M., Professor of Veterinary Physiology.
HENRY ASMUS, Assistant Professor of Farriery.
HERBERT LESTER GILMAN, D.V.M., M.S., Ph.D., Assistant Professor of Research.
HADLEY CARRUTHERS STEPHENSON, B.S., D.V.M., Assistant Professor of Materia Medica and Small Animal Diseases.
MYRON GUSTIN FINCHER, D.V.M., M.S., Assistant Professor of Medicine and Obstetrics.
JOHN MARTIN HENDRICKSON, D.V.M., M.S., Assistant Professor of Poultry Diseases.
EARL LOUIS BRUNETT, D.V.M., M.S., Assistant Professor of Poultry Diseases.
PETER OLAFSON, D.V.M., M.S., Assistant Professor of Pathology.
ALEXANDER ZEISSIG, B.S.A., D.V.M., M.S., Ph.D., Assistant Professor of Bacteriology.
DONALD WYCKOFF BAKER, B.S.A., D.V.M., Ph.D., Assistant Professor of Parasitology.
KENNETH FRANKLIN HILBERT, D.V.M., Assistant Professor of Poultry Investigation. (Stationed at Farmingdale, L. I.)
WALTER JOSEPH GIBBONS, D.V.M., M.S., Instructor in Medicine and Obstetrics.
JESSE SAMPSON, B.S., D.V.M., Ph.D., Instructor in Veterinary Physiology.
SETH DARWIN JOHNSON, D.V.M., Instructor in Research.
CARLTON CASE ELLIS, M.S., D.V.M., Instructor in Poultry Investigation.
BURNARD JAMES ERRINGTON, D.V.M., Instructor in Surgery.
HUGH STEWART CAMERON, D.V.M., M.S., Instructor in Research.
MALCOLM EUGENE MILLER, D.V.M., Instructor in Anatomy.
PHILIP PINCUS LEVINE, M.S., D.V.M., Instructor in Poultry Diseases.
WILLIS FRANCIS WITTER, D.V.M., Instructor in Poultry Diseases.
RUTH EVELYN GORDON, A.B., Ph.D., Instructor in Research.
DORSEY BRUNER, B.S., Ph.D., Assistant in Investigation of Diseases.
DORWIN HERMAN PERELLA, D.V.M., Assistant in Materia Medica.
LEONARD JOYCE GOSS, D.V.M., Assistant in Poultry Diseases.
ALBERT KENNETH TICE, Assistant in Diagnosis.
HENDRIK VERSLUIS, Student Assistant in Bacteriology.
HENRY KRIESEL, Student Assistant in Physiology.
CHARLES DEXTER EBERTZ, Student Assistant in Anatomy.

FLOYD KARKER RICHTMYER, Ph.D., Dean of the Graduate School.
FRANK BARRON MORRISON, B.S., M.S. in Agr., Professor of Animal Husbandry.

ELMER SETH SAVAGE, Ph.D., Professor of Animal Husbandry.
 MERRITT WESLEY HARPER, B.S., M.S., Professor of Animal Husbandry.
 HAROLD ELLIS ROSS, B.S.A., M.S. in Agr., Professor of Dairy Industry.
 EDWARD SEWELL GUTHRIE, Ph.D., Professor of Dairy Industry.
 BENJAMIN FREEMAN KINGSBURY, Ph.D., M.D., Professor of Histology and Embryology.
 BARBOUR L. HERRINGTON, Ph.D., Assistant Professor of Dairy Industry.
 BENJAMIN PERCY YOUNG, Ph.D., Assistant Professor of Zoology.
 ROBERT BYRON HINMAN, Ph.D., Assistant Professor of Animal Husbandry.
 EDWIN SHEPHERD HARRISON, B.S., Assistant Professor of Animal Husbandry.
 JOHN PETER WILLMAN, Ph.D., Instructor in Animal Husbandry.
 ANDREW JACKSON RAMSEY, A.B., Instructor in Histology and Embryology.
 RALPH A. CONNOR, Ph.D., Instructor in Chemistry.

THE STATE COLLEGE COUNCIL

The President, *Chairman*; The Provost, J. DU PRATT WHITE, STANTON GRIFFIS, MYRON C. TAYLOR, PETER G. TEN EYCK, GEORGE R. VAN NAMEE, HORACE WHITE, JAMES M. SHERMAN, FRANK P. GRAVES, HOWARD E. BABCOCK, ARCHIE C. BURNETT, MARY M. CRAWFORD, CARL E. LADD, WILLIAM A. HAGAN, ULYSSES P. HEDRICK, RAYMOND R. BIRCH, KARL M. WIEGAND, and FLORA ROSE.

LECTURERS 1934-35

Prof. M. C. Bond, *Extension Professor of Marketing, Ithaca*; Dr. W. W. Dimock, *Department of Animal Pathology, University of Kentucky, Lexington, Kentucky*; Dr. R. W. Gannett, *Practitioner, Brooklyn, New York*; Dr. F. D. Holford, *Chief Veterinarian, Borden's Farm Products Company, New York City*; Prof. F. B. Hutt, *Department of Poultry Husbandry and Animal Genetics, Ithaca*; Dr. H. B. Leonard, *Bureau of Animal Industry, Albany, New York*; Dr. R. S. MacKellar, *President, American Veterinary Medical Association, New York City*; Dr. L. A. Maynard, *Department of Animal Nutrition, Ithaca*; Dr. C. R. Stockard, *Cornell Medical School, New York City*; Dr. W. L. Williams, *Emeritus Professor, Ithaca*; Prof. L. P. Wilson, *Law School, Ithaca*.

DIRECTORY OF THE COLLEGE

Unless otherwise indicated, the office is in the main building of the Veterinary College

President of the University, Morrill Hall.
 Dean of the Veterinary College, first floor, south wing.
 Asmus, Henry, Assistant Professor, Surgical Building.
 Baker, D. W., Assistant Professor, Experiment Station.
 Barber, C. W., Instructor, third floor southeast.
 Birch, R. R., Professor, Room 1, first floor southwest.
 Bruner, Dorsey, Assistant, third floor northwest.
 Brunett, E. L., Assistant Professor, third floor northeast.
 Cameron, H. C., Instructor, second floor south.
 Dukes, H. H., Professor, Room 4, first floor northeast.
 Ellis, C. C., Instructor, third floor northeast.
 Errington, B. J., Instructor, Room 2, first floor southeast.
 Evans, W. M., Instructor, first floor south wing.
 Fincher, M. G., Assistant Professor, Medical Building.
 Frost, J. N., Professor, Room 2, first floor southeast.
 Gibbons, W. J., Instructor, Medical Building.
 Gilman, H. L., Assistant Professor, second floor south.
 Gordon, R. E., Instructor, third floor northeast.
 Goss, L. J., Assistant, third floor west.
 Hagan, W. A., Professor, third floor west.
 Hayden, C. E., Professor, Room 4, first floor northeast.
 Hopkins, G. S., Professor Emeritus, Room 12, second floor west.
 Johnson, S. D., Instructor, Medical Building.
 Levine, P. P., Instructor, third floor west.

Milks, H. J., Professor, Small Animal Building.
 Miller, M. E., Instructor, first floor, north wing.
 Olafson, P., Assistant Professor, third floor southeast.
 Perella, D. H., Assistant, Small Animal Building.
 Sampson, J., Instructor, second floor northwest.
 Stephenson, H. C., Assistant Professor, Small Animal Building.
 Sunderville, E., Professor, Room 3, first floor northwest.
 Udall, D. H., Professor, Medical Building.
 Tice, A. K., Assistant, first floor, south wing.
 Zeissig, A., Assistant Professor, third floor southwest.

Librarian, Edith C. Williams, Room 9, second floor southeast.
 Assistant Librarian, Mrs. S. H. Burnett, Room 9, second floor southeast.

Financial Secretary, H. H. Haight, first floor, south wing.
 Stenographer and secretary to the Dean, Mable Howell, first floor, south wing.
 Stenographer and Clerk, Agnes Sullivan, first floor southwest.
 Stenographer and Clerk, Arlene P. Mowry, Clinical Buildings.
 Assistant Clerk, Elsie B. Houseweller, first floor, south wing.
 Technician, Carolyn D. Bush, Room 18, third floor west.

Machinist, Archie Wilson, basement.
 Groom, W. C. Selover, Cottage east of main building.
 Groom, George Willis, Medical Building.
 Groom, George F. Schneider, Small Animal Building.
 Assistant Groom, Cyrus Whittier, Surgical Building.
 Teamster, Henry Fatula, Medical Building.
 Attendant, Thad Brown, south wing.
 " Thomas Merrill, north wing.
 " I. H. Everts, third floor.
 " Thomas Nuttall, Surgical Building.
 " Ira Fowler, Experiment Station.
 " A. B. Newman, Experiment Station.
 " Ray Newman, Experiment Station.
 " A. Ross, Experiment Station.
 " D. J. Nedrow, Experiment Station.
 " William Fowler, Experiment Station.
 Laboratory helper, Mrs. Mary Drake, third floor west.

THE FOUNDATION OF THE COLLEGE

The New York State Veterinary College was established by act of the State Legislature in 1894: "There is hereby established a State Veterinary College at Cornell University," Laws of New York, 1894, p. 307. By action of the Board of Trustees of Cornell University, June 10, 1894, the location of the College upon the University campus was authorized. It was further enacted that while the University does not undertake any financial responsibility for the buildings, equipment, or maintenance of the College, it does consent to furnish instruction upon such subjects as are or shall be in its curriculum, upon such terms as may be deemed equitable.

