Fall. 4 credits. Prerequisites: Mathematics 431, 611, 621. Not offered 1999–2000.
Topics: the Prime Number Theorem. Primes in Arithmetic Progressions. The Large Sieve and Some of its Applications.]

[MATH 649 Lie Algebras
Fall. 4 credits. Not offered 1999–2000.
Nilpotent, solvable and reductive Lie algebras. Enveloping algebras. Root systems, Coxeter groups. Classification of simple algebras.]

MATH 650 Lie Groups
Spring. 4 credits.
Topological groups, Lie groups. Relation between Lie groups and Lie algebras. Exponential map, homogeneous manifolds. Invariant differential operators.

MATH 651 Introductory Algebraic Topology
Spring. 4 credits.
Fundamental group and covering spaces. Homology theories for complexes and spaces.

MATH 652–[653] Differentiable Manifolds
652, fall; 653, spring. 4 credits each. Prerequisites: advanced calculus, linear algebra (Mathematics 431), point set topology (Mathematics 453). This is an introduction to differential geometry and differential topology at the level of the beginning graduate student. 653 not offered 1999–2000.
Topological manifolds. Smooth manifolds, immersions and embeddings, tangent bundles, fiber bundles, vector fields and dynamical systems, Froebenius' theorem. Lie groups. Integration on manifolds, differential forms. Stokes theorem. Connections, Riemannian manifolds, geodesics, curvature, Gauss-Bonnet theorem. Tubular neighborhoods, transversality and cobordism.

MATH 661 Geometric Topology
Fall. 4 credits.
An introduction to some of the more geometric aspects of topology and its connections with group theory. Possible topics: surface theory, 3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, hyperbolic manifolds.

MATH 662 Riemannian Geometry
Spring. 4 credits.
Linear connections, Riemannian metrics and parallel translation. Covariant differentiation and curvature tensors. The exponential map, the Gauss Lemma and completeness of the metric. Isometries and space forms, Jacobi fields and the theorem of Cartan-Hadamard. The first and second variation formulas. The index form of Morse and the theorem of Bonnet-Myers. The Rauch, Hessian, and Laplacian comparison theorems. The Morse index theorem. The conjugate and cut loci. Submanifolds and the Second Fundamental form.

MATH 671–672 Probability Theory
671, fall; 672, spring. 4 credits each. Prerequisite: a knowledge of Lebesgue integration theory, at least on the real line. Students can learn this material by taking parts of Mathematics 413–414 or 621. Prerequisite for Mathematics 672: Mathematics 671.
Properties and examples of probability spaces. Sample space, random variables, and distribution functions. Expectation and moments. Independence, Borel-Cantelli lemma, zero-one law. Convergence of random variables, probability measures, and characteristic functions. Law of large numbers. Selected limit theorems for sums of independent random variables. Markov chains, recurrent events. Ergodic and renewal theorems. Martingale theory. Brownian motion and processes with independent increments.

MATH 674 Introduction to Mathematical Statistics
Spring. 4 credits. Prerequisites: Mathematics 671 or permission of instructor.
Topics include an introduction to the theory of point estimation, consistency, efficiency, sufficiency, and the method of maximum likelihood. Convexity and basic concepts of decision theory are introduced. Concepts of sequential methods may be discussed.

MATH 681 Logic
Spring. 4 credits.
Basic topics in mathematical logic, including propositional and predicate calculus; formal number theory and recursive functions; completeness and incompleteness theorems. Other topics as time permits.

MATH [711]–712 Seminar in Analysis
711, fall; 712, spring. 4 credits each. 711 not offered 1999–2000.

MATH 713 Functional Analysis
Spring. 4 credits.
Topological vector spaces. Banach and Hilbert spaces, Banach algebras. Additional topics to be selected by instructor.

MATH 715 Fourier Analysis
Fall. 4 credits.

MATH 717 Applied Dynamical Systems (also T&AM 776)
Spring. 4 credits. Suggested prerequisite: T&AM 675, Mathematics 617, or equivalent.
Review of planar (single-degree-of-freedom) systems. Local and global analysis. Structural stability and bifurcations in planar systems. Center manifolds and normal forms. The averaging theorem and perturbation methods. Melnikov's method. Discrete dynamical systems, maps and difference equations, homoclinic and heteroclinic motions, the Smale Horseshoe and other complex invariant sets. Global bifurcations, strange attractors, and chaos in free and forced oscillator equations. Applications to problems in solid and fluid mechanics.

MATH 722 Topics in Complex Analysis
Spring. 4 credits.
Selections of advanced topics from complex analysis, such as Riemann surfaces, complex dynamics, conformal and quasiconformal mapping. Course content varies.

MATH 728 Seminar in Partial Differential Equations
Fall. 4 credits.

MATH 731–732 Seminar in Algebra
731, fall; 732, spring. 4 credits each.

MATH 735 Topics in Algebra
Spring. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 737 Algebraic Number Theory
Fall. 4 credits.

MATH 739 Topics in Algebra
Fall. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

[MATH 740 Homological Algebra
Spring. 4 credits. Not offered 1999–2000.]

MATH 751–752 Seminar in Topology
751, fall; 752, spring. 4 credits each.

MATH 753–[754] Algebraic Topology
753, fall; 754, spring. 4 credits. 754 not offered 1999–2000.
The continuation of 651. Cohomology, cup products, Poincare duality, higher homotopy groups, fiber bundles, fibrations, vector bundles, characteristic classes, K-theory, spectral sequences, cohomology operations.

MATH 757–758 Topics in Topology
757, fall; 758, spring. 4 credits each.
Selection of advanced topics from modern algebraic, differential, and geometric topology. Course content varies.

MATH [761]–762 Seminar in Geometry
761, fall; 762, spring. 4 credits each. 761 Not offered 1999–2000.

MATH 767 Algebraic Geometry
Fall. 4 credits.

MATH 771–772 Seminar in Probability and Statistics
771, fall; 772, spring. 4 credits each.

MATH 777–778 Stochastic Processes
777, fall; 778, spring. 4 credits each.

MATH 781–782 Seminar in Logic
781, fall; 782, spring. 4 credits each.

MATH 783 Model Theory
Spring. 4 credits.

MATH 784 Recursion Theory
Fall. 4 credits.
Theory of effectively computable functions. Classification of recursively enumerable sets. Degrees of recursive unsolvability. Applications to logic. Hierarchies. Recursive functions of ordinals and higher type objects. Generalized recursion theory.

[MATH 785 Automata Theory
Fall. 4 credits. Prerequisite: Mathematics 481 or similar mathematical logic course at 400-level or higher. Not offered 1999–2000.
Basic results in finite and tree automata, including the algebraic approach to these topics. Buchi automata, with applications to computability theory and decidability problems. Rabin automata and their applications to decidability problems, boolean algebras, linear orderings, topology. Applications of automata theory to theoretical computer science in modal and temporal logic and concurrency.]

[MATH 786 Proof Theory
Fall. 4 credits. Not offered 1999–2000.
This course will cover basic ideas and methods of proof theory along with major recent developments motivated by computer science and knowledge presentation theory.

The topics will include Gentzen style and "natural" derivations, normalization theorems for classical and constructive logics, connections with the typed lambda calculus, Curry-Howard isomorphism, arithmetization of proof theory, incompleteness theorems, Loeb's theorem, modal logic of formal provability, models of arithmetic, consistency proofs and normalization theorems in typed lambda calculus.]

[MATH 787 Set Theory
Fall. 4 credits. Not offered 1999–2000.
Models of set theory. Theorems of Gödel and Cohen, recent independence results.]

MATH 788 Topics In Applied Logic
Fall. 4 credits.
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automatic theorem proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.

MATH 790 Supervised Reading and Research
Fall, spring. 1–6 credits.

MATH 901–902 Oliver Club Seminar

MATH 903–904 Olivetti Club Seminar

MATH 905–906 Occasional Seminar on Undergraduate Education

MATH 907–908 Educational Issues in Undergraduate Mathematics

MATH 911–912 Seminar in Analysis

MATH 913–914 Seminar in Dynamics and Geometry

MATH 949–950 Seminar in Lie Groups

MATH 951–952 Topics in Topology and Geometry

MATH 967–968 Seminar in Combinatorial and Algebraic Geometry

MUSIC

M. Scatterday, chair (on leave, fall 1999); M. Hatch, acting chair, fall 1999; S. Tucker, director of undergraduate studies (301 White Hall, 255–3423); R. Harris-Warrick, director of graduate studies (216 White Hall, 255–7141); M. Bilson, X. Bjerken, D. Borden, L. Case, D. Conn, L. Coral, M. Hatch, K. Hester, H. Hoffman, J. Hsu, J. Kellock, E. Murray, J. Peraino, S. Pond, D. Randel, A. Richards, R. Riley, D. Rosen, R. Sierra, S. Stucky, J. Webster, D. Yearsley, N. Zaslaw

Emeritus: W. Austin, K. Husa, S. Monosoff, R. Palmer, T. Sokol, M. Stith.

Department office: 255–4097.

Musical Performance and Concerts

Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

Vocal ensembles
- Cornell Chamber Singers
- Cornell Chorale
- Cornell University Chorus
- Cornell University Glee Club
- Sage Chapel Choir

Instrumental ensembles
- Chamber Music Ensembles
- Cornell Chamber Orchestra
- Cornell Experimental Lab Ensemble
- Cornell Gamelan
- Cornell Jazz Ensembles
- Cornell Symphony Orchestra
- Cornell University Chamber Winds
- Cornell University Symphonic Band
- Cornell University Wind Ensemble
- Cornell University Wind Symphony

Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall term and, where appropriate, each spring term as well.

The university is also home to many student-run musical organizations, including the Big Red Marching Band and Big Red Pep Band, the Cornell Savoyards, and several a cappella groups. Information about these groups, too, is available through the Department of Music office, 129 White Hall 1999–2000 (255–4097).

The Department of Music and the Faculty Committee on Music sponsor more than one hundred formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artists. The great majority of concerts are free and open to the public. Lectures and concerts are listed on the World Wide Web (http://www.arts.cornell.edu./music/). Additional information is available through the events office (255–4760).

Nonmajors

In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information consult the department office, 129 White Hall 1999–2000 (255-4097), or the director of undergraduate studies (255–3423).

The Major

Two options are available for the student planning to major in music. Each carries the study of music to an advanced level through the integration of performance, music theory, and music history. Option I is a general course, not necessarily oriented toward eventual graduate or professional work in music. Option II is a more specialized and concentrated program, suitable for students who want to prepare for graduate or professional work in music.

All students contemplating a major in music under either option should arrange for placement examinations and advising in the department as early as possible, usually during the freshman orientation period. Information is available from the director of undergraduate studies. All students are expected to have chosen an advisor from among the department faculty at the time of application for major status.

Option I presupposes some musical background before entering Cornell. Prerequisites for admission to the major are completion of Music 152 and 154, at the latest by the end of the sophomore year (the freshman year is preferable), with an overall grade of B- or better in each course. For further information, contact the director of undergraduate studies.

The requirements for the Bachelor of Arts degree with a major in music under Option I comprise the following:

1) in music theory: Music 251, 252, 253, 254, 351, 353, and one of the following: Music 451, 452, 453, 454, 455, 456.
2) in music history: sixteen credits in courses numbered 381 or above listed under Music History Courses for Majors. At least three of these courses must be drawn from the four-course sequence Music 381–384.
3) in performance: four semesters of participation in a musical organization or ensemble sponsored by the Department of Music (Music 331 through 346 and 421 through 448).

Option II presupposes considerable musical study before entering Cornell. Prerequisites for admission into the Option II program are previous acceptance as an Option I major and satisfactory completion of Music 252 and 254, normally by the end of the sophomore year. Students must apply to the department for formal acceptance as an Option II major. An Option II major concentrates in one of the three areas listed below. For Option II in performance, exceptional promise must be demonstrated, in part by a successful solo recital before the end of the sophomore year.

The requirements for the Bachelor of Arts degree with a major in music under Option II are:

1) completion of all the requirements for Option I, except as noted below, and
2) in addition:
   a) in performance:
      (1) the requirement for four semesters of participation in a musical organization or ensemble is waived (but such majors are expected to participate actively in chamber and other ensembles sponsored by the department);
      (2) sixteen credits in individual instruction in the student's major instrument, or voice, earned by taking Music 323–324 throughout the junior and senior years.
   b) in theory and composition or in history: twelve additional credits in this area of concentration at the 300 level or above, of which either four may be earned in Music 301 or 302 when taken once for four credits, or eight may be earned in Music 401–402.

Honors. The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty early in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. Senior year candidates enroll in Music 401–402 with the chair of the honors committee as instructor. Candidates will be encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, culminating in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. A comprehensive examination administered by the candidate's committee is held not later than May 1. The level of honors conferred is based primarily on the candidate's performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

Distribution Requirement

College of Arts and Sciences students may apply either one or two Music Department courses toward the distribution requirement in Group 4 (humanities and the arts). Neither freshman seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least 3 credits, and it may not be in musical performance (Music 321–322, 323–324) or in organizations and ensembles (Music 331 through 346 and 421 through 448).

If two music courses are counted for distribution, they must total at least 6 credits, and at least one of the courses must be academic, not performance-oriented. The second "course," however, may comprise **either** up to 4 credits earned in performance (Music 321–322, 323–324) **or** up to 4 credits earned in organizations and ensembles (Music 331 through 346 and 421 through 448), but not both.

Facilities

Music Library. The Music Library, in Lincoln Hall (White Hall 1999–2000), has an excellent collection of standard research tools. Its holdings consist of approximately one hundred-twenty thousand books, periodicals, and scores and forty-five thousand sound and video recordings. Particularly noteworthy are the collections of opera from all periods; twentieth-century scores and recordings; a large microfilm collection of Renaissance sources, both theoretical and musical; and a collection of eighteenth-century chamber music. In addition, the Department of Rare Books, in the Kroch Library, houses a collection of early printed books on music and musical manuscripts.

Concert Halls. The Department of Music sponsors more than one hundred concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 2,000), Alice Statler Auditorium (about 900), Sage Chapel (about 800) and Barnes Hall Auditorium (about 280).

Rehearsal Spaces. The orchestras and bands rehearse in Bailey Hall, Barnes Hall, and Barton Hall; the Jazz Ensembles, Gamelan, and Chamber Ensembles rehearse in Lincoln Hall; and the choral ensembles are quartered in Sage Chapel. Practice studios in Lincoln Hall (White Hall 1999–2000) are available for individual practice by pianists, vocalists, and instumentalists.

Twenty-two grand pianos and eight upright or studio pianos are housed in Cornell's offices, classrooms, and rehearsal spaces. In addition, our Center for Keyboard Studies includes two concert grand pianos (Steinway and Mason & Hamlin), two eighteenth-century fortepiano replicas (copies of Johann Andreas Stein and Anton Walter), an original Broadwood grand piano from 1827, an 1824 Conrad Graf fortepiano replica, one Dowd and one Hubbard harpsichord, and a Challis clavichord.

Digital/Electronic Equipment. A Macintosh Master studio is available for graduate student use (hours to be arranged) and occasional independent study use. The software used is Performer, Mosaic, Finale, and several Opcode patch editor/librarians. The instruments include a Yamaha KX88 MIDI Controller keyboard, a Yamaha TX802 FM synthesizer, an E-Mu Proteus XR, a Casio FZ 10M sampler and various other synthesizers. In addition, there are two MIDI work stations with additional instruments, including a Korg M1 synthesizer and an Akai S900 sampler.

Introductory Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

MUSIC 100 Elements of Musical Notation
Fall or spring, weeks 2–5. 1 credit. Prerequisite: concurrent enrollment in any three-credit course in music and permission of instructor. D. Conn.
This four-week course, given at the beginning of each term, will fulfill the requirement of basic pitch and rhythm and reading skills needed for introductory courses (except 101 and 103) and 200-level courses with prerequisites. The material covered in this course is no longer part of Music 105.

MUSIC 101 Popular Music in America: 1850–1985 (also AM ST 105) #
Fall. 3 credits. 1-hour disc to be arranged. M. Hatch.
A survey of the history and diverse streams of popular music in America. Elementary vocabulary and techniques for describing, analyzing, and evaluating music. Relationships between mainstream musics, tributaries, and side-streams, and between folk, art, and popular music.

MUSIC 103 Introduction to the Musics of the World @
Spring. 3 credits. 1-hour disc to be arranged. No previous training in music required. S. Pond.
Exploration of musical genres from selected regions of the world. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

MUSIC 105 Introduction to Music Theory
Fall, spring, or summer. 3 credits. Plus two hours to be arranged. Experience in reading music is recommended. Fall, S. Tucker; spring, D. Conn.
An elementary, self-contained introduction to music theory emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads; basic concepts of tonality; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Haydn and Beethoven.

MUSIC 107 Hildegard to Handel
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. R. Harris-Warrick.
The music of Western Europe from the Middle Ages through the Baroque period. Starting from Gregorian chant and the monophonic works of Hildegard von Bingen, this course will survey composers and repertoires such as the troubadors, the Notre Dame School, Renaissance sacred polyphony, madrigals, the dance suite, concertos, cantatas, and will end in the early 18th century with works by Vivaldi, Bach, and Handel.

MUSIC 108 Mozart to Minimalism
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. N. Zaslaw.
A survey of Western art music in many genres from the second half of the 18th century to the present. Composers whose music will be studied include Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Berlioz, Chopin, Wagner, Verdi, Liszt, Brahms, Mahler, Debussy, Strauss, Stravinsky, Bartók, Ives, Webern, Messiaen, Copland, Bernstein, Carter, Stucky, and Sierra.

MUSIC 201 Diction for Oral Presentation
Fall or spring. 1 credit. Prerequisite: permission of instructor. J. Kellock.
Introduction to the uses of the International Phonetic Alphabet for pronunciation of English, French, German, and Italian. Open to singers and non-singers. Assignments will vary according to musical experience. Singing students will be expected to perform their assignments. Students taking voice lessons for credit (321a–322a) must take Music 201 by the end of the third semester of lessons.

Music Theory

Students contemplating the music major are strongly advised to take Music 151, 152, 153, and 154 in the freshman year; in any case Music 152 and 154 must be completed no later than the end of the sophomore year. Students contemplating Option II must complete Music 252 and 254 by the end of the sophomore year.

MUSIC 151 Tonal Theory I
Fall. 3 credits. Prerequisites: admission by departmental placement exam and concurrent enrollment in or previous credit for Music 153, or equivalent. Intended for students expecting to major in music and other qualified students. E. Murray.
Detailed study of the fundamental elements of tonal music: rhythm, scales, intervals, triads; melodic principles and 2-part counterpoint; diatonic harmony and 4-part voice leading in root position and first inversion; analysis of phrase and period structure.

MUSIC 152 Tonal Theory II
Spring. 3 credits. Prerequisites: Music 151 and 153 or equivalent, and concurrent enrollment in or previous credit for Music 154. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 152 is required for admission to the music major. E. Murray.
Continued study of voice leading and harmonic progression, including diatonic modulation; analysis of binary and ternary forms.

MUSIC 153 Musicianship I
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 151. Intended for students expecting to major in music and other qualified students. 3 hrs. TBA. E. Murray.
Sight singing: diatonic melodies in treble, alto, and bass clefs. Keyboard: scales, triads, seventh chords, short diatonic chord progressions. Dictation: intervals, rhythms; short diatonic melodies; short diatonic chorale phrases. Score reading: 2 parts using treble, alto, and bass clefs. Musical terms: tempo markings and rhythmic terminology.

MUSIC 154 Musicianship II
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. 3 hrs. TBA. E. Murray.
Sight singing: longer melodies in 3 clefs, including diatonic modulation. Keyboard: diatonic chord progressions and sequences. Dictation: intervals, rhythms; longer melodies; chorale phrases with diatonic modulation. Score reading: 3 parts using treble, alto, and bass clefs. Musical terms: nuance and expression marks.

[MUSIC 239 Introduction to Improvisational Theory
Spring. 2 credits. Prerequisite: permission of instructor. Intended for performers in "jazz" and related styles. Not offered 1999–2000. Staff.
Tonal, modal, and blues harmonic resources, and the formal structures in which they are

embodied. Development of improvisational skills and creation of spontaneous compositions.]

MUSIC 251 Tonal Theory III
Fall. 3 credits. Prerequisites: Music 152 and 154 or equivalent, and concurrent enrollment in Music 253. D. Yearsley.
Continuation of diatonic and introduction to chromatic harmony; species counterpoint; composition in small forms.

MUSIC 252 Tonal Theory IV
Spring. 3 credits. Prerequisites: Music 251 and 253 or equivalent, and concurrent enrollment in Music 254. R. Sierra.
Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

MUSIC 253 Musicianship III
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 251. 2 hours TBA. D. Yearsley.
Sight singing: melodies with chromaticism in treble, alto, tenor, and bass clefs. Keyboard: diatonic modulation, chromatic chords. Dictation: melodies with modulation; chorale phrases with secondary dominants and other chromatic chords. Score reading: 4 parts using treble, alto, tenor, and bass clefs. Musical terms: orchestral ranges, terms, clefs, and transpositions.

MUSIC 254 Musicianship IV
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 252. 2 hours TBA. R. Sierra.
Sight singing: melodies in 4 clefs, including modality and chromatic modulation. Keyboard: chromatic sequences, chromatic modulations, improvised modulations employing diatonic pivot chords. Dictation: intervals, rhythms, short melodies and short, diatonic chorale phrases. Score reading: 4 parts, including transposing instruments. Musical terms: other terms in French, German, and Italian.

MUSIC 351 Materials of Twentieth-Century Music
Fall. 3 credits. Prerequisite: Music 252 and 254 or equivalent, and concurrent enrollment in Music 353. S. Stucky.
Introduction to some techniques of twentieth-century music including extended tonality, modes, twelve-tone technique, set theory and new approaches to form and rhythm. Analysis of representative works by Debussy, Bartók, Webern, Hindemith, Schoenberg, Stravinsky, and others.

MUSIC 353 Musicianship V
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 351. 2 hours TBA. S. Stucky.
Sight singing: advanced chromatic, twelve-tone, and atonal melodies in 4 clefs. Keyboard: continued chromatic harmony; improvised chromatic modulations. Dictation: continued chromatic harmony; atonal sets and melodies; 2-part counterpoint. Score reading: 4 clefs, transpositions. Music terms: twentieth-century terms.

MUSIC 451 Counterpoint
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. S. Stucky.
Composition in the polyphonic vocal style of the late Renaissance.

[MUSIC 452 Topics in Music Analysis
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1999–2000. J. Webster.
A survey of important analytical approaches to tonal music, including thematic-motivic relations, phrase-rhythm, large-scale paragraph construction, structural-tonal voice-leading, and relations among the movements in a multimovement work.]

[MUSIC 453 Introduction to Improvisational Theory
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1999–2000. Staff.
Study and performance of tonal, modal, and blues harmonic resources; introduction to the formal structures in which these resources are embodied. Includes ear training, work at the keyboard, composing short pieces, and analyzing selected representative works of popular music and African-American art music from 1940 to 1970.]

MUSIC 454 Composition
Fall. 4 credits. Prerequisite: Music 251 or permission of instructor. R. Sierra.

MUSIC 455 Conducting
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. S. Tucker.
Fundamentals of score reading, score analysis, rehearsal procedures and conducting technique; instrumental and choral contexts.

[MUSIC 456 Orchestration
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1999–2000.
Orchestration based on nineteenth- and twentieth-century models.]

Music in History and Culture

MUSIC 221 History of Rock Music (also AM ST 223)
Spring. 3 credits. No previous training in music required. J. Peraino.
This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to present-day genres of alternative rock and hip hop.

MUSIC 222 A Survey of Jazz (also AMST 222)
Fall. 3 credits. Enrollment limited. S. Pond.
This course will trace historical developments in jazz from its African roots to the current diverse spectrum of improvisational styles that form popular, neoclassic, and innovative contemporary jazz music.

MUSIC 245 Gamelan in Indonesian History and Cultures @
Fall or spring. 3 credits. Permission of instructor. No previous knowledge of musical notation or performance experience necessary. M. Hatch.
An introduction to Indonesia through its art. Elementary techniques of performance on the Javanese *gamelan*; a general introduction to Indonesian history and cultures, and the socio-cultural contexts for the arts there. Several short papers and one longer research report are required.

[MUSIC 261 Bach and Handel #
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999–2000. D. Yearsley.]

[MUSIC 262 Haydn and Mozart #
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999–2000. N. Zaslaw.
Music for courts, theaters, churches, concerts, dancing, marching, public and private ceremonies, and domestic use by two extraordinarily different musical personalities who were friends, explored in its historical and socio-cultural contexts.]

[MUSIC 263 Beethoven #
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999–2000. J. Webster.
A survey of Beethoven's life, works, and influence. While the primary focus will be his musical style and its development, the course will also cover social-cultural factors and the psychology and reception of genius.]

[MUSIC 264 Musical Romantics #
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999–2000. D. Rosen.
This survey of music from 1815 to 1900 will be divided into five segments focusing on five composers (Schubert, Berlioz, Verdi, Wagner, and Mahler) and two or three segments on broader topics, such as musical nationalism in Russia, fin de siècle Vienna, the art song, and the history of the piano and its music.]

MUSIC 274 Opera #
Fall. 3 credits. R. Harris-Warrick.
An introduction to major works of the operatic repertory, with discussion of texts and theatrical performances as well as music. Video recordings will be an integral part of the course; trips to live performances will be scheduled where possible.

MUSIC 275 Choral Sounds #
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. R. Harris-Warrick.
This course examines representative works composed for group singing, primarily from the Western choral tradition, but also including folk and popular styles, from the Middle Ages to the 20th century. Class will include discussion of performance practices as well as historical and stylistic issues, and will be integrated with local concert offerings.

MUSIC 276 The Orchestra and Its Music #
Fall. 3 credits. Prerequisite: any three credit music course or permission of instructor. N. Zaslaw.
The music of, and the social structures supporting, large instrumental ensembles in the Western world, including Italian court festivals of the 16th century, string bands of the 17th century, Lully's ascendency at Paris and Versailles, and music of Purcell, Corelli, Vivaldi, Bach, Handel, Haydn, Mozart, Beethoven, Schubert, Schumann, Mendelssohn, Berlioz, Liszt, Wagner, Brahms, Tchaikovsky, Bruckner, Mahler, Strauss, Stravinsky, Schoenberg, Webern, Bartók, Shostakovich, Messiaen, Copland, Carter, Tower, Stucky, Sierra, and others.

MUSIC 372 Mind and Memory (also ENGL 301, S HUM 301, and THETR 301)
Spring. 4 credits. D. Ackerman.
See S HUM 301 for description.

Music History Courses for Majors and Qualified Non-Majors

Prerequisite: Music 152 or permission of instructor. Intended primarily for music majors, these courses investigate selected topics and repertories from each period in some detail. Each course includes listenings, readings, oral and written papers, and analyses.

[MUSIC 374 Opera and Culture (also Gerst 374 and Itala 374)
Spring. 4 credits. Prerequisite: any three-credit music course or proficiency in German or Italian. Not offered 1999–2000. A. Groos.]

MUSIC 381 Music in Western Europe to 1700 #
Fall. 4 credits. J. Peraino.
Western European music from the Middle Ages to the early Baroque, including Gregorian chant, secular monophony, the development of polyphony, the birth of opera, and the rise of independent instrumental music.

MUSIC 382 Music of the Eighteenth Century #
Spring. 4 credits. A. Richards.
Music in Western and Central Europe and North America from Bach, Handel and Vivaldi to Haydn and Mozart, including comic and serious opera, church music, concert music, and social music.

[MUSIC 383 Music of the Nineteenth Century #
Fall. 4 credits. Not offered 1999–2000. D. Rosen.
A chronological survey of nineteenth-century music from Beethoven through Puccini including reference to its cultural and historical context.]

[MUSIC 384 Music of the Twentieth Century
Spring. 4 credits. Not offered 1999–2000. S. Stucky.
Movements, schools, and styles in "classical" music from the turn of the century to the present. Extensive listening and reading assignments for historical breadth; detailed attention to representative works for analytical depth.]

[MUSIC 388 Historical Performance Practicum #
Spring. 4 credits. Not offered 1999–2000. M. Bilson.
The study of 18th- and 19th-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.]

MUSIC 390 Culture of Renaissance II (also COMP LIT 362, ENG 325, HIST 364 ART H 351)
Spring. 4 credits. Plus discussion section. W. Kennedy and C. Kaske.
See Comparative Lit. 362 for description.

MUSIC 398–399 Independent Study in Music History
398, fall; 399, spring. 4 credits. Prerequisite: Music 152 and permission of instructor. Staff.
Advanced study of various topics in music history. Students enrolling in Music 398–399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects.

MUSIC 405 Operatic Contacts (also S HUM 405)
Fall. 4 credits. Limited to 15 students. Permission of instructor. A. Groos.
See S HUM 405 for description.

MUSIC 418 Exploring the Israeli Folksong (also S HUM 418)
Spring. 4 credits. Limited to 15 students. Permission of instructor. S. Burstyn.
See S HUM 418 for description.

MUSIC 474 Opera, History, Politics, Gender (also HIST 456, WOMNS 454, COML 459, S HUM 459, ITALA 456)
Spring. 4 credits. M. Steinberg and S. Stewart.
See HIST 456 for description.

[MUSIC 489 African American Music Innovators (also AS&RC 489)
Fall. 4 credits. Permission of instructor. Not offered 1999–2000.]

[MUSIC 490 American Musical Theatre (also English 454)
Spring. 4 credits. Not offered 1999–2000. To be offered 2000–01. S. McMillin.
See English 454 for description.]

MUSIC 491 American Popular Song
Fall. 4 credits. E. Murray and C. Greenspan.
A historical and analytical study of American popular song (primarily from the 1920s and 1950s), emphasizing Kern, Berlin, Rodgers and Hart, Porter, Gershwin and Harold Arlen, and including others such as Ellington. The interaction of music, lyrics, and performance will be among the topics considered. Live as well as recorded performances will be featured.

[MUSIC 492 Music and Queer Identity
Spring. 4 credits. Prerequisite: Music 152 or permission of instructor. Not offered 1999–2000. J. Peraino.
Throughout history music has been associated with "otherness" in Western cultures. Appropriately, lesbian and gay individuals and communities have turned to music as a means of expressing and negotiating their "queer" identity within status-quo culture. This course examines how and why music encodes "queerness" by focusing on various musical genres (such as opera, disco, women's music, country) and composer/musicians (such as Franz Schubert, Judy Garland, David Bowie) that have become significant for various lesbian and gay communities. The course will also examine the reasons behind the general popularity of queer-coded but "straight-identified" performers such as Elvis Presley, Prince, and Michael Jackson.]

[MUSIC 493 Women and Music (also WOMNS 496)
Spring. 4 credits. Prerequisite: Music 152 or permission of instructor. Not offered 1999–2000. J. Peraino.
This course introduces the students to a critical examination of women's participation in Western European and American musical traditions. The course will focus on the various subject positions and critical perspectives that women hold in examples of music and writings about music. Of primary importance will be the concepts of "objective" vs. "subjective" approaches to the topic of the week. Topics will include approaches to history and criticism, women composers, women performers, women as objects, women's music, drag and androgyny, and women as listeners. Students will be asked to keep a journal of their reactions to the readings, listenin]g assignments, and class discussions, and to write "objective" and "subjective" formal papers.]

MUSIC 494 Love, Sex, and Song in Medieval France (also WOMNS 403)
Spring. 4 credits. J. Peraino.
This course explores the cult of courtly love and its inextricable relationship with singing. We will focus on secular music and poetry and relevant narratives of Southern and Northern France from the twelfth and thirteenth centuries, and consider issues such as constructions of gender and gender relations, music and sexuality in the Middle Ages, medieval misogyny, women's voices in courtly love lyric, the relationship of words and music, performance context and reconstruction.

Independent Study

MUSIC 301–302 Independent Study in Music
301, fall; 302, spring. Credit to be arranged. Prerequisite: departmental approval. Presupposes experience in the proposed area of study. Staff.

Honors Program

MUSIC 401–402 Honors in Music
401, fall; 402, spring. 4 credits each term. Limited to honors candidates in their senior year. Staff.

Digital Music and New Media

MUSIC 120 Learning Music through Digital Technology
Fall or spring. 3 credits. Enrollment limited. Prerequisite: permission of instructor. D. Borden.
This course uses selected commercially available technological resources to produce live music. The student is expected to master the Macintosh computer, several music software programs, and several synthesizers using MIDI. The ability to read music is helpful but not necessary. There are no papers to write; homework is presented in three classroom concerts. The final is a live presentation of the student's final project in a concert open to the public.

MUSIC 220 Learning Counterpoint through Digital Technology
Spring. 3 credits. Enrollment limited. Prerequisite: 152 and permission of instructor. D. Borden.
This course is a study of traditional contrapuntal techniques from the fourteenth century to the present, with emphasis on invention and fugue. Synthesizers, samplers, MIDI, and music software will be covered. There are

three classroom concerts, some analysis and a final public concert.

MUSIC 391 Media Arts Studio I (also THETR 391, ART 391, ARCH 391)
Fall. 3 credits. Permission of instructor. See THETR 391 for description.

MUSIC 392 Media Arts Studio II (also THETR 392, ART 392, ARCH 392)
Spring. 3 credits. Permission of instructor. See THETR 392 for description.

MUSIC 420 Introduction to MIDI Techniques
Spring. 4 credits. Permission of instructor. D. Borden.
This course is an introduction to MIDI for students who are already at an advanced level in music composition. Three composition projects will be completed in collaboration with film, dance, and computer animation students.

[MUSIC 620 Introduction to MIDI Techniques
Spring. 4 credits. Permission of instructor. Not offered 1999–2000. D. Borden.]

Musical Performance

Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, violin, viola, cello, and some brass and woodwind instruments *to those students advanced enough to do college-level work in these instruments*. Lessons are available by audition only. They may be taken either without credit or, through Music 321–322, with credit. Other instruments may sometimes be studied for credit outside Cornell, but also by audition only (see Music 321h–322h).

Lessons for beginners. The Music Department can recommend outside teachers for those who wish to begin studying voice or an instrument. No credit is available for beginning instruction.

Auditions. Auditions are held at the beginning of each term for lessons for advanced students. Contact the Department of Music office (104 Lincoln Hall) for information.

Fees. The fee for a one-half hour lesson weekly, *without credit*, is $150 per term. For a one-hour lesson (or two half-hour lessons) weekly, *without credit*, the fee is $300. The fee in Music 321–322 for a one-hour lesson (or two half-hour lessons) *for credit* is $225 per term. All fees are non-refundable once lessons begin, *even if the course is subsequently dropped*.

Scholarships. Music majors receive a scholarship equal to the lesson fee listed above. Members of department-sponsored organizations and ensembles may, with the permission of the director of the organization, receive a scholarship of up to $150 of the Cornell fee for the type of lessons chosen during the term. These scholarships are intended only for lessons in the student's primary performing medium. Scholarship forms, available in the Music Department office, are to be returned to the office *within the first three weeks of classes*.

Practice rooms. Practice-room fees for twelve hours weekly are $50 per term and for six hours weekly are $40 per term for a room **with a piano**. Practice-room fees for twelve hours weekly are $25 per term and for six hours weekly are $15 per term for a room **without a piano**. The fee for the use of the **pipe organ** is $50 for twelve hours weekly and $40 for six hours weekly. All fees are non-refundable.

Earning credit. For every 4 credits earned in Music 321–322, the student must have earned, or currently be earning, at least 3 credits in another music course (excluding freshman seminars, Music 321–322, 323–324, 331–343, or 421 through 448). These 3 credits must be earned prior to, or simultaneously with the first 2 credits in 321–322; they cannot be applied retroactively. Transfer credit for appropriate music courses already taken elsewhere may be used to satisfy this requirement with the approval of the department chair.

Lessons taken outside Cornell. Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of Music 321h–322h and contact the Music Department office.

MUSIC 321–322 Individual Instruction in Voice, Organ, Harpsichord, Piano, Strings, Woodwinds, and Brass
Prerequisite: advanced students may register only after a successful audition with the instructor, usually scheduled during the first week of classes, and will receive credit only as described under "Earning credit," above. Students may register for this course in successive years.
Students, at the sole discretion of the instructor, earn 2 credits each term for a one-hour lesson (or two half-hour lessons) weekly accompanied by an appropriate practice schedule.

MUSIC 321a–322a Individual Instruction in Voice
321a, fall; 322a, spring. 2 credits each term. Prerequisite: successful audition. Music 201 must be taken by the end of the third semester of lessons. Limited enrollment. Attendance at weekly studio class required for *all* credit students. J. Kellock.
The Vocal Coaching Program offers noncredit lessons to members of the choral ensembles.

MUSIC 321b–322b Individual Instruction in Organ
321b, fall; 322b, spring. 2 credits each term. Prerequisite: successful audition. D. Yearsley.

MUSIC 321c–322c Individual Instruction in Piano
321c fall; 322c, spring. 2 credits each term. Prerequisite: successful audition. M. Bilson, X. Bjerken and staff.

MUSIC 321d–322d Individual Instruction in Harpsichord
321d, fall; 322d, spring. 2 credits each term. Prerequisite: successful audition. D. Yearsley.

MUSIC 321e–322e Individual Instruction in Violin or Viola
321e, fall; 322e, spring. 2 credits each term. Prerequisite: successful audition. L. Case.

MUSIC 321f–322f Individual Instruction in Cello
321f, fall; 322f, spring. 2 credits each term. Prerequisite: successful audition. H. Hoffman.

[MUSIC 321g–322g Individual Instruction in Brass
321g, fall; 322g, spring. 2 credits each term. Prerequisite: successful audition. Not offered 1999–2000. M. Scatterday.]

MUSIC 321h–322h Individual Instruction Outside Cornell
321h, fall; 322h, spring. 2 credits each term. Prerequisite: successful audition. Coordinator: D. Conn.
All the standard orchestral and band instruments, keyboard instruments, guitar and voice may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and when there is limited enrollment in Music 321–322. Prior approval and audition by a member of the faculty in the department is required, and credit may be earned only as described under "Earning credit," above. Additionally, a departmental petition must be completed by the end of the third week of classes. For information and a list of approved teachers, consult the department office, 104 Lincoln Hall/129 White Hall (1999–2000).

MUSIC 321i–322i Individual Instruction in Woodwinds
321i, fall; 322i, spring. 2 credits each term. Prerequisite: successful audition. D. Conn.

MUSIC 323–324 Advanced Individual Instruction
323, fall; 324, spring. 4 credits each term. Open only to juniors and seniors majoring in music under Option II with concentration in performance and to graduate students. Option II majors whose lessons must be taken outside Cornell may apply to the department for financial assistance toward the cost of lessons; $225 per semester will normally be awarded to such students.

Musical Organizations and Ensembles

Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only (usually at the beginning of each semester), except that the Sage Chapel Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than 8 credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

MUSIC 331–332 Sage Chapel Choir
331, fall or summer; 332, spring. 1 credit. No audition for admission. R. Riley.
Open to all students and members of the University. Varied and demanding repertoire. The Sage Chapel Choir sings regularly in the Sunday Service of Worship which is broadcast on 870 WHCU-AM radio, and on special occasions throughout the year.

MUSIC 333–334 Cornell Chorus
333, fall; 334, spring. 1 credit. Prerequisite: permission of instructor. W 5:15–7:15 p.m. plus 2 hours to be arranged. S. Tucker.

MUSIC 335–336 Cornell University Glee Club
335, fall; 336, spring. 1 credit. Prerequisite: permission of instructor. W 7:30–9:30 p.m., plus 2 hours to be arranged. S. Tucker.

MUSIC 337 Wind Symphony
Fall. 1 credit. Prerequisite: permission of instructor. M W 4:45–6:30. D. Conn.

MUSIC 338 Symphonic Band
Spring. 1 credit. Prerequisite: permission of instructor. M W 4:45–6:30. D. Conn.

MUSIC 339–340 Cornell Jazz Ensembles
339, fall; 340 spring. 1 credit. Prerequisite: permission of instructor. W 6–8 p.m. K. Hester.

MUSIC 342 Wind Ensemble
Spring. 1 credit. Prerequisite: permission of instructor. M 7:30–9:30 and R 4:45–6:30. M. Scatterday.

MUSIC 343–344 Cornell Symphony Orchestra
343, fall; 344, spring. 1 credit. Prerequisite: permission of instructor. W 7:30–10:00 p.m. E. Murray.

[MUSIC 345–346 Introduction to the Gamelan @
345 fall; 346 spring. 1 credit. Enrollment limited. Prerequisite: permission of instructor. M W 2:30–3:20. Not offered 1999–2000.
Concentrated instruction for beginning students in elementary techniques of performance on the Indonesian *gamelan*. Music 245 is a 3-credit course that complements the instruction in *gamelan* by an introduction to Indonesian history and cultures.]

MUSIC 421–422 Cornell Chamber Orchestra
421, fall; 422 spring. 1 credit. Prerequisite: permission of instructor. T 5–6:30 p.m. J. Hsu.
Study and performance of the chamber symphonies of Haydn, Mozart, and their contemporaries. For strings, woodwinds, and horns. More recent music may also be included in the spring.

MUSIC 437–438 Chamber Winds
437, fall; 438, spring. 1 credit each term. Prerequisites: enrollment in Symphonic Band, Wind Symphony or Wind Ensemble in the same semester as this course AND permission of instructor only. Fall, T R 4:45–6:30 p.m., D. Conn. Spring, T F 4:45–6:30 p.m., M. Scatterday.
A flexible instrumentation ensemble performing original woodwind, brass, and percussion music from Gabrieli brass choirs and Mozart serenades through more contemporary works such as Stravinsky's Octet and new music premiers. The ensemble will perform on wind symphony, symphonic band and wind ensemble concerts in addition to several chamber concerts throughout the year.

MUSIC 439–440 Experimental Lab Ensemble
439, fall; 440, spring. 1 credit each term. Permission of instructor. W 8:30–10:30 p.m. K. Hester.

MUSIC 441–442 Chamber Music Ensemble
441, fall; 442, spring. 1 credit. Prerequisite: permission of instructor. J. Hsu.
Study and perform chamber music works from duos to octets for pianists, string and wind players.

MUSIC 443–444 Chorale
443, fall; 444, spring. 1 credit each term. Prerequisite: permission of instructor. F 4:30–6:15 p.m. Staff.
Study and performance of selected choral music for mixed voices.

MUSIC 445–446 Cornell Gamelan Ensemble
445, fall; 446, spring. 1 credit each term. Enrollment limited. Prerequisite: permission of instructor. R 7:30–10:00 p.m. M. Hatch.
Advanced performance on the Javanese *gamelan*. Tape recordings of *gamelan* and elementary number notation are provided. Some instruction by Indonesian musicians is offered in most years.

MUSIC 447–448 Chamber Singers
447, fall; 448, spring. 1 credit each term. Prerequisite: permission of instructor. Plus 2 hours to be arranged. Shapovalov.

Graduate Courses

Open to qualified undergraduates with permission of instructor.

MUSIC 601 Introduction to Bibliography and Research
Fall. 4 credits. M 1:25–4. L. Coral.
This course explores the nature of the discipline and introduces the many types of bibliographic tools, both printed and electronic, needed to pursue research in music.

[MUSIC 602 Analytical Technique
Spring. 4 credits. Not offered 1999–2000. J. Webster.
A critical survey of various analyical methods in current use. Frequent analytical assignments and class presentations.]

[MUSIC 603 Editorial Practice
Spring. 4 credits. Not offered 1999–2000.]

[MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis
Spring. 4 credits. Open to graduate students in anthropology, linguistics, psychology, sociology, and other cognate fields with permission of instructor. Not offered 1999–2000. M. Hatch.
Major aspects of research into musical cultures of the world. Problems, theories, and methods, especially those affecting analytical terminology, transcription and analysis of sound events, and fieldwork.]

MUSIC 622 Historical Performance Practicum
Fall. 4 credits. M. Bilson.
The study of 18th- and 19th-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

[MUSIC 653 Topics in Tonal Theory and Analysis
Spring. 4 credits. Not offered 1999–2000. J. Webster.]

[MUSIC 654 Topics in Post-tonal Theory and Analysis
Spring. 4 credits. Not offered 1999–2000.]

MUSIC 657–658 Composition
657, fall; 658, spring. 4 credits each term. F 1:25–4:00 p.m. plus 1 hour to be arranged. R. Sierra, S. Stucky.

[MUSIC 674 German Opera (also German Studies 672)
Spring. 4 credits. Not offered 1999–2000. A. Groos.
See German Studies for description.]

MUSIC 677 Mozart: His Life, Works, and Times (also German Studies 757)
Spring. 4 credits. N. Zaslaw.

[MUSIC 680 Topics in Ethnomusicology
Spring. 4 credits. Not offered 1999–2000.]

[MUSIC 681 Seminar in Medieval Music
Fall. 4 credits. Not offered 1999–2000. J. Peraino.
Topic: Medieval Music and Intellectual History.]

MUSIC 683 Music and Postmodern Critical Theory
Fall. 4 credits. J. Peraino.
This course surveys the many critical theories that have been included under the umbrella of "postmodernism," and that have fueled the debate between "old" and "new" styles of musicology. Readings will focus on structuralism and post-structuralism, feminist literary criticism, queer theory, and postmodern and post-colonialism, and their application in musicology and ethnomusicology. A broad spectrum of music will be examined along with the readings.

[MUSIC 684 Seminar in Renaissance Music
Fall. 4 credits. Not offered 1999–2000.]

MUSIC 686 Seminar in Baroque Music
Fall. 4 credits. N. Zaslaw.
Topic: Handel. Recent controversies over Handel's career and music.

[MUSIC 688 Seminar in Classical Music
Fall. 4 credits. Not offered 1999–2000. J. Webster.]

[MUSIC 689 Seminar in Music of the Romantic Era
Spring. 4 credits. Not offered 1999–2000. D. Rosen.]

MUSIC 690 Seminar in Music of the Twentieth Century
Spring. 4 credits. D. Rosen.
Topic: Britten.

MUSIC 691–692 Historical Performance
691, fall; 692, spring. 4 credits each term. Prerequisite: permission of instructor. Hours to be arranged. M. Bilson.
Lessons on the major instrument with supplementary study and research on related subjects.

[MUSIC 693 Seminar in Performance Practice
Fall or spring. 4 credits. Not offered 1999–2000.]

MUSIC 697–698 Independent Study and Research
697, fall; 698, spring. Credit to be arranged. Staff.

[MUSIC 785–786 History of Music Theory
785, fall; 786, spring. 4 credits each term. Not offered 1999–2000.]

[NES 434 Introductory Sumerian II (Also NES 632) @ #
Spring. 4 credits each semester. Prerequisite: NES 433/631. Not offered 1999–2000. D. Owen.
Continued study of Sumerian grammar and syntax; further readings in selected Sumerian economic, legal, and historical inscriptions of the late third millennium B.C.E.; additional discussion of Sumerian civilization and culture.]

[NES 435–436 Aramaic I-II (also JWST 435–436) @ #
435, fall; 436, spring. 4 credits each term. Prerequisite: knowledge of Hebrew. Enrollment limited to 15 students. Not offered 1999–2000. G. Rendsburg.]

[NES 631 Introductory Sumerian I (also NES 433)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. D. Owen.
For description, see NES 433 under Near Eastern Languages.]

[NES 632 Introductory Sumerian II (also NES 434)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. D. Owen.
For description, see NES 434 under Near Eastern Languages.]

NES 633–634 Elementary Akkadian I and II (also NES 333–334) @ #
633, fall; 634, spring. 4 credits each term. Prerequisite for NES 634: 633 or permission of instructor. D. I. Owen.
An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide the background for the study of the language. Knowledge of another Semitic language helpful but not essential.

NES 637–638 Ugaritic I & II (also NES 337–338) @ #
637, fall; 638, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). G. Rendsburg.
Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.

Archaeology

[NES 261 Ancient Seafaring (also ARKEO 275, JWST 261) @ #
Fall. 3 credits. Enrollment limited to 80 Students. Not offered 1999–2000. D. Owen.
A survey of the history and development of archaeology under the sea. The role of nautical technology and seafaring among the maritime peoples of the ancient Mediterranean world—Canaanites, Minoans, Mycenaeans, Phoenicians, Hebrews, Greeks, and Romans—as well as the riverine cultures of Mesopotamia and Egypt. Evidence for maritime trade, economics, exploration and colonization, and the role of the sea in religion and mythology.]

NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, and RELST 264) @ #
Spring. 3 credits. Enrollment limited to 50 students. J. Zorn.
A survey of the principal archaeological developments in Canaan/Israel from the Neolithic period (ca 9000 B.C.E.) to the Babylonian Exile (586 B.C.E.). Includes an introduction to archaeological methodology utilized in the reconstruction of ancient cultures, as well as the basic bibliography of the field. Emphasis will be placed on the use of archaeological data for understanding major problems in Israelite history and archaeology: such as the dating of the cultural milieu of the patriarchs, the dating and geographical setting of the Exodus and the Israelite conquest, and the origin and history of the Philistines. Special lectures will be devoted to topics such as: warfare, cult, food production and storage, writing and water systems. Recommended for students planning to participate in excavations in Israel.

NES 366 The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366) @ #
Fall. 4 credits. Prerequisite: Archaeology 100 or permission of instructor. D. I. Owen.
A survey of the history and archaeology of the major civilizations of the Near East from the Persian Gulf to Syria and Anatolia. The course will cover the time span from the prehistoric period to the Persian conquest. Sumerian, Babylonian, Eblaite, Elamite, West Semitic, Assyrian and Persian cultures will be discussed with particular emphasis on indigenous development and cross-cultural contacts.

Civilization

[NES 197 Introduction to Near Eastern Civilization (also JWST 197 and RELST 197) @ #
Fall. 3 credits each term. Not offered 1999–2000. D. Owen.]

[NES 234 Arabs and Jews: Cultures in Confluence and Conflict (also JWST 234, RELST 234, and COM L 234) @ #
Fall. 3 credits. Not offered 1999–2000. R. Brann.]

[NES 244 Introduction to Ancient Judaism (also JWST 244 and RELST 244) @ #
Spring. 3 credits. Enrollment limited to 140 students. Not offered 1999–2000. G. Rendsburg.
This course focuses on the development of Judaism as a religion and as a civilization in antiquity. Particular emphasis is placed on theological development culminating in monotheism, the role of the covenant, law and society, sacrifice and prayer as modes of worship, and similar topics. Jewish civilization is placed within the context of ancient civilizations (Canaan, Egypt, Babylon, Persia, Greece, Rome). Texts to be studied include selections from the Bible, the Apocrypha, the Dead Sea Scrolls, Josephus, and the Mishnah. All readings in English translation.]

[NES 251 Introduction to Islam: Religion, Politics, and Society (also RELST 252) @ #
Spring. 3 credits. Not offered 1999–2000.]

NES 255 Introduction to Islamic Civilization (also HIST 253, RELST 255) @ #
Spring. 3 credits. D. Powers.
The seventh-century Arab conquests resulted in the creation of a vibrant new civilization that stretched from the Iberian Peninsula in the West to Central Asia and the borders of India in the East. We will follow the course of Islamic history from the birth of Muhammad until the Mongol sack of Baghdad in 1258, with special attention to the religion of Islam and to the achievements of Muslims in the fields of law, theology, literature, science, philosophy, art and architecture. Friday sections will be devoted to the reading and analysis of primary sources in English translation.

NES 265 From Empire To Empire: Palestine Under Late Ottoman and British Rule, 1799–1948 (also JWST 265, HIST 206) @ #
Fall. 4 credits. M. LeVine.
This course examines the social history of Palestine during the late Ottoman and Mandate periods from a variety of disciplinary perspectives with the goal of helping students better understand the continuities of changes that occurred in the transition from Ottoman to British rule.

[NES 291 Arab Society and Culture
Fall. 3 credits. Enrollment limited to 25 students. Not offered 1999–2000. M. Younes.
The focus of this course is Arab society in the 20th century. We will start with a definition of the term "Arab" and address the issue of whether there is one or several Arab nations. This will be followed by a detailed examination of the following topics: the role of religion, history, and language in shaping modern Arab society; Arab identity and the development of Arab nationalism; the Arab-Israeli conflict; the conflict between secular and religious movements; the political systems of the different Arab countries; ethnic and religious groups; the distribution of resources (the super-rich and the destitute) and resulting conflicts; education; and finally the family and the status of women. No prior knowledge of Arabic is required.]

NES 298 Issues in 20th Century Catholic Thought (also RELST 201)
Fall. 3 credits. D. McKenzie.
This course is designed to introduce the student to important themes in twentieth century Catholicism including ideas of the church, religious freedom, human dignity and human rights, the Eucharist, hierarchy within the church, the communion of saints, discernment, spirituality, options for and obligations to the poor, solidarity, and peacemaking. This exploration is rooted in historical studies as well as theological and ethical approaches. No previous study of Catholicism is presupposed. Consideration will be given to the study of the Second Vatican Council and the ways in which this council inspired changes in the Catholic Church with which the church continues to grapple. Particular attention will be given to understanding Catholicism in the United States and the tensions that exist between United States Catholics and the institutional church.

We will assess the significance of the globalization of the church for theology and ethical decision making.

NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699, NES 639) @ #

Fall. 4 credits. R. Brann.
This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political and cultural identity of medieval "Spain". Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.

[NES 351 Introduction to Islamic Law (also NES 651, RELST 350, HIST 372/652) @ #

Fall. 4 credits. Enrollment limited to 25 students. Not offered 1999–2000. D. Powers.]

[NES 352 Palaces and Court Culture in the Islamic World

Fall. 4 credits. Not offered 1999–2000. D. F. Ruggles.
While much of Christian Europe slumbered, Islamic cities of the Mediterranean and Asia shone with the brilliance of their many royal courts, patronized by rulers determined to outdo each other in the display of wealth and achievement. In centers such as Cairo, Kairouan, Baghdad, Cordoba, Granada, Isfahan, Herat, Agra, Lahore, and Istanbul, luxurious palaces were built to express not only power of sovereignty but intellectual prowess as well, for it was a sign of prestige for a prince to attract the greatest artists, poets, scientists, and scholars to his court. The focus of this course will be the architectural and artistic setting of court life and the display of power in outward signs such as festivals, coinage, and public acts that confirmed and symbolized royal power and authority.]

NES 357 Islamic Law and Society (also RELST 356) @ #

Spring. 4 credits. D. Powers.
The *Shari'ah*, or sacred law of Islam, embodies the totality of God's commands that regulate the life of every Muslim in all its aspects. The *Shari'ah* comprises on an equal basis ordinances regarding worship and ritual as well as political and, in Western terms, strictly legal rules. This course examines the relationship between the *Shari'ah* and the major social, economic, and political institutions of Islamic society. Topics to be discussed will include the status of women, slaves, and non-Muslims; attitudes toward the economy and the arts; the significance of *jihad* (holy war); the nature of the Muslim city; and the relationship between the religious establishment and the government. Attention will be given to the function of the *Shari'ah* in the modern world, with special reference to the problems and challenges of legal reform.

NES 363 Society and Law in the Ancient Near East (also JWST 363) @ #

Fall. 4 credits. T. Sharlach.
This course will study early Near Eastern law codes from Mesopotamia, the Hittite world and Israel. We will consider what legal and ethical norms can be derived from these laws, as well as exploring the issue of the social realities the laws addressed. Our main sources will be the ancient law codes themselves, but we will also read contemporaneous judicial proceedings, contracts and narratives that shed light on the actual practice of law.

NES 464 The Herodotean Moment (also GOVT 454, HIST 454) #

Spring. 4 credits. M. Bernal.
The basic premise of the seminar is that the concept of "Western civilization" is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological and anthropological dimensions of the idea's history.

NES 494 Modern Medicine and the Catholic Church (also RELST 494)

Spring. 3 credits. D. McKenzie.
This course is designed to help students develop an understanding of ethical approaches to contemporary health care which are based on the Catholic tradition in all of its breadth and diversity. Catholic tradition and medicine through critical analysis of relevant teachings and church statements are explored. Principle based approaches are considered as a conversation partner to examine the significance of a faith based approach. The goal of this course is to help students think analytically and passionately about health care ethics. The ability to appreciate complexity and tolerate legitimate differences in moral methods and choices is an important framework for this class, as well as an interest in Catholic tradition. Consideration of what constitutes just health care and the Church's longstanding commitment to medicine will provide a lens to examine critical issues such as: allocation of healthcare resources, the healing relationship and structure of medical care, autonomy and relationships in decision making, life and death treatment decisions, organ donation, abortion, new reproductive technologies, genetics and euthanasia. Attention will also be given to contemporary Roman Catholic scholars who offer feminist and liberation perspectives.

NES 497 Thomas Merton: Monk and Author (also RELST 497)

Fall. 4 credits. D. McKenzie.
Thomas Merton (1915–1968), a major Catholic figure of the twentieth century, enjoys a wide popularity based on his books, letters, journals, and poetry. In his writings he grappled with a wide variety of social problems and developed a contemporary spirituality. From the hermitage where he lived as a Trappist monk at the Abbey of Gethsemane near Bardstown, Kentucky, he contributed significantly to International discourse and social movements on pacifism, social justice, a Buddhist-Christian dialogue, and issues relating to religion and the environment. His life as a contemplative informed his writings on spirituality. Major themes include his conversion as recounted in *The Seven Story Mountain*, his spirituality (*Bread in the Wilderness, Contemplation in a World of Action*), his commitment to pacifism (*Conjectures of a Guilty Bystander, Faith and Violence: Christian Teaching and Christian Practice, Passion for Peace: The Social Essays*), his contributions to social justice (selections from letters, as well as *At Home in the World*, his correspondence with feminist theologian Rosemary Radford Reuther), his poetry (selections from *Collected Poems*), his concern for the environment (selections from letters and journals), and his participation in the Buddhist-Christian dialogue (*Zen and the Birds of Appetite*). Guest faculty from the Asian Studies Department and English Department will explore Merton's contributions from their respective disciplines.

NES 639 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334, SPAN L 339/699) @ #

Fall. 4 credits. R. Brann.
This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political and cultural identity of medieval "Spain". Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.

[NES 651 Introduction to Islamic Law (also NES 351, RELST 350, HIST 372/652)

Fall. 4 credits. Limited to 25 students. Not offered 1999–2000. D. Powers.]

NES 696 Conceptualizing Cultural Contact (also GERST 696, COM L 696)

Spring. 4 credits. L. Adelson.
Since the West German and Turkish governments signed a labor recruitment agreement in 1961, the Turkish population in the Federal Republic has become the largest group of "foreigners" to reside permanently in Germany. While Turks have borne the brunt of xenophobic hostility in a country that may soon grant them citizenship, a lesser known fact is that Turkish-German authors of several generations have been producing German literature for over two decades. Departing from the sociological model that usually interprets this minority literature as a plea for German compassion or intercultural dialogue, this course juxtaposes prose fiction about Turkish-German contact and critical theories of difference with two primary goals in mind: 1) Students will be introduced to representative examples of Turkish-German literature, a cultural phenomenon whose scope and significance have grown, not lessened, over time. 2) Various modes of conceptualizing cultural contact within a given country will be explored and compared, methodologically in relation to each other and analytically with regard to the Turkish-German field.

History

[NES 239 Cultural History of the Jews of Spain (also JWST 239, COMP LIT 239, RELST 239, SPAN LIT 239) @ #
Fall. 3 credits. Not offered 1999–2000. R. Brann.]

[NES 245 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492–1789 (also JWST 253, HIST 285)
Fall. 4 credits. Not offered 1999–2000. V. Caron.
This course will examine the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. It examines the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics will include: the impact of the Spanish Expulsion of 1492; religious, intellectual, and socioeconomic dimensions of the Marrano dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Zevi; the reestablishment of Jewish communities in the West; the end of the "Golden Age" of Polish Jewry and the rise of Hasidism; the changing economic and political role of the Jews in the 17th and 18th centuries; and the impact of Enlightenment.]

[NES 248 Introduction to Classical Jewish History (also RELST 248 and JWST 248) @ #
Fall. 3 credits. Not offered 1999–2000.]

NES 255 Introduction to Islamic Civilization I (also RELST 255, HIST 253) @ #
Spring. 3 credits. D. Powers.
For description see Near Eastern Civilization.

[NES 261 Ancient Seafaring (also JWST 261, ARKEO 275) @ #
Fall. 3 credits. Not offered 1999–2000. D. Owen.]

NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, RELST 264) @ #
Spring. 3 credits. Enrollment limited to 50 students. J. Zorn.
For description, see NES 263 under Near Eastern Archaeology.

[NES 266 Jerusalem Through the Ages (also JWST 266, ARKEO 266, RELST 266)
Fall. 3 credits. J. Zorn. Not offered 1999–2000.
This class will explore the history, archaeology and natural topography of Jerusalem throughout its long life, from its earliest remains in the Chalcolithic period (ca 4000 B.C.E.) to the present day, including Jebusite Jerusalem, Jerusalem as the capital of the Davidic dynasty, the Roman era city of Herod and Jesus, the Crusaders and medieval Jerusalem, and Ottoman Jerusalem as the city entered the modern era. Students will examine the original historical sources (e.g. the Bible, Josephus, and the Madeba map) which pertain to Jerusalem. Slides and videos will be used to illustrate the natural features, man-made monuments, and artifacts which flesh out the textual material providing a fuller image of the world's most prominent spiritual and secular capital.]

[NES 290 History of Zionism and the Birth of Israel (also JWST 290, HIST 267)
Spring. 3 credits. Not offered 1999–2000. V. Caron.
This course will examine the history of Zionism as an ideology and political movement from its origins in the 19th century to the present. Attention will be paid to situating Zionism within the context of modern Jewish, European, and Middle Eastern History. Topics will include: the ideological foundations of Zionism; the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration; the development of the Yishuv; Zionism as a cultural identity for Diaspora Jewry; the British Mandate; the Arab-Zionist encounter; Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.]

NES 294 Modern History of the Near East: Changing Politics, Society and Ideas (also JWST 294, GOVT 358) @
Spring. 4 credits. Fulfills the college distribution requirement in history or the social sciences. M. Bloom.
This introductory course is designed to acquaint students with the main political, social, and cultural trends that have shaped the modern and contemporary history of the Near East. While discussing developments in the region during the nineteenth and twentieth centuries, the lectures will focus on such themes as modernization, nationalism, Islamic response, and Arab politics in global and regional contexts. The course does not presuppose any knowledge of Near Eastern languages.

NES 295 Introduction to Christian History (also JWST 295, RELST 295, HIST 299) #
Spring. 3 credits. K. Haines-Eitzen.
This course offers an introduction of Christianity from the apostle Paul through the 17th century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We will explore the origins of Christianity within the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the vairous controversies that occupied the church throughout its history. The course will draw upon primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

NES 321 Heresy and Orthodoxy in Early Christianity (also RELST 321) @ #
Fall. 4 credits. K. Haines-Eitzen.
In this course we will explore the varieties of Christian thought and practice from the first through the fourth centuries. In its earliest centuries, Christianity consisted of a diverse range of movements, each of which was considered "heretical" by its opponents, one of which came to dominate all the others and so earned for itself the designation "orthodoxy". The "heresies" we study will include Adoptionism, Marcionism, Gnosticism, Montanism, Arianism, and Donatism. Consideration will also be given to the ways in which charges of "heresy" intersected with competing views about women in the early Church, the relationship between Judaism and Christianity, the construction of authority, and the content, function, and sacredness of early Christian books.

[NES 350 Women and Patronage in Islam (also WOMNS 350)
Spring. 4 credits. Not offered 1999–2000. D. F. Ruggles.
The active patronization of art, architecture, literature, and charitable works by Muslim women from the 12th century to the present was a sign of their public and personal power. This course will examine the means of female empowerment, ascribing it to family ties, the birth of male heirs, education, financial independence, etc., as well as its limitations in a world where the public institutions were run by men. It will particularly examine periods of change and the rise of self-conscious feminism in the modern age.]

[NES 351 Introduction to Islamic Law (also NES 651, RELST 350, HIST 372/652) @ #
Fall. 4 credits. Enrollment limited to 25 students. Not offered 1999–2000. D. Powers.]

[NES 356 Islamic History: The Age of Ibn Khaldun (also HIST 317)
Spring. 4 credits. Enrollment limited to 15 students. Prerequisite: NES 257 or equivalent. Not offered 1999–2000. D. Powers.
An examination of the Islamic world in the age of the great fourteenth-century historian Ibn Khaldun, with special attention to the political, social, and economic history of the Maghrib, or Muslim West.]

[NES 358 Ottoman History: 1300–1600 (also HIST 446/646 and NES 658) @ #
Fall. 4 credits. Not offered 1999–2000.]

[NES 359 Ottoman History: 1600–1923 (also HIST 441/641 and NES 659) @ #
Spring. 4 credits. Not offered 1999–2000.]

NES 366 The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366) @ #
Fall. 4 credits. Prerequisite: Archaeology 100 or permission of instructor. D. I. Owen.
For description, see Near Eastern Archaeology.

[NES 368–369 State, Society and Language in Ancient Egypt (also GOVT 343/345)
368, fall; 369, spring. 4 credits. Not offered 1999–2000. M. Bernal.
This course is concerned with state and society in Pharaonic Egypt 3400–300 BCE. This will be combined with an introduction to Middle Egyptian, the official language of the Middle Kingdom 2000–1750 BCE and accepted as the "classical" language thereafter. This is a two-semester sequence course. In the fall we shall study the Egyptian state and society through secondary materials; in the spring we shall be reading primary sources concerned with everyday life, official reports and adventures abroad.]

[NES 393 Religion and Politics in the Middle East (also RELST 393)
Fall. 4 credits. Enrollment limited to 25 students. Not offered 1999–2000.]

[NES 395 International Relations of the Middle East (also GOVT 392) @
Fall. 4 credits. Not offered 1999–2000.]

NES 399 Age of Empires: Architecture of the Ottoman, Safavid, and Mughal Dynasties @ #
Fall. 4 credits. D. F. Ruggles.
The Ottomans, Safavids, and Mughals were the three great empires that coexisted in the Islamic world in the 16th, 17th and 18th centuries. The three architectures are all expressions of Islamic culture and stem from common sources, and yet the regional differences are marked. The Ottomans built monochromatic stone mosques with cascading low domes; the Safavids built tall domes sheathed in brilliantly colored tile; and the Mughals realized their architecture in the indigenous red sandstone and white marble of India. The themes addressed in class are the competition, imitation, and defiant rejection among the three empires; trade and communication with Europe; ethnicity and non-Islamic traditions; and regional versus pan-Islamic interests, and the symbolic construction of sovereign legitimacy with respect to both political dynasty and Islam. We will study the structure and engineering of great domes, the social use of space in mosque and palace planning, the expression of individual identity in tomb patronage, and competing political interests among contemporary and modern users of the building.

[NES 451 Seminar in Islamic History: 600–750 (also HIST 461/671, NES 650, and RELST 451) @ #

Literature

[NES 213 Introduction to the Qur'an (also RELST 213) # @
Spring. 3 credits. Not offered 1999–2000.]

NES 223 Introduction to the Bible I (also JWST 223, RELST 223) @ #
Fall. 3 credits. G. Rendsburg.
This is the first course of a two-semester sequence. The main goal is to introduce students to the literature of the Hebrew Bible, which is accomplished by concentrating on the Torah and the historical material in Joshua through Samuel, that is, the material which covers the period from Israel's origins through King David. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, and law.

[NES 224 Introduction to the Bible II (also JWST 224, RELST 224) @ #
Spring. 3 credits. Not offered 1999–2000. G. Rendsburg.
This is the second of a two-semester sequence, but one does not need to take NES 223 in order to take this course. The main goal is to introduce students to the literature of the Hebrew Bible. This is accomplished by concentrating on the historical material in Kings, the books of the Prophets, and the book of Job, that is, the material which covers the period from King Solomon through the end of the biblical era. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, and mythology. (Note: students who have taken NES 227 Introduction to the Prophets are ineligible to take this course; NES 224 is intended to replace NES 227).]

NES 229 Introduction to the New Testament (also RELST 229 and JWST 229) @ #
Fall. 3 credits. K. Haines-Eitzen.
This course provides a literary and historical introduction to the earliest Christian writings, most of which eventually come to be included in the New Testament. Through the lens of the gospel narratives and earliest Christian letters, especially those of Paul, the course will explore the rich diversity of the early Christian movement, from its Jewish roots in first century Palestine through its development and spread to Asia Minor and beyond. Careful consideration will be given to the political, economic, social, cultural, and religious circumstances that gave rise to the Jesus movement, as well as those that facilitated the emergence of various manifestations of early Christian beliefs and practices.

[NES 230 The Quest for the Historical Jesus (also RELST 231)
Spring. 3 credits. Not offered 1999–2000.]

NES 236 Israel: Literature and Society (also JWST 236, COM L 246) @
Fall. 3 credits. Y. Halevi-Wise.
A series of Israeli literary narratives in English translation will be read closely: *The Lover* by Yehoshua, *A Voyage in the Land of Israel* by Oz, and selected short stories by contemporary authors of various ethnic backgrounds. We will analyze these texts both as literary artifacts and as attempts to represent a panorama of Israeli society.

[NES 239 Cultural History of the Jews of Spain (also JWST 239, COM L 239, RELST 239, SPAN L 239) @ #
Fall. 3 credits. Not offered 1999–2000. R. Brann.]

NES 299 Hebrew Bible and Arabic Qur'an in Comparative Perspective (also RELST 299, COM L 299, JWST 299) @ #
Spring. 3 credits. R. Brann.
This course examines (in translation) the Hebrew Bible and Arabic Qur'an as foundational documents of their respective religious traditions and as the texts by which their corresponding religious communities came to constitute and define themselves. The approach in this course will be comparative, analyzing literary aspects of the parallel narrative traditions on Creation, the Noah story, Abraham/Ibrahim and his sons, the Joseph/Yusuf cycle, as well as postbiblical and Islamic elaborations of the Solomon/Sheba material. The class will also discuss the concepts of revelation, prophethood, community, and notions of history, eschatology, and apocalypse set forth in the Hebrew Bible and Arabic Qur'an. The problematic nature of revealed scripture in monotheistic religion and the limited relevance of the idea of "influence" in the Near Eastern context will also be studied.

[NES 313 Classical Arabic Texts (also RELST 313)
Fall. 4 credits. Prerequisite: NES 311 or equivalent. Not offered 1999–2000. D. Powers.
This course will be an advanced study of classical Arabic through a close reading of selected chapters of the Qur'an, together with the Qur'anic commentary (tafsir) and other relevant literature. Special attention will be given to grammar, syntax, and lexicography.]

NES 320 Women in the Hebrew Bible (also JWST 320, WOMNS 322) @ #
Spring. 3 credits. G. Rendsburg.
This course features stories about women in the Hebrew Bible. Through literary readings of these texts we attempt to understand the portrayal of women (characteristics and roles assigned by male writers); the social reality represented; and the role of narrative in the promotion of ideologies. All texts in English translation. Hebrew texts optional.
There is a one-credit option for students who wish to meet 1 hour/week to read the texts in the Hebrew original (NES 326).

[MUSIC 787 History and Criticism
Spring. 4 credits. Not offered 1999–2000. A. Richards.]

[MUSIC 789 Liturgical Chant in the West
Spring. 4 credits. Not offered 1999–2000.]

MUSIC 901–902 Thesis Research
901, fall; 902, spring. Up to 6 credits each term, to be arranged. Offered for S-U only.
Limited to doctoral students in music who have passed the Admission-to-Candidacy Exam.

NEAR EASTERN STUDIES

R. Brann, chair; K. Haines-Eitzen, Y. Halevi-Wise, D. McKenzie, R. Morrison, D. I. Owen, (director of the Program of Jewish Studies); D. Powers (director of Undergraduate Studies), G. Rendsburg (director of Graduate Studies), D. F. Ruggles, N. Scharf, T. Sharlach, S. Shoer, H. Ünlü, L. White, M. Younes, J. Zorn
Joint faculty: M. Bernal

The Department

The Department of Near Eastern Studies (360 Rockefeller Hall, 255–6275) offers courses in the civilizations of the Near East including archaeology, history, religions, languages, and literatures. Students are encouraged to take an interdisciplinary approach to the religions and cultures of the region which has had an important impact on the development of antique, medieval, and modern civilization. The department's course offerings treat the Near East from the dawn of history to the present and emphasize methods of historical and literary analysis.

Distribution Requirements

Any two Near Eastern Studies history or archaeology courses at the 200, 300 or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the social sciences/history. Any two Near Eastern Studies civilization or literature courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the humanities. NES 197, 198 or a 200-level survey course plus any other Near Eastern studies course will constitute a sequence to fulfill the distribution requirement in either social sciences/history or humanities, depending on the second course used in combination with 197, 198 (or a 200-level survey course). All 200 or 300-level language courses may fulfill the humanities requirement.

The Major

The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's adviser. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S-U options not permitted):

A. Qualification in two Near Eastern languages or proficiency in one.

B. Nine three- or four-credit NES courses, which must include the following:

1. NES 197 or 198 (when NES 197–198 are not offered, students may substitute a 200-level survey course with the approval of the director of undergraduate studies).
2. Two 200-level NES survey courses, one whose chronological parameters fall within the period 3000 B.C.E to 600 C.E., and one whose chronological parameters fall within the period 600 C.E. to the present. The following are examples (a complete list can be obtained in the department office):

   3000 B.C.E to 600 C.E.

   NES 223, Introduction to the Bible

   NES 263, Introduction to Biblical History and Archaeology

   NES 248, Introduction to Classical Jewish History

   600 C.E. to the present

   NES 233, The Lyrics of Love and Death: Medieval Hebrew and Arabic Poetry in Translation

   NES 255, Introduction to Islamic Civilization

   NES 258, Islamic History 1258–1914

   NES 294, Modern History of the Near East
3. At least two NES courses at the 300 level or above (one of which may be NES 301, 302, 311, or 312).

Prospective majors should discuss their plans with the director of undergraduate studies before formally enrolling in the department. To qualify as a major, a cumulative grade average of C or better is required.

Honors. Candidates for the degree of Bachelor of Arts with honors in Near Eastern Studies must fulfill the requirements of the appropriate major study and enroll in the honors course, NES 499, in the fall and spring semesters of their senior year. For admission to the honors program, candidates must have a cumulative average of B+ or better and have demonstrated superior performance overall in Near Eastern Studies courses. After consulting their major adviser, candidates should submit an outline of their proposed honors work to the department **during the second semester of their junior year**.

Study abroad. Near Eastern Studies majors may choose to study in the Near East during their junior year. There are various academic programs in the countries of the Near East that are recognized by the Department of Near Eastern Studies and that allow for the transfer of credit. Archaeological field work on Cornell-sponsored projects in the Near East may also qualify for course credit.

Freshman Seminar

[NES 127 What's Love Got To Do With It? Marriage and Courtship in the Hebrew Bible
Fall and spring. 3 credits. Enrollment limited to 15. Not offered 1999–2000. C. Smith.
We will read selections from the Hebrew Bible (in translation) and examine the portrayal of courtship and marriage in its laws, poetry, and narratives.]

[NES 150 Discovering Islam
Spring. 3 credits. Enrollment limited to 15 students. Not offered 1999–2000. D. Powers.
Against the backdrop of Western stereotypes, we will explore Islamic society and culture from within, with special attention to prophecy and revelation, ritual practice, criminal law, the status of women, and the Islamic understanding of death and resurrection.]

NES 163 Things The Prophets Never Told You: Archaeology and the Religion of Ancient Israel (also JWST 163)
Fall. 3 credits. Enrollment limited to 15 students. J. Zorn.
A casual reading of the Hebrew Scriptures might lead one to believe that the normative religion of the Israelites was that spelled out in the Torah and Prophets. However, a more critical appraisal of the Biblical texts, along with an analysis of extra-Biblical texts and archaeological materials, demonstrates that the Israelites were often closer to their pagan neighbors than to modern Judaism or Christianity. Students will explore in their essays these similarities and differences. Topics may include: cult prostitution, magic, funerary rites, temple ritual, Hebrew mythology, etc. Readings will be from the Hebrew Bible, translations of extra-biblical texts, articles on archaeology and modern synthetic treatments of Israelite cult.

NES 190 Catholic Social Action (also RELST 190)
Spring. 3 credits. Enrollment limited to 15 students. D. McKenzie.
This course will focus on the history and development of Catholic Social Teaching, which calls on Catholics to work to eliminate injustice and build a compassionate world. Attention will be given to several themes including the economy (the rights of workers and owners, the rights to private property and its limitations, economic rights and initiative, debt and development), peace-making, capital punishment, option for the poor, and global solidarity. The class will analyze critically major encyclicals, papal letters, and bishops' statements, as well as attend to selected grassroots movements that inspired this teaching. The course is designed as a comprehensive introduction to the study of Catholicism and its social mission in the twentieth century. Participants will assess the strengths and weaknesses of Catholic Social Teaching and evaluate its contributions to human rights discourse.

Language Courses

NES 101–102 Elementary Modern Hebrew I and II (also JWST 105–106)
101, fall; 102, spring. 6 credits each term. Prerequisite for NES 102: 101 or permission of instructor. Satisfactory completion of NES 102 fulfills the qualification portion of the language requirement. Enrollment limited to 17 students in each section. S. Shoer.
Intended for beginners. This course provides a thorough grounding in reading, writing, grammar, oral comprehension and speaking. Students who complete the course will be able to function in basic situations in a Hebrew-speaking environment.

NES 111–112 Elementary Arabic I and II
111, fall; 112, spring. Enrollment limited to 17 in each session. 6 credits each term. Prerequisite for Arabic 112: Arabic 111 or permission of instructor. M. Younes.

The course provides a thorough grounding in all language skills: listening, speaking, reading, and writing. It starts with spoken Arabic and gradually integrates Modern Standard Arabic in the form of listening and reading texts. Emphasis will be on learning the language through using it in meaningful contexts. The student who successfully completes the two-semester sequence will be able to: 1) understand and actively participate in simple conversations involving basic practical and social situations (introductions, greetings, school, home and family, work, simple instructions, etc.); 2) read Arabic material of limited complexity and variety (simple narrative and descriptive texts, directions, etc.); 3) write notes and short letters describing an event or a personal experience. An important objective of the course is to familiarize students with basic facts about the geography, history, and culture of the Arab world.

NES 117–118 Elementary Turkish I & II
117, fall; 118, spring. 4 credits each term. Prerequisite for NES 118 is NES 117 or permission of instructor. Enrollment limited to 17 students. H. Ünlü.
Intended for beginners. This course is designed to develop students' proficiency and communication in modern Turkish in the four basic language skills: speaking, listening, reading, and writing. Facts about the geography, history, and culture of Turkey are built into the course. The teaching/learning process emphasizes the functional use of the language and contextual communication in the four skills. In the spring term, the course will continue to help students acquire the basic vocabulary and fundamental structures of Turkish. Students will proceed to use the major points of Turkish grammar, conduct oral (informal conversation and structured situations) and written practice, and advance their reading skills. The course will place increased emphasis on the development of conversational, reading, and writing skills while focusing on communicative drills and activities that involve student interaction.

NES 123–124 Elementary Biblical Hebrew I & II (also JWST 123–124, RELST 123–124)
123, fall; 124, spring. 3 credits each term. Enrollment limited to 17 students. Y. Chen.
The course is intended to develop basic proficiency in reading the Hebrew Bible. The first semester will emphasize introductory grammar and vocabulary. The second semester will focus on reading selected passages in the Hebrew Bible, with further development of vocabulary and grammar.

NES 133–134 Qur'anic and Classical Arabic
133, fall; 134, spring. 4 credits each semester. M. Younes.
This course is designed for students who are interested in reading the language of the Qur'an and *Hadiths* (Sayings of the Prophet) with accuracy and understanding. Authentic texts in the form of chapters from the Qur'an and *Hadiths* will be presented and analyzed, and basic grammatical structures will be discussed, explained, and practiced systematically. Interested students will be encouraged to memorize excerpts from the texts. At the end of the two-semester sequence, the successful student will have mastered a working vocabulary of over 1000 words, correct pronunciation, and the most commonly used grammatical structures. In addition, the course will provide the student with a firm foundation on which to build an advanced study of Classical Arabic.

NES 201–202 Intermediate Modern Hebrew I and II (also JWST 201–202) @
201, fall; 202, spring. Enrollment limited to 15 students in each section. 4 credits each term. Prerequisites for NES 201, 102 or permission of instructor; for NES 202, 201 or permission of instructor. N. Scharf.
A sequel to NES 101–102. Continued development of reading, writing, grammar, oral comprehension, and speaking skills. The course introduces Hebrew literature and Israeli culture through the use of texts and audio-visual materials.

NES 211–212 Intermediate Arabic I and II @
211, fall; 212, spring. Enrollment limited to 15 students in each section. 4 credits each term. Prerequisites: for NES 211, one year of Arabic or permission of instructor; for NES 212, 211 or permission of instructor. Staff.
A sequel to NES 111–112. Continued development of the four language skills through extensive use of graded materials on a wide variety of topics. Increasing attention will be given to developing native-like pronunciation and grammatical accuracy, but the main focus will be on developing communication skills. The student who successfully completes 212 will be able to: 1) understand and express himself or herself in Arabic in situations beyond the basic needs; 2) read and comprehend written Arabic of average difficulty; 3) write a letter, a summary of a report or a reading selection. An appreciation of Arabic literature and culture will be sought through the use of authentic materials.

NES 301–302 Advanced Modern Hebrew I and II (also JWST 301–302) @
301, fall; 302, spring. Limited to 15 students. 4 credits each term. Prerequisite for NES 301: 202 or equivalent, with permission of instructor. Prerequisite for NES 302: 301 or equivalent, with permission of instructor. This sequence may be used to fulfill the humanities distribution requirement in literature. Limited to 15 students. N. Scharf.
Advanced study of Hebrew through the analysis of literary texts and expository prose. This course employs a double perspective: language is viewed through literature and literature through language. Students will develop composition skills by studying language structures, idioms, and various registers of style.

NES 311 Advanced Arabic I @
Fall. 4 credits. Prerequisite: NES 212 or permission of instructor. Limited to 15 students. Staff.
Students will be introduced to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis will be on developing fluency in oral expression through discussions of issues presented in the reading selections. A primary objective of the course is the development of writing skills through free composition exercises in topics of interest to individual students.

NES 312 Advanced Arabic II @
Spring. 4 credits. Limited to 15 students. Prerequisite: NES 311, or permission of instructor. Staff.
This course is a continuation of NES 311 using similar but more challenging materials. There will be more focus on the writing skills, the development of native-like pronunciation, and accurate use of grammatical structures than in NES 311. Each student will be required to make an oral presentation in Arabic on a topic of his/her choice and submit a written version of the presentation.

NES 333–334 Elementary Akkadian I & II (also NES 633–634) @ #
333, fall; 334, spring. 4 credits each term. Prerequisite for NES 334: 333 or permission of instructor. Prerequisite for NES 634: 633 or permission of instuctor. D. I. Owen.
An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide a background for study of the language. Knowledge of another Semitic language is helpful but not essential.

NES 337–338 Ugaritic I & II (also NES 637–638) @ #
337, fall; 338, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). G. Rendsburg.
Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.

[NES 416 Structure of the Arabic Language (also LING 416) @
Spring. 4 credits. Prerequisite: NES 112 or one year of Arabic. Not offered 1999–2000. M. Younes.]

[NES 420 Readings in Biblical Hebrew Prose (also JWST 420, RELST 420) @ #
Spring. 4 credits. Prerequisite: one year of Hebrew, Biblical or modern. Course may be repeated for credit. Not offered 1999–2000. G. Rendsburg.
An advanced course in reading selected portions of the Hebrew Bible. Emphasis will be placed on the philological method, with attention to literary, historical, and comparative concerns.]

[NES 433 Introductory Sumerian I (also NES 631) @ #
Fall. 4 credits each semester. Prerequisite: permission of instructor. Not offered 1999–2000. D. Owen.
This course will consist of an introduction to the Sumerian cuneiform script and grammar of the third millennium B.C.E. Readings in selected Sumerian economic, legal, and historical inscriptions, a basic introduction to Sumerian grammar and script, linguistic connections, and a survey and discussion of Sumerian civilization and culture. Students who have taken or plan to take Akkadian, Hebrew, or Hittite linguistics or are otherwise interested in the history of language should consider this course.]

NES 326 Women in the Hebrew Bible—seminar (also JWST 326, WOMNS 326)
Spring. 1 credit. G. Rendsburg.
This is a one-credit option for students who wish to meet one hour each week to read the texts in the Hebrew original. Must be concurrently enrolled in NES 320.

NES 328 Gnosticism and Early Christianity (also JWST 328, RELST 330) @ #
Spring. 4 credits. K. Haines-Eitzen.
An in-depth exploration of early Christian Gnosticism—its literatures, beliefs, and practices. Early Christian Gnosticism came to be considered heretical by early proto-orthodox Church Fathers. In this course, however, we will not simply read the condemnations written by the opponents of gnostic thought; rather, we will focus our attention on reading (in English translation) substantial portions of the texts written by the Gnostics themselves and found at Nag Hammadi, Egypt, in 1945. We will explore gnostic ideas about the world, creation, salvation, God, humanity, and the human body, while also attending to issues of gender, asceticism, and scriptural interpretation as they intersect with gnostic thought. To set gnostic literature within a socio-historical context, we will discuss other relevant ancient texts and scholarly theories about the Jewish and Hellenistic roots of early Christian Gnosticism.

NES 329 Intro to the New Testament—Seminar (also JWST 329, RELST 329)
Fall. 1 credit. Prerequisite: concurrent enrollment (or past enrollment) in NES 229 and one year of ancient Greek.
K. Haines-Eitzen.
A weekly seminar that may be taken in addition to NES 229. The seminar will provide an opportunity to read portions of the New Testament and other early Christian writings in Greek. We will work on grammatical and textual issues as well as other problems related to translations.

NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699) @ #
Fall. 4 credits. R. Brann.
For description, see NES Civilization.

NES 354 The Islamic Book @ #
Spring. 4 credits. D. F. Ruggles.
Books both as material objects and texts will be the subject of this course, and for both we will study first-hand the Arabic and Persian works in the rare book and manuscript collections of the Kroch Library and the Johnson Museum. In the first half of the course we will begin looking at the materials and techniques of manuscript making (parchment, ink, paper, and bindings) and the visual organization of the page. We will proceed to the non-figural decoration of Qur'ans, prayerbooks, and secular texts with calligraphy, painted frontispieces and gold illumination. We will then study the various extant illustrated manuscripts of major works of literature and history, such as the *Maqamat*, *Bayad wa Riyad*, the world history of Rashid al-Din, *Baburnama*, *Süleymanname* and the Mongol, Timurid and Safavid versions of the *Shahnameh*. Projects will consist of creating an exhibition (either in electronic form or for glass display cases) with an accompanying explanatory catalogue.

[NES 394 Gender, Sexuality, and the Body in Early Christianity (also RELST 394, WOMNS 394)
Spring. 4 credits. Not offered 1999–2000.
K. Haines-Eitzen.
Beliefs about gender, sexuality, and the human body were remarkably interwoven with political, religious, and cultural disputes in early Christianity. In this course we will explore the construction and representation of gender, sexuality, and the body in various forms of Christianity from the first century through the fourth. Asceticism and celibacy, veiling and unveiling, cross-dressing and Gnostic androgyny, marriage and childbirth, and homosexuality will be among the topics considered, and our sources will range from the New Testament, early Christian apocrypha, martyrologies, and patristic writings to Greek medical texts, Jewish midrash, Roman inscriptions, and Egyptian erotic and magical spells. Current interdisciplinary and theoretical studies on gender, ideology, sexuality, and power will aid us in developing our analytical approaches to the ancient materials.]

NES 400 Seminar in Advanced Hebrew (also JWST 400) @
Fall. 4 credits. Prerequisite: NES 302/JWST 302 or permission of instructor. Enrollment limited to 15 students.
N. Scharf.
Continuation of work done in NES/JWST 302, with less emphasis on the study of grammar. We will read and discuss texts of cultural relevance, using articles published in Israeli newspapers and works by authors in each of the three principal genres: poetry, theater and novels. The course may be repeated for credit with permission of instructor.

[NES 420 Readings in Biblical Hebrew Prose (also JWST 420 and RELST 420)
Spring. 4 credits. Prerequisite: one year of biblical or modern Hebrew. Course may be repeated for credit. Not offered 1999–2000. G. Rendsburg.
An advanced course in reading selected portions of the Hebrew Bible. Emphasis will be placed on the philological method, with attention to literary, historical, and comparative concerns.]

