## *Cornelliana.*

President Schurman was in Philadelphia last Thursday to attend the annual dinner of the Cornell Club of Philadelphia, and he spent the day at the University of Pennsylvania as the guest of Provost Edgar Fahs Smith. President Schurman inspected the University's dormitory system. A luncheon was given him at the Houston Club to which the Provost invited the deans of the various departments.

St. Patrick's Day is always celebrated by the ingenious students of the College of Architecture. Last Friday morning an enormous green snake, 200 feet long and a foot in diameter, ornamented the front of White Hall. The serpent was pursuing a grotesque frog and St. Patrick was represented as pursuing the snake. At 12 o'clock the entire college paraded around the quadrangle carrying the saint, the snake and the frog and giving yells for the saint. Then they had a bonfire on the Library slope and burned the snake, which was made of cotton cloth and excelsior.

The latest of the official publications of the University is the announcement of the twentieth Summer Session, July 6 to August 16 next. It is announced that instruction in agriculture will be included, and a special pamphlet describing the courses to be given is promised for the middle of April.

Charles F. Wheelock '73, second assistant commissioner of education of the State of New York, addressed the undergraduates of the School of Education Friday afternoon. Dr. Wheelock's address was devoted to explaining the workings of the state department of education and particularly of the division of examinations. He said that in this division Cornell alumni are in the majority, there being about three of them to one graduate from any other college. The positions in

the department of education are filled from the civil service list, and Dr. Wheelock said that a Cornell man or woman is usually at the top of the list.

President Schurman has been appointed a delegate to represent Cornell University at the centennial celebration of the foundation of the University of Breslau in Germany, this summer, August 1 to 3. It was announced recently that the President had been appointed to attend anniversary celebrations next fall at the University of Christiania in Norway and the University of St. Andrews in Scotland.

An event long awaited by the members of the Cornell Cosmopolitan Club will take place next Saturday night, when the new club house will be informally opened for inspection by members and their friends. Supper will be served. The formal dedication of the house will take place later in the year.

Professor Tarr's lecture on "A Trip to Spitzbergen" was well attended. He took the trip last summer in company with several geologists and physiographers. He illustrated his lecture with lantern slides made from snapshots, and said that some of the photographs were made at midnight by the light of the midnight sun.

Spring Day will probably be held on May 27, as that date has been designated as Spring and Navy Day by the University Faculty. A committee of thirty-seven upper class men has been appointed to have general charge of the event. The shows will begin much earlier this year because of the Yale baseball game and the Harvard-Cornell boat race in the afternoon.

Colonel E. D. Meier, president of the American Society of Mechanical Engineers, and Charles P. Steinmetz were the visiting speakers at the annual Sibley banquet, held in the Armory Friday night. Both men spoke of the opportunities offered by engineering

for the young man who is interested in it. Mr. Steinmetz's talk was mostly upon the knowledge which the engineer must gain in college and the experience with which he must supplement this knowledge in practice. He emphasized the importance of a liberal education for engineers. Other speakers were Director Bailey and Director Smith.

From the measurements of the male students who entered the University in 1908 and 1909, undergraduates in the department of history and political science have contrasted the city and the country bred men. The records of 1,723 men were examined, of whom 991 were from the country and 732 were from the city. In the compilation all places having a population of 25,000 or more were considered as cities. The results showed that the average country bred man is taller by half an inch, weighs three and one-half pounds more and has a slightly greater chest expansion than the city man.

The University Orchestra made about \$200 by a concert given in Sibley Dome Thursday night. The Glee Club, the Mandolin Club and the newly organized Banjo Club assisted the orchestra. Edson H. Nichols '08, and J. S. Fassett, jr., '12, were the vocal soloists. The money was raised to finance the orchestra's trip this spring.

Benton S. Monroe '96, instructor in English, has been elected secretary of the Faculty of Arts and Sciences in place of Professor Frederick C. Prescott, who will be absent next year on sabbatic leave.

The addition to the north wing of the Veterinary College is nearly ready to be occupied. During the construction much of the laboratory work of the college has been done in Stimson Hall.

The Rev. Francis E. Clark, founder and president of the United Society of Christian Endeavor, preached in Sage Chapel Sunday and will occupy the pulpit again next Sunday.

