As of October 1, 1966

NEW YORK STATE COLLEGE OF AGRICULTURE

State Appropriated Funds

The traditional method of appropriating State Fund support to the Statutory Units by the procedure of "line-item" control was terminated with the 1965-66 fiscal year. Effective for fiscal 1966-67, State Fund support is made available as a "lump-sum". The budget process for the Statutory Units now has a degree of flexibility which permits maximum utilization of available support in reaching established objectives in the areas of instruction, research, and public service.

The concept of program budgeting has also been officially introduced. This new budgetary procedure provides the mechanism of budget development, request, establishment, adjustment, and reporting along with a control system of fund management and utilization.

The level of total State Fund support for current operations for fiscal 1966-67 is at $11,481,081. This represents an increase of $1,014,157 over the previous fiscal year. The increase is accounted for as follows:

A. Recommended increase of support as presented in Executive Budget in recognition of increased workload requirements, improvements needed in existing programs and for new program ventures.	$ 447,076
B. The Supplemental budget provided support to specific teaching, research and public service programs.	150,000
C. Salary adjustments beyond normal increments for non-professional staff as of April 1, 1966	166,238
D. Salary adjustments beyond normal increments for professorial and other professional staff at July 1, 1967. Funding requirement for fiscal 1966/67 at $288,571 less provision for savings of $37,728.	250,843
	$1,014,157

NEW YORK STATE COLLEGE OF HOME ECONOMICS

BUDGET 1966-67

As of October 1, 1966

NEW YORK STATE COLLEGE OF HOME ECONOMICS

State Appropriated Funds

The traditional method of appropriating State Fund support to the Statutory Units by the procedure of "line-item" control was terminated with the 1965-66 fiscal year. Effective for fiscal 1966-67, State Fund support is made available as a "lump-sum". The budget process for the Statutory Units now has a degree of flexibility which permits maximum utilization of available support in reaching established objectives in the areas of instruction, research, and public service.

The concept of program budgeting has also been officially introduced. This new budgetary procedure provides the mechanism of budget development, request, establishment, adjustment, and reporting along with a control system of fund management and utilization.

The level of total State Fund support for current operations for fiscal 1966-67 is at $2,799,519. This represents an increase of $385,673 over the previous fiscal year. The increase is accounted for as follows:

A. Recommended increase of support as presented in Executive Budget in recognition of increased workload requirements, improvements needed in existing programs and for new program ventures.	$267,929
B. The Supplemental budget provided support to specific teaching, research and public service programs.	35,000
C. Salary adjustments beyond normal increments for non-professional staff as of April 1, 1966	23,805
D. Salary adjustments beyond normal increments for professorial and other professional staff at July 1, 1967. Funding requirement for fiscal 1966/67 at $67,804 less provision for savings of $8,865.	58,939
	$385,673

CORNELL UNIVERSITY

NEW YORK STATE VETERINARY COLLEGE

BUDGET 1966-67

As of October 1, 1966

NEW YORK STATE VETERINARY COLLEGE

State Appropriated Funds

The traditional method of appropriating State Fund support to the Statutory Units by the procedure of "line-item" control was terminated with the 1965-66 fiscal year. Effective for fiscal 1966-67, State Fund support is made available as a "lump-sum". The budget process for the Statutory Units now has a degree of flexibility which permits maximum utilization of available support in reaching established objectives in the areas of instruction, research, and public service.

The concept of program budgeting has also been officially introduced. This new budgetary procedure provides the mechanism of budget development, request, establishment, adjustment, and reporting along with a control system of fund management and utilization.