NES 421 Readings in Biblical Hebrew Poetry (also JWST 421, RELST 421) @ #
Fall. 4 credits. Prerequisite for NES 421: one year of Biblical or Modern Hebrew. Course may be repeated for credit.
G. Rendsburg.
Advanced course in reading selected poems of the Hebrew Bible. Chapters to be studied include various Psalms, parts of the Book of Job, various prophetic speeches, and early compositions such as Genesis 49 and Judges 5. Emphasis will be placed on the philological method, with attention to literary, historical, and comparative concerns as well.

[NES 630 Readings in Judeo-Arabic: Medieval Judeo-Arabic and Hebrew Poetics
Fall and spring. 4 credits. Not offered 1999–2000. R. Brann.]

NES 639 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334, SPAN L 339/699) @ #
Fall. 4 credits. R. Brann.
This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.

NES 491–492 Independent Study, Undergraduate Level
Fall and spring. Variable credit. Prerequisite: permission of instructor. Staff.

NES 499 Independent Study, Honors
Fall and spring. Variable credit. Prerequisite: permission of instructor. Staff.

NES 691–692 Independent Study: Graduate Level
Fall and spring. Variable credit. Prerequisite: permission of instructor. Staff.

The Program of Jewish Studies

The Program of Jewish Studies encompasses a broad spectrum of disciplines that includes civilization, history, language, literature, philology, archaeology and religion. The program offers students the opportunity to take a wide variety of courses in Jewish Studies whose subjects are not represented in the Department of Near Eastern Studies. Students interested in planning a program in Jewish Studies should consult with the director, Professor David I. Owen, 360 Rockefeller Hall. For complete listings and descriptions, see Program of Jewish Studies under "Special Programs and Interdisciplinary Studies."

JWST 105–106 Elementary Modern Hebrew I and II (also NES 101–102)
105, fall; 106, spring. 6 credits each term. Enrollment limited to 15 students.
S. Shoer.

JWST 123–124 Elementary Biblical Hebrew I and II (also NES 123–124, RELST 123–124)
123; fall, 124; spring. 3 credits each term.
Y. Chen.
For description, see NES 123–124.

JWST 163 Things the Prophets Never Told You (also NES 163)
Fall. 3 credits. Freshman Writing Seminar.
J. Zorn.
For description, see NES 163.

JWST 201–202 Intermediate Modern Hebrew I and II (also NES 201–202) @
201, fall; 202, spring. 4 credits. Enrollment limited to 15 students. N. Scharf.

JWST 223 Introduction to the Bible I (also NES 223, RELST 223) @ #
Fall. 3 credits. G. Rendsburg.
For description, see NES 223.

PHILOSOPHY

T. Irwin (chair), T. Berry, R. N. Boyd (on leave fall 1999), W. Bracken, G. Fine, H. Hodes, T. Irwin, K. Jones (on leave 1999–2000), S. MacDonald, R. W. Miller (on leave spring 2000), F. Neuhouser (Society for the Humanities 1999–2000), N. Sethi, S. Shoemaker, J. Stanley, N. Sturgeon, Z. Szabó and J. Whiting.

Emeritus: C. A. Ginet.

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning study in the field. Sections of Philosophy 100 are part of the freshman writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (seventeen students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take Philosophy 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to freshmen.

The Major

Students expecting to major in philosophy should begin their study of it in their freshman

or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses are required for the major. They must include at least one course in ancient philosophy (Philosophy 210 or 211, or a course with a large component on Plato or Aristotle), at least one course in classical modern metaphysics and epistemology (Philosophy 212 or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major after fall 1996 will be required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of Philosophy 100 toward the major. A course in formal logic (e.g., Philosophy 231), while not required, is especially recommended for majors or prospective majors. Courses numbered 191–199 do not count toward the major.

Philosophy majors must also complete at least 8 credits of course work in related subjects approved by their major advisers. Occasionally majors may serve as teaching or research aides, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the College of Arts and Sciences and an average of B+ or better for all work in philosophy. In either or both terms of the senior year a candidate for honors enrolls in Philosophy 490 and undertakes research leading to the writing of an honors essay by the end of the final term. *Honors students normally need to take Philosophy 490 both terms of their senior year in order to write a satisfactory honors essay.* Philosophy 490 does *not* count toward the eight philosophy courses required for the major. Prospective candidates should apply at the philosophy department office, 218 Goldwin Smith Hall.

Fees

In some courses there may be a small fee for photocopying materials to be handed out to students.

Introductory Courses

These courses have no prerequisites; all are open to freshmen.

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

PHIL 100 Freshman Writing Seminars in Philosophy
Fall and spring. 3 credits. Consult the brochure listing freshman writing seminars prepared by the John S. Knight Writing Program.

PHIL 101 Introduction to Philosophy
3 credits. Fall, M W F 11:15–12:05, C. Williams; spring, M W F 11:15–12:05, J. Stanley.

Fall: This course will deal with selected central problems of philosophy, such as: the grounds and extent of our knowledge, responsibility and human freedom, personal identity and the relationships of persons to each other and to the world around them, the foundations of morality, the existence of God and of evil. Readings will be from both historical and contemporary authors.

Spring: As the title suggests, this is an introductory course. We will discuss four principle areas of philosophy: epistemology, philosophy of mind, ethics, and metaphysics; if you don't know what some of these terms mean, you can be sure that you will learn something here. We will begin with a close reading of Descartes's classic *Meditations on First Philosophy*. We will continue with Cartesian themes through the first two-thirds of the course, with discussions of the nature of the mental, personal identity, and free will. The last part of the course will be devoted to a survey of ethical theories.

PHIL 131 Logic, Evidence and Argument
Fall. 3 credits. M W F 10:10–11:00. S. MacDonald.

An introduction to the concepts and skills central to critical reading and thinking. The course aims to provide a general understanding of the principles of reasoning and to develop skills for identifying, analyzing, and evaluating the sorts of reasoning we encounter everyday in ordinary discourse. Students will be expected to attain facility with two different formal systems for representing and evaluating arguments—propositional logic and traditional syllogistic logic—and to acquire the ability to apply these systems in the analysis and evaluation of various kinds of ordinary reasoning.

PHIL 142 Appropriation and Alienation
Spring. 3 credits. This course is intended for freshmen. T R 2:55–4:10. T. Berry.

This course will investigate an important issue in political philosophy: the justification of property rights. We will start the course by watching a film, *The Field*, in which two different conceptions of what justifies ownership come into conflict. Should things belong to those who make them? Or shouldn't labor be the primary justification of property rights? We will spend the first half of the course investigating how the philosopher John Locke handles this issue in his classic defense of private property. In the second half, we will consider Karl Marx's classic objections to Locke's defense of private property.

[PHIL 145 Contemporary Moral Issues
3 credits. Not offered 1999–2000.]

PHIL 181 Introduction to the Philosophy of Science
Spring. 3 credits. T R 1:25–2:40. N. Sethi.

In this course we will attempt to answer such central questions as: What reasons do scientists have for accepting current scientific theories? Is science a search for truth? How can scientists test theories about unobservable entities? Do scientists discover or construct facts about nature? Are scientific claims immune to cultural, social and subjective influences?

PHIL 191 Introduction to Cognitive Science (See Cognitive Studies 101)
Fall. 3 credits. T R 11:40–12:55. M. Spivey-Knowlton.

This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

PHIL 193 Inequality, Diversity and Justice (also City and Regional Planning 293, Government 293, Sociology 293)
Fall. 4 credits. M W F 2:30–3:20. The class will meet as a whole, for a lecture, F, 8/27; thereafter, lectures will be given M W, disc secs will be F. No prerequisites. Intended for freshmen and sophomores. R. Miller.

An interdisciplinary discussion of the nature and moral significance of social inequality, diversity and poverty and of the search for just responses to them. How unequal are economic opportunities? What are the causes of poverty? To what extent is greater equality a demand of justice? Are traditional welfare programs an appropriate response to poverty? What special significance have race and gender as sources of inequality? Do they merit special remedies such as affirmative action? How should governments deal with religious diversity and other differences in ultimate values? For example, should abortion statutes be neutral toward rival views of the importance of potential human life? What are the causes of worldwide inequality? To what extent do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes and legal reasoning interact in the search for answers to these questions. To provide these resources, the course will be taught by leading faculty researchers in philosophy, political theory, the social sciences and law.

PHIL 194 Global Thinking (also Government 294)
Spring. 4 credits. Satisfies geographical distribution requirement. No prerequisites. Intended for freshmen and sophomores. T R 10:10–11:25, plus disc. H. Shue.

The analysis taught in this course is global in two different respects: international subjects and interdisciplinary methods. We look in detail at questions raised by one of the most important and most difficult issues facing international society: when, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Kosovo and Rwanda in this decade? Both of these recent cases, one in Europe and one in Africa, raise fundamental questions about the kind of world we are constructing for the 21st century. To what extent is the system of nation-states we now have either desirable or unavoidable? Does every ethnic group have a right to a self-determining and sovereign state? When is the use of military force morally justified? Should trials for war crimes or crimes against humanity be routinely held after military conflicts? These and other ethical questions need to be answered in light of the best available knowledge about the political dynamics of foreign intervention and the changing international legal regime, bringing together political science, law, and ethics. The course is team-taught by leading faculty researchers from the three fields involved.

[PHIL 210 Ancient Thought #
4 credits. Not offered 1999–2000.]

PHIL 211 Ancient Philosophy (also Classics 231)
Fall. 4 credits. This course has no prerequisites. It is open to freshmen. T R 1:25–2:40. G. Fine.
This course examines the origin and development of Western philosophy in Ancient Greece and Rome. We will study some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philosophers (Epicureans, Stoics, and Sceptics). Questions to be considered include: What are the nature and limits of knowledge? Is knowledge even possible? How reliable is perception? What are the basic entities in the universe: atoms, Platonic Forms or Aristotelian substances? Is moral knowledge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will? Ought we to fear death? One of the fundamental works we will read is Plato's *Republic*.

PHIL 212 Modern Philosophy
Spring. 4 credits. No prerequisites. M W F 1:25–2:15. Z. Szabó.
This course is about the rise of modern philosophical thought in the 17th and 18th centuries in Europe. We will be focusing on four philosophers: Descartes, Berkeley, Leibniz and Hume. Our main interest will be the theory of ideas and the way this theory underlies metaphysics. What are ideas and how do we come to have them? Why are ideas necessary for knowledge about the external world? What is the connection between the structure of ideas and the structure of reality? This course emphasizes close reading of original texts (or translations of original texts) and critical assessment of philosophical arguments.

PHIL 213 Existentialism
Spring. 4 credits. M W F 2:30–3:20. W. Bracken.
This course will provide an introduction to the central themes and methods of existentialism as exemplified in the writings of Kierkegaard, Nietzsche, Heidegger, and Sartre. Topics will include: the nature of consciousness; the idea that human existence is a task; the anxieties of freedom; nihilism and despair; relationships between self and others; the possibility of an ethics of authenticity. Readings will be drawn from the aforementioned philosophers and will include one or two plays as well as one or two short stories. Time permitting, one or two films will also be screened and discussed over the course of the semester.

[PHIL 214 Philosophical Issues in Christian Thought #
4 credits. Not offered 1999–2000.]

PHIL 231 Introduction to Deductive Logic
Fall. 4 credits. M W F 1:25–2:15. H. Hodes.
The logic of truth-functional connectives and the universal and existential quantifiers: analysis of English-statements in terms of a formal language; evaluation of deductive reasoning in terms of such an analysis.

PHIL 241 Ethics (by petition for breadth requirement)
Fall. 4 credits. M W F 9:05–9:55. N. Sturgeon.
An introduction to the philosophical study of moral theories and moral arguments. Ethical relativism, ethical egoism, ethical skepticism, utilitarianism and deontological theories; some application to controversial contemporary issues.

[PHIL 242 Social and Political Philosophy (also Government 260)
Fall. 4 credits. Not offered 1999–2000.]

[PHIL 243 Aesthetics
4 credits. Not offered 1999–2000.]

[PHIL 244 Philosophy and Literature
4 credits. Not offered 1999–2000.]

PHIL 245 Ethics and Health Care
Fall. 4 credits. T R 10:10–11:25. C. Williams.
This course is an introduction to the ethical issues surrounding health care. Topics include: the professional-patient relationship; personhood, quality of life, and death, and their relations to issues such as abortion and euthanasia; justice and access to health care.

PHIL 246 Ethics and the World Environment
Spring. 4 credits. T R 11:40–12:55. H. Shue.
Critical philosophical analysis of the conceptual frameworks in which policies affecting the environment are formulated and judged. The course is an extended case-study of the global environmental issue of rapid climate change, focusing upon the ethical issues at the heart of the debates about the Kyoto Protocol to the Framework Convention on Climate Change. The key issues include alternative grounds for assigning responsibility for making necessary sacrifices between industrialized and developing nations, alternative principles for handling risks to future generations when outcomes are uncertain, and conflicting views about alleged over-consumption in wealthy nations and alleged over-population in poor nations.

[PHIL 247 Ethics and Public Life
4 credits. Not offered 1999–2000.]

PHIL 249 Feminism and Philosophy (also Women's Studies 249)
Fall. 4 credits. M W F 11:15–12:05. J. Whiting.
An historical introduction, using literary as well as philosophical texts, to views about the nature of women and their position in society—from the ancient debate (between Plato and Aristotle) about whether men and women are by nature suited to different activities, to contemporary debates between "sameness" and "difference" feminists. Texts will include Aeschylus, Plato, Aristotle, Rousseau, Wollstonecraft, Engels, and various twentieth century authors (such as Virginia Woolf, Carol Gilligan, Catherine MacKinnon, and Sarah Hoagland).

PHIL 261 Knowledge and Reality
Fall. 4 credits. T R 11:40–12:55. J. Stanley.
There are many propositions you take yourself now to know. For example, you take yourself now to know that there is a course-description of a philosophy class in front of you. You take yourself to know that a human has been on the moon before. You take yourself to know that two plus two is four. And so on. In taking ourselves to know such propositions, we are assuming that we can come to know facts about the world on the basis of such methods as perception, testimony, and memory. In this course, we will investigate, on an introductory level, different theories of what it is to know something on the basis of perception, reasoning, memory, or testimony. Issues we will discuss include skepticisms, i.e. positions which challenge our right to take these methods as sources of knowledge. We will read classical and contemporary sources.

[PHIL 262 Philosophy of Mind
4 credits. Not offered 1999–2000.]

PHIL 263 Religion and Reason
Spring. 4 credits. M W F 9:05–9:55. S. MacDonald.
What must (or could) God be like, and what reasons do we have for thinking that a being of that sort actually exists? What difference would (or could) the existence of God make to our lives? Religion and Reason examines the idea, common to several major world religions, that God must be an absolutely perfect being. What attributes must a perfect being have? Must it have a mind, be a person, care for human beings? Is the concept of a perfect being coherent? Is the existence of a perfect being compatible with the presence of evil in the world and the existence of human freedom? Does human morality depend in any important way on the nature or will of a perfect being? Is a perfect being among the things that actually inhabit our universe? The course approaches these questions with the tools and methods of philosophical reason and through readings drawn from both classic texts and contemporary philosophical discussion.

[PHIL 270 Truth and Interpretation (also Linguistics 270/Cognitive Studies 270)
4 credits. Not offered 1999–2000.]

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits. M W F 10:10–11:00. R. Boyd.
Topic for 1999–2000: Darwin, Social Darwinism, and Human Sociobiology. An examination of attempts in the biological and social sciences to offer scientific theories of human nature and human potential and to apply such theories to explain important social and psychological phenomena.

Intermediate or Advanced Courses

Some of these courses have prerequisites.

PHIL 309 Plato
Fall. 4 credits. Prerequisites: at least one previous course in philosophy. M W 2:55–4:10. G. Fine.
A systematic survey of many of Plato's dialogues, including the *Republic*. We will consider Plato's views on knowledge and reality, as well as his ethical and political theories. Topics to be covered include the theory of forms; the nature and limits of knowledge and sense perception; the ideally just state; human happiness; why be moral?; the nature of the soul and immortality.

PHIL 310 Aristotle
Spring. 4 credits. T R 10:10–11:25. J. Whiting.
A general introduction to Aristotle's works—from the logical and biological through the ethical and political—organized around the differences, and relations, between his theoretical or scientific works and his practical or ethical works. Topics will include: the

extent to which his ethical and political views are based on his metaphysical and psychological views; and the contrast between the universality and exactness of mathematics and other sciences and the alleged particularity and inexactness of ethics.

PHIL 311 The Rationalists
4 credits. Spring. Prerequisites: at least one previous course in philosophy. T R 1:25–2:40. G. Fine.
We will consider the metaphysics and epistemology of Descartes, Spinoza, and Leibniz. Topics to be considered include: the nature of substance; proofs for the existence of God; free will, determinism, and causation; scepticism; the nature and limits of knowledge; the nature and value of sense perception; mind and body.

PHIL 312 Modern Empiricism
Spring. 4 credits. M W F 11:15–12:05. C. Williams.
A systematic survey of important themes in Hume. We will read extensively in each of the three major divisions of *A Treatise of Human Nature*, with occasional glances at Hume's later writings. Topics will include associationism in philosophical psychology, causal inference and belief in unperceived objects, communication of mental states via sympathy, the alleged "combat" of reason and passion, the moral sense and its evolution.

PHIL 313 Twentieth-Century Continental Philosophy
Spring. 4 credits. M 7:30–10:00 p.m. W. Bracken.
An investigation of leading figures in French and German speaking philosophy in the Twentieth-century, including such movements as existentialism, phenomenology, structuralism, post-structuralism, and the Frankfurt school of Critical Theory. Particular attention will be paid to the ways in which these figures can be understood as continuing "the critique of the subject" that Nineteenth-century German philosophers such as Hegel and Marx derived from Kant. Topics will include many of the following: existential phenomenology's critique of consciousness; the central role given to (differing interpretations of) Hegel's master-slave dialectic; the "decentering" of the subject; Lacan's theory of the mirror stage; structuralist conceptions of the unconscious; humanism and anti-humanism; ideology critique and psychoanalysis as methods of self-overcoming; the relationship between reason and desire; the possibility of an ethics (and a politics) of desire. We will focus on selected readings from Kojève, Sartre, Beauvoir, Lacan, Kristeva, Althusser, Marcuse, Adorno, and possibly one or two others, along with supplementary texts from Hegel, Marx, Freud and Nietzsche.

[PHIL 314 Ancient Philosophy: The World of Theory and the World of Ordinary Life #
4 credits. Not offered 1999–2000.]

PHIL 315 Medieval Philosophy
Fall. 4 credits. T R 11:40–12:55. S. MacDonald.
A survey of some main themes and major figures in medieval philosophy. Emphasis will be on the close reading and analysis of representative texts, but some attention will be given to the general historical development of philosophical themes and traditions during the thousand years separating late antiquity and the Renaissance. Readings (in English translation) may include Augustine, Boethius, Anselm, Abelard, Aquinas, Scotus, and Ockham and address topics in metaphysics, epistemology, ethics, and philosophical theology.

PHIL 316 Kant
Fall. 4 credits. M W F 1:25–2:15. T. Irwin.
An introduction to Kant's main metaphysical and epistemological doctrines as presented in the *Critique of Pure Reason*, including: the nature of space and time, the justification of scientific knowledge, the nature of human reason and self-consciousness. Special attention will be paid to Kant's critique of traditional metaphysics and his attempt to establish a new metaphysics, grounded in practical reason, that establishes the existence of God, human freedom, and morality.

[PHIL 317 Hegel #
4 credits. Not offered 1999–2000.]

PHIL 318 Twentieth-Century Philosophy
Spring. 4 credits. Recommended background: Philosophy 231 or the equivalent. M W 2:55–4:10. J. Stanley.
A survey of philosophical writings from the late 19th to early 20th century including G. Frege, B. Russell, L. Wittgenstein, on language, foundations of mathematics, topics in metaphysics (and perhaps epistemology).

[PHIL 319 Philosophy of Marx #
4 credits. Not offered 1999–2000.]

PHIL 331 Deductive Logic (also Mathematics 281)
Spring. 4 credits. M W F 2:30–3:20. H. Hodes.
Review of derivations and truth-in-a-model; function- constants and identity; truth in non-fully-distinguished models; very basic set-theory; sets as the only mathematical objects; mathematical induction; soundness; completeness. Recommended previous course: Philosophy 231 or equivalent.

PHIL 332 Philosophy of Language
Fall. 4 credits. T R 1:25–2:40. Z. Szabó.
This course is an introduction to contemporary philosophy of language. It does not, however, aim at covering all the ground; instead, we will focus almost exclusively on questions of quantification. Problems surrounding the use of quantifiers in natural languages play an important role in philosophical reflection, so working through this course will help you to orient yourself in contemporary analytic philosophy. In relation to quantification, we will touch on a number of important issues including problems surrounding the logical consequence relation, the status of modalities, the nature of intentionality, and the interpretation of propositional attitudes.

PHIL 341 Ethical Theory
Spring. 4 credits. M W F 10:10–11:00. N. Sturgeon.
Topic for 2000: Consequentialism and Its Critics. A historical and systematic investigation of one of the deepest divides in philosophical debate about ethics, between those who think the moral evaluation of acts, character traits and social institutions depends solely on their good or bad consequences, and critics who find this approach fundamentally misguided.

[PHIL 342 Law, Society, and Morality (also Law 666)
4 credits. Not offered 1999–2000.]

[PHIL 343 Resistance and Responsibility (also Law 676)
4 credits. Not offered 1999–2000.]

[PHIL 344 History of Ethics: Ancient and Medieval #
4 credits. Not offered 1999–2000.]

[PHIL 345 History of Ethics: Modern #
4 credits. Not offered 1999–2000.]

[PHIL 346 Modern Political Philosophy (also Government 462)
4 credits. Not offered 1999–2000.]

[PHIL 361 Metaphysics and Epistemology
Not offered 1999–2000.]

PHIL 362 Philosophy of Mind
Spring. 4 credits. T R 2:55–4:10. S. Shoemaker.
The nature of consciousness. Topics will include: the nature of introspective awareness of one's mental states, the nature of "phenomenal consciousness" and the question of whether this involves "qualia," the function of consciousness, the "explanatory gap" between neural states and conscious states, and the issue of whether the existence of consciousness is compatible with physicalism about the mind and functionalist views about the mind.

[PHIL 363 Topics in the Philosophy of Religion
4 credits. Not offered 1999–2000.]

[PHIL 368 Global Climate and Global Justice (also Government 368)
4 credits. Not offered 1999–2000.]

[PHIL 369 Limiting War (also Government 469)
4 credits. Not offered 1999–2000.]

[PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)
4 credits. Not offered 1999–2000.]

[PHIL 382 Philosophy and Psychology
4 credits. Not offered 1999–2000.]

[PHIL 383 Choice, Chance and Reason
4 credits. Not offered 1999–2000.]

[PHIL 384 Philosophy of Physics
4 credits. Not offered 1999–2000.]

[PHIL 387 Philosophy of Mathematics
4 credits. Not offered 1999–2000.]

[PHIL 389 Philosophy of Science: Evidence and Explanation
4 credits. Not offered 1999–2000.]

PHIL 390 Informal Study
Fall or spring. Credit to be arranged.
To be taken only in exceptional circumstances. Must be arranged by the student with his or her adviser and the faculty member who has agreed to direct the study.

Advanced Courses and Seminars

These courses are offered primarily for majors and graduate students.

[PHIL 395 Majors Seminar
4 credits. Not offered 1999–2000.]

[PHIL 409 German Philosophical Texts
Not offered 1999–2000.]

PHIL 410 Latin Philosophical Texts #
Fall and spring. Variable credit. Prerequisites: knowledge of Latin and permission of instructor. Hours to be arranged. S. MacDonald.
Reading of philosophical texts in the original Latin.

PHIL 411 Greek Philosophical Texts (also Classics 311) #
Fall and spring. Variable credit. Prerequisites: knowledge of Greek and permission of instructor. Hours to be arranged. T. Irwin, C. Brittain.
Reading of philosophical texts in the original Greek.

[PHIL 412 Medieval Philosophy #
Not offered 1999–2000.]

PHIL 413 Topics in Ancient Philosophy (also Society for the Humanities 402 and 403)
Fall and spring. 4 credits. T 2:30–4:25. C. Brittain.
Fall: Topic: Augustine's Confessions: Memory and the Self. Augustine's *Confessions* record the strange story of his conversion to or rediscovery of God under the stimulus of the letters of Paul and the pagan philosophy of Plotinus. The *Confessions* interpret his conversion as an act of memory or self-investigation which culminates in a Platonist philosophical vision of the divine at the limits of the self; the work itself is written as a self-conscious act of memory (or self-investigation); it also contains a theoretical analysis of memory (Book X). This course will study Augustine's conception of memory as the source of the self and the bridge from the self to the divine, and its origins in Greek philosophy, Latin rhetorical theory, and individual experience.

Spring: Topic: Augustine's Dialogues on the Soul. Augustine's first works after his conversion were a series of Christian philosophical dialogues, modeled on the exemplary works of Cicero. The dialogues exploit the Platonist conception of the soul Augustine found in the works of Plotinus: its immateriality *(On the quantity of the Soul)*, its intellectual capacities (*Against the Academics*), its immortality *(On the immortality of the Soul)*, and its relation to God (*The Soliloquies*). But theses texts are not simple translations of Greek philosophy into the pre-existing mold of the Latin dialogue; they represent Augustine's appropriation of the 'pagan' cultures of Greece and Rome for a new intellectual vision of Christianity. This course will examine Augustine's fusion and transformation of both the philosophical sources and the literary forms which provoked these powerful and conceptually rich dialogues.

[PHIL 414 German Philosophy after Kant #
Not offered 1999–2000.]

PHIL 415 Special Topics in the History of Philosophy (also Society for the Humanities 406 and 416)
Fall and spring. 4 credits. Fall, M 12:20–2:15; spring, M 12:20–2:15. F. Neuhouser.
Fall: Topic: Subjectivity and the Other I. This seminar examines various forms of the idea that interactions with "the other" (i.e., with other subjects) are essentially involved in the constitution of subjectivity. It will focus on the ways in which contact with the other is essential to reason, morality, freedom, and personal identity, as well as to alienation and self-tyranny. Readings will include: Rousseau on self-love and its connection to autonomy; Hegel's account of the master-slave relation and the unhappy consciousness; Sartre's view of the other as a threat to subjectivity; and de Beauvoir's portrayal of woman as the other and her attempt to unite autonomous subjectivity with being an object for others.

Spring: Topic: Subjectivity and the Other II. This seminar continues and expands the themes of its predecessor with special attention to the role played by the other in certain (loosely speaking) psychological theories of selfhood. Topics will include: G. H. Mead on the importance of social roles to selfhood; Nietzsche on guilt, enslavement, and resentment; Freud's theory of neuroses, narcissism, and the therapeutic relation between analyst and analysand; and Kristeva's view of the other as internal to each of us.

[PHIL 416 Modern Philosophy #
Not offered 1999–2000.]

[PHIL 431 Mathematical Logic (also Mathematics 481)
4 credits. Not offered 1999–2000.]

[PHIL 432 Topics in Logic (also Math 482)
4 credits. Not offered 1999–2000.]

[PHIL 433 Philosophy of Logic
4 credits. Not offered 1999–2000.]

PHIL 434 The Foundations of Mathematics (also Math 384)
Fall. 4 credits. M W F 2:30–3:20. H. Hodes.
Topic for 1999: set-theoretic foundations: formalizing logic (with attention to classical vs intuitionistic reasoning); formalizing arithmetic; set theory and its ZF- (and IZF) formalization; ordinal and cardinal numbers; the axiom of choice; number-systems within set-theory; truth and consistency in set-theory; alternatives to the ZF-formalization. Time permitting we'll constrast the set-theoretic approach with approaches based on untyped Lambda-calculi or type-theories.

[PHIL 436 Intensional Logic (also Math 486)
4 credits. Not offered 1999–2000.]

[PHIL 437 Topics in the Philosophy of Language
4 credits. Not offered 1999–2000.]

[PHIL 441 Contemporary Ethical Theory
4 credits. Not offered 1999–2000.]

PHIL 442 Ethics and the Philosophy of Mind (also Society for the Humanities 409)
Fall. 4 credits T 12:20–2:15. J. Hill.
Topic: "Cosmopolitanism and The Self". This seminar philosophically examines the racial and ethnic tribal identities on which contemporary selves are predicated. As a plausible antidote to problems spawned by tribalism, we will examine the possibility of a moral cosmopolitan identity. Readings will be drawn from the Ancient and Enlightenment cosmopolitans as well as contemporary texts which aim to deconstruct the concept of race.

PHIL 443 Aesthetic Theory
Spring. 4 credits. T R 11:40–12:55. C. Williams.
An examination of issues that commonly arise from our experience of the arts: the character and appropriateness of aesthetic judgments; the content of artworks, and the extent to which contents can be reproduced, stated, or paraphrased; the relevance of moral considerations; aesthetic desiderata (e.g., uniqueness, expressiveness) and aesthetic defectiveness (e.g., sentimentality, bad taste, insincerity). Although these issues can be formulated in a way that is neutral between the various arts, they can seem more pressing (or intractable) for specific arts; and we will give some attention to the more specialized contexts.

[PHIL 444 Contemporary Legal Theory (also Law 710)
4 credits. Not offered 1999–2000.]

[PHIL 446 Topics in Social and Political Philosophy (also Government 474)
4 credits. Not offered 1999–2000.]

PHIL 447 Contemporary Political Philosophy [also GOVT 465]
Fall. 4 credits. T R 2:55–4:10. R. Miller.
Topic for 1999: Reconceiving Liberalism. While traditional liberal goals of civil liberty, political equality and fair economic opportunity retain a central place in current political philosophy, liberalism has recently been subject to a variety of sharply contrasting interpretations, e.g., as based on political values shared by all reasonable moral doctrines (Rawls); as sustained by a general account of moral obligation, centered on mutual justifiability (Scanlon); or as expressing a distinctive view of the good life, in which autonomy plays a fundamental role (Raz). Others (e.g., Sandel) have argued that central liberal goals require, for their achievement, an ethic of solidarity and the collective development of shared values. Our discussion of these outlooks and their critics will include Rawls, *Political Liberalism*; Scanlon, *What We Owe to Each Other*; Raz, *The Morality of Freedom*; Sandel, *Democracy's Discontent*; and relevant disputes over the liberty and equality protected by the U.S. Constitution.

[PHIL 460 Metaphysics and Epistemology (also Society for the Humanities 444)
4 credits. Not offered 1999–2000.]

[Philosophy 461 Feminist Epistemology (also Women's Studies 461)
4 credits. Not offered 1999–2000.]

[PHIL 462 Philosophy of Mind
4 credits. Not offered 1999–2000.]

PHIL 481 Problems in the Philosophy of Science
Spring. 4 credits. W 7:30–10:00. R. Boyd.
Topic for 1999–2000: objectivity in science: alternative approaches from philosophy, science studies, feminist theory and radical critiques of science.

PHIL 490 Special Studies in Philosophy
Fall and spring. 4 credits. Open only to honors students in their senior year. See Honors description at front of Philosophy section.

PHIL 611 Ancient Philosophy
Spring. 4 credits. M 4:30–6:30. T. Irwin.
Topic for 1999–2000: nature, natural law, naturalism: historical questions in meta-ethics.

[PHIL 612 Medieval Philosophy
Not offered 1999–2000.]

[PHIL 613 Modern Philosophers
4 credits. Not offered 1999–2000.]

[PHIL 619 History of Philosophy
4 credits. Not offered 1999–2000.]

PHIL 633 Philosophy of Language
Fall and spring. 4 credits. Fall, W 4:30–6:30, J. Stanley; spring, R 4:30–6:30, Z. Szabo.
Fall: special topics in the philosophy of language. **Spring**: topics in semantics and pragmatics. We will survey current work in linguistics and in the philosophical literature with special focus on anaphora and quantification.

PHIL 641 Ethics and Value Theory
Fall. 4 credits. M 4:30–6:30. N. Sturgeon. Topic for fall: moral relativism, moral realism and moral nihilism

PHIL 642 Morality, Self, and Psychopathology
Spring. 4 credits. T 4:30–6:30. J. Whiting. Philosophical accounts of personal identity typically aspire to a kind of universality; each account tends to represent itself as *the* (presumably uniquely) correct account implying the falsity of its various rivals (e.g., psychological continuity theories implying the falsity of bodily continuity theories and vice versa). But to the extent that we are dealing with *selves*—i.e., partially reflexive entities—it seems possible that different self-*conceptions* might yield different sorts of *selves*, some, for example, more, and some less, bodily (or psychological) than others. We will examine this sort of "contingency of selfhood" both cross-culturally (looking, e.g., at non-Western conceptions of self and at the Buddhist ideal of self-dissolution) and psychopathologically (looking, e.g., at pathological configurations of self such as those involved in autism, schizophrenia, multiple-personality-disorder, and eating disorders), treating the study of psychopathology as akin (for our purposes) to ethnography. The idea is to see whether forms of selfhood (or subjectivity) that we take for granted and perhaps even view as inescapable are in fact contingent and optional. We can then ask what sorts of selfhood (or subjectivity) it is *valuable* (morally, aesthetically, or otherwise) to cultivate. This raises the difficult question of the point(s) of view from which we are to make such assessments.

[PHIL 661 Theory of Knowledge
4 credits. Not offered 1999–2000.]

PHIL 662 Philosophy of Mind
Fall. 4 credits. T 4:30–6:30. S. Shoemaker. The Mind-Body Problem: mental causation, the physical realization of mental states, and emergence.

[PHIL 663 Philosophy of Religion
4 credits. Not offered 1999–2000.]

[PHIL 664 Metaphysics
4 credits. Not offered 1999–2000.]

[PHIL 665 Metaphysics
4 credits. Not offered 1999–2000.]

[PHIL 681 Philosophy of Science
4 credits. Not offered 1999–2000.]

[PHIL 682 Philosophy of Social Science
4 credits. Not offered 1999–2000.]

PHIL 700 Informal Study
Fall or spring. Credit to be arranged. To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee and the faculty member who has agreed to direct the study.

PHIL 773 Proseminar in Cognitive Studies (also Cognitive Studies 773, Linguistics 773, and Computer Science 773)
Fall. 2 credits. Fall: R grade.
For description, see COGST 773.

PHIL 774 Proseminar in Cognitive Studies (also Linguistics 774)
For description, see COGST 774.

Related course in other department

German Studies 378. German Aesthetic Theory from Kant to Hegel. P. Gilgen.

PHYSICS

The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by two component organizations, the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Nuclear Studies (LNS). LASSP carries out extensive research efforts in condensed-matter physics and in low-temperature physics. LNS operates a major high-energy particle physics research facility at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Junior and senior students will find many opportunities for research participation and summer employment.

Introductory physics sequences are: 101–102, 207–208, and 112–213–214, or its honors version 116–217–218. In addition, there is a group of general-education courses, Physics 200 through 206, 209, 210. Physics 101–102, a self-paced autotutorial course, is designed for students who do not intend to take further physics courses and who do not have preparation in calculus. Physics 112 and 207 both require calculus (Mathematics 191 or 111), and additional mathematics is required for subsequent courses in the sequence. Physics 101–102 or 207–208 may be taken as terminal physics courses. The three-term sequence 112–213–214 or its honors version, 116–217–218, is recommended for engineers and physics majors. Physics 214 and 218 are placing an increasing emphasis on use of the computer for homework, laboratory exercises, and projects; some knowledge about computing, perhaps at the level of Computer Science 99 or 100, is desirable.

Courses beyond the introductory level that might be of interest to nonmajors include. Physics 316 (Modern Physics I); Physics 330 (Modern Experimental Optics); and Physics 360 (Electronic Circuits).

Advanced placement and credit are offered as outlined in "Advanced Placement of Freshmen," or students may consult Professor Rogers, the director of undergraduate studies, as should students requesting transfer credit for physics courses taken at another college.

The Major

The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals.

Students who wish to major in physics are advised to start the physics sequence in the first term of their freshman year. (Note that students who have had contact with introductory calculus may take Physics 112 with co-registration in Mathematics 191.) The major program can still be completed with a second-term start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of a year of physics and mathematics courses at Cornell with all course grades at the B-level or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major adviser.

Physics Core

Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-term introductory sequence (Physics 112–213–214 or Physics 116–217–218), the core includes five upper-level courses—(a) the two-course sequence in modern physics (Physics 316–317), (b) at least three semester hours of laboratory work selected from Physics 310, 330, 360, 410, Astronomy 410, (c) an intermediate course in classical mechanics, and (d) an intermediate course in electromagnetism.

Accompanying these physics courses should be work in mathematics through at least Mathematics 222 or 294. Students following the professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (Applied and Engineering Physics 321–322 or Mathematics 321/420–422).

In *addition* to the core, each physics major must complete 15 semester hours of credit in an area of concentration which has been agreed upon by the student and major faculty adviser.

Typical Physics Course Sequences (other sequences are also possible)

Semester	No AP math or physics	1 year AP calculus and good HS physics	Outside concentrators	Outside concentrators (alternate)
1st – Fall	112	116	112	
2nd – Spring	213	217	213	112
3rd – Fall	214	218	214	213
4th – Spring	316, 3x0	316, 3x0	3x0	214
5th – Fall	317, 327, 3x0	317, 327, 3x0	316	3x0, 316
6th – Spring	314/318, 443	318, 443	314	314, 3x0
7th – Fall	341, 410	341, 410	317, 323	317, 323
8th – Spring	Elective(s)	Elective(s)		

•For majors with concentrations outside physics, there will be wide variation in individual programs, arranged to best match the field of concentration.

•Crossovers between the two sequences 112–113–214 and 116–217–218 are possible, although the combinations 112–217–218 and 112–213–218, are difficult. Physics 207 may be substituted for Physics 112. Students taking 217 after 112 must coregister for 216.

•Students taking the honors sequence 116–217–218 are strongly encouraged to start with Physics 116. Exceptionally well-prepared students may be able to begin work at Cornell with Physics 217. Such students should come to the department office for advice in planning a course program.

•Physics electives include 360, 444, 454, 455, 480, 525, 553, 561, 572, the senior seminars 481–483, Astronomy 332 or 431–432, and A&EP 434.

•One semester of intermediate laboratory, listed here as 3x0, is required.

•Well-prepared sophomores wishing to take Physics 318 should consult the instructor before registering.

Concentration within Physics

A student who wishes to pursue professional or graduate work in physics or a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence Physics 116–217–218 is encouraged. Students are strongly encouraged to start the sequence with Physics 116, even if they qualify for advanced placement credit for Physics 112. Core courses in mechanics and electromagnetism will normally be Physics 318 and Physics 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course Physics 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of pre-college work in calculus and in physics. Changes in these typical patterns will be common, as agreed upon between student and major faculty adviser.

Concentration outside Physics

The concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty adviser and must be approved by the adviser. Of the required 15 hours credit beyond the core, at least 8 credits must be in courses numbered above 300. Students have chosen to concentrate in such topics as chemical physics, astrophysics, natural sciences, history and philosophy of science, computer science, meteorology, or econometrics. A combined biology-chemistry concentration is appropriate for pre-medical students or those who wish to prepare for work in biophysics. Students interested in a career in the teaching of science should consider the Teacher Education in Science and Mathematics (TESM) Program, which is administered by the Departments of Education and Mathematics and is described in detail in the College of Arts and Sciences section of this catalog. A concentration in "science education" would then typically include Education 402 and 403, both part of TESM, and two or more courses designed to broaden the student's background in general science and mathematics.

For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with Physics 314 and Physics 323, respectively.

Students with an astronomy concentration who might continue in that field in graduate school should use Astronomy 410, 431, 432 as part of the concentration; they are encouraged to use Physics 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

Foreign Language Requirement

Students interested in eventual graduate work in physics are advised to meet this College of Arts and Sciences requirement with work in French, German, or Russian.

Honors

A student may be granted honors in physics upon the recommendation of the Physics Advisers Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

Double Majors

Double majors including physics are possible and not at all uncommon. It should be noted, however, that if a student wishes to complete a major in physics as well as a major in one or more other subjects, any course used to satisfy a requirement of the second major may not be used also in satisfaction of any physics major requirement.

Courses with Overlapping Content

Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content. In general, students may receive credit for only one of the courses in each group.

Physics 101, 112, 116, 207
Physics 102, 208, 213, 217
Physics 214, 218
Physics 314, 318
Physics 323, 327

Course Prerequisites

Prerequisites are specified in physics course descriptions to illustrate the materials that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisite ordering are urged to discuss their preparation and background with a physics adviser or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

Courses

Listed days and times are not definite but are unlikely to change. Days and times will not be listed for 600-level courses.

PHYS 101 General Physics I
Fall, summer 4-week or 8-week session. 4 credits. General introductory physics for non-physics for non-physics majors. Prerequisites: three years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for Physics 101. Includes less mathematical analysis than Physics 207, but more than Physics 200–206, 209, 210. Enrollment may be limited. Fall introductory lec. R Aug. 26 or M Aug. 30, 7:30 p.m. J. Parpia.
Physics 101 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit. Most instruction occurs in the learning center utilizing video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 101: kinematics, forces and dynamics, momentum, energy, fluid mechanics, waves and sound, thermal physics, kinetic theory, and thermodynamics. At the level of *Physics* by Cutnell and Johnson.

PHYS 102 General Physics II
Spring, summer 4-week or 8-week session. 4 credits. Prerequisite for Physics 102: Physics 101 or 112 or 207. Includes less mathematical analysis than Physics 208, but more than Physics 200–206, 209, 210. Enrollment may be limited. Spring introductory lec, M Jan. 24, 7:30 p.m. Staff.
Physics 101–102 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit each term. Most instruction occurs in the learning center utilizing video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 102: electricity and magnetism, optics, relativity, atomic, quantum, and nuclear physics. At the level of *Physics* by Cutnell and Johnson.

PHYS 103 General Physics
Summer. 4 credits. Prerequisite: three years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for Physics 103. Physics 103 is a more traditional version of Physics 101. Physics 103 is not appropriate for students majoring in physics or engineering. Primarily for students majoring in the life sciences. Lectures and discussions: M-F 10:00–11:15; laboratories M W 2:00–5:00.
Basic principles treated quantitatively but without calculus. Kinematics; forces and fields, momentum, angular momentum and energy; thermal physics and fluid mechanics; and sound waves. Text at the level of *Physics*, 4th edition, by Cutnell and Johnson.

PHYS 112 Physics I: Mechanics
Fall, spring, summer 6-week session. 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisite: coregistration in Mathematics 192 (or 194 or 112), or substantial previous contact with introductory calculus combined with coregistration in Mathematics 111 or 191. Lec, M W F 10:10–11:00 or 12:20–1:10. Two rec. and one lab/cooperative learning session each week. Evening exams. Fall, P. Krasicky; spring, R. Galik.
Mechanics of particles: kinematics, dynamics, conservation laws, central force fields, periodic motion. Mechanics of many-particle systems: center of mass, rotational mechanics of a rigid body, static equilibrium. At the level of *University Physics, Vol. 1*, by Young and Freedman.

PHYS 116 Physics I: Mechanics and Special Relativity
Fall, spring. 4 credits. More analytic than Physics 112, intended for students who will be comfortable with a deeper, somewhat more abstract approach. Intended mainly but not exclusively for prospective physics majors. Prerequisites: a good secondary school physics course and familiarity with basic calculus. Corrective transfers between Physics 116 and Physics 112 (in either direction) are encouraged during the first few weeks of instruction. Lec, M W F 10:10–11:00. Fall, H. Tye; spring, R. Patterson.
A more rigorous version of Physics 112, covering similar topics at the level of *An Introduction to Mechanics*, by Kleppner and Kolenkow.

PHYS 190 Supplemental Introductory Laboratory
Fall, spring. 1 credit. Times by arrangement with instructor. S-U only. Enrollment limited to students who have **all** of the following; (i) three transfer credits for introductory physics lecture material; (ii) a degree requirement of the laboratory component of that introductory course; (iii) approval of the director of undergraduate studies; (iv) permission of the lecturer of that course at Cornell. Enrollment limited.
A Physics 190 Permission Form must be filed in 121 Clark Hall with the physics department course coordinator. Students perform the laboratory component of one of the introductory courses (Physics 112, 213, 214) to complement the lecture-related course credit acquired elsewhere. Those wishing to take the equivalent of one of these introductory courses at another institution should receive prior approval from the director of undergraduate studies.

PHYS 200 Art, Archaeology, and Analysis (also Geology 200, Engineering 185, MS&E 285, Archaeology 285, and Art 372)
For description, see GEOL 200.

PHYS 201 Why the Sky Is Blue: Aspects of the Physical World
Fall. 3 credits. Lec, T R 2:55–4:10, rec, W 2:30–3:20 or W 3:35–4:25. A. Sadoff.
This is a descriptive physics course aimed specifically at the non–science student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overriding theme is the character of physical laws as shown through the great principles of symmetry and conservation. While there are a few computational problems assigned, the purpose is to help students to understand the concepts rather than to master problem-solving techniques. At the level of *Physics for Poets* by March.

PHYS 202 The World According to Physics—The Way Things Work
Summer-3 week session. 3 credits. Prerequisite: three years of high school mathematics, including some trigonometry. M–F 10:00–12:00; laboratories 2 afternoons per week to be arranged. R. Lieberman.
Intended to provide students majoring in fields outside the sciences with an appreciation for the familiar physical world surrounding them. Which falls faster, a pound of gold or a pound of feathers? What trajectory does a launched rocket follow? Why are the curves on highways banked? What actually keeps a satellite circling the earth—why doesn't it just fall down or fly away? Can you build a ship that runs off the heat found in the ocean? With an emphasis on problem solving, the course helps the student to develop skills transferable to other areas. Topics include Newton's basic laws of motion, trajectories, satellites, space travel, and the concepts of energy.

PHYS 203 Physics of the Heavens and the Earth—A Synthesis
Spring. 3 credits. Prerequisite: none; uses high school algebra and geometry. For nonscience majors. Lec T R 2:55–4:10; sec W 2:30–3:20 or 3:35–4:25. H. Padamsee.
This course shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and understanding. The material is divided into three parts: the physics of motion on earth and motion in the heavens, showing how the two evolved separately, from the ideas of the ancient Greeks to the dynamics and telescopic discoveries of Galileo; the final melding of these two topics with Newton's Universal Gravitation; an exploration of this "new" physics and its impact. There is an emphasis throughout on "how do we know the laws?" These are the stories of breakthrough discoveries and brilliant insights made by fascinating people, offering at the same time a humanistic perspective.

PHYS 204 Physics of Musical Sound
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec M W F 9:05–9:55; sec R or F 3:35–4:25. E. Cassel.
Many features of the production, propagation, and perception of musical sound may be understood in terms of important concepts in physics. Topics covered will include the mechanism of tone production in musical instruments, distinctions in tone quality, musical scales and tuning, some basic principles of room acoustics, and aspects of the mechanism of hearing. In addition to homework assignments and exams, students will write a research paper investigating a topic in the physics of sound that interests them. At the level of *The Acoustical Foundations of Music*, by J. Backus.

[PHYS 205 Reasoning about Luck
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, M W 2:30–4:00; rec, T 2:30–3:20. Not offered 1999–2000.
An attempt to explain how natural scientists can cope rationally with randomness. The first part of the course deals with the basic ideas of probability theory and explains why it is that in large systems likely events can become overwhelmingly likely. If we apply these ideas to gases consisting of very large numbers of molecules, an explanation of the true nature of heat follows. In this way, students are given a deep understanding of the second law of thermodynamics.

Probability enters into quantum mechanics in a more basic and somewhat mysterious way. We will spend the latter part of the course giving simple examples of the difference between classical and quantum probability. In particular, we discuss what is meant by an "entangled state" and how we know there are no hidden variables. At the level of *Reasoning About Luck: Probability and Its Uses in Physics* by Ambegaokar.]

PHYS 207 Fundamentals of Physics I
Fall. 4 credits. Prerequisites for Physics 207: high school physics plus Mathematics 111 or 191, or substantial previous contact with introductory calculus, combined with coregistration in a math course approved by instructor. Lec, M W F 9:05–9:55 or 11:15–12:05; two rec. and one lab each week. Evening exams. R. Thorne.
Physics 207–208 is a two-semester introduction to physics with emphasis on tools generally applicable in the sciences, intended for students majoring in a physical science, mathematics, or an analytically oriented biological science.

Mechanics, conservation laws, waves, and topics from thermal physics, fluids, acoustics and properties of matter. At the level of *Fundamentals of Physics*, Vol. I, 5th edition, by Halliday, Resnick, and Walker.

PHYS 208 Fundamentals of Physics II
Spring. 4 credits. Prerequisites for Physics 208: Physics 207 or 112 or 101 and at least coregistration in Mathematics 112 or 192. Physics 207–208 is a two-semester introduction to physics with emphasis on tools generally applicable in the sciences, intended for students majoring in a physical science, mathematics, or an analytically oriented biological science. Lec, M W F 9:05–9:55 or 11:15–12:05; two rec. and one lab each week. Evening exams. Staff.
Electricity and magnetism, and topics from physical and geometrical optics, quantum and nuclear physics. At the level of *Fundamentals of Physics*, Vol II, 5th edition, by Halliday, Resnick, and Walker.

PHYS 209 Relativity and Chaos
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, T R 1:25–2:40; rec, M 2:30–3:20 or M 3:35–4:25. N. D. Mermin.
We will examine two revolutionary fields of classical physics, one venerable and one relatively recent: the special theory of relativity will be developed, with a view to understanding how certain simple but apparently contradictory facts about light lead to extraordinary insights into the nature of time; and the newer subject of "chaos" will be explored, with a view to seeing how extremely simple rules can lead to behavior of breathtaking complexity.

PHYS 210 Randomness in Classical and Quantum Physics
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, T R 1:25–2:40; rec, M 2:30–3:20 or M 3:35–4:25. N. D. Mermin.
We will examine two areas of physics where randomness plays a central role: the classical probability theory of gamblers, and its relation to subjects from the nature of coincidence to the direction of the flow of time; and the quantum theory, which promotes randomness from a consequence of human ignorance to a fundamental aspect of the physical world, leading to Einstein's celebrated rejection of a dice-throwing God and his more disturbing complaint about "spooky actions at a distance."

PHYS 213 Physics II: Heat/ Electromagnetism
Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: Physics 112 and coregistration in the continuation of the mathematics sequence required for Physics 112. Lec, T R 9:05–9:55 or 11:15–12:05, two rec. each week and six 2-hour labs. Evening exams. Fall, R. Galik; spring, staff.
Temperature, heat, thermal energy, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday's law, Maxwell's equations, electromagnetic oscillations. At the level of *University Physics/Vol. 1&2*, by Young and Freedman. Laboratory covers electrical measurements, circuits, and some aspects of heat transfer.

PHYS 214 Physics III: Optics, Waves, and Particles
Fall, spring, (summer, 6 week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: Physics 213 and coregistration in the continuation of the mathematics sequence. Lec, T R 9:05–9:55 or 11:15–12:05. Two rec. each week and one 3-hour lab alternate weeks. Evening exams. Fall, J. Sethna; spring, staff.
Physics of wave phenomena, electromagnetic waves, interference and diffraction effects, wave properties of particles and introduction to quantum physics. Course includes computer use in solving problems and labs. At the level of *University Physics, Vol. 1&2*, by Young and Freedman.

PHYS 216 Introduction to Special Relativity
Fall, spring, based upon preregistration. 1 credit. S-U only. Enrollment may be limited. Course will be completed within first four to six weeks of term. Coregistration in this course is a requirement for registration in Physics 217, unless the student has taken a relativity course at the level of Physics 116 or Astronomy 106. Prerequisites: Physics 112 or Physics 207 or permission of instructor. Lec, T R 8:00–8:50. Fall, J. Rogers; spring, staff.
Introduction to Einstein's Theory of Special Relativity: Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum and energy, and relativistic invariance in the laws of physics. At the level of *An Introduction to Mechanics* by Kleppner and Kolenkow or *Space and Time in Special Relativity* by Mermin.

PHYS 217 Physics II: Electricity and Magnetism (also A&EP 217)
Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in Physics 112 or 116 and in mathematics and who desire a more analytic treatment than that of Physics 213. Prospective physics majors are encouraged to select Physics 217. Prerequisites: approval of student's adviser and permission from the instructor. A placement quiz may be given early in the semester, permitting those students who find Physics 217 too abstract or analytical to transfer into Physics 213, which they can do without difficulty at that time. Vector calculus will be taught in this course, but previous contact, especially with the operations *grad*, *div*, and *curl*, is helpful. It is assumed the student has seen Special Relativity at the level of Physics 116 or is currently enrolled in Physics 216. It is also assumed that the student has covered the material of Mathematics 192 and is coregistered in Mathematics 293 or the equivalent. Lec, M W F 10:10–11:00. Fall, A. Sievers; spring, R. Buhrman.
At the level of *Electricity and Magnetism*, by Purcell (Vol. 2, Berkeley Physics Series).

PHYS 218 Physics III: Waves and Thermodynamics
Fall, spring. 4 credits. Enrollment may be limited. A more rigorous version of Physics 214. Conditions governing enrollment are similar to those of Physics 217. Lec, M W F 11:15–12:05. Fall, C. Franck; spring, K. Berkelman.
Topics covered in recent years have included oscillators, mechanical waves, waves at interfaces, standing waves, electromagnetic waves, guided waves, scattering, interference and diffraction, geometric optics, the doppler effect, and an introduction to matter waves. Evening exams may be scheduled. At the level of *Electronic Vibrations, Waves and Radiation* by Bekefi and Barrett.

PHYS 310 Intermediate Experimental Physics
Spring. 3 credits. Enrollment may be limited. Prerequisite: Physics 208 or 213. Labs T R 1:25–4:25.
Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the Physics 410 lab are available for some experiments.

PHYS 314 Intermediate Mechanics
Spring. 4 credits. Prerequisites: Physics 208 or 214 (or equivalent) and Math 294 (or equivalent); Applied and Engineering Physics 322 or coregistration in Mathematics 420/421 recommended. Intended for physics majors with concentration outside of physics or astronomy; Physics 318 covers similar material at a more analytical level. Lec, M W F 10:10–11:00, rec, F 1:25–2:15. C. Franck.
Includes Newtonian mechanics, Lagrange and Hamilton formulations, central forces, rigid body motion, and small oscillations. At the level of *Classical Dynamics* by Marion and Thornton.

PHYS 316 Modern Physics I
Fall, spring. 3 credits. Prerequisites: Physics 214 or 218 and coregistration in at least Mathematics 294 or equivalent. It is assumed that majors registering in Physics 316 will continue with Physics 317. Lec, M W F 9:05–9:55; rec, R 3:35–4:25. Fall, S. Teukolsky; spring, D. Rubin.
Breakdown of classical concepts in microphysics; light quanta and matter waves; Schrödinger equation and solutions in 1 and 3 dimensions; hydrogen atom, exclusion principle, spin and magnetic moments. At the level of *An Introduction to Quantum Physics* by French and Taylor.

PHYS 317 Modern Physics II
Fall. 3 credits. Prerequisite: Physics 316. Lec, M W F 9:05–9:55, rec, T 2:30–3:20. E. Flanagan.
Investigation of quantum phenomena; classical and quantum statistical mechanics; molecules; solid state physics; nuclear physics and radioactivity; elementary particle physics. At the level of *Modern Physics* by Serway.

PHYS 318 Analytical Mechanics
Spring. 4 credits. Prerequisites: Physics 116 or permission of instructor; Applied and Engineering Physics 321 or Mathematics 420. Intended for junior physics majors concentrating in physics or astronomy. Physics 314 covers similar material at a less demanding level. Lec, M W F 10:10–11:00; rec, F 2:30–3:20. P. Drell.
Newtonian mechanics of particles and systems of particles, including rigid bodies; oscillating systems; gravitation and planetary motion; moving coordinate systems; Euler's equations; Lagrange and Hamilton formulations; normal modes and small vibrations; introduction to chaos. At the level of *Classical Dynamics* by Marion and Thorton and *Physics 318 Lecture Notes* by Hand and Finch. Supplementary reading will be assigned.

PHYS 323 Intermediate Electricity and Magnetism
Fall. 4 credits. Prerequisites: Physics 208 or 213/214 (or equivalent) and Math 293/294 (or equivalent); coregistration in Applied and Engineering Physics 321 or Math 420 recommended. Intended for physics majors with a concentration outside of physics or astronomy; Physics 327 covers similar material at a more analytical level. Lec, M W F 11:15–12:05, rec, F 2:30–3:20. R. Talman.
Includes electro/magnetostatics, boundary value problems, dielectric and magnetic media, Maxwell's Equations, electromagnetic waves, and sources of electromagnetic radiation. At the level of *Introduction to Electrodynamics* by Griffiths.

PHYS 327 Advanced Electricity and Magnetism
Fall. 4 credits. Prerequisites: Physics 217/218 or permission of instructor; coregistration in Applied and Engineering Physics 321 or Mathematics 420. Intended for physics majors concentrating in physics or astronomy. Physics 323 covers similar material at a less demanding level.
N.B.: Physics 327 assumes knowledge of the material at the level of Physics 217. Lec, M W F 11:15–12:05, rec, F 2:30–3:20. L. Gibbons.
Electro/magneto-statics-vector and scalar potentials, Laplace's Equation and boundary value problems, multipoles; radiation-solutions to Maxwell's Equations, energy-momentum of radiation; electrodynamics in media; special relativity-transformations, four vectors, particle kinematics and dynamics, relativistic electrodynamics. At the level of *Classical Electromagnetic Radiation*, by Heald and Marion.

PHYS 330 Modern Experimental Optics (also A&EP 330)
Fall. 4 credits. Enrollment limited. Prerequisite: Physics 214 or equivalent. Lec, M 2:30–3:20; Lab, T W 1:25–4:25; sec. F 3:35–4:25. A. Gaeta.
A practical laboratory course in basic and modern optics. The seven projects cover a wide range of topics from geometrical optics to classical wave properties such as interference, diffraction and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. The students will also be introduced to digital imaging and image processing techniques. At the level of *Optics* by Hecht.

PHYS 341 Thermodynamics and Statistical Physics
Fall. 4 credits. Prerequisites: Physics 214 and Mathematics 294. Lec, M W F 10:10–11:00, rec, R 2:30–3:20. V. Elser.
Statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, free energy. Applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems; introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of *Fundamentals of Statistical and Thermal Physics*, by Reif, or *Introduction to Statistical Mechanics* by Betts.

PHYS 360 Electronic Circuits (also A&EP 363)
Fall, spring. 4 credits. Prerequisites: Physics 208 or 213 or permission of the instructor. No previous experience with electronics assumed, however, the course moves quickly through some introductory topics such as basic DC circuits. Fall term is usually less crowded. Lec, M 2:30–4:25; labs, T R or W F 1:235–4:25 (also evening labs M W 7:30–10:30 spring). Fall, E. Kirkland; spring, R. Thorne.
Analyze, design, build and experimentally test circuits used in scientific and engineering instrumentation (with discrete components and integrated circuits). Analog circuits: resistors, capacitors, operational amplifiers (linear amplifiers with feedback, oscillators, comparators), filters, diodes and transistors. Digital circuits: combinatorial (gates) and sequential (flip-flops, counters, shift registers) logic. Computer interfacing introduced and used to investigate digital to analog (DAC) and analog to digital conversion (ADC) and signal averaging. At the level of *Microelectroinic Circuits* by Sedra.

PHYS 400 Informal Advanced Laboratory
Fall, spring; (summer, 6 week session). Variable to 3 credits. (3 credits *NOT* variable in summer.) Prerequisites: two years of physics or permission of instructor. Lab T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill.
Experiments of widely varying difficulty in one or more areas, as listed under Physics 410, may be done to fill the student's special requirements.

PHYS 410 Advanced Experimental Physics
Fall, spring. 4 credits. Limited to seniors except by special permission. Prerequisites: Physics 214 (or 310 or 360) plus 318 and 327, or permission of instructor. Lec, M 2:30–3:20, lab T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill.
Selected topics in experimental concepts and techniques. About sixty different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, nuclear physics. The student performs three to six diverse experiments, depending on difficulty, selected to meet individual needs and interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

PHYS 443 Introductory Quantum Mechanics
Spring. 4 credits. Prerequisites: Physics 327 or 323; and Physics 316 and Applied and Engineering Physics 321 or Mathematics 420; coregistration in Physics 314 or 318; or permission of instructor. Lec, M W F 9:05–9:55, rec, R 3:35–4:25. S. Teukolsky.
Introduction to concepts and techniques of quantum mechanics, at the level of *An Introduction to Quantum Mechanics*, by Griffiths.

PHYS 444 Nuclear and High-Energy Particle Physics
Spring. 4 credits. Prerequisite: Physics 443 or permission of instructor. Lec, M W F 9:05–9:55, rec, F 2:30–3:20. Staff.
Behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors; general symmetries and conservation laws. At the level of *Concepts of Particle Physics*, by Gottfried and Weisskopf or *Modern Elementary Particle Physics* by Kane.

PHYS 454 Introductory Solid-State Physics (also A&EP 450)
Fall. 4 credits. Prerequisite: Physics 443, A&EP 361, Chemistry 793, or permission of instructor. Lec, M W F 9:05–9:55.
Computer lab: W or R 2:30–4:25. F. Wise.
An introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, superconductivity, and defects. At the level of *Introduction to Solid State Physics*, by Kittel, and *Solid State Physics*, by Ashcroft and Mermin.

[PHYS 455 Geometrical Concepts in Physics
Spring. 3 credits. Prerequisite: Physics 323 or equivalent and at least coregistration in Physics 318 or permission of instructor. Usually offered every other spring. Not offered 1999–2000. Lec, T R 10:10–11:25.
Geometrical methods are an essential tool in modern theoretical physics and also provide deep insights into classical physics. This course will introduce basic concepts from differential geometry, emphasizing calculational methods and illustrating their utility by drawing examples from mechanics, electrodynamics, and crystal diffraction. Tensors, differential forms, covariant and Lie derivatives, Lie algebra of vector fields and gauge invarience will be developed and employed. At the level of *Geometric Mechanics* by Talman.]

PHYS 480 Computational Physics (also Phys 680 and Astro 690)
Spring. 3 credits. S-U grades only. Prerequisites: the course assumes a good background in the standard "mathematical methods for physics," and the ability to write programs in Fortran or C. No previous knowledge of numerical analysis is assumed. Lec, T R 10:10–11:25. Staff.
A course designed to familiarize students with numerical techniques for solving diverse problems in physics and related fields. The problems will be drawn from many different branches of physics, but the emphasis will be on common techniques of solution. Numerical techniques discussed in the course will include ordinary and partial differential equations, linear algebra and eigenvalue

problems, Monte Carlo techniques, solving nonlinear equations, fast Fourier transforms, etc. In contrast to traditional numerical analysis courses, the flavor of the course will be "how-to," rather than theoretical. No theorems will be proved. Students will be expected to solve, both individually and in small teams, assigned numerical exercises. Text: *Numerical Recipes: The Art of Scientific Computing*, by Press, Teukolsky, Flannery, and Vetterling.

PHYS 481–489 Special Topics Seminar
Offerings are announced each term. 2 and 3 credits. Limited to senior physics majors and those who receive permission of instructor. S-U grades only.

New special topics seminar for fall 1999: PHYS 488 Fall. 3 credits. Prerequisites: intermediate E&M (Phys 323 or Phys 327) and classical mechanics (Phys 314 or Phys 318). Introduction to Accelerator Physics and Technology (also Phys 688). Lec T R 10:10–11:25. G. Dugan. Fundamental physical principles of particle accelerators and enabling technologies, with a focus on circular high energy colliders, such as the Cornell Electron Storage Ring (CESR). Includes beam optical design, the single-particle dynamics of transverse and longitudinal motion, collective motion, the role of synchrotron radiation, and the interactions of colliding beams. The physics of some of the required technologies, such as particle sources, radiofrequency cavity systems, vacuum systems, and magnets, will be covered in seminars conducted by experts. Student participation in machine experiments at CESR will be arranged as the running schedule permits. At the level of *Introduction to the Physics of High Energy Accelerators* by Edwards and Syphers.

New special topics seminar for Spring 2000: PHYS 489 Spring. 3 credits. Prerequisites: intermediate level mechanics (Phys 314 or 327) and E & M (Phys 323 or 327) or permission of instructor. Previous completion of Phys 488/688 is not required. Lec, T R 10:10–11:25. S. Gruner and R. Talman. The Storage Ring as a Source of Synchrotron Radiation (also Phys 689). Physics of synchrotron radiation with a focus on characteristics of radiation from dipole magnets, electron beam properties that influence radiation characteristics, issues of flux, brightness, emittance, brilliance, beam stability, and beam lifetime. Regular lectures will alternate with visitor lectures on specialized topics on radiation from insertion devices (i.e., wigglers and undulators,) x-ray optics, coupling to beams, and coherence in x-ray beams. There will be special emphasis on understanding the requirements of experimental x-ray applications and hands-on opportunities for doing synchrotron radiation experiments.

PHYS 490 Independent Study in Physics
Fall or spring. Variable to 4 credits. Ordinarily limited to seniors. Prerequisite: permission required of professor who will direct proposed work. A copy of the Request for Independent Study form must be filed with physics department course coordinator, 121 Clark Hall. Individual project work (reading or laboratory) in any branch of physics.

PHYS 500 Informal Graduate Laboratory
Fall, spring; summer. Variable to 2 credits. By permission of instructor. Experiments of widely varying difficulty in one or more areas, as listed under Physics 510, may be done to fill student's special requirements.

PHYS 510 Advanced Experimental Physics
Fall, spring, summer. 3 credits. Lab, T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill.
About sixty different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, nuclear physics. Students perform four to eight experiments selected to meet individual needs. Independent work is stressed. An optional lecture associated with Physics 410, M 2:30–4:25 is available. It includes lectures on techniques used in experiments in the advanced laboratory and on current research topics.

PHYS 520 Projects in Experimental Physics
Fall, spring, summer. Variable to 3 credits. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible for their project. Prerequisite: Physics 510.
Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in Physics 510.

PHYS 525 Physics of Black Holes, White Dwarfs, and Neutron Stars (also Astronomy 511)
Spring. 4 credits. D. Chernoff.
The formation of compact objects: neutrino and gravitational radiation from supernova collapse and neutron stars. Equilibrium configurations, equations of state, stability criteria, and mass limits. The influence of rotation and magnetic fields. Pulsar phenomena. Mass flow in binary systems; spherical and disk accretion; high-temperature radiation processes. Compact X-ray sources and X-ray bursts. Emphasis will be on the application of fundamental physical principles to compact objects. Topics in diverse areas of physics will be discussed: solid-state physics, nuclear physics, relativity, fluid dynamics, high-energy physics, etc. No astronomy or general relativity prerequisites. Text: *Physics of Black Holes, White Dwarfs, and Neutron Stars*, by Shapiro and Teukolsky.

PHYS 551 Classical Mechanics
Spring. 3 credits. Prerequisite: an undergraduate course in classical mechanics at the level of books by K. Symon or J. B. Marion. Lec, T R 10:10–11:25, rec, R 1:25–2:15. L. Hand.
Lagrangian and Hamiltonian formulation of classical mechanics, using modern methods, modern applications in nonlinear dynamics. At the level of *Theoretical Mechanics of Particles and Continuia*, by Fetter and Walecka.

[PHYS 553–554 General Relativity (also Astronomy 509–510)
553, fall; 554, spring. 4 credits. Prerequisite: knowledge of special relativity at the level of Classical Mechanics, by Goldstein. Lec, T R 1:25–2:40. Not offered 1999–2000. Next offered 2000–01. E. Flanagan.
Physics 553 is a systematic introduction to Einstein's theory, with emphasis on modern coordinate-free methods of computation. Topics include review of special relativity, modern differential geometry, foundations of general relativity, laws of physics in the presence of a gravitational field, experimental tests of gravitation theories. At the level of *Gravitation*, by Misner. Physics 554 is a continuation of 553 that emphasizes applications to astrophysics and cosmology. Topics include relativistic stars, gravitational collapse and black holes, gravitational waves, cosmology.]

PHYS 561 Classical Electrodynamics
Fall. 3 credits. Lec T R 8:30–9:55. Sec M 2:30–3:20. T-M. Yan.
Maxwell's equations, electromagnetic potentials, electrodynamics of continuous media (selected topics), special relativity, radiation theory. At the level of *Classical Electrodynamics*, by Jackson.

PHYS 562 Statistical Physics
Spring. 4 credits. Primarily for graduate students. Prerequisites: a good knowledge of quantum mechanics (at the level of Merzbacher), classical mechanics (at the level of Marion), and statistical mechanics (at the level of Reif). Lec, M W F 9:05–9:55. N. Ashcroft.
Macroscopic or thermodynamic concepts including the laws of thermodynamics, thermodynamic functions, thermodynamic stability, and the thermodynamics of phase equilibria. Microscopic concepts including 1-, 2-, and N- particle quantum states; the microcanonical, canonical and grand-canonical distributions; Bose-Einstein, Fermi-Dirac and Boltzmann statistics; the density-matrix. The microscopic-macroscopic connection. Applications include spin systems—the Ising and related models; strongly correlated fluids, and lattice-gases, including distribution and correlation functions, thermodynamic perturbation theory and introduction to critical phenomena and the renormalization group; dense Fermi- and Bose- systems; linear response of quantal and classical systems; transport properties and the Boltzmann equation. At the level of *Statistical Mechanics* (2nd edition) by Pathria and *Statistical Mechanics of Phase Transition* by Yeomans.

PHYS 572 Quantum Mechanics I
Fall. 4 credits. Lec, M W F 11:15–12:05. P. Drell.
General principles of quantum mechanics, formulated in the language of Dirac. Systems with few degrees of freedom: hydrogen atom, including fine and hyperfine structure; the deuteron; and atomic transitions. Theory of angular momentum, symmetries, perturbations and collisions will be developed to analyze phenomena displayed by these systems. At the level of *Modern Quantum Mechanics* by Sakurai. A knowledge of the subject at the level of Phys 443 will be assumed, but the course will be self-contained.

PHYS 574 Quantum Mechanics II
Spring. 4 credits. Lec, M W F 11:15–12:05. T-M Yan.
Systems with many degrees of freedom. Quantization of the electromagnetic field; interaction of light with matter. Many electron atoms. Second quantization for fermions. Quantum liquids. Scattering of complex systems. Introduction to the Dirac equation. A knowledge of the concepts and techniques covered in Phys 561 and 572 will be assumed.

PHYS 599 Cosmology (also ASTRO 599)
For description, see ASTRO 599.

PHYS 635 Solid-State Physics I
Fall. 3 credits. Prerequisites: a good undergraduate solid-state physics course, such as Physics 454. D. Ralph.
A survey of the basics of the physics of solids: crystal structure, x-ray diffraction, phonons, and electrons. Selected topics from semiconductors, magnetism, superconductivity, disordered materials, dieletric and optical properties and mesoscopic physics. At level of *Solid State Physics* by Ashcroft and Mermin.

PHYS 636 Solid-State Physics II
Spring. 3 credits. Prerequisite: Physics 635. P. Brouwer.
A continuation of Physics 635; magnetism, superconductivity, broken symmetries, elementary excitations, and other topics in quantum condensed matter physics not covered in *Solid State Physics* by Ashcroft and Mermin, such as topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, disordered systems, Anderson localization and other metal insulator transitions.

PHYS 645 High-Energy Particle Physics
Fall. 3 credits. D. Cassel.
Introduction to physics of baryons, mesons, and leptons. Strong, electromagnetic, and weak interactions. Relevance of symmetry laws to particle physics. Introduction to the quark model. At level of *The Experimental Foundations of Particle Physics*, by Cahn and Goldhaber.

PHYS 646 High-Energy Particle Physics
Spring. 3 credits. Staff.
Topics of current interest, such as high-energy electron and neutrino interactions, electron positron annihilation, and high-energy hadronic reactions. Lectures and reading material are at the level of *Introduction to High Energy Physics*, by Perkins. and *Elementary Particle Physics* by Griffiths.

Note: **Only S-U grades will be given in courses numbered 650 or above.**

PHYS 651 Relativistic Quantum Field Theory I
Fall. 3 credits. S-U grades only. A. LeClair.
Topics to be covered include consequences of causality and Lorentz invariance, field quantization, perturbation theory, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and weak interactions.

PHYS 652 Relativistic Quantum Field Theory II
Spring. 3 credits. S-U grades only. H. Tye.
This course is a continuation of Physics 651 and introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-abelian gauge theories, the renormalization group, and spontaneous symmetry breaking. Topics in cosmology, supersymmetry or superstring may be introduced. Applications to the electroweak theory and quantum chromodynamics are emphasized. At the level of *An Introduction to Quantum Field Theory* by Peskin and Schroeder.

PHYS 653 Statistical Physics
Fall. 3 credits. Normally taken by graduate students in their second or later years. Prerequisites: competence in the basic principles of quantum mechanics, statistical physics at the level of Physics 562, and thermodynamics. S-U grades only. V. Ambegaokar.
Survey of topics in modern statistical physics: Dynamical statistical physics (kinetic theory, Boltzmann equation, hydrodynamics); theory of simple fluids; scaling theories and the renormalization group; phase transitions in disordered systems; pattern formation in nonlinear systems, percolation theory.

PHYS 654 Theory of Many-Particle Systems
Spring. 3 credits. Prerequisites: Physics 562, 574, 635, 636, and 653. S-U grades only. Staff.
Equilibrium and transport properties of microscopic systems of many particles studied at zero and finite temperatures. Formalisms such as thermodynamic Green's functions are introduced and applied to such topics as normal and superconducting Fermi systems, superfluidity, magnetism, insulating crystals.

[PHYS 661 Advanced Topics in High Energy Particle Theory
Fall. 3 credits. Prerequisites: Physics 652. S-U grades only. Not offered 1999–2000.
This course will present advanced topics of current research interest. Subject matter will vary from year to year. Some likely topics are two-dimensional conformal field theory with applications to string theory and condensed matter physics, applications of the electroweak theory, lattice gauge theory, mathematical methods (e.g. group theory), perturbative quantum chromodynamics, anomalies and geometry, supersymmetry, current algebra, heavy quark physics, heavy quark symmetry and phenomenological issues beyond the standard model.]

PHYS 665 Topics in Theoretical Astrophysics
For description, see ASTRO 699.

PHYS 667 Theory of Stellar Structure and Evolution (also Astro 560)
For description, see ASTRO 560.

[PHYS 670 Instrumentation Seminar
Spring. 2 credits. S-U grades only. Not offered 1999–2000. J. Alexander.
Conception, design, and performance of innovative instrumentation in condensed matter and elementary particle physics.]

PHYS 680 Computational Physics (also Physics 480 and Astronomy 690)
For description, see PHYS 480.

PHYS 681–689 Special Topics
Offerings are announced each term. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

New special topics seminar for fall 1999:
PHYS 688 Introduction to Accelerator Physics and Technology (also Phys 488). For description see PHYS 488.

New special topics seminar for spring 2000.
PHYS 689 The Storage Ring as a Source of Synchrotron Radiation (also Phys 489). For description see PHYS 489.

PHYS 690 Independent Study in Physics
Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

PSYCHOLOGY

D. J. Bem, S. L. Bem, U. Bronfenbrenner, J. E. Cutting, R. B. Darlington, T. J. DeVoogd, D. A. Dunning, S. Edelman, D. J. Field, B. L. Finlay, E. J. Gibson, T. D. Gilovich, B. P. Halpern, A. M. Isen, R. E. Johnston, C. L. Krumhansl, W. W. Lambert, D. A. Levitsky, J. B. Maas, C. Maxwell-Miller, U. Neisser, M. Owren, H. S. Porte, D. T. Regan, E. A. Regan, H. Segal, M. Spivey, B. J. Strupp

The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes such things as animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology is represented by courses in social psychology and personality (such as Psychology and Law, Judgment and Decision Making, and Social Construction of Gender), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department also emphasizes the statistical and logical analysis of psychological data and problems.

The Major

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an adviser, a major application form may be obtained from the department office (211 Uris Hall).

Requirements for the major are:

1) a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisers, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); and
2) demonstration of proficiency in statistics before the beginning of the senior year.

(See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

1) **Perceptual and cognitive psychology**
2) **Biopsychology**
3) **Social, personality, and abnormal psychology**

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.

1) **Perceptual and cognitive psychology:** Psychology 205, 209, 214, 215, 292, 305, 311, 316, 342, 412, 413, 414, 415, 416, 417, 418, 419, 436, 492.
2) **Biopsychology:** Psychology 223, 307, 322, 324, 326, 332, 361, 396, 420, 422, 424, 425, 429, 431, 440, 492.
3) **Social, personality, and abnormal psychology:** Psychology 128, 265, 275, 277, 280, 281, 325, 327, 328, 402, 404, 450, 481, 489, 491.
4) **Other courses:** Psychology 101, 199, 347, 350, 410, 440, 441, 470, 471, 472, 473, 475, 478, 479. The major adviser determines to which group, if any, these courses may be applied.

With the permission of the adviser, courses in other departments may be accepted toward the major requirements.

Fieldwork, independent study, and teaching. The department requires students to observe the following limits on fieldwork, independent study, and teaching.

1) Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.
2) An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

Statistics requirement. Proficiency in statistics can be demonstrated in any one of the several ways listed below.

1) Passing Psychology 350.
2) Passing an approved course or course sequence in statistics in some other department at Cornell. The approved list of courses and sequences may change. It has usually included Sociology 301, and the sequences Education 352 and 353, and Industrial and Labor Relations 210 and 211. Requests that a particular course be added to this list may be made to Professor Gilovich.
3) Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least 6 semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.
4) Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology. Psychology majors interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology; the physical sciences, including at least introductory chemistry; and mathematics. Students will design with their advisers an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her biopsychology adviser.

Concentration in personality and social psychology. Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration will be permitted to include some major courses in sociology and related fields. Advisers will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the instructor.

Undergraduate honors program. The honors program is designed for those exceptionally able students who wish to pursue an intensive and independent program of research in psychology. Successful participation in this program serves as evidence of the student's facility in the two most important skills of an academic psychologist: the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to engage in creative research activity. All qualified students planning on a graduate education in psychology or other academic fields should consider the honors program seriously. The program offers most students the closest contact and consultation with faculty that they will receive during their time at Cornell.

The core of the honors program is a research project that the student carries out in close collaboration with a faculty member in the field of psychology. It is assumed that most students will do so while enrolled in Psychology 470 (Undergraduate Research in Psychology). A written report of the research is to be given to the chair of the honors committee (currently Professor Field) toward the end of the last semester of the student's senior year. An oral defense of the thesis is then given before a committee of three faculty members, and the student presents his or her work in a public forum. Final honors standing (summa cum laude, magna cum laude, cum laude) is indicated on the student's diploma. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year.

A student may formally apply to the honors program at any time during the senior year provided that she or he is actively engaged in independent research. However, students must do so by the second week of November. Applications should be given to Professor Field and should be made directly by the student.

Distribution Requirement

The distribution requirement in the social sciences is satisfied by any two courses in psychology with the exception of Psychology 223, 307, 322, 324, 326, 332, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492.

Note: The Department of Psychology has listed all days and times for each course that we offer. If there should be changes in the days, times, or semester that a course is offered, we will post the necessary changes throughout the department and in the supplements of the Course and Time and Course and Room Rosters. Changes are also available on the World Wide Web site, http://comp9.psych.cornell.edu

Courses

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry

Fall. 3 credits. Students who would like to take a discussion seminar should also enroll in Psychology 103. M W F 10:10. J. B. Maas.

The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

PSYCH 102 Introduction to Cognitive Science (also COGST 101, COMS 101, LING 170, PHIL 191)

Fall. 3 or 4 credits (the four credit option involves a writing section instead of taking exams). T R 11:40–12:55. M. Spivey.

This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

PSYCH 103 Introductory Psychology Seminars

Fall. 1 credit. Limited to 300 students. Prerequisite: concurrent enrollment in Psychology 101. Hours to be arranged. 12 different time options. J. B. Maas and staff.

A weekly seminar that may be taken in addition to Psychology 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a term paper related to the seminar topic. Choice of seminar topics and meeting times will be available at the second lecture of Psychology 101.

PSYCH 201 Cognitive Science in Context Laboratory (also Cog St 201 and COM S 201)

Fall or spring. 4 credits. Prior completion of "Introduction to Cognitive Science" Psych 102/COGST 101/COM S 101/LING 170/PHIL 191 or equivalent is recommended. Knowledge of programming language is neither assumed nor required. Limited to 24 students. Disc and demos, M W 11:15–12:05; lab M W 1:25–3:25, plus additional hours to be arranged. Fall, B. Halpern and staff. Spring, D. Field and staff.

A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated-future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and student-developed experiments. Use of digital computers as well as the Internet, electronic mail, and Web sites are integral components of the course.

State of the art computing, display (visual, auditory, and other perceptual/sensory systems), digital communication, and simulation approaches are used to apply cognitive science principles and concepts to the analysis, exploration, and direct testing of human-machine interfaces. The focus is on human-computer interactions that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings such as interactions with touch based natural language recognition and processing, use of 'neural networks,' and personal and group transportation vehicles and systems. Students are expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities will be available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data will be facilitated. Fall: http://courseinfo.cit.cornell.edu/courses/csic201/

PSYCH 205 Perception

Spring. 3 credits. Open to first-year students. Graduate students, see Psychology 605. T R 11:40–12:55. J. E. Cutting.

One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual and auditory perception are discussed in detail.

PSYCH 209 Developmental Psychology

Spring. 4 credits. Graduate students, see Psychology 709. T R 2:55–4:10. Staff.

One of four introductory courses in cognition and perception. A comprehensive introduction to current thinking and research in developmental psychology that approaches problems primarily from a cognitive perspective. The course focuses on the development of perception, action, cognition, emotion, personality, social understanding, language, and moral reasoning.

PSYCH 214 Issues in Cognitive Psychology

Fall. 3 credits. Sophomore standing required. Limited to 150 students. Graduate students, see Psychology 614. M W F 11:15. Staff.

Various approaches to the study of cognition will be discussed. Basic concepts in how humans process different kinds of information such as visual, auditory, and symbolic will be introduced. These concepts will then be used to explore topics such as attention and consciousness, concept formation and representation, memory processes and systems, imagery and cognitive maps, problem solving and reasoning, judgment and choice, language acquisition and comprehension, intelligence and creativity, and social cognition.

[PSYCH 215 Psychology of Language (also LING 215)

Spring. 3 or 4 credits (4-credit option involves term paper). Graduate students, see Psychology 715. M W F 11:15. Not offered 1999–2000. Staff.

One of four introductory courses in cognitive psychology. Introduction to the psychological study of language. Covers research in spoken language comprehension and production, reading, and language acquisition.]

Introductory courses in social and personality psychology. Each of the following four courses (265, 275, 277, 280) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none have any prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.

PSYCH 216 Cognitive Psychology Lab

Fall. 1 credit. Limited to 16 students. Prerequisite: concurrent enrollment in Psychology 214. Hours to be arranged. Staff.

If you've ever wondered how humans manage to represent their visual world, why telephone numbers are seven digits long, why imagery works as a mnemonic device, why certain things are better remembered than others, whether bilinguals are disadvantaged relative to monolinguals, how children acquire knowledge of the world, how people make decisions...this laboratory is for you! A weekly lab meeting that encourages students to discover the scientist in themselves through the study of cognition. Much of cognitive research takes place in the laboratory and this course allows students to become familiar with the "how-to" of such research. Students will be given six to eight basic experiments to explore and tinker with. They will be encouraged to pose "what if" questions and eventually test them. The course promotes independent thinking, problem solving in an experimental setting, proposing and testing of one's own hypotheses, relating laboratory Cognition to the real world, and communication of scientific ideas through informal and formal writing and oral assignments. Be prepared for an interactive learning experience.

PSYCH 223 Introduction to Biopsychology

Fall. 3 credits. M W F 10:10. No prerequisites. Can be used to satisfy the psychology major breadth requirement and as an alternative prerequisite for upper-level biopsychology courses. Students who would like to take a discussion/demonstration seminar should also enroll in Psych 224, a one hour per week one-credit section. M. J. Owren.

An introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the ecology and evolution of social organization and social development.

[PSYCH 224 Introduction to Biopsychology Seminars

Fall. 1 credit. Sections with a maximum of 16 students in each. Prerequisite: concurrent enrollment in Psychology 223. Days and times TBA. Not offered 1999–2000. M. J. Owren and staff.

A weekly seminar that may be taken in addition to Psychology 223 to allow and encourage "hands-on" involvement with some of the course material, including interactive computer programs and models to get a clearer picture of basic neuroanatomy, visits to the laboratories of biopsychology faculty, films, reading, writing, and discussion of course material. Involves several small assignments equivalent to a 10-page paper.]

PSYCH 265 Psychology and Law

Fall. 3 credits. M W F 1:25. D. A. Dunning.

This course examines the implications of psychological theory and methods for law and the criminal justice system. We concentrate on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), as well as on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

PSYCH 275 Introduction to Personality Psychology (also HD 260)

Spring. 3 credits. Prerequisites: Psychology 101, HDFS 115, or permission of instructor. T R 10:10–11:25. C. Hazen.

An introduction to personality psychology, with an emphasis on personality development and contemporary research. Covers the major theories of personality, influences on personality development (including genetic, biological, experiential and environmental factors), and methods for assessing personality.

[PSYCH 277 Social Construction of Gender (also Women's Studies 277)

Fall. 3 credits. Limited to 180 students. T R 2:30–4:00. Not offered 1999–2000. S. L. Bem.

Psychology/Women's Studies 277 is an interdisciplinary course that addresses two broad questions: 1) how an individual's gender and sexuality are constructed; and 2) how hidden assumptions or "lenses" embedded in our social institutions, cultural discourses, and individual psyches perpetuate male power and oppress women and sexual minorities. Three lenses in particular are emphasized: androcentrism, gender polarization, and biological essentialism. A fundamental assumption of the course is that social science has worried too much about difference per se and too little about how even our most neutral-looking institutions invisibly transform difference into disadvantage. Although some attention is given to biological perspectives, the course emphasizes the cultural and psychological processes whereby the historically contingent comes to appear as the natural. Among some of the many topics discussed are the importance of looking at biology in context, the parental "instinct," androcentrism in law, sexual orientation cross-culturally, egalitarian relationships, gender-liberated child-rearing, and homophobia.]

PSYCH 280 Introduction to Social Psychology

Spring. 3 or 4 credits; the additional (or fourth) credit requires participation in a weekly seminar. T R 1:25–2:40. T. D. Gilovich and D. T. Regan.

An introduction to research and theory in social psychology. Topics include processing of social information; social influence, persuasion, and attitude change; social interaction and group phenomena. The application of social psychological knowledge to current events will also be discussed.

PSYCH 281 The Helping Relationship

Fall. 3 credits. Limited to 60 students. C. Maxwell Miller.

This course provides an introduction to the theoretical and practical aspects of some basic elements of counseling. Students will develop an understanding of the most current research on the elements of counseling and basic theoretical foundations underlying different approaches. Students will be expected to acquire and demonstrate elementary helping skills. Through role-play, observation of videos, and in-class demonstrations, students will learn such skills as attending and active listening; they will also develop a capacity to recognize internal conflicts and cognitive distortions as well as the similarities between intra-psychic and interpersonal processes. Other topics include issues of transference and counter transference, the multi-axial dimensions of the DSMIV, defensive strategies as they appear in the DSMIV and ethical considerations and practice. While this course provides an introduction to the applied aspects of psychology, it does not prepare students to provide treatment of any sort.

PSYCH 282 Community Outreach

Fall. 2 credits. Prerequisites: Psychology 101 or HD 115. Students may not concurrently register with Psych 327 or Psych 328. T 10:10–11:25. H. Segal.

This course provides students with information and perspectives essential to volunteer field work with human and social service programs in the community. To gain a practical understanding of what mental health professionals do in the workplace, students will examine problems that emerge in fieldwork settings which raise ethical, methodological, theoretical, and practical issues in the observation or treatment of clients or patients. Although students are not required to volunteer at a local agency, the instructor will assist students in finding sites that may provide appropriate learning opportunities. A paper, relating current research to issues relevant to community mental health, is due at the end of the course.

PSYCH 292 Intelligence

Spring. 4 credits. Prerequisites: one 200-level course in psychology. M W TBA. Section meetings on Friday. U. Neisser.