### A DEGREE IN CHEMISTRY.

#### Graduates of Four Year Course to be Bachelors of Chemistry.

President Schurman announces that the executive committee of the Board of Trustees, at its regular meeting last week, adopted a resolution providing that hereafter the degree of Bachelor of Chemistry (B. Chem.) shall be conferred upon students who have completed the special course in chemistry. A recommendation to this effect was adopted by the Faculty of the College of Arts and Sciences at a special meeting Wednesday afternoon, March 8, and approved by the University Faculty at its meeting Friday, March 10. The department of chemistry remains, of course, a department of the College of Arts and Sciences under the jurisdiction of that college.

A four year course in chemistry and allied subjects has been offered by the department since about 1903 for students planning to follow chemistry as a profession. The course is essentially technical in character and professional in purpose. Therefore the degree of Bachelor of Arts, which heretofore has been conferred upon its graduates, has been not descriptive of the work they have done and it has been unsatisfactory to them because it was not on its face a certificate of professional standing, such as the University gave its graduates in engineering, law, etc. The course was designed in response to a demand in the industrial world—a demand for well trained chemists who are not mere analysts. It affords a broad and thorough training in each of the great subdivisions of chemical science, and also comprises instruction in the allied sciences of mathematics, physics, mineralogy and economic geology. Courses in mechanical drawing, in mechanics of engineering and in the mechanical and electrical engineering laboratories are included in order that the student may get some acquaintance with the principles of construction, design, and power transmission.

Some changes are to be made in the outline of the course, mainly additions. English composition is to be required in the freshman year. Two modern foreign languages instead of one will be required for graduation. There will be no required work in chemistry in the senior year, so the senior will have

more time for electives and greater liberty to specialize.

Chemists trained in this course at Cornell are working all over the country, and even abroad, in a great variety of industries, and they are almost uniformly successful. The method of instruction is such as to give them a broad theoretical training and at the same time a peculiar versatility in meeting chemical problems. The demand for the Cornell chemist exceeds the supply. One hundred and eight undergraduates are now registered in the four year course, and the senior class numbers twenty-two.

In no other university is a course given quite like this, and no other gives the degree of Bachelor of Chemistry. There are special courses in chemistry, but they differ from Cornell's in essential respects and they lead to different degrees. The degree to be given at Cornell was selected from half-a-dozen that were proposed, after it had been approved by the faculty of the department and also by the students of the special course.

Some graduates of the course may wonder if they may have the new degree. Professor Dennis was asked about this and he said that the question could not be answered generally. The course, as approved and prescribed for the degree by the faculty of the college, is broader than the old course, and a graduate desiring the degree would have to satisfy the new requirements, and his application would have to be considered by the proper committee of the arts faculty.

Two new board track records were set Saturday in the contests for the University championships. John Paul Jones, the sophomore who has been showing up so well in the indoor work of the winter, won the five lap race in 1 minute 27 2-5 seconds. Tell S. Berna made the other record, finishing first in the ten lap race in 3 minutes 19 seconds. Other board track events were run off in fast time but nothing unusual occurred in the field events. The indoor season will close Saturday night at Ann Arbor with the Cornell-Michigan dual meet.

Director Bailey is to address the Cornell Socialist Club Saturday night on "The Farmer in His Public Relations."

The Junior Feed is to be held in the Dutch Kitchen Friday night.

### PLANS FOR SIBLEY COLLEGE.

#### Special Committee of the Trustees Recommends Three New Buildings.

A special committee of the Board of Trustees, composed of Messrs. McMillin, Westinghouse, Edwards and Barr, has lately rendered an exhaustive report on the prospective needs of Sibley College and has recommended a program of building construction designed to meet those needs. In the accompanying map are shown the changes and additions proposed. The building designated as "C" has been provided for, since the committee reported to the Board, by Mrs. Lang's gift of \$50,000 for Rand Hall, the new shops. The building "A" is naturally next in order. Its cost will be much greater than that of Rand Hall because it is to be a laboratory, requiring boilers, piping systems, etc.

The committee rendered a partial report at the last June meeting of the Board and made its final report at the fall meeting. It had held several meetings and had conducted correspondence with the Sibley College authorities, and had also, as a body, visited the college. It became convinced that the quarters now occupied by the college, particularly by the laboratory and shop sections, are poorly adapted and entirely inadequate as to space even for the existing number of students.