By further acts of the Legislature provision was made for the buildings, equipment, and maintenance of the College and finally, in

1897, by "An act to provide for the administration of the State Veterinary College, established by Chapter 153 of the laws of 1894," the Trustees of Cornell University were intrusted with its administration.

OBJECTS OF THE INSTITUTION

As stated in the act to provide for the administration of the State Veterinary College: "The State Veterinary College, established by Chapter 153 of the laws of 1894, shall be known as the New York State Veterinary College. The object of said Veterinary College shall be: To conduct investigations as to the nature, prevention, and cure of all diseases of animals, including such as are communicable to man and such as cause epizootics among live stock; to investigate the economic questions which will contribute to the more profitable breeding, rearing, and utilization of animals; to produce reliable standard preparations of toxins, antitoxins, and other productions to be used in diagnosis, prevention, and cure of diseases, and in the conducting of sanitary work by approved modern methods; and to give instruction in the normal structure and function of the animal body, in the pathology, prevention, and treatment of animal diseases, and in all matters pertaining to sanitary science as applied to live stock and correlatively to the human family."

The New York State Veterinary College was therefore founded to raise the standards of veterinary investigation and instruction to the level of the most recent advances in biology and medicine. According to the 1934 census of the United States the number of farm animals in the State, exclusive of poultry and pet animals, was 2,998,000 of the value of \$36,188,400. This gives some idea of the great financial interest at stake in the matter of live stock. The latest census report for 1935 gives the value of the live stock of the United States on farms exclusive of poultry and pet animals at \$2,871,431,560. The value of poultry in New York State is \$13,409,000. Another consideration is that the normal permanent fertilization of the soil is dependent upon the live stock kept, and that where there is a deficiency of animals, the productiveness of the land is steadily exhausted; therefore, the health and improvement of animals and the fostering of animal industry lie at the very foundation of our national wealth. Another and no less potent argument for the higher standard of veterinary education is its influence on the health of the human race. With a long list of communicable diseases which are common to man and beast, it is to the last degree important that measures for the extinction of such contagion in our live stock should receive the best attention of the most highly trained experts.

To justify the liberality of the State in creating this seat of learning, it is the aim of the College to train thoroughly a class of veterinarians for dealing with all diseases and defects that depreciate the value of our live stock, and with the causes that give rise to them. It further aims, as far as it has the means and opportunity, to maintain a center of investigation looking toward discoveries in the nature

of diseases, in therapeutics, and in the immunization of animals from contagion; and toward the production of biological products to be employed in diagnosis, treatment, and immunization. So much has been discovered recently in these directions and present knowledge points so unmistakably to coming discoveries, that to neglect this field at the present time would be very unfortunate. Apart from discovery, the mere production of reliable diagnostic and therapeutic biological products is of great economic importance. Furthermore, it is the purpose of the College to be of as much assistance as possible to the practitioners of veterinary medicine.

SITUATION

The New York State Veterinary College is situated at Ithaca, a city of 21,000 population, at the head of Cayuga Lake, 263 miles from New York City, on the Lehigh Valley and Lackawanna Railroads. The college buildings are near the center of the campus of Cornell University. The main line of the Ithaca street railway system crosses the campus on East Avenue, almost immediately in front of the college.

BUILDINGS

The College is housed in five principal buildings, all of buff, pressed brick, forming an incomplete quadrangle. The main building (James Law Hall) is a three-story building facing East Avenue across a small park. On the first floor are the museum, the offices of the Secretary of the College, and the offices of several professors. On the second floor, the laboratories of the Department of Physiology and of the Experiment Station are found. The third floor is occupied by the Department of Pathology and Bacteriology.

Connected with the main building and forming its north wing is a two-story structure which houses the anatomical laboratories and classrooms. A similar wing connected with the south end contains, on the first floor, the business office, the faculty room, the office of the Dean, the diagnostic laboratories, and an auditorium seating about three hundred. The second floor houses the college library.

The Small Animal, the Medical, and the Surgical Buildings form a group, commonly called the Clinical Buildings. They are three stories in height and face Garden Avenue overlooking Alumni Field.

The Small Animal Building contains a large, modern operating room, drug rooms, X-ray room, and kennels and cages for patients. There are a number of wards for infectious diseases and skin diseases. The offices, laboratories, and examining rooms of the clinic are found on the second floor, and the laboratories for materia medica and pharmacy on the third.

The Medical Building contains, on the ground floor, a clinic hall, a drug room, a physical examination room for large animals, wards for patients, and a garage for the cars of the Ambulatory Clinic. The second floor contains wards for patients, a lecture room, a clinical diagnostic and research laboratory and offices. The third floor con-

tains an apartment for the groom and rooms for the internes. A loft provides storage space for hay and grain. A freight elevator provides means of handling feed and large animal patients. The building is steam-heated throughout, and provided with an adequate ventilating system.

The Surgical Building contains, on the ground floor, two isolation wards for horses and cattle and a demonstration hall. The second floor contains a completely equipped shop for the teaching of horse-shoeing. The third floor is used for classrooms and a museum.

The Surgical Ward is situated behind the Surgical Building. It is two stories high and is devoted almost entirely to stalls for large animal, surgical patients. At the south end of this building is the Operating Pavilion, a large operating room equipped with stocks, an hydraulically-controlled operating table and the necessary sterilizing machines and surgical instruments for aseptic surgery.

Within the quadrangle formed by the principal buildings are four smaller buildings, viz.: the groom's cottage, the autopsy building, the building for small experimental animals, and a small sheep stable.

The Experiment Station Farm is situated about two and one-half miles east of the Campus and consists of one hundred thirty-three acres. On this farm there are two well-equipped, steam-heated laboratory buildings, one for poultry disease investigation, the other for research in parasitology. There is also a building for the breeding of small, experimental animals, a work shop, six barns for cattle, two for swine, one for horses, and numerous small isolation buildings. Several residences for staff members complete the list of buildings. All buildings are supplied with running water, and the principal ones are lighted electrically.

LIBRARIES AND MUSEUMS

The Veterinary College not only has a good special library of its own, the Roswell P. Flower Library, but it also enjoys the free use of the University Library of 750,000 volumes and over 2,500 current periodicals and transactions of societies. Its own museum, moreover, is supplemented by other University museums, among which, of particular value to the college, are those of vertebrate and invertebrate zoology (including entomology), agriculture, botany, and geology.

THE ROSWELL P. FLOWER LIBRARY

The college is fortunate in having the Flower Veterinary Library, containing over 10,000 volumes, second to no other special veterinary library in the country. This library is made up of two collections, a small one purchased with state funds, and the main collection purchased with the proceeds of a fund begun by Roswell P. Flower in 1897 with a gift of \$5,000 to the University for the use of the Veterinary college. Four thousand dollars of this gift was used immediately for the purchase of books, leaving \$1,000 as a source of income. This sum was increased, first in 1900 by \$10,000 given by Mrs.

Flower, and in 1929 by about \$8,000, added largely through the efforts of Dr. Frank H. Miller, for many years trustee of the University.

Besides texts in the fields covered by the curriculum and related subjects, the library carries over a hundred American and foreign periodicals and receives pertinent publications from all other important colleges and experiment stations. The University also deposits a number of special periodicals and handbooks in this library which increases its serviceability.

The library is in the south wing of James Law Hall with stack room and spacious reading room open from 9-5 and 7:30-10. In the main reading room are the current numbers of periodicals—veterinary and medical—the catalogue, indices, reference books and texts bearing especially on class work. In an adjoining room are the stacks which are generally open to the students.

Books may be drawn for home use as from the University and Agricultural libraries. These and the Chemistry library are also accessible to Veterinary students and extend their opportunities in the fields of general and special literature. The library also borrows largely from the New York Academy of Medicine and the Army Medical Library in Washington thus opening to research workers the main collections of medical literature in the country.

ADMISSION

No student may be admitted to the Veterinary College until he has secured from the State Education Department a Veterinary Student Qualifying Certificate. In order to obtain this certificate the student must have satisfactorily completed not only a college entrance course in an approved high school but also one year of work (30 semester hours) including six hours each of inorganic chemistry and English in a registered college of arts and sciences, or its equivalent, as determined by the Commissioner of Education. Correspondence regarding the requirements for the qualifying certificate should be addressed to the Assistant in Charge of Qualifying Certificates, State Education Department, Albany, New York. Certificates are not sent from Albany to the applicants but are filed with the College when the University makes requisition for them.

The applicant should also write as early as possible to the Director of Admissions of Cornell University, Ithaca, New York, requesting the application forms for admission to the Veterinary College. The Director of Admissions will require a transcript of the applicant's college record, hence the candidate should procure two transcripts, one for the Department of Education at Albany, and the other for the University.

The number of students that can be admitted annually is limited. It is likely that the number of applicants who meet the scholastic requirements will exceed the number that can be accepted. A Committee on Admissions of the faculty of the Veterinary College will

select those to be admitted after considering not only the formal preparation but also the available evidence bearing on each applicant's character, seriousness of purpose, and fitness for the work that he proposes to undertake. This committee will require a personal interview, whenever this is feasible.