A scientific overview of the controversial issues that surround intelligence tests and what they measure. Topics include the history of testing, correlates of test scores, alternative approaches to mental ability, genetic and environmental contributions to diversity in intelligence, effects of schooling, worldwide IQ gains, cultural factors and group differences.

PSYCH 305 Visual Perception

Fall. 4 credits. Limited to 20 students. Prerequisite: Psychology 205 or permission of instructor. M W F 11:15. J. E. Cutting.

A detailed examination of pictures and their comparison to the real world. Linear perspective in Renaissance art, photography, cinema and video will be discussed in light of contemporary research in perception and cognition.

[PSYCH 307 Chemosensory Perception

Fall. 3 or 4 credits; the optional (or fourth) credit is for an independent research project. Graduate students, see Psychology 607. Not offered 1999–2000. T R 9:05. B. P. Halpern.

An examination of basic theory, data, and processes for perception of the chemosensory environment. A very brief (about two weeks) lecture survey of the anatomy and physiology of human taste and olfaction, the remainder of the course uses the Socratic method, in which the instructor asks questions of the students, to cover topics such as chemosensory psychophysics, saliva, chemosensory bases for the tastes of foods, taste-smell interactions, chemosensory function in neonates and in the aged, temporal aspects of tasting, sweetness, effects of pollution of the chemosensory environment, and interactions between body state and chemosensory stimuli. At the level of *Smell and Taste in Health and Disease,* edited by T.V. Getchell et al., *Sensory Science Theory and Applications in Foods*, edited by H. T. Lawless and B. Klein; *Sensory Analysis of Foods*, 2nd edition, edited by J. R. Piggott.]

[PSYCH 311 Introduction to Human Memory

Spring. 3 credits. Limited to 40 students. Some familiarity with statistical methods and experimental design and with the study of cognition is desirable. Graduate students, see Psychology 611. T R 11:40–12:55. Not offered 1999–2000. Staff.

This course offers an overview of experimental findings and theoretical issues in the study of human memory. Coverage includes topics such as the nature of memory, various memory systems, coding and retrieval processes, practice and habit acquisition, organization for learning and memory, interference and forgetting, models of memory, memory dysfunction and its relation to normal memory.]

PSYCH 316 Auditory Perception

Fall. 3 or 4 credits; the 4-credit option involves a laboratory project or paper. Prerequisite: Psychology 205, 209, 214, or 215 (other psychology, linguistics, or biology courses could serve as prerequisite with permission of the instructor). Limited to 30 students. Graduate students, see Psychology 716. T R 10:10–11:25. C. L. Krumhansl.

Basic approaches to the perception of auditory information, with special consideration of complex patterns such as speech, music, and environmental sounds.

PSYCH 322 Hormones and Behavior (also BIONB 322)

Spring. 3 credits. Two lectures plus a section in which students will read and discuss original papers in the field, give an oral presentation, and write a term paper. Limited to juniors and seniors. Prerequisites: Psychology 223, or BIONB 221 or 222, or one year of introductory biology plus a course in psychology. S-U grades optional. Graduate students see Psychology 722. M W F 11:15. E. Adkins Regan.

A major focus of the course will be comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also included will be hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.

PSYCH 324 Biopsychology Laboratory (also BIONB 324)

Fall. 4 credits. Limited to 20 juniors and seniors. Prerequisites: Psychology 223 or BIONB 221 or 222, and permission of instructor. T R 1:25–4:25. T. J. DeVoogd.

Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, species, and behavior patterns are included.

PSYCH 325 Psychopathology (also HDFS 370)

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: Psychology 101, HDFS 115, or Education 110; a course in statistics (e.g., Psych 350, Soc 301, Educ 352 or 353, Ag Ec 310 or equivalent). Limited to 150 students. C. Maxwell Miller.

A research-based survey of the cognitive, emotional, and biological aspects of psychopathology across the life span. The major mental illnesses will be covered, including schizophrenia, anxiety disorders, affective disorders, and personality disorders as well as psychopathological disorders of childhood. Emphasis will be placed on the development of psychopathology, current theories and models of etiology, and intervention strategies. This course is intended to be a rigorous introduction to the scientific study of psychopathology and psychopathological development; minimal attention to psychotherapy.

[PSYCH 326 Evolution of Human Behavior

Fall. 4 credits. Prerequisite: Psychology 123, or an introductory biology course, or an introductory anthropology course. Graduate students, see Psychology 626. T R 2:55–4:10. Not offered 1999–2000. R. E. Johnston.

A broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics covered will vary but will include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, warfare.]

PSYCH 327 Field Practicum I

Fall only. 3 credits. Prerequisites: Psychology 325 or HD 370 (or taken concurrently), and permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: $25 each semester. Enrolled students must commit to taking Psychology 328 in the spring semester. No S-U option. M W 8:40–9:50. H. Segal.

This course is composed of three components which form an intensive undergraduate field practicum. First, students spend 3–6 hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents or adults; supervision is provided by host agency staff. Second, Cornell faculty provide additional weekly educational supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

PSYCH 328 Field Practicum II

Spring. 3 credits. Prerequisites: Psychology 327 taken the previous term, Psychology 325 or HD 370 (or taken concurrently), permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: $25 each semester. M W 8:40–9:50. H. Segal.

This course continues the field practicum experience from Psych 327. Students spend 3–6 hours a week at local mental health agencies, schools, or skilled nursing facilities working directly with children, adolescents or adults; supervision is provided by host agency staff.

PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328)

Spring. 3 credits. Prerequisites: one year of biology and either a biopsychology class or BIONB 222. Limited to 60 students. Graduate students, see Psychology 632. M W F 11:15. T. J. DeVoogd.

This course will survey the approaches that have been or are currently being used in order to understand the biological bases for learning and memory. Topics will include invertebrate, "simple system" approaches, imprinting, avian song learning, hippocampal and cerebellar function, and human pathology. Many of the readings will be from primary literature.

PSYCH 342 Human Perception: Applications to Computer Graphics, Art and Visual Display

Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: Psychology 101 or permission of instructor. Psychology 205 strongly recommended. Graduate students, see Psychology 642. T R 11:40–12:55. D. J. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course will consider a number of applied aspects of human perception with an emphasis on the display of visual information. Topics to be covered include: "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

PSYCH 347 Psychology of Visual Communications

Spring. 3 credits. Limited to 15 students. Prerequisites: Psychology 101 and permission of instructor. R 10:10–12:05. J. B. Maas.

An exploration of theories of education, communication, perception, attitude, and behavior change as they relate to the effectiveness of visually based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages.

PSYCH 350 Statistics and Research Design

Fall. 4 credits. Limited to 120 students. M W F 9:05–9:55. T. D. Gilovich.

Acquaints the student with the elements of statistical description (measures of average, variation, correlation, etc.) and, more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

[PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also NS 361)

Fall. 3 credits. Prerequisites: limited to 50 students in psychology and 50 students in nutritional sciences. An introductory biology course and an introductory psychology course, or permission of instructor. S-U grades optional. Juniors and seniors only. M W F 9:05–9:55. Not offered 1999–2000. B. J. Strupp.

A critical evaluation of factors thought to underlie normal and abnormal behavior and/or cognitive functioning. Psychological, biological, and societal influences will be integrated. Topics include: (1) the psychobiology of learning and memory; (2) nutritional influences on behavior/cognition (e.g., sugar, food additives, choline); (3) cognitive dysfunction (e.g., amnesia, Alzheimer's disease); (4) developmental exposure to environmental toxins and drugs of abuse; and (5) psychiatric disorders (depression, eating disorders).]

PSYCH 396 Introduction to Sensory Systems (also BIONB 396)

Spring. 3 or 4 credits (4 credits with term paper). Registration for the 4-credit option requires permission of instructor. Prerequisites: an introductory course in biology or biopsychology, plus a second course in neurobiology or behavior or perception or cognition or biopsychology. Students will be expected to have elementary knowledge of perception, neurophysiology, behavior, and chemistry. No auditors. Graduate students, see Psychology 696. M W F 10:10. Offered alternate years. B. P. Halpern.

The course will be taught using the Socratic method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with both those characteristics of sensory systems that are common across living organisms and those sensory properties which represent adaptations of animals to particular habitats or environments. Classroom discussion can increase, but not decrease, a student's final grade. There are two preliminary exams and a final exam. The principles and limitations of major methods used to examine sensory systems will be considered. General principles of sensory systems, and auditory, visual, and somesthetic systems are covered. One aspect of each system (e.g., localization of objects in space by sound, color vision, thermoreception) will be selected for special attention. Two or more textbooks and a course packet of reproduced articles will be used. *An Introduction to the Physiology of Hearing, 2nd edition* by J. O. Pickles; *Hearing: Physiological Acoustics, Neural Coding, and Psychoacoustics*, by W. L. Gulick, G. A. Gescheider, and R. D. Frisina; *The Retina: An Approachable Part of the Brain*, by J. E. Dowling; *Handbook of Physiology—The Nervous System III. Sensory Processes*, edited by J. M. Brookhard and V. B. Mountcastle.

PSYCH 401 Theoretical Approaches to Psychopathology and Treatment

Fall. 3 credits. Limited to 20 students. Prerequisites: Psychology 281 or 325. TBA. C. Maxwell Miller.

This course is designed to provide students with an overview of theoretical approaches to psychopathology and psychotherapy. It also aims to develop students' capacities to think in theoretical terms about psychological practice. We will examine the theoretical and pragmatic features of major contemporary models of psychotherapy and explore the conceptual traditions on which they draw. Observation of the work of children and adolescents, audio-visual demonstrations, case presentations and discussions will be included to advance students' understanding of the application of theory to practice. At the end of the course, students should be prepared to take a particular case and discuss the theoretical, practice, and research issues it raises, including intervention strategies. This course is not intended to provide students simply with an understanding of methods. It is organized around theory, research, and practice relevant to the treatment of several of the Disorders of Infancy and Childhood as well as specific disorders of Adults on Axis I and Axis II of DSM IV.

Special attention will be given to the work of:

1) Daniel Stern, M.D. and Otto Kernberg, M.D.—Psychoanalytic revisionists
2) Lorna Benjamin, Ph.D.—Interpersonal Theory
3) Aaron Beck, M.D—Cognitive Theory
   Marsha Linehan, Ph.D.—Behavioral and Cognitive-Behavioral Treatment

[PSYCH 402 Current Research on Psychopathology: Depression

Spring. 4 credits. Limited to 20 students. Prerequisite: Psychology 325 or HDFS 370 and permission of the instructor. M 1:25–4:25. Not offered 1999–2000. Staff.

Current research and theory on the nature and etiology of depression. Approaches from various perspectives (biological, psychological, socio-cultural) are considered. Minimal attention to psychotherapy and symptomatology.]

[PSYCH 404 Psychopathology and the Family
Spring. 4 credits. Limited to 20 students. Prerequisite: Psychology 325 or HDFS 370 and permission of the instructor. M 1:25–4:25. Not offered 1999–2000. Staff.
This course will explore familial influences on the development of abnormal behavior. It will examine how psychological, biological, and cultural factors in a family might contribute to such disorders as anorexia nervosa, depression, sexual abuse, psychopathy, and psychosomatic illnesses. Emphasis will be placed on early childhood experiences in the family and their impact on the development of later psychopathology. The course will also discuss how the evolution of family structures in more recent times (e.g., the rise in day care and divorce) influences the individual. Family therapy approaches and techniques will also be examined.]

PSYCH 410 Undergraduate Seminar in Psychology
Fall or spring. 2 credits. Nonmajors may be admitted, but psychology majors are given priority. Hours to be arranged. Staff.
Information on specific sections for each term, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall.

[PSYCH 412 Laboratory in Cognition and Perception
Spring. 4 credits. Limited to 15 students. Prerequisite: statistics and one course in cognition or perception is recommended. Graduate students, see Psychology 612. Not offered 1999–2000. M W 2:55–4:10. D. J. Field.
A laboratory course is designed to introduce students to experimental methods in perception and cognitive psychology. Students will take part in a number of classic experiments and develop at least one independent project. Computers will be available and used in many of the experiments although computer literacy is not required. Projects will be selected from the areas of visual perception, pattern recognition, memory, and concept learning.]

[PSYCH 413 Information Processing: Conscious and Non-conscious
Spring. 4 credits. Prerequisites: at least one course in human experimental and permission of instructor; Psychology 350 or equivalent will be useful for evaluating empirical articles. R 10:10–12:35. Not offered 1999–2000. Staff.
In the past decade, a not-so-quiet revolution has been taking place in the field of cognition regarding the problem of conscious mental computation. Data have come from patients with striking neuropsychological syndromes, i.e., the phenomenon of "blindsight" in which patients can respond to visual stimuli without the conscious experience of vision or the "amnesic" syndrome in which patients show interact learning and memory without the awareness of the learning encounters. This signature of independent mental computations has also been amply demonstrated in normal individuals in laboratory settings. We will critically evaluate the theoretical worth and empirical justification of the distinction between "conscious" and "non-conscious" mental computations in normal and patient populations. Weekly readings will be from, but not limited to, topics such as visual processes, face recognition, explicit and implicit memory, language processing and social cognition. Students will be required to: (1) lead and partake in advanced level discussions of classic and current papers, (b) submit weekly summaries of the assigned readings, and (c) write a term paper on a topic of their interest. Students should be prepared to read extensively, think analytically, discuss cogently, and write succinctly.]

PSYCH 414 Comparative Cognition
Spring. 3 credits. Prerequisites: Psychology 205, 209, 214, or permission of instructor. Graduate students, see Psychology 714. T R 11:40–12:55. M. J. Owren.
This course examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally, show concept and category learning, memory, and abstract thinking similar to that of humans, the role of social cognition in the evolution of intelligence, and whether animals are concious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" will play a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates will be a specific focus throughout. The course will be a mix of lecture and discussion, emphasizing the latter as much as possible.

[PSYCH 415 Concepts, Categories, and Word Meanings
Fall. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. Graduate students, see Psychology 615. M 1:25–4:25. Not offered 1999–2000. Staff.
A consideration of what types of categories are psychologically important, how they are represented and used through concepts, and how concept structure and semantic structure are interrelated. Different models of concept structure and categorization processes are evaluated, as are models of conceptual change and concept acquisition. Other topics include: relations between concepts and broader knowledge representation systems such as scripts, mental models, and intuitive theories; relative roles of associative information and beliefs in concept structure; categorization in other species; neuropsychological studies of categorization; comparisons of categorization systems across cultures; and comparisons of concept structures across different types of categories.]

PSYCH 416 Modeling Perception and Cognition
Spring. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. M W F 11:15–12:05. M. Spivey.
This course offers a survey of several computational approaches to understanding perception and cognition. We will explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis will be placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course will cover computational accounts of language processing, language acquisition, visual perception, and visual development, among others. Students will complete a final project that applies a computational model to some perceptual/cognitive phenomena.

[PSYCH 417 The Origins of Thought and Knowledge
Fall. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. Graduate students, see Psychology 717. M 1:25–4:25. Not offered 1999–2000. Staff.
An in-depth analysis of current theories concerning the growth of thought and knowledge in childhood. Several controversies will be discussed in detail, including: Are mental abilities organized in local domains or modules that have their own patterns of development, or is cognitive development a more general process? Do comparative studies with other species and evolutionary models provide any useful insights into cognitive development in humans? Are there qualitative restructurings of thought and knowledge with development, or is the process more continuous in nature? What restrictions should these developmental considerations place on models of thought and knowledge in adults?]

PSYCH 418 Psychology of Music
Spring. 3 or 4 credits, depending on whether student elects to do an independent project. Prerequisites: junior or senior standing with major in psychology or music and some background in both, or permission of instructor. Graduate students, see Psychology 618. M W 2:55–4:10. C. L. Krumhansl.
Detailed analysis of topics in the psychology of music, including theories of consonance, perception of tonal-harmonic structure, memory for music, and effects of musical training. Emphasis given to experimental methodologies.

[PSYCH 419 Neural Networks Laboratory
Spring. 4 credits. Prerequisites: at least one course in biology or biological psychology, one year of calculus, and permission of instructor. Limited to 15 students. Graduate students, see Psychology 619. T R 2:55–4:10. Not offered 1999–2000. D. J. Field.
The course will take a hands-on approach to understanding the limitations and successful applications of neural networks to problems in cognitive and biological psychology. A variety of neural network architectures will be discussed and explored using computer simulations. Applications of networks to perceptual recognition and representation will be emphasized. We will consider the class of problems that different networks can solve and consider the accuracy with which they model real nervous systems. Students will complete weekly lab reports and develop one independent project demonstrating the application of a neural network to a problem discussed in the course.]

[PSYCH 420 Laboratory in Neuroethology (also BIONB 420–03)
Spring. 1 credit. Prerequisite: BIONB 424 or Psychology 424 or equivalent. Permission of instructor required. Lab: M 12:20–5:00. Not offered 1999–2000. C. D. Hopkins.
Designed as a laboratory component for BIONB 424/Psychology 424, this course will illustrate principles of neuroethology: sensory processing, neuroanatomy, and behavioral analysis. Students will participate in six

laboratory exercises scheduled throughout the semester. The laboratory will be open from 12:20 until 5:00 p.m. on Mondays and Wednesdays. Labs will be done in groups of two. Students in this course will learn the fundamentals of electrophysiology, neuroanatomy, and behavior through a series of six laboratory exercises using electric fish, Drosophila, crayfish and *Limulus*, bats and moths.]

[PSYCH 422 Developmental Biopsychology

Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 223 or BIONB 221). Graduate students, see Psychology 622. M W F 9:05–9:55. Not offered 1999–2000. B. L. Finlay.

We will discuss the relationship of the development and evolution of the brain to the development of behavior. Topics include how neurons are generated, finding targets, and establishing connections; the emergence of reflexive and complex behavior; how experience affects the developing brain; evolutionary perspectives on the development of perception, memory, and communication systems; and abnormal development.]

[PSYCH 424 Neuroethology (also BIONB 424)

Spring. 3 credits. Prerequisites: BIONB 221 and 222. S-U grades optional for graduate students only. T 9:05–11:00, R 9:05–9:55. Classes will be held on T R at 9:05–11:00. Thursday's class will run for one hour. Recitations will be scheduled in class. Not offered 1999–2000. C. D. Hopkins.

In the 1950's–1970's ethologists attempted to understand the mechanisms of animal behavior through the use of comparative methods, evolutionary analysis, careful observations of animals in their native habitats, and clever experimentation. Now, with the explosion of knowledge and techniques in the neurosciences, many of the ethologist's mechanisms are being explained in terms of neural systems. This course will review the current status of research in neuroethology, including: mechanisms of acoustic communication in insects and in vertebrates; echolocation in bats and sound localization in owls; electroreception and electrolocation; chemical communication; and visual processing. In addition, it will review studies of the neural systems involved in decision making, in initiating action, and in coordinating fixed acts. Assigned readings will include original articles from the scientific literature. A term paper/poster on neuroethology will be required.]

PSYCH 425 Cognitive Neuroscience

Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 223 or BIONB 221). Graduate students, see Psychology 625. M W F 9:05–9:55. B. L. Finlay.

We will study the relation between structure and function in the central nervous system. The importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition will be stressed. The course will focus on issues in cognitive neuroscience: mechanisms of perception, particularly vision, and the neuropsychology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the world, language, memory, and social interaction.

[PSYCH 429 Olfaction and Taste: Structure and Function (also BIONB 429)

Fall. 3 or 4 credits (4-credit option requires a term paper or research project. The research project can, but does not need to, study nonhuman vertebrates). Preference given to junior and senior psychology and biology majors and graduate students. Prerequisite: one 300-level course in biopsychology or equivalent. Graduate students, see Psychology 629. T R 9:05. Not offered 1999–2000. B. P. Halpern.

The structural and functional characteristics of olfaction and taste will be explored by reading and discussing current literature in these areas. Structure will be examined at the light levels of electron microscopes as well as at the molecular level. Function will be primarily neurophysiological and biochemical aspects. The emphasis will be on vertebrates, especially air-breathing vertebrates in the case of olfaction, but there will be some coverage of invertebrate forms. At the level of *Smell and Taste in Health and Disease*, edited by T. V. Getchell, R. L. Doty, L. M. Bartoshuk, and J. B. Snow; *The Neurobiology of Taste and Smell*, edited by T. E. Finger and W. L. Silver.]

PSYCH 431 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421)

Fall. 3 or 4 credits; the optional (or fourth) credit involves a term paper. Prerequisites: an introductory course in biology or psychology, plus a second course in perception or neurobiology or cognition or psychology. No auditors. Limited to 25 students. Graduate students, see Psychology 631. T R 10:10–11:25. B. P. Halpern.

A literature-based examination of post-maturation changes in the perceptual, structural, and physiological characteristics of somesthetic, chemosensory, visual, and auditory systems. Emphasis will be on human data, with non-human information included when especially relevant. Current developments in human sensory prosthetic devices, and in regeneration of receptor structures, will be examined. Brief written statements (by electronic mail) of questions and problems related to each set of assigned readings will be required at least one day in advance of each class meeting. This course will be taught using the Socratic Method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Students are expected to come to each class having already done, and thought about, the assigned readings.

PSYCH 436 Language Development (also HDFS 436, LING 436, and COG ST 436)

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll under HDFS 633/LING 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. T R 2:55–4:10. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available. (See Cog St. 450/ Ling 450 and Psych 437.)

PSYCH 437 Lab Course: Language Development (also LING 450 and COGST 450) (in conjunction with HDFS/LING 436, Language Development)

Spring. 2 credits. B. Lust.

This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies Research Labs. This course is partially funded by a new National Science Foundation grant to Cornell's Cognitive Studies program, "Interdisciplinary Approaches to the Scientific Study of Language Knowledge and Acquisition." This project is intended to involve undergraduates in active research and to coordinate related subfields of several disciplines in a unified, laboratory-supported curriculum.

This course will include several structured modules dealing with topics covered in the survey course, HD/LING/PSYCH 436, Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods in order to test hypotheses.

The course will meet once a week in group format. In addition, students will be given access to a research lab environment for independent work on assigned modules, and independent research, throughout the week, and throughout the term.

[PSYCH 440 The Brain and Sleep

Fall. 4 credits. Prerequisites: at least Psychology 223 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. S-U grades optional. Graduate students, see Psychology 640. M W 8:40–9:55. Not offered 1999–2000. H. S. Porte.

Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics will include sleep deprivation and the biological functions of sleep; sleep's putative role in learning and memory; biologically interesting deviations from normal sleep; the cognitive neuroscience of sleep.]

PSYCH 441 Laboratory in Sleep Research

Spring. 4 credits. Prerequisites: Psychology 440 or comparable preparation, and permission of the instructor during preregistration. Laboratory fee: $50. Graduate students, see Psychology 641. W 7:30–10:30 p.m. H. S. Porte.

Emphasizing the neurobiology of sleep state, the course introduces the laboratory study of human sleep and its psychological correlates. Serving as both experimenter and subject, each student will learn the physical rationale and techniques of electroencephalography and other bioelectric measures of behavioral state. Using computerized data analysis, students will complete weekly laboratory reports and a collaborative term project. Sleep recordings will be done during the day or evening when possible. In addition, overnight recording sessions are required.

[PSYCH 450 The Lenses of Gender (also Women's Studies 450)
Spring. 4 credits. Limited to 15 seniors and graduate students. Prerequisites: 1) senior or graduate standing, with preference given to psychology majors and women's studies majors; 2) both a course related to gender and/or sexuality and a course related to clinical and/or personality psychology. Permission of instructor required. No preregistration. Interested students should attend first class. Letter grade only. Graduate students, see Psychology 650/Women's Studies 650. F 2:30-4:25. Not offered 1999–2000. S. L. Bem.
The focus of this seminar is the intersection of gender and clinical psychology. Rather than surveying a broader array of topics more superficially or studying a single topic in very great depth, the seminar will take up several gender- and sexuality-related issues in moderate depth over the course of several weeks. Possible topics include depression, eating disorders, recovery of false memories, transgender, needs of lesbian and gay clients. Course requirements will likely include a final essay examination and a term paper or a class presentation.]

PSYCH 470 Undergraduate Research in Psychology
Fall or spring. 1–4 credits. S-U grades optional. Written permission from the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours to be arranged. Staff.
Practice in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 471 Advanced Undergraduate Research in Psychology
Fall or spring. 1–4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours to be arranged. Staff.
Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research. One, and preferably two, semesters of Psychology 470 is required. The research should be more independent and/or involve more demanding technical skills than that carried out in Psychology 470.

PSYCH 472 Multiple Regression
Spring, weeks 1–7. 2 credits. Prerequisite: one solid semester of introductory statistics. Analysis of variance is helpful but not required. M W F 10:10. R. B. Darlington.
Uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis on analyzing data collected under uncontrolled conditions. Includes colinearity, indicator variables, sets, adjusted and shrunken R^2, suppressors, hierarchical analysis, overcontrol, experimental design. Very little hand computation; uses MYSTAT computer program.

PSYCH 473 General Linear Model
Spring, weeks 8–14. 2 credits. Prerequisite: Psychology 472 or equivalent. M W F 10:10. R. B. Darlington.
Includes multicategorical variables, corrections for multiple tests, diagnostic methods, nonlinear relationships, interaction, main and simple effects, and basic power analysis. Emphasizes MYSTAT and SYSTAT, briefly discusses SAS PROC REG and SAS PROC GLM.

PSYCH 475 Multivariate Analysis of Psychological Data
Fall. 2 credits. Prerequisite: Psychology 473 or permission of instructor. R 10:10–12:05. R. B. Darlington.
Students vote on topics to cover, choosing among nonparametric methods, time series, cluster analysis, multidimensional scaling, component analysis, factor analysis, MANOVA, canonical correlation, repeated measures, logistic regression, log-linear models, corrections for unreliability in regression, nesting, power analysis, influence analysis, and other topics. First class sketches all these topics before vote.

[PSYCH 478 Psychometric Theory
Fall. 2 credits. Prerequisite: Psychology 472 or permission of instructor. Not offered 1999–2000. T R 10:10–12:05. R. B. Darlington.
Statistical methods relevant to the use, construction, and evaluation of psychological tests.]

[PSYCH 479 Multisample Secondary Analysis
Fall, weeks 11–14. 1 credit. Prerequisite: Psychology 350 or equivalent. Not offered 1999–2000. T R 10:10–12:05. R. B. Darlington.
Statistical methods for analyzing and integrating the results of many independent studies on related topics.]

PSYCH 480 The Cornell Westchester/ Payne Whitney Field Placements
Full year. 7 credits. Spring through summer and fall. Prerequisites: Psych 325 or Psych 281(for Psych), Biology or Chemistry with Lab (Pre-med). Sophomores or juniors only. C. Maxwell Miller.
The Cornell-Westchester/Payne Whitney field placement program makes available eight-week research/clinical internships for Cornell-Ithaca undergraduates who are pre-professional in psychology, neurobiology, psychiatry, or medicine. Each student is matched with a MD./Ph.D. mentor at the Cornell-Westchester or Payne Whitney hospital. Students work on one rotation throughout the summer and assist the researcher with his/her work. Students' work includes, but is not limited to, reading, reporting, observing, writing literature reviews, learning grant-writing, assisting in the conducting of experiments and planning their own experiments.

Most placements involve a clinical component as well. Under the supervision of the mentor, students work in therapy groups with patients, participate in testing, and assist in psychological rehabilitative activities. The patient populations with whom students work are diverse with regard to age and diagnosis as well as race, culture, ethnicity, and national background.

PSYCH 481 Advanced Social Psychology
Fall. 4 credits. Limited to 20 students, by application. Senior psychology majors have priority. Graduate students, see Psycholgoy 681. T R 10:10–11:25. D. T. Regan.
Selected topics in social psychology are examined in depth with an emphasis on the relationship between experimental research and the development of theory. Readings will be mostly primary sources. Among the theoretical approaches to social behavior we may discuss are social comparison theory, cognitive dissonance, attribution processes and social judgment, dramaturgy and impression management, and evolutionary perspectives.

[PSYCH 489 Seminar: Beliefs, Attitudes, and Ideologies
Fall. 4 credits. Prerequisites: admission is by application during the spring preregistration period. Seniors are given priority. M 2:30–4:25. Not offered 1999. D. J. Bem.
The seminar examines fundamental properties of beliefs and attitudes: how they are formed and changed, what psychological functions they serve for the individual, and how they coalesce into belief systems or ideologies. Several specific idealogies are examined in detail: for example, the political ideologies of the American public, gender, sexual orientation, the ideological factors that promote anorexia in a society, the contrasting world-views of "pro-choice" and "pro-life" activists, the ideologies of psychology and science, and more. Participants write weekly commentaries on the readings in addition to a term paper examining a particular ideology.]

[PSYCH 491 Research Methods In Psychology
Spring. 4 credits. Enrollment limited to 25 students. Recommended: permission of instructor, Psychology 350, experience in upper-division psychology courses, or graduate standing. Graduate students, see Psychology 691. T R 10:10–11:25. Not offered 2000. D. A. Dunning.
An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course will focus on designing and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we will also discuss what makes a research study actually interesting. The course in addition, will cover test construction, survey methods, and "quasi experiments." Students will concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.]

PSYCH 492 Sensory Function (also BIONB 492)
Spring. 4 credits. Limited to 25 students. Prerequisite: a 300-level course in biopsychology, or BIONB 222 or BIOAP 311, or permission of the instructors. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Offered alternate years. Graduate students, see Psychology 692. Not offered 2000–2001. M W F 10:10. B. P. Halpern and H. C. Howland.
This course covers classical topics in sensory function such as vision, hearing, touch and balance, as well as some more modern topics like sensory coding, location of stimulus sources in space, the development of sensory systems, and non-classical topics such as electroreception and internal chemoreceptors. Both human and nonhuman systems are discussed. In all cases the chemical, physical, and neurophysiological bases of sensory information are treated, and the processing of this information is followed into the central nervous system. This course will be taught using the Socratic method, in which the instructors ask questions of the students, and their answers will be discussed. Students will be expected to come to each class having read, thought about, and prepared to discuss, the assigned readings and other assigned information resources. Students will submit brief analyses of, and comments and questions on, all assignments by e-mail to the course's electronic mailing list a day before each class meeting. The mailing list will distribute submissions to all members of the class and to the instructors. In addition to these brief triweekly written exercises, a term paper in the form of a review article will be required.

Advanced Courses and Seminars

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each term is determined by the needs of the students.

A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Uris Hall). The following courses may be offered either term and carry 4 credits unless otherwise indicated.

PSYCH 510–511 Perception

PSYCH 512–514 Visual Perception

PSYCH 518 Topics in Psycholinguistics

PSYCH 519–520 Cognition

PSYCH 521 Psychobiology

PSYCH 522 Topics in Perception and Cognition

PSYCH 523 Hormones and Behavior

[PSYCH 524 Sex Differences in Brain and Behavior (also BIONB 626)
Spring. 2 credits. Limited to 12 seniors and graduate students. Not offered 1999–2000. Hours to be arranged. T. J. DeVoogd.
A survey of the newly discovered animal models for sex differences in the brain. Topics include the role of steroids in brain development, whether hormones can modify the structure of the adult brain, and the consequences of such sex differences in anatomy for behavior.]

PSYCH 527 Topics in Biopsychology

PSYCH 535 Animal Behavior

PSYCH 541 Statistics in Current Psychological Research

PSYCH 580 Experimental Social Psychology

PSYCH 600 General Research Seminar
Fall or spring. No credit.

PSYCH 601 Computational Models of Language
Spring. 4 credits. R 10:10–12:05. Prerequisites: consent of instructor. M. Spivey.
This seminar will involve in-depth discussion of a range of computational approaches to language representation, processing, and acquisition. We will cover pharse-structure grammars, context-free grammars, connectionist models, statistical natural language processing, and dynamical systems, to name just a few. There will also be some hands-on experience writing models in a computer lab using the MATLAB programming environment.

PSYCH 605 Perception (also Psychology 205)
Spring. 4 credits. T R 11:40–12:55. Non-Arts graduate students only. J. E. Cutting.

[PSYCH 607 Chemosensory Perception (also Psychology 307)
Fall. 4 credits. T R 9:05. Not offered 1999–2000. B. P. Halpern.]

[PSYCH 611 Introduction to Human Memory (also Psychology 311)
Spring. 4 credits. T R 11:40–12:55. Not offered 1999–2000. Staff.]

[PSYCH 612 Laboratory in Cognition and Perception (also Psychology 412)
Spring. 4 credits. M W 2:55–4:10. Not offered 1999–2000. D. J. Field.]

PSYCH 613 Obesity and the Regulation of Body Weight (also Nutritional Sciences 315)
Spring. 3 credits. Limited to 30 students. Prerequisites: one course in psychology and one course in nutrition. Undergraduate students may register with permission of instructor. S-U grades optional. Offered alternate years. T R 1:25–3:20. D. A. Levitsky.
This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

PSYCH 614 Issues in Cognitive Psychology (also Psychology 214)
Fall. 4 credits. M W F 10:10. Staff.

[PSYCH 615 Concepts, Categories, and Word Meaning (also Psychology 415)
Fall. 4 credits. M 1:25–4:25. Not offered 1999–2000. Staff.]

PSYCH 618 Psychology of Music (also Psychology 418)
Spring. 4 credits. M W 2:55–4:10. C. Krumhansl.

[PSYCH 619 Neural Networks Laboratory (also Psychology 419)
Spring. 4 credits. T R 2:55–4:10. Not offered 1999–2000. D. J. Field.]

[PSYCH 622 Developmental Biopsychology (also Psychology 422)
Fall. 4 credits. M W F 9:05–9:55. Not offered 1999–2000. B. L. Finlay.]

PSYCH 625 Cognitive Neuroscience (also Psychology 425)
Fall. 4 credits. M W F 9:05–9:55. B. L. Finlay.

[PSYCH 626 Evolution of Human Behavior (also Psychology 326)
Fall. 4 credits. T R 2:55–4:10. Not offered 1999–2000. R. E. Johnston.]

[PSYCH 629 Olfaction and Taste: Structure and Function (also Psychology 429 and BIONB 429)
Spring. 4 credits. T R 9:05. Not offered 1999–2000. B. P. Halpern.]

PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also Psychology 431 and BIONB 421)
Fall. 4 credits. T R 10:10–11:25. B. P. Halpern.

PSYCH 632 Biopsychology of Learning and Memory (also Psychology 332 and BIONB 328)
Spring. 4 credits. M W F 11:15. T. J. DeVoogd.

[PSYCH 640 The Brain and Sleep (also Psychology 440)
Fall. 4 credits. M W 8:40–9:55. Not offered 1999–2000. H. S. Porte.]

PSYCH 641 Laboratory in Sleep Research (also Psychology 441)
Spring. 4 credits. W 7:30–10:30. H. S. Porte.

PSYCH 642 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also Psychology 342)
T R 11:40–12:55. D. J. Field.

[PSYCH 650 The Lenses of Gender (also Psychology 450 and Women's Studies 450 and Women's Studies 650)
Spring. 4 credits. F 2:30–4:25. Not offered 1999–2000. S. L. Bem.]

PSYCH 681 Advanced Social Psychology (also Psychology 481)
Fall. 4 credits. T R 10:10–11:25. D. T. Regan.

[PSYCH 689 Seminar: Beliefs, Attitudes and Ideologies (also Psychology 489)
Fall. 4 credits. M 2:30–4:25. Not offered 1999–2000. D. J. Bem.]

PSYCH 691 Research Methods in Psychology (also Psychology 491)
Spring. 4 credits. T R 10:10–11:25. D. A. Dunning.

PSYCH 692 Sensory Function (also Psychology 492 and BIONB 492)
Spring. 4 credits. Not offered 2000–2001. M W F 10:10. B. P. Halpern and H. C. Howland.

PSYCH 696 Introduction to Sensory Systems (also Psychology 396 and BIONB 396)
Spring. 4 credits. M W F 10:10. B. P. Halpern.

PSYCH 700 Research in Biopsychology

PSYCH 709 Developmental Psychology (also Psychology 209)
Spring. 4 credits. T R 10:10–11:25. Staff.

PSYCH 710 Research in Human Experimental Psychology

PSYCH 713 Information Processing: Conscious and Non-conscious (also PSYCH 413)
Spring. 4 credits. R 10:10–12:35.
B. Khurana.

PSYCH 714 Comparative Cognition (also Psychology 414)
Spring. 4 credits. T R 11:40–12:55.
M. J. Owren.

[PSYCH 715 Psychology of Language (also Psychology 215)
Fall. 4 credits. M W F 11:15. Not offered 1999–2000. Staff.]

PSYCH 716 Auditory Perception (also Psychology 316)
Fall. 4 credits. T R 10:10–11:25.
C. L. Krumhansl.

[PSYCH 717 The Origins of Thought and Knowledge (also Psychology 417)
Fall. 4 credits. M 1:25–4:25. Not offered 1999–2000. Staff.]

PSYCH 720 Research in Social Psychology and Personality

PSYCH 722 Hormones and Behavior (also Psychology 322 and BIONB 322)
Spring. 3 credits. M W F 11:15–12:05.
E. A. Regan.

PSYCH 773–774 Proseminar in Cognitive Studies I and II (also COGST 773/774, PHIL 773/774, LING 773/774, and COMS 773/774)
Fall: R. grade. Spring: S-U only.
4 credits.
The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar will consist of a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that make up the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty members from the field will introduce the theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they will introduce various labs in which active research is being conducted in their field at Cornell.

The proseminar will include suggestions from faculty in each field for further advanced interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It will conclude (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade will be assigned in the fall semester, and a S-U grade only will be assigned in the spring semester.

PSYCH 775 Proseminar in Social Psychology I
Fall. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning, T. D. Gilovich and D. T. Regan.
This is the first term of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

PSYCH 776 Proseminar in Social Psychology II
Spring. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning, T. D. Gilovich, and D. T. Regan.
This is the second half of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

PSYCH 900 Doctoral Thesis Research in Biopsychology

PSYCH 910 Doctoral Thesis Research in Human Experimental Psychology

PSYCH 920 Doctoral Thesis Research in Social Psychology and Personality

Summer Session Courses

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses will be offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry

PSYCH 123 Introduction to Biopsychology

PSYCH 128 Introduction to Psychology: Personality and Social Behavior

PSYCH 199 Sports Psychology

PSYCH 280 Introduction to Social Psychology

PSYCH 350 Statistics and Research Design

QUECHUA

See Romance Studies.

RELIGIOUS STUDIES MAJOR

See "Special Programs and Interdisciplinary Studies."

ROMANCE STUDIES

The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in French, Italian, and Spanish literatures. In addition, the department's program includes courses in the French, Italian, Portuguese, Quecha and Spanish languages and linguistics; semiotics; and Francophone, Italian, and Hispanic culture. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

French

J. Béreaud (director of undergraduate studies, fall), A. Berger, I. Daly, N. Furman, M. Greenberg (chair), E. Kaufman, R. Klein (director of undergraduate studies, spring), P. Lewis, A. Levy, S. LoBello, K. Long, J. Ngaté, C. Sparfel, S. Tarrow, S. Tun, M. C. Vallois, C. Waldron, L. R. Waugh.
Emeriti: A. Colby-Hall, D. I. Grossvogel, A. Seznec.

The Major

The major in French is divided into three options: French Area Studies, French linguistics, and French literature. While prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad, no student will be refused admission merely because of a late start. In view of the ongoing curriculum changes that will be implemented in 1999–2000, please see Professor Jacques Béraud, the director of undergraduate studies. This consultation is especially important for finding out what sequence of courses will follow the current choice of courses.

The French Linguistics Option

The major in French linguistics is designed to give students proficiency in the oral and written language and to develop skills in the linguistic analysis of French.

To be admitted to the major, students should have completed Linguistics 101 and French 200, 203, 205, or 213 (or their equivalents) by the end of the sophomore year. It is expected that all students in the major will also take either French 220, 221, or 222, preferably by the end of the sophomore year.

To complete the major, a student must:

1) Acquire a sound degree of competence in French. This competence is demonstrated by the successful completion of French 312 (or its equivalent) or by the passing of a special examination. Typically, students in the major will have taken 312 by the end of their junior year.

2) Take six courses in French, Romance, and general linguistics (in addition to Linguistics 101). These courses will include at least one course concerning the history of French (e.g., Romance Linguistics 321, French 629 [listed under Romance Studies]), one course concerning the structure of French (e.g., French 405, 408, 410, Linguistics 323), and one other course in French linguistics.

3) Take two courses (preferably a sequence) in some allied area, for example, (a) French literature and civilization, (b) psycholinguistics, (c) philosophy of language, (d) French history, culture, music, or history of art or architecture. (This requirement may be waived for students who are double majors in other fields.)

Honors. The honors program encourages well-qualified students majoring in French linguistics to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not practically possible in the case of course papers.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

The Literature Option

The major in French, literature option, is designed to give students proficiency in the oral and written language, to acquaint them with French literature and culture, and to develop skills in literary analysis.

Admission

To be admitted to the major, students should have completed FRLIT 201, 220, or 221 plus 222 and FRROM 213 or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

(1) Acquire a sound degree of competence in French language. This competence is demonstrated by the successful completion of French 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).

(2) Take six courses in French literature or civilization at the 300 level or above. These courses, selected in consultation with the student's major adviser, will include at least two pre-19th-century courses and at least one 400-level course.

(3) Take two connected courses in one of the following related areas: literature, linguistics, comparative literature, history, history of art, music, government or another relevant discipline with a significant French component. Students who are double majors are exempted from this last requirement.

The Area Studies Option

Admission

To be admitted to the major, students should have completed French Literature 201, 220, 221 or 224 plus French Language 213 or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

(1) Acquire a sound degree of competence in the French language. This competence is demonstrated by the successful completion of French 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).

(2) Take two courses in Romance Studies (literature or civilization) at the 300 level or above.

(3) Take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—Africana studies, anthropology, comparative literature, French literature, economics, government, history, history of art, linguistics, music, theater arts, women's studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of these six courses should be at the 400 level.

A copy of each student's program will be given to the director of undergraduate studies for approval and safekeeping.

Study Abroad in France

French majors or other interested students may study in France for one or two semesters during their junior year. Opting for one of several study-abroad plans recognized by the departments of Romance Studies and Linguistics facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of FRROM 213 or its equivalent in advanced credit or placement by the Cornell CASE examination. The taking of FRROM 301 and/or 312 is, however, strongly recommended.

Students interested in studying in France are encouraged to consider the special benefits offered by EDUCO, the program in Paris cosponsored by Cornell and by Duke University. EDUCO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the year or the semester as fully matriculated students at the University of Paris VII and other institutions of higher learning in Paris, including the Institut d'Etudes Politiques (Sciences Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation into French history, society, and daily life. While it is possible to enroll in the EDUCO Program for one semester, admission will be given first to students planning to study abroad for the full academic year.

EDUCO maintains a center in Paris with appropriate support staff. The resident director, chosen annually from the Cornell and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

Honors. The honors program encourages well-qualified students majoring in French literature or culture to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

Fees. Depending on the course, a small fee may be charged for copies of texts used in course work.

Language

All language courses are offered by the Department of Romance Studies and French linguistics courses are offered by the Department of Linguistics.

Note: Students placed in 200-level courses also have the option of taking courses and/or literature courses; see listings under "Literature" for descriptions of the literature courses, some of which may be taken concurrently with French Language 200, 203, 205, or 213 or Hotel Administration 266.

FRROM 121 Elementary French
Fall, spring and summer. 4 credits. Spring enrollment limited. No prerequisites. Students who have studied French for 2 or more years must take the language placement test (LPF). Intended for beginning students or those placed by examination. C. Sparfel.
Small classes provide the opportunity for student interaction and intensive practice in listening to, speaking, reading, and writing basic French in meaningful contexts, which offer insights into French language, culture, and society.

FRROM 122 Elementary French
Fall or spring. 4 credits. Prerequisite: French 121, LPF score 37–44, or SAT II 370–480. Students who receive an LPF score of 56 after French 122 attain qualification and may enter the 200-level sequence; otherwise, satisfactory completion of French 123 is required for qualification. M. J. Highfield.
The goal of French 122 is to build on the students' elementary knowledge of French so that they can function in basic situations in a French-speaking culture. Courses offer intensive, context-specific practice in speaking, listening, reading, and writing.

FRROM 123 Continuing French
Fall, spring, or summer. 4 credits. Limited to students who have previously studied French and have an LPF score 45–55 or SAT II 490–590. Satisfactory completion of French 123 fulfills the qualification portion of the language requirement. C. Waldron, I. Daly.
French 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability; to establish a groundwork for correct writing; and to provide a substan-

tial grammar review. The approach in the course encourages the student to see the language within the context of its culture.

FRROM 200 Intermediate Reading and Writing
Fall or spring. 3 credits. Prerequisite: qualification in French (French 123, LPF score 56–64, or SAT II 600–680). Satisfactory completion of French 200 fulfills the proficiency portion of the language requirement. S. S. Hnin Tun.
Study of the language in different text types, prose and poetry, articles on current events, and a contemporary novel. Discussion of texts with emphasis on vocabulary development, grammar review and expansion, and appreciation of stylistic levels and cultural differences. Students have the opportunity to select reading material and work on their areas of interest. Taught in French.

FRROM 203 Intermediate Composition and Conversation I
Fall, spring, or summer. 3 credits. Prerequisite: qualification in French (French 123, LPF score 56–64, or SAT II 600–680). Satisfactory completion of French 203 fulfills the proficiency portion of the language requirement. I. Daly.
Readings, conversation, composition; various other activities based on films, videos, and newspaper articles. The course gives students the opportunity to expand their language skills and to strengthen their knowledge of grammar for better control. Taught in French.

FRROM 213 Intermediate Composition and Conversation II
Fall, spring, or summer. 3 credits. Enrollment limited. Prerequisite: proficiency in French (French 200, 203, or 205), permission of instructor, or placement by Cornell Advanced Standing Examination (CASE) offered by the Department of Romance Studies. This course, or its equivalent, is required for admission to the Cornell Abroad program. A. Grandjean-Lévy.
Emphasis on improving grammatical accuracy and on enriching vocabulary in oral and written expression of French. Varied types of reading including newspaper articles, short videos, films, and presentations by students, provide the basis for writing assignments and class discussions. Themes and emphases may vary from section to section. Taught in French.

FRROM 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

FRROM 301 Advanced French I
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 213 or Q++ on the Cornell Advanced Standing Examination (CASE). Fall, J. Bereaud or I. Daly; spring, I. Daly or N. Furman.
Class discussions based on reading of selected contemporary texts: half will be short stories by 20th-century writers, half will be articles on current events taken from French magazines or newspapers. All texts are chosen for thematic or cultural interest and linguistic quality. Special attention will be given to correctness and accuracy in French through grammar review and weekly papers (essays or translations). Two films will be shown to illustrate today's idiomatic language. Course required of French majors.

FRROM 305 French through Film
Fall and spring. 4 credits. Prerequisite: Q++ on CASE exam, French 213, or permission of instructor. C. Waldron.
Analysis of French contemporary films and related readings. Used as a means of studying the language. Particular emphasis on the culture and historical context as it relates to French contemporary society. Additionally, guest speakers will provide enrichment on selected topics.

FRROM 312 Advanced French II
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 301 or placement by the Cornell Advanced Standing Examination (CASE). Fall, J. Bereaud; spring, N. Furman.
Continuation of work done in French 301. The objective of French 301 is to teach students to speak and write correct French; in French 312 students will be expected to have a richer, more idiomatic and hopefully elegant command of the language.

Formal study of grammar will be discontinued, and more attention will be devoted to the examination of texts and to oral presentations by students. Weekly papers as in French 301.

FRROM 630 French for Reading—Graduate Students
Spring only. 3 credits. Limited to graduate students. Staff.
Designed for those with little or no background in French, this course's primary aim is to develop skill in reading French. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. Some flexibility in selecting texts according to fields of interest is offered.

Literature

FRLIT 201 Introduction to Techniques of Reading French Literature
Fall or spring. 3 credits. Prerequisite: qualification in French (SAT II score of 600, LPF score of 56, or French 123). E. Kaufman and staff.
French 201, like all other 200-level French literature courses, satisfies the language requirement by giving proficiency in French. Students with an SAT II score of 640 or more, or an LPF score of 60 or more, should take French 221.

French 201 is divided into small sections and is conducted in French.

French 201 is designed for students interested in improving their written and oral skills in French and also their literary proficiency. Texts have been chosen both for their literary merit and their level of linguistic difficulty. Close scrutiny of the works and active class discussions will sharpen students' critical and analytical abilities. Different genres are covered (poetry, drama, and narrative prose), and the reading list may include authors such as Baudelaire, Beckett, Ionesco, Camus, Duras, Rimbaud and Sartre.

FRLIT 220 French and Francophone Culture @
Fall. 3 credits. Prerequisite: SAT II score of 640 and above, or LPF score of 60, or FRDML 200, 203 or 205. Conducted in French. E. Kaufman.
This course serves as an introduction to French Area Studies. It provides an overview of Francophone culture and society from 1945 to the present. Readings will include a selection of articles dealing with issues of current concern in France; works by French and Maghrebi or African writers; poetry or drama; two films will also be discussed.

FRLIT 221 Modern French Literature #
Fall or spring. 3 credits. Prerequisites: SAT II score of 640 and above, or LPF score of 60, or FRDML 200, 203, or 205. Conducted in French. Fall, N. Furman and staff; spring, staff.
This course, divided into small sections, is intended as an introduction to French literature, the modern period. Texts have been chosen both as a function of their centrality to the traditional literary canon and with an eye to experimentation. The course considers literary genres (poetry, drama, the novel) as solicitations to read texts differently, at different speeds, with diverse claims on our attention. The course is designed to satisfy a general interest in modern French literature as well as to prepare students to pursue a French major in literature. Readings will include works by Baudelaire, Mallarmé, Sartre, Cocteau, Proust, Duras.

FRLIT 222 Early Modern French Literature #
Spring. 3 credits. Prerequisite: FRLIT 201, 220, 221 or permission of the instructor. Required of all literature majors, but not limited to them. Conducted in French. M. C. Vallois.
Study of the classic literature of seventeenth-century France (Corneille, Racine, Molière, Mme. de Lafayette, La Fontaine) and of eighteenth-century Enlightenment literature (Voltaire, Rousseau, Diderot, Beaumarchais). Special attention is paid to the ways in which these various works represent or deal with the shift from an aristocratic cultural code of values to modern bourgeois ideology and aesthetics. The course will also invite reflection on the status and centrality of female characters in classical and neo-classical French literature; it will attempt to trace the evolution from the classical tragic heroine to more modern (but no less problematic) representations of women.

FRLIT 224 The French Experience: An Introduction (also ANTHR 224)
Fall. 3 credits. Conducted in English (with the possibility of a section in French). Readings available both in French and in English translation. A. Berger and J. Siegel.
We look ethnographically and through literature at tastes and at class as they function and are discussed in France. We examine the practice of speech and how it's reflected upon. We look at views from France, America and other places. By emphasizing differences, the French experience emerges.

FRLIT 315 Modern European Literature and Culture (also COML 311 and RUSSL 311)
Fall. 4 credits. Conducted in English. G. Gibian.
For description, see Comparative Literature 311.

FRLIT 320 French Civilization II: Contemporary France
Fall. 4 credits. Prerequisite: FRROM 213 or equivalent. Conducted in French. J. Bereaud.

Detailed, analytical study of contemporary French society, its structure and its culture. In the second part of the course, students will select a topic for in-depth, personal research leading to the writing of a term paper. Short oral presentations will be encouraged. A variety of resources will be used: texts, magazine and television excerpts, and internet items. A few films will be shown to illustrate some aspects of French life.

FRLIT 330 Francophone African Literature @
Spring. 4 credits. E. Kaufman.
Introduction to the works of representative poets, dramatists, novelists, and short story writers from sub-Saharan Africa and Madagascar. L. S. Senghor, C. Laye, F. Oyono, J. J. Rabéarivelo, S. Labou Tansi, and the Afro-Caribbean Aimé Césaire will be among the writers whose works will be read. The focus will be on the twentieth century and the nature of these writers' relationships with both the West and with Africa.

FRLIT 333 Contemporary French Thought
Spring. 4 credits. Conducted in French. R. Klein.
This course is intended to introduce students to the work of some of the major figures in contemporary French thought, in writing published since the events of May 1968. A broad range of topics and issues will be examined, with particular attention to those that have transformed traditional academic disciplines. Books have been selected not only with a view to their theoretical interest, but with an eye to the quality of their French prose. Readings will include works by Lévi-Strauss, Foucault, Cixous, Irigaray, Kristeva, Derrida, Barthes, Baudrillard.

FRLIT 334 The Novel as Masterwork (also French Literature 684)
Fall. 4 credits. Conducted in French. Prerequisite: French 201 or permission of the instructor. M. C. Vallois.
This course traces the evolution of the nineteenth century French novel. Readings include novels by Stendhal, Balzac, Flaubert and Zola.

FRLIT 356 Renaissance France
Fall. 4 credits. Conducted in French. K. Long.
This course will trace the importance of a number of movements/crises/events in the evolution of France as a nation and a culture, as well as the impact of these movements on the origins of modern thought. We will consider the ongoing debate on the status of women, known as the *querelle des femmes*; the discovery of the "New World," and its subsequent colonization; the Reformation, which led eventually to a separation of religious and national interests; and the rise of modernization and scientific disciplines. These areas of inquiry will be studied by means of various texts: the works of Marguerite de Navarre, Louise Labé, François Rabelais, Joachim du Bellay, Pierre de Ronsard, Ambroise Paré, and Michel de Montaigne, among others. Texts and discussions will be in French.

FRLIT 370 Perspectives on the Age of Enlightenment: "Enlightened" Literature
Spring. 4 credits. M. C. Vallois.
Through readings of various works of the French 18th century (by Montesquieu, Voltaire, Diderot, Rousseau and Sade), we will study the emergence of new literary discourses and practices aiming at a "secularization" of the literary field, in conjunction with the ideological and epistemological changes which took place in the age of Enlightenment.

FRLIT 396 The Contemporary French Novel: 1950 to the Present
Fall. 4 credits. Prerequisite: French 201 or permission of instructor. S. Tarrow.
The course will focus on novels written after 1960, tracing the development of new forms of the genre and new voices in the repertoire. Works by well-known authors such as Camus, Robbe-Grillet and Duras will be accompanied by those of North African and immigrant writers. Issues of language and identity will be considered in the context of European interpreter and an increasingly multi-cultural society. Weekly readings, two short essays and a final paper are required.

FRLIT 397 Orientalism, Exoticism and Interiority (also COM L 357)
Spring. 4 credits. T. Hope.
For description, see Comparative Literature 357.

FRLIT 409 Mourning People (also FRLIT 609, COM L 477/677)
Fall. 4 credits. T. Hope.
For description, see Comparative Literature 477.

FRLIT 419–420 Special Topics in French Literature
419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of special topics.

FRLIT 428 Oulipo: Forms of Potential Literature (also FRLIT 698)
Spring. 4 credits. R. Klein.
"Oulipo (Ouvroir de littérature potentielle)" is a relatively small circle of writers and mathematicians that has been conducting radical experiments in literary form since its formation in 1960. Its members are largely, but not exclusively, French, and its meetings are held in Paris. Its aim is to identify and analyze older, even ancient experiments in literary form and to elaborate new forms or textual principles based on novel combinatories or permutations, including computer algorithms. Its founding and continuing members include some of the most prominent contemporary French writers, poets and novelists, including Raymond Queneau, Jacques Roubaud, Georges Perec, as well as the Italian writer, Italo Calvino, and the American, Harry Matthews. The course aims principally to examine the theoretical claims of Oulipo, its hostility to surrealism, its voluntarism, its preference for formal constraints, its exemplification of rhetorical and literary procedures (lipograms, palindromes, rhopalic verse, holorhymes, Boolian haikus, etc.). At the same time, close readings of selected texts will be encouraged.

FRLIT 429–430 Honors Work in French
429, fall; 430, spring. 8 credits year-long course, R grade fall semester, letter grade spring semester, with permission of the adviser. Open to juniors and seniors. Consult the director of the honors program. N. Furman and staff.

FRLIT 448 Medieval Literature
Spring. 4 credits. Prerequisite: French 221 or permission of the instructor. Conducted in English. A. Colby-Hall.
French 448 deals with the romance and the lyric. Facility in reading Old French and appreciation of these two major genres are the primary goals of this course.

FRLIT 477 Nationalism and National Literature in Francophone sub-Saharan Africa (also FRLIT 677, COM L 478/678)
Spring. 4 credits. D. Thomas.
For description, see Comparative Literature 478.

FRLIT 480 Francophone Sub-Sahara African Cinema & Literature (also COM L 460)
Fall. 4 credits. D. Thomas
For description, see Comparative Literature 460.

FRLIT 481 Bohemians and Dandies (also FRLIT 689)
Spring. 4 credits. N. Furman.
A study of two social and cultural phenomena of the 19th century: the bohemian and the dandy as expressed in the works of Vigny, Barbey d'Aurevilly, Villiers de l'Isle-Adam and Jules Vallès.

FRLIT 493 French Feminisms (also WOMS 493)
Fall. 4 credits. Conducted in English. N. Furman.
This course will examine the political, theoretical and literary concerns of contemporary French writers who have addressed "*la question de la femme/la question du féminin.*" Readings will include representative texts by Simone de Beauvoir, Monique Wittig, Kristeva, Jacques lacan, Luce Irigaray, Jacques Derrida, and Hélène Cixous.

FRLIT 607–608 Proseminar
607, fall; 608, spring. 2 credits each term. M. C. Vallois and staff.
Meeting every two weeks, the pro-seminar will be the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities will include reading and discussion of seminal texts, chapters from dissertations and works in-progress, articles and essays from visiting lecturers.

FRLIT 609 Mourning People (also FRLIT 409, COM L 477/677)
Fall. 4 credits. T. Hope.
For description, see Comparative Literature 477.

FRLIT 617 Poetry and Poverty: 19th Century French Lyricism and the Times of Indigence
Fall. 4 credits. A. Berger.
From *Pauvres Gens* (Hugo) to the "pauvre Lélian" (Verlaine), from Baudelaire's poor to Rimbaud's scum, French poetry takes up the claim of the poor. But poverty as a social phenomenon doesn't simply become a poetic theme by striking lyricism's sentimental chord. If poverty is the main issue of the century, as French 19th century political and social thinkers agree, and if the question of modern times is indeed the question of poverty ("la misère"), as Michelet and Heidegger suggest in various ways, then the lyrical treatment of poverty raises the question of poverty's relation to modernity, and more specifically to the economy which defines it. Through a close examination of poems by Hugo,

Baudelaire, Rimbaud, Verlaine, Mallarmé and Jehan-Rictus, read along with Michelet, Benjamin and Heidegger among others, we will address the question of poetry's relations to the modern experience of lack and need, as well as to the poor as representative of the outcast. How can poetry give (itself!!) and what can it give in times of want?

FRLIT 639–640 Special Topics in French Literature
639, fall; 640, spring. 4 credits each term. Staff.
Guided independent study for graduate students.

FRLIT 677 Nationalism and National Literature in Francophone sub-Saharan Africa (also FRLIT 477, COM L 478/678)
Spring. 4 credits. D. Thomas.
For description, see Comparative Literature 478.

FRLIT 684 The Novel as Masterwork (also FRLIT 334)
Fall. 4 credits. M. C. Vallois.
For description, see French Literature 334.

FRLIT 689 Bohemians and Dandies (also FRLIT 481)
Spring. 4 credits. N. Furman.
For description, see French Literature 481.

FRLIT 698 Oulipo: Forms of Potential Literature (also FRLIT 428)
Spring. 4 credits. R. Klein.
For description, see French Literature 428.

Italian

Faculty: M. Migiel (director of undergraduate studies), A. Grossvogel (emerita), K. Battig von Wittelsbach, Flaminia Cervesa-McCobb, S. Stewart-Steinberg, M. Swenson

The Major

Students who wish to major in Italian should consult the Director of Undergraduate Studies who will assign the student a major adviser. The general plan and the details of the student's course of study will be worked out in consultation with the adviser. Italian majors are encouraged to take courses in related subjects such as history, art history, music, philosophy, anthropology, classics, linguistics, and other modern languages and literatures. While a major often occupies only the junior and senior years, it is wise for students to seek faculty advice about the major as early as possible.

Students who elect to major in Italian ordinarily should have completed Italian 201 by the end of their sophomore year. Exemptions can be made on the basis of an examination. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary history, and to develop some skill in literary analysis. To this end, students will be expected to complete successfully 32 credits of Italian literature courses at the 300 level or higher, with papers to be written in Italian or English. Required courses for the major are ITALL 303, 304, and a course on Dante. ITALA 402, History of the Italian Language, and 403, Linguistic Structure of Italian, may be counted toward the 32 credits required for the major (an introductory linguistics course is a prerequisite of ITALA 402 and 403).

Students majoring in Italian will also be expected to acquire competence in the handling of the language. That competence may be demonstrated by passing an oral and written examination to be arranged with the adviser.

Italian majors will also be required to complete successfully two courses in related fields (for example, Italian history, Italian art history, literary theory).

Italian majors may study in Italy, generally during their junior year, under any of those study-abroad plans organized by American universities that allow the transfer of grades and credits.

To be eligible, students must have completed the first two years of their curriculum requirements and be in good academic standing.

Language

ITALA 121–122 Elementary Italian
121, fall; 122, spring. 4 credits each term. Prerequisite: for ITALA 122, ITALA 121 or equivalent. Intended for beginners or students placed by examination. At the end of ITALA 122, students who score 56 or higher on the LPI attain qualification and may enter the 200–level sequence; otherwise ITALA 123 is required for qualification. M. Swenson.
A thorough grounding in all the language skills: listening, speaking, reading, and writing. Language practice is in small groups. Lectures cover grammar and cultural information.

ITALA 123 Continuing Italian
Fall, spring, or summer. 4 credits. Limited to students who have previously studied Italian and have an LPI score 45–55 or SAT II 460–580. Satisfactory completion of ITALA 123 fulfills the qualification portion of the language requirement.
K. Battig von Wittelsbach.
ITALA 123 is an all-skills course designed to improve speaking and reading ability, to establish a groundwork for correct writing, and to provide a substantial grammar review.

ITALA 203–204 Intermediate Composition and Conversation
203, fall or spring; 204, fall or spring. 3 credits each term. Prerequisites: for ITALA 203, qualification in Italian; for ITALA 204, 203 or equivalent.
S. Stewart-Steinberg.
Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

Note: Students placed in 200–level courses also have the option of taking courses in introductory literature and cinema; see separate listings under ITALA 201, 202 and 205 for description of these courses.

ITALA 207 Intermediate Composition and Conversation
Fall. 3 credits each term. Prerequisite: qualification in Italian.
K. Battig von Wittelsbach.
Guided reading, conversation, composition, and grammar review emphasizing preparation for Italian literary studies.

ITALA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor.
Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

ITALA 314 Advanced Italian: Language and Social Issues (also Italian Lit 214)
Spring. 3 credits. Prerequisite: ITALA 204 or equivalent. ITALA 313 is not prerequisite to ITALA 314 and may be taken after ITALA 314. S. Stewart-Steinberg.
Further development of all skills, with emphasis on self-expression. Content: evolution and crisis in Italian politics, values, and national identity against the background of European unification. Social movements, issues, and attitudes, especially as reflected in the mass media.

ITALA 631 Readings in Italian Opera Libretti
Spring. 2 credits. For graduate students only. Prerequisite: permission of instructor. Offered concurrently with appropriate seminars in the Department of Music.

Literature

ITALL 201–202 Introduction to Italian Literature
3 credits. Prerequisite: permission of instructor. ITALL 201 is not prerequisite to ITALL 202 or ITALL 205. Conducted in Italian. Fall, 202; spring, 201. M. Migiel and staff.
In this course, students will develop their language skills in Italian by reading, discussing, and writing about short works of fiction (twentieth-century short stories in ITALL 201; twentieth-century prose works in ITALL 202).

ITALL 205 The Cinematic Eye of Italy
Fall and spring. 3 credits. Conducted in Italian. Prerequisite: ITALA 203 or permission of the instructor. Fall: S. Stewart-Steinberg; spring: M. Migiel.
In this sophomore seminar, film will be used to explore some of the most important issues in modern Italian cultural history, such as: Italy as a relatively new nation-state; fascism; regionalism; the Southern question; Catholicism; terrorism; the new consumerism of the 80's and 90's; and Italy's recent evolution into a multicultural society. Films viewed will include those from the fascist era and the neorealist period, as well as later reformulations and critiques of these early works. There will also be readings designed to introduce students to Italian film criticism and to key debates about contemporary Italian culture.

Italian Culture Courses

The sequence of ITALL 220, 221, 222, 223, and 224 is intended to give students a broad overview of the principal issues in Italian culture. The approach will be interdisciplinary, drawing on materials from at least three

of the following cultural domains: literature, politics, economics, history, art, film, music, religion, science, psychology, philosophy, anthropology.

ITALL 220–224 are conducted in English. Students who are proficient in Italian will have the option of enrolling concurrently in the one-credit Italian practicum, ITALL 300.

ITALL 220 Medieval Italy
Spring. 4 credits. W. Kennedy.
This course will cover the late medieval period in Italy and will deal with such issues as social, economic, and political transitions to early modernity; cultural and intellectual developments in literature, philosophy, theology, and the visual arts; and modern approaches to pre-modern cultures through gender and identity studies. Topic for 2000: readings will focus on the multi-faceted allegory of Dante's *Divine Comedy*, the lyric poetry of Petrarch, and the often raucous stroytelling of Boccaccio's *Decameron*.

ITALL 221 The Italian Renaissance (also HIST 350)
Fall. 3 credits. J. Najemy.
For description, see History 350.

ITALL 224 Contemporary Italy
Fall. 4 credits. M. Migiel.
The course will cover the period from World War II to the present, and will deal with issues such as: Neorealism, the partisan experience, the impact of the economic boom and demographic changes in the 1950s and 1960s, Christianity vs. Marxism, Italian film makers and the myth of Italy, terrorism, Italian feminist thought, rethinking history, North vs. South, immigration and Italian national identity.

ITALL 300 Italian Practicum
Fall or spring. 1 credit. M. Migiel and staff.
Students enrolled in an Italian literature or culture course that is conducted in English (e.g., ITALL 221, 224, 323) may opt to take this one-credit practicum in Italian, provided that they have already attained proficiency in the language. Students in the practicum will spend one class hour per week discussing selected issues or texts in Italian; they will also complete an appropriate amount of written work in Italian.

ITALL 323 Encounters with the Dead (also ITALL 623, COM L 323/623, JWST 323/623)
Fall. 4 credits. M. Migiel.
Focusing on two epic works obsessed with death and with the dead (Dante Alighieri's *Comedy* [1321] and Claude Lanzmann's *Shoah* [1985]) this seminar will explore how Dante's poem and Lanzmann's film, often along analogous lines, address such issues as: the problems inherent in the representation of events; the search for a poetic/cinematic language adequate to convey experiences surpassing human comprehension; the creation of a narrating "I"; and the education of the reader/spectator; national, political, and religious identities; the possibility of heroism; the place of women in the epic enterprise; the challenge of writing a history based on ironic displacement; the redemptive potential of art (and its ability to deceive as well as to enlighten and console); the call to bear witness, both to life and to loss. The seminar will also ask what value there is in comparing such vastly different works (a pre-Renaissance conversion narrative bearing witness to the Creator vs. a post-Holocaust testimonial marked by a crisis of witnessing). Students may read in English translation or the original; *Shoah* will be shown with English subtitles. The seminar will be conducted in English.

ITALL 351 Machiavelli (also HIST 351)
Spring. 4 credits. J. Najemy.
For description, see History 351.

ITALL 394 Calvino and Levi: Then and Now (also ITALL 694)
Spring. 4 credits. Conducted in English. M. Migiel.
A study of the principle works by Italo Calvino and Primo Levi, two of the most important Italian writers of the second half of the twentieth century, and a critical examination of the theoretical frameworks that have been used to understand them so far.

ITALL 419–420 Special Topics in Italian Literature
419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. M. Migiel.
Guided independent study of specific topics.

ITALL 429–430 Honors in Italian Literature
429 fall; 430, spring. 8 credits. Year-long course, R for fall semester; letter grade for spring semester. Limited to seniors. Prerequisite: permission of instructor. M. Migiel.

ITALL 456 Opera, History, Politics, Gender (also HIST 456, SOC HUM 459, COM L 459, WOMNS 454)
Spring. 4 credits. M. Steinberg and S. Stewart.
For description, see History 456.

ITALL 623 Encounters with the Dead (also ITALL 323, COM L 323/623, JWST 323/623)
Fall. 4 credits. M. Migiel.
For description, see Italian Literature 323.

ITALL 639–640 Special Topics in Italian Literature
639, fall; 640, spring. 4 credits each term. M. Migiel.

ITALL 694 Calvino and Levi: Then and Now (also ITALL 394)
Spring. 4 credits. Conducted in English. M. Migiel.
For description, see Italian Literature 394.

Portuguese

Faculty: J. Oliviera

PORT 121–122 Elementary Portuguese
121, fall; 122, spring. 4 credits each term. Intended for beginners. Students may attain qualification upon completion of 122 by achieving a satisfactory score on a special examination. J. Oliviera.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

PORT 203–204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Portuguese 203, Portuguese 122 or permission of instructor; for Portuguese 204, Portuguese 203 or permission of instructor. J. Oliviera.
Conversational grammar review with special attention to pronunciation and the development of accurate and idiomatic oral expression. Includes readings in contemporary Portuguese and Brazilian prose and writing practice.

Quechua

Faculty: L. Morató-Peña.

QUECH 131–132 Elementary Quechua
131, fall; 132, spring. 3 credits each term. Prerequisite: qualification in Spanish. This language series (131–132) cannot be used to satisfy the language requirement. L. Morató-Peña.
A beginning conversation course in the Cuzco dialect of Quechua.

QUECH 133–134 Continuing Quechua
133, fall; 134, spring. 3 credits each term. Prerequisites: for Quechua 133, Quechua 131–132 or equivalent; for Quechua 134; Quechua 133 or equivalent. Satisfactory completion of Quechua 134 fulfills the qualification portion of the language requirement. L. Morató-Peña.
An intermediate conversation and reading course. Study of the Huarochiri manuscript.

QUECH 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Morató-Peña.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Romance Studies

C. Arroyo

ROMS 363 The European Novel (also COM L 363)
Fall. 4 credits. C. M. Arroyo.
For description, see Comparative Literature 363.

Spanish

C. Morón Arroyo, L. Carrillo, D. Castillo, D. Cruz de Jesús, E. Dozier, M. A. Garcés, Z. Iguina, J. W. Kronik, N. Maldonado-Méndez, L. Morató-Peña, J. E. Paz-Soldán, J. Piedra (director of undergraduate studies), M. K. Redmond, J. R. Resina, M. Rice, J. Routier-Pucci, A. Stratakos-Tió, M. Stycos.

The Major

The major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in literary and linguistic analysis. Satisfactory completion of the major should enable students to meet language and literature requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, or to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake preprofessional training for graduate study in law or medicine. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult the director of undergraduate studies in Spanish—Professor Piedra—who will admit them to the major and choose an adviser from the Spanish faculty.

Spanish majors will then work out a plan of study in consultation with their advisers. Previous training and interests as well as vocational goals will be taken into account when the student's program of courses is determined.

SPANL 201 and SPANR 204 (or equivalent) are prerequisite to entering the major in Spanish. All majors will normally include the following core courses in their programs:

1) SPANR 311 and 312
2) SPANL 315, 316, and 318 (not necessarily in that order)

Spanish majors have great flexibility in devising their programs of study and areas of concentration. Some typical options of the major are:

1) Spanish literature, for which the program of study normally includes at least 20 credits of Spanish literature beyond the core courses. Literature majors are strongly urged to include in their programs courses in all the major periods of Hispanic literature.
2) A combination of literature and linguistics.
3) Either of the above options with a maximum of three (3) courses at the 300 level or above in other disciplines counted toward the major. Whichever option a student chooses, he or she is encouraged to enrich the major program by including a variety of courses from related fields or by combining Spanish with related fields such as history, philosophy, sociology, anthropology, art, music, Classics, English, comparative literature, and other foreign languages and literatures. The interdepartmental programs in Latin American Studies and Latino Studies sponsor relevant courses in a variety of areas.

The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

For the concentration in Spanish linguistics, see Department of Linguistics—Spanish.

Study abroad in Spain. Cornell, the University of Michigan, and the University of Pennsylvania cosponsor an academic year in Spain program. Students enrolled in this program spend the first three weeks before the fall semester begins in a residential college located on the campus of the University of Madrid, where they take a course in Spanish language and contemporary society and take advantage of special lectures and field trips in Madrid and Castile. This course carries three credits. In early October the program moves to Seville, where students enroll in as many regular classes at the University of Seville as their language competency and general education permit. Their academic work is supplemented by courses designed explicitly for the program by Seville faculty, as well as a seminar regularly offered by the resident director, who is chosen from the faculty of either Cornell, Michigan or Pennsylvania. The special courses normally include history of art and architecture, Spanish composition and syntax, and modern Spanish history. In Seville students live with selected families in "residencias," or in a few cases in "colegios mayores." Cornell-Michigan-Pennsylvania also maintains a center in Seville, which is used by students for special seminars, tutorials, lectures, and informal gatherings.

Applicants are expected to have at least completed SPANR 204 prior to departure. Students are strongly encouraged to study abroad for the entire year rather than for one semester. Students interested in the study abroad program should consult with the Cornell Abroad office for further information.

Honors. Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty to supervise their work and direct the writing of their honors essays (see Spanish 429–430).

Fees. Depending on the course, a small fee may be charged for film use or for copies of texts for course work.

Language

All language courses are offered by the Department of Romance Studies, and Spanish linguistics courses are offered by the Department of Linguistics.

Note: Students placed in the 200-level courses have the option of taking language and/or literature courses; see listing under SPANL 201 for description of the literature course that may be taken concurrently with SPANR 203–204.

Important information about registration for Spanish classes

The Spanish Program offers a number of elementary and intermediate courses to satisfy the needs of students with a variety of backgrounds; students are urged to register for the appropriate level so as to start the semester in the right class. Students with two or more years in the language are required to take the placement test before taking any Spanish course.

Background	Course
0 Spanish	Spanish 121
less than 2 years	Spanish 121
2 years or more	Placement test score required for any Spanish course
Language Placement Score*	
less than 37 or SAT II below 370	Spanish 121
37–44 or SAT II 370-450	Spanish 112; fall, 122; spring
45–55 SAT II 460-580	Spanish 123
56 or more (Romance Stds), 203, 213 or SAT II 590 and above	Spanish 200, 201

*the placement score can be from an SAT II test, the CPT, or the LPS.

SPANR 112 Elementary Spanish: Review and Continuation
Fall. 4 credits. Prerequisite: LPS score 37–44. M. Rice.
This course is designed for students who have taken some Spanish and who have a placement score of 37–44 or SAT II 370–450. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken Spanish 121 may enroll for this course. As part of the final exam, students take the LPS and, according to their score, may place into Spanish 123 (score below 56) or receive qualification (56 or above), and placement into the 200-level courses.

SPANR 121–122 Elementary Spanish
121, fall and summer; 122, spring. 4 credits each term. Prerequisite: for Spanish 122, Spanish 121. Z. Iguina and staff.
This course is intended for students with no experience in Spanish. (Students who have previously studied 2 or more years of Spanish are not eligible for 121 unless they have an LPS score lower than 37 or SAT II lower than 370.) The course provides a thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information. Evening prelims.

SPANR 123 Continuing Spanish
Fall, spring, or summer. 4 credits. Prerequisite: Spanish 112, Spanish 122, or an LPS score 45–55 or SAT II 460–580. M. K. Redmond and staff.
An all-skills course which requires daily preparation before class and active student participation in class. Includes researching cultural topics of the student's choice, oral presentations, grammar review, audio tapes, video, journal and essay writing, speaking in small groups and authentic readings. Satisfactory completion of Spanish 123 fulfills the qualification portion of the language requirement. After this course, the student may take 201, 203, 213.

SPANR 200 Spanish for English/Spanish Bilinguals (also Latino Studies Program 202)
Fall or spring. 3 credits. Prerequisite: LPS score 56 or higher, SAT II 590 or higher, CASE placement, or permission of instructor. N. Maldonado-Mendez.
A course designed to expand bilingual students' knowledge of Spanish by providing them with ample opportunities to develop and improve each of the basic language skills. Not available to students who have taken Spanish 203 or 213.

SPANR 203 Intermediate Composition and Conversation I
Fall, spring, or summer. 3 credits. Prerequisite: Spanish 123, LPS score 56–64, or SAT II 590–680. Not available to students who have taken Spanish 213. N. Maldonado-Mendez, M. Rice and staff.
Conversational grammar review with special attention to the development of accurate and idiomatic oral expression. Includes readings in contemporary Spanish prose and practice in writing.

SPANR 204 Intermediate Composition and Conversation II
Fall or spring. 3 credits. Prerequisite: Spanish 203, 213, CASE placement, or permission of instructor. This course, or its equivalent, is required for admission to the Cornell Abroad program. E. Dozier and staff.
An advanced-intermediate course designed for students who want to go beyond the basic language requirement, and further broaden their knowledge of the language and related cultures, as well as improve their comprehension and communication skills. This course guides students to take greater command of their own language learning process to optimize their continued progress. Includes a strategic focus on specific problems in listening and reading comprehension, and in accurate writing and speaking.

SPANR 205 Spanish Translation
Summer. 4 credits. Prerequisite: proficiency in Spanish. J. Routier-Pucci.
The objective of the course is to learn to translate from Spanish into English and in so doing, to investigate the various technical, stylistic and cultural difficulties encountered in the translation process.

SPANR 213 Intermediate Spanish for the Medical and Health Professions
Fall or spring. 3 credits. Prerequisite: qualification in Spanish (Spanish 123, LPS score 56–64, or SAT II 590–680) or permission of instructor. Students who have taken Spanish 203 or 200 should speak to the instructor. A. Tió.
Conversational grammar review, with dialogues, debates, compositions, and readings on health-related themes. Special attention is given to relevant cultural differences. Fulfills proficiency requirement.

SPANR 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

SPANR 310 Advanced Conversation and Pronunciation
Spring. 3 credits. Prerequisite: Spanish 204 or equivalent. Z. Iguina.
A conversation course with intensive oral practice obtained through the production of video programs. Study of the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. Weekly pronunciation labs.

SPANR 311 Advanced Composition and Conversation
Fall or spring. 4 credits. Prerequisite: SPANR 204 or 212 or equivalent. M. Stycos and staff.
Advanced language skills, developed through reading, grammar review, and intensive practice in speaking, writing, and translation. Analysis of present-day Spanish usage in a wide variety of oral and written texts.

SPANR 312 Advanced Composition and Conversation
Fall or spring. 4 credits. M. Stycos.
Readings and class discussion will focus on the stylistic analysis of modern texts. Increased emphasis, through weekly essays, on students' development of an effective Spanish prose style.

SPANR 630 Spanish for Reading
Spring. 3 credits. Limited to graduate students. E. Sánchez-Blake.
Designed for those with little or no background in Spanish and little exposure to written Spanish, this course primarily aims to develop skill in reading Spanish. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. The types of texts to be covered will be based on the interests of the students in the course.

SPANR 660 Latino Languages, Ideology and Practice (also Anthropology 660 and Latino Studies Program 660)
Spring. 4 credits. V. Santiago-Irizarry.
For description, see Anthropology. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Literature

SPANL 201 Introduction to Hispanic Literature @
Fall or spring. 3 credits. Prerequisite: qualification in Spanish or permission of instructor. The course is divided into small sections and is conducted mainly in Spanish. (Fulfills both the language proficiency requirement and the humanities distribution requirement. The literature course that normally follows SPANL 201 is either 316 or 318.) J. Piedra and staff.
An intermediate course designed to improve Spanish skills through reading and discussion of contemporary literary works from Spain and Spanish America. Emphasis on the development of fluency in reading and of critical and analytical abilities. The cultural, sociological, and aesthetic implications of texts by authors such as Borges, Cortázar, Fuentes, García Márquez, García Lorca, and Cela are considered.

SPANL 246 Contemporary Narratives by Latina Writers (also LSP 246)
Fall. 3 credits. L. Carrillo.
This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups in the United States including Chicana, Chilean, Cuban, Dominican, and Puerto Rican. We will investigate the parallel development of a Latina perspective on personal, social, and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We will investigate these works as artistic attempts to deal with such issues as culture, language and bilingualism, family, gender, sexuality, and domesticity. We will account for regional distinctions and contributions. Readings will include works by Julia Alvarez, Gloria Anzaldúa, Elena Castedo, Ana Castillo, Denise Chávez, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Nora Glickman, Nicholasa Mohr, Cherríe Moraga, Achy Obejas, Esmeralda Santiago, Ana Lydia Vega, and Helena María Viramontes.

SPANL 301 Hispanic Theater Production
Fall or spring. 1-2 credits. S-U only. D. Castillo.
Students develop a specific dramatic text for full-scale production. The course will involve selection of an appropriate text, close analysis of the literary aspects of the play, and group evaluation of its representational value and effectiveness. All students will be involved in some aspect of production and will write a final paper as a course requirement. Credit will be variable depending upon the student's role in play production: a minimum of 50 hours of work is required for one credit; a maximum of two credits will be awarded for 100 hours or more of work.

SPANL 315 Renaissance Hispanisms: Spain and the Americas #
Spring. 4 credits. Conducted in Spanish. Prerequisite: SPANL 316 or SPANL 318. M. A. Garcés.
In Spain, the cultural revolution known as the Renaissance produced a glittering array of artistic works, which gave rise to the term, Golden Age. There was a "darker side" to the Renaissance, however, which juxtaposed the conquest of America with the establishment of the Inquisition and the expulsion of the Jews and later, of the *Moriscos*. The tale of these relations of exclusion and fascination, of domination and communication with the *other* is recapitulated by the literature of the period. Texts include Columbus, Cabeza de Vaca, *Lazarillo*, Garcilaso de la Vega, San Juan de la Cruz, Cervantes, María de Zayas, Lope de Vega, Calderón, and others.

Note: SPANL 316 and 318 can be taken in any order. Prerequisite: Spanish 201 or 4 years of high school Spanish or permission of instructor.

SPANL 316 Readings in Modern Spanish Literature
Fall or spring. 4 credits. Prerequisite: Spanish 201 or 4 years of high school Spanish or permission of instructor. Taught in Spanish. Fall, J. Kronik or M. Stycos; spring, staff.
Readings and discussion of representative texts from Spain from the romantic period to the present. Bécquer, Galdós, Unamuno, García Lorca, Cela, and others.

SPANL 318 Readings in Spanish-American Literature @
Fall or spring. 4 credits. Fall, J. E. Paz-Soldán or M. A. Garcés; spring, J. Piedra and staff.
Readings and discussion of representative texts of the nineteenth and twentieth centuries from Spanish America: Darío, Borges, Valenzuela, Cortázar, García Márquez, and others.

Note: The prerequisite for the following courses, unless otherwise indicated, is SPANL 315, 316, or 318 or permission of instructor.

SPANL 320 Perspectives on Latin America @
Spring. 3 credits. Conducted in English. D. Castillo.
This interdisciplinary, co-taught course will be offered every spring through the Latin American Studies Program. It is highly recommended for Latin American Studies Concentrators. Topics will vary by semester, but readings will always focus on current research in various disciplines and regions of Latin America. The range of issues addressed will include the economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instuctors and guest lecturers will facilitate student discussions. Students are required to participate in all class discussions and write one research paper in their chosen focus area.

SPANL 339 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334 and SPANL 699) @ #
Fall. 3 credits. S-U option. This course can also be used to fulfill the requirements of the Medieval Studies Program. Offered every other year. R. Brann.
For description, see NES 339.

SPANL 345 Contemporary Spanish-American Novel @
Spring. 4 credits. Prerequisite: SPANL 317 or equivalent. E. Paz-Soldán.
Reading and discussion of selected works of narrative fiction by today's leading authors: Cabrera Infante, Cortázar, Donoso, Fuentes, García Márquez, Puig, Vargas Llosa, and others. Two abiding concerns will be the way in which history interacts with aesthetic form and the role of the bicultural reader in actualizing the text's potential.

SPANL 348 Cuban Literature @
Fall. 4 credits. J. Piedra.
A panoramic view of Cuban literature and culture from its "national origins" in the seventeenth-century to the present. One fourth of the course will be devoted to reading texts frm before the twentieth-century, particulary anti-slavery and travel literature of the nineteenth-century. Beside early and middle twentieth-century masterpieces we will read contemporary texts written within and outside of the Cuban Revolution. The course ends with Cuban-American literature written in English, Spanish, and Spanglish.

SPANL 375 Fictions of the Picaresque in Spain and America (also SPANL 475)
Spring. 4 credits. M. A. Garcés.
While one critic defines the picaresque novel as the autobiography of "an unscrupulous wretch," narrated as a sequence of episodes, others have described it as a drama of consciousness. A fragmentary confession that emphasizes the traumas and vicissitudes that shaped a particular life since its origins, including dreams and fantasies which often question sexual identity, the picaresque bears an uncanny resemblance to the discourse of the analysand in psychoanalysis. We will explore the relationships of the picaresque with such genres as psychoanalysis, autobiography, travel literature, romance, soldierly adventure, and semi-documentary fictions, like some chronicles of the conquest. Our trans-Atlantic voyage starts in Europe with *Lazarillo de Tormes* and works by Alemán, Cervantes, Delicado, and Quevedo, ending in the New World with with the infamous *Vida y sucesos de la monja Alférez*, attributed to the transvestite nun-soldier, Catalina de Erasau, and *Conquista y descubrimiento del Nuevo Reino de Granada*, known as *El Carnero*, by Rodríguez Freyle. Readings will be supplemented with an ample range of theoretical and critical perspectives.

SPANL 397 Reality and Fiction in Modern Spanish Narrative
Fall. 4 credits. Conducted in Spanish.
J. W. Kronik.
This course will examine the various ways in which selected novelists from the nineteenth-century realist period (Galdós, Clarín) and across the twentieth century (Baroja, Carmen de Burgos, Cela) to the present day (Rosa Montero, Lucía Etxebarría) have defined and coped with the task of representing in their imaginative writings the social and political reality they lived and observed. Consideration will be given to the tensions between reality and its fictional figuration and the technical processes of narrative.

SPANL 399 Spanish Film
Fall. 4 credits. Conducted in Spanish.
Screenings to be announced. J. R. Resina.
Examines the evolution of Spanish cinema since Franco's death in 1975, both from a historical and a cinematic perspective. The focus will be on documentary, fictional and allegorical reconstructions of the past, and on the images of the new democratic society which illustrates a postmodern aesthetic. Selected films include works by directors who started their careers under the dictatorship (Saura, Erice, Borau) and by members of the younger generation, such as Almodóvar.

SPANL 419–420 Special Topics in Hispanic Literature
419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of specific topics. For undergraduates interested in special problems not covered in courses.

SPANL 429–430 Honors Work in Hispanic Literature
429, fall; 430, spring. 8 credits. Year-long course, R grade fall semester, letter grade spring semester. Limited to seniors. Prerequisite: permission of instructor. M. Garcés.

SPANL 475 Fictions of the Picaresque in Spain and America (also SPANL 375)
Spring. 4 credits. M. A. Garcés.
For description, see Spanish Literature 375.

SPANL 479 Colonial Spanish American Literature: Voices of the Colonized
Spring. 4 credits. Conducted in Spanish.
J. Piedra.
The course will explore the birth of dissent within Spanish colonial literature as a semi-official, alternative compendium of other vehicles of expression: history and philosophy, grammar and religion, "anthropology" and "ethnology." The emphasis is on the dissenting voices of native Americans, Blacks and women, as well as other "minorities" as they converge in the emergence of a "Creole" conscience. The textual selections or complete works to be considered emphasize the aspects of colonial texts that attempted to side with the "colonized" or that were indeed written by them. The list includes the following authors: Columbus, Pane, Las Casas, Inca Garcilaso, Guaman Poma, Silvestre de Balboa, Madre Castillo, Motolinia, Concolorcorvo, Mateo Alemán, Sor Juana, and Lizardi.