"This condition," says the committee in its report, "will become extremely critical within a very few years, in spite of anything that may be done to restrict the growth, unless steps are taken almost immediately to relieve the situation. Other institutions, modeled after it, and to a considerable extent manned by its graduates, have much better facilities for their work than has Sibley College. The equipment (apparatus, machinery and tools) of the college is reasonably satisfactory in character, although much of it should be replaced by that of more modern type, but the housing of this equipment is such that the work with it cannot be done to good advantage. The congestion in some of the laboratory sections precludes the best use of the plant, and the arrangement, or lack of arrangement, incident to the disconnected buildings materially reduces the efficiency of the instructing staff. The faculty is entitled to much credit for maintaining so high a standard under so discouraging conditions.

"The impressions of a visitor or prospective patron upon inspecting the low dark basement rooms and other makeshift shelters which are dignified by the name of laboratory must inevitably be unfavorable. Unless he be quite intimately familiar with the record and the inner workings of the college one would naturally be repelled rather than attracted by the general aspect of the plant of Sibley College.

"To provide reasonably adequate space for the efficient instruction of about 1,500 students in Sibley College, according to modern demands; or to provide for perhaps 2,000 students under conditions as to congestion approximating the present situation, two, and possibly three, new buildings are, in the judgment of your committee, urgently needed. It is fair to say, however, that these buildings, owing to the possibility of better arrangement, would be rather more effective with even 2,000 students than the present quarters with the present numbers."

The committee quoted memoranda furnished by the Director of Sibley College showing present floor space and the estimated need in that respect to accommodate 2,000 students, and it made the following recommendations:

First—A new three-story building (designated as "C" on the map) to be 47 x 210 feet, except for a length of 45 feet at the extreme east end, where it is to be but 31 feet wide, inside, and a wing 29 x 30 feet. This building would have a gross floor space of approximately 30,000 square feet, which is ten per cent in excess of the space called

(Concluded on Page 284.)

#### THE ELLESMERE MANUSCRIPT.

Gift of a Facsimile Copy to the University by H. J. Patten '84.

The Trustees of the University have adopted a resolution of thanks to Henry J. Patten '84, of Chicago, for the gift of a facsimile copy of the Ellesmere manuscript of Chaucer's Canterbury Tales.

Manchester University has obtained permission from the Earl of Ellesmere to issue, to a limited number of subscribers, a complete reproduction in facsimile of this famous manuscript. The book has a double value: it contains the best text of the Canterbury Tales and hence is of great value and importance to students of English literature; and it is one of the finest fifteenth century English manuscripts in existence. It comprises nearly five hundred large folio pages, and is beautifully illuminated. The figures, drawn and colored with great care, present a minute and faithful delineation of the costume of Chaucer's time, and include a characteristic portrait of the poet himself.

On account of the great expense of reproducing so elaborate a book, the price of the facsimile is necessarily high, and each copy will cost \$250. The English department of the University, being exceedingly anxious to obtain a copy, made a request to the Library Council for its purchase, but the Council had already disposed of all the available Library funds for this year and could not grant the request. Then, through the kindness of

William H. French '73, of Chicago, a member of the University Board of Trustees, the matter was brought to the attention of Mr. Patten, who at once became interested and generously offered to purchase the facsimile for the Library. He sent his check for the full amount, \$250, thus securing for Cornell University a copy of this important and costly work, which is almost ready to be delivered to subscribers. Mr. Patten's gift will be highly appreciated by all future students of English literature at Cornell.

#### MR. MELCHERS'S PAINTING.

Gift of General Rush Hawkins—Place Selected for It.

President Schurman announces that General Rush Hawkins, of New York City, has given the University the famous painting by Gari Melchers entitled "Communion Sunday in a Church in Holland." The fact that Cornell was to become the possessor of this picture was announced in the Alumni News a month ago. It is one of the best known and most admired of Mr. Melchers's works. It was painted before the artist was thirty, and was exhibited at the International Exposition in Paris, where the French government awarded it a grand medal of honor. Up to that time the only American artists so honored were Sargent and Whistler.

During the last few weeks the painting has been on exhibition with some thirteen or fourteen other pic-

tures by Mr. Melchers in the Montross Gallery, New York City. It has excited much favorable comment, and the Art News considers it the best of the pictures in the exhibition. It comes directly from this exhibition to Cornell University.

A short time ago Mr. Melchers visited Cornell and decided upon the amphitheatre of Goldwin Smith Hall as the best place to hang the painting. The walls of the room will be tinted under the direction of Professor Brauner so as to provide a harmonious color and setting.

General Hawkins, the donor of the picture, was colonel during the Civil War of the famous 9th New York Infantry, known as "The Hawkins Zouaves," and in 1865 was brevetted Brigadier-General of Volunteers for "meritorious and valuable services during the war." General Hawkins is an officer of the Legion of Honor of France, is an author of some note, a book collector, and a patron of art. He has recently completed and opened to the public at Providence, R. I., a beautiful building, the Ann Mary Brown Memorial, which contains a collection of paintings, a room of early printed books, and another of family relics and manuscripts.