Priority of application is not necessarily a determining factor in the selection of students to be admitted; nevertheless, the gathering and weighing of the necessary evidence require time, and, as the Committee will begin filling the eligible list early in the Spring, it is advantageous to the candidate to file his application early. Students who have not completed the work required for the Veterinary Student Qualifying Certificate may apply and the committee will act on the application provisionally. August 1 is the latest date for filing applications.

RULES GOVERNING ADMISSION

Besides satisfying the entrance requirements, candidates for admission must comply with the following rules:

1. Every candidate for admission must deposit twenty-five dollars with the University. Candidates are warned not to send cash through the mails. A check, draft, or order should be payable to Cornell University and should be sent to the Office of Admissions, Cornell University, not later than August 1.

If the candidate matriculates, the deposit will be credited to his account, \$10 for the matriculation fee and \$15 as a guaranty fund, which every undergraduate student is required to maintain and which is to be refunded upon his graduation or permanent withdrawal, less any indebtedness to the University.

If admission is denied a candidate, the deposit is refunded in full at any time.

A candidate may withdraw the application for admission, but a charge of \$10 is regularly made for accrued expenses unless the application is withdrawn and a refund of the deposit in full is claimed before August 1. If an application is not withdrawn until after the due date of the college concerned, but is withdrawn before August 31, the \$10 charged for accrued expenses is deducted and \$15 of the deposit is refunded. No refund is made to an applicant who withdraws the application after August 31.

(The winner of a New York State Tuition Scholarship in Cornell University may apply for admission to the University and make the required deposit of \$25 immediately after receiving formal notice of his appointment from the Commissioner of Education at Albany.)

2. Every candidate for matriculation must submit to the Director of Admissions a satisfactory certificate of vaccination against small-pox, not later than August 1 if he is to be admitted in September, or not later than January 1 if he is to be admitted in February. It will be accepted as satisfactory only if it certifies that within the last five years a successful vaccination has been performed or three unsuccessful attempts at vaccination have been made.

3. Every candidate for admission must file with his application at the Office of Admissions either a certificate of good moral character or, if he has attended some other college or university without graduating from it, a certificate of honorable dismissal from it.

ADMISSION TO ADVANCED STANDING

Applicants for admission to advanced standing as members of the second, third, or fourth year class must present the necessary educational qualifications for admission to the first year class, and must pass satisfactory examinations in all the work for which they desire advanced credit, or offer satisfactory certificates of the completion of this work in other schools whose entrance requirements and courses of study are equivalent to those of this college. No person will be admitted to any advanced class except at the beginning of the college year in September.

Graduates of Veterinary colleges whose requirements for graduation are not equal to those of the New York State Veterinary College may be admitted upon such terms as are fixed by the State Department of Education in Handbook No. 12. In this connection, attention is called to the legal requirements of academic and professional education for the practice of veterinary medicine in the State of New York. See page 9 and Appendix B.

ADMISSION TO GRADUATE STUDY

Graduates of this college or other colleges may enter the Graduate School of Cornell University and pursue work in the Veterinary College and allied departments of the University. A prospective graduate student should consult the Announcement of the Graduate School and apply to the Dean of the Graduate School.

ADVANCED WORK AND RESEARCH

The Veterinary College, alone or in combination with other departments of the University, offers advanced students excellent opportunities for study and investigation. Its situation gives it abundant and varied material for research, and it has ample facilities for the prosecution of such work. It encourages graduate and advanced students to carry on independent investigations. Courses of study especially adapted to advanced work and research will be found among those listed on pages 18-27.

SEMINARIES

The several departments of the College hold seminars or special conferences for their advanced and graduate students. The seminary hears reports of the results of investigations and the progress of knowledge in its particular field; discusses methods of advanced and independent work such as is expected of those who are preparing theses or prosecuting any special investigation; and hears the reports of the students on the progress of their work. By means of the seminary the student incidentally gains facility in public speaking and fits himself to take a creditable part in the meetings of veterinary or medical societies.

STUDY FOR PRACTITIONERS

The very rapid advance made during recent years in veterinary science and in facilities and methods for teaching it, as well as the advantage to be gained by studying a given subject under more than one teacher, make it highly desirable that busy practitioners should be enabled as far as possible to increase their personal knowledge by

means of study at such times as they can leave their practices. The New York State Veterinary College wishes to supply this want so far as practicable and offers every facility at hand to accomplish this end.

Veterinarians who are legally authorized to practice at their places of residence will be admitted to any class in the college at any time and for such period as they may elect, without entrance examinations. They will be wholly free to elect any studies that are being regularly taught at the time, and will be granted all opportunities and facilities offered to regular students as long as these privileges do not interfere with the instruction of the regular students. No tuition will be required from licensed veterinarians practicing in the State of New York. Those taking laboratory courses will be required to pay fees to cover the cost of the material used. Every practicable facility will be offered for special study along desired lines. A study of pages 18-27 (Departments, Methods, and Facilities) will enable a practitioner to determine in advance precisely what work will be in progress at a given date.

This work is offered to veterinarians entirely for the benefit they may derive from increased knowledge in veterinary science and does not contemplate the granting of a degree, certificate, or other evidence of responsibility on the part of the College.

General inquiries in reference to this work should be addressed to the Dean, whereas questions relating to studies in the various departments may be addressed to the heads of the departments concerned.

COMBINED COURSES

By a judicious selection of courses it is possible for a student to register both in the Veterinary College (D.V.M.) and in the College of Agriculture (B.S.) or in the College of Arts and Sciences (A.B.) and complete the requirements for the two degrees in seven years.

REGISTRATION

Every student is required to register with the Registrar of the University at the beginning of each term. See the Calendar on page 2 for the exact day. After completing that registration, he must register on the same day with the Secretary of the Veterinary College, Dr. Sunderville, at Room 3, on the first floor of the main building of the College. After being admitted to the University no student is allowed to register after the close of the regular registration day except by special permission.

TUITION AND OTHER FEES

Tuition. For students not residents of the State of New York the tuition in the Veterinary College is two hundred dollars a year, payable \$110 at the beginning of the first term and \$90 at the beginning of the second term. Tuition is free to residents of the State of New York. The law governing the administration of the College provides

that "no tuition fee shall be required of a student pursuing the regular veterinary course who for a year or more immediately preceding his admission to said veterinary college shall have been a resident of this State." A limited number of tuition scholarships are available to non-residents; see Scholarships, page 14.

Students are advised to consult the General Information Number for the University's rules regarding the payment of tuition and other fees.

Laboratory Fees. Every person taking laboratory work is required to pay for the materials actually used. For the first year the laboratory fees will approximate \$52.50; for the second year, \$40; for the third year, \$43.50; for the fourth year, \$5. In some departments a rebate is given at the end of the academic year if there has not been much breakage or excessive use of materials.

A *Matriculation Fee* of \$10 and an *Examination Book Fee* of \$1 are required of every student upon entrance into the University; these fees must be paid at the time of registration. A new undergraduate student who has made the required deposit of \$25 with the Treasurer need not make an additional payment of these fees, because the Treasurer will draw on the deposit for them.

A *Health and Infirmary Fee* of \$6 a term is required, at the beginning of each term, of every student. In return for the Infirmary fee, any sick student is, on his physician's certificate, admitted to the Infirmary, and is given without further charge a bed in a ward, board and ordinary nursing, for a period not exceeding two weeks in any one academic year.

A *Willard Straight Hall Membership Fee* of \$5 a term is required, at the beginning of each term, of every student. Its payment entitles the student to a share in the common privileges afforded by the operation of Willard Straight Hall, subject to regulations approved by the Board of Managers of the Hall. A fee of \$5 a term is required of all graduate students except those who are members of the instructing staff, for whom membership is optional. The use of the hall is restricted to those who have paid this fee.

A *Physical Recreation Fee* is required at the beginning of each term of every undergraduate man and woman. It is \$2 a term for men and \$1 a term for women. Its payment entitles the student, either to the use of the Gymnasium and the University Playgrounds and to the use of a locker, with bathing facilities and towels, in the Gymnasium, the New York State Drill Hall, or the Schoellkopf Memorial Building, or else to the use of the women's gymnasium, recreation rooms and playgrounds, and to the use of a locker if that is necessary.

A *Graduation Fee* is required, at least ten days before the degree is to be conferred, of every candidate for a degree. For the first or baccalaureate degree the fee is \$10; for an advanced degree it is \$20. The fee will be returned if the degree is not conferred.

Tuition and other fees become due when the student registers. The University allows twenty days of grace after the last registration day of each term. The last day of grace is generally printed on the registration coupon which the student is required to present at the Treasurer's office. Any student who fails to pay his tuition charges, other fees, and other indebtedness to the University, or who, if entitled to free tuition, fails to claim it at the Treasurer's office and to pay his fees and other indebtedness, within the prescribed period of grace, is thereby dropped from the University unless the Treasurer has granted him an extension of time to complete payment. For the conditions and terms of any such extension, see the General Information Number.

A tuition fee or other fee may be changed by the Trustees at any time without previous notice.

CHARGES FOR MINOR DELINQUENCIES

Every student is held personally responsible for any injury done by him to any of the University's property.

Assessments, charged to the student's account and payable at the Treasurer's office, are levied upon the student in certain circumstances, under the following rules of the University:

A student desiring to be reinstated after being dropped from the University for delinquency in scholarship or in conduct shall first pay a fee of \$25.

A matriculated student desiring to register after the close of registration day shall first pay a fee of \$5. [Students in the Graduate School are excepted.]

A student desiring to file his registration of studies after the date set by his college for filing the same shall first pay a fee of \$2.