SPANL 487 Borges
Fall. 4 credits. E. Paz-Soldán.
This course examines the life and work of Jorge Luis Borges, one of the indisputable masters of twentieth century literature. We will study his poems, essays and short stories within the modernity/postmodernity debate, and in multiple contexts: local, Latin American, and global. The course will also read other writers of the River Plate region, those who influenced Borges (Macedonio, Fernández), those influenced by him (Cortázar), and those who resisted his enormous influence (Onetti), trying to establish a genealogy of literary affiliations and ruptures. There will be a particular interest in studying film adaptations of Borges' stories.

SPANL 492 Latin American Women Writers (also WOMNS 481 and COM L 482) @
Spring. 4 credits. Conducted in English.
D. Castillo.
This course will provide a sampler of novels and short stories by and about Latin American women. We will look at the question of self-construction and issues such as the social and political concerns involved in a specifically Latin American feminine identity. All works will be read in translation. (Romance Studies students should read originals of the works from the Spanish.) Authors may include writers such as Luisa Valenzuela (Argentina) and Rigoberta Menchú (Guatemala), Helena Parente Cunha and Clarice Lispector (Brazil), Helena Maria Viramontes (U.S.A.), and Simone Schwartz-Bart (Guadaloupe).

SPANL 497 Modern Spanish Poetry and Poetics
Fall. 4 credits. Conducted in Spanish.
C. M. Arroyo.
This course will focus on the development of modern Spanish poetry from Bécquer to the present. Readings will include texts by Bécquer, Machado, Lorca, Jiménez, Guillén, and others as well as poetic and theoretical works designed to help us situate Spanish poetry with respect to such contemporary European aesthetics as romanticism, symbolism, and postsymbolism.

SPANL 639–640 Special Topics in Hispanic Literature
639, fall; 640, spring. 2–4 credits each term. Staff.

SPANL 660 Tales of Love, Trauma and Creation in Cervantes
Fall. 4 credits. M. A. Garcés.
From his first to his last writings, Cervantes' fiction turns around that void represented by the traumatic experience of his Algerian captivity. Linked to explorations in memory, captivity in Cervantes is also paradoxically associated with fantastic—and often perverse—tales of love, as if approaching the site of trauma would elicit an explosion of fantasy. Our seminar will undertake a panoramic survey of Cervantes' works using a wide range of theoretical perspectives. The writer's interest in the problem of fantasy and reality, his exploration of madness in relation to meaning, makes him a cultural ancestor of Freud. More important, the act of bearing witness to a traumatic event that simultaneously functions as a fountain of creation, pressures the relationship between trauma and fantasy, traumatic knowledge and literary studies. Selections from *La Galatea*, *Don Quijote*, the *Novelas ejemplares*, the plays *El Trato de Argel* and *Los baños de Argel*, and the *Persiles* will be approached through theoretical readings from texts by Freud, Lacan, Kristeva, and others.

SPANL 699 Islamic Spain: Culture and Society (also SPANL 339, COM L 334/639, JWST 339 and NES 339/639) #
Fall. 4 credits. R. Brann.
For description, see Spanish Literature 339.

RUSSIAN

P. Carden, director of undergraduate studies [literature], 235 Goldwin Smith Hall, 255–8350;
E. W. Browne, G. Gibian, L. Paperno,
S. Paperno, N. Pollak, S. Senderovich,
G. Shapiro, V. Tsimberov

The Russian Major

Russian majors study Russian language, literature, and linguistics, and emphasize their specific interests. It is desirable, although not necessary, for prospective majors to complete Russian 121–122, 201–202, and 203–204 as freshmen and sophomores, since these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of Russian 122 or the equivalent. Students who elect to major in Russian should consult Professor Carden as soon as possible. For a major in Russian, students will be required to complete (1) Russian 301–302 or 303–304 or the equivalent, and (2) 18 credits from 300- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

Certain courses may, with the permission of the instructor, be taken for one additional hour's credit. Such courses will involve a one-hour section each week with work in the Russian language. These courses count one hour each of credit toward the 12 courses of Russian literature in the original language required for the major.

Study Abroad

Cornell is an affiliated institution with the Council on International Educational Exchange program for Russian language study at St. Petersburg State University. Cornell students also frequently attend the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from W. Browne, in the Department of Linguistics.

Honors. Students taking honors in Russian undertake individual reading and research and write an honors essay.

Fees. Depending on the course, a small fee may be charged for photocopied texts for course work.

Freshman writing seminar requirement. The following courses will satisfy the freshman writing seminar requirement: Russian 103, 104 and 105.

Russian and East European Studies Major

See "Special Programs and Interdisciplinary Studies," which follows the department listings.

Russian Language

RUSSA 103–104 Conversation Practice
103, fall; 104, spring. 2 credits each term. Must enroll in one section of 103 and one section of 121, in the fall; and one section of 104 and one section of 122 in the spring. L. Paperno.

RUSSA 121–122 Elementary Russian
121, fall or summer; 122, spring or summer. 4 credits each term. May be taken alone and qualification will be achieved with satisfactory completion of 121–122–123; or may be taken concurrently with 103–104 and qualification will be achieved at completion of 122–104. Includes a guest lecture by Prof. Peter Holoquist. S. Paperno, V. Tsimberov and staff.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing. Course materials include clips from original Russian films and TV programs.

RUSSA 123 Continuing Russian
Fall. 4 credits. Limited to students who have previously studied Russian or been placed by department. Satisfactory completion of Russian 123 fulfills the qualification portion of the language requirements. Includes a guest lecture by Prof. George Gibian. V. Tsimberov, S. Paperno, L. Paperno.
A course designed to prepare students for study at the 200 level. Passing this course is equivalent to qualification. Authentic Russian materials are used: TV, books, etc.

RUSSA 203–204 Intermediate Composition and Conversation
203, fall or summer; 204, spring or summer. 3 credits each term. Prerequisites: for Russian 203, qualification in Russian (Russian 123 or placement by department); for Russian 204, Russian 203 or equivalent. Includes a guest lecture by Prof. Gavriel Shapiro. L. Paperno, S. Paperno, V. Tsimberov.
Guided conversation, composition, reading, pronunciation, and grammar review, emphasizing the development of accurate and idiomatic expression in the language. Course materials include video clips from an original Russian feature film.

[RUSSA 205–206 Reading Russian Press
205, fall; 206, spring. 2 credits each term. Prerequisite: qualification in Russian (Russian 123 or placement by department). Both semesters must be taken in order to satisfy the proficiency level for the language requirement. This course cannot be used to satisfy the humanities requirement. Not offered 1999–2000. Staff.
Reading unabridged articles on a variety of topics from current Russian periodicals and web pages.

Note: Students placed in the 200-level courses also have the option of taking courses in introductory literature; see separate listings under Russian 201 and 202 for descriptions of these courses, any of which may be taken concurrently with the 203–204 and 205–206 language courses described above.]

RUSSA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs including native speakers of Russian. Times will be arranged with instructor.

RUSSA 303–304 Advanced Composition and Conversation
303, fall; 304, spring. 4 credits each term. Prerequisites: for Russian 303, Russian 204 or equivalent; for Russian 304, Russian 303 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.
Writing, reading, and conversation: viewing and reading authentic language materials; current Russian films (feature and documentary), newspapers, TV programs, and other materials are used.

[RUSSA 305–306 Directed Individual Study
305, fall; 306, spring. 2 credits each term. Prerequisite: placement by the department. Not Offered 1999–2000. Staff.
This course is intended for students with special needs (e.g., children of Russian immigrants who speak Russian at home) that cannot be met by any other Russian course.]

RUSSA 309–310 Advanced Reading
309, fall; 310, spring. 4 credits each term. Prerequisites: for Russian 309, Russian 204; for Russian 310, Russian 309 or equivalent. L. Paperno.
The purpose of the course is to teach advanced reading skills. The weekly reading assignment is 20–40 pages of unabridged Russian prose (50–60 pages for native speakers), mostly (non-fiction) of the 20th century. The discussion of the reading is conducted entirely in Russian and is centered around the content of the assigned selection.

[RUSSA 401–402 History of the Russian Language (also Linguistics 417–418)
401, spring; [402.] 4 credits each term. Prerequisites: for Russian 401, permission of instructor; for Russian 402, Russian 401 or equivalent. Offered alternate years. Not offered 1999–2000. W. Browne.
Phonological, morphological, and syntactic developments from Old Russian to modern Russian.]

[RUSSA 403–404 Linguistic Structure of Russian (also Linguistics 443–444)
403, fall; 404, spring. 4 credits each term. Prerequisites: for Russian 403, Linguistics 101 and permission of instructor, for Russian 404, Russian 403 or equivalent. Offered alternate years. Not offered 1999–2000. W. Browne.
A synchronic analysis of the structure of modern Russian. Russian 403 deals primarily with morphology and its relation to syntax and 404 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.]

RUSSA 413–414 Advanced Conversation and Stylistics
413, fall; 414, spring. 2 credits each term. Prerequisites: for Russian 413, Russian 303–304 or the equivalent, for Russian 414, Russian 413 or equivalent. V. Tsimberov.
Discussion of authentic unabridged Russian texts and films (feature or documentary) in a variety of nonliterary styles and genres.

RUSSA 601 Old Church Slavic
Fall. 4 credits. This course is prerequisite to Russian 602. Offered alternate years. W. Browne.
Grammar and reading of basic texts.

RUSSA 602 Old Russian Texts
Spring. 4 credits. Prerequisite: Russian 601. Offered alternate years. W. Browne.
Grammatical analysis and close reading of Old Russian texts.

RUSSA 633–634 Russian for Russian Specialists
633, fall; 634, spring. 2 credits each term. Prerequisite: four years of college Russian. For graduate and advanced undergraduate students. S. Paperno.
The course is designed for students who specialize in an area of Russian studies requiring fine active control of the language. Fine points of syntax, usage, and style are discussed.

[RUSSA 651–652 Comparative Slavic Linguistics (also Linguistics 671–672)
651, fall; 652, spring. 4 credits each term. Prerequisites: for Russian 651, Russian 601 taken previously or simultaneously or permission of instructor, for Russian 652, Russian 651 or permission of instructor. Offered alternate years. Not offered 1999–2000. W. Browne.
Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.]

[RUSSA 700 Seminar in Slavic Linguistics
Offered according to demand. Variable credit. Not offered 1999–2000. Staff.
Topics chosen according to the interests of staff and students.]

Russian Literature

There are a variety of courses: some with readings in English translation, others in the original Russian, or both. The connection between Russian history, society, and literature is particularly close, so instruction and discussion in class often include a variety of topics, such as culture and intellectual history, as well as literature. Several courses are interdisciplinary, cosponsored with the departments of History, Economics, Government, Comparative Literature, etc.

RUSSL 103 Freshman Writing Seminar: Classics of Russian Thought and Literature
Fall or spring. 3 credits. D. Galloway.
Russian society has always seen its literature as having a mission important to the development of the nation. In this course we will examine Russian literature as it participates in the debate, whither Russia? We will look in particular at the conflict between the Slavophiles, those who thought Russia had its own unique destiny, and the Westernizers, those who thought Russia should look to the West as a model for its development. We will be reading such Russian authors as Turgenev, Dostoevsky, Herzen, and Solzhenitsyn in English translation. The course will examine the rhetorical means each author uses to make his argument. All reading is in English translation.

RUSSL 104 Freshman Writing Seminar: Nineteenth-Century Russian Literary Masterpieces
Fall. 3 credits. P. Carden.
This course will introduce students to a broad selection of the major short works of the Russian literary tradition. Our emphasis will be on what makes each work interesting as writing, what themes have been particularly interesting to Russians, and how we recognize the distinctive voice of each of the writers we are studying. Among the authors read are Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, and Chekhov. All reading is in English translation.

RUSSL 105 Freshman Writing Seminar: Twentieth-Century Russian Literary Masterpieces
Fall or spring. 3 credits. D. Galloway.
We will read and write about a selection of works from the major Russian literary movements of the twentieth century. The course will concentrate in part on important literary responses to the first Russian Revolution and the society it created. Authors to be read include Zamyatin, Olesha, Zoshchenko and Vladimov. Readings in English translation.

RUSSL 201–202 Readings in Russian Literature
Fall or spring. 3 credits. Prerequisites: qualification in Russian. Open to freshmen. Fall: 201, N. Pollak; spring: 202, G. Shapiro.
These courses are designed as the initial courses students take after qualification in Russian and are conducted mainly in Russian. Considerable guidance is provided, however, and there is no presumption of fluency. The goal of the course is to introduce students to original Russian literature, to sample differing literary styles, and to accomplish both with minimal recourse to English in class. Several short papers in Russian and English will be assigned. Readings from nineteenth- and twentieth-century masters of prose and verse such as Pushkin, Lermontov, Tiutchev, Tolstoy, Chekhov, Babel, and Zoshchenko.

RUSSL 207 Themes from Russian Culture
Spring. 3 credits. G. Shapiro.
This course is based on lectures, discussions, and audio-visual presentations (slides, tapes, films). Included within its scope are various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought from its very beginning through the eighteenth century. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country which plays a major role in the world today. Russian culture will be presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.

[RUSSL 208 Themes from Russian Culture II
Spring. 3 credits. Not offered 1999–2000. G. Shapiro.
This course is based on lectures, discussions, and audiovisual presentations (slides, tapes, films). Included are various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought over the last two hundred years. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country that plays a major role in the world today. Russian culture will be presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.]

RUSSL 279 The Russian Connection, 1830–1867 (also COM L 279)
Fall. 3 credits. P. Carden.
As Russian prose began to find its voice, it responded with enthusiasm to the European prose tradition. One line of development in the Russian novel began with Rousseau's division between the needs of individual growth, nourished by solitude and introspection, and the demands of society. Tolstoy's *War and Peace* can be read as a summary and a testing of the novelistic tradition that grew out of the work of Rousseau, in both European and Russian literature. We will follow the line that leads to Tolstoy's multifaceted inquity, beginning with two short novels that set the tone for the introspective novel in the two traditions, Constant's *Adolphe* and Lermontov's *Hero of Our Time*. Looking at relevant excerpts from a range of European prose writers Rosseau, Musset, Goethe, Stendhal, Thackeray among others, we will think about the possibilities and limitations of the introspective novel as a form, especially as manifested in one of the monuments of the genre, *War and Peace*.

RUSSL 280 The Russian Connection, 1870–1960 (also COM L 280)
Spring. 3 credits. P. Carden.
The European novel of introspection developed a second line of inquiry, in some respects counter to the tradition that grew out of the writings of Rousseau. Diderot's "Rameau's Nephew" may be taken as emblematic of a novel that goes beyond the search for self-understanding to focus on alientation, resentment and rebillion. Dostoevsky was the inheritor of this line in the European prose tradition. His works, in particular *Notes from Underground* and *The Idiot*, will be the focal point of our discussion. We will follow up the tradition as Dostoevsky's influence returns the line to Europe in the works of writers like Camus and Sarraute.

RUSSL 311 Modern European Literature and Culture (also COMP L 311, ROM ST 311)
Fall. 4 credits. Core course for European Studies concentration; no prerequisites. G. Gibian.
For course description, please see Comparative Literature 311.

[RUSSL 330 Understanding Russia Today (also Govt 357)
Fall. 4 credits. Not offered 1999–2000. G. Gibian and guest speakers.
An interdisciplinary inquiry into Russian society and its history, designed as an introduction for students not majoring in Russian studies. This course also acts as a synthesis for those who are studying various aspects of Russia in separate disciplines, and is organized into a variety of approaches to Russian language, culture, history, and literature. It aims to teach both basic information and different ways of interpreting that information. Topics will include: the land and the people; doing business in Russia; literary traditions and revolts; Russian national identity; nationalism; persistent cultural traits; religion, history; politics and government; relations with other nations, inside Russia and outside; Jews and Russians; folklore; social matters, customs, values; position of women; education; music, architecture; agriculture and industry; Russian maximalism; regionalism; the ecology; film, TV, theatre, journalism.]

[RUSSL 331 Introduction to Russian Poetry #

Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. Not offered 1999–2000. S. Senderovich.

A survey of Russian poetry with primary emphasis on the analysis of individual poems by major poets.]

RUSSL 332 Russian Drama and Theatre (also Thetr 322, COM L 322)

Spring. 4 credits. S. Senderovich.

Selected topics. Discussion of a number of the most representative Russian plays of the nineteenth and twentieth centuries in chronological order. Introductions to the historical period, cultural atmosphere, literary trends, and crucial moments in the history of the Russian theater will be especially emphasized. Among the works we will be studying will be Gogol's *Inspector General,* Ostrovsky's *The Storm*, and Chekhov's *The Cherry Orchard.* All readings will be in English translation. Additional assignments in critical literature will be made for graduate students.

[RUSSL 333 Twentieth-Century Russian Poetry

Spring. 4 credits. Not offered 1999–2000. N. Pollak.

Close readings of lyrics by major twentieth-century poets. All reading is in Russian. Geared towards undergraduates.]

[RUSSL 334 The Russian Short Story

Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. Not offered 1999–2000. N. Pollak.

A survey of two centuries of Russian story telling. Emphasis on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.]

RUSSL 335 Gogol

Fall. 4 credits. G. Shapiro.

Selected works of Gogol read closely and viewed in relation to his life and to the literature of his time. Readings in English translation.

RUSSL 337 Films of Russian Literary Masterpieces (also Comparative Literature 338)

Fall. 4 credits. S. Senderovich.

War and Peace and *Dr. Zhivago* are well-known American films relating to Russian literature of the 19th and 20th centuries. Russian literature has been a matter of great interest both in the West and East. A clear cut practice of cultural translation is presented by film versions of Russian literary masterpieces. We will perform a comparative analysis of these films, which will provide an excellent opportunity for discussing problems of translation between various media and of cultural translation.

RUSSL 350 Education and the Philosophical Fantasies (also COM L 350)

Spring. 4 credits. P. Carden.

A major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human context is understood as a school in which we form ourselves. This all-encompassing vision of education has been embodied in the works of the great philosopher-fantasists who use the forms of fiction to explore fundamental issues of education. In this course we will examine several key philosophical fantasies, among them Plato's *Republic*, Rousseau's *Emile*, and Tolstoy's *War and Peace.* Our aim will be to understand how the discourse on education became a central part of our Western tradition.

RUSSL 367 The Russian Novel (also Comparative Literature 367) #

Fall. 4 credits. Also open to graduate students. Special discussion section for students who read Russian. G. Gibian.

Sentimentalism, romanticism, realism, modernism. Novels and short stories by Gogol, Turgenev, Tolstoy, Dostoevsky, Chekhov, and others. Readings in English translation.

[RUSSL 368 Russian Literature from 1917 to the Present

Spring. 4 credits. Also open to graduate students. No prerequisites. There will be a special section for students who read Russian. Not offered 1999–2000. G. Gibian.

In translation. A survey of Russian literature focusing on the most important writers. Among the themes to be explored will be Russian Modernism, social command, socialist realism, the Thaw, dissident and emigre literature, post-modernism. Writers include Blok, Mayakovsky, Babel, Olesha, Platonov, Pasternak, Nabokov, Solzhenitsyn, the two Erofeevs, and contemporary women poets and short story writers.]

[RUSSL 369 Dostoevsky #

Fall. 4 credits. Not offered 1999–2000.]

[RUSSL 373 Chekhov in the Context of Contemporary European Literature and Art (also Comparative Literature 375) #

Fall. 4 credits. Not offered 1999–2000. S. Senderovich.

Reading and discussion of Anton Chekhov's short stories in the context of the European art of the short story and painting of that era. The course is designed for nonspecialists as well as literature majors. All reading is in English translation.]

[RUSSL 377 Baltic Literature (also German Studies 377)

Spring. 4 credits. In English translation. Not offered 1999–2000. I. Ezergailis.

For course description, please see German Studies 377.]

[RUSSL 384 Dialogue in/as Text (also Comparative Literature 384)

Spring. 4 credits. Not offered 1999–2000. P. Carden.

An examination of the principle of dialogue and dialogism as it appears in fictional discourse. Using the theories of Mikhail Bakhtin as a point of departure, we will examine the use of dialogue as a form of discourse beginning with Plato's *Phaedrus.* Dostoevsky's novels *Notes from Underground, The Possessed,* and *The Brothers Karamazov* will be discussed as dialogic, or polyphonic forms of discourse. Finally, we will discuss selected works of Gide, Sartre and Camus, who acknowledged their debt to Dostoevsky, to see if they are indeed polyphonic in structure.]

RUSSL 385 Reading Nabokov (also Comparative Literature 385 and English 379)

Fall. 4 credits. G. Shapiro.

This course offers an exciting trip to the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer, Nabokov, at the outbreak of WWII, came to the United States where he reestablished himself, this time as an American writer of world renown. In our analysis of the Nabokovian artistic universe, we shall focus on his two splendid achievements as a Russian writer, *The Defense* (1930) and *Despair* (1934) (both in their English form), and then examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell—*Lolita* (1955) and *Pnin* (1957).

[RUSSL 389 Contemporary Literature in Central and East Europe (also Comparative Literature 389)

Fall. 4 credits. Not offered 1999–2000. G. Gibian.

The course this year will study developments in literature (and to some extent in other areas of culture) in Hungary, Poland, Slovakia, and the Czech Republic in the most recent periods. We shall focus on novels and short stories, but some consideration will also be given to drama and poetry. No knowledge of Eastern European languages is required. The reading will be done in English translation.]

RUSSL 393 Honors Essay Tutorial

Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year. Credit for the first semester will be awarded upon completion of second semester. For information, please see Director of Undergraduate Studies.

[RUSSL 404 History and Nationality in Russia and Eastern Europe (also S Hum 404) #

Fall. 3 credits. Not offered 1999–2000. G. Gibian.

Ethnicity and nationality appear as the main forces behind the recent dramatic changes in Eastern Europe. The seminar addresses these issues in Russia, Czech Republic, and elsewhere, mainly from a literary perspective and also in the context of rising ethnic and national consciousness throughout the world.]

[RUSSL 409 Russian Stylistics

Spring. 4 credits. Also open to graduate students. Prerequisite: three years of Russian. Not offered 1999–2000. S. Senderovich.

A few steps beyond normative grammar. Introduction to the subtleties of idiomatic Russian on the levels of morphology, syntax, vocabulary, and phraseology. Introduction to the genres of live colloquial and written language. Development of writing skills through short assignments and their analyses. First notions of literary stylistics and their practical application.]

RUSSL 415 Post-Symbolist Russian Poetry

Spring. 4 credits. Prerequisite: permission of instructor. N. Pollak.

We will examine works by three poets in the first quarter of this century: Innokentij Annenskij, the Symbolist whom the Acmeists considered their mentor; Osip Mandelstam, a founding Acmeist; and Boris Pasternak,

associated, at least for a time, with the Futurists. Through close readings of their verse, and also critical prose and manifestoes, we will attempt to determine some of the general features that link poets of such diverse orientations in the years following the crisis of Symbolism. We will also outline the features that distinguish them as representative of their respective movements.

[RUSSL 425 Vladimir Nabokov vs. Jean-Paul Sartre (also COMP L 445)
Spring. 4 credits. Not offered 1999–2000. S. Senderovich.
Jean-Paul Sartre reviewed Nabokov's *Despair* in 1938. Ten years later Nabokov returned the favor in his review of the English translation of Sartre's *La Nausée*. The apparent tension between the two celebrated men of European letters of the twentieth century allows us to look at the works of both through the eyes of the other, to go into the problems of Existentialist philosophy, into Nabokov's brand of it, and into responses to Sartre in Nabokov's works. The latter gives an excellent yet unexplored approach to the poetic world of Vladimir Nabokov. Nabokov's major response to Sartre occurred in the novel *Pnin* written in Ithaca and largely about Cornell.]

[RUSSL 427 Russian Formalism (also Comparative Literature 427)
Fall. 4 credits. Not offered 1999–2000. N. Pollak.
This is a course on Russian Formalism, a trend in literary interpretation that flourished in the 1910s and the first part of the 1920s. We will read the writings of such scholars as Tynianov, Eikhenbaum, Shklovsky, and Jakobson, as well as the works they studied. The course provides a historical examination of a school that gave rise to some of the most important movements in twentieth-century Western criticism—and in other disciplines, such as linguistics and anthropology. The course also provides both a look at classics of Russian prose and an approach to literature that has something to offer readers today. No knowledge of Russian is required.]

[RUSSL 430 Practice in Translation
Spring. 4 credits. Prerequisites: proficiency in Russian or approval of instructors. Not offered 1999–2000. W. Browne and S. Senderovich.
A practical workshop in translation: documents, scholarly papers, literary works (prose and poetry). Translation mostly from Russian to English, partly from English to Russian. Attention to problems and development of skills.]

[RUSSL 431 Contemporary Russian Prose
Spring. 4 credits. Prerequisites: Russian 301–302 or 303–304, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. Graduate students may audit the course. Not offered 1999–2000. Staff.
This course is designed to acquaint students with the way Russian prose has developed during the past forty years. Although the emphasis will be on comprehension of the text, we will also discuss literary structure, modern literary history, social and political problems, and the ways in which life in Russia is reflected in its literature. Authors to be read include Viktor Nekrasov, Yuri Kazakov, Alexander Solzhenitsyn, Varlam Shalamov, Abram Tertz (Andrei Sinyavsky), Vasili Axyonov, and Tatyana Tolstaya. This course is specifically intended for third- and fourth-year Russian majors.]

RUSSL 432 Pushkin #
Fall. 4 credits. Prerequisites: Russian 202 or equivalent, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. S. Senderovich.
Reading in the original language and discussion of selected works by Pushkin: lyrics, narrative poems, and *Eugene Onegin*.

[RUSSL 441 Bakhtin as Reader (also RUSSL 641, COMPL 641)
Spring. 4 credits. Open to undergraduates with permission of instructor. Not offered 1999–2000. P. Carden.
The course will investigate the literary and cultural theories of Mikhail Bakhtin, focusing in particular on his interpretations of literary texts. We will read a representative selection of works by Bakhtin covering the chronological development of his ideas. Each member of the class will select one or more of the literary texts commented on by Bakhtin as an occasion for independent work. A reading knowledge of Russian is not required, although Russian readers may have alternate assignments in the language.]

[RUSSL 445 Batiushkov and Pasternak
Fall. 4 credits. Prerequisites: at least one 300-level course in Russian literature in the original, or permission of the instructor. Not offered 1999–2000. N. Pollak.
A study of the works of Konstantin Batiushkov (b. 1787) and Boris Pasternak (b. 1890), two poets who have been described as innovators in Russian poetic language. We will examine the poetry (and prose) of these poets and some of their contemporaries, with a view to exploring their parallel roles in two ages of poetry a century apart.]

[RUSSL 460 Short Works of Tolstoy and Dostoevsky
Spring. 4 credits. Not offered 1999–2000. G. Gibian.
Readings in Russian and in translation. Open to graduate students.]

RUSSL 491 Reading Course: Russian Literature in the Original Language
Fall or spring. 1 credit each term. Prerequisite: permission of instructor. Staff.
This course is to be taken in conjunction with any Russian literature course in English translation. Students will receive one credit for reading and discussing works in Russian in addition to their normal course work.

RUSSL 492 Supervised Reading in Russian Literature
Fall or spring. 1–4 credits each term. Prerequisite: permission of instructor. Staff.

[RUSSL 499 The Avant-Garde in Russian Literature and the Arts
Spring. 4 credits. Open to any student who has completed a second-year course in Russian, or who has equivalent reading skills in Russian. May be used in satisfaction of the 12 hours of reading required for the Russian major. Not offered 1999–2000. P. Carden.
The first decades of the twentieth century was perhaps the richest period ever in Russian literature and the arts. It begins with the brilliant experimentation in poetry and prose of Andrei Bely, Blok, Remizov and others. It continues with the breakthroughs in painting and sculpture of Malevich, Goncharova, Tatlin, etc. In the second decade the rambunctious Futurists take over in literature and establish a compact with theater and the visual arts in which all the art forms break down the barriers to produce a new kind of art. During this period Russian artists in every medium were on the cutting edge of the European art scene. After the Revolution Russian artists and writers of the avant-garde continued their dominance for a time, now including the developing medium of film.
In this course we will read representative Russian texts by the major authors of the period and we will also investigate developments in the theater, the visual arts and film.]

Graduate Seminars

[RUSSL 603 Graduate Seminar: Neglected Masterpieces of Short Russian Prose
Spring. 4 credits. Not offered 1999–2000. G. Gibian.
Nineteenth- and twentieth-century works chosen according to the needs of the students enrolled. Stress on skills useful in teaching Russian literature.]

RUSSL 611 Supervised Reading and Research
Fall or spring. 2–4 credits. Prerequisite: permission of the department. Staff.

[RUSSL 617–618 Russian Stylistics I and II
Not offered 1999–2000.]

[RUSSL 619 Seventeenth-Century Russian Literature
Fall. 4 credits. Not offered 1999–2000. G. Shapiro.
Seventeenth-century Russian literature is often studied together with Medieval literature. Is such an arrangement justified, or does seventeenth-century literature have its own problematic that makes it worth studying separately? In scholarship the seventeenth century is referred to as the Age of Baroque. Did Muscovite Russia experience its own Baroque, and, if so, what are its unique features? These and other important issues will be addressed in the seminar. In the course of the seminar a variety of concepts, genres, and themes characteristic for the epoch will be discussed. We will read the works of such authors as Simeon Polotsky, Silvester Medvedev, Karion Istomin, and the archpriest Avvakum.]

[RUSSL 620 Twentieth-Century Russian Poetry
Spring. 4 credits. Open to advanced undergraduates with permission of instructor. Not offered 1999–2000. N. Pollak.
An in-depth study of the writings of selected twentieth-century poets. Authors may include Blok, Mandelstam, Pasternak, Tsvetayeva, and Khlebnikov.]

[RUSSL 621 Old Russian Literature
Spring. 4 credits. Not offered 1999–2000. S. Senderovich.
A survey.]

[RUSSL 622 Eighteenth-Century Literature
Spring. 4 credits. Not offered 1999–2000. S. Senderovich.
Introduction to the first century of modern Russian literature. Cultural identity of the age: Baroque, Neo-Classicism, Enlightenment, Sentimentalism. Reading of representative texts of the major writers of the century: Trediakovsky, Lomonosov, Sumarokov, Novikov, Karamzin, etc. Main connections with nineteenth-century literature: roots, evolution, intertextuality.]

[RUSSL 624 Russian Romanticism
Spring. 4 credits. Taught in Russian. Not offered 1999–2000. S. Senderovich.
A survey of concepts, themes, genres, and main individual contributions in Russian literature of the Age of Romanticism. The Age of Romanticism encompasses the first four decades of the nineteenth century. Zhukovsky, Batiushkov, Pushkin, Baratynsky, Gogol, and Lermontov are the major representatives of this style and the most important period of Russian literature. The emphasis is on poetry, its historical and theoretical problems. It was, above all, the golden age of Russian poetry, which prepared and deeply influenced the following age of great Russian prose. Turgenev, Tolstoy, Dostoevsky, and Chekhov are full of allusions to the texts of the golden age and cannot be properly understood without it.]

[RUSSL 625 Russian Realism
Fall. 4 credits. Not offered 1999–2000. P. Carden.
A study of the development of psychological realism in Russian prose of the nineteenth century, with some attention to the poetic tradition. In addition to reading representative works, we will pay attention to the historical background of the period. We will approach the works through the critical writings of several important theorists, in particular those of Lydia Ginzburg.]

[RUSSL 626 The Tradition of Russian Poetry
Spring. 4 credits. Not offered 1999–2000. N. Pollak.
This course will examine a selection of poems that have been particularly important for the tradition of Russian literature in the nineteenth and twentieth centuries. Our focus will include critical and literary responses to these poems as well as close readings.]

[RUSSL 627 Russian Formalism (also Comparative Literature 627)
Spring. 4 credits. Not offered 1999–2000. N. Pollak.
See RussL 427 for course description.]

[RUSSL 630 Gogol
Fall. 4 credits. Taught in Russian. Not offered 1999–2000. G. Shapiro.
Gogol's artistic career from his "Ukrainian" cycles to *Dead Souls*. We will examine representative works from each of the major divisions of Gogol's early work, in particular from his cycles *Evenings on a Farm near Dikanka* and *Mirgorod*, and will trace the writer's development toward his magnum opus, *Dead Souls*. Although some of the readings will be done in English to enable the class to cover a significant amount of material, the class work will be focused on close analysis of the Russian text.]

[RUSSL 641 Bakhtin as Reader (also COMP L 641)
Spring. 4 credits. Not offered 1999–2000. P. Carden.]

[RUSSL 650 Russian Intellectual History
Spring. 4 credits. Not offered 1999–2000. S. Senderovich.
Nineteenth- and twentieth-century selected topics. Taught mostly in English.]

[RUSSL 669 Dostoevsky
Fall. Also open to advanced undergraduates. Not offered 1999–2000. G. Gibian and guest lecturers.
Study of representative works from various periods of Dostoevsky's life, including some articles, speeches, and parts of *The Diary of a Writer*, against the context of nineteenth-century Western European and Russian literature. A variety of critical and scholarly approaches (from Russian Formalists to recent Western scholars) will be sampled and evaluated.]

[RUSSL 671 Seminar in Nineteenth-Century Russian Literature
Fall. 4 credits. Not offered 1999–2000. P. Carden.
Topic: *War and Peace*.]

[RUSSL 672 Seminar in Twentieth-Century Russian Literature
Fall. 4 credits. Open to advanced undergraduates. Not offered 1999–2000.]

[RUSSL 673 The Russian Nabokov
Fall. 4 credits. Also open to advanced undergraduates. Not offered 1999–2000. G. Shapiro.
Vladimir Nabokov wrote much verse, several plays, numerous short stories, and nine novels in Russian before switching to English. He is a major Russian writer of the twentieth century. This seminar will examine his work in the context of modern Russian literature, concentrating in particular on the novels. Knowledge of Russian is highly desirable, but all the works discussed also exist in English translation.]

[RUSSL 675 Russian Literature, 1917–1945
Fall. 4 credits. Not offered 1999–2000.
This semester will focus on the achievements of Russian prose between the two World Wars. Among the authors whose works will be closely read and discussed, there are Babel, Olesha, Zoshchenko, Ilf and Petrov, Bulgakov, and Nabokov.]

[RUSSL 676 Russian Literature, 1945–Present
Spring. 4 credits. Not offered 1999–2000.]

[RUSSL 698 Russian Symbolism
Fall. 4 credits. Not offered 1999–2000. P. Carden.
Around 1886 the trends in French culture represented by Baudelaire and Mallarme crystallized into a new cultural movement, called in some of its aspects the Decadence and in others Symbolism. The new sentiments about the nature of art spread throughout Europe, drawing in England, the Scandinavian countries, Germany, and Russia. The first stirrings of Symbolism were in the ascendant in Russian cultural life and it remained the dominant force until 1910. Our task will be to study the phenomenon of Symbolism as it touched the arts in Russia, including not only literature, but dance, theater, and the visual arts. Because Symbolism was a movement that cut across national boundaries, we will study the seminal works of European art that created the climate in which Russian Symbolism was conceived and came to maturity.]

[RUSSL 699 Russian Modernism
Spring. 4 credits. Not offered 1999–2000. P. Carden.
We will be investigating the rich and innovative period of the avant-garde in Russia from 1910 to 1925. In addition to examining outstanding works in a variety of forms, we will look at the movements, social context, and ties to the European avant-garde. Among the writers whose works we will examine are Blok, Bely, Mayakovsky, Khlebnikov, Pilnyak and Babel. We will examine theater through the Futurist performance piece, "Victory Over the Sun," through Meyerhold's productions of Mayakovsky's plays and other experimental pieces, and through mass spectacles. We will discuss the film theories of Eisenstein and Dziga Vertov and see several of their films. In the visual arts we will be examining the experiments of Larionov and Goncharova, Malevich, Kandinsky, and Tatlin. We will also look at the photomontage of Rodchenko.]

SCIENCE AND TECHNOLOGY STUDIES

T. J. Pinch, chair; R. N. Boyd, P. R. Dear, M. A. Dennis, S. H. Hilgartner, R. Kline, B. V. Lewenstein, W. R. Lynn; emeritus, A. G. Power, J. V. Reppy, M. W. Rossiter, L. P. Williams, emeritus. Adjunct faculty: J. J. Brumberg, R. W. Miller, H. Shue, Z. Warhaft

The importance of science & technology in the modern world is difficult to overstate. Whether one looks at the role of computers in society, the history of evolutionary theory, the challenges of environmental controversies, the ethical dilemmas of biomedicine, or the military applications of research, science and technology profoundly affect our lives—often in ways that we scarcely understand or only dimly perceive. The field of science and technology studies uses tools from the history, philosophy, sociology, and politics of science and technology to examine science and technology in their social and cultural context and to explore their political and policy implications. Systematic, integrated study of the origins and impacts of science and technology provides an understanding of the interactions among science, technology, and society and yields invaluable insights into the nature of the modern world.

The Science & Technology Studies Major

The major in Science & Technology Studies offers students wishing to pursue careers in law, public policy, health care, or management an opportunity to develop a full appreciation of the place of science and technology in society. The curriculum aims to further students' understanding of the historical, social, political, and ethical aspects of science and technology and to enable students to participate effectively in policy debates and decision making. In today's world, issues at the intersection of the technical and social arise continually in professional practice, management, and research. Thus, the integrated approach of the S&TS major provides a strong foundation for careers in the professions, in public policy, and in management, as well as in research and teaching.

Themes of the Major

Students in the S&TS major develop a program individually tailored to their particular interests. To give their coursework a coherent focus, students select a theme that draws together a group of related courses. Available themes include:

1. *Science, Technology & Public Policy.* Many of the most important policy issues of our time involve science and technology. This theme offers students an opportunity to gain a deep appreciation of the problems this situation raises in democratic societies. Through courses that survey the place of science in American politics and through courses that focus on such substantive issues as national technology policy or the politics of genetic engineering, this theme explores the tensions between expertise and democracy, the uses of scientific knowledge in making and legitimating policy, social movements that question technology and science, and contemporary debates over economics, innovation, and technology policy.
2. *Technology, Culture, and Society.* Students interested in this theme may examine the connections among technology and society by studying the manifold ways in which social groups (scientists, engineers, inventors, corporations, government agencies, and consumers) interact to construct technological artifacts and systems, and how the use of these artifacts and systems is related to social and cultural change. Areas of particular interest are: computers and society, the military and technological change, gender and technology, biotechnology and society, and telecommunication policy.
3. *Environment, Science, & Society.* By focusing on the relationship between scientific knowledge and political power, this theme offers unique insights into the making and implementation of environmental policy. Courses are available on such topics as American environmental politics, international environmental policy, science and the law, the history of agricultural science, and environmental communication. Students explore the causes and consequences of environmental controversies, the nature of risk and uncertainty in environmental issues, the roles of experts and the public in environmental decisions, and the challenges of global environmental policy.
4. *History and Philosophy of Science and Technology.* This theme provides students with an appreciation of science and technology in historical perspective and with an understanding of the philosophical problems posed by scientific knowledge. Courses available range from broad surveys to intensive studies of focused subjects. Students in this theme address such topics as the emergence of modern science; gender and science; the goal of achieving valid knowledge and the philosophical and institutional problems that this entails; the issues for history and philosophy of science raised by the new sociology of scientific knowledge; the relationship between knowledge, technology, and ethics; and the impact of major institutions—such as religion, medicine, the military, and the modern consumer economy—on the development of the sciences.

Beyond the four themes described above, S&TS majors may also create their own themes, carefully tailored to their particular interests. Examples might include "Computers, Innovation, and Society" or "Science, Technology, and Globalization."

Admission to the Major

Students intending to major in Science & Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student's intellectual interests and why the major is consistent with the student's academic interests and goals; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&TS requirements; and (4) an up-to-date transcript of work

completed at Cornell University (and elsewhere, if applicable).

Acceptance into the major requires completion of the following prerequisites: a) two introductory courses chosen from some combination of history, philosophy, sociology, or government; b) the science requirement of the College of Arts and Sciences; c) mathematics or computer science courses in fulfillment of the Arts College Group Two distribution requirement. Sophomores in the process of completing these prerequisites may be admitted to the major on a *provisional* basis. Further information and application materials are available at 275 Clark Hall (255–6047).

Requirements

S&TS majors must complete the following requirements:

1. Core courses: Science and Technology Studies majors will be required to take:
   (a) either S&TS 250 (Technology in Society) or S&TS 282 (Science in Western Civilization); and
   (b) S&TS 381 (Philosophy of Science: Knowledge and Objectivity) or S&TS 389 (Philosophy of Science: Evidence and Explanation) or S&TS 201 (What is Science? An Introduction to Social Studies of Science and Technology); and
   (c) S&TS 390 (Science in the American Polity: 1800–1960) or S&TS 391 (Science in the American Polity: 1960–now) or S&TS 442 (Sociology of Science).
2. Additional Science and Technology Studies courses: Science and Technology Studies majors will be required to complete at least 21 credit hours of additional courses in Science and Technology Studies, subject to the following restrictions:
   (a) Breadth requirement: at least one course beyond the core courses in each of the three areas of concentration (history, philosophy, and social studies of science and technology);
   (b) Depth requirement: at least two courses in one area beyond the core courses and intended for advanced undergraduates or graduate students.
3. Science Requirement: in addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science). Mathematics sufficient to follow the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student's major adviser and should be related to the theme selected by the student.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to do independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the spring semester before their junior year. More information on the honors program is available from the S&TS undergraduate office at 275 Clark Hall (255–6047).

The Biology and Society Major

The Department of Science & Technology Studies also offers the Biology and Society major, which includes faculty from throughout the university. The Biology and Society major is ideally suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing foundational training in basic biology, biology and society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The biology and society major is offered to students enrolled in the College of Arts and Sciences and the College of Human Ecology. Undergraduates in the College of Agriculture and Life Sciences can develop an approved sequence of courses from the biology and society curriculum under general studies. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the office in 275 Clark Hall, 255–6042.

A full description of the Biology and Society major can be found in the Courses of Study section entitled Special Programs and Interdisciplinary Studies.

The Concentration in Science and Technology Studies

T. J. Pinch, chair; R. N. Boyd, P. R. Dear, M. A. Dennis, S. H. Hilgartner, R. Kline, B. V. Lewenstein, W. R. Lynn; emeritus, R. W. Miller, A. G. Power, J. V. Reppy, M. W. Rossiter, L. P. Williams, emeritus. Adjunct faculty: J. J. Brumberg, H. Shue, Z. Warhaft

The concentration (or minor) in Science & Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from multiple disciplinary perspectives.

The S&TS concentration permits students to develop an individualized program of study closely related to their major field. For example, students might use the S&TS concentration to further explore issues related to their major, focusing on such topics as computers and society; gender and technology; science and law; biotechnology; science and politics; and environmental policy. By choosing courses in S&TS which fit their particular goals, students can tailor the concentration to provide breadth and depth in areas of special interest.

S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology. To satisfy the requirements for the S&TS concentration, students must complete with letter grades a minimum of four courses selected from the course offerings listed for the major. At least one course should be chosen from the list of core courses. The remaining three courses should be chosen in consultation with an S&TS faculty adviser and must be drawn from at least two of the three areas. Interested students may obtain further information about courses by contacting the S&TS undergraduate office, 275 Clark Hall (255–6042).

Course Offerings

Introductory Course
History
Philosophy
Social Studies of Science
Independent Study

S&TS 101 Science and Technology in the Public Arena
Fall. 3 credits. J. Reppy.
An introduction to public policy issues arising from developments in science and technology. We will study such topics as the politics of expertise, the effect of technical change on workers, and the management of risk. The emphasis will be on understanding the role played by technical expertise in political controversies. Students will work in small groups to prepare position papers on selected topics such as biological cloning, encryption on the internet, gendered design in automobiles, outbreaks of rare diseases, and nuclear waste disposal.

History

S&TS 233 Agriculture, History, and Society: From Squanto to Biotechnology
Fall. 3 credits. M. W. Rossiter.
This course will survey the major themes in the development of agriculture and agribusiness in the United States in the nineteenth and twentieth centuries. These include particular individuals (such as Liberty Hyde Bailey, Luther Burbank, G. W. Carver, Henry A. Wallace, and Norman Borlaug), the rise of government support and institutions (including U.S.D.A. and Cornell), noteworthy events (the Dust Bowl, World War II, and the environmental movement), and the achievements of the recent Green and "Gene" Revolutions.

S&TS 250 Technology in Society (also Electrical Engineering 250 and History 250)
Fall. 3 credits.
For description, see ENGRG 250.

S&TS 281 Science in Western Civilization (also History 281) #
Fall. 4 credits.
For description, see HIST 281.

[S&TS 282 Science in Western Civilization #
Spring. 4 credits. Not offered 1999–2000.
For description, see HIST 282.]

S&TS 283 The Sciences in the Twentieth-Century
Spring. 4 credits. M. Dennis.
Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciences—physical and biomedical—during the twentieth century students will learn about the reciprocal relations between science and society. Topics covered may include: the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Soviet Union and Nazi Germany and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the transformation of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-western cultures.

S&TS 287 Evolution (also History 287)
Fall. 4 credits.
For description, see BIO G 207.

S&TS 292 Inventing an Information Society (also Electrical Engineering 298 and Engineering 298 and History 292)
Spring. 3 credits.
For description, see ENGRG 298.

S&TS 355 Computers: From Babbage to Gates
Fall. 4 credits. M. Dennis.
Computers have not always been the ubiquitous beige boxes gracing our desktops: in Victorian London, Charles Babbage attempted to build his analytical engine using brass gears and steel rods; and during World War II the Allied governments used sophisticated electro-mechanical and electronic "brains" to break Axis codes. Machines that once occupied entire rooms now travel in knapsacks. How did this technology, once considered esoteric and useful to only technical specialists, colonize industry, academia, the military, the federal government, and the home? Using primary historical materials, including novels, films, archival documents and other texts we will follow computers from Babbage's Victorian dream of an analytical engine to the visions of contemporary moguls like Bill Gates whose goal is "information at your fingertips." We will explore not only how computer technology affects society, but how culture and politics enable and sustain the development of the machine. This is a course in the history and sociology of computers; a background in computer science is not required. (No technical knowledge of computer use is presumed or required.)

[S&TS 433 International History of Science
Spring. 4 credits. Not offered 1999–2000. M. W. Rossiter.
A survey of the major scientific events and institutions in several foreign nations, including developing countries. The course covers the period 1660 to the present and gives some attention to who in each country becomes a scientist, who rises to the top, and who emigrates. Weekly readings and a research paper.]

S&TS 444 Historical Issues of Gender and Science (also Women's Studies 444)
Fall. 4 credits. Open to sophomores. M. W. Rossiter.
One-semester survey of women's role in science and engineering from antiquity to the 1980s, with special emphasis on the United States in the twentieth century. Readings will include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, we shall have attained a broad view of the problems that have faced women entering science and those that still remain.

S&TS 447 Seminar in the History of Biology (also Biology and Society 447, History 415, and Biological Sciences 467)
Summer. 4 credits. Limited to 18 students. S-U grades optional.
For description see Biology Sci (BIO G) 467.

S&TS 525 Seminar in the History of Technology (also History 525)
Fall. 4 credits. R. Kline.
Exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field will be considered in selecting the topics for the seminar.

S&TS 616 Enlightened Science (also HIST 616)
Fall. 4 credits. Limited to graduate students. P. Dear and M. Dennis.
For description, see HIST 616.

[S&TS 644 Topics in the History of Women in Science (also Women's Studies 644)
Fall. 4 credits. Not offered 1999–2000. M. W. Rossiter.
This is a one-semester graduate seminar on selected topics in the history of women and gender in science and technology, covering mostly the U.S. in the 20th century but broadly defined to include earlier periods and other countries. It seeks to acquaint advanced students with some of the best recent literature on this topic and to identify and explore possible new topics. Weekly readings and a research paper.]

[S&TS 680 Seminar in Historiographical Approaches to Sciences (also History 680)
Fall. 4 credits. Not offered 1999–2000.
For description, see History 680.]

[S&TS 682 Topics in the Scientific Revolution (also History 682)
Fall. 4 credits. Not offered 1999–2000.
For description, see HIST 682.]

[S&TS 687 Seminar in the History of the Agricultural Sciences
Fall. 4 credits. Open to advanced students interested in the history of the agricultural sciences, broadly defined. Not offered 1999–2000. M. W. Rossiter.
Weekly readings and a research paper.]

[S&TS 777 Science, Technology and the Cold War
Fall. 4 credits. Permission of instructor required for undergraduate students. Not offered 1999–2000. M. Dennis.
This graduate seminar will examine the historical transformation wrought in the organization and practice of the physical, biomedical, and environmental sciences since 1945. How did military and federal patronage affect the development of the sciences, the organization of the postwar university, and the armed services? Students will read contemporary historical materials as well as primary texts to understand the development of particular institutions, technologies, and individuals. In addition to participation in the weekly discussion, each student will prepare a research paper for presentation to the seminar.]

Philosophy

S&TS 205 Ethical Issues in Health a nd Medicine (also Biology and Society 205)
Fall. 4 credits.
For description, see B&SOC 205.

S&TS 206 Ethics and the Environment (also Biology and Society 206)
Spring. 4 credits.
For description, see B&SOC 206.

S&TS 286 Science and Human Nature (also Philosophy 286)
Spring. 4 credits.
For description, see PHIL 286.

[S&TS 381 Philosophy of Science: Knowledge and Objectivity (also Philosophy 381)
Fall. 4 credits. Not offered fall 1999.
For description, see PHIL 381.]

S&TS 681 Philosophy of Science (also Philosophy 681)
Spring. 4 credits.
For description, see PHIL 681.

Social Studies of Science

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology
Spring. 3 credits. T. Pinch.
This course is not a science or engineering course. It is not an introduction to science and technology. It is a course which allows both science and non-science majors to reflect a little on the nature of science and technology as activities. How come science is so successful? Has it always been that way? How different really is science from other activities? How does a new invention come about?

In order to understand better what science is we will also look at what it is not. We will look at episodes of mainstream science, along with science from the X-Files. One week students may study what went on in the confirmation of Einstein's theory of relativity;

another week we may hear about crop circles and parapsychology.

Throughout, we will be looking at the infrastructure of science and technology—the bits that scientists, engineers, and their textbooks take for granted. No particular science or arts requirements are needed for this course. The materials are chosen so as to be understandable by all. We will use a variety of media, including still images, video and computer simulations.

S&TS 285 Communication in the Life Sciences (also COMM 285)
Spring. 3 credits. B. Lewenstein.
For description, see COMM 285.

S&TS 311 Sociology of Medicine
Spring. 4 credits. S. Hilgartner.
This course provides an introduction to the ways in which medical practice, biomedical technology, and the medical profession are embedded in society and shaped by social phenomena. Accountability to patients and the public, and struggles over the control of medical practice in a world where medicine is connnected to gender, class, race, and personal autonomy are important overarching themes. We will examine the structure of the medical profession; medical training and professional socialization; the social organization of the hospital; and doctor-patient interactions. The course will also explore how biomedical knowledge and technology get produced, assessed, and introduced into clinical practice. Topics may include the intensive care unit, the training of surgeons, the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and priority setting in biomedical science.

[S&TS 324 Environment and Society (also Rural Sociology 324 and Sociology 324)
Fall. 3 credits. Not offered 1999–2000.
For description, see R SOC 324.]

S&TS 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also Government 305, AM ST 350)
Spring. 4 credits. M. Dennis.
This course will explicate the development of atomic weapons from early twentieth-century ruminations about super bombs in science fiction through the Manhattan Project, the postwar development of thermonuclear weapons and civil defense, and more recent plans for strategic defense. Our focus will expand to cover the lives of researchers at such institutions as Los Alamos during and after World War II as well as discussions of national politics. Other topics include the Nazi effort to develop an atomic bomb, the role of technical espionage during and after World War II, and the problems posed by the classification of technical knowledge. We will seek to understand how the bomb became part of American culture through the use of literature and film, as well as readings in primary historical documents and secondary analyses. In addition to class meetings, there is also a required screening session on W 7–10 p.m. in Uris media room b. Films will generally last less than two hours, but some are longer. Viewing the movies is an essential part of the course.

S&TS 352 Science Writing for the Mass Media (also Communication 352)
Fall. 3 credits.
For description, see COMM 352.

S&TS 360 Ethical Issues in Engineering (also Engineering 360)
Spring. 3 credits.
For description, see ENGR 360.

[S&TS 390 Science In the American Polity, 1800–1960 (also Government 308, AM ST 388)
Fall. 4 credits. Not offered 1999–2000. M. Dennis.
How did America become a leading nation in scientific and technical research? This course charts the development of American science from its origins in gentlemanly societies in the early nineteenth century through the development of large-scale federally funded research or Big Science. Particular attention will be paid to the importance of government patronage in creating new social and intellectual spaces for research; the importance of medicine and the biomedical disciplines for the development of university-based research; the origins and expansion of research in corporations; and the role of war in the political economy of American science.]

S&TS 391 Science in the American Polity, 1960–Now (also Government 309, AM ST 389)
Spring. 4 credits. M. Dennis.
This course reviews the changing political relations between science, technology and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed will include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

[S&TS 400 Components and Systems: Engineering in a Social Context (also Mechanical and Aerospace Engineering)
Spring. 3 credits. Not offered 1999–2000.
For description, see M&AE 400.]

S&TS 401 Biology and Society: The Social Construction of Life (also Biology and Society 301)
Fall. 4 credits.
For description, see B&SOC 301.

[S&TS 406 Biotechnology and Law (also Biology and Society 406)
Fall. 4 credits. Not offered 1999–2000. Staff.]

[S&TS 407 Law, Science and Public Values (also Government 407 and Biology and Society 407)
Fall. 4 credits. Not offered 1999–2000.]

[S&TS 409 From the Phonograph to Techno (also Society for the Humanities 409)
Fall. 4 credits. Limited to 15. Permission of the instructor. Not offered 1999–2000. T. Pinch.
In this seminar, we will treat music and sound and the ways they are produced and consumed as socio-cultural phenomena. We will be concerned to investigate specifically the way that music and sounds are related to technology and how such technologies and sounds have been shaped by and have shaped the wider society and culture of which they are a part. We will look at the history of sound technologies like the phonograph, the electronic music synthesizer, samplers, and the Sony walkman. Our perspective will be drawn from social and cultural studies of science and technology. Students will be encouraged to carry out a small original research project on their own favorite sound technology.]

S&TS 411 Knowledge, Technology, and Property
Spring. 4 credits. Prerequisites: at least one course in science and technology studies. S. Hilgartner.
Should the human genome be treated as private property or a public resource? How should copyright be managed in the digital environment of the Internet? Is music "sampling" high-tech theft or artistic expression? Does bioprospecting represent an enlightened strategy for preserving biodiversity or a post-colonial means for transferring resources from the developing world to the North? Debate about the nature and scope of intellectual property is an increasingly salient feature of contemporary politics. This course examines the ownership of knowledge and technology, exploring fundamental tensions that intellectual property systems express and incompletely reconcile. Perspectives from science and technology studies, sociology, law, and economics will inform the course. Case studies will explore the construction of property in contexts ranging from the early history of copyright to the ownership of life forms, airwaves, algorithms, artistic content, electronic databases, and the personal identities of celebrities.

[S&TS 427 Politics of Environmental Protection in America (also Government 427)
Fall. 4 credits. Not offered 1999–2000. Staff.
An introduction to the distinctive feature of environmental protection in America, focusing particularly on the role of law, science, and citizen activism in public policymaking. Readings from law, political science, and policy analysis will examine the changing role of expert agencies, courts, public interest groups, Congress, and the states in environmental politics since the late 1960s. Case studies of specific environmental controversies (nuclear power, siting, pesticides, endangered species) will be used to explore dominant public conceptions of risk and safety, regulatory costs and benefits, and the goals and instruments of environmental policy.]

S&TS 442 The Sociology of Science (also City and Regional Planning 442 and Biology and Society 342)
Fall. 4 credits. T. Pinch.
A view of science less as an autonomous activity than as a social institution. We will discuss such issues as controversies in science, analysis of scientific text, gender and the social shaping of scientific knowledge.

[S&TS 466 Public Communication of Science and Technology
Fall. 4 credits. Limited to 15. Prerequisite: COMM 352 or 360, ENGRG 350 or permission of instructor. Not offered 1999–2000. B. Lewenstein.
For description, see COMM 466.]

[S&TS 467 Innovation: Theory and Policy
Fall. 4 credits. Open to upper-level undergraduates and interested graduate students. Prerequisite: Economics 102 or permission of the instructor. Not offered 1999–2000. J. Reppy.
In this course we will study the innovation process (that is, the introduction of new technology into practice) through the critical analysis of selected theories of innovation and supporting empirical evidence. Economic theories will be contrasted to the insights to be found in science and technology studies. The focus will be on the context of interests and ideology in which the various theories have been framed and their differing implications for technology policy. Authors to be covered include Schumpeter, Solow, Scherer, Nelson and Winter and Bijker and Pinch.]

[S&TS 469 Food, Agriculture, and Society (also Biology and Society 469, and Biology General 469)
Spring. 3 credits. Not offered 1999–2000.
For description, see BIO G 469.]

[S&TS 483 The Military and New Technology
Fall. 4 credits. Not offered 1999–2000.
For description, see GOVT 483.]

[S&TS 490 The Integrity of Scientific Practice
Fall. 4 credits. Not offered 1999–2000. S. Hilgartner.
Recent scandals over scientific fraud, debates about financial conflicts of interest, disputes about the use of human and animal subjects, and tensions over ownership of data have raised concern about integrity in science. In addition, changes in the American research system—from the emergence of new university-industry relationships to the growth of electronic communication—pose new questions about who owns and controls research. The course addresses practices that present problems of integrity in research (e.g., fraud, secrecy, commercialization). It also examines how scientific practices affect the structural integrity of science as an institution. Through these complementary concepts of integrity, the course explores the connections between the conduct of science and its cultural authority.]

[S&TS 493 Economics Meets Science Studies
Spring. 4 credits. Not offered 1999–2000. J. Reppy.
This course will cover a variety of possible interactions between the disciplines of economics and science and technology studies. Economists (at least some economists) are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motives and institutions to explain behavior in the production of scientific and technological knowledge. We will explore ways in which economics can provide new questions and theoretical approaches for science and technology studies. From another perspective, economics, as the most "scientific" of the social sciences, is itself a subject for study. Internal critiques by economists will be compared to external analyses in the science studies literature. Readings will include works on the epistemology and use of rhetoric in economics and on the "new economics of science", and examples of the use of economic analysis in the science studies literature.]

S&TS 532 Inside Technology: The Social Construction of Technology
Spring. 4 credits. T. J. Pinch.
Rather than analyze the social impact of technology upon society, in this course we will investigate how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies possible which embody different assumptions about society? Do engineers have implicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments will be illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.

S&TS 631 Qualitative Research Methods for Studying Science
Fall. 4 credits. T. J. Pinch.
Much has been learned about the nature of science by sociologists and anthropologists donning lab coats and studying scientists in action. In this course we will look at the methods used in this new wave of science studies. We will examine what can be learned by interviewing scientists, from videos and from detailed examinations of scientific texts. Students will gain hands-on experience by conducting a mini-project in which they investigate some aspect of scientific culture.

[S&TS 645 Genetics: Politics & Society in Comparative Perspective (also Government 634)
Spring. 4 credits. Limited to seniors and graduate students. Not offered 1999–2000. S. Hilgartner.
Contemporary genetics and biotechnology are highly controversial, creating high hopes for some and deep anxieties for others. This course will trace the conflicts and power struggles over genetic engineering, using it as a case to examine some crucial issues in the relationships among science, technology, and politics. In particular, the course will focus on three themes—the politics of property, the politics of identity, and the politics of risk—as they pertain to genetics. Topics may include the social shaping biological research; eugenics and genetics; genetics and medicine; the regulation of risks; the growth of commercial biotechnology; university-industry relationships; Green parties and social movements; North-South issues and biotechnology; the Human Genome Project; intellectual property and patenting genes; and the debate over human cloning.]

[S&TS 700 Special Topic 1: Science Studies and the Politics of Science
Fall. 4 credits. Prerequisites: S&TS 711 or permission of the instructor. Not offered 1999–2000.
Theoretical developments in science and technology studies have called attention to the contingent and socially embedded character of both knowledge claims and technological systems. Drawing on literature from several disciplines, this seminar explores the consequences of these findings for social and political studies of science. Issues and problems to be considered include trust and skepticism, political and legal agency, reflexive institutions, relativism and social action, science and norms, and the co-production of knowledge and social order.]

[S&TS 700 Special Topic 2: Technology Transfer Issues
Spring. 4 credits. Not offered 1999–2000. J. Reppy.
The goal of this course is to develop a coherent analytical framework for analyzing technology transfer, using insights from economics, sociology, history, and science and technology studies and to employ that framework to evaluate current policy issues. We will study the process of technology transfer in different contexts, ranging from intra-firm and intra-industry to technology transfer between civil and military sectors and between industrialized countries and LDCs. The readings will include a mix of theoretical writings and case studies.]

S&TS 711 Introduction to Science and Technology Studies (also HIST 711)
Fall. 4 credits. S. Hilgartner.
This introductory course will provide students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants will chart the terrain of this new field. Topics for discussion include, but are not limited to: historiography of science and technology and their relation to social studies of science and technology; laboratory studies; intellectual properties; science and the state; the role of instruments; fieldwork; politics and technical knowledge; philosophy of science; sociological studies of science and technology; and popularization.

Independent Study

S&TS 399 Undergraduate Independent Study
Fall or spring. 1–4 credits.
Please apply in 275 Clark Hall.

S&TS 699 Graduate Independent Study
Fall or spring. 2–4 credits.
Please apply in 275 Clark Hall.

S&TS 700 Special Topics
Spring. 3–4 credits.

SINHALA (SINHALESE)

See Department of Asian Studies.

SOCIOLOGY

V. Nee, P. Becker, R. L. Breiger, M. Brinton, S. Caldwell, M. Clarkberg, R. Grannis, D. Grusky, S. Han, D. Heckathorn, E. Lawler, M. Macy, P. Moen, R. Stern, D. Strang, J. M. Stycos, S. Szelenyi, P. Tolbert, H. A. Walker, E. Wethington

Emeritus: D. Hayes, R. McGinnis, B. C. Rosen, R. M. Williams, Jr.

The subject matter of sociology is human social organization and institutions. The Department of Sociology offers courses in social organization that include (among other issues) examination of inequality on the basis of race, ethnicity, income, and occupation; political behavior and public policy; social pyschology and group processes; and contemporary social movements for change. Courses that analyze institutions include the family, politics and issues of public policy, the analysis of voluntary organizations, and the

study of networks of political and organizational action.

The Department of Sociology offers the opportunity to develop fundamental theoretical insight and advanced research skills appropriate for the study of social behavior and institutions. Graduates of the department take up careers in university, government, and business settings and in law, management, architecture, and other professions seeking men and women who demonstrate a disciplined understanding of society and social issues.

Sociology Courses for Nonmajors

Sociology provides students with particularly effective ways to understand the complexities of modern life. For many students, the undergraduate years are a last opportunity to gain the insights these fields have to offer. The Department of Sociology is continuing to design an array of beginning and advanced courses that convey a broad understanding of the methods and insights of sociological analysis—courses that will be of particular interest to undergraduates who may not major in sociology. First- and second-year students should note that the introductory courses (101, 103, 105, 115, 150) provide substantial focus on the sociological analysis of major issues of public life. A wide selection of general education courses is available at the 200 level. Advanced undergraduates who are majors in other fields should also see, in particular, the descriptions of Sociology 303, 310, 354, 370, 380, for which there are no prerequisites other than junior or senior status.

Related Courses in Other Departments

Students interested in sociology should consult the course lists of the other social science departments in the College of Arts and Sciences (including Anthropology, Economics, Government, and Psychology) and of these other departments: Organizational Behavior (College of Industrial and Labor Relations), Human Development and Family Studies (College of Human Ecology), and Rural Sociology (College of Agriculture and Life Sciences).

The Major

Requirements for general sociology: (1) 101 and any other 100-level or 200-level course (excluding Freshman Writing Seminar) with a 2.5 minimum grade-point average; (2) no later than the junior year, the 301 and 303 methods courses; (3) one course in the department at the 400 level or higher (491 is recommended); and (4) 20 additional credits in sociology, of which 6 may be taken in related departments on the approval of the student's major adviser. A list of pre-approved courses is maintained by the director of undergraduate studies, some of which are listed under "Related Courses."

Requirements for honors: Potential honor students are encouraged to begin taking the methods and statistics courses during their sophomore year and to take at least 2 credits of Sociology 491, Independent Study, during their junior year. Honors students take Sociology 495–496 during their senior year. Graduation with honors requires a cumulative average of at least B+ in all sociology courses and the successful completion of an oral defense of the honors thesis. Interested students should consult the director of undergraduate studies no later than the second semester of their junior year.

Supervised research. Qualified sociology majors are invited to participate with faculty members in conducting research. Such projects are usually initiated in one of two ways: the student may offer to assist the faculty member in an ongoing project, or the student may request that the faculty member supervise the execution of a project conceived by the student. In either case the student should enroll in Sociology 491. Interested students may direct inquiries to any faculty member.

Business and Organizational Studies Concentration

Sociology majors who wish to prepare for postgraduate study in professional schools (business, management, or law) or a career in business or nonprofit organizations may elect to acquire a concentration in Economic and Organization Sociology. This program provides Cornell students with training in economic sociology, organizational studies and comparative societal analysis useful in a world increasingly shaped by economic and social forces of a truly global dimension. The required ***core*** courses in the concentration are: SOC 105, SOC 215, and a research-oriented honors seminar to be fulfilled as an independent study course (SOC 491) with faculty members affiliated with the concentration. Affiliated faculty include: P. Becker, M. C. Brinton, M. Clarkberg, S.-K. Hap, M. M. Macy, V. Nee, P. Tolbert, R. Stern, and D. Strang. In addition to the required courses, students must take four elective courses from the following list: SOC 217, SOC 220, SOC 311, SOC 314/515, SOC 315, SOC 322, SOC 326/526, SOC 370/570, SOC 373, Soc 421, and SOC 427. Students completing the concentration receive a letter of recommendation from the Chair based on the cumulative academic record in the concentration. Please contact Crystal Chapman, Undergraduate Program Coordinator, or Elaine Wethington, DUS, for additional information on the Business and Organizational Studies concentration.

Introductory Courses

SOC 101 Introduction to Sociology (also RS 101)
Fall, spring, or summer. 3 credits. Fall, M. Macy; spring, S. Szelenyi.
This course provides an introduction to theory and research in sociology. It demonstrates how the insights, theories, and methods of sociological analysis can be brought to bear on major issues of social life. A primary goal is to convey a sense of the manner in which sociologists formulate theories and how the collection and analysis of data are used to evaluate those theories. The course will provide "hands-on" experience in analyzing sociological issues. Students undertake guided research exercises that involve using computers to analyze actual data. No prior background is presumed; necessary skills are covered in class and section meetings.

SOC 103 Self and Society (also R Soc 103)
Fall. 3 credits. W. Burkard.
An introduction to microsociology, focusing on social processes within small groups, including the family. Emphasis is on leadership, conformity, social influence, cooperation and competition, distributive justice, and micro analyses of interaction.

SOC 105 Introduction to Economic Sociology (also RS 105)
Fall. 3 credits. C. Leuenberger.
Modern social thought arose out of attempts to explain the relationship between economic development and the social transformations that gave rise to the contemporary world. Classical theorists from Karl Marx and Max Weber to Karl Polanyi focused their writings on emergent capitalist economies and societies. Contemporary social theorists likewise have sought to understand the interaction between capitalism and the social forces reacting against and emerging from modern economic development. From exchange and rational choice theories to network analysis and institutional theory, a central theme in contemporary social thought has been the relationship between the economy and society, economic action and social structure, rationality and fundamental social processes. This course provides an introduction to social thought and research seeking to understand and explain the relationship between economy and society in the modern era.

SOC 115 Utopia in Theory and Practice
Spring. 3 credits. D. Strang.
People have always sought to imagine and realize a better sort of society, with both inspiring and disastrous results. In this course we discuss the literary utopias of More, Morris, and Bellamy, and also the dystopias of Huxley, Orwel, and Zamiatin. We also examine real social experiments, including nineteenth century intentional communities, 20th century socialisms and religious cults, and modern ecological, political, and millennial movements. Throughout, the emphasis is on two sociological questions. What kinds of social relationships appear as ideal? How can we tell societies that might work from those that cannot?

SOC 151 Families and the Life Course (also HDFS 151)
Spring. 3 credits. T. Mitrano.
For description, see HDFS 151.

General Education Courses

SOC 200 Social Problems (also RSOC 200)
T. Hirschl.
For course description, see RSOC 200.

[SOC 201 Religion and Family in the U.S. (also RSOC 202 and RELST 203)
3 credits. Not offered 1999–2000.
P. Becker.
This course will examine how two fundamental social institutions—religion and the family—are interlinked in American society. As recently as the 1950s, religious institutions were organized around the needs of one dominant family form, the male-breadwinner family with a stay-at-home mother. But since the 1950s, that family form is no longer statistically dominant or culturally normative. How have religious institutions adapted to new family forms? How do religious beliefs influence behavior within families, for example, the raising of children? How do religious groups foster ideals of family life or influence our beliefs about what are "good" families? How do people's family experiences and family values influence their participation

in organized religion? What models of family life are religious groups organized around? We will begin to answer these questions by drawing on readings that explore the religion-family link in a variety of religious, ethnic, and social class contexts within the contemporary United States.]

SOC 202 Population Dynamics (also RSOC 201)
Spring. 3 credits. L. Williams.
For course description, see RSOC 201.

SOC 203 Work and Family (also Women's Studies 203)
Spring. 3 credits. W. Burkard.
Home and family life often is portrayed in the popular media as a haven away from the harsh realities of public life, suggesting that work and family constitute separate and distinct spheres. By contrast many sociologists contend that there is a link between work and family, and that this link has different consequences for men and women. It will highlight the responses of individuals, employers and governments, both in the U.S. and internationally, to the dilemmas posed by the interface between work and family.

[SOC 204 Race and Ethnic Relations
4 credits. Prerequisite: SOC 101, SOC 103, or R SOC 101. Not offered 1999–2000.
Staff.
This course focuses on race and ethnic relations in contemporary perspective. It examines the social and behavioral implications of attributions of race and ethnicity in small group interaction, the world of work, and the larger society. Topics: inequalities in income and employment, affirmative action, ethnic political mobilization, patterns of marriage and family formation.]

SOC 206 International Development (also RSOC 205)
Spring. 3 credits. P. McMichael.
For course description, see RSOC 205.

SOC 208 Social Inequality
Spring. 3 credits. D. Grusky.
This course reviews contemporary approaches to understanding the distribution of valued goods and the social processes by which such inequality comes to be seen as legitimate, natural, or desirable. We address questions of the following kind: What are the major forms of stratification in human history? Is inequality and poverty an inevitable feature of human life? How many social classes are there in advanced industrialism? Is there a "ruling class?" Are lifestyles, attitudes, and personalities shaped fundamentally by class membership? Can individuals born into poverty readily escape their class origins and move upward in the class structure? Is there much countervailing downward mobility? Are social contacts and "luck" important forces in matching individuals to jobs and class positions? What types of social processes serve to maintain and alter racial, ethnic, and gender discrimination in labor markets? Is there an "underclass?" Will stratification systems take on new and distinctive forms in the future? These and other questions are addressed in light of classical and contemporary theory and research.

SOC 210 Social Problems
Spring. 3 credits. D. Heckathorn.
Course description is to be announced.

SOC 215 Organizations: An Introduction (also R SOC 215)
Fall. 3 credits. S. Han.
This is an introductory course in the study of organizations. We will start by taking a look at various examples of organizing, including a street gang in a Boston neighborhood, a minority community, industrial corporations, modern universities, Silicon Valley and Route 128, and more. Hence, a sampler. These brief glimpses serve as exercises in looking behind and beyond diverse rhetoric for common patterns in organizational phenomena. The focus of the course is upon research scholarship, not the training of managers. Nonetheless, the analytical skills you will acquire are applicable to work in firms, government agencies, and nonprofit organizations.

SOC 217 Embedded Markets
Spring. 3 credits. S. Han.
This is a course designed for a wide range of students who are generally interested in organization perspectives on markets and businesses. The primary focus of the course is on modes of organizing. In particular, we will look at the ways in which economic actions are played out in social settings. Basic conceptual frameworks will be provided. Yet the course will extensively use, and ask you to come up with, contemporary and local problems to illustrate the core issues.

SOC 220 Culture and Conflict in Organizations
Spring. 3 credits. P. Becker.
How do the organizations we belong to shape us? What is organizational identity and how does it come about? How do cultural beliefs shape organizations? What kinds of organizations strike us as legitimate and effective, and why? Organizations may be goal-directed problem-solvers, but they're also locations for storing and transmitting social facts, like the hierarchical relations among groups, and powerful ideas, including moral codes. Organizations may seem to evolve naturally, but are often shaped by internal conflicts or powerful outsiders. The first part of this course will examine theories of organizational culture and power; the second part will consist of case studies or organizations, businesses, religious denominations, little league teams, and social movement organizations.

[SOC 222 Social Policy and Organization in Health, Education, and Welfare
3 credits. Not offered 1999–2000.
D. Strang.
Introduces the development of three central kinds of social policy: those concerned with delivering medical care, schooling the young, and providing resources for the economically vulnerable. The course treats the historical development of large-scale public programs, regulatory systems, or attempts to stimulate provide action; political struggles over social rights and the allocation of resources; and the organizations that are constructed to carry out policy. The focus is on American policy, but with considerable comparative attention to the health, education, and welfare programs of other nations.]

[SOC 250 Religion and Public Life (also RELST 249)
3 credits. Not offered 1999–2000.
P. Becker.
This course explores how religion provides a basis for moral critique, political mobilization, and social identity in a modern society. The first part introduces basic issues—definitions of religion, the sociological approach to the study of religion, religion and modernity. In the main body of the course, we will read studies of specific religious groups and organizations in the contemporary United States—examining such questions as: "How does religion provide a basis for gender identity and gender norms? "What do religious groups and discourses contribute to public debate on issues ranging from economic justice to abortion? "How do religious leaders mobilize citizens for social action in their communities?"]

SOC 265 Latinos in the U.S. (also LSP 201 and R SOC 265)
Spring. 3 credits (4-credit option available). H. Velez.
Exploration and analysis of the Hispanic experience in the United States. An examination of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

[SOC 281 Contemporary Social Issues
Not offered 1999–2000. H. A. Walker.
This course uses contemporary social issues to introduce students to sociological reasoning, explanation, and analysis. Topics include race, gender, and performance differences in face-to-face groups; gender and double standards; the origins of economic inequality; and crime and deviance. Students will complete guided research problems that require the analysis of existing data. Classroom instruction will give students all the skills necessary to complete the research exercises.]

[SOC 290 Social Psychology of Interpersonal Relations
Fall. 3 credits. Not offered 1999–2000.
H. A. Walker.
The focus of this course is on the relationship between the individual and the social group. It will examine the way in which the individual shapes "society," and in turn, how society influences individual behavior. Topics include formation of self, influence and conformity, and the emergence of racial and gender differences in status and power.]

Methods and Statistics Courses

SOC 293 Inequality, Diversity and Justice (also City and Regional Planning 293, Government 293, Philosophy 193, Sociology 293)
Fall. 4 credits. No prerequisites: intended for freshmen and sophomores. R. Miller.
An interdisciplinary discussion of the nature and moral significance of social inequality, diversity and poverty and of the search for just responses to them. How unequal are economic opportunities? What are the causes of poverty? To what extent is greater equality a demand of justice? Are traditional welfare programs an appropriate response to poverty? What special significance have race and gender as sources of inequality? Do they merit special remedies such as affirmative action? How should governments deal with

religious diversity and other differences in ultimate values? For example, should abortion statutes be neutral toward rival views of the importance of potential human life? What are the causes of worldwide inequality? To what extent do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes and legal reasoning interact in the search for answers to these questions. To provide these resources, the course will be taught by leading faculty researchers in philosophy, political theory, the social sciences and law.

SOC 301 Evaluating Statistical Evidence
Spring. 3 credits. M. Clarkberg.
A first course in statistical evidence in the social sciences, with emphasis on statistical inference and multiple regression models. Theory is supplemented with numerous applications.

SOC 303 Design and Measurement
Spring. 4 credits. Prerequisite: a course in sociology. S. Caldwell.
Foundations of sociological analysis; issues arising from using humans as data sources; the quality of our primary data; methods of its collection; research designs in wide use and their limitations; pragmatic considerations in doing research on humans, organizations, communities, and nations.

Intermediate Courses

SOC 309 The Sociology of Marriage (also SOC 509)
Spring. 3 credits. M. Clarkberg.
Contemporary debate on the nature of the family in the U.S. often assumes a simplistic decay of the "traditional marriage." This course unpacks the myths and facts that undergird this model. We will overview the historical patterns of marriage in the United States, examine data on contemporary union formation and dissolution and their consequences, and explore various theoretical models of marriage and its decline.

[SOC 311 Solidarity and Social Control
4 credits. Not offered 1999–2000. M. Macy.
What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We will explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.]

[SOC 313 Social Networks and Social Structure (also SOC 513)
Spring. 4 credits. Not offered 1999–2000. Staff.
A critical survey of theories and techniques of structural analysis in sociology, centering on the usefulness of social network analysis in providing integration of studies at different levels of generality. Applications in the areas of the sociology of organizations, community studies, social stratification, and dependence relations among nations. Emphasis on the mutual relevance of theories and operational research procedures.]

SOC 315 Contemporary Business Organization
Fall. 4 credits. D. Strang.
Corporate America appears constantly in the throes of rapid change. In recent years, demographic change and downsizing has restructured the face of management, breaking the implicit social contracts many employees thought they enjoyed. Large bureaucratic organizaitons have declined relative to small networked firms, while at the same time mergers and acquisitions consolidate operations in many industries. Japanese frameworks like total quality management have become American business movements. This course examines what is new and not so new in contemporary American business.

SOC 322 Organizations and Social Inequality (also ILR 325)
Spring. 3 credits. P. Tolbert.
For course description, see ILR 325.

SOC 324 Environment and Society (also ST&S 324 and RSOC 324)
Spring. 3 credits. M. Pfeffer.
For course description, see RSOC 324.

SOC 326 Social Policy (also SOC 526)
Fall. 4 credits. S. B. Caldwell.
The dramatic growth of the policy research sector as an institutional and intellectual force signals a changing relationship of social science to social policy in the United States. With an eye on that relationship, this course examines the development of social policy in selected areas, among them welfare, poverty, housing, crime, and health. The policy research sector itself—people, values, and institutions—is also surveyed.

SOC 333 Primate Societies
Spring. 3 credits. R. Grannis.
All primates (including humans) share a common social and cultural, as well as biological, heritage which was bequeathed to us by our common ancestors. This shared inheritance is even more pronounced between humans and their closest non-human relatives, chimpanzees and gorillas. This course will survey the social behaviors and cultural forms of our primate cousins with a special focus on baboons, chimpanzees, and gorillas. We will begin by reviewing the diversity of primates and their societies. We will then look at primate socioecology including demography, hunting and gathering, and kinship. Next, we will examine the politics, economics, communication, and culture of some of our more closely related primate cousins. In addition to sharing a common past, all primates (except for some recent humans) are hunter-gatherers with similar biological capacities and needs who have solved similar socioecological problems. We will end the course by considering the implications of these findings for our lives as human primates.

SOC 336 Segregation
Spring. 3 credits. R. Grannis.
Over seven decades ago, Robert Park noted that "Physical distances frequently are the indices of social distances." As we near the beginning of a new millennium, very little has changed. Segregation may have disappeared from our public discourse, but it is a very present reality in our cities. This course will survey residential segregation by asking some very basic questions: What does it mean to be segregated? How has segregation been different in different times and places? What are the consequences of segregation? Why does segregation occur? How can illegal segregation persist? What can be done about segregation?

SOC 340 Health, Behavior, and Health Policy
Spring. 3 credits. S. B. Caldwell.
This course examines the social contexts of physical and mental health, illness and medical care; its purpose is to explore the contributions of social science to health promotion and health policy. Topic areas include: social context of health, disease and illness; social organization of health services; use of health services; effectiveness of health service use; health promotion and disease prevention; and national health care policies.

SOC 341 Modern Euro Society and Politics (also GOVT 341)
Fall. 3 credits. J. Pontusson and D. Schirmer.
For course description, see GOVT 341.

[SOC 350 Comparative Revolutions
Not offered 1999–2000.
For description, see GOVT 350.]

SOC 353 Knowledge and Society
Spring. 3 credits. C. Leuenberger.
This course will focus on the historical evolution of the sociology of knowledge as a theoretical paradigm and an empirical research field. We will examine the phenomenological origins of the sociology of knowledge and many of its central texts. We will study how it has been applied to such areas as personhood, interaction, religion, identity and the emotions. We will also consider epistemological questions that arise and will cover various theoretical and empirical approaches which have been influenced by the sociology of knowledge such as ethnomethodology, conversation analysis and the sociology of science and technology.

[SOC 354 Law and the Social Order
Spring. 4 credits. Not offered 1999–2000. Staff.
In what ways, if any, do laws and legal institutions make a difference to people who have disputes? How did lawyering come to be a modern profession? How do business organizations deal with legal ambiguity in constructing symbols of compliance with laws? How do networks of interpretive communities structure the authority of law? By exploring selected topics such as these, we seek to understand the distinctive contributions of sociology to the study of law and the social order.]

SOC 356 Law in Society (also SOC 556)
Fall. 4 credits. W. Burkard.
The phrase "law and society" misleadingly suggests that we are speaking of two discrete entities: 'law' and 'society'. But law is itself part of society, its basic processes are social processes, and it contains within its own internal workings social dimensions worthy of study by the sociologist.

In this course we will examine law in society. The 'classical' sociological models of law-those of Marx, Weber and Durkheim-are well-represented. The works of several significant American and European critical legal theorists-those of the American Legal Realists, the Frankfurt School, Michel Foucalt, Roberto Unger, Duncan Kennedy, and Jurgen Habermas-are also well-represented, not only to facilitate an understanding of the bases for

the attacks on the liberal Rule of Law, but also to facilitate an understanding of the relationship between law and politics and the potential for revitalizing the Rule of Law through democracy. The major themes in 'classical' and contemporary legal anthropology-e.g. hegemony v. resistance, rule-centered v. processual v. interpretive paradigms-are reviewed. We also consider the extent to which the various perspectives on law in society have been appropriated internationally.

[SOC 358 Modes of Institutional Analysis (also SOC 558)
3 credits. Not offered 1999–2000.
D. Strang.
Much social theory treats individual behavior as occurring within and shaped by "institutions." For example, discussions of American health care policy emphasize not only the preferences of physicians, businesses, and consumers, but also the institutional structure of American government that provides multiple veto points and makes broad cross-class coalitions difficult to build. This course will examine the main types of institutional analysis active in contemporary social science.]

[SOC 370 Careers (also SOC 570)
4 credits. Not offered 1999–2000. S. Han.
By examining various career paths, we will consider the implications of career as a continuous process or as a sequence of positions. We will explore the differences and similarities among different career paths and lay out the patterns and structures of the career formation from a sociological point of view. We will also discuss the settings in which the career development takes place, giving some comparative attention to the ways of organizing careers in other societies.]

SOC 371 Comparative Social Stratification (also RSOC 370)
Fall. 3 credits. S. Feldman.
For course description, see RSOC 370.

SOC 373 Organizational Behavior Simulations
Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Limited enrollment. R. Stern.
See ILROB 373 for course description.

SOC 375 Classical Theory
Spring. 3 credits. S. Szonja.
Introduces students to major macro-sociological paradigms and encourages them to participate in "cross-paradigm" debates. The three main theorist of sociology (i.e., Marx, Durkheim, and Weber) are compared with respect to their approaches to the social sciences, their views on human history, their conceptions of capitalist society, and their ideas on social change. The assigned reading focus on the original writings of these theorists, while the lectures provide the requisite socio-historical context.

[SOC 380 Gender, Ideology, and Culture (also WOMNS 380)
4 credits. Not offered 1999–2000.
P. Becker.
This course will explore representations of women in popular culture, including images, narratives, and religious practices. We will examine the relationship between popular culture and ideology, and look at how women "read" popular culture. The aim of the course is to enable students to think critically and analyze the effects of ideological representations of difference on personal identity construction, status, and power relationships. Readings are drawn mostly from sociology of culture and cultural studies; most texts deal with popular culture and gender in the 19th- and 20th-century United States.]

SOC 393 Sociology of War & Peace
Fall. 4 credits. R. M. Williams, Jr. and J. Reppy.
Every human group, community, or society presents many examples of altruism, helping, cooperation, agreement, and social harmony. Each grouping or society also manifests numerous examples of competition, rivalry, opposition, disagreement, conflict, and violence. Both conflict and cooperation are permanent and common aspects of the human condition. Collective conflicts, especially wars and revolutions, are frequent and dramatic events. But "peace" and "war" are equally active social processes, not passive happenings. This course describes various commonly accepted but erroneous notions of the causes and consequences of war and deterrence. It deals with the major theories concerning the sources of war in international and intranational social systems. The last half of the course analyzes the modes, techniques, and outcomes of efforts to restrict, regulate, and resolve international conflicts.

Advanced Courses

The following courses are intended for advanced undergraduates with substantial preparation as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 400-level courses is one introductory course plus 301 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor in charge.

SOC 402 Doctors and Lawyers
Spring. 4credits. W. Burkard.
This seminar will examine sociological and historical materials on the education and training of physicians and attorneys and the practice of medicine and law. Students will utilize these materials to develop projects, e.g., the effects of managed care on medical practice, the role of clinical training in legal education, and will present their works-in-progress during the last half of the course. This course may interest upper-level students considering careers as physicians or attorneys, as well as potential sociologists of medicine, law, or the professions.

SOC 404 Economy and Family—Interrelationships Over the Life Course (also SOC 504)
Fall. 4 credits. M. Clarkberg.
While sociologists have often argued that the modern family has shed most of its "productive" functions, economic models have never been more central in the study of the family. This course explores the emerging dialogue between economists and family scholars along two related dimensions. First, we examine the [reciprocal] relationship between the structure of the economy (including income, careers, and workplace characteristics and policies) and family structure and outcomes. Second, we weigh the contribution of economic or "rational actor" models to the study of the family behaviors. These related economic processes will be used to examine marriage and divorce, time use and the division of labor within families, population growth, and the dynamics of health and aging.

SOC 408 Qualitative Methods (also SOC 508)
Spring. 4 credits. P. Becker.
This course is designed to introduce students to qualitative research. We will focus on interviewing, document review, and participant observation, although we will also talk about validity, reliability, ethics, and research-involvement, issues that are applicable to qualitative research more broadly. Each student will design and carry out a semester-length research project, keep a field journal, and do á final research report.

SOC 421 Regulating the Corporation (also ILROB 421)
Spring. 4 credits. R. Stern.
See ILROB 421 for course description.

SOC 427 The Professions: Organization and Control (also ILROB 427).
Fall. 3 credits. Prerequisite: permision of the instructor. P. Tolbert.
See ILROB 427 for course description.

[SOC 429 Culture and Agency (also SOC 529)
3 credits. Not offered 1999–2000.
P. Becker.
This course will look at the development of sociological theory on questions of culture and agency. Starting with various reflection or materialist approaches to culture that decenter agency, we will then follow the development of theories that explicitly link culture to actors and events in an attempt to account for both social reproduction and social change. The readings will cover a broad time span and a variety of intellectual approaches, including critical theory and cultural studies, but will center on the sociology of culture.]

SOC 430 Social Organization of Economic Action (also Soc 530)
Spring. 4 credits. S. Han.
See SOC 530 for course description.

SOC 437 Social Demography (also RSOC 438)
Fall. 3 credits. D. Gurak.
For course description, see RSOC 438.

[SOC 438 Immigration and Ethnic Identity
4 credits. Not offered 1999–2000.
V. G. Nee.
Immigration has been a central process in the peopling of American society. The early immigration to the United States involved primarily the migration and settlement of European national groups. Since 1965, the mix of immigration has shifted to include increasing diversity of ethnic groups, especially from Latin America and Asia. As American society moves into an era of increasing ethnic diversity, the issue of ethnic boundaries and identity become increasingly complex and problematic. This course seeks to examine the causes of international migration, the dynamics of immigrant incorporation into American society, and the making of new ethnic groups and identities.]