The Trustees of the University have adopted a resolution of thanks for this generous and valuable gift.

#### ELECTIONS TO PHI BETA KAPPA.

The Cornell chapter of Phi Beta Kappa has elected the following undergraduates to membership:

Seniors, Class of 1911—James Eugene Bennett, Youngstown, Ohio; Mattie Durell Bodine, Mansfield, Pa.; Samuel Byron Dicker, Ithaca; Mildred Evans, Philadelphia; Raymond Henry Fuller, Rochester, N. Y.; Heber Emlyn Griffith, Utica, N. Y.; Reuben William Hamlet, Sheridan, N. Y.; Mildred Alice Horton, Whitehall, N. Y.; Agnes Marie Kalmbach, Philadelphia; Vera May McGrew, New Athens, Ohio; Bertha Louise Morgan, Castleton, N. Y.; Melita Hamilton Skillen, Brooklyn; Christina Mills Stivers, Middletown, N. Y.; Walter August Verwiebe, Schenectady; George Morris Wolfson, New York.

Juniors, Class of 1912—Marjorie Latta Barstow, Ithaca; Maurice Charles Braveman, Corning, N. Y.; Mary Magdalen Bruckheiser, Baltimore; Millar Burrows, Buffalo; Clay-

In the underclass rush.

ton Joseph Buttery, Ripley, N. Y.; Margaret Connor, Ithaca; Mary Anita Ewer, Sodus, N. Y.; Janet Ray Frisch, Brooklyn; Lingard Loud, Buffalo; Minchen Rusack, Catskill, N. Y.; Harriet Margaretta Thompson Skerrett, Philadelphia; Victor Herman Werner, Brooklyn.

The following members of the present senior class were elected last year: George Silk Barnum, Lockport, N. Y.; Harriet Nebe Bircholdt, Buffalo; Jacob Cohen, Brooklyn; James Strode Elston, Elmira; Ethel Doreen Frost, Ithaca; Stella Heilbrunn, Brooklyn; Charles Roland Hugins, Binghamton; Erma Campbell Lindsay, Tonawanda, N. Y.; Ross Hamlin McLean, Wellsville, Ohio; Henry George Seipp, New York; Emma Romelia Speed, Ithaca; Elizabeth Undritz, West New Brighton, N. Y.

Of the thirty-nine persons named in the above list, twenty-one are women. J. E. Bennett, one of the seniors to whom the key was awarded, was the captain of this year's varsity basketball team, and is president of the senior class.

#### NEW PRIZE FOUNDED.

Dr. W. G. Hollingworth, of Utica, lectured before the students of the Veterinary College last week and took that occasion to announce that he had provided for an honorarium of \$50 to be awarded annually to a senior or graduate student in the Veterinary College for advanced work or research in pathology or bacteriology. Dr. Hollingworth is president of the

Central New York Veterinary Medical Association and is a former president of the State Veterinary Medical Society. He has taken an active part in the campaign for the better inspection and protection of the milk supply and is widely known for his work in connection with that campaign. He said that his gift was made in appreciation of the great importance of a better and more technical knowledge of the communicable animal diseases.

#### WANT PHILLIPS TO STAY.

Captain E. L. Phillips '91, 13th Cavalry, U. S. A., who has been professor of military science and tactics at Cornell since the fall of 1908, has been ordered to join his regiment on August 1, 1911, when the term of his present detail will end. Heretofore, when requested by the University to do so, the War Department has granted an extension of a year in the detail. The University has requested that Captain Phillips be allowed to remain for another year in charge of the department of military science and tactics. Details such as the one at Cornell have increased gradually during recent years until there are at present about 600 officers in detached service. The places of these officers are for the most part vacant, and the War Department is trying to get a sufficiently introduced in Congress a year ago to provide for 600 more commissions was passed after the number was cut to 200.

ROWING.

**Harvard to Come Here on May 27 — Varsity Crew Shake-up.**

During the week the good news was received that the Harvard rowing management had consented to meet Cornell in varsity and freshman races at Ithaca on Saturday, May 27. The matter had been held open because the Harvard management wanted to have the races a week earlier, but May 27 is the only University holiday of the spring at Cornell, set aside by the faculty particularly for the regatta, and the Cornell management therefore was especially desirous to have that date chosen. The Spring Day show will be held on the campus in the morning of May 27, and in the afternoon, before the regatta, there will be a baseball game with Yale.

