H ADM 255 Hotel Development and Planning
Spring. 3 credits. Limited to sophomores, juniors, and seniors. Required. R. Penner.
An introduction and management overview of the problems and opportunities inherent in the development and planning of hospitality facilities. Topics include the project development sequence; conceptual and space planning; architectural design criteria, construction management; and the interpretation of architectural design and consultant drawings. Emphasis is on setting appropriate facilities requirements, understanding industry practice, and implementing properties decisions within a balanced design, operations, and financial framework.

H ADM 350 Real Estate Management
Fall. 3 credits. Elective. J. deRoos.
Designed for students interested in the management of residential and commercial real estate. Overview of real estate economics, the relevant law, and different aspects of property management including lease and management contracts, accounting and finance, staffing, and building operations. Case studies and a term project focus on the dynamics of operating real estate assets.

H ADM 351 Hospitality Facilities Design
Fall. 4 credits. Prerequisite: H Adm 255 or 751 or permission of instructor. Elective. R. Penner.
A lecture-studio course dealing with property development, planning, and design by focusing on the interpretation and analysis of hotel plans. Students learn basic graphic techniques and apply them to planning problems for hospitality facilities. Final project.

H ADM 352 Hotel Planning and Interior Design
Spring. 3 credits. Field trip, $200; drawing supplies, $75. Limited to 12 students. Prerequisite: H Adm 351. Elective. R. Penner.
A project course concerned with hotel planning, interior design, and renovation. Students establish the operator's criteria for the renovation of hotel guestrooms and public areas, prepare budgets, and develop preliminary conceptual designs leading to a substantial graphic presentation. Drawing ability is essential.

H ADM 353 Food Service Facilities Design
Spring. 3 credits. Limited to 18 students. Prerequisites: H Adm 351 and 335 (co-registration is allowed) or food service experience is recommended. Elective. M. Redlin.
An introduction to the basic concepts of food service facilities design and planning. Students will determine space allocations for kitchens and their support areas; develop basic production work flow in the preparation and service areas; and select equipment utilizing standards for production capability, quality of construction, and ease of maintenance. Students will use studio time for planning, designing, and writing specifications for a medium-size restaurant kitchen.

H ADM 354 Computer-Aided Design
Fall and spring. 2 credits. Limited to 18 students per lecture. Prerequisite: H Adm 351 or equivalent studio experience. Attendance at first class is mandatory. Elective. S. Curtis.
The operation of microcomputer-based computer-aided design (CAD) systems. Using AutoCAD on the IBM PC, the course presents an organized and logical sequence of commands, mode settings, drawing aids, and other characteristics of CAD. Students will learn the program in the school's computer center and will develop a complete graphic presentation. Emphasis is on the use and operation of CAD systems in a commercial document production environment.

H ADM 355 Hospitality Facilities Operations
Fall. 3 credits. Prerequisite: H Adm 255. Required. M. Redlin, D. Stipanuk.
An overview of the operation of hospitality facilities, including operating costs for various types of facilities, types and characteristics of major building systems, and the responsibilities of the engineering-maintenance departments. The renovation needs of hospitality facilities are examined and key managerial aspects of renovations considered.

H ADM 356 Hospitality Risk Management
Spring. 3 credits. Limited to 30 hotel school juniors, seniors and graduate students. Elective. D. Stipanuk.
Risk management within the hospitality environment as applied to issues of control and risk financing. Issues in fire protection, customer and workplace safety, OSHA requirements, and customer and corporate security are analyzed. Basic elements of insurance and crisis management are discussed.

H ADM 357 Insurance and Risk Management
Fall and spring. 3 credits. Limited to 75 students per lecture. Prerequisite: an introductory accounting or business course. Elective. A. Klausner.
A comprehensive look at risk management within a general business or institutional environment. Reviews insurance and non-insurance solutions to controlling loss, the general legal environment within which risk management processes work, and the integration of crisis management into the overall corporate risk management plan.

H ADM 450 Principles of Real Estate
Fall. 3 credits. Limited to juniors and seniors. Elective. J. Corgel.
Approaches real estate from four perspectives: legal, economic, financial, and business. Understanding these perspectives will enable students to make better investment and financing decisions, to use real estate resources wisely, to understand public-policy issues, and to be prepared for additional courses in real estate investment, finance, and development.

H ADM 454 Advanced Computer Aided Design
Spring. 3 credits. Limited to 18 students. Required. S. Curtis.
Computer aided design has grown beyond its traditional use as a tool to draw contract documents. This course will give students an understanding of the more advanced capabilities of AutoCAD, including raster image support, OLE, 3D surface and solid modeling and photorealistic rendering. The availability and capabilities of "third party" plug-ins to AutoCAD will also be explored. There will be weekly projects as well as a final project.

H ADM 455 Special Topics in Properties Management-Sustainable Development and Ecotourism
Fall. 3 credits. Optional field trip, $425 plus travel costs. Limited to juniors, seniors and graduate students. Elective. D. Stipanuk.
A multi-disciplinary investigation of issues surrounding ecotourism and sustainable development. Topics include the concept of sustainable development as applied to the tourism industry, environmental issues affecting the sustainability of tourism

developments, as well as linkages between ecotourism and sustainable development, planning, development, and management of ecotourism projects. We will also explore methods used to reduce the environmental impacts of traditional tourism projects. Optional field trip over winter break.

H ADM 456 Hospitality Facilities Management
Spring. 3 credits. Prerequisite: H Adm 355, 751, or permission of the instructor. Elective. D. Stipanuk.
A managerial approach to hospitality facilities addressing issues of owning and operating, cost management, facilities services and delivery systems management, governmental regulatory compliance, and emerging issues. Emphasis on environmental issues such as indoor air quality, waste management, and energy conservation. Extensive use of the World Wide Web.

H ADM 457 Advanced Development and Construction
Fall. 3 credits. Overnight field trip, $175. Limited to juniors with permission, seniors and graduate students. Elective. D. Stipanuk.
Focuses on the management structure and systems, laws, regulations, and industry practices that most influence the successful development of commercial and residential real estate, including lodging and eating facilities. Topics include scheduling, budgeting, managing other professionals, and analysis of alternative materials and methods. Guest speakers, case studies, and group project.

H ADM 458 Hospitality Real Estate
Spring. 3 credits. Prerequisite: H Adm 323, 450, or permission of instructor. Elective. J. Corgel.
Expands the student's understanding of the role of real estate in individual hospitality businesses and corporations. Designed for those who plan careers in the hospitality industry. Specific objectives are to develop an appreciation of real estate as a factor in the production of income for hospitality businesses; to develop an appreciation of real estate as an asset that can be managed, sold, and otherwise used to increase the wealth of hospitality corporation shareholders; and to understand the importance of valuing real estate, and the approaches to valuation and contemporary hospitality valuation issues.

H ADM 459 International Development
Spring. 3 credits. Limited to 25 seniors and graduate students. Elective. J. Clark.
A seminar course covering the strategic development of international hospitality projects. Topics will include corporate expansion strategies; the international development process; viewpoints of public and private stakeholders; and such development challenges as technology, infrastructure, environmental concerns, and public policy issues. Senior corporate guest lecturers will present and discuss new projects in such locations as Hawaii, Mexico, western and eastern Europe, Southeast Asia, and Latin America and contrast these opportunities with development in the U.S.

H ADM 651 Principles of Real Estate
Fall. 3 credits. Limited to graduate students. Elective. J. Corgel.
This survey course approaches real estate from four perspectives: investment, market, mortgage finance, and legal. Understanding these perspectives will enable students to make better investment and financing decisions, to use real estate resources wisely, to understand public policy issues, and to be prepared for additional courses in real estate investment, finance, and development. This course includes much of the material in H ADM 450 plus special topic sessions that feature guest speakers from the industry, faculty from other colleges, and case studies.

H ADM 658 Advanced Real Estate
Spring. 3 credits. Prerequisite: H Adm 323, 450 or 651. Elective. J. Corgel.
Promotes sound real estate investment and finance decision making through the use of advanced theory and techniques in financial economics. Real estate investment decisions are made through applications of the after-tax discounted cash flow model which incorporates prevailing domestic and international economic conditions in real estate markets, tax rules, and government regulations. Financing decisions are made using the techniques of modern financial analysis. A wide array of financing options is considered including convertible, participating, and accrual mortgages. All types of residential and non-residential real estate are analyzed; however, special emphasis is placed on the analysis of hospitality properties.

H ADM 751 Properties Development and Planning
Spring. 3 credits. Professional master's requirement. Faculty.
Provides an overview of project development, hotel planning, and the construction process, including the role of the development team, feasibility, functional planning and design, interpretation of architectural drawings, architectural and engineering criteria, construction management, contracts, and scheduling. Student teams will prepare the program documentation for a new hotel or one undergoing major rehabilitation in conjunction with other professional master's core courses.

COMMUNICATION COURSES

H ADM 165 Managerial Communication I
Fall and spring. 3 credits. Each lecture limited to 16 students. Note: Students required to take this course generally may not delay it. If extenuating circumstances exist, student must petition to drop the course by the end of the first week of classes. This course must be taken within the first two semesters, including any ITD semesters. Required. S. Jones, faculty.
An introduction to the role and importance of effective communication in managerial work, especially in the hospitality industry. Development of abilities in analytical thinking and clear written expression. The process of planning, preparing, and executing professional communications with an emphasis on written documents. Students write a series of business documents and give several oral presentations.

H ADM 266 Intermediate French: Le Francais de l'Hotellerie et du Tourisme
Spring. 3 credits. Limited to 15 students. Prerequisite: French 123 or permission of instructor. Elective. A. Grandjean-Levy.
Offers continuing study of the French language with specific emphasis on the hospitality industry. Material presented considers cultural, geographic, economic, historical, political, and social contexts within which the business functions. The course is conducted in French, emphasizing a conversational approach. Specialized situations and vocabulary are used in building general competence in practical usage. Students with special interest in the hospitality industry will be given priority for admission.

H ADM 364 Advanced Business Writing
Fall and spring. 3 credits. Limited to juniors, seniors, or graduate students, or written permission of instructor. Prerequisite for undergraduates: H Adm 165 (for hotel school students) or completion of student's freshman writing requirement. Elective. Faculty.
Focuses on the written communication that requires special persuasiveness and control of tone. Writing assignments will give students a chance to apply the theories of communication, semantics, and human relations covered in the course. The kinds of communications that will be analyzed, evaluated, and written include persuasive messages to subordinates and superiors in an organization; sales letters and other promotion materials; and negative messages such as refusals, rejections, and responses to complaints. A major topic is the planning and executing of a job-hunting campaign, for which students prepare résumés, letters of application, and follow-up messages adapted to their individual needs.

H ADM 365 Managerial Communication II
Fall and spring. 3 credits. Limited to 22 juniors and seniors per lecture. Note: Students required to take this course generally may not drop it; however, students may be allowed to drop before the first class meets if the area has a wait list and the vacancy can be filled. Students may drop between the first and second class if they 1) check first with the course chair, and 2) can find a replacement for their place in the course. Students may not drop after the second class unless they petition and present a case of extenuating circumstances. It is expected these cases would be rare. Prerequisites: Hotel undergraduates must have completed H Adm 165 and H Adm 115. Required. N. Dahl, faculty.
A broad study of communication in a management context. Emphasizes the significant role of communication in developing work relationships that enable managers to achieve their goals. It presents the theories and principles of communication that underlie effective performance. Students increase their individual communication abilities by applying these concepts in a variety of managerial contexts, including interacting one-to-one, working in groups, and formally developing and presenting ideas to larger audiences.

H ADM 462 Communication and the Multicultural Organization
Fall. 3 credits. Elective. Faculty.
Influence of culture, perception, and gender on communication in multicultural organiza-

tions, including international and domestic businesses with diverse work forces. Focus is on human interaction at work. Special emphasis on hospitality industry. Topics include values and beliefs, how race and gender affect language use, cultural differences in nonverbal communication, ethnocentrism and stereotyping, intercultural sensitivity and adjustment, cultural variables, persuasion, and ethics of communication in international business.

H ADM 463 Persuasive Communication in Organizations
Spring. 3 credits. Limited to 18 students. Prerequisites: H Adm 165 and 365 for hotel school undergraduates, or permission of instructor. Elective. Faculty.
Prepares students to communicate effectively in a variety of persuasive speaking contexts. Principles of persuasion will be thoroughly examined as they apply to managerial communication tasks. Emphasis on persuasive speaking; also relationship between written and oral communication. Studies the principles of persuasion, analyzes case studies in the hospitality industry, and applies persuasive strategies in simulated workplace settings.

H ADM 661 Organizational Communication For Managers
Spring. 3 credits. Elective. Faculty.
Focuses on the complex interactions that occur when people communicate in organizations. Structured around the communication tasks managers must accomplish to be effective on the job. Business cases. Emphasis on design of effective communication strategies. Applications and experiential exercises help students perfect their ability to write, make oral presentations, and interact effectively with others in mangerial contexts.

H ADM 761 Communication Mini-Courses
Fall. Variable credits. Limited to MMH students. Elective. D. Jameson, faculty.
Note: These are two separate seven-week courses. Students may enroll in Lecture 1 or Lecture 2 or both. Lecture 1—Business Writing (first 7.5 weeks); Lecture 2—Presentational Speaking (second 7.5 weeks).

These mini-courses assist students enrolled in the Master of Management in Hospitality Program in developing their communication skills, improving their communication assignments in other core courses, and meeting the program's required writing and speaking.

OPERATIONS MANAGEMENT, INFORMATION TECHNOLOGY COURSES

H ADM 170 Keyboarding for Windows
Spring. 2 credits. Limited to 30 students. Elective. B. David.
An introduction to the computer and a beginning course in alphabetic and numeric keyboarding. Students learn word-processing skills during the second half of the course.

H ADM 174 Microcomputing
Fall and spring. 3 credits. Limited to hotel school freshmen and transfers. Limited to 30 students per lecture. Required. R. Alvarez, P. Clark, M. McCarthy, R. Moore, M. Talbert.
This course is designed to aid students in building functional computer literacy. Students will develop their skills in five generic areas: text, graphics, spreadsheet, presentation, and listing processing. This portion of the class is taught in the Binenkorb computer lab, where students work with Microsoft Office and the Internet. In addition, students learn introductory statistical concepts, including descriptive statistics, correlation, and regression analysis. Course material is presented through a combination of lectures and labs.

H ADM 274 Microcomputing
Spring. 3 credits. Limited to 30 non-hotel students per lecture. B. David.
An introduction to microcomputing to develop functional computer fluency. Students will develop their skills in five generic areas: text, graphics, spreadsheet, presentation, and file processing. The course is entirely lab-oriented and students work in both Mac/OS and Windows. Software used is Word, Excel, Powerpoint, Filemaker. Students will use the Internet.

H ADM 371 Hospitality Quantitative Analysis
Fall and spring. 3 credits. Required. G. Thompson.
Introduces statistical and operations research methods appropriate for the hospitality industry. The overriding goal is to provide students with the skills and understanding necessary for decision making using quantitative data. Students will use computer spreadsheet software extensively for the "number crunching" analysis.

H ADM 474 Corporate Information Systems Management
Spring. 3 credits. Limited to juniors, seniors, and graduate students. Elective. R. Alvarez.
Explores ten key issues in information technology management through use of case studies of companies who have relevant experience with the issues. A basic understanding of information technology, organizational behavior, and general management is advised.

H ADM 475 Information Technology in the Hospitality Industry
Spring. 3 credits. Limited to 30 students in each section. Prerequisites: all other required core courses, except for students concentrating in information technology. Required. R. Moore.
A three-tiered course, with each tier lasting five weeks. Tier 1 covers information technology management issues. Prior to taking Tier II, students will be required to pass a proficiency test of microcomputer skills taught in H ADM 174. Students will update their skills and learn more advanced features, with emphasis on database and model building skills. In Tier III, students select one of a series of modules, such as hotel systems, food service systems, management of information technology systems, or electronic commerce.

H ADM 674 Service Operations Management
Fall and spring. 3 credits. Limited to 25 graduate students. Prerequisite: H Adm 175, 371, 771 or equivalent. Elective. G. Thompson.
The objective of this course is to improve the understanding of the operations function of service organizations. Focuses on the role and nature of service operations, the relationship of operations to other business functions, and develops skills and provides techniques for the effective management of service operations. Topics include service design, bottleneck and layout analysis, capacity management, work force management, and quality management. Intended for graduate students interested in services management.

H ADM 675 Yield Management
Fall and spring. 3 credits. Limited to 30 students. Prerequisites: H Adm 175, 771, or equivalent. Elective. S. Kimes.
Students learn how to effectively apply the principles of yield management. Focuses on the integration of yield management techniques with information technology, internal management issues, and external marketing concerns. Topics include yield management techniques, forecasting, overbooking, group decisions, and management and marketing issues.

H ADM 676 Restaurant Revenue Management
Spring. 2 credits. First seven weeks. Letter grade only. Limited to 30 graduate students, or by permission of the instructor. Prerequisite: H Adm 771 and 741. Elective. S. Kimes.
Revenue management is a method for profitably managing capacity. The objective of this course is to help students learn how to apply the principles of revenue management to restaurants. The course focuses on methods of managing duration and price with the intent of maximizing revenue per available seat-hour. Topics to be covered include forecasting, overbooking, reservations systems, information technology, process design, pricing, and management and marketing issues.

H ADM 771 Graduate Quantitative Methods
Fall. 3 credits. Professional master's requirement. S. Kimes.
Covers statistical and operations research techniques which can be applied to the hospitality industry. Topics include descriptive statistics, probability, sampling, correlation and regression, forecasting and yield management.

H ADM 772 Information Technology for Hospitality Managers
Fall. 3 credits. Professional master's requirement. R. Moore.
Familiarizes students with issues surrounding the use of information technology in supporting hospitality operations from a guest services perspective and decision making from the viewpoint of management.

LAW COURSES

H ADM 385 Business Law I
Fall and spring. 3 credits. Limited to juniors, seniors, and graduate students outside the hotel school, and hotel students by permission of the instructor. Elective. P. Wagner.
Designed to enable students to acquire a basic understanding of law and legal relationships in a business context. Variety of topics aid in making decisions as an executive with managerial responsibilities.

H ADM 387 Business and Hospitality Law
Fall and spring. 3 credits. Limited to juniors, seniors, and graduate students. Required. D. Sherwyn.
An integrated, chronological presentation of contract, agency, and tort concepts as they apply to the legal aspects of hospitality management. Appropriate federal, state, and local cases, statutes, and other materials are examined. The overall objective is to recognize, analyze, and evaluate legal issues for the purpose of making and articulating appropriate decisions.

H ADM 485 Employment Discrimination Law for Managers
Spring. 3 credits. Limited to juniors, seniors, and graduate students. Elective. D. Sherwyn.
Provides students with an understanding of anti-discrimination statutes and a framework for establishing the proper policies and procedures for complying with the law, avoiding liability, and maintaining positive employment relations.

H ADM 487 Real Estate Law
Fall and spring. 3 credits. Recommended: completion of H Adm 387 preferred. Elective. A. Klausner.
Familiarizes students with the nature and ownership of real estate. Describes interests in real estate and how title is transferred. Acquaints students with legal aspects of marketing residential and commercial real estate, including shopping center and commercial leases, real estate syndication, and subdividing real estate for development.

H ADM 681 The Interplay of Law and Ethics in Service Industry Management
Spring. 3 credits. Limited to 50 hotel graduate students; seniors and other graduate students by permission of instructor. Prerequisite: completion of all required professional master's first-year courses, or permission of instructor. Elective. Faculty.
Involves students in ethical aspects of traditional law problems confronting service industry managers and executives within the areas of commerce, consumerism, administrative law and practice, regulation of anti-competitive marketing activities, and federal securities regulation. The impact of the corporation on traditional notions of personal social responsibility will be stressed.

OTHER COURSES

H ADM 191 Microeconomics for the Service Industry
Fall and spring. 3 credits. Limited to 60 hotel school students per lecture, others by permission of instructor. Required. M. Conlin, J. Wissink.
Introduces the basic principles of microeconomics and teaches students how they apply to managers of enterprises associated with the hospitality industry. Emphasis on methods of market segmentation in the service industries, analyzing economic incentives involved in franchise arrangements, and the nature of competition in various segments of the hospitality industry.

H ADM 490 Housing and Feeding the Homeless
Spring. Variable to 4 credits. Limited to juniors and seniors. Elective. T. O'Connor.
Explores the public and private sector partnership in addressing the crisis of homelessness. Through lectures, readings, discussions, research, volunteerism, and a field placement practicum, students will explore the economic, social, and political issues of our country's concern with housing and feeding homeless people. Students will study the history of homelessness and the strategies to prevent and alleviate the problem. The components of successful housing programs and food assistance programs will be analyzed.

Students taking the course for four credit hours will, in small groups, work with agencies providing services to homeless persons. They will analyze the agency's mission, identify a specific managerial challenge, and formulate an approach and solution to that challenge. This fieldwork will require approximately eight days during the semester.

Students taking the course for three credit hours will research and write a term paper about some aspect of homelessness and volunteer with a service agency approximately three hours per week during the semester.

H ADM 491 Hotel Ezra Cornell
Fall and spring. Variable credit (maximum, 4). Prerequisite: written permission. Elective. Y. Kerr-Donovan.
Elected board members of Hotel Ezra Cornell receive credit for academic coursework, and the development, organization, and management of the April "Hotel-for-a-Weekend." Students who are considering a board position may pre-enroll for the course and should speak with the instructor for additional information about board positions and required coursework. Elections will take place in April after Hotel Ezra Cornell Weekend, at which time the HA 491 course enrollment will be finalized. Further information is available in the Student Services Office, 178B Statler Hall.

H ADM 493 Management Intern Program I—Operations
Fall and spring. 6 credits. Limited to hotel school juniors and seniors with approval of the MIP faculty committee. Prerequisites: Students are expected to have completed H Adm 105, 115, 211, 121, 221, 222, 136, 236, 243, 255, 165, and 174. In addition, completion of the following courses is strongly recommended: H Adm 301, 321, 335, 355, and 365. Additional course work might be required for applicants considering specialized internships. A detailed plan for the completion of all remaining academic requirements must be approved prior to acceptance into the course. Must be taken in conjunction with H Adm 494. S-U grades only, based on six performance evaluations. Elective. R. Chase.

H ADM 494 Management Intern Program II—Academic
Fall and spring. 6 credits. Must be taken in conjunction with H Adm 493. Letter grades only, based on submission of goals and objective statement, four management reports, journals, debriefing, and oral presentation. Elective. R. Chase.

H ADM 495 Development and Management of Wellness in Business Organizations
Spring. 3 credits. Limited to juniors, seniors, and graduate students. Field trip, $25–50. Elective. M. Tabacchi.
Designed to encourage future managers to evaluate the work environment and to enhance opportunities for diverse worker productivity which should increase the corporation's competitive edge.

H ADM 499 Undergraduate Independent Study
Fall and spring. Variable, to 4 credits. Elective. Faculty.
Students are afforded an opportunity to pursue independent study projects under the direction of a resident faculty member. Permission in writing is required prior to course enrollment. Obtain permission form from the Hotel School Student Services Office. Independent study work must be performed in the term for which it is approved, and the usual add/drop policy applies. Retroactive credit for work commenced after an academic term has ended is not allowed.

H ADM 690 Honors Monograph
Year-long course. 4 credits. Limited to professional master's students who: 1) either have a minimum GPA of 3.7 or are in the top 10 percent of the students in the year group in their first-year professional master's courses; 2) have given evidence of being a good writer by meeting all components of the written communication benchmark; and 3) obtained the approval of a brief topic proposal from the potential adviser. Elective. Faculty.
A special integrative course for students who write well and desire to explore in depth a topic of mutual interest to them and a faculty adviser of their choice. The approval of a second reader is required for completion of the course. Special recognition of students who complete the course will be made at graduation. Applications available in the Graduate Office, Room 172 Statler.

H ADM 692 Industry Challenges and Trends
Spring. 3 credits. Limited to 15 seniors and graduate students. Elective. J. Clark.
A seminar approach will be used to discuss readings and case studies selected to illustrate current challenges and future trends such as globalization, consolidation, etc., in the hospitality industry. The view will be futuristic and primarily from that of a multi-unit/corporate perspective. An in-depth analysis of a few specific companies will be included using case studies and guest lecturers when appropriate. Student teams will research new topics and make presentations and final reports.

H ADM 699 Graduate Independent Research
Fall and spring. Credit to be arranged. Elective. Faculty.
Student must have in mind a project and obtain agreement from an individual faculty member to oversee and direct the study. Permission in writing is required prior to course enrollment. Obtain permission form from the Hotel School Graduate Office, Room 172, Statler.

H ADM 791 Creating and Managing for Service Excellence
Fall. 3 credits. Professional master's requirement. L. Renaghan.
Covers the complex management practices and concepts necessary to deliver consistent value in the hospitality industry (determining customer expectations; integrating marketing into operations; managing customer satisfaction; and measuring and controlling costs). Cases, lectures, discussion and industry experts will be used, with emphasis on translating the strategic understanding of value into management practice.

H ADM 793 Industry Mentorship Program
Spring. No credits. S-U grades only. Professional master's requirement. M. Redlin.
Interaction with a senior hospitality industry executive. Objectives are to give the student an overview of the operating dynamics of a segment of the industry, to provide a realistic awareness of day-to-day life working as an executive in the industry, and to develop an awareness of the skills, level of integration, and other factors required for success.

H ADM 794 Management Development
Year-long course. No credits. S-U grades only. Professional master's requirement. D. Jameson.
Students must register for the first three semesters, and they will get a grade at the end of each semester. Second semester students must keep the times listed above open for team project meetings. All students in the Master of Management in Hospitality Program must enroll for HA 794. This requirement includes participation in the MMH Assessment Center, program benchmarking, and other activities related to students' communication development and assessment.

H ADM 890 M.S. Thesis Research
Fall and spring. Credit to be arranged.

H ADM 990 Ph.D. Thesis Research
Fall and spring. Credit to be arranged.

FACULTY ROSTER

Alvarez, Roy, M.Ed., Auburn U. Lecturer
Arbel, Avner, Ph.D., New York U. Prof.
Austin, Jon R., Ph.D., U. of Wisconsin-Madison. Asst. Prof.
Berger, Florence, Ph.D., Cornell U. Prof.
Brownell, Judith, Ph.D., Syracuse U. Prof., and Richard J. and Monene Bradley Director of Graduate Studies
Bryson, Susan, M.A., U. of Chicago. Lecturer

Tabacchi, Mary H., Ph.D., Purdue U. Assoc. Prof.
Thompson, Gary M., Ph.D., Florida State U. Assoc. Prof.
Tracey, J. Bruce, Ph.D., SUNY Albany. Asst. Prof.
White, Robert, A.O.S., Culinary Institute of America. Teaching Support Specialist

Visiting and Other Teaching Staff

Blanchard, Kenneth, Ph.D., Cornell U. Visiting Assoc. Prof.
James, Robert, M.B.A., Pace U. Visiting Lecturer
Merberg, Elliot, B.S., New York U. Visiting Lecturer
Sciarabba, Andrew, B.B.A., St. John Fisher College. Adjunct Assoc. Prof.
Shankar, Gowri, Ph.D., Syracuse U. Visiting Assoc. Prof.
Yesawich, Peter C., Ph.D., Cornell U. Visiting Assoc. Prof.

COLLEGE OF HUMAN ECOLOGY

ADMINISTRATION

Patsy M. Brannon, dean

D. Merrill Ewert; director of Cornell Cooperative Extension

Jennifer Gerner, associate dean

Charles McClintock, associate dean

S. Kay Obendorf, associate dean

Brenda Bricker, director, undergraduate affairs

Darryl Scott, director, admissions

Duncan Bell, college registrar

FACILITIES

The College of Human Ecology anticipates and responds to human needs in the areas of nutrition and health, economic and social well-being, environmental design and technology; as well as human development through education, basic and applied research, and the extension of knowledge. The college is distinctively characterized by the quality of its research in the natural and social sciences and the design arts, a global perspective in academic programs, a preventive approach to contemporary societal problems, multidisciplinary departments and programs, development of leadership in students and citizens, and a commitment to diverse populations. Faculty and students examine individuals in relation to their family, neighborhood, workplace, and community, seeking a balance between theory and practice that will improve the quality of everyday life.

The college is housed in Martha Van Rensselaer Hall. The Division of Nutritional Sciences, an intercollege division supported jointly by the College of Human Ecology and the College of Agriculture and Life Sciences, has space in Savage and Kinzelberg Halls and in Martha Van Rensselaer Hall.

The buildings include administrative and faculty offices, classrooms, auditoriums, galleries and lecture halls; wet chemistry and biochemistry laboratories for nutrition, food science, and textile science; experimental food laboratories; design studios and computer-aided design laboratories; woodworking shops; experimental observation rooms with one-way vision screens and sound-recording equipment; human factors and infant research facilities; educational television studios; and an audio/visual classroom for distance learning. Also included are learning resource centers for career planning, field and international study, a historical costume collection, a human metabolic research unit, a animal research facility, cold rooms, a constant temperature and humidity laboratory, and an early childhood research and care program.

Specialized equipment for teaching and research includes biochemical and chemical instruments for spectroscopy, chromatography, radioisotope analysis, electrophoresis, microscopy, and ultracentrifugation; physical testing equipment; and cameras, videotape, and sound recording equipment.

DEGREE PROGRAMS

	Degree
Biology and Society	B.S.
Design and Environmental Analysis	B.S.
Human Development and Family Studies	B.S.
Human Biology, Health and Society	B.S.
Nutritional Sciences	B.S.
Policy Analysis and Management	B.S.
Textiles and Apparel	B.S.
Individual Curriculum	B.S.

UNDERGRADUATE AFFAIRS

Brenda Bricker, director

Duncan Bell, college registrar

Persons interested in undergraduate study in human ecology should contact the admissions office, 170 Martha Van Rensselaer Hall. Those interested in graduate study should contact the graduate field representative identified among the faculty of each department. Department faculty are listed at the beginning of the course descriptions for each department.

Counselors in the Office of Admission, Student, and Career Services (172 MVR) can help perspective students understand college programs and requirements, as well as College and University resources and services. They provide a broad range of career services and personal support for all matriculated undergraduates. The college registrar (145 MVR) assists undergraduates with questions on academic credit and graduation requirements.

The Students

The College of Human Ecology undergraduate enrollment is 1,369 with 55 percent in the upper division. Roughly 360 students graduate each year; last year 255 freshmen and 188 transfer students matriculated. Nearly one hundred faculty members serve as advisers to undergraduates.

The college's undergraduate admissions committee selects applicants who are academically well prepared and appear most likely to profit from the college's various curricula. Admission is selective. Approximately 73 percent of the student body comes from New York State, with the remainder coming from other parts of the United States and abroad. In 1998 27 percent were identified as members of minority groups. Approximately 209 graduate students have members of the college's faculty chairing their special committees. The college awarded 59 master's degrees and 29 doctorates last year.

ACADEMIC PROGRAMS

Majors

Selection of a major begins with identifying of career goals. In their freshman and sophomore years, students can explore ways to relate their personal interests and capabilities to their career goals. As a result, they sometimes decide to change their major. The director of career services and other counselors in the Office of Admission, Student, and Career Services (172 Martha Van Rensselaer Hall) and resources in the Career Development Center (159 MVR) can help students through their career exploration process.

Each department offers a major, and within most departmental majors there are specific options. The college also offers two interdepartmental majors. Selecting a major means choosing one option in one department. A student may satisfy the requirements of more than one major option. (The college urges students who satisfy more than one major or option to make note of this in the credentials they file in the university's Career Center and to seek recommendations from faculty associated with the options completed.) Majors include the following options:

Design and Environmental Analysis (DEA): Interior design, facility planning and management, human factors and ergonomics.

Human Biology, Health and Society (HBHS): A major sponsored by Division of Nutritional Sciences, HBHS combines the biological sciences with courses that explore human health issues from the perspectives of both the biological and behavioral science. More information about this program can be found in a separate section of the catalog that describes the division's programs.

Human Development (HD): Does not have separate options. Courses focus on cognitive, social, and personality development; phases of development; and family studies and life course. The department administers an honors program for selected students.

Nutritional Sciences (NS): This division supervises this major and HBHS (above). (With careful planning, students may also meet the minimum academic requirements of The American Dietetic Association.) The division administers an honors program for selected students.

Policy Analysis and Managment (PAM): The department offers a major in policy analysis and management.

Textiles and Apparel (TXA): Apparel design, apparel-textile management, fiber science.

Interdepartmental Major in Biology and Society (ID-BS).

Individual Curriculum: It is possible to develop an individual program of study if none of the above programs fit particular educational and career objectives.

Changing Majors

Because any student's interests and goals may change as new options emerge, the college provides ways for students to change their majors. It is important for a student to discuss a possible change of major with her or his faculty adviser or counselor. If the student decides to make a change, a completed change-of-major form (available from the Office of Admission, Student, and Career Services, 172 Martha Van Rensselaer Hall) or from the Office of the Registrar (145 MVR) will officially record the change so that a new adviser can be assigned to the student.

Students of Mature Status

The college recognizes that students who interrupted their formal education and are returning to school have needs different from those of younger undergraduates. To facilitate the education of mature students, defined as those twenty-four years old or older at first matriculation, the college has adopted certain procedures specifically for that group. Counselors in the Office of Admission, Student, and Career Services (172 MVR) can provide information of interest to mature students.

Mature students are permitted to enroll for as few as 6 credits without petitioning for permission and also are permitted to extend their residency beyond the normal eight terms.

Special Students

Students eligible for special status are those visiting from other institutions and interested in particular programs in the college; those with a bachelor's degree preparing for graduate study or jobs and careers in human ecology–related fields; or those who have interrupted their education and are considering completing degree programs. Students accepted in the non-degree status of special student may enroll for a maximum of two semesters. During the second semester of attendance, a special student must either apply for admission as a transfer student or plan to terminate studies in the college at the end of the semester.

Special students are expected to take a minimum of 12 credits each semester and to take one-half to two-thirds of their work in the state divisions of the university. Work taken while a person is classified as a special student may be counted toward the requirements of the bachelor's degree. Those interested in becoming special students should make appointments to discuss admission procedures in the Office of Admission (170 MVR).

Empire State Students

Occasionally a student who is completing requirements for a degree through the Empire State College Program is interested in taking a human ecology course. This can be done by registering through the Division of Summer Session, Extramural Study, and Related Programs, B20 Day Hall. All rules of the extramural division apply, and registrations will be accepted only on a space-available basis and with the written approval of the course instructor.

At the time of registration, Empire State College students provide the extramural division with a completed copy of Empire State College's notification of cross-registration form number, SA-22, F-031, to verify enrollment in Empire State College. Such students will be charged 25 percent of the standard extramural tuition per credit.

DESIGN AND ENVIRONMENTAL ANALYSIS

The Department of Design and Environmental Analysis (DEA) is concerned with planning, designing, and managing interior environments to satisfy human needs. Most people spend over 90 percent of their lives inside buildings. Those settings have substantial and far-reaching effects on the quality of our lives. The processes for creating and maintaining the built environment face enormous challenges, including frequent social and organizational changes, technological advances, new building methods, and finite resources. The program in DEA is dedicated to preparing professionals who can meet these challenges.

Diverse faculty backgrounds and teaching approaches help students to develop multidisciplinary problem-solving and creative abilities, aesthetic judgment, and analytical thinking. Excellent laboratory, shop, studio, and computer facilities permit exploration of innovative concepts for the design and management of interior environments. The relationship between people and their physical surroundings is explored through a combination of academic courses, field experience, and applied research. Examples of student class projects and faculty work are frequently on display in the department's gallery. The DEA Resource Center includes books, journals, newsletters, and material samples for student use.

Options

The department offers undergraduate education in three professional areas: interior design, facility planning and management, and human factors and ergonomics. The interior design option is accredited by the Foundation for Interior Design Education Research (FIDER). The Facilty Planning and Management Program at Cornell is an "IFMA Recognized Program." This means that it meets the standards for recognition of programs established by the International Facility Management Association.

To take full advantage of the course sequences and electives, it is important to select an option as early as possible. This is particularly true in the interior design option. Transfer students in the interior design option may need one or two extra semesters to complete the program.

Option I: Interior Design

The interior design option prepares students for professional careers in the planning and design of interior spaces and associated products. The program emphasizes a problem-solving approach based on knowledge of buildings and their associated systems, furnishings and interior products, human-environment relations, and design principles. Some students combine this program with another option.

Careers are available in interior design and space planning, interior architecture, facility planning, interior product design, and housing. This program also serves as an excellent preparation for graduate study in interior design, facility management, architecture, and product design.

Option II: Facility Planning and Management

This option is designed to prepare students for professional careers in facility management. The program focuses on the planning, design, and management of facilities for large, complex organizations such as corporations, health-care institutions, research and development laboratories, and universities. Facility planning and management is a basic management function that coordinates and integrates information and expertise from areas such as planning and design, real estate and business administration with human factors, ergonomics, environmental psychology, telecommunications, and building operations for the purpose of developing and managing facilities that support individual and organizational effectiveness.

Excellent career opportunities exist in the facility management divisions of private companies, institutions, the health-care industry, and with private consulting firms offering facility management services. The program is also a good preparation for graduate study in business, planning, or one of the design disciplines and for advanced study in facility planning and management.

Option III: Human Factors and Ergonomics

Human factors and ergonomics focuses on the interaction between people and their physical surroundings. This option seeks to expand understanding of how the environment affects human perception, cognition, motivation, performance, health, safety, and social behavior. This knowledge is then used to help architects, planners, interior designers and product designers and facility managers to plan, design, and manage safe and effective environments. The effect of human capabilities or characteristics such as family structure, life-style, social class, and stage in life cycle on environmental needs and requirements is also a focus of the program. Career opportunities are available in design firms and in urban planning and other public agencies as well as in the facility management and product design division of private companies. Human factors and ergonomics is good preparation for graduate study leading to a Ph.D. degree in the social sciences and a career in academic or other research-oriented settings in either the public or private sector. It can also serve as the basis for graduate study in an environmental planning or design discipline such as architecture, facility planning and management, interior design, landscape architecture, or city and regional planning. Electives in the social sciences and in research methods and statistics are encouraged.

Academic Advising

All DEA majors are matched with a faculty adviser during their first semester by the director of undergraduate studies, Paul Eshelman, in E304 Martha Van Rensselaer Hall.

Consultation with faculty advisers about future goals, departmental requirements, sequences of courses, and electives inside or outside the college helps students develop their programs.

Students majoring in interior design, especially, must begin early to plan and collect materials for a portfolio of their work, which is necessary for many positions and for application to graduate schools. Faculty advisers can make recommendations on what to include. Students are free to change advisers. Although advisers must sign the schedule card during course enrollment each term, it is the student's responsibility to keep track of his or her courses and to make sure that they meet graduation requirements for their major and college.

Ownership and Exhibition of Student Work

All design work done in studios as part of an academic program is the property of the department until it has been released by the instructor. The department is not responsible for loss or theft of student work.

HUMAN BIOLOGY, HEALTH, AND SOCIETY

The Human Biology, Health, and Society (HBHS) Program permits you to combine your interests in the biological sciences while exploring human health issues from the perspectives of both the biological and behavioral sciences. HBHS majors select the issues they want to explore in depth from Human Ecology courses that address health and the broad range of factors that influence human well-being. Examples of issues you can explore include: biology and behavior; metabolism, genetics, and health; biology, growth, and development; and food and health policy and health promotion. Most students in this program will proceed to programs of advanced study to pursue careers related to health. This new major is offered by faculty in the Division of Nutritional Sciences. More information about this program can be found in a separate section of the catalog that describes the division's programs.

HUMAN DEVELOPMENT

Human Development majors explore the psychological, social, cultural, and biological development of people from conception to old age, focusing on the processes and mechanisms of growth and change over the life course. A wide range of issues are included in the study of human development, including biological, cognitive, and emotional development; the role of family, neighborhood, workplace, and culture in development; and the influence that developing humans have on their environment. The Human Development major provides an excellent foundation for many careers, such as medicine (particularly family medicine, pediatrics, and psychiatry), clinical psychology and other mental health professions, law, business (especially human resources), child and family advocacy, and education (from preschool to high school teaching to school administration). The major prepares students for academic careers as professors in human development, psychology, or sociology departments. Learning about human development also helps students understand more clearly their own development and the development of those around them.

The faculty of the Department of Human Development comes from several disciplines, including developmental and clinical psychology, sociology, and history. The diversity of faculty expertise results in a wide-ranging view of human development. The research of the department's faculty is extensive. It includes basic research on issues such as the neurobiology of personality, the role of childhood attachments in the development of adult romantic relationships, the acquisition of language in infants, and the effects of environmental toxins on children's cognitive development. It also includes applied research useful for the creation of public policy, such as studies of the causes and consequences of child maltreatment and studies of the effectiveness of reading programs for Headstart preschoolers, apprenticeship programs for high school students, and support programs for older adults moving into retirement communities.

Curriculum

Human Development is the most flexible major in the College of Human Ecology. While all students learn the fundamentals of human development, each student can focus on one or more areas of particular interest. The flexibility of the major also allows students ample opportunity to meet the requirements for admission to many professional schools, including medical, dental, law, and business schools.

Requirements specified by the College of Human Ecology make up part of each student's curriculum, and include classes in the social and natural sciences, humanities, writing, and communication. In addition, there are requirements for the Human Development major. Students in this major can choose up to 14 elective courses from the broad range of offerings across the Cornell campus.

Special Opportunities

Beyond formal coursework, students have many other opportunities that involve ongoing individual work with Cornell faculty or other professionals. Academic credit can be earned through all of them. These opportunities include

Field Placements. Human Development majors can arrange internships with Urban Semester in New York City, Cornell-in-Washington, and Cornell Abroad programs and in local agencies. These have included hospitals, psychiatric hospitals, juvenile detention centers, retirement homes, and the department's on-campus Early Childhood Program. Students have also participated in projects with the Tompkins County Office of Aging, the Tompkins County Youth Bureau, and the Law Guardian's Office of Tompkins County.

Faculty Research. Many students work as research assistants on faculty projects. Students use research techniques ranging from laboratory procedures to family observations to large surveys. They assist in study design, data collection, and data analysis. Participation in faculty research provides the type of experience that many graduate and professional schools expect from their top applicants. Recent projects have included the study of parent-infant interactions, the transition of high school students to the world of work, and the study of recent trends in the composition of American families.

Independent Research. Under faculty supervision, some advanced students complete an honors thesis in an area of personal interest by designing a study and collecting and analyzing data. Recent thesis topics have included marital quality in Asian and interracial couples, development in families that adopt school-age children, and connections between speed of visual processing in infants and later scores on intelligence tests.

Undergraduate Teaching Assistant. Advanced students can serve as undergraduate teaching assistants. This requires close work with the professor teaching the course as well as with students taking the course.

Teaching Certification. A cooperative program with SUNY Cortland allows students interested in elementary education to graduate with a Cornell bachelor of science degree and then apply for New York State teaching certification, which is honored in most other states.

NUTRITIONAL SCIENCES

A major of Nutritional Sciences (NS) focuses on the complex interrelationships of food patterns, nutritional status, and health. This field draws upon chemistry, biology, and the social sciences to understand questions such as: How are nutrients used by the body? What factors influence human food choice? What nutrients and dietary patterns are recommended to promote growth, maintain health, or reduce the risk of chronic disease? Students in this program may also fulfill the courses required for professional membership in the American Dietetic Association, which will enable them to be employed as nutrition counselors, clinical nutritionists, sports nutritionists, or administrators of food and nutrition services. Students also may prepare for medical school and other types of advanced degree programs through this major. The requirements for this program are outlined in the section of this catalog that describes the division's programs.

POLICY ANALYSIS AND MANAGEMENT

The Policy Analysis and Management (PAM) major produces graduates skilled in policy analysis, program planning, and evaluation and possessing management skills applicable in the public, nonprofit, and private sectors. In addition, the Policy Analysis and Management graduate will have concentrated knowledge in one of three areas: family/social welfare, health, and consumer policy. Graduates are well-qualified for a wide variety of public, nonprofit, and private sector employment emphasizing either program analysis and evaluation or management. The major also attracts large numbers of pre-law students, pre-MBA students, and students intending to pursue graduate education in public affairs and policy analysis programs. The potential exists to pursue a five-year program resulting in a BS and a Master of Health Administration.

The PAM major combines theoretical underpinnings from economics, sociology, psychology, and government to critique and analyze our society's values, laws, policies, and programs. It also gives students the knowledge to build management skills for use in public, nonprofit, and for-profit settings. Ideas of social justice, equity, and efficiency will be studied concurrently with strategic planning, human resources, supervision, and organizational development. Research methods, statistics, and planning and evaluation concepts will be learned and used to direct and aid in program planning, policy analysis, program evaluation, and management.

In addition to learning basic policy analysis and management skills, the student will be expected to apply these skills to a particular concentration—social welfare/family, health, or consumer policy. Social welfare/family policy and management includes a panoply of governmental and private sector income maintenance, social, and human service delivery programs and policies that range from child adoption and child neglect and abuse policies and antipoverty programs to policies and programs that impinge on or regulate marriage, divorce, and fertility. Health programs and policies include such politically sensitive programs and issues as health care access, Medicare, Medicaid, long-term care, health maintenance organizations, public health issues, and substance abuse policies. Consumer programs and policies include the regulation and laws governing advertising, product safety, food and drug safety, nutrition policies, the regulation of credit, insurance, telecommunications, mortgage, housing issues, and public utility markets and also deal with issues such as the invasion of privacy, internet security, and children's TV. A specific focus in the consumer concentration is the role of marketing and its relationship to consumer well-being and consumer behavior.

In addition to college requirements, all PAM majors are expected to take core courses: Introduction to Management, Introduction to Policy Analysis, Research Methods, Multivariate Statistics, Intermediate Microeconomics, and Public Finance. Students will also be expected to develop a concentration of three courses in either social welfare/family, health, or consumer policy. These concentrations may emphasize either policy analysis or management skills. Finally, PAM majors will have the opportunity to participate in departmentally approved experiential learning. Please check with the undergraduate advising coordinator, Professor Alan Mathios, for further details.

TEXTILES AND APPAREL

The Department of Textiles and Apparel (TXA) focuses on the use of textiles and fibrous materials for apparel, durable and nondurable household goods, composites, geotechnical, and biomedical applications. Programs in the department, in keeping with the overall mission of the college, emphasize the use of materials to meet human needs. The curriculum includes the application of design principles, physical and materials science, economics and marketing, government policy/regulation, management of products and their delivery, and technological developments.

Practical problem-solving skills are developed in the department's laboratories and studios. Academic course work is further enhanced by field and international experiences. Gallery space provides the setting to display design work. In addition, the Cornell University Costume Collection, housed in the department, provides a valuable resource; items from the collection are made available to students for classroom and special-study use.

Academic Advising

All TXA majors are matched with a faculty adviser by the director of undergraduate studies, Anita Racine (316 Martha Van Rensselaer Hall). Students are strongly urged to discuss their goals, course selection and sequence, electives, and career plans with their faculty adviser. Students in apparel design must begin working with their advisers early to develop a professional portfolio of their work. Students are free to change advisers; changes must be recorded with the advising coordinator. Although advisers must sign the schedule card during course enrollment each term, it is the student's responsibility to keep track of his or her courses and to make sure that the program meets graduation requirements for their major and college.

Ownership and Exhibition of Student Work

All apparel design work done as part of the academic program is the property of the department until it has been released by the instructor. Certain exceptional work may be retained by the department to exhibit for academic purposes. The department is not responsible for the loss or theft of student work.

Course Fees

No grade will be given in a course unless the course fee has been paid by the last week of classes.

Options

Students may select options in apparel design, apparel-textile management, or fiber science. The curriculum is based on manipulation of form, color, and the physical characteristics and structures of fabric to solve functional and aesthetic apparel problems; the application of economic and marketing principles to consumer and industry problems in the textile-apparel sector; and the study of chemical, physical, and engineering properties of fibrous structures and polymers. Depending on previous course work, transfer students may need one or two extra semesters to fulfill the requirements of the major.

Option I: Apparel Design

The study of apparel design includes both functional and aesthetic considerations in the design of body coverings. The program emphasizes a problem-solving approach that enables the student to bring a background in apparel, textiles, and human factors to the design process.

Option II: Apparel-Textile Management

Apparel and textile management combines the fields of apparel and textiles with those of economics, business management, and organizational policy. Students combine theory with case studies to find solutions to everyday problems. Course work is drawn from many interrelated disciplines, including textiles, apparel, economics, business management, and communication, as well as practical field experiences. This provides students with the experience of working with professionals from a wide variety of disciplines. Students often combine this option with either Option I (Apparel Design) or III (Fiber Science).

Option III: Fiber Science

Applications for textile structures include advanced engineering composites, protective clothing for industrial and military environments, and biomedical materials, as well as the more traditional applications found in apparel and home furnishings. The fiber science option provides a strong base in mathematics and the physical sciences combined with supporting courses in engineering, consumer economics, and the social sciences.

Career Opportunities

Graduates of programs in the Department of Textiles and Apparel have found challenging employment within the textile and apparel sector, in independent and government-sponsored research, and in community organizations. Recent graduates are working in the fields of design, management, new product development, engineering, communications, and marketing. In addition, the program prepares students for graduate or professional study in fiber and polymer science, textile marketing, apparel design, textiles, or business and management.

INTERDEPARTMENTAL MAJOR IN BIOLOGY AND SOCIETY

Biology and society is a multidisciplinary program for students with special interests in such problems as genetic engineering, environmental quality, food and population, the right to medical care, and the relation between biology, society, and ethics and/or public policy, as well as for students who plan postgraduate study in management, health, medicine, law, or other related fields.

Because the biology and society major is multidisciplinary, students must attain a basic understanding of each of the several disciplines it comprises, by including introductory courses in the fields of biochemistry, chemistry, mathematics, genetics, ecology, ethics, and history. In addition, majors are required to take core courses in biology and society, a set of electives, and a special senior seminar.

Course work in the College of Human Ecology must be taken in two of the following three concentrations: human development and the environment, health, or social policy and human services. The other basic requirements of the college must also be met. Programs incorporating those required courses are designed in consultation with a faculty adviser to accommodate each student's individual goals and interests. For further information on the major, including courses of related interest, specific course requirements,

and application procedures, see the Human Ecology Student Guide, available in the Office of Admission, Student, and Career Services, 172 Martha Van Rensselaer Hall. Academic advising is coordinated by the director of undergraduate studies, Nancy Breen, 288 Martha Van Rensselaer Hall.

INDIVIDUAL CURRICULUM

A student who has educational and professional objectives that cannot be met satisfactorily within the framework of existing majors in the College of Human Ecology may petition to develop an individual curriculum. To be approved, the curriculum must be within the focus of the college and be interdisciplinary in design, include at least 40 credits in human ecology courses, and not exceed the normal number of credits allowed in the endowed divisions. A student develops an individual curriculum in consultation with faculty advisers from at least two subject-matter fields and the program coordinator, Patti Papapietro, Office of Admission, Student and Career Services (172 MVR).

Such a program of study should encompass a substantial part of the student's undergraduate education and must include at least three semesters. For this reason, a request to follow an individual curriculum should be made as early as possible and must be made before the second semester of the junior year.

If an individual curriculum seems advisable, the individual curriculum coordinator will provide direction in formally developing a program of study. Although the coordinator must approve the course enrollment schedule during course enrollment each term, it is a student's responsibility to follow the curriculum as planned or to have any necessary revision approved in writing by his or her adviser and the program coordinator before the program change.

SPECIAL OPPORTUNITIES

Several programs allow students to receive academic credit for fieldwork and internship experience, study abroad, study in absentia, college-wide certificate programs, and joint programs with other schools and colleges at Cornell. Students may petition the college registrar to have concentrations that are formally recognized elsewhere within the university noted on their transcripts, when accompanied by appropriate documentation from the program.

International Study: Study Abroad

Approximately 15 percent of the class of 1999 in Human Ecology studied abroad. Study abroad allows students to focus on international issues and intercultural understanding through sponsored programs of study abroad for which academic credit is available. Course work in a foreign institution will be planned to increase knowledge of the people and institutions of the country concerned; fieldwork may provide guided experience in family, community, or agency situations of the country concerned and in an area related to individual student interest.

Students should begin planning for their study abroad experience in their freshman or sophomore years. Opportunities for study abroad are available for human ecology students in several ways: through Cornell Abroad, through other U.S. college-sponsored programs abroad, and through direct enrollment in a foreign university. In all cases, students remain registered at Cornell during their overseas study, and their study abroad will be credited as part of their Cornell degree program. Application packets for study abroad can be obtained from and should be submitted to the study abroad adviser in the Office of Admission, Student and Career Services, 172 Martha Van Rensselaer Hall. The study abroad adviser is Paul Fisher, 172 Martha Van Rensselaer Hall.

Field Study, Internships, and Research Opportunities

Field study, internships, and research opportunities allow students to receive academic credit for work that extends and complements their course of study. Through structured experiences facilitated by faculty members, students learn to test, deepen, and apply what they've learned in the classroom.

Students strengthen their ability to integrate theory and practice and learn to reflect critically on their experience while broadening their understanding of service and professional life and enhancing their understanding of diversity and complex societal issues. In existing courses and through individual and group projects, students develop an intellectual framework for understanding and solving problems in a variety of challenging settings.

Placement opportunities are available in business and management, health, law, medicine, environmental analysis, education, nutrition, government, laboratories, textiles and apparel, design, social service and community settings. Students are encouraged to plan early for these opportunities.

To learn more, students should consult with their faculty adviser, professor, or director of undergraduate studies. They can also visit the Career Development Center in N-159 MVR and explore established opportunities listed on the Web site, find informational materials, or meet with a career counselor to develop their own unique placements. New initiatives are encouraged. For further information, contact Kris Deluca-Beach, director of career services, 155 MVR.

Cornell in New York City The Urban Semester Program in Multicultural Dynamics in Urban Affairs

Cornell in New York City provides students with many study options that focus on multicultural dynamics in urban affairs. Experiential learning practices inform all courses of study. The options available include internships, individual and group community service projects, research, independent study, collaborative learning, and mentorships. Students must enroll concurrently in the three courses, HE 470, HE 480, and HE 490. Students learn through reflection and action. Program options are possible throughout the academic year, during winter break, and in the summer.

Courses of study enable students to seek out the relationship between theory and practice, apply theory to practice, acquire professional practice skills, and learn about the impact of diversity on New York City. By applying ethnographic research techniques and methods, students learn to think conceptually, reflect on their actions, and be agents of change.

Several majors in the college require internships or encourage field study. Check with the director of undergraduate study of each major for more information. The Career Development Center in 159 MVR and counselors in the Office of Admission, Student, and Career Services in 172 MVR can help you find internships and provide more information on department opportunities and enrolling in Cornell in New York City.

Multicultural Practice

Fall and spring semesters: HE 470

Students immerse themselves in internship activities three days each week. During small group seminars, students reflect on their internship experiences, focusing on multicultural issues, professional practice, and organizational culture.

Multicultural Issues in Urban Affairs

Fall and spring semesters: HE 480

This course is a study of multicultural issues in urban affairs as students enhance their academic foundations in career development. Students examine issues of diversity (e.g., race, ethnicity, religion, class, gender, sexual orientation) in relationship to (1) professional life in different sectors of the economy; (2) the development of neighborhoods and communities; and (3) the basis of a just and democratic society. Readings focus on inner-city children and youth under a variety of multicultural-influenced conditions and contexts. Costs include travel to and from sites by public transportation at about $3.00–6.00 each week.

Communities in Multicultural Practice

Fall and spring semesters: HE 490

This course provides students with an understanding of community building processes and enables them to interact with children, youth, and their families in school settings. For a full day once each week, students work in inner city schools with teachers, staff, and children, providing community service. Student learning is focused on how to increase children's learning capacities and expand their horizons by teaching them to envision success. Students focus on the assets that inner city children bring to their school environment and learn how to mentor them. They help teach skills, knowledge, values, behaviors, and perspectives that school children must develop in order to enter the working world. Costs include public transportation costs to and from the various sites, about $3.00-6.00 each week.

The Winter Intersession in Community Service and Mutual Learning: The South Bronx-Banana Kelly/Cornell University Project in Community Building

Winter intersession: HE 402

Over the course of two intensive weeks, students participate in an ongoing community service project in the South Bronx with children of the Banana Kelly community. In carrying out community service, students

participate with the director of the Cornell in New York City Program. In the 1995 intersession, six students mentored 12 children in an after-school program by documenting the community with photographs and stories. In the 1998 intersession seven students mentored 15 ninth graders from Banana Kelly High School.

A photography exhibit was produced and circulated. In 1998, Cornell students and children produced three-dimentional models of their imagined community in future years and a book of essays and photographs.

Fieldwork in Diversity and Professional Practice

Summer session: HE 406

Over the course of an eight-week summer session, students will participate in a literacy project in Williamsburg, Brooklyn.

Gerontology Concentration Gerontology Certificate Program

This program develops students' understanding of and competence in dealing with the processes and issues of aging. Study in gerontology provides practical experience and preparation for professional work. Students draw on resources of several departments and colleges at Cornell and Ithaca College to shape a curriculum suited to their professional goals and interests. Contact Donna Dempster-McClain, Gerontology Coordinator, Bronfenbrenner Center, G21 Martha Van Rensselaer Hall.

Double-Registration Programs

Johnson Graduate School of Management

A limited number of highly qualified students from the Cornell undergraduate divisions, including human ecology, may be accepted by the Johnson Graduate School of Management after their junior year. Students need the approval of the admissions office and the registrar in the College of Human Ecology. Accepted students should be aware that if the management course work taken in the senior year is in excess of the 21 additional credits allowed in the Cornell endowed divisions, they will be charged for the additional credits on a per-credit basis. Students entering this program must also complete requirements for their degree and major in Human Ecology.

Law School

A small number of highly qualified applicants may be admitted to the Cornell Law School after only three years of undergraduate education. The requirements for admission under these circumstances are more stringent than for acceptance after four years of undergraduate study. Applicants must present outstanding qualifications and strong professional motivation. The junior-year applicant follows the ordinary application procedures for Cornell Law School admission. Interested students should contact the Law School director of admissions to discuss the extraordinary admissions criteria. Because students accepted to this program will spend their senior year in the Cornell Law School, they need to plan ahead to ensure that distribution requirements for the B.S. degree from the College of Human Ecology will be met. Successful applicants need the approval of the college registrar.

Cornell Medical College

A limited number of highly qualified students from three Cornell divisions, including the College of Human Ecology, may be accepted by the Cornell Medical College after the junior year. To be considered for this program, the student must have completed 105 credits toward graduation by the end of the junior year. Students also need to plan ahead to ensure that distribution requirements for the bachelor of science degree will be met. Accepted students receive 15 credits toward the B.S. degree from their first year of study at the College of Medicine. Interested students should contact the Health Careers Program office in 103 Barnes Hall.

Other Off-Campus Programs

New York State Assembly Internships

A limited number of session internships with the New York State Assembly are available in the spring semester. Intern applicants must be sophomores or higher and enrolled in New York State colleges or universities. Human ecology students apply to the program through the student's major department. The New York State Assembly also sponsors a summer internship. Further information about internship programs may be obtained through the Office of Admission, Student, and Career Services, 172 Martha Van Rensselaer Hall.

Cornell-in-Washington

For information on Cornell-in-Washington, see the section, Interdisciplinary Centers, Programs, and Studies, in the front of the catalog.

Ithaca College

Full-time undergraduate students at Cornell may petition to enroll in courses at Ithaca College. Students pay regular tuition to Cornell and only special fees to Ithaca College, if any are charged. Students are allowed to register for one course a term and may take no more than 12 credits in four years. Exceptions will be granted to Cornell students enrolled in methods and practice-teaching courses at Ithaca College.

Cornell students are eligible to register only in Ithaca College courses that are relevant to their program and that do not duplicate Cornell courses. Acceptance of Cornell students into Ithaca College courses is on a space-available basis. Participation in this program is not guaranteed, and Ithaca College has the right to accept or reject students for any reason it deems appropriate. The program is available only during the fall and spring semesters.

For further information students should contact the college registrar, 145 Martha Van Rensselaer Hall.

Wells College

Full-time undergraduate students at Cornell may petition to enroll in courses at Wells College. Students pay regular tuition to Cornell and only special fees to Wells College, if any are charged. Students are allowed to register for one course a term and may take no more than 12 credits in four years. Exceptions will be granted to Cornell students enrolled in methods and practice-teaching courses at Wells College.

Cornell students are eligible to register only in Wells College courses that are relevant to their program and that do not duplicate Cornell courses. Acceptance of Cornell students into Wells College courses is on a space-available basis. Participation in this program is not guaranteed, and Wells College has the right to accept or reject students for any reason it deems appropriate. The program is available only during the fall and spring semesters.

For further information students should contact the college registrar, 145 Martha Van Rensselaer Hall.

PLANNING A PROGRAM OF STUDY

Academic Advising

Students who choose to major in a particular department are assigned to a faculty adviser by that department's director of undergraduate studies. The director of undergraduate studies can help match a student's needs with the special interests of a faculty member. Students may change advisers as their own interests change and should see the director of undergraduate studies to discuss such a change. Faculty advisers, and counselors in the Office of Admission, Student, and Career Services (172 Martha Van Rensselaer Hall), are available to discuss course requirements and sequences, and electives inside or outside the college, as well as future goals and career opportunities. Although advisers must provide the adviser key number during course enrollment each term, it is the student's responsibility to make sure that her or his program meets graduation requirements for the major and the college. Directors of undergraduate studies in each department are available to answer questions about the advising system and the undergraduate major. Students who are exploring alternative majors should work closely with college counselors who are available for planning and referral to department resource faculty.

Completing Graduation Requirements

A summary of record is kept for each student in the Office of the Registrar, 146 Martha Van Rensselaer Hall. At the beginning of fall term each continuing student receives a copy showing which major and degree requirements have already been met. It is important to check this summary and to bring any questions to the attention of the faculty advisor and the staff members in the Office of Admission, Student, and Career Services. A student may complete the requirements of more than one major.

Electives

Students have individual objectives in choosing courses beyond the minimum requirements of the major. The university is diverse; the departments, centers, and special programs numerous; the fields of study almost unlimited. Counselors and faculty advisers are available to discuss which courses may interest students and best round out their educations.

Students should consult the index for information on where different subjects are taught in the university. Some subjects are taught in more than one division of the university.

Foreign Language Study and Placement

Students who studied a foreign language before coming to Cornell and who want to continue must take either the College Entrance Examination Board (CEEB) achievement test in that language or a departmental language placement test. The latter is given during orientation week in September and again in December, January, and May. Students in human ecology who plan to work with non-English-speaking people in this country or abroad often find it necessary to be proficient in another language. Students who wish to study abroad may find that many study-abroad programs in non-English-speaking countries require the equivalent of two years of college-level language study. For more detailed information, see the section "Advanced Placement of Freshmen."

REQUIREMENTS FOR THE DEGREE OF BACHELOR OF SCIENCE

General

Students applying as undergraduates who do not have the required academic unit in biology, chemistry, or physics are required to show evidence of having met this deficiency before matriculation in the college.

Freshmen and sophomores are required to enroll in at least one human ecology course per semester.

To graduate, students need to

1) meet college credit and distribution requirements,
2) complete requirements for a major,
3) achieve a cumulative average of 1.7 (C–) or better,
4) complete two terms of physical education

College Requirements

These are the general areas of study and specific courses and credits required of every student in the college. The major you choose may require specific courses listed below or may leave you free to choose among certain courses listed there.

Category I General Distribution

A. *Natural Sciences* (6) selected from Biological Sciences 101–103, 102–104, 105–106, 109–110; Chemistry 206, 207–208; and Physics 101–102, 112, 201 or 202, 207–208.

B. *Social Sciences* (6)

C. *Humanities* (3) Language credit cannot be used in this area (See: IV).

D. *Written Communictions* (6) Must be Freshman Writing Seminars. At least one seminar must be in the humanities.

E. *Quantitative and Analytical*

1. Math competency equivalent to EDUC 115 (precalculus)
   a. AP of 3 or higher on AB test
   b. AP of 2 on BC test
   c. Math assessment test score equivalent to EDUC 115
   d. Pass a math course equivalent to or higher than EDUC 115
2. Statistics, advanced math, logic (3)

F. *Additional credits* (12)

Category II Requirements in HUMEC—the major (number of credits vary by major)

HUMEC Credits Outside the Major 9

May not include any HE 00 courses, HE 100, HE 101 or any 403 course. A maximum of three credits of special studies (400, 401, and 402), or of any internship credit may be used. A maximum of five credits of either HE 470 or HE 480, PAM 392 or HE 490 can be used.

Category III Other courses to complete 120 credits overall, exclusive of physical education.

Elective credits can be earned in Human Ecology or elsewhere. Students who earn more than 21 credits in endowed colleges during fall or spring terms will be billed for the excess credits at the endowed rate of tuition. Billable endowed credit includes endowed courses taken in Category II.

Category IV Physical Education 2

TOTAL credits (exclusive of PE) 120

Students who have successfully fulfilled these requirements should have completed at least two terms of physical education in their freshman year.

Related Policies

College course requirement. Freshmen and sophomores are required to enroll in at least one course in the College of Human Ecology each semester. Students who fail to comply with this requirement will be reviewed by the Committee on Academic Status for appropriate action.

Category I.D. Students who score 4 or 5 on the College Board AP English Exam are awarded 3 credits in English. Students who score 5 on the College Board AP Exam are exempt from one freshman writing seminar in addition to the 3 English credits awarded.

Category III. *There is no limit to the number of credits that may be taken in the state divisions of Cornell,* and therefore students may choose to take additional state credits and graduate with more than 120 credits.

Credits in the endowed divisions in this section may not exceed 21. Any course taken in an endowed division for which a grade of F or U is received will be counted *as part of* the 21 endowed credits allowed.

Elective credits earned in Cornell's endowed divisions during summer session, in absentia credits, and transfer credits are not counted in the limited 21 endowed credits permitted because they were paid for at endowed tuition rates.

Not more than 21 credits in Categories II and III may be taken in the endowed divisions of the university except under *both* of the following conditions:

1) The students must have senior status (must be in the final two semesters prior to graduation);
2) Payment must be made for each credit taken in excess of the 21 allowed, *whether or not the courses are passed.* For the fee per credit charge, students should call the Office of the Bursar.

Category I.D. Transfer students should have taken at least 6 credits in English composition or in courses requiring substantial writing and offering instruction in writing equivalent to that offered in the freshman writing seminar program at Cornell. Students who have not fulfilled this requirement before transferring must fulfill it after matriculation.

Category III. Transferred credits for courses applied toward electives do not reduce the 21 Cornell endowed credits that students are allowed. Courses with a passing grade below C– will not transfer to meet human ecology degree requirements.

Category IV. Transfer students who have had the equivalent of two semesters of college (and therefore enter as sophomores) are not required to take physical education at Cornell, regardless of whether they took physical education at their first college. Exemption or postponement for medical reasons must be cleared by Gannett Health Center. For further information about exemption from, or postponement of, physical education, students should consult the Office of Physical Education in Teagle Hall.

Exemptions from Requirements

Students who want an exemption from a specific graduation or major requirement may petition, and approval may be given under certain circumstances. Full information about the petition process is given in the Human Ecology Student Guide. Petition forms are available in the Office of Admission, Student, and Career Services, 172 Martha Van Rensselaer Hall or in Room 145, the Office of the Registrar.

PROCEDURES

Course Enrollment and Registration

Students are expected to make course requests for their next semester during a specified time in the current semester. Those dates are advertised publicly and available on the University Registrar's web site. CoursEnroll takes place electronically, using software available through Just the Facts. During this time, each student must meet with his or her faculty adviser to discuss academic plans and to obtain the advising code required for finalizing course requests.

Incoming students will receive tentative schedules upon their arrival to campus, and will meet with faculty advisers during the orientation period.

All students may adjust their schedules and grading options during the first three weeks of each semester.

Permission of Instructor

Certain courses may be taken only with the permission of the instructor as indicated in *Cornell University: Courses of Study.* Undergraduates must obtain permission of the instructor for any graduate course. Students must request the instructor's permission during the CoursEnroll period by placing their name on a list maintained by the departmental advising assistant.

Students interested in taking a course in the Department of Art in the College of Architecture, Art, and Planning are required to register with the departmental secretary (100 Olive

Tjadan Hall) before enrolling in the course. Seniors who want to take an elective course in the Johnson Graduate School of Management are required to obtain permission of the instructor on a course authorization form that the student then files with that school's registrar in Sage Hall.

Special Studies Courses

Each department in the College of Human Ecology (DEA, HD, DNS, PAM, and TXA) offers special studies courses that provide opportunities for students to do independent work not available in regular courses. One of those courses, designated 300, Special Studies for Undergraduates, is intended primarily for students who have transferred from another institution and need to make up certain course work.

The other special studies courses are 400, Directed Readings; 401, Empirical Research; and 402, Supervised Fieldwork. Those courses are normally taken by upperclass students, and work is supervised on an individual basis by a faculty member in the department in which the course is offered. It is important for students to use the appropriate course number (300,400,401, or 402) for a special project.

A student who wants to take special studies courses talks with the faculty member under whose supervision the study would be done and then prepares a work plan. If the faculty member agrees to supervise the study, the student completes a multicopy special studies form, a multicopy description of the study to be pursued. The student obtains the signatures of the instructor and the department chair as well as the student's department adviser before submitting it to the Human Ecology Registrar's Office. The student also must complete a course enrollment form in the Office of the Registrar (145 MVR). Special studies forms and instructions are available in the departmental offices.

To register for a special studies course, a student obtains a special studies form from the departmental office where they plan to take the course. The student discusses the proposed course with the faculty member under whose supervision the study would be done and then prepares a plan of work. If the faculty member agrees to supervise the study, the student completes a special studies form and obtains signatures from the instructor, department chair, and faculty adviser before submitting the form to the Office of the College Registrar (145 MVR). The student must also submit a course registration form (add/drop form) to the Office of the College Registrar. Special studies forms are available in 145 MVR or in departmental offices. Add/drop forms are only available in 145 MVR.

Semester credits for special studies courses are determined by the number of contact hours the student has with the supervising faculty member (or a person designated by the faculty member). Special studies courses can be taken as directed readings (400), empirical research (401), and supervised fieldwork (402). Refer to the Human Ecology section of Courses of Study for descriptions of the courses. To earn one credit, a student must have the equivalent of three hours of contact time per week with the faculty member or designated person for 15 weeks (a total of 45 contact hours). For additional credit, multiply the number of credits to be earned by 45 to determine the number of contact hours needed for the course.

A student can only use 12 credits of 400, 401, or 402 courses towards graduation and only 5 of these 12 credits can be used to satisfy the 9-credit-outside-the-major requirement. In addition, a student can only take one 403 course towards graduation requirements.

To register in a special studies course taught in a department outside the college, follow the procedures established by that department.

Course Loads

The normal course load in the college ranges from 12 to 18 credits. *During the course enrollment period no student may enroll for more than 15 credits or five courses, whichever is greater.*

Credits beyond 15 may be added during the first three weeks of the semester without special permission.

Students should avoid planning excessive work loads; the time required to keep abreast of courses tends to increase as the semester progresses. *Classes cannot be dropped after the seventh week of classes without petitioning and by substantiating extenuating circumstances.* Permission to drop late is rarely granted. Do avoid the need to drop courses by taking on a reasonable workload and using the drop period to make changes in your program.

Except for those with mature student status, students must carry at least 12 credits (exclusive of physical education). In special cases, a student may petition to carry between 8 and 12 credits. Forms for petitioning and advice on how to proceed are available from the Office of Admission, Student, and Career Services, 172 MVR.

Except for mature students, it is seldom possible to have tuition prorated if a student carries fewer than 12 credits during a semester. (See the college registrar or counselors for more information.)

Students of mature status may carry 6 to 11 credits without petitioning and may have their tuition prorated. However, before the beginning of each term, mature students planning to take a light course load should submit a proration of tuition form to the Human Ecology Registrar's Office .

Oversubscribed Courses

Enrollment in many human ecology courses is limited. When a course is over enrolled, students are generally assigned on the basis of seniority or by criteria defined for each course as listed in *Cornell University: Courses of Study*. Students' professional goals may be considered. Those students not admitted to a course may be placed on a waiting list.

Late Course Enrollment

Students who do not complete course enrollment during the course enrollment period usually must wait until the beginning of the next semester to enroll. Extensions are rarely granted and usually only for documented illness.

Students who do not meet the deadline for any reason should see the college registrar in 145 MVR as soon as possible. The college registrar can explain available options and course enrollment procedures under such circumstances.

Important: Students can review their course schedule via computer using Just the Facts. Students are responsible for checking their course schedule for accuracy of course numbers, credit hours, grade option and other data. Students must correct errors immediately. Procedures for correcting enrollment errors as well as making changes for other reasons are described below under **Course Enrollment Changes.**

At the beginning of the fall semester, each continuing student receives a copy of his or her **summary of record** from the Human Ecology Registrar's Office. This summary shows completed degree requirements. Students are responsible for assuring that their academic program meets degree requirements. Students may direct questions about their academic programs to their faculty adviser or to a counselor in the Office of Admission, Student, and Career Services. They resolve any questions about degree requirements with the appropriate staff person in the Human Ecology Registrar's Office.

Late University Registration

A student clearing his or her financial obligations **after** the deadline date on the bursar's bill is considered late. **Late registrants are assessed a finance charge on the bursar's bill starting from the date the bill is due.**

All students must be registered according to university policy before the end of the third week of classes. If for any reason a student registers after that time, the Bursar's Office will change a late fee.

Students who fail to register by the third week of the term will be withdrawn from the university. Should withdrawn students wish to return, they must reapply through the admissions committee.

Course Enrollment Changes

Deadlines

- During the first three weeks of the term, courses may be added or dropped, or the grade option can be changed.
- From the fourth through the seventh week of the term, course changes may be made with the permission of the instructor (instructor's signature on the add/drop form).
- From the fourth week of the term, instructors have the right to consider students' requests for course changes on an individual basis or to announce at the beginning of the term a specific date between the fourth and seventh weeks beyond which they will no longer approve course changes.
- From the eighth week of the term, no course change may be made without petitioning for approval. Petitions are usually granted only in circumstances beyond a student's control (for example, illness). A student petitioning for medical reasons should provide substantiating medical evidence with the petition.
- A student submitting a petition after the seventh week requesting permission to drop a course must attach a statement from his or her faculty adviser to that

petition indicating whether or not the advisor supports the request.

- After the seventh week of the term, any student granted permission to drop a course after petitioning will automatically receive a grade of **W** (Withdrawn), and the course will remain on the official transcript.

Deadlines for Half-Term Courses

Students may drop half-term courses within the first three-and-one-half weeks of the course. Students may add a course after the first week of classes only with the permission of the instructor. After the first three-and-one-half weeks, students must petition to drop the course. (See **Petition Process, General Petition Form** for information on the procedure.)

Procedures

It is to the student's advantage to make any necessary course enrollment changes as early in the term as possible. Adding new classes early makes it easier for the student to keep up with class work. Dropping an unneeded class early makes room in the class for other students who may need it for their academic programs.

Ideally, students evaluate their class work load carefully at the beginning of the term. If, in the first week or two, the instructors do not discuss the amount of material to be covered and the extent of student assignments, students need to ask about course requirements.

Some procedures required for class enrollment are also required for class enrollment changes. For example, the instructor's permission must be obtained for a course requiring it, and the same forms for special studies courses must be completed. Aside from the procedures listed below for course enrollment changes, all course change forms for **nutritional science majors** must be signed by the faculty department adviser.

Waiting List: The Human Ecology Registrar's Office maintains waiting lists for students who want to enroll in courses that have been filled. Waiting lists are maintained on a first-come, first-served basis without regard to seniority or other factors. To keep their names active on a waiting list, students must **check in person every 48 hours** with the Human Ecology Registrar's Office. Names of students who do not check in are automatically dropped from the list.

Limited enrollment classes: Students who do not attend the first two class sessions of courses with limited enrollment may be dropped from the course list. Students can avoid being dropped from a class by notifying the instructor that unavoidable circumstances have prevented their attendance.

There is no charge for course changes. To make course changes during the **first three weeks**, a student takes the following five steps:

1) Obtains a course-change form from the Human Ecology Registrar's Office, 145 MVR.
2) Completes the form and takes it to the appropriate office for signature: for human ecology courses, the forms should be taken to the Human Ecology Registrar's Office; for courses outside the college, the forms should be taken to the appropriate departmental office of the other college.
3) Makes sure that his or her name is added to the list of enrolled students for a course being added, or removed from the class list for a course being dropped. Asks the person recording the change to sign the form.
4) **Submits all signed forms to the Human Ecology Registrar's Office, including the forms for out-of-college courses.** Changes are not completed until the signed forms are filed in that office. If a student does not drop a course that he or she no longer attends, the student is in danger of receiving an **F** in the course.
5) Receives carbon copies of each course change form at the time it is submitted. It is **important** for students to keep these copies to verify later that the forms were filed.

To make course changes during the **fourth through seventh** weeks of the term, a student takes the following steps:

1) Completes the five steps listed above for changes made during the first three weeks.
2) Obtains the instructors' signatures on the course change form for human ecology courses.

To make course changes **after the seventh week** of the term, a student must file a general petition form. (See the section below, **Petition Process**.) Students are expected to attend classes and to do assigned work until the petition has been formally approved or denied.

In absentia Study

Under certain conditions, credit toward a Cornell degree may be given for in absentia study, that is, study done at an accredited institution away from Cornell after the student matriculates in the College of Human Ecology.

To be eligible for in absentia study, a student must be in good academic standing and must receive permission in advance from the college registrar. Students not in good standing may study in absentia but will not receive transcript credit until they have been returned to good standing by the Committee on Academic Status. In some cases, students may petition for in absentia credit after the work has been completed, but there is no guarantee that such credit will be awarded without advance approval.

In absentia petition forms are available in the Human Ecology Registrar's Office, 145 MVR. The student completes the form, has it signed by his or her faculty adviser, attaches catalog descriptions for the courses that will be taken, then submits the form to the Human Ecology Registrar's Office, 145 MVR.

Students receive notice of the petition decision by means of a letter from the college registrar.

A student may take up to 15 credits in absentia as long as the courses do not duplicate courses already taken and the in absentia courses are applicable to the requirements of the college. On rare occasions student's petition for more than 15 credits in absentia may be allowed: (1) the work taken represents a special educational opportunity not available at Cornell, (2) it relates to the student's particular professional goals, and (3) those goals are consistent with the focus of the college. The in absentia petition form is used to request more than 15 credits in absentia.

The college registrar requests approval from the appropriate department if a student wants to apply in absentia credit to requirements for his or her major. If in absentia credit is sought for a modern foreign language in which the student has done work, approval by the Department of Modern Languages and Linguistics (College of Arts and Sciences) must be obtained. The department will recommend the number of credits the student should receive and may require the student to take a placement test after returning to Cornell.

The student is responsible for having the registrar of the institution where in absentia study is taken send transcripts of grades to the Human Ecology Registrar's Office. Only then will credit be officially assessed and applied to the Cornell degree. Credit for in absentia study will be granted **only** for those courses with grades of C- or better. Only credits (not course names and grades) for in absentia study appear on the Cornell University transcript.

A student who holds a Regents' or Children of Deceased or Disabled Veterans Scholarship may claim that scholarship for study in absentia if the study is done in a college in New York State and if it is for a maximum of 15 credits acceptable to the College of Human Ecology.

The rules regarding study in absentia apply to transfer students with the additional stipulation that at least 60 credits must be taken at Cornell. At least 40 of the 60 credits must be in the College of Human Ecology at Cornell unless the student has transferred equivalent human ecology credit. (No more than 20 credits of equivalent credit may be applied to the 40 credits required in human ecology course work.)

Leaves of Absence

A student may request a leave of absence before the beginning of the semester or during the first seven weeks of the semester for which a leave is sought. A leave may be extended for a second semester by requesting an extension in writing from the Office of Admission, Student, and Career Services. Note that in absentia study and leave of absence status are mutually exclusive.

A student considering a leave of absence is urged to discuss plans with a counselor in the Office of Admission, Student, and Career Services. The counselor can supply the necessary forms for the student to complete and file with the Human Ecology Registrar's Office, 145 MVR.

Requests for a leave of absence received after the first seven weeks of the semester, or requests for a leave of absence from students who have already had two semesters' leave of absence, will be referred for action to the Committee on Academic Status. The committee may grant or deny such requests, attaching conditions as it deems necessary. Leaves of absence after the first seven weeks are generally granted only when there are compelling reasons why a student is unable to complete the semester, such as extended illness.

A student who requests a leave of absence after the first seven weeks is advised to attend classes until action is taken on the petition. A student whose petition for a leave of absence is denied may choose to withdraw or to complete the semester.

The academic records of all students who are granted a leave of absence are subject to review, and the Committee on Academic Status may request grades and other information from faculty members to determine whether the student should return under warning or severe warning or in good academic standing.

Withdrawal

A withdrawal is a termination of student status at the university. Students may voluntarily withdraw at any time by notifying a counselor in the Office of Admission, Student, and Career Services and filing a written notice of withdrawal in the Human Ecology Registrar's Office. A student considering such an action is urged to discuss plans with a counselor in the Office of Admission, Student, and Career Services, 172 MVR.

In some instances a student may be given a withdrawal by the college registrar. A student who leaves the college without an approved leave of absence or does not return after the leave has expired will be given a withdrawal after the seventh week of the term in which he or she fails to register.

A student who has withdrawn from the college or who has been given a withdrawal by the college registrar and who wishes to return at a later date must reapply through the Office of Admissions for consideration along with all other applicants for admission. If the student was in academic difficulty at the time of the withdrawal, the request for readmission will be referred to the Committee on Academic Status for consideration, and that committee may stipulate criteria under which the student may be readmitted to the college.

Petition Process

The petition process permits students to request exceptions to existing regulations. Petitions are considered individually, weighing the unique situation of the petitioning student with the intent of college and university regulations.

Students can avoid the necessity to petition by carefully observing the deadlines that affect their academic program. See the **Course Enrollment Changes** section above for some of the important deadlines. If unsure about a deadline, check with a counselor in the Office of Admission, Student, and Career Services, 172 MVR.

Although many kinds of requests can be petitioned in the college, options other than petitioning may be preferable in some cases. To explore whether a petition is appropriate, the student may discuss the situation with a college counselor or the college registrar in the Human Ecology Registrar's Office.

Students may appeal petitions denied by the college registrar to the Committee on Academic Status. Students who appeal a denied petition **must** attach a statement from the student's faculty adviser before CAS will consider the appeal.

GRADES

See the "Grading Guidelines" section for information on the official university grading policies.

S-U Grades

Some courses in the college and in other academic units at Cornell are offered on an S-U basis; that fact is indicated in the *Cornell University: Courses of Study*. University regulations concerning the S-U system require that a grade of S be given for work equivalent to a C– or better; for work below that level, a U must be given. **No grade point assignment is given to S, and S or U grades are not included in the computation of semester or cumulative averages**. A course in which a student receives an S is, however, counted for credit. No credit is received for a U. Both the S and U grades appear on a student's record. A student who is attempting to qualify for the Dean's List must take at least 12 credits for the usual A–F grades. See the *Human Ecology Pocket Book of Useful Information* for specific details about the Dean's List.

A student may take no more than 12 credits on an S-U basis during his or her college career; however, more than one S-U course may be taken in one semester. S-U courses may be taken **only as electives or in the 9 credits required in the college outside the major** unless the requirements for a specific major indicate otherwise. Freshmen enrolled in English 137 and 138 (offered for S-U grades only) are permitted to apply those courses to the freshman writing seminar requirement. If a required course is only offered S-U, it will not count toward the 12-credit or 4-course limit.

To take a course for an S-U grade, a student must check the course description to make sure that the course is offered on the S-U basis; then either sign up for S-U credit during course enrollment, or file an add/drop/change form in the Human Ecology Registrar's Office before the end of the third week of the term. Forms are available in the Human Ecology Registrar's Office. After the third week of the term, students can not change grade options.

Grades of Incomplete

A grade of incomplete is given when a student does not complete the work for a course on time but when, in the instructor's judgment, there was a valid reason. A student with such a reason should discuss the matter with the instructor and request a grade of incomplete.

A grade of incomplete may remain on a student's official transcript for a maximum of two semesters and one summer after the grade is given, or until the awarding of a degree, whichever is the shorter period of time. The instructor has the option of setting a shorter time limit for completing the course work.

If the work is completed within the designated time period, the grade of incomplete will be changed to a regular grade on the student's official transcript. **If the work is not completed within the designated time period, the grade of incomplete automatically will be converted to an F.**

When a student wants to receive a grade of incomplete, the student should arrange a conference with the instructor (preferably before classes end and the study period begins) to work out the agreement. A form, called *explanation for reporting a final grade of* **F** *or incomplete,* which has been signed by both the instructor and the student, must be submitted by the instructor to the Human Ecology Registrar's Office. This form is submitted with the final grade sheets whenever a grade of incomplete is given.

This form is for the student's protection, particularly in the event that a faculty member with whom a course is being completed leaves campus without leaving a record of the work completed in the course.

If circumstances prevent a student from being present to consult the instructor, the instructor may, if requested by the student, initiate the process by filling out and signing part of the form and turning it in to the Human Ecology Registrar's Office with the grade sheet. Before a student will be allowed to register for succeeding semesters, he or she must go to the Human Ecology Registrar's Office to fill out and sign the remainder of the form.

If the work is satisfactorily completed within the required time, the course appears on the student's official transcript with an asterisk and the final grade received for the semester in which the student was registered for the course.

A student who completes the work in the required time and expects to receive a grade must take the responsibility for checking with the Human Ecology Registrar's Office (about two weeks after the work has been handed in) to make sure that the grade has been received. Any questions should be discussed with the course instructor.

ACADEMIC HONORS

The college encourages high academic achievement and recognizes outstanding students in several ways.

Dean's List. Excellence in academic achievement is recognized each semester by placing on the Dean's List the names of students who have completed satisfactorily at least 12 credits with letter grades other than S or U and who have a semester grade point average of 3.5 or above. No student who has received an F or U in an academic course will be eligible.

Kappa Omicron Nu seeks to promote graduate study and research and to stimulate scholarship and leadership toward the well-being of individuals and families. As a chapter of a national honor society in the New York State College of Human Ecology, it stimulates and encourages scholarly inquiry and action on significant problems of living—at home, in the community, and throughout the world.

Students are eligible for membership if they have attained junior status and have a cumulative average of not less than B. Transfer students are eligible after completing one year in this institution with a B average.

Current members of Kappa Omicron Nu elect new members. Not more than 10 percent of the junior class may be elected to membership and not more than 20 percent of the senior class may be elected. Graduate students nominated by faculty members may be elected.

Bachelor of Science with Honors recognizes outstanding scholastic achievement in an academic field. Programs leading to a degree with honors are offered to selected students by the Department of Human Development and the Division of Nutritional Sciences. Information about admission to the programs and their requirements may be obtained from the appropriate department or division. Students in other departments who wish to qualify for honors should contact Janet Brown-Aist, N118A Martha Van Rensselaer Hall, their sophomore year or the first semester of their junior year.

Bachelor of Science with Distinction recognizes outstanding scholastic achievement. Distinction is awarded to students in the top 10 percent of the graduating class based on the last 60 credits earned at Cornell. The graduating class includes students who will complete requirements for Bachelor of Science degrees in January or May of the same academic year.

Names of seniors who meet these requirements are presented to the faculty of the college for approval.

The primary objectives of the honor society, **Phi Kappa Phi**, are to promote the pursuit of excellence in higher education and to recognize outstanding achievement by students, faculty, and others through election to membership. Phi Kappa Phi is unique in that it recognizes scholarship in all academic disciplines.

To be eligible for membership students must rank in the top ten percent of the senior class, or in the top five percent of the junior class. Provisions also exist for the election of faculty members and graduate students whose work merits recognition.

INTERDEPARTMENTAL COURSES

HE 100 Critical Reading and Thinking
Fall, spring, or summer. 2 credits. Enrollment limited. Priority is given to freshmen and sophomores; juniors and seniors are admitted with permission of the instructor. Letter or S-U grades.
The objective of this course is to enable students to increase critical reading and thinking abilities. Theory and research associated with a wide range of reading, thinking, and learning skills are examined. Emphasis is placed on developing and applying analytical and evaluative skills. Laboratory instruction is individualized and provides the opportunity to focus intensively on increasing comprehension, reading rate, and vocabulary.

HE 101 College Achievement Seminar
6-week summer session. 2 credits. Enrollment limited to and required of Prefreshman Summer Program students. Letter or S-U grades.
The objective of this course is to improve the study and learning skills of incoming freshmen. Emphasis is placed on acquisition of skills necessary to achieve academic success. Topics include time management, note-taking, mapping, textbook comprehension, exam preparation, and exam strategies. The application of theory to the demands of Cornell course work is stressed. In addition, students are introduced to library and computing resources through hands-on projects.

THE URBAN SEMESTER PROGRAM IN NEW YORK CITY

Sam Beck, Ph.D., director

The Urban Semester Program is a set of courses spanning the entire year. During either fall or spring semester students enroll in three classes focusing on the opportunities and barriers that a multicultural society presents and their articulation with professional, community, or public policy settings (15-credit residential program). Students intern three to four days each week and are encouraged to live in the Olin Hall dormitory of the Cornell University Medical College.

The two-week winter intercession course (2 credits) enables students to do community service through a reflective practice curriculum. In the eight-week summer semester (3 credits), students carry out a literacy project with pre-k and kindergarten children. Students who seek to contribute to their own communities are encouraged to participate in any of the program offerings. Most students work with the program staff to locate internships. For further information, contact the Urban Semester Program at (212) 746–2273 or the Career Development Center, N–155 Martha Van Rensselaer Hall.

New York City offers a wide variety of intership settings. Many bilingual and bicultural internship settings are available in Chinese, Spanish, Creole, Russian, Yiddish, and other languages. Examples of internships follow:

- **Health and medicine**—New York Hospital/Cornell Medical Center, Chinatown Health Clinic, New York City Department of Public Health, Bellevue Hospital, Queens Medical Center for Women and Children, Community Health Project
- **Private and public law**—NOW Legal Defense and Education Fund, Neighborhood Defender Service of Harlem, Legal Aid, Puerto Rican Legal Defense and Education Fund, NAACP Legal Defense and Education Fund, Gay and Lesbian Anti-Violence Project, Kane Kessler, P.C.
- **Government and community agencies**—Women's Action Alliance, The Center for Puerto Rican Studies, New York City Commission on the Status of Women, New York City Council offices, Cornell University Cooperative Extension, New York City Department of Consumer Affairs
- **Wall Street firms and other private businesses**—Bloomingdales, Prudential Securities, Oppenheimer, Inc., The Advertising Council, GKN Securities, Rogers and Cowan, Inc., Kidder Peabody, Co., Hill and Knowlton, Young and Rubican, Altschiller Reitzfeld, Terry Williams Agency
- **Private not-for-profit organizations**—Grant Street Settlement House, Neighborhood Housing Services, Abyssinian Baptist Church Development Corporation, University Settlement Society of New York, Urban Development Corporation, Greater Chinatown Community Association, Lesbian and Gay Community Services Center
- **Private and public schools**—United Federation of Teachers, Central Park East, River East, Manhattan Center for Math and Science, PS 41, City and Country, Churchill School, Little Red School House, St. Ann's School
- **Design and arts organizations**—Harlem Textile Works, Perry Ellis International, Caribbean Cultural Center, Delacour & Ferrara, Architects, P.C., New York Shakespeare Festival Theatre, New York Theatre Workshop, Cynthia Rowley Company, SOHO20 Gallery, Museum of African Art, Lower East Side Tenement Museum
- **Communication and media**—*Good Housekeeping, Mirabella,* William Morrow Co., MTV, NBC-TV, ABC-TV, Good Morning America, WBAI-Radio, *The Village Voice, The New Yorker,* Telemundo Group, Inc., *Essence,* McNeil-Lehrer News, Ad Council, *McCalls, Child,* Children's Television Workshop, Time Warner, Inc.

HE 470 Multicultural Practice
Fall and spring semesters.
Students immerse themselves in internship activities three days each week. During small group seminars, students reflect on their experiences in their internships with a focus on multicultural issues, professional practice, and organizational culture.

HE 480 Multicultural Issues in Urban Affairs
Fall and spring semesters.
This course is a study of multicultural issues in urban affairs as students enhance their academic foundations in career development. Students examine issues of diversity (e.g., race, ethnicity, religion, class, gender, sexual orientation) in relationship to (1) professional life in different sectors of the economy; (2) the development of neighborhoods and communities; and (3) the basis of a just and democratic society. Readings will reflect the focus on inner-city children and youth effected by many multicultural influences. Costs include travel to and from sites by public transportation at about $3.00–6.00 each week.

HE 490 Communities in Multicultural Practice
Fall and spring semesters: HE 490.
This course provides students with an understanding of community building processes and enables them to interact with children, youth, and their families in school settings. For a full day once each week, students work in inner city schools with teachers, staff, and children, providing community service. Student learning is focused on how to increase children's learning capacities and expand their horizons by teaching them to envision success. Students focus on the assets that inner city children bring to their school environment and learn how to mentor them. They help teach skills, knowledge, values, behaviors, and perspectives that school children must develop in order to enter the working world. Costs include public transportation costs to and from the various sites, about $3.00–6.00 each week.