[SOC 444 Contemporary Research in Social Stratification
4 credits. Not offered 1999–2000.
R. L. Breiger.
Stratification and mobility as paired concepts, requiring mutual articulation. The interplay of structure (occupational groups, labor markets, organizational demographics, social classes)

and process (tracking, career trajectories, socioeconomic attainment). Recently formulated log-linear models of mobility and structure provide a central focus of the course.]

SOC 457 Health and Social Behavior (also HDFS 457)
Fall. 3 credits. Prerequisites: HDFS 150, HSS 201, Sociology 101, or Rural Sociology 101 and a course in statistics. Letter grades only. E. Wethington.
See HDFS 457 for course description.

SOC 480/580 Identity and Interest in Collective Action
Fall. 4 credits. M. Macy.
This seminar examines the problem of collective action from alternative theoretical perspectives: on centered on shared *interests*, the other on common *identities*. The former claims that groups are held together because the members are interdependent and thus benefit from cooperating in a common endeavor. Others argue that effective mobilization may depend on affective ties among participants who share a salient demarcation. We will explore this debate, and its possible resolution, through an examination of formal theoretical studies (especially computer simulation) as well as empirical research using experimentation and comparative case analysis. Key concepts addressed in the social dilemmas (and game-theoretic analysis), the free-rider problem, rational choice theory, formal and informal social control, social identity theory, and the role of networks and institutions as mechanisms for reconciling the tension between individual self-interest and collective obligations.

SOC 491 Independent Study
Fall or spring. 1–4 credits. For undergraduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure agreement of a faculty member to serve as supervisor for the project throughout the term. Graduate students should enroll in 891–892.

SOC 495 Honors Research
Fall or spring. 4 credits. Limited to sociology majors in their senior year. Prerequisite: permission of instructor.

SOC 496 Honors Thesis: Senior Year
Fall or spring. 4 credits. Prerequisite: Sociology 495.

Graduate Core Courses

These courses are primarily for graduate students in sociology but may be taken by other graduate students with permission of the instructor. Graduate students in sociology will normally take each of the five courses listed below, but with the concurrence of their special committees other arrangements may be made.

SOC 501 Basic Problems in Sociology I
Fall. 4 credits. V. Nee.
Analysis of theory shaping current sociological research. Examination of several central problems in sociological inquiry provides an occasion for understanding tensions and continuities between classical and contemporary approaches, for indicating the prospects for unifying microsociological and macrosociological orientations, and for developing a critical appreciation of efforts to integrate theory and research.

SOC 502 Basic Problems in Sociology II
Spring. 4 credits. D. Heckathorn.
Continuation of Sociology 501. Emphasis is on the logical analysis of theoretical perspectives, theories, and theoretical research programs shaping current sociological research. The course includes an introduction to basic concepts used in the logical analysis of theories and examines their application to specific theories and theoretical research programs. Strategies include functionalism, social exchange, and interactionism.

SOC 504 Economy and Family (also SOC 404)
Fall. 4 credits. M. Clarkberg
For course description, see SOC 404.

SOC 505 Research Methods I: Logic of Social Inference
Fall. 4 credits. Prerequisite: a first course in statistics and probability. M. Clarkberg.
This course is an introduction to techniques of social inference. We will cover research methods, sources of evidence, model design, and questions of empirical validity.

SOC 506 Research Methods in Sociology II
Spring. 4 credits. Prerequisite: Sociology 505 or equivalent. D. Grusky.
Introduction to the general linear model for discrete and continuous variables. Discussion of principles of estimation, model selection, coefficient interpretation, specification error, and fit assessment. The linear regression model is covered in depth and then generalized to the cases of logistic regression, probit, log-linear, log-multiplicative, latent class, and related models. Although the statistical theory underlying these models is reviewed, issues of interpretation and estimation typically take precedence. Emphasis is accordingly place on the analytic and stylistic issues that arise in writing research papers based on the general linear model.

SOC 507 Research Methods in Sociology III
Fall. 4 credits. Prerequisite: Sociology 506. D. Strang.
Models and methods for the quantitative and formal analysis of social dynamics. The course focuses on event history analysis in the case of discrete outcomes and pooled cross-sectional and time-series analysis in the case of continuous outcomes.

Graduate Seminars

These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. Which seminars are to be offered any term is determined in part by the interests of the students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each term.

SOC 508 Qualitative Methods (also SOC 408)
Spring. 4 credits. P. Becker.
This course is designed to introduce students to qualitative research. We will focus on interviewing, document review, and participant observation, although we will also talk about validity, reliability, ethics, and research-involvement, issues that are applicable to qualitative research more broadly. Each student will design and carry out a semester-length research project, keep a field journal, and do a final research report.

SOC 509 The Sociology of Marriage (also SOC 309)
Spring. 3 credits. M. Clarkberg.
For course description, see SOC 309.

[SOC 513 Social Networks and Social Structure (also SOC 313)
Spring. 4 credits. Not offered 1999–2000. Staff.]

SOC 526 Social Policy (also SOC 326)
Fall. 4 credits. S. B. Caldwell.

[SOC 529 Culture and Agency (also SOC 429)
4 credits. Not offered 1999–2000. P. Becker.
For description, see SOC 429.]

SOC 530 Social Organization of Economic Action (also SOC 430)
Spring. 4 credits. S. Han.
The issue of organizational boundary has been a central concern for both organizational sociology and economic sociology. The seminar approaches the issue, although it covers many other relevant literatures, mainly by playing two lines of argument against each other: transaction cost economics and transfer pricing problem. Meta-analytic techniques are also introduced, which are to be used for the final team project reviewing the empirical research on vertical integration.

SOC 556 Law in Society (also SOC 356)
Fall. 4 credits. W. Burkard.
For course description, see SOC 556.

[SOC 558 Modes of Institutional Analysis (also SOC 358)
4 credits. Not offered 1999–2000. D. Strang.]

[SOC 575 Seminar in Institutions and Rationality
2 credits. Not offered 1999–2000. V. Nee.
This year-long seminar examines the theoretical logic and assumptions of the new institutionalism in sociology and other social sciences. Understanding the part played by informal constraints of social norms and networks and by formal institutional arrangements (i.e., contracts, property rights, laws, regulations and the state) encompass the domain of study. The seminar will focus on comparative analysis and case studies illuminating and explaining the part played by institutions in structuring the economic and social transactions of society and specifying the causal mechanisms shaping path dependent institutional change.]

SOC 580 Simulating Social Dilemmas (also SOC 480)
Fall. 4 credits. M. Macy.

SOC 583 Transitions to Market Economies in China and Eastern Europe
Spring. 4 credits. V. Nee.
This course examines the problems and prospects of transitions to markets in China and Eastern Europe. It introduces concepts for understanding the state socialist economy that is being transformed and analyzes important social and economic developments since 1988. Topics include privatization, joint ventures, new capital markets, entrepreneurship, and labor relations in these changing economies.

SOC 591 Special Seminars in Sociology
Fall and spring. 2–4 credits.
These graduate seminars will be offered irregularly. Topics, credit, and instructors will vary from semester to semester. Students should look at the sociology department bulletin board at the beginning of each semester for possible offerings.

SOC 606–607 Sociology Colloquium
Fall and spring. No credit. Required of all sociology graduate students.
A series of talks representative of current research interests in sociology, given by distinguished visitors and faculty members.

SOC 608 Proseminar in Sociology
Fall. One credit. Enrollment restricted to first-semester sociology graduate students.
Discussions on the current state of sociology and on the research interests of the members of the field, given by members of the field.

[SOC 660 Social Movements
Not offered 1999–2000.
For description, see GOVT 660.]

SOC 691 Independent Study
Fall or spring. 2–4 credits. Prerequisite: graduate status and permission of a faculty member willing to supervise the project. Staff.
For graduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure agreement of a faculty member to serve as supervisor for the project throughout the term.

SOC 707 Literacy, Social Organization, Consciousness, and the Information Society (also ENGL 707, LING 707, PSYCH 707, WRIT 707
Fall. 5 credits. Letter or S-U.
C. Bazerman, visiting professor.
This course will investigate the literate practices of contemporary academic, disciplinary, and professional cultures, which are deeply implicated in contemporary forms of social organization and consciousness. We will examine the historical emergence and elaboration of literate practices and the implications for contemporary society moving from print to electronic media. This investigation will start with considering the interaction of literacy and social organization at earlier moments and will then consider some relevant theory to expose the ways text, social organization, and consciousness interact. We will then return to the rise and organization of academic, disciplinary, professional, and information culture. Each participant in the seminar will be responsible for developing a project examining socio-cognitive discursive practices within a classroom, disciplinary, professional, or cyber-information domain.

SOC 725 Analysis of Published Research in Organizational Behavior (also ILROB 725)
Fall. P. Tolbert.
For course description, see ILR 725.

SOC 891–892 Graduate Research
891, fall; 892, spring. Up to 4 credits each term, to be arranged. Prerequisite: graduate status and permission of a faculty member willing to supervise the project.

SOC 895–896 Thesis Research
895, fall; 896, spring. Up to 6 credits each term, to be arranged. Prerequisite: permission of thesis director.

THEATRE, FILM & DANCE

D. Bathrick, chair; R. Archer, S. Brookhouse, J. Chu, S. Cole (on leave spring 2000), D. Feldshuh, A. Fogelsanger, (coordinator, dance program); D. Fredericksen, (director, film studies); J. E. Gainor, (director, graduate studies, on leave fall 1999); K. Goetz (on leave spring 2000), D. Hall, C. Hatcher, E. Intemann, J. Johnson, J. Kovar, B. Levitt, P. Lillard, J. Morgenroth, C. Orr Brookhouse, M. Rivchin, R. Schneider, J. Self, B. Suber (on leave spring 2000), A. Van Dyke, (director, undergraduate studies); A. Villarejo

Through its courses and production laboratories, the department provides students with a wide range of opportunities in theatre, film, and dance. It offers a theatre arts major with concentration in theatre or film and a major in dance. These majors educate students in accordance with the general liberal arts ethic of the college. The programs in dance and film and the advanced undergraduate theatre program give some measure of professional preparation in those arts as well. The department encourages academic and studio participation by students from all disciplines and also provides the Cornell community with an opportunity to take part in its productions on an extracurricular basis.

Theatre Arts Major

Theatre Concentration

The theatre concentration offers studies in the history of theatre, dramatic theory and criticism, playwriting, acting, directing, design/technology, and stage management. Students interested in the Theatre Arts major should consult with Alison Van Dyke (Director of Undergraduate Studies, Theatre, Film & Dance).

Course requirements for theatre concentration: **Credits**

1) **THETR 240** and **THETR 241** (two-semester introduction to theatre) 8
THETR 250 Introduction to Theatre Design and Technology 4
THETR 280 Introduction to Acting 3

2) Four laboratory courses distributed as follows: **Credits**
THETR 151 Production Lab I 1–3
THETR 153, THETR 253, or **THETR 353** Stage Management Lab I, II, or III 1–3
THETR 155 Rehearsal and Performance or **THETR 151** in a different area 1–3
THETR 251 or **THETR 351** Production Lab II or III 1–4

3) Four courses in the area of **Theatre Studies** (see Theatre Studies section of theatre courses) chosen in the following manner:
one course must be at 300 level
one course must be at 400 level
two additional courses at the 300 or above level
one of the four courses must be pre–twentieth century.

4) Three courses (at least 9 credits) in other Theatre courses chosen in consultation with the faculty advisor. Course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.

5) Courses in which a student receives a grade below "C" cannot be used to fulfill the requirements for a Theatre Arts major.

Honors

The Theatre Arts honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be part of the honors program the student must maintain a GPA of 3.5 in classes for the theatre major and an average of 3.0 in all courses. Students must consult with their advisers in the spring of their junior year in order to enroll in the honors programs.

The Advanced Undergraduate Theatre Program

The department offers advanced study in directing, playwriting, design/technology and

stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended "track" of courses or equivalent experience. (For recommended course of study please see listing of courses at end of departmental listings.) Approval process will include a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

Film

The study of film began in this department in the 1930s and continues to be based here. In the interim years, however, it has also spread into a significant number of other departments in the college: Africana studies, anthropology, Asian studies, comparative literature, English, German studies, history, psychology, romance studies and women's studies. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film's relationships to myth and ideology, the use of film as historical evidence, film's efficacy as a rhetorical medium, and film's contribution to perennial issues in aesthetics, the history of the arts, and studies in cognition. In addition, courses in film production and the history and theory of film as an art are centered in this department.

This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The four ways currently being used are as follows: 1) concentrating on film within the Department of Theatre, Film & Dance; 2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); 3) focusing on film as a College Scholar; and 4) concentrating in Visual Studies. Students interested in option 4 should consult Marilyn Rivchin (Theatre, Film & Dance). Students interested in options 2 or 3 should consult Don Fredericksen (Theatre, Film & Dance) and Lynne Abel (director, College Scholar and Independent Major programs). Students interested in the first option should consult Don Fredericksen (director, Film Studies, Theatre, Film & Dance).

Film Concentration Requirements

The department's film concentration requires a total of 50 credits in film and related courses. Students should note that a number of film courses—including two required "core" courses: Theatre Arts 375 and 376—are offered in alternating years, during the fall semester. This means that *students cannot fulfill the requirements for the major in less than two years*, and that they should plan accordingly, in consultation with their major adviser. **In particular, students must plan to be in residence at Cornell during *both* their junior and senior year fall semesters.** Within the "core" required courses, Theatre Arts 274, Introduction to Film Analysis, should be taken during the sophomore year.

Majors wishing to utilize the production courses in a substantial manner must plan carefully and work within certain limits. These courses are: Theatre Arts 277, 377, 383, 413, 477, 493 and 653. Enrollment in each of these courses is limited by the nature of the work and by facilities. Enrollment in Theatre Arts 477 and 493 depends upon the quality of previous work in Theatre Arts 277, 377, 383 and/or 413; enrollment is not guaranteed. Majors *without* a strong interest in production can complete the production requirement with one course: Theatre Arts 277. Majors *with* a strong interest in production should begin instead with Theatre Arts 377, after they have taken Theatre Arts 274 in their sophomore year. **The total credits in production courses cannot exceed twenty hours; this limit is strictly enforced.**

1. A core of *four* film courses:

   THETR 274 Introduction to Film Analysis 4

   [**THETR 375** History and Theory of Commercial Narrative Film (offered alternate fall semesters; not offered 1999–2000)] 4

   THETR 376 History and Theory of Documentary and Experimental Film (offered alternate fall semesters; offered 1999–2000) 4

   [**THETR 277** Video Production I (offered alternate spring semesters, and summers; not offered 1999–2000)] 3

   OR

   THETR 377 Fundamentals of 16mm Filmmaking 4

2. *One* of the following theatre courses:

   THETR 250 Fundamentals of Theatre Design/Technology 4

   THETR 280 Introduction to Acting 3

   THETR 398 Directing I (prerequisite: permission) 3

3. *Four* courses (15–16 credits) in film offered by Theatre, Film & Dance as below, or by other departments (with consent of adviser):

   THETR 264 Interpreting Hitchcock 4

   [**THETR 275** Introduction to Film Theory (offered alternate spring semesters; not offered 1999–2000)] 4

   [**THETR 277** Video Production I (offered alternate spring semesters; not offered 1999–2000)] 3

   THETR 291 Filming Other Cultures 3

   THETR 369 Studies in Film Analysis 4

   [**THETR 378** Soviet Film of 20s and French Film of 60s (offered alternate spring semesters not offered 1999–2000)] 4

   THETR 379 Modern Documentary Film (offered alternate spring semesters; offered 1999–2000) 4

   THETR 383 Screenwriting 4

   THETR 386 Third Cinema (Not alternate years; offered 1999–2000) 4

   THETR 391 Media Arts Studio I 3

   THETR 392 Media Arts Studio II 3

   THETR 395 Video: Art, Theory, Politics 4

   [**THETR 396** German Film (offered occasionally; not offered 1999–2000)] 4

   [**THETR 413** Film and Performance (offered occasionally; not offered 1999–2000)] 4

   AS&RC 435 African Cinema 4

   [**THETR 473** Film and Spiritual Questions (offered alternate years; not offered 1999–2000)] 4

   THETR 474 Jung, Film, and the Process of Self-Knowledge (offered alternate years; offered 1999–2000) 4

   THETR 475 Seminar in the Cinema I 4

   [**THETR 476** Seminar in the Cinema II (offered occasionally; not offered 1999–2000)] 4

   THETR 477 Intermediate Film and Video Projects 4

   THETR 493 Advanced Film and Video Projects 4

   THETR 653 Myth onto Film 4

4. 15 credits of related coursework inside or outside of the Department of Theatre, Film & Dance (as approved by adviser). The courses chosen to fulfill this requirement should reinforce the student's particular interest in film, and will not necessarily be film courses per se. For example, a student interested in the psychology of film, or in ethnographic film, or in film vis-a-vis intellectual or social history, will be encouraged to choose "related course work" in those areas.
5. With a grade of less than C, a course cannot be used toward the concentration.
6. Course work in production cannot exceed twenty credit hours.

Honors

Students who have maintained a GPA of 3.5 in their film concentration courses and an average of 3.0 in all courses may elect to work for honors in film during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in film.

The Advanced Undergraduate Film Program

The department offers advanced study in filmmaking to students who qualify on the basis of outstanding achievement in film studies and film production courses. Acceptance to the AUFP and admission to the advanced film production course (THETR 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project. Up to four of these students will also be selected to receive the Melville Shavelson Award to help fund their advanced film projects.

Film Study Abroad

The College of Arts and Sciences, through this department and in consort with a number of other colleges and universities, offers up to a full year of study at the Inter-University Center for Film and Critical Studies in Paris, France.

The center's program is theoretical, critical, and historical. It is most useful to students pursuing a major in film studies and serves as an intensive supplement to their Cornell film courses. Fluency in French is required, and Theatre Arts 274 or 275 and 375 are prerequisites. Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center.

The Dance Program

The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, and the history, theory, and criticism of dance. Technique courses include modern dance at four levels and ballet at three levels. Other dance forms, such as historical dances, Japanese Noh, Indian and Javanese, dance are offered on a rotating basis. Courses in African, jazz and ballroom dance, taken through the Physical Education program, supplement these offerings. Technique classes develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to eight academic credits (one each semester) in technique classes. Students may also satisfy the physical education requirement by taking dance technique classes in the dance program. The schedule for all dance technique classes is available in the main office of the Center for Theatre Arts. Students taking technique for academic credit must also register through their own colleges.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance classes is by audition. Students may receive one academic credit (S-U grades only) when performing in student-faculty concerts by registering for THETR 155.

The Dance Major

To be admitted to the major, students must have completed two technique courses in modern dance or ballet at level II or above, and THETR 210 (Beginning Dance Composition). It is recommended that THETR 201 (Dance Improvisation), THETR 250 (Fundamentals of Theatre Design and Technology) and Music 105 (Introduction to Music Theory) be taken before the junior year. It is also strongly recommended, but not required, that dance majors take THETR 233 (Explorations in Movement and Performance). The following requirements are expected of the major.

Prerequisites for the Major:

THETR 210 Beginning Dance Composition and Music Resources

Two technique courses in modern dance or ballet at level II or above

Requirements for the Major:	**Credits**
Music 105 Introduction to Music Theory (or substitute at the appropriate level)	3
ONE course in historical dance, jazz, a non-western form, folk dance, or ballroom dance	0–3
TWO semesters each of ballet and modern dance (in addition to the prerequisite)	4
THETR 155 Rehearsal and Performance	1
THETR 201 Dance Improvisation	3
THETR 250 Fundamentals of Design and Technology	4
THETR 310–311 Intermediate Dance Composition	8
THETR 312 Physical Analysis of Movement	3
THETR 314–315 Western Dance History	8
THETR 410 Advanced Dance Composition	4
THETR 418 Seminar in History of Dance (or other 400-level academic dance course)	4
THETR 491 Senior Project	4
Total	46–49

Students will be expected to perform in at least two concerts and to present at least two of their own dances, in addition to the senior project.

Honors

Students who have maintained a GPA of 3.5 in classes for the dance major and an average of 3.0 in all courses may elect to work for honors in dance during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in dance.

Department Courses:

See individual sections for: Freshman Writing Seminars; General Survey Courses; Theatre Studies; Acting; Directing; Playwriting; Design; Technology; Stage Management; Independent Study, Internships and Honors; Film; Dance.

First-Year Writing Seminars

THETR 147 FWS Phantasms and Philes
Fall. 3 credits. T. Rhys.
What is it about the supernatural that appeals to audiences? Is it the visual spectacle, or something deeper? What happens when we put our darkest fears on stage? This course explores these questions by juxtaposing a present-day drama—Fox Television's The X-Files—with the plays of the British gothic period.

THETR 152 FWS Smoking Sirens: Femmes Fatales in Popular Culture
Fall and spring. 3 credits. H. Young Jr.
This course explores the development of the 'femme fatale' in popular culture. It uses novels, films, and plays in conjunction with relevant theoretical texts to chronicle her rise over the past seventy years. Specifically, this course studies the socio-political positioning of women in modern art, closely analyzes gender construction and performances and probes into the issues of sexuality and sexual differences. Representative texts will include *Double Indemnity*, the play M Butterfly, and the films The Blue Angel, Jules et Jim, La Femme Nikita, and Basic Instinct. Writing assignments will include short first person narratives, play analyses, film reviews and a screenwriting exercise. Weekly films screenings will be required.

THETR 162 FWS Beyond Bruce Lee: Martial Arts Films of Hong Kong
Fall. 3 credits. C. Conceison.
"Kung-fu" films featuring Bruce Lee, Jackie Chan, and Jet Li will be viewed and discussed in terms of their impact domestically and internationally, and examined more deeply to explore their cultural and political significance: How do they define Chinese masculinity? How do they contribute to the effort to construct a narrative history for colonized Hong Kong? What do they reveal about Hong Kong's relationship with mainland China? We will evaluate this in light of the recent return of HK to Chinese governance. Weekly film screenings will be required. Readings include background material in history and film theory, and both popular and scholarly articles on the films and relevant issues. Papers will include the above topics, as well as a movie review and brief scene script. Films include *Dragon*, *Rumble in the Bronx*, *Once Upon a Time in China*, *Lethal Weapon 4* and others.

THETR 181 FWS Stages of Desiring
Fall and spring. 3 credits. D. Matson.
Is gay theater its own art? Is theater a gay art? This course is a sampling of English and American drama dealing with or written by lesbians, gays, bisexuals, and transgendered persons, or more simply, queers. Using Oscar Wilde's *The Importance of Being Earnest* as our point of departure, we'll work our way to the present, visiting such playwrights as Tennessee Williams, Edward Albee, Carol Churchill, Holly Hughes, and Larry Kramer before finishing out the course with Tony Kushner's epic *Angels in America*. Through reaction papers, class discussion, and possibly even the writing of a one-act play, students will be expected to confront candidly questions of queerness and theater; need there be any distinction between queer theater and straight theater? and just what is it about the theater that offers queerness a sanctuary? These questions will inevitably lead us to issues of stereotyping, stigmatizing, performing, gender, and dressing in drag.

THETR 185 FWS Film, Fantasy, and the Bard
Fall and spring. 3 credits. E. Intemann.
Today's popular literature and films are often inspired by historical literary sources, and Shakespeare's plays are especially rich in finding their way into current works. This course will examine Shakespeare, as realized in various forms of today's film and popular literature. The class will explore *King Lear* and *A Midsummer Night's Dream* as envisioned by Shakespeare and as reinterpreted in the modern film and fantasy literature genres. Although the writing assignments will be primarily critical essays, students will be given the opportunity to write some fiction. Issues discussed might include how content relates to form, be it literary or dramatic; how our modern sensibility affects our perception of the work; how themes are emphasized or de-emphasized depending on the historical and cultural biases of the audience; and how the liberties that Shakespeare may have taken with his source material compare to those currently taken with his works.

General Survey Courses

THETR 230 Creating Theatre
Spring. 3 credits. Limited to 25 students. D. Hall and faculty.
An introduction to theatrical production for the non-major. Students will develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Center for Theatre Arts, and by attending department productions. Some writing is required.

THETR 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also English 301 and Music 372)
Spring. 4 credits. Limited to 40 students. For description, see English 301.

[THETR 430 Introduction to Theatre Management
Fall. 4 credits. Limited to 15 students. Not offered 1999–2000. J. E. Gainor.
This class is designed to introduce students to the profession of theatre management. The class will be a project-oriented study of components of the field, such as marketing, fundraising, contracts, organizational structures, personnel management, accounting, and box office.]

Theatre Studies Courses

[THETR 223 The Comic Theater (also Comparative Literature 223 and Classics 223) #
Spring. 3 credits. Not offered 1999–2000. J. Rusten.
For description, see Classics 223.]

THETR 240 Introduction to World Theatre I #
Fall. 4 credits. R. Schneider.
A survey of the roots of theatrical representation around the world from ritual practice to classical Greek and Roman theatre as well as Indian, Chinese, Japanese, African, and native performance. A charting of major developments in the theatre—playwriting, acting, staging, architecture—through the 17th century.

THETR 241 Introduction to World Theatre II #
Spring. 4 credits. R. Schneider.
A survey of the major developments and innovations in world theatre since 1642, exploring the evolution of naturalism, the birth of the director, as well as the emergence of the avant-garde in the West and its supposed demise today. This course will examine the impact of colonialism on theatre practices around the world.

THETR 320 Queer Theatre (also English 352 and Women's Studies 320)
Spring. 4 credits. Limited to 20 students. J. E. Gainor and D. Matson.
What is Queer Theatre and did it exist before the politicization of Queer Identity? Starting with the Renaissance in England, we will examine dramatic, critical, historical and other writing as we pose questions about spectatorship, visibility and professionalism. Evening film screenings will be required.

THETR 322 Russian Drama and Theatre (also Russian Literature 332)
Spring. 4 credits. S. Senderovich.
See Russian Literature 322 for description.

[THETR 332 Medieval and Renaissance Theatre (also Comparative Literature 332 and English)
Spring. 4 credits. Prerequisites: THETR 240 or permission of instructor. Not offered 1999–2000. J. E. Gainor.
Besides the discussion of representative plays from these periods, this class may focus on questions such as the staging of medieval drama, the relation between the church and the community, and the ways in which historians and critics have interpreted the Renaissance, especially in light of class, race, and gender on stage as well as in the audience.]

[THETR 333 European Drama 1660–1900: Moliere to Ibsen (also English 335 and Comparative Literature 336)
Spring. 4 credits. Not offered 1999–2000. R. Parker.
See English 335 for description.]

THETR 334 American Indians and Film (also Am. St. 338)
Fall only. 4 credits. L. Black.
We will use documentaries, classic Westerns, comedies, modern-day commentaries on American Indians, and recent films made by American Indians (*Smoke Signals*, *Imagining Indians*) to explore constructions of Indians in film and the creations of Indian and non-Indian identities through film narrative.

[THETR 335 The Modern and Contemporary Theatre (also Comparative Literature 335)
Fall. 4 credits. Prerequisites: THETR 240 or permission of instructor. Not offered 1999–2000. R. Schneider.
A study of the drama and its cultural contexts from the late nineteenth century to the present. This course will raise questions about modern as well as postmodern theories of performance and the role of theatre in society. It may also examine western style theatre in non-western settings.]

[THETR 336 American Drama and Theatre (also English 336)
Spring. 4 credits. Limited to 25 students. Prerequisite: permission of instructor. Not offered 1999–2000. J. E. Gainor.
A survey of American theatre from 1900–1960. Emphasis will be placed on the relationship among theatre, culture, and history.]

[THETR 337 Contemporary American Theatre (also English 337)
4 credits. Limited to 20 students. Not offered 1999–2000. J. E. Gainor.
A survey of American drama and theatre post-1960. Particular emphasis will be placed on plays by women and dramatists of color to explore questions of identity and theatrical responses to contemporary American culture.]

[THETR 339 Theories and Techniques of 20th Century Western Theatre
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. R. Schneider.
A look at Western performance across the 20th century emphasizing theatre theory and directing technique rather than drama. Beginning with symbolism, naturalism and the avant-garde we'll move on to explore Meyerhold, dada, Brecht, Artaud, Happenings and performance art, Boal, theatre images, feminist theatre, multicultural theatre, theatre of AIDS, and other theatre issues and innovations. Students will engage in performance projects.]

THETR 345 The Tragic Theater (also Classics 345 and Comp. Literature 344)
Spring. 4 credits. Limited to 40 students. F. Ahl.
See Classics 345 for description.

[THETR 372 English Drama to 1700 (also English 372) #
Fall. 4 credits. Not offered 1999–2000. S. McMillin.
See English 372 for description.]

[THETR 373 English Drama from 1700 to the Present (also English 373)
4 credits. Not offered 1999–2000. S. McMillin.
See English 373 for description.]

THETR 405 Operatic Contacts (also Society for the Humanities 405, German Studies 404, Comparative Literature 408)
Fall. 4 credits. Permission of instructor. Limited to 15 students. A. Groos.
See Society for the Humanities for complete description.

[THETR 420 Brecht, Artaud, Mueller, Wilson (also German Studies 430 and Comparative Literature 430)
4 credits. Not offered 1999–2000. D. Bathrick.
See German Studies 430 for description.]

[THETR 424 Elizabethan and Jacobean Drama (also English 425)
Fall. 4 credits. Limited to 15 students. Not offered 1999–2000. B. Adams.
See English 425 for a complete description.]

[THETR 425 Introduction to Dramaturgy and Dramatic Criticism
4 credits. Prerequisite: THETR 240 & 241, or their equivalents. Limited to 15 students. Not offered 1999–2000. J. E. Gainor.
What is dramaturg? What does a dramaturg do? We will examine this position in the theatre in both historical and practical modes. The class will be primarily a practicum, involving dramaturgical work on departmental productions, participation with student playwrights on new script development, and practice in the writing of dramatic criticism.]

THETR 431 Theory of the Theatre and Drama (also Comparative Literature 433) #
Spring. 4 credits. Prerequisite: some theatre history and dramatic literature work at the 300 level or permission of instructor.
A survey of dramatic theory and theories of theatrical representation from Aristotle to the present.

[THETR 433 Dramaturgy: Play and Period (also English 435)
Fall. 4 credits. Not offered 1999–2000. J. E. Gainor.
Topic for 1997: The Theatre of George Bernard Shaw. A survey of the plays and non-dramatic writings in their social, historical, and theatrical contexts.]

[THETR 435 Special Topics: The Victorian and Edwardian Theatre (also English 422)
Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000. J. E. Gainor.
An in-depth exploration of theatre and drama in England from the mid-nineteenth through early twentieth centuries. Topics will include melodrama, the social problem play, the popular stage, the conditions of theatrical production, and the impact of European theatre. Representative authors include Robertson, Pinero, Shaw, Wilde, Robins, Galsworthy, and St. John.]

[THETR 436 The Female Dramatic Tradition (also Women's Studies 433)
4 credits. Not offered 1999–2000. J. E. Gainor.
Is there a "female dramaturgy"? What is the female tradition in the theatre? The course will explore these questions through an investigation of texts by women dramatists, including Hrotsvitha, Aphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.]

[THETR 438 East and West German Drama (also German Studies 438 and Theatre 648)
4 credits. Not offered 1999–2000. D. Bathrick.
Major historical and textual developments in German theatre from the end of World War II to the present. Leading dramatists from West and East Germany, Switzerland, and Austria (Brecht, Frisch, Durrenmatt, Weiss, Hochhuth, Muller, Braun, Kroetz, Handke, and others) will be treated in the light of the political events and aesthetic-dramaturgical traditions from which they emerge and with which they are taking issue.]

[THETR 439 Theatre of Commodities: Advertising, TV, and Performance (also Women's Studies 441/641)
Spring. 3 credits. Not offered 1999–2000. R. Schneider and A. Villarejo.
This course will explore the employment of bodies and objects as representational emblems of value and desire in late capitalism. We will analyze the ways in which desire circulates through print advertising, television, and the avant-garde. We will examine socio-cultural constructions of the relationship between screen bodies and live bodies, especially as involves advertising and audience. We will explore conceptual and culturally inscribed spaces between notions of desire, fulfillment, deferral and value coding. Throughout, feminist analyses of gender construction and deployment in the realms of the market, popular culture, and "high" art will frame our inquiry. Finally we will ask questions about the problematic of interventionary tactics in art and popular culture relative to consumption and commodity aesthetics. The course will draw on Williamson, Marx, Benjamin, Freud, Irigaray, de Certeau, Baudrillard, Dienst, Goldman, McClintock, Bordieu, Friedan, Haug, Lee, Fiske, Goffman, Lears, Murray, Taylor, and others as well as numerous print advertisements, television texts, and performance artworks.]

THETR 445 Text Analysis for Production: How to Get from the Text onto the Stage
Fall. 4 credits. Prerequisite: THETR 240 or THETR 281 or THETR 250 or THETR 398, and permission of instructor. Limited to 15 students. B. Levitt.
This course examines the play as the central, essential source for production decisions made by the actor, the director, the designer and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer or dramaturg, as well as through two to three papers.

[THETR 454 American Musical Theatre (also English 454)
Spring. 4 credits. Prerequisite: ENGL 272 or THETR 240 and 241 and ability to read music at the level of MUSIC 105. Not offered 1999–2000. S. McMillin.
See English 454 for description.]

[THETR 459 Contemporary British Drama (also English 459)
Fall. 4 credits. Limited to 15 students. Not offered 1999–2000. S. McMillin.
See English 459 for a complete description.]

[THETR 470 The Japanese Noh Theater and Modern Dramatists (also Asian Studies 470 and Comparative Literature 470) @
Fall. 4 credits. Alternates with THETR 471. Not offered 1999–2000. K. Brazell.
For description, see Asian Studies 470.]

[THETR 471 Japanese Theatre (also Asian Studies 471) @ #
Fall. 4 credits. Not offered 1999–2000. K. Brazell.
For description, see Asian Studies 471.]

THETR 600 Proseminar in Theatre Studies
Spring. 4 credits. Limited to Theatre Arts graduate students.
An introduction to the theory and methods involved in the study of the theatre. Attention will focus on pedogogy and the profession in Part I. Part II will explore current scholarly trends.

THETR 637 Seminar in Dramatic Theory (also Comparative Literature 638)
Fall. 4 credits. Prerequisite: permission of instructor. R. Schneider.
Topic varies each semester.

[THETR 648 East and West German Drama: Post-1945 (also THETR 438 and German Studies 438)
3 credits. Not offered 1999–2000. D. Bathrick.]

THETR 660 Visual Ideology (also Comparative Literature 660 and German Studies 660)
Spring. 4 credits. G. Waite.
For description, see German Studies 660.

[THETR 679 Bertolt Brecht in Context (also German Studies 679 and Comparative Literature 679)
4 credits. Requirements: seminar paper that will form the basis for an oral presentation for class discussion. Not offered 1999–2000. D. Bathrick.
See German Studies 679 for description.]

[THETR 703 Theorizing Film (also English 703 and French Lit 695)
Fall. 4 credits. Not offered 1999–2000. T. Murray.
See English 703 for description.]

Acting

THETR 155 Rehearsal and Performance
Fall or spring. 1–2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the department's scheduled auditions. Students should add this course only after they have been assigned roles. S-U grades only.
The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

THETR 205 Rehearsal Workshop
Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production; and by permission. Staff.
This course will enable students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the class will depend on the needs of a particular production (history, choreography, textwork, dramaturgy, etc).

THETR 280 Introduction to Acting
Fall or spring. 3 credits. Each section is limited to 16 students. Preregistration and registration only through roster in the department office, Center for Theatre Arts. Staff.
An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus will be on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

THETR 281 Acting I
Fall or spring. 3 credits. Each section limited to 14 students. Prerequisites: THETR 280 and audition. Registration only through roster in department office, the Center for Theatre Arts. 281 is restricted to sophmores and above. B. Levitt and S. Cole.
Practical exploration of the actor's craft through improvisation and exercises in physical and psychological action. Scene study utilizing the plays of Williams, Inge, and Miller.

THETR 282 Standard American Stage Speech
Fall. 3 credits. Prerequisites: THETR 280 and permission of instructor. A. Van Dyke.
An introduction to Standard American Stage Speech. We will study various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Checkov, Moliere, etc.

[THETR 283 Voice and Speech for Performance
2 credits. Limited to 12 students. Primarily for department majors. Prerequisite: permission of instructor. Not offered 1999–2000. Faculty.
Registration only through department roster in the main office of the Center for Theatre Arts. Development of the speaking voice with additional emphasis on dramatic interpretation.]

[THETR 284 Speech and Dialects for Performance
Spring. 3 credits. Limited to 12 students. Primarily for department majors or advance undergraduate training program candidates. Prerequisites: THETR 281 and permission of instructor. Not offered 1999–2000. A. Van Dyke.
Development of speech and dialects in dramatic text.]

THETR 287 Summer Acting Workshop
Summer. 3 credits. Limited to 16 students in a section. Levitt and staff.
An introduction to the processes of acting. Practice in training techniques, rehearsal procedures, and methodology.

THETR 380 Acting II
Fall. 3 credits. Prerequisite: THETR 281 and audition. Limited to 12 students. S. Cole.
A continuation of Acting I. Special consideration will be given to a physical approach to characterization utilizing the plays of Chekhov and Ibsen.

THETR 381 Acting III: Advanced Scene Study
Spring. 3 credits. Prerequisite: THETR 380 and audition. Limited to 10 students. B. Levitt.
This course focuses on advanced problems in language and period style (movement, bows, curtsies, and period dances). Monologues and scenes will be drawn from these playwrights: Shakespeare and Moliere.

[THETR 385 Advanced Studies in Acting Techniques
Spring. 3 credits. Prerequisites: THETR 281, Audition and permission of instructor. Limited to 10 students. Topic varies each semester. May be repeated for credit. Not offered 1999–2000. B. Levitt.]

[THETR 387 Movement for the Actor
Fall. 3 credits. Prerequisites: THETR 281 and permission of instructor. Limited to 10 students. Not offered 1999–2000. Staff.
Physical skills for the actor will be developed through work with LeCoq-based Neutral Mask corporeal mime, and physical acting techniques.]

[THETR 415 The History of Acting
Spring. 3 credits. Limited to 10 students. Prerequisites: THETR 380 and permission of instructor. Not offered 1999–2000. S. Cole.
A study of the art of acting in its historical and cultural context from the Greeks to the early 20th Century, with an emphasis on an analytical understanding of acting methodology in relation to social context. Lectures and film showings, with student papers and presentations required.]

Directing

THETR 177 Student Laboratory Theatre Company
Spring. 1–2 credits.
The Student Laboratory Theatre Company is a group of student-actors who earn credit by acting in three scenes directed by students taking THETR 498. Students enrolling in SLTC for credit will earn 1 credit for 2 projects and 2 credits for 3 projects. SLTC also meets with directors once a week.

THETR 398 Fundamentals of Directing I
Fall. 3 credits. Limited to 10 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. D. Feldshuh.
Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student's awareness of why and how certain stage events communicate effectively to an audience. Each student will direct a number of exercises as well as a short scene.

THETR 498 Fundamentals of Directing II
Spring. 4 credits. Enrollment strictly limited. Prerequisite: THETR 280 and 398, and permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Recommended: THETR 250 and 281. D. Feldshuh.
This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student will direct a series of projects and public presentations focusing on specific directorial challenges.

THETR 499 Practicum in Directing
Fall or spring. 1–4 credits. Prerequisites: THETR 240, 250, 280, 398, 498, and permission of instructor. D. Feldshuh.
This course will allow the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in conjunction with a faculty mentor. It may also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

Playwriting

THETR 348 Playwriting
Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. Staff.
Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals and write. The semester culminates in the completion of a twenty to thirty minute one-act play.

[THETR 349 Advanced Playwriting
Spring. 4 credits. Prerequisite: THETR 348 or permission of instructor. Not offered 1999–2000. Staff.
A continuation of Theatre Arts 348, emphasizing advanced techniques and culminating in the completion of a full-length play.]

[THETR 497 Seminar in Playwriting
1–4 credits. Prerequisite: THETR 348 and 349 and permission of instructor. Not offered 1999–2000. Staff.
This class is an extension of THETR 348 and 349. Students formulate a process for developing a full-length play, which they develop over the course of the semester. The class meetings are made up of discussions about the students' process and creative tactics, and reading of material generated by the playwrights.]

Design, Technology, and Stage Management

Design

THETR 250 Fundamentals of Theatre Design and Technology
Fall and spring. 4 credits. Not open to first term freshman. Limited to 12 students. Registration only through department roster in CTA 225. A minimum of one credit of Production Lab (THETR 151 or 251) is strongly recommended concurrently. K. Goetz, R. Archer, J. Johnson, C. Hatcher, C. Orr Brookhouse, and E. Intemann.
An introduction to design and technology in the theatre. Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage. Students are required to purchase materials, which the instructors will specify (approximate cost, $40).

[THETR 263 CAD Studio for the Theatre
Spring. 3 credits. Limited to 8 students. Prerequisite: permission of instructor. Not offered 1999–2000. K. Goetz and selected theatre production faculty and staff.
Students will utilize commercially available 3D modeling and rendering software to explore the process of designing scenery and lighting for the live theatre. MiniCAD, Vectorworks, Artlantis, and Photoshop will be the primary applications used. Former theatre experience is helpful but not essential.]

[THETR 319 Music, Dance, and Light
Fall. 3 credits. Attendance at dance concerts and music concerts is required. Not offered 1999–2000. E. Intemann and A. Fogelsanger, J. Morgenroth.
Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.]

THETR 343 Costume History: From Fig Leaf to Vanity
Fall. 3 credits. Limited to 20 students. C. Orr Brookhouse.
Costume History will offer an overview of the history of clothing from the first signs of clothing to the early 20th century. It will investigate personal, social, religious, political, and regional reasons for why and how clothing evolved.

THETR 362 Lighting Design Studio I: Lighting in the Performing Arts
Fall. 4 credits. Prerequisite: THETR 250 or permission of instructor. Limited to 6 students. E. Intemann.
The theory and practice of lighting design as a medium for artistic expression. This course will explore the aesthetic and mechanical aspects of light and their application in the theatre. Artistic style and viewpoint will also covered.

THETR 364 Scenic Design Studio
Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 250 and 340 or permission of instructor. K. Goetz.
An exploration of the process of designing scenery for the live theatre. Projects will employ various media to explore dramatic use of architecture, the scenic space, and elements of interior design. Experience in theatre production and graphic skills is helpful but not essential. Students are required to purchase materials which the instructor will specify (approximate cost: $50.00).

THETR 366 Costume Design Studio
Spring. 3 credits. Students are required to purchase materials which the instructor will specify (approximate cost: $50.00). Limited to 10 students. J. Johnson.
Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style. May be repeated for credit.

THETR 368 Sound Design Studio
Spring. 4 credits. Limited enrollment to 6 students. Prerequisite: THETR 250 or 252 or permission of instructor. Students are required to purchase supplies (approximate cost $20.00). C. Hatcher.
The use of sound as a medium of design for the theatre; research and creation of the theatrical sound score, digital recording and basic audio engineering techniques with projects in post production studio engineering and live recording. Emphasis is on producing viable sound designs for live theatre events.

THETR 369 Digital Audio Studio
Fall. 3 credits. Limited to 6 students. By permission of instructor only. C. Hatcher.
A project oriented course focusing on current techniques in digital audio recording, editing and processing for theatre and video production. Students will explore Digidesign's Pro Tools multitrack environment, MOTU's Digital Performer including basic MIDI operation and methods of synching audio to video. Some experience with audio recording, music or video production is helpful but not necessary.

THETR 462 Lighting Design Studio II
Spring. 4 credits. Prerequisite: THETR 362 or permission of instructor. Limited to 6 students. E. Intemann.
This course concentrates on designing lighting for different genres in various venues, developing the lighting designer as a versatile artist. Personal style and artistic commitment will be stressed.

Technology

THETR 252 Technical Production Studio I
Fall. 3 credits. Limited to 6 students. D. Hall and J. Zornow.
Stage Lighting and Sound Technology: the practical aspects of lighting and sound technology including equipment setup, engineering, electrics, organization, recording techniques, and production paperwork will be explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of fifty hours for the semester.

THETR 254 Theatrical Make-up Studio
Fall. 3 credits. Students are required to purchase make-up kits which the instructor will provide (approximate cost $50.00). Limited to 12 students. J. Johnson.
Basic techniques of make-up for the stage including corrective, old age, and fantasy; use of prosthetics, wigs, hair and hairpieces.

THETR 256 Technical Production Studio II
Spring. 3 credits. Limited to 6 students. Students are required to purchase materials, which the instructor will specify (approximate cost $25.). Prerequisite: THETR 250 or permission of instructor. Additional hands-on time in prop and paint shops required, to be discussed. T. Honesty.
Scene Painting: introduction to the basic techniques of painting scenery, including but not limited to the layout and painting of bricks, marble, stone, and wood grain for the theatre. Individual projects in scene painting and participation on paint crew for productions are included. **Stage Properties**: introduction to the processes of propmaking, including furniture construction and upholstery techniques, use of shop tools and materials, period research, and painting and finishing.

THETR 340 Theatrical Drafting and Technical Drawing Studio
Fall. 3 credits. Limited to 6 students. Prerequisite: THETR 250 or permission of instructor. S. Brookhouse.
Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept of an individual style in the approach to drafting for the theatre. A series of projects to familiarize students with the convention and process of visualization and drafting.

THETR 352 Themed Entertainment: The Technical Perspective
Fall. 3 credits. Limited to 12 students. R. Archer.
Exploration into the integration of art and science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions will deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus will be on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

THETR 354 Stagecraft Studio
Fall. 3 credits. A minimum of one credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. R. Archer.
An exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

THETR 356 Costume Construction Studio
Spring. 3 credits. A minimum of one credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. Lab fee of $25 to be paid in class. C. Orr Brookhouse.
A project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

[THETR 358 Costume Draping Studio
Fall. 3 credits. Prerequisite: THETR 356 or permission of instructor. Not offered 1999–2000. J. Johnson.
The course will provide further experiences in the area of costume construction, particularly in the specialized area of patterning. Students will learn to make patterns by the method of draping on the form and will conclude the class by building a complete costume (from inside out) using that method of patterning.]

Stage Management

THETR 153 Stage Management Production Laboratory I
Fall and spring. 1–2 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium Theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.
Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or S.L.T.C. under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 253 Stage Management Laboratory II
Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.
Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 353 Stage Management Laboratory III
Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium Theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of the instructor. P. Lillard.
Practical experience in theatrical production as stage manager for a dance theatre concert, or an AUTP production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 370 Stage Management Studio
Fall. 2 credits. Prerequisite: THETR 250 or 280 or permission of instructor. P. Lillard.
Introduction to the concepts and techniques of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a

working stage manager or assistant stage manager. THETR 153, 253, and 353 complement this course.

THETR 453 Stage Management Laboratory IV
Fall and spring. 1–5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.
Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

Production Laboratories

THETR 151 Production Laboratory I
Fall and spring. 1–3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre. P. Lillard, S. Brookhouse, T. Honesty, J. Zornow, C. Orr Brookhouse.
This course provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew. No prerequisites or experience required.

THETR 251 Production Laboratory II
Fall and spring. 1–3 credits. Prerequisite: permission of instructor. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre. P. Lillard, S. Brookhouse, D. Hall, C. Hatcher, C. Orr Brookhouse, J. Zornow.
Practical experience in theatrical production, as a light board operator, sound board operator, sound technician, head dresser or scenery/props special project.

THETR 351 Production Laboratory III
Fall and spring. 1–3 credits. May be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann, J. Zornow, C. Hatcher, J. Johnson, C. Orr Brookhouse.
Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager or assistant to a faculty or guest director or designer.

THETR 451 Production Laboratory IV
Fall and spring. 1–4 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, C. Hatcher, J. Johnson, E. Intemann, C. Orr Brookhouse.
Practical experience in theatrical production, in the position of designer, shop manager, technical director or sound engineer.

Independent Study, Internships and Honors

THETR 300 Independent Study
Summer, fall, or spring. 1–4 credits.
Independent Study in the Theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 CTA.

THETR 485 Undergraduate Internship
Fall, spring, or summer. 1–3 credits.
To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *prior* to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 495 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance.
This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

THETR 496 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors student in Theatre, Film and Dance.
This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.Film

Film

THETR 264 Interpreting Hitchcock (also English 263)
Fall. 4 credits. Limited to 75 students. L. Bogel.
See English 263 for complete description.

THETR 274 Introduction to Film Analysis: Meaning and Value
Fall. 4 credits. Limited to thirty-five students. D. Fredericksen.
An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

[THETR 275 Introduction to Film Theory
Spring. 4 credits. No prerequisites, strongly recommended for film majors. Not offered 1999–2000. A. Villarejo.
This course provides an introduction to critical and theoretical approaches to film over the past century. It surveys questions of form, genre, aesthetics, narrative, spectatorship, industry, authorship, and apparatus through readings and weekly screenings of films key to these theoretical and critical formulations. The second half of the course will be devoted to the major theoretical trajectories of the past few decades in the humanities more generally and in their specific relations to cinema: structuralism and semiotics, Marxism, psychoanalysis, feminist theory, poststructuralisms, postcolonial theory and queer theory.]

[THETR 277 Video Production I
Spring, alternate years and occasionally in summer. 3 credits. Limited to 12 students. Permission of instructor. Open to sophomores, juniors, and seniors. Not offered 1999–2000. M. Rivchin.
A hands-on, beginning video production course using Super-VHS cameras and editing equipment. Students will learn camera, lighting, sound recording, editing and digital effects through a series of technical exercises. Students will develop two short, original video projects to be shown publicly at the end of the semester. A $100 equipment maintenance fee per student will be collected in class. Cost for videotape approximately $50–100.]

THETR 291 Filming Other Cultures (also Thetr 691 and Anthropology 291/691) @
Spring. 4 credits. Limited to 20 students, with preference given to those who have taken either Anthropology 102 or Theatre Arts 274. Fee for screening and maintenance, $35. R. Ascher.
THETR 291 meets simultaneously with THETR 691/ANTRO 291/691. For topics and issues addressed, please see the description under Anthropology 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's *Where the Green Ants Dream*, and, in consultation with the instructor, review films related to their special interests and major field of study.

[THETR 329 Political Theory and Cinema (also German Studies 330, Comparative Literature 330 and Government 370)
Fall. 4 credits. Not offered 1999–2000. G. Waite.
For description, see German Studies 330.]

THETR 369 Studies in Film Analysis (also English 369)
Spring. 4 credits. L. Bogel.
Topic: Fast-Talking Dames: Hollywood Comedies. See English for complete description.

[THETR 375 History and Theory of the Commercial Narrative Film
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Offered alternate years. Prerequisite for film majors THETR 274. Not offered 1999–2000. A. Villarejo.
Consideration of the broad patterns of narration in the history of the commercial narrative film. Emphases placed upon the early articulation of a cinematic means of narration, realism as an artistic style, the nature and functions of popular film, and the modes of modernist and post-modernist "art cinema" narration.]

THETR 376 History and Theory of Documentary and Experimental Film
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 274 is strongly recommended, but not required. A. Villarejo.
First, the history and theory of documentary film up to the end of World War II. Second, the history and theory of the experimental and personal film forms in Europe and the United States.

THETR 377 Fundamentals of 16mm Filmmaking
Fall and spring. 4 credits. Limited to 12 students. Intended for juniors and seniors (who may need to sign up a year or more in advance) with priority given to film majors. Prerequisite: THETR 274 (or higher-level film studies course) and permission of instructor. Equipment fee, $100 (paid in class). The average cost to each student for materials and processing is $400. M. Rivchin.
A hands-on course in the basics of 16mm filmmaking techniques, requiring no prior production experience, emphasizing creative development of filmic ideas through critical discussion. Students may explore narrative, experimental, documentary, animation, and abstract genres, producing short exercises and a final sound film project (8–12 minutes) to be screened publicly.

[THETR 378 Soviet Film of the 1920s and French Film of the 1960s
Spring. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 375 is strongly recommended, but not required. Offered alternate years. Next offered spring 2001. D. Fredericksen.
An intensive treatment of two distinct periods of radical innovation in film theory and history. Emphasis on the animated relationship between theory and filmmaking during these two decades. Major figures include Eisenstein, Pudovkin, Vertov, Kuleshov, Dovzhenko, and Room, in the Soviet 1920's; Godard, Truffaut, Resnais, Rohmer, Tati, Rouch, Bresson and Bazin in the French 1960's.]

THETR 379 Modern Documentary Film
Spring. 4 credits. Prerequisite: THETR 376 is strongly recommended but not required. Fee for screening expenses, $10 (this fee is paid in class). Offered alternate spring semesters; offered spring 2000. D. Fredericksen.
An intensive consideration of canonical documentary films from 1945 to the present. Emphases upon the documentary film as an artistic form with a distinct history and set of theoretical questions, as a sociopolitical force, as an ethnographic medium within and without a filmmaker's culture, and as a televised medium of persuasion and expression.

[THETR 383 Screenwriting
Spring. 3 credits. Prerequisites: THETR 274 and 377, and permission of instructor. Limited to 12 students. Not offered 1999–2000. Staff.
Exercises in various genres of screenwriting will be explored: the commercial narrative, documentary, experimental, and abstract. This class will culminate in the writing of a finished script for a ten to fifteen-minute film. Note: this class is an intensive writing experience that will demand a great deal of outside work.]

THETR 386 Third Cinema
Spring. 4 credits. Prerequisite: previous course in film history or analysis helpful, though not mandatory. Offered alternate years; offered 1999–2000. A. Villarejo.
This course explores postcolonial film and video through the rubric of "third cinema." We will investigate the diverse historical, national, political and generic commitments of films from Africa, South Asia, Latin America, the US and UK (Sembene, Ray, Brocka, etc.). Readings in film and postcolonial theory will guide our critical analyses of the films.

THETR 391 Media Arts Studio I (also ART 391, ARCH 391, MUSIC 391)
Fall. 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum THETR 377 or 277, or dance studio courses. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin and B. Suber, THETR; S. Taft and S. Bowman, ART; K. Hubbell, J. Zissovice and G. Wilcox, ARCH; D. Borden, MUSIC.
A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film and video. Group projects and discussions will also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.

THETR 392 Media Arts Studio II (also ART 392, ARCH 392, MUSIC 392)
Spring. 3 credits. Preference given to those who completed Media Arts Studio I. See THETR 391 for prerequisites. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin and B. Suber, THETR; S. Taft and S. Bowman, ART; K. Hubbell, J. Zissovice and G. Wilcox, ARCH; D. Borden, MUSIC.
A continuation of Media Arts Studio I. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film and video. Group projects and discussions will also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.

[THETR 395 Video: Art, Theory, Politics (also English 395)
Fall. 4 credits. Not offered 1999–2000. T. Murray.
For description, see English 395.]

[THETR 396 German Film (also Comparative Literature 396 and German Studies 396)
Spring. 4 credits. Requirements: participation in class discussion, one paper, midterm, and final. Not offered 1999–2000. D. Bathrick.
This course will explore German film from the Weimar and Nazi periods to the present in relation to the cultural and sociopolitical context of which it was a part. Readings and lectures will be devoted to formal and cultural developments historically as well as interpretive analysis of selected individual films.]

[THETR 413 Film and Performance
Spring. 4 credits. Prerequisite: at least one production course in 16mm film or video, and/or at least one 300-level course in acting or directing. Permission of the instructors. Limited to 12 students. $50 maintenance fee to be collected in class. Not offered 1999–2000. M. Rivchin and faculty.]

[THETR 473 Film and Spiritual Questions (also Religious Studies 473 and College Scholar Seminar)
Spring. 4 credits. Limited to 20 students. Offered alternate spring semesters; next offered spring 2001. D. Fredericksen.
The use of film as a medium for the expression of spiritual questions has a long and rich history, although little attention is given to this fact in contemporary film studies. This seminar will examine films and writings by filmmakers who are so inclined. Special attention will be given to the work of Andrey Tarkovsky, the Russian film director and theorist.]

THETR 474 Jung, Film, and the Process of Self-knowledge (also College Scholar Seminar)
Fall. 4 credits. Limited to 20 students. Offered alternate spring semesters; offered 1999–2000. D. Fredericksen.
"Know thyself" is one of the oldest and most enduring imperatives of the human spirit, and a *raison d'etre* for liberal studies. This seminar will trace the Jungian approach to this imperative and test its critical capacities with respect to films by Fellini (*8 1/2*), Bergman (*Persona*), and Roeg (*Walkabout*).

[THETR 475 Seminar in the Cinema I
Fall. 4 credits. Limited to 20 students. Offered alternate years. Prerequisite: some analytic studies in film analysis. Not offered 1999–2000. D. Fredericksen.
Topic for fall 1999: the films of Ingmar Bergman. An intensive consideration of Bergman's corpus, with emphasis upon the films of the middle and end of his career. As well, close attention will be given to the nature of the critical act and its relationship to biography, film history, and film theory.]

[THETR 476 Seminar in the Cinema II
Spring. 4 credits. Limited to twenty students. Not offered 1999–2000. Faculty.]

THETR 477 Intermediate Film and Video Projects
Fall. 4 credits. Limited to 8 students. Prerequisites: THETR 377 or 277 as minimum; preference given to those who have taken THETR 383 (screenwriting), 398 (directing), or 413 (acting and directing for the camera), and permission of instructor. Equipment fee: $100 to be collected in class. Film projects costs: $300–1000; video $50–150. M. Rivchin.
16mm filmmaking and video skills course designed to increase the student's knowledge and practice of: cinematography, lighting, sync-sound filming and editing techniques; working with labs and sound houses; S-VHS and digital video camera; and both analog and non-linear (AVID) editing. Each student will write, direct, shoot and edit one original short, sync-sound scene and one experimental project.

THETR 493 Advanced Film and Video Projects
Spring. 4 credits. Limited to 4–6 students, those selected to the Advanced Undergraduate Film Program by application in December. Prerequisite: THETR 377 or 277, and 477; recommended: 383 (screenwriting) and 398 (Directing 1). Equipment fee: $100. Project costs: $500–2000. M. Rivchin.
This is a third-level film production course for those students who have already written and proposed a dramatic narrative script, a documentary treatment, or an experimental or animation storyboard. Working in two production crews rotating as directors, cinematographers, and sound recordists' students may shoot in sync-sound, film, or video. Students will edit the films they write and direct, and will be individually responsible for editing and all completion costs of their projects, which will be screened publicly at the end of the semester.

THETR 653 Myth onto Film
4 credits. R. Ascher.
For description, see ANTHR 653.

THETR 661 Cinematic Desire (also English 660 and Comp Lit. 662)
Fall. 4 credits E. Hanson.
See English for complete description.

THETR 674 Introduction to Film Analysis: Meaning and Value
Fall. 4 credits. Limited to 10 graduate students. D. Fredericksen.
An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Graduate students who intend to teach film at the undergraduate level are especially welcome. In addition to full participation in the work of THETR 274, graduate students will read and discuss in tutorials Bordwell's *Making Meaning: Inference and Rhetoric in the Interpretation of Cinema.*

THETR 691 Filming Other Cultures (also Theatre 291 and Anthro 291/691)
Spring. 4 credits. Fee for film screening and maintenance, $35. R. Ascher.
THETR 691 meets simultaneously with THETR 291/ANTRO 291/691. For topics and issues addressed, please see the description under Anthropology 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's *Where the Green Ants Dream,* and, in consultation with the instructor, review films related to their special interests and major field of study.

[THETR 699 German Film Theory (also German Studies 699 and Comparative Literature 699)
Fall. 4 credits. Offered every fourth year. Not offered 1999–2000. D. Bathrick.
This course examines critically major German film theories from the Weimar period to the present. Works by Balazs, Arnhelm, Kracauer, Benjamin, Adorno, Horkheimer, Kluge, Syberberg, Koch, Elsaesser, and others will be discussed in relation to the context in which they emerge as well as current debates in film theory.]

Dance

Classes in Dance Technique (THETR 122, 231, 232, 303, 304, 306, 308, 309), Explorations (THETR 233), and the movement sections of Indian Dance (THETR 307, 317) are co-listed in the Department of Physical Education (PE) and the Department of Theatre, Film & Dance (THETR). Students may register for these classes either through PE in order to satisfy the university's physical education requirement *or* through THETR for 0 or 1 academic credit, *with a limit of 1 credit per semester and 8 credits total.* Students may not get THETR and PE credit simultaneously for the same course.

Technique

These courses may be used to fulfill the technique class corequisite for THETR 201, 210, 310, 311, 410, 411. Students who wish to enroll in a non-introductory level technique course (THETR 231, 232, 303, 304, 308, 309) must attend a placement class; pre-enrollment is not allowed. Placement classes are held the next to last Wednesday and Thursday of each semester; please contact the department registrar for more information.

THETR 122 Dance Technique I (also Physical Education 424)
Fall and spring. 0 to 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Chu, J. Kovar, and B. Suber; spring: J. Chu and J. Kovar.
Entry level class. The fundamentals of elementary dance training. Movement sequences focusing on rhythm, placement, an vitality of performance through an anatomically sound dance technique.

THETR 231 Dance Technique II/ Ballet (also Physical Education 431)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Staff.
Beginning Ballet technique intended for students with some dance training. Includes all basic barre and centre work focusing on presence and presentation.

THETR 232 Dance Technique II/Modern (also Physical Education 432)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Morgenroth.
Beginning Modern technique intended for students with some dance training. Material covered includes specific spinal and center work with attention to rhythm, design, and movement expression.

THETR 303 Dance Technique Workshop (also Physical Education 422)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
This class goes beyond the conventional modern dance class and looks into the very nature of technical training for dancers by studying and investigating a variety of movement forms including yoga, improvisation, classical and modern western dance. It is open to level III and IV dance technique students.

THETR 304 Dance Technique III/Ballet (also Physical Education 434)
Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Intermediate Ballet technique. Work is done on strengthening the body through a movement technique emphasizing presence and musicality based on harmonic muscular control.

THETR 306 Dance Technique III/Modern (also Physical Education 436)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Morgenroth; spring, J. Chu.
Intermediate modern technique focusing on rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students will be challenged by complex phrases and musicality.

THETR 308 Dance Technique IV/Modern (also Physical Education 438)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self.
Advanced and pre-professional Modern technique. A continuation of and supplement to THETR 306.

THETR 309 Dance Technique IV/Ballet (also Physical Education 439)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Staff.
Advanced and pre-professional Ballet technique. A continuation of and supplement to THETR 304.

Composition, Improvisation, and Performance

THETR 155 Rehearsal and Performance
Fall and/or spring. 1–2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the dance program's auditions. Students may add this course only after they have been assigned roles. S-U grades only.
The study, development, and performance of roles in departmental dance productions.

[THETR 201 Dance Improvisation
Fall. 3 credits. Limited to 12 students. Concurrent enrollment in a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Not offered 1999–2000. J. Morgenroth.
When the body knows when, where, and how to move without prior direction, we call that improvisation. This course offers the possibility of "training" one's movement instincts to respond with focus, humor, and spontaneity. Live musical accomp. Includes some dance history.]

THETR 210 Beginning Dance Composition
Fall and spring. 3 credits. Concurrent enrollment in THETR 212 and a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self.
Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through class improvisations. Informal showing at end of semester.

THETR 211 Dance Movement Workshop
Summer. 3 credits. Limited to 15 students. For students with varied levels of training, including those with no experience. J. Kovar.
Students explore new ways of moving and creating dances and prepare short studies each week based on material covered in class. Modern dance technique, improvisation, and composition are covered. Students observe and discuss the main concerns of contemporary performance from the artist's/performer's perspective. Viewings of films, videotapes, and live performances.

THETR 212 Music Resources for Dance Composition
Fall and spring. 1 credit. MUSIC 105 is recommended as a prerequisite but not required. Students may register in successive semesters, for a maximum of 4 credits. Attendance at dance concerts and music concerts is required. A. Fogelsanger.
Intended to expand choreographers' music vocabulary and skills through a survey of contemporary music for dance, the study of music and dance collaborations, and rhythm studies. Includes discussing and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Syllabus varies depending on the students' experience.

THETR 233 Explorations in Movement and Performance (also Physical Education 440)
Fall. 0 or 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
A physically demanding exploration into various movement realms. Specific subjects covered are genderized movement, erotic power, spiritual power, ritual and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagerness to investigate the nature of performance and explore unfamiliar territory in movement.

THETR 310 Intermediate Dance Composition I
Fall and spring. 3 credits. Prerequisite: THETR 210. Concurrent enrollment in THETR 212 and a technique class at the appropriate level is required. Fall, J. Self; spring, staff.
Intermediate choreographic projects will be critiqued in progress by faculty and peers. Consideration of design problems in costuming and lighting.

THETR 311 Intermediate Dance Composition II
Fall and spring. 3 credits. Prerequisite: THETR 310. Attendance at dance concerts is required. Concurrent enrollment in THETR 212 and a dance technique class at the appropriate level is required. Fall, J. Self; spring, staff.
A continuation of THETR 310.

THETR 410 Advanced Dance Composition I
Fall and spring. 3 credits. Prerequisite: THETR 311. Concurrent enrollment in THETR 212 and in a technique class at the appropriate level. Attendance at dance concerts is required. Fall, J. Self; spring, staff.
Students work on advanced choreographic problems, to be presented in performance. Work in progress will be critiqued by faculty on a regular basis.

THETR 411 Advanced Dance Composition II
Fall and spring. 3 credits. Prerequisite: THETR 410. Concurrent enrollment in THETR 212 and in a technique class at the appropriate level. Attendance at dance concerts is required. Fall, J. Self; spring, staff.
A continuation of THETR 410.

THETR 491 Senior Project in Dance
Fall or spring. 4 credits. Prerequisite: THETR 410 or permission. This course is limited to senior dance majors only.
Students who take this course will create a project in choreography and performance, dance film or video, dance pedagogy, or other appropriate area agreed upon with a member of the dance faculty. Senior projects that are to be performed, must be presented within one of the three regularly scheduled department concerts.

History, Criticism, and Theory

THETR 307 Asian Dance and Dance Drama (also Physical Education 427) @
Sec. 01. Indian Dance. Fall, D. Bor. Sec. 02. Japanese Noh Theatre. Not offered 1999–2000. Sec. 03. Indonesian Dance Theatre. Not offered 1999–2000.
This course is designed to give the student a practical working knowledge of Indian classical dance, specifically in the indigenous style of Orissa known as Odissi. The technique strengthens the body and develops grace, rhythmic expression, and dexterity that can benefit all forms of dance.

THETR 312 Physical Analysis of Movement
Fall. 3 credits. J. Morgenroth.
This course is an examination of human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology, and kinesiology and in Sweigard's *Human Movement Potential*. Guest lectures by experts in anatomy and health areas. Practical and laboratory work. Demonstration of dissection.

THETR 314 Western Dance History I: Classical Ballet History as a Reflection of Western Ideology #
Fall. 4 credits. Attendance at dance concerts is required. B. Suber.
A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Texts, videotapes, and through live performance, the class will explore how ballet has perpetuated or confronted social issues of race, class, gender, sexuality, the body, and abuse.

THETR 315 Western Dance History II: History of Modern Dance
Spring. 4 credits. Attendance at dance concerts is required. J. Chu.
This class will study the course of modern dance in the twentieth-century United States. We will examine each generation of dancers, starting with Isadora Duncan and ending with performers emerging today. Issues of gender, cultural identity, elitism, and democracy will be discussed.

[THETR 317 Asian Dance II
0, 1 or 3 credits. Prerequisite: THETR 307 or previous training in Odissi Classical Dance. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Not offered 1999–2000.
The continuation of THETR 307, Odissi Classical Dance. Emphasis is mainly on choreography as well as continuing to refine and perfect the basic movements learned in the preliminary course. Meets twice weekly for movement classes; an extra class will be arranged to learn the art of makeup.]

[THETR 319 Music, Dance, and Light
Fall. 3 credits. Attendance at dance concerts and music concerts is required. Not offered 1999–2000. E. Intemann, A. Fogelsanger, J. Morgenroth.
Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.]

[THETR 418 Seminar in History of Dance @
Spring. 4 credits. Attendance at dance performances is required. Not offered 1999–2000. B. Suber.
Topic for 1999: Digital Dance.]

THETR 490 Senior Paper in Dance
Spring. 4 credits. Prerequisite: THETR 418, senior standing. Attendance at dance concerts is required.
Under faculty direction, the student will write a senior paper in dance history, criticism, or theory.

Tracks toward admission into the advanced undergraduate theatre program

Design, Technology, and Stage Management

Recommended for individuals interested in a **Design**, **Technology**, or **Stage Management** track:

THETR 250 Fundamentals of Theatre Design and Technology
THETR 151 and 251 Production Lab I and II (at least one credit of each)

Recommended for Scenic Design emphasis:
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Design Assistant)
THETR 354 Stagecraft Studio
THETR 364 Scene Design Studio
Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for costume design or costume shop management emphasis:
THETR 254 Theatrical Make-up Studio
THETR 351 Production Lab III (as Design Assistant)
THETR 356 Costume Construction Studio
THETR 366 Costume Design Studio I
Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Lighting Design or costume shop management emphasis:
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Student Electrician)
THETR 351 Production Lab III (as Design Assistant)
THETR 362 Lighting Design Studio I
Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Sound Design emphasis:
THETR 251 Production Lab II (as Student Sound Technician)
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Design Assistant)

THETR 368 Sound Design Studio
Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Technical Direction emphasis:
THETR 252 Technical Production Studio I
THETR 256 Technical Production Studio II
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Assistant Technical Director)
THETR 354 Stagecraft Studio
Upon admission to the program: **THETR 451** Production Lab IV (at least 1 credit)

Recommended for Stage Management emphasis:
THETR 253 or **353** Stage Management Lab II or III—two assignments
THETR 280 Introduction to Acting
THETR 370 Stage Management Studio
THETR 398 Fundamentals of Directing I
Upon admission to the program: **THETR 453** Stage Management Lab IV

Directing

Recommended for individuals interested in a directing track:
THETR 151 and **THETR 251** Production Lab I and II (at least 2 combined credits)
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 398 Directing I
THETR 498 Directing II

Playwriting

Recommended for individuals interested in a playwriting track:
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 348 Playwriting
THETR 349 Advanced Playwriting
Students in the advanced undergraduate theatre program may also elect to take THETR 485 (Undergraduate Internship) in addition to or in place of one production assignment.

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

Africana Studies and Research Center

J. Turner, director (255–5218); A. Adams, N. Assié-Lumumba, A. Bekerie, L. Edmondson, R. Harris, S. Hassan, A. Mazrui, A. Nanji, D. Ohadike. Offices: 310 Triphammer Road, 255–4625 or 255–4626.

The Africana Studies and Research Center is concerned with the examination of the history, culture, intellectual development, and social organization of Black people and cultures in the Americas, Africa, and the Caribbean. Its program is structured from an interdisciplinary and comparative perspective and presents a variety of subjects in focal areas of history, literature, social sciences, and African languages. African languages such as Swahili are consistently offered, while other languages, e.g., Mandinka and Yoruba are occasionally offered. African languages are also taught during summer/winter session.

The center offers a unique and specialized program of study that leads to an undergraduate degree through the College of Arts and Sciences and a graduate degree, the Master of Professional Studies (African and African-American), through the university's Graduate School.

A student may major in Africana studies; however, another attractive alternative is the center's joint major program. This program enables the student to complete a major in any of the other disciplines represented in the college while at the same time fulfilling requirements for a major in Africana Studies. This requires only a few more credits than is usually the case when one completes a single major course of study. Courses offered by the center are open to both majors and nonmajors and may be used to meet a number of college distribution requirements, including historical/temporal breadth (#) and geographical breadth (@) requirements, such as freshman writing seminars, language (Swahili), expressive arts, humanities, social sciences, and history.

The center also brings distinguished visitors to the campus, sponsors a colloquium series, and houses its own library.

The Africana Major

The undergraduate major offers interdisciplinary study of the fundamental dimensions of the African-American and African experiences. Because of the comprehensive nature of the program, it is to the students' advantage to declare themselves Africana majors as early as possible. The following are prerequisites for admission to the major.

Students should submit:

1) a statement of why they want to be an Africana studies major;
2) a tentative outline of the area of study they are considering (African or African-American) for the undergraduate concentration; and
3) a full transcript of courses taken and grades received.

The center's undergraduate faculty representative will review the applications and notify students within two weeks of the status of their request.

After acceptance as a major in the Africana Center, a student must maintain a C+ cumulative average in the center's courses while completing the major program. The Africana major must complete 36 credits in courses offered by the center, to include the following four core courses: AS&RC 205, 231, 290, and 422. Beyond the core courses, the student must take 8 credits of center courses numbered 200 or above and 15 credits numbered 300 or above. The program of an undergraduate major may have a specifically Afro-American focus or a specifically African focus.

Joint Majors

The center encourages joint majors in the College of Arts and Sciences and in other colleges. Joint majors are individualized programs that must be worked out between the departments concerned. The center's undergraduate faculty representative, Professor Adams, will assist students in the design and coordination of joint major programs. However, in any joint major program, the center will require at least 16 credits be taken in Africana studies courses, including AS&RC 290.

Double Majors

In the case of double majors (as distinct from joint majors) students undertake to carry the full load of stipulated requirements for a major in each of the two departments they have selected.

Certificate in African Studies

In conjunction with the Institute for African Development, the Africana Studies and Research Center administers an undergraduate Certificate in African Studies program. The certificate is offered as a minor concentration available to students in all of the undergraduate colleges at Cornell. Many of the courses in the program might be used to fulfill other course distribution requirements. By pursuing this certificate, students acquire an interdisciplinary understanding of Africa. After developing a foundation of knowledge on the culture, society, and development of Africa in the core course "Africa: The Continent and Its People," students pursue 15 credit hours in a humanities or development studies track or a combination of the two, including an additional core course, either "African Civilizations and Cultures" or "Contemporary African Development Issues." The requirements for the cetificate are a minimum of 18

credit hours, including the core courses. Students interested in the certificate program must contact Professor Adams (the center's undergraduate faculty representative) who will register them in the program and assign them a faculty adviser from their own college. The faculty adviser will be responsible for determining completion of the certificate requirements.

Honors. The honors program offers students the opportunity to complete a library research thesis, a field project in conjunction with a report on the field experience, or a project or experiment designed by the student. The requirements for admission to the honors program for all students—regular majors, joint majors, and double majors—are a B- cumulative average in all courses and a B+ cumulative average in the center's courses. Each student accepted into the honors program will have an honors faculty committee consisting of the student's adviser and one additional faculty member, which is responsible for final evaluation of the student's work. The honors committee must approve the thesis or project before May 1 of the student's junior year. The completed thesis or project should be filed with the student's faculty committee by May 10 of the senior year.

Language Requirement

Courses in Swahili may be used to satisfy the College of Arts and Sciences language requirement. In Swahili, successful completion of AS&RC 131, 132, 133, and 134 provides qualification, and the addition of 202 provides proficiency. AS&RC majors are not required to take an African language, but the center recommends the study of Swahili to complete the language requirement.

AS&RC 131 Swahili
Fall. 4 credits. Laboratory time to be arranged. A. Nanji.
Beginner's Swahili. Part 1—Grammar for speaking, reading, and writing. Requires no knowledge of language. Swahili is spoken in East and Central parts of Africa.

AS&RC 132 Swahili
Spring. 4 credits. Prerequisite: Swahili 131. A. Nanji.
Continued study of the basic grammatical formation of the language and the introduction of reading material ranging from songs to short stories. A great many drills are invariably used in this course to help develop the student's comprehension of the language. Swahili tapes are highly utilized during all of these sequences.

AS&RC 133 Swahili
Fall. 4 credits. Prerequisites: Swahili 131 and 132. Language laboratory time to be arranged. A. Nanji.
Advanced study in reading and composition.

AS&RC 134 Swahili
Spring. 4 credits. Prerequisite: Swahili 133. A. Nanji.
In this course of the sequence more emphasis is placed on the development of reading ability and the acquisition of writing skills. Students are expected to read and comprehend selected Swahili stories and write compositions on chosen topics. Ample consideration is given to oral practice in the classroom.

AS&RC 171 Black Families and the Socialization of Black Children
Fall. 3 credits. Faculty.
This course provides an examination of the evolution of the Black family from its roots in Africa, the evolution of family forms, the impact of social policy, and a consideration of the literature stressing family and child well-being. Among the major topics considered will be male/female relationships, childbearing and parental roles, the extended family, economic and health issues. The component of the course focusing on youth will primarily cover child and adolescent development.

AS&RC 172 The Education of Black Americans: Historical and Contemporary Issues
Spring. 3 credits. Faculty.
This course will be devoted to the history of educating Black Americans. Considerable attention will be given to contemporary issues. The major topics of focus will include an examination of the debates concerning the type of the education needed, public and private schooling efforts, the Africana Studies movement, community control issues, busing, affirmative action, re-segregation debates and new initiatives in education including vouchers, and charter schools.

AS&RC 191 Africa: The Continent and Its People @
Fall. 3 credits. L. Edmondson.
An introductory interdisciplinary course focusing on Africa's geographical, ecological, and demographic characteristics; indigenous institutions and values; the triple cultural heritage of Africanity, Islam, and Western civilization; main historical developments and transitions; contemporary political, economic, social, and cultural change. Africa's ties with the United States (from trans-Atlantic slavery to the present), its impact on the emerging world order, and its contribution to world civilization will also be explored.

AS&RC 202 Swahili Literature @
Fall. 4 credits. Prerequisite: Swahili 134. A. Nanji.
Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary forms.

AS&RC 204 History and Politics of Racialisation: A Comparative Study
Spring. 4 credits. A. Bekerie.
The primary focus of this course will be on the historical and contemporary significance of racialisation in the United States and South Africa with regard to societal development and inter-relations. It will include an analysis of the historical development of racialised barriers as an instrument of power and privilege. The ways with which racialisation is used as an instrument of ideology to social status, cultural hierarchy and economic positions will also be examined. Particular emphasis will be given to the development and perpetuation of scientific racism in both places. The apparent success against Jim Crow form of racism in the United States and apartheid in South Africa appears to transform racism into subtle and 'scientific' sphere. This transformation and its continued impact in perpetuating social inequality will be further analyzed.

AS&RC 205 African Cultures and Civilizations # @
Spring. 3 credits. D. Ohadike.
This course is concerned with the peoples of Africa and the development of African cultures and civilizations from the earliest times to the present day. It focuses on the near modern civilizations of Africa south of the Sahara, and the ancient civilizations of Egypt and the Nile Valley, together with their contributions to the development of the major world civilizations. The course also deals with the socio-political organization of African societies, their kinship systems, cross-cutting ties, rites of passage, gender relations, arts (including music, dance, folklore, architecture, sculpture, painting, and body decoration).

AS&RC 210 Major Works of Black World Writing
Fall. 3 credits. A. Adams.
This course surveys classic texts by African American, Caribbean, and African writers. The focus is on literary texts by authors such as Langston Hughes, Toni Morrison, James Baldwin, Maryse Conde, and Chinua Achebe, with a view toward analyzing common experiences, references, themes, and literary strategies across the Black world. The works of fiction, poetry, and drama that constitute the central material of the course are supplemented by essays and biographies from other authors who have influenced the creative vision and the movement of the peoples of Africa and the Diaspora, e.g., W.E.B. DuBois and Marcus Garvey, Nelson and Winnie Mandela.

AS&RC 231 African American Social and Political Thought
Spring. 3 credits. J. Turner.
This is an introductory course that will review and analyze the major theoretical and ideological formulations developed and espoused by African-Americans in the struggle for liberation. This semester we will focus specifically on the political philosophy and historical significance of Malcolm X, and the work and movement of Marcus Garvey, as the prime movers of nationalism and pan-Africanism among Black people in this century. Such themes as slave resistance, nationalism, Pan-Africanism, emigration, anti-imperialism, socialism and internal colonialism, and the political and social views of Black women will be discussed. Black political thought will be viewed in its development as responses to concrete conditions of oppression and expression.

[AS&RC 265 African American Literature in the 20th Century
Fall. 3 credits. Not offered fall 1999. Faculty.
This course provides an overview to major works in African American literature from 1900 to the 1980s. Focusing on significant moments in the tradition, the readings highlight literary movements, their advocates, and their detractors. Divided into four units, the literary works come from the Post-Reconstruction period, Harlem Renaissance, Socialism, Realism, and Modernists of the 1930s and 1940s, the Black Arts Movement of the 1960s and 1970s, and the Womanist critiques from the mid 1970s through the 1980s. In addition to a range of periods and styles, this course includes a range of genres, such as the autobiography, poetry, essay, short story, drama, and novel.]

AS&RC 271 Introduction to African Development (also CRP and Government 271) @
For description, see CRP 271.

[AS&RC 280 Race, Power, and Privilege in the United States (formerly Racism in American Society)
Fall. 3 credits. Not offered fall 1999.
D. Barr and J. Turner.
This course will be a topical treatment of the history and theory of racism in the United States. The course will begin with an examination of basic concepts and theories of racism. From there we will examine the history of racial groups in America—African-Americans, Native Americans, Asian Americans, and the Hispanic groups. Particular attention will be paid to the political economy of racism and the sociological and the psychological aspects of race relations in America, with specific reference to the differences and intersections of race, class, gender, and ethnicity.]

AS&RC 283 History of Resistance Movements in Africa and the Diaspora @
Fall. 3 credits. D. Ohadike.
This course deals with the history of resistance and liberation movements in Africa, Brazil, the Caribbean, and the United States. It is concerned with the dialectical relationships between European domination and Black resistance. It examines the methods, strength, and complexity of Black resistance and liberation, together with the rise of revolutionary classes in Africa and the Diaspora. It draws attention to the importance of unity and organization in resistance and then shows similarities, connections, and continuities in Black resistance. Finally, it demonstrates that African background helped to shape the nature of struggles for independence and civil liberties in the Caribbean, Brazil, and the United States.

AS&RC 290 The Sociology of the African-American Experience
Fall. 3 credits. J. Turner.
This is an introductory course to the field of Africana Studies. It assumes a historical/sociological approach to the examination of the African-American experience. The course surveys the African beginnings of human kind and the classical role of Black people in world civilization and the making of early culture. The course treats issues in the humanities, social sciences, and history. This course is required for all undergraduate students majoring at the Africana Center.

AS&RC 304 African American Art
Spring. 3 credits. S. Hassan.
This course investigates the different forms of African American visual artistic traditions in relation to their historical origins and sociocultural context from the early days of slavery to the present time. The course will start with an overview of African art and the experiences of the Middle Passage and slavery in relation to African American traditions in the decorative arts including: pottery, architecture, ironwork, quiltmaking, basketry. This is followed by a fine art survey starting with the eighteenth and nineteenth centuries, continuing through the early twentieth-century Harlem Renaissance up to the present. Certain issues related to African American arts and creativity such as "improvisation," "Black Aesthetic," and "Pan Africanism" will also be explored. Slides, films, film strips will be used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

AS&RC 310 Art in African Culture and Society @
Fall. 3 credits. S. Hassan.
This course is a survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at investigating the different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism and complexity of traditional African art will be explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular African societies will be used to examine the relationship of the arts to indigenous concepts of time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and acculturation will also be explored. These include tourist art, popular art, and elite art.

AS&RC 311 Government and Politics in Africa @
Fall. 3 credits. A. Mazrui.
Power and political participation in Africa. The colonial background and its political consequences. The pre-colonial continuities in the post-colonial politics. Ethnicity and allegiance in the African polity. The monarchical tendency in African political culture. From the warrior tradition to the military coup in the post-colonial era. From the elder tradition to presidential gerontocracy. From the sage tradition to intellectual meritocracy. Class *versus* ethnicity in African politics. The one-party *versus* the multiparty state. Socio-cultural *versus* socio-economic ideologies. The gender question in African politics. The soldier and the state. The African political experience in a global context.

AS&RC 352 Pan-Africanism and International Politics
Spring. 3 credits. L. Edmondson.
Pan-Africanism addresses the shared experiences and aspirations of African people around the world, focused on a search for greater linkages and unifying measures. Informed by an exploration of the racial factor in international relations, this course will examine Pan-African theories, ideologies, and movements, past and present, in their political, socio-economic, and cultural manifestations, focusing mainly on the African continent, the Caribbean, and Black America.

AS&RC 362 Global Perspectives on Gender
Spring. 4 credits. N. Assie-Lumumba.
The course will examine how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class will be taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty member directing the course, the class will consider such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; the role of the state in constructing an engendered economy and polity.

AS&RC 380 African History: Earliest Times to 1800 # @
Fall. 3 credits. A. Bekerie.
As the second largest continent with vast and varying geographical and sociocultural conditions combined with recently established fact as an original home of human species, Africa provides rich and diverse oral and written early history. The course covers some of the major historical signposts from the origins of human species to 1800. Among the topics for discussion are: Historical Perspectives and Sources, The Nile River Cultural Complex, Berber, Carthage and Maghreb of North Africa, Upper Guinea and Western Sudan of West Africa, Cities of the East African Coast, and Great Zimbabwe and other sites of Southern Africa.

AS&RC 381 African History, 1800–Present @
Spring. 3 credits. D. Ohadike.
This is a survey of African history in the nineteenth and twentieth centuries. It deals with African revolutions in the nineteenth century; the ending of the slave trade and the politics of the abolition; European scramble and partition of Africa; resistance to European colonial conquest; African societies in the colonial period; the politics of decolonization; Neo-colonialism; the rise and decline of military regimes; African debt crisis; and conflict and reconciliation in Africa.

AS&RC 404 Afrocentricity: Paradigm and Critical Readings
Fall. 4 credits. A. Bekerie.
What is Afrocentricity? It is a theoretical framework designed to study and interpret the histories and cultures of peoples of Africa and African descent by locating them at the center of their experiences. In other words, it is a method of knowing the life experiences of African peoples from the inside out. The course will examine—through the writings of Asante, Keto, Clarke, Jean, Myers, Amin, Mazrui, Gates, Appiah, Richards, Schlesinger and T'hiongo—the conception and depth of the paradigm, its relevance in the production and utilization of knowledge, particularly emancipatory knowledge, the history of the paradigm, and the debate it generates among a wide range of thinkers and scholars.

AS&RC 410 African American Politics
Spring. 4 credits. J. Turner.
The central thesis of African American politics has been its movements for political change and democratic access and human rights. This development since the seventeenth century is a complex political legacy. This course will conduct a close study of African American political practice and theoretical analysis of the American political system. Implications of the political systems for prospects and limitations to participation by Black people will be analyzed. Critical historical stages in the process of Black politics will be examined. The development of electoral offices in federal and statewide politics, and the significant urban political power bases giving rise to African American mayoralty politics in critical industrial centers, as well as rural hamlets will center the course. Presidential politics—the Jesse Jackson campaigns—and new political formations including Black Republicans/conservatives will constitute the emphasis on contemporary events. The course will review the development of the literature in African American politics.

AS&RC 420 Public Policy and the African American Urban Community
Spring. 4 credits. J. Turner.
The socioeconomic conditions of the African American urban community will be the central focus of the course. Community development models will be explored in relationship to the social needs of the African American population. The changing configuration of internal organization of the African American community nationally will be examined.

AS&RC 422 African Literature @
Spring. 4 credits. A. Adams.
With such great focus, both inside and outside Africa, on issues of Africa's "development," what place does "literature" take? Is African literature influencing or influenced by the mundane realities of daily living faced by African people? Or does African literature concern itself with philosophical ideas and ideals that transcend those realities to embrace the general human condition? Or, does it do both? The texts that we will be reading this course will be approached in terms of these issues of "African development" and "the universal human experience."

[AS&RC 425 African American Performance Genres and Traditions
Spring. 4 credits. Not offered spring 2000. Faculty.
This course introduces students to the various genres in African American verbal performance practices, including poetry, rap, sermons, drama, and the performance of self in every day life. Students will perform as well as observe, read, and write critical commentary on contemporary black performance. Performance is broadly defined to include performance of the self in every day life as well as formally staged productions. Thus, students will have the opportunity to observe performance of identity in a range of black social settings. Blending analysis and practice, we begin with everyday life performances and end with staged presentations of scenes from the African American theatrical repertoire.]

AS&RC 435 African Cinema (also Society for the Humanities 435) @
Spring. 4 credits. S. Hassan.
This course offers an overview of African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, different trends within African cinema will be explored, such as "Return to the Sources" and the rediscovery of the pre-colonial past; the "Social Realist" narrative and critique of post-independence Africa; reconstructing the story of colonialism from the perspective of the colonized; and the entertainment genre. Techniques, style, and aesthetics of African cinema will also be discussed. The course offers a unique opportunity of looking at African culture and society, and at issues of social change, gender, class, tradition, and modernization through African eyes.