The level of total State Fund support for current operations for fiscal 1966-67 is at $2,285,841. This represents an increase of $300,674 over the previous fiscal year. The increase is accounted for as follows:

A. Recommended increase of support as presented in Executive Budget in recognition of increased workload requirements, improvements needed in existing programs and for new program ventures.	$164,639
B. The Supplemental budget provided support to specific teaching, research and public service programs.	40,000
C. Salary adjustments beyond normal increments for non-professional staff as of April 1, 1966.	46,006
D. Salary adjustments beyond normal increments for professorial and other professional staff at July 1, 1967. Funding requirement for fiscal 1966/67 at $57,553 less provision for savings of $7,524.	50,029
	$300,674

BUDGET L966-67

As of October 1, 1966

NEW YORK STATE SCHOOL OF INDUSTRIAL AND LABOR RELATIONS

State Appropriated Funds

The traditional method of appropriating State Fund support to the Statutory Units by the procedure of "line-item" control was terminated with the 1965-66 fiscal year. Effective for fiscal 1966-67, State Fund support is made available as a "lump-sum". The budget process for the Statutory Units now has a degree of flexibility which permits maximum utilization of available support in reaching established objectives in the areas of instruction, research, and public service.

The concept of program budgeting has also been officially introduced. This new budgetary procedure provides the mechanism of budget development, request, establishment, adjustment, and reporting along with a control system of fund management and utilization.

The level of total State Fund support for current operations for fiscal 1966-67 is at $2,094,999. This represents an increase of $248,767 over the previous fiscal year. The increase isaaccounted for as follows:

A. Recommended increase of support as presented in Executive Budget in recognition of increased workload requirements, improvements needed in existing programs and for new program ventures.	$175,727
B. Salary adjustments beyond normal increments for non-professional staff as of April 1, 1966.	28,534
C. Salary adjustments beyond normal increments for professorial and other professional staff at July 1, 1967. Funding requirement for fiscal 1966/67 at $51,200 less provision for savings of $6,694.	44,506
	$248,767

State Appropriated Funds

The traditional method of appropriating State Fund support to the Statutory Units by the procedure of "line-item" control was terminated with the 1965-66 fiscal year. Effective for fiscal 1966-67, State Fund support is made available as a "lump-sum". The budget process for the Statutory Units now has a degree of flexibility which permits maximum utilization of available support in reaching established objectives in the areas of instruction, research, and public service.

The concept of program budgeting has also been officially introduced. This new budgetary procedure provides the mechanism of budget development, request, establishment, adjustment, and reporting along with a control system of fund management and utilization.

The level of total State Fund support for current operations for fiscal 1966-67 is at $2,377,813. This represents an increase of $245,036 over the previous fiscal year. The increase is accounted for as follows:

A. Recommended increase of support as presented in Executive Budget in recognition of increased workload requirements, improvements needed in existing programs and for new program ventures.	$114,223
B. Salary adjustments beyond normal increments for non-professional staff as of April 1, 1966	68,562
C. Salary adjustments beyond normal increments for professorial and other professional staff at July 1, 1967. Funding requirement for fiscal 1966/67 at $71,614 less provision for savings of $9,363.	62,251
	$245,036

State Appropriated Funds

The traditional method of appropriating State Fund support to the Statutory Units by the procedure of "line-item" control was terminated with the 1965-66 fiscal year. Effective for fiscal 1966-67, State Fund support is made available as a "lump-sum". The budget process for the Statutory Units now has a degree of flexibility which permits maximum utilization of available support in reaching established objectives in the areas of instruction, research, and public service.

The concept of program budgeting has also been officially introduced. This new budgetary procedure provides the mechanism of budget development, request, establishment, adjustment, and reporting along with a control system of fund management and utilization.

The level of total State Fund support for current operations for fiscal 1966-67 is at $2,374,636. This represents an increase of $236,440 over the previous fiscal year. The increase is accounted for as follows:

A. Recommended increase of support as presented in Executive Budget in recognition of increased workload requirements, improvements needed in existing programs and for new program ventures	$151,500
B. Salary adjustments beyond normal increments for non-professional staff as of April 1, 1966	83,517
C. Salary adjustments beyond normal increments for professorial and other professional staff at July 1, 1967. Funding requirement for fiscal 1966/67 at $1,637 less provision for savings of $214.	1,423
	$236,440