DESIGN AND ENVIRONMENTAL ANALYSIS COURSES

F. Becker, chair; P. Eshelman, director of undergraduate studies; J. Laquatra, director of graduate studies; A. Basinger, S. Danko, J. Elliott, G. Evans, K. Gibson, R. Gilmore, A. Hedge, J. Jennings, L. Maxwell, W. Sims

Note: A minimal charge for photocopied course handouts may be required.

NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

DEA 101 Design Studio I
Fall. 3 credits. Each section limited to 18 students. Permission of instructor required for non-DEA majors. Priority given to interior design majors. Option I majors must take DEA 101 in fall of their first year. Approximate cost of materials, $60. M W 1:25–4:25; or T R 10:10–1:10. J. Elliott.
A studio course introducing the fundamental vocabulary and principles of two- and three-dimensional design. Students experiment with the development of form through problem-solving approaches.

DEA 102 Design Studio II
Spring. 3 credits. Limited to Option I DEA majors only. B– or higher in DEA 101 required to register for this course. Option I majors must take DEA 102 and 115 concurrently. Approximate cost of materials, $200; shop fee, $10. T R 1:25–4:25. P. Eshelman.
A studio course in three-dimensional design with an interior design emphasis. Problems in spatial organization are explored through drawings and models.

[DEA 111 Making a Difference: By Design
Fall. 3 credits. Limit 285. Lab Fee: $25. M W F 11:15–12:05. Not offered fall 1999; next offered fall 2000. S. Danko.
Students in any academic area examine how design affects their daily life and future profession. Course focuses on issues of leadership, creative problem-solving, and risk-taking through case study examination of leaders in business, education, medicine, human development, science, etc., who have made a difference using design as a tool for positive social change. Utilizing a micro to macro framework, students explore the impact of design from the person to the planet. Additional topics: nurturing innovation, visual literacy, design criticism, design and culture, semiotics, proactive/reflective decision-making, and ecological issues.]

DEA 115 Design Graphics
Spring. 3 credits. Option I DEA majors only. Prerequisite: DEA 101; must take DEA 102 and DEA 115 concurrently. Minimum cost of materials, $100; technology fee $10. Permission of instructor only. M W F 8:00–10:00. K. Gibson.
A studio drawing course for interior designers. Discussion groups on drawing techniques are held to develop a visual understanding and vocabulary. Students are introduced to the functions of line, shape, and value. Perspective, spatial, and conceptual drawing are emphasized.

DEA 150 Introduction to Human-Environment Relations
Spring. 3 credits. M W F 12:20–1:10. G. Evans.
Introduction to the influence of physical environment on human behavior. Topics include environmental influences on crowding, community, crime, and friendship; environmental needs associated with characteristics such as stages in life cycle, life styles, social class, family structures, and handicaps; person-environment fit for lighting, acoustics, indoor air quality and ventilation, and thermal comfort; introduction to human factors and systems analysis; effects of environment on perception-cognition; user-responsive design; participatory design programming; and post occupancy evaluation.

DEA 201 Design Studio III
Fall. 4 credits. Limited to Option I DEA students. Prerequisites: DEA 101,102, and 115 (minimum grades of B–) Recommended: DEA 111 and 150. Coregistration in DEA 203 is required. Minimum cost of materials, $150; lab fee, $40; optional field trip, approximately $100. M W F 1:25–4:25. C. Sherwyn.
Beginning interior design studio. Focus is on development of basic proficiency in interior design skills. The course is structured around a series of elementary interior and interior-product design problems of 3 to 5 weeks in length.

DEA 202 Design Studio IV
Spring. 4 credits. Each section limited to Option I DEA students. Prerequisites: DEA 201 and 203. Prerequisites or corequisites: DEA 204. Minimum cost of materials, $120; diazo machine fee, $8; field trip fee. T R 12:20–4:25. Sherwyn.
Second interior design studio. Emphasis of the course is on continued development of basic proficiency in design skills through exposure to a selected set of interior design problems of limited complexity. Each problem of 3 to 5 weeks duration is structured to emphasize different aspects of the design process.

DEA 203 Digital Communications
Fall. 2 credits. Priority given to DEA majors. Lab fee $10. M 7:30–9:55. J. Elliott.
Communication techniques for architectural and interior designers. Students study the various forms of communication used throughout the design process, from programming and conceptualization through construction documentation, and the most effective utilization of those forms. Both verbal and visual presentation methods are stressed.

DEA 204 Introduction to Building Technology
Spring. 2 credits. M 2:30–4:25. W. Sims.
Introduction to building technology for interior designers and facility managers. Emphasis is placed on developing basic understanding of buildings and building systems and their implications for interior design and facility management. Covers basic building types; structural systems; construction materials and methods; HVAC systems; plumbing, electrical, lighting, fire, and security systems; and telephone, computer, and other communication systems.

DEA 243 Inside Out: The American Everyday Interior (also WOMNS 243, AM ST 243)
Spring (odd-numbered years). 3 credits. Limited to 65. S-U option. T R 10:10–11:15. J. Jennings.
A study of late nineteenth- and twentieth-century everyday interiors in socio-cultural contexts, with an emphasis on design dissemination, consumer patterns, and gender issues. Topics include women's walls, power in the parlor, photographs as a mirror, the love of the colonial.

DEA 250 The Environment and Social Behavior
Fall. 3 credits. Limited to 16. Priority order: DEA seniors, juniors, sophomores, freshmen. Prerequisite: DEA 150 or permission of instructor. Field trip fee $65. T R 2:55–4:10. G. Evans.
A combination seminar-and-lecture course for students interested in the social sciences, design, or facility management. Through projects and readings the influence of environmental form on social behaviors such as aggression, cooperation, communication, community, and crime is explored. Also covered are the influences of stage in life cycle, family structure, and social class on environmental needs and purposes. Implications for the planning, design, and management of complex environments such as offices, hospitals, schools, and housing are emphasized.

[DEA 251 History and Theory of the Interior
Fall. 3 credits. Limited to 65. Priority given to DEA majors. M W F 9:05–9:55. Not offered fall 1999; next offered fall 2000. J. Jennings.
An historic study of interior architecture and design with an emphasis on the concepts of design theory. Overarching themes encompass several time periods from the classical to the twentieth century and isolate cultural patterns, spatial ideas, dialectics, design elements and theorists. Reading, discussion, analytical exercises, essays, examinations. Field trip.]

DEA 300 Special Studies for Undergraduates
Fall or spring. Credit to be arranged. Department faculty.
Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the head of the department, is filed at course registration or during the change-of-registration period.

DEA 301 Design Studio V
Fall. 4 credits. Prerequisites: DEA 111,150, 201, 202, 203, and 204. Corequisite: DEA 303 and 459. Minimum cost of materials, $150; shop fee, $10; optional field trip, approximately $100; diazo machine fee, $8. T R 12:20–4:25. P. Eshelman.
Intermediate-level interior design studio. The course is organized around a series of interior and interior-product design problems of intermediate-level complexity, 3 to 5 weeks in duration. Focus is on development of design skills and on understanding of a selected set of generic problem types.

DEA 302 Design Studio VI
Spring. 5 credits. Prerequisites: DEA 301 and 303 or permission of instructor. Corequisites: DEA 304 and DEA 305. Minimum cost of materials, $150; shop fee, $10; diazo machine fee, $8. M W F 1:25–4:25. K. Gibson.
Intermediate-level interior design studio with an introduction to computer applications. Emphasis on using the microcomputer as a design tool in the process of creating and planning interior spaces. Continued development of design skills and problem solving in relation to a selection of problem types.

DEA 303 Introduction to Furnishings, Materials, and Finishes
Fall. 2 credits. W 7:30–9:25 p.m. R. Gilmore.
Basic understanding of furniture types and systems; interior products and equipment such as work-stations; window, wall, and floor coverings; ceiling and lighting systems; and materials and finishes. Emphasis is placed on criteria for selection of furnishings, materials, and finishes for typical interior design and facility management problems.

DEA 304 Introduction to Professional Practice of Interior Design
Spring. 1 credit. W 2:30–4:25. A. Basinger.
Introduction to organizational and management principles for delivery of interior design and facility management services. Covers basic organizational structures and basic management functions within interior design and facility management organizations, work flow and scheduling, business practices, legal and ethical responsibilities and concerns, contracts, basic contract documents such as working drawings and specifications, supervision of construction and installation, and cost estimation.

DEA 305 Construction Documents and Detailing
Spring. 2 credits. Prerequisites: DEA 301 and DEA 303. Corequisites: DEA 302 and DEA 304. Minimum cost of materials $50. Field trips, $50. W 7:30–9:25 p.m. R. Gilmore.
Comprehensive study of drafting, detailing, schedules and specifications. Emphasis on drawing conventions, symbols, dimensioning, detailing of interior elements, terminology, construction methods and materials.

DEA 325 Human Factors: Ergonomics–Anthropometrics
Fall. 3 credits. Recommended: DEA 150. T R 8:40–9:55. A. Hedge.
Implications of human physical and physiological characteristics and limitations on the design of settings, products, and tasks. An introduction to engineering anthropometry, biomechanics, control/display design, work physiology, and motor performance. Course includes practical exercises and field project work.

DEA 350 Human Factors: The Ambient Environment
Spring. 3 credits. Recommended: DEA 150. T R 8:40–9:55. A. Hedge.
An introduction to human-factor considerations in lighting, acoustics, noise control, indoor air quality and ventilation, and the thermal environment. The ambient environment is viewed as a support system that should promote human efficiency, productivity, health, and safety. Emphasis is placed on the implications for planning, design, and management of settings and facilities. Course includes a field project.

DEA 374 Elements of Business for Non-Business Majors (also Hotel Administration 104)
Spring. 1 credit. Limited to 36. Weekend course. P. Rainsford.
Focus will be to provide hands-on skills and knowledge about how to start or run a small business. Especially appropriate for students interested in professional careers such as architecture, design, writing, art, engineering, law, and other service businesses. Course structure will use a computer-based management simulation game and will require students to work in management teams of six to start and operate a hotel. Introductory-level course. No previous business experience or computer knowledge required. Students are required to attend all sessions and complete a paper, which will be due a week after conclusion of the course.

DEA 400–401–402–403 Special Studies for Undergraduates
Fall or spring. Credits to be arranged. S-U grades optional. Department faculty.
For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of DEA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department head and filed at course registration or within the change-of-registration period after registration in 145 MVR, College Registrar's Office, along with an add/drop slip. To ensure review before the close of the course registration or change-of-registration period, early submission of the special studies form to the department head is necessary. Students, in consultation with their advisers and the instructor should register for one of the following subdivisions of independent study.

DEA 400 Directed Readings
For study that predominantly involves library research and independent reading.

DEA 401 Empirical Research
For study that predominantly involves data collection and analysis, or laboratory or studio projects.

DEA 402 Supervised Fieldwork
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

DEA 403 Teaching Apprenticeship
For study that includes teaching methods in the field and assisting faculty with instruction. Students must have demonstrated a high level of performance in the subject to be taught and in the overall academic program.

DEA 407 Design Studio VII
Fall. 5 credits. Prerequisites: DEA 302, DEA 303, DEA 304, and DEA 305. Minimum cost of materials, $150. Diazo machine fee $8. Field trip $50. M W F 1:25–4:25. R. Gilmore.
Advanced interior design studio organized around a series of interior design problems, 3 to 5 weeks in duration. Focus is on development of design skills and on competence in solving a selected set of generic interior design problem types.

DEA 408 Design Studio VIII
Spring. 5 credits. Prerequisites: DEA 301, 302, 303, and 304. Minimum cost of materials, $150; diazo machine fee, $8 per semester. T R 12:20–4:25. J. Elliott.
Design–problem-solving experiences involving completion of advanced interior design problems. Problems are broken into five phases: programming; schematic design and evaluation; design development, including material and finish selection; design detailing; and in-process documentation and the preparation of a professional-quality design presentation.

DEA 430 Furniture as a Social Art
Spring. 3 credits. Limited to 15. Permission of instructor. Cost of building materials: $150. Students must also sign up for 2 hours of DEA shop time each week for model building. M W 10:10–12:05. P. Eshelman.
This course examines furniture as a design process that emphasizes support of human behavior. Information about specific social issues including health care, aging, child care, and education is the starting point for assignments. Students analyze products currently available and design new furniture. Also covered are furniture materials, fabrication processes, and manufacturing techniques.

[DEA 443 Cultural Construction: The Nineteenth- and Twentieth-Century American Interior
Spring (even-numbered years). 3 credits. Enrollment limited to 15 students. S-U option. Field trips $50. T R 10:10–11:30. Not offered spring 2000; next offered spring 2002. J. Jennings.
A topical study of nineteenth- and twentieth-century American vernacular interiors, exploring the relationship between interior design theory and social and cultural values. Sources include historic interiors, literature and art, architectural and material culture studies. Reading, discussion, comparative analysis, and critical writing.]

DEA 451 Seminar in Facility Planning and Management
Fall. 1 credit. S-U grades only. M 3:35–4:25. F. Becker, W. Sims.
Series of seminars led by Cornell faculty and other facility management professionals. Topics include strategic space planning, space standards, office automation, project management, energy conservation, environmental protection and regulatory issues.

DEA 453 Planning and Managing the Workplace
Spring. 3 credits. Prerequisite: limited to juniors and seniors. M 7:30–10:30. F. Becker.
Intended for students interested in the planning, design, and management of facilities for complex organizations. The purpose of the course is to explore how characteristics of the workplace, including building, design, furniture and equipment and policies governing their use and allocation, affect individual and organizational effectiveness. Special topics, such as the human implications of new information technologies and work at home, are also covered.

DEA 454 Facility Planning and Management Studio
Spring. 4 credits. Prerequisite: DEA 459 or permission of instructor. Letter grades only. Minimum cost of materials, $100. T R 1:25–4:25. W. Sims.
For advanced undergraduates interested in facility planning and management. Purpose is to provide basic tools, techniques, and concepts useful in planning, designing, and managing facilities for large, complex organizations. Covers strategic and tactical planning for facilities, organizing to deliver facility management services, project management, space forecasting, space allocation policies, programming, relocation analysis, site selection, building assessment, space planning and design, furniture specifications, and moves. Sociopsychological, organizational, financial, architectural, and legal factors are considered.

DEA 455 Research Methods in Human–Environment Relations
Fall. 3 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25–2:15. G. Evans.
The course develops the student's understanding and competence in the use of research and analytical tools to study the relationship between the physical environment and human behavior. Emphasis is placed on selection of appropriate methods for specific problems and the policy implications derived from research. Topics include research design, unobtrusive and obtrusive data-collecting tools, the processing of qualitative and quantitative data, and effective communication of empirical research findings.

DEA 459 Programming Methods in Design
Fall. 3 credits. T R 10:10–11:25. L. Maxwell.
Introduction to environmental programming. Emphasis on formulation of building requirements from user characteristics and limitations. Diverse methods for determining characteristics that will enable a particular environmental setting to support desired behaviors of users and operators. Methods include systems analysis, soft system, behavior circuit, behavior setting, and user characteristic approaches. Selection of appropriate methods to suit problems and creation of new methods or techniques are emphasized.

DEA 470 Applied Ergonomic Methods
Spring. 3 credits. Prerequisite: DEA 325. T R 2:55–4:10. A. Hedge.
This course covers ergonomics methods and techniques and their application to the design of modern work environments. Emphasis is placed on understanding key concepts. Coverage includes conceptual frameworks for ergonomic analysis, systems methods and processes, a repertoire of ergonomics methods and techniques for the analysis of work activities and work systems. This course is the undergraduate section of DEA 670, which will share the same lectures but will meet for an additional hour. DEA 670 will have additional readings and projects.

DEA 499 Senior Honors Thesis
Fall or spring. Variable credit. Prerequisite: permission of thesis advisor and DEA director of undergraduate studies. Letter grades only.
This is an opportunity for DEA majors to undertake original research and scholarly work leading to the preparation of a thesis. Students work closely with their thesis advisor on a topic of interest.

DEA 600 Special Problems for Graduate Students
Fall or spring. Credit to be arranged. S-U grades optional. Department faculty.
Independent advanced work by graduate students recommended by their special committee chair and approved by the head of the department and instructor.

[DEA 643 Cultural Construction: The Nineteenth- and Twentieth-Century American Interior
Spring (even-numbered years). 4 credits. Enrollment limited to 15 students. S-U option. Field trips $50. T R 10:10–11:30. Not offered spring 2000; next offered spring 2002. J. Jennings.
A course intended for graduate students who want a more thorough grounding in the history of vernacular interiors than is provided by DEA 443. Each student is required to attend DEA 443 lectures, meet with the instructor and other graduate students for an additional class hour each week, and do additional readings and projects.]

[DEA 645 Dancing Mind/Thinking Heart: Creative Problem—Solving Theory and Practice
Spring. 3 credits. Limited to 15 graduate and advanced undergraduate students. Prerequisite for undergraduates: permission of instructor. T 4:30–7:30. Not offered spring 2000; next offered spring 2001. S. Danko.
Focuses on thinking processes and techniques that support creative problem solving. Theories of creative behavior and critical thinking are examined. Course is highly participatory and experiential by design. Weekly discussions include hands-on applications of theories on short problems tailored to the backgrounds of the students. Primary goal is to demonstrate perceptual, emotional, intellectual, cultural, and environmental blocks to creative thinking and expand the student's repertoire of creative problem solving strategies for use in day-to-day professional practice. Case studies of creative individuals and organizations from a variety of fields are presented.]

DEA 648 Advanced Applications in Computer Graphics
Fall. 3 credits. Limited to 14 graduate and advanced undergraduate students. Prerequisites for undergraduates: DEA 302 or permission of instructor. Minimum cost of materials $150. Lab fee $35. T R 9:05–12:05. K. Gibson.
Advanced use of computer technology to create and analyze interior environments. Emphasis will be on the use of 3-D modeling, animation, photorealistic rendering and emerging technologies to investigate dynamic design issues.

DEA 650 Programming Methods in Design
Fall. 4 credits. T R 10:10–11:25. L. Maxwell.
A course intended for graduate students who want a more thorough introduction to environmental programming methods than is provided by DEA 459. Each student is required to attend DEA 459 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 459 for more detail.

DEA 651 Human Factors: Ergonomics-Anthropometrics
Fall. 4 credits. Recommended: DEA 150 and a 3-credit statistics course. T R 8:40–9:55. A. Hedge.
A course intended for graduate students who want a more thorough grounding in human factors than is provided by DEA 325. Each student is required to attend DEA 325 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 325 for more detail.

DEA 652 Human Factors: The Ambient Environment
Spring. 4 credits. Recommended: DEA 150. T R 8:40–9:55. A. Hedge.
A course intended for graduate students who want a more thorough grounding in human factors considerations than is provided by DEA 350. Each student is required to attend DEA 350 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. For detailed description, see DEA 350.

DEA 653 Planning and Managing the Workplace
Spring. 4 credits. Letter grades only. M 7:30–10:30. F. Becker.
Intended for graduate students who want a more thorough grounding in the planning, design, and management of facilities for complex organizations than is provided by DEA 453. Each student is required to attend DEA 453 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 453 for more detail.

DEA 654 Facility Planning and Management Studio
Spring. 4 credits. Prerequisite: DEA 459/650 or permission of instructor. Letter grades only. Minimum cost of materials, $100. For graduate students in facility planning and management. T R 1:25–4:25. W. Sims.
For description, see DEA 454.

DEA 656 Research Methods in Human-Environment Relations
Fall. 4 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25–2:15. G. Evans.
Intended for graduate students who want a more thorough understanding of the use of research to study the relationship between physical environment and human behavior than is provided by DEA 455. Each student is required to attend DEA 455 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 455 for more detail.

DEA 659 Seminar on Facility Planning and Management
Fall. 1 credit. For graduate students interested in careers in facility planning and management. S-U grades only. M 3:35–4:25. F. Becker, W. Sims.
Series of seminars led by Cornell faculty members and other professionals directly involved in facility planning and management. Topics include strategic and tactical facility planning, space standards, project management, computer and facility management, facility maintenance and operations, energy conservation and building systems.

DEA 660 The Environment and Social Behavior
Fall. 4 credits. Prerequisite: DEA 150 or permission of instructor. Field trip fee $65. T R 2:55–4:10. G. Evans.
Intended for graduate students who want a more thorough understanding of the influence of environmental form on social behavior than is provided by DEA 250. Each student is required to attend DEA 250 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 250 for more detail.

DEA 668 Design Theory Seminar
Spring. 3 credits. Enrollment limited to 25 students. T R 10:10–11:25. J. Jennings.
Directed toward advanced undergraduate and graduate students with interest in the theory of design. The purpose is to provide an understanding of major theoretical ideas underlying design movements of the twentieth century. Explores these ideas through readings, lectures by faculty and visitors, student presentations of research papers, and seminar discussions.

DEA 670 Applied Ergonomics Methods
Spring. 4 credits. Enrollment limited to 20. Prerequisite: DEA 651. T R 2:55–4:10. A. Hedge.
Intended for graduate students who want a more thorough understanding of applied ergonomics methods than is provided by DEA 470. Each student is required to attend DEA 470 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 470 for more detail.

DEA 899 Master's Thesis and Research
Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Department graduate faculty.

HUMAN DEVELOPMENT COURSES

J. Eckenrode, chair; M. Cochran, director of graduate studies; J. Haugaard, director of undergraduate studies; C. Anderson, U. Bronfenbrenner, J. Brumberg, R. Canfield, S. Ceci, S. Cornelius, D. Dempster-McClain, R. Depue, J. Doris, J. Garbarino, K. Greene, S. Hamilton, C. Hazan, B. Koslowski, L. C. Lee, B. Lust, P. Moen, K. Pillemer, M. Potts, C. Raver, H. Ricciuti, S. Robertson, J. Ross-Bernstein, R. Savin-Williams, E. Wethington, W. Williams

NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

HD 115 Human Development
Fall or summer. 3 credits. S-U grades optional. M W F 1:25–2:15. J. Garbarino.
Provides a broad overview of theories, research methods, and current knowledge of human development from conception into adulthood. Course material covers infancy, childhood, and adolescence. Topics include biological, intellectual, linguistic, social and emotional development as well as the cultural, social, and interpersonal contexts that affect developmental processes and outcomes of these domains.

HD 150 Families and the Life Course (also Sociology 151)
Spring. 3 credits. S-U grades optional. M W F 1:25–2:15. T. Mitrano.
This course provides an introduction to social scientific research on family roles and functions in American society. Topics include family history, how families change over the life course, and how families are influenced by cultural and economic forces.

HD 216 Human Development: Adolescence and Youth
Spring or summer. 3 credits. Prerequisite: HD 115 or Psychology 101 or permission of instructor. S-U grades optional. T R 10:10–11:25. C. Schelhas-Miller.
Provides a broad overview of theories, issues, and research in the study of human development from early adolescence to early adulthood (youth). Attention is focused on the interplay of biological and cognitive factors, interpersonal relationships, social structure, and cultural values in shaping the individual's development. The role of adolescence in both the individual's life course and the evolution of the culture as a whole is also considered. Familial, peer group, educational, and work contexts for development are discussed.

HD 218 Human Development: Adulthood and Aging
Spring. 3 credits: Prerequisite: HD 115. S-U grades optional. T R 10:10–11:25. S. Cornelius.
Provides a general introduction to theories and research in adult development and aging. Psychological, social, and biological changes from youth through late adulthood are discussed. Both individual development within generations and differences among generations are emphasized.

HD 230 Cognitive Development
Spring. 3 credits. S-U grades optional. Prerequisites: HD 115 or Psychology 101. T R 11:40–12:55. R. Canfield.
This course surveys theories and research in perceptual and cognitive development from infancy through adolescence. Extensive coverage of infant perception, cognition and learning during the first two years of life forms the foundation of the course. Significant linkages between brain development and behavioral development are covered when possible. Language, memory, concepts, and problem solving are covered in the second half of the semester. The course is intended to serve as a foundation for more advanced study in cognitive development, but also as an overview for students whose primary interests lie in other areas.

[HD 233 Children and the Law
Fall. 3 credits. Prerequisites: HD 115 and an introductory statistics course. W 2:30–5:00. Not offered 1999–2000. S. Ceci.
This course examines psychological data and theories that shed light on the practical issues that arise when children enter the legal arena. It attempts to integrate theories, research, and methodology from several areas of psychology including, developmental, cognitive, social, and clinical. This course also attempts to examine the degree to which basic research can (and should) be used to solve applied issues. The topic of children and the law provides an opportunity to meet all these requirements. Rapid changes involving child witnesses in our legal system have forced social scientists to bring their work into the courtroom. At the same time, bringing this fray into the legal system has changed the course of research and thinking about certain aspects of child development and cognition: it has encouraged researchers to tackle new issues and to develop innovative experimental paradigms. Selected topics to be covered include: memory development, suggestibility, theory of mind, childhood amnesia, expectancy formation, symbolic representational ability, and repression. Several actual cases involving child witnesses will be presented to illustrate the application of scientific data to the courtroom. Because of the heavy use of case materials; video and textual coverage of actual trials, it is expected that students will devote more than the usual number of hours to this course.]

HD 241 History of Childhood in the United States (also History 271, American Studies 241)
Fall. Limited to 50 students. 3 credits. M W 8:40–9:55. J. Brumberg.
An examination of childhood and adolescence in various historical contexts: Puritan New England, slave plantations, evangelical revivals, the Western frontier, Victorian families, reform schools, early high schools and colleges, the sexual revolution of the 1920s, immigrant communities, the Depression and World War II, the 1950s, and more recent social and cultural changes affecting families. Students will evaluate continuities and changes in the lives of American children as well as changing scientific ideas about children. Students have an opportunity to reflect on and write about their own childhood and adolescence. This course is designed to give students a humanities perspective on approaches to childhood.

HD 242 Participation with Groups of Young Children
Fall or spring. 4 credits. Limited to 20 students (limit depends on availability of placements and of supervision). Prerequisites: HD 115 and permission of instructor. S-U grades optional. W 10:10–12:05. J. Ross-Bernstein.
This course is designed to integrate developmental theories with supervised experience in child care centers, with the intention of enhancing the student's abilities to understand and to relate effectively with young children. This class involves participation, observation, reflection, reading, writing, and sharing of viewpoints. Placements are in local nursery schools, day care centers, Head Start programs, and kindergartens.

HD 251 Social Gerontology: Aging and the Life Course
Spring. 3 credits. Limited to 60 students. Strongly recommended: HD 150 or equivalent to be determined by instructor. S-U grades optional. T R 10:10–11:25. D. Dempster-McClain.
This course analyzes the social aspects of aging in contemporary American society from a life course perspective. Topics to be covered include: (1) An introduction to the field of gerontology, its history, theories, and research methods, (2) A brief overview of the physiological and psychological changes that accompany aging, (3) An analysis of the contexts (such as family, friends, social support, employment, volunteer work) in which individual aging occurs, including differences of gender, ethnicity, and social class. (4) The influences of society on the aging individual. Guest speakers will provide

an introduction to various careers in the field of gerontology.

[HD 253 Gender and the Life Course
Fall. 3 credits. Limited to 110 students. S-U grades optional. Not offered 1999–2000. T R 10:10–11:40. P. Moen.
We will examine the complex interplay between gender and age as well as the social construction of the life course. Students explore the relationship between social change and individual lives, observing the significance of two key institutions—work and family—in shaping basic life choices and their consequences throughout the life course. Implications of key life trajectories and transitions for individual lives and for social policy will also be discussed.]

[HD 258 History of Women in the Professions, 1800 to the Present (also Women's Studies 238 and History 238, American Studies 258)
Fall. 3 credits. S-U grades optional. Human ecology students must register for HD 258. Not offered 1999–2000. J. Brumberg.
The historical evolution of the female professions in America (midwifery, nursing, teaching, librarianship, home economics, and social work) as well as women's struggles to gain access to medicine, law, and the sciences. Lectures, reading, and discussion aim to identify the cultural patterns that fostered the conception of gender-specific work, and the particular historical circumstances that created these different work opportunities. The evolution of "professionalism" and the consequences of professionalism for women, family structures, and American society are also discussed.]

HD 260 Introduction to Personality (also Psychology 275)
Fall. 3 credits. Recommended: introductory course is psychology or human development. T R 10:10–11:25. D. Bem.
An introduction to personality psychology, with an emphasis on personality development and contemporary research. Covers the major theories of personality, influences on personality development (including genetic, biological, experiential and environmental factors), and methods for assessing personality.

HD 261 The Development of Social Behavior
Spring. 3 credits. Strongly recommended: HD 115 or Psychology 128. Offered alternate years. T R 1:25–2:40. C. Raver.
Issues in the development of social behavior are viewed from the perspective of theory and research. Likely topics include bases of social behavior in infancy and early childhood, the role of parents, siblings and peers, the development of prosocial and aggressive behavior, the development and functioning of attitude and value systems, and the function and limits of experimental research in the study of social development.

HD 266 Emotional Functions of the Brain
Fall. 3 credits. Prerequisite: a biology course. Letter grades only. M 10:10–12:35. R. Depue.
Much of our social behavior, and what we refer to as personality, is related to phylogenetically-old emotional systems, systems that help us to adapt to critical stimuli in the environment. These systems are structured and organized within the brain, but they are also capable of being modified by our everyday experiences. After an overview of the gross anatomy of the primate brain is presented, the focus of the course concerns networks of brain regions that are organized around the integration of processes related to emotion and motivation. First, general features of the brain in relation to emotional evaluation and expression processes are discussed, and then the brain organization related to several specific types of emotional systems are explored. Neurobiological modulation of emotional processes by neurotransmitters of wide distribution in the brain are detailed as well. The latter helps to lay the groundwork for understanding the nature of individual differences in much of our social and emotional behavior.

HD 281 Foundations of Clinical Practice (also Psychology 281)
Fall. 3 credits. Enrollment limited to 60 students. Letter grades only. W 1:30–4:30. C. Maxwell Miller.
This course provides an introduction to the theoretical and practical aspects of some of the basic elements of counseling. Students will develop an understanding of the most current research on important aspects of counseling and will be introduced to the basic theoretical foundations underlying different approaches. Students will be expected to acquire and demonstrate elementary helping skills. Through role-play, observation of videos, and class demonstrations, students will learn such skills as attending and active listening; they will also develop a capacity to recognize internal conflicts and cognitive distortions as well as the similarities between intra-psychic and interpersonal processes. Other topics include issues of transference and countertransference, the multi-axial dimensions of the DSM IV, defensive strategies as they appear in the DSM IV, and ethical considerations and practices. While this course gives an introduction to the applied aspects of psychology, it does not prepare students to provide treatment of any sort.

HD 284 Introduction to Sexual Minorities (also Women's Studies 285)
Fall. 3 credits. Prerequisite: one social science course. S-U grades optional. M 6:30–9:00 p.m. R. Savin-Williams.
This course introduces students to theories, empirical scholarship, public policies, and current controversies with lesbian, gay, bisexual, transgender, sexual questioning, and other sexual minority populations. The major focus is on gay, lesbian, and bisexual development, lifestyles, and communities with additional emphasis on ethnic, racial, gender, and class issues. Videos supplement the readings and lectures.

HD 300 Special Studies for Undergraduates
Fall or spring. Credit to be arranged. Permission required.
Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the coordinator of undergraduate education, is filed at course registration or during the change-of registration period.

[HD 313 Problematic Behavior in Adolescence
Fall. 3 credits. Prerequisite: HD 115 or Psychology 101; HD 216 recommended. T R 2:55–4:10. Not offered 1999–2000. J. Haugaard.
This course will explore several problematic behaviors of adolescence, including depression, drug abuse, eating disorders, and delinquency. Various psychological, sociological, and biological explanations for the behaviors will be presented. Appropriate research will be reviewed; treatment and prevention strategies will be explored. An optional discussion section will be available to students who would like an opportunity to discuss readings and lectures in greater depth.]

[HD 334 The Growth of the Mind
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 635, a supplemental graduate seminar. Prerequisites: a course in human experimental psychology, statistics, or HD 115 or equivalent; or permission of the instructor. S-U grades optional. Offered alternate years. Not offered 1999–2000. B. Lust.
In this course the fundamental issues of cognition are introduced. What is the nature of human intelligence? of logical and scientific reasoning? How are knowledge and understanding acquired and represented in the human mind? What is the nature of mental representation? What are the cognitive characteristics of the mind at birth? What is the relation of the acquisition of knowledge and understanding to their final representation? What are the relations between language and thought? In the study of those issues, how can epistemology and experimental psychology be related through the experimental method?

Basic debates within the study of cognition are introduced and discussed throughout: for example, the roles of innateness and learning, the distinction between competence and performance, and the relation between induction and deduction in the acquisition of knowledge. Those psychological issues are set in a context of basic epistemological issues involving the tension between rationalism and empiricism. The course will analyze Piaget's comprehensive theory of cognitive development and experimental results. Current research in cognitive development will be contrasted.]

HD 344 Infant Behavior and Development
Fall. 3 credits. Prerequisites: HD 115, a biology course, and a statistics course. Not open to freshmen. M W F 1:25–2:15. S. Robertson.
Behavior and development from conception through the first two years after birth will be examined in traditional areas (e.g., perception, cognition, socioemotional, language, motor). The fundamental interconnectedness of these aspects of development will be strongly emphasized, as well as their relation to the biology of fetal and infant development. Topics with implications for general theories of development will be emphasized (e.g., the functional significance of early behavior, the nature of continuity and change, the role of the environment in development). Conditions which put infants at risk for poor development (e.g., premature birth, exposure to environmental toxins, maternal depression) and topics with current social, ethical, or

political implications (e.g., infant day care, fetal rights) will also be considered. An emphasis on research methodology in the study of early behavior and development will be maintained throughout the course.

HD 346 The Role and Meaning of Play
Fall. 2 credits. Limited to 30 juniors and seniors. Prerequisite: HD 115. M 7:30–9:25 p.m. J. Ross-Bernstein.
The aim of this course is to examine the play of children ages three through seven. Through seminar discussions, workshops, films, and individualized research the student will explore the meaning and validity of play in the lives of young children, the different ways that children play and the value of each, and the effect of the environment in enhancing and supporting play.

[HD 347 Human Growth and Development: Biological and Behavioral Interactions (also Biology and Society 347 and Nutritional Sciences 347)
Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent, and HD 115 or Psychology 101. Limited to 150 students. M W F 1:25. Offered alternate years. Not offered 1999–2000. S. Robertson and J. Haas.
This course is concerned with the interrelationships of physical and psychological growth and development in humans during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variations for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.]

HD 348 Advanced Participation with Children
Spring. 4–8 credits. Limited to 20 students (limit depends on availability of placements and supervision). Prerequisites: HD 115 and HD 242; and permission of instructor. Recommended: HD 346. S-U grades optional. T 12:20–2:15. J. Ross-Bernstein.
An advanced, supervised field-based course, designed to help students deepen and consolidate their understanding of children. Students are expected to define their own goals and assess progress with supervising teachers and instructor; to keep a journal; and to plan, carry out, and evaluate weekly activities for children within their placement. Conference groups and readings focus on contexts of development and on ways to support children's personal and interpersonal learning. Each student is expected to do a presentation and paper on a self-selected topic within the scope of the class. Participation is in settings that serve typical and/or special needs children from three to eight years of age and provide education, care, or special-purpose interventions for them.

[HD 353 Risk and Opportunity Factors in Childhood and Adolescence
Spring. 3 credits. Enrollment limited to 100 students. Prerequisites: HD 115 and HD 150. S-U grades optional. T R 1:25–2:40. Not offered 1999–2000. J. Garbarino.
This course explores the meaning of risk and opportunity in the lives of children and youth. It begins from an understanding of risk accumulation and resilience as they relate to social policy, professional practice, and community development. The concept of "social toxicity" is a central theme of the course. Assignments include writing research-based editorials and participating in a simulated public policy debate.]

[HD 359 American Families in Historical Perspective (also Women's Studies 357, History 359, American Studies 359)
Spring. 3 credits. Prerequisite: HD 150 or one 200-level social science or history course. S-U grades optional. Human ecology students must register for HD 359. Not offered 1999–2000. J. Brumberg.
This course provides an introduction to and overview of problems and issues in the historical literature on American families and the family life cycle. Reading and lectures demonstrate the pattern of American family experience in the past, focusing on class, ethnicity, sex, and region as important variables. Analysis of the private world of the family deals with changing cultural conceptions of sexuality, sex roles, generational relationships, stages of life, and life events. Students are required to do a major research paper on the history of their family, covering at least two generations, and demonstrating their ability to integrate life-course development theory, data drawn from the social sciences, and historical circumstances.]

HD 362 Human Bonding
Fall. 3 credits. Recommended: introductory course in psychology or human development. S-U grades optional. T R 1:25–2:40. C. Hazan.
The science of interpersonal relationships. Examines the basic nature of human affectional bonds, including their functions and dynamics. Covers such topics as interpersonal attraction and mate selection, intimacy and commitment, love and sex, jealousy and loneliness, the neurobiology of affiliation and attachment, and the role of relationships in physical and psychological health.

HD 363 The Psychological Development of Women
Fall. 3 credits. Limited to 60 students. Strongly recommended: HD 115, 150, and a 200-level course. Letter grades only. T R 11:40–12:55. C. Raver.
Historically, psychologists have effectively charted the pathways of boys' normative development yet sometimes neglected to pursue a full understanding of girls' development. To address this gap, this seminar will pursue a number of theoretical perspectives that focus on the social development of girls and women. Theory and research on girls' gender identity, peer relationships, romantic relationships, and parenting will be covered, with an eye toward understanding their meaning within different historical and sociocultural frameworks. Relations between psyche, body, and culture will be considered, using the works of such authors as Freud, Horney, Miller, Chodorow, and Gilligan. Students will rigorously evaluate these theoretical perspectives in light of recent empirical research on women's psychological development.

HD 366 Psychobiology of Temperament and Personality
Spring. 3 credits. Letter grades only. Prerequisite: HD 266. T R 10:10–11:40. R. Depue.
This course is for students who have an interest in the neurobiology of behavior, in general, and in temperament and personality, in particular. The course material is presented within an evolutionary biology perspective, where the development of neurobehavioral systems as a means of adapting to critical stimuli is explored as the basis of emotional traits in humans. The nature of temperament, social affiliation, and personality is explored from psychometric, social, genetic, and biological points of view. There is a focus on the general role played by the biogenic amines (dopamine, norepinephrine, and serotonin) and opiates in determining individual differences in temperament and personality. Implications for several forms of personality disorders and psychopathology are also discussed. Finally, the manner in which environmental influences across the life span may be coded in the brain and influence the development of personality is explored.

HD 370 Psychopathology (also Psychology 325)
Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: HD 115 or Psychology 101. Letter grades only. M W F 11:15–12:05. C. Maxwell-Miller.
A research-based survey of the cognitive, emotional, and biological aspects of psychopathology across the life span. The major mental illnesses will be covered, including schizophrenia, anxiety disorders, affective disorders, and personality disorders as well as psychopathological disorders of childhood. Emphasis will be placed on the development of psychopathology, current theories and models of etiology, and intervention strategies. This course is intended to be a rigorous introduction to the scientific study of psychopathology and psychopathological development; minimal attention to psychotherapy.

HD 397 Experimental Child Psychology
Fall. 4 credits. Prerequisites: HD 115 or Psychology 101 and one course in statistics. Intended primarily for students interested in entering graduate programs involving further research training. Limited to 16 students. M W 10:10–12:00. L. Lee.
A study of experimental methodology in research with children. Includes lectures, discussions, and practicum experiences covering general experimental design, statistics, and styles and strategies of working with children.

HD 400–401–402–403 Special Studies for Undergraduates
Fall or spring. Credits to be arranged. Enrollment limited to juniors and seniors with a minimum 3.0 G.P.A. Permission required. Prerequisites: either HD 115, 150, and two intermediate level HD courses, or four courses in pyschology or sociology. S-U grades optional.
For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of HD not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake, on a form available from the department office in NG14. This form must

be signed by the instructor directing the study and the student's faculty adviser and submitted to NG14 MVR, the Office of Undergraduate Education. After clearance that all prerequisites are met, the student picks up the form in NG14 to file at course registration or within the change-of-registration period after registration in the College Registrar's Office, 145 MVR along with an add/drop slip. To ensure review before the close of the periods, early submission of the special studies form to the Office of Undergraduate Education is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study (guidelines for each are available in NG14 Martha Van Rensselaer Hall).

HD 400 Directed Readings
Prerequisites: in addition to the general prerequisite courses, a statistics or methods course and at least one course directly linked to the area of study. Permission required.
For study that predominantly involves library research and independent study.

HD 401 Empirical Research
Prerequisites: in addition to the general prerequisite courses, a statistics or methods course and at least one course directly linked to the area of study. Permission required.
For study that predominantly involves data collection and analysis, or laboratory or studio projects.

HD 402 Supervised Fieldwork
Prerequisites: in addition to the general prerequisite courses, an observation or participation course. Permission required.
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

HD 403 Teaching Apprenticeship
Prerequisites: in addition to the general prerequisite courses, students must have taken the course or equivalent and received a grade of B+ or higher. Permission required.
For study that includes assisting faculty with instruction.

HD 417 Female Adolescence in Historical Perspective (also Women's Studies 438, History 458, American Studies 417)
Fall. 3 credits. Prerequisites: HD 216, 241 or, 258 or 300-level history or women's studies course. Juniors and seniors only. M 7:30–10:00 p.m. J. Brumberg.
A reading, writing, and discussion course that will attempt to answer a basic historical question that has consequences for both contemporary developmental theory and social policy: how has female adolescence in the United States changed in the past 200 years? The focus will be on the ways in which gender, class, ethnicity, and popular culture shape adolescent experience. Although the required readings are primarily historical in nature, students are encouraged to think about the interaction of biology, psychology, and culture. Students are required to do a primary source research paper.

HD 436 Language Development (also COGST 436, PSYCH 436 and LING 436)
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD/LING 700, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. T R 2:55–4:10. B. Lust.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of universal grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child.

HD 438 Thinking and Reasoning
Fall. 3 credits. Prerequisite: HD 115 or Psychology 101. T R 1:25–2:40. B. Koslowski.
The course will examine problem solving and transfer, pre-causal thinking, logical thinking, practical syllogisms, causal reasoning, scientific reasoning, theories of evidence, expert vs. novice differences, and non-rational reasoning. Two general issues will run through the course: the extent to which children and adults approximate the sorts of reasoning that are described by various types of models, and the extent to which various models accurately describe the kind of thinking that is required by the types of problems and issues that arise and must be dealt with in the real world.

HD 439 Cognitive Development: Infancy through Adolescence
Spring. 3 credits. Prerequisites: HD 115 or Psychology 101. Letter grades only. T R 1:25–2:40. B. Koslowski.
The course will be an overview of current and classic issues and research in cognitive development. Central topics of both "hard cognition" (e.g., information processing and neuropsychological functioning) and "soft cognition" (e.g., problem solving, concepts and categories) will be covered. Selected topics will be linked to methodological issues and to important social issues such as cross-cultural cognitive development and putative racial and social class differences.

HD 440 Internship in Educational Settings for Children
Fall or spring. 8–12 credits. Prerequisites: HD 115, 242, or 243 and 348. Recommended: HD 346. Permission of instructor required. S-U grades optional. J. Ross-Bernstein.
Opportunity to integrate theory with practice at an advanced level and to further develop understanding of children ages two to ten and their families. Interns will function as participants in varied settings and participate in curriculum planning, evaluation, staff meetings, home visits, parent conferences, and parent meetings. Supervision by head teacher and instructor. Students are expected to define their own goals and to assess their progress, to do assigned and self-directed readings, and to keep a critical incident journal.

HD 451 Nontraditional Families and Troubled Families
Spring. 3 credits. Limited to 30 students. Prerequisites: HD 115 and 150. Letter grades only. T R 8:40–9:55. Offered alternate years. J. Haugaard.
This is an advanced course designed to explore the functioning of families. The first part of the course examines family system theory and how it relates to our understanding of all families. Four types of families are then examined: two nontraditional families (e.g., adoptive families) and two troubled families (e.g., families with a chronically ill child).

[HD 456 Families and Social Policy
Spring. 3 credits. Prerequisite: one course in the area of the family or in sociology. S-U grades optional. Not offered 1999–2000. P. Moen.
An examination of the intended and unintended family consequences of governmental policies, using case studies in areas such as social welfare, day care, and employment. The policy implications of changes in the structure and composition of families are also considered.]

HD 457 Health and Social Behavior (also SOC 457)
Fall. 3 credits. Prerequisites: a course in statistics and one of the following: HD 150, Sociology 101, Sociology 151, or Rural Sociology 101. Letter grades only. T R 10:10–11:25. Offered alternate years. E. Wethington.
This course critically examines theories and empirical research on the relationships among social group membership, social status, and physical and mental health. The lectures focus on social stress, social support, and family structure, all of which are associated with variations in physical health, mental health, and health maintenance behaviors. Students are expected to read widely from current literature in medical sociology, health psychology, public health, and epidemiology.

[HD 464 Sexual Minorities and Human Development (also WOMNS 467)
Spring. 3 credits. Limited to 15 students. Permission of instructor required. T R 2:55–4:10. Not offered 1999–2000. R. Savin-Williams.
The first half of the course covers topics selected by students regarding theoretical, research, and applied issues on sexual minorities. In the second half of the course, students present their field experience or research topic to the class as a teaching experience. The success of the course depends on students feeling personally engaged and committed to the course content, their selected field experience, and their chosen specialized research topic. Because of the multidisciplinary nature of the course, it is hoped that students from a variety of backgrounds in academic disciplines, gender, sexual orientation, ethnicity, race, class, and religious affiliation will feel comfortable in the course.]

HD 467 Psycho-social Issues in Asian American Identity (also AAS 467)
Spring. 3 credits. Prerequisites: HD 115 or Psychology 101 preferred. Letter grades only. M 6:30–9:00 p.m. L. Lee.
The course will review theories of identity and self and their usefulness in understanding identity formation for various ethnic groups within the Asian American population. It will

examine the impact of various societal forces, e.g., racism, stereotypes, etc. as well as life experiences, e.g., immigration, family values, etc. in shaping or contributing to the formation of identity or identities of Asian Americans.

[HD 468 Stress in Childhood and Adolescence
Fall. 3 credits. Recommended: HD 115, HD 150 and a statistics course. Letter grades only. TBA. Not offered 1999–2000. J. Eckenrode.
This is an advanced seminar that will review research related to the nature and consequences of stressful experiences in childhood and adolescence, particularly those arising in the family. Topics covered represent common stressors in the lives of children (e.g. divorce of parents), which have potentially damaging consequences for development (e.g. child abuse). Topics in which faculty at Cornell have conducted significant research (e.g. children's memory for stressful events) are also covered. In addition to considering the negative impact of stress on development, we will also consider issues of individual differences in stress reactivity, including the concepts of coping and resilience. These topics lead naturally into discussions of practice and policy.]

[HD 471 Child Development and Psychopathology
Spring. 3 credits. Limited to 60 advanced-level students. Prerequisites: HD 115 or Psychology 101. Strongly rcommended: a basic course in psychopathology. Letter grades only. T R 11:40–12:55. Not offered 1999–2000. J. Haugaard.
This class will explore the development and process of mental, emotional, and behavioral disorders in children such as mental retardation, autism, and attention deficit disorders. Topics will include (1) the classification of mental disorders; (2) biological, psychological, and sociological theories regarding the development and maintenance of mental disorders; (3) prevalence and etiology of childhood mental disorders, and (4) therapeutic and preventive interventions. If there is sufficient enrollment, an optional discussion section will be available to those students who would like an opportunity to discuss readings and lecture material in greater depth.]

[HD 482 Child Development and Social Policy
Fall. 3 credits. Enrollment limited to 25 juniors and seniors or by permission of instructor. Prerequisites: HD 115, HD 150, and a course in statistics. HD 260 OR 261 strongly recommended. Letter grades only. Offered alternate years. Not offered 1999–2000. T R 12:20–1:45. C. Raver.
Course work and seminar discussion emphasize the integration of basic research in young children's social and emotional development with intervention- and prevention-oriented research. The course also examines theoretical models of the relations between risk and resilience in child development, family functioning, community and culture. Policies in the domains of parenting, early childhood education, family and community violence, poverty, and child care are analyzed. Broad questions regarding the identification of social problems and the design of solutions are considered within cultural and historical contexts.]

[HD 483 American Child Care in Global Perspective
Fall. 3 credits. Enrollment limited to 25 juniors and seniors. Prerequisites: HD 115 and HD 150. S-U grades optional. T R 2:55–4:10. Not offered 1999–2000. M. Cochran.
In this course we examine American child care policies and programs, broadly defined, in the context of policies and programs in Africa, Asia, Europe, and Latin America. Comparison and analysis are guided by several complementary conceptual frameworks. Particular attention is given to relativism and universalism as applied to developmental and educational principles and concepts. Students specialize in the child care policies and programs of another country, work in teams to analyze a contemporary policy issue, and apply course content to an issue of their choice in a final paper.]

HD 498 Senior Honors Seminar
Fall. 1 credit. Required for, and limited to, seniors in the HD honors program. S-U grades only. TBA. S. Cornelius.
This seminar is devoted to discussion and presentation of honors theses being completed by the senior students.

HD 499 Senior Honors Thesis
Fall or spring. Credit to be arranged. Prerequisite: permission of thesis adviser and coordinator of honors program. S-U grades optional. Department faculty.

HD 106, 206, 306, 406 Topics in Human Development
2–4 credits. S-U grades optional.
These topics vary each time the course is offered and are taught by advanced graduate students in the field of human development. Descriptions are available at the time of course registration. These courses do not fulfill any requirements for the major; they must be taken as electives.

Topics Courses

Fall or spring. 2–4 credits. Prerequisites and enrollment limits vary with topic being considered in any particular term. Permission of instructor may be required.
This series of courses provides an opportunity for undergraduates to explore an issue, a theme, or research in the areas of departmental concentration. Topics vary each time the course is offered. Descriptions are available at the time of course registration. Although the courses are usually taught as seminars, a subject may occasionally lend itself to lecture, practicum, or other format.

HD 215, 315, 415 Topics in Adolescent and Adult Development

HD 235, 335, 435 Topics in Cognitive Development

HD 245, 345, 445 Topics in Early-Childhood Development and Education

HD 255, 355, 455 Topics in Family Studies and the Life Course

HD 265, 365, 465 Topics in Social and Personality Development

HD 275, 375, 475 Topics in Developmental Psychopathology

HD 285, 385, 485 Topics in the Ecology of Human Development

The Graduate Program

HD graduate courses are only open to undergraduates with instructor's permission.

General Courses

HD 610 Processes in Human Development: Theoretical Models and Research Designs
Spring. 3 credits. Open to graduate students and juniors and seniors in HD and related fields with instructor's permission. Prerequisite: a minimum of one course in statistics. Letter grades only. W 2:00–4:25. U. Bronfenbrenner.
The purpose of the seminar is to acquaint students with selected scientific paradigms being employed at the frontiers of developmental science for investigating the conditions and processes that shape human development over the life course. Particular attention will be given to research models that draw on disciplines (such as evolutionary biology, human genetics, developmental psychology, sociology, anthropology, history, economics). The principal seminar activities consist of faculty and student development of research questions, critical analysis of these questions in the light of diverse theoretical perspectives, and their corresponding research designs. In this process, the human being is treated as an integrated organism.

[HD 617 Adolescence
Spring. 3 credits. Not offered 1999–2000. Staff.
Critical examination of seminal theoretical and empirical writings on adolescent development. Empirical research on specific questions chosen by students is considered in the light of these approaches.]

[HD 631 Cognitive Development
Fall. 3 credits. Letter grades only. Offered alternate years. Not offered 1999–2000. Staff.
Faculty members involved in the course will present their area of specialization in cognitive development. These areas will include perception, attention, memory, language, thinking and reasoning, learning, creativity, and intelligence.]

HD 640 Infancy
Fall. 3 credits. TBA. S. Robertson.
Development in infancy will be examined through a critical review of key research and theory in selected aspects of neurobehavior, perception, cognition, language, emotion, and social relationships. Theoretical issues to be considered include the role of experiences in early development, sensitive periods, continuity and discontinuity in development, and the functional significance of early behavior. Some of the conditions that put infants at risk for poor development will also be considered, such as premature birth, perinatal medical complications, and exposure to environmental toxins. The course will combine perspectives from developmental psychology and psychobiology.

HD 650 Contemporary Family Theory and Research
Fall. 3 credits. E. Wethington.
Sociological and social psychological theories and research on the family are examined with reference to the relationship between the family and society. Topics change from year to year, but focus on the processes of socialization and social control, the reproduction of gender and social class across

generations, changes in family "values" across time, the rise of divorce and single motherhood, family diversity, and the genesis of deviance and psychological disorder.

HD 660 Social Development
Spring. 3 credits. S-U grades optional. C. Raver.
This course is designed to provide both broad and in-depth training in the areas of social and emotional development during infancy and childhood. It will cover most of the major topic areas and theoretical orientations. Consideration will be given to basic influences on socioemotional development—biological, social, and cultural. Coverage will include normative development as well as the origins and nature of individual differences. We will explore such fundamental issues and questions as: What are emotions? What role do they play in the development and organization of personality? What are the effects of early social relationships on emotional regulation? When and how does the self-system emerge? Emphasis will be on the processes—both internal and external—that help determine the course and outcome of development.

[HD 670 Experimental Psychopathology
Spring. 3 credits. Prerequisite: an undergraduate course in abnormal psychology or psychopathology; a course in multivariate statistics; and substantive course work in neurobiology or related biological science. Not offered 1999–2000. TBA. Staff.
Overview of current theories and empirical research on functional and organically based psychological disorders. Topic areas to be covered include autism, schizophrenia, anxiety disorders, affective disorders, and personality disorders. Focus is on the developmental and etiology of psychopathology.]

Topical Seminars

Seminars offered irregularly, with changing topics and instructors. Content, hours, credit, and instructors to be announced. Seminars offer concentrated study of specific theoretical and research issues.

HD 618 Seminar in Adolescence and Adult Development
Topics include peer relations, parent-teen relationships, self-esteem, youth and history, work, and moral development.

HD 633 Seminar on Language Development
Topics include acquisition of meaning in infancy, precursors of language in early infancy, and atypical language development.

HD 635 Seminar in Cognitive Development
Topics include early attention, perception, memory, and communication. Assessment and intervention in relation to these processes will be considered when possible.

HD 645 Seminar on Infancy
Focuses on selected topics in the developmental psychology and psychobiology of infancy (including fetal development). Special topics vary and depend in part on student interests.

HD 646 Seminar in Early-Childhood Development and Education
Topics include analysis of models and settings, design of assessment techniques, program evaluation, and early childhood in a cross-cultural context.

HD 655 Seminar in Family Studies and the Life Course
Topics include the sociology of marital status, the single-parent family, work-family linkages, women and work, and families and social change.

HD 665 Seminar in Personality and Social Development
Focuses on selected issues related to personality and social development. The issues selected vary each year according to current importance in the field and student interests.

HD 675 Seminar in Developmental Psychopathology
Topics include learning disabilities, therapeutic interventions in atypical development, child abuse and maltreatment, family factors in the etiology of functional disorders, and cognitive characteristics of atypical groups.

HD 685 Seminar in Human Development and Family Studies
Topics include development of self-concept, sex-role identity, observational methods, and interviews in developmental research.

HD 690 Seminar on Ecology of Human Development
Topics include the institutional setting as a determinant of behavior, the poor family, and the identification and measurement of ecological variables.

Individualized Special Instruction

HD 700–806 Special Studies for Graduate Students
Fall or spring. Credits and hours to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades at discretion of instructor.
Independent advanced work by graduate students recommended by their Special Committee chair with permission of the instructor.

HD 700 Directed Readings
For study that predominantly involves library research and independent study.

HD 701 Empirical Research
For study that predominantly involves collection and analysis of research data.

HD 702 Practicum
For study that predominantly involves field experience in community settings.

HD 703 Teaching Assistantship
For students assisting faculty with instruction. Does not apply to work for which students receive financial compensation.

HD 704 Research Assistantship
For students assisting faculty with research. Does not apply to work for which students receive financial compensation.

HD 705 Extension Assistantship
For students assisting faculty with extension activities. Does not apply to work for which students receive financial compensation.

HD 706 Supervised Teaching
4 credits.
For advanced students who assume major responsibility for teaching a course. Supervision by a faculty member is required.

HD 806 Teaching Practicum
4 credits. For advanced graduate students to independently develop and teach an undergraduate topics course under the supervision of a faculty member.

HD 899 Master's Thesis and Research
Fall or spring. Credit to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.

HD 999 Doctoral Thesis and Research
Fall or spring. Credit to be arranged. Credits 1–15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.

POLICY ANALYSIS AND MANAGEMENT

R. Burkhauser, chair; D. Kenkel, Consumer Economics and Housing, director of graduate studies; J. Greene, Human Service Studies, director of graduate studies; A. Mathios, director of undergraduate studies; J. Kuder, director of Sloan Program; J. Allen, R. J. Avery, D. Barr, R. Battistella, B. J. Bristow, R. Brooks, W. K. Bryant, D. Burchfield, R. Burkhauser, P. Chi, L. Dimmler, M. Dyer, J. Ford, J. Gerner, J. Greene, R. Heck, A. Kabcenell, D. Kenkel, J. Kuder, N. Kutty, A. Mathios, C. McClintock, L. Morton, A. Parrot, E. Peters, P. Pollak, E. Rodriguez, W. Rosen, S. Tennyson, J. Tiffany, D. Tobias, W. Trochim, S. Walston; R. Babcock, Emeritus; H. Biesdorf, Emeritus; G. Bymers, Emerita; F. M. Firebaugh, Emerita; A. Hahn, Emeritus; E. S. Maynes, Emeritus; J. Mueller, Emerita; L. Noble, Emerita; J. Robinson, Emerita; C. Shapiro, Emerita; L. Street, Emeritus; K. Walker, Emerita; B. L. Yerka, Emerita; J. Ziegler, Emeritus

NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

[PAM 180 Human Services in Contemporary Society (formerly HSS 101)
Fall. 3 credits. Recommended for freshmen and first-year transfer students. Not offered 1999–2000. D. Barr.
A lecture and discussion course designed as an introduction to the community base of services. Current and historical human services are examined. Emphasis is placed on social services, education, health, and criminal justice. Barriers to service delivery are discussed, such as racism, sexism, classism, sexual preference, physical disability, and age. Contemporary issues that impact on service delivery will also be discussed with attention to the relationship between direct service and public policy.]

PAM 200 Intermediate Microeconomics (formerly CEH 210)
Fall or spring. 4 credits. Prerequisite: Econ 101 or equivalent. Fall: preference to sophomores and juniors. Spring: preference to juniors and seniors. R. Brooks, W. Rosen.
A section is mandatory. Theory of demand and consumer behavior including classical and indifference curve analyses; theories of production and cost; models for the following markets—competitive, monopoly, monopolistic competition, oligopoly, and inputs; general equilibrium; welfare economics; public goods; risk.

PAM 201 Determinants of Behavior (formerly HSS 246)
Fall. 3 credits. Prerequisites: introductory sociology and introductory psychology. J. Mueller.
This course provides an interdisciplinary knowledge base for human service professionals. We examine social behavior in the human environment from ecological, ethological, historical, cultural, and social system perspectives. Applications are made to professional practice at the micro level (counseling with individuals and families or other small groups) and at the macro level (social planning and policy formulation for vulnerable groups in our society).

PAM 204 Applied Public Finance (also CEH 204)
Fall or spring. 3 credits. Prerequisites: PAM 200. S-U grades optional. E. Peters, D. Kenkel.
The public sector now spends nearly $2 out of every $5 generated as income in the U.S. economy. A thorough knowledge and understanding of this important sector is an essential part of training in policy analysis and management. This course will provide an overview of the public sector of the U.S. economy, the major categories of public expenditures, and the main methods used to finance these expenditures. The principles of tax analysis and cost-benefit analysis will be presented with a focus on the role of public policy in improving economic efficiency, promoting the goals of equity and social justice improving equity by altering the distribution of wealth and income.

PAM 205 Research Methods (formerly HSS 292)
Fall or spring. 3 credits. Sections TBA. W. Rosen, W. Trochim.
Students will learn the logic and methods of social science research, as well as how to create researchable questions out of their issues of interest. Readings, written assignments, and in-class exercises focus on stating hypotheses, designing studies and samples to test hypotheses, measuring variables, and simple statistical analysis. PAM majors should take this course no later than their junior year.

[PAM 206 Race, Power, and Privilege in the United States (formerly HSS 280)
Fall. 3 credits. Not offered 1999–2000. J. Turner/D. Barr.
For description, see AS&RC 280.]

PAM 220 Introduction to Management: Principles and Differences Among Sectors (also HSS 220)
Fall or spring. 3 credits. D. Tobias, S. Walston.
This course is a basic introduction to major management and related concepts of planning, organizing, controlling, leadership, and special topics within five major management contexts including individual/personal, groups/families, firms, not-for-profit organizations, and governments/communities.

PAM 223 Consumer Markets I (formerly CEH 233)
Fall. 4 credits. R. J. Avery.
A study of the structure and functions of consumer retail markets with emphasis on the role and activities of the major players in these markets—firms, consumers, and governments. The nature and consequences of various types of market failures are studied from each of these perspectives. Case studies and outside lecturers are used.

PAM 230 Introduction to Policy Analysis (formerly CEH 230)
Fall or spring. 3 credits. R. Avery, J. Gerner.
Policy analysis is an interdisciplinary field that uses theories, concepts, and methods from disciplines such as economics, sociology, and political science to address substantive issues in the public policy arena. Students will be introduced to the functions of and interactions between the major institutions (public and private) at the national, state, and local level involved in the policy making process. The course will focus on public policy analysis in the consumer, health, and family/social welfare areas and will also include an introduction to the technical skills required to undertake policy analysis.

PAM 240 Critical Perspectives (also HSS 240)
Fall or spring. 4 credits. D. Barr, J. Greene and J. Allen.
This course examines the implications and importance of perspective when examining of public policy. It considers the sources of differing perspectives, including demographic characteristics, historical experience, and intellectual tradition. We also consider how these differing perspectives affect what is considered to be empirical evidence, what assumptions are made, and what outcomes are considered to be important. We will explore these ideas using several specific public policy proposals.

PAM 270 Housing and Society (formerly CEH 247)
Spring. 3 credits. S-U grades optional. P. Chi.
A survey of contemporary American housing issues as they relate to the individual, the family, and the community. The course focuses on the current problems of the individual housing consumer, the resulting implications for housing the American population, and governmental actions to alleviate housing problems.

PAM 300 Special Studies for Undergraduates (formerly CEH and HSS 300)
Fall or spring. Credit to be arranged.
Special arrangement for course work to establish equivalency for training in a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. This form, signed by both the instructor directing the study and the head of the department, should be filed at course registration during the change-of-registration period.

PAM 301 Economic Organization of the Household (formerly CEH 325)
Fall. 3 credits. Prerequisite: Econ 101 or equivalent. S-U grades optional. W. K. Bryant.
Economic models are used to help explain a wide variety of family and individual behavior. Topics include the demand for consumer goods and services; consumption and saving; time allocation in the household including labor supply, household production and leisure; human capital investment; fertility; marriage and divorce. Within each topic, uses of the material by public- and private-sector decision makers are discussed.

PAM 303 Ecology and Epidemiology of Health (formerly HSS 330)
Spring. 3 credits. S-U grades optional. Limited to 50 students. E. Rodriquez.
Ecological and epidemiological approaches to the problems which restrict human health within the physical, social, and mental environment. The course introduces epidemiological methods to the students and surveys the epidemiology of specific diseases such as AIDS, hepatitis, Legionnaires' disease, plague, cancer, herpes, and chlamydia. Application of epidemiology to health care will be discussed.

PAM 305 Introduction to Multivariate Analysis (formerly CEH 307)
Fall or spring. 4 credits. Prerequisites: ARME 210 or ILRST 210 or equivalent. Staff.
The course introduces students to basic econometric principles and the use of statistical procedures in empirical studies of economic models. Assumptions, properties, and problems encountered in the use of multiple regression procedures are discussed. Students are required to specify, estimate, and report the results of an empirical model. Factor analysis and analysis of variance will be covered as well. Section meets once a week.

[PAM 310 Evaluation of Public Policies (formerly CEH 485)
Fall. 3 credits. Prerequisites: PAM 200, 330 or permission of instructor. Not offered 1999–2000. B. Rosen.
This is an advanced course in economic policy analysis that builds on the material covered in PAM 330, Intermediate to Policy Analysis. The course will use a series of policy examples to demonstrate the economic approach. Special topics in cost-benefit analysis and policy evaluation techniques will be developed when necessary for the example under study. Examples of topics that may be addressed include excise taxation, economic evaluations of health care innovations, environmental policies, traffic regulations, consumer policies, and welfare reform.]

PAM 323 Consumer Markets II (formerly CEH 333)
Spring. 4 credits. R. J. Avery.
This course focuses on external and internal forces that drive consumer demand. Material in this course will cover the processes whereby consumers interpret market-provided information and the social forces impacting consumer purchase decisions. Particular emphasis will be placed on communication institutions in the market (advertising, the news, and other mass media) and the control of these institutions through government regulation. A select group of consumer policy issues will be covered, such as consumer evaluation of product safety and quality, food additives, consumer privacy, and socially responsible advertising.

PAM 326 Personal Financial Management (formerly CEH 315)
Fall. 3 credits. Preference given to human ecology students; limit 200; not open to freshmen. S-U grades optional. R. Heck.
The study of personal financial management at various income levels and during different stages of the family life span. Course topics include financial management frameworks and decision-making processes, basic economic and financial principles, returns to human resources, income and wealth analysis, the role of consumer and mortgage credit,

financial insolvency and counseling, expenditure and purchase analyses, the use of budgets and record keeping in achieving family economic goals, economic risks and available protection, retirement and estate planning, and alternative forms of savings and investments.

PAM 330 Intermediate Policy Analysis (formerly CEH 250)
Spring. 3 credits. Prerequisite: PAM 200. N. Kutty.
Introduction to the tools and techniques of policy analysis. Topics covered include microeconomic concepts such as consumer and producer surplus, deadweight loss; rationale for public policy; benefit-cost analysis; impact assessments; experimental, quasi-experimental, and non-experimental designs; and the social ecology of policy analysis.

PAM 340 The Economics of Consumer Policy (formerly CEH 330)
Fall. 4 credits. Prerequisites: PAM 200 or permission of instructor. S. Tennyson.
This course is designed to familiarize students with the basic approaches to consumer policy and the economic analysis of consumer policy issues. The course is structured around the major forms of government intervention in consumer markets, and examines a wide variety of economic and social regulations from the economic perspective. Students are required to write a term paper analyzing a consumer policy issue of their choosing.

[PAM 341 Economics of Consumer Law and Protection (formerly CEH 365)
Spring. 3 credits. Prerequisite: Econ 101 or equivalent. S-U grades optional. Not offered 1999–2000. A. Mathios.
Economic analysis of the roles played both by the courts and by federal and state regulatory legislation in altering consumer markets, consumer behavior, and consumer welfare. Topics include economic analyses of contract law, products liability, accident law and antitrust law, as well as the activities of such agencies as the Federal Trade Commission, the Food and Drug Administration, and the Consumer Product Safety Commission.]

PAM 346 Economics of Social Security (also CEH 346)
Spring. 3 credits. Prerequisite: PAM 200. S-U grades optional. R. Burkhauser.
This course provides students with an economic perspective on social security policies. The readings illustrate the use of economic analysis to predict the behavioral effects and income distributional consequences of policy. The course primarily focuses on the Old-Age, Survivors and Disability Insurance Program. But other programs such as, the Supplemental Security Income, Food Stamps, etc., will be discussed as will policies that attempt to end discrimination against the elderly or those with disabilities.

PAM 350 Contemporary Issues in Women's Health (formerly HSS 335)
Fall. 3–4 credits. Offered alternative years. A. Parrot.
This course will deal with the history of women in medicine and historical and cultural treatment of women's health problems. Health care research and the exclusion of women from research trials and protocols will also be addressed. Reproductive issues, alternative approaches to treatment, medical problems, ethical issues, cancers, factors that contribute to post-traumatic stress disorders, health promotion behaviors, political issues, and routine medical recommendations will also be discussed in depth. Students may take the course for a fourth credit, which will require attending a discussion section every other week and observations of seven facilities that provide a variety of women's health care (i.e., birthing center, mammogram, and ultrasound center, wellness center, hospital labor and delivery unit, LaMaze class, women's self defense class, etc.) on the alternate weeks.

[PAM 370 Wealth and Income (formerly CEH 355)
Fall. 3 credits. Open to sophomores, juniors, and seniors; graduate students may elect to audit and write a research paper for 1 to 2 credits under PAM 600. Prerequisites: Econ 101–102 or equivalent. S-U grades optional. Not offered 1999–2000. E. Peters.
The wealth and income positions of American households are defined and described. Various statistics are employed to present conflicting pictures of the distribution of income using the same underlying data. Several models of economic determinants of income are presented and redistributive policies are discussed in the context of the economics of the political and philosophical positions for and against such policies.]

[PAM 371 Economics of Family Policy—Adults (formerly CEH 320)
Fall. 4 credits. Limited to 40 students. Junior or senior standing; non-PAM majors by permission of instructor. Not offered 1999–2000. Staff.
This course examines the economics of family policy issues that have a particular impact on adult family members. Emphasis in this course is on the economic behavior surrounding the policy and the incentives set up by the policy. Policies considered include marriage and divorce, family leave policy, policies assisting single parents, and policies affecting caregiving.]

PAM 372 Economics of Family Policy—Children (formerly CEH 321)
Spring. 4 credits. Limited to 40 students. Junior or senior standing; non-PAM majors by permission of instructor. J. Gerner.
This course examines the economics of family policy issues that particularly affect children. This course focuses on a) the economic behavior that generates the policies and b) the economic incentives and behavior that result from the policies. Topics include child welfare, education, day care provision, child support, and adoption.

[PAM 373 The Economics of Welfare Policy (formerly CEH 356)
Fall. 4 credits. Prerequisite: Econ 101 or equivalent. S-U grades optional. Not offered 1999–2000. D. Burchfield.
Using the tools of economics, this course examines welfare policy. Included is an examination of the populations affected, the behavior various policies are likely to engender, and how much income redistribution occurs as a result of these welfare policies. Various proposals for welfare reform are also evaluated.]

PAM 374 Urban Economics and Policy (formerly CEH 348)
Spring. 4 credits. Prerequisite: PAM 200 or equivalent. S-U grades optional. N. Kutty.
This course explores the economics of cities and urban problems and studies the growth of cities, location choices of firms and households, and the factors which determine land rents. The urban policy issues explored include—housing, urban poverty, zoning, and urban congestion.

PAM 375 Housing and Long-term Care for the Elderly (formerly CEH 444)
Fall. 3 credits. S-U grades optional. P. Chi.
Through a wide range of service experiences, this service-based seminar will allow students to explore the different ways community agencies enable older adults to remain independent within diversified residential settings as planned retirement housing, subsidized housing for the low-income elderly, home-sharing projects, ECHO housing, accessory apartments, assisted living facilities, and continuing care retirement community. This seminar will focus on the linkage between housing and long-care alternatives. Throughout the seminar, students will be asked to reflect critically on how their service experience complements, challenges, or extends the course curriculum. The seminar will meet two times every other week. Students are also required to give 4–6 hours of service a week, 4 during the weeks the seminar meets and 6 during the other weeks.

[PAM 376 Housing, Neighborhood and Community (formerly CEH 445)
Spring. 3 credits. Prerequisite: PAM 270 or permission of instructor. S-U grades optional. Not offered 1999–2000. P. Chi.
The course examines the interrelationships of housing conditions, neighborhood transitions, and community development. Both theoretical and empirical perspectives on residential patterns, neighborhood change, and community power will be examined. Special attention is given to government policies that deal with fair housing, residential segregation, neighborhood revitalization, and community development.]

PAM 380 Human Sexuality (formerly HSS 315)
Spring. 3 credits. Limited to 500 students. Prerequisite: an introductory course in human development and family studies, psychology, or sociology (or equivalent social science course). Recommended: one course in biology. A. Parrot.
The aim of this course is to provide students with an understanding of the interactions and interrelationships of human behavior that influence sexual development and behavior. The course will focus on the evolution of sexual norms, cross-cultural customs, legislation within changing sociopolitical systems, and delivery of services related to sexual issues, needs, and/or problems. Future trends in sexuality will be addressed. Biological and developmental components of human sexuality will also be addressed. An underlying issue is the influence of our social and cultural system on the development of sexual needs, standards, and values. Research and theory of human sexuality will be explored through human and organizational behavior, biology, history, communication arts, education, research theory, law, sociology, and psychology.

[PAM 381 Health-care Services and the Consumer (formerly HSS 325)
Fall. 3 credits. Prerequisite: an introductory course in human services or health or biology. S-U grades optional. Offered alternate years. Not offered 1999–2000. A. Parrot.
This course is an introduction to health care services and will present developments in the health field that affect the availability and kinds of health services. Emphasis is placed on the interrelationships of practitioners, institutions, and agencies. The part each can play in prevention, diagnosis, and treatment of disease and disability is also explored. Topics will include historical and current trends, quality health care, consumer issues, cultural concerns, ethical issues, politics and policies, and the contemporary problems of health care.]

PAM 383 Social Welfare as a Social Institution (formerly HSS 370)
Fall. 3 credits. J. Allen.
A philosophical and historical introduction to social welfare services. The course reviews the historical, social, and political contexts within which social welfare programs and the profession of social work have evolved. It discusses the political and ideological processes through which public policy is formed and the way policies are translated into social welfare programs. Basic issues in welfare are discussed through present program designs, public concerns, and the interrelationships and support of services in the community.

PAM 392 New York State Government Affairs (also HSS 392)
Spring semester only. 12 credits. Letter grade only. Preference given to juniors and seniors. Sophomores considered. PAM 220 or a course in political science strongly recommended. C. McClintock.
Students participate in the New York State Assembly Intern Program which includes coursework on legislative, intergovernmental and political party dynamis, that has been approved as upper division baccalaureate credit by the New York State Regents National Program on Noncollegiate Sponsored Instruction. Students also participate in a three day a week supervised New York State Assembly internship requiring research on proposed legislation, committee and public hearings and constituent issues that link policy analysis and implementation. Course and internship performance recommendations are reviewed and finalized by the faculty coordinator of the PAM Experiential Learning Honors Program and recorded as Cornell credit.

PAM 400–401–402 Special Studies for Undergraduates (formerly CEH and HSS 400–401–402)
Fall and spring. Credits to be arranged. S-U grades optional. Staff.
For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of CEH, HSS, or PAM not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake, on a form available from the department field office. This form must be signed by the instructor directing the study and the department chair and filed at course registration or within the change-of-registration period after registration with an add/drop slip in 145 MVR, College Registrar's Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special studies form to the department chair is necessary. Students, in consultation with their faculty supervisor, should register for one of the following subdivisions of independent study.

PAM 400 Directed Readings (formerly CEH and HSS 400)
For study that predominantly involves library research and independent reading.

PAM 401 Empirical Research (formerly CEH and HSS 401)
For study that predominantly involves data collection and analysis.

PAM 402 Supervised Fieldwork (formerly CEH and HSS 402)
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

PAM 403 Teaching Apprenticeship (formerly HSS 403)
Prerequisite: students must have taken the course (or equivalent) in which they will be assisting and have demonstrated a high level of performance. For study that includes assisting faculty with instruction.

PAM 404 Senior Seminar: Self-Evaluation of Professional Practice (formerly HSS 473)
Spring. 3 credits. Prerequisite: limited to students with field experience or ongoing field experience. Faculty.
The process of change at the individual, family, and community level is a major theme of the senior seminar. The second theme, which is integrated throughout the course, concerns ethical principles and values that should inform professional practice. We will also discuss value dilemmas attendant on interventions to promote change at both the micro and macro levels of practice.

PAM 423 Risk Management and Policy (also CEH 423)
Spring. 3 credits. Prerequisite: Econ 101 and a course in statistics. Enrollment limited to 80. S. Tennyson.
The objective of this course is to provide students with a broad understanding of risk management problems and solutions, a greater appreciation of the importance of risk and risk regulation in our society, and increased comprehension of the complexities of making decisions about risk. Topics covered include alternative ways to define and measure risk, the importance of risk-tradeoffs, and models of decision making under risk. With this background, alternative approaches to risk management are discussed, including insurance, non-insurance financing alternatives, and loss control. The impact on risk management of the legal liability system and government programs, laws and policies are also considered.

[PAM 424 Families in Business (formerly CEH 435)
Spring. 3 credits. Prerequisites: introductory statistics or permission of instructor. S-U grades optional. Not offered 1999–2000. R. Heck.
Offers students the opportunity to explore family business topics such as business formation, growth and expansion, strategic management, professionalization, succession, locational choices, and family dynamics, conflicts, and relationships relative to the business. An overview of families who own businesses and the profiles of their businesses will be presented along with the examination of the course topics relative to the various stages of business activity including feasibility, start-up, ongoing maintenance, expansion or redirection, and exit or transfer. Case studies from the Harvard Business School series will be utilized to examine the course topics listed above. The course also provides an introduction to research on family businesses by surveying the conceptual issues and methodological approaches related to the study of family businesses.]

[PAM 425 Empirical Research on Family Businesses (formerly CEH 436)
Fall. 3 credits. Prerequisites: introductory statistics or permission of instructor. S-U grades optional. Not offered 1999–2000. R. Heck.
Allows students to develop research skills by providing opportunities for hands-on survey and fieldwork. Topics and activities include research design, sampling, questionnaire development, and statistical analyses related to family-owned businesses; critical review of current research approaches and extant databases used to research business ownership; and implementation and completion of an actual survey of fieldwork project of selected family business owners, or the use of extant databases for descriptive analyses of family-owned businesses.]

PAM 427 Complementary Alternative Medicine (also HSS 491)
Fall. 3 credits. Prerequisites: a health course and intro biology or permission of instructor. A. Parrot.
This course will help pre medical students, health administration students, as well as health economics students understand the relationship between alternative medicine and western allopathic medicine. The course will educate students about health and wellness, treatments for specific health conditions, differing philosophies of health care, financing health services, and cross cultural approaches to health and wellness.

PAM 435 The U.S. Health Care System (also HSS 435)
Fall or spring. 3 credits. R. Battistella, D. Burchfield.
This course provides an introduction to the health care delivery systems in the United States, and covers the inter-relatedness of health services, the financing of health care, and the key stakeholders in health care delivery including regulators, providers, health plans, employers and consumers. The course describes the history and organization of health care, behavioral models of utilization, issues of health care reform, and current trends. The course provides an overview of the key elements of the field including ambulatory care services, mental health services, hospitals and clinicians, insurers, the role of public health organizations, and the politics of health care in the U.S.

[PAM 450 Economics of Health Behavior and Policy (formerly CEH 432)
Spring. 3 credits. S-U grades optional. Prerequisites: PAM 200 or equivalent or permission of instructor. Not offered 1999–2000. D. Kenkel.

This course uses the tools of economics to provide a better understanding of health behavior and policy. One focus is on policies that promote public health, including education programs and cigarette and alcohol taxation. Policies that influence consumer choices about health care and health insurance are also considered. A common theme is that to understand the effects of health policy it is necessary to analyze the incentives faced by consumers and the incentives of their employers, insurers, and health care providers. Analyses of specific health policies help develop this theme.]

[PAM 470/HD 485 Psycho-Economic Perspectives on Human Intelligence and Achievement: Did the Bell Curve Get It Right? (formerly CEH 475)

Spring. 3 credits. Prerequisites: basic statistics: any of the following (ARME 210, ARME 411, BTRY 215, ILRST 210, PAM 305, ECON 319, ECON 320); basic economics: ECON 101 or permission of either instructor. Open to juniors and seniors; limited to 100. Not offered 1999–2000. S. Ceci, E. Peters.

The course brings together the analytical tools and key models of economics and psychology to investigate issues raised by Herrnstein and Murray's book *The Bell Curve*. The objective of the course is to bring research into the classroom by enabling students to understand and use (in the lab) the methods available for defining and assessing intelligence and its relationship to success in life and social issues.]

PAM 471 The Politics of Power and Empowerment in Community Development (formerly HSS 417)

Spring. 3 credits. Limited to 20 students. D. Barr.

The course will take a theoretical world view of power and the historically colonial relationship between the American ruling class and other people. The three dimensions of power will be used as the framework for analysis. The relationships between social class, race, sex, and power will be studied. In addition, the class will explore the nature of empowerment and new theories of power and empowerment.

PAM 473 Social Policy (formerly HSS 475)

Spring. 3 credits. Prerequisite: PAM 383 or Government 111 or Sociology 141. S-U grades optional. J. Allen.

An examination of the policy-making process and the significance of national policies as they affect the distribution of social services. Frameworks for analyzing social policy are used to evaluate existing social programs and service-delivery systems. Implications for change in policies at the national, state, and local levels are discussed.

PAM 480 Professional Internship in Human Service Studies (formerly HSS 414)

Fall or spring. 4–7 credits. Limited to juniors and seniors majoring in human service studies. Prerequisite: PAM 100. Precourse enrollment required. Staff.

Students intern for a minimum of 10 hours a week in a human service organization and attend a weekly seminar or office hours with a focus on integrating classroom and field-based learning. The course is structured as an opportunity for students to learn experientially and, at the same time, provide meaningful services to human service organizations. Interns are expected to take active roles in structuring, monitoring, and assessing their learning under the guidance of a faculty instructor.

PAM 481–482 Social Work Methods and Practice I and II (formerly HSS 471–472)

Introduction to concepts and methods used in a generalist model of social work practice. Examination of the values and ethics of professional practice. Students acquire knowledge and skills appropriate for working with individuals, groups, families, organizations, and communities. Class content is integrated with supervised fieldwork. Placements are made in social agencies in Tompkins and surrounding counties. Students are expected to arrange and to pay for their own transportation.

PAM 481 Social Work Methods and Practice I (formerly HSS 471)

Fall. 9 credits. Limited to 25 social work students. Lab fee: $63. Prerequisites: introductory psychology, introductory sociology, one course in human development, grades of C+ or better in PAM 201 and 383. Staff.

PAM 482 Social Work Methods and Practice II (formerly HSS 472)

Spring. 9 credits. Limited to 25 social work students. Prerequisites: grade of B- or better in PAM 481 and satisfactory performance in fieldwork. Staff.

Topics Courses

Fall or spring. 2–4 credits. Prerequisites and enrollment limits vary with topic being considered in any particular term. Permission of instructor required. Hours to be arranged. Department faculty.

This series of courses provides an opportunity for advanced undergraduates to explore an issue, a theme, or research in the areas of departmental concentration. Topics vary each time the course is offered. Descriptions are available at the time of course registration. Although the courses are usually taught as seminars, a subject may occasionally lend itself to lecture, practicum, or other format.

PAM 483 Human Service Environments—Topic course (formerly HSS 490)

PAM 484 Human Service Programs—Topic course (formerly HSS 491)

PAM 485 Performance Management and Measurement in Nonprofit Organizations—Topic course (formerly HSS 492)

PAM 486 Child Welfare I (formerly HSS 490)

Fall. 3 credits. O. Heath-Crump.

This course is an introduction to the field of child welfare with its many contemporary, traditional, and sometimes controversial issues. Included is an overview of current child welfare practice and policy as it affects such problem areas as drugs and alcohol, children and homelessness, and children and violence. This seminar will present a broad perspective on these subjects along with a systems theory orientation.

PAM 487 Child Welfare II (formerly HSS 490)

Spring. 3 credits. O. Heath-Crump.

This course is a sequel of Child Welfare I, which exposes students to the numerous problems plauging children of the child welfare system. Students will have the opportunity to take a closer look at how the system works, how it is not working to improve the lives of children, and what might be done about it. The purpose of the course is to prepare students to be change agents regarding the child welfare system and to not accept the status quo. The course will also focus on the major policy issues that are emerging for the future of children contending with the system.

PAM 499 Honors Program (formerly CEH 499 and HSS 499)

Fall or spring. This course is a combination of CE&H 499 and HSS 499. For CE&H and PA majors.

The honors program provides students with the opportunity to undertake basic or applied research which will be preparation of a thesis representing original work of publishable quality. The program is intended for students who desire the opportunity to extend their interests and efforts beyond the current course offerings in the department. Furthermore, the program is designed to offer the student the opportunity to work closely with a professor on a topic of interest. CE&H or PA majors doing an honors program may take PAM 499 for up to 15 credits. See Professor Alan Mathios for more details. For HSS majors the honors program allows them to pursue independent literature or field investigation. The HSS Honors Program is open to HSS majors who have been admitted as juniors to the College of Human Ecology Honors Program. HSS majors may take up to 6 credits of PAM 499 and should spread the credit over two semesters in their senior year.

PAM 520 Policy and Management Issues on Foreign Investment in China (formerly CEH 520)

Spring. 3 credits. P. Chi.

This course will help students understand the general investment environment in China and learn how social, cultural, political and economic factors affect decisions on market entry strategies, marketing mix strategies and other management strategies for foreign-invested enterprises (FIEs) in China. This course will not only examine the growth of FIEs since the 1980s, but also discuss the policy initiatives and institutional barriers for direct foreign investment in China. Both multiplier and linkage effects of foreign investment on China's economy will also be evaluated. Further, the management issues on formation, performance, profitability, and dissolution of FIEs will be systematically examined.

PAM 600 Special Problems for Graduate Students (formerly CEH and HSS 600)

Fall and spring. Credits to be arranged. S-U grades optional. Staff.

Independent advanced work by graduate students recommended by their chair and approved by the department chair and the instructor.

[PAM 601 Research Workshop in Consumer Economics and Housing (formerly CEH 601)
Fall and spring. 1 credit. S-U grades only. Not offered 1999–2000. Staff.
Research workshop designed to provide a forum for graduate students in consumer economics and housing to present their research.]

PAM 603 Teaching Experience (formerly HSS 603)
Fall and spring. 1–3 credits. S-U only.
For students assisting faculty with instruction. The aspects of teaching and the degree of involvement vary depending on the needs of the course and the experience of the student. Does not apply to work for which students receive financial compensation.

PAM 604 Economics of Consumer Demand (formerly CEH 613)
Fall. 3 credits. Prerequisite: PAM 200, Economics 311 or 313, or concurrent enrollment in one of the three, and two semesters of calculus. S-U grades optional. W. K. Bryant.
A graduate level introduction to theory and empirical research on household demand, consumption, and saving. Emphasis is on the use of the theory in empirical research. Topics include neo-classical theory of demand, duality, complete demand systems, conditional demand, demographic scaling and translating, consumption and savings. Becker and Lancaster models of demand will be introduced.

PAM 605 Economics of Household Behavior (formerly CEH 624)
Spring. 3 credits. Prerequisite: PAM 604 or Economics 609–610 or consent of instructor. S-U grades optional. E. Peters.
This course examines household decision making in both single agent and multiple agent (e.g., game theoretic or bargaining) frameworks. The first half of the course focuses on 1) fertility, 2) household production, and 3) time allocation models of behavior—decisions that are usually modeled in a single-agent framework. The second half of the course looks at 1) marriage markets, 2) family formation and dissolution, 3) bargaining models of resource allocation within the household, and 4) intergenerational transfers across households. These kinds of behaviors are more fruitfully studied using multiple agent models such as contract theory, game theory, and household bargaining. Empirical applications of the theoretical models are presented for both developed and developing countries. Implications for family policies such child care subsidies, divorce laws, family planning, government subsidies to education, and social security are also discussed. Much of the material covered by this course could also be found in economic demography and economics of the family courses.

PAM 606 Demographic Techniques (formerly CEH 606)
Fall. 3 credits. S-U grades optional. W. Brown.
This course provides an introduction to the methods, measures, and data used in the analysis of human populations. Topics include demographic rates, life-table analysis, cohort vs. period analysis, sources and quality of demographic data, population estimation and projection, and stable population models.

PAM 610 Introduction to Program Evaluation (formerly HSS 689)
Fall. 1 credit. J. Greene.
This course provides a conceptual introduction to the theory and practice of social program evaluation. It is designed particularly but not exclusively for students planning a major or minor in HSS program evaluation and planning. The course emphasizes two major dimensions of evaluation: 1) its practical, real-world, political dimension and 2) its theoretical, methodological dimension. At the intersection of these two dimensions lie issues of evaluation's purpose and role, which are also addressed in the course.

PAM 611 Program Evaluation and Planning—Topic course (formerly HSS 611)

PAM 612 Measurement for Program Evaluation and Research (formerly HSS 690)
Fall. 4 credits. Priority given to HSS students. Limit 35. E. Rodriguez.
The course reviews measurement theory and its application to the evaluation of human service programs. Topics include validity; reliability; scaling methods; basic principles of instrument design; and varied methods of data collection with an emphasis on structured questionnaires and interviews. Student work is focused around an applied course project. Attention is also given to ethical and managerial issues that arise in applied measurement settings.

PAM 613 Program Evaluation and Research Design (formerly HSS 691)
Spring. 3 credits. W. Trochim.
This course reviews research design and its application to the evaluation of human service programs. Major topics include experimental, quasi-experimental, and nonexperimental research designs; basic sampling and measurement theory; and the theory of validity in research. Attention is given to issues that arise in the application of research designs, and the evaluation of programs, including problems of randomization, causal inference, replication, and utilization of results. The central role of the general linear model in the statistical analysis of outcome evaluation is presented through case examples and computer simulation. Students will encounter examples of outcome evaluation outcomes from a wide range of disciplines including health, mental health, social welfare, criminal justice, social policy, and education.

[PAM 614–615 Program Evaluation in Theory and Practice (formerly HSS 692–693)
614, fall; 615, spring. 4 credits each semester. Prerequisites for PAM 614: 612 and 613 or 617, or permission of instructor. Prerequisite for PAM 615: 614. Students must register for both semesters. Not offered 1999–2000. Staff.
This course is a practicum in which the class designs and conducts an evaluation of a human service program. Students are involved in all phases of the evaluation from design to the production and dissemination of a final report. Emphasis is on research methods in the social sciences. Application of knowledge developed in prerequisite courses is stressed (for example, planning and managing an evaluation, ethics, methods of data collection, data processing, and strategies for analysis and feedback of results).]

PAM 616 Strategies for Policy and Program Evaluation (formerly HSS 695)
Fall. 3 credits. Prerequisites: PAM 612 and 613 or 617 or equivalent. Offered alternate years. C. McClintock.
This course examines a wide range of approaches to the evaluation of policies and programs in the human services. The approaches are examined with respect to their purposes, key audiences, and methodologies, as well as their philosophical, political, and value frameworks. Analysis of commonalities and differences across evaluation approaches are used to judge the appropriateness of a given strategy for a particular context.

PAM 617 Qualitative Methods for Program Evaluation (formerly HSS 696)
Spring. 3 credits. Prerequisites: PAM 612 and 613 or equivalent. J. Greene.
This course presents a qualitative approach to applied research and the evaluation of human service programs. Topics include the epistemological assumptions underlying this approach, questions of entry into setting, methods for data collection and data analysis, reporting, confidentiality of participants, and the ethics of qualitative inquiry. The course aims to help students understand how, when, and why a qualitative approach to social inquiry can be used appropriately, effectively, and defensibly.

PAM 618 Seminar in Program Evaluation and Evaluative Research (formerly HSS 697)
Fall and spring. 1 credit. W 12:20–1:10. J. Greene, E. Rodriguez, and W. Trochim.
This ongoing seminar is topically organized according to student and faculty projects. Focus is on professional issues in evaluation practice, including consulting, ethics and standards, preparation of conference and publication materials, and various methodological issues.

PAM 620 Human Service Administration—Topic Course (formerly HSS 610)

[PAM 623 Consumer Decision Making (formerly CEH 639)
Spring. 3 credits. Not offered 1999–2000. R. J. Avery.
Individual and family decision making with respect to their market purchases will be investigated from a multidisciplinary perspective. Topics to be covered in the course include cognitive theories of information processing; theories of group interaction in decision making; and the effect of advertising, imperfect information, and uncertainty on consumer product evaluation and purchase behavior. Special attention will be given to consumer decision making in various market segments, e.g., low-income consumers, children, and the elderly. Specific attention will be paid to how consumers in these segments process marketer-provided information and their related consumption decisions.]

PAM 630 Seminar in Program Planning and Development (formerly HSS 669)
Fall. Variable credit. Staff.
Topics include microlevel program planning, third-sector organizations, and intergovernmental influences on program planning, policy formation, program implementation, and mainstreaming. Two or more human services are examined.

PAM 631 Ethics, Public Policy, and American Society (formerly HSS 658)
Fall. 3 credits. J. Ziegler.
This course will explore current issues of ethics and public policy against a background of theories of ethical behavior. Questions of how public officials and managers of public and non-profit agencies and private enterprises act will be examined. How do standards of ethical behavior in these professions get established? How are public policy issues with ethical implications resolved? Readings will draw from political philosophy, contemporary social science, and imaginative writing. This class is a seminar and class participation is essential. Open to seniors and graduate students.