AS&RC 451 Politics and Social Change in the Caribbean @
Fall. 4 credits. L. Edmondson.
A study of the historical, geostrategic, political, economic, and social (including racial and cultural) forces bearing on the domestic and international experiences of Caribbean societies. Special attention will be given to conflicting definitions and perceptions of the Caribbean; contending theories of Caribbean social structure and models of development; the continuing salience of struggles for change and transformation; prospects of regional integration; and Caribbean challenges to the global system, especially with regard to the region's relations with the United States and the region's position in the Third World in the context of the North-South cleavage.

AS&RC 455 Caribbean Literature @
Fall. 4 credits. A. Adams.
This course will examine the prose literature of the Caribbean islands. Through the reading of several novels and short stories from the various languages and cultural strains that comprise the Caribbean societies, students will study the points of commonality and the diversity within this body of literature. The recurrence of certain historical, social, and cultural issues that have formed the multi-ethnic Caribbean peoples will be analyzed in their varying manifestations across the linguistic and other boundaries to uncover the underlying shared experience.

AS&RC 459 Education in Africa and the Diaspora @
Fall. 4 credits. N. Assié-Lumumba.
This course deals with educational innovations geared to promoting equal opportunity based on gender, race and class, in Africa and the African diaspora. After an introduction on the concepts of education and innovations and the states of innovation as planned change, the course will focus on concrete historical and contemporary cases of educational innovations. The case studies in the United States include the creation and expansion of historically black institutions such as Lincoln University, Spelman College, Tuskegee Institute (now Tuskegee University), and other schools in the South, and the Westside Preparatory School in Chicago. The African cases to be studied include African languages for instruction with a focus on a Nigerian case, Ujamaa and education for self-reliance in Tanzania, and the case of Cote d'Ivoire which adopted television as a medium of instruction.

AS&RC 468–469 Honors Thesis
Hours to be arranged. 468, fall; 469, spring. Africana Center faculty.
For senior Africana Studies majors working on honors theses, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty. Permission of the AS&RC director of undergraduate studies is required.

AS&RC 475 Black Leaders and Movements in African-American History
Fall. 4 credits. R. Harris.
Analyzes the personalities, ideas, and activities central to the struggle for African-American liberation from the eighteenth-century to the present. Examines theories of leadership and the structure of protest movements with the goal of understanding current leadership needs and trends among African Americans.

AS&RC 478 Family and Society in Africa @
Fall. 4 credits. N. Assié-Lumumba.
The family as a social institution is structured according to socio-economic, historical, political, and cultural specificities. This is the frame in which the family in Africa and the African diaspora must be analyzed. The topics to be discussed in this course include the concepts of nuclear and extended family, the place and role of different age groups and generations in the family, marriage and its related issues, parenthood, childrearing, gender roles, class differences, and "family planning." This course also deals with the impact of westernization, urbanization, and modern economy on the structure of the family in Africa as well as the legacy of African family values in the African diaspora with a focus on the African American case.

AS&RC 479 Women and Gender Issues in Africa @
Spring. 4 credits. N. Assié-Lumumba.
There are two contrasting views of the status and role of women in Africa. One view portrays African women as dominated and exploited by men. According to another view women have a favorable social position in Africa: indigenous ideologies consider women to be the foundation of society, they are economically active and independent and they have an identity independent of men. In this seminar we will discuss the status and role of women in Africa historically as well as in the contemporary period. Among the topics to be covered are: women in non-westernized/pre-colonial societies; the impact of colonial policies on the status of women; gender and access to schooling, participation in the economy and politics; women and the law; women and health issues; gender issues in southern Africa; womanism and feminism; the United Nations Decade of Women and the four World Conferences on Women (Mexico 1975, Copenhagen 1986, Nairobi 1985, and Beijing 1995).

AS&RC 483 History of African Political Thought @ #
Fall. 4 credits. D. Ohadike.
The purpose of this course is to provide students with a thorough knowledge of the history of African political thought and ideologies, from ancient times to the present.

This course is divided into two broad sections. The first section looks at the history of African political thought and institutions in ancient and near modern times and explains the functioning of African communalism. It then goes on to show how western political thought in the nineteenth and early twentieth centuries instigated the revival of such ideas as Uhuru, Negritude and African Humanism.

The second section examines the history of anti-colonial political thought. It explains why the colonial intelligentsia and radical African nationalists developed such political ideologies as African socialism, Lumumbism, and Nkrumaism. The course also looks at socio-political thought in African literature, and explores the contributions of African religious thought (like Kimbanguism and Tokoism) to the development of African political culture. Among the works of the major African political thinkers to be studied are those of Casely Hayford, Leopold Sédar Senghor, Simon Kimbangu, Amilcar Cabral, Frantz Fanon, Kwame Nkrumah, Patrice Lumumba, Nnamdi Azikiwe, Julius Nyerere, Jomo Kenyatta, Nelson Mandela, and Steve Biko.

AS&RC 484 Politics and Social Change in Southern Africa @
Spring. 4 credits. L. Edmondson.
This course focuses on the legacies of apartheid and the challenges of transformation toward a post-apartheid society in South Africa. Topical emphases include: the rise and decline of apartheid; the historical continuity of Black resistance against racism; women under, against, and after apartheid;

South Africa's relations with its neighbors; geo-political, economic, and racial dimensions of the American connection; politics of negotiation and transition to majority rule; prospects for stability, democracy and equality; South Africa's new role in the African continental and global arenas. Instructor's lectures will be supplemented by films and class discussions.

AS&RC 498–499 Independent Study
Hours to be arranged. 498–fall; 499–spring. Africana Center faculty.
For students working on special topics, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty.

AS&RC 501 Global Africa: Comparative Black Experience @
Spring. 4 credits. A. Mazrui.
This seminar will address two diasporas in the Black experience. The *diaspora of enslavement* concerns slaves and descendants of slaves in both the Western and Eastern Diaspora. The *diaspora of colonization* concerns demographic dispersal as a result of colonialism. African-Americans are in their majority part of the Diaspora of Enslavement. Recent Algerian immigrants into France are part of the Diaspora of Colonization. Jamaicans and Trinidadians in Britain are part of a *double diaspora*—products of both enslavement and colonialism. The course will address these areas of Black comparison: Comparative Slavery—A Triple Heritage; Race and Race Mixture in Four Traditions; Comparative Emancipation from Slavery; Comparative Liberation from Colonialism; Comparative Struggle for Civil Rights; The Gender Question in Global Africa; Comparative Quest for Global Equality.

AS&RC 502 Education and Development in Africa @
Spring. 4 credits. N. Assié-Lumumba.
In the 1950s and 1960s, the human capital theory that emphasizes the importance of formal education for achievement of full productive potential of individuals and countries enjoyed a renewed popularity. African countries promoted educational expansion with the expectation that it would lead to socio-economic development. The initial euphoria, however was followed by skepticism and then disillusion. Education began to be perceived even as a hindrance to development. This course examines the relationship between formal education and individual and national development. In this seminar, different paradigms of development including modernization and dependency theories and Third World Forum are presented with an emphasis on the perceived and actual roles of education in individual and national development.

AS&RC 503 African Aesthetics @
Fall. 4 credits. S. Hassan.
The goal of this course is to investigate in depth the principles of aesthetics and philosophy of African visual arts. The course will offer a critical survey of the different writings and the growing body of research on this relatively new area of inquiry. The objectives of the course are to review how African aesthetics has been studied to date, to provide a critical analysis of the different approaches to the subject and related issues, and to suggest future directions of research. In-depth analysis of particular African societies will be used to examine the relationship of arts and aesthetics to indigenous concept of time, space, color, form, and sociopolitical order. In addition, issues related to African aesthetics and arts such as style, gender, class, and social change will also be explored.

AS&RC 504 Political Change in Africa
Fall. 4 credits. A. Mazrui.
The study of Africa can be approached either dialectically (focusing on the tension between opposing forces) or thematically (focusing on themes as chapters of experience). This course will borrow from both those approaches. In their class assignments and examinations students are free to use either approach.

The first approach will explore the dialetic between continuity and change; tradition and modernity; dependency and liberation; foreign and indigenous influences; anarchy and order; political decay and political development; democracy and authoritarianism; socialism and capitalism. The thematic approach will examine African Nationalism; race consciousness and Pan-Africanism; political parties and interest groups; executive power; ethnicity in politics; class-formation; civil-military relations; economic and cultural dependency; sub-regional and continental Pan-Africanism; crisis of the African state; and Africa in World Politics.

AS&RC 510 Historiography and Sources: The Development of African-American History
Spring. 4 credits. Prerequisite: upperclass or graduate standing or permission of instructor. R. Harris.
Studies the way Black historians in particular have explained the African-American past. Examines the development of writing African-American history during the twentieth century. Seeks to determine the principles for interpreting African-American history. Acquaints participants with the methodologies and sources central to understanding the African-American experience.

AS&RC 530 Womanist Writing in Africa and the Caribbean @
Spring. 4 credits. A. Adams.
Theoretical essays on the nature, relevance, and articulation of feminist thought from African and Caribbean writers will complement literary texts. Gender issues, as manifested both at home and in emigrant situations abroad will be examined in texts by such writers as Sistren, Conde, Dangarembga, Aidoo, Warner-Vieyra, Ba, Emecheta, Kincaid, W. Mandela. (Francophone works may be read in the original by individuals who so desire.)

AS&RC 598–599 Independent Study
598–fall; 599–spring. Variable credit. For all graduate students.

AS&RC 601–602 Africana Studies Graduate Seminar
601, fall; 602, spring. 4 credits. Africana Studies faculty.
This course, which will be conducted as a seminar, is designed for first-year AS&RC graduate students. It will be coordinated and supervised by one professor but team-taught by three or four faculty per semester. Each participating faculty will be responsible for a topical *segment* of the course related to her/his areas of specialization or an area of interest pertaining to theory and methodology of Africana Studies.

AS&RC 698–699 Thesis
698, fall; 699, spring. Limited to Africana Studies and Research Center graduate students.

Agriculture, Food, and Society Concentration

A. G. Power, coordinator; G. Altschuler, M. M. Devine, emeritus; M. J. Esman, J. Fessenden MacDonald, C. C. Geisler, A. Gillespie, B. Ginsberg, D. J. Greenwood, S. L. Kaplan, D. R. Lee, T. J. Lowi, T. A. Lyson, P. L. Marcus, P. McMichael, V. Nee, D. I. Owen, D. Pimentel, N. T. Uphoff, D. Usner. Office: 275 Clark Hall, 255–6042.

Agriculture, Food, and Society is an interdisciplinary concentration that is designed to introduce students to the study of agricultural and food issues from diverse perspectives within the liberal arts. The Agriculture, Food, and Society concentration seeks to make available to students a coherent program of study in which the role of agriculture in modern or prehistorical-historical and developed or developing societies can be understood in biological, social, scientific, and humanistic perspective. The concentration draws upon courses in several colleges—in particular, the Colleges of Arts and Sciences, Agriculture and Life Sciences, and Human Ecology.

The concentration is administered by a committee, the members of which are drawn from the faculty associated with the concentration. The members of this committee include faculty from each of the major colleges from which courses in the concentration are drawn. The work of the committee is supported administratively through the Biology and Society Major. The office of the Biology and Society Major (275 Clark Hall) also provides a central location for students to receive information about relevant course offerings, upcoming seminars and presentations, faculty interests, and so on.

Basic Requirements

The requirements for the Agriculture, Food, and Society concentration are designed to ensure a broad background in the biological, socioeconomic, and humanistic dimensions of agricultural and food issues. These requirements include foundation courses in biology; the Senior Seminar B&Soc/BioG/S&TS 469, Food, Agriculture, and Society; plus a minimum of five electives totaling 15 credits drawn from the courses offerings.

Students enrolling in the Agriculture, Food, and Society concentration should take the following foundation courses in biology to prepare themselves for course work in agricultural science: a two-semester introductory biology sequence selected from Biological Sciences 109/110, 105/106, or 101–104. (Advanced placement in biology with a score of 4 or 5, or Biological Sciences 107/108, offered during the eight-week Cornell summer session, also satisfies the biological sciences requirement). These courses may be used to meet group 1 (physical or biological sciences) distribution sequence requirements in the College of Arts and Sciences.

It is recommended (but not required) that students in the Agriculture, Food, and Society concentration elect one or more freshman

writing seminars with agriculturally related content to meet basic college requirements for graduation. The electives for the concentration, from which a minimum of five courses and 15 credits must be taken, are organized into three groups: agricultural and nutritional science, humanities, and social science/history. Students must select one agricultural and nutritional science course, one humanities course, and three social science or history courses. A maximum of six of the 15 credits may be earned in 100-level courses.

In addition, students are required to take the senior seminar, B&Soc/BioG/S&TS 469, Food, Agriculture and Society. Adjustments to these and other requirement of the concentration may be made with the approval of the student's Agriculture, Food, and Society faculty adviser.

American Studies

R. L. Moore, director; G. Altschuler, P. Becker, R. Bensel, S. Blumin, T. Borstelmann, J. Brumberg, P. Caban, J. E. Gainor, M. C. Garcia, J. Goldsby, M. Kammen, I. Kramnick, T. J. Lowi, B. Maxwell, D. E. McCall, L. L. Meixner, M. B. Norton, R. Polenberg, J. Porte, J. Rabkin, N. Salvatore, S. Samuels, M. E. Sanders, V. Santiago-Irizarry, M. Shefter, J. H. Silbey, H. Spillers, D. Usner, M. Washington, S. Wong.

Affiliated faculty: J. E. Bernstock, H. Gottfried, M. Hatch, L. Herrin, J. Jennings, P. McClelland, J. Peraino, P. Sawyer, M. Woods.

The Major

The major in American Studies, appropriate for a wide array of future professions, began as a program of coordinated study in the history, literature, and politics of the United States. These remain the core elements, but American Studies aims to be inclusive in its subject matter. Given the nation's diverse population and cultures, the program wants its majors to examine American experience in broad terms, drawing on the materials and methods of a variety of disciplines.

The prerequisites are two courses from the following: American Studies 101, American Studies 102, English 262, English 265, English 275, English 268, Government 111, History 101, History 102, History 260, History 261. Students who contemplate becoming an American Studies major are encouraged to speak with the program director as early as possible to arrange for a major adviser.

In consultation with their advisers, American Studies majors elect, in addition to the prerequisites, 36 credits (or nine courses) chosen from the American Studies course list (these courses are usually crosslisted with another department). Their work must include courses in all of the three large periods into which the nation's development can be divided (colonial, nineteenth century, and twentieth century). Students must take no fewer than 4 courses before 1900. At least one of these courses must be in the period before 1800. Each student must also take one of American Studies 430 seminars or, with the approval of the adviser, an appropriate substitute seminar at the 400 level. (American Studies 500 taught in Washington, DC, does not fulfill the seminar requirement.) Students are given considerable freedom in creating a balanced program, but no more than five courses may be in any one department.

Beyond the basic core requirements for the major, 8 credits of work in the history or literature of a culture outside the United States are required. Students who study abroad for one semester usually satisfy this requirement.

Students may find courses relevant to American experience that they wish to take but that are not on the American Studies course list. With their adviser's approval, students may count two such courses towards fulfilling the major.

Honors

Candidates for honors must maintain an average of B+ in courses pertinent to the major. Normally, at the end of the junior year students who wish to write a senior honors essay must approach a member of the American Studies Program faculty and discuss their ideas for a project. With approval from the faculty member students may then register in the fall of their senior year for American Studies 493, the honors essay tutorial. At the end of the fall semester, honors candidates will meet with their adviser and a second member of the American Studies faculty to discuss their progress. If satisfactory, honors students will complete their honors essays in the spring by enrolling in American Studies 494.

Prerequisite Courses (see also under appropriate departments)

AM ST 101 Introduction to American Studies: American Revolution to the Beginning of the 20th Century #

Fall. 4 credits. G. Altschuler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. We will do so by examining eight "great" or classic texts written between 1776–1900. The historical context of these texts will be explored in lecture and they will be treated as literature and historical/cultural documents. Texts include: *Common Sense* by Thomas Paine; *The Blithedale Romance* by Nathaniel Hawthorne; The Lincoln-Douglas Debates; Henry James' *The Bostonians*; Mark Twain's *Huckleberry Finn*; and William Dean Howells' *The Rise of Silas Lapham*.

AM ST 102 Introduction American Studies: Progressive Era to the Present

Spring. 4 credits. G. Altschuler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. We will do so by examining eight "great" or classic texts written between 1900 and the present. Texts include: Ernest Hemingway's *A Farewell to Arms*; F. Scott Fitzgerald's *The Great Gatsby*; William Faulkner's *Sound and the Fury*; Richard Wright's *Black Boy*; John Updike's *Rabbit Run*; and Philip Roth's *American Pastoral*.
American Studies 101 is not a prerequisite of American Studies 102.

American Studies 430 Seminars

Section One: The Politics of the American Civil War (also Government 408)

Fall. 4 credits. R. Bensel.

The Civil War, along with the founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American Political development. Arising out of intense ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention will be paid to: (1) the political economy and culture of plantation slavery in the antebellum South; (2) the apparent inevitability of collision between the slave and free states and their respective societies; (3) the military, political, and economic strategies that determined, on both sides, the course and duration of the war; (4) the limits and possibilities of reform of southern society during Reconstruction; and (5) the impact of the Civil War on the subsequent development of the United States.

Section Two: American in the Camera's Eye (also History 430)

Fall. 4 credits. R. L. Moore.

Photographs and films have become archives for historical research. From the era of Matthew Brady's Civil War images, the United States has been recorded by documentary photographers who have called attention to the country's progress and its poverty. Hollywood filmmakers have also recorded endless images of American landscape and placed against that landscape fictionalized accounts of the country's history and its social problems. What can we learn from these images? What is their relation to written texts and to other documents that tell us about the past? How truthful is documentary? How misleading is Hollywood? One key text will be James Agee's and Walker Evans' *Let Us Now Praise Famous Men*. The seminar will meet once each week for discussion and periodically during the semester to view films.

Section Three: Literature as History: The Americas (also English 430)

Spring. 4 credits. B. Maxwell.

Beginning with William Carlos Williams's *In the American Grain* (1925), this course will consider modernist innovations in the telling of history by literary means. Responding to what they felt as the "deadness" of conventional historiography, writers such as Williams, Charles Reznikoff, John Sanford, Muriel Rukeyser, Melvin Tolson, and Paul Metcalf produced imaginative American histories that made a new world of historical narration, and in the process found new objects of historical attention, one of which was the plural, transnational America of the hemispheric Americas. This reconfiguration anticipated and in some cases shaped recent revisionist critiques of the European presence on American soil (Eduardo Galeano, Leslie Marmon Silko, David Stannard, Ward Churchill, Noam Chomsky, Ana Castillo); accordingly, students will read examples, some polemical, of that later work.

Anthropology, Sociology, and Economics

[AM ST 150 Introduction to American Religion (also Sociology 150 and Religious Studies 150)
3 credits. Not offered 1999–2000. P. Becker.
For description, see SOC 150.]

[AM ST 203 Religion and Family in the U.S. (also Sociology 201, Rural Sociology 202, Religious Studies 203)
3 credits. Not offered 1999–2000. P. Becker.
For description, see SOC 201.]

[AM ST 221 Anthropological Representation: Ethnographies of Latino Culture (also Anthropology 221 and Latino Studies Program 221)
Not offered 1999–2000. V. Santiago-Irizarry.
For description, see ANTHRO 221.]

AM ST 323 American Economic History (also Economics 323) #
Spring. 4 credits. P. McClelland.
For description, see ECON 323.

AM ST 377 The United States (also Anthropology 377 and Latino Studies Program 377)
Fall. 4 credits. V. Santiago-Irizarry.
For description, see ANTHRO 377.

[AM ST 380 Gender, Ideology, and Culture (also Sociology 380 and Women's Studies 380)
Not offered 1999–2000. 4 credits. P. Becker.
For description, see SOC 380.]

[AM ST 426 History of American Enterprise (also Economics 426) #
4 credits. Not offered 1999–2000. P. McClelland.
For description, see ECON 426.]

Literature and Theatre Arts

AM ST 215 Comparative American Literature (also Comparative Literature 215)
Fall. 4 credits. B. Maxwell.
For description, see COM L 215.

AM ST 240 Survey in US Latino Literature (also English 240)
Spring. 4 credits. M. P. Brady.
For description, see ENGL 240.

AMST 260 Introduction to American Indian Literature (also English 260)
Fall. 4 credits. R. Warrior.
For description, see ENGL 260.

AM ST 262 Asian American Literature (also English 262, Asian American Studies 262)
Fall. 4 credits. S. Wong.
For description, see ENGL 262.

AM ST 265 Introduction to African American Literature (also English 265)
Fall. 4 credits. J. Goldsby.
For description, see ENGL 265.

[AM ST 267 American Literary Identities: Nineteenth Century (also English 267)
Not offered 1999–2000.]

AM ST 268 The Culture of the 1960s (also English 268)
Fall. 4 credits. P. Sawyer.
This course argues that the 1960s helps define the 1990s, but that as we look back, the 1990s helps define the 1960s. Were the sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an empassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, war, the counterculture, the New Left, and the woman's movement. Texts will include *The Autobiography of Malcolm X, The Electric Kool-Aid Acid Test, Dispatches*, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, manifestoes, and memoirs. The term paper will explore students' special interests.

AM ST 275 The American Literary Tradition (also English 275)
Fall. 4 credits. H. Spillers.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

[AM ST 276 Literature in the Cold War Culture (also English 276)
Not offered 1999-2000. B. Maxwell.
For description, see ENGL 276.]

AM ST 291 American 1920s: Literature and Culture (also English 291)
Fall. 4 credits. B. Maxwell.
For description, see ENGL 291.

AM ST 318 Queer Theatre (also Theatre Arts 320)
Spring. 4 credits. E. Gainor.
For description, see THETR 320.

[AM ST 334 American Drama and Theatre (also Theatre Arts 336 and English 336)
4 credits. Not offered 1999–2000. E. Gainor.
For description, see THETR 336.]

[AM ST 335 Contemporary American Theatre (also Theatre Arts 337 and English 337)
4 credits. Not offered 1999–2000. E. Gainor.
For description, see THETR 337.]

AM ST 338 American Indians and Film (also Theatre Arts 338)
Fall. 4 credits. L. Black.
For description, see THETR 338.

AM ST 361 Early American Literature (also English 361)
Spring. 4 credits. S. Samuels.
For description, see ENGL 361.

AM ST 362 The American Renaissance (also English 362)
Fall. 4 credits. J. Porte.
For description, see ENGL 362.

AM ST 363 The Age of Realism and Naturalism (also English 363)
Spring. 4 credits. J. Goldsby.
For description, see ENGL 363.

[AM ST 364 American Literature Between Wars (also English 364)
4 credits. Not offered 1999–2000.
For description, see ENGL 364.]

[AM ST 365 American Literature Since 1945 (also English 365)
4 credits. Not offered 1999–2000. B. Maxwell.
For description, see ENGL 365.]

[AM ST 366 The Nineteenth-Century American Novel (also English 366)
4 credits. Not offered 1999–2000. D. McCall.
For description, see ENGL 366.]

[AM ST 367 The Modern American Novel (also English 367)
Not offered 1999–2000.]

[AM ST 369 Survey of African American Literature to 1917 (also English 375)
4 credits. Not offered 1999–2000. J. Goldsby.
For description, ENGL 375.]

[AM ST 370 Survey in African American Literature: 1918 to Present (also English 376)
4 credits. Not offered 1999–2000. H. Spillers.
For description, see ENGL 376.]

[AM ST 371 American Poetry to 1950 (also ENGL 371)
4 credits. Not offered 1999–2000. R. Gilbert.
For description, see ENGL 371.]

AM ST 372 American Poetry Since 1950 (also English 378)
Fall. 4 credits. R. Gilbert.
For description, see ENGL 378.

[AM ST 374 19th-Century American Women Writers (also English 374 and Women's Studies 378) #
4 credits. Not offered 1999–2000. Staff.
For description, see ENGL 374.]

AM ST 394 Topics in American Indian Literature: Native Cultural Studies (also English 394)
Spring. 4 credits. Staff.
For description, see ENGL 394.

[AM ST 465 Proseminar in American Studies (also English 465)
4 credits. Not offered 1999–2000. J. Porte.
For description, see ENGL 465.]

[AM ST 467 Studies in American Fiction: 1870–1915 (also English 467)
4 credits. Not offered 1999–2000.]

AM ST 469 William Faulkner (also English 469)
Fall. 4 credits. H. Spillers.
For description, see ENGL 469.

AM ST 470 Studies in the Novel: Hemingway, Fitzgerald, Faulkner (also English 470)
Spring. 4 credits. D. McCall.
For description, see ENGL 470.

[AM ST 471 American Indian Women's Literature (also English 471)
4 credits. Not offered 1999–2000.
For description, see ENGL 471.]

[AM ST 473 American Indian Autobiography (also English 473)
4 credits. Not offered 1999–2000.
For description, see ENGL 473.]

[AM ST 474 Contemporary African American Poetry (also English 474)
4 credits. Not offered 1999–2000.
K. McClane.
For description, see ENGL 474.]

AM ST 479 Jewish-American Writing (also English 479 and Jewish Studies 478)
Fall. 4 credits. J. Porte.
For description, see ENGL 479.

[AM ST 485 American Modernist Writing (also English 485)
4 credits. Not offered 1999–2000.]

Government and Public Policy

GOVT 111 Introduction to American Government and Politics
Fall. 3 credits. T. J. Lowi.
An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

AM ST 302 Social Movement in American Politics (also Government 302)
Spring. 4 credits. M. E. Sanders.
For description, see GOVT 302.

AM ST 305 Public Opinion and Political Participation (also Government 304)
Fall. 4 credits. J. Cowden.
For description, see GOVT 305.

AM ST 306 Latino Politics in the United States (also Government 306)
Spring. 4 credits. P. Caban.
For description, see GOVT 306.

AM ST 310 Civil Liberties in the United States (also Government 327)
Spring. 4 credits. J. Rabkin.
For description, see GOVT 327.

AM ST 315 Prisons (also Government 314)
Spring. 4 credits. M. Katzenstein.
For description, see GOVT 314.

[AM ST 316 The American Presidency (also Government 316)
4 credits. Not offered 1999–2000.
M. E. Sanders.
For description, see GOVT 316.]

AM ST 319 The American Congress (also Government 318)
Spring. 4 credits. M Shefter.
For description, see GOVT 318.

AM ST 328 Constitutional Politics: The United States Supreme Court (also Government 328)
Fall. 4 credits. J. Rabkin.
For description, see GOVT 328.

AM ST 350 Atomic Consequences: The Incorporation of Nuclear Weapons In Postwar America (also Science and Technology Studies 350, Government 305)
Spring. 4 credits. M. Dennis.
For description, see S&TS 350.

AM ST 353 Feminism Movements and the State (also Government 353, Women's Studies 353)
Fall. 4 credits. M. Katzenstein.
For description, see GOVT 353.

[AM ST 376 American Political Thought from Madison to Malcolm X (also Government 366 and History 316) #
4 credits. Not offered 1999–2000.
I. Kramnick.
For description, see GOVT 366.]

[AM ST 388 Science in the American Polity, 1800–1960 (also Science and Technology Studies 390, Government 308)
Fall. 4 credits. Not offered 1999–2000.
M. Dennis
For description, see S&TS 390.]

AM ST 389 Science in the American Polity, 1960-Now (also Science and Technology Studies 391, Government 309)
Spring. 4 credits. M. Dennis.
For description, see S&TS 391.

AM ST 409 Racial Prejudice and Political Intolerance (also Government 409)
Spring. 4 credits. J. Cowden.
For description, see GOVT 409.

AM ST 418 The Politics of Scandal (also Government 419)
Spring. 4 credits. M. Shefter and J. Rabkin.
For description, see GOVT 419.

AM ST 428 Government and Public Policy: An Introduction to Analysis and Criticism (also Government 428)
Fall. 4 credits. T. Lowi.
For description, see GOVT 428.

AM ST 429 Government and Public Policy: An Introduction to Analysis and Criticism (also Government 429)
Spring. 4 credits. T. Lowi.
For description, see GOVT 429.

History

AM ST 103 Introduction to American History (also History 101) #
Fall. 4 credits. D. Usner.
A survey of American history from the beginning through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, antebellum reform movements, and the coming of the Civil War.

AM ST 104 Introduction to American History (also History 102)
Spring. 4 credits. M. C. Garcia.
An introductory survey of the development of the United States since the Civil War.

[AM ST 201 Popular Culture in the United States, 1900–1945
Fall. Not offered 1999–2000.
G. Altschuler.
American Studies 201 will deal with American popular culture in the period between 1900 and the end of World War II. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines and music, we will try to better understand the ways in which popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and the less powerful, seek to "control" images and themes. Topics for 201 include: the Western; Cultural Heroes and the Cult of Individualism in the 1920s; The Hays Code and the Black Sox scandal; Mae West and the "New Women"' Advertising in an Age of Consumption; Gangsters and G-Men; Jackie Robinson and the American Dilemma.]

[AM ST 202 Popular Culture in the United States, 1945–Present
Spring. 4 credits. Not offered 1999–2000.
G. Altschuler.
American Studies 202 will treat the period from 1945 to the present. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines and music, we will try to better understand the ways in which popular culture shapes and/or reflects American values. The course will also depict popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and less powerful, seek to "control" images and themes. Topics for 202 include: The "Honeymooners" and 1950's Television, soap operas; "Gross-out" movies; Elvis; The Beatles, and Guns 'n Roses; Gothic Romances; People Magazine and USA Today.]

[AM ST 204 Comparative Migration in the Americas (also History 202)
Fall. 4 credits. Not offered 1999–2000.
M.C. Garcia.
For description, see HIST 202.]

AM ST 208 Seminar: Era-Franklin D. Roosevelt (also History 208)
Fall. 4 credits. R. Polenberg.
For description, see History 208.

AM ST 214 Seminar on American Foreign Policy (also History 214)
Fall. 3 credits. Prerequisite: permission of instructor. W. LaFeber.
For description, see HIST 214.

AM ST 241 History of Childhood in the United States (also Human Development and Family Studies 241 and History 271)
Fall. 4 credits. J. Brumberg.

AM ST 251 Black Religious Traditions from Slavery to Freedom (also History 251 and Religious Studies 251)
Spring. 4 credits. M. Washington.
For description, see HIST 251.

[AM ST 258 Historical Development of Women as Professionals, 1800 to Present (also Human Development 258, History 238, Women's Studies 238)
4 credits. Not offered 1999–2000.
J. Brumberg.
For description, see HD 258.]

AM ST 259 Introduction to US Latino History, Part I (also History 260, Latino Studies Program 260)
Spring. 4 credits. M. C. Garcia.
For description, see HIST 260.

AM ST 261 Introduction to US Latino History, Part II (also History 261, Latino Studies Program 261)
Fall. 4 credits. M. C. Garcia.
For description, see HIST 261.

[AM ST 272 American Indian History, 1500–1600 (also History 276) #
4 credits. Not offered 1999–2000.
D. Usner.
For description, see HIST 276.]

AM ST 273 Women in American Society, Past and Present (also History 273) #
Spring. 4 credits. M. B. Norton.
For description, see HIST 273.

[AM ST 277 American Indian History Since 1830 (also History 277)
4 credits. Not offered 1999–2000.
D. Usner.
For description, see HIST 277.]

[AM ST 303 African-American Women in Slavery and Freedom (also History 303)
4 credits. Not offered 1999–2000.
M. Washington.
For description, see HIST 303.]

AM ST 304 American Culture in Historical Perspective, 1880–1980 (also History 304)
Spring. 4 credits. M. Kammen.
For description, see HIST 304.

[AM ST 311 Structure of American Political History (also History 311) #
4 credits. Not offered 1999–2000.
J. Silbey.
For description, see HIST 311.]

[AM ST 312 Structure of American Political History (also History 312)
4 credits. Not offered 1999–2000.
J. Silbey.
For description, see HIST 312.]

[AM ST 314 History of American Foreign Policy, 1912 to the Present (also History 314)
4 credits. Not offered 1999–2000.
T. Borstelmann.
For description, see HIST 314.]

[AM ST 317 American Constitutional Development (also History 318)
4 credits. Not offered 1999–2000.
R. Polenberg.
For description, see HIST 318.]

[AM ST 320 Understanding Work in America, 1800–1990 (also History 315)
4 credits. Not offered 1999–2000.
N. Salvatore.
This course examines both the experience and the perception of work in American life in the century framed by two fundamental formations: the emergence of a system of industrial capitalism largely nationalistic in its orientation and the development of a more international economic system in more recent times. Among the topics considered will be the effects of technological change, its impact on the experience of work across numerous occupational categories, and the changing perceptions of work as reflected in contemporary cultural expression, literature, and commentary across the century.]

[AM ST 321 Colonial North America to 1763 (also History 321) #
4 credits. Not offered 1999–2000.
M. B. Norton.
For description, see HIST 321.]

[AM ST 322 Age of the American Revolution, 1763–1815 (also History 325) #
4 credits. Not offered 1999–2000.
M. B. Norton.
For description, see HIST 325.]

[AM ST 324 Varieties of American Dissent, 1880–1990 (also History 324)
4 credits. Not offered 1999–2000.
N. Salvatore.
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course will explore the varieties of economic, political, and cultural dissent in American between 1880 and 1990, and will examine how understanding dissent in its specific historical context illuminates major aspects of American life and culture.]

[AM ST 327 American Frontier History Before 1850 (also History 327) #
4 credits. Not offered 1999–2000.
D. Usner.
For description, see HIST 327.]

[AM ST 330 The Age of Jackson, 1813–1850 (also History 330) #
4 credits. Not offered 1999–2000.
For description, see HIST 330.]

[AM ST 331 American Civil War and Reconstruction, 1850–1877 (also History 331) #
4 credits. Not offered 1999–2000.
J. Silbey.
For description, see HIST 331.]

AM ST 332 The Urbanization of American Society, 1600 to 1860 (also History 332) #
Fall. 4 credits. S. Blumin.
For description, see HIST 332.

AM ST 333 The Urbanization of American Society, 1860–2000 (also History 333)
Spring. 4 credits. S. Blumin.
For description, see HIST 333.

[AM ST 336 Capitalism and Society in Developing America, 1607–1877 (also History 336) #
4 credits. Not offered 1999–2000.
S. Blumin.
For description, see HIST 336.]

[AM ST 337 Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840–2000 (also History 337)
4 credits. Not offered 1999–2000.
S. Blumin.
For description, see HIST 337.]

[AM ST 340 Recent American History, 1925–1960 (also History 340)
4 credits. Not offered 1999–2000.
R. Polenberg.
For description, see HIST 340.]

AM ST 341 Recent American History, 1960–Present (also History 341)
Fall. 4 credits. R. Polenberg.
For description, see HIST 341.

[AM ST 345 Intellectual/Cultural Life of Nineteenth-Century Americans (also History 345 and Religious Studies 345) #
4 credits. Not offered 1999–2000.
R. L. Moore.
For description, see HIST 345.]

AM ST 346 Modernization of the American Mind (also History 346)
Fall. 4 credits. R. L. Moore.
For description, see HIST 346.

[AM ST 359 American Families in Historical Perspective (also Human Development 359 and Women's Studies 359)
3 credits. Not offered 1999–2000.
J. Brumberg.
For description, see HD 359.]

AM ST 378 Topics in US Women's History (also History 378 and Women's Studies 378)
Fall. 4 credits. M.B. Norton.
For description, see HIST 378.

AM ST 411 Seminar: American Political History (also History 411)
Spring. 4 credits. J. Silbey.
For description, see HIST 411.

AM ST 417 History of Female Adolescence (also Human Development 417, History 458, Women's Studies 438) #
Fall. 4 credits. J. Brumberg.
For description, see HD 417.

AM ST 419 Seminar in American Social History (also History 419)
Spring. 4 credits. Taught in Washington, D.C. S. Blumin.
For description, see HIST 419.

[AM ST 421 Undergraduate Seminar in American Cultural History (also History 421)
4 credits. Not offered 1999–2000.
M. Kammen.
For description, see HIST 421.]

[AM ST 440 Undergraduate Seminar in Recent American History (also History 440)
4 credits. Not offered 1999–2000.
R. Polenberg.
For description, see HIST 440.]

[AM ST 442 Religion and Politics in American History from J. Winthrop to R. Reed (also History 442 and Religious Studies 442)
4 credits. Not offered 1999–2000.
R. L. Moore.
For description, see HIST 442.]

AM ST 486 Seminar on the 1960s (also History 486)
Fall. 4 credits. T. Borstelmann.
For description, see HIST 486.

AM ST 500 Research Seminar in American Studies (also History 500)
Fall or spring. Offered in Cornell-in-Washington Program only. S. Blumin and others.
For description, see HIST 500.

Music and Visual Studies

AM ST 105 Popular Music in America: 1850–1985 (also MUSIC 101) #
Fall. 3 credits. M. Hatch.
For description, see MUSIC 101.

AM ST 222 A Survey of Jazz (also Music 222)
Fall. 3 credits. S. Pond.
For description, see MUSIC 222.

AM ST 223 History of Rock Music (also MUSIC 221)
Spring. 3 credits. J. Peraino.
For description, see MUSIC 221.

AM ST 243 Inside Out: The American Everyday Interior (also Design and Environmental Analysis 243, Women's Studies 243)
Spring. 3 credits. J. Jennings.
For description, see DEA 243.

AM ST 282 The American Landscape (also Landscape Architecture 282)
3 credits. H. Gottfried.
For description, see LA 282.

AM ST 355 Art from 1940–1990 (also History of Art 365)
Fall. 4 credits. J. E. Bernstock.
For description, see ART H 365.

[AM ST 360 Painting and Everyday Life in Nineteenth-Century America (also History of Art 360) #
4 credits. Not offered 1999–2000.
L. L. Meixner.
For description, see ART H 360.]

AM ST 390 American Architecture and Building I (also Architecture 390)
Fall. 3 credits. Prerequisites: Architecture 181–182 or permission of instructor.
M. Woods.
For description, see ARCH 390.

AM ST 397 Special Topics in the History of Architecture and Urbanism (also Architecture 398)
Fall. 3 credits. Prerequisites: Architecture 181–182 or permission of instructor.
M. Woods.
For description, see ARCH 398.

[AM ST 462 Topics in Early Modernism (also History of Art 462) #
4 credits. Not offered 1999–2000.
L. L. Meixner.
For description, see ART H 462.]

Honors

Please see description of major for information about registration in these courses.

AM ST 493–494 Honors Essay Tutorial
493, fall; 494, spring. Up to 4 credits each semester. See R. L. Moore for appropriate advisors.

Center for Applied Mathematics

The Center for Applied Mathematics administers a broadly based interdepartmental graduate program that provides opportunities for study and research over a wide range of the mathematical sciences. This program is based on a solid foundation in analysis, algebra, and methods of applied mathematics. The remainder of the graduate student's program is designed by the student and his or her Special Committee. For detailed information on opportunities for graduate study in applied mathematics, students should contact the Director of Graduate Studies of the Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall.

There is no special undergraduate degree program in applied mathematics. Undergraduate students interested in an application-oriented program in mathematics may select an appropriate program in the Department of Mathematics, the Department of Computer Science, or some department of the College of Engineering.

A listing of selected graduate courses in applied mathematics can be found in the description of the center in "Interdisciplinary Centers, Programs, and Studies."

Archaeology Program

A. Ramage (history of art), program director

S. Baugher (landscape architecture), R. G. Calkins (history of art), K. M. Clinton (classics), J. E. Coleman (classics), D. Evett (English), K. L. Gleason (landscape architecture), J. S. Henderson (anthropology), K. A. R. Kennedy (ecology and systematics), P. I. Kuniholm (history of art), director of undergraduate studies, D. I. Owen (Near Eastern studies), N. Russell (anthopology), B. S. Strauss (history), T. P. Volman (anthropology).

Archaeology is an interdisciplinary field at Cornell, which is one of the few universities in the United States to offer a separate archaeology major. Program faculty members, affiliated with several departments, coordinate course offerings and help students identify opportunities for fieldwork, graduate study, and professional positions.

The Major

Prospective majors must complete Archaeology 100 or one of the basic courses as defined below before they will be admitted to the major. This initial course will not be counted toward the major requirements.

Because the major draws on the teaching and research interests of faculty from many departments to present a broad view of the archaeological process, interested students should discuss their course of study with a participating faculty member as early as possible. In some areas of specialization, intensive language training should be coordinated with other studies as early as the freshman year.

Once admitted to the major, students must take an additional 32 credits from the courses listed below, selected in consultation with a major adviser of their choosing. These courses should provide exposure to a broad range of archaeologically known cultures and the methods of revealing and interpreting them. Sixteen of the credit hours should be at the 300 level or above. At least two courses must be taken from each of categories B-E.

Courses basic to the discipline of archaeology are marked with the word "**Basic**" after the number of credit hours. It is recommended that majors who are planning to pursue graduate studies in archaeology should take at least two of the basic courses in each category. Further courses in languages and in geology are also recommended.

Honors. Honors in archaeology is awarded on the basis of the quality of an honors essay and the student's overall academic record. Prospective honors students should have a 3.5 gradepoint in the major and a 3.0 gradepoint overall. They should consult with the director of undergraduate studies before the beginning of the senior year. The honors essay is normally prepared in consultation with a faculty adviser during the senior year; students may enroll in Archaeology 481, fall; 482, spring for this purpose.

Fieldwork. Every student should gain some practical experience in archaeological fieldwork on a project authorized by his or her adviser. This requirement may be waived in exceptional circumstances. The Jacob and Hedwig Hirsch bequest provides support for a limited number of students to work at excavations sponsored by Cornell and other approved institutions.

The Concentration

Students in Cornell schools and colleges other than Arts and Sciences may elect a concentration in archaeology. To concentrate in archaeology, the student must complete five courses, all with a grade of C or better. The five courses must consist of either (1) Archaeology 100 and four other courses from categories B–D, at least three of which must be basic courses, or (2) five courses from categories B–D, at least four of which must be basic courses. Concentrators are encouraged to gain some fieldwork experience. They are eligible on the same basis as majors for Hirsch Scholarships in support of fieldwork.

First-Year Writing Seminars

For course descriptions, see the first-year writing seminar brochure.

A. Introductory Courses and Independent Study Courses

ARKEO 100 Introduction to Archaeology (also Anthropology 100) #
Fall. 3 credits. Basic. J. Henderson.
A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks archaeologists use to reconstruct them. This course can serve as a platform for both Archaeology and Anthropology undergraduate majors.

ARKEO 201 Lost Tribes and Sunken Continents (also Anthropology 201) @ #
Summer only. 3 credits. D. Evett.
An examination of popular theories about past highlights, differences among them, and the kinds of explanations offered by archaeologists. Emphasis is on the ways archaeologists interpet the past. Case studies include Atlantis, Stonehenge, Egyptian and Mexican pyramids, and the history of contacts between the Old World and the Americas.

ARKEO 300 Individual Study in Archaeology and Related Fields
Fall and spring. Credit to be arranged. Prerequisite: Archaeology 100 or permission of instructor.
Students pursue topics of particular interest with the guidance of a faculty member.

ARKEO 481–482 Honors Thesis
481, fall; 482, spring. 4 (V) credits. S-U only. Prerequisite: admission to Honors Program.
The student, under faculty direction, will prepare a senior thesis.

ARKEO 600 Special Topics in Archaeology
Fall and spring. 4 (V) credits.
Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 681–682 Master's Thesis
681, fall; 682, spring. 4 (V) credits. S-U only. Limited to students admitted to Master's Program in Archaeology.
Students, working individually with faculty member(s), prepare a Master's Thesis in Archaeology.

B. Theory and Interdisciplinary Approaches

[ARKEO 202 Interpretive Archaeology (also Anthropology 202) #
Fall. 3 credits. Basic. Limited to 50 students. Not offered 1999–2000. T. P. Volman.
For description, see ANTHR 202.]

[ARKEO 203 Early People: The Archaeological and Fossil Record (also Anthropology 203) #
Spring. 3 credits. Basic. Not offered 1999–2000. T. P. Volman.]

[ARKEO 204 Ancient Civilizations (also Anthropology 204) @ #
Fall. 3 (4) V credits. Basic. Not offered 1999–2000. J. S. Henderson.]

ARKEO 215 Stone Age Art (also Anthropology 215) @ #
Fall. 3 credits. T. P. Volman.
For description, see ANTHR 215.

[ARKEO 317 Stone Age Archaeology (also Anthropology 317)
Fall. 4 credits. Not offered 1999–2000. T. P. Volman.
For description, see ANTHR 317.]

ARKEO 409 Approaches to Archaeology (also Archaeology 609 and Anthropology 409/609)
Fall. 4 credits. Basic. Prerequisite: permission of instructor. N. Russell.
For description, see ANTHR 409.

ARKEO 494 Seminar in Archaeology: The Archaeology of Human Origins (also Anthropology 494) @ #
Fall. 4 credits. T. P. Volman.
For description, see ANTHR 494.

ARKEO 609 Approaches to Archaeology (also Archaeology 409 and Anthropology 409/609)
Fall. 4 credits. Basic. Prerequisite: permission of instructor. N. Russell.
For description, see ANTHR 409.

BIO ES 371 Human Palaeontology (also Anthropology 371)
Fall. 3 credits. K. A. R. Kennedy.
For description, see Biological Sciences/ Ecology & Systematics 371.

LA 569 Archaeology in Preservation Planning and Design (also CRP 569)
Spring. 3 credits. S. Baugher.
For description, see LA 569.

C. Old World Archaeology

[ARKEO 221 Minoan-Mycenaean Art and Archaeology (also Classics 221 and History of Art 221) #
3 credits. Basic. Not offered 1999–2000. J. Coleman.
For description, see CLASS 221.]

[ARKEO 233 Archaeology in Action II (also History of Art 225 and Classics 233) #
Spring. 3 credits. Prerequisite: permission of instructor. Not offered 1999–2000. P. I. Kuniholm.
For description, see ART H 225.]

ARKEO 263 Introduction to Biblical History and Archaeology (also NES 263, Jewish Studies 263, and Religious Studies 264) @ #
Spring. 3 credits. J. Zorn.
For description, see NES 263.

[ARKEO 275 Ancient Seafaring (also Jewish Studies 261 and Near Eastern Studies 261) @ #
3 credits. Not offered 1999–2000. D. I. Owen.
For description, see NES 261.]

ARKEO 321 Mycenae and Homer (also Classics 321 and History of Art 321) #
Fall. 4 credits. Prerequisite: at least one previous course in Archaeology, Classics, or History of Art. J. Coleman.
Study of the relationship between the Mycenaean period of Greece (known primarily from archaeology) and the Homeric *Iliad* and *Odyssey*. Topics include Mycenaean architecture, burial customs, kinship and military activities; the reasons for the collapse of the Bronze Age palatial economies; the archaeological evidence for society in the "Dark Ages" that followed; the writing systems of Mycenaean Greece (Linear B) and the Iron Age (the Semitic/Greek alphabet); the nature of the Homeric poems and their value as historical sources.

[ARKEO 352 The City of Athens from Theseus to Justinian (also Classics 352 and History of Art 352) #
3 credits. Not offered 1999–2000. Staff.
For description, see CLASS 352.]

ARKEO 366 The History and Archaeology of the Ancient Near East (also Jewish Studies 366 and Near Eastern Studies 366) @ #
Fall. 4 credits. D. I. Owen.
For description, see NES 366.

ARKEO 380 Introduction to the Arts of China (also History of Art 380) @ #
Fall. 4 credits. A. Pan.
For description, see ART H 380.

[ARKEO 417 Early Medieval Archaeology and Literature (also Archaeology 617, English 417 and 617)
Spring. 4 credits. Prerequisite: permission of instructor. Enrollment limited to 15 students. This course may be used as one of the three pre-1800 courses required of English majors. Not offered 1999–2000; next offered 2000–01. R. T. Farrell.
For description, see ENGL 417.]

[ARKEO 425 Seminar on the Bronze Age Architecture of Asia Minor (also Art History 425 and Classics 430)
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. P. I. Kuniholm.]

[ARKEO 432 Sardis and the Cities of Asia Minor (History of Art 424 and Classics 432) #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. A. Ramage.]

ARKEO 434 The Rise of Classical Greece (also History of Art 434 and Classics 434) #
Spring. 4 credits. Recommended: Classics 220 or 221 or History of Art 220 or 221, or permission of instructor. P. I. Kuniholm.
For description, see ART H 434.

[ARKEO 435 Seminar on Roman Art and Archaeology (also Classics 435 and History of Art 427) #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. A. Ramage.
For description, see ART H 427.]

[ARKEO 520 Seminar in Classical Archaeology (also History of Art 520 and Classics 630)
4 credits. Not offered 1999–2000. P. I. Kuniholm.
For description, see ART H 520.]

[ARKEO 617 Early Medieval Archaeology and Literature (also Archaeology 417, English 417 and 617)
Spring. 4 credits. Not offered 1999–2000; next offered 2000–01. R. T. Farrell.
For description, see ENGL 417.]

[ARKEO 629 The Prehistoric Aegean (also Classics 629) #
4 credits. For graduate students, and advanced undergraduates with permission of instructor. Not offered 1999–2000. J. E. Coleman.
For description, see CLASS 629.]

CLASS 220 Introduction to Art History: The Classical World (also History of Art 220) #
Fall. 4 credits. A. Ramage.
For description, see CLASS 220.

[CLASS 319 Art in the Daily Life of Greece and Rome (also History of Art 319)
Spring. 4 credits. Not offered 1999–2000. A. Ramage.
For description, see ART H 319.]

[CLASS 322 Greeks and Barbarians (also History of Art 328) #
4 credits. Prerequisite: Classics 220 or 221, or permission of instructor. Not offered 1999–2000. J. Coleman.
For description, see CLASS 322.]

CLASS 329 Greek Sculpture (also History of Art 329) #
Spring. 4 credits. J. E. Coleman.
For description, see CLASS 329.

[CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also Religious Studies 333) #
Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. Not offered 1999–2000. K. Clinton.
For description, see CLASS 333.]

[ART H 322 Arts of the Roman Empire (also Classics 350)
4 credits. Not offered 1999–2000. A. Ramage.
For description, see ART H 322.]

[ART H 325 Greek Vase Painting (also Classics 325) #
4 credits. Not offered 1999–2000. A. Ramage.
For description, see ART H 325.]

ART H 327 Greek and Roman Coins (also Classics 327) #
Spring. 4 credits. A. Ramage.
For description, see ART H 327.

[LA 292 Creating a Second Nature
Spring. 3 credits. Prerequisites: none. Anthropology 100, Archaeology 100, or Classics/History of Art 220 recommended. Not offered spring 2000. K. Gleason.
For description, see LA 292.]

D. New World Archaeology

[ARKEO 355 Ancient Mexico and Central America (also Anthroplogy 355) @ #
Spring. 4 credits. Basic. Not offered 1999–2000. J. S. Henderson.
For description, see ANTHR 355.]

[ARKEO 493 Seminar in Archaeology (also Anthropology 493) @ #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 456 Mesoamerican Religion, Science, and History @ #
Fall. 4 credits. Not offered 1999–2000.]

LA 360 Pre-Industrial Cities and Towns of North America (also CRP 360)
Fall. 3 credits. S. Baugher.
For description, see LA 360.

E. Methodology and Technology

[ARKEO 262 Laboratory in Landscape Archaeology (also Landscape Architecture 262)
Spring. 3 credits. Not offered spring 2000. S. Baugher.
For description, see LA 262.]

ARKEO 285 Art, Archaeology, and Analysis (also Art 372, Engineering 185, English 185, Geology 200, MS&E 285, History of Art 200, NS&E 285, and Physics 200)
Spring. 3 credits. 3 lecs. Does not meet liberal studies distribution requirements. Staff.
For description, see GEOL 200.

ARKEO 309 Dendrochronology of the Aegean (also History of Art 309 and Classics 309)
Fall and spring. 4 credits. Limited to 10 students. Prerequisite: permission of instructor. P. I. Kuniholm.
For description, see ART H 309.

ARKEO 361 Summer Program in Etruscan Archaeology at La Piana in Italy (also Classics 361) #
Summer only. 3 or 6 credits. Permission required. J. Whitehead.

[ARKEO 370 Environmental Archaeology (also Archaeology 670 and Anthropology 370 and 670)
Fall. 4 credits. Prerequisite: two previous courses in archaeology or permission of instructor. Not offered 1999–2000. T. P. Volman.
For description, see ANTHR 370.]

[ARKEO 405 Archaeological Research Design (also Archaeology 605 and Anthropology 405/605)
Spring. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 1999–2000. J. S. Henderson, T. P. Volman.
For description, see ANTHR 405.]

ARKEO 423 Ceramics (also History of Art 423 and Classics 423)
Fall. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 423.

[ARKEO 458 Archaeological Analysis (also Archaeology 658 and Anthropology 458/658) @
Spring. 4 credits. Prerequisite: one course in archaeology or permission of instructor. Enrollment limited to 15 students. Not offered 1999–2000. J. S. Henderson.
For description, see ANTHR 458.]

ARKEO 463 Zooarchaeological Method (also Anthropology 463) #
Fall. 5 credits. N. Russell.
For description, see ANTHR 463.

ARKEO 464 Zooarchaeological Interpretation (also Anthropology 464) #
Spring. 4 credits. N. Russell.
For description, see ANTHR 464.

[ARKEO 466 Humans and Animals (also Archaeology 666 and Anthropology 466/666) #
Fall. 4 credits. Not offered 1999–2000.]

[ARKEO 467 Origins of Agriculture (also Anthropology 467) #
Spring. 4 credits. Not offered 1999–2000.]

[ARKEO 469 Gender and Age in Archaeology (also Archaeology 669 and Anthropology 469/669) #
Spring. 4 credits. Not offered 1999–2000.]

[ARKEO 601 Graduate Colloquium in Archaeology
4 credits. Open to graduate students and advanced undergraduates by permission of instructor. Not offered 1999–2000. Staff.
Faculty members of the Program in Archaeology and invited speakers will present summaries of the different aspects of archaeological analysis. Topics may include: lithics, ceramic typology, petrographic and neutron activation analysis, dendrochronology and other chronological techniques, settlement patterns, inscriptions, human and animal bones.]

[ARKEO 605 Archaeological Research Design (also Archaeology 405 and Anthropology 405/605)
Spring. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 1999–2000. J. S. Henderson, T. P. Volman.
For description, see ANTHR 405.]

[ARKEO 666 Humans and Animals (also Archaeology 666 and Anthropology 466/666) #
Fall. 4 credits. Not offered 1999–2000.]

[ARKEO 669 Gender and Age in Archaeology (also Archaeology 669 and Anthrolpology 469/669) #
Spring. 4 credits. Not offered 1999–2000.]

[ARKEO 670 Environmental Archaeology (also Archaeology 370 and Anthropology 370 and 670)
Fall. 4 credits. Prerequisite: two previous courses in archaeology or permission of instructor. Not offered 1999–2000. T. P. Volman.
For description, see ANTHR 370.]

[ANTHR 371 Human Paleontology (also Biological Sciences 371)
Fall. 4 credits. Prerequisite: one year of introductory biology, Anthropology 101, or permission of instructor. Not offered 1999–2000. K. A. R. Kennedy.
For description, see ANTHR 371.]

[ANTHR 474 Laboratory and Field Methods in Human Biology (also Biological Sciences 474)
5 credits. Prerequisite: one year of introductory biology, Anthropology 101, or permission of instructor. Not offered 1999–2000. K. A. R. Kennedy.]

[LA 261 Urban Archaeology (also CRP 261)
Fall. 3 credits. Not offered 1999–2000. S. Baugher.
For description, see LA 261.]

Asian American Studies Program

The Asian American Studies Program is a university-wide academic program housed administratively within the College of Arts and Sciences. Its aim is to promote teaching, research, and educational activities related to Asian Americans and to serve as a resource to the campus and regional communities. The program's undergraduate courses, offered within the program and cross-listed with departments in various colleges, meet distribution requirements and count toward a concentration in Asian American Studies. The program does not offer a graduate course of study, but students can undertake graduate work in Asian American Studies within selected disciplines of the university.

Undergraduate Concentration

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Asians in America. The course of study stresses developments within the United States, but also underscores the transnational and comparative contexts of Asian America and the field's connections with African American, American Indian, Latino, and Women's Studies. Students must work with a faculty adviser from among the program's affiliated faculty and must complete at least fifteen (15) units of credits as follows: (a) AAS 110 and two (2) additional courses in Asian American Studies; (b) one (1) course in Africana, American Indian, Latino Studies, or Women's Studies*; and (c) one (1) course in East Asian, South Asian, or Southeast Asian Studies.* (*These courses must be approved by the student's faculty adviser, and they should address issues of race, gender, or the histories and cultures of Asian peoples.) Students must file an application for the concentration with the Asian American Studies Program.

Resource Center

The program's Asian American Studies Resource Center provides meeting space for the more than thirty-five undergraduate student organizations of the Cornell Asian Pacific Student Union and the graduate student Asian Pacific American Graduate Association. It also holds a modest print collection of books, periodicals, and newspapers; a current news clip file; a comprehensive data base of publications on Asian Americans since 1977; and a sizable collection of videotapes on the Asian American experience.

Research

The program encourages faculty and student research on Asian Americans by sponsoring guest lectures, conferences, film festivals, readings, and exhibits. It also funds research projects and student travel to conferences and research sites. The Asian American Studies Workshop is the program's principal research initiative, engaging Cornell's faculty and students with invited faculty from other universities in a year-long intensive study of selected themes.

Affiliated Faculty

T. Chaloemtiarana (Southeast Asia Program), B. de Bary (Asian Studies), S. Han (Sociology), V. P. Kayastha (Kroch Library), J. V. Koschmann (History), L. C. Lee (Human Development), V. Munasinghe (Anthropology), V. Nee (Sociology), R. E. Ripple (Education), N. Sakai (Asian Studies), S. Samuels (English), A. M. Smith (Government), K. W. Taylor (Asian Studies), S. Tien (Gannett Health Center), S. Wong, director (English), D. Yeh (Vice President Student/Academic Services)

Courses

AAS 110 Introduction to Asian American Studies
Spring. 3 credits. This course can be used to satisfy either a social science or humanities distribution requirement.
Interdisciplinary, cross-cultural introduction to Asian American Studies focusing on contemporary issues. Major themes include: identity and stereotypes, gender, family, community, education, migration and labor, and anti-Asianism. Coverage will be given to both Hawaii and the U.S. mainland, and to Asian Indians, Chinese, Filipinos, Hawaiians, Japanese, Koreans, and Southeast Asians.

[AAS 213 Asian American History
Not offered fall 1999.
For description, see HIST 213.]

AAS 303 Asians in the Americas: A Comparative Perspective (also Anthropology 303)
Fall. 4 credits.
The common perception of ethnicity is that this is a "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians"? On what basis can we label Asians an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies will focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

AAS 262 Asian American Literature
For description, see ENGL 262.

AAS 412 Undergraduate Seminar in Asian American History (also History 412)
Spring. 4 credits.
For description, see HIST 412. A reading and research seminar that will cover various topics in Asian American history.

[AAS 435 Asian American Images in Film
3 credits. Prerequisite: AAS 110 or permission of instructor. Not offered 1999–2000.
Examination of images of Asians in American film and television productions within their historical and socio-cultural contexts. Use of film and media theory to assess the impact of those images on both Asian and non-Asian American viewers. Students will be challenged to create, in video or on paper, images that avoid stereotypes and depict more realistically the Asian American experience.]

[AAS 438 Immigration and Ethnic Identity
Spring. 4 credits. Not offered 1999–2000.
For description, see SOC 438.]

AAS 467 Psycho-Social Issues in Asian American Identity
Spring. 3 credits.
For description, see HD 467.

[AAS 478 Self and Nation in Asian-American Literature (also English 478)
Not offered 1999–2000.
A study of the ways in which Asian American writers have constructed discourses of self and nation. Topics will include nationalism, feminism, identity politics, and theories of minority discourse. In our reading of selected works of prose, poetry and drama by Chinese American, Filipino American, Japanese American and Korean American writers, we will be asking questions about the relation of these works to the moment of their production and reception, and the manner in which these textual representations engage with shifting cultural and political struggles. Writers under discussion may include: Carlos Bulosan, Theresa Hak Kyung Cha, Frank Chin, Jessica Hagedorn, David Henry Hwang, Maxine Hong Kingston, Joy Kogawa, David Mura.]

[AAS 492 Twentieth Century Women Writers of Color
Spring. 4 credits. Not offered 1999–2000.
This course will explore a range of writing—novels, stories, poems, essays—by American women writers of color in the twentieth century. We will look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region, and class. Readings may include works by Joy Harjo, Leslie Marmon Silko, Sandra Cisneros, Gloria Anzaldua, Theresa Hak Kyung Cha, Sigrid Nunez, Jamaica Kincaid, Maxine Hong Kingston, and Gwendolyn Brooks.]

AAS 495 Independent Study
Fall or spring. 1–4 credits.
Topic and credit hours to be mutually arranged between faculty and student. Independent Study Forms must be approved by Asian American Studies Program Office.

Biology and Society Major

J. V. Reppy, director of undergraduate studies, colleges of Arts and Sciences and Agriculture and Life Sciences; S. K. Obendorf, advising coordinator, College of Human Ecology; D. Bates, B. Bedford, C. Bisogni, R. Boyd, T. Brenna, U. Bronfenbrenner, emeritus, R. Canfield, S. Ceci, B. Chabot, C. C. Chu, T. Dawson, P. Dear, C. Eberhard, G. W. Evans, G. W. Feigenson, J. Ford, J. Fortune, C. Geisler, K. Grazier, C. Greene, D. Gurak, J. Haas, A. Hedge, S. Hilgartner, R. Howarth, H. C. Howland, K. A. R. Kennedy, B. Knuth, A. Lemley, D. Levitsky, B. Lewenstein, B. A. Lewis, J. Fessenden MacDonald, J. Mueller, A. Netravali, N. Noy, L. Palmer, A. Parrot, D. Pimentel, T. Pinch, A. G. Power, W. Provine, S. Robertson, E. Rodriquez, M. Rossiter, P. Schwartz, J. Shanahan, M. Small, N. Sturgeon, J. M. Stycos, V. Utermohlen, E. Wethington

The Biology and Society major is ideally suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing foundational training in basic biology, Biology and Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology and Society major, which involves faculty from throughout the university, is offered by the Department of Science & Technology Studies. Students in the College of Arts and Sciences and the College of Human Ecology are eligible for the major. In addition, undergraduates in the College of Agriculture and Life Sciences can develop an approved sequence of courses from the Biology and Society curriculum under general studies. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the undergraduate records office in 275 Clark Hall, 255–6047.

Because the major is multidisciplinary, students must attain a basic understanding of the several disciplines it comprises. The curriculum includes courses in ethics; mathematics; statistics; history, philosophy, and social studies of science and biology; and basic biology (e.g., genetics and development; biochemistry and molecular-cell biology; ecology; evolutionary biology) as well as integrative courses offered through Biology and Society. In addition, majors are required to take a core course and must develop a theme: an intellectually coherent grouping of courses representative of their special interest in Biology and Society. Recommended themes in the Biology and Society major include biology, behavior, and society; biology and human population; biology and public policy; environment and society; food agriculture, and society; and health and society. Students may also develop their own individually tailored themes (which in recent years have included topics such as biotechnology and society, and agriculture, environment, and society). In consultation with their faculty adviser, students select courses that meet the foundation and core course requirements so as to build a coherent theme. Sample curricula for the recommended themes and for several student developed themes are available in the Biology and Society office.

There are student advisers and faculty available (according to posted office hours or by appointment) in the Biology and Society offices, 275 Clark Hall or 278 Clark Hall, to answer questions and to provide assistance.

Admission to the Major

All students should have completed a year of college-level biology before submitting an application during their sophomore year. Juniors are considered on a case-by-case basis. Upper-division applicants should realize the difficulties of completing the major requirements in fewer than two years. The application includes (1) a one-page statement explaining the student's intellectual interests in

the Biology and Society major and why the major is consistent with the student's academic goals and interests; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling Biology and Society requirements, including courses taken and those the student plans to take; and (4) a transcript of work completed at Cornell University and elsewhere, if applicable, current as of the date of application.

Acceptance into the major requires completion of the course sequence in introductory biology. Sophomores in the process of completing this prerequisite may be admitted to the major on a *provisional* basis. It is the student's responsibility to assure that final acceptance is granted upon satisfactory completion of the introductory biology sequence. Although only introductory biological science is a prerequisite for acceptance, students will find it useful to have completed some of the other requirements (listed below) by the end of their sophomore year, preferably in the first semester. Students who are considering the major may also find it beneficial to take "S&TS 201 What is Science?" in their freshman or sophomore year. Human Ecology students should also consult the current Human Ecology Guide and meet with the college advising coordinator, Kay Obendorf, 202 Martha Van Rensselaer Hall, 255–3151.

Major Requirements

No single course may satisfy more than one major requirement.

1) **Basic courses**

   A. Biological sciences 101–104 or 105–106 or 107–108 (prerequisite for admission to Biology and Society).

   B. College calculus (one course):* Math 106, 111, 112 or any higher level calculus.

   Recommended but not required: General chemistry (one year sequence) (prerequisite to biochemistry and other chemistry courses): Chemistry 103–104, 207–208, or 215–216.

2) **Foundation Courses** (should be completed by end of junior year).

   These courses must be above the 100-level, at least 3 credit hours and taken for a letter grade.

   A. Ethics: one course; B&SOC 205 (also S&TS 205) or B&SOC 206 (also S&TS 206).**

   B. Social sciences/humanities foundation: two courses; one from any two of the following subject areas: History of Science; Philosophy of Science; Sociology of Science; Politics of Science; and Science Communication.**

   C. Biology foundation (breadth requirement): three courses; one each from three of the following subject areas: Ecology (BIO ES 261); Evolutionary Biology (BIO ES 278); Biochemistry, Molecular and Cell Biology (BIO BM 231 or 330 or 331 or 333); Microbiology (BIO MI 290); Genetics and Development (BIO GD 281 or 282 or Plant Breeding 225); Neurobiology and Behavior (BIO NB 221 or 222); Botany (BIO PL 241); and Anatomy and Physiology (BIO AP 311 or NS 341 but **NOT** BIO AP 212).

   D. Biology foundation (Depth requirement): one biology course for which one of the above (2.C.) is a prerequisite.

   E. Statistics: one course selected from MATH 171, ILR 210, BTRY 215, AG EC 310, EDUC 353,Soc 301, Psych 350, Econ 319, OR&IE 370, BTRY 601, CRP 320.

3) **Core Course: (one course).** Should be completed by end of junior year.

   B&Soc 301 Biology and Society: The Social Construction of Life (also S&TS 401); or Phil 286: Science and Human Nature (also S&TS 286).

4) **Theme** (five courses that correspond to the theme selected by the student). These courses must be above the 100-level, at least 3 credit hours and taken for a letter grade. Choose these courses as follows:

   A. Natural Science Issues/Biology Elective (two courses). Select from the list of B&SOC approved Natural Science Issues courses or choose course(s) with introductory biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VTMED).

   B. Humanities/social sciences electives** (Two courses. Courses from the list of Senior Seminars may be used as theme electives if not used to meet another requirement).

   C. **Senior Seminar** (One course taken senior year). Courses change yearly.

* Students may petition to take a second statistics course (an advanced course, in sequence with the statistics course taken in the foundation) in place of the calculus requirement.

** Among the courses taken to meet the social sciences and humanities requirements (2.A, 2.B, 3, and 4.C), a minimum of two social science courses and two humanities courses must be chosen. History of science and philosophy of science courses may be counted toward the humanities requirement for the major.

Independent Study

Projects under the direction of a biology and society faculty member are encouraged as part of the program of study in the student's theme area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1–4 credits in Biology and Society 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology and Society office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented undergraduate students whose major is Biology and Society (B&SOC). Students who enroll in the honors program are expected, with faculty guidance, to do independent study and research dealing with issues in biology and society. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career.

Biology and Society majors are considered for entry into the honors program at the end of the spring semester before their senior year. Application forms for the honors program are available in the Biology and Society office, 275 Clark Hall. The honors program is available to Biology and Society majors from the College of Arts and Sciences. Biology and Society majors in the Colleges of Human Ecology and Agriculture and Life Sciences must be selected by an honors committee within their college. To qualify for the Biology and Society honors project, students must have an overall Cornell cumulative grade-point average not lower than 3.30, have formulated a research topic, and have found a project supervisor (with a Cornell appointment) and a Biology and Society faculty member willing to serve as their advisers. Applications will be reviewed by a committee headed by the director of undergraduate studies, who will notify students directly of the outcome. Students will be permitted to register for the honors program only by permission of the department. More information on the honors program is available in the Biology & Society office, 275 Clark Hall (255–6047).

I. First-Year Writing Seminars

B&SOC 103 In the Company of Animals
Spring. 3 credits.

B&SOC 104 Ecosystems and Ego Systems
Spring. 3 credits.

II. Foundation Courses

*A. **Ethics*** (select one)

B&SOC 205 Ethical Issues in Health and Medicine (also Science and Technology Studies 205)
Fall. 4 credits. Limited to 150 students. Open to sophomores, juniors, and seniors. Prerequisites: none. S. Hilgartner.
In today's rapidly changing world of health and medicine, complex ethical issues arise in many contexts—from the private, interpersonal interactions between doctor and patient to the broad, mass-mediated controversies that make medicine into headline news. This course examines ethical problems and policy issues that arise in contemporary medicine, health care, and biomedical research. Tools for ethical analysis are applied to a variety of cases and fundamental questions in bioethics. Perspectives from social science, history, and law also inform the course. We will explore ethical questions that arise in a number of substantive contexts, including the doctor-patient relationship, medical decision making near the end of life, human experimentation, genetics and reproductive technology, public health, and the allocation of scarce resources.

B&SOC 206 Ethics and the Environment (also Science and Technology Studies 206)
Spring. 4 credits. Limited to 60 students. Open to all undergraduates; permission of instructor required for freshmen. Staff.
We address how ethical analysis helps shape our responses to environmental problems. Case studies will help guide our assessments. You will be challenged to develop ethical solutions or approaches on your own and in groups. Major aims include: articulating the relationships between knowledge and values; exploring the ethical implications of different conceptions of "nature"; and distinguishing between ethics and economics, ecology, ideology, politics, and prudence or wisdom. A background in basic ecology OR environmental issues OR ethics is helpful.

B. Social Sciences/Humanities Foundation (2 courses, 1 from any 2 areas)

1. History of Science

BIOG 207 Evolution (also Science and Technology Studies 287 and History 287)
Fall or summer. 3 credits. (Intended for students with no background in college biology. May not be taken for credit after BIOES 278.) W. B. Provine.
For description, see BIOG 207.

[HIST 282 Science in Western Civilization (also Science and Technology Studies 282) #
Spring. 4 credits. Not offered 1999–2000. P. Dear.
For description, see HIST 282.]

S&TS 233 Agriculture, History, and Society: From Squanto to Biotechnology
Fall. 3 credits. M. Rossiter.

S&TS 283 The Sciences in the Twentieth Century
Spring. 4 credits. Pending EPC approval. M. Dennis.

S&TS 355 Computers: From Babbage to Gates
Fall. 4 credits. M. Dennis.

S&TS 390 Science in the American Polity: 1800–1960 (also GOVT 308, AMST 388)
Fall. 4 credits. M. Dennis.
For description, see S&TS 390.

[S&TS 433 Comparative History of Science
Spring. 4 credits. Not offered 1999–2000. M. Rossiter.]

S&TS 444 Historical Issues of Gender and Science (also Women's Studies 444)
Fall. 4 credits. M. Rossiter.
For description, see S&TS 444.

2. Philosophy of Science

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology
Spring. 3 credits. T. Pinch.

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits. May be used to meet the philosophy of science requirement *if not* used to meet the core course requirement.
For description, see PHIL 286.

PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)
Fall. 4 credits. Limited to 30 students. R. Boyd.
For description, see PHIL 381.

3. Sociology of Science

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)
Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology. Limited to 75 students. May be used to meet the sociology of science requirement if not used to meet the core course requirement. Staff.
See Core Courses for description.

B&SOC 342 Sociology of Science (also Science and Technology Studies 442 and City and Regional Planning 442)
Fall.
For description, see S&TS 442.

HSS 246 Determinants of Behavior (also PAM 201)
Fall. 3 credits.

R SOC 208 Technology and Society
Fall. 3 credits.

S&TS 201 What Is Science? An Introduction to the Social Studies of Science and Technology
Spring. 3 credits. T. Pinch.

S&TS 311 The Sociology of Medicine
Spring. 4 credits. S. Hilgartner.

4. Politics of Science

[B&SOC 406 Biotechnology and Law (also Science and Technology Studies 406)
Fall. 4 credits. Not offered 1999–2000. Staff.]

[B&SOC 407 Law, Science, and Public Values (also Government 407 and Science and Technology Studies 407)
Fall. 4 credits. Not offered 1999–2000. Staff.]

S&TS 391 Science in the American Polity: 1960-Now (also Government 309, AMST 389)
Spring. 4 credits. M. Dennis
For description, see S&TS 391.

[S&TS 427 Politics of Environmental Protection in America (also Government 427)
Fall. 4 credits.
For description, see S&TS 427. Not offered 1999–2000.]

5. Science Communication

COMM 260 Scientific Writing for Public Information
Fall or spring. 3 credits. Limited to 25 nonfreshman or graduate students per section. Prerequisite: any college-level writing course.

COMM 285 Communication in the Life Sciences (also S&TS 285)
Spring. 3 credits. B. Lewenstein.

[COMM 315 Introduction to Health Communication
Fall. 3 credits. Not offered 1999–2000. C. Trumbo.]

COMM 352 Science Writing for the Mass Media (also Science and Technology Studies 352)
Fall. 3 credits. Not open to freshmen. Limited to 25 students. Prerequisite: one college writing course. B. Lewenstein.
For description, see COMM 352.

COMM 421 Communication and the Environment
Spring. 3 credits. J. Shanahan.

[COMM 466 Communication of Science and Technology
Fall. 3 credits. Not offered 1999–2000. B. Lewenstein.]

C. Biology foundation (breadth requirement): Three courses: one from three of the following subject areas:

1. Biochemistry, Molecular and Cell Biology

BIOBM 330 Principles of Biochemistry, Individual Instruction
Fall or spring. 4 credits.
For description, see BIOBM 330.

BIOBM 331 Principles of Biochemistry: Proteins and Metabolism
Fall. 3 credits. May not be taken for credit after BIOBM 330 or 333.
For description, see BIOBM 331.

NS 262 The Cell and the External World
Spring. 3 credits.

2. Ecology

BIOES 261 Ecology and the Environment
Fall or summer. 4 credits. Prerequisite: one year of introductory biology.

3. Genetics and Development

BIOGD 281 Genetics
Fall, spring, or summer. 5 credits. Not open to freshman fall semester. Limited to 200 students.

BIOGD 282 Human Genetics
Spring. 2 or 3 credits. (2 credits if taken after Biological Sciences 281.)

4. Evolutionary Biology

BIOES 278 Evolutionary Biology
Fall or spring. 3 or 4 credits. Limited to 300 students.

5. Microbiology

BIOMI 290 General Microbiology Lectures
Fall, spring, or summer. 2 or 3 credits (2 credits if taken after BIOMI 192). Recommended: concurrent registration in BIOMI 291.

6. Neurobiology and Behavior

BIONB 221 Neurobiology and Behavior I: Introduction to Behavior
Fall. 3, 4 or 5 credits (4 credits with discussion and written projects; 5 credits with 2 discussions per week). Not open to freshmen.
For description, see BIONB 221.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits. (4 credits with discussion and written projects). Not open to freshmen. Each discussion limited to 20 students.
For description, see BIONB 222.

7. Botany

BIOPL 241 Introductory Botany
Fall. 3 credits.
For description, see BIOPL 241.

8. Physiology and Anatomy

BIOAP 311 Introductory Animal Physiology, Lectures (also Veterinary Medicine 346)
Fall. 3 credits. Prerequisite: one year of college biology, chemistry, and mathematics. Recommended: previous or concurrent course in physics.

NS 341 Human Anatomy and Physiology
Spring. 4 credits. Prerequisite: college biology (NS 115 recommended). Permission only.

*D. **Biology foundation*** (depth requirement): one course for which one of the above breadth requirement courses (2C) is a prerequisite.

*E. **Statistics** (select one)*

ARME 210 Introductory Statistics
Fall. 4 credits.

BTRY 215 Introduction to Statistical Methods
Fall. 3 credits.

BTRY 601 Statistical Methods I
Fall. 4 credits.

CRP 223 Introduction to Statistical Reasoning for Urban and Regional Analysis
Fall. 3 credits.

ECON 319 Introduction to Statistics and Probability
Fall or summer. 4 credits. Prerequisites: Economics 101–102 and Mathematics 111–112.

ILRST 210 Statistics: Statistical Reasoning
Fall and spring. 3 credits.

PSYCH 350 Statistics and Research Design
Fall. 4 credits.

SOC 301 Evaluating Statistical Evidence
Fall. 4 credits.

III. Core Courses

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)
Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology or permission of instructor. Limited to 75 students. Staff.
Critical thinking about the diverse influences shaping the life sciences. Topics include evolution and natural selection, heredity and genetic determinism, biotechnology and reproductive interventions. We interpret episodes, past and present, in biology in light of scientists' historical location, economic and political interests, use of language, and ideas about causality and responsibility. Readings, class activities, and written assignments are designed so that students develop interpretive skills and explore their own intellectual and practical responses to controversies in biology and society.

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits.
For description, see PHIL 286.

IV. Themes

*A. **Natural Science Issues/Biology Elective*** (two courses). Select from the list of B&SOC approved Natural Science Issues courses or choose course(s) with intro biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VTMED.

[BIOAP 214 Biological Basis of Sex Differences (also Biology and Society 214 and Women's Studies 214)
Fall. 3 credits. Not offered 1999–2000.
For description, see BIOAP 214.]

[BIOES 275 Human Biology and Evolution (also Anthropology 275 and Nutritional Sciences 275)
Fall. 3 credits. Offered alternate years. Not offered 1999–2000.]

BIOPL 247 Ethnobiology
Fall. 3 credits.

HD 266 Emotional Functions of the Brain
Fall. 3 credits.

[HD 347 Human Growth and Development: Biological and Behavioral Interactions (also Biology and Society 347 and Nutritional Sciences 347)
Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent, and Human Development 115 or Psychology 101. Offered alternate years. Not offered 1999–2000.]

HD 370 Experimental Psychopathology
Spring. 3 credits.

NS 222 Maternal and Child Nutrition
Spring. 3 credits.

NS 361 Biology of Normal and Abnormal Behavior (also Psychology 361)
Fall. 3 credits.
For description, see NS 361.

NTRES 201 Environmental Conservation
Spring. 3 credits.

Examples of biology electives

AN SCI 300 Animal Reproduction and Development
Spring. 3 credits.

HD 366 Psychobiology of Temperament and Personality
Spring. 3 credits.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits.

*B. **Humanities/Social Science elective*** (two courses)

Courses listed earlier as social science/humanities foundation courses (2.B.) are particularly appropriate as social science/humanities electives. However, a single course cannot be used to meet both requirements. Additional courses that are recommended as social science or humanities electives are:

Examples of social science electives

ARME 464 Economics of Agricultural Development
Spring. 3 credits.

ANTHRO 211 Nature and Culture @
Spring. 3 credits.

[BIOES 673 Human Evolution: Concepts, History, and Theory (also Anthropology 673)
Fall. 3 credits. Offered alternate years. Not offered 1999–2000.
For description, see BIOES 673.]

CRP 380 Environmental Politics
Spring. 4 credits.

[CRP 451/551 Environmental Law
Fall. 4 credits. Not offered 1999–2000.]

HD 241 History of Childhood in the United States
Fall. 3 credits.

[HD 258 The Historical Development of Women as Professionals, 1800 to the Present (also Women's Studies 238 and History 238)
Fall. 3 credits. Not offered 1999–2000.]

HSS 315 Human Sexuality (also PAM 380)
Spring. 3 credits.

[HSS 325 Health Care Services and the Consumer (also PAM 381)
Fall. 3 credits. Offered alternate years. Not offered 1999–2000.]

HSS 330 Ecology and Epidemiology of Health (also PAM 303)
Fall. 3 credits.

[HSS 335 Contemporary Issues in Women's Health (also PAM 350)
Fall. 3 credits. Not offered 1999–2000.]

HSS 634 Health Care Organization (also PAM 657)
Fall. 3 credits.

HSS 688 Long-Term Care and the Aged: Alternative Health and Social Service Delivery Systems (also PAM 668)
Fall. 3 credits.

NS 450 Public Health Nutrition
Spring. 3 credits.

NS 457 National and International Food Economics (also Economics 374)
Spring. 3 credits.

NTRES 400 International Environmental Issues
Fall. 4 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

R SOC 201 Population Dynamics (also Sociology 202)
Spring. 3 credits.

R SOC 205 Rural Sociology and International Development (also SOC 206)
Spring. 3 credits.

R SOC 324 Environment and Society (also Science & Technology Studies 324 and Sociology 324)
Fall and summer. 3 credits.
For description, see R SOC 324.

[R SOC 490 Society and Survival
Fall. 3 credits. Not offered 1999–2000.]

Examples of humanities electives

NTRES 407 Religion, Ethics, and the Environment
Spring. 4 credits.

PHIL 241 Ethics (by petition for breadth requirement)
Spring. 4 credits.

[PHIL 368 Global Climate and Global Justice (also Government 468)
Fall. 4 credits. Not offered 1999–2000.]

PHIL 681 Philosophy of Science (also Science & Technology Studies 681)
Spring. 4 credits.
For description, see PHIL 681.

C. Senior Seminars

BIO G 467 Seminar in the History of Biology (also Biology & Society 447, History 415, and Science & Technology Studies 447)
Summer (6-week session). 4 credits. Limited to 18 students.
For description, see BIO G 467.

[BIO G 469 Food, Agriculture, and Society (also Biology & Society 469 and Science & Technology Studies 469)
Spring. 3 credits. Limited to 20 students. Not offered 1999–2000.
For description, see BioG 469.]

BIOES 661 Environmental Policy (also Biology & Society 461 and Agriculture and Life Sciences 661)
Fall or spring. 3 credits each term. Limited to 12 students. (Students must register for 6 credits each term since an "R" grade is given at the end of the fall term).
For description, see BIOES 661.

CEH 444 Housing for the Elderly (also PAM 375)
Spring. 3 credits.

HD 366 Psychobiology of Temperament and Personality
Fall. 3 credits.

HD 610 Processes in Human Development
Fall. 3 credits.

HD 660 Social Development
Spring. 3 credits. Permission of instructor required for undergraduates.

[HSS 335 Contemporary Issues in Women's Health (also PAM 350)
Fall. 3 credits. Not offered 1999–2000.]

HSS 625 Health Care Services: Consumer and Ethical Perspectives (also PAM 652)
Fall. 3–4 credits.
Permission of instructor required. If using this course as a senior seminar, B&SOC majors must take it for 4 credits by writing a major paper. Enrollment limited—preference given to HSS students.

HSS 631 Managed Health Delivery Systems: Primary-Ambulatory Care (also PAM 656)
Spring. 3 credits.

HSS 655 Leadership in Human Service Organizations (also PAM 680)
Fall. 3 credits.

[R SOC 408 Human Fertility in Developing Nations (also Biology & Society 404)
Spring. 3 credits. Not offered 1999–2000.
For description, see R SOC 408.]

R SOC 410 Population and Environment
Spring. 3 credits.

[R SOC 418 Population Policy (also Biology & Society 414)
Spring. 3 credits. Not offered 1999–2000.
For description, see R SOC 418.]

[S&TS 406 Biotechnology and the Law (also Biology & Society 406)
Fall. 4 credits. Not offered 1999–2000. Staff.
For description, see S&TS 406.]

[S&TS 427 Politics of Environmental Protection in America (also Biology & Society 427 and Government 427)
Fall. 4 credits. Not offered 1999–2000. Staff.
For description, see S&TS 427.]

S&TS 490 Integrity of Scientific Practice
Fall. 4 credits. S. Hilgartner.

[S&TS 645 Genetic Engineering: Politics and Society in Comparative Perspective (also Government 634)
Spring. 4 credits. S. Hilgartner. Not offered 1999–2000.
For description, see S&TS 645.]

V. Other Courses

B&SOC 375 Independent Study
Fall or spring. 1–4 credits. Prerequisite: must have written permission of faculty supervisor and Biology and Society major.
Projects under the direction of a Biology and Society faculty member are encouraged as part of the program of study within the student's concentration area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1–4 credits in Biology and Society 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Students may elect to do an independent study project as an alternative to, or in advance of, an honors project. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology and Society office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

B&SOC 400 Undergraduate Seminar
Fall or spring. Variable credit. May be repeated for credit.
From time to time different seminars on topics of interest to undergraduates are offered. Topics and instructors are listed in the biology and society supplement issued at the beginning of each semester.

B&SOC 499 Honors Project
Fall and spring. 3–5 credits each term. Open only to Biology and Society students in their senior year.
Students who are admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upper-level course.
Students may take 3–5 credits per semester up to a maximum of 8 credits in B&SOC 499, Honors Project. Students should note that B&SOC 499 is to be taken in addition to those courses that meet the regular major requirements. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of the first semester, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Students who do continue in the honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

Applications and information are available in the Biology and Society office, 275 Clark Hall.

Cognitive Studies Program

J. Halpern (computer science), R. Hoy (neurobiology and behavior), co-directors. C. Cardie, R. Constable, B. Donald, J. Halpern, D. Huttenlocher, L. Lee, R. Rubinfeld, B. Selman, R. Zabih (computer science); A. Hedge (design and environmental analysis); J. Dunn, R. Ripple, D. Schrader (education); R. Canfield, S. Ceci, B. Koslowski, B. Lust, S. Robertson, E. Wethington (human development); K. O'Connor, R. Peterson, J. Russo (Johnson Graduate School of Management); J. Bowers, A. Cohn, M. Diesing, J. Gair, W. Harbert, A. Jongman, S. McConnell-Ginet, C. Rosen, Y. Shirai, M. Suner, H. Tao, L. Waugh, J. Whitman, D. Zec, A. Zucchi (linguistics); A. Nerode, R. Shore (mathematics); D. Easley, L. Blume, K. Basu (economics); H. Howland (neurobiology and behavior); R. Boyd, C. Ginet, H. Hodes, S. Shoemaker, J. Stanley, Z. Szabó, (philosophy); J. Cutting, R. Darlington, T. DeVoogd, D. Dunning, D. Field, B. Finlay, T. Gilovich, B. Halpern, A. Isen, R. Johnson, C. Krumhansl, U. Neisser, M. Owren, J. Sereno, M. Spivey (psychology); M. Macy, V. Nee (sociology). G. Babbes, S. Hertz (associate members).

Cognitive studies is comprised of a number of disciplines that are linked by a major concern with fundamental capacities of the mind, such as perception, memory, reasoning, language, and the organization of motor action. In the College of Arts and Sciences these disciplines are represented in the departments of Computer Science, Linguistics, Mathematics, Modern Languages, Philosophy, Psychology, Economics and Sociology. Elsewhere in the university they are represented in the Department of Human Development and Design and Analysis (College of Human Ecology), the Section of Neurobiology and Behavior (Division of Biological Sciences), the Department of Education (College of Agriculture and Life Sciences), and the Johnson Graduate School of Management.

The issues addressed in cognitive studies arise at several levels. At the broadest level are problems of characterizing such basic notions as "mind," "knowledge," "information," and "meaning." At a more specific level are questions regarding the abstract operating principles of individual components of the

mind, such as those underlying visual perception, language ability, and understanding of concepts. These principles concern the organization and behavior of the components and how they are biologically represented in the brain. At the most specific level are questions about the properties of the elementary computational structures and processes that constitute these components.

Important insights into issues of these kinds have been achieved in recent years as a result of the various cognitive studies disciplines converging in their theoretical and methodological approaches. It is this convergence, in fact, that warrants grouping the disciplines together under the single term "cognitive studies." Even greater progress can be expected in the future as a consequence of increasing cooperation among the disciplines.

Undergraduate Concentration

An interdisciplinary undergraduate concentration in Cognitive Studies is available to Cornell University undergraduates in the College of Arts and Sciences. Students from other colleges who seek such a concentration should discuss such possibilities with the Cognitive Studies office, which will provide information and contacts concerning such concentrations.