Courtney "shook up" the squad during the week. The 1911 crew, winner of two freshman, one junior and four varsity races, is no more. H. R. Lafferty, who was not a member of that combination but who rowed in the four last June, is the only senior in the squad. The new first combination of varsity men is as follows:

Bow, C. H. Elliott '13; 2, C. S. Bates '13; 3, B. A. Lum '13; 4, E. H. Dole '13; 5, G. B. Wakeley '12; 6, W. G. Distler '12; 7, C. B. Ferguson '12; stroke, E. F. Bowen '12; coxswain, H. J. Kimball '11.

This crew went on the water together for the first time Wednesday. It is said that the men rowed exceptionally well. The crew is made up of Wakeley and Bowen from the varsity eight of last year. Ferguson and Distler of the 1910 four, and Elliott, Bates, Dole and Lum of the freshman squad of last season. The arrangement is peculiar in that Bowen, Distler and Dole are all experienced strokes.

A cold wave drove the oarsmen back to the machines on Thursday and practice was held in the crew room for the remainder of the week. Three other varsity combinations are rowing.

INTERCOLLEGE CARNIVAL.

Not for nothing had the "Ags" been practicing daily in the Animal Husbandry building for the intercollegiate carnival which was held in the Armory Saturday. As a result of the skill of their team in the unique events which make up the carnival program, the two

barrels of apples will be eaten this year by the agriculturists. The claim of the "Ags" to the victory was not entirely undisputed. The College of Arts and Sciences, which won the apples last year, was a close second. The score of the carnival was as follows: Agriculture, 23 1-2; Arts, 21 1-2; Civil Engineering, 16 1-2; Sibley, 9 1-2; Architecture, 2; Veterinary, 2; Law, 1.

As a result of the carnival the colleges now rank as follows in points scored in the race for the intercollegiate championship: Agriculture, 31; Sibley, 25; Civil Engineering, 21; Arts, 15; Law, 14; Veterinary, 13 1-2; Architecture, 7 1-2.

ATHLETIC NOTES.

**Mr. Wason Gives \$100 for the Sibley Gig.**

Charles W. Wason '76, of Cleveland, has given \$100 toward the fund which the students of Sibley College are raising to purchase a gig for their crew. The gig complete with oars will probably cost \$625. Of this sum the students and faculty have already subscribed \$260 and Mr. Wason's gift brings the amount to within \$265 of the sum needed. A systematic canvass of the students who have not yet subscribed is being made. The intercollegiate crews were still practicing indoors this week, with 165 men registered. Mr. Wason's gift was announced at the Sibley banquet last Friday by Director Smith, who noted the fact that Wason was the first Commodore of the Cornell Navy, acting as manager of the crews that rowed at Saratoga in '75 and '76.

Lacrosse practice was held out of doors for a few afternoons last week. Because of the soggy condition of Alumni Field, it was impossible to practice there and the squad worked on the Armory green. Only a short time is now left in which to prepare the men for the southern trip. The Mount Washington Lacrosse Club, Johns Hopkins, the Navy and Lehigh are to be played while the team is south this year.

A game of soccer football was scheduled for Saturday between Cornell and the Auburn Theological Seminary, but it was postponed because of the soggy condition of the ground. Cornell is to play its first league game with Columbia on March 25.

An assistant manager of football is to be elected tomorrow.

BASEBALL.

**Squad Cut to Forty—Scanlon Instructs the Battery Men.**

"Doc" Scanlon of the Brooklyn National League team assisted Coach Coogan with the baseball work during the past week, giving his particular attention to the batteries. General practice was given up for two days in order that more attention might be given to the pitchers and the catchers. The instruction in the Armory cage was supplemented in the evenings by talks in which Scanlon explained some finer points of pitching and catching.

The squad has been cut to forty in order to facilitate practice in the cage. When the team gets out of doors the men who have been dropped are to have another chance to try for the team. Following is the list of men whom Coach Coogan has retained:

Pitchers—Octavio Carvajal, '11; C. E. Emmons '12; C. R. Hightower '12; E. D. Burkart '13; H. T. Canfield '13; T. K. Gally '13; R. B. Krogstad '13; E. D. Nesbit '13; F. B. O'Connor '13, and Walter Wellman '13.