[PAM 632 The Intergovernmental System: Analysis of Current Policy Issues (formerly HSS 664)
Fall. 3 credits. Open to seniors who have had a course in American government and to graduate students. Not offered 1999–2000. J. Ziegler.
This course offers advanced policy analysis of current political/social/economic issues in the context of the intergovernmental system. Particular attention is paid to how certain policy and human service issues are played out at the federal, state, and local levels of government, and to the formulation of federal and state budget policy. General public administration theory is considered. Students work in teams on a policy/administrative research project and report to the class.]

PAM 633 Social Policy and Program Planning in Human Services (formerly HSS 660)
Spring. 3 credits. S-U grades optional. Staff.
An examination of the policy process with an emphasis on the ways in which this process determines the allocation and distribution of social services in the fields of health, education, income security, employment, criminal justice, and housing. The relationship of the policy process to the political economy, to intergovernmental relations, and to social change at the national, regional, state, and local levels will be analyzed. To this end history, theory, cultural values and beliefs, and the structure of society will also be investigated. The role of evaluation in policy planning and implementation will be underscored. Current issues in policy, such as the role of the private and voluntary sectors, interest group politics, barriers and constraints to the development of effective policies, and the respective roles of consumers, clients, and human service professionals in the policy process will also be addressed.

[PAM 640 Information and Regulation (formerly CEH 635)
Spring. 3 credits. Prerequisite: PAM 604 or PAM 200 and two semesters of calculus. Class packets on sale at Campus Store. Not offered 1999–2000. A. Mathios.
A survey of the problems and policies accompanying informational failures and other market failures with regard to consumer well-being. Governmental regulation of products, producers, consumers, and prices are examined. Antitrust activity, disclosure requirements, advertising restrictions, and regulatory agencies are examined in terms of their ability to serve the public and special interests. Economic analysis, rather than institutional structure, is emphasized.]

PAM 650 Applications in Health Management Practice, Enterpreneurship and Consulting (formerly HSS 612)
Spring. 3 credits. S. Walston.
Seminars and practica, offered periodically and reflecting faculty and student interest, with changing topics and instructors. Content, time, credits, and instructors to be announced. Seminars and practica offer concentrated study in a specific human service area or in the education, planning, or evaluation processes within human services.

[PAM 651 Seminar in Mental Health Services (formerly HSS 613)
Fall. 3 credits. Open to undergraduate seniors with instructor's approval. Not offered 1999–2000. J. Mueller.
Using lectures, case examples, and class discussions, we will look from both administrative and clinical perspectives at the organization and delivery of mental health services to persons who are mentally ill, mentally infirm, or seriously emotionally and/or developmentally disabled. We will examine model programs for long-term community care and services designed to meet the special needs of ethnic/racial minorities, women, and homeless persons who are mentally impaired. State/federal partnerships will be discussed in terms of their impact on fiscal and human resources for both public and for-profit agencies.]

PAM 652 Health Care Services: Consumer and Ethical Perspectives (formerly HSS 625)
Fall. 3–4 credits. Limited to 30 students; undergraduates with permission of instructor. 4-credit option, may be used as Biology and Society Senior Seminar option. A. Parrot.
The course will focus on consumer and ethical issues faced by the health care field today. Broad topics to be discussed include ethical standards and guidelines, health care costs and accessibility of services, government role in health care delivery, health care as a right or privilege, private industry role in health care, services for the medically indigent and elderly, practitioner burnout and training, ethics of transplant surgery and funding, reproductive technology, AIDS research and funding, animals in medical research, right to die, and baby and granny Doe cases.

[PAM 653 Health Economics and Policy (formerly CEH 632)
Spring. 3 credits. Prerequisites PAM 604 . Econ 609 or permission of instructor. S-U grades optional. Not offered 1999–2000. D. Kenkel.
This course provides an overview of research in health economics and its relevance for health policy. Models of health capital, household production, and insurance are developed and used to address public health policies and health insurance programs and reforms. Major issues in the economics of the health care sector are discussed, including the markets for physician services, hospital care and long-term care. Much of the course focuses on the U.S., but it will also review research on other countries, especially developing countries that face a very different set of health policy issues.]

PAM 654 Legal Aspects of Health Care (formerly HSS 627)
Spring. 3 credits. Prerequisites: PAM 657 or permission of instructor. H. Allen and R. Brooks.
This course introduces principles of the law that are specifically applicable to health-service delivery. Topics considered include the liability of hospitals and their staff and personnel for injuries to patients; medical records and disclosure of information; consent to medical and surgical procedures; responsibility for patients' personal property; collection of bills; medical staff privileges; and confidential communications.

[PAM 655 Comparative Health-Care Systems (formerly HSS 630)
Spring. 3 credits. Open to graduate students and a limited number of seniors with permission of instructor. Not offered 1999–2000. P. J. Ford.
An overview of health services is given within the larger context of the social and economic development policies of several industrialized democracies and developing countries. Sociocultural, economic, and epidemiologic factors are stressed as keys to the formulation of realistic strategies. Resource allocations for health services are assessed against the backdrop of changing rates of economic growth.]

PAM 656 Managed Health Delivery Systems: Primary-Ambulatory Care (formerly HSS 631)
Spring. 3 credits. Prerequisite: PAM 657. R. Battistella.
The concept of primary care is used to enhance understanding of the direction and purpose of ongoing changes in health services organization and financing. Pressures on traditional indemnity insurance and solo fee-for-service medicine are examined in the context of the transition from unmanaged to managed delivery systems. The course is divided into two parts: Part 1 examines the development of health maintenance organizations and related forms of managed care against the backdrop of larger public policy concerns. Part 2 centers on administrative-financial topics associated with the design, marketing, and operation of managed delivery systems in highly competitive markets. Considerable attention is given to the relationship between physicians and management with respect to such subjects as medical practice styles, productivity, quality assurance, and outcome measurement. The consumer health care behavior literature is reviewed in the light of marketing strategies and utilization control objectives. Many of the managerial topics are highlighted with field trips and visiting speakers.

PAM 657 Health Care Organization (formerly HSS 634)
Fall. 3 credits. Limited to 30 students. Priority given to Sloan students or permission of the instructor. R. Battistella.
The course will provide an introduction at the graduate level to the organization of health providers in the United States, the interrelationships of health services and the major sources and methods of paying for care. The course will describe how health services are structured in the United States and how these different services interrelate along the continuum of care. The course will describe and analyze organization, delivery, and financing issues from a variety of perspectives using specific performance criteria (e.g., equity, quality, efficiency). Innovations by the public and private sectors in the delivery and reimbursement of health care will also be presented.

PAM 658 Field Studies in Health Administration and Planning (formerly HSS 635)
Fall or spring. 1–4 credits. TBA. Staff.
Students interested in developing administrative and program-planning research skills are given an opportunity to evaluate an ongoing phase of health care agency activity in the light of sound administrative practice and principles of good medical care. In planning and carrying out the research, students work closely with a skilled practicing administrator and with members of the faculty.

PAM 659 Epidemiology, Clinical Medicine, and Management Interface Issues (formerly HSS 637)
Spring. 3 credits. E. Rodriguez.
From an empirical and analytical framework this course explores the relationships between epidemiology, clinical medicine, and management. The course will review the epidemiology, policy issues, and treatment of selected diagnoses accounting for a significant percentage of utilization and cost of health care services. In addition, students will have an opportunity to explore issues of resource allocation and continuous quality improvement. The format for the class is lecture, discussion, and case analysis.

PAM 660 Quality in Health Care Organizations (formerly HSS 638)
Fall. 3 credits. A. Kabcenell and S. Walston.
The quality of health services—the extent to which the appropriate and most effective care is properly administered in the least costly manner—is a topic of paramount importance to patients. It is also a central concern of the providers and managers of health services and those who pay for care. It is a cornerstone of health care reform. Through readings, lecture, discussion, and group work, this course will acquaint the student with the basic elements of managing quality in health care organizations including: defining quality from many perspectives; measuring performance and detecting poor quality care; traditional and progressive approaches to managing quality including Continuous Quality Improvement; and the politics of quality, both within and outside the organization.

PAM 661 Economics of Health and Medical Care (formerly HSS 640)
Fall. 3 credits. D. Kenkel.
The course is designed for graduate students who seek an understanding of the tools, vocabulary, and way of thinking of economics as it applies to decision making in health services delivery, administration, and policy. The philosophy of the course approach is based on the often-quoted credo of John M. Keynes: "The theory of economics does not furnish a body of settled conclusions immediately applicable to policy. It is a method rather than a doctrine, apparatus of the mind, a technique of thinking which helps its possessor to draw correct conclusions." The basic methods of micro-economics will be emphasized as tools to help individuals and organizations make better decisions about health services delivery, administration, financing and policy issues.

PAM 662 Health Care Financial Management I (formerly HSS 641)
Fall. 3 credits. D. Burchfield.
The course is designed to give graduate students an intensive introduction to the issues and techniques in the financial management of health service organizations. Class lectures, readings, guest speakers, problems, case studies, and research for term paper/projects will all be used to demonstrate important points, which will be reinforced by examples and applications. The course emphasizes the internal financial management knowledge and skill necessary for financial success in complex health organizations.

[PAM 663 Health Care Financial Management II: Payment Systems (formerly HSS 642)
Spring. 3 credits. Prerequisite: PAM 662. Not offered 1999–2000. Staff.
The purpose of this course is to develop an understanding of the theories on which health care payment and reimbursement systems are based and the techniques by which they operate.]

PAM 664 Information Resources Management in Health Organizations (formerly HSS 645)
Spring. 3 credits. Recommended: strong basic computer skills. S-U grades optional. D. Burchfield.
Students are expected to have basic computer skills upon entry into the course. This course is a graduate course in Health Services Administration. Students will be exposed to the opportunities and challenges inherent in the use of health management information systems (HMISs) in clinical and non-clinical applications. The course focuses on the manager's role in the application of HMISs to solve problems and address concerns in today's health care service industry. Students will learn how an HMIS can enhance the ability to appraise multi-clinical and non-clinical services of care.

PAM 665 Managing Health and Human Service Organizations I (formerly HSS 648)
Fall and spring. 3 credits. Staff.
This is the first segment of an 8-credit sequence addressing the management and leadership of health and human services organizations. Different perspectives are examined, from that of the first-line supervision to the CEO level. This course begins with a study of basics of management—communications, motivation, change management, leadership, human resources, organizational design issues, and labor relations. It then looks at the development of technical skills in the areas of problem solving, decision making, productivity measurement, resource allocation and performance measurement. The course is taught with an applied focus and utilizes a case study approach.

PAM 666 Strategic Management and Organizational Design of Health Care Systems (formerly HSS 649)
Spring. 3 credits. Prerequisite: PAM 665. S. Walston.
This is the second segment of an 8-credit sequence in the management and leadership of health and human services organizations. This course concentrates on strategy issues, marketing, organizational culture issues, development of mission, the management of professionals, and studies the importance of roles, structure, and inter- and intra-institutional relationships within these organizations. The course is taught via a case study approach.

PAM 667 Health and Welfare Policy (formerly HSS 685)
Fall. 3 credits. R. Battistella.
Health and welfare issues are seen as reflecting alternate solutions to the broader institutional problems of allocation (economics), control (politics), and normative behavior (morality). A basic tenet is that health and welfare policy is deeply rooted in social values and the availability of economic resources. Health policy is interpreted from a multidisciplinary perspective in which change emanates from structural dynamics accompanying socioeconomic development such as the evaluation of the economy from the entrepreneurial to the managerial to the post-industrial stages, together with shifts in social and political ideology—libertarianism, welfare statism, and secular humanism.

PAM 668 Long-Term Care and the Aged: Alternative Health and Social Service Delivery Systems (formerly HSS 688)
Fall. 3 credits. Prerequisite: PAM 657. R. Battistella.
Alternatives for the organization and delivery of long-term care services are examined within the context of public-financing constraints. Progressive long-term care is viewed as a continuum encompassing medical and social services positioned to optimize independent living. Relevant experience from other highly developed countries is presented. Visiting speakers from the public and private sectors are featured. Field trips provide additional insights into the many challenges and opportunities of long-term care policy and management.

PAM 674 Housing Economics (formerly CEH 648)
Spring. 3 credits. Prerequisite: Economics 311 or 313. Instructor's permission **required**. N. Kutty.
A survey of economic theory and empirical research related to housing markets. The course studies the demand and supply sides of the housing market as applications of microeconomic theory. Topics related to housing demand include tenure choice (decision to own or rent), household formation, mobility, and discrete choice models of housing demand. Topics on the supply side include housing starts, maintenance, and rehabilitation. Housing policy issues such as tax policy, housing for the elderly, fair housing, rent control, and zoning also will be addressed.

PAM 680 Leadership in the Human Services (formerly HSS 655)
Fall. 3 credits. Open to seniors with instructor's permission. S-U grades optional. J. Mueller.
Students in this seminar will study human service organizations in the context of their changing economic, political, ecological, and technological environments, and in terms of the leadership behaviors of administrators who are making successful adaptive responses to these changes. The introduction of new organizational forms and strategies for nurturing innovation and for effecting cultural change within the work environment will be discussed from the perspective of leadership roles at various organizational levels. Readings include both new theoretical literature and practical how-to-do-it guides for administrators. The seminar format provides an opportunity for simulations so that students can give and receive feedback on their leadership skills.

PAM 704–705 Internship in Human Service Studies (formerly HSS 704–705)
Fall, spring, or summer. 1–15 credits. S-U grades optional.
Internship placement in human services is determined by availability and students' academic and professional goals. Opportunities are available in public and private human service organizations at the national, state, and local levels in positions consistent with students' needs and desires. The duration of an internship is negotiated between the student and the agency, while course credit and residence units are arranged between the student and the Special Committee.

PAM 718 Advanced Seminar in Program Evaluation (formerly HSS 790)
Fall, spring. 1–3 credits. S-U grades optional. Prerequisite: permission of instructor. Staff.
This advanced course is intended for students with at least three courses in evaluation (PAM 612 series or equivalent) and statistics through multiple regression. The seminar focuses on analysis and appraisal of current literature on program evaluation and evaluative research. The seminar is topical, addressing current issues of importance in the field.

PAM 799 MPS Problem Solving Project (formerly HSS 799)
Fall or spring. Credits to be arranged. For students recommended by their chair and approved by the instructor in charge of independent advanced work. S-U grades optional.

PAM 899 Master's Thesis and Research (formerly CEH and HSS 899)
Fall and spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional.

PAM 999 Doctoral Thesis and Research (formerly CEH and HSS 999)
Fall and spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional.

Topical Seminars and Practica—PAM 618 and 630 (formerly HSS 697 and 669)
Seminars and practica, offered periodically and reflecting faculty and student interest, with changing topics and instructors. Content, time, credits, and instructors to be announced. Seminars and practica offer concentrated study in a specific human service area or in the education, planning, or evaluation processes within human services.

Topics Courses—PAM 611, 620, and 650 (formerly HSS 611, 610 and 612)
Fall or spring. 2–4 credits. Prerequisites and enrollment limits vary with topic being considered in any particular term. Permission of instructor required. Hours to be arranged.
This series of courses provides an opportunity for graduate students to explore an issue, a theme, or research in the areas of departmental concentration. Topics vary each time the course is offered. Descriptions are available at the time of course registration. Although the courses are usually taught as seminars, a subject may occasionally lend itself to lecture, practicum, or other formats.

TEXTILES AND APPAREL COURSES

A. Lemley, chair, A. Netravali, director of graduate studies; A. Racine, director of undergraduate studies; S. Ashdown, C. C. Chu, C. Coffman, C. Jirousek, S. Loker, S. K. Obendorf, A. Racine, P. Schwartz

NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

TXA 114 Introduction to Computer-Aided Design
Fall and summer. 3 credits. Fall, T or R 1:25–4:25. It is important for students on wait lists to attend the first class. Limit 18 per lab section. Priority given to all TXA and other freshmen and sophomore students. Not open to those who have taken or are currently enrolled in DEA 648. S–U grades optional. A. Racine.
A studio course that explores the creative potential of microcomputers. The AutoCAD software program is used as a design tool for generating a wide variety of visual images. Basic Photoshop software commands are introduced to enhance AutoCAD drawings. Daily hands-on demonstrations and studio work. Students develop two-dimensional designs based on historical, cultural, and museum sources for portfolios and display. Supplies cost about $60.00; lab fee $15.00.

TXA 125 Art, Design, and Visual Thinking
Fall. 3 credits. S-U grades optional. Lecs M W F 12:20–1:10. C. Jirousek.
An introduction to the visual arts and design that explores aesthetic and cross-cultural dimensions of visual experience. Augmented by slide presentations, artifacts, video, and an internet-based electronic textbook, lectures emphasize the varieties of visual expression seen in works of art and design. Social, cultural, and historic interpretations of visual expression are discussed.

TXA 135 Fibers, Fabrics, and Finishes
Spring. 3 credits. S-U grades optional. Lecs M W F 9:05–9:55. A. Netravali.
An introduction to fibers, fibrous materials, and dyes and finishes. Special emphasis is given to the use of fibrous materials in apparel, residential and contract interiors, and industrial applications. Topics covered include fiber properties, fabric structure, coloration of fibrous materials, dimensional stability, flammability, product specifications, and performance standards.

TXA 145 Introduction to Apparel Design
Spring. 4 credits. Limited to 30 students with 15 students per lab section; priority given to all TXA, other freshmen and sophomore students, and students transferring into TXA; not open to seniors outside of TXA. Letter grades only. Apparel design majors should take course during the first year. Minimum cost of materials, $125; lab fee, $10. Lec T 1:25–4:25 and lab F 10:10–12:05 or lec R 1:25–4:25 and lab F 12:20–2:15. A. Racine.
Intensive study of principles and processes of flat-pattern design with emphasis on creative expression in children's apparel. Students develop a thorough understanding of the principles and techniques needed to produce apparel.

TXA 217 Drawing the Clothed Figure
Spring. 3 credits. Enrollment limited to 18 students. Prerequisite: a basic drawing course. Priority given to apparel students. Letter grades only. Minimum cost of supplies $125.00. Lab fee: $30. T R 10:10–1:10. Staff.
The goal of this course is to improve a student's capacity to communicate apparel design ideas visually by drawing clothing on the human body. Emphasis will be on development of techniques used to express the human body, materials, and clothing designs quickly and clearly in working sketches and to present clothing designs in finished renderings.

TXA 237 Structural Fabric Design
Fall. 3 credits. S-U grades optional. Prerequisite: TXA 135. Recommended: college algebra. Lecs M W F 9:05–9:55. P. Schwartz.
This course covers the elements of technical fabric design with an emphasis on woven and knitted fabrics. Topics include structure of woven and knitted fabrics, openness, manufacturability, equivalence, and color effects.

TXA 264 Draping
Fall. 4 credits. Limited to 20 students. Prerequisite: TXA 125 and TXA 145; one drawing course recommended. Minimum cost of materials, $125; lab fee, $10. T R 10:10–1:10. S. Ashdown.
This studio course examines the process of creating a three-dimensional garment from the two-dimensional fabric. Through exercises, the principles and processes of draping, advanced flat pattern making, and fitting are studied. Assigned problems require the students to make judgments regarding the design process, the nature of materials, body structure, function, and fashion.

TXA 269 Style, Fashion, and the Apparel Industry
Spring (last seven weeks of semester). 2 credits. Recommended: TXA 125 and TXA 135. Not open to freshmen. S-U grades optional. Lec M W 10:10–12:05. A. Racine.
Illustrated lectures will focus on changes in the U.S. apparel industry and fashion from the nineteenth century to the present day due to social forces, technological developments, and shifting demographics. The Cornell Costume Collection will be used for discussion. Students will write a term paper on issues relating to the fashion industry.

TXA 300 Special Studies for Undergraduates
Fall or spring. Credit to be arranged. Staff.
Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the department chair, is filed at course registration or during the change-of-registration period.

TXA 331 Apparel Production and Management
Fall. 3 credits. Prerequisites: Economics 101 and 102 and an upper-division course in either apparel or textiles. T R 10:10–11:25. Not offered 2000-2001. S. Loker.
Introduction to the global textile and apparel industry, particularly the technical and economic aspects of apparel production. Analysis of specific apparel manufacturing and management issues such as international sourcing, Quick Response, mass customization, production and information technology, labor, and logistics.

TXA 335 Fiber Science
Spring. 3 credits. Limited to 20 students. Prerequisites: college chemistry and physics. Lecs M W 1:25–2:15. Lab M 2:30–4:25. A. Netravali.
This course covers fibers commonly used in various engineering, medical, and apparel applications. Topics include nature of polymer molecules, chemical structure of organic fibers, inorganic fibers, micro-macro structure of fibers, fiber dimensions, environmental effects, mechanical, optical, thermal, and frictional properties of fibers. Fiber uses such as composites in aerospace and other structural components, circuit boards, bulletproof vests, sutures, artificial arteries, geotextiles, sporting goods, etc. will be discussed.

TXA 336 Fundamentals of Color and Dyeing
Fall. 3–4 credits. 3 credits for lecture only; 4 credits for lecture and lab. Prerequisite: college Natural Science Requirements. Fiber science students are required to take the lab. Lab fee, $15. Lecs M W F 10:10–11:00; lab M 1:25–4:25. C. C. Chu.
Color is an extremely important and useful factor in daily life. This course will emphasize theories and scientific principles of color, providing a framework for the use of color in design, marketing, or research. How colorants are used to dye fabrics will be addressed. Although fabrics are chiefly used to illustrate color in the class, much of the information and knowledge will be useful to non-textile majors. Guest lecturers from the industry will address the practical aspects of color in business.

TXA 346 Apparel Design Process and Pattern Development
Spring. 4 credits. Prerequisite: TXA 135 and TXA 145. Letter grades only. Minimum cost of materials, $125; lab fee, $10. M W 1:25–4:25. Staff.
This studio course applies the principles and processes of advanced pattern making and the theory of functional clothing to the development of sportswear, actionwear, and clothing for active leisure activities. Assigned problems will require students to use the design process to apply information about body structure, user needs (thermal protection and comfort, mobility, and visibility), and the nature of materials to the production of functional, fashionable apparel.

TXA 368 Computer-Aided Apparel Design
Spring (first seven weeks of semester). 2 credits. Prerequisite: TXA 114, TXA 125, and TXA 264. Minimum cost of materials, $50; lab fee, $10. M W F 10:10–12:05. A. Racine.
Intermediate apparel students prepared to challenge and refine their design skills will be presented with a variety of complex studio problems. This class uses computer-aided apparel design and team work.

TXA 375 Color and Surface Design of Textiles
Fall. 4 credits. Recommended: TXA 114 and TXA 135. Minimum cost of other materials, $100; lab fee, $75. Limited to 18 students. T R 1:25–4:25. C. Jirousek.
Studio experience in the surface design of textiles combined with exercises in color theory. Textile projects will utilize techniques such as block printing, shibori, batik, silk painting, silk screen, and stitchery to produce a portfolio of textile designs. Studio work will be augmented by lectures on pattern and color theory illustrated by slides and textile examples.

TXA 400–401–402–403 Special Independent Studies for Undergraduates
Fall, summer, or spring. Credits to be arranged. S-U grades optional. Staff.
For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of TXA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department chair and filed at course registration or within the change-of-registration period after registration along with an add/drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special-studies form to the department chair is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study.

TXA 400 Directed Readings
For study that predominantly involves library research and independent reading.

TXA 401 Empirical Research
For study that predominantly involves data collection and analysis, or laboratory or studio projects.

TXA 402 Supervised Fieldwork
S-U only.
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

TXA 403 Teaching Apprenticeships
Fall or spring. 2–4 credits. Prerequisites: student must have upperclass standing, have demonstrated a high level of performance in the subject to be taught and in the overall academic program, and have permission of the instructor and the department chair. S-U grades optional. Staff.
Apprenticeship includes both a study of teaching methods in the field and assisting the faculty with instruction.

TXA 432 Product Quality Assessment
Fall. 3 credits. Prerequisites: TXA 135 and Statistics. Lab fee, $15. Lecs M W 1:25–2:15; lab M or W 2:30–4:25. S. K. Obendorf.
This course covers evaluation of fibers, yarns, fabrics, and garments, with emphases on the meaning of standards, testing philosophy, quality control, and statistical analysis. Day-to-day tests done in textile and apparel industry will be discussed. Laboratory sections will introduce students to various test methods, data generation for analysis, and evaluation.

TXA 436 Fiber Chemistry
Spring. 3 credits. S-U grade optional. Senior and first-year graduate students. Lecs M W F 10:10–11:00. Offered alternate years. Not offered 2000–2001. C. C. Chu.
The chemical and physical structure of several commercially important fibers, such as cotton, wool, silk, polyesters, nylons, acrylics, polyolefins and spandex and their polymerization process are discussed. The general chemical and physical properties of each will be given. Degradation reactions for certain fibers such as polyolefins and acrylics will be discussed.

TXA 439 Biomedical Materials and Devices for Human Body Repair
Spring. 2–3 credits. 2 credits meets Tues. only; 3 credits meets Tues. and Thurs. S-U grades only for 2 credits, letter grades only for 3 credits. Juniors and seniors only. Prerequisites: college Natural Science requirement. (Chem. or Biol.). T 1:25–2:40, R 1:25–2:40. C. C. Chu.
Survey of materials and devices for repair of injured, diseased, or aged human tissues/organs. It includes properties of synthetic and biological materials, wound healing processes, medical devices for repair of wounds, blood vessels, hearts, joints, bones, nerves, male impotence, vision/hearing/voice, and drug control/release.

TXA 444 Apparel/Textile Retailing and Distribution
Spring. 3 credits. S-U grades optional. Juniors and seniors only. Prerequisite: TXA 135, TXA 331, and ARME 240 or equivalent. Lec M W 2:55–4:10. Staff.
This course provides an overview of the business of design, production, distribution, marketing, and merchandising of apparel and related products from a management perspective. The organization and structure of both domestic and international retailers is included along with pricing strategies, merchandise planning, inventory management, and sales promotion. New uses of computer systems and information technologies will be emphasized throughout.

TXA 446 Apparel Design: Intermediate Functional Clothing Design
Spring. 4 credits. Prerequisites: TXA 367 and TXA 246 or permission of instructor. Minimum cost of materials, $125; lab fee, $15. Offered alternate years. M W 10:10–1:10. Staff.
Complex problems in functional apparel design will be studied with an emphasis on totally encapsulating clothing. Students will work in groups and individually to set design criteria and develop innovative solutions for current problems in protective apparel.

TXA 465 Apparel Design: Product Development and Presentation
Fall. 4 credits. Prerequisites: minimum of three drawing or art courses, TXA 264, TXA 368, and TXA 375 or permission of instructor. Recommended: TXA 114. Minimum cost of materials, $250; lab fee, $10. M W 10:10–1:10. S. Ashdown.
Through studio problems in apparel design, students examine the influence of manufacturing technology and cost on apparel products. Garments are developed to various stages from sketches to finished samples. Some portfolio development included.

TXA 475 Photoshop for Portfolio Presentations in Textiles and Apparel
Spring (first seven weeks of semester). 2 credits. Limited to 16 students. Prerequisite: TXA 217 or TXA 375. Course fee covering CAD lab color printing, $15.00. T R 10:10–12:05. Staff.
This course will explore the use of Adobe Photoshop as a tool for portfolio development in textile and apparel design. Building on studio work produced in other courses, students will learn the basics of Photoshop and create a design line for a formal portfolio that will involve textile design applied to either apparel or home furnishings use.

TXA 499 Honors Thesis Research
Fall and spring. 1–6 credits (maximum 6 credits for graduation). S-U grades optional. Prerequisite: TXA students who have been admitted to college honors program. Staff.
Independent research leading to the honors thesis. College honors program guidelines are to be followed.

TXA 600 Special Problems for Graduate Students
Fall or spring. Credit to be arranged. S-U grades optional. Staff.
Independent advanced work by graduate students recommended by their chair and approved by the department chair and instructor.

[TXA 620 Physical Properties of Fiber-Forming Polymers and Fibers
Fall. 3 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1999–2000. A. Netravali.
Formation and properties of fiber-forming polymers, rubbery, glassy, and crystalline states and their interconnection. Fiber structure, relationship between chemical structure and physical properties of manufactured and natural fibers. Mechanical, thermal, and viscoelastic properties of fibers and testing methods will be discussed.]

[TXA 626 The Chemistry of Textile Finishes and Dyeing
Spring. 3 credits. S-U optional. Prerequisites: TXA 336 or equivalent and organic chemistry, or permission of instructor. Offered alternate years. Not offered 1999–2000. C. C. Chu.
Chemical aspects of textiles with emphasis on finishes and dyeing are discussed. Industrially important textile chemicals used for dyeing and enhancing fiber and fabric properties, such as durable press, anti-soiling, water repellency will be studied. The emphasis is on the correlation of the observed effect with chemical structure, end-use influences, interaction with fabric and fibers, sources and synthetic routes. The environmental impact of these textile chemicals and current federal regulation will be briefly discussed.]

TXA 637 Research Seminars in Apparel Design
Fall and spring. 1 credit; S-U only; repeat of course each semester is encouraged for all apparel design graduate students. Available to advanced undergraduate students with permission of individual instructor. Apparel Design faculty.

TXA 639 Mechanics of Fibrous Assemblies
Fall. 3 credits. Prerequisite: solid mechanics or permission of instructor. Offered alternate years. Not offered 2000–2001. P. Schwartz.
A study of the mechanics of fiber assemblies: idealized yarn and fabric models; statistical bundle theories; deformation of yarns and fabrics in tensile, shear, and compressive stress; bending and buckling; and the mechanical behavior of nonwoven textile materials.

TXA 664 Human Factors: Anthropometrics and Apparel
Spring (even-numbered years). 3 credits. S–U grades optional. Prerequisites: course in statistics and permission of instructor. Open to advanced undergraduates. Offered alternate years. Not offered 2000–2001. S. Ashdown.
Seminar course focusing on the human form and its relationship to clothing. Includes discussion of quantification of body sizes and human variation; historical, cultural, and aesthetic concepts of fit; apparel sizing techniques; national and international sizing systems and standards; impact of sizing systems on various populations (elderly, handicapped, etc.).

[TXA 675 Aesthetics and Meaning in World Dress
Spring. 3 credits; S-U grades optional. Prerequisites: TXA 125 or course in history of art, costume history, or other history. Offered alternate years. Not offered 1999–2000. C. Jirousek.
An examination of the aesthetic and social psychological relationship between body and clothing in the context of various cultures. Students will develop a research topic to be presented orally and in a term paper and will participate in the development of an exhibition.]

TXA 899 Master's Thesis and Research
Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Staff.

TXA 999 Doctoral Thesis and Research
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Staff.

FACULTY ROSTER

Allen, Josephine A., Ph.D., U. of Michigan. Assoc. Prof., Policy Analysis and Management
Anderson, Carol L., Ph.D., Iowa State U. Assoc. Prof., Human Development, Assistant Dean
Ashdown, Susan, Ph.D., U. of Minnesota. Assoc. Prof., Textiles and Apparel
Avery, Rosemary J., Ph.D., Ohio State U. Assoc. Prof., Policy Analysis and Management
Barr, Donald J., Ph.D., Indiana U. Prof., Policy Analysis and Management
Battistella, Roger M., Ph.D., U. of Michigan. Prof., Policy Analysis and Management
Becker, Franklin D., Ph.D., U. of California at Davis. Prof. and Chair, Design and Environmental Analysis
Brannon, Patsy, Ph.D., Cornell U. Prof., Nutritional Sciences, Dean
Brooks, Richard, Ph.D., U. of California at Berkeley, J.D., U. of Chicago. Asst. Prof., Policy Analysis and Management
Brumberg, Joan J., Ph.D., U. of Virginia. Prof., Human Development
Bryant, W. Keith, Ph.D., Michigan State U. Prof., Policy Analysis and Management
Burkhauser, Richard, Ph.D., U. of Chicago. Prof. and Chair, Policy Analysis and Management
Canfield, Rick, Ph.D., U. of Denver. Assoc. Prof., Human Development
Ceci, Stephen J., Ph.D., U. of Exeter (England). Prof., Human Development
Chi, Peter S., Ph.D., Brown U. Prof., Policy Analysis and Management
Chu, Chih-Chang, Ph.D., Florida State U. Prof., Textiles and Apparel
Cochran, Moncrieff, Ph.D., U. of Michigan. Prof., Human Development
Cornelius, Steven W., Ph.D., Pennsylvania State U. Assoc. Prof., Human Development
Danko, Sheila, M.I.D., Rhode Island School of Design. Assoc. Prof., Design and Environmental Analysis
Depue, Richard, Ph.D., U. of Oklahoma. Prof., Human Development
Eckenrode, John J., Ph.D., Tufts U. Prof. and Co-Director, Family Life Development Center
Elliott, John, M.E. Des., U. of Calgary. Asst. Prof., Design and Environmental Analysis
Eshelman, Paul E., M.F.A., U. of Illinois. Assoc. Prof., Design and Environmental Analysis
Evans, Gary, Ph.D., U. of Massachusetts at Amherst. Prof., Design and Environmental Analysis
Ewert, D. Merrill, Ph.D., U. of Wisconsin at Madison. Assoc. Prof., Assoc. Dean
Ford, John L., Ph.D., U. of Michigan. Prof., Policy Analysis and Management
Garbarino, James, Ph.D., Cornell U. Prof. and Co-Director, Family Life Development Center
Gerner, Jennifer L., Ph.D., U. of Wisconsin. Prof., Policy Analysis and Management, Associate Dean
Gibson, Kathleen J., M.A., Ohio State U. Asst. Prof., Design and Environmental Analysis
Greene, Jennifer C., Ph.D., Stanford U. Prof., Policy Analysis and Management
Greene, Katrina, Ph.D., U of Virginia. Asst. Prof., Human Development
Hamilton, Stephen F., Ed.D., Harvard U. Prof., Human Development

Racine, Anita, Ph.D., Cornell U. Sr. Lecturer, Textiles and Apparel
Rosen, William, Ph.D., U. of CA. Sr. Lecturer, Policy Analysis and Management
Ross-Bernstein, Judith, M.Ed., Northwestern U. Lecturer, Human Development
Schelhas-Miller, Christine, Ed.D., Harvard U. Lecturer, Human Development

SCHOOL OF INDUSTRIAL AND LABOR RELATIONS

ADMINISTRATION

Edward J. Lawler, dean

Robert Smith, associate dean, academic affairs

Ronald L. Seeber, associate dean, extension and public affairs

James E. McPherson, assistant dean, Office of Student Services

Gordon Law, librarian

Allan Lentini, director, administrative services

Francine Blau, director, research

Michael O'Hara, director, external relations

Robert Stern, graduate faculty representative

Tove Hammer, editor, *Industrial and Labor Relations Review*

DEGREE PROGRAMS

	Degree
Industrial and Labor Relations	B.S.
	M.I.L.R.
	M.P.S.
	M.S.
	Ph.D.

THE SCHOOL

The School of Industrial and Labor Relations at Cornell (ILR) is a small school within a large university. It tries to maintain the small-college atmosphere expected of an institution that has about 720 undergraduates and approximately 120 graduate students, even as ILR students participate fully in the activites of the larger Cornell community.

ILR students study in modern, technologically advanced lecture halls, seminar rooms, and libraries.

Almost half of the school's typical freshman class comes from the greater New York City area. Another 30 percent live in other parts of New York State. Students from other states and a few from foreign countries make up the rest of the class. Women constitute about 50 percent of recent entering classes, and minority students comprise about 25 percent of new freshmen and transfer students.

Students enrolled in the School of Industrial and Labor Relations at Cornell may take a substantial number of courses in the other six undergraduate colleges and schools of the university, including the College of Arts and Sciences. Cornell students have access to all of the libraries and other services of the university.

The school operates in four areas: (1) resident instruction, (2) extension and public service, (3) research, and (4) publications. It provides instruction to undergraduates and graduate students who are preparing for careers in industrial and labor relations, as well as to men and women already engaged in industrial relations activities and the general public through its Extension and Public Service Division.

The school's Conference Center, part of the extension division, initiates and hosts conferences covering the full scope of industrial and labor relations. The center provides continuing education and information to practitioners and scholars.

The Research Division develops materials for resident and extension teaching and originates studies in industrial and labor relations. The Publications Division publishes and distributes the research results.

GRADUATE DEGREES

More than 120 students on the Cornell campus are enrolled in graduate study in industrial and labor relations, one of the largest graduate fields in the university. Students may work toward the degrees of Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy. For further information on graduate programs, contact the Graduate Office, School of Industrial and Labor Relations, Cornell University, 216 Ives Hall, Ithaca, NY 14853–3901.

DEPARTMENTS OF INSTRUCTION

Courses in the school are organized into six departments:

Collective Bargaining, Labor Law, and Labor History

In the study of workers, employers, and the government policies affecting them, members of this faculty concentrate on subjects of industrial and labor relations best understood by reliance on the fields of administration, economics, history, and law. Courses explore subjects within the framework of American society, stress fundamental forces of change, and analyze texts and empirical data with methods drawn from the social sciences, the humanities, and the legal professions.

Human Resource Studies

This department offers specialization in human resource studies. Human Resources focuses on employer-employee relationships and deals with such topics as human-resource planning, staffing, computer applications to personnel, personnel information systems, training, management development, performance appraisal, compensation administration, organization development, and the sociological environment of human resource management. The study of human resource policy focuses on government efforts to enhance the population's ability to be employed. Although primarily concerned with governmental measures that influence the supply of labor (for example, training, education, health, mobility, and immigration), the subject area also includes policies in private industry that relate to the demands for labor.

International and Comparative Labor Relations

International and Comparative Labor Relations is concerned with industrial and labor relations systems and labor markets in other parts of the world. Countries include those in Western Europe, as well as in Asia, Latin America, and South America.

Labor Economics

Labor Economics deals with labor markets: that is, the institutional arrangements, terms, and conditions under which workers supply their labor and under which firms demand their labor. Faculty members are especially concerned with understanding the workings of labor markets and the effects of various public policies. The topics dealt with in courses and research include the following: analysis of the labor force, employment and unemployment, wages and related terms of employment, income distribution, income security programs, health and safety in industry, retirement, pensions and social security, economic aspects of collective bargaining, and economic demography.

Organizational Behavior

By studying individuals, groups, single organizations, and associations or organizations, persons in the field of organizational behavior understand human behavior within organizations as well as the actions of the organizations themselves. At the individual level of analysis, courses consider motivation, leadership, attitudes, personality, group processes, organizational change, and worker participation. At the organizational level, courses examine occupations, deviance in the work place, conflict, power, organizational design, public policy regarding organizations, and industrial conflict. The department also offers courses on research methods in organizational research and general survey courses in both psychological and sociological research.

Social Statistics

Economic and social statistics includes the principles of statistical reasoning, statistical methods, and the application of statistical tools of analysis.

A full list of required and elective courses is available from the Office of Student Services, 101 Ives Hall.

RESIDENT INSTRUCTION

This division conducts the on-campus programs leading to the degrees of Bachelor of Science, Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy from Cornell.

Office of Student Services

Staff members from the Office of Student Services, 101 Ives Hall, work closely with faculty and faculty committees to administer degree programs for the school and many of the school's support services. The office's responsibilities include the admitting and orienting of new students, maintaining students' personal and academic records, and counseling students on personal and academic problems. The office also works closely with seniors who are planning graduate study.

Counseling and Advising

New students will be provided advising on orientation, academic procedures, and course registration by counselors in the Office of Student Services.

Each of the school's academic departments names faculty members to serve as advisers for students who wish to consult with them regarding career possibilities in the field, postgraduate programs, or similar matters. Questions or issues related to graduation requirements, course registration, and related academic procedures should be raised with counselors in the Office of Student Services.

Minority Programs

Cornell University administers a variety of special opportunity programs designed to provide financial assistance and other forms of assistance to (1) minority students and (2) low-income students meeting program guidelines. The purpose of these programs is to provide access to a Cornell education for capable students who otherwise might not secure the admissions consideration, financial assistance, or supportive services necessary for their success at the university. The associate director for minority education in the Office of Student Services provides academic and personal counseling to all ILR minority students. ILR offers a variety of support services to enhance academic achievement.

STUDY OPTIONS

Several study options are open to ILR undergraduates, making it possible to tailor a program to fit special circumstances.

One such option is the five-year ILR master's degree. With early planning, some students may earn the M.S. degree in the fifth year. Using another option, some ILR students arrange for dual registration in the Johnson Graduate School of Management, earning their bachelor's degree in ILR and a master's degree in the Johnson Graduate School of Management after five years of study.

Some students elect to spend a semester in New York City, Albany, or Washington, D.C., with a chance to observe actual labor problem solving as interns in congressional offices, labor organizations, personnel offices, and state and federal agencies. For more information, see "Special Academic Programs," below.

Study abroad options are also available at a number of foreign universities. Qualified students may spend a semester or a full year studying abroad.

A number of ILR courses deal directly with today's problems and involve fieldwork in the Ithaca area and elsewhere in New York State. The ILR program allows juniors and seniors who want to conduct their own research to receive course credit for individually directed studies if the program is supervised by a faculty member.

Study in Absentia

Registration in absentia enables a student to seek admission in another American institution for a semester or a year and transfer credit toward completion of the Cornell degree. This study option requires the development of a plan of study, a statement of appropriate reasons for study away from the university (e.g., availability of courses not offered at Cornell), good academic standing, approval of the plan by the director of student services, and payment of a special in absentia registration fee. Course work taken in absentia is usually not evaluated for transfer credit until the work has been completed and the student has returned to the school. Students then submit a course syllabus and other evidence of content to the chairman of the department that might have offered the respective course, or to a counselor in the Office of Student Services if the course is more appropriate as a general elective.

Leave of Absence or Withdrawal

If a student desires to withdraw or to take a leave of absence from the university, an interview should be scheduled with a counselor in the Office of Student Services. Counselors will assist students in petitioning for approval of a leave of absence and in contacting the appropriate offices or departments of the university.

REQUIREMENTS FOR GRADUATION

To earn the Cornell Bachelor of Science degree in industrial and labor relations, the student needs to successfully complete 120 credits. This requires eight terms for an average of 30 credits a year although some students accelerate their studies.

Freshman Year

Fall Semester

Freshman Writing Seminar	3
Introductory Microeconomics (ECON 101)	3
History of American Labor: Nineteenth Century (ILRCB 100)	3
Social and Psychological Foundations of Organizational Behavior I (ILROB 170)	3
ILR Colloquium (ILRID 150)	1
Elective	3
	16

Spring Semester

Freshman Writing Seminar	3
Introductory Macroeconomics 102	3
History of American Labor: Twentieth Century (ILRCB 101)	3
Social and Psychological Foundations of Organizational Behavior II (ILROB 171)	3
Elective	3
	15

Physical Education, Fall and Spring

Sophomore Year

Fall Semester

Statistics I (ILRST 210)	3
Development of Economic Institutions (ILRLE 140)	3
Labor and Employment Law (ILRCB 201)	3
Human Resource Management (ILRHR 260) Fall	3
Elective	3
	15

Spring Semester

Statistics II (ILRST 211)	3
Economics of Wages and Employment (ILRLE 240)	3
Distribution: Cultural Perspectives	3
Distribution: Western Intellectual Tradition	3
Elective	3
	15

Junior and Senior Years

Economic Security (ILRLE 340)	3
Collective Bargaining (ILRCB 300)	3
Distribution: International and Comparative ILR	3
Distribution: Upper Division Writing	3
Distribution: Science and Technology	3
Advanced Organizational Behavior (ILROB 420)	3

ILR and General Electives

ILR Advanced Electives—27 credit hours in no fewer than 9 courses

General Electives—34 credit hours of which up to 22 hours may be freely elected in the university's endowed divisions

Required Courses

(55 credits)

The curriculum prescribes the courses and subjects listed in the table above; some are illustrative. In the senior year, all courses will be electives.

Elective Courses

(65 credits)

From the courses offered by the school, students must select a minimum of 9 courses and 27 credits of ILR elective courses. No more than 9 of these credits may be satisfied by ILR 499, Directed Studies, or ILR 497–498, Internships, ILR 495, Honors Program, or one semester of Study Abroad.

Undergraduates are required to select one intensive writing course (for a minimum of three credits) from a list of designated courses.

The remaining 34 credits may be selected from the courses of any other college at Cornell, but a student who takes more than 34 credits in the endowed colleges (the College of Architecture, Art, and Planning; the College of Arts and Sciences; the Johnson Graduate School of Management; the College of Engineering; and the School of Hotel Administration) must pay for each credit taken in excess of 34, *whether or not the courses are*

passed. For the precise fee per credit, students should call the Office of the Bursar.

The number of credits that may be taken in the endowed colleges at no additional cost to the student may be changed at any time by official action of the school.

ILR Math Requirement

If you took AP calculus in high school and scored a 3 or better on the AB exam or a 2 or better on the BC exam, you have fulfilled the ILR math requirement. If you did not take AP calculus, or if you did not achieve the scores noted above, you will be expected to take and pass the ILR Math Assessment before you may register for required courses in Statistics and Labor Economics. The Math Assessment is based on materials covered in New York State Regents Exams for Courses 2 and 3. (Calculus is not covered in those courses.)

The ILR Math Assessment will be scheduled in August, January, and May. Those who do not pass in the first attempt will be expected to register in an appropriate math course and pass the assessment *before the beginning of their third semester* in the school. Anyone who cannot meet the requirement by the beginning of the third semester may be enrolled for a terminal term and will be expected to leave the school thereafter.

Transfer students will be expected to meet the same standards in math: either present the score required by Cornell University for AP calculus (AB or BC) credit, or pass the ILR Math Assessment before being permitted to register in ILRST 210 or ILRLE 240 with a terminal semester possible after failing the assessment given at the beginning of a third semester as an ILR student.

SCHEDULING AND ATTENDANCE

Schedule Changes

Occasionally it may be necessary for a student to request changes in his or her course schedule either before a term begins or during the semester. Such requests must be directed to the Office of Student Services to avoid possible loss of academic credit.

Class Attendance

It is each student's responsibility to attend all scheduled classes unless excuses have been approved by the faculty. In some courses an instructor may permit a maximum number of class absences without a grade penalty or dismissal from the course. An explanation for absence from class may occasionally be secured from the Office of Student Services in advance of the expected absence. An approved absence may be warranted by:

1) participation in authorized university activities such as athletic events, dramatic productions, or debates;
2) medical problems supported by a record of clinic or infirmary treatment;
3) serious illness or death in the immediate family;
4) other circumstances beyond the student's control.

A request for explanation of an absence should, when possible, be made to the Office of Student Services before the date of expected absence. A reported and explained absence does not relieve a student from fulfillment of academic requirements during the period of absence. The course instructor has the authority to determine what work must be completed. The office can only confirm the explanation for absence. Students should inform the Office of Student Services of any problems they have meeting course requirements.

ACADEMIC STANDING AND GRADES

Academic Integrity

In 1987 the faculty of the School of Industrial and Labor Relations approved a revised code of academic integrity. This code, while based on the Cornell University code, varies somewhat.

Absolute integrity is expected of all Cornell students in all academic undertakings. They must in no way misrepresent their work, fraudulently or unfairly advance their academic status, or be a party to another student's failure to maintain academic integrity. The code specifically prohibits:

1) knowingly representing the work of others as one's own;
2) using or obtaining unauthorized assistance in any academic work;
3) fabricating data in laboratory or field work;
4) giving fraudulent assistance to others;
5) fabricating data in support of laboratory or field work.

Full details on the applications of those prohibitions to course work, term papers, examinations, and other situations are listed in the code. Copies are available from the Office of Student Services, 101 Ives Hall.

Dean's List

A Dean's List is compiled for each of the four undergraduate classes each term on the seventh day following receipt of final grades from the registrar. Eligibility for the Dean's List is determined by applying all of the following criteria:

1) achievement of a term average for freshmen of 3.3 or better; for sophomores of 3.4 or better; and for juniors and seniors of 3.6 or better;
2) a minimum course load for the term of 12 letter-graded credits;
3) completion of all courses registered for at the beginning of the term;
4) satisfaction of all good-standing requirements.

Academic Standing

Good standing requires that all of the following criteria be met at the end of each term:

1) an average of C– (1.7) for the semester's work, including a minimum of 8 completed and letter-graded credits;
2) no failing grades in any course, including physical education;
3) a cumulative average of C– (1.7) for all completed terms.

If at the end of any term a student fails to maintain good standing or if overall academic performance is so marginal as to endanger the possibility of meeting school and university degree requirements, his or her record is reviewed by the Committee on Academic Standards and Scholarships. The committee may issue a written warning to the student at that time. If a student does not improve after the written warning, he or she may be denied permission to register for the next term.

Involuntary Separation from the School for Academic Reasons

A student may be denied permission to reregister at the end of any term when he or she has failed:

1) to establish good standing after a semester on warning;
2) to maintain an average of 1.7 in any term after a previous record of warning;
3) to achieve good standing after being on warning any two previous semesters;
4) two or more failures in one term or has a term average of 1.0 or below.

The Academic Standards and Scholarship Committee may decide to permit a student to remain on warning more than one semester if there has been significant improvement even though the cumulative average is still below 1.7.

S-U Grading Policy

An undergraduate may register to receive a final grade of S (Satisfactory) or U (Unsatisfactory) in courses that offer this option—either in the school or in other divisions of the university—subject to the following conditions:

1) the S-U option may be used in ILR and in out-of-college course electives only, not in directed studies;
2) students are limited to registering in *two* S-U courses a term;
3) S-U registration is limited to 4 credits for each course;
4) students registering for S-U grades must be in good standing;
5) students must fulfill the graduation requirement of 105 letter-graded credits.

ILR faculty members assign a grade of U for any grade below C– and a grade of S for any grade of C– or better. A grade of U is considered equal to an F in determining a student's academic standing, although it is not included in the cumulative average.

No change of grading (from letter to S-U or from S-U to letter) may be made after the first three weeks of class. There are no exceptions to this restriction, and appeals will not be accepted.

Grades of Incomplete

A grade of incomplete is assigned when the course has not been completed for reasons that are acceptable to the instructor. It is understood that the work will be completed later and credit given. Instructors may grant a grade of incomplete for a limited number of clearly valid reasons, but only to students with substantial equity in a course. A firm and definite agreement on the conditions under which it may be made up must be made with

the instructor. The school's policy allows a maximum of two full terms of residence for removal of a grade of incomplete. If it is not made up within this time, the grade automatically becomes an F.

SPECIAL ACADEMIC PROGRAMS

To meet the special academic objectives of some students, the school's faculty has established several special academic programs. For additional information, students should contact a counselor in the Office of Student Services. Counselors will explore the program with students to help them decide if it suits their interests.

Dual Registration in the Johnson Graduate School of Management

Dual informal registration in the Johnson Graduate School of Management leads to a Bachelor of Science degree in industrial and labor relations and a master's degree in management after five years of study and is open to students who meet the requirements of the Johnson Graduate School of Management.

Early planning by each student, preferably in the sophomore year, is desirable to ensure that the expectations of the Johnson Graduate School of Management and ILR curriculum requirements are fulfilled. Students interested in the very limited and selective program of the Johnson Graduate School of Management should contact the Admissions Office, 319 Malott Hall, and a counselor at the Office of Student Services.

Five-Year Master of Science Degree Program

With early planning it is possible to earn the M.S. degree in a fifth year of study. This program is designed specifically for those who wish concentrated study in an area of specialization in the school for a Master of Science degree. Students considering this program should consult a counselor in the Office of Student Services after their freshman year.

Internships

The Credit Internship Program has provided students with a vivid understanding of problems in labor and industrial relations through observation and participation in "real-life" labor problem solving. A number of selected students spend a term of the junior year in Albany, New York City, or Washington, D.C., in close contact with practitioners. Their activities include independent research under direction of ILR faculty members and seminars drawing on fieldwork experience with employers, labor organizations, and government agencies. More information about this program is available from the Office of Student Services.

Honors Program

Undergraduates who are ranked in the top 20 percent of their class at the end of the junior year may propose a two-semester research project, an honors thesis, for review by the Committee on Academic Standards and Scholarships. When approved, the candidate for graduation with honors works for two semesters (for 3 credits in each term) to research, write, and then defend the thesis.

Study Abroad

Cornell students with strong academic records and the necessary preparation in required and elective courses are encouraged to consider study abroad. The university currently has contact with universities in more than 40 countries that permit undergraduates to register for courses while maintaining Cornell registration and financial aid for a semester or a year. Information about those opportunities may be requested from Cornell Abroad, 474 Uris Hall.

Some study abroad programs require the development of language proficiency and preparation in appropriate courses at Cornell. Students should consult the Office of Student Services and Cornell Abroad in the freshman and sophomore years to be sure that they comply with the academic and procedural requirements for study abroad.

COLLECTIVE BARGAINING, LABOR LAW, AND LABOR HISTORY

H. Katz, chair; M. Cook, C. Daniel, I. DeVault, M. Gold, L. Gray, J. Gross, R. Hebdon, S. Kuruvilla, R. Lieberwitz, D. Lipsky, P. Ross, N. Salvatore, K. Stone, L. Turner

ILRCB 100 Introduction to U.S. Labor History: Nineteenth Century
Fall. 3 credits. C. Daniel, I. DeVault, N. Salvatore.
This first semster of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States through the end of the nineteenth century.

ILRCB 101 Introduction to U.S. Labor History: The Twentieth Century
Spring. 3 credits. Prerequisite: ILRCB 100. C. Daniel, I. DeVault, N. Salvatore.
This second semester of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States from the end of the nineteenth century up to the present.

ILRCB 201 Labor and Employment Law
Fall. 3 credits. M. Gold, R. Lieberwitz, K. Stone.
A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework within which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.

ILRCB 300 Collective Bargaining (200)
Fall and spring. 3 credits. M. Cook, R. Hebdon, H. Katz, S. Kuruvilla, L. Turner.
A comprehensive introduction to industrial relations and collective bargaining in the United States; the negotiation, scope, and day-to-day administration of contracts; the major substantive issues in bargaining, including their implication for public policy; industrial conflict; the major challenges facing unions and employers today; U.S. industrial relations in international and comparative perspective.

ILRCB 301 Labor Union Administration
Fall. 3 credits. Staff.
Study and analysis of the structure and operations of American unions, including the complicated internal life of the organizations; the varied environments in which unions develop and grow or decline; the relationship of national unions, local unions, and members in the many different sections of internal union government; the ways in which unions are set up to handle organizing, collective bargaining, contract administration, and political activity; and the widespread movement toward merger and consolidation of unions that began in the sixties and continues today. All of these will involve a study of union constitutions and other primary documents, in addition to secondary readings. Attention will be given to relevant legislation, current problems of unions, and the eternal problems of attaining union democracy.

ILRCB 302 Strangers and Citizens: Immigration and Labor in U.S. History
Fall or spring. 3 credits. I. DeVault.
Will explore immigrant workers' experiences in the 19th and 20th centuries from different perspectives. We will examine what it meant to the immigrants themselves to arrive as strangers in the United States while also examining the ways in which pre-existing American groups defined these immigrants as "strangers." Similarly, we will look at U.S. citizens in their roles as greeters of immigrants, detractors of immigrants, and as models for the aspirations of immigrants. Throughout the course our main examples will come from the industrial and union realms.

ILRCB 304 Seminar in American Labor and Social History
Fall or spring. 4 credits. Permission of instructor. C. Daniel, I. DeVault, N. Salvatore.
An undergraduate seminar whose topic changes depending on semester and instructor.

ILRCB 305 Introduction to Labor Arbitration and Alternative Dispute Resolution
Fall. 3 credits. J. Gross.
An introductory survey that focuses in part on the U.S. labor arbitration process in the private and public sectors (legal issues, discipline and discharge, contract language interpretation, remedies, and procedures) and in part on alternative dispute resolution systems in the United States and other countries. Student participation in class discussion is expected and assignments will include an original research paper.

ILRCB 384 Women and Unions (also WOMNS 384)
Fall or spring. 4 credits. I. DeVault.
Will explore women's participation in the United States labor movement in the nineteenth and twentieth centuries. Issues covered will include women workers' relations with male-dominated union movements, the role of cross-class alliances of women in organizing women workers, interactions with radical parties and organizations, problems faced by women union leaders and activities, and others.

ILRCB 385 The African-American Workers, 1865–1910: The Rural and Urban Experience
Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. N. Salvatore.
Examines the history of blacks in America from Emancipation through the experience of the first generation born after slavery, with a focus on the work experience. Topics will include the restructuring of work during Reconstruction; the relationship between work and black organizational developments; between black and white workers; and the nature of work in the agricultural south and in cities throughout the nation.

ILRCB 386 The African-American Workers, 1910–the Present: Race, Work and the City
Fall. 3 credits. Prerequisites: junior or senior. N. Salvatore.
Examines the history of blacks in America from the start of the Great Migration through the 1970s, with a focus on the work experience. Topics will include the effect of migration and urbanization on black workers; the nature of the relationship between black and white workers as influenced by depression and two world wars; and an examination of the effect of the Civil Rights movement on the economic circumstances of black workers.

ILRCB 400 Union Organizing
Spring. 3 credits. Prerequisites: undergraduates, ILRCB 201 and 300; graduate students, ILRCB 500 and 501. K. Bronfenbrenner.
Explores various aspects of unions' attempts to organize workers: why some workers join unions and others do not; strategy and tactics implemented by unions and management during organizing campaigns; present status of labor law as it affects organizing; creative approaches to union organizing; the organizing model of unionism.

ILRCB 401 My Brother's Keeper: Volunteerism and Philanthropy
Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.
The philosophy, practice, economics, and law of volunteering labor and donating money. Topics include altruism versus self interest; why individuals volunteer labor and raise and donate money; the structure and practices of charitable organizations; the economic effects of voluntary labor and philanthropic gifts; and the law of raising and distributing money.

ILRCB 404 Contract Administration
Fall. 3 credits. Prerequisites: ILRCB 300 and 201 or ILRCB 500 and 501. K. Bronfenbrenner.
This course will focus on the practice, nature, and challenges of union representation under collective bargaining agreements. Working with union contracts, constitutions, and by-laws from a diversity of national and local public and private sector agreements, the course examines how U.S. unions represent their members in different industries and different collective bargaining environments. Issues to be addressed include union representative/steward rights and responsibilities, contract enforcement structures and practice, access to information, new work systems, hours of work and scheduling, contingent staffing arrangements, workplace discrimination, health and safety, promotional opportunities, down-sizing, leadership development, membership involvement and commitment, internal organizing, community coalition building, and decertification campaigns. Students will practice hands-on work in interpreting contract language and preparing and presenting grievances and unfair labor practices.

ILRCB 405 Negotiation & Dispute Resolution
Spring. 3 credits. Prerequisites: background in economics and social sciences. Permission of instructor. D. Lipsky.
Distance Learning. Deals with four related topics: (1) nature of conflict particularly between organizations, (2) negotiation and bargaining, with a focus on process, practice, and procedures; (3) third party dispute resolution, with a focus on mediation and arbitration; and (4) alternative dispute resolution (ADR), with a focus on its current use in the corporate sector and the implications for our system of justice. It will be a generic dispute resolution course, i.e. it will not focus on labor relations or any particular types of disputes, but will deal with many different kinds of conflicts. Will use examples and cases to illustrate general principles. Few if any of these cases and examples will be drawn from labor relations, rather, illustrative material in the course will be based on exercises in areas such as product liability, environmental regulation, commercial relations, and personal injury disputes.

ILRCB 407 Contemporary Trade Union Movement
Spring. 3 credits. Prerequisites: undergraduates, ILRCB 100, 101, graduate students ILRCB 502. R. Seeber, R. Hurd.
An examination of contemporary trade union issues, including union power, political action, collective bargaining approaches, and organizing efforts. The course will cover structural, functional and strategic aspects of contemporary unions. Speakers from the union movement will address the class.

ILRCB 482 Ethics at Work
Fall or spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.
Major theories of ethics are examined, then applied to issues in the employment relationship such as genetic screening of job applicants, random drug testing of employees, affirmative action, discipline for off-duty conduct, whistle-blowing, worker safety and cost/benefit analysis, comparable worth, strikes by employees providing crucial services, and crossing a picket line.

ILRCB 488 Liberty and Justice for All
Fall or spring. 3 credits. Prerequisite: junior or senior or permission of instructor. M. Gold.
Major theories of ethics are examined, then applied to contemporary issues such as affirmative action and reverse discrimination, the right to life (from abortion to capital punishment), comparable worth, and constitutional rights such as freedom of speech.

ILRCB 495 Honors Program
Fall and spring (yearlong course). 3 credits each term. Admission to the ILR senior honors program may be obtained under the following circumstances: (a) students must be in the upper 20 percent of their class at the end of their junior year; (b) an honors project, entailing research leading to completion of a thesis, must be proposed to an ILR faculty member who agrees to act as thesis supervisor; and (c) the project, endorsed by the proposed faculty sponsor, is submitted to the Committee on Academic Standards and Scholarships.
Accepted students embark on a two-semester sequence. The first semester consists of determining a research design, familiarization with germane scholarly literature, and preliminary data collection. The second semester involves completion of the data collection and preparation of the honors thesis. At the end of the second semester, the candidate is examined orally on the completed thesis by a committee consisting of the thesis supervisor, a second faculty member designated by the appropriate department chair, and a representative of the Academic Standards and Scholarship Committee.

ILRCB 497–498 Internship
Fall and spring. 497, 3 credits; 498, 6 credits. Staff.
All requests for permission to register for an internship must be approved by the faculty member who will supervise the project and the chairman of the faculty member's academic department before submission for approval by the director of Off-Campus Credit Programs. Upon approval of the internship, the Office of Student Services will register each student for 497, for 3 credits graded A+ to F for individual research, and for 498, for 6 credits graded S-U, for completion of a professionally appropriate learning experience, which is graded by the faculty sponsor.

ILRCB 499 Directed Studies
Fall and spring. 3 credits.
For individual or group research projects conducted under the direction of a member of the ILR faculty, in a special area of labor relations not covered by regular course offerings. Sophomores, juniors and seniors with a preceding semester of 3.00 term average, are eligible to submit projects for approval by the Academic Standards Committee. Students should consult with a counselor in the Office of Student Services at the time of CoursEnroll in order to arrange for formal submission of their Directed Study.

ILRCB 500 Collective Bargaining
Fall. 3 credits. Open only to graduate students. Recommended: ILRCB 501 taken previously or concurrently. M. Cook, R. Hebdon, H. Katz, S. Kuruvilla, L. Turner.
A comprehensive introduction to the industrial relations system of the United States. The negotiation, scope, and day-to-day administration of contracts; union and employer bargaining structures; implications of industrial relations issues for U.S. competitiveness and public policy; industrial conflict; U.S. industrial relations in international and comparative perspective.

ILRCB 501 Labor and Employment Law
Fall. 3 credits. Open only to graduate students. M. Gold, R. Lieberwitz, K. Stone.
A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework within which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employ-

ment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.

ILRCB 502 History of Industrial Relations in the United States since 1865
Spring. 3 credits. Open only to graduate students. C. Daniel, I. DeVault, N. Salvatore.
This introductory survey course emphasizes historical developments in the twentieth century. Special studies include labor union struggles over organizational alternatives and such other topics as industrial conflicts, working-class life styles, radicalism, welfare capitalism, union democracy, and the expanding authority of the federal government.

ILRB 504 The U.S. Industrial Relations System
4 credits. Offered only in New York City for the MPS Program. Staff.
Examines the development, operation, and outcomes of the US industrial relations system in a comparative context. Specifically, the course contrasts the American experience with industrial relations institutions and outcomes with the experience of several other countries in Europe and Asia. We will look at the process of union formation, the practice of collective bargaining at different levels, the methods of dispute resolution, and the legal regime germane to industrial relations.

We will also focus on both processes and outcomes of different country systems, focusing on the degree of collaboration or conflict, wage levels and wage inequality, and practices in different industries and firms. Finally we will attempt to address the role played by industrial relations and human resource policy in economic and social development in these nations.

ILRCB 602 Arbitration
Fall and spring. 4 credits. Limited to 21 students. Prerequisites: undergraduates, ILRCB 201, 300; graduate students, ILRCB 500 and 501; permission of instructor. J. Gross, R. Lieberwitz.
A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of a mock arbitration hearing, and the preparation of arbitration opinions and post-hearing briefs.

ILRCB 603 The Economics of Collective Bargaining in Sports
Fall or spring. 3 credits. L. Kahn.
Surveys economic and industrial issues in the sports industry. Topics include: 1) salary determination, including free agency, salary caps, salary arbitration; 2) competitive balance and financial health of sports leagues; 3) antitrust issues in sports; 4) labor disputes, union history, and contract administration issues in sports leagues; 5) discrimination in sports; 6) performance incentives.

ILRCB 604 Theories of Equality and Their Application in the Workplace
Spring. 3 credits. R. Lieberwitz.
An examination of the various aspects of equality in the workplace, focusing on issues of race, gender, and national origin, and the ways in which societal discrimination on these bases are institutionalized in the workplace. Theories attempting to define "equality" and specific workplace issues are studied, including the means for achieving equality at the workplace. The course entails a high level of student participation in class discussions, and assignments include a research paper.

ILRCB 605 Readings in the History of Industrial Relations in the United States
Fall. 3 credits. Limited to seniors and graduate students. C. Daniel, N. Salvatore.
A seminar covering, intensively, original printed sources and scholarly accounts for different periods in American history.

ILRCB 606 Theories of Industrial Relations Systems
Fall or spring. 3 credits. Limited to seniors and graduate students. Prerequisites: seniors, ILRCB 100, 101, 300; graduate students, ILRCB 500. H. Katz.
Will trace the evolution of theory and research on industrial relations. Topics include: theories of the labor movement, institutional models and evidence regarding what unions do, the origins of internal labor markets and their relationship with unionization, models of strikes, empirical assessments of arbitration, research on union decline, and empirical evidence of the impacts of new technology.

ILRCB 607 Values in Law, Economics, and Industrial Relations
Fall and spring. 3 credits. Limited to 21. Prerequisites: ILRCB 201, 300, 500, 501. J. Gross.
An examination of the often hidden values and assumptions that underlie the contemporary U.S. systems of employment law, work and business, and industrial relations. Classroom discussions and student research projects will use novels and short stories (as well as the literature of industrial and labor relations) to focus on issues such as: discrimination; law, economics and the state; work and business; power, conflict and protest; and rights and justice.

ILRCB 608 Special Topics in Collective Bargaining, Labor Law, and Legislation
Fall and spring. 3 credits. Prerequisites: undergraduates, ILRCB 201; graduate students, ILRCB 501. Staff.
The areas of study are determined each semester by the instructor offering the seminar.

ILRCB 609 Special Topics: Labor Law Policy Seminar
Spring. 3 credits. K. Stone.
The United States collective bargaining system, which had its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars on both the right and the left, and at the same time the decline in the labor movement has undermined its political support. This seminar will look at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Some of the topics to be discussed: the theory of regulation embodied in the National Labor Relations Act and its critique; alternative concepts of labor markets and their policy ramifications; the emerging of the global economy and its ramifications for domestic labor regulation. There will also be discussion of alternative systems of labor regulation, such as found in West Germany, Sweden, and Japan.

ILRCB 650 Service Work and Workers in Historical Perspective
Fall or spring. 3 credits. I. DeVault.
Takes a historical perspective on the development of a service economy in the United States. Readings will include general and theoretical works, but the main focus will be recent historical scholarship on specific occupations and situations in the "nonproductive" workforce. Students will explore primary sources for research on the subject and write research papers.

ILRCB 651 Industrial Relations in Transition
Spring. 3 credits. Limited to seniors and graduate students. H. Katz.
Considers whether recent developments such as concession bargaining, worker participation programs, and the growth of nonunion firms represent a fundamental transformation in industrial relations practice. Will review recent research and new theories arguing that such a transformation is occurring, including the work of Piore and Sabel, Bluestone and Harrison, and Kochan, McKersie, and Katz. Will also review the counterarguments and evidence put forth by those who believe no such transformation is under way. Course material will focus on industrial relations practice in the private sector in the United States, although some attention will be paid to developments in Western Europe, the United Kingdom, and Japan.

ILRCB 655 Employment Law
Spring. 3 credits. Prerequisites: ILRCB 201/501. M. Gold.
Examines a number of major federal and state laws designed to protect workers in their employment relationships. The material covered will be selected from the following: the Fair Labor Standards Act, unemployment insurance, workers' compensation, the Occupational Safety and Health Act, the Employee Retirement Income Security Act, the doctrine of employment at will, Social Security, workers' right-to-know, plant closings, and protection of workers' privacy.

ILRCB 682 Seminar in Labor Relations Law and Legislation
Fall or spring. 3 credits. Limited enrollment. Prerequisite: permission of instructor. R. Lieberwitz.
Legal problems in public employment and other areas of labor relations affecting the public interest.

ILRCB 683 Research Seminar in the History of Industrial Relations
Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 100 and 101; graduate students, ILRCB 502. C. Daniel, I. DeVault, N. Salvatore.
The areas of study are determined each semester by the instructor offering the seminar.

ILRCB 684 Employment Discrimination and the Law
Fall. 3 credits. Prerequisite: ILRCB 201/501 or equivalent. M. Gold.
An examination of the laws against employment discrimination based on race, color, religion, sex, national origin, age, and disability.

ILRCB 685 Research Seminar on Trade Unions
Fall or spring. 3 credits. Prerequisite: ILRCB 300 or 500; permission of instructor. S. Kuruvilla.
Designed to provide an analytical survey of research on trade unions in the United States. Major topics include unions in politics, unions as complex organizations, public opinion and attitudes toward unions, determinants of union growth and decline, economic and non-economic effects of unions, internal union government, and commitment and participation in trade union activity. This is a research-oriented course.

ILRCB 686 Collective Bargaining in the Public Sector
Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 300 and 201; graduate students, ILRCB 500 and 501. R. Hebdon.
An examination of the development, practice, and extent of collective bargaining between federal, state, and local governments and their employees. The variety of legislative approaches to such matters as representation rights, unfair practices, scope of bargaining, impasse procedures, and the strike against government are considered along with implications of collective bargaining for public policy and its formulation.

ILRCB 689 Constitutional Aspects of Labor Law
Spring. 3 credits. R. Lieberwitz.
In-depth analysis of the Supreme Court decisions that interpret the United States Constitution as it applies in the workplace. This study will focus on the First Amendment, Fifth Amendment, Fourteenth Amendment, and Commerce Clause, with issues including freedom of speech and association, equal protection, due process, and other issues in the area of political and civil rights. The course entails a high level of student participation in class discussion, and assignments include a research paper.

ILRCB 703 Theory and Research in Collective Bargaining
Spring. 3 credits. Open to graduate students who have had ILRCB 500 and ILROB 723 or their equivalents. Recommended: a statistics course beyond the level of ILRST 510. Staff.
This is a second-level course in collective bargaining that builds on the institutional research covered in ILRCB 500. The existing literature in the area of collective bargaining is appraised for its theoretical and empirical content. Efforts are made to explore the appropriate role for theory and empirical analysis in moving research in collective bargaining toward a more analytical perspective and to identify and appraise the underlying paradigms used to study collective bargaining-related issues.

ILRCB 705 The Economics of Collective Bargaining
Spring. 3 credits. Prerequisites: ILRCB 500; ILRLE 540 (or their equivalents) and an understanding of multiple regression analysis; or permission of instructor. Staff.
Focuses on both the economic analysis of unions and collective bargaining in our economy and on the economic forces that affect collective bargaining. The method is to identify and conceptualize the structural determinants of relative bargaining power. On this basis, the course examines both the economic outcomes of collective bargaining and current bargaining trends in a variety of industries. Tentative theoretical analyses of unionism (neoclassical, institutionalist) are compared. The statistical techniques and empirical results of research on the union effect on economic outcomes (wages, prices, inflation, profits, productibility, earnings inequality) are also evaluated. The effect of technology, corporate structures, and public policy on union bargaining power is outlined, and a number of case studies of collective bargaining in the private sector are reviewed. A term paper is required.

ILRCB 783 Seminar in American Labor History
Spring. 3 credits. Permission of instructor. N. Salvatore.
A reading and research seminar for graduate students that focuses on selected topics in nineteenth- and twentieth-century labor history. The topic changes each semester.

ILRCB 790 ILR M.P.S. Program
Fall and spring. 1–9 credits. Staff.
Supervised research only for those enrolled in the ILR M.P.S. program.

ILRCB 798 Internship
Fall and spring. 1–3 credits.
Designed to grant credit for individual research under direction of a faculty member by graduate students who have been selected for an internship. All requests for permission to register for ILRCB 798 must be approved by the faculty member who will supervise the project.

ILRCB 799 Directed Studies
Fall and spring. Credit to be arranged.
For individual research conducted under the direction of a member of the faculty.

ILRCB 980 Workshop in Collective Bargaining, Labor Law, and Labor History
Fall and spring. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only. Staff.
Designed to provide a forum for the presentation of current research being undertaken by faculty members and graduate students in the Department of Collective Bargaining, Labor Law, and Labor History, and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

HUMAN RESOURCE STUDIES

P. Wright., chair; R. Batt, J. Bishop, J. Boudreau, V. Briggs, R. Broderick, M. Cavanaugh, L. Dyer, G. Milkovich, Q. Roberson, W. Wasmuth, T. Welbourne

ILRHR 260 Human Resource Management
Fall. 3 credits. Open only to ILR students; others by permission. M. Cavanaugh and staff.
An introductory overview of the management of human resources in organizations. Topics include human resource decisions dealing with staffing, employee development, work-system rewards, and employee relations. Emphasis is on (a) problem-solving and decision-making approaches; (b) operational methods, technologies, and practices; (c) application of relevant behavioral science theory and research; and (d) legislation and other environmental constraints having an important bearing on the effective utilization of human resources by an enterprise.

ILRHR 266 Personal Computer Basics
Fall, spring, and summer. 2 credits. Limited. Staff.
Provides basic skills in the use of IBM personal computers (PCs) using the Windows environment. Course covers basic hardware, terminology, fundamentals of Disk Operating System (DOS), Internet and Lexis Nexis, Windows 95, Microsoft Excel, Access, and Powerpoint. Emphasis is placed on hands-on experience using examples demonstrating human resource issues and PC-based solutions. This course is a prerequisite to several advanced Human Resource Management electives.

ILRHR 360 Human Resource Economics and Public Policy
Fall, spring. 3 credits. Open to sophomores, juniors, and seniors. J. Bishop, V. Briggs.
A review of labor-market trends, data collection systems, and theories pertaining to public efforts to develop the employment potential of the nation's human resources and to combat unemployment. The major segments of the nation's educational training enterprise—public education, higher education, employer-provided training, apprenticeship, and special training programs for the disadvantaged—are examined. Special policy and programmatic issues pertaining to youth, rural workers, welfare reform, direct job creation, worker relocation, economic development, targeted tax credits, industrial policy, and "enterprise zone" proposals are examined. Comparisons are made with other industrialized nations.

ILRHR 362 Career Development: Theory and Practice
Fall, spring. 2 credits. 7 weeks. Limited to 30. S-U only. J. McPherson.
The components of career management: individual factors and organizational realities in the development of both careers and organized programs for career management. Two complementary learning tasks required: information-gathering for career decision making based on self-assessment activities, and comprehension of organizational circumstances and practices encountered as careers develop. Grade based on short writing assignments and research paper.

ILRHR 363 Leadership Seminar for Fraternities and Sororities
Spring. 2 credits. S-U only. Permission of instructor. Staff.
Provide students with an opportunity to develop their leadership and management skills. The philosophy of the class is that fraternity and sorority houses are small businesses and the leadership must be capable of effective managing and leading in order for them to succeed. The learning method will be "hands on" with participants working on weekly assignments that involve their application of lessons learned to their current job duties. Students will participate in role plays, class discussions, meetings with guest speakers and debriefing sessions where they report the results of their using the material obtained from class in their current situations.

ILRHR 366 Women at Work
Spring. 3 or 4 credits. J. Farley.
Various aspects of female occupational roles in twentieth-century United States. Historical, social, and legal factors that influence women's choice of careers, work socialization and training, and subsequent labor-market experience are considered. Working women's entry-level jobs, opportunities for advancement, and income are compared to men's.

ILRHR 456 International Human Resource Management
Spring. 3 credits. Staff.
Will provide an examination of international human resource management issues in multinational enterprises. The course has two major objectives: to enhance understanding of key strategic and functional issues related to IHRM, and to develop analysis of practical IHRM issues in multinational enterprises. Will include topices such as strategic issues for IHRM, cross-cultural management issues, coordination issues, and expatriate management.

ILRHR 460 Human Resource Strategies for Entrepreneurial Firms
Fall. 4 credits. Open to juniors and seniors. ILR 260 or permission of instructor. T. Welbourne.
This class utilizes a semester-long case study that focuses on human resource issues and strategies for growing, entrepreneurial firms. Students solve weekly dilemmas by integrating their knowledge of the functional areas of human resource management with general management, human resource strategy, entrepreneurship, accounting/finance, marketing, public relations, and small business management. Creative solutions to problems are communicated to the class via role plays, formal presentations, inpromptu meetings, and class discussions. In addition to the semester-long case study, students work in teams to develop their own case of an existing company. The emphasis is on integration of concepts, application to real-life business situations, and acquisition of general management skills and knowledge.

[ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives
Fall or spring. 3 credits. Prerequisite: ILR 260 or equivalent and consent of instructor. Limited to juniors and seniors. Not offered 1999–2000. R. Batt.
Seminar designed to explore the state of knowledge and current research concerning the design and development of alternative work systems. The focus is on understanding alternative approaches to work restructuring and their differential effects on firm competitiveness and employee welfare. The first half of the course considers classic texts on mass production, flexible specialization, sociotechnical systems, diversified quality production, and lean production. It compares these workplace models in their original national contexts and in subsequent transplants. Relevant research from economics, engineering, organizational behavior, human resources, and industrial relations is examined. The second half of the course considers these alternative approaches to restructuring in the context of specific manufacturing and service industries and occupational groups. Students are required to hand in weekly memos covering the readings, actively participate in seminar discussions, and write two research papers on topics relevant to the course.]

ILRHR 462 Staffing, Training, and Development
Spring. 3 credits. Prerequisites: ILRHR 260 or by permission of the instructor. M. Cavanaugh.
Provide overviews of the staffing, training, and development functions within organizations. The first half of the semester will focus on the process by which organizations fill positions. Topics will include legal issues, job/competency analysis and planning, external selection practices, and internal staffing decisions. The second half of the semester will focus on the process by which organizations train and develop employees. Topics will include training needs assessment, program design, training evaluation, and management development practices. Throughout the semester we will examine the relationship between the staffing and training/development functions.

ILRHR 466 Comparative Human Resource Management
Fall. 3 credits. Staff.
Provides a survey of human resource management practices in two key regions: Europe and the Asia-Pacific region. Focus of this course is on HRM issues such as selection and staffing, training and development, and appraisal and reward systems. Special attention is given to HRM trends and developments. Issues of transferability of HRM practices, and implications for multinational enterprises operating in those regions, will also be discussed.

ILRHR 468 Human Resources Management Simulation
Spring. 2 credits. Limited to 30 juniors and seniors. Prerequisite: ILRHR 260 or equivalent. 7 weeks. W. Wasmuth.
Uses a simulation model and an open-systems approach as means to enhance students' skills in strategic planning and managerial decision making. Attention will be given to the implications and efforts of strategic human resource managerial and supervisory decisions as measured by ten organizational performance indicators, including quality of work life, employee productivity, customer satisfaction, employee retention, internal control, and the bottom line. Each student will be assigned to a group (team) of five members and must be committed to the work of that group. An individual research paper is also required. Regular attendance is required.

ILRHR 469 Immigration and the American Labor Force
Fall and spring. 3 credits.
V. Briggs.
Assesses the role that immigration policy plays as an instrument of human resource development in the United States. Immigration policy will be placed in an evolutionary context but primary attention will be given to the post-1965 revival of mass immigration. In addition to legal immigration, policies pertaining to border commuters, illegal immigration, "maquiladoras," refugees, asylees, and nonimmigrant workers are also examined. Comparisons are also made with immigration systems of other nations.

ILRHR 495 Honors Program
Fall and spring (yearlong course).
3 credits each term.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 497–498 Internship
Fall and spring. 3 and 6 credits.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 560 Human Resource Management
Fall and spring. 3 credits. Open only to graduate students. Staff.
A survey course covering the major areas of the management of human behavior in work organizations. Consideration is given to such aspects of strategic and human resource planning, design and management of workteams, staffing, training and management development, organization development, compensation, and employee and labor relations. Emphasis is on the application of theory and research to the solution of personnel problems.

ILRHR 564 Human Resources Management in Effective Organizations
4 credits. Offered only in New York City for the MPS Program. Staff.
This course offers the opportunity to become better prepared to make effective decisions about human resources. Successful organizations depend on people, their human resources. The first module examines strategic human resource management and the effects of HR decisions on organization success and fair treatment of people. Another module focuses on alternative systems used to staff and develop people. The third module focuses on compensating and rewarding people. And the final module includes employee relations and alternative work systems. Case and field studies are used throughout the course.

ILRHR 653 Research on Education Reform and Human Resource Policy
Fall and spring. Permission of instructor.
J. Bishop.
A research seminar and tutorial in which students conduct *qualitative* empirical research on a common topic that varies from year to year that can inform education reform efforts or human resource policy. Topics vary from year to year.

ILRHR 656 International Human Resource Management (also NBA 588)
Fall. 3 credits. Prerequisite: ILRHR 260/560. Limited. Seniors or graduate students only or permission of the instructor. Staff.
The focus of the course is on international human resource strategies in multinational firms. It has two major objectives: to enhance the understanding of key functional and strategic issues related to HRM activities in international firms, and to review practical applications of concepts learned from the course in leading U.S. corporations. In the first part of the course, the emphasis is on the theory of international HRM; the second part is focused on field analysis. During the semester, students will conduct TEAM research on state-of-the-art IHRM practices in leading U.S. multinationals. In addition, each student will prepare a review paper on one specific area of IHRM of his or her choice.

ILRHR 661 Applied Personal and Organization Development
Spring. 3 credits. G. Thomas.
An experiential course that deals with OD and its role in the organizational change process. Combines the opportunity for hands-on practice in a workshop setting. Students will have responsibility for researching and writing a paper that examines a specific method, technique, or critical issue; an in-class demonstration/presentation illustrating applications of a chosen subject; and a final project requiring a comprehensive proposal that describes an appropriate and logically supported intervention strategy.

ILRHR 662 People in Agile Organizations
Fall. 4 credits. Prerequisites: ILRHR 260, 560 or equivalent, plus two functional courses in HR management. Enrollment limit, 25. L. Dyer.
Organizational agility is defined as the capacity to be infinitely adaptable without having to change. It is a core competence for organizations operating in rapidly moving marketplaces. Accordingly, an increasing number of organizations are striving to become more agile by inventing new ways of managing all aspects of organizational capability. Course explores the opportunities and challenges posed by organizational agility, with particular emphasis on crafting human resource strategies that support this evolving paradigm. Every effort is made to run the course as an agile organization rather than using a traditional classroom format.

ILRHR 664 HR Online Research and Reporting Skills
Fall. 3 credits. J. Boudreau, S. Basefsky.
Designed to teach students skill-based techniques in HR research methodology. The students will be taught to act as their own consultants in both a classroom and workforce setting as they access data and find statistical information to support their research topics. The first five weeks of the semester will consist of weekly meetings with the reference librarians at the Martin P. Catherwood Library. These meetings will cover a different research technique each week, and students will be given readings and a hands-on assignment to gain practical experience on these techniques.

ILRHR 665 Transforming Human Resource Management: Case Studies
Fall and spring. 4 credits. Limited. Prerequisite: ILRHR 260/560 plus two other courses in human resource studies and permission of instructor. L. Dyer, P. Wright.
As the capstone course in HR Studies, students will integrate the theories and practices learned in other courses. Extensive field work is involved. The field projects are designed to require students to draw upon and integrate their course work in HR planning, staffing, development, compensation and reward, and new work systems.

ILRHR 666 Human Resource Metrics
Fall. 4 credits. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics, one elective in human resource studies. J. Boudreau.
Explores how to account for the contribution of human resource management programs and decisions to achieving organizational goals. It emphasizes a systematic decision-making system that organizes the discipline of human resource management and can assist in planning and evaluating programs. Topics include the role of financial-accounting statements in managing human resources, cost-benefit analysis for programs, managing human resources as a profit center, and identifying human resource management constituents to address their goals.

ILRHR 667 Employee Relations and Diversity
Spring. 4 credits. Prerequisites: ILRHR 260/560 or equivalent and permission of instructor. Q. Roberson.
Explores the policies, programs, and practices used by employers to promote the just and humane treatment of employees, especially managerial, professional, and other employees not covered by collective bargaining contracts. Includes such policies as the protection of employee rights and the nature of processes used to allocate organizational opportunities and rewards; such programs as employee assistance plans and due process procedures; and elements of such practices as employee communication and supervision. Treats these as a "package" to be considered in totality and developed strategically. Considers variations in employee relations strategies, the motives of employers in establishing such strategies, and the effects of these strategies on relevant individual and organizational outcomes. Special emphasis will be placed on fairness in managing members of under-represented groups.

ILRHR 668 Staffing Organizations
Spring. 4 credits. Limited to 25 students. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics. M. Cavanaugh.
This seminar provides an overview of the process by which organizations staff positions from pools of external and internal applicants. Will focus on theories, research, policies, and practices concerning attraction and selection for the most effective utilization of human resources. Topics covered in the course include: staffing strategy and context, measurement of staffing effectiveness, job/competency analysis and human resource planning, recruitment and job choice, initial and substantive external selection practices, and internal staffing decisions. Throughout the course, considerable emphasis will be placed on relevant legislation and court decisions, and practical application of relevant theory and past research.

ILRHR 669 Managing Compensation
Fall and spring. 4 credits. Limited to 30 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 266 and basic statistics or permission of instructor. R. Broderick, G. Milkovich.
Focuses on managing employee compensation in contemporary organizations. The major objectives are: to examine the current state of compensation decision making, to examine how recent theoretical and research developments inform compensation decisions, and to offer an opportunity to develop competencies in making compensation decisions.

ILRHR 670 Seminar in Manufacturing
Spring. 15 credits. R. Batt.
Semester in Manufacturing ("SiM") is designed to give students a basic understanding of the fundamentals of manufacturing, as well as a broad overview of current issues and trends. The 15-credit immersion format allows development of the linkage of manufacturing to other functions in the enterprise (Research & Development, marketing, corporate strategy, human resources, etc.) A highlight of SiM is that each student will visit more than 20 manufacturing facilities during the semester, representing diverse sets of products, processes, and manufacturing strategies. These visits include extended discussion sessions with management, and often union representatives, as well as a factory tour. These visits bring the "real-world" perspective to the course. SiM is built around five basic themes. The 15-credit immersion format allows each theme to be discussed in depth, and the interrelationships between themes to be developed over the semester, giving students a broad understanding of how an enterprise functions.

[ILRHR 690 Comparative Human Resource Management
3 credits. Prerequisites: ILRHR 260/560, or permission of instructor. Not offered 1999–2000. Staff.
Surveys human resource practices in two key regions of the world: Western Europe and the Pacific Rim. The focus is on HR issues related to management of professional and managerial work force, such as selection and staffing, development, and appraisal and reward systems. Special attention is given to current changes and trends in the human resource management area (e.g., unification of Europe, transformation of Japanese firms). Implications for multinationals operating in these countries will also be discussed.]

[ILRHR 691 Human Resource Planning and Strategy
2 credits. Limited. Prerequisites: ILRHR 560 or equivalent, one course in statistics, and permission of instructor. 7 weeks. Not offered 1999–2000. L. Dyer.
Covers the content of human resource strategies and the process of human resource planning. The emphasis is on developing human resource strategies that are integrated with firm business strategies. Covered are methods and techniques used to forecast and plan for organization structures and processes, work force population, employee contribution, and employee morale. Much of the course is organized around cases and simulations in which students make policy and program decisions for fictional organizations. Decisions are evaluated on the basis of their contributions to the organizations' human resource and business objectives.]

[ILRHR 692 Training the Displaced and Disadvantaged
3 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. Bishop.
Examines public and private efforts to lower unemployment and underemployment of displaced and disadvantaged workers. The seminar examines the scope of the problem, its causes, and why specific programs have worked and others have not. Topics covered will include training for displaced workers, rehabilitation of the disabled, job-search training, tax credits for hiring, vocational training, literacy instruction, EEO, public service employment, assisting new business, and industrial policy. The seminar also investigates how the structure of the economy influences the ability of targeted training and job creation to achieve sustained reductions in unemployment and draws lessons from the experience of other societies.]

ILRHR 693 Training and Development in Organizations
Spring. 3 credits. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics or permission of instructor. M. Cavanaugh.
The purpose of this course is to acquaint students with aspects of learning in organizations. We will begin by discussing organizational learning, and then focus more narrowly on specific ways in which learning is achieved through the training and development functions. Topics throughout the semester include: how learning is linked to organizational strategy, how to determine that training is needed, issues regarding the design of training programs, current training techniques, evaluation strategies, and management development practices.

[ILRHR 694 Human Resource Information System Applications
4 credits. Limited to 22 students. Prerequisites: ILRHR 260/560 or equivalent; ILRHR 266; at least one upper-level HRS elective; basic statistics; and permission of instructor. Not offered 1999–2000. J. Boudreau.
Explores the development, implementation and management of computerized personnel information systems and their use in human resource management. Theories and concepts relevant to the design and implementation of such systems are presented and used as the framework for hands-on experience with personal and mainframe computer systems. Students create and use applications of current popular human resource software to design their own applications and present them to the class. Where possible, student applications are based on field work in actual organizations.]

ILRHR 695 Education, Technology, and Productivity
Fall. 3 credits. J. Bishop.
The seminar investigates the nexus between the education and training in schools and at the workplace and the technological progressiveness, productivity, and competitiveness of firms, individuals, and nations. We will investigate (1) how technological progress is changing the nature of work and what this implies for reform of education and training, (2) why United States productivity has increased so little in the past two decades, (3) how education and training contribute to the growth and competitiveness, (4) why educational achievement has declined, and (5) how the responsibility for education and training should be apportioned among individuals, firms, private nonprofit organizations, and government.

ILRHR 697 Special Topics in Resource Studies
Fall or spring. 3 credits. Staff.
The areas of study are determined each semester by the instructor offering the seminar.

ILRHR 698 International Human Resource Policies and Institutions
Spring. 3 credits. J. Bishop.
A comparative study of human resource policies and institutions in Western Europe, North America, Japan, and East Asia (with special emphasis on math and science education) and of the effects of these institutions on productivity, growth, and equality of opportunity. The institutions studied include primary and secondary education, apprenticeship, employer training, and higher education. Data on the consequences of policies is presented and an effort made to understand how human resource policies and institutions have contributed to the rapid growth and low levels of inequality in Europe, Japan, and the Pacific Rim nations. Another focus of the course is understanding the causes of the low levels of achievement of American high school students relative to their counterparts abroad.

ILRHR 760 Seminar in Human Resource Studies
Fall or spring. 3 credits. Prerequisites: ILRHR 560, ILRST 510/511, and ILRHR 669 and permission of instructor. P. Wright.
A "floating" seminar designed to give faculty and students an opportunity to pursue specific topics in detail, with an emphasis on theory and research. Topics vary from semester to semester. Interested students should consult current course announcements for details.

[ILRHR 765 International Compensation
4 credits. Not offered spring 2000. G. Milkovich.
Seminar focuses on international developments in employee compensation. Will study recent research, theoretical developments and specific organizations' practices in a wide variety of countries. Local national practices will be our principal focus along with expatriates and others. Almost everyone believes they are experts in pay, so we will be drawing upon research and theories from sociology, economics, psychology, etc. Four operative terms are seminar, comparative, compensation, and organization. This is a seminar, so come to each session prepared to be an active player in discussions. Our focus is comparative, including research, theory, and practices of specific enterprises in different countries. Compensation includes all forms of pay including cash, benefits, allowances, and so on. Primary focus is at the organization level of analysis.]

[ILRHR 767 Human Resource Strategies for Entrepreneurial Firms
4 credits. Open to graduate students only. ILRHR 560, equivalent, or permission of instructor. Not offered 1999–2000. T. Welbourne.
For course description, see ILRHR 460.]

ILRHR 769 Topics in International Compensation Theory and Research
Spring. 4 credits. Prerequisite: ILRHR 669. G. Milkovich.
Examines recent developments in theory, research, and practice related to compensation. Discussion emphasizes the relevance of theory and research to compensation decision making. Students examine compensation and reward-related theories and research from supporting disciplines such as economics, psychology, sociology, and organizational behavior and evaluate their relevance to employee, managerial, executive, and international compensation.

ILRHR 790 ILR M.P.S. Program
Fall and spring. 1–9 credits.
Supervised research only for those enrolled in the ILR M.P.S. program.

ILRHR 798 Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 799 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 960 Workshop in Human Resource Studies
Fall and spring. 2 credits. Enrollment limited to M.S. and Ph.D. candidates. S-U grades only. Staff.
The workshop is designed to provide a forum for the presentation and critical discussion of current research being undertaken by graduate students, faculty members, and invited guests in the field of human resource studies. All M.S. and Ph.D. candidates in the Department of Human Resource Studies are urged to enroll; candidates in other departments are cordially invited. Each participant will have an opportunity to benefit from the collective wisdom of the others in the formulation, design, and execution of his or her research, as well as to become current on the latest developments in the field.