The undergraduate concentration in Cognitive Studies is designed to enable students to engage in a structured program directly related to the scientific study of cognition and the mind. The concentration provides a framework for the design of structured, supervised programs of study in this growing interdisciplinary field. Such programs of study serve as complements to coursework in a single discipline as represented by an individual department. It is considered crucial that students gain a strong background in their major, independent of their work in the concentration. Independent majors and college scholars may also apply. Colleges vary in their procedures for formal recognition of this concentration (contact the Cognitive Studies office for details). The Cognitive Studies Program faculty have designed five structured "tracks" that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration advisor. The courses listed under each track are program suggestions. The student should consult with his/her Cognitive Studies adviser to develop a more customized curriculum. In some cases, students may want to combine or cross tracks.

In general, it is expected that students in the concentration will take COGST 101, a lab course such as COGST 201, and three courses at the 300 or 400 level in at least two departments. Even though only five courses are required to complete the concentration, we expect that students interested in cognitive studies will often end up taking more, and we encourage them to do an independent research project (COGST 470) and a research workshop such as COGST 471.

The five tracks are as follows. The first track involves a particular approach to the study of cognition. The other four tracks are structured around specific content domains and consist of sets of suggested course clusters. Please note that many of these courses have substantial prerequisites.

1. Cognitive Studies in Context: The Workplace, the Classroom, and Everyday Life

   Foundational issues in cognitive science are intimately relevant to real world settings. The Cognitive Studies in Context track offers students the opportunity to learn and independently explore how theory and research on the mind can help us better understand how we use information in much of our daily activities, whether it be the workplace, the classroom, or any other aspect of everyday life. Students will come to better understand the cognitive ergonomics of such diverse settings as an aircraft cockpit, a quality control station an assembly line, or an anesthesia station in a surgical suite. They will come to better understand the perceptual constraints that help tailor the nature of visual communication systems, or the linguistic constraints that help tailor text-based communication. They will come to see how the functional architecture of human memory guides the presentation and use of information in a wide array of settings. They will also learn how design constraints on computer hardware and software interact with human capacities and biases.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

   In addition, three more upper-level approved courses in Cognitive Studies areas will normally be expected.

2. Perception and Cognition

   This track focuses on psychological, computational, and neurobiological approaches to the interface between perception and cognition. Students will develop a grasp of the continuum between sensory impressions and complex thought.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
   COGST 450/LING 450/PSYCH 437, Lab Course: Language Development
   COM S 462, Robotics and Machine Vision
   BIONB 326, The Visual System
   PSYCH 305, Visual Perception
   PSYCH 309, Development of Perception and Representation
   PSYCH 316, Auditory Perception
   PSYCH 418, Psychology of Music
   PSYCH 342, Human Perception: Applications to Computer Graphics, Art and Visual Display
   PSYCH 412, Laboratory in Cognition and Perception
   PSYCH 416, Modeling Perception and Cognition
   PSYCH 419, Neural Networks Laboratory

3. Language and Cognition

   This track focuses on the representation, processing, and acquisition and learning of language, as well as its role in cognition and culture. Students will acquire skills and knowledge in formal and applied linguistic theory, psycholinguistic experimentation, and computational modeling techniques.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
   COGST 450/LING 450/PSYCH 437, Lab Course: Language Development
   COM S 411, Programming Languages and Logic
   LING 203, Introduction to Syntax and Semantics
   LING/PHIL/COGST 270, Truth and Interpretation
   LING 301–302, Phonology I & II
   LING 303–304, Syntax I & II
   LING 309–310, Morphology I & II
   LING 319–320, Phonetics I & II
   LING 325, Pragmatics
   LING 350/COG ST 350, Representing Language: Knowledge Taught and Untaught
   LING 403, Introduction to Applied Linguistics
   LING 409, Psycholinguistics of Second Language Reading
   LING 421–422, Semantics I & II
   PHIL 332, Philosophy of Language
   PSYCH 215/LING 215, Psychology of Language
   PSYCH 370/LING 370, Language and Cognition
   PSYCH 415, Concepts, Categories, and Word Meanings
   PSYCH 416, Modeling Perception and Cognition
   PSYCH 436/LING 436/HD 436/COGST 436, Language Development

4. Cognition and Information Processing

   This track focuses on how the mind (or a computer) can encode, represent, and store information. Students will develop an understanding of concepts, categories, memory, and the nature of information itself.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
   COGST 450/LING 450/PSYCH 437, Lab Course: Language Development
   COM S 211, Computers and Programming
   COM S 212, Structure and Interpretation of Computer Programs
   COM S 472, Foundations of Artificial Intelligence
   COM S 473, Practicum in Artificial Intelligence
   PHIL 262, Philosophy of Mind
   PHIL 362, Philosophy of Mind
   PSYCH 309, Development of Perception and Representation
   PSYCH 311, Introduction to Human Memory
   PSYCH 412, Laboratory in Cognition and Perception
   PSYCH 413, Information Processing: Conscious and Non-conscious
   PSYCH 414, Comparative Cognition
   PSYCH 415, Concepts, Categories, and Word Meanings
   PSYCH 416, Modeling Perception and Cognition
   PSYCH 417, The Origins of Thought and Knowledge

5. Cognitive Neuroscience

   This track focuses on neurobiological and computational approaches to understanding how perception and cognition emerge in the human brain. Students will acquire knowledge of what neural structures subserve what perceptual/cognitive processes, and how they interact.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
   COM S 410, Data Structures
   COM S 401, Programming Languages and Software Engineering
   PSYCH 328, Biopsychology of Learning and Memory
   PSYCH 396, Introduction to Sensory Systems
   PSYCH 416, Modeling Perception and Cognition
   PSYCH 419, Neural Networks Laboratory
   PSYCH 425, Cognitive Neuroscience
   PSYCH 440, The Brain and Sleep

A Cognitive Studies undergraduate laboratory and computer facility is available for all students in a Cognitive Studies concentration. This facility will help link resources from different laboratories across the Cornell campus as well as providing a central location for developing and conducting experimental research in cognitive studies.

Students who complete the concentration requirements will have their concentration in Cognitive Studies officially represented on their transcript. In addition, students who have made very substantial progress towards completing the requirements for the concentration will be eligible for enrollment in the Graduate Proseminar in Cognitive Studies during their senior year (COGST 773–774).

Concentration Application Procedures. Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Studies Program coordinator, Mary Wright, cogst@cornell.edu. 255–6431, who will provide application materials and set up a meeting with a relevant member of the Undergraduate Concentration Committee. This Committee will assist the student with selection of a concentration adviser with expertise in the student's main area of interest.

To formally initiate the concentration in Cognitive Studies, a student must gain approval for a selection of courses from a concentration adviser (one of the program faculty). The courses selected must form a coherent cluster that makes sense to both the adviser and the student. To be admitted to the concentration, the student must submit this plan of study to the Cognitive Studies undergraduate faculty committee for final approval.

In addition to assisting in and approving the student's selection of courses, the concentration adviser serves as a general source of information about the field of cognitive studies, relevant resources around the university, and job and graduate school opportunities. Often, the adviser can help the student develop independent research experience.

Independent Research. The concentration encourages each student to be involved in independent research that bears on research issues in cognitive studies, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.

The Committee for Undergraduate Concentration in Cognitive Studies consists of: Bart Selman, computer science, 5–5643, 4144 Upson Hall, selman@cs.cornell.edu; Draga Zec, linguistics, 5–0728, 217 Morrill Hall, DZ17@cornell.edu; Jason Stanley, philosophy, 5–6829, 216 Goldwin Smith, JCS27@cornell.edu; Michael Owren, psychology, 5–3835, 224 Uris Hall, MJO9@cornell.edu. The current Director of Undergraduate Studies is Draga Zec.

Graduate Minor

For information, consult the program office (235 Uris Hall, 255–6431, cogst@cornell.edu or the director of graduate studies, Carol Rosen 255–0722, cgr1@cornell.edu).

Courses

Cognitive Studies

COGST 101 Introduction to Cognitive Science (also COM S 101, LING 170, PHIL 191, PSYCH 102)

Fall. 3 credits. M. Spivey.

This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

COGST 201 Cognitive Science in Context Laboratory (also Cognitive Studies, Computer Science, Psychology)

Fall or spring. 4 credits. Prior completion of "Introduction to Cognitive Science" PSYCH 102/COGST 101/COM S 101/LING170/PHIL 191 or equivalent is recommended. Knowledge of programming languages is neither assumed nor required. Limited to 24 students. Disc and demos, M W 11:15–12:05; lab, M W 1:25–3:25, plus additional hours to be arranged. Fall, B. Halpern and staff. Spring, D. Field and staff.

A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated-future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and student-developed experiments. Use of digital computers as well as the Internet, electronic mail, and Web sites are integral components of the course.

State of the art computing, display (visual, auditory, and other perceptual/sensory systems), digital communication, and simulation approaches are used to apply cognitive science principles and concepts to the analysis, exploration, and direct testing of human-machine interfaces. The focus is on human-computer interactions that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings such as interactions with touch screen displays, effects of very brief sensory inputs on subsequent decisions, computer-based natural language recognition and processing, use of 'neural networks,' and personal and group transportation vehicles and systems. Students are expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities will be available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data will be facilitated.

COGST 450 Lab Course: Language Development (also LING 450 and PSYCH 437) (in conjunction with HD/PSYCH/LING 436, Language Development)

Spring. 2 credits. B. Lust.

This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies Research Labs. This course is partially funded by a new National Science Foundation grant to Cornell's Cognitive Studies program, "Interdisciplinary Approaches to the Scientific Study of Language Knowledge and Acquisition." This project is intended to involve undergraduates in active research and to coordinate related subfields of several disciplines in a unified, laboratory-supported curriculum.

The course will include several structured modules dealing with topics covered in the survey course, HD/LING/PSYCH 436, Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods to test hypotheses.

The lab course will meet once a week in group format. In addition, students will be given access to a research lab environment for independent work on assigned modules, and independent research, throughout the week, and throughout the term.

COGST 470 Undergraduate Research in Cognitive Studies

Fall or spring. 1–4 credits. S-U grades optional. Prerequisite: permission of major adviser; written permission of Cognitive Studies faculty member who will supervise the research and assign the grade. Hours to be arranged. Cognitive Studies faculty.

Experience in planning, conducting, and reporting independent laboratory, field, and/or library research in an interdisciplinary area relevant to cognitive studies.

COGST 471 Cognitive Studies Research Workshop
Fall or spring. Credits variable. Prerequisites: student must be enrolled in an independent research course (either in Cognitive Studies, e.g., COGST 470, or in a related department), or in honors thesis research in one of the departments relevant to Cognitive Studies. Staff. (Interdisciplinary faculty from Cognitive Studies Program).
This course will provide a research workshop in which undergraduate students who are engaged in research in a particular area relevant to cognitive science can meet across disciplines to learn and practice the essentials of research, using interdisciplinary approaches. In this workshop, students critique and discuss the existing literature in a field of inquiry, individual students present their research designs, methods and results from their independent research studies, debate the interpretation of their research results, and participate in the generation of new research hypotheses and designs, in a peer group of other undergraduate students involved in related research.

[LING 270 Truth and Interpretation (also COGST 270 and PHIL 270)
Spring. 4 credits. Not offered 1999–2000. J. Stanley and M. Diesing.
In this course, with the use of classic papers in the philosophy of language and linguistics, we will motivate and introduce the basic concepts behind the project of giving a rigorous theory of meaning for natural language. Our goal will be to understand how philosophers and linguists have used concepts such as reference and truth to explain linguistic content. We will also discuss how issues of learnability and language processing raise constraints for this project.]

LING 350 Representing Language: Knowledge Taught and Untaught (also COGST 350)
Fall. 4 credits. J. Gair.
This course will deal with some of the discoveries made in modern linguistics that reveal some fundamental properties of human language and the special human capacity for it, as well as some of the still unsettled questions about it. It will also trace some of the paradigm shifts that have occurred within linguistics and consider some of the ways in which language has been represented, both within the science of linguistics and outside of it, by contrasting what is known with what is popularly believed to be true. Projected topics will include: innateness vs. language as socio-cultural; language variability vs. universal grammar; language change and relatedness of languages; the question of correctness.

HD 436 Language Development (also COGST 436, LING 436 and PSYCH 436)
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633, LING 700, or PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. B. Lust.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 437).

Computer Science

COM S 211 Computers and Programming
Fall or spring. 3 credits.

COM S 212 Structure and Interpretation of Computer Programs
Fall or spring. 4 credits.

COM S 280 Discrete Structures
Fall or spring. 4 credits.

COM S 381 (or 481) Introduction to Theory of Computing
Fall. 3 or 4 credits.

COM S 410 Data Structures
Fall or spring. 4 credits.

COM S 411 Programming Languages and Logics
Fall. 4 credits. Not offered every year.

COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits.

COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits.

COM S 482 Introduction to Analysis of Algorithms
Spring. 4 credits.

COM S 486 Applied Logic (also MATH 486)
Fall or spring. 4 credits.

Education (College of Agriculture and Life Sciences)

EDUC 210 Psychology of Learning and Memory
Fall. 3 credits.

EDUC 212 Psychological Foundations of Education
Spring. 2–3 credits.

EDUC 311 Educational Psychology
Fall. 3 credits.

Human Development (College of Human Ecology)

HD 115 Human Development
Fall or summer. 3 credits.

HD 266 Emotional Functions of the Brain
Fall. 3 credits. R. A. Depue.

[HD 334 The Growth of the Mind
Spring. 4 credits. Not offered 1999–2000.]

HD 344 Infant Behavior and Development
Fall. 3 credits.

HD 347 Human Growth and Development: Biological and Behavioral Interactions
Spring. 3 credits.

HD 362 Human Bonding
Fall. 3 credits. C. Hazan.

HD 436 Language Development (also PSYCH 436, COGST 436 and LING 436)
Spring. 4 credits.

HD 438 Thinking and Reasoning
Fall. 3 credits.

HD 439 Cognitive Development: Infancy through Adolescence
Spring. 3 credits. B. Koslowski.

Linguistics

LING 101 Theory and Practice of Linguistics
Fall, spring or summer. 4 credits.

LING 170 Introduction to Cognitive Science (also COGST 101 and PSYCH 102)
Fall. 3 credits.

LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits.

LING 203 Introduction to Syntax and Semantics
Fall. 4 credits.

[LING 212 Language and Culture
Spring. 3 credits. Not offered 1999–2000.]

LING 264 Language, Mind, and Brain
Fall. 4 credits.

LING 270 Truth and Interpretation (also COGST 270 and PHIL 270)
Spring. 4 credits.

LING 301–302 Phonology I, II
Fall and spring. 4 credits each term.

LING 303–304 Syntax I, II
Fall and spring. 4 credits each term.

[LING 309 Morphology I
Spring. 4 credits. Not offered 1999–2000.]

[LING 310 Morphology II
Fall. 4 credits. Not offered 1999–2000.]

LING 319 Phonetics I
Fall. 4 credits

LING 320 Phonetics II
Spring. 4 credits.

LING 325 Pragmatics
Fall. 4 credits.

LING 350 Representing Language: Knowledge Taught and Untaught (also COGST 350)
Fall. 4 credits.

[LING 401 Approaches to Language Typology I
Fall. 4 credits. Not offered 1999–2000.]

LING 402 Approaches to Language Typology II
Spring. 4 credits.

LING 421 Semantics I
Spring. 4 credits.

LING 422 Semantics II
Fall. 4 credits.

LING 436 Language Development (also COGST 436, PSYCH 436 and HD 436)
Spring. 4 credits.

LING 450 Lab Course: Language Development (also COGST 450 and PSYCH 437)
Spring. 2 credits.

Mathematics

MATH 281 Deductive Logic (also PHIL 331)
Fall. 4 credits.

MATH 481 Mathematical Logic (also PHIL 431)
Spring. 4 credits.

MATH 482 Topics in Logic (also PHIL 432)
Spring. 4 credits.

[MATH 483 Intensional Logics and Alternatives to Classical Logics (also PHIL 436)
Fall. 4 credits. Not offered 1999–2000.]

MATH 486 Applied Logic (also COM S 486)
Spring. 4 credits.

Modern Languages

LANG 414 Second Language Acquisition I
Fall. 4 credits.

LANG 425 Corpora and Applied Linguistics
Fall. 4 credits.

Neurobiology and Behavior (Division of Biological Sciences)

BIONB 221 Neurobiology and Behavior I: Introduction to Behavior
Fall. 3, 4, or 5 credits.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits.

[BIONB 326 The Visual System
Spring. 4 credits. Not offered 1999–2000.]

BIONB 328 Biopsychology of Learning and Memory (also PSYCH 332)
Spring. 3 credits.

BIONB 396 Introduction to Sensory Systems (also PSYCH 396)
Spring. 3 or 4 credits.

BIONB 421 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and 631)
Fall. 3 or 4 credits.

[BIONB 424 Neuroethology (also PSYCH 424)
Spring. 3 credits. Not offered 1999–2000.]

BIONB 492 Sensory Function (also PSYCH 492)
Spring. 3 or 4 credits.

[BIONB 496 Bioacoustic Signals in Animals and Man
Spring. 3 credits. Not offered 1999–2000.]

Philosophy

PHIL 231 Introduction to Deductive Logic
Fall. 4 credits.

PHIL 261 Knowledge and Reality
Spring. 4 credits.

[PHIL 262 Philosophy of Mind
Fall. 4 credits. Not offered 1999–2000.]

[PHIL 270 Truth and Interpretation (also COGST 270 and LING 270)
Spring. 4 credits. Not offered 1999–2000.]

Fall. 4 credits.

[PHIL 382 Philosophy and Psychology
4 credits. Not offered 1999–2000.]

[PHIL 389 Philosophy of Science: Evidence and Explanation
4 credits. Not offered 1999–2000.]

[PHIL 431 Mathematical Logic (also MATH 481)
4 credits. Not offered 1999–2000.]

PHIL 432 Topics in Logic (also MATH 482)
Spring. 4 credits.

[PHIL 433 Philosophy of Logic
4 credits. Not offered 1999–2000.]

[PHIL 436 Intensional Logic (also MATH 483)
Fall. 4 credits. Not offered 1999–2000.]

[PHIL 437 Problems in the Philosophy of Language
Spring. 4 credits. Not offered 1999–2000.]

[PHIL 461 Metaphysics
Spring. 4 credits. Not offered 1999–2000.]

Psychology

PSYCH 205 Perception
Spring. 3 credits.

[PSYCH 209 Development
Spring. 4 credits. Not offered 1999–2000.]

PSYCH 214 Issues in Cognitive Psychology
Fall. 3 credits.

PSYCH 215 Psychology of Language
Spring. 3 or 4 credits.

PSYCH 305 Visual Perception
Fall. 4 credits.

[PSYCH 311 Introduction to Human Memory
Spring. 3 credits. Not offered 1999–2000.]

PSYCH 316 Auditory Perception
Fall. 3 or 4 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328)
Spring. 3 credits.

PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display
Fall. 3 credits.

PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also NS 361)
Fall. 3 credits.

[PSYCH 396 Introduction to Sensory Systems (also BIONB 396)
Spring. 3 or 4 credits. Not offered 1999–2000.]

[PSYCH 412 Laboratory in Cognition and Perception
Spring. 4 credits. Not offered 1999–2000.]

PSYCH 413 Information Processing: Conscious and Non-conscious
Spring. 4 credits.

PSYCH 414 Comparative Cognition
Spring. 3 credits.

[PSYCH 415 Concepts, Categories, and Word Meanings
Fall. 4 credits. Not offered 1999–2000.]

[PSYCH 416 Modeling Perception and Cognition
Spring. 3 credits. Not offered 1999–2000.]

[PSYCH 417 The Origins of Thought and Knowledge
Fall. 4 credits. Not offered 1999–2000.]

PSYCH 418 Psychology of Music
Spring. 3 or 4 credits.

[PSYCH 425 Cognitive Neuroscience
Fall. 4 credits. Not offered 1999–2000.]

PSYCH 436 Language Development (also COGST 436, HD 436 and LING 436)
Spring. 4 credits.

PSYCH 492 Sensory Function (also BIONB 492)
Spring. 4 credits.

Sociology

SOC 480 Simulating Social Dilemmas (also SOC 580)
Fall. 4 credits.

Graduate Courses and Seminars

The following courses and seminars are generally for graduate students only. However, some may be appropriate for advanced undergraduates. The director of the concentration must approve an undergraduate's use of any of these for satisfying the concentration requirements.

COGST 773–774 Proseminar in Cognitive Studies I and II (also Com S 773/774, Ling 773/774, Phil 773/774, Psych 773/774)
Fall: R grade; spring: S-U only. 4 credits. T 1:25–2:40. Staff.

The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar will provide a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that comprise the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty from the field will introduce theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they will introduce various labs in which active research is being conducted in their field at Cornell, and current issues of interdisciplinary interest.

The proseminar will include suggestions from faculty in each field for further advanced

interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It will conclude (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade will be assigned in the fall semester, and an S-U grade will only be assigned in the spring semester.

COM S 674 Natural Language Processing
Spring. 4 credits. Prerequisite: COM S 472 recommended.

COM S 676 Reasoning About Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year. J. Y. Halpern.

COM S 677 Reasoning About Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year; next offered fall 1999. J. Y. Halpern.

COM S 775 Seminar in Natural Language Understanding
Fall and spring. 2 credits.

EDUC 611 Educational Psychology
Fall. 3 credits. Undergraduates admitted with permission from instructor. R. Ripple.

EDUC 614 Epistemological Development and Reflective Thought
Fall. 3 credits.

EDUC 714 Moral Development and Education
Spring. 3 credits.

HD 600/700 Graduate Seminars

LING 700 Graduate Seminars

MATH 581 Logic

MATH 655 Mathematical Foundations of Computer Modeling and Simulation

MATH 684 Recursion Theory

MATH 688 Automated Theorem Proving

LANG 700 Seminar (Grammaticization and Second Language Acquisition)
Spring. 4 credits.

PHIL 700 Graduate Seminars

PSYCH 601 Computational Models of Language
Spring. 4 credits. Prerequisite: consent of instructor. M. Spivey.

PSYCH 676 Topics in Emotion
Spring. 4 credits. M. Owren and C. Krumhansl.

College Scholar Program

L. Abel, director, 172 Goldwin Smith Hall, 255–3386.

The College Scholar Program is described in the introductory section of Arts and Sciences.

COLLS 397 Independent Study
Fall or spring. 1–4 credits. Prerequisite: permission of program office.

COLLS 499 Honors Research
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

East Asia Program

140 Uris Hall

V. B. Shue, director; J. Whitman, associate director, T. Bestor, D. Boucher, K. W. Brazell, M. Brinton, R. Bullock, P. Button, P. Chi, J. Choi, S. G. Cochran, B. de Bary, C. d'Orban, G. Fields, E. M. Gunn, P. J. Katzenstein, J. V. Koschmann, F. Kotas, J. M. Law, L. C. Lee, T. P. Lyons, T. L. Mei, V. Nee, A. Pan, Y. Park, C. A. Peterson, J. R. Piggott, N. Sakai, P. S. Sangren, Y. Shirai, R. J. Sukle, H. Tao, K. W. Taylor, S. Tian, H. Wan, S. Wen. Emeritus; K. Biggerstaff, E. H. Jorden, J. McCoy, R. J. Smith, M. W. Young

East Asian studies at Cornell is led by thirty-four faculty members from five colleges, who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through various departments in most of the humanities and social science disciplines, as well as in the fields of business, city and regional planning, international and comparative labor relations and rural sociology. Language courses in Mandarin, Cantonese, Korean, and Japanese are offered, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin. Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may work toward an M.A. in East Asian studies, a dual M.B.A./M.A. degree, or an M.A./Ph.D. degree in a discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology. A variety of fellowships, travel grants, awards, and assistantships are available for graduate students concentrating on East Asia.

The formal program of study is enriched by a variety of extracurricular activities, including a Japanese and Chinese language house, film series, workshops, art exhibits, and numerous lectures, symposia and performances related to East Asia. The Wason Collection in Olin Library is a comprehensive collection of books on East Asia in Western languages, Japanese, Chinese, and Korean. The Mary Rockwell Galleries of the Herbert F. Johnson Museum of Art have an excellent collection of East Asian art.

First-Year Writing Seminars

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, see the John S. Knight Writing Program section, and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in late October for the spring term.

Human Biology Program

J. Haas (nutritional sciences), director, 127 Savage Hall, 255-8001; B. Finlay (psychology), J. Fortune (physiology/women's studies), E. Frongillo (nutritional sciences), R. Johnston (psychology), K.A.R. Kennedy (ecology and systematics/anthropology), D. Levitsky (nutritional sciences), P. W. Nathanielsz (physiology), D. L. Pelletier (nutritional sciences), W. Provine (ecology and systematics/history), R. Robertshaw (physiology), S. Robertson (human development), R. Savin-Williams (human development), M. Small (anthropology)

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology, into a comprehensive study of biological diversity in *Homo sapiens*. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The program of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology and systematics, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students with a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity. Human biology is not a major but a curriculum of study that provides majors in various departments with a program for selecting elective courses that deal with the biology of the human species. Students in their junior year may develop a program of study in human biology while majoring in a number of different departmental fields.

Basic Requirements

The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and physical diversity of the human species. Adjustments may be made in these requirements, depending upon the student's academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (Biological Sciences 101–103 plus 102–104 or 105–106 or Biological Sciences 107–108 offered during the eight-week Cornell Summer Session); one year of general chemistry (Chemistry 207–208 or 215–216); one year of college mathematics (Mathematics 111–112 or 105–106 or 111–105); one course in genetics (Biological Sciences 281 or 282); one course in biochemistry (Biological Sciences 330, 331, 332, or 333 or Nutritional Sciences 320). It is recommended that students planning graduate study in

biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty adviser in human biology for help in selecting appropriate courses.

Elective courses should be taken that will enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major. Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty adviser representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisers in his or her department who is listed as faculty in human biology to be their principal adviser, or he or she may have an adviser in the department of the major and seek the advice of a human biology faculty adviser in matters pertaining to satisfaction of the requirements. In certain cases a faculty adviser may represent both the major and the curriculum of study in human biology.

Courses

Human Anatomy and Physiology

BIO AP 214 Biological Basis of Sex Differences (also Biology and Society 214 and Women's Studies 214)
Fall. 3 credits.

BIO ES 274 The Vertebrates: Structure, Function, and Evolution
Spring. 4 credits.

BIO AP 311 Introductory Animal Physiology, Lectures (also Veterinary Physiology 346)
Fall. 4 credits.

BIO AP 319 Animal Physiology Experimentation
Fall. 4 credits.

BIO AP 458 Mammalian Physiology
Spring. 3 credits.

BIO ES 474 Laboratory and Field Methods in Human Biology (also Anthropology 474)
Spring. 5 credits.

NS 115 Nutrition and Health: Concepts and Controversies
Fall. 3 credits.

NS 222 Maternal and Child Nutrition
Spring. 3 credits.

NS 315 Obesity and the Regulation of Body Weight
Fall. 3 credits.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits.

NS 341 Human Anatomy and Physiology Lab
Spring. 4 credits.

NS 361 Biology of Normal and Abnormal Behavior (also Psychology 361)
Fall. 3 credits.

NS 441 Nutrition and Disease
Fall. 4 credits.

PSYCH 322 Hormones and Behavior (also Biological Sciences 322)
Spring. 3 or 4 credits.

PSYCH 425 Cognitive Neuroscience
Fall. 3 or 4 credits.

VET MI 431 Medical Parasitology
Fall. 2 credits.

Human Behavior

ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits.

ANTHR 490 Primates and Evolution
Spring. 4 credits.

B&SOC 301 Biology and Society I: The Social Construction of Life (also Science and Technology Studies 401)
Fall. 4 credits.

BIO NB 421 Effects of Aging on Sensory and Perceptual Systems (also Psychology 431 and 631)
Fall. 3 or 4 credits.

BIO NB 427 Animal Social Behavior
Fall. 4 credits.

HD 344 Infant Behavior and Development
Fall. 3 credits.

PAM 380 Human Sexuality
Spring. 3 credits.

NS 245 Social Science Perspectives of Food and Nutrition
Fall. 3 credits.

NS 347 Human Growth and Development: Biological and Behavioral Interactions (also Human Development 347 and Biology and Society 347)
Spring. 3 credits.

NS 361 Biology of Normal and Abnormal Behavior
Fall. 3 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

PSYCH 425 Cognitive Neuroscience
Fall. 3 or 4 credits.

R SOC 408 Human Fertility in Developing Nations
Spring. 3 credits.

R SOC 438 Social Demography
Fall. 3 credits.

Human Evolution and Ecology

ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind
Fall. 3 credits.

ANTHR 203 Early People: The Archaeological and Fossil Record (also Archaeology 203)
Spring. 3 credits.

ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits.

ANTHR 391 The Evolution of the Human Life Cycle
Spring. 3 credits.

ANTHR 490 Primates and Evolution
Spring. 4 credits.

BIO G 207 Evolution (also History 287, and Science and Technology Studies 287)
Fall or summer. 3 credits.

BIO ES 261 Ecology and the Environment
Fall or summer. 4 credits.

BIO ES 272 Functional Ecology of Vertebrates
Spring. 4 credits.

BIO ES 275 Human Biology and Evolution (also Anthropology 275 and Nutritional Sciences 275)
Fall. 3 credits.

BIO ES 278 Evolutionary Biology
Fall or spring. 3 or 4 credits.

BIO ES 371 Human Paleontology (also Anthropology 371)
Fall. 4 credits.

BIO ES 461 Population and Evolutionary Ecology
Spring. 4 credits.

BIO ES 464 Macroevolution
Spring. 4 credits.

BIO ES 470 Ecological Genetics (also Entomology 470)
Spring. 4 credits.

BIO ES 471 Mammalogy
Fall. 4 credits.

BIO GD 481 Population Genetics
Fall. 4 credits.

BIO GD 482 Human Genetics and Society
Fall. 3 credits.

BIO GD 484 Molecular Evolution
Spring. 3 credits.

BIO ES 673 Human Evolution: Concepts, History and Theory (also Anthropology 673)
Fall. 3 credits.

B&SOC 447 History of Biology–Evolution (also History 447)
Fall. 4 credits.

PAM 303 Ecology and Epidemiology of Health
Spring. 3 credits.

NS 306 Nutritional Problems of Developing Nations
Fall. 3 credits.

NS 451 Epidemiology and Health of Human Communities
Fall. 3 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

R SOC 201 Population Dynamics
Spring. 3 credits.

VET MI 431 Medical Parasitology
Fall. 2 credits.

VET CS 664 Introduction to Epidemiology
Fall. 3 credits.

Independent Major Program

L. Abel, director, 172 Goldwin Smith Hall, 255–3386.

The Independent Major Program is described in the introductory section of Arts and Sciences.

IM 351 Independent Study
Fall or spring. 1–4 credits. Prerequisite: permission of the program office.

IM 499 Honors Research
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

International Relations Concentration

Matthew Evangelista, director (mae10@cornell.edu)

Integral to international relations is a focus on global issues and processes and an understanding of their impact on particular countries or geographic regions. Cornell's several undergraduate colleges and many departments offer courses that provide a strong grounding in the field as well as an opportunity to study more than 60 languages.

The concentration in international relations provides a curricular structure for undergraduate students with an interest in international law, economics, agriculture, trade, banking, organizations, and government service, and in cross-cultural affairs or education. Students can major in just about anything and in addition "concentrate" in international relations. They can major in a field that the concentration in international relations closely complements (for example, history, government, economics, or anthropology) or they can major in some very different subject, including the sciences, and use the concentration to develop a separate expertise.

Course Requirements:

These requirements are designed to expose students to a broad range of perspectives in international relations while allowing them to tailor their course selections to specific interests. Courses throughout the university are grouped into four subject areas: 1) International Economics and Development; 2) World Politics and Foreign Policy; 3) Transnational Processes and Policies; and 4) Cultural Studies. Within these four subject areas, courses are also identified as "core" or "elective." Students must complete eight courses selected from the four groups according to one of two strategies. Option A emphasizes the politics and economics of international relations. Option B puts greater stress on culture. In choosing either option, students should ensure that they acquire familiarity with more than one geographic region or country.

Option A:

- One core course from Groups 1, 2, 3, and 4
- One elective from Groups 1, 2, 3, and 4

Option B:

- One core course from Groups 1, 2, 3, and 4
- One elective from either Group 1 or Group 2
- One elective from Group 3 and Group 4, and one additional elective from either Group 3 or Group 4

Students should take note that some courses have prerequisites. **The list of courses here (for fall 1999 only) is representative but not exhaustive**. Many other courses throughout the university can qualify for the IR Concentration. For further information, contact the administrative coordinator or the director of the IRC (address below).

Course List Fall 1999

(For Course List Spring 2000, contact IRC program in fall of 1999)

Group 1: International Economics and Development

Core:

ECON 361	International Trade Theory (prerequisites: Econ 101–102–313)

Electives:

ECON 324	American Economic History
ECON 425	Economic History of Latin America
ECON 457/ WOMNS 446	Women in the Economy
ECON 460/ ILRLE 642	Economic Analysis of Welfare State
ECON 471	Economy of Former USSR & Central Europe
ECON 472	Comparative Economic System: East & West
ECON 475	Economic Problems of India
GOVT 338	Comparative Political Economy
GOVT 433	Politics of Economic Liberalization in the Developing World
ILRIC 333/ 533	Western Europe, US, and Japan
ILRIC 632	Labor Movements: Comparative Perspectives
ILRIC 637	Labor Relations in Asia
ILRHR 656	International Human Resource Management

Group 2: World Politics and Foreign Policy

Core:

GOVT 385	American Foreign Policy

Electives:

AS&RC 311/ 504	Government and Politics in Africa
AS&RC 380	African History: Early Times to 1800
AS&RC 451	Political and Social Change in Caribbean
GOVT 351	India
GOVT 358/ NES 294/ JWST 294	Modern History of the Near East
GOVT 380	Politics of Modern Germany
GOVT 393/ SOC 393	Introduction to Peace Studies
GOVT 432	Model European Union II
HIST 191	Introduction to Modern Asian History
HIST 214	SEM American Foreign Policy (permission of instructor)
HIST 293	History of China Up to Modern Times
HIST 295	Colonial Latin America
HIST 384	Europe, 1945–1968
HIST 414	Motivations of US Foreign Policy (permission of instructor)
HIST 464	Murder, War, & State, Violence in Europe (permission of instructor)
HIST 467	SEM Modern European Political History

Group 3: Transnational Processes and Policies

Core:

GOVT 393/ SOC 393	Introduction to Peace Studies

Electives:

B& SOC 461/ ALS 661/ BIOES 661	Environmental Policy (a year-long course)
CRP 477/ CRP 677	SEM Issues in African Development
GOVT 400	US Sovereignty and International Law (by permission only)
HIST 250/ ELE E 250/ ENGRG 250	Technology in Society
INTAG 300	Perspectives in International Agricultural and Rural Development
NTRES 400	International Environmental Issues (juniors and seniors)
R SOC 438/ SOC 437	Social Demography (enrollment limited to 30)

Group 4: Cultural Studies

Core:

ANTHR 200	Cultural Diversity and Contemporary Issue
ANTHR 321/ WOMNS 321/ ANTHR 621	Sex and Gender: Cross Cultural Perspective

Electives:

ANTHR 303/ AAS 303	Asians in the Americas
ANTRR 322/ RELST 322	Magic, Myth, Science and Religion (limited to 12 students)
ANTHR 328	Conflict, Dispute Resolution, and Law in Cultural Context
ANTHR 339	Peoples/Cultures of Himalayas
ANTHR 345	Japanese Society
ANTHR 362/ 662	Democratizing Society
ASIAN 211	Introduction to Japan
ASIAN 215	Introduction to South Asian Civilization
ASIAN 490/ HIST 490	Tales of Heike
AS&RC 478/ WOMNS 478	Family and Society in Africa
COML 311/ RUSSL 311/ FRLIT 315	Modern European Literature and Culture
COML 404/ ENGL 404/ GERST 414	Nazis and the Literary Imagination
ENGL 252/ WOMNS 252/ JWST 255	Women and the Holocaust
ENGL 268/ AM ST 268	The Culture of the 1960's
ENGL 434	Electronic Art and Culture
FRLIT 220	French and Francophone Culture
FRLIT 224/ ANTHR 224	The French Experience
HIST 151	Introduction to Western Civilization
HIST 249	Race and Class in Latin American History
HIST 281/ S&TS 281	Science in Western Civilization
HIST 287/ BIO G 207/ S&TS 287	Evolution
HIST 291/ JWST 252	Modern European Jewish History: 1789–1948
HIST 326	History of the Samurai, Part II
HIST 348	History of Brazil
HIST 355	The Old Regime: France 17th and 18th Century
HIST 366/ RELST 366	Medieval Culture, 1100–1300
HIST 395	Southeast Asia to the 18th Century
HIST 428	Comparative History of Colonial North America (permission of instructor)
HIST 445/ HIST 645	Prostitutes/Patriots—Latin America (permission of instructor)
HIST 462	Pop Culture in European History
HIST 474	Topics in Modern European Intellectual History
HIST 493/ HIST 693	Problems in Modern Chinese History (permission of instructor)
NES236/ JWST 236/ COML 246	Israel: Literature and Society
NES 294/ JWST 294/ GOVT 358	Modern History of the Near East
NES 366/ JWST 366	History and Archeology: Ancient Near East
SOC 393/ GOVT 393	Sociology of War and Peace

Language Requirement

IR Concentrators are expected to complete additional language study beyond the College of Arts and Sciences degree requirement. This study can be accomplished in one of two ways:

1) Two years of one foreign language (proficiency plus one course)
2) Two languages at proficiency

Study Abroad

IR Concentrators are strongly encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with study abroad.

All courses used to fulfill the concentration requirements must be taken for a letter grade. Transcripts will reflect successful completion of the requirements for the concentration. In addition, students will receive a special certificate signed by both the director of the Mario Einaudi Center for International Studies and the director of the international relations concentration. To enroll and for further information, contact Zhang Wu, the administrative coordinator, IRC, at the Mario Einaudi Center for International Studies, 156 Uris Hall, wz18@cornell/edu/254–5004 or contact the director, Prof. Mathew Evangelista (Government), (255–8672/mae10@cornell.edu).

Center for International Studies

See Interdisciplinary Centers, Programs, and Studies.

Program of Jewish Studies

D. I. Owen, director (Ancient Near Eastern and Biblical History and Archaeology), L. Adelson (German-Jewish Literature and Culture), R. Brann (Judeo-Arabic Studies), S. Burstyn (Israeli Music), V. Caron (Modern French and European-Jewish History), M. Diesing (Yiddish Language and Linguistics), N. Furman (French Holocaust Literature), K. Haines-Eitzen (New Testament and Early Christianity), Y. Halevi-Wise (Modern Hebrew Literature), R. Hoffmann (Holocaust Studies), P. Hyams (Medieval Jewish History), D. LaCapra (Holocaust Studies), M. Levine (Modern Middle Eastern History and Political Science), M. Migiel (Italian Literature), R. Polenberg (American-Jewish History), J. Porte (American-Jewish Writers), D. S. Powers (Arabic and Islamic Studies), G. Rendsburg (Biblical and Semitic Studies), E. Rosenberg (Holocaust Studies), N. Scharf (Hebrew Language), D. Schwarz (Anglo-Jewish Literature), G. Shapiro (Russian-Jewish Literature), S. Shoer (Hebrew Language), M. Steinberg (German-Jewish History and Culture), Y. Szekely (Judaica Bibliography), J. Zorn (Biblical Archeaology)

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976.

The program has grown out of the conviction that Judaic civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges.

The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; medieval and modern Hebrew literature; ancient, medieval, and modern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

Courses Offered

JWST 105–106 Elementary Modern Hebrew I and II (also NES 101–102)
105 fall; 106 spring. 6 credits. S. Shoer.
For description, see NES 101–102.

JWST 123–124 Elementary Biblical Hebrew I & II (also NES 123–124, RELST 123–124)
123 fall; 124 spring. 3 credits. Y. Chen.
For description, see NES 123–124.

JWST 163 Things the Prophets Never Told You: Archaeology and the Religion of Ancient Israel (also NES 163)
Fall. 3 credits. J. Zorn.
For description, see NES 163.

JWST 201–202 Intermediate Modern Hebrew I and II (also NES 201–202) @
201, fall; 202, spring. 4 credits. N. Scharf.
For description, see NES 201–202.

JWST 223 Introduction to the Bible I (also NES 223) @ #
Fall. 3 credits. G. Rendsburg.
For description, see NES 223.

JWST 229 Introduction to the New Testament (also NES 229, RELST 229) @ #
Fall. 3 credits. K. Haines-Eitzen.
For description, see NES 229.

JWST 236 Israel: Literature and Society (also NES 236) @
Fall. 3 credits. Y. Halevi-Wise.
For description, see NES 236.

JWST 252 Modern European Jewish History, 1789–1948 (also HIST 291)
Fall. 4 credits. V. Caron.

JWST 694 Joyce's Ulysses and the Modern Tradition (also ENGL 670)

John S. Knight Writing Program

The director of the John S. Knight Writing Program is Jonathan Monroe, professor in the Department of Comparative Literature and George Elliott Reed Professor of Writing and Rhetoric. Katherine Gottschalk, senior lecturer in the Department of English, is the Walter C. Teagle Director of First-Year Writing Seminars. The program's offices are in 159 Goldwin Smith Hall, 255–4061.

M. Gilliland (Writing Workshop), K. Hjortshoj (Writing Workshop), B. LeGendre (Writing Workshop), J. Martin (Writing Workshop), J. Pierpont (Writing Workshop), E. Shapiro, (Writing Workshop).

The John S. Knight Writing Program helps to coordinate the teaching of writing for undergraduates in six of the university's schools and colleges (the School of Industrial and Labor Relations and the colleges of Agriculture and Life Sciences; Architecture, Art, and Planning; Arts and Sciences; Engineering; and Human Ecology). The program administers writing seminars for first-year and upperclass students, tutorial writing classes, and seminars in the teaching of writing. More than thirty academic departments and programs participate in the program.

Advanced Writing Seminars

For upperclass students, the program collaborates with the Department of English in offering English 288–89, "Expository Writing." This course helps students write with more confidence and skill in all disciplines, while provoking inquiry into particular areas of study, forms or uses of writing, or topics intimately related to the written medium. Students may choose among a variety of sections focusing on such themes as "Writing about the Social World," "Writing in the Humanities," "Issues and Audiences," "Understanding the News," and "The Languages of Science."

First-Year Writing Seminars

For first-year students the program offers the first-year writing seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prose that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All seminars pursue this common aim through small classes, with a maximum of seventeen students, and adherence to a program-wide set of guidelines:

- Seminars require at least six—and at most ten—formal writing assignments on different topics, totaling a minimum of thirty pages. (Some of the 30-page total may include preparatory drafts.)
- A minimum of two of the required essays (see above) are developed through several stages of revised drafts under the instructor's guidance so that the revisions stand as substantially improved essays.
- All seminars spend ample classroom time on work directly related to writing.
- Reading assignments in the course subject are kept under 75 pages per week to permit regular, concentrated work on writing.
- All students meet in at least two individual conferences with the instructor.

Offerings change from semester to semester. Each term's first-year writing seminars are described in a brochure available from college registrars.

To ensure that students will enjoy the benefits of small writing classes, first-year writing seminars are limited to no more than seventeen students. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out ballots available from their college registrars. Over ninety percent receive one of their top three choices. Students may change their writing seminars each semester at the First-Year Writing Seminar Exchange. Changes can also be made at special First-Year Writing Seminar add/drop sessions held during the first two weeks of each semester.

The colleges and the school served by the program accept first-year writing seminars in fulfillment of their individual graduation requirements in categories referred to variously as "first-year writing," "oral and written expression," and the like. The program does not decide whether students may graduate: it makes courses available. Individual colleges and schools administer their own graduation requirements.

Currently, most undergraduate students are required to take two first-year writing seminars. Architecture majors, however, need only one. Hotel students fulfill their requirement through Hotel Administration 165, which should be taken with Hotel Administration 265 during the first two semesters at Cornell. Agriculture and Life Sciences students can take first-year writing seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score "4" or "5" on the Princeton Advanced Placement Examination in English receive three credits. Such credits are awarded automatically; no application to the John S. Knight Writing Program or the Department of English is necessary. How these credits may be applied to first-year writing or other distribution requirements depends on the student's college and score. All students who score "5," except Architecture majors, may apply their three credits towards the writing requirements of their college. Of students who score "4," only Agriculture and Life Sciences students and Industrial and Labor Relations students may apply their three credits toward the writing requirements of their college. Students should always consult their college registrars to be certain that they understand their writing requirements.

Students who have already taken a first-year writing seminar, or who score "4" or "5" on the Princeton AP exam, or "700" or better on the English Composition or CEEB tests, may enroll, space permitting, in the following upper-level first-year writing seminars: English 270, 271, or 272.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to first-year writing seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course. (It is not sufficient to write, for example, one thirty-page term paper.) Students in the College of Engineering and the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a first-year writing seminar to satisfy part of their writing requirement. The John S. Knight Writing Program must approve all such petitions in advance.

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in late October for the spring term.

Teaching Writing

Each summer and fall, the program offers instruction in the teaching of writing to new staff members in the first-year writing seminars and other interested instructors. Teaching Writing I, offered in the summer, is primarily a course for graduate students; the same course is offered in the fall as Teaching Writing II. The program also sponsors a summer apprenticeship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

WRIT 700 Teaching Writing
Summer and fall. 1 credit. S-U grade only.
Teaching Writing introduces new instructors of Cornell's First-Year Writing Seminars to the challenges of teaching writing in courses that both introduce students to particular fields of study and develop the sophisticated writing skills students will need throughout their undergraduate careers and beyond. An overview of methodologies involved in the teaching of writing within a disciplinary context is provided by readings representing a range of pedagogical theories and practices, seminar discussions, and presentations of faculty, visiting scholars in the field, and experienced TAs. Participants in the course prepare written assignments designed to prepare them for the actual work of their First-Year Writing Seminars. In addition, written critiques and explanatory rationales of those assignments provide an opportunity for reflection on the methods chosen and on the principles underlying them.

WRIT 707 Literacy, Social Organization, Consciousness, and the Information Society (also ENGL 707, LING 707, SOC 707, & PSYCH 707)
Fall. 5 credits. C. Bazerman.
This course will investigate the literate practices of contemporary academic, disciplinary, and professional cultures, which are deeply implicated in contemporary forms of social organization and consciousness. We will examine the historical emergence and elaboration of literate practices and the implications for contemporary society moving from print to electronic media. This investigation will start with considering the interaction of literacy and social organization at earlier

moments and will then consider some relevant theory to expose the ways text, social organization, and consciousness interact. We will then return to the rise and organization of academic, disciplinary, professional, and information culture. Each participant in the seminar will be responsible for developing a project examining socio-cognitive discursive practices within a classroom, disciplinary, professional, or cyber-information domain.

Writing Workshop

The John S. Knight Writing Program offers "An Introduction to Writing in the University" for first-year students (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

Writing 137 and 138 are graded S-U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate, including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL), should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The Workshop also offers a Walk-In Service (see below) to help students work on writing assignments. The director is Joe Martin, senior lecturer in the Writing Workshop. The Workshop offices are in 174 Rockefeller Hall, 255–6349.

The Walk-In Service

Through the Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Walk-In Service has tutors available during the academic year in 174 Rockefeller and north- and west-campus residential areas. The director is Mary Gilliland. For information contact the Writing Workshop, 174 Rockefeller Hall, 255–6349.

WRIT 137–138, 134 An Introduction to Writing in the University
137, fall; 138, spring; 134, summer. 3 credits each term. Each section limited to 12 students in the fall and spring, 6 students in the summer. S-U grades only. Prerequisite: permission of instructor.
This writing seminar is designed for students who need more focused attention to order to master the expectations of academic writing. The course emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and with weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

WRIT 139–239 Special Topics in Writing
Fall, spring. 139, undergraduate students only; 239, graduate students only. 3 credits. S-U grades only. Cannot fulfill any writing or distribution requirements. Prerequisite: permission of instructor.
These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction is in weekly tutorials. Interested students should come to 174 Rockefeller for more information.

Latin American Studies

190 Uris Hall

D. Castillo, director; M. J. Dudley, associate director; L. Benería, R. Blake, D. Block, C. Castillo-Chávez, M. L. Cook, D. Cruz de Jesus, T. Davis, E. Dozier, B. Deutsch-Lynch, G. Fields, M. A. Garcés, W. Goldsmith, J. Haas, J.-P. Habicht, J. Henderson, T. Holloway, Z. Iguina, B. J. Isbell, S. Jackson, T. Jordan, J. Kronik, S. Kyle, D. R. Lee, L. Morató, B. Olguín, J. Oliveira, J. E. Williams

The Latin American Studies Program encourages and coordinates faculty and student interests in Latin America. A variety of special lectures, films, and seminars supplement the regular course offerings. Graduate students may pursue a minor in Latin American Studies, while majoring in the field of their choice.

Undergraduate Concentration

Undergraduate students may fulfill a Latin American Studies Concentration by completing a minimum of 15 credits in Latin American studies courses combined with language proficiency in Quechua, Spanish, or Portuguese. Latin American courses are offered in the College of Agriculture and Life Sciences; the College of Architecture, Art, and Planning; College of Arts and Sciences, College of Human Ecology; and the School of Industrial and Labor Relations.

For further information and a current course listing, students should contact the program office at 255–3345 or 190 Uris Hall.

Latin American Studies Core Courses

It is strongly recommended that undergraduate concentrators take the interdisciplinary core course **SPANL 320/LASP 301 Perspectives on Latin America**.

Particular attention is drawn to the following courses that students have taken in the past to complete requirements for the undergraduate concentration or the graduate minor.

Other courses may be substituted with the approval of the advisor.

Latino Studies Program

434 Rockefeller Hall

The Latino Studies Program is an interdisciplinary academic program that focuses on the contributions, concerns, and welfare of those persons of Latino origin who reside in the United States. It includes support for historical, linguistic, literary, social, economic, and political studies of this diverse group of Americans. To this end the program objectives are (1) to expand the available course curriculum by providing both undergraduate and graduate courses pertaining to Latino subject matters; (2) to enlarge the size of the Latino faculty at Cornell through permanent appointments and visiting appointments; and (3) to enhance the Latino academic environment on campus through support of such activities as lectures, conferences, seminars, exhibits, and research activities.

Undergraduate Concentration

The Latino Studies Program offers an undergraduate concentration in Latino Studies which consists of an interdisciplinary course of study primarily in history, sociology, anthropology, literature and language. To complete the concentration, students must take at least five courses (minimum total of 15 credits) in Latino Studies, including "Latinos in the United States" (LSP 201/SOC 265) offered each spring semester. Students are required to include at least two courses at the 300 or 400 levels. Students who are interested in the concentration must meet with the LSP advisor, senior lecturer Loretta Carrillo, and file an application with the Latino Studies Program office by the beginning of their junior year. A maximum of one independent study, which requires the approval of the LSP advisor, will be accepted to fulfill the requirements of the concentration. The FWS does not count towards fulfilling concentration requirements.

Resource Center

The Latino Studies Program Resource Center in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The Resource Center maintains print and media material pertinent to U.S. Latino issues and also provides a meeting space for more than 25 Latino student organizations.

Courses

LSP 201 Latinos in the United States (also SOC 265)
Spring. 4 credits variable. T-TH 2:55–4:10.
H. Velez.
Exploration and analysis of the Hispanic experience in the United States. An examination of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

LSP 202 Spanish for English/Spanish Bilinguals (also SPAND 200)
Fall and spring. 3 credits. M W F 11:15–12:05. N. Maldonado-Mendez.
A course designed to expand bilingual student's knowledge of Spanish providing them with ample opportunities to develop and improve each of the basic language skills.

LSP 220 Sociology of Health and Ethnic Minorities (also RSOC 220)
Fall. 3 credits. T-TH 10:10–11:25.
P. Parra.
Discusses the health status of minorities in the United States. Specifically, it will explore intragroup diversity such as migration, economic status and the influence of culture and the environment on health status and access to health care. Although special attention is given to Latino populations, discussion encompasses other minorities who face similar problems.

[LSP 221 Anthropological Representation: Ethnographies on Latino Culture (also ANTHRO 221)
3 credits. Not offered 1999–2000.
V. Santiago-Irizarry.
Representation is basic to anthropology. In translating cultures, anthropologists produce authoritative representations of and about other people's lives. In this course, we will examine with a critical eye, the production of representations about U.S. Latino cultures, as they are embodied in anthropological texts. Issues to be explored include the relation between the ethnographer and the people he or she is studying, the contexts in which ethnographic texts are produced, and the way they may position different cultural groups within the larger national context.]

LSP 240 Survey in U.S. Latino Literature (also ENGL 240)
Spring. 4 credits. Time: TBA.
M. P. Brady.
It is estimated that by the year 2000, the Latino/a population in the United States will be the largest "minority group" in the country. This course seeks to introduce students to the growing body of literature (both fiction and poetry) by the various U.S. Latino/a communities. We will consider cultural production that results from intercultural crossings between Mexico, Cuba, Guatemala, Dominican Republic, El Salvador, and Los Angeles, New York, and Miami. How do Latina/o literatures converge and diverge as they explore issues of "race," ethnicity, gender, sexuality, class, nationality, and identity in general, at a time when the American profile is increasingly becoming "latinized." Authors examined may include Tomás Rivera, Cherrie Moraga, Jesús Colón, Miguel Pinero, Nicolasa Mohr, Cristina García, Julia Alvarez, Américo Paredes, Junot Díaz, Loida Maritza Pérez, Sandra Benítez, Martin Espada, Lorna Dee Cervantes, Frances Negrón-Muntaner, Luz María Umpierre, and Hector Tobar.

LSP 246 Contemporary Narratives by Latina Writers (also SPANL 246)
Fall. 3 credits. T-TH 1:25–2:40.
L. Carrillo.
This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups in the United States including Chicana, Chilean, Cuban, Dominican, and Puerto Rican. We will investigate the parellel development of a Latina perspective on personal, social, and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We will investigate these works as artistic attempts to deal with such issues as culture, language and bilingualism, family, gender, sexuality, and domesticity. We will account for regional distictions and contributions. Readings will include works by Julia Alvarez, Gloria Anzaldúa, Elena Castedo, Ana Castillo, Denise Chávez, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Nora Glickman, Nicholasa Mohr, Cherríe Moraga, Achy Obejas, Esmeralda Santiago, Ana Lydia Vega, and Helena María Viramontes.

LSP 260 Introduction to U.S. Latino History, Part I (also HIST 260, AM ST 259)
Spring. 4 credits. T-TH 1:25–2:40.
M. C. Garcia.
This course introduces students to the history of Latinos in the United States. We will focus specifically on the history of Chicanos (Mexican Americans) and Central Americans. Part II of this course LSP/HIST/AM ST 261 focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. Among the topics that will be addressed are: historical immigration patterns and the "push/pull" factors that compelled migration to the

United States; the social and political events that shaped the evolution of these Latino communities; the role of cultural identity, race, class, and gender in shaping experience; the role of foreign policy in formulating immigration policy.

LSP 261 Introduction to U.S. Latino History, Part II (also HIST/AM ST 261)
Fall. 4 credits. TH 2:55–4:10.
M. C. Garcia.
This course, part II of a two-semester sequence, introduces students to the history of Latinos in the U.S. In LSP/HIST/AM ST 261 we will focus on Puerto Ricans, Cubans, and the Dominicans in the United States. (LSP/HIST 260; AM ST 259 focuses on Mexican Americans/Chicanos and Central Americans). Among the topics to be addressed are: historical immigration patterns and reasons for migration; the social and political events that shaped the evolution of these communities; the role of cultural identity, race, class and gender in shaping experience; the intersection of U.S. foreign policy and immigration policy.

LSP 280 Intercultural Ethnoscapes: Spain and America (also ANTHRO 280)
Fall. 3 credits. M W F 1:25–2:15. One-time course offering by visiting professor.
Visiting Professor M. Buxó I Rey.
At the end of each century, the West has reflexively considered its cultural achievements. The nineteenth century ended with the utopian illusion that knowledge was being transformed into industrial, scientific and social progress. The twentieth ends with the illusion of a breakthrough to a knowledge-based society that is globally and locally interconnected. Yet to be categorized a fundamental cultural change, global ubiquity, immediacy, and virtuality have to build on new meanings, designs, and actions. This course uses the past and the present link between Spain and America as an ethnographic laboratory to explore the agency and the intercultural translation of meanings, sentiments and identities through the selection and hybridization of cultural objects and visual and textual expressions, including iconography and ritual, gardens, literature, mass media and the Internet.

LSP 306 Latino Politics in the United States (also GOVT 306)
Spring. 4 credits. T-TH 10:10–11:25.
P. Cabán.
The opening section examines the evolution of Latino/a political identity and the ongoing debate on whether Latinos constitute a homogeneous ethnical/racial population with common political interests, values and aspirations. We examine the immigration experience and the socioeconomic and demographic characteristics of different Latino/a populations. The next section focuses on the changing structure of U.S. politics, at the national, state and local levels. We examine the histories of Latinos' organizing and electoral struggles to gain access to the political system, their patterns of political socialization, and the possibilities of and obstacles for coalition building with other racial/ethnic populations. Finally, the course will examine a number of case studies on Latinos' struggle for inclusion in the U.S. body politic, and look at ways in which they have challenged efforts to exclude them. We will be concerned with four recent policy issues: welfare and immigration reforms, affirmative action, bilingual education and civil rights legislation. Understanding how the decisions and actions of the legal system and courts have altered the opportunities for Latino economic and political empowerment, and the campaigns organized by these affected communities to reverse injurious legislation, will be the central themes here.

[LSP 366 Spanish in the United States (also LING 366)
4 credits. Prerequisite: some knowledge of Spanish. Not offered 1999–2000.
M. Suner.
Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics.]

LSP 377 The United States (also ANTHRO/AM ST 377)
Fall. 4 credits. T-TH 11:40–12:55.
V. Santiago-Irizarry.
The anthropological inquiry into one's culture is never a neutral exercise. This course will explore issues in the cultural construction of the United States as a "pluralistic" society. We will look at the ideological context for the production of a cultural profile predicated upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings will include historic documents and accounts, popular writings, and recent ethnographies on the United States.

[LSP 396 Modern Latino Prose Fiction (also SPANL 396)
4 credits. Conducted in Spanish. Not offered 1999–2000. D. Castillo.
A detailed examination of representative twentieth-century fictional works (novels, short stories, plays) by Hispanic American authors. Discussion will be centered on such issues as the social and political concerns raised by the fiction and the authors' needs to struggle with a double linguistic and cultural tradition. Authors include Nicholasa Mohr, Piri Thomas, Rolando Hinojosa-Smith, Alejandro Morales, Tomás Rivera, Ron Arias, Raymond Barrio, and Luis Valdez.]

LSP 420/421 Independent Study
Fall and spring. 2–4 credits. Permission of instructor.
Guided independent study.

LSP 660 Latino Languages, Ideology, and Practice (also ANTHRO 660)
Spring. 4 credits. T 4:30–6:30.
V. Santiago-Irizarry.
Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course will look at the place of language as a signifying practice in the U.S. by focusing on the experience of Latino communities. Topics to be explored include linguistic diversity and change, accomodation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.

Law and Society

D. A. Dunning, director, 280 Uris Hall, 255–6391, dad6@cornell.edu, R. Breiger (sociology), C. Carmichael (comparative literature), D. A. Dunning (psychology), G. Hay (economics), P. Hyams (history), M. Katzenstein (government), R. Miller (philosophy), M. B. Norton (history), R. Polenberg (history), D. Powers (Near Eastern studies), J. Rabkin (government), A. Rutten (government), H. Shue (Ethics and Public Life)

The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of the social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. Students who wish to graduate with a concentration in law and society should consult the director of the program or one of the advisors listed above to plan a coherent program of study. Admission to the concentration has to be approved by the director of the program. Such a program should ordinarily include at least four courses from the following list. At least two of the courses should fall outside the student's major. Particular attention is drawn to GOVT 313 and PSYCH 265, which past students have often taken. Other courses may be substituted with the approval of the advisor. The Law and Society Program is an activity of the Program on Ethics and Public Life. Inquiries can be directed to:
Mary Newhart, Administrative Assistant, 119 Stimson Hall, 255–8515, mjn3@cornell.edu.

Lesbian, Bisexual and Gay Studies

E. Hanson, director, undergraduate studies, B. Martin, director, graduate studies; B. Anderson, D. Bem, S. Bem, A. Berger, J. Borneman, B. Correll, J. Culler, I. DeVault, N. Furman, J. E. Gainor, I. V. Hull, M. Jacobus, K. Jones, M. Katzenstein, K. March, S. McConnell-Ginet, T. Murray, M. B. Norton, J. Peraino, J. Piedra, R. Savin-Williams, R. Schneider, A. M. Smith, A. Villarejo, R. Weil

The field of Lesbian, Bisexual and Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LBG Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms.

In addition to offering a graduate minor, the field of LBG Studies now offers an undergraduate concentration, which is administered under the auspices of the Women's Studies Program and which consists of four courses from the list below. Although most of the courses in LBG Studies (including those on men) will probably fall under the aegis of the Women's Studies Program and hence be crosslisted with it, not all of the courses in Women's Studies are sufficiently focused enough on the social construction of sexuality per se to be part of the LBG Studies concentration. In order to qualify for the concentration, courses must devote a significant portion of their time to sexuality and to questioning the cultural and historical institution of exclusive heterosexuality. Students selecting their four courses from the LBG Studies subset must identify their concentration as either LBG Studies or Women's Studies; they cannot double-count their credits and thereby use the same courses for both concentrations.

Students interested in the LBG Studies concentration should contact the Lesbian, Bisexual and Gay Studies Office in 379 Uris Hall.

Courses

ANTHR 200 Cultural Diversity and Contemporary Issues
Fall. 3 credits. Staff.
For description, see ANTHRO 200.

ANTHR 321 Sex and Gender in Cross-Cultural Perspective (also WOMNS 321)
Fall. 4 credits. K. March.
For description, see WOMNS 321.

ENGL 355 Decadence (also WOMNS 355)
Spring. 4 credits. E. Hanson.
For description, see ENGL 355.

[ENGL 377 Gay Fiction (also WOMNS 376)
Not offered 1999–2000. E. Hanson.]

[ENGL 395 Video: Art, Theory, Politics (also THETR 395)
Not offered 1999–2000. T. Murray.]

[ENGL 424 Studies in Renaissance Lyric
Not offered 1999–2000. B. Correll.]

ENGL 427 Shakespeare: Gender, Sexuality, Cultural Politics (also WOMNS 427)
Spring. 4 credits. B. Correll.
For description, see ENGL 427.

ENGL 608 Seminar in Cultural Studies: Race, Drugs and Gender
Spring. 4 credits. M. P. Brady.
For description, see ENGL 608.

[ENGL 654 Queer Theory (also WOMNS 654)
Not offered 1999–2000. E. Hanson.]

[ENGL 655 Decadence (also WOMNS 656/COM L 655)
Not offered 1999–2000. E. Hanson.]

ENGL 660 Cinematic Desire (also COM L 662 and WOMNS 661)
Fall. 4 credits. E. Hanson.
For description, see ENGL 660.

[ENGL 703 Theorizing Film: Race, Nation and Psychoanalysis (also FRLIT 695)
Not offered 1999–2000. T. Murray.]

FRLIT 493 French Feminisms (also WOMNS 493)
Fall. 4 credits. N. Furman.
For description, see FRLIT 493.

[GERST 413 The Women Around Freud (also WOMNS 413)
Not offered 1999–2000. B. Martin.]

GOVT 353 Feminist Movements and the State (also WOMNS 353)
Fall. 4 credits. M. Katzenstein.
For description, see GOVT 353.

[GOVT 362 Politics of Sexuality (also WOMNS 262)
Not offered 1999–2000. A. M. Smith.]

[GOVT 415 Race, Gender, and Organization (also WOMNS 415)
Not offered 1999–2000. M. Katzenstein and J. Reppy.]

GOVT 467 Radical Democratic Feminisms (also WOMNS 468)
Fall. 4 credits. A. M. Smith.
For description, see GOVT 467.

HD 284 Introduction to Sexual Minorities (also WOMNS 285)
Fall. 3 credits. R. Savin-Williams.
For description, see HD 284.

[HD 464 Sexual Minorities and Human Development (also WOMNS 467)
Not offered 1999–2000. R. Savin-Williams.]

[HIST 377 Gender in Early Modern Europe (also WOMNS 377)
Not offered 1999–2000. R. Weil.]

HIST 378 Topics in U.S. Women's History (also WOMNS 378)
Fall. 4 credits. M. B. Norton.
For description, see HIST 378.

[HIST 626 American Women's History (also WOMNS 626)
Not offered 1999–2000. M. B. Norton.]

LING 244 Language and Gender (also WOMNS 244)
Spring. 4 credits. S. McConnell-Ginet.
For description, see LING 244.

[PSYCH 277 Social Construction of Gender (also WOMNS 277)
Not offered 1999–2000. S. Bem.]

[PSYCH 450/650 Lenses of Gender (also WOMNS 450/650)
Not offered 1999–2000. S. Bem.]

[SPAN L 384 Literature and Revolution
Not offered 1999–2000. J. Piedra.]

[SPAN L 400 Maricoteoría/Queer Theory
Not offered 1999–2000. J. Piedra.]

THETR 320 Queer Theatre
Spring. 4 credits. J. E. Gainor and D. Matson.
For description, see THETR 320.

[THETR 336 American Drama and Theatre (also ENGL 336)
Not offered 1999–2000. J. E. Gainor.]

[THETR 339 Theories and Techniques of 20th-Century Western Theatre
Not offered 1999–2000. R. Schneider.]

[THETR 436 The Female Dramatic Tradition (also WOMNS 433)
Next offered in 2–3 years. J. E. Gainor.]

THETR 637 Seminar in Dramatic Theory
Fall. 4 credits. R. Schneider.
For description, see THETR 637.

WOMNS 211 Introduction to Feminist Theory
Fall. 4 credits. K. McCullough.
For description, see WOMNS 210.

WOMNS 405/605 Domestic Television
Spring. 4 credits. A. Villarejo.
For description, see WOMNS 405/605.

[WOMNS 441/641 Theater of Commodities: Feminism, Advertising, TV, and Performance (also THETR 439)
Not offered 1999–2000. A. Villarejo and R. Schneider.]

WOMNS 465 Feminist Theory/Lesbian Theory (also GERST 465 and COM L 465)
Fall. 4 credits. A. Villarejo.
For description, see WOMNS 465.

[WOMNS 621 Lesbian, Gay, Bisexual Studies (also GERST 621)
Not offered 1999–2000. B. Martin.]

Medieval Studies

Danuta Shanzer, director; B. B. Adams, F. M. Ahl, C. M. Arroyo, R. Brann, K. W. Brazell, C. Brittain, E. W. Browne, R. G. Calkins, R. T. Farrell, A. S. Galloway, A. B. Groos, W. E. Harbert, T. D. Hill, P. R. Hyams, J. J. John, C. V. Kaske, W. J. Kennedy, S. MacDonald, M. Migiel, J. M. Najemy, C. A. Peterson, J. R. Piggott, D. S. Powers, D. M. Randel, S. Senderovich, W. Wetherbee (emerita: A. M. Colby-Hall)

Undergraduate Study in Medieval Studies

The "middle" in "Middle Ages" comes from its position between late antiquity and the early modern period, a conception created for European and Western conditions. Our concentration, however, is more properly inclusive and treats a time span from roughly the 5th century into the 16th and ranges from Western Europe and the Mediterranean to China and Japan. To discover the vibrant state of medieval studies today, one need only look at the extraordinary range of scholarly, but accessible, Web sites that have sprung up all over the Internet. Cornell possesses a wealth of faculty and library resources to introduce students to every corner of the field.

While this concentration provides strong interdisciplinary breadth to majors in classics, any of the modern languages, history, music, philosophy, etc., and is excellent preparation for graduate study in a medieval field, it could complement a science major as well. Many students feel bound to choose their majors with an eye to future careers and earning potential. The program provides encouragement, guidance, and an avenue for intelligent enjoyment of an important part of all our pasts.

This concentration offers something different and extra. Coursework in Medieval Studies enhances the student's enjoyment and understanding of the artistic and material relics of the Middle Ages: Gregorian chant, manuscripts and stained glass windows, Gothic cathedrals, Crusader castles, and picturesque towns cramped within ancient walls. The student will discover the serious realities involved in, and shaped by, Arthurian tales of brave knights and fair ladies, dungeons, dragons, and other marvels. Students can analyze and appreciate the horrors of the Black Death, triumphs in courtly love and pitched battle, swords and scimitars, caliphs and popes, fear of demons and djinns, and the reassuring presence of angels.

The period saw many of the foundational choices that have, for good and ill, made the world what it is today. Many of our current challenges in the fields of law, human rights, attitudes toward power, authority, gender relations and sexual mores are derived from the ways in which society was formulated a millennium ago. The Medieval Studies Program houses a vital undergraduate association, Quodlibet, that arranges frequent lectures on medieval topics and an annual Medieval Reading of prose and poetry in many medieval languages.

Undergraduates who wish to undertake an independent major or concentration in Medieval Studies should consult the director of the program, 259 Goldwin Smith Hall, 255–8545, <medievalst@cornell.edu>.

The Undergraduate Concentration in Medieval Studies shall consist of five medieval courses (at the 200-level or above) in at least two different disciplines, of which up to two may also count towards the major, and one must come from our list of approved "core courses."

Medieval Languages

Medieval texts (like all others) become most lively and informative when read in the original, and Cornell fortunately offers many courses for students interested in acquiring the relevant skills: Classical Arabic, Medieval Hebrew, Medieval Latin, Classical Chinese, Historical Sino-Japanese (Kambun) 700–1300 and Historical Sino-Japanese 1300–1600, Old English, Middle English, Gothic, Old Saxon, Old High German, Middle High German, Old Norse-Icelandic, Old Irish, Middle Welsh, Old Occitan (Provençal), Old French, Medieval Spanish, Medieval Italian, Old Russian, and Old Church Slavonic.

Some medieval languages require study of a modern language (e.g., French for Old Occitan and Old French) or a classical language (Classical Latin for Medieval Latin) as background. Students interested in a concentration in Medieval Studies should begin the study of a medieval language as early as possible, so that they may be able to study texts in the original before they graduate. Students are advised to consult the sponsoring departments for information about the prerequisites for various medieval languages.

Graduate Study

The Medieval Studies Program offers both an interdisciplinary and a literary comparative Ph.D. in Medieval Studies. Disciplinary fields of concentration offered within the Field of Medieval Studies are: Medieval Archaeology, Medieval History, Medieval History of Art, Medieval Literature, Medieval Philology and Linguistics, Medieval Music, and Medieval Philosophy. Information about the graduate program in Medieval Studies is contained in the catalog of the Graduate School, in a brochure on Medieval Studies available from the field coordinator, and at "Cornucopia," the program's Web site, <http://www.arts.cornell.edu/medieval>.

Medieval Studies Courses: Graduate and Undergraduate

Courses in various aspects of Medieval Studies are offered every year in several cooperating departments, including Asian Studies, Classics, Comparative Literature, English, German Studies, History, History of Art, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature, and by the Society for the Humanities. The current year's offerings are:

***ART H 230 Monuments of Medieval Art (also RELST 230) #**
Spring. 4 credits. R. G. Calkins.

ART H 336 Prelude to the Italian Renaissance (also RELST 336) #
Fall. 4 credits. R. G. Calkins.

ART H 341 15th Century Flemish Painting (also RELST 342) #
Spring. 4 credits. R. G. Calkins.

ART H 481 The Arts of China: Art of the T'ang Dynasty (618–907) @
Fall. 4 credits. A. Pan.

***ART H 531 Problems in Medieval Art and Architecture: The Archaeology of the Book (also RELST 531)**
Fall. 4 credits. R. G. Calkins.

ASIAN 348 Indian Devotional Poetry (also RELST 348)
Fall. 4 credits. D. Gold.

CHLIT 213–214 Introduction to Classical Chinese
213, fall; 214, spring. 3 credits each term. S. Tian; T. L. Mei.

CHLIT 420 T'ang and Sung Poetry
Spring. 4 credits. T. L. Mei.

CHLIT 607 Early Medieval Poetry
Spring. 4 credits. S. Tian.

CLASS 369 Intensive Medieval Latin
Summer. 4 credits. D. Shanzer.

ENGL 201 The English Literary Tradition #
Fall. 4 credits. A. Galloway.

ENGL 212 Introduction to the Medieval Epic
Spring. 4 credits. T. Hill.

ENGL 274 Scottish Literature #
Fall. 3–4 credits. T. Hill and H. Shaw.

ENGL 310 Old English in Translation
Spring. 4 credits. T. Hill.

ENGL 311/611 Old English
Fall. 4 credits. T. Hill.

ENGL 312/612 Beowulf #
Spring. 4 credits. R. Farrell.

ENGL 319 Chaucer
Spring. 4 credits. R. Farrell.

ENGL 321 Spenser and Malory #
Fall. 4 credits. C. Kaske.

ENGL 413/614 Middle English
Fall. 4 credits. A. Galloway.

ENGL 710 Advanced Reading in Old English
Fall. 4 credits. T. Hill.

FRLIT 448 Medieval Literature #
Spring. 4 credits. A. Colby-Hall.

***HIST 263 The Earlier Middle Ages (also RELST 263) #**
Fall. 4 credits. J. J. John.

HIST 275 Authority and Resistance in Europe, 1400–1600 #
Spring. 4 credits. S. Pohl.

HIST 326 History of the Samurai II @ #
Fall. 4 credits. J. Piggott.

***HIST 366 Medieval Culture, 1100–1300 (also RELST 366) #**
Fall. 4 credits. J. J. John.

***HIST 368 Marriage and Sexuality in Medieval Europe (also RELST 368, WOMNS 368) #**
Spring. 4 credits. P. Hyams.

***HIST 436 Conflict Resolution in Medieval Europe #**
Spring. 4 credits. P. Hyams.

HIST 490 Tales of the Heike (also ASIAN 490, S HUM 489) @ #
Fall. 4 credits. J. Piggott and K. Brazell.

HIST 492 Undergraduate Seminar: Medieval Chinese History #
Fall. 4 credits. C. A. Peterson.

ITALL 220 Medieval Italy
Spring. 4 credits. W. J. Kennedy.

ITALL 323/623 Encounters with the Dead (also COM L 323/623, JWST 323)
Fall. 4 credits. M. Migiel.

LING 315–316 Old Norse
315, fall; 316, spring. 4 credits each term. E. Johannsson.

LING 441 Introduction to Germanic Linguistics
Fall. 4 credits. W. Harbert.

MUSIC 494 Love, Sex, and Song in Medieval France
Spring. 4 credits. J. Peraino.

NES 133–134 Qur'anic and Classical Arabic
133, fall; 134, spring. 4 credits each term. M. Younes.

***NES 255 Introduction to Islamic Civilization (also HIST 255, RELST 255) @ #**
Spring. 3 credits. D. Powers.

NES 339/639 Islamic Spain: Culture and Society (also COM L 334, SPANL 339/699) @ #
Fall. 4 credits. R. Brann.

***PHIL 315 Medieval Philosophy #**
Fall. 4 credits. S. MacDonald.

PHIL 410 Latin Philosophical Texts #
Fall and spring. Variable credit. S. MacDonald.

RUSSA 601 Old Church Slavonic
Fall. 4 credits. E. W. Browne.

RUSSA 602 Old Russian Texts
Spring. 4 credits. E. W. Browne.

SANSK 131–132 Elementary Sanskrit (also CLASS 131–132, LING 131–132)
131, fall; 132, spring. 4 credits each term. C. Minkowski; staff.

S HUM 402 Augustine's Confessions: Memory and the Self (also CLASS 405, COM L 400, PHIL 413)
Fall. 4 credits. C. Brittain.

S HUM 403 Augustine's Dialogues on the Soul (also CLASS 406, COM L 424, PHIL 413)
Spring. 4 credits. C. Brittain.

Approved "core courses" for the undergraduate concentration are marked with an asterisk (*). Fuller descriptions of all courses are available in this catalog under the listings for the relevant departments. Even more detailed information can be found on the Web at <http://www.arts.cornell.edu/medieval/coursedesc.html>.

Modern European Studies Concentration

Susan Tarrow, coordinator

Students from any college may choose an undergraduate concentration in Modern European Studies to complement any major in any college. The purpose of the concentration is to provide a coherent structure for students with an interest in interdisciplinary study in the field of European studies.

The concentration has three tracks: European politics, economics and society; modern European history; and European culture. The requirements for the concentration are:

1) Competence in at least one modern European language, Romance, Germanic or Slavic (i.e., completion of a 300-level course or equivalent with a grade of at least B-, or demonstration of an advanced level of competence in an oral proficiency interview test where available).

2) Completion of two interdisciplinary core courses:

   Government 341/Sociology 341: Modern European Society and Politics
   Spring 2000. 4 credits. J. Pontusson and D. Schirmer.

   Comparative Literature 311/Russian Literature 311/French Literature 315: Modern European Literature and Culture
   Fall 1999. 4 credits. G. Gibian.

Under certain conditions, students may be permitted to substitute other courses for those listed above.

3) Completion of one course in modern (post-1789) European history.

4) Two additional courses in any of the three areas, which may include a senior seminar (400 level).

   a) Courses in European and comparative politics, anthropology, sociology, women's studies, and related courses in the School of Hotel Administration, the College of Agriculture and Life Sciences, and the School of Industrial and Labor Relations.

   b) Courses in modern European history (post-1789).

   c) Courses in (post-1789) English and European literatures, comparative literature, semiotics, fine arts, architecture, music, philosophy, film and theatre arts, and women's studies.

Only two courses may be used to satisfy requirements for both the major and the concentration. Courses satisfying the breadth and distribution requirements in the College of

Arts and Sciences, however, *may* be applied to the concentration. Students interested in completing a research project under the European Summer Research Program may apply for The Wood Fellowship in their junior year. All concentrators are encouraged to participate in the Language House Program, and to spend a semester or more in a program of study in Europe. Courses taken abroad may be applied to the concentration if they are approved for Cornell credit.

Undergraduates in the College of Arts and Sciences can major in European Studies through the Independent Major or College Scholar programs.

Departmental advisers include: J. Borneman (Anthropology); C. Otto (Architecture); L. Abel (College Scholars, Independent Majors); S. Christopherson (CRP); G. Fields (Economics); D. Schwarz (English); I. Ezergailis (German Studies); J. Pontusson (Government); J. Weiss (History); M. Suner (Linguistics); C. Rosen (Modern Languages); N. Zaslaw (Music); S. Tarrow (Romance Studies); G. Gibian (Russian Literature); S. G. Tarrow (Sociology); D. Bathrick (Theatre Arts)

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 120 Uris Hall (telephone 255–7592, e-mail SRT2@cornell.edu).

Religious Studies

J. M. Law, director; B. Adams, C. M. Arroyo, K. Barzman, P. Becker, D. Boucher, R. Brann, R. G. Calkins, C. M. Carmichael, K. Clinton, J. Fajans, D. Fredericksen, J. W. Gair, D. Gold, S. Greene, K. Haines-Eitzen, J. S. Henderson, T. D. Hill, D. Holmberg, P. R. Hyams, J. J. John, C. V. Kaske, W. J. Kennedy, S. MacDonald, D. Mankin, K. S. March, D. McKenzie, C. Minkowski, R. L. Moore, D. I. Owen, J. R. Piggott, D. S. Powers, D. M. Randel, G. Rendsburg, J. S. Rusten, P. S. Sangren, D. R. Shanzer, M. Washington

The Religious Studies Program, an academic unit offering a major in the scholarly study of religion through the College of Arts and Sciences, offers a wide variety of courses. In addition to courses dealing with various approaches to and topics in the study of religion, we have integrated curricula within our program for in-depth studies of Judaism, Christianity, the Hindu tradition and Buddhism. We also offer an increasing number of courses on Islam.

The Religious Studies Program is designed to meet the needs of three classes of students: 1) students planning to pursue advanced degrees in the academic study of religion or allied disciplines or subdisciplines (history of religions, religion and literature, religion and psychology, ethics, theology, area studies, etc.); 2) students seeking courses on topics relating to religion to fulfill distribution requirements; and 3) those students desiring a more systematic exposure to the academic study of religion as a significant component of their liberal arts experience. To all students, our program offers an excellent opportunity to develop a deeper understanding and appreciation of the complex ways in which religious traditions, with their individual, communal, and doctrinal dimensions inform human thought and behavior. The courses offered through our program are informed by the established scholarly tradition of the study of religion as an academic, as opposed to confessional, pursuit. Religious traditions are explored in all of their complexity through comparative, contextual (in specific historical or cultural contexts) and thematic studies.

The program also hosts lecture series, conferences, symposia, and periodic social gatherings for faculty and students throughout the academic year to foster a sense of intellectual community among our students and faculty.

The Major in Religious Studies

Signing into the major: To sign into the major in Religious Studies, a student must have completed at least one course in Religious Studies prior to scheduling an appointment with the program director. Here is the process:

1) Schedule an appointment with Professor Jane-Marie Law, Director of Religious Studies; please contact her by e-mail: <jml16@cornell.edu>.

2) In addition to a copy of your current Cornell transcript (the informal one you regularly receive is acceptable), please bring to your meeting with Professor Law all of these forms, which are available in the Religious Studies office:

   a) a completed Religious Studies Major Application Form (available in Rockefeller 182)

   b) a proposed "Course of Study," which will be used as a guide in your conversation with the director and revised for formal submission to the program upon your entrance as a major

   c) a College of Arts & Sciences Advisor/Major form which will be signed by your advisor.

Advising in the Religious Studies Program: Upon entering the major in Religious Studies, a student is assigned a faculty advisor whose area of expertise most closely matches the proposed interest of the student. Students may propose a faculty member on their own, provided he or she is a current regular faculty member of the Religious Studies Program. An up-to-date advisor list is available in the Religious Studies office. Working closely with one's advisor when selecting courses is an important component of this program, enabling students to fulfill the requirements for the major while creating an integrated and coherent course of study out of our large number of multidisciplinary course offerings.

To graduate as a major in Religious Studies, a student must 1) complete with letter grades the program's two core courses, Religious Studies 101 "Understanding the Religions of the World" and Religious Studies 449 "History and Methods of the Academic Study of Religion" (these two core courses can not be waived); and 2) complete with letter grades eight additional courses approved for the major, at least four of them at the 300 level or above. The following specifications of this second requirement are designed to promote breadth (2a) and depth (2b) of study.

(2a) At least four of a major's eight additional courses are to be selected to ensure some familiarity with two (or more in special cases) different religious traditions or phenomena. These courses may be at the introductory or advanced levels, though depth work at the 300 level or above is advised. For example, "Introduction to Asian Religions" (Religious Studies 250) might lead a student to take "The Religious Traditions of India" (Religious Studies 351), and then combine these with two courses on Judaism, "Introduction to Ancient Judaism" (Religious Studies 244) and "Cultural History of Jews of Spain" (Religious Studies 239).

(2b) At least two of these eight additional courses are to be selected to ensure depth of coverage in one religion or one group of closely related religious traditions or phenomena. In the first illustrative case described above, the student might combine "The Religious Traditions of India" with "Tantric Traditions" (Religious Studies 347) or "Indian Devotional Poetry" (Religious Studies 348) to acquire a measure of specialist strength in the religions of India. Alternatively, that student might combine "Introduction to Asian Religions" with one or more courses dealing with Buddhism, such as "Chinese Buddhism" (Religious Studies 357) or "Japanese Buddhism" (Religious Studies 359), to develop an appropriate depth along a different dimension. No more than one of the courses chosen to meet requirement 2a may be used to satisfy requirement 2b. Routinely, survey courses (which are offered at the 100 and 200 levels) should be combined with tradition on geographically specific offerings at the 300 and 400 level to satisfy this aspect of the requirements.

To engage in the kind of focused study envisioned under 2b, a student will be expected to attain proficiency in a language other than English to gain access to relevant sources, primary or secondary. For example, a knowledge of Greek or Latin might be required for the study of Christianity (as well as Greek or Roman religions); of Hebrew or Aramaic for Judaism; of Arabic for Islam; of Sanskrit or Hindi for Hinduism; of Pali, Chinese or Japanese for Buddhism. Religious phenomena like shamanism or totemism, though less firmly rooted in literary traditions, have generated substantial bodies of important scholarship in French and German, and an undergraduate major concentrating in this area of Religious Studies should be equipped to make independent use of such material. Courses used to satisfy this foreign language proficiency requirement may not be applied to the course requirements described under 2a and 2b. Choice of language to fulfill this requirement is determined by the student in consultation with his or her adviser and is decided at the time the student enters the major.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences; a comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program, 182 Rockefeller Hall.

Graduating with Honors in Religious Studies:

GENERAL INFORMATION

1. **Eligibility.** 3.0 cumulative average and 3.5 average inside the major with no grade in the major below B-. Program Director notifies eligible candidates over the summer between the junior and senior years of eligibility.

2. **Honors Courses.** Candidates must sign into RELST 495 (Senior Honors Essay) for up to eight credits (two courses) for two semesters. This two-semester sequence is required. After the first term, an R in the transcript indicates that this course (usually for 8 credits) is a yearlong course. When the project is completed at the end of the second semester, the grade recorded counts for all eight credits. (The eight-credit limit is the result of the conviction/belief that earning more than eight credits for a single "piece" of your undergraduate education is unwise.)

   You submit your honors proposal (with and according to the program's instruction/cover sheet) to the Religious Studies administrator before the end of the spring term of your junior year. She/he then approves your signing into the honors courses.

3. **Honors Committee—3 faculty members.** While you are required to have three faculty members on your committee at the time of the submission of the final draft, we only require that two of them be identified when you submit your proposal. The three members should be:

   a. The professor who has agreed to work closely with you over the year and to be the supervisor/grader of your project is chair of the committee.

   b. Another knowledgeable faculty member

   c. Religious Studies major advisor

   Sometimes your advisor is the supervisor/chair. If that is the case, you need two additional knowledgeable professors for your committee of three.

   You may have faculty outside the College of Arts and Sciences on your committee or as the supervisor, but non-A&S faculty have no obligation to supervise projects for students not in their own colleges, so be properly grateful.

Courses Approved for the Major Sponsored by Religious Studies

RELST 101 Understanding the Religions of the World @ #
Fall. 3 credits. Required of Religious Studies majors. J. M. Law.
This course provides a dynamic introduction to the academic study of religion as an intellectual discipline through an overview of the world's major religious traditions including Hinduism, Buddhism, Taoism, Confucianism, Shinto (in Japan), Judaism, Christianity, and Islam. The focus for the fall of 1999 will be on religion and human rights (themes change annually). For each religious system, we will focus on 1) the dynamics of founding and promulgation; 2) core rituals, myths, doctrines, and texts; 3) changing understandings of community and identity; and 4) conceptions of the human-divine relationship, and its implications for peaceful interaction within and beyond the tradition's borders. To highlight our studies throughout the semester, we will explore how these themes of religious tradition get expressed through vibrant personal narratives—both oral and written. Representatives of many of the religions will address the class to discuss their lives in relationship to their religious tradition. Course work will include readings in primary source materials in translation and hands-on ethnographic work with local religious communities.

RELST 123–124 Elementary Biblical Hebrew I and II (also NES 123–124, JWST 123–124)
123, fall; 124, spring. 3 credits. Enrollment limited to 17 students. Y. Chen.

Fall. 4 credits. R. G. Calkins.
For description, see ART H 531.

Additional courses offered by cooperating departments may also be approved through petition for the major in Religious Studies. For details see the program director, Jane Marie Law, 125 Rockefeller Hall or e-mail her at jml16@cornell.edu.

Russian and East European Studies Major

J. Borneman (Anthropology); G. J. Staller (Economics); S. Beck (Field and International Studies Program); I. Ezergailis, D. Bathrick (German Studies); V. Bunce, M. Evangelista, S. Tarrow (Government); P. Holquist, W. M. Pintner (History); U. Bronfenbrenner (emeritus, Human Development and Family Studies); P. Carden, G. Gibian, N. Pollak, S. Senderovich, G. Shapiro (Russian Literature); W. Browne, S. Paperno (Slavic linguistics); S. Szelenyi (Sociology)

The major in Russian and East European studies has the following requirements:

1) Proficiency in Russian or an East European language with one additional advanced (300-level) language or literature course, **OR** qualification in an East European language **and** qualification in another language useful for research in the area.*

*These requirements, in the case of some languages, may require study abroad or coursework completed at another institution.