Catchers—C. A. Abbott '12; G. H. Morris, jr., '13; E. W. Butler '13; J. J. McCormick '13; H. O. Underhill '13, and J. H. Smith '13.

Infielders—W. A. Dauenhauer '11, D. A. Howard '11, E. B. Magner '11, K. W. Gass '12, R. T. Isett '12, A. L. Johnson '12, J. E. Kessler '12, L. C. Mahoney '12, J. E. Kessler '12, L. B. Clute '13, P. P. Keller '13, E. H. Lemon '13 and Edward Trainer '13.

Outfielders—Eugene Dugan '11, C. E. Thomas '11, E. E. Thompson '11, J. D. Vincent '11, M. A. Gordon '12, L. C. Pritchard '12, D. D. Ward '12, L. S. Ward '12, R. B. Whyte '12, O. J. Pierce '13 and J. H. O'Connell '13.

E. W. Butler, who is suffering from a strained cartilage in his throwing arm, is still retained on the squad, for there is said to be a possibility that he will be in condition to play. It was lately reported that Butler could not play this season. He is one of the most promising candidates for catcher.

A further cut is to be made in the squad this week, which will reduce the number to thirty. About twenty men will be taken on the southern trip during the Easter recess.

Next Saturday the intercollegiate fencing preliminaries will be held at West Point.

### SUBSCRIPTION—\$3.00 Per Year.

Published by the Cornell Alumni News Publishing Company. John L. Senior, President, Woodford Patterson, Secretary and Treasurer. Office: 110 North Tioga Street, Ithaca, N. Y.

Published weekly during the college year and monthly in July and August, forty issues annually. Issue No. 1 is published the first Wednesday of the college year, in October, and weekly publication (numbered consecutively) continues through Commencement week. Issue No. 40, the final one of the year, is published the last Wednesday in August and contains a complete index of the entire volume.

Single copies, ten cents each. Foreign postage, 40 cents per year. Subscriptions payable in advance.

Should a subscriber desire to discontinue his subscription, notice to that effect should be sent in before its expiration. Otherwise it is assumed that a continuance of the subscription is desired.

Checks, drafts and orders should be made payable to the Cornell Alumni News.

All correspondence should be addressed—

CORNELL ALUMNI NEWS,  
Ithaca, N. Y.

WOODFORD PATTERSON  
Editor.

FREDERICK KÜHNE  
Business Manager.

JAMES B. WALKER, JR.  
Assistant Business Manager.

Entered as Second-Class Matter at Ithaca, N. Y.

Ithaca, N. Y., March 22, 1911.

The Book of Views of the Campus, which we mentioned two weeks ago as one of the official publications of the University, may be obtained, as we should perhaps have added, from the Registrar. A price of 25 cents has been put on this booklet on account of the cost of publishing it.

In about everything but name the four year course in chemistry, which is to be honored with a special degree, is a college by itself. And it is not such a small college either. It has more students now than the Veterinary College has, more than the College of Architecture had three years ago, and it is larger than the College of Agriculture was ten years ago. The profession of chemist is becoming well defined, although the trained chemist's knowledge is applied to a surprising variety of industrial problems. Graduates of the special course at Cornell

are concerned in the manufacture of steel, rubber, cement, pure foods, drugs, aluminum, copper, zinc, oil, salt, asphalt and paper. The demand in the industries is for something more than men who are merely able to analyze what is set before them. The modern chemist has to be capable of improving manufacturing methods and devising new processes. The department at Cornell was one of the earliest in the country to discern the coming demand and to prepare for it.

Volume 1, number 1 of the Cornell Chemist was issued this winter. It is a typewritten mimeographed volume of nineteen pages, containing news of the department of chemistry. It is published for free distribution among graduates of the department and the plan is to publish three numbers a year. Its purpose is threefold, to tell what is going on in Morse Hall, to report suggestions and ideas received from alumni as to the curriculum and to afford a means of exchange of ideas among the alumni of the department themselves. It is edited by members of the faculty and is written in a breezy style.

A bill to establish in Southern California a state institute of technology of collegiate rank has been defeated the California senate, and most friends of higher education will probably think that the state is to be congratulated on the result. The proposed institute would have duplicated the technical departments of the University of California. Those who opposed the bill and defeated it used the argument that one adequate university was all that the taxpayers of a state could adequately support. Andrew D. White used a similar argument forty-odd years ago in the New York legislature when he saved the land grant for Cornell.