[ILRHR 961 Doctoral Research Seminar in Human Resource Management
Fall. 3 credits. Ph.D. candidates only. Not offered 1999–2000. P. Wright.
This seminar is aimed at reading, understanding, and conducting research in HRM. Students should obtain thorough understanding of the current research in traditional areas of HRM such as validation, job analysis, EEO, selection, performance appraisal, compensation, and training, and should develop the skills necessary to evaluate, criticize, and contribute to the literature on HRM.]

[ILRHR 962 Doctoral Research Seminar in Strategic Human Resource Management
Fall. 3 credits. Ph.D. candidates only. Not offered 1999–2000. P. Wright.
Seminar is aimed at reading, understanding, and conducting research in SHRM. The course should enable students to obtain a thorough understanding of the current research in Strategic HRM, and to develop the skills necessary to evaluate, criticize, and contribute to the literature on SHRM.]

[ILRHR 963 Research Methods in HRM/ Strategic Human Resource Management
Spring. 3 credits. Ph.D. candidates only. Not offered 1999–2000. P. Wright.
Designed to build social science research skills, particularly in the area of human resource studies (HRS). Topics include measurement reliability, construct validity, design of studies, external validity, meta-analysis, critiquing/reviewing HRS research, publishing HRS research, and applications of statistical models of HRS issues.]

INTERNATIONAL AND COMPARATIVE LABOR

G. Fields, chair; J. Abowd, R. Batt, J. Bishop, F. Blau, G. Boyer, V. Briggs, M. Cook, I. DeVault, L. Kahn, H. Katz, S. Kuruvilla, L. Turner

ILRIC 333 Western Europe, the United States, and Japan in a Changing World Economy
Fall. 3 credits (1 additional credit may be arranged). Open to juniors and seniors. L. Turner.

Offers an introduction to the contrasting national trajectories and current political economies of Germany, Britain, France, Japan and the U.S. Emphasis will be on (a) cross-national differences and comparisons; and (b) the different capacities that contrasting institutions offer each society as it grapples with intensifying trade competition, domestic political conflict, and the need for production reorganization and "new industrial relations."

ILRIC 337 Special Topics:
Fall. 3 or 4 credits. Staff.
Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

ILRIC 339 The Political Economy of Mexico
Fall. 3 credits. M. Cook.
Explores the range of challenges affecting contemporary Mexican politics, society, and economic development—from democratization to immigration to NAFTA. The course provides both an introduction to Mexican political economy for those with no prior background and an opportunity for students with more knowledge of Mexico to explore a research topic in greater depth.

ILRIC 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRIC 533 Western Europe, the United States, and Japan in a Changing World Economy
Fall. 4 credits. Graduate students.
L. Turner.
See description for ILRIC 333. Graduate students attend class, take the midterm and submit an analytical research paper at the end of the semester.

ILRIC 537 Special Topics
Fall or spring. 3 or 4 credits. Staff.
Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

ILRIC 631 Comparative Labor Movements in Latin America (also Government 631)
Spring. 3 credits. M. Cook.
Examines the historical development of labor movements in Latin America, their role in national political and economic development, and the impact of economic liberalization, authoritarianism, and redemocratization on contemporary labor organizations in the region. Countries examined will include, but are not limited to, Mexico, Brazil, Argentina, Chile, Peru, and Venezuela.

ILRIC 632 Revitalizing the Labor Movement: A Comparative Perspective
Fall. 4 credits. Graduate seminar open to seniors with permission of instructor only.
L. Turner.
Examines contemporary efforts in advanced industrial democracies to reform industrial relations. The first half of the course will examine contemporary industrial relations' reform efforts in the U.S., including innovative organizing strategies; new calls for union militance; business strategies for a "union-free" environment; efforts at labor-management cooperation; and the report of the Dunlop Commission. The second half will cover Britain—the Thatcher reforms of the 1980s and the current labor-backed works council movement; France—the Auroux Laws of the 1980s and their effects; and Germany—the transformation of industrial relations in eastern Germany since 1989.

ILRIC 633 Labor, Industry, and Politics in Germany
Fall. 4 credits. Open to seniors with permission and graduate students.
L. Turner.
Is the successful postwar "social partnership" model of organized capitalism in the Federal Republic of Germany viable in the 1990s? To answer this question, we will study the works councils and codetermination, the rise of a strong postwar labor movement, the contemporary German version of social partnership, with an emphasis on current events and the new challenges for German industry and labor posed by German unification and the single European market.

[ILRIC 635 Labor Markets and Income Distribution in Developing Countries
Spring. 4 credits. Prerequisite: ILRLE 240 or Economics 313 or permission of instructor. Not offered 1999–2000.
G. Fields.
A course analyzing who benefits and how much from economic growth in developing countries and how income distribution would be affected by various public policies. Topics to be covered include: poverty, inequality, social welfare, and economic growth-theory and evidence; poverty profiles, earnings functions, and decompositions; employment, unemployment, wages, and labor markets; and an introduction to benefit-cost analysis, with application to the economics of education.]

ILRIC 636 Comparative History of Women and Work (also Womens Studies 636)
Fall. 4 credits. Permission of instructor.
I. DeVault.
Will explore the similarities and differences between different cultures' assumptions about the work of women as well as women's experiences in varying work circumstances throughout history. Beginning with theoretical pieces and overviews of the history of women and work, most of the course will consist of in-depth examinations of specific work situations or occupations across time and geography. Comparative examples will be taken from the United States, Europe, and the Third World.

ILRIC 637 Labor Relations in Asia
Fall. 3 credits. Permission of instructor required. S. Kuruvilla.
A comparative survey of the industrial relations systems of selected Asian nations such as Japan, S. Korea, Thailand, Malaysia, Singapore, Hong Kong, China, and several others. The emphasis is on economic development strategies and industrial relations policies in these countries. Industrial relations practices, the extent of union organization, and labor force demographics of these countries will be examined. The primary objective is to provide students with an introduction to industrial relations systems in Asia. The countries chosen are representative, but not exhaustive.

[ILRIC 638 Labor, Free Trade, and Economic Integration in the Americas (also Government 630)
Spring. 3 credits. Limited. Open to seniors and graduate students; juniors by permission. Not offered 1999–2000.
M. Cook.
Analyzes the contemporary movements toward free trade and regional economic integration in the Western Hemisphere. Special attention is paid to labor's role in this process. Examines the origins and implications of the North American Free Trade Agreement (NAFTA) and looks at integration schemes in South America (Mercosur), Central America, and the Caribbean, and at hemisphere-wide initiatives. A research paper is required.]

ILRIC 730 Research Seminar on Labor Markets and Economic Development
Fall or spring. 3 credits. Prerequisite: open to M.S. and Ph.D., students only.
G. Fields.
Research seminar for students writing theses or dissertations on aspects of labor markets and economic development. Will address research questions, methodologies, and contributions in the areas of employment and unemployment, income and earnings, educational and human resource development, welfare economics, and economic growth. Numerous presentations and written papers will be required.

ILRIC 739 The Political Economy of Mexico
Spring. 3 credits. M. Cook.
For course description, see ILRIC 339.

ILRIC 790 ILR M.P.S. Program
Fall and spring. 1–9 credits.
Supervised research only for those enrolled in the ILR M.P.S. Program.

ILRIC 799 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

Other courses approved to fulfill ILRIC distribution

ILRCB 304 Latin American Labor History
Fall. J. Cowie.
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRHR 456 International Human Resource Management
Spring. Staff.
For description, see the section, Human Resource Studies.

ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives
Fall or spring. R. Batt.
For description, see the section, Human Resource Studies.

ILRHR 466 Comparative Human Resource Management
Fall. Staff.
For description, see the section, Human Resource Studies.

ILRHR 469 Immigration and the American Labor Force
Fall and spring. V. Briggs.
For description, see the section, Human Resource Studies.

ILRHR 656 International Human Resource Management
Spring. V. Pucik.
For description, see the section, Human Resource Studies.

ILRHR 690 Comparative Human Resource Management
Fall. Staff.
For description, see the section, Human Resource Studies.

ILRHR 698 International Human Resource Policies and Institutions
Spring. J. Bishop.
For description, see the section, Human Resource Studies.

ILRLE 444 The Evolution of Social Policy in Britain and America
Spring. G. Boyer.
For description, see the section, Labor Economics.

ILRLE 448 Topics in Twentieth Century Economic History: The Economics of Depression and the Rise of the Managed Economy
Fall. G. Boyer.
For description, see the section, Labor Economics.

ILRLE 640 Economic History of British Labor 1750–1940
Fall. G. Boyer.
For description, see the section, Labor Economics.

ILROB 628 Cross-Cultural Studies in Organizaitonal Behavior
Spring. Staff.

INTERDEPARTMENTAL COURSES

ILRID 150 Freshman Colloquium
Fall. 1 credit. Open only to ILR freshman. S-U only. Staff.
This course is offered: a) to acquaint new freshman students with some of the issues and disciplines in the field of industrial and labor relations; b) to establish acquaintanceship among members and the ILR faculty and small, randomly assigned groups of students. The course includes a plant visit and several meetings early in the semester designed to introduce issues encountered in studying the employment relationship.

ILRID 451 Science, Technology, and the American Economy
Spring. 4 credits. V. Briggs.
The industrial revolution did not begin in the United States, but the nation became the world's first technological society. Attention will be given to the evolutionary confluence of science, technology, mathematics, religion, and capitalism in the formation of the U.S. economy, its institutions, and its labor force. Primary attention will be given to the post-World War II economic developments. The vantage point will be the linkage with employment, unemployment, income, and productivity considerations. Public policy issues (such as the employment impact of the computer, research and development policy, national defense influences, the "agricultural revolution," savings and investment rates, labor force preparedness) will be explored. Critical concerns pertaining to environmental impacts, income polarization, and consumerism will also be examined.

ILRID 452 Writing in Industrial and Labor Relations
Fall or spring. 3 credits. J. Farley.
Will require close reading of four or five books related to the term's theme in the field of industrial and labor relations and careful writing about them. Students will also have an opportunity to practice writing about the world of work for different audiences.

ILRID 790 ILR M.P.S. Program
Fall and spring. 1–9 credits.
Supervised research only for those enrolled in the ILR M.P.S. program.

LABOR ECONOMICS

L. Kahn, chair; J. Abowd, F. Blau, G. Boyer, R. Ehrenberg, G. Fields, R. Hutchens, G. Jakubson, R. Smith

ILRLE 140 Development of Economic Institutions
Fall. 3 credits. Prerequisite for non-ILR students: permission of instructor. G. Boyer.
Provides students with an understanding of the historical roots of the economic system currently dominant in Western Europe and the United States. The course will focus on (a) the process of European economic growth prior to 1914, (b) the effect of industrialization on labor in Great Britain, and (c) the historical evolution of economic thought from Adam Smith to J. M. Keynes.

ILRLE 240 Economics of Wages and Employment (also Economics 341)
Fall and spring. 3 credits. Prerequisites: Economics 101–102, Economics 313, or permission of instructor.
Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. Considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

ILRLE 340 Economic Security (also Econ 451)
Spring. 3 credits. Prerequisites: ILRLE 240 or equivalent.
Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

ILRLE 348 The Economics of Unemployment (also Econ 453)
Fall. 4 credits. Prerequisite: ILRLE 240/540 or permission of instructor.
This course introduces students to several issues fundamental to an understanding of unemployment: the social costs; definitional questions and measurement problems; the patterns of unemployment; and the various types of unemployment, their causes, and the policies that can or have been pursued to alleviate unemployment. The course is designed for undergraduate and graduate students who have taken a survey course in labor economics or its equivalent.

ILRLE 440 Special Topics in Labor Economics
Fall or spring. 4 credits.
An undergraduate seminar whose topic changes depending on semester and instructor.

ILRLE 441 Income Distribution (also Econ 455)
Fall. 4 credits. Prerequisite: ILRLE 240 or Economics 341. R. Hutchens.
Explores income distribution in the United States and the world. Topics to be covered include functional and size distributions of income, wage structure, income-generating functions and theories, discrimination, poverty, public policy and income distribution, and changing income distribution and growth. Students who have taken CEH 355 may not receive credit for 441.

ILRLE 442 The Economics of Employee Benefits (also Econ 456)
Fall. 4 credits. Prerequisites: ILR 240 or equivalent. F. Blau.
An in-depth treatment of the economics and financial management and administration of all employee benefits: health care, insurance, retirement income, family-care benefits, executive incentive plans, and other compensation provided as a service or contingent financial package to employees. Detailed international comparisons of health care and retirement systems are included.

ILRLE 444 Modern European Economic History
Spring. 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.
An introduction to the economic development of Europe from 1500 to 1939. Topics covered include: the establishment of an institutional framework supporting economic growth in early modern Europe; the causes of the first industrial revolution in Great Britain; the effects of industrialization on workers' living standards; the spread of industrialization to the major continental powers—France, Germany, Austria-Hungary, and Russia; and the economic causes and effects of the First World War.

ILRLE 445 Women in the Economy (also Econ 457 also WOMNS 446)
Fall. 4 credits. Prerequisite ILRLE 240 or equivalent.
Examines the changing economic roles of women and men in the labor market and in the family. Topics include: a historical overview of changing gender roles; the determinants of the gender division of labor in the family; trends in female and male labor force participation; gender differences in occupations and earnings; and the consequences of women's employment for the family.

ILRLE 446 Economic History of British Labor 1750–1940 (also Econ 459)
Fall or spring. 4 credits. G. Boyer.
Will examine various aspects of British labor history from the beginning of the Industrial Revolution until World War II. Specific topics will include: (1) monetary and non-monetary changes in workers' living standards; (2)

internal migration and emigration; (3) the London labor market; (4) the extent of poverty and the evolution of the welfare state; (5) Luddism and Chartism; and (6) the development of trade unions.

ILRLE 448 Topics in Twentieth Century Economic History: The Economics of Depression and the Rise of the Managed Economy (also Econ 458)
Spring. 4 credits. Prerequisites: ILRLE 240 or Economics 314. G. Boyer.
Topics covered include: the causes of the Great Depression in the United States; the economics of the New Deal; the causes of high unemployment in interwar Great Britain; the rise of Keynesian economics and the development of demand management policies in Great Britain and the United States after 1945.

ILRLE 495 Honors Program
Fall and spring (yearlong course). 3 credits each term.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 497–498 Internship
Fall and spring. 3 and 6 credits.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 540 Labor Economics
Fall. 3 credits. Prerequisites: Economics 101–102 or Economics 103 or equivalent. Required of graduate students majoring or minoring in labor economics and M.I.L.R. candidates.
Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. The course considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination and the effects of unions.

ILRLE 541 Social Security and Protective Labor Legislation
Spring. 3 credits. Prerequisite: ILRLE 540 or equivalent. Required of graduate students majoring in labor economics and M.I.L.R. candidates.
Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

ILRLE 544 Labor Market and Personnel Economics
4 credits. Offered only in New York City for the MPS Program. Staff.
A four-module course, in which the first module covers the basic elements of supply and demand in the labor market, the second and third modules cover the "new personnel economics" (emphasizing economic issues within a firm that relate to selecting, training, assigning, motivating and compensating workers), and the final module covers key institutions and economic security issues (including unemployment, pensions, disability, discrimination, and unions). The goals of this course are to have students learn to analyze both business and public policy problems, taking into account both basic principles of economic theory and the relevant institutional environments.

ILRLE 642 Economic Analysis of the Welfare State (also Econ 460)
Spring. 4 credits. R. Hutchens.
Includes economic rationales for government intervention and analysis of the effects of programs on economic welfare. Discusses taxes, in-kind, and cash programs. Includes some discussion of welfare states in other countries.

ILRLE 644 The Economics of Occupational Safety and Health (also Econ 461)
Spring. 3 credits.
Analyzes the problem of occupational injuries and illnesses in the United States. The first section concentrates on legal requirements, judicial interpretations, and legal implications of the Occupational Safety and Health Act, then shifts to such questions as the need for, and appropriate goals of, the act; the stringency of safety standards considered in a benefit-cost framework; the difficulties in enforcing the act; and estimates of the impact of the act.

ILRLE 647 Evaluation of Social Programs
Fall. 4 credits.
An introduction to the methodologies used by economists to evaluate the impacts of social-action programs and legislation. General evaluation methodology, cost-benefit analysis, and econometrics are discussed. Case studies are considered to illustrate the uses of these techniques, to acquaint the student with major current government programs and legislation, and to estimate these programs' economic impacts. Throughout, the primary analytic framework used by the instructor is microeconomics.

ILRLE 648 Economic Analysis of the University (also Econ 342)
Spring. 4 credits.
Seeks to illustrate the complexity of decision making in a nonprofit organization and to show how microeconomic analysis in general, and labor market analysis in particular, can be usefully applied to analyze resource allocation decisions at universities. Among the topics covered are financial aid, tuition, admissions policies, endowment policies, faculty salary determination, the tenure system, mandatory retirement policies, merit pay, affirmative action, comparable worth, collective bargaining, resource allocation across and within departments, undergraduate versus graduate education, research costs, libraries, athletics, and "socially responsible" policies. Lectures and discussions of the extensive readings will be supplemented by presentations by Cornell administrators and outside speakers who have been engaged in university resource allocation decisions or have done research on the subject.

ILRLE 741 Applied Econometrics I
Fall. 4 credits.
Considers methods for the analysis of longitudinal data, that is, data in which a set of individual units are followed over time. The focus will be on both estimation and specification testing of these models. Will consider how these statistical models are linked to underlying theories in the social sciences. Course coverage will include panel data methods (including fixed vs. random effects models for both linear and non-linear systems) and, if time permits, duration analysis.

ILRLE 742 Applied Econometrics II
Spring. 4 credits.
Covers statistical methods for models in which the dependent variable is not continuous. It covers models for dichotomous response (including probit and logit) and polychotomous response (including ordered response and multinomial logit), various types of censoring and truncation (e.g., the response variable is only observed when it is greater than a threshold), as well as sample selection issues, etc. Will also include an introduction to duration analysis. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model.

ILRLE 744 Seminar in Labor Economics I (also Econ 641)
Spring. 3 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics.
Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 745 Seminar in Labor Economics II (also Econ 642)
Fall. 3 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics.
Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 746 Seminar in Labor Economics III (also Econ 643)
Spring. 4 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics.
Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 748 Economics of Employee Benefits
Fall. 4 credits.
Students in this course attend the lectures in ILRLE 442 (see description for 442) but have additional course requirements. If enrollment warrants, they will also meet separately at a time to be arranged for discussion of topics in 442 and additional topics.

ILRLE 749 Economics of Development (also Economics 672)
Fall. 4 credits. Prerequisites: first-year graduate economic theory and econometrics.
Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who

benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

ILRLE 790 ILR M.P.S. Program
Fall and spring. 1–9 credits.
Supervised research only for those enrolled in the ILR M.P.S. program.

ILRLE 798 Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 799 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 940 Workshop in Labor Economics
Fall and spring. 3 credits. Intended for Ph.D. students who have started to write their dissertations.
Presentations of completed papers and work in progress by faculty members, advanced graduate students, and speakers from other universities. Focus is on the formulation, design, and execution of dissertations.

ORGANIZATIONAL BEHAVIOR

P. Tolbert, chair; S. Bacharach, L. Gruenfeld, T. Hammer, E. Lawler, M. Loundsbury, W. Sonnenstuhl, B. Smith, R. Stern, L. Williams

ILROB 170 Introduction to Micro Organizational Behavior and Analysis: The Social Psychology of the Workplace
Fall. 3 credits. Staff.
This introductory (survey) course considers the basic individual and group processes in the workplace. At the individual level, we will study personality, motivation, perception, attitude formation, and decision making. On the group level, we will emphasize group dynamics, leadership, power and influence, and culture.

ILROB 171 Introduction to Macro Organizational Behavior and Analysis
Spring. 3 credits. Staff.
The relationship between industry and the economy as a whole and its implications for other social institutions in American society (including stratification, politics, and American values) is discussed. The course moves from classical sociological theory to the analysis of complex organizations. The central focus of the course is the study of industrial organizations and of complex organizations in general, emphasizing authority relations, goals, the division of labor, bureaucracy, and organizational design.

ILROB 320 The Psychology of Industrial Engineering
Fall. 4 credits. T. Hammer.
A study of the human factors in the industrial engineering of work, workplaces, tools, and machinery. The course examines the aspects of individual and social psychology that operate in the work setting and that should be taken into account in the design of jobs. These include limitations of the human sensory system; individual difference in skills, abilities, motives, and needs; group dynamics; intrinsic motivation; job satisfaction; conflict.

ILROB 321 Group Solidarity (also SOC 311)
4 credits. M. Macy.
What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select readers? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We will explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

ILROB 322 Work and Organization
3 credits. M. Lounsbury.
Will theoretically examine the concept of work and track how the nature of work and the operations of organizations are changing, highlighting the complex linkages between economic activity, social change and individual experience. Course includes a service-learning requirement that is designed to involve students in projects at local governmental or community organizations. This field based activity will also enable students to complement theoretical perspectives learned in class with a more grounded, experiential understanding of the relationship between work and organization.

ILROB 324 Gender and Work (also SOC 314/514 and Womns 314/514)
Spring. 4 credits. M. Brinton.
The purpose of this course is to familiarize students with the field of gender stratification. The first part of the course will examine long-term changes in women's labor force participation and the division of labor between the sexes as societies industrialize. We consider theoretical work as well as empirical case studies of a number of countries ranging from Taiwan to Ireland. The second part of the course focuses on gender and work in highly industrialized societies, and includes empirical studies of the gendered division of labor in households and the labor market of the United States in particular. The structure of the course is lecture one day per week and detailed discussion and critique of selected readings on the second day. Students take a mid-term exam and prepare a research proposal on some aspect of gender and work. During the last two weeks of the course, students present synopses of their research proposals and we discuss and constructively critique them.

ILROB 325 Organizations and Social Inequality (also SOC 322)
Spring. 3 credits. Removed from ILR writing intensive list. P. Tolbert.
Examines the central role that organizations in industrial societies play in allocating income, status, and other resources to individuals. A variety of theoretical explanations of social inequality will be examined, and the social policy implications of each will be considered. Class assignments are designed to develop students' general writing skills, as well as substantive understanding of different theories and approaches to the problem of inequality.

ILROB 328 Cooperation, Competition, and Conflict Resolution
Spring. 4 credits. Prerequisite: one course in social psychology or equivalent. Staff.
An examination of theory and empirical evidence relating to the resolution of interpersonal, intergroup, and international conflict. Specific attention is devoted to studying factors that contribute to the development of cooperative or competitive bonds between parties to a conflict. The following topics are studied: the availability and use of threat; the credibility, intensity, and costs of threat; fractioning and escalating conflict. Personality and situational factors that regulate conflict intensification are stressed.

ILROB 329 Organizational Cultures
Fall or spring. 3 credits. Prerequisite: one or more courses in sociology. Staff.
Reviews the concept of culture as it has evolved in sociology and anthropology, applying it to formal organizations in workplaces such as corporations and unions. The course first examines the nature of ideologies as sense-making definitions of behavior, concentrating on the cultural forms that carry these cultural messages, rituals, symbols, myths, sagas, legends, and organizational stories. Considerable attention will be given to rites and ceremonials as a cultural form in organizational life that consolidates many of these expressive forms into one. The course will examine types of ceremonial behavior such as rites of passage, rites of enhancement, and rites of degradation, including the role of language gestures, physical settings, and artifacts in ceremonial behavior. The presence of subcultures and countercultures in organizational behavior will also receive attention, especially the part played by occupational subcultures in formal organizations.

ILROB 370 The Study of Work Motivation
Fall. 4 credits. Open to juniors and seniors. T. Hammer.
Designed to acquaint the student with the basic concepts and theories of human motivation with implications for job design and organizational effectiveness. Focus is on theories of worker motivation and on research approaches and results as these apply to the performance of individuals and groups in formal organizations. Readings are predominantly from the field of organizational psychology, supplemented by relevant contributions from experimental and social psychology. Each student will design, execute, and analyze a research study of his or her own.

ILROB 371 Individual Differences and Organizational Behavior
Fall or summer. 4 credits. Recommended: some acquaintance with the substance and methods of behavioral or social science. L. Gruenfeld.
Examines personality from a comparative psychodynamic point of view. Social behavior, authority relationships, and work motivation are used to illustrate how various theories could be applied to understand behavior and experience in organizations.

ILROB 373 Organizational Behavior Simulations
Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Limited enrollment. R. Stern.

Basic principles of organizational behavior is studied through readings and participation in simulation games. Simulations model traditional organizations and cooperatives. Games model executive decision making, running a company, assembly work, and cooperative decision making. Organizational design, decision making, conflict, cooperation, and power are the central topics of discussion. The contrasting bases of power in the organizations permits the study of the assumptions underlying organization structure and process.

ILROB 420 Contemporary Organizational Behavior Applications

Fall or spring. 3 credits. Prerequisites: ILR 170 and 171 (120 and 121).

Introduces students to contemporary applications of organizational behavior theory in work organizations. Will explore the frameworks of common and current organizational and managerial change interventions, review contemporary literature about them, and try to discover existing links between these processes and the theoretical OB literature. Specific topics will vary from year to year. For this year, applications include TQM, re-engineering, team development, learning organizations, world-class manufacturing, competing values frameworks, assessment instruments, and multiculturalism and diversity issues in the workplace.

ILROB 421 Regulating the Corporation

Spring. 4 credits. R. Stern.

Will examine public and private power from an organizational perspective. The resource-dependence approach to organization-environment relations provides a framework for interpreting government attempts at the regulation of corporate behavior. Topics cover the structure and functioning of government regulatory agencies and corporate responses to regulation, including corporate strategy, change, and political influence. Business ethics and corporate social responsibility are considered along with the role of interest groups such as consumer or citizen organizations. Research and case materials focus on the implementation of environmental protection, occupational health and safety, equal opportunity, antitrust, securities, and consumer regulations.

ILROB 422 Organizations and Deviance

Fall. 3 credits. Enrollment limited to 60. W. Sonnestuhl.

Focuses upon the deviant actions of organizations, including such behaviors as price fixing, environmental pollution, illegal campaign contributions, and discrimination in hiring and promotion. Examines the origins of such behaviors within organizations, the processes by which they became institutionalized, and the processes by which they become defined as deviant organizational actions. Within this context, the course will examine such contemporary cases as Exxon's Valdez oil spill, Iran–Contragate, drug testing, and the federal savings and loan scandal. These events raise troubling questions about what it means to live and work within an organizational society, and they cannot be dismissed as instances of a few individuals gone bad.

ILROB 425 Sociology of Industrial Conflict

Spring. 4 credits. R. Stern.

The course focuses on the social, economic, and political causes of industrial conflict. The nature of work and the employment relationship provide the foundation for understanding both individual and collective expressions of conflict in work settings. Worker background, psychological contracts and authority relations set the stage for studying conflict expressions including strikes, labor turnover, absenteeism, sabotage, accidents, grievance filing, violence and other forms of conflict at work.

ILROB 427 The Professions: Organization and Control

Fall. 3 credits. Prerequisite: permission of the instructor. P. Tolbert.

Focuses on the sources of power and control exercised by professional groups in contemporary society. A number of issues will be examined in this context including: the role of professions in society, processes through which an occupational group becomes defined as a profession, sources of control that professional associations have over their members, relations between professionals and nonprofessionals in organizations, and the relationship between unionization and professionalization of occupations.

ILROB 428 Organizational Change and Intervention

Fall. 3 credits. Limited to 25. Juniors and seniors with permission of instructor. L. Williams.

Seminar will focus on planned and unplanned change in organizations. Topics will include mergers and acquisitions, team building, self management and the role of change agents. Participants will be required to develop and present topics in addition to keeping a weekly journal and participating in exercises.

ILROB 429 Organizational Politics and Institutional Change

Spring. 2 credits. 7 weeks. Limited to juniors and seniors with permission of the instructor. Please see instructor before the first class. S. Bacharach.

Will examine the market, cultural, political, and structural forces that change the organizational "rules of the game," how those changes affect individuals and organizations, and the distortions that occur as individuals and organizations attempt to adjust to a new unstable order. Issues to be examined include power, corruption, dealmaking, rationality, uncertainty, and competition. Course requirements include completing a major research paper and leading a class discussion.

ILROB 470 Group Processes

Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Permission of instructor. E. Lawler.

A review of theoretical approaches and selected research on group phenomena, including the formation of groups, the structure of group relations, and group performance. Specific topics include conformity and obedience, status and power relations, tactics of influence, solidarity and commitment, the management of emotion, the emergence and change of microcultures, and the role of groups in networks and organizations.

ILROB 472 Applied Organizational Behavior

Fall. 3 credits. Prerequisites: ILROB 170 and 171. S. Bacharach.

Introduces students to intermediate theory of organizational behavior. It will specifically concentrate on teaching students to use organizational theories for analytical and applied purposes. Among the issues to be addressed are organizational structure, work processes, organizational politics, organizational design, job design, incentive systems, and quality-of-work-life programs.

ILROB 474 Personality and Organizational Behavior Only

3 credits. Prerequisite: ILROB 170 or permission of instructor. B. Smith.

Will provide an overview of theoretically grounded perspectives on personality assessment. While this is not a class in personality theory, various theories will be discussed. Will cover the historical rise, fall, and rebirth of personality theory. In addition, the course will examine the use of personality theory to understand both the behavior of people in organizations and the "behavior of organizations". Students will be offered the opportunity to participate in a series of personality assessments designed for individual development. These assessments will be used throughout the course as an aid to understanding the relationship between personality and behavior within the world of work.

ILROB 479 Technical Workers and the Social Organization of Research and Development

Spring. 3 credits. Prerequisite: ILROB 170, 171 or an introductory course in sociology or anthropology. Staff.

Examines how industrial R&D is organized and seeks to impart an appreciation for the practical problems that arise when firms employ a significant number of scientists, engineers, and other technical workers. It is designed for students who have an interest in high-technology firms or who anticipate working for firms in which R&D plays an important role. The course brings relevant theoretical perspectives to bear on pragmatic issues surrounding technical innovation and the employment of scientists and engineers. Representative topics include: the organization of scientific and technical communities, the industrialization of research, the nature of scientific and technical work, strategies for fostering innovation, the careers of scientists and engineers, and the managerial problems characteristic of high-technology firms. Requirements include a take-home midterm and a final paper.

ILROB 495 Honors Program

Fall and spring (yearlong course). 3 credits each term.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 497–498 Internship

Fall and spring. 3 and 6 credits.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 499 Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 520 Organizational Behavior and Analysis

Fall or spring. 3 credits. Staff.

Survey of concepts, theories, and research from the fields of organizational and social psychology as these relate to the behavior of individuals and groups in organizations. Job attitudes, motivation, performance, leadership and power, group formation, perception, and organizational climate. A preliminary course for advanced work in organizational behavior.

ILROB 620 Theories of Organizational Change, Innovation, and Evaluation
Spring. 4 credits. Prerequisites: two organizational behavior courses at the 300 level, or advanced courses in sociology or psychology. W. Sonnenstuhl.
Examines the dynamics of individual, structural, and environmental factors operating in organizational change in general, and in the implementation and use of innovations within formal organizations in particular. The role of evaluative research in assessing the effectiveness of the implementation of innovations and in determining organizational effectiveness are analyzed. Several case studies of organizational change in government, unions, and private industry are examined. The emphasis is on conceptual frameworks for analyzing organizational change and mounting evaluative research on innovations. Readings are interdisciplinary and include sociology, psychology, and political science.

ILROB 621 Organizational Diagnosis Intervention and Development
Spring. 4 credits. Prerequisites: undergraduates, ILROB 170 and 171; graduate students, ILROB 520 and 521 or equivalent; and permission of instructor. L. Gruenfeld.
This applied course considers theories and techniques for the identification and improvement of organizational problems at the behavioral (micro) level. Methods for the implementing of change are evaluated in the light of several normative and descriptive theories of individual and group development and effectiveness. The course emphasizes both quantitative and qualitative data processing procedures.

ILROB 622 Sociology Of Markets
3 credits. M. Lounsbury.
Since World War II, the diffusion of "markets" in Asia, Eastern Europe and Latin America as well as changes in the structure of Western economies has reinvigorated questions about how markets are socially structured. Drawing on the literature in economic sociology, this course explores the social, cultural, economic and political factors that shape the emergence and dynamics of markets. Among the issues to be addressed are: the social organization of markets, market discrimination, the cooperative aspects of market formation and functioning, the role of government and other institutional arrangements, the relationship of economic change to broader social forces such as social movements, and the shift towards globally market-oriented economies.

ILROB 623 Micropolitics in Organizations
Spring. 3 credits. Prerequisites: ILROB 170 and 171. Limited, permission of instructor. S. Bacharach.
Examines micro-political processes in organizations. Neo-Macchiavellain, Marxian, and Weberian approaches to organizational politics will be specifically analyzed. An attempt will be made to understand how the micro-political rules of organizational games are institutionalized in change. Among the ideas to be discussed are the institutionalization of ideology and specification of the relationships among power, tactics, and strategy. Interest groups and coalition politics will be examined in terms of conflict and bargaining. Other issues to be discussed include corruption, dealmaking, and competition. Examples will be drawn from both the private and public sectors. Seminar requirements will include an in-class presentation and a major paper and/or take-home final exam.

ILROB 624 Groups in Work Organizations
Fall. 4 credits. Enrollment limited. Permission of instructor required. L. Gruenfeld.
This is an experiential learning course designed primarily for advanced students who have a comprehensive background in the theory and methods of the behavioral sciences. Work group members study their roles and relationships to each other, the task, other work groups, and especially authorities. Students write a number of self-reflective papers in which they conceptualize their experiences and relate them to theory and method in organizational behavior and experience.

ILROB 625 Conflict, Power and Negotiation
Fall. 3 credits. Open to seniors and graduate students. Permission of instructor is required. Limited enrollment. E. Lawler.
Theoretical seminar adopts a power perspective on bargaining and conflict resolution. Examines how power relations and power processes affect tactics in bargaining and also when power relations inhibit or promote conflict resolution. "Power" is viewed in the course as a capability, embedded in a social structure, and tactics are the action based on or using such power. The seminar gives overview of several theoretical approaches to conflict and bargaining (e.g., rational choice, cognitive, social exchange) and places the power perspective in this context.

ILROB 627 Leadership in Organizations
Spring. 3 credits. Prerequisites: two organizational behavior courses at the 300 level or advanced courses in sociology or psychology. L. Gruenfeld.
An examination of theories and research findings from the behavioral sciences that are relevant to leadership and the influence process in groups and organizations. Personality, situational factors, intergroup processes, interpersonal perception as well as the motivation to both lead and follow will be discussed. The implications for leadership training, organization development, and action research are explored.

ILROB 628 Cross-Cultural Studies in Organizational Behavior
Spring. 3 credits. Limited. Permission of instructor before registering in course. L. Gruenfeld.
Designed for students interested in social psychological theory and research in international culture comparisons of behavior and experience in organizations. Variables such as power distance, individualism-collectivism, universalism-particularism and attitudes toward authority as well as work motivation will be examined. Upon completion of the readings and discussion of conceptual materials and consideration of several major international comparison studies, each student will prepare and present a paper on a topic of his/her own choice usually related to his/her country of origin (China, Japan, German, USA, etc.).

ILROB 629 Personality in Organization
Fall. 4 credits. Open to undergraduates with permission of instructor. L. Gruenfeld.
This advanced course considers psychodynamic theories of organizational diagnosis at the individual and group levels. Topics include leadership, power, authority, work motivation, intervention, and change. The topics are discussed and applied in small study groups. The professor's role is as a consultant and resource person. Class members study and research their own behavior and present their qualitative and quantitative findings to the class. Students are expected to have background and interest in both research methods and theory.

ILROB 670 Semester in Manufacturing
Spring. 15 credits. Open to master's and Ph.D. students in Industrial and Labor Relations with permission of instructor.
Intended for students who want to work as professionals or who have a strong interest in the manufacturing industries. It is taught by an interdisciplinary faculty team from the College of Engineering, the Johnson School of Management, and the School of Industrial and Labor Relations. Course material will be based on plant visits and project work with local industry. Student participation will be in interdisciplinary teams with members representing the three colleges. Course content will concentrate on four major issues thought to make a competitive difference in today's economic environment: (1) the changing environment for product design; (2) rapid-response production systems; (3) organization, management, and compensation of the manufacturing team; and (4) performance measurement.

ILROB 671 Organizations as Social Networks
Spring. 3 credits. Prerequisites: one or more courses in organizational behavior, sociology, psychology, anthropology, or political science. A course in statistics or research methods would be helpful.
Increasing attention has been devoted to the idea that social structures can be fruitfully investigated as social networks. In particular, organizational and inter-organizational structures may be analyzed as patterned relationships among individuals, groups, and even other organizations. Such networks appear to be strong predictors of a variety of social dynamics including attitude similarity, the diffusion of innovation, turnover, and the allocation of organizational resources. A variety of methods for collecting and analyzing network data including: graph theory, sociometry, clique detection, centrality analysis, blockmodeling, and the quadratic assignment procedures will be used. In addition to reading recent published research, this course will involve work with actual data sets and relevant computer programs.

ILROB 674 The Social Psychology of Behavior and Experience in Organizations
Fall. 3 credits. Prerequisite: ILROB 170 and 171 or ILROB 520. L. Gruenfeld.
Considers theories that seek to explain behavior at the individual, group, and organizational level. Work motivation, leadership, and the member composition and dynamics of groups will be discussed. Harmony, conflict and other aspects of the relationships among groups in the organization will be evaluated.

ILROB 675 Cooperative Strategies for Improving Organizational Performance
Spring. 4 credits.
Will concentrate on presentation and analysis of a series of case studies involving projects using cooperative strategies to improve organizational performance. Emphasis will be

given to cases in which union and management have been working together to enhance productivity and the quality of working life. Cases will be examined against a background of research literature on improving organizational performance. Students will be responsible for a term paper.

ILROB 676 Systems of Labor Participation in Management
Fall. 4 credits. Prerequisites: senior standing and permission of instructor.
Examines the theory and practice of worker participation in systems ranging from informal shop-level participation to self-management. Special emphasis is placed on socio-technical systems of job design and work restructuring that give workers control over the labor process. Attention is also given to legislated programs of participation (codetermination) and to participation in employee-owned firms.

ILROB 679 Methods of Observation and Analysis of Behavior Attitudes and Values in Work Groups and Organizations
Fall or spring. 4 credits. Permission of instructor required.
Considers qualitative and psychometrically precise and systematic research methods for the study of behavior in groups and organizations. Includes a workshop that is designed to improve teamwork with the use of on-line data generated by group members. Personality, leadership culture, and group dynamics are the major focus. Students will observe, record, and videotape group and individual behavior, which will be analyzed with the help of microcomputer programs, especially SYMLOG (a system for the multiple-level observation of groups) developed by Bales (1970, 1979). In addition to lectures and discussion of research papers, this course will also include a research project designed and executed by the students.

ILROB 720 Issues of Measurement in Research on Organizations (Instrumentation)
Fall. 4 credits.
Concerns the study of tests and measures used to assess central variables in organizational behavior and related fields. Students will learn where to find measures suitable for their research purposes and will examine the theories that define the constructs being measured; the empirical information available about different measures—construction, reliability, and validity; and the ways in which the instruments have been used in research and practice.

ILROB 721 Advanced Micro Organizational Behavior
Spring. 3 credits.
Examines the historical development of psychological theories of organizational behavior and contemporary issues in micro organizational research. The course will emphasize reading and analysis of primary source material.

ILROB 722 Advanced Macro Organizational Behavior
Fall. 3 credits. Prerequisites: ILROB 520.
Examines the historical development of sociological theories of organizations and contemporary issues in macro organizational research. The course will emphasize reading and analysis of primary source material.

ILROB 723 Behavioral Research Theory, Strategy, and Methods I
Fall. 4 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll.
Materials studied in ILROB 723 and 724 include (1) theoretical, conceptual, and ethical questions; (2) survey research and attitude-scaling procedures; (3) laboratory research methods; (4) participant observation and interview methods; (5) use of documents and qualitative data analysis. Provides students with important philosophical background for doing research and exposes them to a well-balanced, interdisciplinary set of quantitative and qualitative research tools.

ILROB 724 Behavioral Research Theory, Strategy, and Methods II
Spring. 3 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll.
Course will cover (a) analysis and interpretation of quantitative data, (b) traditional problems encountered in the assessment of human and organizational characteristics, (c) the use of different methods of data analysis, and (d) an examination of the limitations imposed on data analysis and interpretation by traditional measures. Examples of topics covered in the course: the use of Chi-square, t-tests, ANOVA, simple and multiple correlation and regression, reliability and validity analyses, causal models, factor analysis, scale construction.

ILROB 725 Analysis of Published Research in Organizational Behavior (also SOC 725)
Fall. 3 credits. Prerequisites: ILROB 520 and one year of statistics.
An advanced research methods course that critically examines published research papers in the field of organizational behavior in terms of research design and method as well as theory.

ILROB 726 Selected Topics in Organizational Behavior
Fall. 3 credits. Prerequisites: ILROB 520 and permission of instructor.
An advanced proseminar that seeks to develop an interdisciplinary perspective on selected topics in organizational behavior. The topics themselves will change from year to year depending on participants' interests. Course is designed to allow students and the instructor to jointly pursue significant scholarly inquiry into one or more arenas of organizational theory. Emphasis will be placed on exploring the relevance of tradition in related disciplines (anthropology, linguistics, philosophy, sociology, etc.) that may enrich our understanding of organizational life.

ILROB 727 Work and Industrial Conflict
Spring, weeks 7–14. 2 credits.
A concentrated examination of the sociology of industrial conflict. The seminar focuses on classic formulations of conflict theory in sociology, then the social, political, economic causes of industrial conflict. Both individual and collective forms of conflict expression are examined. Some discussion of the implications of various types of worker management of firms for industrial conflict will be included.

ILROB 728 Theories of Motivation and Leadership
Spring. 2 or 4 credits. Prerequisites: ILROB 520.
Two independent but sequence-connected minicourses.

(1) Theories of Work Motivation. 7 weeks. 2 credits.
Course will provide an introduction to basic concepts of human motivation in general, with particular emphasis on the theories that explain and predict work motivation. Students will examine the empirical research that tests the validity of the theories and shows how and under what conditions different motivation models can be used for practice in work organizations.

(2) Theories of Leadership and Power. 7 weeks. 2 credits.
Several current microtheories of leadership and power and related research are examined. The disciplinary perspective employed is social organizational psychology and the level of analysis emphasized is action and experience of individuals in groups.

ILROB 729 Organizational Change and Intervention
Fall. 3 credits. Graduate students only; no exceptions.
This seminar is concerned with planned and unplanned change in organizations. It is designed to analyze theory in practice. Particular attention will be paid to the role of internal and external change agents. Class members will be encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants will submit weekly work force journals.

ILROB 770 The Cultures of Work Organizations
Fall. 3 credits. Open only to graduate students.
Considers both administrative and occupational cultures in the workplace. It takes an anthropology perspective, focusing on ideologies as the main ingredient of cultures but emphasizing the role of cultural forms, e.g., myths, stories, sagas, language, rites and ceremonials, and physical settings of meaning. It pays special attention to the place of subcultures and countercultures in the makeup of administrative culture and to occupations as a major source of subcultures. The role of the environment in which organizations are embedded, and its influence on workplace cultures, is also included. Forms of cultural leadership and approaches to reading and changing cultures are also considered.

ILROB 771 Social Science and Social Scientists
3 credits. Grad only. Letter grade only.
L. Williams.
This seven-week course offers a philosophy of science look at social science methods. Discussions will include a comparison of conventional and radical views of theory construction, and the strengths and weaknesses of approaches such as interviewing, surveys, policy capture, laboratory experiments, secondary data analysis, action research and ethnomethodology. Readings will include: *Mismeasurement of Man* (Gould); *Conduct of Inquiry* (Kaplan); *Against Method* (Feuerband); *Servants of Power* (Baritz); and *Encounter with an Interviewer* (Twain).

ILROB 772 The Social Construction Of Economic Life
3 credits. M. Lounsbury.
Drawing on the literature in economic sociology, this course emphasizes how "economic" activities are constituted and shaped by the social, cultural and historical contexts within which they are situated. This course will focus on surveying various empirical and theoretical approaches used to study the genesis and influence of broader scale organizational and institutional arrangements and provide students with an opportunity to formulate and refine their own research questions and perspectives.

ILROB 773 Advanced Seminar In Cross-Cultural Studies of Organizational Behavior
Fall. 3 credits. Permission of the instructor.
Considers theory and method for the study of cross-cultural and cognitive style variables. Members participate in the conceptualization and conduct of a comparative research project.

ILROB 776 Organizational Implications of World Class Manufacturing
Fall. 4 credits.
Aimed at helping students develop an understanding of organizations as complex social systems, and of the behavioral implications of new manufacturing initiatives. Live case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, total quality management, and just-in-time material flow. Analyses emphasize the impact of such innovations on individuals' role definitions and relationships, organizations communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 776 is a core course in the Master of Engineering/ Manufacturing Option degree program.

ILROB 777 Personality In Work Groups and Organizations
Spring. 3 credits. Prerequisite: statistical methods and/or a course in research methods. Each student will administer, score, and statistically test theory-driven hypothesis. Staff.
Discusses several theories of personality and related research findings. The relationship of personality to work motivation and leadership and interpersonal behavior in groups (teams) is also considered. Methods of research including observational, peer report, and self report, as well as performance tests are studied.

[ILROB 778 Solidarity In Groups
Fall. 3 credits. Not offered 1999–2000. Staff.
Examines sociological and social psychological theories about how social solidarity or a "sense of community" comes about and is maintained in groups and organizations. Distinguishes emotional, normative, and instrumental bases for social solidarity and shows how these promote or inhibit subgroup formation in organizations, commitment of individuals to organizations, and organizational citizenship behavior.]

ILROB 790 ILR M.P.S. Program
Fall and spring. 1–9 credits.
Supervised research only for those enrolled in the ILR M.P.S. program.

ILROB 798 Internship
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 799 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 920 Organizational Behavior Workshop
Fall. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only.
This workshop is designed to provide a forum for the presentation of current research undertaken by faculty members and graduate students in the Department of Organizational Behavior and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

SOCIAL STATISTICS

A. Hadi, Chair; J. Angellotti, J. Bunge, T. DiCiccio, P. Velleman, M. Wells

ILRST 210 Statistical Reasoning I
Fall, spring and summer 1999–2000. 3 credits. Attendance at weekly discussion section is required. J. Angellotti, P. Velleman.
An introduction to the basic concepts of statistics and data analysis. Descriptive methods, normal theory models and inference procedures for univariate and bivariate data. Basic statistical designs, an introduction to probability and applications of the Binomial and Normal distributions. Estimation, confidence intervals, and tests of significance for a single population mean and proportion, the difference in two population means and porportions, simple linear regression, correlation, and two-way contingency tables. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

ILRST 211 Statistical Reasoning II
Fall, spring and summer 1999–2000. 3 credits. Prerequisite: ILRST 210 or suitable introductory statistics course. J. Bunge, T. DiCiccio, A. Hadi.
A second course in statistics. Applications of statistical data analysis techniques, particularly to the social sciences. Topics include: statistical inference; simple linear regression; multiple linear regression; logistic regression; and analysis of variance. Computer packages are used throughout the course.

ILRST 310 Statistical Sampling
Spring. 3 credits. Prerequisite: two terms of statistics. J. Bunge.
Theory and application of statistical sampling, especially in regard to sample design, cost, estimation of population quantities, and error estimation. Assessment of nonsampling errors. Discussion of applications to social and biological sciences and to business problems. Course includes an applied project.

ILRST 311 Practical Matrix Algebra
Fall. 3 credits. J. Bunge.
Matrix algebra is a necessary tool for statistics courses such as regression and multivariate analysis and for other "research methods" courses in various other disciplines. One goal of this course is to provide students in various fields of knowledge with a basic understanding of matrix algebra in a language they can easily understand. Topics include special types of matrices; matrix calculations; linear dependence and independence; vector geometry; matrix reduction (trace, determinant, norms); matrix inversion; linear transformation; eigenvalues; matrix decompositions; ellipsoids and distances; some applications of matrices.

ILRST 312 Applied Regression Methods
Fall. 3 credits. Prerequisite: ILRST 211 or equivalent courses. T. DiCiccio.
Matrix algebra necessary to analyze regression models is reviewed. Multiple linear regression, analysis of variance, nonlinear regression, and linear logistic regression models are covered. For these models, least squares and maximum likelihood estimation, hypothesis testing, model selection, and diagnostic procedures are considered. Illustrative examples are taken from the social sciences. Computer packages are used.

[ILRST 313 Design and Analysis of Experiments
3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 1999–2000.
The statistical design and analysis of comparative experiments including completely randomized, factorials, randomized block, latin squares, and split-unit designs including crossover and repeated measures. Application of statistical design to research problems. Analyses to compare treatment groups including ANOVA, ANCOVA, contrasts and multiple comparison procedures. Computer packages are used.]

[ILRST 314 Graphical Methods for Data Analysis
3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 1999–2000.
Classical and recently developed graphical methods for analysis and display. Characteristics of effective and honest graphs with comparison of alternative methods for understanding data. Includes study of current computer programs and methods expected to be practical in the near future: graphing of univariate data, bivariate plots, multivariate data, graphical methods of data analysis; the specification, modification, and control of graphs; study of interaction between choice of display and underlying patterns.]

ILRST 410 Techniques of Multivariate Analysis
Spring. 3 credits. Prerequisite: ILRST 312 or equivalent.
Techniques of multivariate statistical analysis discussed and illustrated by examples from various fields. We emphasize application, but theory will not be ignored. Deviation from assumptions and the rationale for choices among techniques are discussed. Students are expected to learn how to thoroughly analyze real-life data sets using computer-packaged programs. Participants should have some knowledge of matrix notation. Topics include: multivariate normal distribution; sample geometry and multivariate distances; inference about a mean vector; comparison of several multivariate means, variances, and

covariances; detection of multivariate outliers; principal component analysis; factor analysis; canonical correlation analysis; discriminant analysis, and multivariate multiple regression.

[ILRST 411 Statistical Analysis of Qualitative Data
3 credits. Prerequisite: two statistics courses or permission of instructor. Not offered 1999–2000. M. Wells.
An advanced undergraduate and beginning graduate course. Includes treatment of association between qualitative variates, contingency tables; log-linear models; binary ordinal, and multinomial regression models; limit dependent variables.]

ILRST 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRST 510 Statistical Methods for the Social Sciences I
Fall, spring and summer 1999–2000.
3 credits. J. Angellotti, P. Velleman.
A first course in statistics for graduate students in the social sciences. Descriptive statistics, probability and sampling distributions, estimation, hypothesis testing, simple linear regression and correlation. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

ILRST 511 Statistical Methods for the Social Sciences II
Fall, spring and summer. 3 credits. Prerequisite: ILRST 510 or equivalent introductory statistics course. A. Hadi, P. Velleman.
A second course in statistics that emphasizes applications to the social sciences. Topics include: simple linear regression; multiple linear regression (theory, model building, and model diagnostics); and the analysis of variance. Computer packages are used extensively.

ILRST 610 Seminar in Modern Data Analysis
Fall. 3 credits. Prerequisite: two statistics courses or permission of instructor. P. Velleman.
An advanced survey of modern data analysis methods. Topics include exploratory data analysis, data re-expression, philosophy of data analysis, robust methods, statistical graphics, regression methods, and diagnostics. Extensive outside readings cover recent and historical work. Participants should have some knowledge of multiple regression, including the use of matrices, and some experience using a computer.

[ILRST 611 Statistical Computing
3 credits. Prerequisites: linear algebra, knowledge of a programming language, and statistics at least through multiple regression. Not offered 1999–2000.
A survey of new aspects of statistical computing. Topics include: basic numerical methods, numerical linear algebra, nonlinear statistical methods, numerical integration and approximation, smoothing and density estimation. Additional special topics may include Monte Carlo methods, statistical graphics, computing-intensive methods, parallel computation, computing environments. Designed for graduate students in the statistical sciences and related fields interested in new advances. Students may be asked to write programs in a programming language of their choice.]

ILRST 612 Data Mining
Spring. 3 credits. Prerequisite: three coursee in statistcs including multiple regression, computer experience (preferably cross platform), and matrix algebra (may be taken concurrently). J. Bunge.
Data mining is the fastest-growing business application of statistics. The term typically refers to a suite of methods used to estimate or predict a response (e.g., probability that a customer will buy a new product), based on a large set of predictors (5,000 independent variables is not large). Methods include logistic regression, decision trees (CART, CHAID), neural nets, and discriminant analysis; diagnostics and outlier detection are also important. We will use the new SAS software package Enterprise Miner, which gives a point-and-click interface for data cleaning, exploration and analysis via several methods, and we will also use the IBM competitor Intelligent Miner. I will draw on my consulting experience in industry and will hopefully obtain real (sanitized) datasets for us to work on. For more information e-mail John Bunge at jab18@cornell.edu; see also http://www.cornell.edu/Academic/RSF9/RSF9ILRST.html.

[ILRST 613 Bayesian and Conditional Inference
3 credits. Prerequisites: graduate level courses equivalent to OR&IE 670 and OR&IE 651 or permission of instructor. Not offered 1999–2000. M. Wells.
Covers the following topics: loss functions and utility theory, prior information and subjective probability, coherency, basic Bayesian inference, empirical Bayesian inference, robust Bayesian inference, Bayesian computations, ancilliarity, conditional properties of statistical procedures, and Barndorff-Nielsen's exact likelihood theory.]

[ILRST 614 Structural Equations with Latent Variables
3 credits. Prerequisites: ILRST 210, 211 or ILRST 510, 511 or equivalent. Not offered 1999–2000. M. Wells.
Provides a comprehensive introduction to the general structural equation system, commonly known as the "LISREL model." One purpose of the course is to demonstrate the generality of this model. Rather than treating path analysis, recursive and nonrecursive models, classical econometrics, and confirmatory factor analysis as distinct and unique, we will treat them as special cases of a common model. Another goal of the course is to emphasize the application of these techniques.]

[ILRST 615 Expert Systems and Probabilistic Network Models
3 credits. S-U only. Prerequisite: OR&IE 560 or an equivalent course in probability and statistics. Not offered 1999–2000.
This is an interdisciplinary course for students in applied mathematics, computer science, statistics, and other related fields of applications such as medical, engineering, and social sciences. Topics include: components of expert systems, rule-based expert systems, probability-based expert systems, uncertainty measures, dependency models, Bayesian and Markov networks, propagation of uncertainties, learning structure from data, and examples of applications. Students will use computer software to gain experience.]

[ILRST 711 Robust Regression Diagnostics
3 credits. S-U or letter grade. Prerequisite: ILRST 312 or equivalent or permission of instructor. Not offered in 1999–2000.
Regression models are simplifications of reality; we rarely expect the model to be exactly true. In many applications of regression, however, small changes in a model, a model assumption, or a data point can have very large effects on the results. Regression analysis is viewed in this course as a cyclical process, which takes inputs and produces outputs in an interactive or cyclical way; a way in which the outputs can be used to diagnose, validate, criticize, and possibly alter the inputs. This is an attempt to narrow the gap between the theory and practice of regression analysis. We discuss classical methods as well as a recently developed general framework for assessing the sensitivity of the outputs to small changes in the input. Students are expected to be able to perform through analyses of real-life data using computer packages. Topics to be discussed include: role of variables in a regression equation, regression outliers and influential observations, robuts regression, alternatives to least squares (e.g., LMS, LAV, IRLS) error-in-variables models, and generalized linear models.]

ILRST 712 Theory of Sampling
Fall. 3 credits. Prerequisite: calculus and at least one semester of mathematical statistics. J. Bunge.
Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or "design" approach; the second part on the more recent "model-based" approach. Attention is paid to recent progress in the field.

[ILRST 713 Counting Processes with Statistical Applications
3 credits. Prerequisite: a course at the technical level of Math 572 and 574 or permission of instructor. Not offered 1999–2000.
The statistical analysis of life history data is playing an increasing role in the social, natural, and physical sciences. We will formulate and solve various practical problems in the statistical analysis of life history data using the modern theory of stochastic processes. We will examine the martingale dynamics for point processes relevant to life history data. Both parametric and nonparametric inference for multiplicative intensity models will be considered. The large sample properties of the proposed procedures will be discussed in detail using recent extensions of functional central limit theorems for martingales.]

[ILRST 714 Topics in Modern Statistical Distribution Theory
3 credits. Prerequisite: courses equivalent to OR&IE 651 or Math 571, and STATS 409 or OR&IE 670. Not offered 1999–2000.
Recent research has revealed vast territories of distribution theory that are unfamiliar to most statisticians. Provides an introduction to three topics underlining this "modern" theory: infinite divisibility, decomposability, and stability; characterization of distributions; extensions of univariate distributions to multivariate distributions.]

[ILRST 715 Likelihood Inference
3 credits. Prerequisite: graduate courses equivalent to OR&IE 670 and OR&IE 670. Not offered in 1999–2000.
In most statistical models, exact distribution theory for testing hypotheses or constructing confidence intervals is either unavailable or computationally cumbersome. Inferences are routinely performed by using large-sample approximations to the distributions of test statistics. This course provides a survey of some recent higher-order asymptotic approximations for likelihood-based methods of inference.]

[ILRST 716 Statistical Consulting
2 credits. Prerequisites: limited to graduate students. S-U only. Not offered 1999–2000.
A course in practical consulting on "real-world" statistical problems. Under the supervision of the instructor(s), students will hear problems presented by clients (usually faculty and graduate students from other fields) and will collaborate in proposing a statistical model, analyzing data, and interpreting results. Statistical computing will be used as needed.]

ILRST 717 The Analysis of Discrete Data
Spring. 3 credits. Prerequisites: graduate courses equivalent to OR&IE 670 or permission of instructor. T. DiCiccio.
This course concerns statistical models and methods for analyzing categorical data. The key models to be covered are log-linear models for contingency tables and logistic regression models for binary-response and multinomial data. Asymptotic distribution theory necessary for inference in these models will be emphasized. Other topics include conditional inference and connections with generalized linear models. Computer packages will be used for analyses in practical examples.

ILRST 799 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILR EXTENSION

Statewide

The following courses are open to participants in the Extension Division's statewide credit programs in labor studies and management studies. Extension offices are based in Buffalo, Albany, Rochester, Ithaca, New York City, and Long Island. These courses are not open to undergraduate or graduate students matriculated in the Ithaca ILR programs. Courses and course credits earned in Extension Division certificate programs are not automatically accepted as transfer credits or as a basis of admission to the resident ILR undergraduate and graduate programs in Ithaca. Student applications for course transfer are evaluated by the ILR school on an individual basis.

204 Managing Conflict
Fall or spring. 3 credits.
The purpose of this course is to provide students with opportunities to apply conflict resolution theory to specific situations, based on real-life problems that require resolution. Students will examine situations, analyze the facts and perceptions driving the actors, and engage in applying communication, negotiation, and mediation techniques to reduce or eliminate the conflict.

205 Oral Skills for Conflict Management
Fall or spring. 3 credits.
This course emphasizes developing the oral communications skills required to successfully manage conflict both as a party to a dispute, and as a third party who is charged with helping to resolve a dispute. The course presents simulations to help the participants practice their skills.

206 The Nature of Conflict
Fall or spring. 3 credits.
The purpose of the course is to provide students with the conceptual foundation to engage in further study of conflict management and conflict resolution. Having taken the course, the students will 1) be able to identify and describe types of conflict; 2) be able to identify the various sources of conflict; 3) be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflict situations; 4) be able to describe conflict situations in terms of social psychological aspects utilizing a "person perception" or "attribution" theoretical orientation; 5) be able to identify their personal response styles to conflict.

208 Workplace Negotiations
Fall or spring. 3 credits.
Will cover the theory and practice of negotiation as it applies to workplace and business situations. Students will be exposed to theoretical models of negotiation and will participate in negotiation exercises. Students will be participating in two negotiation exercises and will be asked to write a paper on their negotiating position in each exercise. More weight will be given in grading to the student's ability to present a well-thought-out rationale for positions and tactics than to the outcome of the negotiation itself.

241 Arbitration
3 credits.
A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of an arbitration hearing, and the preparation of an arbitration opinion.

242 Public Sector Collective Bargaining
Fall or spring. 3 credits.
This course is designed as an introduction to collective bargaining in the public sector. The course examines the historical development of bargaining in public employment, the evolution of state and federal and bargaining theory and practices, as well as impasse resolutions techniques frequently found in this sector. Special emphasis will be given to developing an understanding of the similarities and differences between public and private sector bargaining and how they have affected tactics and strategies employed by the parties.

243 Growth of American Business and Management History
Fall or spring. 3 credits.
The growth and cycles of American business enterprise produced significant changes in education, government, work, the family, the ethnic composition of the population, and the landscape. As business and industry expanded, new methods evolved for managing these enterprises. This course will examine the development of managerial practices, the relationship of management to the work force, and the social ramifications of capitalist expansion.

245 Public Sector Labor Law
3 credits.
A survey and analysis of the New York State Public Employees Fair Employment Act is made as well as a comparison with other state laws covering public employees. The course will examine the extent to which the law protects and regulates concerted actions by employees in the public sector. The intent is to study and understand the law as written, but more importantly how it has been interpreted by the courts of New York State in its application. Major emphasis will be employee and employer rights, including recognition and certification, improper practices, strikes, grievances, and disciplinary procedures of the New York State Public Employment Relations Board.

247 Labor and the American Economy
3 credits.
Will help the student understand how economic theories relate to the economic problems confronting the American citizen in general and the American union member in particular. Emphasis will be placed on contemporary economic theories and how their proponents attempt to solve American economic problems.

248 Employment Practices Law
3 credits.
Considers laws and regulations that impact directly on managers and employers. Students will examine issues and laws such as Equal Employment Opportunity, Employee Retirement Income Security Act, Federal Wage and Hour Laws, Occupational Safety and Health Act, unemployment laws and other topics. Students will focus on the practical application of laws and their impact on the workplace.

250 New York Workers' Compensation Law for Trade Unionists and Injured Workers
Fall or spring. 3 credits.
There is a collective perception that the Worker's Compensation system in New York compounds an injured personal predicament with Byzantine responses that lead to despair. Unions and injured workers' organizations believe that, if properly empowered, they can be just as effective as lawyers in looking after their injured colleagues' claims. This course is structured to meet both of these realities. We will delve into every nook and cranny of New York Worker's Compensation law. The course will be entirely practical. Skills teaching, how to present a case, decorum, ethics, and persuasiveness, are built into the course. Experts on how the system really works will also be used.

251 Principles and Practices of Management
Fall or spring. 3 credits.
Presents the theory and processes of management with an emphasis on supervision. Management functions of planning, organizing, staffing, and evaluating are included. Concepts and theories are presented, and case studies are analyzed. Motivating people, exercising leadership, and effectively developing employees are emphasized.

252 Contract Bargaining
Fall or spring. 3 credits.
Examines the principles of contract bargaining, including bargaining environments and structures as well as standards used in bargaining. Students will learn to prepare bargaining demands, cost economic items, draft noneconomic contract language, negotiate economic and noneconomic issues, and resolve a contract bargaining impasse. The course will consider the impact of contract bargaining outcomes on workers, unions, employers, and the public.

253 Contract Administration
Fall or spring. 3 credits.
Focuses on the role of the steward in administering the union contract in the workplace. Students will evaluate grievance and arbitration contract clauses, the grievance procedure in practice, the role of the union steward, the role of local and international unions, negotiation of grievances, and preparation for arbitration. Students will analyze the impact of grievance and arbitration procedures on workers, unions, and employers.

254 Labor Law
Fall or spring. 3 credits.
Examines the principles of labor law by looking at social philosophy and the historical context of federal labor legislation from the 1930s. Students will concentrate on major provisions of the National Labor Relations Act, examining how the National Labor Relations Board and the federal courts have interpreted the national labor laws. Discussion will include new directions in labor legislation and interpretation with consideration given to the impact of labor law on workers, unions, and employers.

255 Labor History
Fall or spring. 3 credits.
Reviews American labor history from the prespective of workers' social dimensions of the development of the working class, reform and revolutionary movements, and the emergence of craft, industrial, and public employee unions. Included will be a discussion of the development of trade union institutions and leaders and the evolution of union political activities and collective bargaining. Special attention will be paid to the involvement of women and minority workers with unions.

256 Dispute Resolution
Fall or spring. 3 credits.
Examines third-party participation in dispute resolution in private and public sector collective bargaining. Development of dispute resolution methods in American labor relations; issues and practices in neutral, binding arbitration of grievances and mediation; conciliation; and fact finding procedures will be discussed. We will also look at exclusive labor-management mechanisms to settle industry disputes.

257 Human Resource Administration
Fall or spring. 3 credits.
Designed to provide an overview of personnel practices in the modern organization. It will focus on manpower planning, employment, training and development, motivation and compensation, and performance appraisal and communication for students who are currently supervisors or personnel practitioners or for those aspiring to those positions.

258 Organizational Behavior
Fall or spring. 3 credits.
Designed to illustrate how behavioral science theory leads to research and how theory and research provide a basis for practical application in business, industry, education, and government.

259 Union Administration
Fall or spring. 3 credits.
Focus is on the principles and practices of effective union administration. Students will study the dynamics of democratic organizations and the development of organizational leadership. The course explores alternative methods of decision making and lines of responsibility. The legal obligations of unions and union officials will be discussed and analyzed. The course also examines the structure and evolution of relationships inside the labor movement.

262 Project Management
Fall or spring. 3 credits.
Through the process of restructuring, many companies are "flattening out" the hierarchy of management levels. This means that more responsibilities are shifting downward to employees who may not have the status (authority) of supervisor or manager, but who have the enormous responsibility of completing complex, critical projects within well-defined business constraints. In response to the shift in responsibility downward and with much more to be accomplished with limited resources, the demands for employees with effective project management skills are increasing. Employees who can successfully manage projects are and will continue to be the most marketable individuals in the work force because their skills are transferable to all disciplines, organizations, and situations.

264 Contemporary Labor Problems
Fall or spring. 3 credits.
A survey of the major challenges that confront the American labor movement. Students are briefed on the background of each problem and discuss and analyze a broad range of solutions proposed by the experts.

266 Professional Writing: The Power of the Written Word in Business
3 credits.
Focuses on the importance of developing effective writing skills and strategies required to be successful in business communities. Students will sharpen existing writing skills, correct bad writing habits, and develop new writing habits through "real life" exercises taken from case studies and their own experiences. In addition, they will learn the importance of using rhetorical strategies such as defining situations requiring written responses, writing to a specific audience, attending to a specific purpose, choosing the appropriate language, and varying tone and style as the situation demands. Students, upon completing this course, will have the confidence and the writing skills to successfully address most situations requiring written communication. Genres include memos, proposal letters, and reports.

267 Speaking and Listening for Business and the Professions
3 credits.
The overall objective is to equip participants with the skills and knowledge they need to speak and listen effectively. By the end of the course, students will be able to accurately listen to, and interpret oral communication; identify major causes of listening misunderstandings such as biases, distractions, emotions, etc.; describe and employ techniques for overcoming those listening barriers; speak effectively in front of an audience; describe ways to build rapport with an audience; persuade an audience; use visual aids effectively; introduce speakers, make presentations, and speak extemporaneously.

269 The Evolution of Work in America
Fall or spring. 3 credits.
Explores the evolution of contemporary business operations. Discussion will focus on historical and present-day theories of work organization, changes in the workplace and workforce, and future trends. The relationships between businesses and the societies in which they exist, in both local and global economies, will also be examined.

343 Health in the Workplace
Fall or spring. 3 credits.
Examines the state and federal laws that affect job safety, and health, and the way workers and their unions can use legislation to promote safe and healthy working conditions. Topics include safety and health standards; the enforcement of laws and standards; the responsibilities of management; the rights of employees and their unions, including the rights to information; collective bargaining for safety and health; racial- and gender-based discrimination regarding hazardous work; and drug testing.

344 Union Strategies for Safety and Health
Fall or spring. 3 credits.
Even with OSHA, the most effective tool for change in the unionized work environment remains the collective bargaining process and collective action. This course explores specific strategies for making the workplace safer through collective bargaining, workers education, safety and health committees, joint labor-management committees, working with COSH groups, union-sponsored medical exams at occupational health clinics, and the OSHA complaint process. Case studies will consider integration of occupational health initiative into broader union strategies such as organizing drives and industrial development planning.

345 Health Hazards Identification and Evaluation in the Workplace
Fall or spring. 3 credits.
Students will learn about the many work site health hazards including toxic chemicals, biological agents, radiation, and electromagnetic fields. Routes of exposure, acute and chronic health effects, and the bases of regulatory exposure limits such as TLV's and OSHA PEL's will be discussed. Basic hazard evaluation and information gathering techniques will familiarize students with available resources for evaluating work site conditions.

346 Introduction to Industrial Hygiene: Hazard Evaluation and Control
Fall or spring. 3 credits.
This course builds on the knowledge acquired in both the safety hazard and health hazard courses to provide students with greater mastery of hazard evaluation and control methods. (Students are encouraged to complete the health hazard and safety hazard courses before taking industrial hygiene.) It will provide practical, hands-on training in evaluating potential worksite hazards.

Students will learn about environmental monitoring methods such as air sampling and become familiar with the commonly used equipment. They will also learn to interpret and evaluate monitoring data provided by professional testers.

347 Safety Hazards Identification and Evaluation in the Workplace
Fall or spring. 3 credits.
Safety hazards (as opposed to health hazards) generally involve harm of an immediate and sometimes violent nature; health effects include burns, electrical shock, broken bones, and the loss of limbs, eyesight, or hearing. With chemicals, the primary concern is their explosive, reactive, or flammable nature rather than with the toxic effects that are the focus of health hazard evaluation. Students will become familiar with site inspection and hazard identification methods and will learn about control techniques appropriate for a variety of work settings.

364 Labor, Government, and Politics
3 credits.
A survey of the ways the American political system affects labor and how organized labor affects the system through voting, political parties, and interest groups.

367 Safety and Health in the Workplace
Fall or spring. 3 credits.
To provide basic education and training in workplace safety and health. The course will focus on applicable federal and state laws, standards for safety and health, industrial hygiene, and such health concerns as asbestos, radon, and AIDS. Practical experience will be provided through workplace walk-through safety and health inspections and in use of industrial hygiene equipment that measure noise, temperature, humidity, airflow, and airborne toxics.

FACULTY ROSTER

Abowd, John M., Ph.D., U. of Chicago. Prof., Labor Economics
Angellotti, Jon E., MS candidate, Cornell U. Social Statistics
Bacharach, Samuel, Ph.D., U. of Wisconsin. Jean McKelvey-Alice Grant Prof. of Labor Management Relations, Organizational Behavior
Batt, Rosemary, Ph.D., Mass. Inst. of Technology. Asst. Prof., Human Resource Studies
Bishop, John H., Ph.D., U. of Michigan. Assoc. Prof., Human Resource Studies
Blau, Francine D., Ph.D., Harvard U. Francis Perkins Prof. of Industrial and Labor Relations, Labor Economics
Boudreau, John W., Ph.D., Purdue U. Assoc. Prof., Human Resource Studies
Boyer, George R., Ph.D., U. of Wisconsin. Prof., Labor Economics
Briggs, Vernon M., Jr., Ph.D., Michigan State U. Prof., Human Resource Studies
Bunge, John A., Ph.D., Ohio State U. Assoc. Prof., Social Statistics
Cavanaugh, Marci A., U. of Minnesota. Asst. Prof., Human Resource Studies
Cook, Maria L., Ph.D., Univ. of Calif., Berkeley. Assoc. Prof., Collective Bargaining, Labor Law, and Labor History
Cowie, Jefferson R., Ph.D., U. of North Carolina—Chapel Hill. Visiting Asst. Prof., Collective Bargaining Labor Law and Labor History
Daniel, Cletus E., Ph.D., U. of Washington. Prof., Collective Bargaining, Labor Law, and Labor History
DeVault, Ileen A., Ph.D., Yale U. Assoc. Prof., Collective Bargaining, Labor Law, and Labor History
DiCiccio, Thomas J., Ph.D., U. of Waterloo. Assoc. Prof., Social Statistics
Dyer, Lee D., Ph.D., U. of Wisconsin. Prof., Human Resource Studies
Ehrenberg, Ronald, Ph.D., Northwestern U. Irving M. Ives Professor of Industrial and Labor Relations and Economics, Labor Economics
Farley, Jennie T., Ph.D., Cornell U. Prof., Extension
Fields, Gary S., Ph.D., U. of Michigan. Prof., Labor Economics
Gold, Michael E., LL.B., Stanford U. Assoc. Prof. Collective Bargaining, Labor Law, and Labor History
Gross, James A., Ph.D., U. of Wisconsin. Prof., Collective Bargaining, Labor Law, and Labor History
Hadi, Ali S., Ph.D., New York U. Prof., Social Statistics

Wright, Patrick M., Ph.D., Michigan State U. Assoc. Prof., Human Resource Studies

LAW SCHOOL

ADMINISTRATION

Lee E. Teitelbaum, dean of the law faculty and professor of law

John A. Siliciano, associate dean for academic affairs and professor of law

Gary J. Simson, associate dean for faculty development and professor of law

Anne Lukingbeal, associate dean and dean of students

Richard D. Geiger, associate dean and dean of admissions

Harry B. Ash, assistant dean for development and public affairs

Charles D. Cramton, assistant dean for alumni and international affairs

Gihan S. Fernando, assistant dean for student services

Richard F. Robinson, assistant dean for administration and finance

Nan A. Colvin, registrar

LAW SCHOOL

The primary function of the Law School is to prepare attorneys for both public and private practice who will render the highest quality of ethical and professional service to their clients and who will further legal progress and reform. The curriculum is designed to prepare students for admission to the bar in all American states and territories.

Ordinarily, a student who is admitted to the Law School must have a baccalaureate degree from an approved college or university. The course of study leading to the degree of Doctor of Law (J.D.) covers three academic years. Students may be admitted to a program of study leading to the degree of Doctor of Law "with specialization in international legal affairs." The Law School also offers to a limited number of students an opportunity to earn both a J.D. degree and an LL.M. degree in international and comparative law.

There are combined graduate degree programs with the Johnson Graduate School of Management, the Department of City and Regional Planning of the College of Architecture, Art, and Planning, the School of Industrial and Labor Relations, the graduate divisions in economics, history, and philosophy of the College of Arts and Sciences, and the Université de Paris I (Pantheon-Sorbonne), as well as a special opportunity for highly qualified undergraduates in the College of Arts and Sciences to register in the Law School during their senior year.

Each year the graduate program of the Cornell Law School admits a limited number of students, generally all from abroad. The LL.M. degree (Master of Laws, Legum Magister) and the J.S.D. degree (Doctor of the Science of Law, Jurisprudentiae Scientiae Doctor) are conferred. A small number of law graduates may also be admitted as special students, to pursue advanced legal studies without seeking a degree.

For further information, refer to the Law School catalog, which may be obtained from the Office of the Registrar, Myron Taylor Hall.

FIRST-YEAR COURSES

LAW 500 Civil Procedure
Fall and spring. 6 credits. K. M. Clermont, B. J. Holden-Smith, J. J. Rachlinski, F. F. Rossi.
An introduction to civil litigation, from commencement of an action through disposition on appeal, studied in the context of the federal procedural system. Also, a detailed consideration of federalism and ascertainment of applicable law; jurisdiction, process, and venue; and former adjudication.

LAW 502 Constitutional Law
Fall. 4 credits. K. A. Abrams, S. L. Johnson, G. J. Simson, I. P. Stotsky.
A study of basic American constitutional law, including judicial review, some structural aspects of the Constitution as developed particularly in light of the passage of the Civil War amendments, and certain of its rights provisions.

LAW 504 Contracts
Fall and spring. 6 credits. R. A. Hillman, R. S. Summers.
An introduction to the nature, functions, and processes of exchange, contract, and contract law. The course focuses on the predominant rules and principles governing contract and related obligation, including the substantive reasons underlying the rules and principles.

LAW 506 Criminal Law
Spring. 4 credits. S. P. Garvey, D. N. Yellen.
An introductory study of the criminal law, including theories of punishment, analysis of the elements of criminal liability and available defenses, and consideration of specific crimes as defined by statute and the common law.

LAW 508 Legal Methods
Fall and spring. 4 credits. P. Anderson, D. A. French, C. Grumbach, T. Harris-Abbott, B. S. Williams.
Legal methods is a full-year skills course designed to introduce first-year students to the techniques of research, analysis, and writing that are necessary in legal practice. Instruction in the fall semester focuses on legal research and the written communication of objective legal analysis. Students complete a series of research and writing assignments that develop and test their skills in these areas. Instruction in the spring semester focuses on written and oral advocacy. In the context of a simulated civil or criminal trial, students complete the necessary research and then draft and rewrite a trial or appellate brief advocating their client's position on one or more legal issues. The spring semester culminates with a moot court exercise designed to introduce the students to the techniques and logistics of oral advocacy in a courtroom setting. Instruction occurs in small sections of approximately 30 students and in individual conferences. Each student receives extensive editorial and evaluative feedback on each written assignment.

LAW 512 Property
Spring. 4 credits. G. S. Alexander, E. Sherwin.
An investigation of the law's protection of ownership, including the beginnings of property, legal and equitable estates, concurrent ownership, and public and private regulation of land use.

LAW 515 Torts
Fall. 4 credits. G. A. Hay, J. A. Henderson, Jr., J. A. Siliciano.
An introduction to the principles of civil liability in the tort field: intentional wrongs, negligence, and strict liability. Attention is also given to the processes by which tort disputes are handled in our legal system.

UPPERCLASS COURSES

LAW 602 Administrative Law: The Law of the Regulatory State
Fall or spring. 3 credits. C. R. Farina, J. J. Rachlinski.
An introduction to the constitutional and other legal issues posed by the modern administrative state. Topics include: procedural due process, separation of powers, procedural modes of administrative policymaking; judicial review of agency action; the oversight and control relationships between agencies and Congress or the President. The course provides a working familiarity with the fundamentals of administrative procedure, as well as a larger inquiry into the role of agencies in our constitutional system—and the effect of legal doctrine on shaping that role.

LAW Advanced Civil Procedure
3 credits. Offered as a seminar in 1999–2000.
A study of complex civil litigation involving multiple parties and multiple claims. Topics include joinder of parties and claims, impleader, interpleader, class actions, and intervention. Consideration of case management, the Civil Justice Reform Act of 1990, multidistrict transfers in the federal courts, and the use of alternative procedures for disposition of cases.

LAW 604 Alternative Dispute Resolution: Mediation as a Nontraditional Approach to Litigation
Fall. 2 credits. Limited enrollment. J. Meyer.
This seminar will emphasize mediation as a nontraditional, cutting-edge alternative to the traditional litigation process. The seminar will introduce students to the spectrum of ADR processes, but will emphasize mediation as both a concept and a set of skills. The process of mediation will be explored through readings, videotapes, simulations, and role-playing exercises.

LAW 608 American Indian Law
Spring. 2 credits. Recommended prerequisite: Administrative Law and Public International Law. J. Tahsuda.
An examination of the primary themes and materials of the federal law concerning Native American tribes and individuals. The course devotes considerable attention to the historical development of law and policy in that area and to the present division of authority over Indian country among federal, state, and tribal governments.

LAW 609 American Legal History: From the Revolution to the Civil War
Fall. 3 credits. A. S. Konefsky.
This course focuses on the development of American law in the century from 1760 to 1860. Transitions in the legal ideology of the period will be examined, including the reception of the common law in America, the influence of the American Revolution on beliefs about the nature of law, shifts in forms of legal reasoning, changes in the legal profession, and the rise of the codification movement. In turn, resulting changes in legal doctrine in areas including contract, tort, and property will be studied for their impact on private and public economic activity.

LAW 610 Antitrust Law
Spring. 2 or 3 credits. Students who have taken an antitrust course in the Paris Program may take this course for 2 credits. G. A. Hay.
A consideration of the basic antitrust rules enacted by Congress and amplified by the courts to protect competitive markets and limit the exercise of monopoly power. Price fixing, boycotts, and market allocation agreements among competitors; agreements between suppliers and customers; joint ventures; attempts to monopolize and monopolization; price discrimination; and mergers.

LAW 611 Arbitration
Spring. 2 credits. Preference given to students to have previously taken Evidence. Limited enrollment. R. K. Hull.
Arbitration is the principal method of resolving disputes between unions and employers, between securities brokers and their clients, and under international business agreements, and is gaining favor in many other areas. This course will familiarize students with arbitration practice in a variety of fields, through the use of simulation exercises, role playing, and discussion of readings and videotapes. Class exercises will focus on practical skills, including case preparation, preliminary hearings, all phases of case presentation, and post-hearing briefs. The practical distinctions between arbitration and traditional litigation will be noted throughout.

[LAW Banking Law and Regulation
3 credits. Not offered 1999–2000.
The course begins by defining the roles that banks and other financial intermediaries play in the economy. It considers the claim that a specialized set of regulations governing the activities of financial intermediaries is justified by the special role banks occupy in society. In that context a variety of theoretical arguments about banking regulation are considered. The course then examines each of the major laws that govern banking activities against the background of the various regulatory theories discussed. Topics addressed include entry restrictions, growth and expansion of bank activities, regulation of the business of banking, expansion through the bank holding–company structure, branch banking, interstate banking, and regulation of failing or failed banks.]

LAW 613 Bankruptcy
Fall. 3 credits. Prerequisite: Students who have taken Debtor-Creditor Law are ineligible for this course. T. Eisenberg.
Selected topics in the law of bankruptcy. An overview of the various bankruptcy chapters and a detailed study of the bankruptcy provisions of most general applicability. The relationship between the rights of an Article 9–secured creditor and the bankruptcy trustee's power to avoid liens. Related topics in the enforcement of money judgments and the law of fraudulent conveyance.

[LAW Business Combinations
2 credits. Not offered 1999–2000.
This course examines the principal business, legal, and accounting issues in the purchase and sale of privately and publicly held businesses. Emphasis is placed on the negotiation, structuring, financing, and documentation of the most common type of combining transaction—the acquisition of assets of a privately held company. Among the legal issues considered are the business and other reasons for selling or buying a business, the forms of business combinations, directors' duties, successor liability, securities regulation, tax, and antitrust. Additional issues surrounding acquisitions of publicly held companies (including hostile takeovers) are studied principally for comparison. The responsibilities of transactional lawyers to persons other than their clients are also assayed.]

LAW 615 Children, Parents, and the State
Spring. 2 credits. L. Teitelbaum.
This course explores legal and social understandings of the rights of children, parents, and the state with respect to issues such as access to and control over the content of education, authority regarding health care, claims to speech and expression, and procreative decisions. The course also examines the operation of rights in connection with juvenile court jurisdiction over neglect and abuse, delinquency, and status offenses.

[LAW Civil Rights Legislation
3 credits. Not offered 1999–2000.
Explores in depth the history and current status of federal civil rights legislation. The course focuses on 42 U.S.C.§1983, the dominant vehicle for vindication of constitutional rights in civil cases, and on Title VII of the Civil Rights Act of 1964, the principal federal statute covering employment discrimination.]

LAW 616 Commercial Law
Spring. 3 credits. W. F. Taylor.
Examines a variety of commercial dealings and focuses on Articles 2 and 3 of the Uniform Commercial Code, with some coverage of other Articles and the Convention on Contracts for the International Sale of Goods. The course is designed to give students an understanding of commercial statutes and to inform them about many of the underlying commercial transactions to which the law relates.

LAW 617 Comparative Labor Law
Fall. 3 credits. X. Blanc-Jouvan.
This course compares labor and employment law in France and the United States and surveys more briefly labor-market regulation in Canada, Germany, Japan, and the European Union. It provides an overview of the labor- and employment-law systems of each country and then examines selected topics from a comparative perspective. Specific topics that receive comparative treatment include unjust dismissal, employment discrimination, the right to organize labor unions, the right to strike, and worker voice through collective bargaining and other mechanisms.

LAW 618 Comparative Law
Fall. 3 credits. Prerequisite: basic common law. B. A. Rudden.
The course tackles first the sources, structures, and assumptions common to the legal systems of continental Europe, Latin America, and some countries of the Far East, and then examines the enduring divisions of their private law. Particular examples are then studied and may be grouped under a topic (e.g., the liability of the post office or the problem of the injured rescuer) or by country (e.g., French contract law, Roman and German tort law). The course aims to demonstrate the utility of the comparative method by encouraging students to rethink their own law in the light of other approaches. This enables students to see how problems may sometimes be solved by breaking the categories in which they are embedded in a given system, and thus to gain a better understanding of the reasons for the rules.

LAW 619 Conflict of Laws
Fall. 2 credits. G. J. Simson.
A study of the methods used by courts to decide the applicable law in cases that, in their parties or events, involve more than one state or country. Attention to the due-process limitations on jurisdiction, a state's obligation under the full-faith-and-credit clause to respect sister-state judgments, and conflicts between federal and state law.

LAW 620 Constitutional Law II: The First Amendment
Spring. 3 credits. S. H. Shiffrin.
A comprehensive discussion of freedom of speech, press, and association. The free-exercise-of-religion clause and the establishment clause of the First Amendment are treated less extensively.

[LAW Constitutional Remedies
2 credits. Not available to students who have taken Civil Rights Legislation. Not offered 1999–2000.
Explores in depth the history and current status of 42 U.S.C.§1983, the major statutory vehicle for vindication of constitutional rights in civil cases.]

LAW 622 Copyright
Fall. 3 credits. P. W. Martin.
Copyright law has become increasingly important as the American economy has shifted from a predominantly manufacturing economy to an information economy. This course provides students with a comprehensive overview of the U.S. copyright law. It begins with coverage of the substantive and procedural requirements for qualifying for copyright protection, then provides an in-depth study of the rights granted to authors under this law, the standards for judging copyright infringement, public policy

limitations on the scope of copyright interest (such as the fair use defense), and remedies available to successful litigants. Issues raised by new information technologies and recent amendments addressing them receive special attention. Partly as an aid for understanding United States law better and partly because copyright law is of increasing international importance, the course also provides some comparative and international copyright law components. In addition, it touches on issues of trademark and right of publicity law as they overlap or complement copyright.

LAW 625 Corporations
Fall or spring. 4 credits. F. S. Kahn, J. R. Macey.
An introduction to the business corporation laws affecting the rights and roles of corporate boards of directors, senior executive officers and shareholders, with an emphasis on large, publicly traded firms. Shareholders' economic interests are examined from the perspective of limited liability and dividend standards, expectations of liquidity or transferability of shares and the use of debt capital as a mode of financing corporate activity. Shareholders' limited participation rights in corporate decision making are examined from the perspective of state and federal rules governing shareholder voting and the disclosure of corporate information and the notion of managerial expertise (e.g., as evidenced by judicial application of the "business judgment rule"). The latter part of the course focuses on directors' and officers' fiduciary obligations to shareholders, examining the operation of these duties in a variety of settings and transactions. Issues relating to the roles and functions assumed by corporate attorneys (with respect to their clients) and the role of business corporations within society are also addressed. No previous business knowledge is assumed.

LAW 627 Criminal Procedure
Fall. 3 credits. J. H. Blume.
This course surveys the law of criminal procedure, with emphasis on the constitutional constraints that regulate the pretrial stage of the criminal process. More specifically, the course focuses on the law of interrogations and confessions, the admissibility of evidence, and on the right to counsel throughout all stages of the criminal process.

[LAW Current Topics at the Crossroads of Law and Finance [also NBA 551]
3 credits. Not offered 1999–2000.
Financial institutions of all kinds, whether they are formally known as insurance companies, banks, investment banks, mutual funds, or pension funds, invest money on behalf of clients in a wide variety of investment vehicles. This course will look at the way that these financial institutions are treated from both a legal and an economic perspective. Emphasis will be placed on the intersections between modern financial theory and legal analysis. Topics to be covered include insurance, bank regulation and reform, securities markets, investment banking, and pensions.]

[LAW Death Penalty in America: A Survey
1 credit. Not offered 1999–2000.
The course will survey the law relating to the administration of the death penalty.]

[LAW Debtor-Creditor Game
3 credits. Prerequisite: Prior enrollment in Secured Transactions or Debtor-Creditor Law or concurrent enrollment in one of those courses and permission of the instructor. Limited enrollment. Not offered 1999–2000.
Advanced debtor-creditor law including Chapter 11 of the Bankruptcy Code, bankruptcy procedure, negotiation techniques, and case strategy.]

LAW 630 Directed Reading
Fall or spring. 1 or 2 credits. A two-credit directed reading may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Registrar.
An examination of a topic through readings selected by arrangement between the instructor and an individual student or group of students (not exceeding eight).

LAW 633 Employment Law
Fall. 3 credits. D. Avery.
Survey of major statutory schemes, constitutional principles, and common law doctrines that affect the employer-employee relationship in the public and private sectors, other than laws regulating union formation and collective bargaining which are covered in Labor Law. Topics covered include unjust dismissal, drug testing, free speech, privacy, and antidiscrimination laws. In addition, the course will provide an overview of major statutory schemes affecting the terms and conditions of employment, such as workers' compensation, the Fair Labor Standards Act, and the Occupational Safety and Health Act.

[LAW Entertainment Law
2 credits. Not offered 1999–2000.
This course explores several areas within the broad field of entertainment law. Topics include contract law, labor, antitrust, the role of agents, personal and privacy rights, literary and music publishing, sound recordings, films, and television.]

LAW 636 Environmental Law
Spring. 3 credits. J. J. Rachlinski.
The course surveys the major environmental law with a primary focus on federal statutes (CERCLA, RCRA, NEPA, the Clean Water Act, the Clean Air Act, and the Endangered Species Act). The course lays out the various governmental tools used to address the problems of environmental degradation and discusses the value of these tools. Special attention is paid to the economic, social, and political obstacles to efficient regulation of the environment.

[LAW Estate and Gift Taxation
3 credits. Prerequisite: Federal Income Taxation. Not offered 1999–2000.
This course surveys the three federal taxes imposed on wealth transfers: the estate tax, the gift tax, and the generation-skipping tax. The course uses a problem-oriented approach, with emphasis on the Internal Revenue Code, regulations, and other tax materials.]

LAW 640 Evidence
Fall or spring. 3 credits. S. D. Clymer, F. F. Rossi.
The rules of evidence in civil and criminal cases with emphasis on relevance, authentication, witnesses, experts, and hearsay. The course focuses on the Federal Rules of Evidence, with some attention to how they diverge from the common law.

LAW 641 Family Law
3 credits. M. A. Fineman.
Broadly understood, family law is the study of state imposed rules regulating intimacy and intimate relationships in society. Consideration of the legal regulation of intimate relations collapses traditional law school distinctions such as those drawn between "civil" and "criminal" or "public" and "private" mechanisms for control of behavior. The laws that effect family formation and dissolution are many and varied. They reach deep into our lives, influencing as well as being influenced by our assumptions and beliefs about what is "natural" and "normal." In this course we will use scientific and social scientific information to explicitly evaluate some of those assumptions and beliefs, and to call into question the appropriateness of a number of current state laws regulating families. We will examine the evolution of our society's understanding of and expectations for marriage, as well as shifts over the past several decades in the nature of and justification for state regulation of that institution. Substantial attention also will be paid to the social and legal consequences of marriage dissolution, including an examination of the imposition of a gender neutrality-gender equality model in the divorce context. The imposition of this model has resulted in a transformation of the legal rules governing distribution of property and allocation of custody and control over children with some problematic consequences. Topics to be considered include: definitions, policy and trends in American family law, the regulation of marriage, the legal significance of marriage: rights and obligations, private ordering within the marital context, nonmarital relationships - rights and obligations, divorce and divorce substitutes, spousal and child support obligations, marital property and theories of marital equality, rights to children.

LAW 643 Federal Courts
Spring. 4 credits. Prerequisite: Constitutional Law and second semester of Civil Procedure. Students without such background should consult with instructor. C. R. Farina.
An intensive examination of the federal courts and their constitutional and statutory role in the federal system. The relationship of the federal courts with the other branches of the federal government and with the states, and the relationship between state and federal law. Case-or-controversy problems, the allocation of jurisdiction between state and federal courts, federal question and diversity jurisdiction of the district courts, and limitations thereon. The course is strongly recommended for anyone planning a judicial clerkship.

LAW 644 Federal Income Taxation
Fall or spring. 4 credits. Limited enrollment. T. Eisenberg, E. M. Jensen.
A basic course designed to develop understanding of tax concepts and ability to work effectively with the Internal Revenue Code, regulations, cases, and other tax materials.

LAW 646 Feminist Legal Theory
Fall. 3 credits. M. A. Fineman.
This course provides an introduction to feminist legal theory. During the semester we will consider the historical stages, as well as current and emerging contours, of feminist theory in law. There will be some comparison of feminist legal theory with allied intellectual movements such as critical race theory. The last part of the course will look at

applied feminist legal scholarship in the areas of (1) the economic subordination of women, (2) the sexual subordination of women, and (3) motherhood and reproduction.