A student desiring to take an examination or other test for the removal of a term condition (including the making up of a mark of "absent" or "incomplete") shall first pay a fee of \$2 for each examination or other test.

A student desiring to make an appointment for the required medical examination or conference after twenty days from the last registration day of the term shall first pay a fee of \$2.

For reasons satisfactory to the proper authority any of the above-mentioned assessments (except that levied for examination or other test to remove a condition) may be waived in any individual case if the student's failure to comply with the regulation was due to ill health or to other reason beyond his control. Application for such a waiver should be made to the Dean of the college enrolling the student, or in the case of the medical examination, to the chairman of the Faculty Committee on Health.

SCHOLARSHIPS AND PRIZES

The following scholarships and prizes are offered to students in the Veterinary College as incentives to earnest study:

University Undergraduate Scholarships. At a special examination held at the beginning of the fall term in each year, eighteen scholarships, continuing for two years and of an annual value of \$200 each, are open to competition by all members of the incoming freshman class of the University. For a statement of the provisions regulating the award and tenure of these scholarships, see the General Information Number.

University Scholarship for Graduates. One University Graduate Scholarship of the value of \$200 is offered annually to a graduate in veterinary medicine. This scholarship is open to graduates of all veterinary schools having requirements for graduation equivalent to those of this college. Applications may be made by graduates or seniors in good standing and should be filed with the Dean of the Graduate School on or before March 15 of the academic year preceding the one for which application is made.

Tuition Scholarships. The trustees have authorized a limited number of scholarships, each of an annual value of \$200, the amount of the annual tuition, to be awarded each year by the Veterinary College. The scholarships are awarded to undergraduate students who are of sufficiently high promise or standing in the judgment of the faculty, who are not residents of New York State, and who have had, before entering, two or more years of college or university training. Each student holding a scholarship must maintain a standing satisfactory to the Veterinary Faculty.

The Horace K. White Prizes, established by Horace K. White of Syracuse, are awarded annually to meritorious students in the graduating class of the College. They consist of a prize of \$100 to the first in merit and a prize of \$25 to the second in merit.

The Jane Miller Prize of \$50 in veterinary physiology is awarded to the student or students doing the best work in this subject. This prize is usually divided into a first prize of \$30 and a second prize of \$20 and awarded at the end of the junior year.

The James Gordon Bennett Prize of \$50 is offered to members of the graduating class. The award is based upon work in the clinics giving evidence of the ability of the recipient to handle diseased animals humanely. Special emphasis is laid upon the ability of the student to apply effectively local and general anaesthesia.

The Anne Besse Prize of \$50 in the principles and practice of veterinary medicine. This award is based upon work in the clinics giving evidence of ability in clinical diagnosis.

Charles Gross Bondy Prizes. Two annual prizes to be awarded to two senior students who rank highest in proficiency in the courses of practical medicine and surgery of small animals. The first prize is \$25 and the second prize is \$15.

The Merry Prize in Anatomy. This prize is bestowed by Albert E. Merry as a memorial to his father, Addison D. Merry. This prize is usually divided into a first prize of \$30 and a second prize of \$20. It is awarded at the end of the sophomore year to the student or students doing the best work in this subject.

EXPENSES

Living expenses in Ithaca vary from \$8 to \$12 a week. Books, instruments, stationery, etc., cost about \$40 a year.

The laboratory fees are first year, \$52.50; second year, \$40; third year, \$43.50; fourth year, \$5.

OPPORTUNITIES FOR SELF-HELP

In addition to occasional and irregular work at hourly compensation in the various departments, the following positions as student assistants are open to capable students:

Anatomy.....	\$400 a year
Bacteriology and Pathology.....	\$400 a year
Physiology.....	\$400 a year

THE RULE GOVERNING STUDENT CONDUCT

The University's rule governing the conduct of students is this: "A student is expected to show both within and without the University unfailing respect for order, morality, personal honor, and the rights of others." The authority to administer this rule and to impose penalties for its violation is vested in the University Committee on Student Affairs. The rule is construed as applicable at all times, in all places, to all students of the University. A student may at any time be removed from the University if, in the opinion of the Committee on Student Affairs, his presence is not conducive to the University's best interests.

PREScribed FOUR-YEAR COURSE

LEADING TO THE DEGREE OF DOCTOR OF VETERINARY MEDICINE (D.V.M.)

REQUIREMENTS FOR GRADUATION

In order to receive the degree of Doctor of Veterinary Medicine (D.V.M.), candidates must satisfy all the entrance requirements (see page 9), must successfully pursue the courses named in the following Schedule of Studies, must have paid all due fees, and must have spent at least one year in residence.

The work of the college is arranged to begin late in September and to close in June. The academic year is divided into two terms. See the Calendar on page 2.

Students remaining in the Veterinary College must pass twelve hours each term, four of which, exclusive of clinics, must have a grade of seventy or higher.

THE SCHEDULE OF STUDIES

In the following schedule, the figure in the first column after the name of the course is the number of the course and refers to a description on one of the following pages, 18-27; the figures in the second and third columns indicate the hours of credit given for the successful pursuit of the several courses in either term.

FIRST YEAR

<i>Subject</i>	<i>Course</i>	<i>Credit</i>
Anatomy.....	1	3 —
“.....	2	1 —
“.....	3	3 —
“.....	4	— 6
Histology.....	6	4 3

DEPARTMENTS; FACILITIES; METHODS; COURSES OF INSTRUCTION

In the following pages, the names of the departments, with summaries of their particular equipment, facilities, methods, and courses of instruction, are given approximately in the order in which the studies are pursued in the veterinary curriculum.

CHEMISTRY

Chemistry 365. Elementary Organic Chemistry. Second term. Lectures and laboratory. Three hours credit. Prerequisite, Chemistry 101 and 105. Dr. CONNOR and assistants. Lectures, M W 11, *Baker* 207. Conferences and discussion, F 11. Laboratory, M 1:40-4, *Baker* 250.

MICROSCOPY; HISTOLOGY; EMBRYOLOGY

Professor, B. F. KINGSBURY; Instructor, A. J. RAMSAY.

This department offers instruction in the theory and use of the microscope and its accessories; in vertebrate histology, in vertebrate embryology, and in histologic and embryologic technique; and opportunity for research in all of these subjects. For all the courses the department is well supplied with the best modern apparatus.

The rooms for the use of this department are in the basement and second floors of Stimson Hall. They consist of a large general laboratory, a research laboratory, preparation room, and laboratories for the instructing staff, where also special demonstrations of difficult subjects are given to small groups of students.

In the courses outlined below, the student gains a practical knowledge of the normal structure of the tissues and organs of the animal body by the direct study of them in the laboratory. From time to time, the ability of the student to recognize the normal structure is tested by the identification of unlabeled preparations. The laboratory work is supplemented by recitations, reviews, and lectures covering the general aspects of the subject.

6. **Microscopy and Histology.** First and second terms. Credit seven hours. Required of first year students. The exercises each week are as follows: First term: Lectures, M F 8. Laboratory, M F 1:40-4. Second term: Lectures and laboratory, W F 8-11. Instructor RAMSAY and assistants.

Microscopy. The aim is to give a working knowledge of the theory and use of the microscope and its accessories, methods of mounting microscopical specimens, etc. Laboratory fee, \$6 a term.

Histology. This includes the study of the fine anatomy of the animal body, and also fundamental methods of histologic investigation and demonstration.

9. **Embryology.** Third year, second term. Credit two hours. The exercises each week are as follows: Lectures, S 9. Laboratory, M 1:40-4. Professor KINGSBURY. A study of the development of the domestic animals (chiefly common fowl, pig, sheep, cow, horse), the fetal membranes and placenta, together with a general consideration of sex, inheritance, and the laws of development, maternal impressions, etc.

ANATOMY

Professor, EARL SUNDERVILLE; Instructor, M. E. MILLER; Assistant, C. D. EBERTZ.

The instruction in anatomy is by lectures, recitations, and laboratory work, the last being by far the most important. The objects of the lectures are to present facts of general morphology as related to the horse and other domestic animals; to direct attention, as far as possible, to the correlation of structure and functions of the various organs of the body; and to emphasize the anatomical relations of those parts most subject to surgical operations. The main reliance, however, is placed upon the work done in the laboratory. Thorough, practical knowledge of anatomy can be acquired in no other way, and every student, before taking his final examination, will be required to dissect all parts of the horse or the ox, and such parts of other domestic animals as may prove most expedient.

The courses in anatomy extend over two years. The first year is devoted to the study of bones, joints, muscles, and certain viscera; the second year, to the vascular and nervous systems and to the organs of special senses.

In the study of the osseous, muscular, digestive, and respiratory systems, the skeletons in the laboratory and the Auzoux models afford valuable assistance. In the museum there are accumulating series of specimens which illustrate, in a typical manner, some of the more important anatomical features of the various domestic animals.

1. **Comparative Osteology.** First year, first term. Credit three hours. Lecture, F 11. Laboratory, M 9-12; T 10:30-12:30, 1:40-4; Th 10:30-12:30, 1:40-4; S 9-11:30. Professor SUNDERVILLE, Instructor MILLER, and assistants. Laboratory fee, \$5.

2. **Arthrology.** First term. Credit one hour. This course immediately follows course 1. Professor SUNDERVILLE, Instructor MILLER, and assistants.