2) At least one course relating to Russia or Eastern Europe, at the 200 level or above, in four of the following five departments: Government, Economics, History, Russian Literature and Sociology. Appropriate courses offered in other departments may be substituted for one of the above courses with the consent of the major adviser.

3) At least three additional courses at the 300 level or above, all from one of the following three departments: Government, History (within the History Department courses may be at the 250 level or above), or Russian Literature. One of the three courses must be at the 400 level or above. The three courses must be approved by the major adviser in the department of concentration.

To apply for the major, students are directed to the Institute for European Studies (Slavic and East European Studies Program), 120 Uris Hall. Students should designate an adviser in the department where his or her work will be concentrated. Students are encouraged to study abroad and should discuss their plans with their advisers. For questions concerning the major or the honors program, students should consult with their major adviser or inquire at the Institute for European Studies.

Honors Program in Russian and East European Studies

I. Students entering the Russian and East European Studies Major Honors Program must have a cumulative average of at least 3.0, no grade below a B in courses connected with the major, and a cumulative average inside the major of at least 3.5. Students will form a special honors committee consisting of their major adviser and two other faculty members not necessarily from the Russian and East European area.

II. Honors candidates must complete an honors thesis project during the senior year. The topic should be developed and approved in consultation with their major adviser. Part of the research should include sources in Russian or an Eastern European language.

III. Students may earn a total of eight credits for the courses in the honors program and should register for the appropriate number in the department of their major adviser.

IV. Ordinarily, in the first term of the senior year, students who meet the prerequisites will do independent research and reading in a particular area under supervision of their major adviser.

V. In the second term of the senior year students will complete the honors project by a date set by the Slavic and East European Studies Program. Students should keep their committee members informed as their work progresses. Students will meet together with their whole honors committee to discuss the draft of the thesis or project and make recommendations for revision. When the project is completed, the committee will decide whether the project deserves honors, and, if so, after reviewing their academic record, will recommend students for a Bachelor of Arts *cum laude*, *magna cum laude*, or *summa cum laude*. The committee will also assign a grade for the honors research course.

Courses

COM L 311 Modern European Literature and Culture (also RUSS L 311 and FRLIT 315)
Spring. 4 credits.

COM L 367 The Russian Novel (also Russian Literature 367) #
Fall. 4 credits.

[COM L 381 Marxist Cultural Theory (also German Literature 381 and Government 372)
4 credits. Not offered 1999–2000.]

COM L 385 Reading Nabokov (also Russian Literature 385 and English 379)
Fall. 4 credits. Limited to 25.

[COM L 389 Contemporary Literature in Central and Eastern Europe (also Russian Literature 389)
Fall. 4 credits. Not offered 1999–2000.]

[CZECH 131–132 Elementary Czech
Not offered 1999–2000.]

[CZECH 133–134 Continuing Czech
Not offered 1999–2000.]

ECON 370 Socialist Economies in Transition
Fall or spring.

ECON 381 Economics of Participation and Workers' Management
Fall or spring. 4 credits.

ECON 382 The Practice and Implementation of Self-Management
Fall or spring. 4 credits.

ECON 471 The Economies of Central Europe and of the Former Soviet Union: From Central Planning to Markets
Fall or spring. 4 credits.

ECON 472 Comparative Economic Systems: East and West
Fall or spring. 4 credits.

[GERST 376 Contemporary Soviet Latvian Literature
Fall. 4 credits. Taught in Latvian. Not offered 1999–2000.]

[GERST 377 Baltic Literature
Fall. 4 credits. Not offered 1999–2000.]

[GERST 381 Marxist Cultural Theory (also Comparative Literature 381 and Government 372)
4 credits. Not offered 1999–2000.]

GOVT 231 Introduction to Comparative Government and Politics
Spring. 4 credits.

[GOVT 325 Government and Politics of Eastern Europe
4 credits. Not offered 1999–2000.]

[GOVT 333 Government and Politics of the Former Soviet Union
Fall. 4 credits. Not offered 1999–2000.]

GOVT 341 Modern European Society and Politics (also SOC 341)
Fall. 4 credits.

GOVT 342 The New Europe
Spring. 4 credits.

GOVT 350 Comparative Revolutions
Spring. 4 credits.

[GOVT 376 Rethinking Marx
4 credits. Not offered 1999–2000.]

GOVT 394 Comparative Foreign Policy
Spring. 4 credits.

[GOVT 399 International Relations of the Former Soviet Union
Fall. 4 credits. Not offered 1999–2000.]

[GOVT 445 Stalinism as Civilization (also History 478)
4 credits. Not offered 1999–2000.]

GOVT 491 Conflict, Cooperation, and Norm: Ethnical Issues in International Affairs
Fall. 4 credits.

[GOVT 657 Comparative Democratization
4 credits. Not offered 1999–2000.]

GOVT 660 Social Movements and Contentious Politics
Fall. 4 credits.

[GOVT 669 Modern Social Theory I
4 credits. Not offered 1999–2000.]

GOVT 670 Modern Social Theory II
Spring. 4 credits.

[HIST 242 Europe Since 1789 #
4 credits. Not offered 1999–2000.]

HIST 252 Russian History to 1800 #
Fall. 4 credits.

HIST 253 Russian History Since 1800 #
Spring. 4 credits.

HIST 290 Twentieth-Century Russia and the Soviet Union
Spring. 4 credits.

[HIST 352 The End of the Austro-Hungarian Monarchy, 1848–1919
4 credits. Not offered 1999–2000.]

[HIST 379 The First World War: Causes, Conduct and Consequences
4 credits. Not offered 1999–2000.]

HIST 383 Europe 1900–1945
Fall. 4 credits.

[HIST 384 Europe, 1945–1968
Fall. 4 credits. Not offered 1999–2000.]

HIST 385 Europe in the 20th Century: 1968–1990
Spring. 4 credits.

[HIST 410 Russia in the Age of Total War and Revolution
4 credits. Not offered 1999–2000.]

[HIST 415 The United States and Russia, 1780–1914 #
4 credits. Not offered 1999–2000.]

[HIST 478 Stalinism as Civilization (also GOVT 445)
4 credits. Not offered 1999–2000.]

HIST 490 Empire, State and Nation in Russian and Soviet History
Spring. 4 credits.

HIST 677 Seminar in Russian History
Fall. 4 credits.

HIST 678 Seminar in European Political History
Spring. 4 credits.

[HUNGR 131–132 Elementary Hungarian
3 credits. Not offered 1999–2000.]

[ILRIC 331 Comparative Industrial Relations Systems: Non-Western Countries
3 credits. Not offered 1999–2000.]

[ILRCB 606 Theories of Industrial Relations Systems
3 credits. Not offered 1999–2000.]

LING 671–672 Comparative Slavic Linguistics
671, fall; 672, spring. 4 credits each term.

POLSH 131–132 Elementary Polish
131, fall; 132, spring. 3 credits each term.

[POLSH 133–134 Continuing Polish
133, fall; 134, spring. 3 credits each term. Not offered 1999–2000.]

[ROMAN 131–132 Elementary Romanian
131, fall; 134, spring. 3 credits. Not offered 1999–2000.]

[ROMAN 133–134 Continuing Romanian
133, fall; 134, spring. 3 credits. Not offered 1999–2000.]

RUSSA 103–104 Conversation Practice
103, fall; 104, spring. 2 credits each term.

RUSSL 105 Freshman Writing Seminar: Twentieth-Century Russian Literary Masterpieces
Fall. 3 credits.

RUSSA 121–122 Elementary Russian
121, fall or summer; 122, spring or summer. 4 credits each term.

RUSSA 123 Continuing Russian
Fall. 4 credits.

RUSSL 201–202 Readings in Russian Literature #
201, fall; 202, spring. 3 credits each term. G. Shapiro.

RUSSA 203–204 Intermediate Composition and Conversation
203, fall, spring, or summer; 204, spring. 3 credits each term.

RUSSA 205–206 Reading Russian Press
205, fall; 206, spring. 2 credits each term.

RUSSA 207–208 Russian Phonetics for Beginners
207, fall; 208, spring. 2 credits.

RUSSL 207 Themes from Russian Culture I #
Not offered 1999–2000.]

[RUSSL 208 Themes from Russian Culture II
Spring. 3 credits. Not offered 1999–2000.]

[RUSSA 301–302 Advanced Russian Grammar and Reading
Not offered 1999–2000.]

RUSSA 303–304 Advanced Composition and Conversation
303, fall; 304, spring. 4 credits each term.

RUSSA 305–306 Directed Individual Study
305, fall; 306, spring. 2 credits each term.

RUSSA 309–310 Advanced Reading
309, fall; 310, spring. 4 credits.

RUSSL 200 The Russian Connection #
Spring. 4 credits.

[RUSSL 331 Introduction to Russian Poetry #
Fall. 4 credits. Not offered 1999–2000.]

[RUSSL 332 Russian Drama and Theatre (also Theatre Arts 332)
Fall. 4 credits. Not offered 1999–2000.]

[RUSSL 333 Twentieth-Century Poetry
Spring. 4 credits. Not offered 1999–2000.]

[RUSSL 334 The Russian Short Story #
Fall. 4 credits. Not offered 1999–2000.]

[RUSSL 335 Gogol #
Fall. 4 credits. Not offered 1999–2000.]

RUSSL 367 The Russian Novel #
Fall. 4 credits.

RUSSL 368 Russian Literature From 1917 to the Present
Fall. 4 credits.

[RUSSL 373 Chekhov in the Context of Contemporary European Literature and Art (also Comparative Literature 395) #
Fall. 4 credits. Not offered 1999–2000.]

[RUSSL 385 Reading Nabokov (also CompL 385 and English 379)
Spring. 4 credits. Not offered 1999–2000.]

[RUSSL 389 Contemporary Literature in Central and East Europe (also Comparative Literature 389)
Fall. 4 credits. Not offered 1999–2000.]

[RUSSL 390 The Power of Nationalism: Expressions of National Feelings in Politics, Literature, History, and the Arts (also Comparative Literature 390)
Fall. 4 credits. Not offered 1999–2000.]

[RUSSL 393 Honors Essay Tutorial
Fall and spring. 8 credits. Not offered 1999–2000.
Must be taken in two consecutive semesters in the senior year. Credit for the first semester will be awarded upon completion of the second semester. For information, please see the Director of Undergraduate Studies.]

[RUSSA 401–402 History of the Russian Language
401, fall; 402, spring. 4 credits each term. Not offered 1999–2000.]

RUSSA 403–[404] Linguistic Structure of Russian
403, fall; [404, spring]. 4 credits. 404 not offered 1999–2000.

[RUSSA 407–408 Russian Phonetics
407, fall; 408, spring. Not offered 1999–2000.]

RUSSA 409 Teaching Russian as a Foreign Language
Fall or spring. 1 credit.

[RUSSL 409 Russian Stylistics
Fall. 4 credits. Not offered 1999–2000.]

RUSSA 413–414 Advanced Conversation and Stylistics
413, fall; 414, spring. 2 credits each term.

RUSSL 430 Practice in Translation
Spring. 4 credits.

[RUSSL 431 Contemporary Russian Prose
Spring. 4 credits. Not offered 1999–2000.]

[RUSSL 432 Pushkin #
Spring. 4 credits. Not offered 1999–2000.]

RUSSL 445 Batiushkov and Pasternak
Fall. 4 credits.

RUSSL 460 Short Works of Tolstoy and Dostoevsky
Spring. 4 credits.

RUSSL 491 Reading Course: Russian Literature in the Original Language
Fall or spring. 1 credit.

RUSSL 492 Supervised Reading in Russian Literature
Fall or spring. 1–4 credits each term.

[RUSSL 498 Russian Symbolism
4 credits. Not offered 1999–2000.]

[RUSSA 601 Old Church Slavonic
Fall. 4 credits. Not offered 1999–2000.]

[RUSSA 602 Old Russian Texts
Spring. 4 credits. Not offered 1999–2000.]

[SEBCR 131–132 Elementary Serbo-Croatian
131, fall; 132, spring. 3 credits each term. Not offered 1999–2000.]

SEBCR 133–134 Continuing Serbo-Croatian
133, fall; 134, spring. 3 credits each term.

SOC 230 Knowledge and Power
3 credits.

[SOC 360 State and Society in Comparative Perspective
3 credits. Not offered 1999–2000.]

[SOC 365 Comparative Perspectives on Socialist Societies and Economics
4 credits. Not offered 1999–2000.]

[SOC 366 Transitions From State Socialism
Spring. 4 credits. Not offered 1999–2000.]

SOC 510 Comparative Societal Analysis
Fall. 4 credits.

[THETR 322 Russian Drama and Theatre (also Russian Literature 332)
4 credits. Not offered 1999–2000.]

[THETR 335 Modern and Contemporary Theatre (also Comparative Literature 337)
Spring. 4 credits. Not offered 1999–2000.]

THETR 378 Russian Films of the 1920s and French Films of the 1960s
Spring. 4 credits.

[THETR 662 Russian Drama and Theatre (also Russian Literature 632)
4 credits. Not offered 1999–2000.]

[UKRAN 131–132 Elementary Ukrainian
131, fall; 132, spring. 3 credits each term. Not offered 1999–2000.]

Science of Earth Systems

R. Allmendinger, W. Allmon, W. Bassett, J. Bird, L. Brown, L. Cathles, J. Cisne, L. Derry, C. Greene, B. Isacks, T. Jordan, S. Kay, R. Kay, D. Turcotte, W. White (Geological Sciences); P. Baveye, S. Colluci, K. Cook, W. Knapp, S. Riha, D. Wilks, M. Wysocki (Soil, Crop and Atmospheric Sciences); W. Brutsaert (Civil and Environmental Engineering); L. Hedin, R. Howarth (Ecology and Systematics); P. Gierasch (Astronomy); M. Kelley (Electrical Engineering); J.-Y. Parlange (Agricultural and Biological Engineering); J. Yavitt (Natural Resources).

The Science of Earth Systems (SES) is the study of the interactions between the atmosphere, oceans, biosphere, and solid Earth; these dynamic interactions control the global environment. The interdisciplinary approach of SES incorporates major components of geology, ocean and atmospheric sciences, terrestrial hydrology, biogeochemistry, and ecology into an integrated study of Earth as a complex system. Earth system science presents one of the outstanding intellectual challenges in modern science and is the primary foundation for the future management of our home planet.

The Major

The major in Science of Earth Systems emphasizes a rigorous, objective study of the Earth and its systems with broad preparation in basic sciences and mathematics, followed by the choice of an area of concentration for study in greater depth. The Science of Earth Systems program seeks to train students in a strong set of fundamental skills that will allow them to approach with quantitative rigor a wide range of questions about the Earth and its environment, and to adapt those skills rapidly to new areas of inquiry as they arise. The major in Science of Earth Systems is by nature interdisciplinary, and involves faculty from the College of Arts and Sciences, the College of Engineering, and the College of Agriculture and Life Sciences. In the College of Arts and Sciences the program is administered by the Department of Geological Sciences in collaboration with the Departments of Astronomy, Ecology and Evolutionary Biology.

The SES curriculum begins with a series of courses designed to provide preparation in fundamental science and mathematics necessary for a rigorous study of Earth Systems. This preparation is followed by three core courses providing breadth and integration. An additional set of four intermediate to advanced courses are selected to provide depth and a degree of specialization.

Students in the College of Arts and Sciences choosing to pursue the Science of Earth Systems major are required to take the following courses: PHYS 207–208 (or 112–213), CHEM 207–208, BIOSCI 101/103–102/104 (or 109–110), and MATH 111–112 (or 121–122, or 191–192). Three additional 3–4 credit hour courses in mathematics, physics, chemistry, or biology are required; these additional courses must require one or more of the basic courses listed above as a prerequisite. One of the courses must be either GEOL 201 or BIOES 261. Both GEOL 201 and BIOES 261 can be chosen. Mathematics at the level of MATH 221 or 293 is strongly recommended for all SES students, and those choosing areas of concentration in Atmospheric Sciences, Environmental Geophysics, or Hydrology should take MATH 222 or 294.

The four required SES core courses include the following:

SES 301 (ASTRON 331, SCAS 331) Climate Dynamics

SES 302 (GEOL 302, SCAS 332) Evolution of the Earth System

SES 321 (GEOL 321,NATRES 321) Biogeochemistry

These courses are described in the section entitled "Interdisciplinary Centers, Programs, and Studies" at the beginning of the catalog. Twelve additional credit hours selected from 300- and 400-level courses approved by the SES Committee are required. These courses will ordinarily be organized around one of the SES areas of specialization. The areas of specialization currently include the following:

Climate Dynamics, the study of physical and chemical processes producing Earth's weather and climate;

Ocean Sciences, the study of the biological, chemical, and physical processes at work in the ocean (see "Courses in Marine Sciences" on p. 163);

Hydrological Sciences, the study of the interactions of rock, water, snow, and ice on Earth's land surfaces;

Biogeochemistry, study of element cycling near Earth's surface and how organisms both mediate and benefit from these fluxes;

Environmental Geology and Geophysics, remote sensing, field and laboratory measurements of Earth's surface and subsurface applied to the study of the environment, global change, and natural hazards;

Earth in Space, Earth's ionosphere and exosphere, solar-terrestrial interactions, and earth as a planet.

Further information and applications contact B. Isacks, 255–2307, bli1@cornell.edu or R. Kay, 255–3461, rwk6@cornell.edu. Also see the SES website at ***http://www.geo.cornell.edu/geology/ses_arts.html*** for up-to-date information. Administrative offices are located at 2120 Snee Hall.

Society for the Humanities

Dominick LaCapra, Director

Fellows for 1999–2000

Charles Brittain (Cornell University)

Laura Brown (Cornell University)

Shai Burstyn (Tel-Aviv University)

Eric Cheyfitz (University of Pennsylvania)

Sandra Greene (Cornell University)

Arthur Groos (Cornell University)

Jason Hill (Southern Illinois University)

Kobena Mercer (New York University)

Frederick Neuhouser (Cornell University)

Norie Neumark (University of Technology, Sydney)

John Ricco (Texas Tech University)

Mark Sanders (Barnard College)

Daniel Usner (Cornell University)

Priscilla Wald (University of Washington)

Janet Wolff (The University of Rochester)

The Society annually awards fellowships for research in the Humanities. The Fellows offer, in line with their research, informal seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students, suitably qualified undergraduates, and interested auditors. Students who want credit for a seminar should formally register in their own college. Persons other than those officially enrolled may attend as visitors with permission of the Fellow. The theme for 1999–2000 is: Points of Contact.

SHUM 301 Mind and Memory (also English 301, Music 372, and Theatre, Film, and Dance 301)

Spring. 4 credits. M W 2:55–4:10.
D. Ackerman.

Creativity is the attribute of the mind that enables us to make new combinations from often unfamiliar information, to perceive analogies and other linkages in seemingly unlike elements, to seek for syntheses. As is true of all learning, creativity is dependent upon memory—a memory that is genetic and social as well as personal and experiential. This course will explore the nature of creativity in science and art, indicating the differing requirements for discovery in the disparate disciplines while demonstrating the commonality that underlies the creative process and binds physicist and mathematician to poet, composer, visual artist.

The opening sessions will be concerned with the crucial role of memory in learning, discovery, and spiritual insight for all humans, and will make reference to recent scientific research into the complex nature of the human brain, including the intimate connections with the rest of the body. Following the introduction, the course will rely on weekly guests from as many disciplines in the arts and sciences as possible, faculty members who will discuss the process underlying their research, or their work as creative or performing artists.

Members of this course are encouraged to enroll in another course or be engaged in an activity in which the insights gained in this class can be applied or tested. To further abet the active participation so necessary to learning, students will be asked to keep a journal, one that summarizes their understanding of, and response to, each presentation by a guest lecturer. This journal will serve as a continuing record of their experiences as members of the course and will become the basic resource for an essay, to be submitted at the semester's end. It will give their carefully considered assessment of the applicability of the what they have learned in this course to a second course or activity, to their own mental processes, and to the future they propose for themselves.

S HUM 402 Augustine's *Confessions*: Memory and the Self (also Classics 405, Comparative Literature 400, Religious Studies 402)

Fall. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25.
C. Brittain.

Augustine's *Confessions* record the strange story of his conversion to or rediscovery of God under the stimulus of the letters of Paul and the pagan philosophy of Plotinus. The *Confessions* interpret his conversion as an act of memory or self-investigation which culminates in a Platonist philosophical vision of the divine at the limits of the self; the work itself is written as a self-conscious act of memory (or self-investigation); it also contains a theoretical analysis of memory (Book X). This course will study Augustine's conception of memory as the source of the self and the bridge from the self to the divine, and its origins in Greek philosophy, Latin rhetorical theory, and individual experience.

S HUM 403 Augustine's Dialogues on the Soul (also Classics 406, Comparative Literature 424)

Spring. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25.
C. Brittain.

Augustine's first works after his conversion were a series of Christian philosophical dialogues, modeled on the exemplary works of Cicero. The dialogues exploit the Platonist conception of the soul Augustine found in the works of Plotinus: its immateriality (*On the quantity of the soul*), its intellectual capacities (*Against the Academics*), its immortality (*On the immortality of the soul*), and its relation to God (*The Soliloquies*). But these texts are not simple translations of Greek philosophy into the pre-existing mold of the Latin dialogue; they represent Augustine's appropriation of the 'pagan' cultures of Greece and Rome for a new intellectual vision of Christianity. This course will examine Augustine's fusion and transformation of both the philosophical sources and the literary forms which provoked these powerful and conceptually rich dialogues.

S HUM 404 The European as Other (History 443)

Fall. 4 credits. Limited to 15 students. Permission of instructor. W 2:30–4:25.
S. Greene.

Much has been written about European images of African men, African women and African cultural practices during the 18th, 19th and 20th century, but how did Africans view Europeans during these periods? How did these images influence the ways Africans saw themselves and how did these images change over time? These questions and others will be explored in this course by examining a variety of historical, literary and anthropological texts.

S HUM 405 Operatic Contacts (also Theatre, Film, and Dance 405, Music 405, Comparative Literature 408, German Studies 404)

Fall. 4 credits. Limited to 15 students. Permission of instructor. T 10:10–12:05.
A. Groos.

This seminar begins with representative contacts involving other nations, races, and cultures in operas such as Verdi's *Aida*, Bizet's *Carmen*, and Puccini's *Madama Butterfly*. It then explores their post-colonial transformations, ranging from cinematic appropriations (*Carmen*), shifts from colonizer to colonized (Sessions, *Montezuma*), the repatriation and decolonization of *Madama Butterfly* in Japanese theatre, or the mapping of sexual politics onto race (*M. Butterfly*). Discussions involve text (in English translation) and music. Ability to read music will be helpful but is not required.

S HUM 406 Subjectivity and the Other I (also Philosophy 415)

Fall. 4 credits. Limited to 15 students. Permission of instructor. M 12:20–2:15.
F. Neuhouser.

This seminar examines various forms of the idea that interactions with "the other" (i.e., with other subjects) are essentially involved in the constitution of subjectivity. It will focus on the ways in which contact with the other is essential to reason, morality, freedom, and personal identity, as well as to alienation and self-tyranny. Readings will include: Rousseau on self-love and its connection to autonomy; Hegel's account of the master-slave relation and the unhappy consciousness; Sartre's view of the other as a threat to subjectivity; and de Beauvoir's portrayal of woman as the other and her attempt to unite autonomous subjectivity with being an object for others.

S HUM 408 Contemporary Native American Literature (also English 410)

Fall. 4 credits. Limited to 15 students. Requirements: one seminar presentation, a final paper of 20–25 pages, and regular attendance. Permission of instructor.
R 12:20–2:15. E. Cheyfitz.

Contemporary Native American Literature and its Contexts: this course will look at Native American writing in the genres of fiction, poetry and non-fiction from the 1960s to the present with a particular emphasis on the social, political, and historical contexts that this writing articulates. Writers to be read will be taken from a list that, among others, includes M. Scott Momaday, Vine Deloria Jr., Janet Campbell Hale, Elizabeth Cook-Lynn, James Welch, Gerald Vizenor, Leslie Marmon Silko, Linda Hogan, Simon Ortiz, Luci Tapahonso, Louise Erdrich, Diane Glancy, Adrian Louis, Wendy Rose, Joy Harjo, Paula Gunn Allen, and Sherman Alexie.

S HUM 409 Cosmopolitanism and The Self (also Philosophy 442)

Fall. 4 credits. Limited to 15 students. Permission of instructor. T 12:20–2:15.
J. Hill.

This seminar philosophically examines the racial and ethnic tribal identities on which contemporary selves are predicated. As a plausible antidote to problems spawned by tribalism, we will examine the possibility of a moral cosmopolitan identity. Readings will be drawn from the Ancient and Enlightenment cosmopolitans as well as contemporary texts which aim to deconstruct the concept of race.

S HUM 410 Visual Studies in the Diaspora (also Comparative Literature 433, History of Art 410)

Fall. 4 credits. Limited to 15 students. Permission of instructor. W 2:30–4:25.
K. Mercer.

This course examines the formative role of visual representation in modern conceptions of 'race' and investigates diaspora-based art practices shaped by these social conditions. From 19th century colonialism through 20th century modernism, we consider the gaze, the stereotype, cultural hybridity and institutional policy in relation to the Harlem Renaissance, the Caribbean Artists Movement and contemporary debates on New Internationalism.

S HUM 415 Slavery and the Idea of Race in Early Modern England (also English 440, English 640)
Spring. 4 credits. Limited to 15 students. Permission of instructor. T 10:10–12:05. L. Brown.
This course considers the relation between the development of the modern idea of race and the economic exploitation of slavery in the first era of English imperial expansion. As an introduction to the topic, we will canvass important modern statements on the subject, including those of David Brion Davis, Ivan Hannaford, and Robin Blackburn. The readings will center on literary texts about slaves and slavery, including writings by ex-slaves in the Afro-British tradition of the late eighteenth century. But we will also explore materials from narratives of Caribbean travel and slave rebellion, anecdotes about freed slaves and slave punishments from contemporary magazines, and biological works on the classification of humans and other animals. Texts will include: Aphra Behn, *Oroonoko*; John Stedman, *Narrative of a Five Years Expedition Against the Revolted Negroes of Surinam*; Janet Schaw, *Journal of a Lady of Quality*; Olaudah Equiano, *Narratives of the Life*; Ignatius Sancho, *Letters of the Late Ignatius Sancho*; Ottobah Cugoano, *Thoughts and Sentiments on the Evil of Slavery*; Edward Long, *The History of Jamaica*; Charlottes Dacre, *Zofloya or the Moor*.

S HUM 416 Subjectivity and the Other II (also Philosophy 415)
Spring. 4 credits. Limited to 15 students. Permission of instructor. M 12:20–2:15. F. Neuhouser.
This seminar continues and expands the themes of its predecessor with special attention to the role played by the other in certain (loosely speaking) psychological theories of selfhood. Topics will include: G. H. Mead on the importance of social roles to selfhood; Nietzsche on guilt, enslavement, and resentment; Freud's theory of neuroses, narcissism, and the therapeutic relation between analyst and analysand; and Kristeva's view of the other as internal to each of us.

S HUM 417 Spanish Borderlands and French Frontiers in American History (also History 487)
Spring. 4 credits. Limited to 15 students. Permission of instructor. R 10:10–12:05. D. Usner.
This seminar will explore how non-English colonial regions of North America—places like Florida, Louisiana, and California—have been represented in American history and culture. Through a critical examination of historical and popular texts, literature, folklife studies, and films, students will trace the role played by imagery of French and Spanish provinces in the production of nationalist, regionalist, and ethnic narratives.

S HUM 418 Exploring the Israeli Folksong (Music 418)
Spring. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25. S. Burstyn.
The rich song repertory composed, sung and danced in Palestine/Israel between roughly 1930 and 1960 will be approached in this seminar as a multifaceted cultural phenomenon. Through listening, reading and analysis we shall explore the eclectic nature of the Israeli folksong, its canon formation, dissemination, and complex oral and printed traditions. Course requirements: one research paper.

S HUM 419 Noisy Hybrids
Spring. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25. N. Neumark.
This seminar explores points of contact between theory and art/practice, through theoretical and historical texts and new media and sound art works. Sound Studies is introduced as a hybrid discipline: what analyses of 'noise' does it offer and how do they inflect/distort debates on corporeality, subjectivity and translation? Questions of cultural diversity and alterity reverberate through the seminar.

S HUM 420 Testimony, Law, Literature (also English 442)
Spring. 4 credits. Limited to 15 students. Permission of instructor. M. Sanders.
In this seminar, we will explore ways in which testimony hinges literature and law, and how the study of testimony makes sense of the origins of literatures, and brings to light the cultural and aesthetic roots and boundaries of legal systems and procedures. Using slave narrative, Holocaust survivor narrative, *testimonio*, and other collaborative testimonial literature, as well as the public hearings of South Africa's Truth and Reconciliation Commission as our primary source material, we will consider such issues as: truthfulness in testimony and confession; mourning, trauma and witnessing; the ethics of testimonial collaboration and advocacy. Requirements: one research paper, one presentation, and regular attendance.

S HUM 421 Contagion, Americanism, and Social Control
Spring. 4 credits. Limited to 15 students. Permission of instructor. P. Wald.
This course will explore the language of contagion as it surfaced in fiction, journalism, medicine and sociology at the turn of the twentieth century. We will attend both to its central role in defining "Americanism" and in negotiating the changing demographics brought about by immigration, urbanization and imperialism and to the differences among the genres and disciplines in that negotiation. We will study both a cultural phenomenon (and moment) and a variety of methodologies and lines of inquiry. The object of the course is to track a set of assumptions from their origin in scientific discovery (bacteriology) through their development in changing ideas about culture and contact to their consequences for historical and contemporary understanding of and attempts to regulate social interactions. There will be a required seminar paper.

S HUM 423 Modernism and the Sociology of Art
Spring. 4 credits. Limited to 15 students. Permission of Instructor. Time TBA. J. Wolff.
The seminar will focus on art in Britain and the US in the period 1900 to 1930. The principal objective will be to address the meaning of the term "the painting of modern life" (Baudelaire and T. J. Clark)—that is, what it might mean to claim that a certain style of painting is representative of a particular social and historical moment. The assumption that modernism is the art of modernity will be challenged, or at least explored critically. At stake is the question of the possibility of a sociology of art. A major theoretical project for the seminar, therefore, will be to address the development in the past two decades of three separate but necessarily related fields: cultural studies, the sociology of art and culture, and the "new art history." The opposition of two aesthetic regimes-modernism and realism- will be examined in terms of institutions and social relations, as well as art-critical and aesthetic discourses. For example, the case of the Whitney Studio Club, and its preponderance of Aschan-style artists, will be considered in relation to the simultaneous rise of European-influenced avant-garde art in New York, and its institutional and social supports. In the case of England, the engagement in art practice inspired by Cubism and Futurism will be discussed in relation to intellectual and cultural life more generally in the 1910s and 1920s, and also in connection with the particular location and cultural production of immigrant and Jewish artists. As a conceptual and theoretical preparation for this discussion, the seminar will read texts on 'the stranger'—in general, in modern society, and in relation to ethnicity, gender, and nation-building. Consideration of the post-1950 success of modernism (and especially abstraction) will take up two later sessions, focusing particularly on the case of the artist R. B. Kitaj and the meaning of the hostile response to his 1994 retrospective at the Tate Gallery.

SHUM 450 Unbecoming Community
Spring. 4 credits. Time TBA. Limited to 15 students. Permission of instructor. J. Ricco.
This seminar will examine the work of a number of contemporary philosophers and social theorists who take community to be necessarily irresolvable, incomplete, and perhaps even impossible, and who locate its criticality in this very "failure" (Nancy, Blanchot, Agamben, Golding, Bersani, and Haver, et.al.) Unbecoming community might be what Georges Bataille meant when he spoke of "the community of those who do not have a community." Rather than force a negative or positive evaluation of this condition, we too shall treat community as an ethico-political question in its own right, and one that requires new ways of thinking about collective forms of sociality. We will consider anonymity, illegality, imperceptibility, itinerancy, proximity, and inconsolability, as some of the forces that make community unbecoming.

SHUM 489 Tales of the Heike (also Asian Studies 490 and History 490)
Fall. 4 credits. Permission of instructor. T 2:30–4:25. K. Brazell and J. Piggot.

SHUM 495 Opera, History, Politics, Gender (also History 456)
Spring. 4 credits. W 2:30–4:25. M. Steinberg and S. Stewart.

South Asia Program

C. Minkowski, director; A. Basu, K. Basu, D. Bor, D. Boucher, R. Colle, L. Derry, C. Fairbanks, S. Feldman, J. Gair, D. Gold, D. Henderson, R. Herring, D. Holmberg, R. Kanbur, M. Katzenstein, V. Kayastha, K. A. R. Kennedy, S. Kuruvilla, B. Lust, B. G. MacDougall, M. Majumdar, K. March, K. McGowan, S. Mohanty, V. Munasinghe, A. Nussbaum, S. Oja, P. Olpadwala, B. Perlus, T. Poleman, N. Sethi, D. Sisler, S. Subramanian, D. Sudan, N. Uphoff, M. Walter

The South Asia Program coordinates research, teaching, and special campus events relating to Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program faculty includes members from a variety of disciplines, including agricultural economics, agricultural engineering, anthropology, architecture, art, city and regional planning, communication, comparative religion, ecology and systematics, economics, English, government, history, history of art, human ecology, industrial and labor relations, international agriculture, linguistics, literature, rural sociology, and science, technology, and society. Undergraduates with a special interest in the region may major in Asian studies with a South Asia concentration, or complete a South Asia concentration with any other major. Graduate students may pursue the M.A. degree in Asian Studies with a concentration in South Asia. Languages offered are Bengali, Hindi, Nepali, Sinhala, Urdu, Sanskrit, and Pali. Foreign Language Area Studies Fellowships are available to Cornell graduate students who are U.S. citizens. Cornell is a class A member of the American Institute of Indian Studies (AIIS), and undergraduates as well as graduate students are eligible for AIIS intensive language program fellowships in India. For courses available in South Asian studies and details on the major, see the Department of Asian Studies listing in this volume.

Students who want further information on courses and research opportunities should direct questions to the program office, 170 Uris Hall.

Southeast Asia Program

T. Chaloemtiarana, director; B. R. Anderson, W. B. Bailey, A. C. Cohn, P. Gellert, M. F. Hatch, S. Kuruvilla, T. Loos, K. M. McGowan, A. Riedy, J. T. Siegel, E. Tagliacozzo, K. W. Taylor, E. Thorbecke, L. Williams, J. U. Wolff, D. K. Wyatt Emeritus: R. Baker, R. B. Jones, G. McT. Kahin, S. J. O'Connor, O. W. Wolters.

Southeast Asia studies at Cornell is included within the framework of the Department of Asian Studies. Seventeen core faculty members in the colleges of Arts and Sciences, Business and the Johnson Graduate School of Management, the School of Industrial and Labor Relations, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. In addition, lecturers and other faculty provide language and area instruction on Southeast Asia. Courses are offered in such fields as anthropology, Asian studies, economics, finance, government, history, history of art, labor relations, linguistics, music, and rural sociology. Instruction is also offered in a wide variety of Southeast Asian languages: Burmese, Cambodian (Khmer), Cebuano (Bisayan), Indonesian, Javanese, Tagalog, Thai, and Vietnamese, for which Foreign Language Area Studies Fellowships are available to U.S. citizens. The formal program of study at Cornell is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar and concerts of the Gamelan Ensemble. The George McT. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities related to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this region in America.

Undergraduates may major in Asian studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asia studies by completing 18 credits of course work. Graduate students may work toward an M.A. degree in Southeast Asian studies or pursue a Master of Professional Studies in another school with a concentration in Southeast Asian studies. Ph.D. students specializing in Southeast Asia receive a doctorate in a discipline such as history, art history, anthropology, government, music, eocnomics, or city and regional planning.

Additional information is available on the Internet at: http://www.einaudi.cornell.edu/southeastasia. Inquires for further information should be directed to the program office, 180 Uris Hall.

Statistical Science Department

The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the section, "Interdisciplinary Centers, Programs, and Studies," in the front of this catalog.

Women's Studies Program

Shirley Samuels, director; J. E. Gainor, director of undergraduate studies; D. Castillo, director of graduate studies; L. Abel, K. Abrams, A. Adams, N. Assie-Lumumba, K. Barzman, P. Becker, D. Bem, S. Bem, J. Bemstock, L. Beneria, A. Berger, F. Blau, L. Bogel, M. Brinton, L. Brown, J. Brumberg, W. Burkard, D. Castillo, C. Chase, M. Clarkberg, B. Correll, E. DeLoughrey, I. DeVault, J. Farley, S. Feldman, T. Fishel, J. Fortune, S. Friedman, N. Furman, J. E. Gainor, J. Ginsburg, S. Greene, E. Hanson, K. Haines-Eitzen, N. Hirschmann, M. Hite, P. Hyams, B. J. Isbell, M. Jacobus, J. Jennings, M. Katzenstein, C. Lazzaro, U. Liebert, T. Loos, K. March, S. McConnell-Ginet, K. McCullough, M. Migiel, M. B. Norton, J. Peraino, C. Raver, J. Reppy, M. Rossiter, R. Ruggles, S. Samuels, R. Savin-Williams, R. Schneider, A. M. Smith, M. Steinberg, M. C. Vallois, A. Villerajo, M. Washington, R. Weil, B. Wejnert, J. Whiting, L. Williams.

Introduction to the Program

Women's Studies is an interdisciplinary program that seeks to deepen understanding of women's lives, culture, and history, in all their complex multiplicities. Transformative as well as additive, women's studies challenges us to re-examine much of what we think we already know by providing an intellectual—and critical—feminist framework through which to view the many interconnections among gender, knowledge, and power. Thus, central to the curriculum in women's studies are such overarching notions as these:

(a) that definitions of gender—including those that privilege exclusive heterosexuality—are not natural or universal but are instead social constructions that vary across time and place, serve political ends, and have ideological underpinnings;

(b) that systems of gender inequality interact with other social inequalities, including those of class, race, ethnicity, sexual preference, and Western vs. non-Western cultures; and

(c) that even the most current knowledge derived from the humanities, social sciences, and natural sciences is not as impartial, objective, or neutral as has traditionally been thought but instead emerges out of particular historical and political contexts.

Although all Women's Studies courses except writing seminars count toward the major, they do not all satisfy distribution requirements or count toward the total hours required in Arts and Sciences; if a course is not cross-listed with another Arts and Sciences department, be sure to check with college offices about whether it will satisfy distribution or our requirements for Arts and Sciences.

Program Offerings

The Women's Studies Program offers an undergraduate major, an undergraduate concentration, and a graduate minor. Undergraduate students in the College of Arts and Sciences who want to major in women's studies can apply directly to the program. Undergraduate students in other colleges at Cornell will need to work out special arrangements and should speak to the Director of Undergraduate Studies (DUS) in Women's Studies.

The Undergraduate Major

The questions posed by feminist inquiry cannot be answered from within any single discipline or even from a simple combination of two or more disciplines. For that reason, the women's studies major provides students with a basic groundwork in the interdisciplinary field of women's studies and then requires each student to construct an advanced and individually tailored program of study on a topic, in a discipline, or in a combination of disciplines of special interest to the student alone.

Rather than specifying a particular sequence of required courses for each and every student, the women's studies major gives students a starting point in women's studies, an active advisory structure to help them shape a curriculum, and an ongoing impetus to reflection about their entire program of undergraduate study.

In designing their major, students should keep in mind that there are not many graduate programs offering a degree in women's studies itself. Accordingly, undergraduates

wishing to major in women's studies should talk at length with a faculty member about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. To give one example of what needs to be considered in designing a major: Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women's studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major.

Requirements for a Women's Studies Major

1. Prerequisite courses: before applying to the major, the student must complete any two Women's Studies courses with a grade of B- or better. Some suggested entry-level courses for 1999–2000 include: 206, 210, 211, 234, 244, 269, 273, 277, and 285. These courses would count both as prerequisites and as part of the women's studies major. First-Year writing seminars, in contrast, would count as prerequisite courses but not as part of the major.
2. Required course work:
   a. A minimum of 36 credits in women's studies is required for the major. No course in which the student has earned less than a C- can count toward these 36 credits. Although there is no single women's studies course that is required of all students, every major must complete a program of study that is both graduated in difficulty and interdisciplinary in scope—a program, in other words, that reflects both the breadth and the depth of women's studies scholarship. This program of study must be developed in consultation with the director of undergraduate studies and must include advanced seminars at the 300 level or above.
   b. Students may count up to three courses outside women's studies toward the major **if** those courses are approved by the director of undergraduate studies as constituting a meaningful component of the student's women's studies curriculum. To facilitate the coordination of a women's studies major with other majors in the college, students may also count toward the major up to three women's studies courses that are simultaneously being counted toward a second major.
3. The Honors Program: to graduate with honors, the major in women's studies must complete a senior thesis under the supervision of a women's studies faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative grade point average of 3.0 in all coursework and a 3.3 average in all courses applying to their women's studies major. Students interested in the Honors Program should consult the Director of Undergraduate Studies (DUS) late in the spring semester of their junior year or very early in the fall semester of their senior year. For more information about the Honors Program, see WOMNS 400 and the "Guidelines For a Senior Honors Thesis" available in the Women's Studies Program office.

The Women's Studies Concentration

Undergraduate students in any college at Cornell can concentrate in Women's Studies in conjunction with a major defined elsewhere in the university. The concentration consists of four courses in Women's Studies completed with a grade of C- or above, no more than two of which can come from a single discipline and none of which should overlap with the major. In rare cases, the DUS may allow one class from within a student's major to count toward the requirements for the concentration. Students should not assume the waiver will be granted, and they must petition the DUS with this request before the beginning of their final semester of study. Freshman writing seminars cannot be included within the four required courses. Students wishing to concentrate in Women's Studies should see the DUS.

The LBG Concentration

Women's Studies serves as home to the Lesbian, Bisexual, and Gay Studies Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. The Women's Studies courses that may be used to fulfill the LBG concentration are 210, 244, 262, 277, 285, 321, 353, 355, 376, 377, 413, 415, 427, 433, 450/650, 441/641, 465, 467, 468, 493, 621, 626, 654, 656 and 661. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies portion of this catalog.

I. First-Year Writing Seminars

[WOMNS 100.95 FWS: A Matter of Fact? History, Gender & Difference (also History 100.95)
3 credits. Not offered 1999–2000. T. Loos.]

[WOMNS 104 FWS: Whose Families? Whose Values? (also History 105)
3 credits. Not offered 1999–2000. M. B. Norton.]

WOMNS 106 FWS: Women and Writing (also English 105)
Fall and spring. 3 credits. Staff.
For description, see ENGL 105.

[WOMNS 109 FWS: Gendered Imaginations in African History and Literature (also History 109)
3 credits. Not offered 1999–2000. Next offered fall 2000–01. S. Greene.]

[WOMNS 113 Nudity/Nakedness: The Sexed Body in Western Art (also History of Art 112.03)
3 credits. Not offered 1999–2000. K. Barzman.]

[WOMNS 155 FWS: Fiddler on the Roof in Anthropological Guise: Tradition, Gender, and the Politics of Culture (also Anthropology 155)
3 credits. Not offered 1999–2000. S. Friedman.]

[WOMNS 157 FWS: Close Encounters: Race and Sex in Anthropology and Science Fiction (also Anthropology 157)
3 credits. Not offered 1999–2000. T. Fishel.]

WOMNS 178 FWS: Desire (also English 178 and Theatre Arts 178)
Spring. 3 credits. E. Hanson.
For description, see ENGL 178.

II. Courses

WOMNS 203 Work and Family (also Sociology 206)
Spring. 3 credits. W. Burkard.
For description, see SOC 203.

WOMNS 206 Gender and Society (also Rural Sociology 206)
Spring. 3 credits. B. Wejnert.
For description, see R SOC 206.

[WOMNS 210 Introduction to Feminist Theory
4 credits. Not offered 1999–2000. A. Villarejo.
This course introduces students to critical approaches in feminist scholarship to the cultural, socioeconomic, and political situation(s) of women. Particular attention will be paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings will draw on work in various disciplines and will include literary texts and visual images.]

WOMNS 211 Introduction to Women's Studies
Fall. 3 credits. K. McCollough.
Introduction to Women's Studies is a multidisciplinary approach to understanding the experiences, historical conditions, and concerns of women, both in the present and the past. As the academic manifestation of feminism, women's studies offers a range of perspectives (from liberal to radical) but focuses, in general, on understanding the sources of women's oppression in order to eliminate these sources.

[WOMNS 214 Biological Basis of Sex Differences (also Biological Sciences 214 and Biology and Society 214)
3 credits. Not offered 1999–2000. J. Fortune.]

[WOMNS 234/434 Gender in Early Modern Europe (also History 234/434) #
4 credits. Not offered 1999–2000. R. Weil.]

[WOMNS 238 The Historical Development of Women as Professionals, 1800–Present (also Human Development and Family Studies 258, American Studies 258, and History 238) #
3 credits. Not offered 1999–2000; next offered fall 2000–01. J. Brumberg.]

[WOMNS 243 Inside-Out: The American Everyday Interior (also Design and Environmental Analysis 243)
3 credits. Not offered 1999–2000; next offered spring 2000–01. J. Jennings.]

WOMNS 244 Language and Gender Relations (also Linguistics 244)
Spring. 4 credits. S. McConnell-Ginet.
For description, see LING 244.

WOMNS 249 Feminism and Philosophy (also Philosophy 249)
Fall. 4 credits. J. Whiting.
For description, see PHIL 249.

[WOMNS 251 Twentieth-Century Women Novelists (also English 251)
4 credits. Not offered 1999–2000. S. Samuels.]

WOMNS 252 Women and the Holocaust (also English 252 and Jewish Studies 255)
Fall. 4 credits. M. Jacobus.
For description, see ENGL 252.

[WOMNS 263 Interpreting Melodrama and the Woman's Film (also English 263)
4 credits. Not offered 1999–2000. L. Bogel.]

WOMNS 269 Introduction to Feminist Political Thought (also Government 369)
Fall. 4 credits. N. Hirschmann.
For description, see GOVT 369.

WOMNS 273 Women in American Society, Past and Present (also History 273) #
Spring. 4 credits. M. B. Norton.
For description, see HIST 273.

[WOMNS 277 Social Construction of Gender (also Psychology 277)
3 credits. Not offered 1999–2000. S. Bem.]

WOMNS 285 Introduction to Sexual Minorities (also Human Development 284)
Fall. 3 credits. R. Savin-Williams.
For description, see HD 284.

[WOMNS 305 Emotion, Gender, and Culture (also Anthropology 305) @
4 credits. Not offered 1999–2000. B. J. Isbell.]

[WOMNS 307 African-American Women in Slavery and Freedom (also History 303 and Africana Studies 307) #
4 credits. Not offered 1999–2000. M. Washington.]

[WOMNS 309/509 The Sociology of Marriage (also Sociology 309/509)
3 credits. Not offered 1999–2000. M. Clarkberg.]

[WOMNS 314/514 Gender and Work (also Sociology 314/514)
4 credits. Not offered 1999–2000. Next offered fall 2000–01. M. Brinton.]

WOMNS 320 Queer Theater (also Theatre Arts 320)
Spring. 4 credits. J. E. Gainor.
For description, see THETR 320.

WOMNS 321/631 Sex and Gender in Cross-Cultural Perspective (also Anthropology 321/621) @
Fall. 4 credits. K. March.
For description, see ANTHR 321/621.

WOMNS 348 Studies in Women's Fiction (also English 348)
Fall. 4 credits. L. Brown.
For description, see ENGL 348.

[WOMNS 349 Readings in Feminist Literary Theory (also English 349)
4 credits. Not offered 1999–2000. M. Hite.]

[WOMNS 350 Women and Patronage in Islam (also Near Eastern Studies 350)
4 credits. Not offered 1999–2000. D. Ruggles.]

WOMNS 353 Feminism: State and Public Policy (also Government 353)
Fall. 4 credits. M. Katzenstein.
For description, see GOVT 353.

WOMNS 355 Decadence (also English 355 and Comparative Literature 355) #
Spring. 4 credits. E. Hanson.
For description, see ENGL 355.

[WOMNS 357 American Families in Historical Perspective (also History 359, American Studies 359 and Human Development 359)
3 credits. Not offered 1999–2000; next offered spring 2000–01. J. Brumberg.]

[WOMNS 358 20th-Century Experimental Fiction by Women (also Enlgish 358)
4 credits. Not offered 1999–2000. M. Hite.]

[WOMNS 362 Global Perspectives on Gender (also Africana 362) @
4 credits. Not offered 1999–2000; next offered spring 2000–01. N. Assie-Lumumba.
The course will examine how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class will be taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty directing the course, the class will consider such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; the role of the state in constructing an engendered economy and polity.]

[WOMNS 363 Representations of Women in Ancient Greece and Rome (also Classics 363 and History 367) #
4 credits. Not offered 1999–2000. J. Ginsburg, L. Abel.]

WOMNS 365 Topics in Social and Personality Development: The Psychological Development of Women (also Human Development 365)
Fall. 3 credits. C. Raver.
For description, see HD 365.

WOMNS 366 Women at Work (also Industrial and Labor Relations: Human Resources 366)
Spring. 3 or 4 credits. J. Farley.
For description, see ILRHR 366.

WOMNS 368 Marriage and Sexuality in Medieval Europe (also History 368 and Religious Studies)
Spring. 4 credits. P. Hyams.
For description, see HIST 368.

[WOMNS 370 19th-Century Novel (also English 370) #
4 credits. Not offered 1999–2000. E. Hanson.]

WOMNS 378 Topics in U.S. Women's History (also History 378 and American Studies 378)
Fall. 4 credits. M. B. Norton.
For description, see HIST 378.

[WOMNS 380 Gender, Ideology, and Culture (also Sociology 380)
4 credits. Not offered 1999–2000. P. Becker.]

[WOMNS 381 19th Century French Women Writers (also French Literature 381) #
4 credits. Not offered 1999–2000. A. Berger.]

[WOMNS 384 History of Women and Unions (also Industrial & Labor Relations: Collective Bargaining 384)
4 credits. Not offered 1999–2000; next offered spring 2001–02. I. DeVault.]

[WOMNS 394 Gender and Sexuality in Early Christianity (also Near Eastern Studies 394 and Religious Studies 394)
4 credits. Not offered 1999–2000. K. Haines-Eitzen.]

WOMNS 400 Senior Honors Thesis
Fall and spring. 2–8 credits. For Women's Studies seniors only. Permission of Women's Studies faculty member required. Student must carry a GPA of 3.0 in all subjects and a 3.3 in Women's Studies. Staff.
Both the form of theses, and the nature and extent of contact between student and adviser, will depend on mutual agreement between the two. In one common scenario, the student will write an essay of approximately 50 pages in length, drafted and revised in a series of carefully planned stages over the course of two semesters, with an outline expected on approximately Sept. 15th and a draft of the first chapter on approximately November 15th. An "R" grade will be assigned at the end of the fall semester and a letter grade on completion of the project at the end of the spring semester.

WOMNS 403 Love, Sex, and Song in the Middle Ages (also Music 403)
Spring. 4 credits. J. Peraino.

4 credits. Not offered 1999–2000. J. Bernstock.]

WOMNS 405/605 Domestic Television
Spring. 4 credits. A. Villarejo.
This course is a seminar on television as technology and cultural form, focusing on the "domestic" as a synonym for gendered value-coding, an axis of the international division of labor (and questions of television's dissemination and circulation), and a site for historical exploration. The course balances readings in television and cultural theory (Spigel, Dienst, Merck, Williams, Feuer, Modleski, Mellencamp, Shattuc, Spivak and others) with close analysis of television as information, entertainment, furniture, technology, text, genre, flow, channel, and circuit of production of the commodity audience. Students may enroll in either undergraduate or graduate level with graduate students submitting a longer paper and doing supplementary readings.

[WOMNS 406 The Culture of Lives (also Anthropology 406) @

4 credits. Not offered 1999–2000.
J. Ginsburg.]

WOMNS 465 Feminist Theory/Lesbian Theory (also Comparative Literature 465 and German Studies 465)
Fall. 4 credits. A. Villarejo.
This seminar will explore developments in feminist theory, primarily in the United States from the 1950's through the mid 1990's. We will also trace the changing status of "lesbianism" in feminist theories over that same time period and examine its status in current constructions of "queer theory." What happens to the relationship between feminist theory and lesbian thought when "queer theory" emerges? The purpose of the course is to encourage critical, historically informed readings of what could be considered canonical texts and crucial junctures in Second Wave feminist thought, many of which remain unfamiliar even to Women's Studies students.

[WOMNS 466 Feminism and Gender Discrimination (also Government 466 and Law 648)
4 credits. Not offered 1999–2000.
K. Abrams.]

4 credits. Not offered 1999–2000.
A. Adams.]

WOMNS 600 Special Topics in Feminist Theory: An Interdisciplinary Graduate Course in Women's Studies
Fall. 4 credits. This course is open to graduate students and undergraduate seniors who have obtained permission of instructor. Staff.
The purpose of this course is to expose graduate students to interdisciplinary approaches in Women's Studies and feminist theory to a variety of topics or questions. While many of our graduate courses train students in highly specialized areas of feminist theory, this course aims to teach students how to find common intellectual ground around a single topic from interdisciplinary perspectives without sacrificing the complexity of any disciplinary approach. The course is designed for graduate minors in Women's Studies and students with a specialized interest in feminist theory. Although it is not required, the course is strongly recommended for students obtaining a graduate minor in Women's Studies.

[WOMNS 608 African-American Women (also History 608)

Galik, Richard S., Ph.D., Cornell U. Prof., Physics/LNS¶
Galloway, Andrew, Ph.D., U. of California at Berkeley. Assoc. Prof., English
Ganem, Bruce, Ph.D., Columbia U. Franz and Elisabeth Roessler Professor of Chemistry and Chemical Biology
Garcés, Maria Antonia, Ph.D., Johns Hopkins U. Asst. Prof., Romance Studies
Garcia, Maria Cristina, Ph.D., U. of Texas at Austin. Assoc. Prof., History/Latino Studies
Gibbons, Lawrence K., Ph.D., U. of Chicago. Asst. Prof., Physics/LNS¶
Gibian, George, Ph.D., Harvard U. Goldwin Smith Professsor of Russian Literature, Russian Literature/Comparative Literature
Gibson, Eleanor J., Ph.D, Yale U. Susan Linn Sage Professor of Psychology Emeritus, Psychology
Gierasch, Peter J., Ph.D., Harvard U. Prof., Astronomy/CRSR†
Gilbert, Roger S., Ph.D., Yale U. Assoc. Prof., English
Gilgen, Peter, Ph.D., Stanford U. Asst. Prof., German Studies
Gilovich, Thomas, Ph.D., Stanford U. Prof., Psychology
Ginet, Carl A., Ph.D., Cornell U. Prof. Emeritus, Philosophy
Ginsburg, Judith R., Ph.D., U. of California at Berkeley. Assoc. Prof., Classics
Giovanelli, Riccardo, Ph.D., Indiana U. Prof., Astronomy/NAIC‡
Gittelman, Bernard, Ph.D., Massachusetts Inst. of Technology. Prof., Physics/LNS¶
Goetz, Kent, M.F.A., U. of Wisconsin at Madison. Asst. Prof., Theatre, Film and Dance
Gold, Daniel, Ph.D., U. of Chicago Divinity School. Prof., Asian Studies
Gold, Thomas, Ph.D., Cambridge U. (England). John L. Wetherill Professor of Astronomy Emeritus/CRSR†
Goldsby, Jacqueline, Ph.D., Yale U. Asst. Prof., English
Goldsmith, Paul F., Ph.D., U. of California at Berkeley. James A. Weeks Professor of Physical Sciences, Astronomy/NAIC‡
Gottfried, Kurt, Ph.D., Massachusetts Inst. of Technology. Prof. Emeritus, Physics/LNS¶
Grannis, Rick, Ph.D., U. of California. Asst. Prof., Sociology
Greenberg, Donald P., Ph.D., Cornell U. Prof., Computer Science
Greenberg, Mitchell, Ph.D., U. of California at Berkeley. Prof., Romance Studies
Greene, Charles H., Ph.D., U. of Washington. Assoc. Prof., Geological Sciences/CFE
Greene, Sandra E., Ph.D., Northwestern U. Assoc. Prof., History
Greenwood, Davydd J., Ph.D., U. of Pittsburgh. Goldwin Smith Professor of Anthropology
Greisen, Kenneth I., Ph.D., Cornell U. Prof. Emeritus, Physics
Gries, David J., Ph.D., Technische Hoch., München (Germany). William L. Lewis Professor of Engineering, Computer Science
Grimes, Joseph E., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Groos, Arthur, Ph.D., Cornell U. Prof., German Studies
Gross, Leonard, Ph.D., U. of Chicago. Prof., Mathematics
Gross, Mark, Ph.D., U. of California at Berkeley. Asst. Prof., Mathematics
Grossvogel, Anita V., Ph.D., Cornell U. Assoc. Prof. Emerita, Romance Studies
Grossvogel, David I., Ph.D., Columbia U. Prof. Emeritus, Goldwin Smith Professor of Comparative Literature and Romance Studies
Gruner, Sol M., Ph.D., Princeton U. Prof., Physics/LASSP*
Grusky, David, Ph.D., U. of Wisconsin. Prof., Sociology
Guckenheimer, John, Ph.D., U. of California at Berkeley. Prof., Mathematics
Gunn, Edward M., Jr., Ph.D., Columbia U. Prof., Asian Studies
Hagfors, Tor, Ph.D., U. of Oslo (Norway). Prof. Emeritus, Astronomy/Engineering/NAIC‡
Haines-Eitzen, Kim, Ph.D., U. of North Carolina. Asst. Prof., Near Eastern Studies/Religious Studies
Halpern, Bruce P., Ph.D., Brown U. Susan Linn Sage Professor of Psychology, Psychology/Biological Sciences
Halpern, Joseph Y., Ph.D., Harvard U. Prof., Computer Science
Hammes, Gordon G., Ph.D., U. of Wisconsin. Horace White Prof. Emeritus, Chemistry and Biochemistry
Han, Shin-Kap, Ph.D., Columbia U. Asst. Prof., Sociology
Hand, Louis N., Ph.D., Stanford U. Prof., Physics/LNS¶
Hanson, Ellis, Ph.D., Princeton U. Asst. Prof., English
Harbert, Wayne E., Ph.D., U. of Illinois. Prof., Linguistics
Harris, Robert L., Ph.D., Northwestern U. Assoc. Prof., Africana Studies and Research Center
Harris-Warrick, Rebecca, D.M.A., Stanford U. Assoc. Prof., Music
Hartill, Donald L., Ph.D., California Inst. of Technology. Prof., Physics/LNS¶
Hartman, Paul L., Ph.D., Cornell U. Prof. Emeritus, Physics/Applied and Engineering Physics/LASSP*
Hartmanis, Juris, Ph.D., California Inst. of Technology. Walter R. Read Professor of Engineering, Computer Science
Harwit, Martin O., Ph.D, Massachusetts Inst. of Technology. Prof. Emeritus, Astronomy/CRSR†
Hassan, Salah, Ph.D., U. of Pennsylvania. Asst. Prof., Africana Studies and Research Center
Hatch, Martin, Ph.D., Cornell U. Assoc. Prof., Music
Hatcher, Allen, Ph.D., Stanford U. Prof., Mathematics
Hay, George A., Ph.D., Northwestern U. Prof., Economics/Edward Cornell Prof. of Law
Hayes, Donald P., Ph.D., U. of Washington. Prof. Emeritus, Sociology
Haynes, Martha P., Ph.D., Indiana U. Prof., Astronomy/NAIC‡
Heckathorn, Douglas D., Ph.D., U. of Kansas. Prof., Sociology
Henderson, David W., Ph.D., U. of Wisconsin. Prof., Mathematics
Henderson, John S., Ph.D., Yale U. Prof., Anthropology
Henley, Christopher L., Ph.D., Harvard U. Assoc. Prof., Physics/LASSP*
Herrin, W. Lamar, Ph.D., U. of Cincinnati. Prof., English
Herring, Ronald, Ph.D., U. of Wisconsin at Madison. Prof., Government
Herter, Terry L., Ph.D., U. of Rochester. Prof., Astronomy/CRSR†
Hester, Karlton, Ph.D., City U. of New York. Asst. Prof., Music
Hildebrand, George H., Ph.D., Cornell U. Maxwell M. Upson Professor of Economics and Industrial Relations Emeritus, Economics/Industrial and Labor Relations
Hilgartner, Stephen, Ph.D., Cornell U. Asst. Prof., Science and Technology Studies
Hill, Thomas D., Ph.D., Cornell U. Prof., English/Medieval Studies
Hines, Melissa A., Ph.D., Stanford U. Asst. Prof., Chemistry and Chemical Biology
Hirschmann, Nancy, Ph.D., Johns Hopkins U. Assoc. Prof., Government
Hite, Molly, Ph.D., U. of Washington. Prof., English
Ho, Wilson, Ph.D., U. of Pennsylvania. Prof., Physics/LASSP*
Hockett, Charles F., Ph.D., Yale U. Prof. Emeritus, Modern Languages and Linguistics/Anthropology
Hodes, Harold, Ph.D., Harvard U. Assoc. Prof., Philosophy
Hoffmann, Roald, Ph.D., Harvard U. Frank H. T. Rhodes Professor of Humane Letters, Chemistry and Chemical Biology
Hohendahl, Peter U., Ph.D., Hamburg U. (Germany). Jacob Gould Schurman Professor of German Literature, German Studies/Comparative Literature
Holcomb, Donald F., Ph.D., U. of Illinois. Prof. Emeritus, Physics/LASSP*
Holdheim, W. Wolfgang, Ph.D., Yale U. Frederic J. Whiton Professor of Liberal Studies, Emeritus, Comparative Literature/Romance Studies
Holloway, Thomas H., Ph.D., U. of Wisconsin. Prof., History
Holmberg, David H., Ph.D., Cornell U. Prof., Anthropology/Women's Studies
Holquist, Peter, Ph.D., Columbia U. Asst. Prof., History
Hong, Yongmiao, Ph.D., U. of California at San Diego. Assoc. Prof., Economics
Hopcroft, John E., Ph.D., Stanford U. Joseph C. Ford Professor of Computer Science
Houck, James R., Ph.D., Cornell U. Kenneth A. Wallace Professor of Astronomy/CRSR†
Houston, Paul L., Ph.D., Massachusetts Inst. of Technology. Peter J. W. Debye Professor of Chemistry and Chemical Biology
Hsu, John T. H., D. Music, New England Conservatory of Music. Old Dominion Foundation Professor of Humanities and Music, Music
Hubbard, John H., Doctorat d'Etat, U. de Paris (France). Prof., Mathematics
Hughes, Robert E., Ph.D., Cornell U. Prof. Emeritus, Chemistry and Chemical Biology
Hull, Isabel V., Ph.D., Yale U. Prof., History
Husa, Karel, Diploma, Paris Conservatory (France). Kappa Alpha Professor of Music, Emeritus
Huttenlocher, Daniel P., Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Computer Science
Hwang, J. T. Gene, Ph.D., Purdue U. Prof., Mathematics
Hyams, Paul R., D. Phil., Oxford U. (England). Assoc. Prof., History

Irwin, Terence H., Ph.D., Princeton U. Susan Linn Sage Professor of Philosophy, Philosophy
Isacks, Bryan L., Ph.D., Columbia U. William and Katherine Snee Professor of Geological Sciences/INSTOC #
Isard, Walter, Ph.D., Harvard U. Prof. Emeritus, Economics
Isbell, Billie J., Ph.D., U. of Illinois. Assoc. Prof., Anthropology
Isen, Alice M., Ph.D., Stanford U. Prof., Johnson Graduate School of Management/ Psychology
Jacobus, Mary L., D. Phil, Oxford U. (England). John Wendell Anderson Professor of English/Women's Studies
Janowitz, Phyllis, M.F.A., U. of Massachusetts. Prof., English
Jeyifo, Biodun, Ph.D, New York U. Prof., English
John, James J., Ph.D., U. of Notre Dame. Professor of Paleography and Medieval History, History
Johnston, Robert E., Ph.D., Rockefeller U. Prof., Psychology
Jones, Karen, Ph.D., Cornell U. Asst. Prof., Philosophy
Jones, Robert B. Jr., Ph.D., U. of California at Berkeley. Prof. Emeritus, Modern Languages and Linguistics
Jordan, Teresa E., Ph.D., Stanford U. Prof., Geological Sciences/INSTOC#
Jorden, Eleanor H., Ph.D., Yale U. Mary Donlon Alger Professor of Linguistics Emerita, Modern Languages and Linguistics
Kahin, George McT., Ph.D., Johns Hopkins U. Aaron L. Binenkorb Professor of International Studies Emeritus, Government
Kahn, Alfred E., Ph.D., Yale U. Robert Julius Thorne Professor of Political Economy Emeritus, Economics
Kahn, Peter J., Ph.D., Princeton U. Prof., Mathematics
Kalos, Malvin H., Ph.D., U. of Illinois. Prof., Physics/LASSP*
Kammen, Michael G., Ph.D., Harvard U. Newton C. Farr Professor of American History and Culture, History
Kanbur, Ravi. Ph.D., Oxford U. (England) T.H. Lee Prof. of World Affairs, Economics
Kaplan, Steven L., Ph.D., Yale U. Goldwin Smith Professor of History
Karig, Daniel E., Ph.D., U. of California at San Diego. Prof. Emeritus, Geological Sciences
Kaske, Carol V., Ph.D., Johns Hopkins U. Prof., English
Katzenstein, Mary F., Ph.D., Massachusetts Inst. of Technology. Prof., Government
Katzenstein, Peter J., Ph.D., Harvard U. Walter S. Carpenter, Jr., Professor of International Studies, Government
Kay, Robert W., Ph.D., Columbia U. Prof., Geological Sciences/INSTOC#
Kay, Suzanne M., Ph.D., Brown U. Assoc. Prof., Geological Sciences/INSTOC#
Kelley, E. Wood, Ph.D., Indiana U. Assoc. Prof., Government
Kellock, Judith, M. M., Boston U. Assoc. Prof., Music
Kennedy, William J., Ph.D., Yale U. Prof., Comparative Literature
Keshav, S., Ph.D., U. of California at Berkeley. Assoc. Prof., Computer Science
Kesten, Harry, Ph.D., Cornell U. Prof., Mathematics
Kiefer, Nicholas M., Ph.D., Princeton U. Ta-Chung Liu Prof. of Economics
Kinoshita, Toichiro, Ph.D., Tokyo U. (Japan). Goldwin Smith Professor of Physics Emeritus/LNS¶
Kirkwood, Gordon M., Ph.D., Johns Hopkins U. Frederick J. Whiton Professor of Classics Emeritus
Kirshner, Jonathan, Ph.D., Princeton U. Assoc. Prof., Goverment
Klein, Richard J., Ph.D., Yale U. Prof., Romance Studies
Kleinberg, Jonathan, Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Computer Science
Koschmann, J. Victor, Ph.D., U. of Chicago. Prof., History
Kozen, Dexter, Ph.D., Cornell U. Joseph N. Pew Professor of Engineering/ Computer Science
Kramnick, Isaac, Ph.D., Harvard U. Richard J. Schwarz Professor of Government
Kronik, John W., Ph.D., U. of Wisconsin. Prof., Romance Studies
Krumhansl, Carol L., Ph.D., Stanford U. Prof., Psychology
Krumhansl, James A., Ph.D., Cornell U. Horace White Professor of Physics Emeritus/LASSP*
Kufner, Herbert L., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Kuniholm, Peter I., Ph.D., U. of Pennsylvania. Prof., History of Art
LaCapra, Dominick C., Ph.D., Harvard U. Bryce and Edith M. Bowman Professor in Humanistic Studies, History
LaFeber, Walter F., Ph.D., U. of Wisconsin. Marie Underhill Noll Professor of American History, History
Lai, Dong, Ph.D., Cornell U. Asst. Prof., Astronomy/CRSR†
Lambert, Bernd, Ph.D., U. of California at Berkeley. Prof., Anthropology
Lambert, William W., Ph.D., Harvard U. Prof. Emeritus, Psychology/Sociology/Anthropology
Law, Jane Marie, Ph.D., U. of Chicago. Assoc. Prof., Asian Studies/H. Stanley Krusen Professor of World Religions
Lawler, Edward J., Ph.D., U. of Wisconsin. Prof. Sociology/Industrial and Labor Relations
Lawler, Margaret, M. A., San Jose State Coll. Assoc. Prof. Emerita, Theatre Arts
Lazzaro, Claudia, Ph.D., Princeton U. Prof., History of Art
Leavitt, Thomas W., Ph.D., Harvard U. Prof. Emeritus, History of Art
LeClair, André R., Ph.D., Harvard U. Assoc. Prof., Physics/LNS¶
Lee, David M., Ph.D., Yale U. James Gilbert White Distinguished Professor in the Physical Sciences, Physics/LASSP*
Lee, Lee C., Ph.D., Ohio State U. Assoc. Prof. Human Development and Family Studies/ Asian American Studies Program
Lee, Lillian, Ph.D., Harvard U. Asst. Prof., Computer Science
Lee, Stephen, Ph.D., U. of Chicago. Prof., Chemistry and Chemical Biology
Leed, Richard L., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Lepage, G. Peter, Ph.D., Stanford U. Prof., Physics/LNS¶
Levitsky, David A., Ph.D., Rutgers U. Prof., Nutritional Sciences/Psychology
Levitt, Bruce, Ph.D., U. of Michigan. Prof., Theatre, Film and Dance
Lewis, Philip E., Ph.D, Yale U. Prof., Romance Studies
Littauer, Raphael M., Ph.D., Cambridge U. (England). Prof. Emeritus, Physics/LNS¶
Livesay, G. Roger, Ph.D., U. of Illinois. Prof. Emeritus, Mathematics
Long, Kathleen P., Ph.D., Yale U. Assoc. Prof., Romance Studies
Loos, Tamara L., Ph.D., Cornell U. Asst. Prof., History
Loring, Roger F., Ph.D., Stanford U. Assoc. Prof., Chemistry and Chemical Biology
Lovelace, Richard V. E., Ph.D., Cornell U. Prof., A&EP/Astronomy/CRSR†
Lowi, Theodore J., Ph.D., Yale U. John L. Senior Professor of American Institutions, Government
Lurie, Alison, A. B., Radcliffe Coll. Frederic J. Whiton Professor of American Literature, English
Lyons, Thomas, Ph.D., Cornell U. Assoc. Prof., Economics
Maas, James B., Ph.D., Cornell U. Prof., Psychology
Macy, Michael W., Ph.D., Harvard U. Prof., Sociology
Majumdar, Mukul K., Ph.D., U. of California at Berkeley. H. T. Warshow and Robert Irving Warshow Professor of Economics
Mankin, David P., Ph.D., U. of Virginia. Assoc. Prof., Classics
March, Kathryn S., Ph.D., Cornell U. Assoc. Prof., Anthropology/Women's Studies
Marcus, Phillip L., Ph.D., Harvard U. Prof. Emeritus, English
Marohn, John, Ph.D., California Institute of Technology. Asst. Prof., Chemistry and Chemical Biology
Martin, Biddy, Ph.D., U. of Wisconsin at Madison. Prof., German Studies/Women's Studies
Masson, Robert T., Ph.D., U. of California at Berkeley. Prof., Economics
Mazrui, Ali A., Ph.D., Oxford U. (England). Senior Scholar, Africana Research and Studies Center and A. D. White Professor-at-Large Emeritus
McCall, Dan E., Ph.D., Columbia U. Prof., English
McClane, Kenneth A., M.F.A., Cornell U. W.E.B. DuBois Professor of Literature, English
McClelland, Peter D., Ph.D., Harvard U. Prof., Economics
McConkey, James R., Ph.D., State U. of Iowa. Prof. Emeritus, English
McConnell-Ginet, Sally, Ph.D., U. of Rochester. Prof., Linguistics
McCoy, William John Jr., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
McCoy, Maureen, M.F.A., U. of Iowa. Assoc. Prof., English
McDaniel, Boyce D., Ph.D., Cornell U. Floyd R. Newman Professor of Nuclear Studies Emeritus, Physics/LNS¶
McDermott, Rose, Ph.D., Stanford U. Asst. Prof., Government
McGowan, Kaja, Ph.D., Cornell U. Asst. Prof., History of Art
MacDonald, Scott, Ph.D., Cornell U. Prof., Philosophy
McGinnis, Robert, Ph.D., Northwestern U. Prof. Emeritus, Sociology
McLafferty, Fred W., Ph.D., Cornell U. Peter J. W. Debye Emeritus Professor of Chemistry and Chemical Biology
McMillin, H. Scott, Ph.D., Stanford U. Prof., English
McMurry, John E., Ph.D., Columbia U. Prof., Chemistry and Chemical Biology
Mebane, Walter, Ph.D., Yale U. Assoc. Prof., Government
Mei, Tsu-Lin, Ph.D., Yale U. Hu Shih Prof. of Chinese Literature and Philology, Asian Studies
Meinwald, Jerrold, Ph.D., Harvard U. Goldwin Smith Professor of Chemistry and Chemical Biology
Meixner, Laura L., Ph.D., Ohio State U. Assoc. Prof., History of Art
Melas, Natalie A., Ph.D., U. of California at Berkeley. Asst. Prof., Comparative Literature
Mermin, Dorothy M., Ph.D., Harvard U. Goldwin Smith Professor of English
Mermin, N. David, Ph.D., Harvard U. Horace White Professor of Physics, Physics/ LASSP*
Messing, Gordon M., Ph.D., Harvard U. Prof. Emeritus, Classics/Modern Languages and Linguistics

Migiel, Marilyn, Ph.D., Yale U. Assoc. Prof., Romance Studies
Miller, Richard W., Ph.D., Harvard U. Prof., Philosophy/Science and Technology Studies
Minkowski, Christopher, Ph.D., Harvard U. Assoc. Prof., Asian Studies
Mitra, Tapan, Ph.D., U. of Rochester. Prof., Economics
Moen, Phyllis, Ph.D, U. of Minnesota. Prof., Human Ecology/Sociology
Mohanty, Satya P., Ph.D., U. of Illinois. Assoc. Prof., English
Monosoff-Pancaldo, Sonya, Artists Diploma, Julliard School of Music. Prof. Emeritus, Music
Monroe, Jonathan B., Ph.D., U. of Oregon. Prof., Comparative Literature
Moore, R. Laurence, Ph.D., Yale U. Howard A. Newman Professor in American Studies, History
Morgan, Robert R., M.F.A., U. of North Carolina. Kappa Alpha Prof. of English
Morgenroth, Joyce, M.A., Johns Hopkins U. Assoc. Prof., Theatre, Film and Dance
Morley, Michael D., Ph.D., U. of Chicago. Prof., Mathematics
Morrisett, Greg, Ph.D., Carnegie Mellon U. Asst. Prof., Computer Science
Morrison, George H., Ph.D, Princeton U. Prof. Emeritus, Chemistry and Chemical Biology
Munasinghe, Viranjini P., Ph.D., Johns Hopkins U. Asst. Prof., Anthropology/Asian American Studies
Murray, Edward, Ph.D., Yale Univ. Assoc. Prof., Music
Murray, Timothy, Ph.D., Johns Hopkins U. Prof., English
Myers, Andrew, Ph.D., Massachusetts Institute of Technology. Asst. Prof., Computer Science
Najemy, John M., Ph.D., Harvard U. Prof., History
Nee, Victor, Ph.D., Harvard U. Goldwin Smith Professor of Sociology
Neisser, Ulric, Ph.D., Harvard U. Prof., Psychology
Nelson, Frederick E., Ph.D., U. of Michigan. Assoc. Prof., Geological Sciences
Nerode, Anil, Ph.D., U. of Chicago. Goldwin Smith Professor of Mathematics
Neubert, Matthias, Ph.D., Ruprecht-Karls-U. of Heidelberg. Prof., Physics/LNS¶
Neuhouser, Frederick, Ph.D., Columbia U. Assoc. Prof., Philosophy
Ngate, Jonathan, Ph.D., U. of Washington. Assoc. Prof., Romance Studies
Nicholson, Philip, Ph.D., California Inst. of Technology. Prof., Astronomy/CRSR†
Norton, Mary Beth, Ph.D., Harvard U. Mary Donlon Alger Professor of American History, History
Nussbaum, Alan, Ph.D., Harvard U. Prof., Classics/Linguistics
Nussbaum, Michael, Dr. Sci., Academy of Sciences Berlin (Germany). Prof., Mathematics
O'Connor, Stanley J., Ph.D., Cornell U. Prof. Emeritus, History of Art
O'Donoghue, Ted, Ph.D., U. of California at Berkeley. Asst. Prof., Economics
O'Neill, Kathleen, Ph.D., Harvard U. Asst. Prof., Government
Ohadike, Don, Ph.D., U. of Jos (Nigeria). Assoc. Prof., Africana Studies and Research Center
Olguín, Ben V., Ph.D., Stanford U. Asst. Prof., English
Oliver, Jack E., Ph.D., Columbia U. Irving Porter Church Professor Emeritus of Engineering/Geological Sciences/INSTOC#
Olum, Paul, Ph.D., Harvard U. Prof. Emeritus, Mathematics
Orear, Jay, Ph.D., U. of Chicago. Prof. Emeritus, Physics/LNS¶
Ortigueira, Salvador, Ph.D., U. Carlos III (Madrid) Asst. Prof., Economics
Owen, David I., Ph.D., Brandeis U. Bernard and Jane Schapiro Professor of Ancient Near Eastern and Judaic Studies, Near Eastern Studies
Owren, Michael J., Ph.D., Indiana U. Asst. Prof., Psychology
Palmer, Robert M., M.M., Eastman School of Music. Given Foundation Professor of Music Composition Emeritus, Music
Pan, An-yi, Ph.D., U. of Kansas. Asst. Prof., History of Art
Parker, A. Reeve, Ph.D., Harvard U. Prof., English
Parpia, Jeevak M., Ph.D., Cornell U. Prof., Physics/LASSP*
Parrish, Stephen M., Ph.D., Harvard U. Goldwin Smith Professor of English Emeritus
Patterson, J. Ritchie, Ph.D., U. of Chicago. Asst. Prof., Physics/LNS¶
Payne, Lawrence E., Ph.D., Iowa State U. Prof. Emeritus, Mathematics
Peeva, Irena, Ph.D., Brandeis U. Asst. Prof., Mathematics
Pelliccia, Hayden, Ph.D., Yale U. Assoc. Prof., Classics
Peraino, Judith A., Ph.D., U. of California at Berkeley. Asst. Prof., Music
Peterson, Charles A., Ph.D., U. of Washington. Prof., History
Piedra, Jose, Ph.D., Yale U. Assoc. Prof., Romance Studies
Piggott, Joan R., Ph.D., Stanford University. Assoc. Prof., History
Pinch, Trevor J., Ph.D., U. of Bath (England). Prof., Science and Technology Studies
Pingali, Keshav K., Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Computer Science
Pintner, Walter M., Ph.D., Harvard U. Prof. Emeritus, History
Plane, Robert A., Ph.D., U. of Chicago. Prof. Emeritus, Chemistry
Platek, Richard, Ph.D., Stanford U. Assoc. Prof., Mathematics
Pohl, Robert O., Doktor, U. Erlangen (Germany). Prof., Physics/LASSP*
Pohl, Susanne, Ph.D., U. of Michigan. Asst. Prof., History
Polenberg, Richard, Ph.D., Columbia U. Goldwin Smith Professor of American History, History
Pollak, Nancy, Ph.D., Yale U. Assoc. Prof., Russian Literature
Pontusson, Jonas, Ph.D., U. of California at Berkeley. Assoc. Prof., Government
Porte, Joel, Ph.D., Harvard U. Ernest I. White Professor of American Studies and Humane Letters, English/Comparative Literature
Possen, Uri M., Ph.D., Yale U. Prof., Economics
Power, Alison G., Ph.D., U. of Washington. Assoc. Prof., Science and Technology Studies/Ecology and Systematics
Powers, David S., Ph.D., Princeton U. Prof., Near Eastern Studies
Provine, William B., Ph.D., U. of Chicago. Prof., History/Biological Sciences
Pucci, Pietro, Ph.D., U. of Pisa (Italy). Goldwin Smith Professor of Classics
Rabkin, Jeremy A., Ph.D., Harvard U. Assoc. Prof., Government
Radzinowicz, Mary A., Ph.D., Columbia U. Jacob Gould Schurman Professor of English Emerita
Ralph, Daniel C., Ph.D., Cornell U. Asst. Prof., Physics/LASSP*
Ramage, Andrew, Ph.D., Harvard U. Prof., History of Art
Ramakrishna, Ravi, Ph.D., Princeton U. Asst. Prof., Mathematics
Randel, Don M., Ph.D., Princeton U. Given Foundation Professor of Musicology, Music
Rawlings III, Hunter R., Ph.D., Princeton U. Prof., Classics
Reed, Joseph D., Ph.D., Stanford U. Asst. Prof., Classics
Regan, Dennis T., Ph.D., Stanford U. Assoc. Prof., Psychology
Regan, Elizabeth Adkins, Ph.D., U. of Pennsylvania. Prof., Psychology/Biological Sciences
Rendsburg, Gary, Ph.D., Memorial New York U. Paul and Berthe Hendrix Memorial Professorship in Jewish Studies, Near Eastern Studies
Reppy, John D., Ph.D., Yale U. John L. Wetherill Professor of Physics Emeritus, Physics/LASSP*
Reppy, Judith, Ph.D. Cornell U. Prof., Science and Technology Studies
Resina, Joan Ramon, Ph.D., U. of California at Berkeley. Assoc. Prof., Romance Studies
Rhodes, Frank H. T., Ph.D. , U. of Birmingham (England). Prof., Geological Sciences
Richards, Annette, Ph.D., Stanford U. Asst. Prof., Music
Richardson, Robert C., Ph.D., Duke U. F. R. Newman Professor of Physics/LASSP*
Rife, Joseph L., Ph.D., U. of Michigan. Asst. Prof., Classics
Rogers, Joseph T., Ph.D., U. of Rochester. Assoc. Prof., Physics/LNS¶
Roldan, Mary J., Ph.D., Harvard U. Asst. Prof., History
Rosen, Bernard C., Ph.D., Cornell U. Prof. Emeritus, Sociology
Rosen, Carol G., Ph.D., Harvard U. Prof., Linguistics
Rosen, David, Ph.D., U. of California at Berkeley. Prof., Music
Rosenberg, Alex, Ph.D., U. of Chicago. Prof. Emeritus, Mathematics
Rosenberg, Edgar, Ph.D., Stanford U. Prof., English/Comparative Literature
Rothaus, Oscar S., Ph.D., Princeton U. Prof., Mathematics
Rossiter, Margaret, Ph.D., Yale U. Marie Underhill Noll Professor of the History of Science, Science and Technology Studies
Rubin, David L., Ph.D., U. of Michigan. Prof., Physics/LNS¶
Rubinfeld, Ronitt A., Ph.D., U. of California at Berkeley. Assoc. Prof., Computer Science
Rush, Myron, Ph.D., U. of Chicago. Prof., Government
Russell, Nerissa, Ph.D., U. of California at Berkeley. Asst. Prof., Anthopology
Rusten, Jeffrey S., Ph.D., Harvard U. Prof., Classics
Saccamano, Neil, Ph.D., Johns Hopkins U. Assoc. Prof., English
Sakai, Naoki, Ph.D., U. of Chicago. Prof., Asian Studies
Saloff-Coste, Laurent, Ph.D., U. Paris VI. Prof., Mathematics
Salpeter, Edwin E., Ph.D., Birmingham U. (England). James Gilbert White Distinguished Professor in the Physical Sciences Emeritus, Physics/LNS¶/Astronomy/CRSR†
Salvatore, Nicholas, Ph.D., U. of California at Berkeley. Prof., Industrial and Labor Relations/American Studies
Samuels, Shirley, Ph.D., U. of California at Berkeley. Assoc. Prof., English/Women's Studies
Sanders, Elizabeth, Ph.D., Cornell U. Prof., Government
Sangren, P. Steven, Ph.D., Stanford U. Assoc. Prof., Anthropology
Santiago-Irizarry, Vilma, Ph.D., New York U. Asst. Prof., Anthropology and Hispanic American Studies
Sawyer, Paul L., Ph.D., Columbia U. Prof., English
Scatterday, Mark D., D.M.A., Eastman Schl. of Music. Assoc. Prof., Music

Schamis, Hector, Ph.D., Columbia U. Asst. Prof., Government
Schatz, Alfred H., Ph.D., New York U. Prof., Mathematics
Scheraga, Harold A., Ph.D., Duke U. George W. and Grace L. Todd Professor Emeritus of Chemistry and Chemical Biology
Schneider, Fred B., Ph.D., SUNY at Stony Brook. Prof., Computer Science
Schneider, Rebecca, Ph.D., New York U. Asst. Prof., Theatre, Film and Dance
Schuler, Richard E., Ph.D., Brown U. Prof., Economics/Engineering
Schwarz, Anette, Ph.D., Johns Hopkins U. Assoc. Prof., German Studies
Schwarz, Daniel R., Ph.D., Brown U. Prof., English
Selman, Bart, Ph.D., U. of Toronto. Assoc. Prof., Computer Science
Seltzer, Mark, Ph.D., U. of California at Berkeley. Prof., English
Sen, Shankar, Ph.D., Harvard U. Prof., Mathematics
Senderovich, Savely, Ph.D., New York U. Prof., Russian Literature
Seshadri, Praveen, Ph.D., U. of Wisconsin. Asst. Prof., Computer Science
Sethna, James P., Ph.D., Princeton U. Prof., Physics/LASSP*
Seznec, Alain, D.E.S., U. of Paris-Sorbonne (France). Prof. Emeritus, Romance Studies
Shanley, Kathryn, Ph.D., U. of Michigan. Assoc. Prof., English
Shanzer, Danuta, D.Phil., Oxford U. (England). Prof., Classics
Shapiro, Gavriel, Ph.D., U. of Illinois at Urbana. Assoc. Prof., Russian Literature
Shaw, Harry E., Ph.D., U. of California at Berkeley. Prof., English
Shefter, Martin A., Ph.D., Harvard U. Prof., Government
Shell, Karl, Ph.D. Stanford U. Robert Julius Thorne Professor of Economics
Shepherd, Reginald, MFA., U. of Iowa. Asst. Prof., English
Shirai, Yasuhiro, Ph.D., U. of California at Los Angeles. Asst. Prof., Asian Studies
Shmoys, David B., Ph.D., U. of California at Berkeley. Prof., Computer Science
Shoemaker, Sydney S., Ph.D., Cornell U. Susan Linn Sage Professor of Philosophy
Shore, Richard A., Ph.D., Massachusetts Inst. of Technology. Prof., Mathematics
Shue, Henry, Ph.D., Princeton U. Wyn and William Y. Hutchinson Prof. of Ethics and Public Life
Shue, Vivienne B., Ph.D., Harvard U. Frank and Rosa Rhodes Professor of Chinese Government
Siegel, James T., Ph.D., U. of California at Berkeley. Prof., Anthropology
Siegel, Sandra F., Ph.D., U. of Chicago. Prof., English
Sierra, Roberto, M. M., London U. (England). Prof., Music
Sievers, Albert J. III, Ph.D., U. of California at Berkeley. Edward L. Nichols Professor, Physics/LASSP*
Siggia, Eric D., Ph.D., Harvard U. Adjunct Prof., Physics/ LASSP*
Silbey, Joel H., Ph.D., U. of Iowa. President White Professor of History, History
Silsbee, Robert H., Ph.D., Harvard U. Prof. Emeritus, Physics/ LASSP*
Silverman, Albert, Ph.D., U. of California at Berkeley. Prof. Emeritus, Physics/LNS¶
Sjamaar, Reyer, Ph.D., Rijksuniversiteit te Utrecht (The Netherlands). Asst. Prof., Mathematics
Small, Meredith F., Ph.D., U. of California at Davis. Asst. Prof., Anthropology
Smillie, John, Ph.D., U. of Chicago. Prof., Mathematics
Smith, Anna Marie, Ph.D., U. of Essex (England). Asst. Prof., Government
Smith, Brian, Ph.D., U. of California at Berkeley. Asst. Prof., Computer Science