LAW 647 Health Law
Fall. 3 credits. L. I. Palmer.
This course examines the role of law and policy in the health care industry. Students will be invited to take a "systems approach" to the study of the role of law in arriving at coherent policy solutions for a host of dilemmas facing a rapidly evolving industry. Students will be asked to consider if a particular statute, regulation, or judicially crafted legal doctrine is consistent with new developments or any public policy towards health care. Topics covered include: access to health care; purchasing health care; commercialism vs. professionalism; the antitrust challenge to professional dominance; changing institutional providers; and public and industry-sponsored quality control.

LAW 648 Injunctions
Fall. 3 credits. Prerequisite: Two semesters of Civil Procedure. Students without such background should consult with instructor. Limited enrollment. Satisfies the first or second writing requirement. C. R. Farina.
The course integrates theory and practice in focusing on the availability and use of the injunction, an increasingly important remedial tool in both public-interest and private-section litigation. Coverage includes the substantive and procedural prerequisites for obtaining interlocutory and permanent injunctions, permissible scope and timing, the types and incidents of contempt, and the duties of those enjoined. Special consideration is given to the use of the injunction as a remedial tool for federal courts in public law litigation. The substantial writing component involves several drafting exercises based on real case studies of recent injunctions requests.

LAW 650 Insurance
Spring. 3 credits. J. A. Henderson, Jr.
Insurance is an increasingly important tool for the management of risk by both private and public enterprises. This course provides a working knowledge of basic insurance law governing insurance regulation; risk classification; property, commercial, and liability insurance; and claims processes. The emphasis throughout the course is on the link between traditional insurance law doctrine and modern ideas about the function of private law.

[LAW Intellectual Property
3 credits. Not offered 1999–2000.
An introduction to the domestic and international context of intellectual property law with a review of state and federal law relating to intellectual property, principally copyright, patent, and trademark law. Intellectual property issues raised by new information technologies are emphasized throughout the course.]

LAW 652 International Business Transactions
3 credits. J. J. Barceló III.
An examination of the unique legal features of business transactions across national boundaries. The first half of the course deals with the private law of international transactions. The topics covered include: choice of law in the U.S. and Europe concerning international sales; the U.N. Convention on the International Sale of Goods; financing international transactions through letters of credit; and international dispute settlement (litigation and arbitration). The second half of the course deals with public regulatory law, including an overview of the World Trade Organization (WTO/GATT) with some attention to the trade-environment conflict; fair and unfair trade rules (escape clause, subsidies and countervailing duties, and antidumping); the trade consequences of intellectual property rights; and international antitrust.

LAW 653 International Commercial Arbitration
Fall. 3 credits. J. J. Barceló III, D. Ridgway.
A study of arbitration as a dispute resolution process for international trade and business disputes. The course analyzes ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreements to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, and enforcement of international arbitral awards. The course gives special attention to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. It will focus on commercial arbitration as an international phenomenon and not on arbitration under any particular national system.

LAW 655 International Human Rights
Spring. 3 credits. D. Wippman.
This course explores the development and effectiveness of international legal rules governing the conduct of a state toward people within its jurisdiction. Topics include the substantive norms of human rights, and their philosophic basis; the mechanisms for the protection of human rights, such as the United Nations, specialized agencies, international humah rights commissions, and domestic courts; and current issues such as the doctrine of humanitarian intervention, the status of indigenous peoples, and human rights during armed conflicts, illustrated where possible through case studies of current situations.

[LAW International Protection of Intellectual Property
2 credits. Recommended prerequisite: Intellectual Property. Not offered 1999–2000.
This course studies intellectual property rights in the international legal system. A general introduction reviews the international protection of patents, trademarks, industrial design, and copyright. The starting and focal point is the Agreement on Trade Related Aspects of Intellectual Property (TRIPS) adopted in the framework of the World Trade Organization (WTO). The international protection of intellectual property is studied through consideration of the TRIPS agreement and the several international conventions the observation of which is made mandatory for WTO Members by TRIPS. Also examined are issues of international court jurisdiction and applicable law in the area of intellectual property.]

LAW 656 Introductory Jurisprudence
Fall. 3 credits. Not available to students who have taken Legal Process. S. P. Garvey.
An introduction to contemporary schools of legal and political theory. The schools of legal theory examined include positivism, natural law, legal realism, legal process, and critical legal studies. The schools of political theory examined include liberalism, libertarianism, communitarianism, feminism, and critical race theory.

LAW 657 Issues in Professional and Organizational Ethics: Secrecy and Whistle Blowing
Fall. 3 credits. K. Clark.
This course explores the obligations facing persons who possess confidential information in a variety of legal contexts (e.g., lawyer-client relationships; government and corporate employment; trade secrets; and military information). It also examines the extent of and limitations on whistle blowing options available to lawyers and other professionals.

[LAW International Taxation
3 credits. Prerequisite: Federal Income Taxation. Not offered 1999–2000.
This course examines the U.S. income tax treatment of foreign investment and business operations in the United States, as well as the treatment of U.S. investment and business operations abroad. The course focuses on international tax jurisdiction and on the methods by which the United States relieves international double taxation, both by statute and through income tax treaties.]

LAW 660 Labor Law
Spring. 3 credits. D. Avery.
A study of collective bargaining, including the process of union formation, legal regulation of strikes and other economic weapons, negotiation and enforcement of collective agreements, the duty of fair representation, the application of antitrust law to union activity, and the relationship between federal labor law and local laws regulating the employment contract.

[LAW Law and Medicine
3 credits. Not offered 1999–2000.
This course considers legal issues related to medical care and biomedical science. Topics include constraints on access to health care, organization and financing of health services, promoting quality of care in hospitals and outpatient sites, fraud and abuse in clinical practice and biomedical research, dilemmas engendered by therapeutic applications of new technologies, and pathways to reform of the U.S. health care system. Teaching materials will comprise a law and medicine casebook, and scientific literature.]

LAW 668 Lawyers and Clients
3 credits. Satisfies the professional responsibility requirement. R. C. Cramton.
A survey and critique of (1) the law governing the practice of law and the legal profession's norms concerning the lawyer-client relationship; (2) the social functions of lawyers; (3) the modes and patterns in which legal services are or are not made available to the public; and (4) ethical theory relating to lawyer role and conduct.

LAW 669 Legal Aspects of Foreign Investment in Developing Countries
Fall. 3 credits. M. B. Ndulo.
This course will study legal aspects of foreign investments in developing countries. It will seek to identify legal problems that are likely to affect a commercial investment in a developing country. Inter alia, it will deal with the public international law principles and rules governing the establishment by foreign businesses of various factors of production (persons and capital) on the territory of other states and the protection of such investments. Thus, the course includes a discussion of the following topics: economic development and foreign capital; obstacles to the flow of investments to developing countries; guarantees to investors and investment codes; bilateral treaties; nationalization; joint ventures; transfer of technology; arbitration; investment insurance; unification of trade law; and the settlement of investment disputes.

LAW 670 Legislation
Spring. 3 credits. L. I. Palmer.
This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. Drafting exercises are used throughout the course to determine to what degree legislation can be used to reform law or to remedy particular social problems.

LAW 671 Mergers and Acquisitions
Fall. 2 credits. R. F. Balotti.
This course examines the principal business and legal issues in the purchase and sale of publicly held businesses. Emphasis is placed on the duties of directors in the acquisitions of publicly held companies (including hostile takeovers).

[LAW Negotiation
2 credits. Limited enrollment. Not offered 1999–2000.
This course is intended to develop methods and skills required for negotiation practice. Approaches to negotiation strategy formation, preparation, and conduct will be explored through discussion of selected readings and through class exercises. Students will engage in four or more mock negotiations in situations that typically involve lawyers.]

LAW 672 Negotiating the Ethical Minefield: A Young Lawyer's Guide to Safe Travel
Fall. 3 credits. L. Fox.
Virtually all law school courses teach us how to represent our clients more effectively. Only professional responsibility courses provide would-be lawyers with guidance on our own conduct. This course will attempt to answer such knotty questions as: Why lawyers have to worry more about their own clients than they do about judges, the party or lawyers on the other side? What limits are placed on our obligations of zealous advocacy? How do lawyers resolve the competing pressures from clients, society, their own consciences, and their pocketbooks? What does professional independence really mean, and can it be preserved in the twenty-first century?

LAW 675 Patent and Trademark Law
3 credits. D. Bordewieck.
This course examines federal patent and trademark law. For patent law, particular attention is given to the nonobviousness and novelty requirements; the interpretation of patent claims, the extent to which patent issues are resolved by courts rather than by juries; the doctrine of equivalents; remedies for patent infringement; and defenses to patent infringement claims. For trademark law, the course examines the various kinds of marks, symbols, product configurations, and packagings for which trademark and trade dress protection can be obtained; the need to establish secondary meaning; what constitutes likelihood of confusion; types of trademark infringement; remedies for trademark infringement; and defenses to trademark infringement claims. The course also briefly examines state trade secrets and unfair competition law. Approximately 60% of the class will be devoted to trademark law. We will not consider international issues.

[LAW Private Justice: Arbitration and Other Forms of Alternative Dispute Resolution
4 credits. Limited enrollment. Not offered 1999–2000.
Arbitration has become a major aspect of legal practice in such fields as labor law, commercial law, securities law, family law, and other areas. This course will examine the developing law of arbitration and the relationship between private arbitration and the judicial system. It will examine issues such as the enforceability of arbitration agreements, arbitral due process, judicial review of arbitration awards, and the effect of arbitration on statutory rights. It also examines other forms of alternative dispute resolution, including mediation, small claims courts, and the new mandatory arbitration requirements of some federal and state judicial systems. The course focuses on the law of alternative dispute mechanisms and includes six simulation and problem solving sessions.]

LAW 678 Products Liability
Spring. 3 credits. J. A. Henderson, Jr.
Applications of products-liability doctrine and theory to a variety of problems drawn from or closely approximating actual litigation. An overview of the relevant case law, statutes, and administrative regulations, including the new *Restatement, Third, of Torts: Products Liability.*

LAW 680 Public International Law
Fall. 3 credits. D. Wippman.
An introduction to the legal rules governing the conduct of states vis-á-vis other states, individuals, and international organizations, with reference to major current events and issues. Topics include the nature, sources, and effectiveness of international law; the establishment and recognition of states; principles concerning state sovereignty, territory, and jurisdiction; the law of treaties; state responsibility; international environmental law; and human rights. Special attention will be given to the law governing the use of force.

LAW 682 Remedies
Fall. 3 credits. E. Sherwin.
This is an overview of legal remedies and their origins, including equitable remedies, restitution, and damages. The emphasis is on private rather than public law. A considerable amount of the course is spent on the nature and history of equity.

[LAW Roman Law and Modern Civil Law Systems
2 credits. Not offered 1999–2000.
Roman law has been the most influential legal system in Western legal history. The course focuses on selected areas of Roman property, contract, and tort law in order to demonstrate two basic aspects: (1) the distinctive characteristics of classical Roman law, which was largely jurists' law that was shaped by legal experts similar to modern law professors (as opposed to statutory or judge-made law); and (2) the continuing substantive and methodological influence of Roman law in modern civil law systems, including the major impact of Roman law on the unification process of European law. Roman case law is studied in English translation and compared with legal reasoning and solutions in contemporary European (e.g., German and French) legal systems. The course also demonstrates a number of direct and indirect influences of Roman law on Anglo-American law.]

[LAW Secured Transactions
3 credits. Not offered 1999–2000.
The course explores the use of security in commercial and consumer transactions. Specific subjects include creditor remedies, default, acceleration and cure, the creation and perfection of security interests, and priority among security interests and liens. The objective is to see secured credit as a system for lending and recovering money.]

[LAW Securities Regulation
2 credits. Not offered 1999–2000.
This course examines the federal system of regulation of the offering, sale and distribution of securities, including the Securities Act of 1933 and the Securities Exchange Act of 1934. Emphasis is placed on the structure, negotiation and consummation of securities transactions as part of the capital-raising process. The responsibilities of securities professionals are also reviewed.]

LAW 683 Securities Regulation and the Regulation of Financial Intermediaries
Fall. 2 credits. J. R. Macey.
This course covers the federal rules relating to the public offering of securities, secondary market trading of securities, and the regulation of commercial banking, investment banking, and investment companies (mutual funds). Emphasis is placed on the relationship between the various forms of financial intermediation and capital formation, and on the role of these activities in corporate governance. The increasing internationalization of the capital markets, and the public policy issues related to globalization, also will be discussed.

[LAW Social and Cognitive Psychology for Lawyers
3 credits. Not offered 1999–2000.
In their short history, cognitive and social psychology have produced a rich understanding of how human beings think and how they interact with each other. It should therefore come as no surprise that these two fields have a number of applications to law. This course will explore those applications. Examples include: what effect common errors in judgment have on tort and contract law; how the perception of risk affects societal demand for regulation in environmental law; how organizational and group decision-making processes affect corporate governance; how social norms about fairness impede or

facilitate negotiation and dispute resolution; how biases in judgment influence litigation strategies; and what studies of conformity mean for the development of international human rights law. The goal of this course is to introduce students with interests in different areas of law to some general principles of human thought and social interaction that will be valuable to them in their future practice.]

LAW 684 Social Security Law: Work, Families, and Administrative Justice
Spring. 3 credits. P. W. Martin.
The course will focus especially on how social security's benefit rules relate to employment, families and household composition and how its procedures address the challenge of adjudicating the massive numbers of benefit claims that arise each year. It will introduce the general features of the Social Security Act's entitlement, benefit formulae, and procedural rules; highlight those that pose the greatest difficulty to administrators and advocates; and survey current proposals for change.

LAW 685 Sports Law
Spring. 2 credits. Recommended prerequisite: Antitrust Law and Labor Law. W. B. Briggs.
The course traces the development of sports law in the United States. Particular attention is given to the relationship of sports with antitrust and labor law. Contemporary issues involving arbitration, collective bargaining, amateur athletics, agents, torts, criminal law, and constitutional law are addressed.

LAW 687 Supervised Teaching
Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Registrar.

LAW 688 Supervised Writing
Fall or spring. 1, 2, or 3 credits. A two- or three-credit supervised writing program may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Registrar.

LAW 689 Taxation of Corporations and Shareholders
Fall. 3 credits. Prerequisite: Federal Income Taxation. E. M. Jensen.
This course examines the federal income taxation of corporate structure and transactions involving alterations in structure, including the rules governing incorporation, dividends, redemptions, liquidations, divisions, and reorganizations.

LAW 692 Trial Advocacy
Spring. 4 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath.
This course is devoted to the study of the trial. Fundamental skills are taught in the context of challenging procedural and substantive law problems. Each stage of the trial is examined: jury selection, opening, objections, direct examination, cross-examination, impeachment, expert witnesses, child witnesses, summation, and pretrial. In addition to exercises every week on a particular segment of a trial, the student also does a full-day jury trial at the completion of the course. Video equipment is used to teach and critique student performances. There are a few written assignments.

LAW 694 Trusts and Estates
Fall. 4 credits. G. S. Alexander.
The course examines the process of gratuitous transfers of wealth and introduces the practice of estate planning. It surveys the basic law of property succession, including wills and intestate succession, the law of trusts, powers of appointment, federal transfer taxation, and trust investment. Certain recurrent policy problems are emphasized, including the problem of form of legal norms and the problem of collective constraints on private intention.

PROBLEM COURSES AND SEMINARS

All problem courses and seminars satisfy the first or second writing requirement. Limited enrollment.

LAW 700 Advanced Civil Procedure
Spring. 3 credits. B. J. Holden-Smith.
A study of complex civil litigation involving multiple parties and multiple claims. Topics include joinder of parties and claims, impleader, interpleader, class actions, and intervention. There will be consideration of case management, the Civil Justice Reform Act of 1990, multidistrict transfers in the federal courts, and the use of alternative procedures for disposition of cases.

LAW 701 Advanced Criminal Procedure Seminar: Post-Conviction Remedies
Fall. 3 credits. J. H. Blume.
This seminar will explore various post-conviction remedies available to state and federal prisoners, including motions for new trial, state post-conviction proceedings, federal habeas corpus, and other extraordinary writs.

[LAW Advanced Criminal Procedure Seminar: Pre-Conviction
3 credits. Recommended prerequisite: Criminal Procedure. Not offered 1999–2000.
This seminar starts where the course, criminal procedure, ends. Topics may include double jeopardy, restraints on the decision to prosecute, pretrial detention and release, preindictment and pretrial delay, discovery and the obligation to disclose exculpatory evidence, the right to an impartial jury, jury selection, the right to confront witnesses and to present a defense, and sentencing.]

[LAW African Americans and the Supreme Court
3 credits. Not offered 1999–2000.
Beginning with its first decisions related to the slavery question, the Supreme Court has at times aided and at other times hindered efforts to afford African Americans full citizenship. This seminar explores the relationship between blacks and the Supreme Court by examining the major Court decisions affecting African Americans and attempting to understand those decisions in their historical contexts. The course begins with a review of the background and meaning of the constitutional provisions pertaining to the status of blacks in the new nation and ends with an intensive look at *Brown v. Board of Education*.]

LAW 703 Advanced Legal Research
Spring. 3 credits. C. M. Germain and staff.
Teaches cutting-edge research techniques to prepare students for practice in the law office of the future. Focuses on desktop electronic legal research, and covers U.S., international, and foreign law, as well as multidisciplinary research. The course is designed to teach students, whose careers will begin in a period of information transition, how to handle traditional and electronic sources and formats and make efficient choices.

[LAW Advanced Legal Writing and Analysis
3 credits. Not offered 1999–2000.
This seminar will explore in some detail the principles of legal analysis and writing through the medium of various documents produced in representing a hypothetical client in civil or criminal litigation. Students will conduct the necessary research on an assigned legal issue and then prepare a series of documents in preparation of the client's case. Those documents will include an office memorandum, a client letter, and a trial brief or memorandum in support of a motion. Students rewrite each document after receiving written comments from Professor Williams and other students through collaborative editing exercises.]

LAW 707 American Legal Theory
Fall. 3 credits. R. S. Summers.
The fall 1999 topic for this seminar is the formality of basic types of legal phenomena such as criteria of valid law (for both publicly and privately made law), statutory rules, accepted methods of statutory interpretation, the principle of stare decisis and common law rules, adjudicative processes, limitations on judicial power to modify rules, and the formal characteristics of the legal system viewed as a whole. American law lacks appropriate formality in many important ways and a heavy price is paid for this. However, legal formality and its distinctive underlying rationales (general legal values) profoundly affect the overall content of law and its practice by lawyers in the American as well as other legal systems. Such formality and its rationales have as much or more of a claim to primacy as the essence of law than do problem-specific policies that also inform the law's content. In this seminar, there is about equal emphasis on practical skills and theory.

[LAW Appellate Advocacy
Fall and spring. 3 credits. Prerequisite: Legal Methods or Practice Training 1 and 2. Year-long course. Not offered 1999–2000.
This course is designed to teach students the intricacies and nuances of appellate brief writing. Using the transcript of a criminal trial, students will write and rewrite an appellate brief for either the defense or prosecution. Students will read and digest the transcript and choose issues to research and potentially brief. After discussing the potential issues and research and basic appellate principles such as preservation, harmless error, and standards of review, we will turn our attention to the art of persuasion. Beginning with the first word of the first Question Presented, and ending with the last word of the Argument, appellate lawyers painstakingly choose each word to advance their arguments. The class will discuss in detail and practice writing each part of the appellate brief to see how each part can best meet this goal of persuasion. For instance, the Statement of Facts, perhaps the most important part of an appellate brief, will be treated as a story with a plot and sympathetic and unsympathetic characters. The class will discuss language and style and look at such details as word choice, sentence length and placement of "bad facts." The class will similarly dissect the Question Presented, Point Headings, and last, but certainly not least, the Argument.]

LAW 709 Biblical Law
Spring. 3 credits. C. M. Carmichael.
Analysis of law and narrative in the Bible from the perspective of ancient law and legal history. Topics include the nature of the law codes (e.g., hypothetical formulation versus statutory law), legal issues in the narratives (e.g., law of adultery and women's rights), law and morality (e.g., Ten Commandments), law and religion (e.g., institutions guaranteed by the law but condemned by religious authority), the transformation of extralegal relations into legal ones (e.g., with the introduction of money), legal interpretation in antiquity (e.g., Sermon on the Mount), social factors in legal development (e.g., shame and guilt), and aspects of criminal, family, and private law (e.g., eye for an eye, incest rules, and unjust enrichment).

[LAW Civil Rights in Housing: Theory and Practice
3 credits. Not offered 1999–2000.
Students will explore federal fair housing laws, history, and policies, while learning practical litigation skills. The seminar includes reading materials, class discussion, legal writing, and litigation exercises. The seminar materials include cases and statutes, as well as literature about policies underlying fair housing rights in the United States. The policy literature will be selected from a broad political spectrum, and will be designed to provoke thought and encourage classroom debate. The legal writing assignments and the litigation exercises simulate work assignments common in a civil litigation practice. Students will draft three briefs on different issues at various procedural postures (injunction, summary judgment, and appeal). Additionally, students will complete six short litigation exercises, including developing a proof schema and discovery plan, designing a fair housing test, drafting an affidavit and correspondence in support of a motion, writing jury instructions and a special verdict, and planning a trial notebook.]

LAW 711 The Common Law and African Legal Systems
Spring. 3 credits. M. Ndulo.
This seminar will study legal systems in post colonial Africa. It will concentrate on the former British colonies. During the colonial period, the common law was imported into British Africa. As a result, these countries are now common law jurisdictions. The description is supported by the history of the countries as well as by current statutory guidelines. African countries, however, also retained African customary law as part of the legal system. The two systems of law operated alongside one another and interacted at various points. During the colonial period, the common law was considered superior to African customary law and became the dominant system of law. In today's Africa, the two systems continue to operate side by side in very much the same as they did in colonial times. Conflicts between them have generated considerable interest among legal scholars. This seminar will consider the following issues: the introduction of the common law in Africa; nature of the customary judicial process; the nature of the plural system; areas of conflict between customary law and the common law in such areas as succession, land tenure, marriage laws, and gender. It will also examine issues relating to constitutional law and governance. Contemporary Africa is engaged in efforts aimed at building democratic political systems that are responsive to the needs of African communities. In this regard, we will examine such issues as constitutional arrangements in post-independence Africa, and conditionality, good governance, and development aid.

LAW 712 Comparative Legal Methods
Fall. 2 credits. Limited to LL.M. students. B. S. Williams.
This course will provided an introduction to the U.S. legal system and an opportunity for international LL.M. students to develop their legal analysis and writing skills through the completion of a series of writing assignments designed to teach the forms and content of legal analysis and expression common to American legal practice. The course will begin with an introduction to the structure of the U.S. legal system, including information on the nature and function of the state and federal governments and the structure of the American court system. The course will also introduce the methods that guide American attorneys in case analysis and application, and statutory interpretation. Finally, the course will provide extensive instruction in legal writing and analysis skills, including an introduction to basic legal research tools and strategies. The course grade will be based on writing assignments.

LAW 713 Constitutional Law and Political Theory
Spring. 3 credits. S. H. Shiffrin.
The purpose of the seminar is to explore theories of freedom of speech and theories of equality. How are the ideas of freedom, equality, association, and community linked in doctrine, and how should they be linked? Neoconservative, liberal, radical, feminist, and Marxist writings are considered.

[LAW Corruption Control
3 credits. Not offered 1999–2000.
This seminar examines the factors that facilitate and inhibit public or private corruption and analyzes the wide variety of criminal, civil, and nontraditional approaches designed to control corruption and to promote governmental and commercial integrity.]

[LAW Critical Race Theory
3 credits. Not offered 1999–2000.
This seminar will explore the relationship between critical understandings of the significance of race and legal interpretation. Of particular importance is the examination of how societal values and customs, expressed in legal rules purporting to address racial issues, inhibit critical approaches to the concerns of justice for disadvantaged groups.]

[LAW Dispute Resolution Techniques
3 credits. Not offered 1999–2000.
A course offering students an opportunity to learn conflict management and dispute resolution techniques in negotiation, mediation, and arbitration of commercial disputes, usually in the intellectual property context. The course will be scheduled to take place on certain full weekends to be announced.]

LAW 715 Emerging Problems of Health Law
Spring. 3 credits. L. I. Palmer.
The delivery of health care presents problems on the frontiers of both law and medicine. These include whether legislatures should authorize physicians to assist the death of dying patients, prohibit the cloning of humans beings, or modify the regulations concerning the administration of pain medication. In addition, new knowledge about reducing risks has emerged in policy discussions about how to improve the "quality" of health care during an era of managed care. There are now new questions about whether law inhibits the health care system's ability to make the system "safe" for patients. Students will study selected problems on the frontiers of law and medicine and prepare a seminar paper on a topic related to one of the emerging issues in health law or bioethics.

LAW 716 Empirical Studies of the Legal System
Fall. 3 credits. T. Eisenberg.
This seminar guides students in their own empirical studies of the legal process. Students derive research topics from a variety of empirical sources and design and run their own computer programs. Sample topics may include evaluating patterns of punitive damages awards, studying jurors' perceptions in death penalty cases, evaluating the success rates and burden of Title VII cases, and studying products liability cases.

LAW 717 Employment Discrimination
Spring. 3 credits. W. F. Taylor.
This seminar explores contemporary problems in equal-employment law. It focuses on legal issues involving Title VII, comparable worth, wrongful discharge, disability discrimination, age discrimination, and equal pay. Students are required to submit a paper as partial fulfillment of the requirements of the course.

[LAW Ethnic Conflict and International Law
3 credits. Recommended prerequisite: International Human Rights or Public International Law. Not offered 1999–2000.
This seminar examines the status and rights of ethnic, racial, religious, and national groups under international law, and considers the role of international law in developing an adequate response to intercommunal conflicts in Europe, Asia, and Africa. Topics include the sources of nationalism and ethnic conflict, pertinent individual and group rights, principles of humanitarian law and humanitarian intervention, the relationship between group identity and democracy, the role of international organizations in responding to ethnic conflict, and possible solutions to ethnic conflict, including secession, autonomy, and federalism.]

LAW 720 European Union Law
Spring. 3 credits. J. J. Barceló III.
The course studies the EU treaty, institutions, and lawmaking processes; the direct effect, supremacy, and reception of EU law in the member states, the development of the four freedoms (goods, services, persons, and capital) fundamental rights doctrine, protection of the environment, and the EU antitrust law.

[LAW Family Law Seminar
3 credits. Not offered 1999–2000.
This course is designed to familiarize the student with the practical problems facing the practitioner in family law cases. Students participate in negotiating separation agreements, presenting oral arguments of motions, preparing a memorandum of law, and developing interviewing skills and client relationships. The philosophy of the family law practitioner and methods of dealing with clients involved in divorce, custody, and the

like are covered. The emphasis is on method rather than substantive law.]

LAW 722 Family Wealth Transfers
Spring. 3 credits. D. Avery.
This seminar explores the development of the laws relating to property transfers in the context of both traditional and nontraditional family relationships. Readings from history, legal history, political theory, feminist legal theory, psychology, anthropology, sociology, and comparative law will provide a framework for evaluating the ways in which modern American laws of property, contacts, divorce, gratuitous transfers, taxation, and bankruptcy shape and are shaped by the formation, perpetuation, and disintegration of the family. Topics include community property, the Uniform Marital Property Act, constructive trust doctrine, common law concurrent interests, equitable distribution laws, and the laws affecting property settlements, cohabitation agreements, and premarital contracts.

LAW 726 Federal Litigation Seminar
3 credits. D. Bordewieck.
This seminar is designed for students genuinely interested in being litigators. It explores the "real world" of civil litigation in federal court, from commencement of a lawsuit through termination by some means other than trial. Particular attention is given to local rules; complaints; answers; document requests; removal issues; venue motions; preliminary injunction motions; summary judgment motions; nonparty discovery; sanctions; FRCP 26 disclosures and requirements; attorney-client privilege issues; and case-management procedures and orders. Throughout the course, the seminar endeavors to determine how one rationally litigates before frequently disinterested judges pursuing their own agendas and against counsel evidencing little regard for the rules or the law. This seminar entails a very substantial quantity of written work.

[LAW Feminism and Gender Discrimination
3 credits. Not offered 1999–2000.
The seminar provides an introduction to feminist theory as it has emerged in legal scholarship and the social sciences. Several feminist legal theories are then used as a framework for analyzing a series of legal problems implicating gender. Among the problems discussed are sexual harassment, work-family conflict, divorce and child custody, surrogacy, abortion, rape, spousal abuse, and pornography.]

LAW 728 Foundations of Criminal Law
Fall. 3 credits. Prerequisite: Criminal Law. S. P. Garvey.
This seminar examines various theoretical issues in the substantive criminal law. Among the topics to be discussed are the justification (if any) for punishment; the relationship between theories of punishment and political theory; the moral limits on the authority of the state to criminalize conduct; theories of excuse and justification in the criminal law; and the role of emotion and reason in the criminal law.

[LAW Foundations of Employment Law
3 credits. Prerequisite: Labor Law or Employment Law. Not offered 1999–2000.
This seminar studies labor markets to catalog ways they succeed and ways they fail, and assesses ways that labor market regulation attempts to correct market failure. Both labor law (regulation of unions) and employment law (regulation of the nonunion workplace) topics are covered. Specific topics include: internal labor markets and contingent workers; the decline of unions; policies underlying the National Labor Relations Act; the erosion of the employment-at-will doctrine; and regulation of health care and pensions. To add perspective, the seminar will attempt a comparative examination of the legal systems of Canada, Japan, Germany, France, New Zealand, and Macedonia.]

[LAW Health Care Reform
3 credits. Not offered 1999–2000.
This seminar addresses the role of law in structuring efforts to resolve problems of access, quality, and costs in health care. The focus is on the U.S. health care system but approaches of some other nations to comparable problems are briefly explored. Materials will include a health law casebook and selected readings from medical and health policy sources. During the later sessions of the semester students present their seminar papers to the class.]

LAW 731 Immigration and Refugee Law
Fall. 3 credits. Prerequisite: Constitutional Law. S. W. Yale-Loehr.
This seminar explores the evolving relationship between U.S. immigration policy and our national purposes. Immigration plays a central role in contemporary American life, significantly affecting our foreign relations, human rights posture, ethnic group relations, labor market conditions, welfare programs, public services, and domestic politics. It also raises in acute form some of the most basic problems that our legal system must address, including the rights of insular minorities, the concepts of nationhood and sovereignty, fair treatment of competing claimants for scarce resources, the imperatives of mass administrative justice, and pervasive discrimination. In approaching these questions, the course draws on diverse historical, judicial, administrative, and policy materials.

LAW 732 The Independence of Lawyers
Fall. 3 credits. L. J. Fox.
No area of the law is in more ferment than professional responsibility. Traditional models for the provision of legal services are being attacked by others from accountants to real estate brokers who wish to enter the field and who are asking, even demanding, that we dispense with many of our basic ethics rules. The standard litigation model is being attacked as too slow and too expensive and being usurped by alterative methods of dispute resolution. Old fashioned notions of loyalty to clients are being undermined by the economics of the practice of law. Traditional principles of confidentiality are being questioned as interfering with the search for the truth and the demands of effective law enforcement. Insurance companies are aggressively controlling the way legal services are delivered to their insureds. Our ethics rules are being asked to respond to such knotty issues as hate speech, discrimination, and pay-to-play. This seminar will give students an opportunity to explore in depth these and other "hot" topics which, one can predict, will simultaneously be the subject of headline- grabbing news stories (at least in the National Law Journal) as the course proceeds.

LAW 733 International Criminal Law
Spring. 3 credits. D. Wippman.
This seminar will examine the evolution of modern international criminal law, from Nuremberg to the new International Criminal Court. Topics will include the nature and sources of international criminal law, jurisdiction, individual and state responsibility, penalties and deterrence, and alternatives to criminal trials, such as truth commissions and amnesties. The seminar will emphasize recent developments, such as the Pinochet extradition proceedings and efforts to try senior Khmer Rouge leaders.

LAW 734 Introduction to French Law
Spring. 3 credits. Prerequisite: Not available to students with significant knowledge of civil law system.
C. M. Germain.
Introduction to the French legal system from a comparative law perspective, with a focus on civil law methodology and French legal institutions. Topics studied include French law sources and authorities, such as legislation, court decisions, and scholarly writings; the relationship between French law and the European Union; the French court structure in civil, criminal, and administrative law matters and its major procedural features; and the organization of the legal profession.

LAW 735 Issues In Tort Law
Spring. 2 credits. J. A. Siliciano.
The course explores some of the major theoretical and practical questions surrounding the tort system. The central inquiry focuses on the purported goals of tort law, their compatibility with each other, and the degree to which they are realized in practice. The course also examines a variety of substantive areas and considers various proposals to restructure tort law.

LAW 736 Juvenile Justice Seminar
Spring. 3 credits. D. N. Yellen.
This seminar examines the history, philosophy, and current issues concerning the separate juvenile justice system. Among the issues that may be considered are the constitutional protections applicable to the juvenile justice process, the treatment of noncriminal misconduct, waiver to adult court, confidentiality, the roles of police, lawyers and social workers, and sanctions.

[LAW Labor Law Theory and Policy Seminar (also ILR 608)
3 credits. Prerequisite: Labor Law. Not offered 1999–2000.
The U.S. collective bargaining system, which had its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars on both the right and the left, and at the same time, the decline in the labor movement has undermined its political support. This seminar will look at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Some of the topics to be discussed are: the theory of regulation embodied in the National Labor Relations Act and its critique; alternative conceptions of labor markets and their policy ramifications; and the emerging global economy and its ramifications for domestic labor regulation. There will also be discussion of alternative systems of labor regulation, such as found in West Germany, Sweden, and Japan.]

[LAW Law and Economics Seminar
3 credits. Not offered 1999–2000.
Selected analysis of ways in which the law has incorporated, wittingly or unwittingly, an economic perspective. A major topic is the Coase Theorem and whether the common law promotes efficiency; a second theme is whether such a common law is ethically appropriate; a third theme contrasts the efficiency of the common law with the marketplace for legislation. Prior study of economics is neither required nor disqualifying.]

LAW 741 Law and Higher Education
Spring. 3 credits. Prerequisite: Constitutional Law or Administrative Law.
J. J. Mingle.
Higher education is a complex, idiosyncratic institution. Universities and colleges have a unique mission—teaching, research, and public service—and a uniquely challenging task of accommodating the various constituencies and organizations both internal (governing boards, faculty, students) and external (alumni, legislatures, courts, government agencies), that influence how they are managed and how policies are shaped. This seminar will explore the dynamic tensions, high expectations, and complex legal policy issues universities face in fulfilling their mission.

LAW 743 Law and Mental Health Seminar
Fall. 3 credits. H. R. Beresford.
The seminar explores issues at the interface of law and psychiatry. After an introduction to clinical and scientific aspects of mental illness, the seminar will address issues of autonomy, liberty, competency, coercion, and criminal responsibility as they relate to persons with disorders of behavior, cognition, or mood. Students write and present seminar papers on self-selected topics.

LAW 744 Law, Science, and Technology
Fall. 3 credits. Y. M. Cripps.
An examination of the interaction between legal principles and procedures and scientific research and development. Topics include the role of the law in regulating cloning, recombinant DNA research, surrogacy, and in vitro fertilization; plant breeders' rights and the patentability of organic matter; judicial assessment of expert scientific evidence; and compensation for damage caused by scientific experiments and new technologies.

LAW 745 Law Through Literature
Fall. 3 credits. N. L. Cook.
In this seminar, students use literature, supplemented by law texts, as a basis for understanding operations of law and the impact of legal process on people's lives. An explicit goal of the course is the acquisition of literary skills that can be cross-utilized in law practice. Students thus not only analyze legal principles in the context of stories, but also learn how to apply such literary concepts as metaphor, imagery, plot and character development, perspective, and point of view in their legal work.

LAW 746 Lawyers and the Legal Profession
3 credits. Satisfies the professional responsibility requirement. R. C. Cramton.
This seminar is divided into roughly two parts. First, a survey of the law of lawyering in a small class setting during the first one-half of the course; and second, more detailed consideration of a number of current issues after the spring break. Members of the seminar actively participate throughout, but their writing and presentations generally are concentrated on the topics considered during the latter half. Special topics for Spring 1999 included the following: client fraud in business transactions, the Whitewater prosecutors and the O. J. Simpson defense team; counseling regulatory compliance (the Kaye-Scholer affair); the Lindsey-Clinton attorney-client privilege cases; and the ethics issues raised by A Civil Action. Distinguished practitioners participate in a number of seminar sessions.

LAW 756 Legal Aspects of Commercial Real Estate Development
Spring. 3 credits. J. E. Blyth.
Through the use of several written memoranda and one oral presentation, this seminar addresses considerations basic to commercial real estate development. It focuses on purchase agreements, options, rights of refusal, memoranda thereof, representations, and warranties; disclosure required of brokers and sellers, attorneys as brokers, notarial misconduct; conveyancing and surveys; commercial leases; conventional financing; conflicts between commercial tenants and institutional lenders; alternatives to conventional financing; title insurance; attorney opinion letters; and choice of real estate entity. About one-half of the course is devoted to commercial leases; conventional financing, and alternative to conventional financing (such as tax exempt financing and synthetic leases).

[LAW Legal Information Systems
3 credits. Not offered 1999–2000.
The seminar will address those qualities and effects of legal information databases which courses in legal research and the formal study of information retrieval do not. Whereas such courses and the disciplines from which they arise would see legal information systems as either research tools or as corpora that form a backdrop for the study of computer science techniques, we will be interested in such systems as economic entities with particular importance to lawyers and their clients, and as phenomena that have a role in defining the activities and boundaries of lawyering. Why is one such database better than another, and what does such a functional analysis say about what lawyers do and think? What are the practice (and malpractice) implications of an array of differentially priced sources for legal information? What happens to the role of the lawyer when clients have equal or better access to the letter of the law? What is the boundary between legal information and legal advice? What combination of private and public actors provides the "best" system for distributing legal information? These questions, and others, will define our area of work. Such a discussion is particularly relevant at a time of major upheaval in the way these primary tools of the profession are defined, bought, and sold.]

[LAW Managed Care Seminar
3 credits. Not offered 1999–2000.
Traditional fee-for-service indemnity insurance plans are being replaced by "managed care" as the dominant mode of financing health care in this country. This seminar examines the role of law in resolving the ethical, social, and economic debate that managed care has generated. Opponents of the trend have called for legislation to set standards for what insurers must provide. For instance, in response to "drive-through deliveries," legislation has been proposed to increase the minimum number of hospital days for which a patient can be reimbursed after the birth of a child. On the other hand, proponents argue that health care providers, insurers, and even patients benefit from cost-containment measures. Meanwhile, lawyers for health care insurers, providers, employers, governments, and patients must cope with this changing environment by using existing legal doctrines or creating new ones. Each student will prepare a paper on some aspect of the role of law in managed care. These papers might involve, for example, a critique of a piece of legislation or examination of the various legal concepts used to adjust to the changing environment of health care in this and other industrialized countries.]

LAW 758 Melville and the Law
Spring. 3 credits. A. Konefsky.
This seminar will explore Herman Melville's views on law, lawyers, and legal systems as developed in three of his works of fiction: Benito Cereno, Bartleby, and Billy Budd. Melville's ideas about slavery, free labor, and the nature of justice will be explored through (1) an examination of the historical and legal historical events that may have influenced Melville's fictional narratives, (2) a discussion of the stories themselves, and (3) an analysis of literary criticism focusing on the relationship between law and Melville's work.

LAW 759 National Security Law Seminar
Fall. 3 credits. K. Clark.
This course will examine the struggle between the executive and legislative branches in the areas of national security and foreign affairs; the federal government's authority to pursue covert and overt wars; limitations on civil liberties during war-time and other emergencies; the government's regulation of personnel with security clearances; and the public's access to national security information through the Freedom of Information Act and other means.

LAW 760 Organized-Crime Control
Fall. 3 credits. Prerequisite: Criminal Procedure. R. C. Goldstock.
This seminar discusses selected aspects of criminal procedure and civil remedies that are used to control sophisticated illegal syndicated activity. Constitutional, statutory, and practical concerns in the use of electronic surveillance and RICO are a particular focus.

LAW 766 Origins of English and American Law
Spring. 3 credits. E. Sherwin.
This course provides an overview of Anglo-American legal history, including Roman law origins, early English law, early American law, and modern social and intellectual legal debates. Approximately one half the course will be spent on foundational reading; the second half will consist of presentation of student papers.

LAW 770 Reproductive Issues Seminar
Spring. 3 credits. M. A. Fineman.
This seminar will consider various reproductive dilemmas, paradoxes, and policies in modern American society. Birth control and abortion will be addressed, but the emphasis will be on placing the reproductive process within a broad sociolegal context. To this end, we explore issues such as eugenics, the

use and regulation of medical technology, lesbian mothering, the relationship between reproduction and poverty programs, and a variety of other contemporary issues.

LAW 774 Selected Business Transactions Seminar
Fall. 3 credits. Recommended prerequisites: Corporations. Z. J. Shulman.
An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings, the course will cover: the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the transaction closing. Regarding mergers and acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), public company transaction issues i.e., antitakeover matters and fiduciary concerns, fiduciary duties, and crucial legal aspects of the acquisition, such as letters of intent, successor liability, continuity of employees and non-competition agreements.

[LAW Separation of Powers
3 credits. Not offered 1999–2000.
The last fifteen years have witnessed more debate about the nature and consequences of "separation of powers" than we have seen since the Founding Era. This seminar examines the ways this concept is understood and used by modern judges, legislators, executive officials, and scholars to justify, or to attempt to modify, the distribution of power within contemporary American government.]

[LAW The Supreme Court and the Death Penalty
3 credits. Not offered 1999–2000.
This seminar examines the role of the Supreme Court in modern capital punishment jurisprudence focusing on how, and to what extent, the Court's view of death penalty cases has changed in the last thirty years. Students will have the option of writing a paper or assisting in the research for and drafting of a petition for writ of certiorari or brief filed in the Supreme Court.]

[LAW Tax Policy Seminar
3 credits. Prerequisite: Federal Income Taxation. Not offered 1999–2000.
This seminar analyzes the tax policy goals of fairness, simplicity, and economic efficiency, and examines how well the present tax system satisfies these goals. Specific topics include: progressivity of the tax rate structure; use of the tax system to advance social policies; tax legislative process; taxation of the family; comparison of income and consumption taxes.]

[LAW The Religion Clauses of the First Amendment
3 credits. Prerequisite: Constitutional Law. Course not available to students who have already taken Civil Liberties Clinic. Not offered 1999–2000.
This course examines various issues relating to the First Amendment's establishment and free-exercise clauses. In the early part of the semester the seminar meets to discuss assigned readings. The later part is devoted to the presentation of seminar papers. Each student must submit a substantial paper on an approved topic and brief written critiques of two other students' papers.]

LAW 777 Theories of Property
Fall. 3 credits. Prerequisite: Property. G. S. Alexander.
This seminar explores the various ways that people have conceived of, or understood, property. The materials studied are eclectic and interdisciplinary. They include readings on slavery and property, women and property, community interests in property, as well as classical theories (libertarian, utilitarian, Marxian).

LAW 778 Transition to Democracy
Fall. 3 credits. I. P. Stotzky.
The closing decades of the twentieth century can rightly be characterized as the era of democracy. During the 1970s, several southern European nations abandoned longstanding dictatorships and adopted democratic regimes. During the early 1980s, most Latin American nations repudiated their aged military dictatorships and instituted democracies. In the 1990s, another wave of democratization swept Eastern Europe and the Soviet Union, destroying the "Communist Empire." In nations undergoing this transition, economic, political, and social stability has not yet been fully achieved. The corporatist political and social structures have not yet been transformed to allow the vast, underprivileged majority access to the basic necessities that ensure a dignified life. Institutional structures of public life, such as a representative legislative branch, a competent judiciary, and an executive branch that adheres to its constitutionally imposed boundaries, must be developed and stabilized. The rule of law—and thus the fundamental guarantees of due process—has to become an accepted, basic requirement of public life and private social interaction. In this seminar, we will examine the very complicated issues involved in the transition process. For example, we will look at the relationship among constitutionalism, democracy, human rights, and law. We will also discuss the role in the democratization process of cultural norms, human rights trials, economic development, and the international community.

LAW 779 United Nations, Elections, and Human Rights
Fall. 3 credits. M. B. Ndulo.
The seminar provides a wide range examination of the current status of the international protection of human rights with special emphasis on civil and political rights relating to elections and governance. Taking part in the conduct of public affairs is a basic human right increasingly prized by people throughout the world. Universally, the right to take part in government is proclaimed and guaranteed by the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights and is recognized in many other international treaties and declarations. At times free and fair elections necessitate international assistance to countries to aid them in fulfilling international human rights standards, and cooperation in establishing and strengthening the legal, technical and physical infrastructure necessary to carry out elections. The seminar will further examine: self determination, truth commissions and the role of non-governmental organizations with regard to standard setting and monitoring of human rights.

[LAW Voting and Political Participation
3 credits. Recommended prerequisite: some previous experience with legal materials (case studies, statutes) will be helpful, but is not required. Not offered 1999–2000.
This course explores the meanings assigned to political participation in the American political system and examines a series of instances in which the law has been used to enhance, equalize, or otherwise regulate voting and other forms of political participation. The course begins by investigating the problematic rationality of political participation, examining several arguments for participation notwithstanding the low probability that any participant's vote will have an effect on electoral outcomes. A brief survey of historical and contemporary denials of the franchise is then used to shed further light on the meaning(s) of political participation. The second part of the course turns to the question of legal regulation of the vote, examining the merits and proper scope of plebiscitary democracy; the problem of apportionment resolved and created by the "one persons, one vote" rule; and efforts to facilitate minority political participation under the Constitution and the Voting Rights Act.]

CLINICAL COURSES AND EXTERNSHIPS

All clinic courses and externships satisfy the second writing requirement. Limited enrollment.

LAW 781 Capital Punishment Clinic: Post-Conviction Litigation
Spring. 4 credits. Prerequisite: permission of instructor, Criminal Procedure or Criminal Law experience preferred. J. H. Blume, S. L. Johnson.
Death penalty post-conviction litigation: investigation and the preparation of petitions, memorandums, and briefs. This course is taught as a clinic. Two or possibly three South Carolina Death Row cases will be worked on by students. Case selection will depend on both pedagogical factors and litigation needs of the inmates. Students will read the record and research legal issues. Some students will be involved in investigation, while others will assist in the preparation of papers. All students will be included in discussions regarding the necessary investigation and strategy for the cases.

LAW 782 Capital Trial Clinic
Spring. 4 credits. Prerequisite: permission of instructor, Criminal Procedure or Criminal Law experience preferred. J. Blume, S. L. Johnson.
The issues that are unique to a capital trial, with a focus on a specific capital trial and the issues it presents.

LAW 784 Government Benefits Clinic
Spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1 or Legal Aid Clinic 3 (6 hours combined credit for both courses when combined with LA1 or LA3). B. Strom.
The course has both a substantive component, in which a broad conceptual understanding of

a complex and controversial area of law and public policy is developed, and a live client clinical experience, in which those concepts can be applied in solving actual client problems. The substantive component of the course provides an introduction to government benefits law by examining various need-based benefit programs including Social Security, Unemployment Insurance, Temporary Assistance to Needy Families (TANF), Supplemental Security Income (SSI), and Food Stamps. Case handling involves the representation of clients in government benefits cases (social security, public assistance, food stamps, unemployment insurance, Medicaid, SSI, etc.) involving both the Tompkins County Department of Social Services, the N.Y.S. Department of Labor and the Social Security Administration. The course also includes a lawyering skills classroom component because students are simultaneously enrolled in Legal Aid 1 or 3 (see the descriptions below).

LAW 785 Government Benefits Clinic/ Neighborhood Legal Services Externship

Spring. 6 credits. This course is a combination of government benefits and the Neighborhood Legal Services Externship and either Legal Aid Clinic 1 or Legal Aid Clinic 3 (6 hours combined credit for both courses when combined with LA1 or LA3). B. Strom.

The course is the same as government benefits except that the case-handling component involves handling cases for the Ithaca office of Neighborhood Legal Services. See that description for additional details.

LAW 786 Judicial Externship

Fall or spring. 4 credits. G. G. Galbreath. Students work with a trial court judge. Work involves courtroom observation, conferences with the judge, research and writing memoranda, drafting decisions. The emphasis is on learning about judges, judicial decision-making process, and trials. There are weekly class meetings with readings and discussions of topics related to the externship experience. While the primary focus is the student's work at the placement, each student will also do the class presentations, a final project, and will meet individually with the faculty member.

LAW 790 Law Guardian Externship

Fall or spring. 4 credits. J. M. Miner. Students will learn about the representation of children in abuse and neglect cases, juvenile delinquency proceedings, and PINS (Persons in Need of Supervision) cases through their placement at the Tompkins County Law Guardian office. Duties may include interviewing, investigating, drafting memoranda and motions, and assisting in trial preparation. Participants are required to attend the classroom component of Legal Aid 1, Legal Aid 2, or 3 (see descriptions below).

LAW 791 Legal Aid Clinic 1

Fall or spring. 4 credits. During the second and third week there may be a couple accelerated class sessions. Classes are mandatory for all Legal Aid Clinic 1 students and all students in courses which include the Legal Aid 1 classroom component. N. L. Cook, G. G. Galbreath, K. Hessler, J. M. Miner, B. Strom.

Participants handle civil cases for low-income clients of the Legal Aid Clinic under the supervision of the clinic faculty. Students interview and counsel; investigate and analyze facts; interrelate substantive and procedural law with facts in the context of actual representation; develop a strategy to handle clients' problems; identify and resolve professional responsibility issues; do legal writing; negotiate and settle cases; and represent clients at administrative hearings. Seminar classes seek to develop interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises.

LAW 792 Legal Aid Clinic 2

Fall. 4 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid 1 classroom component. N. A. Cook, G. G. Galbreath, K. Hessler, J. M. Miner, B. Strom.

Students handle legal aid cases, participate in a classroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic's clients in both federal and state courts.

LAW 793 Legal Aid Clinic 3

Spring. 4 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid Clinic 1 classroom component. N. A. Cook, G. G. Galbreath, K. Hessler, J. M. Miner, B. Strom.

Students handle legal aid cases, participate in a classroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic's clients in both federal and state courts.

LAW 794 Legislative Externship

Fall or spring. 3 credits. J. M. Miner, B. Strom.

The students work with the local New York State Member of Assembly. Work involves drafting legislation, tracking legislation for constituents, legal research and writing, responding to constituent requests that particularly require legal research or an explanation of law. The emphasis is on learning about legislative process, drafting of legislation, understanding the reasons for statutory ambiguity, and developing various skills. There are several informal meetings with the faculty supervisor during the semester with readings and group discussions related to the externship experience.

LAW 795 Neighborhood Legal Services Externship

Fall or spring. 4 credits. Requires simultaneous enrollment with Legal Aid Clinic 1, Legal Aid Clinic 2, or Legal Aid Clinic 3. (4 hours combined credit for both courses when combined with LA1 or LA2). G. G. Galbreath, B. Strom.

Along with case handling it includes a classroom component. (See Legal Aid 1, 2, and 3 course descriptions.) The classes are devoted to the development of lawyering skills and issues related to professional responsibility and the role of an attorney. Cases involve the representation of clients of a legal services office, the Ithaca office of Neighborhood Legal Services (NLS). In addition, each student will meet periodically with the faculty supervisor for review of the placement experience.

[LAW Public International Law Clinic

3 credits. Prerequisites: Public International Law or International Human Rights. Not offered 1999–2000.

Students will prepare legal memoranda and policy proposals for foreign governments and international organizations. The memoranda will be prepared in coordination with the Public International Law and Policy Group, a nonprofit organization that provides *pro bono* advice on issues of public international law to governments, NGOs, and international organizations. Possible subject areas include minority rights, border treaties, citizenship and nationality disputes, state succession issues, and war crimes.]

[LAW Religious Liberties Clinic

4 credits. Year-long offering. Not offered 1999–2000.

Students work in teams on cases provided by organizations that handle Establishment and Free Exercise Clause cases. All students do substantial research and memoranda writing, and some may draft portions of briefs. To help ensure that students have the opportunity to take a case to completion (or at least to the next stage of litigation), this is a full-year course, with students required to register for both semesters for a total of four credit hours and a grade at the end. Given the nature of litigation, demands on student time may be sporadic, and students should be prepared to do some work over intersession if court deadlines so require.]

LAW 796 Small Business Clinic

Fall or spring. 5 credits. W. A. Kell. Students will learn and apply a broad range of knowledge in business-related law, through participating in interdisciplinary teams of students assisting microenterprise entrepreneurs with legal and business needs, specifically child care programs. Faculty from the Law School, the Johnson School of Management, and College of Human Ecology will supervise teams of students from each of the above colleges and provide classroom teaching. Under such supervision, student teams will work autonomously to consult with and provide technical assistance to the child care entrepreneur. Critical questions include: what are the needs of small businesses for legal consultation in order to survive and thrive? How can professionals of different disciplines work together most effectively to assist small businesses, given the often interconnected nature of legal and business problems? What practices are most conducive to the creation of viable small businesses, enabling entrepreneurs to respond to often-conflicting consumer needs for high quality (but affordable) services? Readings will be drawn from areas of contract, tort, property, employment, and administrative law, as well as areas of business planning, entrepreneurship, and consumer issues. There will be weekly classroom sessions focused on substantive areas of knowledge, the development of client relationships, and ethical issues. Weekly team meetings will also be required for supervision. Guest speakers from each of the colleges will offer additional experiences for learning and discussion. Writing and research requirements will be met through student work on behalf of the client entrepreneurs, including the development of contracts, procedures, articles of incorporation, and other documents, as well as internal legal memoranda and business plans.

LAW 797 Women and the Law Clinic
Spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1, Legal Aid Clinic 3 (6 hours combined credit). J. M. Miner.
Students will represent women clients who have legal matters primarily in the family law area (divorce, custody, support, domestic violence). Students will also participate in the lawyering skills classroom component of Legal Aid 1 or 3. An additional class will focus on such issues as the impact of substantive law on women, the impact of legal institutions on women, professional role development, feminist lawyering methods, and other topics related to women and the law.

LAW 798 Youth Law Clinic
Spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1 or 3 (6 hours combined credit). N. L. Cook.
Students will work with groups of youth and service providers in a multifaceted approach to identifying and resolving problems of a legal nature. Under the supervision of faculty and community experts, clinic students will both handle individual representation cases and participate in nonlitigation project work such as community education, legislative advocacy, and meditative training. The emphasis of the course is on planning, communication, policy development, and nonadversarial problem solving.

NONPROFESSIONAL COURSE

GOVERNMENT 313 The Nature, Functions, and Limits of Law
Spring. 4 credits. Undergraduates only. R. A. Hillman.
A general-education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of techniques for resolving conflicts and dealing with social problems. The course analyzes the roles of courts, legislatures, and administrative agencies in the legal process, considering also constitutional limits on their power and practical limits on their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process.

JOHNSON GRADUATE SCHOOL OF MANAGEMENT

ADMINISTRATION

Robert J. Swieringa, dean

John A. Elliott, associate dean for academic affairs

Michael J. Hostetler, associate dean for executive education

Richard A. Highfield, associate dean for MBA Program and operations

Richard A. Shafer, associate dean for corporate relations

Susan K. Salton, executive director of marketing and corporate communications

Steven J. Sharratt, executive director of development

Natalie M. Grinblatt, director of admissions

Stephen F. Johansson, director of career services

Harriet Peters, director of advising and student activities

Rhonda Velazquez, assistant to the dean

Ann W. Richards, financial aid, registration and admissions operations director

The Johnson Graduate School of Management prepares men and women for managerial careers in business. The school offers course work in many disciplines to provide potential managers with an understanding of the complexities of the professional world in which they will operate and of the organizations of which they will become a part.

A bachelor's degree or its equivalent is required for admission to the two-year program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background of undergraduate studies in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

Combined degree programs allow highly qualified Cornell students to co-register in the school during their senior year, thereby earning a master's degree in less than the usual time.

The doctoral program, administered through the Graduate School, provides an advanced level of education in business for those who seek careers in teaching and research at leading universities.

More detailed information about these programs is available from the Office of Admissions and Student Affairs, Johnson Graduate School of Management, Room 111 Sage Hall.

Students in other graduate programs and undergraduate students registered with the university are welcome in many classes. Since matriculated MBA students require certain courses for graduation, non-Johnson School students are not allowed to pre-enroll. During the first week of classes, registration of non-Johnson School students occurs on a space available basis.

UNDERGRADUATE ONLY

NBA 300 Entrepreneurship and Enterprise
Fall, spring. 3 credits. D. BenDaniel.
The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and workouts, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures. For non-Johnson School students only. Johnson School students see NBA 564.

NBA 401 Entrepreneurship for Scientists and Engineers
Fall, spring. 3 credits. J. Nesheim.
This course is intended to introduce students to the new business startup process. Small teams will be formed to come up with an idea for a startup and create a business plan that can attract venture capital or other funding for the new enterprise. Guest lecturers are from successful high-technology companies. The course is led by instructors from Silicon Valley and Ithaca who created high-technology businesses.

COURSES FOR NON-JOHNSON SCHOOL STUDENTS

NCC 550 Financial Accounting
Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.
An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure. This course is similar in content to the MBA core course: NCC 500.

[NCC 553 Marketing Management
Fall, spring. 3 credits. Course intended for non–Johnson School students only. May not be offered 1999–2000. Staff.
The course addresses controllable and uncontrollable marketing variables that managers in multi-product firms face in today's business environment. Topics include customer behavior, product planning, distribution, advertising and promotion, pricing, and competitive strategy. This course is similar in content to the MBA core course NCC 503.]

NCC 554 Management and Organizations
Fall. 3 credits. Course intended for non–Johnson School students only. Staff.
This course takes a resource-based approach to management by arguing that organizations should link their strategy to their internal resources and capabilities. This theme is developed by addressing: (1) the strategic value of internal resources and capabilities, (2) the role of human resources and organizational behavior in formulating and implementing strategy, and (3) the importance of structure and the design of organizations in formulating and implementing strategy. Included among the topics are: how firms create sustainable competitive advantage through internal resources and capabilities, what the best practices are for managing people, what effects best practices have on attitudes and behaviors, why putting the customer first is not necessarily best practice from a resource-based perspective, why organizational culture is central to organizational effectiveness, why the formal organizational chart and structure of an organization are important, how organizations innovate, how organizations change through re-architecture and re-engineering, what firms gain and lose through pursuing core competencies, and what firms gain through strategic alliances and networks. The course makes extensive use of case materials. This course is similar in content to the MBA core course: NCC 504.

NCC 556 Managerial Finance
Fall, spring. 3 credits. Course intended for non–Johnson School students only. Staff.
An introduction to business finance through theory and case studies. Topics include stock and bond valuation, the capital-budgeting decision, portfolio theory, the asset-pricing models, raising capital, capital structure, mergers and acquisitions, costs of capital, option pricing, and risk management. International applications are considered within each topic area. Letter grade only, based on exam, group case reports, homework and class participation. This course is similar in content to the MBA core course: NCC 506.

NCC 558 Production and Operations Management
Spring. 3 credits. Course intended for non–Johnson School students only. Prerequisites: NCC 501 or permission of the instructor. Staff.
Operations management deals with the problems of producing and delivering goods and services, topics that are of strategic importance in almost every organization. Production scheduling is a significant problem for manufacturing firms; smooth work flow and quality control are important in banking operations; inventory control is crucial in large retail establishments; and proper task sequencing is a major problem in the construction industry. The course deals with

these problems and others from a managerial viewpoint. The course is designed around managerial problems in the operations area. Students use case studies to improve skills in problem identification. This course is similar in content to the MBA core course NCC 508.

[NBA 553 Accounting and Finance for Engineers
Spring. 3 credits. Course intended for non-Johnson School students only. May not be offered 1999–2000. R. Hilton.
This course focuses on basic financial and managerial accounting and the economic and financial concepts that have a bearing on managerial decisions. The goals of the course are: 1) to give students a working knowledge of the accounting process and the value and limitations of the data that comes out of the accounting information system, 2) to familiarize students with key concepts in managerial accounting and the application of cost information to pricing and operating decisions, 3) and to promote an understanding of the use of economic theory in the evaluation of capital investment projects. The teaching methods consist of lectures and cases. Students are evaluated on the basis of exams.]

NCC COMMON CORE COURSES

NCC 500 Financial Accounting
Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. D'Souza, R. Libby.
An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure.

NCC 501 Statistics for Management
Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. McClain, J. Thomas.
An introduction to decision making under conditions of uncertainty. Topics include descriptive statistics, probability theory, classical statistics, statistical decision theory, and simple and multiple regression analysis. Applications in finance, marketing and operations management are discussed.

NCC 502 Microeconomics for Management
Fall. 2.5 credits. Johnson School core course. Enrollment limited. M. Waldman.
Microeconomic theory is introduced and applied to problems faced by managers. Specific topics covered include supply and demand, consumer behavior, pricing when a firm has market power, and the role of contracts. The class employs a lecture format and emphasizes problem solving. Grading is based on a midterm and a final exam.

NCC 503 Marketing Management
Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Stayman, A. Ainslie.
The course is designed to convey the key concepts of marketing and how they fit into the larger context of management strategy and decisions. Both the practical "how" and the fundamental "why" of marketing activities are presented in the light of contributions from behavioral science, economics and statistics. The goals are to provide sufficient understanding for those who will need only to interact with the marketing function, as well as communication concepts and developing processes that can provide the foundation for further course work and future experience in marketing. The course makes extensive use of case materials.

NCC 504 Management and Organizations
Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Sally.
If you think about it, stories are central to how we know and remember events, people, and facts, and to how we communicate knowledge and history. Most of the jobs you aspire to involve a particular form of story-telling—the CEO's vision, the analyst's report, the planner's strategy, the salesperson's pitch, the consultant's analysis, and the manager's brand. What distinguishes these as business stories is that they are often analytical (based on a set of objective facts and statistics) and reflect a deep understanding of the complex interactions of individuals and organizations. This course has two goals: 1) to make you appreciate the complexity of the issues that often arise in organizations, and 2) to develop and refine your analytical story-telling abilities. To achieve these goals, the course will be taught by the case-study method. Cases are an efficient way to expand your experience base with respect to such issues as motivation, power, leadership, ethics, structure, design, and change. We hope to teach you how to make good inferences about what will and won't work in particular situations, and how to learn from your own experiences and those of others.

NCC 506 Managerial Finance
Fall. 2.5 credits. Johnson School core course. Enrollment limited. R. Michaely.
The course objective is to introduce students to the basic concepts of finance. In particular, we address the issue of what type of investments should firms and individuals take on, and how these investments should be financed. Understanding these concepts are essential to financial managers and professional investors, and have important applications to many aspects of financial decisions all of us have to make on a daily basis (e.g., is getting an MBA a good investment?). These issues involve capital budgeting decisions, stock and bond valuation, how to assess and account for risk through the capital asset pricing model (CAPM), option pricing, capital structure and cost of capital, and market efficiency. Letter grade only, based on examinations, quizzes, group case reports, homework and class participation.

NCC 508 Managing Operations
Spring. 2.5 credits. Johnson School core course. Enrollment limited. Prerequisite: NCC 501 or permission of instructor. M. Lojo, L. Robinson.
This course focuses on managing processes: actions that convert inputs into outputs. Almost any business function can be modeled as a network of processes. The first part of the course examines processes, both individually and as part of a larger system; we see that good process design reflects both the volume and the variety of the product. A common course theme is the deleterious effect of variability (in demand, supply, quality, or capacity) in complex systems. Queuing theory and simulation are particularly helpful for analyzing process capabilities. The second part of the course analyzes how goods and services are produced. After describing the strategic role of operations, we examine forecasting systems, inventory management and just-in-time, and logistic management. Constrained optimization models provide information about managing with finite resources. The final part of the course examines process improvement through quality and productivity management and corporate learning.

NCC 509 Strategy
Spring. 2.5 credits. Johnson School core course. Enrollment limited. B. Hermalin, V. Kadiyali.
Among the critical tasks facing any senior manager are the creation, implementation, and evaluation of a business unit's strategy. This course seeks to provide the management student with the tools and frameworks essential to carrying out these tasks. Many of these tools and frameworks will be based on recent advances in game theory, industrial organization, and organization theory, although the course will also draw from the older business policy tradition as well. Students who successfully complete this course will be able to analyze industries, identify areas of strategy advantage and disadvantage, and to devise strategies that exploit advantages and remedy disadvantages.

NBA MANAGEMENT ELECTIVE COURSES

Accounting

NBA 500 Intermediate Accounting
Fall, spring. 3 credits. Prerequisite: NCC 500 or the equivalent. B. Sanjur, T. Dyckman.
The course is based on the essential concepts and terminologies of financial accounting introduced in the accounting core course. Students learn to evaluate financial statements through the use of case studies drawn from actual corporate financial reports.

[NBA 501 Accounting for Mergers and Consolidations
Spring, first half of semester. 1.5 credits. Prerequisite: NBA 500 or permission of the instructor. May not be offered 1999–2000. R. Libby.
The course focuses on accounting problems related to equity financing, including leveraged restructuring, intercorporate investments, leveraged buyouts, consolidated reports, proforma statements for a merger prospectus, and other related financial reporting problems. The method of instruction is lecture mixed with cases. Grading is based on two closed book exams. Course continues in NBA 508, Advanced Accounting, offered second half of semester.]

NBA 502 Managerial Cost Accounting
Fall, spring. 3 credits. Prerequisites: NCC 500, NCC 501, and NCC 502, or the equivalent. R. Hilton.
The course is designed both for those responsible for internal accounting information and those who use such information for decision making. Topics include budgeting, accumulating costs for product costing, activity-based costing, standard costs, the

analysis of cost variances, cost estimation and prediction, cost-price-volume decisions, performance measurement, non-manufacturing cost analysis, cost allocation, and transfer pricing. Instruction will be a mixture of lecture and case discussion. Student evaluation will be based on a midterm exam, a final exam, a project, and class participation.

[NBA 503 Strategic Cost Management
1.5 credits. Not offered 1999–2000. R. Hilton.
This course focuses on the role of cost management and related issues in helping a firm compete successfully in the global market. Topics considered include activity-based costing, activity-based management, value chain analysis, the lean enterprise, confronting competition in an industry dominated by lean enterprises, re-engineering, process value analysis, identification of non-value-added activities and costs, target costing, Kaizen costing, continuous improvement, time-based competition, cost versus quality, and benchmarking. The course is almost entirely based on cases, many of them lean enterprises in Japan.]

NBA 504 Taxation Affecting Business and Personal Decision Making
Spring, first half of semester. 1.5 credits. Prerequisite: NCC 500 or permission of the instructor. R. Bloomfield.
This course introduces students to the fundamental concepts and techniques of tax planning for individuals and businesses. Planning opportunities considered include changing the timing and nature of income, investments, and expenses; choosing an organizational form; constructing transactions that allow two or more parties to engage in tax arbitrage. The course also introduces tax research techniques and issues regarding tax compliance. Course continues with NBA 507.

NBA 505 Auditing
Spring. 3 credits. Prerequisite: NCC 500 or permission of the instructor. M. Nelson.
The course examines the process by which financial-accounting systems are audited. Topics include ethics, the meaning of audit reports, the legal liability of auditors, the study and evaluation of internal control systems, and various approaches for testing account balances. Problems, cases, and video simulations are used to illustrate concepts.

NBA 506 Financial Statement Analysis
Spring, first half of semester. 1.5 credits. Prerequisite: NCC 506, NBA 500 (or concurrent enrollment) or permission of the instructor. S. Tasker.
This course develops a set of core skills essential to financial statement analysis. We will cover strategic ratio analysis, cash flow analysis, pro forma financial statements, financial modeling, credit analysis, bond rating and bankruptcy predictions, and firm valuation using discounted cash flow techniques. Emphasis is on practical applications. The course format is a combination of case studies and lectures. The lectures communicate subtler aspects of the material while the cases provide hands-on experience. There will be an exam.

Note: Students who have completed the 3-credit version of NBA 506 cannot enroll in this course.

NBA 507 Tax Implication of Mergers and Acquisitions and Other Special Topics
Spring, second half of semester. 1.5 credits. Prerequisite: NBA 504 or permission of instructor. R. Bloomfield.
This course examines special topics in tax planning for businesses, with particular emphasis on capital structure choices and reorganizations (mergers and acquisitions), and intra-entity transactions (transfer pricing issues). Readings include many current research papers examining how large corporations exploit their tax planning opportunities.

NBA 508 Advanced and International Accounting
Spring, second half of semester. 1.5 credits. Prerequisites: NBA 501 or permission of the instructor. J. D'Souza.
The course examines advanced topics in accounting for international transactions and international subsidiaries, including foreign currency translation, price level adjustments and international variation in accounting principles. The method of instruction is lectures mixed with cases. Grading will be based on two exams and some written cases. Continuation of NBA 501, Accounting for Mergers & Consol. (offered first half of semester).

NBA 509 Advanced Financial Analysis
Fall, second half of semester. 1.5 credits. Prerequisites: NBA 506, a finance immersion course, or permission of the instructor. C. Lee.
This course builds on the core financial analysis skills developed in NBA 506. Topics covered include equity valuation, residual income models, quality of earnings assessments, earnings manipulation detection, market efficiency issues, fairness opinions in MBO's, and large sample stock screening strategies. The overall focus is on using accounting-based information to make investment decisions. Emphasis is on practical applications and special attention is given to cultivating analytical and communication skills. The course features both lectures and cases. There will be a group term project, but no final exam.

Note: Students who have completed the 3-credit version of NBA 506 cannot enroll in this course.

[NBA 510 Cornell Equity Research
Fall, spring. 1.5 credits. S-U grading only. Prerequisites: NCC 500 and NCC 506 or equivalent, and be taking (or have completed) NBA 506 or have permission of the instructor. S-U grades only. May not be offered 1999–2000. R. Bloomfield.
Students write and revise equity research reports on companies that are neglected by analysts and preferably undervalued. Class work includes lectures and cases on equity research and valuation, presentations by guest visitors, and presentations by students who must persuade the class to approve their stock recommendations.]

NBA 511 Financial Modeling
Fall, spring, second half of the semester. 1.5 credits. Prerequisites: NBA 506 or permission of the instructor, and mastery of basic EXCEL skills. S. Tasker.
Financial modeling is the art and science of constructing spreadsheet models of firms' future financial statements. In this class, we build on the brief introduction to financial modeling in NBA 506 by modeling the effect on the income statement, balance sheet, and statement of cash flows of more complicated financial transactions such as leveraged buyouts, mergers & acquisitions, and corporate reorganizations. The class meets in the state-of-the-art Parker Center computer lab, and active student participation is emphasized.

NBA 512 Applied Portfolio Management
Fall, spring. 3 credits. Restricted. C. Lee.
An accounting/finance elective course that focuses on the management of an investment fund (see Charles Lee for a full course description). Students enrolled in this course must commit to taking the course for fall and spring semesters. They will receive three credit hours for each semester's work. Strong preference is given to second year MBA students who have successfully completed either NBA 506 or one of the finance immersions. Students need to apply formally. If the number of applicants exceeds 12, admission will be competitive and merit-based.

Economics

NBA 523 Business and Economic Forecasting
Spring, second half of the semester. 1.5 credits. S-U grading only. Prerequisite: NCC 501 or the equivalent. R. Highfield.
This course will focus on statistical and econometric approaches to forecasting business and economic data series that have a time dimension (time series). The course provides students with a toolbox of time series forecasting methods and teaches them how to choose the appropriate one. Topics will include the relationship of forecasting to decision making, univariate methods such as ARIMA modeling, and some multivariate methods such as transfer function, regression, vector autoregression and neural networks. Applications will usually involve the forecasting of business and economic data. Although statistical theory will be covered as necessary with lecture and supplemental class notes, the emphasis will be on applications and learning by doing. Passing the course requires participation in class discussions and satisfactory performance on both individual and group projects. There are no exams. There is no text for the course but students will be required to use the student version of a sophisticated econometric software package.

NBA 524 Macroeconomics and International Trade
Fall. 3 credits. Prerequisite: NCC 502 or equivalent or permission of the instructor. R. Lind.
The course applies basic macroeconomic theory to such problems as inflation, unemployment, economic growth, and productivity and examines how those problems interact with international trade and finance. Students learn to be informed observers of national and international economic policies and discerning users of economic analyses and forecasts. A lecture/discussion format is used as the method of instruction.

[NBA 527 Applied Economic Analysis (also ECON 616)
Spring. 4 credits. Letter/S-U optional grading. Not offered 1999–2000. R. Frank.

This course will emphasize how economics analysis can help firms and individuals make the most of their opportunities. Of special interest to managers and consultants will be the course's focus on examples that illustrate how faulty economic reasoning leads to inefficient outcomes. The course will also emphasize strategic thinking, and will instruct students in the art of "economic naturalism"—the use of economic reasoning to understand and explain patterns of individual and firm behavior.]

[NBA 529 Economics of Imperfect Information (also ECON 757).
4 credits. Prerequisites: ECON 609–610 and 619. Not offered 1999–2000.
The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signaling theory, sequential choice theory, and search theory will be discussed.]

Finance

NBA 540 Advanced Corporate Finance (Theory and Practice)
Fall, spring. 3 credits. Prerequisite: NCC 506 or the equivalent. Students who took NBA 540 and/or NBA 548, 1.5 credit version, can not enroll in this course. H. Bierman.
This course is relevant for both investment banking and the treasurer's activities of an operating corporation. Most class sessions are lecture-discussion, but there are several corporate finance cases. The topics include common stock, preferred stock, debt securities (duration, convexity, inverse floaters, bond refunding, term structure, swaps), hybrids, security design, weighted average cost of capital, basic capital structure issues, cash distribution policy, and the buy versus lease decision. The use of debt to add value, mergers and acquisitions, corporate restructuring, LBO's and MBO's and Merchant Banking are also covered.

NBA 541 Economic Evaluation of Capital Investment Projects
Spring. 3 credits. Prerequisite: NCC 506 or permission of the instructor. B. Swaminathan.
This course deals with the evaluation of capital investment projects under uncertainty. The first part of the course focuses on traditional capital budgeting techniques using the discounted cash flow approach. This involves the estimation of cash flows, the treatment of risk and discount rates, the role of inflation and taxes, and the use of single factor and multi-factor asset pricing models in determining discount rates. The second part of the course focuses on the valuation of future investment opportunities of a firm using option pricing techniques. This includes issues such as flexibility options, options on real assets, evaluation of natural resource investments, and evaluation of new product investments. The methods of instruction are lectures, case discussion, spreadsheet exercises, statistical exercises, and seminars by practitioners. Students are evaluated on the basis of mid-term and final examinations, cases, and homework assignments.

NBA 542 Investments and Portfolio Analysis
Fall, spring. 3 credits. Prerequisites: NCC 501, 502, and 506, comfort with quantitative methods. H. Li.
This course deals with several important issues pertaining to investments in securities markets. First, it deals with portfolio diversification theory, asset allocation, asset pricing models such as CAPM, APT, etc. and empirical anomalies such as size effect, January effect, etc. Second, the course deals with the issue of evaluating portfolio performance, mutual fund performance, etc. Third, it deals with investment strategies based on patterns in historical security returns. This may be loosely considered as similar to technical analysis. In addition, the course deals with investment strategies based on publicly available information related to accounting and other market statistics, the use of earnings forecasts, etc. This may be considered as falling under fundamental analysis. Finally, the course deals with frictions to trading imposed by the institutional structure of securities markets. The goal of this course is to train the students in the latest tools and techniques in portfolio theory, and familiarize them with the latest developments in securities market research and applications. This is a highly quantitative course involving extensive analysis of security market data using regression analysis and other statistical tools. Grades in this course will be based on mid-term and final exams, cases, a project, and a trading game.

NBA 543 Financial Markets and Institutions
Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance core). M. O'Hara, W. Bailey.
This course applies principles of finance in order to understand modern financial markets. Central themes are the structure of financial markets, their pricing function, the interaction between financial markets and macroeconomic conditions, and the processes of innovation and regulation in these markets. We look at the workings of a variety of markets and develop an understanding of the different problems which different types of markets address. We study the question of market efficiency and the interaction between government policies and financial markets. We analyze issues in innovation and regulation with basic principles of financial economics. Throughout the course, we consider the relevance of these issues for the practical corporate, portfolio, or public sector decision-maker. The course includes ideas and evidence from academic research along with historical, institutional, and international perspectives. Recent events are used to illustrate concepts and develop analytic skills. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

[NBA 544 Bank Management
3 credits. Prerequisite: NBA 543. May not be offered 1999–2000. M. O'Hara.
The course provides an in-depth treatment of management issues in commercial banking. Topics include risk management, credit decisions and pricing, information problems, bank performance evaluation, international lending, and strategic planning. Students learn concepts through case studies and participate in a bank-simulation exercise.]

NBA 545 Corporate Finance
Fall, first half of semester. Spring, second half of semester. 1.5 credits. Prerequisite: NCC 506. J. Zender.
This half-semester course will cover some of the more advanced topics in the area of corporate finance, including executive compensation, corporate governance, and bankruptcy law. The course will include lecture/discussion sessions in which the main ideas and the existing evidence (i.e., the theory and the empirics) will be presented and discussed. Cases will be used to illustrate the importance and applicability of these ideas and to provide "hands on" understanding of the material.

NBA 546 Introduction to Derivative Securities
Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance Core) or permission of the instructor. C. Gukhal, H. Li.
The course introduces students to the pricing and hedging of derivative securities. The course briefly covers forward contracts, futures contracts, and swaps. The primary emphasis is on option contracts. Underlying assets include stocks, currencies, and commodities. Fixed income derivatives are covered in NBA 555. The method of instruction is primarily lectures, supplemented by guest speakers. A midterm and a final exam comprise roughly half the grade, with the remaining half determined by assignments and class participation. The course is a prerequisite for NBA 550, Advanced Topics in Derivative Securities.

NBA 547 Applied Financial Engineering (also OR&IE 565)
Spring. 4 credits. Prerequisites: NCC 506, NBA 546, NBA 555, NBA 542, OR&IE 523, OR&IE 523, COMS 211, permission of instructor. F. Diz.
This course is designed to integrate the students' course work in engineering (computing, stochastic modeling) and finance (options/futures and investment theory) through the completion of a project. The course project will be undertaken via student groups. It will involve the implementation of a financial model to a real world problem. Problems will come from the real issues facing the financial industry. The implementation will include model formulation, computer programming, data collection, and data analysis. The course format will be a mixture of lectures by faculty, industry professionals and students (project presentations).

NBA 549 Managerial Finance Immersion
Spring. 10 credits. H. Bierman, B. Hermalin, R. Hilton, L. Robinson, S. Smidt, S. Tasker.
This is a unique immersion course specifically designed for students planning to pursue finance careers in non-financial companies. Some students interested in non-finance careers (including consulting) may wish to consider this course, but they should recognize that it is not specifically designed for this purpose. A major objective of this course is to help students make more informed choices about how to launch their finance careers. The course will provide a high level of interaction with executives who work in the finance function in a diverse collection of non-financial corporations. These interactions will take place on campus, and in the facilities of the participating companies. A conscious effort will be made to have a very diverse sample of industries

and company sizes so that students can appreciate how the financial functions of a company are affected by the size of the company, its internal culture, and the economics and technology of the industries within which it operates.

NBA 550 Risk Management with Derivatives

Spring. 3 credits. Prerequisites: NBA 546 and NBA 555 (NBA 555 can be taken concurrently). R. Gukhal.

This course studies advanced topics in derivatives and risk management. The first part of the course covers topics in derivatives and develops the tools necessary for analysis and the seconnd part is their application to risk management. This course is intensive and demanding—about 50% more demanding than the Fall NBA 546 course.

[NBA 551 Current Topics at the Crossroads of Law and Finance

Spring. 3 credits. May not be offered 1999–2000. M. O'Hara.

This course explores a series of selected topics that involve important issues in law and finance. The premise of the course is that financial institutions of all kinds, whether they are known as insurance companies, banks, investments banks, or pension funds, invest money and advise clients in a wide variety of settings. This agency relationship introduces a number of important dimensions to the intermediary-client relationship and this course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.]

NBA 552 Cases in Corporate Finance

Spring. 3 credits. Prerequisites: NCC 506 or the equivalent. Recommended: NBA 540. Course is limited to second-year MBA's and Twelve-Month Option Students. Students who took NBA 535 and/or NBA 536, 1.5 credit version, can not enroll in this course. H. Bierman.

This course consists of discussions of corporate finance cases dealing with corporate financing. Students will form groups and formally present one case and critique a second. This is in addition to the normal class sessions. The cases in this course deal with mergers, acquisitions, valuation, corporate restructuring, LBO's, MBO's, Merchant Banking and the financing of corporations. The material applies equally to careers in investment banking and managerial finance. The course does not deal with sales trading or the details of managing an investment banking firm. Several executives working in corporate finance will present cases.

NBA 554 International Finance

Spring. 3 credits. Prerequisite: NCC 506 (Finance core) or permission of instructor. W. Bailey.

This course applies principles of finance to the international setting. International finance is different in two basic respects. First, the existence of multiple currencies adds risk to investment and financing decisions. Second, when corporations and portfolio investors cross international borders both problems and opportunities arise. We focus on these issues and highlight how finance theory can be extended to address them. We start with basic principles of international finance, then apply those principles to a variety of problems. The course helps students to understand the ideas and research results of international finance and to adapt what they learn to the practical problems of the increasingly globalized business world beyond the classroom. The first part of the class outlines three basic themes: exchange rate volatility, barriers to international capital flows, and the value of international diversification. The second part of the class presents a variety of problems, examples, and applications from the three basic themes. These range from corporate finance applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

NBA 555 Fixed Income Securities and Interest Rate Derivatives

Fall, spring. 3 credits. Prerequisites: NCC 506 (Finance core), NCC 501 (Quantitative Methods core). R. Jarrow.

This course is designed to study the pricing, hedging, and risk management of fixed income securities and interest rate derivatives. Topics to be studied include: the term structure of interest rates, interest rate swaps (caps, floors, collars), the risk structure of interest rates, credit risk spreads, and corporate bond valuation. The method of instruction is lectures and discussion, with computer illustrations an integral part of the class content.

NBA 556 Immersion in Investment Banking

Spring. 10 credits. Prerequisite: NCC 506. T. Dyckman, J. Hass, B. Hermalin, H. Li, L. Robinson, B. Swaminathon, S. Tasker.

This course is specifically designed for those students planning to pursue careers in investment banking. The course is inappropriate for students interested in following a finance career in non-financial industry or non-finance careers (including consulting).

This course is designed to meld the practical and the theoretical aspects of the field. We will be expecting a great deal of interaction and discussion between students, the participating faculty, and visiting practitioners. While the course is designed to make its students more attractive as candidates for employment in the investment banking profession, and we expect that some of the participating firms will be using their visits to identify candidates for summer internships, obtaining relevant summer internships remains the responsibility of the students.

NBA 557 Case Studies in Venture Investment and Management

Fall. 2 credits. Prerequisites: NCC 500 and NCC 506 or concurrent enrollment. W. Thomas.

A series of cases that focus on the venture capital investment process and on the subsequent management of such ventures. The primary perspective is that of the venture capitalist in assembling and evaluating information, preparing forecasts, assessing risks, developing and negotiating investment structure and terms, and deciding whether to invest. Cases also focus on management and financial problems, policy issues, and the relationship between venture capitalists and entrepreneurs. The secondary perspective is that of the entrepreneur and the techniques and skills employed in managing growing enterprises. Presentations by venture capitalists and entrepreneurs will supplement student discussion and analysis of cases. Grades will be based on written reports, quality of classroom participation, and a final exam.

NBA 558 Corporate Financial Policy

Fall, second half of semester. Spring, first half of semester. 1.5 credits. Prerequisite: NCC 506 (Finance core). J. Zender.

The course will deal with frontier topics in corporate finance and investment strategy. The financial world is changing at an increasing pace. New financial products are coming to the markets, and the financial structure of many corporations is becoming more and more complicated. Corporate financial officers and investors (such as money managers) need to know the driving forces behind the financial products (debt, equity, and more complicated products) to understand the products themselves. Understanding these issues will enable us to estimate firm values more precisely. The course objective is to enable you to better analyze financial situations you may encounter in the future, as well as firms' valuation techniques.

General Management

NBA 530 Entrepreneurship Lab

Fall, spring. 3 credits. Prerequisites: NBA 564 Entrepreneurship, or concurrent enrollment, or permission of the instructor. MBA students only. Letter/S-U optional grading. P. Sears.

Students will team up with entrepreneurs in the greater Ithaca area on defined projects, which will be integral to the companies' operations, such as production planning, new product launches, or assessing organizational structure. The goal of the course is for students to gain first-hand exposure to the application of functional knowledge in a start-up setting, while bringing real value to the host company.

NBA 531 Startup Forum: Cornell Technologies with New Venture Potential

Fall, spring. 1 credit. S-U grading only. R. Holsten.

The course will focus on research at Cornell, which may be a basis for new business ventures. It will address the fundamental ways in which university-based research differs from industrial research. Students will explore and critique the business potential of each concept.

NBA 532 Venture Partnerships—the Corporate Business Development Role, Big Company vs. Emerging Company

Spring. 1.5 credits. Letter/S-U optional grading. P. Sears.

In an era when large corporations are 'downsizing' and 'outsourcing' in order to save on fixed costs, and emerging companies are dependent upon strategic partnerships with large companies as part of their financing strategies, the business development executive can be found at the vortex of this activity. Priorities for the business development executive are distinctly different depending upon the size and history of the enterprise. This course, taught by a venture capitalist who has also served as a Corporate Development Vice President for a Fortune 100 Company, examines the multitude of roles played by managers in business development jobs. A significant amount of attention will be paid to

planning and managing the merger and acquisition process, as well as key elements in negotiation of the strategic partnership. There will be several guest speakers, each an acknowledged expert in the field. Students will be assigned deal-making tasks in the context of a case study that will be the centerpiece of the course. Class dates will be announced. Students will be expected to have read the Big Pharm case study prior to the first class.

NBA 559 The Venture Capital Industry and Private Equity Market

Spring. .5 credit. S-U grading only. D. BenDaniel, J. Reyes.

This course focuses on the industry from the practitioners' perspective. Topics include (1) an introduction to the private equity market focusing on the transactions that define the industry, its structure, participants, history and trends, (2) institutional private equity investing—now an increasingly important and dynamic part of the asset allocation mix, and (3) issues in private equity investing such as concentration in fewer, larger funds and the critical role of a new class of gatekeeper/consultants for limited partners. The course will involve four lectures and a final paper. The course is given jointly by Professor David BenDaniel and Jesse Reyes, Director of Research of Venture Economics Information Services.

NBA 560 Business Law I (also ARME 320)

Fall. 3 credits. Limited to juniors, seniors, and graduate students. D. Grossman.

The course introduces the basic tenets of law as they apply to businesses and their operations. Topics include personal property, contracts, agency, real property, and landlord-tenant concerns. Text readings and case studies are used. All students intending to be professional accountants are required to take the course, and it is strongly recommended for finance students:

NBA 561 Business Law II (also ARME 321)

Spring. 3 credits. Prerequisite: NBA 560 or permission of the instructor. D. Grossman.

The first portion of this course examines legal issues in the formation and operation of business enterprises, particularly partnerships, corporations, and limited liability companies. The second portion of the course will review selected topics in business law, such as employment discrimination, secured transactions, product liability, unfair competition, and international business law.

NBA 562 Estate Planning (also ARME 422)

Fall. 1 credit. S-U grading only. Limited to juniors, seniors, and graduate students. D. Grossman.

Fourteen sessions on the various aspects of estate planning. The law and use of trusts, the law of wills, federal and New York State estate and gift taxes, and probate procedures are covered.

NBA 563 Initial Public Offerings and Acquisitions

Spring. 3 credits. Letter/S-U optional grading. J. Shulman.

An in-depth look at initial public offerings (IPOs) and acquisitions from a practitioner's point of view. With respect to IPOs the course will cover: the applicable statutory framework, pre-offering corporate preparation (such as implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review prócess, underwriting arrangements, pricing, selection of a trading forum (i.e., NYSE, NASDAQ or AMEX) and the consequences of going public. Regarding acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale) and crucial aspects of acquisitions, such as letters of intent, continuity of employees, anti-takeover strategies, and non-competition agreements. Mr. Shulman is an attorney with experience in IPOs and acquisitions, and an adjunct professor at the Cornell Law School where he teaches a seminar course on this topic.

NBA 564 Entrepreneurship and Enterprise

Fall, spring. 3 credits. D. BenDaniel.

The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and work-outs, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures.

NBA 567 Management Writing

Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, M. Hittleman, C. Rosen.

Students learn to write clearly and effectively by focusing on the writing process as well as the finished product. Course topics include audience perspective, style, organization, strategy, and persuasion. There is a writing assignment every week. Students receive instructor and peer feedback. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

NBA 568 Oral Communication

Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, C. Rosen.

This course focuses on improving the presentation skills of management students. The course covers the areas of speaking formats (impromptu, extemporaneous, manuscript), delivery, organization, visual aids, and question/answer. Student speeches constitute the bulk of class time, with each student presenting seven or eight speeches in the seven-week session. The small class size allows for significant individual attention. Students receive feedback from classmates and the instructor, and have the opportunity to review in tutorials the videotapes of most of their presentations. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

NBA 569 Management Consulting

Fall, spring. 3 credits. A. McAdams.

The course is case-study oriented and focuses on strategic consulting. It has multiple objectives. First, it provides students with the opportunity to understand the role of the consultant and to gain indirect experience in that role through dealing with a broad range of practical and real-world issues. Second, it helps students improve their analytic skills through practice with case studies. Third, it provides students with information that they are unlikely to gain in other courses, as well as experience in making group presentations and evaluating them. In addition, students are required to write a comprehensive analytic term paper.

NBA 570 Leadership in Management

Spring (meets during winter break). 1.5 credits. MBA students only. S-U grades only. R. Peterson, RPW Executive Development and other Johnson School faculty.

This course is a partnership with RPW Executive Development to provide MBA students with the self-awareness and interpersonal skills required to be effective leaders (the general principles of leadership course is NBA 668). RPW has partnered extensively with the Johnson School Executive Education Department in the past. The course consists of five full-day training sessions. Staff from RPW and Johnson School faculty will provide training. The first two days will focus on self-awareness and employ several experiential exercises and self-assessment instruments including, the Campbell Leadership Index (CLI), Meyers-Briggs Type Indicator (MBTI), the Fundamental Interpersonal Relations Orientation-Behavior (FIRO-B), the Kirton Adaptation/Innovation inventory (KAI), and the Ambiguity Preference Scale (APS). Class members will also be trained in giving and receiving feedback from team members and faculty. Mid-week activities will include various leadership and team challenges, including a business simulation. Attendance is required each day of the course to receive credit. NOTE: most of the self-assessment instruments listed above will need to be completed prior to the first day of class to allow for scoring and analysis.

NBA 571 Cornell Management Simulation

Fall, spring. 1.5 credits. Restricted to second-year MBA students. J. Hass, S. Smidt.

This computer-based simulation is played by self-selected teams of four students who make marketing, production, and finance decisions for one of five companies operating competitively in the same industry. After the first week, during which the rules of the simulation are explained and the software used by each team is demonstrated, the teams make periodic decisions (meeting at their own convenience). At the beginning of the simulation, each team writes a Strategic Intent paper and, before the results of the last decision have been determined, each team presents an in-depth analysis of its performance and its strategy for the future in a "Board of Directors" meeting. Letter grading only, based on the value created for the company's shareholders (relative to other firms in the same industry), the team's Strategic Intent paper and the instructor's evaluation of team's performance at the BOD meeting. Students who have completed NBA

549 cannot take this course. Open to MBA IIs only. Meetings will be periodic throughout the semester.

NBA 572 Environment, Economics, and Management Policy

Fall.. 3 credits. Enrollment preference to Johnson School and other graduate students, others by permission. D. Chapman.

Environmental protection and pollution controls are of major importance in the U.S. and OECD countries, and are growing in importance in developing countries. This course analyzes the economic rationale affecting business and public decision making. It investigates the success achieved in the U.S., and the important role that business has played in that success. Case studies review government-business cooperation, methods of analysis, and management strategy. The course concludes with business leaders presenting their past experiences and current challenges for analysis by the class. The general goal of the course is to introduce future managers to the realistic process of successful environmental decision making.

NBA 573 Seminar in Sustainable Development

Spring, first half of semester. S-U grading only. 1–3 variable credits. A. McAdams.

This seminar-style course will involve readings and discussion of issues in environmental management, and will also feature four significant outside speakers on the subject of environmental management. (Students interested in doing consulting projects in environmental management will be accommodated in NBA 575, Advanced Consulting.)

NBA 575 Field Projects

Fall. 3 variable credits. J. Russo.

The course teaches how to frame unstructured business problems through a hands-on team project. Teams must identify what the central issues are, and then determine the most appropriate tools and concepts to provide insight into these issues. Students also learn to approach business problems from a cross-functional perspective. Specific conceptual content includes: project management; power, politics, and personalities in work groups; managing in for-profit versus not-for-profit organizations; and organizational change. Field Projects is not classroom-based. Although there will be a few class sessions early in the semester, the course structure will revolve around (a) periodic reviews and (b) coaching sessions as needed. The instructor team will contain one regular member of the Johnson School's faculty, an experienced executive, and an administator.