3. **Myology and Abdominal Viscera.** First term. Credit three hours. In this course the dissection of muscles is begun. Lectures, laboratory hours, etc., the same as in the preceding courses. Professor SUNDERVILLE, Instructor MILLER, and assistants.

4. **Myology, Thoracic and Abdominal Viscera, Lymphatic System, and Organs of Special Sense.** Second term. Credit six hours. Lectures and written reviews, Th 9. One or more weekly recitations. Laboratory work, W Th F 1:40-4; T 10:30-1, Th 10-12:30. Professor SUNDERVILLE, Instructor MILLER, and assistants. Laboratory fee, \$5.

5. **Blood Vessels and Nerves of the Arm, Leg, and Head.** Second year, first term. Credit five hours. Laboratory work, M W Th F 1:40-4, W 10-12:30. Professor SUNDERVILLE and assistants.

6. **Canine Anatomy.** Second term. Elective. Hours to be arranged. Open to students who have completed Course 5. Topographic anatomy of the dog and regions of the body most subject to surgical operations will be studied. Instructor MILLER. Laboratory fee, \$3.

200. **Clinical and Laboratory Practice.** Throughout the year. For Senior students in Veterinary Medicine only. Credit three hours a term. (This course is given co-operatively by several departments among which students will divide their time.) M W F 2-4:00.

Students will be assigned in small groups to special work in the surgical and small animal clinics, the diagnostic laboratories, and in topographic anatomy, blood and urine chemistry, parasitology, hematology, clinical pathology, bacteriology and serology.

PHYSIOLOGY

Professors, H. H. DUKES, C. E. HAYDEN; Instructor, JESSE SAMPSON; Student Assistant, HENRY KRIESEL.

It is the aim of this department to select from a wide field of important topics those that will be of greatest use to the student in comprehending normal body functions. Without a broad knowledge of normal functions, it is useless to attempt progress in the proper conception of diseased conditions.

Physiology is an intermediary between such subjects as anatomy, histology, zoology, and chemistry, and the more applied and clinical subjects. This fact has been taken into account in determining the proper place of physiology in the curriculum.

The work in the lecture and recitation room is correlated with that in the laboratory, thus affording to the student a better understanding of the perspective and symmetry of the subject than could be obtained otherwise. The lectures are illustrated with lantern slides, moving pictures, charts, anatomical preparations, and practical demonstrations. The laboratories are well equipped with modern apparatus for work in both the physical and the chemical phases of physiology.

Those who have the necessary qualifications and interest in physiology are encouraged to pursue their work beyond that given in the regularly scheduled courses.

Courses 11, 12, 13, 14, and 15, listed below, are designed primarily for students in Veterinary Medicine and are required of them. However, if space is available, other qualified students will be admitted, but permission to register must be obtained.

10. **Animal Physiology.** First or second term. Credit three hours. A course of lectures or recitations arranged especially for students in Agriculture, but open to others. Students taking this course should be familiar with the first principles of chemistry. Permission to register is not required. First term, M W F 9; second term, M W F 10. Professor HAYDEN or Professor DUKES.

11. **Chemical Physiology.** First year, second term. Credit four hours. An introductory course in chemical physiology, including the elements of biophysics. Lectures or recitations, M 9; W 12. Laboratory, T 8-10:30; S 9-11:30. Laboratory fee, \$7.50. Professor HAYDEN and Dr. SAMPSON.

12. **Physiology of the Domestic Animals.** First year, second term. Credit 3 hours. Lectures and recitations on blood and lymph, circulation, respiration, digestion, and absorption. M Th S 8. Professor DUKES.

13. **Physiology of the Domestic Animals.** Second year, first term. Credit four hours. Lectures and recitations on excretion, metabolism, heat regulation, endocrine organs, muscle and nerve, central nervous system, senses, and reproduction. M T W Th 9. Professor DUKES.

14. **Experimental Physiology.** Second year, first term. Credit two hours. Prerequisite, Course 12 or 13, or its equivalent. A laboratory course in experimental physiology in which special emphasis is placed on mammalian physiology. Section I, T 1:40-4, S 8-10:30; Section II, F S 10:30-1. Laboratory fee, \$10. Professor DUKES and Dr. SAMPSON.

15. **Applied Chemical Physiology.** Third year, first term. Credit two hours. A laboratory course in which attention will be given to the normal chemical constituents of blood and urine and the quantitative estimation of such as have been found to be most important in physiological and clinical studies. A study of the constituents of muscle, bone, and nervous tissue will constitute a part of the course. M F 1:40-4. Laboratory fee, \$7.50. Professor HAYDEN and Dr. SAMPSON.

16. **Advanced Experimental Physiology.** Second term. Credit two hours. Prerequisites, Course 12 or 13, or its equivalent, and Courses 14 and 15, or their equivalent. A laboratory course in advanced mammalian physiology. The course will not be given for less than three students, and the class will be limited to eight students. Registration by permission. Hours to be arranged. Laboratory fee, \$10. Professors DUKES and HAYDEN and Dr. SAMPSON.

17. **Special Problems in Chemical Physiology.** Both terms. This course will be adapted to the needs of students and will consist of laboratory work, conferences, collateral readings, and reports. Registration by permission. Hours and credit to be arranged. Laboratory fee, \$2 a credit hour. Professor HAYDEN and Dr. SAMPSON.

18. **Research.** Both terms. Hours to be arranged. For graduates only. Professors DUKES and HAYDEN.

200. **Clinical and Laboratory Practice.** (See page 19.)

ZOOLOGY

1a. **General Zoology.** First term. Credit four hours. Assistant Professor YOUNG. Recitation, W 9; lecture, F 9, McGraw 5. Laboratory, T Th 8-10:20, McGraw 2. Open to freshman veterinary students.

An introduction to the field of zoology through a study of the structural and functional organization of animals. Fundamental biological principles are discussed and consideration is given to the systematic relationships of the larger animal groups. Laboratory fee, \$4.

MATERIA MEDICA AND SMALL ANIMAL CLINIC

Professor, H. J. MILKS; Assistant Professor, H. C. STEPHENSON; Assistant, D. H. PERELLA.

The instruction in Materia Medica and Small Animal Clinic consists of lectures, recitations, and laboratory work. The work in pharmacology includes not

only the action of medicines but also their preparation and uses. The clinic furnishes abundant material for the study of applied therapeutics and the action of different drugs.

20. **Pharmacology.** Second term. Credit four hours. A study of the actions and uses of the various drugs and their preparation. A varied collection of the crude drugs and their official preparations is available. Four lectures or recitations each week. Second term, M W F 9, T 2. Professor MILKS and Assistant Professor STEPHENSON. Prerequisite: Veterinary Physiology 11.

21. **Materia Medica and Pharmacy Laboratory.** Second term. Credit two hours. The work in this course consists of the study of a selected group of inorganic drugs and of certain crude organic drugs and their official preparations, and in making pharmaceutical preparations such as syrups, emulsions, spirits, liniments, tinctures, fluid extracts, extracts, ointments, pills, etc. In this study the student is required to write concise notes on the physiologic action of the drugs examined and to make tests of their incompatibility. In addition to this, each student will have practical experience in writing and compounding prescriptions. The importance of a discriminating and accurate system for dispensing medicines is thoroughly emphasized. Five hours a week. M F 1:40-4. Professor MILKS and Assistant Professor STEPHENSON. Laboratory fee, \$10.

22. **Diseases of Small Animals.** This course deals principally with canine and feline diseases. Two lectures or recitations throughout the first term of the third year. M W 9. Professor MILKS and Assistant Professor STEPHENSON. Prerequisites: General Surgery 30, and Physical Diagnosis 51.

22a. **Diseases of Small Animals.** Fourth year, first term. Credit two hours. T Th 9. Professor MILKS.

23. **Recitations in Materia Medica and Therapeutics.** Third year, first term. Credit two hours. Th F 9. Professor MILKS. Prerequisite: Pharmacology 20.

24. **Advanced Work.** This course will consist principally of laboratory exercises on the physiological action of drugs on animals and will be supplemented by collateral reading and reports. Five or more hours a week. Professor MILKS.

CLINIC FOR SMALL ANIMALS

In this clinic, dogs and cats form the majority of patients. The students have close supervision of the cases; they compound and administer medicines and assist in the surgical operations.

25. **Small Animal Clinic.** Credit one hour a term. Six actual hours a week throughout the third and fourth years. Daily. First and second terms, 10-12. Professor MILKS, Assistant Professor STEPHENSON, and assistants.

26. **Elective.** Two hours a week. This will consist of advanced work in pharmacology or in diseases of the small animals. The choice will depend largely upon the interest of each student.

200. **Clinical and Laboratory Practice.** (See page 19.)

ANIMAL HUSBANDRY

1. **Livestock Production.** First term. Credit three hours. Lectures, M F 10. *Agricultural Economics* 25. One laboratory period, first year students, W 11-1, *Judging Pavilion*. Professors SAVAGE and HARPER, Assistant Professors HARRISON, HINMAN, and WILLMAN, and assistants.

Introduction to types, breeds, judging, and management of livestock.

10. **Livestock Feeding.** Second term. Credit three hours. Lectures, T Th S 9. *Animal Husbandry Building A*. Professor MORRISON and Dr. SALISBURY.

The feeding of farm animals, including the general basic principles, feeding standards, the computation of rations, and the composition and nutritive value of livestock feeds.