### Cornell Wrestlers "Peeved."

The wrestling team defeated Columbia in New York on Saturday night, winning five bouts to two. On the preceding night, at South Bethlehem, the team met Lehigh. The first four bouts had been contested and the score stood 3 to 1, in Cornell's favor. In the fifth bout, Allen, of Cornell, was disqualified for roughness. The Cornell team thereupon left the floor and forfeited the meet to Lehigh.

### UNIVERSITY CALENDAR.

#### Wednesday, March 22.

Campus Club—Meeting. Barnes Hall, 4 to 6 p. m.

Y. W. C. A.—Regular mid-week meeting. Barnes Hall, 7:15 p. m.

Agassiz Club Lecture—Professor Duggar. Truffle Production in the Mediterranean Region. McGraw Hall, South Wing, 7:30 p. m.. The public is cordially invited.

College of Arts and Sciences and Alliance Francaise Lecture—Professor Gustave Michaut, Professor of Literature, University of Paris. Moliere. Goldwin Smith Hall, Room B, 8:15 p. m.

#### Thursday, March 23.

Sanitary Science and Public Health Lecture—Dr. H. H. Crum, Health Officer, Ithaca. The Supervision of Infectious Diseases. Goldwin Smith Hall, Room A, 12 m.

Popular Lectures on Greek Sculpture—Mr. Andrews. VI. The Athenian Grave Reliefs. Goldwin Smith Hall, Museum of Casts, 5 p. m.

C. U. C. A.—Regular mid-week meeting. Barnes Hall, 7:15 p. m.

#### Friday, March 24.

Organ Recital—Sage Chapel, 5 p. m.

Junior Feed—Dutch Kitchen, 7 p. m.

Lectures on Professional Opportunities for Women: IV. Dr. Katherine Bement Davis, Superintendent for the New York State Reformatory for Women at Bedford. Women in the Civil Service. Sage College Drawing Room, 8 p. m.

The Cornell Bacteriological Association—Meeting. Agronomy Building, College of Agriculture, Room 152, 8 p. m.

#### Saturday, March 25.

Agassiz Club Field Trip—Leader, Professor Harris. Subject, Geological Formations. McGraw Hall, North Wing, 2 p. m.

Association of Civil Engineers—Eighth Annual Banquet. Ithaca Hotel, 7 p. m.

#### Sunday, March 26.

Sage Chapel—The Rev. Francis E. Clark, D. D. President, The United Society of Christian Endeavor, Boston, Mass. Morning service at 11 o'clock. Vesper service at 3:15 o'clock.

### ALUMNI ASSOCIATIONS

#### Philadelphia.

The twenty-seventh annual banquet of the Cornell Club of Philadelphia was held on March 16 at the University Club. The toastmaster was James Mapes Dodge '71. President Schurman was the principal speaker. He illuminated different phases of the University's activities, spoke of the work of various departments and the probable future development of some of the colleges, notably that of agriculture, and commended on the advantages of the new location of

Alumni Field. Franklin Spencer Edmonds '95 spoke on Cornell men in politics, and George Bruce Davidson '84 discussed the affairs of the club and advocated the early purchase of a house. George Edward Stevenson '81 told some of his reminiscences. A feature of the dinner was an open discussion with President Schurman, in which many took part. Almost all the classes were represented in the attendance, which numbered about seventy alumni.

#### Spokane.

A most successful Cornell dinner was held in the University Club of Spokane, Washington, on Wednesday, March, 8. A committee was appointed to arrange for monthly meetings. Those present were W. C. Stone '95, H. G. Miller '96, H. M. Hart '96, W. E. Chase '00, Laurence S. Haskin '02, Newton C. Fassett '04, Ernest V. Price '04, William G. Kennedy '06, Harold G. Stern '06, George W. Roddewig '06, W. T. Harrison '07, H. G. Harrison '07, Stanley Z. Smith '09, C. M. Fisher '10, and K. V. Rothschild '12.

#### Brooklyn.

Several dozen Cornellians gathered at the University Club of Brooklyn, on Lafayette avenue, on Tuesday evening, March 14, and enjoyed an informal smoker under the auspices of the Cornell Association of Brooklyn. The occasion was made especially enjoyable by the absence of speeches. Stories were told by nearly all present, and the Cornell songs were sung, with Lou Sieling '07 at the piano. A pair of Ethiopian musicians had been engaged, and they contributed the largest share of the entertainment.

Foremost on the program of stories was Romeyn Berry '04, who drew on his inexhaustible fund of anecdotes and yarns and was greatly appreciated. He started in with his famous oyster story, which has been the feature of many undergraduate and alumni affairs and which never seems to grow old.