NBA 577 The Political, Legal, and Regulatory Environment of Business

Spring. 3 credits. Letter/S-U optional grading. R. Schuler.

The political climate, laws, regulations and government arrangements for infrastructure have a profound effect on the nature, operation, and profitability of business. Many of the most important decisions that top management makes are driven by political, legal, and regulatory considerations (e.g., the responses of Exxon to the Exxon Valdez oil spill and Union Carbide to the Bhopal, India, gas leak and the decision of AT&T to accept the division of its company in response to an antitrust suit filed by the United States government). Environmental and waste-management concerns are leading to new laws and regulations that will affect many aspects of business well into the next century, creating opportunities as well as posing problems. The course begins with a discussion of the political and economic foundations of business regulation. Students examine different areas of application, including economic regulation, environmental regulation, antitrust, and product liability. Guest speakers include leading scholars from throughout the university and business and government leaders.

[NBA 578 Business Ethics

Fall. 3 credits. Not offered 1999–2000. R. Frank.

Students examine actual situations in business, both in the United States and abroad, that involve ethical issues affecting individuals and organizations. They are challenged to decide on appropriate ethical positions.]

NBA 579 Business Strategy

Fall, first half of semester. 1.5 credits. Enrollment limited to second-year MBA students only. J. Suwinski.

A well defined strategy is essential for business success—describing where the business is going, how it's going to get there, and then providing a framework for making decisions along the way. Strategy is the responsibility of top executives of a company/business, and the ability to formulate effective strategy is one of the key skills that distinguishes General Managers from functional managers. This course will focus on the process of effective strategy formulation from the perspective of the general manager of a business unit. This perspective also applies to consultants working for clients on business unit strategy. Corporate strategy and its interaction with business unit strategies will be discussed, as well as tools useful for industry and company analysis. Situational analysis will also be covered. This course will compliment the core strategy course, with emphasis on understanding and practicing frameworks that are useful in case-based interviews. The course will draw heavily on the instructor's experience developing strategy for numerous businesses at Corning Incorporated. Guest speakers from industry and strategy consulting firms and also from industry will present their approaches to strategy, and the analytical tools they find most effective in working on business strategy. Students will gain experience, via assigned cases, in analyzing business problems/opportunities, using the strategic process to formulate effective business strategies, and in presenting their recommendations in written form and orally in class. A major case write-up and presentation in a mock board environment at the end of the course gives students an opportunity to play the role of strategy consultants working on a real case.

NBA 653 Strategic Alliances: Lessons from Experience

Spring. 1 credit. S-U grading only. J. Suwinski.

A wide variety of strategic alliances are being used today as companies try to leverage their resources for competitive advantage. This course will overview the spectrum of alliances, examining the strategic rationale and pros and cons of each major type of alliance. The primary focus of the course will be on joint ventures as a specific form of strategic alliance, where the success rate is less than 50%. The course will develop a set of principles that have contributed to success for Corning Incorporated. The course will be taught from the perspective of the general manager of a major business unit.

NBA 665 Managing Technology and Innovation

Spring. 3 credits. M. Lojo.

This course is designed for students who see themselves in settings where they have to develop new products or processes and for students who must implement change in existing products or processes. We discuss major issues involved in managing the introduction of new technology, including competitiveness, technology assessment, R&D strategy, and positioning. We examine how industries are transformed by new technologies and how innovations diffuse among firms. We also consider internal management issues, including such topics as the structure of innovative organizations, the design of incentive and reward systems that foster risk taking, the way innovation champions manage the new-product development through cross-functional teams, and the role of executive leadership. The course uses a combination of readings, lectures, discussions, case analyses, and guest lectures.

International Management

NBA 576 The World Geopolitical Environment of Business

Fall. 3 credits. Letter/S-U optional grading. R. Lind.

The geopolitical face of the world is changing at a pace that few could have envisioned even five years ago. The unification of Germany, the fall of communism, the institution of sweeping economic restructuring in the former Soviet Union, the move toward democracy with market economies in eastern Europe, the movement of Europe toward a unified economy, and the flirtations with reform and its implications in China are just a few of the many examples of the changing world environment of business. The course provides students with a view of those fast-paced worldwide changes. Topics covered include developments in western and eastern Europe, the former Soviet Union, the Pacific Rim, Central and South America and the Middle East and the role and fate of developing countries in the world economy. Guest speakers include leading scholars from Cornell and other universities and leaders in business and government.

NBA 580 Strategies for Global Competitiveness

Spring. 3 credits. A. McAdams.

Initially, students explore the role of government in several private-market industrialized nations—Japan, France, Germany, the United Kingdom, and Italy—for lessons the United States might learn and use. They investigate the impact in each of those countries of government policies on the global competitiveness of the country's firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, and electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela and Malaysia and newly emergent countries such as Singapore. Classes are run in a discussion format. This

course can be used to fulfill the strategy requirement.

[NBA 581 Special Topics—Contemporary Development of Southeast Asian Economies
Spring. 3 credits. Not offered 1999–2000. I. Aziz.
This course will analyze the patterns and processes of Southeast Asian economic development during the last three decades. The five plus two countries in the region that will be the focus of the course include Thailand, Indonesia, Malaysia, Singapore, the Philippines, Brunei and Vietnam. The topics will be divided into the following categories: Southeast Asian economic development, regional economic cooperation in Southeast Asia, and the financial crisis of the 1990's. The course will assess important factors and consequences of the region's development patterns and use international comparative analysis to explicate the relative position and uniqueness of the region's performance. Evaluation will be based equally on the student's participation in class discussions and debates and on a term paper.]

NBA 584 International Competitive Strategy
Fall and spring, first half of semester. 1.5 credits. Letter/S-U optional grading. This course can be used to fulfill the strategy requirement. J. Katz.
Focuses on the development of competitive strategies in the global environment—including the identification of internationally relevant strengths and weaknesses, the movement and use of resources to gain competitive advantage, and strategies to confront competitors, both domestic and multinational.

NBA 585 Cross-National Management
Fall, second half of semester. 1.5 credits. Letter/S-U optional grading. J. Katz.
Focuses on the differences in managerial style across countries and develops skills to deal with these differences. Most of the material will be applicable to all countries, though two specific countries will be highlighted each semester.

NBA 586 Global Management Structures
Spring, second half of semester. 1.5 credits. Prerequisites: the new version of NBA 584. Letter/S-U optional grading. J. Katz.
Focuses on the control, communication and coordination systems within multinational corporations. Design and development of appropriate systems, to ensure enactment of corporate strategy will be addressed.

NBA 587 International Mergers & Acquisitions
Spring. 1.5 credits. J. Hanks.
This course covers issues relating to mergers and acquisitions in an international context. Topics include business due diligence, pricing and negotiation and other important topics from both the buy and sell side. The course will use both lecture and case formats. Students will be evaluated on the basis of group and individual written assignments. The instructor for the course, Mr. Arthur Rosenbloom, is special partner and former chairman of the board of Patricof & Co. Capital Corp, a New York City–based firm specializing in mergers and acquisitions, private placements, and valuations of going concern businesses for tax and corporate purposes. Patricof has offices in New York and Palo Alto, affiliates in London, Paris, Zurich, Madrid, and Munich and is part of Apax Partners, which includes Patricof & Co. Ventures, Inc., one of the world's largest international venture capital firms. He holds a bachelor's degree from Bucknell University, a master's degree from Columbia University, and a law degree from Cornell. He has taught a similar course at Columbia.

Beginning with the third meeting of the course, Mr. Rosenbloom will conduct the course via a video-teleconferencing link from New York City.

NBA 590 Managing in Developing Countries
Fall, first half of semester. 1.5 credits. Letter/S-U optional grading. J. Katz.
This class centers on the unique features of industrialized and newly industrializing countries as hosts for multinational business operations. It is a case-based course; each class is spent discussing one or two cases. Topics include environmental variation and how to deal with it and concentrated national power structures and their management. We cover a large number of countries spread throughout the world. Students are responsible for providing in-class updates on the countries discussed. Grading is based on the country update presentation, a final case write-up, and class participation.

NBA 592 Experience in International Management
Spring. 1.5 credits. S-U grades only. J. Katz.
The objective of this course is to combine classroom sessions and international experience to increase awareness of business environments outside the U.S. NOTE: participation in a faculty approved study trip is required to complete this course (fee charged). On trips, students will visit local businesses, subsidiaries of foreign multinationals, government officials, local business school students, and others. Students must also attend two pre-trip meetings (1 1/4 hours each) and two Saturday meetings during spring semester (2 1/2 hours each). Those meetings will be used to present information on international business conditions, industrial structures, management styles and also, to develop cross-cultural skills. A final paper, integrating the material learned in the classroom with their experiences, will be required.

Management Information Systems

[NBA 600 Database Management
3 credits. May not be offered 1999–2000. L. Orman.
Database technology is the principal tool of bookkeeping, reporting, and auditing. It is also the primary infrastructure technology for all information systems. Not only is it critical to managing the information flow in modern organizations, but also in building systems to support managerial decisions. The course introduces the basic principles of management, design, and use of databases in organizations. Topics include: data storage and organization, efficiency and optimization, retrieval and end-user languages, reporting and auditing, and the impact on the organization. Students design, create and use databases using various database management systems.]

NBA 601 Electronic Commerce
Spring. 2 credits. Letter/S-U optional grading. Course will meet for the first nine weeks of the semester. L. Orman.
Electronic commerce is the use of information technology in conducting economic transactions and managing businesses over computer networks. It is a phenomenon that has captured the public attention because of its wide-ranging implications for businesses, markets, public institutions, and the general public. Electronic commerce involves a wide variety of cooperating technologies such as communications, networks, databases, expert systems, and multimedia. It also impacts a wide variety of managerial issues. Electronic commerce created a new emphasis on information technologies and systems in management. It led to the development of new technologies and new combinations of existing technologies to support management. On occasion, it radically altered business practices and the role of management.

The students in this course will learn to conduct economic transactions and manage businesses on the Internet. All major technical and managerial issues will be covered through computer exercises on the Internet, and case studies and examples of businesses on the Internet.

NBA 612 Imaging and the Electronic Age
Fall. 3 credits. D. Greenberg.
The advances of computer graphics, computer processing power, network bandwidths and video compression technologies are forcing the merger of the telephone, television and computer industries. The influence of these technologies has created paradigm shifts that will drastically change the way we communicate, how we are educated, the way we work, design, and in essence, how we will live in the next century. We are just beginning to fathom how these changes will influence our modus operandi and greatly modify our traditional patterns of behavior, both personal and organizational. Clearly, business and industry management will have to understand the implications of the advanced technology. This course will start by presenting historical technological advances that created major paradigm shifts for communications. Advances in computer technology emphasizing the fundamentals behind the increases in processing power, video and computer graphics capabilities, and network transmission will be presented. The latter half of the course will cover the effect of these scientific advances on many discipline-specific areas including photography, the film industry, the entertainment and animation industry, television broadcasting, publishing, as well as the computer industry itself. Sessions will be devoted to the social and legal issues rising from the rapid advances in electronic communication. In attempting to predict the disruptive changes of the future, it is best to understand the technologies themselves. Thus, students with technology or science backgrounds are preferred. Although no computer programming will be required, a working knowledge of computers is necessary. The course will be especially tailored to a business school and industrial concerns and will have interactive live demonstrations at the state-of-the-art laboratory of the Program of Computer Graphics. No prior knowledge in computer science is required.

[NBA 614 Managing in the Information Age

Fall, first half of semester. 1.5 credits. Not offered 1999–2000. A. McAdams.

In this course we explore a topic that is just beginning to emerge: the implications of the explosion of the Internet and interactive multimedia communications for the way managers think and manage. We examine the origins of the Internet and some of the forces that have let to its rapid development, noting along the way, why and how it has "blindsided us" as Andy Grove of Intel and Bill Gates of Microsoft candidly stated. We then look at how information is being used today in pioneering applications in organizations of various kinds based, in part, on original case studies and on guest lecturers. Throughout the semester the student will be asked to identify new and innovative use of modern information technologies. The course itself will evolve—even in real time—with the developments in the field.]

NBA 615 Information Technology to Manage Business

Fall. 1.5 credits (variable). S-U grades only. A. McAdams.

This course will rely on visiting speakers from several technology-based firms. The speakers will address how to manage the information technology function as a business and how to use IT to deal with business problems. Speakers will come from hardware companies, software companies, and other organizations dealing with large issues of managing the information resource. There will be assignments, with student groups interacting with speakers, and a short paper at the end of the course. The course will meet approximately 10 times during the semester for up to two hours. H-P, Intel, and other firms have indicated an interest in being involved.

Marketing

[NBA 520 Pricing and Strategy

Spring, second half of semester. 3 credits. Prerequisite: NCC 502. May not be offered 1999–2000. V. Rao.

This course extends material introduced in the core microeconomics course, where the focus is on pricing decisions. The course is taught very much like the core microeconomics course; i.e., the course consists mostly of lectures and problem sets that utilize the ideas contained in the lectures. One difference is that some understanding of calculus is required. The grading for the course is based on a midterm exam, a final exam, and a paper. Specific topics covered include price discrimination, peak-load pricing, product line pricing, and pricing when information is asymmetric.]

[NBA 620 Marketing Research

Fall. 3 credits. Prerequisites: NCC 501 and NCC 503, or the equivalent. Not offered 1999–2000. V. Rao.

This course deals with marketing research as a critical support function in corporations. The broad objective is to provide a fundamental understanding of marketing research methods employed by better managed firms or proposed by leading academicians. The course is aimed at the manager, the ultimate user of marketing information, who is responsible for the scope and direction of research activities involved in obtaining, analyzing, and interpreting results of research. The course will cover the use of secondary sources of marketing information as well as designing studies for collecting primary date. Students will be exposed to up-to-date methods in research design, qualitative research, measurement, data collection and analysis. The emphasis will be on evaluating research methods and on interpretation and use of results rather than on mathematical derivations. Students will also be exposed to the practical side of marketing research through case studies, problem sets and projects.]

NBA 621 Advertising Management

Fall. 1.5 credits. Prerequisite: NCC 503 (Marketing core). D. Stayman.

The course is designed to give students an understanding of the advertising and promotion management process. It covers the components of a successful advertising campaign and helps students develop an appreciation of the issues involved in advertising planning and decision making. They also learn how recent social-science findings and theory can facilitate advertising management.

NBA 622 Marketing Strategy

Fall. 3 credits. Prerequisite: NCC 503 (Marketing core). V. Rao.

The course balances theoretical and practical approaches to the development and evaluation of marketing strategies for multiproduct firms. It considers various environmental opportunities and constraints in developing and evaluating integrated marketing strategies for new and established products and services. Recent research results are applied to decisions on product-market boundary definition, resource allocation, product positioning, and competitive reactions. It includes selected current topics such as brand equity, acquisitions, and lead-user analyses. Students use case studies extensively to develop skills in strategy analysis and to enhance skills in assessing external threats and opportunities. They employ computer-assisted market strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy.

[NBA 623 Customer-Based New Product Development

Fall, spring, first half of semester. 1.5 credits. Prerequisites: NCC 501 and NCC 503. Not offered 1999–2000.

The successful introduction of new products requires careful planning and systematic screening and testing. This course covers models and methods that are useful to managers in the development (e.g., specification of products and services) and marketing of new products. Heavy emphasis is placed on the measurement of consumer preferences. Students are required to complete a group project, consisting of a measurement instrument, data collection (from at least 30 respondents) and data analysis, for a self-chosen product category. The method of instruction consists of a combination of lectures and discussion of cases and articles. Performance is evaluated primarily based on exams and the group project.]

NBA 624 Immersion in Brand Management

Spring. 15 credits. Prerequisites: NCC 500, 501, 502, 503 and 506. Restricted enrollment permission of the instructor required. G. Babbes.

This is a full-time program for the semester; students will not be able to take other courses concurrently. The course objective is to begin training students to think and act like brand managers, some of the best-trained and most upwardly mobile professionals in industry. It will provide students with a unique opportunity to begin internalizing the concepts, principles, and tools necessary to achieve success in brand management. While the course will focus on managing traditional consumer brands, high-tech products, services, and global branding will also be addressed. In-class methods will consist of: (1) academic and industry lecturers; (2) on-site visits with marketing and manufacturing professionals; (3) case and project discussions and presentations; and (4) a brand management simulation. Course requirements will consist of (1) extensive readings; (2) individual case write-ups and presentations; (3) group projects and presentations (including a capstone business plan development project); and (4) in-class exams. There will be considerable off-campus travel for field study. Note that this course is an approved substitute for both core courses, NCC 508 and NCC 504.

NBA 625 International Marketing

Spring, second half of semester. 1.5 credits. Letter/S-U optional grading. Recommended: NCC 503. J. Katz.

International Marketing is designed to train students to take a domestic product and expand it into international markets successfully. Market selection, international market research issues, and international marketing strategies are all discussed. The term project (actually submitted in three parts throughout the term) requires that students choose some product and develop a plan for taking it abroad. Each class includes cases, therefore, class preparation is essential. Grading is based on the term project, the final, and class participation. Core marketing provides a useful background, but is not a prerequisite.

NBA 626 Consumer Behavior

Spring. 3 credits. A. Isen.

Topics include factors that influence response to advertising of various kinds, purchase decisions, product perceptions, response to promotion, consumer satisfaction, and the basic methodologies for understanding consumer behavior.

NBA 627 Affect, Brand Equity, and Internet Marketing

Spring. 3 credits. A. Isen.

The course will focus on concepts central to brand equity, including brand association, brand perceptions, brand loyalty, relationship marketing and brand extensions and revitalization, with a special focus on the role of affect (feelings) in decision-making and thought processes that are fundamental to these and other concepts central to brand equity establishment, maintenance, and management. Additionally we'll cover the emerging area of internet marketing from the consumer perspective relative to brand equity, including consumer response to the internet as a medium and marketing channel.

[NBA 630 Policies for Marketing Channels
Spring. 3 credits. Prerequisite: NCC 503. Not offered 1999–2000. V. Kadiyali.
Marketing channels are analyzed as a chain of interdependent and interlocking organizations that produce and deliver goods and services to various types of consumers. We will look at various aspects of these relationships, such as efficiency, conflict, incentives and government intervention. Instruction consists of lectures, cases and guest speakers. Evaluation is based on cases and a final project (presentation and write up) and on class participation.]

NBA 631 MARKSTRAT Simulation
Fall, second half of semester. 1.5 credits. Prerequisite: NCC 503. V. Rao.
MARKSTRAT Simulation offers an opportunity for students to make various marketing strategy decisions in a realistic, dynamic, simulated, competitive environment. Students, working in teams, will manage a portfolio of a firm's products for several years (periods). They will learn how to make long term decisions (introduction of new products) and will deal with various cross-functional issues related to marketing management (e.g., research and development, product design, and budgeting). A major portion of the course will be devoted to an understanding of the basic concepts (e.g., competitive positioning, resource allocation, market segmentation and product design) on which the game is based and to a discussion of suitable methods of analysis of data generated in the game. Students will develop an initial strategy statement and strategic marketing plan for their firm. This game has become quite popular in various schools of management that are perceived to be competitive to the Johnson School. Students will develop an initial strategy statement and strategic marketing plan for their firm.

NBA 633 Internet Marketing
Spring, first half of semester. 1.5 credits. S-U grades only. V. Rao, D. Stayman, V. Kadiyali.
This class explores the effect of the internet on marketing. The topics include an overview of the on-line industry, business models for the internet, advertising and promotions on the internet, marketing research on the internet, loyalty programs for internet marketing, and disintermediation or channel conflict resulting from internet distribution. The course will comprise industry speakers from Cendant, CSC, Netcentives, H-P, 1st USA, Catalina marketing, and Bausch and Lomb and others. Course requirements include write-ups on a subset of speakers, and a final report and presentation on an internet marketing issue of your choice. NBA 638 is restricted to MBA II's because the same information is available for MBA I's in the strategy core.

[NBA 635 Marketing Models
Fall. 3 credits. Prerequisite: NCC 503. Not offered 1999–2000. V. Kadiyali.
Students learn how to use mathematical models to solve marketing problems. The objective is to develop students' skills in evaluating marketing models and implementing them in management practice.]

[NBA 637 Direct Marketing
1.5 credits. Prerequisite: NCC 503 Marketing Management, or equivalent. Not offered 1999–2000. V. Rao, D. Stayman.
The objective of this short course is to expose MBA students to selected contemporary issues in the area of direct marketing. In addition to providing an overview of the direct marketing industry and trends in database technology, the course will address major strategic and tactical issues in the management of direct marketing. The discussion will mainly consider the perspective of a marketer interested in employing the opportunities in direct marketing as an integral element of the marketing mix for a product/service. It will also address appropriate ethical concerns with direct marketing. To acquire a flavor of various practices in the industry, students will visit one or two direct marketing firms in New York City or its vicinity toward the end of the course.]

NBA 638 Analysis of Competitive Decision Making
Spring. 3 credits. Prerequisite: NCC 502 (Microeconomics core course). V. Kadiyali.
This course brings methods of micro-economics analysis to competitive decision making. Specifically, we will address issues relating to optimal competitive decisions for a firm interacting with current and potential rivals. We discuss how firms can, by their choice of appropriate decisions, best signal to rivals their intentions and their degree of commitment to them. We also look at sustainability, flexibility, and correction of decision choices. Game theoretic perspectives are used to understand these concepts. The dimensions of competitive strategy that we look at include product proliferation, R&D and patent policies, choice of compatibility with existing products, bundling of products, investing in capacity, vertical integration, choice of channels of distribution partners, pricing, and promotions. We also discuss problems caused in the optimal choice and implementation of firm strategies when information is imperfect. Specifically, we look at issues of moral hazard and adverse selection, and how these issues affect firm choices of strategies (e.g., pricing, choice of channel partners, etc.). Instruction includes lectures and cases. Student evaluation is based on cases, class participation and a final project. This course can be used to fulfill the strategy requirement.

NBA 639 Data-Driven Marketing
Fall. 3 credits. A. Ainslie.
Data-Driven Marketing will introduce the future brand manager or marketing consultant to the use of market data to evaluate and construct pricing and promotional strategies. The course will introduce new sources of data available on product purchases and consumers' reactions to the marketing environment. The course focuses on the practical use of popular data sources. Approximately 70 percent of the course will cover panel data on high-volume consumer packaged goods, and 30 percent will be devoted to direct or "database" marketing. The goal of this course is to introduce these new data sources and provide a solid foundation for the development of analytic tools. Examples are drawn from the consumer packaged goods industry. This course makes intensive use of EXCEL and the WINDOWS computing environment. The data has been extracted and organized for use in EXCEL; this allows the student to concentrate on learning modeling tools without a large investment in computing or data manipulation methods.

Operations Management

NBA 641 Logistics and Manufacturing Strategy
Spring. 3 credits. Letter/S-U optional grading. Prerequisite: NCC 508, OR&IE 410, or permission of the instructor. L. J. Thomas.
The course is about supply-chain integration, which involves strategic management of the values chain, from materials to customer. Students discuss operations strategy issues that are important to both manufacturing and service. The course emphasizes written and oral communication skills. About a fourth of the classes are spent on case studies, with small groups presenting their analyses of them. There is one mid-term examination, but the majority of the grade is evaluated based on projects and class participation. There is an option of replacing some assignments with a "live case," a project with a local company.

[NBA 644 Quality Management
Fall. 3 credits. Prerequisite: NCC 508 or permission of the instructor. Not offered 1999–2000. L. Robinson.
The theme of this course will be the design and improvement of products and processes. The topics to be covered within this survey course include: (1) principles of process improvement (the formal 7-step improvement process, quality tools); (2) process monitoring (statistical process control, process capability, Motorola's '6 sigma' program); (3) product design (the Kano model, customer satisfaction and delight, issues in survey design, quality function deployment (QFD), design and manufacturability); (4) product delivery and support (quality in service and administration, satisfaction guarantees, and customer loyalty); (5) process design and improvement (kaizen vs. business process reengineering, benchmarking, design of experiments); and (6) issues in implementing quality improvements. The structure of the course will emphasize 'hands-on' applications of the principles and learning's from the course. The guest speakers and local plant tour will be supplemented with Harvard cases, several exercises (e.g., assuming the role of a Baldridge Examiner, finding and correcting the root causes of problems in a process) and homework assignments (to allow you to work through quantitative problems without any time pressure). A sizeable component of this course will be a group project, which applies the formal quality improvement process at a local firm.]

[NBA 645 Product Development Practicum
Spring. 3 credits. Not offered 1999–2000. J. Thomas.
This course centers on developing a major new product for firms. It will involve training in creativity by a consulting firm and readings in product development. This course will provide the opportunity to learn from many different sources, consultants, faculty, and executives.]

NBA 646 Managing Knowledge-Based Services
Spring. 3 credits. Prerequisite: NCC 508. M. Lojo.
This course is designed for students who plan to manage technical and high-skill service enterprises. We discuss the pros and cons of the "service economy" and examine the unique aspects of producing service products, focusing on high-end, high value-added services. Although some consumer service examples will be included, the primary emphasis is on corporate and industrial services that occur between large firms, including technical, financial and expert services. We will explore the use of traditional operations management tools in the context of service industries, as well as concepts from other disciplines such as sociology, psychology, and economics. In addition to managing the efficient provision of services, we will address service design, marketing, evaluation, and improvement. The course uses a combination of case analyses, discussion, student projects and presentations, guest lectures, and readings.

NBA 650 Semester in Manufacturing Management
Spring. 15 credits. Enrollment limited; permission of instructor required. J. Bradley, D. Conway, J. Suwinski.
This is a full-time program for the semester; students will not be able to take other courses concurrently. The course is concerned with the integration of technological, human-resource, logistical, and financial considerations to produce a manufacturing enterprise that can respond quickly and effectively to market requirements. It will be taught by a team of faculty and industrial practitioners, and much of the student work will be team-oriented. There will be considerable off-campus travel for field study to a variety of manufacturing plants. Note that this course is an approved substitute for both the Managing Operations and Management and Organizational core courses, i.e., NCC 504 and NCC 508. Johnson School students should complete NCC 506 before taking this course.

[NBA 651 Employment Relations
Spring. 1 credit. Not offered 1999–2000.
The course will be offered over two full days and will consist of three parts: (1) an overview of U.S. labor and employment law and its effect on today's management, (2) a case analysis of what can lead a workforce to seek union representation to be able to bargain collectively over wages and conditions of employment, and (3) an examination of union-management productivity partnership.]

[NBA 652 Integrating Product Design, Marketing, and Manufacturing
Spring. 1 credit. Not offered 1999–2000. J. Bradley, J. Thomas.
The course will make the necessity of integrating product design, marketing and manufacturing for a firm's success apparent. Managerial tools and useful concepts that facilitate this integration will be introduced. Students will have the opportunity, through homework assignments or projects, to make a more in-depth foray into the course topics.]

Organizational Behavior

NBA 663 Managerial Decision Making
Fall. 3 credits. J. Russo.
This course presents practical concepts from the behavioral sciences that can serve as guides to managerial action. Lectures, cases, and exercises are used to acquaint students with new perspectives on decision making, critical thinking, problem solving, and group processes. Taken together, these perspectives offer a trouble-shooter's guide to the uncertainty, complexity, and conflict in the business world.

NBA 666 Judgment and Negotiations
Fall, spring. 3 credits. K. O'Connor.
Judgment is the art and science of transforming perception into thought or opinion. Negotiation is the art and science of securing agreements between two or more interdependent parties. The purpose of this course is to understand the theory and processes of negotiation as it is practiced in a variety of settings. This course is designed to complement the technical and diagnostic skills learned in other courses at the Johnson School. A basic premise of the course is that while a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills is needed for these solutions to be accepted and implemented. The course will highlight the components of an effective negotiation and teach students to analyze their own behavior in negotiations. The course will be largely experiential, providing students with an opportunity to develop their skills by participating in negotiations and integrating their experiences with the principles presented in the assigned readings and course discussions.

NBA 667 Managing Intellectual Capital
Fall, first half of the semester. 1.5 credits. B. Nelsen.
As the twentieth century draws to a close, economies long based on manufacturing are giving way to those based on the management of information, the production of knowledge, and the provision of services. Hence, organizational profits will increasingly flow from intellectual rather than material capital. A firm's success will hinge upon the manager's ability to recognize and adapt to the unique challenges presented by managing intellectual capital. This course examines this shift in the business environment and its practical implications for managers. Topics addressed include (1) motivating and managing knowledge workers; (2) employee empowerment and self-managing teams; (3) organizational learning; and (4) leadership for innovation and creativity.

NBA 668 Leading Teams and Organizations
Fall. 3 credits. R. Peterson.
This course focuses on general principles for successfully leading teams and organizations (the personal development course is NBA 570). The course draws on the latest research in team decision making and organizational leadership to address questions such as, (1) what is the difference between leadership and management, (2) how does a leader establish trust and commitment to an organization (e.g., David Kearns at Xerox), and (3) how do leaders transform organizations (e.g., Jack Welch at GE)? The course consists primarily of case studies of leaders, but also includes some experiential and group activities. Course grading is based on class participation, group case analyses, and a final individual case analysis. Priority is given to MBAs.

NMI AND NRE RESEARCH AND ADVANCED STUDIES

NMI 500–502 Directed Reading and Research
Fall, spring. 1, 2 or 3 credits. S-U grading only.
Students undertake special-interest research under the supervision of faculty members. Registration is limited to students who have the approval of their advisers and of the faculty members involved in the research.

NMI 510 Multi-Cultural Work Environments
Spring. 1 credit. S-U grading only. Restricted to Johnson School students. C. Rosen, B. Mink.
NMI 510 is a independent study course that is open to students whose summer internships will be in a country other than that of their citizenship or prior work experience. The goal of the course is to promote an understanding of the cultural assumptions we bring to the work environment and the effects of cultural differences on organizational interactions and productivity. Registration for the course occurs in the spring semester prior to the internship, and grades are posted in the following fall semester after completion of the course project (a 10-page paper). Students may register for the course after obtaining an internship offer and completing the paperwork for the course instructors. International students will obtain and process work authorization forms with the International Students Office. See Charlotte Rosen (Sage 304) for further details about the academic and immigration requirements for NMI 510.

DOCTORAL SEMINARS

NRE 502 Doctoral Seminar In Marketing
3 credits. A. Ainslie.
This class is intended to introduce students to empirical research in marketing. There will be a strong focus on the historical development of econometric specifications of consumer choice models (with an emphasis on heterogeneity and issues of dynamic consumption patterns), and Bayesian methods in marketing. However, by the very nature of the class, the content will to some extent be driven by the participants in the course. Teaching will be interactive, and each participant will be expected to present one of the papers studied to the rest of the class. Furthermore, each participant will be expected to replicate the results of one of the papers, requiring the participant to write the necessary code and briefly discuss their findings.

Enrollment is by consent of the instructor. Students are required to have taken a graduate level course in either mathematical statistics or econometrics, although this restriction may be waived in special cases. Students are welcome to sit in on parts of the class; for example, the section on Bayesian Methods will be broad enough that students from other areas may find the presentation useful.

NRE 504 Doctoral Seminar in Accounting
3 credits. Staff.
The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research. This course is for Ph.D. students only.

NRE 507 Doctoral Seminar: Affect and Cognition
Fall. 3 credits. Prerequisites: courses in statistics and experimental design. A. Isen.
The course examines research on some of the ways affect influences such thought processes as memory, decision making (including risk taking), and problem solving (including creative problem solving). Applied topics relevant to management concerns (for example, organizational behavior and consumer behavior) as well as other theoretical and applied topics (among them medical decision making, social interaction, self-concept, and cognitive and affective development) are considered, depending on student interests.

[NRE 509 Doctoral Seminar in Research Methods
3 credits. May not be offered 1999–2000. Staff.
This course concerns the fundamentals of scientific research: theory, research design, methods, and criticism. It is designed for doctoral students who wish to undertake research publishable in scholarly journals. Little or no scientific training is assumed. Statistics will not be emphasized; however, familiarity with elementary statistical concepts and inference will prove useful. The course will cover: 1) the principles of theory building; 2) the pros and cons of various general research designs (laboratory and field experiments, surveys, interviews, participant observation, archival studies, simulations, and formal mathematical models); and 3) the structure of research papers and the review process.]

[NRE 510 Ethnography in Organizations
3 credits. May not be offered 1999–2000. B. Nelsen.
This course is a comprehensive introduction to the philosophy and practice of fieldwork in an ethnographic tradition, with particular emphasis on conducting fieldwork in organizational settings. The course has four primary objectives: (1) to acquaint students with various philosophies and techniques for doing field research in organizational settings; (2) to provide students with an opportunity to engage in field research; (3) to provide students with an opportunity to develop unique insights into an organizational setting(s) and contribute to the theoretical understanding of social phenomena in their field of study; (4) to provide a climate of social support throughout the student's field experience.]

NRE 511 Doctoral Seminar in Finance—Corporate Finance
1.5 credits. Staff.
This course will cover topics in corporate finance and empirical asset pricing.

[NRE 513 Doctoral Seminar in Finance—Market Microstructure
3 credits. May not be offered 1999–2000. Staff.
The course examines recent research in market microstructure, particularly as it relates to theoretical issues. Topics covered include asymmetric information in securities markets, market behavior, and market structure.]

[NRE 514 Doctoral Seminar in Finance—Asset Pricing Theory
1.5 credits. Permission of instructor required. May not be offered 1999–2000. Staff.
This course will cover asset pricing theory as based on either economic equilibrium or the absence of arbitrage. The method of instruction is primarily presentations given by the students on important papers. The presentation and the final exam each comprise about half the grade.]

[NRE 515 Doctoral Seminar in Behavioral Decision Research
Spring. 3 credits. May not be offered 1999–2000. J. Russo.
This seminar focuses on decision making. The first topic is competing paradigms for research in decision making. A central question of this topic is, "Which paradigms have been most successful or show promise in being most productive in the future?" Other topics will be guided by the interest of participants. They include connectionist approaches, dynamical systems, the interpretation (and distortion) of information, consistency-based theories, biased allocation of attention, and memory—all as applied to the theories and phenomena of decision and judgment.]

[NRE 517 Doctoral Seminar in Information, Incentives, Games, and Contracts
3 credits. May not be offered 1999–2000. Staff.
An introduction to game theory and information economics for a broad audience — those who will construct (or just consume) game-theoretic models in applied fields of management (including accounting, finance, marketing, and organizational behavior) and applied fields of economics (including industrial organization, labor economics, macroeconomics, and international economics). The course emphasizes applications at least as much as pure theory; each step in the theory is illustrated by applications from management and economics before the next step in the theory is introduced. The wide variety of applications shows that similar issues arise in different fields and that the same game-theoretic tools can be applied in each setting.]

FACULTY ROSTER

Ainslie, Andrew, Ph.D., U. of Chicago. Asst. Prof., Marketing
Babbes, George, Ph.D., U. of California at Berkeley. Asst. Prof.. Marketing
Bailey, Warren B., Ph.D., U. of California at Los Angeles. Assoc. Prof., Finance
BenDaniel, David J., Ph.D., Massachusetts Inst. of Technology. Don and Margi Berens Professor of Entrepreneurship
Bierman, Harold, Jr., Ph.D., U. of Michigan. Nicholas H. Noyes Professor of Business Administration
Bloomfield, Robert J., Ph.D., U. of Michigan. Assoc. Prof., Accounting
Bradley, James R., Ph.D., Stanford U. Asst. Prof., Production and Operations Management
Conway, Richard W., Ph.D., Cornell U. Emerson Electric Co. Professor of Manufacturing Management, Prof., Management Information Systems, Director, Semester in Manufacturing
D'Souza, Julia, Ph.D., Northwestern U. Asst. Prof., Accounting
Dyckman, Thomas R., Ph.D., U. of Michigan. Ann Whitney Olin Professor of Accounting
Elliott, John A., Ph.D., Cornell U. Prof., Accounting, Associate Dean for Academic Affairs
Frank, Robert, Ph.D., U. of California at Berkeley. Professor of Economics
Greenberg, Donald P., Ph.D., Cornell U. Prof., Management Information Systems
Gukhal, Reddy, Ph.D., Columbia U. Asst. Prof., Finance
Hass, Jerome E., Ph.D., Carnegie-Mellon U. Prof., Finance and Business Strategy
Haveman, Heather A., Ph.D., U. of California at Berkeley. Prof., Organizational Behavior
Hermalin, Benjamin E., Ph.D., Massachusetts Inst. of Technology. Prof., Economics
Hilton, Ronald W., Ph.D., Ohio State U. Prof., Accounting
Isen, Alice M., Ph.D., Stanford U. S. C. Johnson Prof., Marketing
Jarrow, Robert A., Ph.D., Massachusetts Inst. of Technology. Ronald P. and Susan E. Lynch Professor of Investment Management, Prof., Finance and Economics
Kadiyali, Vrinda, Ph.D., Northwestern U. Asst. Prof., Marketing and Economics
Lee, Charles M. C., Ph.D., Cornell U. Prof., Accounting and Finance, Henrietta Johnson Louis Professor of Management, Director, The Park Center for Investment Research
Li, Haitao, Ph.D, Yale U. Asst. Prof., Finance
Libby, Robert, Ph.D., U. of Illinois. David A. Thomas Professor of Management, Prof., Accounting and Behavioral Science
Lind, Robert C., Ph.D., Stanford U. Prof., Economics, Management, and Public Policy
Lojo, Maureen P., Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Production and Operations Management
McAdams, Alan K., Ph.D., Stanford U. Assoc. Prof., Managerial Economics
McClain, John O., Ph.D., Yale U. Prof., Quantitative Analysis
Michaely, Roni, Ph.D., New York U. Assoc. Prof., Finance
Nelsen, Bonalyn, Ph.D., Cornell U. Asst. Prof., Organizational Behavior
Nelson, Mark W., Ph.D., Ohio State U. Assoc. Prof., Accounting
O'Connor, Kathleen, Ph.D., U. of Illinois. Asst. Prof., Organizational Behavior
O'Hara, Maureen, Ph.D., Northwestern U. Robert W. Purcell Prof., Management, Prof., Finance
Orman, Levent V., Ph.D., Northwestern U. Assoc. Prof., Management Information Systems
Peterson, Randall S., Ph.D., U. of California at Berkeley. Asst. Prof., Organizational Behavior
Rao, Vithala R., Ph.D., U. of Pennsylvania. Deane W. Malott Professor of Management, Prof., Marketing and Quantitative Methods
Robinson, Lawrence W., Ph.D., U. of Chicago. Assoc. Prof., Operations Management
Russo, J. Edward, Ph.D., U. of Michigan. S. C. Johnson Family Prof., Management, Prof., Marketing and Behavioral Science

Sally, David F., Ph.D., U. of Chicago. Asst. Prof., Organizational Behavior
Smidt, Seymour, Ph.D., U. of Chicago. Nicholas H. Noyes Professor of Economics and Finance, Director, Leadership Skills Program
Stayman, Douglas M., Ph.D., U. of California at Berkeley. Assoc. Prof., Marketing
Suwinski, Jan H., MBA, Cornell U. Prof., Business Operations
Swaminathan, Bhaskaran, Ph.D., U. of California at Los Angeles. Asst. Prof., Finance
Tasker, Sarah, Ph.D., MIT. Asst. Prof., Accounting
Thomas, L. Joseph, Ph.D., Yale U. Nicholas H. Noyes Professor of Manufacturing, Director, Executive Development Program
Waldman, Michael, Ph.D., U. of Pennsylvania. Prof., Economics, Charles H. Dyson Prof., Management
Wittink, Dick R., Ph.D., Purdue U. Henrietta Johnson Louis Prof., Management, Prof., Marketing and Quantitative Methods

Lecturers

Highfield, Richard A., Ph.D., U. of Chicago. Sr. Lec. Economics, Associate Dean for MBA Programs and Operations
Katz, Jan, Ph.D., Massachusetts Inst. of Technology. Sr. Lec., International Business and Marketing
Matthews, Ronald W., Sr. Lec., Operations Management
Mink, Barbara E., M.A., Cornell U. Sr. Lec., Management Communications
Pike, Alan S., M.A., Cornell U. Sr. Lec., Management Communications
Rosen, Charlotte, Ph.D., Cornell U. Sr. Lec., Coordinator, Management Communications

Adjunct and Visiting Faculty

Grossman, Dale A., J.D., American U. Sr. Lec., Tax and Business Law
Nesheim, John L., MBA, Cornell U. Visiting Lecturer, President, Aladdin Systems, Inc.
Schuler, Richard E., Ph.D., Brown U. Prof. Economics, Prof. Civil & Environmental Engineering
Sears, Peter A., J.D., Harvard U. Visiting Lecturer, Vice President, Business Investments, Smith Kline Beecham Corporation
Thomas, William, MBA, Harvard. Lec., Management, President, Capital Southwest
Zender, Jaime F., Ph.D., Yale U. Prof., Finance

DIVISION OF NUTRITIONAL SCIENCES

ADMINISTRATION

Jere Haas, director

Carole Bisogni, associate director for academic affairs

Noa Noy, director of graduate studies, Field of Nutrition

THE DIVISION

Nutritional Science draws upon the chemical, biological, and social sciences to understand the complex relationships between human health, nutritional status, food and lifestyle patterns, and social and institutional environments. Understanding these relationships includes the study of the metabolic regulation and function of nutrients, nutrient requirements throughout the life span, role of diet in reducing risk of chronic disease, nutritional quality of foods, and interventions and policies designed to promote the nutritional health of individuals and populations.

The focus of this broad field of study at Cornell is the Division of Nutritional Sciences, which brings together specialists from many disciplines. The faculty are involved in undergraduate and graduate teaching, research, and extension of research-based knowledge throughout New York State, the nation, and the world.

The division is affiliated with both the College of Human Ecology and the College of Agriculture and Life Sciences. An undergraduate program in Nutritional Sciences is offered through the College of Human Ecology. The undergraduate program, Nutrition, Food, and Agriculture, is offered in the College of Agriculture and Life Sciences. In 1997 a new undergraduate program in Human Biology, Health, and Society was established within the College of Human Ecology. Graduate study in the Field of Nutrition, is administered by faculty members throughout the university.

FACILITIES

Most of the faculty members of the division work in Savage Hall, Kinzelberg Hall, and Martha Van Rensselaer Hall. In addition to housing offices, classrooms, and seminar rooms, these buildings contain research facilities, specialized laboratories, a human metabolic research unit, and computer facilities. The division's Learning Resource Center in Martha Van Rensselaer Hall is used by students for individual study and for small group discussions. In addition to printed and audiovisual materials, the Learning Resource Center contains two computers which give students access to specialized software. Savage Hall also has a graduate reading room.

UNDERGRADUATE PROGRAMS

The Division of Nutritional Sciences offers three programs leading to a B.S. degree:

Nutritional Sciences, College of Human Ecology: this program provides students with a strong foundation in the broad field of nutritional sciences as well as thorough training in chemistry and biology. Students may prepare for a variety of career interests including medicine and other health careers, fitness and sports nutrition, nutrition counseling, clinical nutrition, dietetics, nutritional biochemistry, community nutrition, and nutrition education.

Nutrition, Food, and Agriculture, College of Agriculture and Life Sciences: this program is for students who want strong training in human nutrition combined with supportive course work in the agriculture and the life sciences. Strong preparation in biology, chemistry, and math is required. Students in the Nutrition, Food, and Agriculture Program supplement the nutrition curriculum with courses in areas such as food science, animal science, plant science, advanced biology, business and economics, education, and communication. This program prepares students for variety of career interests.

Human Biology, Health, and Society, College of Human Ecology: established in 1997, this program gives students a strong foundation in biology and then explores human health issues from the perspectives of both biology and the social sciences. Students complete a rigorous curriculum in the natural sciences and then, choosing from a wide array of courses offered in the College of Human Ecology, focus their studies on health issues of their choice. Students can explore such topics as gene expression and metabolism related to disease states; biological and social aspects of growth and development; and policies and programs influencing health.

THE CURRICULUM

Undergraduate students in these three programs complete the requirements of their colleges as well as the courses required by the program of their specific interests.

All three undergraduate programs offered by the division require a strong foundation in chemistry and biology; including introductory chemistry and biology, organic chemistry, biochemistry, and physiology. A minimum competency in college algebra is required with additional math and/or statistics requirement for some programs and career paths. Students in the Human Biology, Health, and Society major also complete a course in physics and two additional courses in advanced biology.

All students complete the introductory course, Nutrition and Health: Concepts and Controversies (NS 115). The Nutritional Sciences major and the Nutrition, Food, and Agriculture Program require the completion of four other core courses: Nutrition and Health: Concepts and Controversies (NS 115); Social Science Perspectives on Food and Nutrition (NS 245); Nutritional and Physicochemical Aspects of Foods (NS 345); Physiological and Biochemical Bases of Nutrition (NS 331); and Methods in Nutritional Sciences (NS 332). Students in these programs also must select a minimum of nine credits in advanced courses in the nutritional sciences.

The Human Biology, Health, and Society major requires a minimum of six credits from courses that integrate biology and the social sciences as they examine health issues. In addition, students must also complete nine credits of advanced electives in courses focused on human biology, health, and society.

Undergraduate students in these three programs have a faculty adviser in the Division of Nutritional Sciences. Student-adviser conferences are required at least twice a year. Advisers help students plan their course schedules and can suggest opportunities for individual study or experience outside the classroom.

In all three undergraduate programs the correct sequencing of biology, chemistry, and/or nutrition courses is very important. Students considering these programs should get detailed information about course requirements from the division's Academic Affairs Office, 309/335 MVR.

CAREER OPTIONS AND COURSE PLANNING

Requirements for the three programs are the minimum set of courses necessary for a bachelor's degree in these fields. Students should supplement their requirements with elective courses and other learning experiences that will prepare them for entry-level jobs or advanced study in their field(s) of interest. A summary of suggested electives for different career interests follows:

Medicine and Other Health Careers: Recommended courses for pre-med students include calculus and two terms of physics. Specific information about medical school admissions requirements can be obtained from the university's Health Careers Office, 203 Barnes Hall. Students interested in other health careers should acquire specific information about those requirements. Courses of interest may include those related to the biological and social determinants of health; human growth, development, and behavior through the life course; interpersonal communications; advanced biology; sociology; psychology; and ethics.

Dietetics: Students who wish to work in the areas of clinical nutrition, nutrition counseling, sports nutrition, community nutrition, or food and nutrition management should complete the academic requirements for The American Dietetic Association (ADA). Courses in foods,

nutrition and disease, microbiology, management, statistics, and nutritional care are added to the courses required for the nutrition programs. For more information about meeting ADA requirements see Anne Kendall, 3M5 MVR.

Exercise, Nutrition, and Health Promotion: Students should complete a course in physiology and a course in anatomy after introductory biology. Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in kinesiology, exercise physiology, and biomechanics. Students who wish to apply to graduate schools to study physical therapy should complete a year of introductory physics; a course in statistics; a course in ethics; and three courses in psychology. Students should check the specific requirements of their schools of interest. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office, 309 MVR.

Biomedical Research/Nutritional Biochemistry: Recommended electives include calculus, physics, genetics, advanced biology and chemistry, toxicology, and nutritional sciences courses related to the physiology, biochemistry, and metabolism of different nutrients and disease states.

Public Health and Community Nutrition: Suggested electives include courses in communications, education, human development, policy analysis and management, maternal and child nutrition, geriatric nutrition, nutrition and disease, and food economics.

Nutrition, Food, and Business: Recommended electives include courses in management, marketing, economics, communications, hotel administration, and food science.

Nutrition and Agriculture: Recommended electives include courses in food science, animal science, plant sciences, international agriculture, agricultural economics, biological sciences, and rural sociology.

International Nutrition: Recommended electives include courses in language, anthropology, agricultural economics, policy, economics, rural sociology, international agriculture, and nutritional sciences related to maternal and child health and problems of developing nations.

Biology and Behavior: Recommended electives include courses in psychology, human development, and neurobiology.

Food, Nutrition, and Health Policy: Recommended electives include courses in economics, sociology, government, policy analysis, and management.

SPECIAL EXPERIENCES

Undergraduates can enhance their experiences by participating in structured field experiences or study abroad. Academic credit can be earned for field experiences in a community agency, health-care facility, or business. The Urban Semester in the College of Human Ecology provides students with an opportunity to study and gain field experience in New York City. All students intending to spend a term off campus in field experience or study abroad must plan their courses well in advance to be sure that all program requirements can be met.

INDEPENDENT STUDY ELECTIVES

Independent study courses (NS 400, 401, 402) can be used to obtain credit for more diverse or intensive experience than the classroom can offer, whether this involves laboratory work, library research, or field study. Any student interested in independent study should obtain the sponsorship of a faculty adviser and the approval of the associate director for academic affairs or consider applying to the honors program.

HONORS PROGRAM

The honors program, leading to a B.S. degree with honors, gives official recognition to students who have demonstrated excellence in their academic work and their capacity for independent study.

In addition to fulfilling the requirements for a major, students in the honors program take courses in designing and evaluating research, complete an original piece of research, and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 230 Savage Hall.

COURSES RECOMMENDED FOR NONMAJORS

Courses in nutritional sciences can strengthen programs of study in biological sciences, biology and society, communications, food science, human development, human services, and other fields.

NS 115, Nutrition and Health: Concepts and Controversies, is open to all students. After NS 115, nonmajors with limited backgrounds in chemistry and biology may elect NS 247, Food for Contemporary Living; NS 262, Nutrients and Cells; NS 275, Human Biology and Evolution; NS 306, Nutritional Problems of Developing Nations; NS 315, Obesity and the Regulation of Body Weight; NS 347, Human Growth and Development: Biological and Behavioral Interactions; NS 380, Integrating Food Systems and Human Nutrition Needs; NS 450, Public Health Nutrition; NS 457, National and International Food Economics.
Nonmajors with strong backgrounds in chemistry and the biological sciences may consider NS 331, Physiological and Biochemical Bases of Human Nutrition, as well as many advanced nutritional sciences courses, such as NS 345 Physicochemical and Nutritional Aspects of Foods; NS 421, Nutrition and Exercise; and NS 441, Nutrition and Disease.

GRADUATE PROGRAMS

Graduate study is administered by the Field of Nutrition, a group of about forty faculty members from throughout the university who have a common interest in nutritional problems. In the M.S. and Ph.D. degree programs, students may specialize in molecular and biochemical nutrition, human or animal nutrition, community nutrition, or international nutrition. Research is emphasized in all graduate programs. Field experience may be an important component of concentrations in community, international and public-health nutrition, and nutrition education.

The specialties and interests represented by faculty in the Field of Nutrition provide almost unlimited opportunity for graduate study. Cornell's extensive laboratory and agricultural facilities ensure that students interested in experimental nutrition have exceptional choices and thorough training. As the largest faculty in the country devoted to the study of human nutrition, the field includes specialists in biochemical, metabolic, epidemiological, and sociocultural research. Opportunities to work with community and federal agencies are available to students interested in applied nutrition and public policy. Students in international nutrition are expected to conduct their thesis research abroad.

For more information about the graduate program, please write for the brochure. Graduate Study in Nutrition, available from the Director of Graduate Studies, Field of Nutrition, Cornell University, 309 MVR Hall, Ithaca, New York 14853–4401; telephone (607)255–4410.

COURSES

NS 115 Nutrition and Health: Concepts and Controversies
Fall. 3 credits. S-U grades optional. M W F 1:25. D. Levitsky.
The course will discuss the facts and fallacies concerning the role that nutrition, exercise, and other health behaviors play in preventing disease, maintaining good health, and maximizing athletic performance will be discussed. Emphasis is on understanding the biological mechanisms through which good nutrition and regular exercise affect psychological and physical health.

NS 116 Personalized Concepts and Controversies
Fall. 1 credit. Corequisite: NS 115. S–U only. Limited to freshmen and transfer students, 10 per section. TBA.
D. Levitsky.
This course provides students enrolled in NS 115 individualized assistance in many skills used in NS 115 such as using computers to analyze diets, using electronic mail, finding and using scientific references, and reviewing material presented in NS 115 lectures.

NS 120 Nutrition and Health: Issues, Outlooks, and Opportunities
Spring. 1 credit. S-U grades only. Limited to 120 freshmen, sophomores and juniors, others by permission of instructor.
W 12:20. C. Bisogni.
A course for students interested in exploring careers in the broad fields of food, nutrition, and health. Experts representing different areas will discuss their work, focusing on current issues and trends as well as their requisite knowledge and skills. This course describes the many disciplines that are drawn upon in addressing human problems related to food, diet, and health. It also explores the related intellectual and career opportunities. This is not an introductory nutrition course for nonmajors.

NS 200 Vegetarian Nutrition: An Introduction
Fall. 3 credits. S-U grades optional. Prerequisites: NS 115 advised but not essential. M W F 11:15. T. C. Campbell.
This introductory course will survey vegetarianism from a variety of nutrition and health considerations. The material to be presented and discussed will primarily include the empirical scientific evidence presented for easy comprehension for students without nutrition training. The course will also consider the historical and sociocultural roots, both ancient and of more recent times, that have led to the growing interest in, and acceptance of, this type of dietary practice. Particular attention will be given to the role of vegetarianism in the prevention and reversal of chronic degenerative diseases. Special topics on competitive sport, childhood nutrition, food preparation, and dietary transition will be offered. Internationally known guest speakers, will provide 6-8 of the lectures.

NS 222 Maternal and Child Nutrition
Spring. 3 credits. Prerequisites: NS 115 and a college biology course or permission of the instructor. S-U grades optional. Limited to 25 students. Preregistration is required in room 309 Martha Van Rensselaer Hall. M W F 1:25. C. Garza.
Involves the study of nutritional requirements in pregnancy, lactation, infancy, and childhood growth through adolescence. Topics include the relationship between maternal diet and pregnancy outcome; analysis of different methods of infant feeding; and nutritional status of pregnant women, children, and adolescents in the United States and in developing countries.

NS 245 Social Science Perspectives on Food and Nutrition
Fall. 3 credits. Prerequisite: NS 115. Limited to nutrition majors. Letter grade only. T R 10:10–11:25. J. Sobal.
Theories, concepts, and methods from the social sciences will be used to examine food, eating, and nutrition. The course will use the food and nutrition system and the food choice process as conceptual models for examining the scope of social aspects of nutrition.

NS 247 Food for Contemporary Living
Fall and spring. 1 credit. Laboratory sections limited to 32 students. Preregistration during course pre-registration required in 309 Martha Van Rensselaer Hall. Laboratory coat or apron required. Fall T 1:25–4:25; spring T 1:25–4:25 or R 9:05–12:05. A. Kendall.
Emphasizes meal planning for healthy individuals using national nutrition standards; the development of food preparation and presentation skills; the application of sensory evaluation techniques; food science principles as they apply to cooking and ethnic and cultural influences on cuisine.

NS 262 Nutrients and Cells
Spring. 3 credits. Prerequisites: one semester of biology and chemistry. M W F 9:05. N. Noy.
The course will focus on the relationships of the cell with the environment. Examples from three general areas will be considered: 1. Mechanisms of uptake of nutrients by bacterial and by mammalian cells. 2. Intra-cellular outcomes of nutritional stimuli: effects on metabolism and gene expression, toxicity. 3. Pathways of neutralization: detoxification, secretion, DNA repair.

[NS 275 Human Biology and Evolution (also Biological Sciences 275 and Anthropology 275)
Fall. S-U grades optional, with permission of either instructor. Offered alternate years. Not offered 1999–2000.
See BIO SCI 275 for course description.]

NS 300 Special Studies for Undergraduates
Fall or spring. Prerequisites: permission of instructor. S-U grades optional. DNS faculty.
Special arrangements to establish equivalency for courses not transferred from a previous major or institution. Students prepare a description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the associate director for academic affairs, is filed at course registration or during the change-of-registration period.

NS 306 Nutritional Problems of Developing Nations
Spring. 3 credits. Prerequisites: NS 115. S-U grades optional. T R 10:10. J-P. Habicht, M. C. Latham.
The course is designed for undergraduates interested in the nutritional problems of developing countries. Attention is given to the array of nutrition problems encountered, the causes of hunger and malnutrition, the epidemiology of the major nutritional problems afflicting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.

NS 315 Obesity and the Regulation of Body Weight (also Psychology 613)
Spring. 3 credits. Prerequisites: NS 115, Psych 101. Limited to juniors and seniors. S-U grades optional. Offered alternate years. T R 1:30–3:00. Not offered 2000–2001. D. Levitsky.
This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, genetics of obesity, role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

NS 320 Introduction to Human Biochemistry
Fall. 4 credits. Prerequisites: one year college biology; one year college general chemistry; and CHEM 257 or 357–358; or permission of the instructor. S-U grades optional. M W F 10:10, sec T 1:25. W. Arion, P. Stover.
The principles of biochemistry are presented within the context of human health and disease. Metabolism of carbohydrates, lipids, proteins and selected micro-nutrients is taught from a perspective that emphasizes their role in supporting the structure and physiological functions of the major organs of the body, including blood. The concepts of enzyme catalysis, enzyme regulation, hormone action and bioenergetics are incorporated within this framework. The fundamental concepts of eucaryotic DNA structure, function and gene expression are covered with reference to their importance in regulating metabolism and the impact of a changing nutrient environment.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits. Prerequisites: Biological Sciences 330 or 331 or equivalent. S-U grades optional. Lec M W F 10:10; disc, W or R. M. Stipanuk, C. McCormick.
This course examines the biochemical and physiological bases of human nutritional requirements. The instructors use an integrated approach to cover the digestion and metabolism of the nutrients (carbohydrates, proteins, lipids, vitamins, and minerals). Metabolic and chronic diseases that are related to nutrition are discussed throughout the semester. The discussion sections and problem sets provide an opportunity to examine in greater depth selected topics from lecture.

NS 332 Methods in Nutritional Sciences
Fall and spring. 3 credits. Each section limited to 18 students. Prerequisites: NS 345, NS 331 preferred or concurrent registration. Laboratory preregistration during course preregistration required in room 309 Martha Van Rensselaer Hall. One evening prelim to be scheduled. Fall. Lec M 12:20; lab M W 1:25–4:25 or M W 6:30–9:30 or T R 10:10–1:10. Spring. Lec M 12:20; labs M W 1:25–4:25 or T R 10:10–1:10 or M W 6:30–9:30. J. T. Brenna, M. N. Kazarinoff.
Laboratory introduction to principles and analytical techniques of nutritional research. Emphasis is on analytical concepts and skills required to determine nutrient function and nutritional status of individuals. Topics include methods of nutrient, metabolite, and enzyme analysis in body fluids, and methods for assessing individual food intake and nutritional status.

NS 341 Human Anatomy and Physiology
Spring. 4 credits. Letter grade only. Prerequisites: college biology; NS 115 recommended. Laboratory preregistration required in 309 MVR during preregistration. Limit 120. Lec M W F 12:20; lab W or R or F, 9:05–11:00 or 2:30–4:25. V. Utermohlen.
Introduction to human anatomy and physiology with particular emphasis on aspects of relevance to the nutrition sciences and medicine. All major organ systems will be covered. Laboratories will emphasize location, recognition, and description of anatomical structures. Testing of physiological functions will focus on the tests with nutritional and medical relevance.

NS 345 Nutritional and Physicochemical Aspects of Food
Spring. 3 credits. Prerequisite: college course in organic chemistry or biochemistry. S–U grades optional. T R 1:25–2:40. B. Parker, B. Lewis.
A study of the nutritional, physical, and chemical properties of foods including composition, food structure, enzymic and nonenzymic phenomena, and processing/preparation aspects. Issues related to food safety, regulation, and food composition data bases will also be discussed.

NS 346 Introduction to Physiochemical Aspects of Foods—Laboratory
Spring. 1 credit. Each section limited to 18 students. Limited to dietetics students in DNS. Prerequisites: NS 345 or concurrent registration; a college course in organic chemistry and permission of instructor during course registration

(permission-of-instructor forms must be obtained from and returned to 309 MVR). Letter grade only. M 12:20–3:20 or T 9:05–12:05. B. Parker, R. Lewis.
Laboratory exercises designed to illustrate principles related to food quality and ingredient functionality, and to introduce students to the analytical methodology associated with food evaluation.

[NS 347 Human Growth and Development: Biological and Behavioral Interactions (also Human Development and Family Studies 347 and Biology and Society 347)
Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent; Human Development and Family Studies 115 or Psychology 101 or equivalent. Offered alternate years. Not offered 1999–2000. M W F 1:25. J. Haas, S. Robertson.
This course is concerned with the interrelationships of physical and psychological growth and development in humans, particularly during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variation for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.]

[NS 361 Biology of Normal and Abnormal Behavior
Fall. 3 credits. Prerequisites: Biological Sciences 101–102 and Psychology 101, or permission of the instructor. A fundamental knowledge of biology and psychology is essential. S-U grades optional. Limited to juniors and seniors. Not offered 1999–2000. M W F 9:05. B. Strupp.
A critical evaluation of biological factors thought to influence behavior and/or cognitive functioning. Biological, psychological, and societal influences will be integrated. Topics include nutrition and behavior, psychiatric disorders, developmental exposure to environmental toxins and abused drugs, biopsychology of learning, memory, intelligence, and related cognitive disorders.]

NS 378 Food, Nutrition, and Service Management
Fall. 3 credits. Prerequisites: NS 115, NS 247 or permission of instructor. T R 8:40–9:55. TBA.
The course discusses how management principles and theories apply to foodservice operations and nutrition services. The systems concept of organization is used. Emphasis is placed on leadership development, decision making/problem solving as it relates to procurement, production, distribution, and quality assurance in food and nutrition services. Recipe and menu development projects show the interrelationships of nutrition, labor, equipment, and environmental concerns. Marketing strategies and implementation are discussed.

NS 380 Integrating Food Systems and Human Nutrition Needs
Spring. 2 credits. Prerequisites: NS 115 or Food 200 or An Sc. 100. Letter grade only. T R 8:40–9:55. G. Combs.
A student-centered course that uses case studies to examine the link between human nutrition and health issues to those involving systems of food production and distribution. Student teams will investigate new and existing technological options within food systems to address domestic or international human nutrition needs.

NS 398 Honors in Nutritional Sciences
Fall. 1 credit. Limited to students admitted to the division honors program. S-U grades only. T 12:20. M. Kazarinoff.
Research design. Analysis of research papers on selected topics.

NS 400–401–402–403 Special Studies for Undergraduates
Fall or spring. Credits to be arranged. S-U grades optional. Division faculty.
For advanced independent study by an individual or group of students who want to study a field of nutritional sciences not otherwise provided through course work in the division or elsewhere at the university. Students prepare a description of the study they want to undertake on a form to be signed by the instructor directing the study and the associate director for academic affairs. The form, available from the department office, is filed at course registration or within the change-of-registration period along with an add/drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, students should submit the special-studies form to the associate director for academic affairs as early as possible.

NS 400 Directed Readings
For study that predominantly involves library research and independent reading.

NS 401 Empirical Research
For study that predominantly involves data collection and analysis or laboratory or studio projects.

NS 402 Supervised Fieldwork
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

NS 403 Teaching Apprenticeship
For study that includes assisting faculty with instruction.

[NS 421 Nutrition and Exercise
Spring. 3 credits. Prerequisites: Bio S 311 or NS 341 and NS 115 or NS 331. S–U grades optional. M W F 11:15. Not offered 1999–2000. Division faculty.
This course will acquaint students with the interaction between nutrition, exercise, and athletic performance. Topics will cover the biological, psychological, and sociological aspects of nutrition as it relates to exercise performance. Students will learn nutritional counseling techniques for educating the recreational and professional athlete, coach, and trainer.]

NS 431 Mineral Nutrition and Chronic Disease
Fall. 2 credits. Prerequisites: NS 331, AnSci 410, or permission of instructor. S-U grades optional. T R 11:15. C. McCormick.
We will evaluate the evidence that diet plays a role in osteoporosis and hypertension and whether iron status affects the development of heart disease and inflammation. A goal of the course is to review the data upon which recommendations for daily nutrient intakes are currently based. Class discussion of key research articles will be conducted and evaluated.

NS 441 Nutrition and Disease
Fall. 4 credits. Prerequisites: NS 331 and a human physiology course. S-U grades optional. M W F 10:10; F 8:00. V. Utermohlen.
Study of the anatomical, physiological, and metabolic abnormalities in acute and chronic illness, and the role of nutritional therapy in their prevention and care. Topics covered include: nutritional assessment, nutritional pharmacology, starvation, infection, trauma, cancer, diabetes mellitus, and renal, cardiovascular, pulmonary, skeletal, neurological, liver, and gastrointestinal disorders.

NS 442 Implementation of Nutrition Care
Fall. 3 credits. Prerequisites: NS 247, concurrent registration in NS 441 (or equivalent background in either course). S-U grades optional. Lec M W F 9:05. A. Kendall.
Development of skills necessary to implement nutrition care in clinical settings: nutrition screening, dietary assessment, principles of medical nutrition therapy, menu planning for disease states, quality assurance.

NS 450 Public Health Nutrition
Spring. 3 credits. Prerequisites: NS 115, and one course dealing with population-level studies, e.g., NS 245, HDFS 150, PAM 201, PAM 303, RSOC 100, RSOC 200. M W F 11:15. K. Rasmussen, D. Pelletier.
Public health nutrition is the major professional career track for nutritionists outside of dietetics. It deals with efforts to improve the diets and nutritional status of whole populations by working at the community, state, and national level. This course helps prepare students to work in public health nutrition by describing methods used in the assessment of nutrition problems, development of nutrition-related policies, and delivery of health, nutrition, and food assistance programs.

NS 451 Epidemiology and Health of Human Communities
Fall. 3 credits. Prerequisite: one semester of statistics (can be taken concurrently). M W F 1:25. E. Frongillo.
Examines through a series of case studies, the role of epidemiological investigation in understanding, assessing, and improving the health and nutrition of human communities and populations. Students will read and discuss scientific research and public policy literature on specific topics of current interest. Emphasis is on the conceptualization of epidemiology as an ecological science that studies the interdependence and interaction of humans with their social, cultural, and physical environment. Intended for advanced undergraduates and graduate students with an interest in health, human biology, nutrition, or epidemiology.

NS 457 National and International Food Economics (also Economics 374)
Spring. 4 credits. Prerequisites: Econ 101 or CEH 110 and junior standing, or permission of instructor. S-U grades optional. M W F 9:05. E. Thorbecke.
Analysis of the world food economy. Review and analysis of the major economic factors determining the demand for food, the composition of food consumption, and nutritional intake, as well as the major economic factors affecting food production

and supply. This course evaluates the effectiveness of various policies and programs in alleviating poverty and malnutrition.

NS 488 Applied Dietetics in Foodservice Systems

Spring. 3 credits. Limited to 27 students. Prerequisites: NS 378, Micro 290. Laboratory preregistration during course preregistration is required in room 309 Martha Van Rensselaer Hall. White lab coat is required. Approximately $25.00 will be needed for special supplies/activities. Lec M W 9:05; labs, M or T or W 1:30–6:00. TBA.

Students will gain experience in facility design; equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources; menu planning, recipe development, volume food production; computer-assisted management; employee training; applied safety and sanitation standards; and will develop other skills required to operate/manage a foodservice program. The application of quality management in food service operations and facility management is stressed. Laboratories will be arranged through Cornell Dining.

NS 498 Honors in Nutritional Sciences

Spring. 1 credit. Limited to students admitted to the division honors program. Students may register in NS 499 concurrently. M or F 2:30. M. Kazarinoff and division faculty.

Juniors (Mondays). Discussion of research opportunities in nutrition and orientation to research facilities. Delineation of honors research problems in consultation with faculty mentors. Seniors (Fridays). Workshop sessions on honors thesis and oral presentation preparation.

NS 499 Honors Problem

Fall and spring. Credits to be arranged. Open only to students in the division honors program. M. Kazarinoff and division faculty.

An independent literature, laboratory, or field investigation. Students should plan to spread the work over two or more semesters.

NS 600 Special Problems for Graduate Students

Fall or spring. Credit to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional. Division faculty.

Emphasis on independent advanced work. Experience in research laboratories in the division may be arranged.

NS 601 Proteins and Amino Acids (also Animal Science 601)

Spring. 2 credits. Prerequisites: physiology, biochemistry, and nutrition. Offered alternate years. W F 12:20. R. E. Austic.

The course emphasizes the dynamic aspects of protein digestion and absorption, amino acid transport, and amino acid and nitrogen metabolism and their relationships to the nutritional requirements for amino acids.

NS 602 Lipids (also Bio Sci 619)

Fall. 2 credits. T R 11:15. A. Bensadoun.

Advanced course on biochemical, metabolic, and physiological aspects of lipids, more specifically lipid transport. Topics covered include lipid methodology, structure of plasma lipoproteins, molecular biology and cell biology of apolipoproteins, lipoprotein receptors, lipid transfer factors, lipolytic enzymes, and atherosclerosis.

[NS 603 Mineral Nutrition: Metabolic, Health, and Environmental Aspects (also An Sc 603)

Fall. 2 credits. Letter grade only. Prerequisites: biochemistry, physiology, and nutrition. T 2:20–4:25. Offered alternate years, not offered 1999–2000. X. G. Lei, G. F. Combs, Jr.

The course emphasizes the metabolic roles and environmental impacts of mineral nutrition in animal, human, and food systems. Team-taught lectures include general biochemical and physiological aspects of mineral metabolism and specific mechanisms of gene expression regulation and mammal health disorders associated with individual elements. Methodology and facility of mineral research is also discussed.]

NS 604 The Vitamins (also An Sc 604)

Fall. 2 credits. T R 10:10. G. Combs.

Text-based discussion sessions on nutritional aspects of the vitamins, including recent developments in nutritional and biochemical interrelationships with other nutrients and metabolites.

NS 605 Nutritional Biochemistry Colloquim

Fall and spring. 1 credit. S-U grades only. R 12:20. Nutritional Biochemistry faculty.

Nutritional biochemistry colloquium is a graduate seminar series that focuses on recent advancements in biochemical nutrition. Weekly presentations are made by faculty, postdocs and graduate students and are based on the primary literature. The presentations are followed by a discussion involving all participants.

NS 607 Nutrition as an Integrating Discipline: Concepts and Paradigms

Fall. 3 credits. Prerequisite: some prior coursework or experience in nutrition, or permission of the instructor. M W F 10:10. M. Kazarinoff, J-P. Habicht, and division faculty.

An overview course for beginning graduate students which introduces them to the full breadth of nutritional science disciplines, including quantitative and qualitative sciences. Also suitable for seniors as an integrating course. The course presents concepts and paradigms of molecular biology, biochemistry, clinical nutrition, epidemiology, anthropology, economics, program planning and administration, policy development, and ethics. This semester the course uses Vitamin A as the example. Emphasis will be placed on the integration of factual and conceptual knowledge to solve nutrition problems in human societies.

NS 611 Molecular Toxicology (also Toxicology 611)

Spring. 3 credits. Prerequisite: Toxicology 610 and a full-year 400-level course in biochemistry or equivalent. S-U grades optional. TBA. S. Bloom, R. Dietert.

A study of the fundamental biochemical mechanisms of absorption, transport, metabolism, and excretion of drugs, carcinogens, and toxicants. Emphasis on oxidative and conjugative pathways of metabolism and of environmental and nutritional factors that influence toxicant metabolism and disposition. Methods of evaluating in vivo and in vitro metabolism are also addressed.

NS 612 Methods of Assessing Physical Growth in Children

Spring. 3 credits. Limited to graduate students and undergraduate students who have permission of the instructor. A previous course in statistics required. S-U grades optional. Lec T 1:25; lab, R 1:25–4:25; disc T 2:15–3:05. J. Haas.

A laboratory course to train students in methods and techniques used to assess the physical growth and development of children. The methods explored are those applicable for field, community, and clinical studies and cover anthropometry, body composition, skeletal age, maturity indicators, physical fitness, and energy expenditure.

NS 614 Topics in Maternal and Child Nutrition

Fall. 3 credits. Prerequisites: NS 331, and 222 or 347, Biological Sciences 311, and permission of instructor. T R 8:30–9:55. Will not be offered fall 2000. K. Rasmussen.

An advanced course on the role of nutrition during pregnancy and lactation. The feeding and growth of infants and children in health and disease is considered. Critical evaluation of current literature is emphasized via lecture, discussions, and a term paper.

NS 617 Teaching Seminar

Fall or spring. 0 credit. Limited to division graduate students and students who have permission of the instructor. S–U only. C. Bisogni, D. Way.

Individualized instruction focusing on development of teaching skills for guiding classroom learning in lecture, discussion, and laboratory settings. Preparation of content, presentation, and interaction techniques and evaluative methods are emphasized in relation to the student's specific teaching assignment. Videotaped simulations provide opportunity for practice and analysis of teaching behaviors.

NS 618 Teaching Experience

Fall or spring. 0 credit. Limited to division graduate students and students who have permission of instructor. S–U only. C. Bisogni.

Designed to provide experience in teaching nutritional sciences by direct involvement in college courses under supervision of a faculty member. The aspects of teaching and the degree of involvement vary, depending on the needs of the course and the experience of the student.

NS 619 Field of Nutrition Seminar (also Animal Science 619)

Fall or spring. 0 credit. S–U only. M 4:00. Faculty and guest lecturers.

Lectures on current research in nutrition.

NS 620 Food Carbohydrates (also Food Science 620)

Spring. 2 credits. Prerequisites: Biological Sciences 330 or equivalent. Letter grades only. Offered alternate years. T R 10:10. J. Brady, B. Lewis.

A consideration of the chemistry of carbohydrates, including sugars and complex carbohydrates (starches, pectins, hemicelluloses, gums, cellulose, and glycoconjugates). Emphasis is on intrinsic chemistry, functionality in food systems, and changes occurring during food processing and storage.

NS 626 Special Topics in Food
Fall. 2 credits. TBA. B. Lewis.
Discussion of current research on specific topics related to functional foods and nutraceuticals/phytochemicals.

NS 631 Dietary Assessment
Fall. 1 credit. 7 weeks only. Prerequisites: statistics and NS 331 or equivalent. Enrollment limited. R 2:30–5:30. D. Sanjur.
Study of methods and techniques for assessing dietary intakes at the individual and household levels.

[NS 636 Integration and Coordination of Energy Metabolism (also Biological Sciences 637)
Spring. 3 credits. Prerequisites: Biological Sciences 330 and 331, or equivalent. M W F 9:05. Not offered 1999–2000.
The dynamics of energy metabolism in humans and higher animals are developed through characterizations of how the metabolic components support the structure and function of the individual tissues. Mechanisms that control and coordinate energy metabolism within and between organs are analyzed in the context of selected physiological and pathological stresses.]

NS 637 Epidemiology of Nutrition
Spring. 3 credits. Limited to graduate students. Prerequisites: Biometry 601 and concurrent registration in Biometry 602 or NS 641 or equivalent knowledge. Basic knowledge about the nutritional aspects of growth and development and about nutritional biochemistry. TBA. J-P. Habicht.
This course covers principles of nutritional epidemiology, impact assessment of nutrition intervention programs, and nutritional surveillance. Principles of using nutritional information in decision making are presented. The course shows how the biochemistry and physiology of nutrition can be related to epidemiological assessment and research strategies.

NS 638 Epidemiology of Nutrition Seminar
Spring. 3 credits. Reserved for graduate students planning field intervention studies; by permission of instructor. Prerequisite: NS 637. TBA. J-P. Habicht.
Covers the meta-analysis, design, measurement, and analytic issues involved in developing, implementing, and analyzing studies of field interventions with nutritional impact.

NS 639 Epidemiology Seminar (also Statistics and Biometry 639)
Spring. 0–1 credit. Limited to graduate students; others by permission of instructor. Contact P. Cassano 255–7551 for permission and credit information. S-U grades only. M 12:20. P. Cassano.
This course will develop skills in the preparation and interpretation of epidemiological data by discussing current research topics and issues.

NS 640 Social Science Theories in Nutrition
Fall. 3 credits. Limited to 20 graduate students. T R 10:10–12:05. J. Sobal.
Social science theories and paradigms of sociology, psychology, anthropology, economics, political science, geography, and history that contribute to understanding food, eating and nutrition will be discussed to understand how theories apply to nutrition topics, issues, and problems.

NS 644 Community Nutrition Seminar
Fall and spring. Non-credit. S–U only. Fall M 11:15, spring M 12:20. A. Gillespie and Cornell Community Nutrition faculty.
This seminar, sponsored by the Cornell Community Nutrition Program, focuses on research presentations in nutrition education and other areas of community nutrition. Cornell faculty and graduate students and invited outside speakers present research proposals, results from ongoing research, theoretical bases for research, program evaluations, and discuss current programs and issues in community nutrition. The format varies but always includes discussion by participants.

NS 645 Nutrition Intervention in Communities: A Global Perspective
Spring. 3 credits. Limited to 25 graduate students with an interest in human nutrition and health and exceptional senior nutrition majors by permission. Prerequisite: NS 640. M W 1:25–2:40. C. Olson.
The goal of the course is to help students gain tools and develop a conceptual framework for thinking critically about nutrition interventions in communities around the world. The course involves extensive reading, active involvement in class discussions and fieldwork.

NS 646 Seminar in Physicochemical Aspects of Food
Spring. 1–3 credits. Prerequisite: a college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25–2:40. B. Parker, B. Lewis.
An introduction to physicochemical aspects of food, for graduate students who have had limited or no work in this area. The seminar uses the lectures of NS 345 as a basis for supplementary readings and critical review of research on selected topics.

NS 660 Special Topics in Nutrition
Fall or spring. 3 credits maximum each term. Registration by permission of the instructor. Division faculty.
Designed for students who want to become informed in any specific topic related directly or indirectly to nutrition. The course may include individual tutorial study, experience in research laboratories, a lecture series on a special topic selected by a professor or a group of students, and/or selected lectures of another course already offered. Topics may be changed so that the course may be repeated for credit.

NS 680 International Nutrition Problems, Policy and Programs
Spring. 3 credits. Prerequisite: permission of instructor. T R 11:15–12:30. M. Latham.
Designed for graduate students who want to learn about the important nutritional problems of developing countries. The major forms of malnutrition related to poverty and their underlying causes are discussed. Emphasis is placed on programs and policies that can assist poor countries and communities to improve their nutritional and health status.

NS 681 Nutritional and Public Health Importance of Human Parasitic Infections
Fall. 2 credits. Prerequisites: graduate student status or permission of instructor. S-U grades optional. M 2:30–4:15. L. Stephenson.
Reviews the scientific evidence on the relationships between human nutritional status and common human parasitic infections. Concentrates on malnutrition (protein-energy malnutrition, anemia) in developing countries. The parasitic infections emphasized are malaria, hookworm, ascaris, schistosomiasis, and trichuriasis. Format is lecture-discussion.

NS 683 Field Studies in International/ Community Nutrition
Fall. 1 credit. Graduate student status or permission of instructor required. Strongly recommended for graduate students doing field research. S-U grades only. Mainly audio-tutorial format. Available as independent study most semesters. TBA. L. Stephenson.
Reviews practical considerations in conducting field research in developing countries, including (1) seeking fundings, (2) experimental design issues, (3) choice of procedures, and (4) planning for and carrying out data collection. Also includes how to a) construct a C.V., b) write an abstract and prepare a clear 10-minute talk with legible slides (FASEB formation), and c) when, where, and how to publish research results. Extensive handouts. Lecture/demonstration/discussion.

NS 685 Food and Nutrition Policy (also Agricultural Economics 685)
Spring. 3 credits. Prerequisites: introductory microeconomics, intermediate statistics (through multiple regression), or instructor's permission. M W 2:55–4:10. D. Sahn.
This course examines the role of government policy in alleviating poverty, food insecurity, and malnutrition in developing countries. Topics covered include methodologies for economic policy analysis of time use and food acquisition behavior, the "production" of nutritional outcomes, and the role of price policy and markets. Course readings draw largely on examples from Africa and Asia.

NS 690 Trace Element and Isotopic Analysis (also Chemistry 628)
Spring. 3 credits. Primarily for graduate students and advanced undergrads. Prerequisite: Chemistry 288 or 390, 302 or Chemistry 208 and Mathematics 112, or permission of instructor. S-U grades optional. Offered alternate years. T R 10:10. J. T. Brenna.
Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications.

NS 698 International Nutrition Seminar
Fall and spring. No credit. No grades given. R 12:20–1:10. J-P. Habicht.
This seminar series consists of presentations by Cornell faculty and graduate students, and by invited outside speakers. Speakers cover a range of topics relating to nutritional problems, policy, and programs in the non-industrialized countries.

NS 699 Special Topics in International Nutrition
Fall and spring. 3 credits maximum each term. Registration by permission of instructor. Faculty in International Nutrition Program.

This option is designed for graduate students, mainly those with a concentration in international nutrition, who wish to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It usually consists of tutorial study on an agreed topic. Because the topics change, the course may be repeated for credit.

NS 700 Current Topics in Toxicology (also Toxicology 698)
Fall or spring. 1–3 credits. S-U grades optional. TBA. Staff.
A discussion of the most current developments in various areas of toxicological research and testing. Faculty and students will participate jointly in evaluating research findings and provide seminars and discussion of such material. For information regarding the topic, instructor, and credit, contact the office of the Graduate Field of Environmental Toxicology.

NS 702 Seminar in Toxicology (also Toxicology 702)
Fall or spring. 1 credit. S-U grades only. F 12:20. Staff.
The seminar program covers varied topics in biochemical, genetic, nutritional, veterinary, and regulatory toxicology, ecotoxicology, and environmental chemistry. Included are presentations of basic research studies, fundamental concepts, and research activities involving environmental problems of a toxicological nature. Presentations are given by speakers from Cornell and visitors.

NS 703 Seminar in Nutritional Sciences
Fall and spring. 1 credit. S-U grades only. T 12:20 or W 12:20. Division faculty.
Presentations of original articles pertinent to the Nutritional Sciences. Students will learn how to make professional presentations and how to critique the presentations by others. In addition, students will read and learn how to interpret original articles published in a wide variety of journals.

[NS 707 Nutrition as an Integrating Discipline: Evaluation, Criticism, Application
Fall. 3 credits. Prerequisites: advanced graduate standing and permission of the instructor. 2-hour class period per week plus discussion and workshop. M 1:25–3:20. Not offered 1999–2000.
M. Kazarinoff, K. Rasmussen.
The goal of this course is to provide an integrative capstone learning experience for advanced graduate students with majors or minors in nutrition. Groups of students will focus on a series of special problems in nutrition drawn from those currently faced by nutrition professionals. Special problems may involve assuming the role of consultants, expert committee members or peer-reviewers who are charged with answering questions or formulating recommendations related to research, programs, or policies.]

NS 899 Master's Thesis and Research
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

NS 999 Doctoral Thesis and Research
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

FACULTY ROSTER

Arion, William J., Ph.D., U. of N. Dakota. Prof.
Bensadoun, Andre, Ph.D., Cornell U. Prof., Nutritional Sciences/Physiology
Bisogni, Carole, Ph.D., Cornell U. Assoc. Prof. and Associate Director for Academic Affairs
Brenna, Thomas, Ph.D., Cornell U. Assoc. Prof.
Campbell, T. Colin, Ph.D., Cornell U. Jacob Gould Schurman Professor of Nutritional Biochemistry
Chen, Junshi, M.D., Peking Medical College, China. Adjunct Prof.
Combs, Gerald F. Jr., Ph.D. Cornell U. Prof.
Crompton, D. W. T., Ph.D., Sc.D., U. of Cambridge (England). Adjunct Prof.
Devine, Carol M., Ph.D., Cornell U. Asst. Prof.
Frongillo, Edward, Jr., Ph.D. Cornell U. Assoc. Prof.
Garza, Cutberto, M.D., Baylor College; Ph.D., MIT. Prof.
Gillespie, Ardyth, Ph.D., Iowa State U. Assoc. Prof.
Haas, Jere D., Ph.D., Pennsylvania State U., Director and Nancy Schlegel Meining Professor in Maternal and Child Nutrition
Habicht, Jean-Pierre, Ph.D., Massachusetts Inst. of Technology. James Jamison Professor of Nutritional Epidemiology
Jonsson, Urban, Ph.D., Chalmers U. Tech. (Sweden). Adjunct Prof.
Kazarinoff, Michael N., Ph.D., Cornell U. Assoc. Prof., Nutritional Sciences/Biochemistry, Molecular and Cell Biology
Latham, Michael C., D.T.M.&H., U. of London (England). Prof.

Olson, Christine M., Ph.D., U. of Wisconsin. Prof.
Parker, Robert S., Ph.D., Oregon State U. Assoc. Prof.
Pearson, Thomas, Ph.D., Johns Hopkins U. Adjunct Prof.
Pelletier, David, Ph.D., The Pennsylvania State U. Assoc. Prof.
Pelto, Gretel, Ph.D., U. Minnesota, Prof.
Peto, Richard, M.Sc., U. London (England). Adjunct Prof.
Rasmussen, Kathleen M., Sc.D., Harvard U. Prof.
Rivera, Juan, Ph.D., Cornell U. Adjunct Asst. Prof.
Sahn, David, Ph.D., M.I.T. Prof.
Sanjur, Diva M., Ph.D., Cornell U. Prof.
Sobal, Jeffery, Ph.D., U. of Pennsylvania. Assoc. Prof.
Stephenson, Lani, Ph.D., Cornell U. Assoc. Prof.
Stipanuk, Martha H., Ph.D., U. of Wisconsin. Prof.
Stover, Patrick, Ph.D., Med. College of Virginia. Asst. Prof.
Strupp, Barbara, Ph.D., Cornell U. Assoc. Prof.
Thorbecke, Erik, Ph.D., U. of California. H. E. Babcock Professor of Economics and Food Economics
Utermohlen, Virginia, M.D., Columbia U. Assoc. Prof., Nutritional Sciences/Biochemistry, Molecular and Cell Biology

Other Teaching Personnel

Kendall, Anne, Ph.D., R.D., Cornell U. Lecturer and Director of Dietetics Program

Joint Appointees

Bauman, Dale, Prof., Animal Science/Nutritional Sciences
Miller, Dennis, Prof., Food Science/Nutritional Sciences
Van Campen, Darrell R., Assoc. Prof., U.S. Plant, Soil, and Nutrition Laboratory/Nutritional Sciences

OFFICER EDUCATION

Military instruction began at Cornell University in 1868 under the provisions of the Morrill Act of 1862. Since that time, officer education has been highlighted by the construction of Barton Hall in 1914 and the establishment of a formal Reserve Officers Training Corps (ROTC) unit in 1917. The program evolves to keep pace with the latest military changes and emphasizes the development of leadership and managerial skills. Cornell's Officer Education Program has produced many outstanding civilian and military leaders.

The Officer Education Programs prepare students for a commission as an officer in either the United States Army, Navy, Air Force, or Marine Corps. Each service program is headed by a senior military officer who also serves as a full professor on the Cornell faculty.

MILITARY SCIENCE

Lieutenant Colonel John M. Keefe, Engineer, United States Army, Professor of Military Science and Commanding Officer, U.S. Army ROTC Instructor Group

Major Brian Edholm, Military Intelligence, United States Army

Captain Scott Hillmer, Infantry, United States Army

Captain Reginald Snell, Armor, United States Army

United States Army ROTC Program

The primary objective of the Army Officer Education Program at Cornell is to commission the future officer leadership of the United States Army. Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen's role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential. These objectives are achieved through a program normally covering four years. A two-year program is available for those who qualify. The program includes specific courses in military science, more general academic subjects that assure a well-rounded education, practical training in leadership through participation in the Cadet Corps (including attendance at one six-week summer camp at an Army installation), and the opportunity to participate in a number of extracurricular activities. The combination prepares the student for commissioning and effective performance in the many branches of the Army. The student's academic major, academic performance, leadership ability, personal desires, and the needs of the Army determine the branch of the Army in which the student is commissioned upon graduation.

Requirements for Enrolling

Applicants must be citizens of the United States and be able to obtain a Secret level security clearance prior to being commissioned as lieutenants. (Non-citizens may enroll in selected portions of the program.) Students must meet Army medical requirements. Overall sound mental and physical condition is essential, and students are required to undergo periodic physical fitness tests. Enrollment and continuation in the program is subject to the approval of the Professor of Military Science. Enrollment in specific courses by students not formally enrolled in the program must be approved by course instructors. Contracted students must register for letter-grade military science classes and leadership laboratories for the purpose of commissioning into the United States Army.

Four-Year Program

The Four-Year Program is open to students in their freshman year or, with the approval of military and university authorities, to sophomores in a five-year degree program. Veterans of the Armed Forces of the United States and students entering Cornell with AROTC credit from secondary or military schools (Junior Division AROTC) may receive advanced standing, if qualified. Under the Four-Year Program students enroll in the Basic Course (Mil S I and II) during the first two years, and the Advanced Course (Mil S III and IV) during the next two years. A total of twelve credits of military subjects are taken. In addition, academic-enrichment courses are required in such fields as written communications, computer science, and military history. All cadets attend a five-week camp, with pay, between the junior and senior years. All cadets participate in physical fitness training three days per week. Each year selected cadets are sent to the Army's Airborne School, Winter Survival School, and Air Assault Course, depending upon availability and student standings within the ROTC program.

Basic Course (Mil S I and Mil S II)

Students in the first year of the Basic Course take one classroom course in military science in the fall and spring semesters, for which they receive academic credit depending upon their college. These courses include study of the U.S. organization for defense and principles and techniques of leadership and management.

Students also participate in leadership modules that include rappelling, orienteering, drill and ceremony, physical training, winter survival, rifle marksmanship, historical site visits, land navigation, interpersonal communication, and individual tactical training. These modules are designed to promote personal development and enrichment. While they do not receive academic credit for these activities, students may receive physical education credit. Typical freshman participation in Army officer education is 48 1/2 program-related hours.

During the fall of the second year, students take a two-credit course in American military history. The course consists of instruction in three primary areas. The first section develops the concept of the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second section focuses on America at war in the nineteenth century. Section three focuses on warfare in the twentieth century and concludes with the prospects of future actions for the military.

During the spring of the second year, students take a one-credit course in map reading and spend approximately two hours a week in practical leadership training, land navigation, and military skills.

Advanced Course (Mil S III and Mil S IV)

The Advanced Course of the Four-Year Program is open to students who have successfully completed the Basic Course and are accepted by the Professor of Military Science for further enrollment. It is also open to students who have gained appropriate advanced standing through either successful completion of Basic Camp, a six-week summer training camp, or prior military training. Students entering the Advanced Course must have the equivalent of four academic semesters remaining at Cornell or another degree-granting institution. Students must pass required physical and aptitude tests. In addition, the past performance and desire of each student is evaluated to determine potential for eventual commissioning.

When students are accepted for the Advanced Course or accept a scholarship, they sign a written contract with the U.S. government. Under terms of the contract, they agree to complete the Advanced Course and to accept a commission if offered. Concurrently with the signing of the contract, students enlist in the United States Army Reserve.

Classroom study in the Advanced Course includes one military science course each semester on such subjects as leadership and management, small-unit tactics, and command and staff organization and functions. The two hours a week of practical leadership training continues, and between the junior and senior years all cadets attend a five-week advanced summer camp conducted at Ft. Lewis, Washington.

Scholarships

Scholarships are awarded on the basis of merit and may be available for two, three, or four years. AROTC scholarships are awarded each year to outstanding Basic Camp participants and students in the freshman and sophomore classes. Scholarships pay up to $16,000 toward tuition and mandatory fees. Scholarship cadets and Advanced Course cadets also receive $150 a month for up to ten months a year. Scholarship cadets also receive $450 per year toward the cost of text books.

Commissioning

All students who successfully complete the Advanced Course, including the advanced summer camp, are commissioned as second lieutenants in the United States Army upon graduation.

Service Obligations

ROTC graduates may serve on Active Duty, in the Army Reserve, or in the National Guard, depending upon the needs of the Army and the leadership abilities of the cadet. Officers beginning active duty attend the Officer Basic Course (normally ten to sixteen weeks) of their assigned branch. Upon completion, officers are assigned to a unit and location determined by the desires of the individual and the requirements of the Army. Officers selected for reserve duty attend the Officer Basic Course, after which they are released to reserve status.

ROTC graduates generally serve four years on active duty and four years in reserve status; however, some may serve eight years on reserve duty.

Choice of Branch

Cadets in the second year of the Advanced Course (normally the senior year) may specify the branch of the Army—such as Infantry, Armor, Field Artillery, Air Defense Artillery, Aviation, Corps of Engineers, Signal Corps, Military Police, Military Intelligence—in which they prefer to serve. They are notified in December of the branch to which they are assigned. Appointment in a chosen branch depends upon the student's academic and officer education performance, degree area, and the needs of the Army at that time.

Graduate Study

Active duty deferments, or educational delays, may be granted to individuals who want to attend graduate school at their own expense. Requests will be considered on the basis of needs of the service. Admission to graduate school is the student's responsibility.

Benefits

Each cadet in the Advanced Course (Mil S III and Mil S IV) receives $150 a month for up to ten months a year. While attending the advanced summer camp (between the junior and senior years), each cadet receives approximately $700. A cadet in the Two-Year Program receives the same payments as cadets in the Advanced Course and, in addition, receives approximately $700 for summer Basic Camp attendance before entering the Advanced Course.