DAIRY INDUSTRY

IN THE COLLEGE OF AGRICULTURE

1. **Introductory Dairy Science.** Third year, second term. Credit three hours. Lectures and laboratory practice. T Th 11. Laboratory, W 1:40-4. *Dairy* 218. Assistant Professor HERRINGTON and Mr. RISHOI. Laboratory fee, \$7.

102. **Market Milk and Milk Inspection.** Fourth year, second term. Credit five hours. Lectures and laboratory practice. T Th 1-6. *Dairy* 218. Professor ROSS and Assistant Professor AYRES. Laboratory fee, \$10.

EXPERIMENT STATION

Professor, R. R. BIRCH; Assistant Professors, H. L. GILMAN, D. W. BAKER; Instructor, H. S. CAMERON.

61. **Health and Diseases of Animals.** Arranged especially for students in the College of Agriculture. First term. Credit three hours. Not open to freshmen or to those who have had no courses in animal husbandry. Lectures, M W F 11. *Veterinary College.* Professor BIRCH.

The course is designed to give the student a clear conception of the causes and nature of the diseases of animals, with suggestions for their prevention. Special epizootic diseases. Such information as is practicable is given for the treatment of slight injuries and for first aid in emergencies.

62. **Animal Parasitology.** Third year, first term. Credit two hours. M 8; S 9. Prerequisite courses, Pathology 40, 40a and Zoology 1a. This course deals with the various parasitisms of domestic animals. A study of the life cycles, the incidence in various hosts and distribution of the various parasitic forms, also the symptoms and pathology of the disease, and control measures, including therapeutics and prophylaxis. Assistant Professor BAKER.

62a. **Parasites Laboratory.** A companion course to 62 with the same prerequisites. Credit one hour. S 10-12:30. Laboratory fee, \$3. A study of the protozoal, helminth, and arthropod parasites of domestic animals. Parasitized animals will be used for the study of symptoms and therapeutics. External and internal parasites removed from these hosts will be used for anatomical examination. Post-mortem examinations of parasitized animals will be supplemented by microscopic examinations of prepared specimens. A study of technique including the collection, preservation, staining and mounting of specimens, and microscopic examination of blood smears, urine, and feces for presence of protozoa or helminth ova. Assistant Professor BAKER.

63. **Advanced Work in Animal Parasitology.** First and second terms. Credit one to three hours, by arrangement. Prerequisite courses 62 and 62a. For advanced undergraduate and graduate students. Special problems concerned with the parasites of animals. Assistant Professor BAKER.

64. **Elective.** Students desiring to fit themselves for special work with Bang's disease can arrange for an elective with two credit hours. This will cover both semesters of the senior year. Assistant Professor GILMAN and Instructor CAMERON.

200. **Clinical and Laboratory Practice.** (See page 19.)

SURGERY

Professor, J. N. FROST; Assistant Professor, HENRY ASMUS; Instructor, B. J. ERRINGTON.

The instruction consists of classroom and laboratory work designed to afford symmetrical training for practice.

THE CLASSROOM WORK

Course 30 in General Surgery, Course 40 in General Pathology, and Course 31 in Surgical Exercises together constitute a group designed to impart a general knowledge of the principles of surgery, surgical pathology and therapeutics, and operative technique.

Course 32, a total of eighty lectures and recitations, is devoted to the surgery of the various regions of the body.

The College possesses an extensive collection of surgical instruments and apparatus of home and foreign make, illustrating the history of veterinary surgery as indicated by the means employed in the cure of diseases. The College has acquired since its foundation an extensive pathological collection illustrative of surgical diseases, to which has been added from the surgical and obstetrical clinics a large amount of material of value for teaching purposes. Further important additions are made by veterinary practitioners. The surgical collection is especially rich in specimens illustrating the diseases of the teeth.

CLINICS AND LABORATORY WORK

The laboratory work in the Department of Surgery includes Surgical Exercises and Clinics. The course in surgical exercises comprises sixteen periods of three hours each, in which the student is required to perform all the important operations on horses and cattle. The animal for a given exercise is placed under general anaesthesia, which is maintained until the close of the period, when the subject is destroyed. The maintenance of chloroform anaesthesia for three consecutive hours gives the student valuable experience in the technique of general anaesthesia, for which there is a constantly increasing demand. Strict method is enforced in relation to asepsis and antisepsis, arrest of hemorrhage, suturing, and dressing, so that, while acquiring skill and knowledge of the appearance, resistance, and general character of living tissues, the student also forms proper habits in surgical procedure.

CLINICAL SURGERY OF THE LARGER ANIMALS

M W F, first and second terms. One year. Students in charge of cases are required to give necessary daily attention.

The surgical building has a thoroughly modern equipment in every respect. There is a spacious operating room fitted with operating table, stocks, and other conveniences, a commodious recovery room for chloroformed animals, and other accessory rooms for instruments, drugs, and other necessities. The entire structure is planned to secure the highest efficiency in aseptic and antiseptic surgery. Senior students assist regularly in the surgical operations.

General and local anaesthetics are regularly used in painful operations, and the student is taught to eliminate, as far as practicable, the element of pain in surgery. Instruments and apparatus of the most approved pattern are kept directly at hand in the operating room, and the student becomes familiar with their good and bad points by actual use.

Special apparatus for investigation is supplied as needed. Advanced students are called upon to assist in the various investigations, and thus become not only more familiar with surgical manipulations but also inspired to study methodically and effectively the many questions in surgical pathology and therapeutics. They also become better prepared to cope promptly and properly with the many atypical cases constantly occurring in general practice.

30. **General Surgery.** Third year, first term. Four recitations or laboratory periods a week. T 9; W F 8; W 1:40-4. Professor FROST. Prerequisite courses are 1, 2, and 3 in Anatomy, Course 10 in Physiology, Course 6 in Histology. (Not given in 1935-36).

31. **Surgical Exercises.** Three hours a week of laboratory work in surgical operations upon anaesthetized animals. Third year, first term. Section I, Th 1:40-4; Section II, T 1:40-4. Professor FROST and Dr. ERRINGTON. Laboratory fee, \$20.

32. **Special Surgery.** Third year, second term. Five lectures or recitations a week. M T W Th F 9. Professor FROST.

34. **Consulting Clinic.** Six actual hours a week for four terms. Daily at 10-12. Professor FROST and Dr. ERRINGTON.

35. **Jurisprudence, Ethics, and Business Methods.** One lecture a week. Fourth year, second term. F 9. This course is given chiefly by members of the legal and medical professions and by non-resident veterinarians.

36. **Horseshoeing.** Laboratory and lecture. Fourth year. First term: laboratory, T 2-4, Section I; Th 2-4, Section II. Prerequisite, Special Surgery 32. Second term: lecture, W 9. Prerequisite, first term's laboratory. Assistant Professor ASMUS.

37. **Horseshoeing Short Course.** Four weeks' training for farmers and farm boys who wish to gain sufficient knowledge to shoe their own horses. One course during the month of November and one during the month of January. Assistant Professor ASMUS.

200. **Clinical and Laboratory Practice.** (See page 19).

MEDICINE AND OBSTETRICS

Professor, D. H. UDALL, Assistant Professor, M. G. FINCHER; Instructors, W. J. GIBBONS and S. D. JOHNSON.

The course in veterinary medicine, principles and practice, extends over the last two years of undergraduate study, the subjects of the second year being distinct from, and complementary to, those of the first. It includes the constitutional dietetic and toxic affections and the non-infectious maladies of the different systems of organs—digestive, respiratory, circulatory, urinary, cutaneous, and visual—of the various genera of domestic animals. The wide scope of the course, covering as it does the varied manifestations of a given morbid condition, the complications in each, caused by constitution, environment, utilization, microbial infection, etc., and the application of prophylactic and therapeutic measures to all in turn, give a breadth and soundness of view which should render the student a reliable and skillful veterinary pathologist, physician, and sanitarian.

The course on contagious diseases deals with the general subject of infection and contagion; the microbiology of diseases in which micro-organisms constitute the essential factor; the accessory and restrictive environment, such as condition of soil, water, air, climate, culture, season, weather, animal industries, trade, migration, war, consumption of animal food, etc.: the diagnosis of the different plagues; the various methods of suppression by the individual owner, the municipality, town, county, state, or nation; and the exclusion of pestilences from a country. The transmissibility of each contagious disease to different genera of animals, from animal to man, and from man to animal, together with the susceptibility of each genus to immunization and the best known means of securing this, receive due attention.

Enzootic diseases are carefully studied, and the various causative factors in location, environment, and in constitutional or racial susceptibility are fully dealt with, as subsidiary to prevention and treatment.

Our proximity to the city and to a well-stocked agricultural country tends to secure a greater variety of patients than can be had in a large city remote from country flocks and herds. Students take charge of individual cases in the hospital and ambulatory clinic and keep a record of each with treatment. The course also includes instruction in diagnosis. Through the medium of laboratory guides students are expected to acquire a methodical system of examination by repeated systematic observations on both normal and diseased animals. The work involves the use of various special diagnostic methods taught in other laboratories of the College, such as examination of the blood, urine, and feces, the application of sero-diagnostic methods, etc.

AMBULATORY CLINIC

An ambulatory or out-clinic is conducted for the purpose of giving instruction to students under conditions identical with those encountered in private practice. Proper conveyances and equipment are provided and an opportunity offered for observing such diseased farm and dairy animals as cannot be entered in the clinics of the College. The student thereby not only has an opportunity to see cases not readily brought to the college clinic, but also assists in handling cases in the same manner and under the same environment as is required of the country practitioner. As the vicinity of Ithaca is largely devoted to dairying, valuable clinical material relating to obstetrics and the diseases of dairy cows is available and is extensively used.