William A. Moss crop '88, president of the association, was toastmaster. He allowed very few to escape providing their share of the program.

Some of those present were Dr. Herbert D. Schenck '82, Evarts L. Prentiss '83, F. D. Ingalls '84, William A. Moss crop '88, C. F. Horne '97, W. W. Macon '98, Harry R. Cobleigh '01, Richardson Webster '02, Romeyn Berry '04, L. E. Meeker '04, Charles L. Mulligan '07, Louis J. Sieling '07, Ben

### CORNELL WOMEN'S CLUBS.

#### Cleveland.

The Cornell Women's Club of Cleveland held its first luncheon as an organized and federated club on March 4 in the Egyptian room at Telling's Restaurant, Euclid avenue. Other informal luncheons had been held in previous years. The nomination for trustee of Mrs. William Vaughn Moody, which was made recently by the Federation of Cornell Women's Clubs, was heartily endorsed. The question of a large dormitory or small halls of residence was also discussed in connection with the gift of Mrs. Russell Sage. The majority favored the small halls. A history of the club, its aims and interests, was given by the president, Mrs. Charles R. Miller '80, and many pleasing reminiscences were told by members present.

#### Chicago.

A large number of Cornell women met on Saturday, March 11, at the home of Mrs. Frank Cary in Chicago and organized the Cornell Women's Club of Chicago and Vicinity. The following officers were elected: President, Mrs. Frank Cary (Harriet Heyl) '81; vice-president, Miss Harriet Hinman Bisbee '91; secretary-treasurer, Mrs. Robert Warren Sailor (Queenie N. Horton) '09; directors, Mrs. Paul Shorey (Emma Large Gilbert) '90 and Mrs. Harry H. Lobdell (Nellie Frost Lamson) '91.

The club formally endorsed the nomination of Mrs. William Vaughn Moody of Chicago for the office of alumni trustee and joined the Federation of Cornell Women's Clubs.

The address of the secretary, Mrs. Robert Warren Sailor, is 6111 Washington Boulevard, Oak Park, Ill.

Dr. J. H. Pryor of Rochester and Dr. Lawrence Brown of the Trudeau sanitarium were the lecturers before the class in sanitary science and public health last week. Both spoke on the subject of tuberculosis.

April 1 is the date of the Cornell dinner at Buffalo.

### PLANS FOR SIBLEY COLLEGE.

(Continued from Page 279.)

for in the memorandum of the Director. This building should be built first and its construction ought to be begun early in 1911. It would be occupied by the wood working and machine shops, and it would eventually house work which probably will be substituted for the present forge work.

Second—After completion of the building designated as "C," the present shop building should be immediately removed and a new three-story laboratory building should be erected on that site. This building (designated as "A") would accommodate the Mechanical Laboratory. It would be 47 x 210 feet, inside, and would have, as extensions, a three-story wing 24 x 45 feet, a one-story boiler room 38 x 60 feet and the present experimental boiler room would be roofed over (one story) for condenser and pump pit.

This plan provides for utilization of the present boiler pit, the existing stack and possibly the coal bunkers now in use. It also avoids moving the large experimental engine, thus saving a considerable sum on the engine setting. The building would provide for the Mechanical Laboratory approximately 36,000 square feet of floor space, slightly less than that suggested by the Director of the College.

Third—The laboratory of the department of electrical engineering could be moved into the present Mechanical Laboratory building, after the latter is vacated. As the Director of the College states, this would not be altogether satisfactory as a permanent arrangement. It would, however, afford much relief for the electrical work. If by the time this stage of the development is reached it appears probable that a new Chemical Laboratory may be erected, the electrical department would look to the possession of Morse Hall as its permanent home. In that case the present Mechanical Laboratory building, or a new building on its site, would be available for extension of other departments of the college. If, at the time the new Mechanical Laboratory is completed, there is no prospect of a new Chemical Laboratory, the building designated "B" should be erected for a permanent Electrical Laboratory.

Fourth—The foundry and forge shop can remain in the present location for the time being, but probably the forge work would be transferred eventually to the shop building ("C") and a one-story foundry building should then be erected either on the present Mechanical Laboratory site (in case building "B" is not needed) or, preferably, the foundry would be erected on the site of the present repair shop, in the rear of Franklin Hall.

Fifth—If required for lecture or drafting rooms, or if desired to complete the architectural features of the main Sibley College building, the "pavilions" originally planned would be erected at each end of the structure.