Military Science Courses

All cadets take one course and a leadership laboratory each semester in military science. The number of hours a week spent in the classroom varies from semester to semester, as does the credit received for each course.

Freshman Year (Mil S I)

Mil S 101 United States Organization for Defense
Fall. 1 credit. Required. Staff.
Students examine the U.S. defense structure in terms of organization, mission, personnel, and relationships among and between military forces and branches and departments of the government. The U.S. Army force structure is examined at all levels. The complexities and magnitude of operating the defense organization are studied to provide a framework for subsequent instruction. Students develop skills in conducting oral and written presentations.

Mil S 102 Leadership Theory
Spring. 1 credit. Required. Staff.
This course allows students to develop a basic understanding and appreciation of theories of social and organizational psychology and behavior as they apply to the military setting. Attention is given to leader types, the source and exercise of authority, and the impact of varying styles of leadership, resource management, motivation, and organization effectiveness. The student is introduced to the concepts of integrity, ethics, and professionalism. Classes on historical events and strategy are also presented.

Sophomore Year (Mil S II)

Mil S 222 Small Organizational Operations/Land Navigation
Spring. 1 credit. Required. Prerequisite: Mil S 102 or instructor approval. Staff.
Students learn the basic principles of group dynamics at the level of the smallest military unit, the squad. Troop-leading procedures are introduced through case studies and role-playing exercises. Leadership theories introduced in Mil S 102 are examined in a variety of realistic settings. The practical application of behavioral theories is explored in the context of small military organizations. The course will also provide practical knowledge of the various forms of topographic representation. Students will use maps in terrain association and land navigation. Knowledge of topography is complemented by an orientation on significant environmental influences of physical, social, and climatic factors. Portions of the course offer experience in land navigation and orienteering.

Mil S 321 Armed Conflict in Society
Fall. 2 credits. Required. Staff.
This course provides practical knowledge in American Military History. It is primarily an overview course designed to provide an understanding of the art and nature of warfare and particularly how warfare has affected the United States. The course consists of three primary areas of instruction with an emphasis on American military history. The first area of instruction addresses the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second phase focuses on America at war in the nineteenth century. It places particular emphasis on the American Civil War and the strategy of annihilation versus the strategy of attrition. The final phase looks at warfare in the twentieth century and finishes with an analysis of the future of warfare for the military of the United States.

Junior Year (Mil S III)

Mil S 331 Theory and Dynamics of the Military Team
Fall. 2 credits. Required. Staff.
After an initial introduction to techniques of presenting briefings, students are provided with a broad understanding of the principles and application of teamwork in military organizations. Particular emphasis is given to leadership responsibilities of the commander as the team coordinator. This course helps students develop an understanding of the roles and contributions of the various branches of the Army in support of the military team.

Mil S 332 Leadership in Small-Unit Operations
Spring. 2 credits. Required. Prerequisite: Mil S 331. Staff.
This course provides an understanding of the nature of decision making and the tactical application of the military team. Through the use of conferences and extensive practical exercises, students develop familiarity with the factors influencing a leader's decisions and the process of planning, coordinating, and directing the operations of military units through operation plans and orders.

Senior Year (Mil S IV)

Mil S 441 Leadership, Management, and Ethics for the Junior Military Officer
Fall. 2 credits. Required.
An overview of the functions, responsibilities, and interrelationships among small-unit leaders, the commander, and the staff. Detailed discussions focus on actions of small-unit leaders, communication skills, army operations, the logistical support of the army in the field, and the army training system. The course focuses on the dynamics of leadership in battle through the detailed analysis of a series of case studies. Just war theory, ethics, and professionalism are also addressed in a seminar-type environment.

Mil S 442 Contemporary Military Environment
Spring. 2 credits. Required.
A continuation of Mil S 441. Conferences and seminars examine the techniques of effective military leadership with special attention given to professionalism and ethical considerations in the armed forces during both peacetime and armed conflict. Army operations and basic doctrine are also discussed. This is a capstone course designed to prepare the student for commissioning.

Practical Leadership Training

All Army Officer-Education Students

As with many laboratory periods, no credit is given, and participation is required for successful completion of the AROTC program. Students receive physical education credit for the laboratory. Each semester, cadets register for the appropriate leadership laboratory, consisting of physical fitness training three times per week, two hours of military training each week, and one or two weekend training exercises per semester.

Mil S I Leadership Laboratory I

Fall.	Spring.
0 credits. S/U.	0 credits. S/U.
Mil S 151	Mil S 152

Mil S I cadets meet for two hours each week to learn a variety of military skills including rappelling, first aid, drill and ceremonies, weapons familiarization, and physical fitness training.

Mil S II Leadership Laboratory II

Fall.	Spring.
0 credits. S/U.	0 credits. S/U.
Mil S 251	Mil S 252

Cadets meet for two hours each week as members of the cadet organization to

participate in practical leadership exercises. Types of practical activities include rifle marksmanship, orienteering, drill and ceremonies, signal communications, physical fitness training, first aid, tactics and field exercises.

Mil S III Leadership Laboratory III

Fall. 0 credits.	Spring. 0 credits.
Required. S/U.	Required. S/U.
Mil S 351	Mil S 352

Cadets meet for two hours a week and some weekends to prepare for a five-week summer camp that follows their junior year. Emphasis is on the development of individual practical and leadership technique skills. Cadets rotate through leadership positions to develop an ability to apply decision-making processes to a myriad of situations. Cadets also acquire technical expertise and proficiency in signal communications, physical fitness, drill and ceremonies, rappelling, orienteering, tactics, water survival, and other military skills.

Mil S IV Leadership Laboratory IV

Fall. 0 credits.	Spring. 0 credits.
S/U. Required.	Required. S/U.
Mil S 451	Mil S 452

Senior cadets plan and operate the leadership laboratory programs for Mil S I–III cadets. The development of planning and supervisory skills is emphasized. Cadets have an opportunity to practice leadership skills developed during previous ROTC training and summer camp experiences. Includes two to three hours a week devoted to physical fitness.

Professional Military Education (PME) Requirements

In addition to the ROTC classes and leadership laboratories listed above, a number of courses are required as part of the contracted student's academic program. These courses are offered by the university and round out the student's professional education. The PME component of the ROTC program requires at least one college course in each of the following areas: communication skills, military history, and an introduction to computers. These courses must be completed prior to graduation and commissioning. Courses that meet these requirements are approved by the Professor of Military Science.

NAVAL SCIENCE

Captain V. Lynch, United States Navy, Professor of Naval Science and Commanding Officer, Naval ROTC Unit

Lieutenant Colonel R. Minor, United States Marine Corps

Lieutenant J. Cleary, United States Navy

Lieutenant M. Vannoy, United States Navy

Lieutenant J. Biondi, United States Navy

The objective of the Naval Officer Education Program is to prepare selected students for service as commissioned officers in the United States Navy or United States Marine Corps by supplementing their undergraduate education with instruction in essential concepts of naval science and fostering development of leadership, integrity, and dedication to their country and the naval services. The program is compatible with most undergraduate major fields of study, including five-year baccalaureate degree programs on a case-by-case basis. The objective is achieved through a broad program, normally covering four years, that combines specific courses in naval science and specified academic subjects. These courses supplement weekly professional development sessions in which the practical aspects of naval science and leadership procedures are stressed. It also includes at least one summer-at-sea period.

Non–naval officer education students: Though the Navy–Marine Corps Program has been designed to prepare future officers, naval science courses are open to all students at Cornell as space limitations allow.

Requirements for Enrollment

An applicant for the Naval ROTC program at Cornell must be a citizen of the United States. Applicants must have reached their seventeenth birthday by June 30 of the entering year and be less than twenty-seven years of age on June 30 of the calendar year in which they are commissioned. Waivers of the upper age limit may be available for applicants who have prior active duty military service. Applicants must also meet physical and medical requirements. Interested students can visit the Naval ROTC Unit in Barton Hall or contact their local recruiter.

Programs

There are two programs: the Scholarship Program and the College Program. They differ primarily in benefits to the student.

Scholarship Program

The Scholarship Program provides approximately one thousand scholarships in more than sixty universities nationwide to selected students who want to serve in the Navy or Marine Corps. Financial support is provided to students during college preceding the award of the baccalaureate degree.

Benefits

The program offers scholarships that provide *full tuition* and are not need-based. While on scholarship, students also receive money for instructional fees, textbooks, nonconsumable supplies, and a $150-a-month stipend for a maximum of forty months.

Successful completion of the Scholarship Program leads to a commission in the Navy or Marine Corps Reserve. At Cornell University over 90 percent of NROTC students have a scholarship. Students entering NROTC without a prior scholarship award are entitled to compete for two- or three-year scholarships controlled by the Chief of Naval Education and Training.

Entering the Scholarship Program

There are three ways to enter the Scholarship Program:

First, by applying to the national competition each year. This process entails filling out and submitting an appropriate application; being interviewed; having a physical examination; and applying to, and being accepted by, one of the colleges or universities throughout the country that offers an NROTC program.

Second, by enrolling in the College Program at Cornell and being recommended by the Professor of Naval Science for a scholarship after at least one semester in the program.

Third, by entering through the Two-Year Scholarship Program.

College Program

There are two College Programs available. Both lead to a commission in the Naval or Marine Corps Reserve.

Starting in the junior year, each of these programs provides textbooks for naval science courses, uniforms, and a subsistence allowance of $150 a month.

The regular College Program is four years long. Academic requirements for students in this program are somewhat less than those for scholarship students, as noted in the curriculum section of this booklet.

The Two-Year College Program begins the summer before the junior year, when students attend a required program with pay at the Naval Science Institute in Newport, R.I.

Summer Training

Each summer, students in the Scholarship Program spend approximately four to six weeks on a Navy ship or with a naval activity anywhere in the world for on-the-job training. College Program students attend one summer training session of the same duration between the junior and senior years.

Active Duty Requirements

Scholarship midshipmen commissioned in the Navy or Marine Corps Reserve serve on active duty for a minimum of four years. College program midshipmen commissioned in the Naval or Marine Corps Reserve serve a minimum of three years. In somes cases, following commissioning, specialized training such as aviation or nuclear power will add additional active duty requirements.

Choice of Assignment

Graduates have an opportunity to request the duty they prefer upon graduation. These requests are given careful consideration, and every effort is made to assign newly commissioned officers their duty of choice.

Among the assignments available are duty in naval aviation as either a pilot or naval flight officer, on submarines, and on surface ships. Other specialties, such as special warfare or medical service corps, may be available on a limited basis.

Marine Corps Options

The United States Marine Corps is an integral part of the Naval Services and is commanded by the Commandant of the Marine Corps. One-sixth of the NROTC scholarship students may be Marine selectees who will be designated Marine-option midshipmen. Upon successful completion of the program they will be appointed second lieutenants in the United States Marine Corps Reserve.

Marine-option midshipmen follow the same program as other NROTC midshipmen for the first two years. Beginning with the junior year, Marine-option midshipmen are taught Marine oriented courses by a Marine Officer Instructor. For first class summer training (after the junior year), Marine-option students travel to Quantico, Virginia, where they undergo six weeks of intensive training known as the USMC Officer Candidate School. Upon commissioning the following year as second lieutenants, they are assigned to the Basic School at Quantico, Virginia. After the Basic School, the Marine officer is assigned duty in a variety of occupational fields.

Among the duties available are infantry, aviation, artillery, tracked vehicles, engineering, communications, electronics, supply, administration, and computer science. The officer may serve on board naval vessels or at shore installations of the Marine Corps or Navy, either in this country or overseas.

The Marine Corps has a postgraduate training system similar in objectives and organization to that of the Navy. Marine officers selected for aviation receive flight training at the Naval Air Station, Pensacola, Florida, along with their Navy counterparts.

Curriculum

A student has three categories of requirements to fulfill as a midshipman. The first of these requirements is a weekly naval professional development session each semester. The second requirement is a naval science course each semester. The last set of requirements consists of other required courses prescribed by the Navy to meet the growing need for more and better technically educated junior officers.

Naval Professional Laboratories

Nav S 141–142, 241–242, 341–342, or 441–442

All students in the program participate in one ninety-minute professional development session each week. The session is held from 2:30 until 4:00 on Wednesday afternoons. This period consists of both drill and professional information briefings. Students gain experience in actual leadership situations and at the same time learn the fundamentals of seamanship, military formations, movements, commands, discipline, courtesies, and honors. During information briefings special emphasis is given to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer's duties.

Naval Science Courses

All Navy and Marine midshipmen take one naval science course each semester during their freshman and sophomore years. Navy-option students continue to take a naval science course each semester during their junior and senior years. Marine-option students have slightly different curriculum requirements for their junior and senior years.

Freshman Year (Navy and Marines)

Nav S 101 Fundamentals of Naval Science

Fall. No credit.

A study of fundamental aspects of naval science, including its contributions to sea power, factors and different warfare communities involved in the physical development of naval forces, resources that must be managed, and prospects for the future. Naval uniforms, customs, and traditions are also covered.

Nav S 102 Sea Power and Maritime Affairs

Spring. 3 credits.

Discussions examine the history of the Navy as a force in diplomacy and an instrument of U.S. foreign policy. Relationships between Congress and the military for determining the national defense policy are also explored. An integrated examination of current events and issues gives a historical perspective throughout the course.

Nav S 157 Principles of Sailing

Fall and spring. Physical education credit.

Instruction in basic sailing skills and safety principles. Students sail small boats on Cayuga Lake. Focus is on U.S. Navy Class B inshore skipper certifications.

Sophomore Year (Navy and Marines)

Nav S 201 Organizational Behavior and Small Group Processes

Fall. 3 credits.

The theme of the course is the "evolving role of the manager, organizational decision maker, and leader." The course will begin by briefly studying the theoretical principles of management and will progress through practical skills of managers and leaders. Lectures, reading assignments, films, and discussions should provide students with an excellent opportunity to wrestle with complex managerial and leadership issues. The goal of this course is for students to begin to develop a sound personal leadership philosophy that will enable them to more effectively accomplish assigned responsibilities leading men and women in today's demanding and increasing "hi-tech" naval environment.

Nav S 202 Naval Ship Systems I (also Mechanical and Aerospace Engineering 101)

Spring. 3 credits.

An introduction to primary ship-systems and their interrelationship. Basic principles of thermodynamics, propulsion, mechanical operation, internal communications, electronics, ship structure, and other marine systems.

Junior Year (Navy)

Nav S 301 Principles of Navigation (also Agricultural Engineering 305)

Fall. 4 credits.

An introduction to the fundamentals of marine navigation emphasizing piloting and celestial navigation procedures. The course covers coordinate systems, chart projections, navigational aids, instruments, compass observations, time, star identification, use of the nautical almanac, tides and currents. Electronic navigation systems are discussed.

Nav S 302 Naval Operations

Spring. 3 credits.

The course covers the application of the nautical rules of the road and maneuvering board in order to avoid collisions at sea. Other aspects of naval surface ship operations that are introduced include visual and electronic communications methods, tactical disposition of forces, ship handling theory, and deck seamanship topics.

Senior Year (Navy)

Nav S 401 Naval Ships Systems II (Weapons)

Fall. 3 credits.

The principles and theories used in the development of naval weapons systems are examined. Initially, extensive study is made of detection systems, especially radar and sonar, followed by discussions of ancillary systems for computing, stabilizing, tracking, and weapons control and delivery.

Nav S 402 Leadership and Ethics

Spring. 3 credits.

A variety of topics important to the naval officer for both professional and managerial development are reviewed. The material is tailored for the midshipman to provide an understanding and appreciation of leadership and ethics in preparation for assignments in the naval service. Through the use of lectures, case studies, and role playing, the student will learn various aspects of Navy leadership and ethical decision-making. Marine-option students may also take this course.

Junior or Senior Year (Marine Options)

Nav S 310 Evolution of War

Spring. 3 credits.

A study of warfare that examines the relationship of military strategy to geography, economics, sociology, technology, and national political realities and values; the evolution of warfare, including principles of war, weapons, and associated equipment; and the effects of nuclear weapons and guerrilla warfare on traditional concepts of national strategy.

Nav S 410 History of Amphibious Warfare

Spring. 3 credits.

The history of the development, theory, techniques, and conduct of amphibious operations from 490 B.C. to the present. Special emphasis will be on amphibious operations conducted in the central Pacific during World War II and the future of amphibious operations.

Other Required Courses

Navy Option Scholarship Program

To be eligible for a commission in the United States Navy, midshipmen must successfully complete all the requirements for a baccalaureate degree in any field of study offered by Cornell University and complete courses in the following subjects (specified courses to be approved by the Professor of Naval Science):

American military affairs or national security policy (one semester)

English (one year)

calculus (one year)

calculus-based physics (one year)

computer science (one semester)

The calculus requirement must be satisfied by the end of the sophomore year and the physics requirement by the end of the junior year.

Although free choice of academic majors is permitted, students are encouraged to pursue majors in engineering and the physical sciences to meet the technological requirements of the modern Navy.

Navy Option College Program

Navy-option College Program students must complete one year of college-level study in mathematics, physical science, and English as a prerequisite for commissioning. The mathematics course must be completed by the end of the junior year; the physical science course by the end of the senior year. In addition, one term of computer science is required. College Program students who desire entry into the Navy-option Scholarship Program should fulfill all of the requirements applicable to Navy-option scholarship students if they wish to be eligible and competitive for a scholarship controlled by the Chief of Naval Education and Training.

Marine Option

Any midshipman, in either the Scholarship Program or the College Program, who completes all of Cornell University's degree requirements in any academic major, is eligible for a commission in the U.S. Marine Corps or U.S. Marine Corps Reserve. Marine-option students take the same naval science courses and naval professional laboratories as Navy-option students for the freshman and sophomore years. During the junior and senior years, Marine-option students have slightly different naval science course requirements than their Navy-option student counterparts. Two semesters of courses (a minimum of 3 hours each) in the subject area of American Military Affairs or National Security Policy are required. One semester of a modern foreign language must be completed.

Extracurricular Activities

The NROTC midshipman at Cornell is offered a broad range of activities, including sail training and a comprehensive intramural sports program. Midshipmen participate in a myriad of social events, including the annual Navy/Marine Corps Birthday Ball.

DEPARTMENT OF AEROSPACE STUDIES

Colonel James L. Wilson, Jr., United States Air Force, Professor of Aerospace Studies and Commander, Air Force ROTC Detachment 520

Captain Reid N. Orth, United States Air Force

Captain Daniel P. McAlister, United States Air Force

The objective of the Air Force Officer Education Program at Cornell is to prepare men and women for positions as officers in the United States Air Force. The program is designed to teach students about the mission and organization of the Air Force, the historical development of airpower, leadership, and management. Students study national security policy and the role of the military in a democratic society. This program includes specific courses in aerospace studies and practical leadership laboratories.

Requirements for Enrollment

The Air Force Officer Education Program is open to any qualified undergraduate or graduate student enrolled in any major field of study. An applicant must be a United States citizen to become a commissioned officer. Noncitizens may enroll and will receive certificates acknowledging completion of the course but cannot receive a commission.

All applicants receive physical examinations at no cost and must meet certain physical requirements to be accepted. Students who are interested in qualifying for flying categories (pilot or navigator) must meet more stringent physical requirements. In addition, students enrolled in the commissioning program must meet specified physical fitness requirements.

Though the program is designed to prepare future Air Force officers, the Department of Aerospace Studies' academic courses are open to all students at Cornell.

Four-Year Program

The Four-Year Program is open to all qualified freshmen. Sophomores may also enter a condensed version of the four-year program after coordination with the AFROTC staff. Students in a five-year program may enroll during their freshman, sophomore, or junior year.

Veterans of the U.S. armed forces and students entering Cornell from military schools may receive advanced standing, subject to approval by the Professor of Aerospace Studies.

The Four-Year Program consists of General Military Courses (GMC) and Professional Officer Courses (POC). For scholarship cadets, the first year of the GMC carries no military commitment, and students may withdraw at any time. For nonscholarship cadets, both years of the GMC carry no military commitment, and students may withdraw at any time.

General Military Course

Students in General Military Courses (GMC) take a one-credit-hour Aerospace Studies course each semester. During the freshman year, the student examines the organization and mission of the United States Air Force and the environment of the Air Force officer. In the sophomore year, the student studies the history and development of American air power. In both years, officership and professionalism within the United States Air Force are emphasized.

Students also spend two hours a week in a leadership laboratory. Leadership laboratory provides cadets with the opportunity to put into practice the skills they learn in their aerospace studies classes. These laboratories focus on the development of officer qualities through such activities as drill and ceremonies, group leadership problems, confidence-building exercises, and guest lecturers. In addition, all students participate in summer field training for four weeks between their sophomore and junior years.

Professional Officer Course

The Professional Officer Courses (POC) provide a two-year advanced program of instruction. Students who are accepted for the POC must have successfully completed or validated the basic course and must meet academic and physical standards. Each cadet accepted into the POC must sign an agreement to complete the program and accept, if offered, a commission in the United States Air Force upon graduation.

Classroom study in the POC is a three-credit-hour course each semester. In the junior year, cadets study Air Force leadership and management at the junior officer level. During the senior year, cadets study the elements of national security and the military's role in American society. Leadership laboratory requires two hours a week in the junior and senior years. In leadership laboratory, cadets are exposed to advanced leadership experiences and apply principles of leadership learned in the classroom.

Two-Year Program

The Two-Year Program consists of the last two years (Professional Officer Courses) of the regular Four-Year Program plus a five-week summer training course preceding enrollment.

The Two-Year Program is open to all qualified students with two years of academic study remaining at Cornell (graduate or undergraduate) or at schools supported under a crosstown agreement. Applications are accepted from October through April of the academic year preceding the applicant's planned entry into the program. Selectees are then required to complete a five-week summer training program at government expense.

Scholarships

The Air Force offers four-year scholarships to high school seniors and two- and three-year scholarships to college students. Four-year scholarships are offered on a competitive basis in specified majors to high school seniors. Scholarship information can be obtained from a high school guidance counselor, from Air Force ROTC officers at Cornell (AFROTC phone number is 607–255–4004), from a local Air Force recruiter, or from AFROTC/RROO, Maxwell AFB, AL 36112–6663, 1–800–522–0033, extension 2093. The deadline for submitting a four-year scholarship application is December 1 of the year preceding the academic year in which a student wants to enter the program. Students should apply early.

Scholarships for two and three years. Applications for these scholarships should be made to the Professor of Aerospace Studies during the freshman or sophomore years of college. All selections are based on the student's major, scores achieved on the Air Force Officer Qualifying Test, the student's overall grade point average, and the recommendation of the Professor of Aerospace Studies. Scholarship amounts range from $3,400 per year to full tuition, fees and books, and provide a $150 monthly nontaxable allowance during the school year. Scholarships do not include the cost of room and board.

Fees

An initial uniform deposit of $50 is required on entry into AFROTC. Two subsequent $50 uniform payments are due, one on entry into the POC and one before commissioning. At that point, cadets can purchase uniforms with their deposits or return uniforms and receive their deposits back.

Benefits

All cadets in the advanced program (POC)—whether they are on scholarship or not—receive a $150-a-month, nontaxable subsistence allowance during the academic year. During the four- or five-week summer field training (see below), each cadet receives a pay allowance plus an allowance for travel to and from the field site. Textbooks and supplies required for Department of Aerospace Studies courses are provided.

All cadets are eligible to participate in AFROTC-sponsored field trips made to Air Force bases throughout the country as well as voluntary summer programs for professional development. Scholarship and advanced cadets (POC) are entitled to space-available travel on Air Force aircraft flying within the continental United States.

Field Training

There are two types of field training: a four-week course for cadets in the Four-Year Program and a five-week course for Two-Year Program applicants. Students in these

programs normally attend field training between their sophomore and junior years.

Field training is designed to stimulate the development of military leadership skills through meaningful experiences. The curriculum consists of aircraft, aircrew, and survival orientation; junior officer training; physical training; small arms training; a social-actions program; and supplemental training. The five-week training program includes sixty hours of Air Force ROTC academic course work that substitutes for the freshman and sophomore Aerospace Studies courses.

Cadets may also volunteer for one of many Advanced Training Programs. These programs **include** the Professional Development Program, Air Force Academy Free-Fall Parachute Training, the British Royal Air Force (RAF) Exchange Program, Research and Development Experiences, the Academy Soaring Program, and Army Airborne Training.

Commissioning Obligations

All students who successfully complete the AFROTC advanced program (POC) are awarded a baccalaureate degree, tendered a commission, and enter the Air Force as second lieutenants.

Second lieutenants commissioned in nonflying categories are required to serve on active duty for four years. Pilots are required to serve on active duty for ten years after completing flying training. Navigators serve six years after completing training.

Air Force Careers

The Air Force assigns new officers to a career field based on mission requirements, educational background, and officers' preferences. Students in the engineering-scientific category may be assigned to practice in their specialty in research and development, communications, electronics, aeronautics, astronautics, the biological sciences, computer design and maintenance, meteorology, space, or other engineering and scientific fields. Graduates in the nontechnical category can anticipate assignments in manpower management, information management, logistics, law enforcement and investigation, intelligence, personnel, transportation, accounting and finance, and other career fields. They will be placed in positions of responsibility and be given the opportunity to further their development in leadership and management skills. Their specific educational expertise may be required.

Any undergraduate major is suitable for those who are qualified and interested in becoming pilots or navigators. After completion of flying training, personnel are assigned to a specific type of aircraft.

Curriculum

Students in the Four-Year Program are required to take all courses listed below. Students in the Two-Year Program are required to take all of the courses listed for the junior and senior years. There are no prerequisites for any Aerospace Studies courses.

Freshman Year

Air S 161 The Foundations of the United States Air Force I
Fall. 1 credit.
This is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Air S 162 The Foundations of the United States Air Force II
Spring. 1 credit.
Continuation of Air S 161.

Sophomore Year

Air S 211 The Evolution of USAF Air and Space Power I
Fall. 1 credit.
This course is designed to examine general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the space-age global positioning systems of the Persian Gulf War. Historical examples are provided to extrapolate the development of Air Force capabilities (competencies) and missions (functions) to demonstrate the evolution of what has become today's USAF air and space power. Furthermore, the course examines several fundamental truths associated with war in the third dimension: e.g., Principles of War and Tenets of Air and Space Power. As a whole, this course provides the students with a knowledge-level understanding of the general element and employment of air and space power from an institutional, doctrinal, and historical perspective. In addition, students will continue to discuss the importance of the Air Force Core Values by examining operational examples and historical Air Force leaders and will continue to develop their communication skills.

Air S 212 The Evolution of USAF Air and Space Power II
Spring. 1 credit.
Continuation of Air S 211.

Junior Year

Air S 331 Air Force Leadership and Management I
Fall. 3 credits.
This course is a study of leadership, quality management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course.

Air S 332 Air Force Leadership and Management II
Spring. 3 credits.
Continuation of Air S 331.

Senior Year

Air S 401 National Security Affairs/ Preparation for Active Duty I
Fall. 3 credits.
This course examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles of this course.

AS 402 National Security Affairs/ Preparation for Active Duty II
Spring. 3 credits.
Continuation of Air S 401.

Leadership Laboratory Courses

All Air Force cadets spend 2 hours a week throughout the academic year in a leadership laboratory, for which no academic credit is given. Occasionally laboratories are held at times other than the normally scheduled period. All cadets are expected to participate in an evening formal dinner and to meet minimum physical fitness and weight standards each semester. Leadership lab is open to students qualified to compete for an Air Force commission.

Air S 141–142 Initial Military Experiences
Introduction to the responsibilities, life, and work of an Air Force officer. Basic knowledge of drill and ceremonies, military courtesies, and the wearing of the uniform. Field trip to a local military installation.

Air S 241–242 Intermediate Military Experiences
Develops skills in giving commands for drill and ceremonies. Introduction to the Air Force base environment in which the Air Force officer functions. Includes a look at career areas available based on academic majors. Students participate in leadership situations through military drills and ceremonies. Field trip to a local military installation.

Air S 341–342 Junior Officer Leadership
Cadets assume leadership responsibilities similar to those of a junior officer. Emphasis is on the importance of applying effective human relations skills in dealing with superiors, peers, and subordinates. Cadets also gain insight into the general structure and progression patterns common to selected Air Force officer career fields.

Air S 441 Advanced Leadership Experiences
Cadets assume command leadership responsibilities to operate a military organization. Cadets apply effective leadership and managerial techniques with individuals and groups and participate in self-analysis of leadership and managerial abilities.

Air S 442 Precommissioning Laboratory
Factors that facilitate transition from civilian to military life are reviewed. The need for military security, base services and activities, personal finances, travel regulations, and social obligations are introduced.

DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS

ADMINISTRATION

Alan E. Gantert, director

COURSES

The courses and fees described in this catalog are subject to change or cancellation at any time by official action of Cornell University. For current fee information on physical education courses call 255–4286; for outdoor education courses, call 255–6415 (ext. 2).

Enrollment in any course is limited by the space available. Other restrictions are included in the course description. Most courses are coeducational. The specific time and place of class meetings, as well as information about fees, are available at the physical education course registration or may be found on "Bear Access," a package of software for accessing a variety of network services at Cornell, or on the World Wide Web (at http://www.athletics.cornell.edu/PE). Course fees are billed through the Office of the Bursar.

Additional course offerings may be listed at registration, as the curriculum is frequently reviewed and changed.

Aquatic Courses

Lifeguard Training
Fall and spring. Fee charged. Prerequisite: swimming test consisting of 500 yards, demonstrating three strokes, treading water without the use of hands, and retrieving a brick from seven feet of water. Three classes a week.
An American Red Cross certification course. Practice and execution of lifeguarding first aid and CPR skills and techniques. Certification is awarded in lifeguarding, first aid, and CPR upon satisfactory completion of the course.

Lifeguard Training Instructor
Spring. Fee charged. Prerequisites: current Red Cross ICT or instructor card, written and skill tests in lifeguarding, first aid, and CPR techniques. Students must not miss first class. Two classes a week.
American Red Cross lifeguarding instructor and CPR-FPR certifications are awarded upon successful completion.

Scuba, Open-Water
Fall, spring, and summer (6 weeks). Fee charged.
Program includes classroom work skill training in a pool and open-water training in Cayuga Lake. P.A.D.I. open water certification awarded upon successful completion.

Scuba, Advanced Open-Water
Fall and spring. Fee charged.
Advanced-level open-water training in Cayuga Lake. For those who have completed the open-water course.

Rescue Diver
Fall and spring. Fee charged.
Advanced course for scuba divers. For those who have completed Advanced Open-Water Scuba certification and are interested in learning rescue and safety techniques.

Dive Master
Fall and spring. Fee charged.
Advanced-level scuba course open only to those who have completed the Rescue Diver course. NOTE: This is a long, time-consuming course, which requires the student to be in good physical and swimming shape.

Specialty Scuba Diving
Fall and spring. Fee charged.
Courses offered in the following specialty diving areas: navigation, search and recovery, night diving, deep diving, underwater photography, wreck, multi-level, boat, tropical fish identification and buoyancy control, and underwater naturalist.

Scuba Diving Trips
Spring. Fee charged.
This course is offered during the spring intersession period. Scuba trips to various destinations such as the Bahamas. Locations change from year to year. See the information sheet at the registration table.

Swimming, Introduction to (ARC)
Fall, spring, and summer. (6 weeks).
Instruction and practice in skills leading to passing the basic swimming proficiency test.

Swimming, Advanced Beginning (ARC)
Spring.
Ideal for all who have taken one term of Beginning Swimming, regardless of whether the test was successfully completed. Areas of special emphasis are the crawl stroke and rotary breathing, back crawl, elementary backstroke, diving, treading water, and underwater swimming. The primary objective is to strengthen the student's confidence and competence.

Swimming, Intermediate (ARC)
Fall and spring.
Practice of basic skills and five basic strokes; front crawl, back crawl, elementary backstroke, breaststroke, sidestroke.

Swimming, Advanced (ARC)
Fall and spring.
Practice of nine strokes: front crawl, back crawl, elementary backstroke, breaststroke, inverted breaststroke, sidestroke, overarm sidestroke, trudgeon, and butterfly.

Swimming Conditioning
Fall and spring. Prerequisite: reasonable swimming ability.
Introduction to, and practice of, different training methods. Final objective: to swim 2,500 yards during class period. Primarily a conditioning and not an instructional course.

Water Safety Instructor
Spring. Fee charged. Prerequisite: passing of written and skill water tests which are given on the first day.
American Red Cross water safety instructor certification is awarded upon satisfactory completion of the course. This is not a course for a casual participant. Approximately 45 hours of work is required.

Water Safety Instructor Refresher Course
Spring. Fee charged.
Selected sessions of the water safety instructor certification course.

Bowling Courses

Bowling
Fall and spring. Fee charged.
For the beginning and intermediate bowler. Shoe rental is included in the fee.

Dance Courses

Develop flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with rhythmic accuracy, clarity of body design, and fullness of feeling. Auditions are required for admission to all advanced courses, since they require the mental and physical ability to perform more-complex phrases in various styles.

Ballet I
Fall and spring.

Ballet II
Fall and spring.

Ballet III
Fall and spring.

Ballroom Dancing
Fall, spring and summer. Fee charged. One class a week, Helen Newman Hall. Students and their partners must sign up at course registration.
Includes instruction in the waltz, swing, cha cha, calypso, tango, and others.

Belly Dancing
Fall and spring. Fee charged.
Belly dancing is an exciting Middle Eastern folk art that can help in the development of flexibility, body awareness, and overall body tone. The class will begin with warm-ups and continue with basic movements and rhythms, then put them together in a dance to music of the Middle East.

Introduction to Swing Dance
Fall and spring. Fee charged.
No partners are needed. Beginners can expect to develop significant capacity for enjoyment of two forms of swing dance: jitterbug and street boogie. Partners will be rotated throughout the course. Effort will be made at registration to equalize male and female ratios.

Latin Dance
Fall and spring. Fee charged.
Partner sign-in required. This is an introductory course that will teach salsa, mambo, Latin and meringue. Emphasis on listening, feeling and expressing Latin rhythms with precise detail and technique.

Modern Dance I (also Theater Arts 124)
Fall and spring.

Modern Dance II (also Theater Arts 232)
Fall, spring, and summer (6 weeks).

Modern Dance III (also Theater Arts 306)
Fall and spring.

Modern Dance IV (also Theater Arts 308)
Spring.

Equitation Courses

Basic, Intermediate, Advanced
Fall, spring, and summer (6 weeks). Fee charged.
All riding classes are held at the Cornell Equestrian Center located on Pine Tree Road near East Hill Plaza. Detailed information will be offered by the equitation staff at the registration sign-up table. Basic—never ridden; Intermediate I—completed basic with knowledge of walk/trot/canter; Intermediate II—walk/trot/canter with control over 2' course; Advanced—strong jumping/dressage skills with experience hunting/showing/eventing. Students must fill out a release form to participate in any riding class.

First Aid/CPR Courses

Emergency Response
Fall and spring. Fee charged.
This advanced-level first aid course is the most comprehensive available without NYS certification. Sixty hours of training includes CPR for the Professional Rescuer and oxygen administration, as well as many of the first aid skills taught in a basic EMT class. American Red Cross certification is valid throughout the United States and is accepted by many states as a Certified First Responder equivalent. Certification is valid for three years. This certification would be appropriate for camp medical directors and those who work closely with pre-hospital medical staff.

NYS Emergency Medical Technician—Basic
Two-semester course. Fee charged.
This intensive 130-hour course is taught throughout both the fall and spring semesters. Course includes training in CPR for the Professional Rescuer, oxygen administration, airway management, fracture management, bleeding control, expanded patient assessment, spinal immobilization, medical anti-shock trousers, and defibrillation. Students will qualify for the NYS EMT Certification Exam upon successful completion of this course. Rigid attendance and participation requirements are strictly enforced.

Fishing Courses

Fly Fishing and Basic Flytying Techniques, Level I
Fall and spring. Fee charged.
Learn the art of tying several of your own artificial flies while you learn the art of fly casting. Students must have a valid NYS fishing license and their own wader boots. All other materials provided.

Salt Water Fly Fishing
Fall. Fee charged.
Learn the special techniques necessary for salt water fly fishing. This course includes 4 hours of classroom instruction and 4 days of fishing over fall break.

Fitness Courses

Aerobic Dance
Fall, spring, and summer (6 weeks). Fee charged.
A dance program designed to keep the cardiovascular system in top shape by making the body demand increased amounts of oxygen.

Body Sculpting
Fall and spring. Fee charged.

Cardio Crazy
Fall and spring. Fee charged.
The course is designed to acquaint the student with the various types of indoor aerobic training equipment, rowing machines, tread mills, stair machines, exercycles, and Nordic Traks, and to teach them to design a personal fitness program incorporating the equipment.

8 O'Clock Rock
Fall and spring. Fee charged.
This class combines the best of the principles of weight training and the cardio training in the 8 O'Clock Rock Class.

Aerobic Instructor Training
Fall and spring. Fee charged.
The course is designed to train the student to teach aerobics and prepare for the A.F.A.A. Primary Aerobic Instructors Certification Test.

Fitness and Conditioning
Fall and spring.
Physical fitness program that embodies features of stretching exercises, weight lifting, and jogging. Students work on their individual training needs.

Jogging
Fall and spring.
This course will cover running and stretching techniques. A conditioning program with the objective to develop the capacity to run three miles after 12 weeks of training.

Jogging Tours—Distance Running
Fall and spring.
A course designed for the intermediate runner who can run an average of 3 miles in 30 minutes. Most tours will be 3–4 miles long and will go through campus and nearby countryside.

Triathlon
Fall and spring.
Designed to acquaint students with the components of, and conditioning for, triathlon (running, swimming, and bicycling).

Wellness and Fitness
Fall and spring. Fee charged.
"Here's to a Healthier You"—a wellness experience for the busy student. This course will assess the student's physical fitness status, blood cholesterol levels, and overall lifestyle health habits. Each student will receive an individual exercise prescription and have access to the Wellness Program fitness room in Helen Newman Hall. Lectures on nutrition and stress management are also presented. This course has been made possible through the generosity of the Bateman family in memory of Ms. Dorothy Bateman, Cornell's first director of women's sports and physical education (1920 to 1962).

Golf Courses

Golf, Introduction to
Fall and spring. Fee charged.
A PGA program of instruction is geared to all levels of experience and ability. The objective is to give beginners enough skill to play, and to give more-advanced players direction in their thinking, practice, and play, through a thorough understanding of fundamentals. Equipment is furnished.

Golf, Recreational
Fall and spring. Limited to students who are experienced golfers. Fee charged.
Students must provide their own clubs. A minimum of ten rounds of nine holes each must be played to receive credit. Fee covers a semester's membership.

Gymnastics Courses

Gymnastics, Introduction to
Fall and spring.
Introduction to gymnastics deals with a majority of the Olympic events. The course will focus upon beginner-level skills and is open to both male and female participants.

Ice Skating Courses

Skating, Introduction to
Fall and spring. For beginning to intermediate skaters. Fee charged.
Students provide their own skates or rent them at Lynah Rink. Course will cover forward and backward skating, turns, and stops.

Figure Skating, Beginning, Intermediate, and Advanced Levels
Fall and spring. Fee charged.
Instruction and practice in basic figure skating techniques: forward, backward, crossovers, turns, and spirals. Students provide their own skates or rent them at Lynah Rink.

Martial Arts—Self-Defense Courses

Boxing, Introduction to
Fall and spring. Fee charged.
The course covers the basic skills of footwork, defensive, and offensive techniques. Skipping rope, shadow boxing, and heavy bag work will be taught as methods for individual aerobic conditioning.

Boxing, Thai
Fall and spring. Fee charged.
A martial art system developed from the unique culture of Thailand is a blend of art, science, and sport.

Fencing, Introduction to
Fall and spring. Fee charged.
Includes warm-up exercises and offensive and defensive moves. Equipment furnished.

Fencing, Intermediate
Spring. Fee charged. Prerequisite: Introduction to Fencing or the equivalent.
Interclass competition is stressed. Equipment is furnished.

Fencing, Classical
Fall and spring. Fee charged.
Classical fencing is a martial art that uses the practice of the sword to cultivate self-mastery.

Judo, Introduction to
Fall and spring. Fee charged.
Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

Judo, Intermediate
Fall and spring. Fee charged.
Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

Karate, Introduction to
Fall and spring. Fee charged.
A beginning course taught by professional black belt instructors. Involves mastery of basic blocks, kicks, and punches.

Karate, Advanced
Fall and spring. Fee charged.
Open to those who have taken basic Karate or the equivalent.

Kung Fu
Fall and spring. Fee charged.
Exploration of conditioning and fitness procedures used in the major martial arts, such as karate or judo. Covers circular movement for generating strong blocks, kicks, and punches.

Self-Defense and Empowerment for Women
Fall and spring. Fee charged.
Basic methods of physical protection for women.

Tae Kwon Do, Introduction to
Fall and spring. Fee charged.
A Korean martial art distinguished by emphasis on high and powerful kicks. Basic kicking, punching, and blocking emphasized.

Tae Kwon Do, Intermediate
Fall and spring. Fee charged.
A Korean martial art distinguished by its emphasis on high and powerful kicks. Intermediate-level kicking, punching, and blocking are emphasized.

Tae Kwon Do, Advanced
Fall and spring. Fee charged.
A Korean martial art distinguished by its emphasis on high and powerful kicks. Advanced-level kicking, punching, and blocking are emphasized.

T'ai Chi Chuan, Introduction to, and Intermediate
Fall and spring. Fee charged.
Introduction to T'ai Chi, a system of graceful exercises that aim at nurturing relaxation, deep breathing, and improved circulation.

Outdoor Education Program

See the brochure for the Cornell University Outdoor Education Program at registration for more information about courses.

Climbing Courses

Basic Rock-Climbing
Fall, spring, and summer. Fee charged.
Seven afternoons climbing inside on the Lindseth climbing wall.

Basic Rock-Climbing, for Women
Fall, spring. Fee charged.
Seven afternoons climbing inside on the Lindseth climbing wall taught by and for women.

Basic Rock-Climbing, for 24 and Over
Fall, spring. Fee charged. Non-credit course.
Four evenings climbing indoors on the Lindseth wall for people age 25 or older.

High Adventure 101
Fall, spring, and summer. Fee charged.
Six afternoons at local parks and wilderness areas, some classes on indoor Lindseth climbing wall.

Continuing Rock-Climbing
Fall, spring. Fee charged.
Seven afternoons of advanced climbing techniques on the Lindseth climbing wall.

Ice Climbing
Spring. Fee charged.
Four outings to local state parks and gorges.

Outdoor Top Roping
Fall, spring. Fee charged.
Two outings (nights) on the Lindseth climbing wall and two outings at local climbing areas.

Shawangunks Rock-Climbing
Fall, spring. Fee charged.
Four-day climbing camp at the Shawangunks.

Backpacking Courses

Natural History of the Finger Lakes
Fall, spring. Fee charged.
Backpacking skills with a strong environmental focus.

Backpacking in the Finger Lakes
Fall, spring. Fee charged.
Classes lead to two full weekends on the trail.

Southwest Backpacking
Spring. Fee charged.
Spring break trip to the SW deserts and canyons.

Trail Maintenance
Fall, spring. Fee charged.
Work with the local trails club to support and maintain trail systems.

Wilderness Skills
Fall, spring. Fee charged.
Break trip focusing on wilderness travel and living skills.

Wilderness Survival Skills
Fall, spring. Fee charged.
Primitive living skills taught in three classes and a weekend backpack trip.

Biking Courses

Bike and Hike
Fall, spring. Fee charged.
Four full days exploring local countryside.

Bike Repair, Beginning
Fall, spring. Fee charged. Non-credit.
Two evenings of hands-on repair work.

Bike Repair, Intermediate
Fall, spring. Fee charged. Non-credit.
One evening of hands-on repair work.

Mountain Biking
Fall. Fee charged.
Four full days exploring local countryside.

Canoeing Courses

Canoeing, Adirondacks
Fall. Fee charged.
Break trip explores the beauty of the Adirondacks via canoe.

Introduction to Paddling
Fall, spring. Fee charged.
A sampler of beginning canoeing and kayaking.

Canoe/Camping, Flatwater
Fall, spring. Fee charged.
Four full days paddling local waterways including an overnight.

Canoeing, Moving Water
Fall, spring. Fee charged.
Includes a full weekend of river paddling.

Caving Courses

Caving
Fall, spring. Fee charged.
Four days in the fall and two weekends in the spring in Pennsylvania caves.

Hiking Courses

Day Hiking
Fall, spring. Fee charged.
Day outings in the Finger Lakes Region.

Snowshoeing
Spring. Fee charged.
Day outings in the Finger Lakes Region.

Kayaking Courses

Whitewater Kayaking Day Trip
Spring. Fee charged. Non-credit course.
Day excursion for paddlers with basic skills.

Whitewater Kayaking
Fall, spring. Fee charged.
Includes a full weekend of whitewater paddling.

Pool Kayaking
Fall, spring. Fee charged.
Seven-session introduction to whitewater kayaking skills.

Sea Kayaking
Fall, spring. Fee charged.
Break trip exploring various coastal areas.

Outdoor Leadership

Wyoming Expedition
Summer. Fee charged.
Twenty-one day leadership and mountaineering expedition to the Wind River Mountains.

Outdoor Leadership
Spring. Fee charged.
Training course for outdoor education instructors.

Wilderness Emergency Care, Basic
Fall, spring, summer (6 weeks). Fee charged.
Full weekend of wilderness first aid and CPR.

Wilderness Emergency Care, Advanced
Fall, spring. Fee charged. Non-credit.
Two evenings of specialized wilderness care.

Wilderness First Responder
Offered in January, over winter break. Fee charged.
Ten days of instruction and practical application of backcountry first aid. Participants earn CPR and First Responder certifications. Taught by SOLO Wilderness Medical Institute.

Skiing—Cross-Country Courses

Cross-Country Skiing, Basic
Spring. Fee charged.

Cross-Country Skiing, Intermediate
Spring. Fee charged.

Cross-Country Ski Day Touring
Spring. Fee charged.
Four full-day weekend outings. Emphasis on backwoods touring.

Telemark Skiing
Spring. Fee charged.
Four evenings at Song Mountain Ski Area.

Personal Growth Courses

Body-Mind
Fall and spring.
Activities are drawn from ancient Eastern practices as well as modern Western psychology, and are designed to give the student first-hand experience of the interaction between their own bodies and minds.

Introduction to Meditation
Fall and spring. Fee charged.
This course provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation. The methods serve to evoke the deep relaxation from which heightened awareness and creativity arise.

Living Routines
Fall and spring.
Provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation.

Health Issues for Student Athletes
Fall and spring.
To promote and encourage lifestyle choices on the part of student athletes that will help them establish and maintain high levels of all-around health, and thereby contribute positively to their academic and athletic achievement. NOTE: This is an NCAA requirement open to sophomore athletes only.

Relaxation and Stress Management
Fall and spring.
Introduction to basic relaxation techniques for the reduction of everyday stress. Techniques will be taught that can be used in normal everyday living situations.

Swedish Massage
Fall, spring, and summer. Fee charged.
Learn to give a relaxing, stress-reducing Swedish massage. You will master the basic strokes of Swedish massage and learn about their application to the different parts of the body. Students will use oils and lotions as a part of their training.

Therapeutic Massage
Fall, spring, and summer. Fee charged.
Provides an experiential introduction to several types of massage. Included are Swedish, shiatsu, polarity, and sports massage. Class members will participate in group exercises and practice on each other during class time. All exercises and techniques can be done while wearing street clothing.

Shiatsu Massage
Fall and spring. Fee charged.
Gain an experimental understanding of your body and learn certain shiatsu massage techniques.

Yoga, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Fundamentals of hatha-yoga. Covers basic postures, breathing techniques, and deep relaxation. Introduces chanting.

Racket Sports Courses

Badminton, Introduction to
Fall and spring. Helen Newman Hall.
Fundamental shots, scoring, and general play.

Badminton, Intermediate
Fall and spring. Helen Newman Hall.
Review of fundamental shots, scoring, and general play.

Racquetball, Introduction to
Fall, spring, and summer. Fee charged.
Instruction for beginners. Equipment is furnished. Protective eyewear required.

Squash, Introduction to, Intermediate
Fall, spring, and summer. Fee charged.
Classes for appropriate level of play. Equipment is furnished. Protective eye wear required.

Tennis, Introduction to
Fall, spring, and summer. Fee charged.
Basic skills taught include forehand, backhand, serve, and volley. Scoring methods taught.

Tennis, Intermediate
Fall, spring, and summer. Fee charged.
Review basic strokes plus topspin and underspin. Doubles strategy emphasized.

Tennis, Advanced
Fall, spring. Fee charged.
Advanced strokes and doubles play emphasized. Recommended for tournament players or those with previous team experience.

Tennis, Indoor-Recreational
Fall and spring. Fee charged.
Play is conducted at the new Reis Tennis Center. Players must have high school or college tournament experience or a rating of 3.5 or higher from the USTA. Matches are played in both doubles and singles. Equipment furnished. NO BLACK-SOLE SHOES ALLOWED ON COURTS!

Sailing Courses

Board Sailing (Wind Surfing)
Fall, spring, and summer (6 weeks). Fee charged.
A Mistral Board Sailing Academy certificate is awarded on successful completion.

Catamaran, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Learn unique skills necessary for sailing multihull catamarans.

Small-Boat Sailing, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Learn basic skills necessary to sail small sailboats and basic keelboats safely.

Small-Boat Sailing, Competitive
Fall and spring. Fee charged.
Vanguard 420 sailboat used for the course. USYRA Rules Book used as a text for the course. Fee includes one-year membership in university sailing team program.

Water Skiing
Fall only. Fee charged.
Introductory course for beginning water skiers. Classes will be conducted from East Shore Marina.

Skiing and Snow Boarding

Downhill Skiing and Snowboarding
Spring. Fee charged.
Transportation, instruction, ski-lift fees, and skiing time are offered in a package deal. Greek Peak and Song Mountain personnel are present at registration to explain the program and accept fees. Bus transportation to Greek Peak is provided six afternoons a week for six weeks.

Cross-Country Skiing—See Outdoor Program.

Target Shooting Courses

Archery, Introduction to
Fall and spring. Fee charged. Two classes a week.
Instruction in the care of equipment; seven basic steps for shooting; scoring; practice shooting at twenty, thirty, and forty yards.

Pistol, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Instruction in use of pistol in the three modes of fifty-foot competitive target shooting—slow fire, timed fire, and rapid fire. Emphasis on safety and responsibility while firing.

Riflery
Fall and spring. Fee charged.
Instruction and practice in the techniques of target riflery from various shooting positions.

Trap and Skeet
Fall, spring, and summer (6 weeks). Fee charged.
Includes lectures and shooting at the Tompkins County Rod and Gun Club range. Guns and shells are furnished.

Team Sports Courses

Basketball
Fall and spring.
Fundamental drills in passing, shooting, and dribbling. Scrimmages each class session.

Ice Hockey, Introduction to
Fall and spring. Prerequisite: basic skating ability. Fee charged.
Stick handling, passing, and shooting are stressed. Some scrimaging. Students provide their own skates and sticks; all other equipment is furnished.

Ice Hockey, Intermediate
Fall and spring. Fee charged. Prerequisite: beginning hockey or previous participation in organized hockey.
This course is designed for the intermediate hockey player. Advanced techniques taught include positioning, power play, penalty killing, and offensive and defensive attack. Each session emphasizes game situations and scrimmaging. Skates and hockey sticks must be supplied by the participants.

Soccer
Spring.
Introduction to the game. Includes basic individual skills (passing, trapping, shooting) and team play and strategy.

Volleyball, Introduction to
Fall and spring.
Fundamentals of ball handling, serves, defensive blocks, and position play are stressed. Classes will scrimmage.

Volleyball, Intermediate
Fall and spring.
Passing and blocking strategy; scrimmages in class.

Volleyball, Advanced
Fall and spring.
Offensive and defensive team strategy is emphasized in class scrimmages.

Weight Training Courses

Trotter Circuit Training
Fall and spring. Fee charged.
Students will gain a working knowledge of the basic principles of Trotter selectorized weight lifting equipment. Emphasis on principles of weight training, circuit training, intensity training, and program design.

Principles of Weight Training
Fall and spring. Fee charged.
Introduces the proper use of olympic weights for improving physical condition and muscular strength. Instruction with focus on the relation between high-rep light weight lifting, low-rep heavy lifting, and the development of bulk, strength, and endurance.

Independent Study

Independent Study
Fall and spring.
Independent study is designed for those who have difficulty fitting any of the regularly scheduled courses into their academic program. Class activities will be based on personal fitness programs. A term paper is required. Permission to enter this program must be granted by the program director.

SCHOOL OF CONTINUING EDUCATION AND SUMMER SESSIONS

The School of Continuing Education and Summer Sessions provides a wide variety of educational opportunities beyond the degree-granting programs of the university. These programs serve virtually all age groups in a great variety of formats and time frames. For information about the following programs write B20 Day Hall, Ithaca, New York 14853–2801; call 607/255–4987; e-mail cusce@cornell.edu; or fax 607/255–9697; unless indicated otherwise below. You may also visit us on the Web at www.continuingeducation.cornell.edu.

ADMINISTRATION

Glenn C. Altschuler, dean

Judith K. Eger, director, program development and marketing

Abby H. Eller, director, Cornell University Summer College

Christine Holmes, special programs coordinator

Ralph Janis, director, Cornell's Adult University

Charles W. Jermy, Jr., associate dean, and director, Cornell University Summer Session

Joseph Lindner, manager, computing

Ann L. Morse, media manager

Cathy M. Pace, registrar

Diane E. Sheridan, director, finance and administration

CORNELL UNIVERSITY SUMMER SESSION

The Cornell University Summer Session provides unique and unusually attractive opportunities for study and recreation at a time when the Cornell campus and the Finger Lakes region of central New York are at their loveliest and the Ithaca weather is at its best. Participants may choose from a wide spectrum of courses scheduled during three-, six-, and eight-week sessions. Although admission is open to persons of all ages, the majority of summer session participants are matriculated Cornell students. Classes meet daily and are usually kept small to foster a close association between students and teachers. For information call 607/255–4987; e-mail cusce@cornell.edu; or visit our Web site at www.summer.cornell.edu.

SPECIAL AND PROFESSIONAL PROGRAMS

Intensive learning experiences are presented year-round both for students and for professionals in many fields. Formats include for-credit courses of one to eight weeks and noncredit weekend and weeklong short courses. Programs can also be designed to respond to the needs and interests of corporations, professional societies, and other groups. These programs take place on the Cornell campus, on site, and at other locations worldwide. For information call 607/255–7259; e-mail cusp@cornell.edu; fax 607/255–9697; or visit www.continuingeducation.cornell.edu/SP/.

SUMMER COLLEGE PROGRAMS FOR HIGH SCHOOL STUDENTS

High school sophomores, juniors, and seniors attend regular university courses through Cornell University Summer College and may earn college credit. They also explore career options through specially designed workshops. Students live in residence halls, become familiar with campus life, and attend seminars describing the college admissions process. The program is designed to help ease the transition from high school to college. For information call 607/255–6203; e-mail summer_college@cornell.edu; fax 607/255–8942; or visit www.summercollege.cornell.edu.

CORNELL'S ADULT UNIVERSITY

Cornell's Adult University (CAU) offers week-long noncredit courses on campus for adults and families during the summer. During the fall, winter, and spring, there are weekend seminars, week-long domestic programs, and international study tours. Developed and led by distinguished members of the Cornell faculty, all programs are inspired by the belief that learning never ends and that one of the roles of a great university is to provide a bridge between traditional formal education and informal, noncredit study. For information, write Cornell's Adult University, 626B Thurston Avenue, Ithaca, New York 14850–2490; e-mail cauinfo@cornell.edu; fax 607/254–4482; call 607/255–6260; or visit www.cau.cornell.edu.

DISTANCE LEARNING

The School of Continuing Education and Summer Sessions offers courses through distance learning. Instructional materials for these courses may be presented on the World Wide Web, video tapes, and/or CD-ROMs. Students interact with the instructor and other students by phone or e-mail. Assignments and examinations are completed within a scheduled session, just as in on-campus courses, but students have the option of beginning study prior to the start of the session. For information, visit www.continuingeducation.cornell.edu/DL/.

EXTRAMURAL STUDY

Cornell undergraduate or graduate students whose studies have been interrupted may find it appropriate to resume their studies by taking classes on a part-time basis. Area residents may take courses on a part-time basis by registering as extramural students. Those interested may enroll in almost any course offered in the fall and spring terms if they receive the instructor's written approval. Another offering, the **Visitor's Program**, allows adults to attend classes in many divisions of the university on a space-available basis at a reduced charge. In this program, no credit is given, and no record is kept of attendance or performance. Visitors are required to obtain written permission from the instructor. For information, write to Extramural Study, B20 Day Hall, Ithaca, NY 14853–2801; call 607/255–4987; fax 607/255–9697; e-mail cusce@cornell.edu; or visit www.continuingeducation.edu/EXMU/.

WINTER SESSION

Cornell undergraduate and graduate students, as well as employees and area residents, can earn three to four credits between the fall and spring semesters by enrolling in the winter session. This quiet time on campus allows students to enjoy generally smaller classes and to concentrate on intensive study. Winter-session students may enroll in scheduled courses or design individualized study with a faculty member. For information, write to Winter Session, B20 Day Hall, Ithaca, NY 14853–2801; call 607/255–4987; fax 607/255–9697; e-mail cusce@cornell.edu; or visit www.wintersession.cornell.edu.

CONTINUING EDUCATION INFORMATION SERVICE

This service provides free information, counseling, and referral to people who have been out of school for several years and want to resume their education. It also provides information about short courses, workshops, professional updates, and executive programs offered by the university to people inside and outside Cornell. For information, write to Continuing Education, B20 Day Hall, Ithaca, NY 14853–2801; call 607/255–4987; fax 607/255–9697; or e-mail cusce@cornell.edu.

SUMMER COURSE ROSTER

The Cornell University Summer Session offers a wide variety of courses. The list that follows includes those courses that are usually offered every summer. The list is not exhaustive; many new courses or courses offered only occasionally are not listed. For complete information, contact the Summer Session Office. Courses are posted to the Web (www.summer.cornell.edu) in the fall as the roster is developed. A preliminary course roster is available beginning in late November. If a course is also offered through distance learning, the course title will be followed by **DL**.

Africana Studies

AS&RC 205 African Cultures and Civilizations

A program in African languages is also offered. Consult the department for a complete listing.

Molecular Medicine: G. Weiland

Population Medicine and Diagnostic Services: D. Lein

THE COLLEGE

The College of Veterinary Medicine offers a professional program that requires four years of full-time academic and clinical study of the normal and abnormal structure and function of the animal body and the diagnosis, treatment, and prevention of animal disease.

Graduates of the college receive the Doctor of Veterinary Medicine (D.V.M.) degree, which is recognized by licensing boards throughout the world. Graduates generally enter private practice, academia, or become engaged in one of the increasing number of other biomedical activities.

Admission requires a minimum of three years of college work, including specific prerequisite courses and experience. Applications must be filed approximately one year before the proposed matriculation date. The competition for admission is keen, since there are many more qualified applicants than can be admitted.

Graduate programs in veterinary research and postdoctoral training in clinical specialties are open to Doctors of Veterinary Medicine and some highly qualified holders of baccalaureate degrees and lead to the degree of Master of Science or Doctor of Philosophy.

More detailed information is contained in the Catalog of the College of Veterinary Medicine, which may be obtained by writing to the college.

Note: 500- and 600-level courses are open only to veterinary students except by written permission from the instructor.

The College of Veterinary Medicine has revised its professional curriculum; the new course requirements apply to the class that matriculated in the fall of 1993 and to subsequent classes. Courses in the revised professional curriculum are designated with the prefix "VTMED," and consist of two categories of courses: foundation courses and distribution courses.

The Professional Curriculum

FOUNDATION COURSES

In foundation courses I, II, III, and IV (VTMED 510, 520, 530, 540), students work in small groups under the guidance of a faculty tutor. Case-based exercises are used to facilitate the understanding of basic science concepts within the context of clinical medicine. On average, three to four 2-hour tutorial sessions are scheduled each week. These are complemented by lectures, laboratories, and discussion sessions or other organized learning opportunities specific to the individual course. Faculty are available to respond to questions that arise as a result of the case-based exercises.

Tutorial sessions and all other organized learning programs are usually scheduled during the mornings, thereby reserving the afternoons for independent study. By situating learning in a clinical context, students are better able to integrate material from the basic and clinical sciences, and are encouraged to develop an understanding of the clinical reasoning process from the beginning of the curriculum. The tutorial-based educational format creates an atmosphere that requires students to be involved actively in their learning and allows them to develop skills in communication, information retrieval, and analysis.

Note: Courses listed in brackets [ ] are approved courses that are not offered during the 1999-2000 academic year.

VETMED 510 The Animal Body (Foundation Course I)
Fall. 12 credits. Limited to first-year veterinary students. Letter grades only. S. S. Suarez and staff.
This course is designed to enable students to understand the principles of veterinary anatomy at the gross, microscopic, and ultrastructural levels. Developmental anatomy is emphasized to the extent that it reflects determination of adult form and species differences. Radiologic and related imaging techniques are used throughout the course to assist in the understanding of normal structural anatomy. Understanding of the anatomic basis of common surgical procedures is achieved during the various dissection procedures. The course is based on tutorials with significant emphasis on practical laboratories. Lectures and modules complement student learning.

VETMED 517 Animals, Veterinarians, and Society: Part A (Foundation Course VIIa)
Fall. 1 credit. Limited to first-year veterinary students. Letter grades only. A fee of approximately $10 is charged for the course guide. J. E. Saidla and staff.
This course is the correlate for VETMED 510 The Animal Body. This is a laboratory-based course that teaches physical examination of four species (dog, cat, cow, and horse). The class is divided into small groups and each group meets for two hours each week during the first eleven weeks. The skills of auscultation, percussion, palpation, and observation are taught along with clinically related diagnostic procedures.

VETMED 520 Genetics and Development (Foundation Course II)
Fall and spring. 8 credits. Limited to first-year veterinary students. Prerequisite: VETMED 510 The Animal Body. Letter grades only. R. A. Levine and staff.
An appreciation of how gene expression and cell behavior contribute to normal animal development and health is crucial for our understanding of the pathogenesis of disease. Students will gain an understanding of the cellular and molecular mechanisms that regulate development and maintain normal structure and function throughout the life of an animal. Emphasis will be placed on defining and characterizing normal cellular behaviors and on understanding how mutations in specific genes promote disease. Students will become familiar with the common molecular procedures being used to develop new diagnostic and therapeutic tools to maintain health and combat disease. Tutorial sessions are complemented by lectures, laboratories, and class discussions.

VETMED 521 Neuroanatomy and Clinical Neurology
Spring. 3 credits. Limited to first-year veterinary students. Letter grades only. A. de Lahunta.
Fundamentals of functional neuroanatomy and diseases of the nervous system are taught so that each student is competent in the diagnosis of clinical neurologic disorders of domestic animals. This is a vertically integrated course that includes dissection of the central nervous system of the dog, the anatomic basis for the diagnosis of diseases of

the nervous system, and the differential diagnosis of those diseases. Clinical cases with pertinent lesions are demonstrated with each system. Films and videotapes of clinical patients are used to demonstrate the clinical signs produced by the various diseases. Slides of gross and microscopic lesions are used to emphasize the clinical and neuroanatomic relationships and to stress characteristic features of representative conditions.

VETMED 527 Animals, Veterinarians, and Society: Part B (Foundation Course VIIb)

This course begins in the last part of fall semester and finishes at the end of winter session. 1 credit. Limited to first-year veterinary students. Prerequisite: VETMED 517 Animals, Veterinarians, and Society: Part A. Letter grades only. A fee of approximately $7.00 is charged for the course guide. J. F. Saidla and staff.

This course is the correlate for VETMED 520 Genetics and Development. It enters into a study of ethical issues related to animal use, animal welfare, animal genetics, clinical application of genetics, genetics counseling, and clinical day-to-day ethics. The course meets for one 2-hour session each week.

VETMED 530 Function and Dysfunction: Part I (Foundation Course IIIa)

Spring. 9 credits. Limited to first-year veterinary students. Prerequisite: VETMED 520 Genetics and Development. Letter grades only. D. Robertshaw and staff.

This course is designed to develop students' understanding of how an animal maintains itself as a functional organism; how this is achieved through the integration of different functional organ systems; how tissue structure relates to tissue function; how injury alters structure and leads to dysfunction, manifested as clinical signs; how organ function can be assessed; and how it can be modulated pharmacologically. The course incorporates aspects of physiology, biochemistry, cell biology, histology, pathology and histopathology, clinical pathology and pharmacology.

VETMED 531 Function and Dysfunction: Part II (Foundation Course IIIb)

Fall. 7 credits. Limited to second-year veterinary students. Prerequisite: VETMED 530 Function and Dysfunction: Part I. Letter grades only. D. Robertshaw and staff.

A continuation of VETMED 530 Function and Dysfunction: Part I.

VETMED 537 Animals, Veterinarians, and Society: Part C1 (Foundation Course VIIc)

Spring. 1 credit. Limited to first-year veterinary students. Prerequisite: VETMED 527 Animals, Veterinarians, and Society: Part B. Letter grades only. A fee of approximately $9.00 is charged for the course guide. J. F. Saidla and staff.

This course is the correlate for VETMED 530 Function and Dysfunction: Part I. The central goal of this course is to provide students with the interpersonal skills and techniques necessary to communicate effectively with clients. In addition, students will be provided an opportunity to study the human-animal bond, animal death, and grief counseling. This course also provides opportunities to practice client interviewing skills and to participate in a home or farm visit.

VETMED 538 Animals, Veterinarians, and Society: Part C2 (Foundation Course VIIc, continued)

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VETMED 537 Animals, Veterinarians, and Society: Part C1. Letter grades only. A fee of approximately $6.00 is charged for the course guide. J. E. Saidla and staff.

This course is the correlate for VETMED 531 Function and Dysfunction, Part II. This course provides for understanding the importance of the medical record, the diversity of clients, employees, and society in general, and a session on alternative medicine and its various practices. How to critically read and evaluate clinical studies and journal articles is also addressed.

VETMED 540 Host, Agent, and Defense (Foundation Course IV)

Fall. 12 credits. Limited to second-year veterinary students. Prerequisite: VETMED 531 Function and Dysfunction: Part II. Letter grades only. TBA (course leader) and others.

This course is divided into six sections: the host response, intracellular environment, extracellular environment, somatic environment, external environment, and surrounding environment. Using this approach, students develop an understanding of the host response to insult; a familiarity with groups of important pathogens; an understanding of how pathogens manipulate the host and how the host defends itself against attacks; and an understanding of the roles played by the external environment and human intervention in the epidemiology of infectious organisms.

VETMED 547 Animals, Veterinarians, and Society: Part D (Foundation Course VIId)

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VETMED 538 Animals, Veterinarians, and Society: Part C2. Letter grades only. A fee of approximately $12.00 is charged for the course guide. J. E. Saidla and staff.

This course is the correlate for VETMED 540 Host, Agent, and Defense. This course will emphasize maintaining health in both individuals and populations of animals and humans. Topics will include animal bites, nosocomial infections, rabies control programs, vaccines and vaccine reactions, zoonotic diseases, and integrated health maintenance programs. The course emphasizes veterinary public health.

VETMED 550 Animal Health and Disease: Part I (Foundation Course V)

Spring. 10 credits. Limited to second-year veterinary students. Prerequisite: VETMED 540 Host, Agent, and Defense. Letter grades only. D. M. Ainsworth.

This course integrates the clinical sciences of medicine, surgery, anesthesiology, radiology, and theriogenology, which are themselves integrated subjects, with systems pathology and relevant aspects of applied pharmacology. The course will be presented on a systems basis moving from clinical signs of alteration in function, to pathophysiology of clinical signs, to strategies for diagnosis and treatment. Specific examples will be used to establish a cognitive framework and knowledge of the most important diseases. This course will provide a sound foundation for clinical rotations in Foundation Course VI. It builds upon the strengths developed in earlier courses by an increased exposure to case examples in a more directed way, taking advantage of the diversity of skills and special knowledge of both faculty and students. A variety of educational techniques will be used, including lectures in which interaction is encouraged, laboratories, demonstrations, case discussions, and autotutorials.

VETMED 551 Animal Health and Disease: Part II (Foundation Course V, continued)

Fall. 20 credits. Limited to third-year veterinary students. Prerequisite: VETMED 550 Animal Health and Disease: Part I. Letter grades only. D. M. Ainsworth and staff.

A continuation of VETMED 550 Animal Health and Disease: Part I.

VETMED 557 Animals, Veterinarians and Society: Part E (Foundation Course VIIe)

Spring. 1 credit. Limited to second-year veterinary students rolling over into fall semester for the then third-year veterinary students. Prerequisite: VETMED 547 Animals, Veterinarians, and Society: Part D. Letter grade only. A fee of approximately $14.00 is charged for the course guide. J. E. Saidla and staff.

This course is a correlate with Foundation Course V, Animal Health and Disease. The course will examine governmental regulation of the veterinary profession, including proper drug usage, extra label drug use (FDA), controlled substances (DEA), substance abuse, professional liability and malpractice insurance, professional and unprofessional conduct, hazardous materials in the workplace (OSHA), and environmental issues (EPA). Also included will be sessions relating to controlling and preventing the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions.

VETMED 560 Ambulatory and Production Medicine I

Fall, winter, spring and summer. Credit variable (either one or two credits). Letter grades only. L. D. Warnick and staff.

A clinical service rotation in which students accompany latory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures such as castration and dehorning. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

VETMED 561 Community Practice Service-Medicine (enroll in VTMED 561)

2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. E. Hornbuckle and staff.

The Community Practice-Medicine Service is structured to provide supervised clinical experience in the practice of small companion

animal medicine. The course is conducted in the Small Animal Clinic of the Veterinary Medicial Teaching Hospital. Students interact directly with clients presenting their pet for primary medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.

VETMED 562 Community Practice Service-Surgery and Anesthesiology
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. H. J. Harvey and staff.
Basic principles of anesthesiology and surgery are emphasized in the clinical rotation. Under direct staff supervision, students will anesthetize and perform surgical procedures on patients presented to the Small Animal Clinic for neutering and minor elective procedures. Students will be responsible for all aspects of patient care during their hospital stay and will be expected to fully participate in client communications. Ordinarily, this course will precede Anesthesiology Service and Small Animal Surgery Service (soft tissue component).

VETMED 563 Small Animal Medicine
Fall, spring, winter, and summer. 4 credits. Required course open to second-semester third-year and all fourth-year veterinary students; not open to others. Letter grades only. S. C. Barr, S. A. Center, J. F. Randolph, K. W. Simpson.
The Small Animal Medicine Service is structured to provide supervised clinical experience in the practice of companion small animal medicine. The course is conducted in the Small Animal Clinic of the Companion Animal Hospital. Students interact directly with clients presenting their pets for primary or referral medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plan to the clients and provide follow-up care and management of these patients.

VETMED 564 Small Animal Surgery Service
Fall, winter, spring, and summer. 4 credits. Required of all third- and fourth-year veterinary students; not open to others. Letter grades only. E. J. Trotter and small animal surgery faculty.
A clinical service rotation, this course exposes the student to the practice of surgery under hospital conditions. Students participate in the diagnostic techniques; planning of therapy; and daily care of dogs, cats, and exotic species under the direction of a faculty veterinarian. Students assist experienced surgeons in the operating room and, with house-officer supervision, are responsible for patients undergoing elective ovariohysterectomy or castration. Client communications and the basics of efficient practice are emphasized.

VETMED 565 Ambulatory Medicine Service
Fall, winter, spring, and summer. 4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. C. L. Guard and staff.
A clinical service rotation in which students accompany ambulatory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures such as castration and dehorning. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

VETMED 566 Large Animal Medicine Service
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. D. Ainsworth, T. Divers and staff.
Students assigned to this service will assist the faculty and house staff of the Large Animal Medicine service in the diagnosis and care of patients. The goal of this course is for students working on this service to acquire knowledge and skills in history taking, physical examination, election and completion of appropriate ancillary tests, diagnosis, treatment and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

VETMED 567 Large Animal Surgery Service
Fall, winter, spring, and summer. 4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. P. Hackett and staff.
This clinical rotation is structured to provide supervised clinical experience in the practice of large animal surgery. Under the direction of faculty and house staff, students participate in the diagnosis, surgical treatment, and care of patients presented to the Large Animal Clinic. Training through patient care is supplemented by formal rounds and didactic instruction.

VETMED 568 Anesthesiology Service
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. D. Gleed, J. W. Ludders, P. F. Moon and staff.
This course is designed to provide clinical experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in selecting suitable anesthetic techniques for patients in the Veterinary Medical Teaching Hospital and then implement those techniques under the supervision of faculty and residents. The goal is for students to learn the skills and thought processes necessary to perform safe anesthesia in a modern veterinary practice.

VETMED 569 Dermatology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. H. Miller and staff.
During this clinical rotation, students participate in the diagnosis and management of skin disorders in small and large animals. Patients are examined by appointment and through consultation with other hospital services.

VETMED 570 Ophthalmology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. C. Riis, T. Kern, N. Irby and J. Cho.
This course combines clinical experience with beginning skills in diagnostic ophthalmology. Students learn how to apply the ophthalmic diagnostic tests. A competent ocular examination is the goal of this rotation. Confidence in using direct and indirect ophthalmoscopes, slit lamps, tonometers, goniolenses, conjunctival cytology, and surgery comes with the practice provided by this rotation. Students are required to review the introductory orientation videotapes in the Autotutorial Center entitled, "Ocular Examination I and II," before the start of the rotation. This rotation provides surgical experience and consultations. A high percentage of the consultations are referral cases that usually challenge the service. Adequate routine case material is presented to prepare most students for practice.

VETMED 571 Pathology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. B. A. Summers and staff.
This course involves the hands-on diagnostic necropsies of most mammalian species that are presented to the pathology necropsy room and of avian species that are admitted to the avian and aquatic animal medicine necropsy room. Students work in groups of three to five for the two-week rotation. Necropsies are performed under the guidance of pathology faculty and residents. Students prepare written reports of necropsies performed, review microscopic hematology and cytology slides, perform urinalyses, and discuss case studies.

VETMED 572 Radiology Service
Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. N. L. Dykes and staff.
A two-week clinical experience in the Radiology Section of the Veterinary Medical Teaching Hospital. Students will use radiographic, CT, ultrasonographic, and nuclear medicine imaging techniques to evaluate animal patients under treatment in the Veterinary Medical Teaching Hospital. Students obtain and interpret radiographic and ultrasonographic studies with guidance from radiology faculty and technical staff. Two 3-hour laboratory sessions are given to allow hands-on experience in patient positioning and radiographic technique. An autotutorial teaching film file is used to familiarize students with radiographic examples of common diseases of large and small animal species. Small-group discussions are scheduled to present and discuss current cases. The safe use of x-ray producing equipment and radioisotopes are discussed.

VETMED 573 Fourth-Year Seminar
Fall and spring. 1 credit. Required of all fourth-year veterinary students. First-, second-, and third-year students and all staff members are also invited and encouraged to attend. S-U grades only. F. H. Fox, chair of the Senior Seminar Committee.
The aim of this course is to give the student the responsibility and opportunity of selecting and studying disease entity on the basis of a case or series of cases, or to conduct a short-term, clinically oriented research project under the direction of a faculty member. In either case, an oral report will be presented at a weekly seminar. A written report will also be submitted at the time of the seminar. All participants are encouraged to foster an atmosphere in which discussion, exchange of ideas, and the airing of controversial opinions might flourish.

DISTRIBUTION COURSES

Distribution courses comprise 30 percent of the curriculum and are usually scheduled during the first half of each spring semester. During the first two years, many of the distribution courses are oriented to the basic sciences. During years three and four, students have additional distribution course offerings from which to choose. Some will emphasize clinical specialties, whereas others will integrate basic science disciplines with clinical medicine and will be co-taught by faculty representing both areas. Students from different classes have the opportunity to take many of these courses together.

Grades: grading options for distribution courses are either letter or S-U.

VETMED 601 Anatomy of the Carnivore
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, third, and fourth-year veterinary students, others by permission. Letter grades only. A. J. Bezuidenhout
Carnivore anatomy is studied by detailed systematic and regional dissection of the cat, with comparison to the dog. Student dissection is supplemented with prosections, radiographs, and exercises focusing on surgical approaches. There are opportunities for dissection of other carnivores, such as the ferret and the fox, depending on availability of speciments. The lectures augment the laboratory dissection, and introduce the student to functional morphological comparative features in the Order Carnivore. Students do an independent research project on the carnivore species of their choice, and give an oral presentation on this to the class.

VETMED 602 Anatomy of the Horse
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, third, and fourth-year veterinary students, others by permission. Letter grades only. M. S. Hackett.
This course is organized as a traditional anatomy course that relies primarily on students learning the anatomy of horses through hands-on dissection laboratories augmented by lectures and highlighted by clinical correlations. An understanding of anatomy that provides the foundation for surgery and is directly relevant to clinical practice will be emphasized in the regional approach to dissection. Structural-functional correlations that are unique or important in the horse will be the area of emphasis for most lectures. Microscopic anatomy will be integrated into the course in selected areas to lay a foundation for the later study of pathology or when it reinforces concepts of structure and function that are difficult to understand by a study of the gross anatomy alone (i.e., hoof). Student dissection cadavers will be supplemented by skeletal materials, radiographs, models, preserved pre-dissected specimens and fresh specimens when they are available.

VETMED 603 Anatomy of the Ruminant
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of the instructor. First-, second-, third, and fourth-year veterinary students, others by permission. Letter grades only. J. Hermanson.
The regional anatomy of several ruminant species will be covered using dissection laboratories, lectures, and large-group discussions. Functional consequences of structural modifications and anatomical features directly relevant to clinical practice will be emphasized. Microscopic anatomy will be correlated with gross anatomy when appropriate to relate structure to function and to provide a foundation for later study in pathology. Student dissection material will be supplemented by skeletal materials, radiographs, models, predissected specimens, and postmortem specimens. Students will be required to complete an independent study project on a relevant subject of their choice. Assessment includes written and practical examination.

VETMED 605 Comparative Anatomy: Pattern and Function
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body. First-, second-, third, or fourth-year veterinary students, others by permission. Letter grades only. L. A. Mizer.
The goal of this course is to study anatomical variability among amniote (mammals, birds, and reptiles) and anomniote (amphibian & fish) species. This is accomplished by relating the anatomy of major organ systems in each species to a common basic pattern and considering the differences in a functional perspective. Six major systems will be explored (integumentary, locomotory, neurosensory, cardiorespiratory, digestive, and urogenital) in a variety of species as available.

VETMED 606 Advanced Clinical Neurology
Spring. 1 credit. Prerequisite: VETMED 521 Neuroanatomy and Clinical Neurology. Third-and fourth-year veterinary students. Letter grades only. A. deLahunta.
The objective of this course is to further the experience and confidence of the student in the diagnosis and understanding of clinical neurological disorders. It continues their correlation of anatomy, physiology, and pathology in the diagnosis of diseases of the nervous system and the understanding of their pathogenesis. Neurological disorders that are not covered in the foundation course will be considered here. The course is entirely based on case examples that are presented on videotapes or 16mm film and slides.

VETMED 607 The Literature and Subject Matter of Natural History
Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students, others by permission. S-U grades only. H. E. Evans.
This course is an introduction to classic and current natural history literature. Materials relating to the earth sciences and the biology of plants and animals from around the world will be shown and discussed. Students will be required to show and discuss a book that concerns natural history in a country of their choice. A recommended reference text for this course is, *The Cambridge Illustrated Dictionary of Natural History*, by R. J. Lincoln and G. A. Boxshall, 1990.

VETMED 609 Anatomy and Histology of Fish
Spring. 2 credits. Minimum enrollment 4; maximum enrollment 6. First-, second-, third, and fourth-year veterinary students, others by permission. S-U grades optional. P. R. Bowser.
This course provides an overview of the diversity of anatomy and histology of fish. Students will participate in lecture, discussion and laboratory exercises to review the major organ systems. Extensive use of library resources for assigned readings will be expected. Each student will prepare a term project and make one oral presentation.

[VETMED 610 Veterinary Aspects of Avian Biology
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 60. First-, second-, third-, and fourth-year veterinary students, others by permission. Letter grades only. Offered odd-numbered years. Not offered spring 2000. G. V. Kollias.
An introduction to avian biology for veterinary students. The course will include lectures and laboratories involving avian evolution, anatomy, physiology, and ecology. Emphasis will be on the development of a strong foundation in avian biology that will be applied in VETMED 616 Diseases of Birds and VETMED 652 Avian Medicine and Surgery.]

VETMED 611 Fish Health Management
Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third, or fourth-year veterinary students, others by written permission of instructor. S-U grades optional. P. R. Bowser.
This course will present a summary of important diseases of fin fishes. Diseases covered will be those of importance in commercial aquaculture as well as those encountered by the tropical fish hobbyist. The course is designed to provide the students with a knowledge base and hands-on diagnostic experience in diseases of fish.

VETMED 612 Management of Aquarium Systems
Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third-, and fourth year veterinary students or written permission of instructor. S-U grades optional. P. R. Bowser.
This is a lecture and laboratory course dealing with procedures and practices involved in management of aquarium systems. Topics include water quality, types of aquarium filtration systems, fish health, fish nutrition, and general fish biology. A portion of the course will require independent work in aquarium system management.

VETMED 613 Aquavet I: Introduction to Aquatic Veterinary Medicine
Four weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 4 credits. Maximum enrollment 24 students from Cornell University, the University of Pennsylvania, and other U.S. colleges and schools of veterinary medicine. By permission of the instructor and special application procedure. S-U grades only. Course fee required. P. R. Bowser.

The course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutions at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is designed to introduce veterinary students to aquatic animal medicine. The marine environment is described and visited on field trips in the Woods Hole area. Specific aspects of the comparative anatomy, physiology, nutrition, microbiology, pathology, and medicine of a variety of marine and freshwater species are discussed. Some emphasis is placed on systems of aquaculture. The specific diseases of a few selected species are presented as examples, including the diseases of a crustacean, a shellfish, a finfish, and marine mammals. The course is taught by an invited faculty of thirty-five individuals who are leaders in their respective fields of aquatic animal medicine. Students present seminars on appropriate topics.

VETMED 614 Aquavet II: Comparative Pathology of Aquatic Animals
Two weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 2 credits. Prerequisites: formal course work in diseases of aquatic animals or appropriate experience and permission of the instructor. Maximum enrollment 18. S-U grades optional. Course fee required. Special application procedure required. P. R. Bowser.

This course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutes at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is an advanced course in the comparative pathology of aquatic invertebrates and vertebrates commonly used as laboratory animals. The material presented will consist of discussions of the diseases of aquatic animals as well as extensive use of the microscope to examine the histopathology associated with these diseases. The course is taught by an invited faculty of twelve individuals who are leaders in their respective fields of aquatic animal medicine.

[VETMED 615 Veterinary Medicine in Developing Nations
Spring. 2 credits. Maximum enrollment 20. First-, second-, third-, and fourth- year veterinary students; others by permission of instructor. S-U grades only. Offered odd-numbered years. Not offered 1999–2000. K. A. Schat.

Veterinary medicine has an important role to play in developing nations in (a) developing and providing economical sources of animal proteins for human consumption and (b) protecting ecological resources. This seminar course will provide interested veterinary students with information on and insight into the multitude of complex issues facing U.S. veterinarians working in developing nations.]

VETMED 616 Diseases of Birds
Spring. 2 credits. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. Naqi and G. V. Kollias.

This course is designed to introduce second-, third-, and fourth-year veterinary students to a basic and practical knowledge of the most common infectious and non-infectious diseases affecting a variety of avian species. The course will emphasize the latest diagnostic and control approaches. The course format will be a combination of didactic lectures and discussions.

[VETMED 618 Adaptation of Animals to the Environment
Spring. 1 credit. Minimum enrollment 10. Graduate, first-, second-, third-, and fourth-year veterinary students. Letter grades only. Not offered spring 2000. D. Robertshaw.

The course will examine the physiological adaptations of animals to their environment in addition to methods of acclimatization to novel environments. The course will focus on environmental parameters that exist in harsh environments and include heat, cold, altitude and xeric conditions. Thus the physiological mechanisms of thermoregulation in mammals, birds and ectotherms will be examined together with their responses to low food and water availability. The knowledge obtained will help in understanding the consequences of translocation of both wild and domestic animals and provide a rational basis for animal housing and the provision of appropriate habitats for zoological gardens. The degree of environmental adaptation will also be examined in terms of animal production from a basic science standpoint.]

[VETMED 619 Pathogenesis of Viral Disease (also VETMI 701)
Spring. 2 credits. Minimum enrollment 15; maximum enrollment 45. Strongly recommended prerequisite of immunology. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Offered odd-numbered years. Not offered spring 2000. J. D. Baines.

Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spreading between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature, the text, Nathanson's *Viral Pathogenesis*, 1997, and Field's, *Virology*, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.]

VETMED 620 Molecular Biology and Immunology of Host-Parasite Interactions (also VETMI 702)
Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students, others by permission of the instructor. Letter grades only. Offered even-numbered years. E. J. Pearce.

The primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures will focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and reviews will be used as the basis from which to explore the issues of host invasion, evasion of host defense mechanisms by parasites, vaccination against parasitic infections, chemotherapy, drug resistance, vector biology, and molecular diagnosis. Biological processes that are especially well understood through work on parasites, such as RNA editing and GPI-anchor biosynthesis and structure, will be covered in detail.

VETMED 622 Foreign Infectious Diseases of Animals
Spring. 1 credit. Minimum enrollment 6. Second-, third, and fourth-year veterinary students. Letter grades only. D. H. Schlafer.

This course describes the etiology, pathogenesis, clinical signs, gross pathology, differential diagnosis, methods of spread, reservoir hosts, and control of foreign animal diseases that present serious economic threats to the United States. The format is student seminar presentations with each student responsible for presenting one seminar. Ordinarily the course will also include presentations by College faculty and research scientists working on F.A.D.s.

VETMED 625 Osteoarthritis
Spring. 1 credit. Maximum enrollment 16. Graduate, first-, second-, third-, and fourth-year veterinary students. Letter grades only. G. Lust.

This course provides a basis at the molecular, cellular, and tissue levels for understanding the function of mammalian diarthrodial joints. It includes a description of a diarthrodial joint and the detailed composition and metabolism of bone, articular cartilage, ligaments, meniscus, capsule, and synovium. The interrelationship of synovium, synovial fluid, joint lubrication, articular cartilage, simple biomechanical considerations, and enervation are described to address joint function. A comprehensive discussion of the osteoarthritis that is inextricably associated with hip dysplasia in dogs serves as a basis for the etiopathogenesis of this disease. Osteoarthritis in joints of cats, dogs, horses, pigs, sheep, and cows also are discussed in detail as is osteochondrosis.

Consideration is also given to infectious arthritis and human joint diseases such as gout and pseudogout. The role of pain receptors, a brief discussion of therapy such as the role of nonsteroidal anti-inflammatory drugs, glucocorticoids, and mention of possible corrective surgery procedures are included.

VETMED 626 Epidemiology of Infectious Diseases
Spring. 1 credit. Maximum enrollment 8. Second-, third-, and fourth-year veterinary students. Letter grades only. H. Mohammed and staff.

This course will provide an introduction to the epidemiologic methods used in infectious disease investigations. The importance of surveillance systems in detecting modern epidemics and in the development of effective disease prevention and control strategies will also be discussed. An emphasis will be placed on understanding the relationships between the host, the agent and the environment as they relate to disease causation. The course will explore contemporary epidemiologic methods applicable to old diseases that remain real or potential problems, newly emerging infectious diseases, and nosocomial infections. Selected diseases will be discussed to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and groups of animals. The students will have the opportunity to apply the methods learned to actual disease problems and write an epidemiologic report that might lead to a publication in a peer reviewed scientific journal.

VETMED 627 Diseases of Antiquity

Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grade option only. J. Saidla.

This is a study of 30 human and animal diseases that have had profound effects on the course of human history from the beginning of recorded time to the present. This course combines aspects of literature, medicine, and history and explores the interactions between demographics, commerce, imperialism, medical care, the environment and disease. Prevailing superstitions and religious views are considered in context with each illness and simultaneously occurring world events.

VETMED 628 Clinical Pathology

Spring. 2 credits. Minimum enrollment 20; maximum enrollment 60. Second-, third-, and fourth-year veterinary students. Letter grades only. T. Stokol.

This six-week course addresses a range of issues related to laboratory medicine and interpretation of laboratory results. General topic areas include hematology, clinical chemistry and immunology, and urinalysis. The primary mode of instruction is student-driven small group (untutored) exploration of case materials followed by faculty-moderated large-group discussions. Selected lectures and laboratory sessions will supplement and expand on issues generated by the case discussions. This course builds on concepts previously addressed in Block 3 and 4, and also provides additional experiences in practical clinical pathology procedures and microscopy.

VETMED 630 Clinical Biostatistics for Journal Readers

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students, all others by permission of the instructor. Letter grade. H. N. Erb.

The student will become familiar with the statistical methods commonly used in veterinary clinical articles, will be able to recognize obvious misuse of those methods, and will be able to interpret the statistical results.

VETMED 631 Clinical Diagnostic Parasitology

Fall and spring. 0.5 credit. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. S-U grades only. To be arranged with Dr. Frongillo. D. D. Bowman and M. K. Frongillo.

This course will provide a chance to perform diagnostic parasitology methods using samples obtained from ongoing clinic cases. Students will attend eight one-hour sessions as they rotate through the ambulatory, community practice, and pathology rotations. In the ambulatory service (four sessions with students), diagnostics will concentrate on the laboratory examination of samples from large animal cases that have been observed during the prior week. In the Community Practice Service, one hour will concentrate on the examination of samples from ongoing cases, while a second hour will consist of a discussion of the treatment of common endo- and ecto-parasites. The two hours spent as part of the pathology rotation will examine methods of recovering parasites from pathology specimens, including the examination of wet preparations and the digestion of tissues for parasite recovery. The course is considered to be a logical extension to the foundation course, Host, Agent, and Defense, and is expected to build upon the didactic material presented in Large and Small Animal Parasitology.

VETMED 632 Senior Seminar

Fall and spring. 1 credit. First-, second-, and third-year veterinary students. S-U grades only. Must be completed in two consecutive terms (either fall to spring or spring to fall). R. O. Gilbert.

Attendance at fourteen of the senior seminar sessions presented during the academic year constitutes acceptable completion of this course.

This course does *not* fulfill the one-credit Set VII minimum.

VETMED 633 Introduction to Nontraditional Companion and Laboratory Animals

Spring. 1 credit. First-, second-, third-, and fourth year veterinary students. Letter grades only. J. E. Saidla and staff.

This course is both laboratory and lecture based and deals with a wide variety of nontraditional species that might be brought into a small animal practice other than a dog or cat. These can be either companion or laboratory animals and include rodents, lagomorphs, other small mammals, reptiles, amphibians, birds, fish, goats, sheep, potbellied pigs, primates, and llamas. Instruction in restraint and handling, breeding, husbandry, and general management information is provided for each species. This is followed, where practical, by laboratory sessions for observation, restraint, and physical examination.

VETMED 635 Introduction to the Professional Literature

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. Lee.

This course introduces veterinary students to the professional and biomedical literature, including development of critical reading skills. Students will become familiar with the broad range of professional and biomedical literature and will be encouraged to develop a rigorous approach to journal and scientific article review. Secondary emphasis is on developing skills in library and bibliographic search techniques, as well as exploring the use of veterinary-related on-line information.

VETMED 637 Introduction to Community Practice Service

Fall, winter, spring, and summer. 1 credit. First- and second- year veterinary students by permission of instructor. S-U grades optional. W. E. Hornbuckle.

This course introduces veterinary students to primary care small animal clinical practice through direct exposure to the Community Practice Service of the Veterinary Medical Teaching Hospital. Students observe and assist with restraint, examination and routine treatment of pets, and communication with clients. Successful completion requires satisfactory participation during ten half-days of clinical service.

VETMED 638 Physiological Nutrition

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 90. Second-, third-, and fourth-year veterinary students, others by permission of the instructor. Letter grades only. F. A. Kallfelz.

This course will provide information on the evaluation and formulation of rations for large and small animals. These concepts will be applied in discussion on the nutrition requirements of these animals during maintenance, gestation, lactation, growth, stress, and aging. The course is recommended for all second-year veterinary students who do not have a strong background in ruminant, equine, canine, and feline nutrition. This course, or its equivalent, will be necessary for comprehension of clinical nutrition concepts in Foundation Course V.

VETMED 639 Veterinary Dentistry

Spring. 1 credit. Maximum enrollment 96. Second-, third-, and fourth-year students. Letter grades only. J. E. Saidla.

This is an introductory-level course in small animal dentistry. It is a laboratory course that meets for two hours, twice a week for 16 sessions. Basic concepts and practical topics in dental nomenclature, dental anatomy, oral/dental examination, routine dental care including prophylaxis, recordkeeping, genetics and breed differences, feline-specific dental disease, occlusion/malocclusion, periodontics, endodontics, restorative dentistry, oral surgery, and orthodontics are presented. Basic instrumentation dental radiography and materials used in dentistry are stressed. The class will use prepared specimens for all sessions.