50. **Veterinary Medicine, Principles and Practice.** Lectures or recitations. Third year. First term, T Th S 8; second term, T Th 8.

50a. **Veterinary Medicine, Principles and Practice.** Fourth year. First term, M W F 8; second term, W F 8.

51. **Physical Diagnosis.** Two recitations or lectures a week. Second year. Second term. Credit two hours. M F 8.

53. **Ambulatory Clinic.** Throughout the senior year. Credit two hours each term. One hour a week is devoted to a review and discussion of the cases treated in the clinic. Recitations, first term, F 9; second term, M 9.

54. **Obstetrics, including Diseases of Genital Organs of Cattle, Sterility, Abortion.** Four lectures or recitations and one laboratory section a week in the first term of the fourth year. M W 9, T Th 8. Section I, Th 2-4; Section II, T 2-4. It is aimed in this course to give a general survey of the subject of obstetrics, and to include a thorough consideration of the diseases of the genital organs, including sterility and abortion. Obstetric exercises are given by appointment throughout the year. For this work a specially constructed apparatus or "phantom" is employed in such a manner as to closely simulate actual working conditions in obstetrical practice. Newborn calves are procured, killed, and so placed in the apparatus that the various corrections of position and embryotomic operations may be carried out by the student under the direction of the instructor in charge.

Clinical instruction in obstetrics is given in Course 53.

55. **Ophthalmology.** One lecture or recitation a week. Third year, second term. W 8.

56. **Hygiene.** One lecture or recitation a week. Fourth year, second term. T 8.

Special Lectures. During the year, lectures on special topics in medicine will be given by eminent practitioners and teachers of veterinary medicine. These will form a part of the instruction in this department.

Opportunities for Research. The activities of the department, aside from the instruction work, are devoted to research in connection with diseases of cattle, including the phenomena of sterility and abortion in animals of breeding age, and of diseases of newborn calves having intimate relation to the diseases of the genital organs of cows. Opportunity is afforded for participation in the investigations by graduate students having acceptable preparation.

PATHOLOGY AND BACTERIOLOGY

Professor, W. A. HAGAN; Assistant Professors, PETER OLAFSON, E. L. BRUNETT, J. M. HENDRICKSON (at Farmingdale), ALEXANDER ZEISSIG, K. F. HILBERT (at Farmingdale); Instructors, C. C. ELLIS, C. W. BARBER, W. M. EVANS, P. P. LEVINE, RUTH E. GORDON, W. F. WITTER; Assistants, D. W. BRUNER, L. G. GOSS; Student Assistants, H. VERSLUIS, A. K. TICE.

The laboratories of the department are well equipped with modern apparatus providing opportunity for advanced work, for those students who are properly prepared, in pathological anatomy, autopsy work, pathogenic bacteriology and immunity. The department operates two diagnostic laboratories, one for poultry diseases and the other for general diagnostic work to which a great deal of pathological material and blood samples for serological testing come from all parts of the State. These laboratories furnish an abundance of fresh materials for teaching work and for research in animal diseases. The clinics and the routine autopsies also furnish material.

The following courses are required in the curriculum of the Veterinary College and are given particularly for veterinary students. When there is room for them, properly prepared students of other colleges will be admitted, but permission to register must be obtained in each case.

40. **General Pathology.** Second year, first term. Credit two hours. Prerequisite, course 6 (Miscroscopy and Histology) or equivalent. In addition it is desirable that the student shall have had at least one year's work in anatomy and physiology. In special cases of students who are majoring in biology and expect to take no further work in pathology, these prerequisites may be waived in part. When this is done, the course will not be accepted as a prerequisite for other courses. Recitations, T Th 8. Dr. OLAFSON.

40a. **General Pathology Laboratory.** Credit two hours. Course 40 must be taken simultaneously or have been completed previously. Section I, T 10-12:30, F 8-10:30. Section II, M 10-12:30, Th 10-12:30. Laboratory fee, \$5. Drs. OLAFSON and BARBER.

41. **Special Pathology.** Second year, second term. W S 8. Credit two hours. Prerequisite course 40a. Dr. OLAFSON.

41a. **Special Pathology Laboratory.** Credit two hours. Course 41 must be taken simultaneously, or have been completed previously. Second year, second term. Section I, T Th 10-12:30. Section II, W 1:40-4, S 10-12:30. Laboratory fee, \$5. Drs. OLAFSON and BARBER.

42. **Pathology of Infectious Diseases.** Fourth year, first term. Credit two hours. Prerequisites, courses 41 and 49. Recitations, T Th 12. Dr. HAGAN.

43. **General Bacteriology.** Second year, first term. Credit two hours. Lectures and recitations, M W 8. Dr. HAGAN.

43a. **General Bacteriology Laboratory.** Credit two hours. Open to students who have taken or are taking course 43 or its equivalent. Section I, M Th 10-12:30. Section II, T 10-12:30; F 8-10:30. Laboratory fee, \$10. Drs. ZEISSIG and BRUNER.

46. **Diseases of Poultry.** Third year, second term. Credit two hours. Prerequisite, course 49a. T F 12. Dr. BRUNETT.

47. **Autopsies.** Throughout the third and fourth years. Daily 10-12. Credit one hour in fourth year. Drs. OLAFSON and BRUNETT.

48. **Food Hygiene.** Third year, second term. Credit two hours. Prerequisites, courses 41 and 49. Lecture, M F 8. Dr. ZEISSIG.

49. **Pathogenic Bacteriology.** Credit two hours. Prerequisite, course 43, or its equivalent. Second year, second term. T Th 8. Dr. HAGAN.

49a. **Pathogenic Bacteriology Laboratory.** Credit three hours. Second year, second term. M W F 10-12:30. Laboratory fee, \$10. Dr. ZEISSIG.

NOTE: The following courses are not a part of the regular veterinary curriculum. Course 170 is given especially for students of poultry husbandry in the College of Agriculture. Course 149 is given to accompany Course 49 for those students who have had no work in pathological anatomy. The others are for graduate and advanced undergraduate students. Permission to register must be obtained by all students electing these courses.

149. **Pathogenic Bacteriology Laboratory.** Credit two hours. Students must have completed, or take simultaneously, course 49. T 1:40-4, Th 1:40-4. Laboratory fee, \$10. Dr. ZEISSIG.

150. **Laboratory Methods of Diagnosis.** Credit one to three hours. Prerequisites, courses 41a, and 49a or 149. Hours by appointment. Dr. EVANS. Instruction and practice in the application of bacteriological, pathological, and serological methods for the diagnosis of disease.

151. **Immunological Methods.** First term. Credit two hours. Prerequisites, courses 49, and 49a or 149. Class limited to twelve students. Two laboratory periods on consecutive days. Hours to be arranged. Laboratory fee, \$10. Dr. ZEISSIG.

152. **Advanced Work in Pathology, Bacteriology, or Immunology.** First and second terms. Credit one to three hours. Hours to be arranged. Laboratory fee, \$2 a credit hour. Drs. HAGAN, OLAFSON, and ZEISSIG.

Properly prepared students may undertake special problems or receive special assignments.

153. **Hematology.** Second term. Credit one hour. One lecture and laboratory session a week, the time to be arranged. Laboratory fee, \$2. Dr. OLAFSON.

154. **Seminar.** First and second terms. Hours to be arranged. No credit. Required of all graduate students. Undergraduate students are admitted.

170. **Poultry Hygiene and Disease.** First term. Credit two hours. Prerequisites: Animal Physiology (Veterinary 10), or Human Physiology (Arts 303) and Agricultural Bacteriology 3. Lectures, T Th 10. Dr. BRUNETT. (Special course for students of poultry husbandry.)

200. **Clinical and Laboratory Practice.** (See page 19.)

MILITARY SCIENCE AND TACTICS

1. **Basic Course.** Throughout the year. The complete course covers two years. Required. All able-bodied male students in the Veterinary College, except aliens, candidates for a baccalaureate degree, are required to take* two terms in the Department of Military Science and Tactics.

*For those who elect to take the Advanced Course the full two-year Basic course is required as a prerequisite.

Instruction is offered in either the Infantry or Field Artillery Branch. For details concerning the course see the Announcement of the Department of Military Science and Tactics.

Three hours a week, either M T W or Th 1:40-4:10 P.M. *Drill Hall.*

The requirements of Military Science and Tactics must be completed in the first terms of residence, otherwise the student will not be permitted to register again in the University without the consent of the faculty.

2. **Advanced Course.** Elective. Throughout the year. The course covers two years. Credit ——— hours ———. The Advanced Course is that prescribed by the War Department to qualify students for commission in the Officers Reserve Corps. Approved graduates are commissioned as second lieutenants in the branch in which they have qualified. Graduates of Veterinary Colleges, commissioned in another branch, may transfer to the Veterinary Corps with the approval of the War Department.

Instruction is offered in either the Infantry or Field Artillery Branch. The Field Artillery Courses, both Basic and Advanced, stress the care and use of the horse and mule, as a mount and a draft animal. For details concerning the course see the announcement of the Department.

Prerequisite, Course 1, in the branch elected. Five hours a week. Either M T W or Th. Hours by assignment. *Drill Hall.*

HYGIENE AND PREVENTIVE MEDICINE

All students in the first year of undergraduate courses are required to attend lecture-recitations on Hygiene and Preventive Medicine given once a week throughout the college year.

Entering students will be held for two hours of Hygiene and Preventive Medicine unless they present evidence of having satisfactorily completed an equivalent course previous to entering here.

1. **Hygiene (Required of all Freshmen).** First term, W 8. One lecture-recitation each week with preliminary examination and final. The use of a text-book is required.

Registration and assignment to section: *for men*, at the Old Armory; *for women*, at the Sage Gymnasium.

Sections for men:

Acting Professor KERR, Assistant Professors YORK, GOULD, SHOWACRE, and Doctors ROBINSON, HAWKINS, and TEAGARDEN.

Sections for women:

Assistant Professor EVANS, Doctors CUYKENDALL and STELLE.

2. **Hygiene (Required of all Freshmen).** Second term, M 10. One lecture or recitation each week with preliminary examination and final. The use of a text-book is required.

Registration and assignment to section: *for men*, at the Old Armory; *for women*, at the Sage Gymnasium.

APPENDIX A

OPENINGS FOR VETERINARIANS IN AMERICA

1. In the Medical Department of the United States Army there is a demand for a limited number of veterinarians. Beginning with the rank of Second Lieutenant, the veterinarian earns promotion after certain periods of service and examination. The initial salary is \$1,700 and quarters.

2. In the Bureau of Animal Industry, United States Department of Agriculture, a number of veterinarians are employed professionally as livestock agents and inspectors, inspectors and superintendents of quarantine stations, and investigators in bacteriology and pathology. By an act of Congress, the federal veterinary inspectors must be graduates of a veterinary college maintaining the requirements of the Bureau. Applicants for the position must take a civil service examination. The initial salary is \$1,860.

3. In the different states there are appointive positions as State Veterinarian, and in some states as County or District Veterinarian. These are desirable positions and involve considerable responsibility.

4. The time is not far distant when each municipality must have its veterinary inspector of markets, abattoirs, and butcher meat, as well as of milk and other dairy products.

5. Veterinarians are needed to serve on tuberculosis and other commissions in order that the work in this field may be conducted intelligently and successfully along scientific lines. The control of disease depends largely upon those specially trained in the anatomy, physiology, hygiene, and pathology of the lower animals.

6. Educators in comparative pathology are wanted in agricultural and veterinary colleges, and experiment stations, and must soon be in demand by every medical college that aims to keep abreast of the times.

7. There are always openings in the wide field of private veterinary practice. With a ratio of three farm animals to every human being, and with less than one veterinarian to every thirteen doctors of medicine for man, the balance of opportunity seems to be largely in favor of the veterinary practice, and this preponderance must steadily increase with recovery of stock values and the increase in the number of farm animals.

APPENDIX B

LEGAL REQUIREMENTS FOR LICENSE TO PRACTICE VETERINARY
MEDICINE AND SURGERY IN THE STATE OF NEW YORK.

PUBLIC HEALTH LAW

CONSOLIDATED LAWS OF NEW YORK, CHAPTER 45, ARTICLE 10

§1326. *Qualifications for practice.* No person shall practice veterinary medicine after July first, eighteen hundred and ninety-five, unless previously registered and legally authorized, unless licensed by the department and registered as required by this article; nor shall any person practice veterinary medicine who has ever been convicted of a felony by any court, or whose authority to practice is suspended or revoked by the department on recommendation of the state board. Any person, a citizen of the United States and of the state of New York, who matriculated in a reputable veterinary medical school prior to January first, eighteen hundred and ninety-five, and who received his degree therefrom prior to January first, eighteen hundred and ninety-seven, or any person who has engaged in the practice of veterinary medicine prior to the year eighteen hundred and eighty-six, shall be admitted to the veterinary examination for license to practice, as conducted by the department.

§1331. *Admission to examination.* The department shall admit to examination any candidate who pays a fee of ten dollars and submits satisfactory evidence, verified by oath if required, that he (first) is more than twenty-one years of age; (second) is of good moral character; (third) has the general education required in all cases after July first, eighteen hundred and ninety-seven, preliminary to

receiving a degree in veterinary medicine; (fourth) has studied veterinary medicine not less than four full years, including four satisfactory courses in four different academic years, in a veterinary medical school registered as maintaining at the time a satisfactory standard; (fifth) has received a degree as veterinarian from some registered veterinary medical school. The degree in veterinary medicine shall not be conferred in this state before the candidate has filed with the institution conferring it, the certificate of the department that before beginning the first annual veterinary course counted toward the degree he had earned a veterinary medical student qualifying certificate in accordance with the rules of the department, the minimum requirement for which, for matriculates after January one, nineteen hundred and five, shall be the successful completion of an approved four-year high school course or its equivalent. The department may accept as the equivalent for any part of the third and fourth requirement, evidence of five or more year's reputable practice in veterinary medicine, provided that such substitution be specified in the license. The department may admit to the examination graduates of duly incorporated veterinary schools, who matriculated in such schools prior to nineteen hundred and fifteen, provided such graduates are now and have been for at least five years, residents of this state.

§1333. *Examinations and reports.* Examination for license shall be given in at least four convenient places in this state and not less than twice annually, in accordance with the department rules, and shall be exclusively in writing and in English. Each examination shall be conducted by a department examiner, who shall not be one of the veterinary medical examiners. At the close of each examination, the department examiner in charge shall deliver the questions and answer papers to the board, or to its duly authorized committee, and such board, without unnecessary delay, shall examine and mark the answers and transmit to the department an official report, signed by its president and secretary, stating the standing of each candidate in each branch, his general average and whether the board recommends that a license be granted. Such report shall include the questions and answers and shall be filed in the public records of the department. If a candidate fails on his first examination, he may have a second examination without fee.

§1334. *Licenses.* On receiving from the state board an official report that an applicant has successfully passed the examination and is recommended for license, the department shall issue to him, if in their judgment he is duly qualified therefore, a license to practice veterinary medicine. Every license shall be issued by the department under seal and shall be signed by each acting veterinary medical examiner of the board and by the officer of the department who approved the credential which admitted the candidate to examination, and shall state that the licensee has given satisfactory evidence of fitness as to age, character, preliminary and veterinary medical education and all other matters required by law, and that after full examination he has been found duly qualified to practise. Applicants examined and licensed before July first, eighteen hundred and ninety-seven, by other state examining boards registered by the regents as maintaining standards not lower than those provided by this article, and applicants who matriculated in a New York state veterinary medical school before July first, eighteen hundred and ninety-six, and who received the veterinarian degree from a registered veterinary medical school before July first, eighteen hundred and ninety-seven, may without further examination, on payment of ten dollars to the department, and on submitting such evidence as they may require, receive from it an endorsement of their licenses or diplomas conferring all rights and privileges of a department license issued after examination. And any veterinary practitioner in any county of this state who was registered in the county clerk's office between July first, eighteen hundred and ninety-five, and July first, nineteen hundred and fifteen, or any commissioned veterinary medical officer heretofore serving in the United States army or an allied army in the world war, or so commissioned and honorably discharged therefrom, and who was a citizen and resident of this state at the time of entering such service or at the time this section as hereby amended takes effect, or becomes a resident within one year thereafter, may, upon satisfactory evidence of such registration or discharge and

of qualification to practise either with or without examination as the department may direct on the recommendation of the board of veterinary medical examiners, and upon written application, receive from the department a certificate of facts which may be registered in the office of the county clerk where such practitioner was registered, or where such discharged commissioned officer intends to practice, and the registration of such certificate shall constitute a lawful registration under the provisions of this article and shall operate to confer all the rights and privileges of a department license issued after examination. Before any license is issued it shall be numbered and recorded in a book kept in the office of the department and its number shall be noted in the license. This record shall be open to public inspection, and in all legal proceedings shall have the same weight as evidence that is given to a record of conveyance of land.

§1335. *Registry.* Every license to practice veterinary medicine shall, before the licensee begins practice thereunder, be registered in a book to be known as the "Veterinary Medical Register," which shall be provided by and kept in the clerk's office of the county where such practice is to be carried on, with name, residence, place and date of birth, and source, number and date of his license to practice. Before registering, each licensee shall file, to be kept in a bound volume in the county clerk's office an affidavit of the above facts, and also that he is the person named in such license, and had, before receiving the same, complied with all requisites as to attendance, terms and amount of study and examination required by law and the rules of the university as preliminary to the conferment thereof, and no money was paid for such license, except the regular fees, paid by all applicants therefor; that no fraud, misrepresentation or mistake in any material regard was employed by any one or incurred in order that such license should be conferred, and shall annually in the month of January report, under oath, to the state board of examiners, any facts required by the board, shall pay to the department a registration fee of one dollar, and shall receive a certificate of registration that must be conspicuously displayed together with the original certificate of registration. Every license, or if lost, a copy thereof legally certified so as to be admissible as evidence, or a duly attested transcript of the record of its conferment, shall, before registering, be exhibited to the county clerk, who, only in case it was issued or indorsed as a license under seal by the department, shall indorse or stamp on it the date and his name preceded by the words, "Registered as authority to practice veterinary medicine, in the clerk's office of county." The clerk shall thereupon give to every veterinarian so registered a transcript of the entries in the register, with a certificate under seal that he has filed the prescribed affidavit. The licensee shall pay to the county clerk a total fee of one dollar for registration, affidavit and certificate.