VETMED 640 Veterinary Aspects of Captive Wildlife Management

Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. G. V. Kollias.

This course will concentrate on principles of captive wildlife management, both clinical and nonclinical. Students will be challenged to learn and integrate a variety of disciplines that are essential to successfully managing wildlife in a captive or semi-free-ranging environment. These disciplines include but are not limited to species-specific (1) behavior and behavioral requirements, (2) nutritional requirements and problems, (3) natural history, (4) zoonotic, and toxicological problems, (5) manual restraint and anesthesia, (6) preventive medicine, and (7) medical and legal ethics. In even numbered years the course will emphasize North American wildlife species, and in odd numbered years Central and South American, African, Asian, and Australian Species.

VETMED 641 Approaches to Problems in Canine Infectious Diseases
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. C. Barr.
The course consists of two 50-minute discussion/lecture periods a week for eight weeks. The letter grade will be obtained entirely from the result of a written examination given in the final period. The course will emphasize the approach to clinical medical problems generally and infectious diseases specifically. The overall objective is to give future small animal practitioners skills in the approach to clinical problems with specific emphasis placed on history taking, clinical signs and examination skills, assessment of clinicopathology data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course expands knowledge gained in Foundation Course IV and under the instruction of a clinical faculty member is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases.

VETMED 642 Management of Fluid and Electrolyte Disorders
Spring. 2 credits. Minimum enrollment 20; maximum enrollment 40. For second-, third-, and fourth-year veterinary students. Letter grades only. D. F. Smith.
Students will focus on clinical manifestations and the pathophysiologic mechanisms associated with fluid, electrolyte, and metabolic acid base disturbances in domestic animals. The course is divided into segments dealing with salt and water imbalances, potassium abnormalities, metabolic acidosis, metabolic alkalosis, and mixed acid-base disturbances.

VETMED 643 Fundamental Aspects of Embryo Transfer
Spring. 1 credit. Maximum enrollment 16. Enrollment is done by lottery. Third- and fourth-year veterinary students or graduate students with permission of instructor. S-U grades only. R. Gilbert.
This course provides an introduction to the theory and practice of embryo transfer in domestic animals. Topics include background, advantages and disadvantages, superovulation, embryo recovery techniques, embryo culture and manipulation, embryo transfer techniques, registration of offspring, import and export, and related topics in assisted reproductive technologies. Students are exposed to practical techniques of embryo transfer in cattle, small ruminants, horses, and swine. The course consists of lectures, demonstrations, and laboratory classes during which students practice techniques of embryo recovery, evaluation, handling and transfer.

VETMED 644 Equine Surgical and Anesthetic Techniques
Winter. 1 credit. Prerequisite: VETMED 602, Antaomy of the Horse. Minimum enrollment 3; maximum enrollment 21. Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only. S. L. Fubini (coordinator) and other large-animal surgeons.
This course consists of five laboratories performing surgical procedures on ponies and cadaver specimens. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with some specialized surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating equine practice after graduation. This course is offered during a one-week period over winter intersession.

VETMED 645 Food Animal Surgical and Anesthetic Techniques
Winter. 1 credit. Prerequisite: VETMED 603, Anatomy of the Ruminant. Minimum enrollment 6; maximum enrollment 30. Third- and fourth-year veterinary students. S-U grades only. Enrollment is done by lottery. S. L. Fubini and other large-animal surgeons.
This course consists of five laboratories performing surgical procedures on sheep, calves, cadaver specimens, and adult cattle. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for those students anticipating food animal practice after graduation. This course is offered during a one-week period over winter intersession.

VETMED 646 Llama Tutorial
Fall, spring, and summer. 1 credit. Prerequisite: VETMED 540. Second semester second-, third- or fourth-year veterinary students. S-U grades only. Independent Study. M. C. Smith.
This autotutorial or group tutorial course covers common problems of llamas and alpacas. Participants will be provided with study guides consisting of brief case descriptions and sample study questions. Reference will be made to textbooks, journal articles, videotapes, and (if available) a teaching llama to assist students in finding the answers to the questions efficiently. Grading is based on an oral exam.

VETMED 647 Poisonous Plants
Fall. 1 credit. First-, second-, third-, and fourth-year veterinary students or by permission of the instructor. S-U grades only. R. Hillman and M. Smith.
Field trips demonstrate toxic plants growing in natural or cultivated settings. Lectures address economically important poisonous plants native to the United States. Information presented includes plant identification, natural habitat, toxic principles, clinical signs of toxicity, and treatment and prevention of poisoning in animals. Some of the major toxic principles found in plants and considered in detail in the course are nitrates, cyanide, oxalates, photodynamic agents, alkaloids, and mycotoxins.

VETMED 648 Clinical Management of Native Wildlife
Fall, spring, and summer (credit given in fall). 1 credit. Enrollment not to exceed 20 students per semester, 2 students per rotation. First-, second-, third-, fourth-year veterinary students by permission of the instructor. Letter grades only. G. Kollias and staff.
This course introduces veterinary students to primary native wildlife care and to wildlife issues that face practicing veterinarians on a daily basis. Students are responsible for the assessment, physical examination, and medical care of native wildlife presented to the Veterinary Medical Teaching Hospital by the public and local wildlife rehabilitators. Student activities are directly supervised and assessed by faculty wildlife clinicians on a daily basis. Successful completion of the course requires 40 hours of satisfactory supervised participation per semester in the clinic. Clinic times will be appropriately scheduled throughout the semester. Students are required to submit two case summaries before the end of the semester.

VETMED 649 Introduction to Equine Practice
Spring. 0.5 credit. First- and second-year veterinary students. Maximum enrollment 30. Letter grades only. R. Hackett and C. Collyer.
This is an introductory course in equine husbandry intended for students with little or no experience working with horses. Lecture topics will include horse breeds and colors, housing facilities and fencing, and overview discussions of the racing, showing, and breeding industries. Laboratories will emphasize basic equine handling and restraint as well as feeds and bedding.

VETMED 650 Veterinary Parasitology: Large Animal
Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. Bowman.
This course provides a basic introduction to large animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant economic importance to veterinarians, clients, and producers. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.

VETMED 651 Veterinary Parasitology: Small Animals
Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. Bowman.
This course provides a basic introduction to small-animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant clinical importance to veterinarians and pet owners. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.

VETMED 652 Avian Medicine and Surgery
Spring. 2 credits. Minimum enrollment 20; maximum enrollment 80. Third- and fourth-year veterinary students. Letter grades only. G. Kollias and staff.
This course is designed to introduce Third- and fourth-year veterinary students to the principles and practice of clinical avian medicine and surgery. The course will be taught in a basic didactic lecture and discussion format with laboratories that will reinforce concepts presented in the lectures.

VETMED 653 Advanced Equine Lameness

Spring. 1.5 credits. Minimum enrollment 7; maximum enrollment 21. Third- and fourth-year veterinary students. Enrollment is done by lottery. S-U grades only. N. Ducharme, A. Nixon, and staff.

This course is designed to help students understand the methodology and to develop the manual skills required for lameness examination in horses. Emphasis will be on developing diagnostic skills. Specifically, the student will be expected to develop proficiency in the identification of clinical characteristics associated with recognized lamenesses and to localize the origin of the lameness. Teaching aids will include video modules outlining various gait abnormalities. In addition, horses with specific gait abnormalities will be available for physical, radiographic, and ultrasonographic examination.

[VETMED 654 Current Therapy in Equine Reproduction

Spring. Lec, 1 credit; lab 0.5 credit. Lab, minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery. Concurrent enrollment in Current Therapy in Equine Reproduction Lecture is required. Third- and fourth-year veterinary students. Letter grades only. Not offered spring 2000.

This course will cover aspects of physiology and therapy of equine reproduction. The purpose of the course is to prepare the student for equine broodmare practice.]

VETMED 655 Production Animal Theriogenology

Spring. Lec, 1 credit; lab, 1 credit. Lab, minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery. Concurrent enrollment in Production Animal Theriogenology Lecture is required. Third- and fourth-year veterinary students. Letter grades only. R. Gilbert.

This course deals with specific reproductive conditions of production animals as well as reproductive management of production units. Content includes reproductive biology of production animals, economic considerations, and medical and surgical approaches to management of reproductive disorders. Laboratory sessions are tailored to acquisition of specific skills fundamental to the practice of theriogenology of production animals. Emphasis is on dairy cows.

VETMED 656 Special Problems in Equine Medicine

Spring. 1.5 credits. Minimum enrollment 10; maximum enrollment 30. Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only. T. Divers and staff.

This course is intended for students who plan to or may enter equine practice. In-depth study of important diseases, review of recent literature, health management, and hands-on procedures or demonstrations will be the core of this course.

VETMED 657 Disorders of Large Animal Neonates

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 100. First-, second-, third-, and fourth year veterinary students. Grade A-F only. D. Ainsworth.

The common medical problems of foals and calves, with emphasis placed on the neonatal period, are discussed. Specific topics examined in detail include disorders affecting the respiratory, gastrointestinal, and musculoskeletal systems. Students will also spend several hours in the neonatal intensive care unit providing medical care of hospitalized patients under staff supervision.

VETMED 659 Equine Soft Tissue Surgery

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 21. Third- and fourth-year veterinary students. Enrollment is done by lottery. Letter grades only. R. Hackett and staff.

This course, intended for students anticipating equine practice after graduation, will build upon material presented in the foundation courses to provide supplemental instruction in surgical disorders of the horse. Lectures will be case based and emphasize those disorders likely to be encountered in equine practice (colic, traumatic injuries, dentistry, upper respiratory tract disorders, prepurchase examination). Laboratories will emphasize those diagnostic and therapeutic procedures in which an entry-level equine practitioner should be competent.

VETMED 661 Surgical Pathology

Spring, summer, fall. Variable 1–2 credits. Second-, third-, and fourth-year veterinary students with permission of instructor. Letter grades only. S. McDonough.

This two-week course (approximately eight hours per day for 2 credits) will provide hands-on experience in the Surgical Pathology Service of the Department of Pathology. Students will assist in tissue selection and sample submission and in trimming and preparing specimens. Working with the attending pathologist, they will examine tissue specimens histologically, propose diagnoses, and discuss their interpretations.

VETMED 662 The Bottom Line

Fall and spring. 0.5 credit. First-, second-, third-, and fourth-year veterinary students. S-U grades only. R. Lewis.

This course provides case analysis of material submitted to the necropsy service. Gross and microscopic lesions for each disease/condition are emphasized and correlated with relevant antemortem findings. When appropriate, pathogenetic mechanisms, epidemiology, etiology, prevention, and treatment are included in the discussion.

VETMED 664 Veterinary Clinical Immunology

Spring. 1 credit. Minimum enrollment 12. First-, second, third-, and fourth-year veterinary students. Letter grades only. R. Lewis.

This course is a case-based discussion course in which selected diseases of immunologic origin are presented for and by the students. Emphasis is placed on the immunologic mechanisms which lead to clinical disease.

Review of hospital medical records, selection of an appropriate case, and written assessment of the case forms the bases of student evaluation.

VETMED 665 Medical and Surgical Problems of Dairy Cattle—Emphasis on the Individual Animal

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 28. Enrollment is done by lottery. Third- and fourth-year veterinary students. Letter grades only. S. Fubini and staff.

This course will provide students with a special interest in dairy practice the opportunity for in-depth discussions of special problems in bovine medicine and surgery. Emphasis will be on case discussions, physical examination techniques, and ethical and practical matters. The course will emphasize individual cow treatment.

VETMED 667 Special Problems in Small Animal Medicine

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third- and fourth-year veterinary students. S-U grades only. K. Simpson and staff.

During the 4-week course, students will work through cases in small animal medicine. The course consists of a 50-minute weekly discussion period. The focus will be on the medical problems associated with cases using historic, clinical, clinical pathologic, and pathologic findings to elucidate basic pathophysiologic principles of disease. The overall objective is to give future small animal practitioners skills in the approach to clinical problems with specific emphasis placed on history taking, clinical signs and examination skills, assessment of clinical pathology data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course expands knowledge gained in Foundation Course V and, under the instruction of a clinical faculty member, is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases.

VETMED 668 Practice Management

Spring. 2 credits. The number of sections will be determined by the enrollment. Third- and fourth-year veterinary students. S-U grades only. J. E. Saidla.

Course participants form a veterinary group practice that includes the specialties of each person's interest. Topics are presented and discussed in the staff meeting format of the practice. Topics include basic practice organization, leadership styles, career planning, communication skills, facility management, human resource management, maintenance of standards, marketing and merchandising, building and maintaining clients, practice growth, finances, computing systems and information management, money management, legal issues and insurance, professional relations and responsibility, and maintaining an acceptable quality of life, including stress management. Various practitioners and practice managers will speak to the group about their very different successful practices, concentrating on management and organizational skills.

VETMED 669 Sheep and Goat Medicine

Spring. Lec, 1 credit; lab 0.5 credit. Lab, concurrent enrollment in Sheep and Goat Medicine Lecture is required. Third-, and fourth-year veterinary students. S-U grades only. M. Smith.

This course will discuss diagnosis, treatment, and prevention of medical and surgical problems of individual small ruminants and of sheep and goat herds. Basic information on breeds, behavior, nutritional requirements, and management systems will be supplied. Economically important contagious or metabolic diseases will be discussed in depth. The diagnostic evaluation and differential diagnoses for common clinical presentations such as skin disease, neurologic disease, lameness, and mastitis will be considered.

Herd monitoring of economically important parameters and necropsy diagnosis of abortions and neonatal losses will be addressed. Breeding systems, pregnancy diagnosis methods, and correction of dystocias will be discussed and demonstrated in optional laboratory sessions.

VETMED 670 Drug Handling in the Body
Spring. 0.5 credit. Maximum enrollment 60. For second-, third-, and fourth-year veterinary students. Letter grades only. R. A. Cerione and G. A. Weiland.
This course will provide an in-depth consideration of the pharmacological principles of administration, adsorption, distribution, metabolism, and elimination of drugs. Emphasis will be on the conceptual basis of the pharmacokinetic considerations in the therapeutic use of drugs. The course will build on the pharmacological and physiological principles introduced in Foundation Course III.

VETMED 671 Autonomic Pharmacology
Spring. 0.5 credit. Maximum enrollment 80. For second-, third-, and fourth-year veterinary students. Letter grades only. G. A. Weiland.
This course will provide an in-depth consideration of the pharmacological and physiological principles of autonomic pharmacology. Molecular, cellular, and organ system mechanisms will be emphasized. The course will explore in more detail the fundamental pharmacological and physiological principles of the effects of drugs on autonomic organs introduced in Foundation Course III.

VETMED 672 Antimicrobial Drug Therapy in Veterinary Medicine
Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. W. S. Schwark.
The objective of this course is to familiarize students with antimicrobial drugs used in veterinary practice. The course will build on fundamental pharmacological and microbiological principles covered in Foundation Courses III and IV and will consider antibacterial, antifungal, antiparasitic, and anticancer drugs from the point of view of unique pharmacokinetic properties, indications for clinical use, and potential toxicities as the basis for rational use.

VETMED 673 Growth Factor-Coupled Signal Transduction
Spring, even-numbered years. 0.5 credit. First-, second-, third- and fourth-year veterinary students and permission of the instructor. Letter grades only. R. A. Cerione.
This course will present basic information regarding the regulation of cell growth and differentiation. The emphasis will be on the signal transduction pathways that are responsible for translating growth factor binding at the cell surface into nuclear responses and mitogenesis. The course should complement cases covered in Foundation Course II and tie together the biochemical pathways underlying cell growth with biological processes such as wound healing and disease states such as cancer.

VETMED 674 Physiology and Pharmacology in the Understanding and Treatment of Diabetes
Spring, even-numbered years. 1 credit. Maximum enrollment: 24. Letter grade. G. Sharp.
This course will cover the basic causes of the manifestations of diabetes, signal transduction mechanisms controlling insulin secretion and insulin action, and the principles underlying current and potential future treatment for this group of diseases. The course will stress the value of basic research into cellular and molecular mechanisms for the treatment and cure of disease.

[VETMED 675 Fundamental Principles of Vertebrate Central Nervous System Pharmacology
Spring. 0.5 credit. Minimum enrollment 6. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 1999–2000. Next offered spring 2002. L. M. Nowak.
This course will include up-to-date knowledge of physiological and pharmacological aspects of the main central nervous system neurotransmitter receptors and provide a basis for rational understanding of the drugs used during surgery and in treatment of neurological diseases.]

VETMED 676 Clinical Ophthalmology
Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. R. Riis, N. Irby and T. Kern.
The principles and practice of entry-level veterinary ophthalmology introduced in, Block V, Introduction to Veterinary Ophthalmology, are supplemented by lectures and discussions that emphasize species differences, basic surgical decision-making, and recognition of ocular conditions appropriate for referral.

VETMED 677 Dairy Production Medicine
Fall. 2 credits. Minimum enrollment 6; maximum enrollment 14. Third-, and fourth-year veterinary students. Letter grades only. C. Guard.
This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease and productivity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students will be introduced to the dominant software currently used in dairy management. Local dairy herds will serve as additional laboratories for class projects.

[VETMED 678 Small Animal Theriogenology
Spring. 1 credit. Third-and fourth-year veterinary students. Letter grades only. Not offered spring 2000. R. Gilbert.
This is a distribution course in a lecture-based format designed to complement the knowledge gained in the theriogenology component of Foundation Course V, Animal Health and Disease. Content includes discussion of breeding management, infectious and non-infectious causes of infertility and pathology of the male and female reproductive tracts, their diagnosis and management. The emphasis of the course will be on conditions affecting dogs and cats, but some conditions of other common pet species will be discussed.]

VETMED 679 Clinical Pharmacology
Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. W. Schwark.
This course is offered after Blocks I-V and formal exposure to pharmacology course work is completed. The course is designed to familiarize students with drug use in the clinical setting and utilizes ongoing cases in the teaching hospital as a teaching tool. Pharmacological concepts are emphasized, with a focus on the rationale for drug choice, alternative drug choices available, pharmacokinetic considerations, and potential drug interactions/toxicities. This course is offered at the time students are about to embark on their clinical rotations. It is designed to emphasize practical aspects of pharmacology in the clinical setting, utilizing basic concepts obtained during formal course work. The onus will be placed on the student to explain/rationalize drugs employed in clinical cases in the teaching hospital.

VETMED 680 Behavior Problems of Horses
Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students. S-U grades only. K. A. Houpt.
The goal of this course is to give veterinary students the ability to treat the behavior problems of horses. History-taking, counseling, diagnostic tests, follow-up, the importance of cooperation with the referring veterinarian, prevention of behavior problems, training techniques of value to the practitioner, and socialization of foals will be presented.

VETMED 681 Behavior Problems of Small Animals
Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students. S-U grades only. K. A. Houpt.
The goal of this course is to give veterinary students the ability to treat the behavior problems of cats and dogs. History-taking, counseling, and follow-up methods will be presented. Each student will have the opportunity to participate in three cases. Behavioral and pharmacological treatments for behavior problems will be presented.

VETMED 682 Topics in Veterinary Emergency and Critical Care Medicine
Spring. 1 credit. Minimum 10; maximum enrollment 35. Enrollment is done by lottery. Third-, and fourth-year veterinary students, all others need instructor approval. S-U grades optional. P. Moon.
This course will provide an introduction to emergency and critical care medicine. It is designed to have 1–2 topics per week. An introductory seminar will present basic information on the topic(s) at the beginning of the week, students will receive 1–2 case scenarios with homework questions and a two hour group discussion will occur later in the week. Although most of the cases will be based on small animal cases, the same principles will apply to both large animal and small animal situations. Topics which might be covered include: trauma stabilization, emergency fluid therapy, cardiac and pulmonary emergencies, nutritional support, common toxicology problems, emergency surgical procedures (chest tubes, tracheotomies), and basic and advanced cardiopulmonary resuscitation. When two courses (i.e. section "A" and "B") are offered in the same year, different topics will be covered in the two courses.

[VETMED 685 Physiology of Pregnancy
Spring. 2 credits. Maximum enrollment 20. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered spring 2000. P. W. Nathanielsz.
This course is presented in lecture fashion, with weekly assignments consisting of one major reference per lecture related to that week's work to review. Subjects covered are placental function, fetal growth, central nervous system development, fetal breathing, biorhythms in maternal and fetal physiology, parturition, and adaptations to newborn life.]

VETMED 689 Fundamentals of Ruminant Digestion and Metabolism
Spring. 0.5 credit. Minimum enrollment 5; maximum enrollment 50. First-, second-, third-, and fourth-year veterinary students; selected graduate students by permission of the instructor. Letter grades only. T. R. Houpt.
This course is designed for the student with little or no previous course work in ruminant digestive physiology. It will consist primarily of lectures surveying the functional aspects of: control of feed intake; salivation; reticuloruminal motility, including rumination and eructation; microbial flora and fauna; fermentation in reticulorumen (digestion of carbohydrates, proteins and fats); ruminal gas formation; absorption of short-chained fatty acids; special features of ruminal nitrogen metabolism; passage of nutrients to lower tract; and a brief consideration of the functions of omasum, abomasum, small and large intestines. Emphasis will be on the differences of the ruminant digestive processes from those of the simple-stomached animals.

VETMED 690 Molecular and Genetic Basis of Inherited Disorders in Animals and Application to Clinical Medicine
Spring. 2 credits. Minimum enrollment 5; maximum enrollment 15. First-, second-, third- and fourth-year veterinary students; graduate and undergraduate students also welcome. Letter grades only. Offered even-numbered years. J. Ray.
This course introduces the molecular basis of inherited diseases in domestic animals. Topics include several inherited metabolic defects causing systematic malfunctions; muscle, bone abnormalities; retinal degeneration; failure of the immune systems. Techniques to characterize genes and mutations. Use of molecular techniques for diagnosis and prevention. Use of molecular tools for the treatment of inherited disorders.

VETMED 692 Current Concepts in Reproductive Biology
Fall. 3 credits. First-, second-, and third-year veterinary students or appropriate undergraduate/graduate training. Letter grades only. Lec, 2 hours each week; disc, 2 hours each week; T R 10:10–12:05. J. Fortune, R. Butler, and staff.
This is a team-taught survey course in reproductive physiology/endocrinology. Lectures by a number of reproductive biologists on various aspects of male reproductive function (endocrine regulation, testis function, spermatogenesis, and sperm physiology/function); female reproductive function (endocrinology, ovarian development and function, oocyte physiology/fucntion); pregnancy; parturition; puberty; and reproductive technology. Student participation in the form of discussions and/or presentations.

VETMED 695 Genetic Basis of Eye Diseases
Spring. 1 credit. Minimum enrollment 5; maximum enrollment 14. First-, second-, third- and fourth-year veterinary students. Letter grades only. G. Aguirre.
This course covers the topic of the molecular and genetic basis of inherited eye diseases in domestic and laboratory animals. It is aimed at the professional student in the veterinary curriculum, but is open to graduate level students. The course will be given in a combination lecture/seminar format, with students leading and actively participating in discussions. The students are expected to do assigned and independent outside research, both for class discussions and the paper.

VETMED 696 Fundamental Principles and Anesthetic Techniques for Small Animal Practice
Spring. 1 credit. Minimum enrollment 15. Third-, and fourth-year veterinary students. Letter grades only. C. Short.
This course is designed for the veterinary student with interest in small animal practice. It will consist of lectures, case discussions, and anesthetic protocol development for routine and complicated cases. Subjects covered in the course will include: management of anesthesia for elective surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, treatment of respiratory complications, treatment of cardiovascular complications, cardiopulmonary resuscitation, and post-anesthetic management. While fundamental concepts and advancements in anesthesia will be utilized in this course, a practical application for use in private practice will be a major objective.

VETMED 698 Special Projects in Veterinary Medicine
Fall, winter, spring, summer. Variable 1–4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.
This course provides the opportunity for students to work individually with a faculty member to pursue an area of particular interest and, typically, not part of the established curriculum. Specific course objectives and course content are flexible and reflect the scope and academic expertise of the faculty.

VETMED 699 Research Opportunities in Veterinary Medicine
Fall, winter, spring, summer. Variable 1–4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.
This course provides the opportunity for individual students to work in the research environment of faculty involved in veterinary or biomedical research. Specific course objectives and course content are flexible and reflect the specific research environment. Research projects may be arranged to accumulate credit toward requirements in Distribution Sets I, II, III, IV, and V.

VETMED 700 Large Animal Theriogenology Service
Spring. 2 or 4 credits. Prerequisite of VETMED 551. Maximum enrollment 6 per rotation. Third-and fourth-year veterinary students. Letter grades only. R. O. Gilbert and staff.
This clinical service rotation is offered to provide additional hands-on experience in all phases of theriogenology. Equine reproductive experience is gained in teasing, rectal palpations, ultrasound scanning, semen collection and evaluation, natural breeding, and artificial insemination. Additional techniques emphasized include taking and evaluating endometrial biopsies, endometrial culturing, and collecting and evaluating endometrial cytology smears. Bovine experience includes weekly trips to the slaughterhouse, where rectal-palpation findings can be compared to actual structures present in recovered tracts. Additional experience in rectal palpation is gained by following cyclic changes in assigned cows in the college dairy herd as well as by participating in herd-health palpations. Trips to the Department of Animal Science's sheep and swine barns allow observation of breeding programs and provide experience in castration, docking, clipping milk teeth, and notching ears. Weekly seminars are presented on current topics in theriogenology.

VETMED 701 Cardiology Service
Fall and spring. 2 credits. Prerequisite VETMED 551. Minimum enrollment 1 per rotation; maximum enrollment 2. Third-, and fourth-year veterinary students. Letter grades only. S. Moise.
The purpose of the cardiology rotation is to provide the student with the opportunity to put into practice what they have learned in the foundation years. The management of the most common cardiac diseases will be emphasized including congestive heart failure, arrhythmias, and secondary cardiac diseases. All species will be examined, large and small, although the majority will be small animals. Diagnostics including cardiovascular physical examination, electrocardiography, radiography, and echocardiography will be taught. The rotation includes clinical work, didactic teaching, and self-initiated digging for information.

VETMED 702 Laboratory Animal Medicine
Fall and spring. 2 credits. Prerequisite of VETMED 551. Maximum enrollment of 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. F. Quimby and staff.
The practice of laboratory animal medicine requires a combination of preventive programs, clinical skills, knoweldge of various species' biologies, familiarity with research methodology, and acquaintance with state and federal regulations. This course is offered as a two-week introduction to that specialty. Students accompany laboratory animal veterinarians on clinical rounds of Cornell's research animal housing and participate in laboratory diagnostic work. Review sessions are conducted on the biology, medicine, pathology, and husbandry of rodents, rabbits, and primates and on current legislation regulating the care and use of research animals. The course may include a field trip to the research animal facilities of Rockefeller University, the Cornell University Medical College, Marshall Farms, and the Laboratory of Experimental Medicine and Surgery in Primates.

VETMED 703 Clinical Wildlife, Exotic, and Zoo Animal Medicine
Fall, winter, spring, and summer. 2 credits. Prerequisite: VETMED 551. Maximum enrollment 2 per rotation. Third- and fourth-year veterinary students. Letter grades only. G. V. Kollias and staff.

This course introduces students to primary medical care of non-traditional pet species, zoo animals, and native wildlife. Students, directly supervised by the attending clinician, are responsible for the assessment, physical examination, and medical management of exotic animal species presented to the veterinary teaching hospital. Other opportunities available to assist in the development of clinical skills in wildlife, zoo and exotic animal medicine include the wildlife clinic cases, ongoing wildlife research and service projects, and trips to the Burnett Park Zoo. Successful completion of the course requires satisfactory performance during this 14-day clinical rotation.

VETMED 704 Quality Milk

Fall or spring. 2 credits. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. Letter grades only. R. Gonzalez, D. Wilson and staff.

This course covers the causes, diagnosis, treatment, and prevention of bovine mastitis. The role of management practices is stressed. The course includes lectures, readings, discussions, laboratory exercises, and farm visits as part of the Quality Milk Promotion Services—New York State Mastitis Control Program.

VETMED 705 Special Opportunities in Clinical Veterinary Medicine

Fall, spring, and summer. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. S-U grades only.

This course provides opportunities for students finished with Foundation Course V to explore professional areas not available through the regular curriculum. Blocks of two to four weeks are usually spent at other teaching hospitals, research laboratories, or zoological facilities. Student proposals are submitted to the associate dean for academic programs for review and approval. On-site supervisors of the block act as ex-officio faculty members and are required to evaluate each student formally.

VETMED 707 Poultry Medicine and Production Rotation

Fall. 2 credits. Prerequisite: VETMED 551 and VETMED 616, Disease of Birds is recommended. Third- and fourth-year veterinary students. K. A. Schat.

This course is a two-week rotation that will take place at the University of St. Hyacinthe or the University of Guelph in alternating years. This course provides students with an introduction in practical poultry medicine by a combination of lectures, discussions, and laboratory sessions including postmortem examinations. Students will also visit hatcheries, broiler, layer, and turkey farms.

VETMED 720 Issues and Preventive Medicine in Animal Shelters

Spring. 1 credit. Prerequisite: VETMED 540. Minimum enrollment 5; maximum enrollment 30. Second-, third-, and fourth-year veterinary students. Letter grades only. J. M. Scarlett and staff from the American Society for Prevention of Cruelty to Animals.

Veterinarians often work for or with animal shelters, serve on shelter boards of directors, are community resources for issues relating to companion animal welfare, participate in spay and neuter programs and influence the quality of the human-animal bond. This course will address the history of the humane movement, role of the veterinarian in relation to shelters, preventive and palliative health management (including highlighting diseases of major concern), issues surrounding euthanasia, reasons for relinquishment, programs for behavior modification and the legal concerns of shelters. These issues will be addressed using lectures and large group discussions.

VETMED 725 Diagnostic Cytology

Spring. 1.0 credit. Prerequisite: VETMED 628. Maximum enrollment 5. Second-, third-, and fourth-year veterinary students. S-U grades only. T. Stokol.

This two week course will provide in-depth experience in preparation and interpretation of cytological specimens. Evaluation of the cytological specimens will be incorporated into clinical cases, so that the results are interpreted with respect to the provided case material. The primary mode of instruction is based on faculty-driven microscopic slide evaluation. Students will be required to evaluate the slides independently prior to the microscope sessions. Selected mini-tutorials and laboratories will complement the microscopic sessions. The course builds on concepts previously addressed in the Foundation Blocks 3 and 4 and in the Clinical Pathology Distribution Course (VETMED 628). This course is limited to those students that are participating in or have completed the Clinical Pathology Distribution Course.

VETMED 726 Reptile Medicine and Surgery

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third-, and fourth-year veterinary students. Letter grades only. G. V. Kollias.

This course is designed to introduce third- and potentially fourth-year veterinary students to the principles and practices of reptile medicine and surgery. The course will be taught in a basic lecture and discussion format with laboratories reinforcing concepts presented in the lectures.

VETMED 730 Vaccines: from Jenner to DNA

Spring. 1 credit. Prerequisite: introductory course in immunology or VETMED 540 or VETMI 315. Minimum enrollment 10; maximum enrollment 40. Second-, third-, and fourth-year veterinary students and graduate students. Others by permission of the instructor. Letter grades only. Grades based on two examinations. Offered even-numbered years. T. Clark.

This course will provide an overview of vaccines used in clinical practice, as well as an in-depth look at vaccine development. Emphasis will be placed on the most recent advances in vaccine design and delivery, including the use of recombinant DNA techniques for targeting specific immunological responses. Lectures will touch on vaccines commonly used in veterinary practice and will address in detail the use of: carriers, adjuvants and immunostimulants; attenuated pathogens; synthetic peptides; recombinant subunit vaccines; viral and bacterial vectors for vaccine delivery; synthetic antibodies; and genetic immunization with "naked" DNA.

VETMED 732 Veterinary Clinical Toxicology

Spring. 1.5 credits. Second-, third-, and fourth-year veterinary students. S-U grades optional. L. Thompson and K. Earnest-Koons.

This course will provide the veterinary student with a solid introduction to concepts and principles of toxicology and how they are applied in the clinical setting. Students will learn about specific common toxicants, clinical signs in affected animals and treatment protocols for the toxicants in question. Students will also gain an understanding of the clinical approach to suspected or unknown toxicoses, sample collection and handling, and resources available for clinical toxicologic problems. The course will be conducted with two one-hour lectures per week and one hour-long large group discussion per week. The class will meet two days per week, the first day for one hour and the second day for two hours. Grades will be based on weekly quizzes, a final exam, a short paper and/or oral participation.

VETMED 733 Selected Infectious Diseases of Swine

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. S-U grades optional. K. Earnest-Koons.

This course will provide veterinary students with a solid introduction to concepts and principles of swine infectious diseases and how they are treated in the clinical setting. Students will learn about specific infectious diseases, clinical signs in affected animals and treatment protocols for the diseases in question. Students will also gain an understanding of the clinical approach to suspected or unknown infectious agents, sample collection and handling, and resources available for infectious disease diagnosis. The course will be conducted with two one-hour lectures per week and one hour-long large group discussion per week. The class will meet three days per week for one hour each. Grades will be based on weekly quizzes, a final exam, a short paper and/or oral presentation.

VETMED 735 Special Topics in Ambulatory and Production Animal Medicine.

Fall, winter, spring and summer. Variable 1–2 credits. Prerequisite: VETMED 560. Enrollment is done by lottery. Second-, third-, and fourth-year veterinary students. Letter grades only. L. Warnick and staff.

This course provides specialized experiences in the Ambulatory and Production Medicine Service. The course will consist of participation in scheduled and emergency farm calls and completion of projects designed to provide experience in herd problem solving, records analysis and implementing herd-health programs. Clinical service assignments will be planned to meet individual student goals. Examples of focus areas available include livestock production medicine, dairy reproductive examinations, small-ruminant medicine, and equine ambulatory practice.

VETMED 736 Veterinary Diagnostic Imaging: Anatomy and Interpretation

Spring. 1 credit. Minimum enrollment 20; maximum enrollment 50. First- and second-year veterinary students by permission of instructor. Third- and fourth-year veterinary students. S-U grades only. P. Scrivani.

The course is designed to emphasize the relevance of a solid foundation in veterinary anatomy as it clinically applied to diagnostic imaging. Additionally, the course is designed to provide students with an understanding of the strengths and limitation of diagnostic imaging by discussing interpretation prin-

ciples, pitfalls and interpretations, and measurements obtained through lectures, laboratory exercises, weekly quizzes, and reading assignments. Integration of these objectives will culminate in weekly laboratory exercises where students will have to make or evaluate decisions regarding patient management based on evaluation of clinical signs and imaging examinations. The "Roentgen-Sign" approach to diagnostic imaging interpretation will be used as a model.

VETMED 745 Dynamics of Dairy Herd Health and Management
Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Y. T. Grohn and L. D.Warnick.
Competitive pressure, increasing input costs, and comparatively stagnant milk and salvage values require dairy producers to become more efficient. The current trend of increasing herd size drives changes in management. Dairy cattle are handled in groups, although individual cow health and productivity fundamentally underpin the financial success of the dairy enterprise. Veterinarians are called upon to advise dairy producers not only in matters of herd health, but increasingly in matters of productivity and management decision making. Identifying opportunity areas to improve productivity and ultimately profitability requires modern veterinarians to recognize and solve complex and interdependent milk production, reproduction, and health issues. Until the advent of the new veterinary curriculum, biological systems were often taught in isolation. Yet there are research models that integrate the dynamic nature of dairy production, health, management, and economics through epidemiological and economic modeling. Despite the existence of such advanced research models, they have not been integrated fully into the curriculum. The goal of this course is to teach students the dynamic relationships of herd performance parameters with dairy herd health and management. This will be done with a combination of lectures and exercises using two computer simulation models. The following topics will be addressed: 1) how often production diseases occur and when, 2) how they are interrelated, 3) the impact of disease on milk production, reproductive performance, and risk of culling, and 4) how to use this information in production medicine.

The format of this eight-week course (two days per week) is a lecture one day and hands-on work with computer simulation models on the other day.

Veterinary Biomedical Sciences

VETBMS 346 Introductory Animal Physiology (enroll in VETPH 346) (also BIOAP 311) (Undergraduate)
Fall. 3 credits. Prerequisites: BIOG 105, BIOG 106 or BIOG 101, BIOG 102, BIOG 103, BIOG 104, BIOG 107, BIOG 108; CHEM 207, CHEM 208, or CHEM 206, OR CHEM 215, CHEM 216; MATH 106, MATH 111 OR MATH 191 or AP credit for any of the above; or one year of college-level biology, chemistry, and mathematics. S-U grades optional. M W F 11:15. E. R. Loew.
A general course in animal physiology emphasizing principles of operation, regulation, and integration common to a broad range of living systems from the cellular to the organismal level. Structure-function relationships are stressed along with underlying physical-chemical mechanisms.

VETBMS 600 Special Projects in Anatomy (enroll in VETA 600)
Fall, spring. 1 credit per 2.5-hour period. By permission of the instructor. S-U grades only.

[VETBMS 628 Graduate Research in Animal Physiology (Graduate) (enroll in VETPH 628) (also BIO S 719)
Fall, spring. 1–3 credits. By written permission of department chairperson and faculty mentor who will supervise the work and assign the grade. S-U grades optional. Not offered 1999–2000.
Similar to Biological Sciences 499 but intended for graduate students who are working with faculty members on an individual basis.]

[VETBMS 637 Postmortem Pathology (enroll in VETPA 637)
Fall, spring. 2 credits. Intended for veterinary students but open to others. S-U grades optional. Not offered 1999–2000. J. M. King.
A presentation of gross and microscopic lesions of diagnostic significance, employing color projection slides as illustrations. Emphasis on pathological and differential diagnosis of a wide spectrum of viral, metabolic, bacterial, parasitic, and other diseases.]

VETBMS 639 Autotutorial in Laboratory Animal Medicine and Science (enroll in VETPA 639)
Spring. 1–3 credits. Letter grades only. F. W. Quimby.
This course is offered to individuals interested in pursuing various aspects of laboratory animal medicine and science in depth. A variety of resources are available to assist students in their research on a particular topic: the library of the Division of Laboratory Animal Medicine, including the autotutorial library; the university libraries; and special information collected from other institutions. Grades are determined on the basis of a paper, an oral presentation, or the creation of an audiovisual teaching aid, any of which may be selected by the student.

VETBMS 641 Veterinary Clinical Immunology (enroll in VETPA 641)
Spring. 1 credit. By permission of the instructor. Letter grades only. R. M. Lewis.
This course emphasizes the clinical aspects of fifteen specific diseases that are mediated by immunologic processes. Case material from the Teaching Hospital is used to illustrate presenting clinical signs, laboratory diagnostic methods, clinical course, therapeutic approaches, and eventual outcome of each disease under discussion. Student participation in informal case discussions is encouraged as a means of introducing students to the practice of veterinary medicine through case discussion and analysis. Training is also provided in the use of the college's computerized biomedical information system and the hospital records system to develop a critical written case analysis, which serves as the basis for grading.

VETBMS 700 Predictions of Form or Phlogeny (enroll in VETA 700)
Spring. 1 credit. By permission of the instructor. S-U grades optional. J. W. Hermanson.
Form and function are often discussed as a correlated entity in biology. This seminar group will start with the question, "Does form really predict function?" This will be addressed initially with respect to the analysis of paleobiology, but will then encompass examples of experimental functional morphology. In particular, there is a growing body of experimental data demonstrating that diverse functions can be achieved with nearly identical morphologies, and that the functional diversity may better be explained by behavior or environmental factors. Might these observations refute current theories about the origin of flight in extinct organisms (i.e., the cursorial or ground-up theory of flight versus the arboreal gliding theory of flight evolution)? Specific topics pursued will be selected by participants in this course. Participation will be open to interested graduate students, advanced undergraduate students, and veterinary students.

VETBMS 720 Special Problems in Physiology (Graduate) (enroll in VETPH 720)
Fall, spring. 1–3 credits. By permission by instructor. Laboratory work, conferences, collateral readings, and reports. Adapted to the needs of students. S-U grades optional.

VETBMS 788 Seminar in Surgical Pathology
Fall, spring. 1 credit. Intended for residents. Third- and fourth-year veterinary students may attend. Letter grades only. B. A. Summers and staff.
The major objective of this discussion and seminar course is to introduce the residents to the discipline of surgical pathology. Selected material from the Surgical Pathology Service is prepared in advance for independent review by the residents. The material is presented in a slide-seminar format by the residents under the review of the faculty. Emphasis is placed on pathogenesis, etiology, and pathologic descriptions of the lesions. In addition, appropriate guest lecturers cover specific areas of interest and special topics not encountered in the departmental service programs.

[VETBMS 796 Medical Primatology (enroll in VETPA 796)
Fall. 1 credit. For residents and graduate students by permission of instructor. Offered even-numbered years. Not offered fall 1999. F. W. Quimby.
A survey of major diseases, medical care, and management techniques for all life stages of primates. Topics include physical examination, restraint anesthesia, housing, and management of various nonhuman primate species; bacterial, viral, and parasitic diseases; noninfectious diseases; infant and nursery care reproduction and behavioral considerations; and therapeutics.]

VETBMS 811 Advanced Physiology Methods I (enroll in VETPH 811) (also BIO S 811) (Graduate)
Fall. 2 credits. Enrollment limited. Prerequisites: graduate student status or permission of course coordinator. S-U grades only. Lab to be arranged. J. Ray.
This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three

modules are offered each semester by arrangement with the course coordinator.

VETBMS 812 Advanced Physiology Methods II (enroll in VETPH 812) (also BIO S 812) (Graduate)
Spring. 2 credits. Enrollment limited. Prerequisites: graduate student status or permission of course coordinator. S-U grades only. Lab to be arranged. J. Ray.
This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

Veterinary Clinical Sciences

[VETCS 700 Pathophysiology of Gastrointestinal Surgery
Fall. 1.5 credits. S-U grades only. Offered every third year. Next offered in fall of 2001. N. G. Ducharme.
Normal anatomy and physiology of the gastrointestinal system in carnivores, herbivores and ruminants will be presented initially. This will be followed by in-depth discussion of the pathophysiological mechanisms and sequelae of gastrointestinal obstructions including reperfusion injury, peritonitis, adhesions and short bowel syndrome. The emphasis of this course is development of advanced understanding of surgically relevant gastrointestinal problems which lead to appropriate decision making.]

[VETCS 701 Pathophysiology of Orthopedic Surgery (Graduate)
Spring 1.5 credits. Prerequisites include DVM, MD, or equivalents, or approval of instructor. S-U grades only. Offered every third year. Next offered spring 2002.]

VETCS 702 Pathophysiology of Cardiopulmonary Surgery (Graduate)
Fall. 1.5 credits. Prerequisite: DVM degree or equivalent. S-U grades only. Offered every third year. R. P. Hackett, S. L. Fubini, N. G. Ducharme, H. J. Harvey.
Using lectures and group discussions, the objective of this course is to explain the pathophysiology of various cardiovascular diseases (cardiac arrest, cardiac arrythmia under anesthesia) and thoracic disease (various forms of upper airway resistance). The emphasis is placed on understanding these mechanisms and outlining the surgeon's response to them.

VETCS 703 Surgical Principles and Surgery of the Integumentary System (Graduate)
Spring. 1.5 credits. For graduate DVM's (or equivalent) in residency or graduate training programs. S-U grades only. Offered every third year.
This course is designed for surgery residents and graduate students. It is largely discussion format and examines surgical principles and surgery of the integumentary system.

[VETCS 704 Pathophysiology of Urogenital Surgery (Graduate)
Fall. For graduate DVM's or equivalent in residency or graduate training programs. 1.5 credits. S-U grades only. Offered every third year. Next offered fall 2001. S. Fubini.
This course is designed to review and discuss uogenital surgical procedures in animals and the rational basis for them. Pathophysiology will be stressed. Some classes will consist of reprints with discussion.]

[VETCS 706 Pathophysiology of Neurologic Surgery (Graduate)
Spring. Requisite includes DVM, MD or equivalent, or approval of instructor. 1.5 credits. S-U grades only. Offered every third year. Next offered spring 2001.]

VETCS 710 Advanced Veterinary Anesthesiology I
Fall, winter. Prerequisites: VETMED 568 Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. P. F. Moon and staff.
The content of the course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology and pathology. Clinically oriented lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

VETCS 711 Advanced Veterinary Anesthesiology II
Fall, winter. 1 credit. Prerequisites: VETMED 568, Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. P. F. Moon and staff.
The content of the course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology and pathology. Clinically oriented lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

Veterinary Microbiology and Immunology

VETMI 315 Basic Immunology (Undergraduate) (also Biological Sciences 305)
Fall. 3 credits. Strongly recommended: basic courses in microbiology, genetics, and biochemistry. S-U grades optional. J. A. Marsh.
A survey of immunology, with emphasis on the cellular and molecular bases of the immune response. More information is available at the biog305 courseinfo web site.

VETMI 320 Principles of Toxicology (Undergraduate) (also Biological Sciences 320 and Toxicology 320)
Spring. 3 credits. Prerequisites: one year each of introductory biology and chemistry, with lab; one semester of organic chemistry lecture or waiver by instructor. S-U grades optional. T R 1:25–2:40. S. Penningroth, R. Dietert, and S. Bloom.
An introduction to the interdisciplinary science of toxicology, drawing on material from biology, chemistry, pharmacology, ecology, earth science, risk analysis and policy studies. Basic principles of toxicological science are presented and illustrated by case examples, such as pesticide toxicity to wildlife reproduction and human health risk assessment at a Superfund hazardous chemical waste site. Chemical risk management is described as a sociopolitical process involving the integration of scientific, economic and cultural factors.

Independent student projects include a toxic chemical profile and a team analysis of hypothetical "environmental risk scenarios." Periodic talks by toxicology faculty acquaint students with basic research in this interdisciplinary branch of Biological Science. This is an introductory level course in toxicology. Format: lecture supplemented by case examples. One field trip to a hazardous chemical waste site. Appropriate for non-majors seeking basic literacy in environmental and human toxicology. "Gateway course" for students interested in 400 and 600 level toxicology courses.

[VETMI 404 Pathogenic Bacteriology and Mycology (also BIOMI 404)
Spring. 2 or 3 credits (3 credits with lecture and seminar). Prerequisites: BIOMI 290 and 291. Seminar is required of graduate students and open to undergraduates with permission of instructor. Seminar limited to 15 students. Letter grades only. Offered odd-numbered years. Not offered spring 2000. Microbiology faculty.
This is a course in medical microbiology, presenting the major groups of bacterial and mycotic pathogens important to human and veterinary medicine. The emphasis of this course is infection and disease pathogenesis. Topics include disease causality; interactions of host, pathogen, and environment, including immunity to bacteria and fungi; and principles of antimicrobial therapy and drug resistance. A companion seminar addresses the current and classic literature related to microbial pathophysiology on the cellular and molecular level.]'

VETMI 408 Viruses and Diseases I (also Biological Sciences 408)
Spring. 3 credits. Intended primarily for graduate and undergraduate microbiology majors. Prerequisites: Microbiology 290 and 291 (College of Agriculture and Life Sciences). Recommended: VETMI 315, Genetics 281. Letter grades only. Offered even-numbered years. J. W. Casey.
The course will cover basic concepts in virology with emphasis primarily on DNA virus-host interactions, strategies for gene regulation, and mechanisms of pathogenicity. Selected viral infections that result in immune dysfunction and neoplasia will be highlighted in the context of approaches to prevent or reduce the severity of diseases.

[VETMI 409 Viruses and Disease II (also BIOMI 409)
Fall. 2 credits. Prerequisites: BIOMI 290 & 291. Recommended BIOMI 408, BIOBM 330–332, BIOBM 432. Offered even-numbered years. Not offered spring 2000. G. Whittaker.
This course will be complementary to BIOMI 408, Viruses and Disease I, and will emphasize RNA viruses. The course will be complete in its own right. As such, completion of BIOMI 408 is not a requirement, but is

encouraged. The structure and classification of viruses entry, genome replication and virus assembly. Particular emphasis will be placed on virus-host cell interactions. Vaccinations, chemotherapy and evaluation of viruses will also be discussed.]

VETMI 431 Medical Parasitology (Undergraduate)
Fall. 2 credits. Prerequisites: zoology or biology; any of the following courses: BIOES 261, 263, 264, 267, 274, 275, 278; BIOG 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 170, 202, 207; BIOMI 192, 290, 398 or equivalent course. Letter grades only. D. D. Bowman.
A systematic study of arthropod, protozoan, and helminth parasites of public health importance, with emphasis on epidemiologic, clinical, and zoonotic aspects of these parasitisms.

VETMI 605 Special Projects in Microbiology (Undergraduate)
Fall, spring. 1–3 credits. By permission of the instructor. Prerequisite: a good background in microbiology or immunology. Preferably, students should have background in pathogenic microbiology and immunology. S-U grades only. Microbiology staff.
The course normally provides an opportunity for the student to work in a research laboratory or carry out a special project under supervision.

VETMI 700 The Biology of Animal Viruses (Graduate and Upper-level Undergraduate)
Fall. 2 credits. Letter grades only. Offered odd-numbered years. C. R. Parrish and staff.
This course will examine current topics in studies of animal viruses, with some comparisons with plant viruses where similar mechanisms apply. Selected topics will be examined in depth, and those will include the structures of viruses and their components, viral nucleic acids and replication strategies, details of the interactions between viruses and their host cell components and metabolism. Other topics to be covered will include the evolution and selection of viruses, and novel approaches to the prevention of virus infection, and methods for antiviral chemotherapy.

[VETMI 701 Pathogenesis of Viral Diseases (also VETMED 619)
Spring. 2 credits. Given during 8-week spring distribution period, January-March. Open to graduate students and advanced undergraduates with permission of instructor. Strongly recommended prerequisite: Immunology. Letter grades. Offered odd-numbered years. Not offered spring 2000. Microbiology faculty.
Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spread between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature, Nathanson's *Viral Pathogenesis*, 1997, and Field's *Virology*, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.]

VETMI 702 Molecular Biology and Immunology of Host-Parasite Interactions (Graduate) (also VETMED 620)
Spring. 2 credits. S-U grades optional. Offered even-numbered years. E. J. Pearce.
See description for VETMED 620.

VETMI 705 Advanced Immunology (Graduate) (also Biological Sciences 705)
Spring. 3 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. Letter grades only. Offered even-numbered years. R. G. Bell and staff.
Coverage at an advanced level of molecular and cellular immunology.

VETMI 706 Immunology Seminar Series (Graduate)
Fall, spring. No credit. Required of all graduate students in the Field of Immunology. S-U grades only. Fall, E. Pearce; spring, R. Dietert.
Presentations of research investigations by Cornell faculty members, postdoctoral fellows, and graduate students in the Field of Immunology and by invited speakers from other institutions.

VETMI 707 Advanced Work in Bacteriology, Virology, and Immunology (Graduate)
Fall, spring. 1–3 credits. By permission of the instructor. S-U grades optional. Microbiology staff.
This course is designed primarily for graduate students with a good background in pathogenic microbiology and immunology. It may be elected by veterinary students who are properly prepared.

VETMI 710 Microbiology Seminar (Graduate)
Fall, spring. 1 credit. Required of all graduate students in the Department of Microbiology and Immunology. S-U grades only. E. J. Pearce, C. R. Parrish.

[VETMI 719 Immunology of Infectious Diseases and Tumors (also Biological Sciences 706) (Graduate)
Spring. 2 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. S-U grades optional. Offered odd-numbered years. Not offered spring 2000. E. Y. Denkers and staff.
Coverage at an advanced level of the immunology of diseases caused by selected bacterial, viral, protozoan, and helminthic parasites, and tumor immunology.]

VETMI 737 Advanced Work in Animal Parasitology (Graduate)
Fall, spring. 1–3 credits. For advanced undergraduate, graduate, and veterinary students. Letter grades only. D. D. Bowman and other faculty.
This course is intended for advanced undergraduate, graduate, and veterinary students with interests in parasitology research.

VETMI 770 Advanced Work in Avian Diseases (Graduate)
Fall, spring. 1–3 credits. By arrangement with the instructor. Letter grades only. Microbiology faculty.

VETMI 772 Advanced Work in Aquatic Animal Diseases (Graduate)
Fall, spring. 1–3 credits. By arrangement with the instructor. S-U grades only. P. R. Bowser.

VETMI 783 Seminars in Parasitology (Graduate)
Fall, spring. 1 credit. Open to veterinary students or graduate students; others by permission of the instructor. S-U grades only. D. D. Bowman.
This is a seminar series designed to acquaint students with current research in the field of parasitology. The range of topics is determined, in part, by the interests of those participating and may include such topics as the ecology of parasitism, parasite systematics, wildlife parasitology, and parasitic diseases of plants and animals, including humans.

Veterinary Molecular Medicine

VETMM 470 Biophysical Methods (enroll in VETPR 470) (also A&EP 470)
Spring. 3 credits. By permission of the instructor. Letter grades only. M. Lindau.
An overview of the diversity of modern biophysical experimental techniques used in the study of biophysical systems at the cellular and molecular level. Topics covered will include methods that examine both structure and function of biological systems, with emphasis on the applications of these methods to biological membranes. The course format will include assigned literature reviews by the students on specific biophysics topics and individual student presentations on these topics. The course is intended for students of the engineering, physics, chemistry, and biological disciplines who seek an introduction to modern biophysical experimental methods. A solid knowledge of basic physics, and of mathematics through the sophomore level is expected. Some knowledge of cellular biology is helpful but not required.

[VETMM 610 Cellular and Molecular Pharmacology (enroll in VETPR 610)
Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. Not offered fall 1999. G. A. Weiland and pharmacology faculty.
A graduate-level course surveying the molecular and cellular aspects of receptor mechanisms, signaling pathways, and effector systems. Topics covered include drug-receptor interactions; ligand- and voltage-gated ion channels; G protein pathways; growth factor signaling; lipid signaling; calcium; nutrient and nitric oxide signaling; and mechanisms of receptor-mediated effects on neural excitability, electrical pacemakers, muscle contraction and gene expression.]

VETMM 611 Systems Pharmacology (enroll in VETPR 611)
Spring. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. G. A. Weiland and pharmacology faculty.
A graduate-level course surveying system- and organ-related aspects of pharmacology. Topics covered include drug disposition; pharmacokinetics; autonomic pharmacology;

central nervous system pharmacology; pharmacology of inflammation, allergy and platelet function; cardiovascular, gastrointestinal and endocrine pharmacology; and chemotherapy, including antimicrobial agents and cancer chemotherapy.

VETMM 672 Protein Kinetics (enroll in VETPR 672) (also CHEM 672)
Fall. 4 credits. Prerequisite: CHEM 288 or 390, BIOBM 331 or permission of the instructor. S-U grades optional. B. A. Baird.
Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include: protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of cell membrane receptors in regulating cellular activities.

VETMM 700 Calcium as a Second Messenger in Cell Activation (enroll in VETPR 700)
Spring. 2 credits. By permission of the instructor. Lecture-discussion. S-U grading only. Offered even-numbered years. C. M. S. Fewtrell.
Regulation of intracellular calcium and techniques for studying calcium movements and distribution in cells. Calcium channels and exchangers, calcium-binding proteins, and calcium stores. Phosphatidylinositol turnover, release of calcium from intracellular stores, and activation of calcium influx. Calcium gradients and oscillations. Mechanisms of exocytosis and the proteins involved. Each topic will be introduced with a lecture followed by discussion of recent papers from the literature.

[VETMM 701 Organ System Toxicology (enroll in VETPR 701) (also TOX 611)
Fall. 1 credit. For graduate students in environmental toxicology. S-U grades only. Offered even-numbered years. Not offered fall 1999. W. S. Schwark.
A minicourse on molecular mechanisms involved in chemical toxicity. Specific examples of toxicity in organ systems such as the nervous system, kidney, liver, respiratory tract, and cardiovascular system will be considered.]

VETMM 703 Receptor-Ligand Interactions (enroll in VETPR 703) (also BIONB 790–02)
Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered odd-numbered years. R. E. Oswald, G. A. Weiland.
The course covers both the practical and theoretical tools for the study of ligand-receptor interactions, emphasizing the quantitative and physical chemical aspects of receptor theory. Topics discussed are basic methods of radioligand binding assays, including separation and measurement of bound and free ligand; characterization of receptor function; analysis of receptor structure; thermodynamic basis of the binding; methods of analyzing equilibrium binding; equilibrium binding for complex binding mechanisms; and kinetics of simple and complex binding mechanisms.

[VETMM 704 CNS Synaptic Transmission (enroll in VETPR 704)
Spring. 2 credits. Maximum enrollment: 20 graduate students and undergraduate seniors by permission of the instructor. S-U grades optional. Offered odd-numbered years. Not offered spring 2000. L. M. Nowak.
This is a survey course in vertebrate central nervous system physiology and pharmacology, and focuses on mechanisms of neurotransmitter action at the membrane and cellular levels. Roles of selected neurotransmitters in normal and dysfunctional brains are covered. Topics are introduced in lectures and followed up in discussions of recent journal articles.]

[VETMM 705 Molecular Mechanisms of Receptor-G Protein Coupled Signaling (enroll in VETPR 705)
Spring. 2 credits. S-U grades optional. Offered odd-numbered years. Not offered spring 2000. R. A. Cerione.
This course focuses on the mechanisms of action of GTP binding proteins. Several receptor-coupled signaling systems are examined, including adenylyl cyclase, vertebrate vision, phosphatidylinositol lipid turnover, receptor systems regulating various ion channels, and receptors involved in cell growth regulation.]

[VETMM 706 Growth Factor-Coupled Signaling (enroll in VETPR 706) (also BIOBM 734)
Spring. 0.5 credits. By permission of the instructor. S-U grades optional. Offered odd-numbered years. Not offered spring 2000. R. A. Cerione.
General theme will be mitogenic signaling pathways. Receptor tyrosine kinases, src, ras, and ras-regulatory proteins will be covered.]

[VETMM 707 Protein NMR Spectroscopy (enroll in VETPR 707) (also BIOBM 730)
Spring. 2 credits. S-U grades optional. Offered odd-numbered years. Not offered spring 2000. R. E. Oswald and L. K. Nicholson.
The fundamentals of NMR will be presented and the student will acquire the tools necessary to establish an in-depth understanding of multidimensional, multinuclear NMR experiments. Application of the technique to proteins for assignment of resonances, determination of structure, and characterization of dynamics will be presented. Special approaches for applying solution NMR techniques to large proteins will be discussed.]

VETMM 708 Lipid Second Messengers (enroll in VETPR 708)
Spring. 2 credits. Students with general biology background may enroll by permission of instructor. Lecture-discussion. S-U grades optional. Offered even-numbered years. H. Alex Brown.
This course covers the biochemical pathways involved in the production of lipid second messengers. These pathways function as essential elements of cellular signal transduction cascades. Topics include pathways of phospholipid synthesis, regulation of major mammalian phospholipases by receptors linked through G-proteins and tyrosine kinase receptors to intracellular cascades, and subsequent metabolism of lipid products. The roles of lipids in regulating cell processes, such as membrane structure, exocytosis, cell cycle, and apoptosis, are topics for discussion following reviews of recent publications. A background in general biochemistry is recommended.

VETMM 709 Cancer Cell Biology (enroll in VETPR 709) (also Biological Sciences 750) (Graduate)
Spring. 3 credits. Prerequisite: Biological Sciences 330 or 331 or equivalent. Recommended: graduate courses in biological sciences. Letter grade. Offered even-numbered years. J. L. Guan, R. A. Levine, B. U. Pauli, A. Yen.
This advanced graduate course will cover molecular, cellular, and genetic aspects of cancer. The course is divided into four sections. The first section will address tumor etiology, progression, and metastasis. Topics in this section will include causes of cancer, morphologic and genetic models of cancer progression, tumor angiogenesis, tumor invasion, and metastasis. The second section will discuss cell-matrix and cell-cell interactions in cancer. Topics will include the structure and function of the major matrix receptor integrin family of cell adhesion molecules, integrin interactions with the cytoskeleton, intracellular signaling pathways in cell-ECM interactions, integrin-mediated signaling in cellular growth regulation, changes of integrins in human tumors and metastasis, structure and function of cadherin family of cell-cell adhesion molecules, signaling mechanisms in cell-cell interactions in normal development and cancer. The third section will be on cell cycle. It will develop properties of the cell cycle, how its phases are measured, and changes associated with cell transformation. The fourth section will discuss the signaling pathways that regulate cell cycle progression and how oncogenes and tumor suppressor genes regulate cell proliferation, differentiation, and apoptosisis.

Special Projects and Research in Pharmacology

Fall, spring, summer. 1–3 credits. By arrangement with the instructor. S-U grades optional. Independent study or research. Pharmacology faculty.
These courses cover a variety of topics related to the research interests of the faculty.

VETMM 711 The Role of Calcium in Stimulus-Secretion Coupling (enroll in VETPR 711)
C. M. S. Fewtrell.

VETMM 713 Mechanisms of Growth-Factor Action (enroll in VETPR 713)
R. A. Cerione.

VETMM 714 Central Nervous System Neurotransmitters (enroll in VETPR 714)
L. M. Nowak.

VETMM 718 Structure-Function of the Nicotinic Acetylcholine Receptor (enroll in VETPR 718)
R. E. Oswald.

VETMM 720 Modulation of Nicotinic Acetylcholine Receptor Function (enroll in VETPR 720)
G. A. Weiland.

VETMM 724 The Control of Hormone Secretion (enroll in VETPR 724)
G. W. G. Sharp.

VETMM 730 Graduate Research in Pharmacology (enroll in VETPR 730)
Fall, spring, and summer. 1–12 credits. By permission of the instructor. S-U grades only. This course is offered by individual faculty members in the Department of Pharmacology for graduate students undertaking research toward M.S. or Ph.D. degrees.

Directed Readings in Pharmacology

Fall, spring, and summer. 1–3 credits each topic. By arrangement with the instructor. S-U grades optional. Pharmacology faculty. Reading and discussions.
These courses are offered to small groups or to individual students.

VETMM 742 Receptor Mechanisms (enroll in VETPR 742)
G. A. Weiland.

VETMM 745 Biochemical Neuropharmacology (enroll in VETPR 745)
G. A. Weiland.

VETMM 747 Amino Acid Neurotransmitters (enroll in VETPR 747)
L. M. Nowak.

VETMM 748 Stimulus-Secretion Coupling (enroll in VETPR 748)
C. M. S. Fewtrell.

VETMM 750 Cell Calcium (enroll in VETPR 750)
C. M. S. Fewtrell.

VETMM 760 Advanced Topics in Pharmacology (enroll in VETPR 760)
Pharmacology faculty.

Veterinary Population Medicine and Diagnostic Sciences

VETPMD 664 Introduction to Epidemiology (Graduate) (enroll in VETCS 664)
Fall. 3 credits. Prerequisites: Statistics and Biometry 601 (College of Agriculture and Life Sciences) may be taken concurrently or permission of the instructor. S-U grades optional. H. N. Erb.
Lectures and discussion deal with the fundamentals of epidemiology. Current topics in epidemiology from the fields of nutrition, infectious and chronic diseases, occupational medicine, and veterinary medicine will be reviewed to illustrate the principles and practice of epidemiology, especially of clinical-trial design and infectious-disease epidemiology.

VETPMD 665 Study Designs (Graduate) (enroll in VETCS 665)
Spring. 2 credits. Prerequisites: VETCS 664 and Statistics and Biometry 601 (College of Agriculture and Life Sciences). S-U grades optional. H. O. Mohammed.
Design and interpretation of cross-sectional, case-control, and cohort studies (including controlled clinical trial) are covered. Design issues will include sample size, bias, and relative advantages and disadvantages.

The course objectives are: 1) know the difference between different types of epidemiologic study designs and relative advantages and disadvantages of each; 2) given a problem (usually a field situation), be able to design an appropriate epidemiologic study; 3) be able to effectively analyze and criticize published epidemiologic studies.

The course will consist of lectures on the principles of epidemiologic study design and related issues (sample size calculations, validity and precision, and identification and minimizing of bias); basic analysis of epidemiologic data; and discussion of published epidemiologic studies. These studies include observational cohort studies (prospective and retrospective), cross-sectional studies, case-control studies, and hybrid studies (ambidirectional, and other hybrid designs).

VETPMD 666 Advanced Methods in Epidemiology (Graduate) (enroll in VETCS 666)
Fall. 3 credits. Prerequisites: VETCS 665 and Statistics and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. M W F 8:45–9:35. Y. T. Grohn.
Concepts introduced in VETPMD 664 and VETPMD 665 are further developed, with emphasis on statistical methods. Topics include interaction, effect modification, stratified analysis, matching and multivariate (logistic regression) methods, survival analysis, and strategies for the analysis of epidemiologic data.

VETPMD 700 Special Projects in Diagnostic Endocrinology (enroll in VETDL 700)
Fall, spring. 1–3 credits. By permission of the instructor. Letter grades only. T. J. Reimers.
An independent study course. Students have the opportunity to research a particular topic in diagnostic/clinical endocrinology of animals.

VETPMD 701 Special Projects in Infectious Diseases (enroll in VETDL 701)
Fall, spring. 1–3 credits. By permission of the instructor. S-U grades optional. Diagnostic laboratory faculty.
This course provides laboratory experience with attention to specific aspects of infectious disease problems.

VETPMD 702 Special Topics in Infectious Diseases (enroll in VETDL 702)
Fall, spring. 1–3 credits. By permission of the instructor. S-U grades optional. Diagnostic laboratory faculty.
The objective of this course is to offer a broad exposure to various aspects of infectious diseases.

VETPMD 703 Doctoral-Level Thesis Research (Graduate) (enroll in VETDL 703)
Fall, spring. 6–9 credits. By permission of the instructor. S-U grades only. Diagnostic Laboratory faculty.
Research leading to a Ph.D. degree.

VETPMD 704 Master's – Level Thesis Research (Graduate) (enroll in VETDL 704)
Fall, spring. 1–3 credits. By permission of the instructor. S-U grades only. Diagnostic Laboratory faculty.
Research leading to an M.S. degree.

VETPMD 705 (enroll in VETDL 705)

[VETPMD 707 Clinical Biostatistics (Graduate) (enroll in VETCS 707)
Spring. 2 credits. For veterinary residents or graduate students. Letter grades only. Offered odd-numbered years. Not offered spring 2000. H. N. Erb, Y. T. Grohn, H. O. Mohammed, J. M. Scarlett.
The theory behind and interpretation of parametric and nonparametric statistical techniques commonly employed in research/clinical medicine will be explained. Students will analyze small data sets using a commercial statistical software package.]

VETPMD 708 Epidemiology Seminar Series (Graduate) (enroll in VETCS 708)
Fall, spring. 1 credit. S-U grades only. Epidemiology faculty.
Advanced theoretical and analytical epidemiologic concepts and techniques will be discussed.

VETPMD 766 Graduate Research (Graduate) (enroll in VETCS 766)
Fall, spring, and summer. Credit and hours to be arranged. Must be registered in masters of Ph.D. program in epidemiology and permission of the graduate faculty member concerned. S-U grades only. Epidemiology faculty.
This course enables students outside the section of Epidemiology to receive graduate research credits for projects with epidemiological components.

VETPMD 799 Independent Studies in Epidemiology (enroll in VETCS 799)
Fall, spring. 1–3 credits. H. N. Erb, Y. T. Grohn, H. O. Mohammed, J. M. Scarlett.
The purpose of this course is to investigate an epidemiologic topic with one of the instructors. It provides experience in problem definition, research design, and the analysis of epidemiologic data.

FACULTY ROSTER

Aquirre, Gustavo D., Ph.D., U. of Pennsylvania. Alfred H. Caspary Professor, Clinical Sciences
Ainsworth, Dorothy M., Ph.D., U. of Wisconsin-Madison. Assoc. Prof., Clinical Sciences
Antczak, Douglas F., Ph.D., U. of Cambridge (England). Dorothy Havemeyer McConville Professor of Microbiology and Immunology
Appel, Max J., Ph.D, Cornell U. Prof. Emeritus, Microbiology and Immunology

COLLEGE OF ARTS AND SCIENCES

PROGRAM OF STUDY

Introduction

The College of Arts and Sciences—composed of those departments that comprise the humanities and the arts, the basic sciences, mathematics and computer science, and the social sciences and history—is a community of about 4,000 undergraduates and 600 faculty members. The college values intellectual breadty and rigor, individual choice and responsibility, imaginative curricula, and development of critical thinking and writing. The college is also a graduate school and research center attracting faculty whose research and scholarly and creative writing require first-rate academic facilities and who bring to all their students the profound questioning and the current ideas of contemporary scholarship. Finally, the college exists within a university of about 18,000 students and 1,630 faculty members. This wider community provides depth and diversity of applied and professional studies beyond what one undergraduate college alone can offer. Students may draw upon the knowledge and facilities of the other undergraduate colleges at Cornell to supplement their studies. Abundant variety and outstanding quality in many fields, including interdisciplinary fields, give the college its distinctive character.

The richness of the curriculum is extraordinary; there is no course that all students must take, and there are nearly two thousand from which they may choose. By choosing courses each semester, students design their own education. They strike a balance between developing known interests and exploring new subjects. They sharpen their verbal and quantitative skills. They also come to understand more thoroughly the Western tradition and learn something about the non-Western world and its peoples. An education in the liberal arts and sciences means honing one's critical capacities, learning about oneself in nature and culture, and gaining real experience with views of the world radically unlike one's own. All this is highly individual, and the college relies on each student and faculty adviser to design a sensible, challenging, and appropriate course of study.

Yet the faculty believes that each student's education should have certain common qualities. These include familiarity with several different ways of knowing that are reflected in clusters of disciplines in the natural sciences, the social sciences, and the humanities and the arts. In addition to these general areas of knowledge, students study foreign languages, acquire effective writing and quantitative skills, and concentrate on one particular field to develop the powers of imaginative and critical thinking as fully as possible. To accomplish these objectives, the college has certain requirements for graduation.

Summary of Requirements for the Bachelor of Arts degree

1) First-Year Writing Seminars: two courses. (See "John S. Knight Writing Program," p. 563.)
2) Foreign language: proficiency in one language or qualification in two; 0 to 4 courses. (See below.)
3) Distribution: nine courses, three of which are satisfied with a major in humanities or social sciences and four of which are satisfied with a major in sciences. (See below.)
4) Breadth: two courses (may be among courses for distribution, major, or electives). (See below.)
5) Major. (See below.)
6) Electives: four or five courses (at least 15 credits) in courses not used to fulfill other requirements and not in the major field.
7) Residence: eight full-time semesters, unless a student can successfully complete all other requirements in fewer than eight semesters and meet the additional criteria to accelerate graduation. (See below under "Acceleration.")
8) Minimum number of courses: thirty-four courses. A two-credit course counts as half a course; a six-credit language course counts as one and one-half courses; a one-credit course does not count toward this requirement. (See below under "Courses and Credits.")
9) Credits: a total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. (Note "Non-credit courses below.")
10) Physical education: completion of the university requirement (two one-credit non-academic courses). Please note that physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester. (See p. 13.)
11) Application to graduate. (See below under "Graduation.")

Foreign Language Requirement

The faculty considers competence in a foreign language essential for an educated person. Studying another language helps students understand the problematics of language itself, our fundamental intellectual tool, and more fully opens another culture for exploration. The sooner a student acquires competence, the more useful it will be. Hence, work toward the foreign language requirement should be undertaken in the freshman and sophomore years. Courses in foreign languages and/or literature are taught in the College of Arts and Sciences by the following departments: Africana Studies and Research Center, Asian Studies, Classics, German Studies, Near Eastern Studies, Romance Studies, and Russian Literature.

The language requirement may be satisfied in one of two ways:

1) by attaining *proficiency* (competence at the intermediate level) in one language

or

2) by attaining *qualification* (mastery of an introductory seuqence) in two languages.

Proficiency

Proficiency may be attained in languages by passing an intermediate (usually 200-level) Cornell course (or Chinese or Japanese 161). Some introductory language courses are taught at the 300- or 400-level (for example, Near Eastern Studies 333–334); these do not confer proficiency. Proficiency can also be earned by examination. A score of 4 or 5 on an AP *language* exam earns three credits but does not carry with it proficiency. However, a student who received a score of 4 or 5 on an AP language exam can earn proficiency and an additional three credits by scoring high enough on the CASE (Cornell Advanced Standing Examination), which is given during orientation week. On the other hand, a score of 4 or 5 on an AP *literature* exam in French, German (German offers a combined language/literature exam), or Spanish earns proficiency, as well as three credits. Students with those scores should also take the CASE to see if they can earn an additional three credits. Students with appropriate scores on Cornell Language Placement tests or SAT II examinations are also eligible to take the CASE (see chart below). Native speakers and writers of a language other than English may earn proficiency and 6 credits by taking the CASE exam or an individual exam (if no CASE exam is available).

Qualification

Qualification may be attained in any of the following ways:

1) Three years of high school study in any one language gives qualification in that language. No demonstration of competence is necessary. Note, however, that this route to qualification does not guarantee entrance into an intermediate level course. Students who want to continue studying the language must be placed in the appropriate course through an examination. Being placed below the intermediate level does not cancel the qualification.
2) Passing the requisite Cornell course: 102, 123, or 134 in most languages; Chinese 110, 112, or 114; Japanese 160; Korean 102 or 110; Near Eastern Studies 102 in Hebrew, 112 in elementary Arabic; 118 in Elementary Turkish; Classics 103 or 104 in Greek, 106 or 107 in Latin; 132 in Sanskrit; AS&RC 134 in Swahili.

   Note: Except in the case of Sanskrit, completion of language sequences 131–132 does not constitute qualification.
3) A score of 600 in French, 580 in German, and 590 in Italian or Spanish on the SAT

II taken in high school or a score of 56 or higher on the appropriate Cornell LP (Language Placement) test.

Students may earn a score of 56 on the placement test at the end of a course numbered 122 (second semester of the introductory sequence) and consequently attain *qualification* without taking 123, the third semester of the introductory sequence. However, with a score of 56, it may be worthwhile to take 123.

4) By departmental or (when no placement test is available) individual examination at Cornell.

Placement in Language Courses and Advanced Placement Credit

Placement into language courses and advanced placement credit are separate results of examinations.

Placement

Entering students who have had two or more years of high school study in a language, who have been awarded credit for language work at another college or university, or who are native speakers, bilingual, or have spoken the language at home, may enroll in a course in the same language only after being placed by examination. The placement exam may have been taken in high school (SAT II, taken after the last course, or AP, if the score was 4 or 5) or at Cornell (LP test). Students may, but need not, retake a language test if a year or more has passed since last taking it. Being placed into a 200-level course does not earn credit toward the degree. Credit is earned only for high school work equivalent in level to language courses numbered 200 and above at Cornell.

Placement Tests and Advanced Placement Credit

The type of test depends upon the language and the student's level of achievement:

1) Eight languages offer scheduled placement and advanced standing tests at the beginning of each semester: Chinese, French, German, Italian, Japanese, Korean, Russian and Spanish. The schedule is available from Callean Hile, Department of Romance Studies, 283 Goldwin Smith Hall, CLH2@conrell.edu; it is also posted on the Web at: http://dml.cornell.edu/html/place/testschedule.html. Please note that the advanced standing examination in French, German, Italian, Russian, and Spanish, is called the CASE: Cornell Advanced Standing Examination. Eligibility for the CASE may be determined from the placement tables below. In Russian only, *all* students seeking placement take the CASE.

   Native speakers of Spanish who have completed their secondary education in a Spanish-speaking country do not take the CASE. For these students, the Spanish program offers a walk-in service, the Native Language Accreditation for Spanish, in the third week of September and the first week of February. Students interested in this service should contact either David Cruz de Jesús or Eleanor Dozier in 323 Morrill Hall. Spanish-English bilinguals who do not fit the definition of "native speakers," and whose test scores make them eligible, should take the CASE.

French

Placement Tests		*Language*	*Literature*

*Students who have a score of 65 of higher on the LPS, or 690 or higher on the SAT II, or an AP score of 4 or 5 may enroll in Spanish 200, 201, 203 or 213 without taking the CASE.

2) Arabic: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

3) Greek, Ancient and Modern: departmental examination, Department of Classics, 120 Goldwin Smith Hall.

4) Hebrew: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

5) Latin: departmental examination, Department of Classics, 120 Goldwin Smith Hall.

6) Persian: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

7) Turkish: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

8) Other languages: consult the list of contact persons, available from Callean Hile, Department of Romance Studies, 283 Goldwin Smith Hall, CLH2@conrell.edu; it is also posted on the Web at: http://dml.cornell.edu/html/place/contacts.html

Language Requirement Exemptions and Substitutions

Outright waivers of the requirement are never granted. However, rarely, but if appropriate, alternative courses are arranged. Legitimate requests for exemptions require evidence of inability to learn foreign languages in a classroom setting. Most students provide documentation of learning disabilities relating to foreign language acquisition (e.g., an auditory processing problem) to Student Disability Services, 234 Day Hall, 255–3976. Other students who may never have been tested for a disability reveal it through repeated and dedicated but vain attempts in formal language courses. A poor grade in a Cornell introductory langauge course or taking the LP exam repeatedly and unsuccessfully is not adequate evidence.

Students who wish to request a substitution for the normal requirement should meet with Dean Walbridge, Office of Admissions and Advising, 172 Goldwin Smith Hall. If Dean Walbridge determines that the request has merit, the student then meets with the Language Substitution Review Committee. This committee makes the final decision for or against a substitution. If a substitution is allowed, the committee then works with the student to select substitute courses.

Distribution Requirements

In satisfying the distribution requirements, students become acquainted with a broad range of subject matter and points of view among disciplines in the college and explore areas that may be entirely new to them. Although students may complete the requirements over the eight semesters, they can take advanced courses in subjects they find intriguing only if they have completed the introductory prerequisites.

Students must take a total of nine courses (of three or more credits each) for the distribution requirements: four courses from Groups 1 and 2 below, at least two of which are from Group 1 and at least one of which is from Group 2 (for example, one chemistry, one physics, one geology, and one mathematics); five courses from Groups 3 and 4 below, with at least two in each group and two in the same department (for example, one course in sociology, one in history, one in history of art, and two in theater arts). Courses in the major may be applied to the distribution requirements.

1. Physical and Biological Sciences

In fulfilling the science distribution requirement, students must take at least one course from the primary list of courses and may select additional courses from the supplementary list.

Primary list:

Astronomy: all courses *except* 233

Chemistry: all courses

Geological Sciences: all courses

Physics: all courses

Biological Sciences: all courses *except 152, 200 (unless permission of the associate director is obtained), 208, 209, or 367.* The following courses are especially suitable for the distribution requirement because they have no prerequisites: 101–104, 105–106, 107–108, 109–110, 154, 170, 184, 192, 202, 207, 212, 240, 241, 264 plus 266, 275. *Note that introductory biology can count for distribution only when completed as a two-semester sequence: 109–110, 105–106, or 101 and 103 plus 102 and 104, or 107–108, or a combination of the first term of one sequence and the second term of another.*

Supplementary list:

Animal Science: 100, 150, 212

Anthropology: 101, 208, 275, 371, 390, 474, 490

Applied and Engineering Physics: 110

Biology and Society: 301

Entomology: 212

Food: 200

Materials Science and Engineering: 277

Natural Resources: 201, 210, 301

Nutritional Science: 115

Plant Breeding: 225

Psychology: 223

Soils, Crops, and Atmospheric Sciences: 131, 231

2. Quantitative and formal reasoning

Biometry and Statistics: 215

City and Regional Planning: 320

Computer Science: 100, 211, 212

Economics: 319, 320, 321

Industrial & Labor Relations: 210, 211

Linguistics: 216

Mathematics: all courses *except* 101 and 109

Operations Research & Industrial Engineering: 115

Philosophy: 231, 331, 431, 436

Physics: 205, 209, 210

Psychology: 350

Sociology: 301

If students choose two courses from this list to satisfy part of the distribution requirement, those two courses may not have significant overlap. For example, students may not choose two beginning courses in statistics.

Under exceptional circumstances and upon petition, certain Cornell courses not listed above under Group 2 (courses such as those appearing on the following auxiliary list) may be used to satisfy the requirement in quantitative and formal reasoning. The petition should provide a persuasive rationale both in terms of the student's course of study and in terms of meeting the goals of the requirement.

Auxiliary list: Agricultural Economics 310; Agricultural Engineering 151; City and Regional Planning 321; Industrial and Labor Relations 312; Linguistics 421, 450; Psychology 472–473 (a sequence of two two-credit courses which may count only in its entirety as one course)

3. Social sciences and history

Africana Studies: 171, 172, 191, 204, 205, 220, 231, 271, 280, 283, 290, 300, 301, 311, 352, 370, 380, 381, 410, 420, 451, 459, 475, 478, 479, 483, 484

American Studies: 101, 102, 201, 202, 320

Anthropology: all courses except 101, 208, 275, 371, 390, 451, 452, 453, 474, 490

Archaeology: 100, 201, 202, 203, 204, 263, 275, 317, 353, 355, 362, 370, 405, 409, 458, 466, 467, 469, 493, 494

Asian Studies: courses in Asian anthropology, economics, government, history, linguistics, or sociology

Asian American Studies: 110

Biology and Society: 301, 342, 407, 427

City and Regional Planning: 100, 101

Cognitive Studies: 101, 201

Economics: all courses *except* 317, 318, 319, 320, 321

Engineering: 250, 292

Government: all courses

History: all courses

Linguistics: all courses *except* 131, 132, 236, 238, 251, 252, 315, 316

Near Eastern Studies: 244 and all other courses in Near Eastern archaeology and history

Psychology: all courses except 223, 307, 322, 324, 326, 332, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492

Religious Studies: 150, 203, 239, 244, 248, 251, 257, 258, 263, 264, 265, 320, 322, 335, 345, 350, 365, 368, 393, 442, 443, 451, 459

Science and Technology Studies: 201, 233, 250, 281, 282, 287, 292, 311, 350, 352, 355, 360, 391, 401, 407, 427, 433, 442, 444, 447, 467, 483, 490, 645, 687

Sociology: all courses except 301

Women's Studies: 206, 210, 211, 214, 218, 220, 227, 234, 238, 244, 269, 273, 277, 281, 285, 305, 307, 321, 344, 353, 357, 362, 368, 378, 380, 384, 406, 408, 416, 426, 438, 442, 444, 450, 455, 458, 459, 466, 467, 477, 478, 479, 493, 612

4. Humanities and the arts

Africana Studies: 202, 210, 211, 265, 285, 303, 304, 310, 422, 425, 431, 432, 435, 455

American Studies: 101, 102, 201, 202, 324

Anthropology: 290, 451, 452, 453, 455

Archaeology: 100, 221, 309, 321, 351, 352, 357, 366, 380, 423, 434, 435, 520, 629

Asian Studies: 208, 211, 212, 215, 218 and other courses in Asian art, literature, religion, or culture

Asian American Studies: 110

Biology and Society: 205, 206

Classics: courses at the 200-level and above in Classical civilization, art, and archaeology; Classical languages at the 200-level and above

Comparative Literature: all courses

English: all courses at the 200-level and above

French Literature: all courses (not language courses)

German Studies: all courses except 121, 122, 123, 204, 205, 206, 303, 304, 305, 306

History of Art: all courses

Italian Literature: all courses *except* 205 (not language courses)

Music: one course of at least three credits, *excluding* musical performance, organizations, and ensembles. If a student chooses to satisfy part of the distribution requirement with more than one music course, an acceptable sequence may include four credits in musical performance, organizations, or ensembles combined with introductory, theory, or history and culture courses. (Students may count performance credits as only one course toward distribution.)

Near Eastern Studies: courses in Near Eastern civilization or literature, including 244 and language courses at the 200-level and above

Philosophy: all courses *except* 191 and courses in logic

Religious Studies: 101, 197, 198, 213, 223, 227, 229, 230, 231, 234, 239, 244, 250, 251, 252, 255, 262, 295, 297, 315, 328, 332, 333, 334, 337, 342, 344, 347, 350, 351, 352, 354, 355, 357, 358, 359, 360, 362, 395, 410, 420, 441, 449, 473, 531

Russian Literature: all courses

Science and Technology Studies: 205, 206, 286, 381, 384, 389, 390, 481, 681

Spanish Literature: all courses (not language courses)

Theatre, Film and Dance: all 3- or 4-credit courses at the 200-level or above *except* technical production studios

Women's Studies: 210, 211, 249, 251, 252, 263, 264, 294, 320, 341, 348, 349, 355, 358, 363, 370, 374, 381, 403, 404, 409, 413, 427, 431, 433, 445, 447, 448, 451, 461, 464, 465, 468, 470, 471, 475, 476, 481, 486, 491, 492, 493, 530, 594, 661

Restrictions on Applying Courses to the Distribution Requirements

1) Advanced Placement Credit and Credit from Other Institutions

Students may apply up to two courses of approved advanced placement or transfer credit towards distribution requirements in Groups 1 and 2 (physical/biological sciences and quantitative/formal reasoning), as long as they take at least one course from the primary list in science at Cornell. Transfer credit applied to distribution in Group 2 (quantitative/formal reasoning) must be in mathematics or computer science; it may not be in other quantitative subjects, for example, statistics or logic.

Students may apply no advanced placement or transfer credit from other institutions toward satisfaction of the distribution requirements in Groups 3 and 4 (social sciences/history and humantities/arts).

Students who transfer to the college from another institution or who enter through the Mid-Year Freshman Program are under the above rules for advanced placement credit, but are eligible to have credit for post high school coursework taken at their previous institution count towards all distribution requirements. Transfer students receive a detailed credit evaluation when they are accepted for admission.

2) Freshman writing seminars may not count towards any distribution requirement.

3) No single course may satisfy more than one distribution requirement. However, students may count courses in their major towards distribution. Courses offered or cross-listed by their major department may not be counted towards any distribution category beyond the usual category of the major department itself. For example, a history major may not count a course cross-listed between history and a literature department towards distribution in the humanities.

Breadth Requirements

Students must include in their undergraduate curricula at least one Arts and Sciences course that focuses on an area or a people other than those of the United States, Canada, or Europe, and one course that focuses on an historical period before the twentieth century. (Arts and Sciences courses about Native American cultures may count toward the geographic breadth requirement if they focus on the cultures themselves and not on interaction with European cultures.) Courses that satisfy the geographic breadth requirement are marked with an @ when described in this catalog. Courses that satisfy the historical breadth requirement are marked with a #. Many courses satisfy both requirements, and students may in fact use the same course to satisfy both. Students may use courses satisfying distribution, major, or elective but not writing requirements in satisfaction of either of the breadth requirements. They may also apply Cornell courses conferring proficiency in a non-Western language toward the geographical breadth requirement. They may not apply advanced placement or credit awarded by examination or, for students matriculating as freshmen (with the exception of students entering through the Mid-Year Freshman Program), transfer credit to either of the breadth requirements.

The Major

In their last two years, students devote roughly one-half their time to acquiring depth and competence in a major subject. The choice of major does not define a student's intellect or character or lead directly to a lifetime's occupation, although it sometimes does some of each. By majoring, students focus and develop their imaginative and intellectual capacities through a subject they find especially interesting.

Most departments and programs specify certain prerequisites for admission to the major; they are found in the department and program descriptions on the following pages.

Students may apply for acceptance into the major as soon as they have completed the prerequisites. To apply, they take a copy of their transcript to an appointment with the director of undergraduate studies in their prospective major. Students must be accepted into a major before the beginning of the junior year. A department or program may refuse admission into the major if the applicant's performance does not meet established standards. A student without a major at the beginning of the junior year is not making satisfactory progress toward the degree, must meet with an advising dean, and may not be allowed to continue in the college.

Available majors

Majors are offered by each of the departments. There are also majors in American studies, archaeology, biology and society, religious studies, Russian and East European studies, science of earth systems and women's studies.

Some students want to pursue an interest that cannot be met within an established major. They may plan, with the help of their faculty adviser, an independent major that includes courses from several departments. See "Independent Major Program," below, under "Special Academic Options." Whatever the major—chemistry, math, philosophy, or music—graduates from the College of Arts and Sciences earn the one degree the college awards, a Bachelor of Arts.

Double Majors

Only one major is required for graduation. Some students choose to complete two majors. No special permission or procedure is required; students simply become accepted into both majors and find an adviser in each department. Both majors will be posted on the official transcript.

Electives

Of the 34 courses and 120 credits required for graduation, almost one-third are free electives. How students use these electives frequently makes the difference between an ordinary and a truly interesting course of study. Students must complete at least four courses and at least 15 credits offered outside the major field and not used to fill another requirement. AP credits not otherwise used may be used to fulfill elective requirements. Students may group electives to form a concentration separate from their major or even apply them to a second major. Since only one major is required, students may count courses in a second major as electives. Some students choose to explore a variety of subjects; some develop a concentration in a department or subject outside Arts and Sciences to gain practical training or specialized knowledge.

Residence

The College of Arts and Sciences is primarily a residential college for students who devote their energy and spirit to full-time study. The faculty believes that integrated, full-time study for a defined period best promotes intellectual and creative development and best prepares people for citizenship and careers.

Consequently, eight semesters of full-time study in the College of Arts and Sciences are integral to earning the A.B. degree. Even if the minimum requirements can be met in fewer semesters, the faculty of the college expects students to take advantage of the resources of the university for eight full terms and obtain as rich and advanced an education in the liberal arts and sciences as possible.

Transfer students from other institutions must spend a minimum of four semesters on the Cornell campus in Ithaca enrolled in the College of Arts and Sciences. Transfers from other colleges at Cornell must spend four semesters on campus in Ithaca as students in the Internal Transfer Division or in the college.

Approved study abroad, SEA Semester, Urban Semester, and Cornell-in-Washington are considered semesters of residence, but not as semesters on the Cornell campus. Nonetheless, students may spend no more than two semesters on such programs and must be on campus during their last semester.

Semesters of extramural study in the Division of Continuing Education and Summer Sessions do not count as semesters of residence.

Freshmen occasionally enter with credit from other institutions, take leaves and complete courses at other institutions, or take summer courses at other institutions. The college will accept credit for such courses, if they are comparable to courses offered by departments at Cornell and are approved by those departments (approval forms are available in the Academic Advising Center, 55 Goldwin Smith Hall). Students may not, however, count such credit as part of the 100 credits required in the College of Arts and Sciences or use such credit to replace a term of residence. Students may not leave the college after fewer than eight semesters of residence and complete their undergraduate degrees with credits earned at other institutions or as part-time or summer students at Cornell.

Acceleration

Some students decide that they do not need eight semesters of residence to obtain a solid undergraduate education. These students should compress the first four semesters and spend four full semesters in the major. Benefitting from opportunities for advanced, seminar, and independent (sometimes honors) work is what best characterizes undergraduate education in the college. Students considering acceleration should discuss their plans with their major advisor.

Accelerants apply to graduate two semesters before their intended new graduation date. They must obtain an "Application to Graduate" in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

1. Accelerants must meet either condition *a* or *b*:
   a. Complete 60 credits before the beginning of the last four semesters and complete the prerequisites for admission to the major in time to spend *four* semesters in the major.
   b. Pass 48 credits in College of Arts and Sciences courses numbered "300" and above. Upper-level courses taken in other colleges at Cornell University may count as College of Arts and Sciences credit only if approved for the major.
2. All accelerants are required to complete 100 credits at Cornell at "C" or above. Courses completed with a grade of "S" will count toward the 100 credits. Advanced placement credits do not count towards this requirement.
3. Students may not use credits earned while on leave of absence to reduce their terms of residence.
4. Accelerants may not finish the degree with credits earned in summer or winter session, through part-time study (unless they meet the guidelines for part-time study), or at an off-campus program, including Cornell-in-Washington, SEA Semester, Urban Semester, or study abroad. That is, they may not exit through any program other than a regular, full-time Cornell semester in Ithaca.

Students matriculating as freshmen may not compress their undergraduate education into fewer than six semesters of residence. Transfer students, both from other institutions and from other colleges at Cornell, must spend at least four semesters in the college on campus in Ithaca.

Ninth term

Students who can graduate in eight semesters should do so. If a worthy academic plan for a full ninth or tenth semester is approved, the student enrolls in the college as a special student for the additional work. Such a status allows enrollment in a full schedule of courses for full tuition and full use of campus resources, but allows financial aid only from loans or outside agencies, not from Cornell funds. Students who need only a part-time schedule of courses in a ninth or tenth term in order to graduate should complete the outstanding courses as part-time students paying pro-rated tuition. Students may spend a ninth term with Cornell aid only with permission of the Committee on Academic Records. Such permission is normally granted only to:

1. Students who have been ill or have an exceptionally compelling academic plan.
2. Students attracted late to a field with a hierarchical curriculum (for example, physics).
3. Students who were academically underprepared for the curriculum at Cornell and needed to begin with a lighter schedule of courses than normal. (See Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, about this option.)

Part-time Study

Students in good academic standing may take a personal leave of absence and enroll in the Division of Continuing Education, but such semesters of part-time study do not count as terms of residence and credits from such semesters may not be used to reduce the terms of residence.

Part-time study in special circumstances

The college and university support students (with financial aid and services) as best they can to make full-time study possible. Occasionally, however, extraordinary but non-financial personal, academic, or medical circumstances make becoming a part-time student necessary and appropriate. Students in good academic standing who face extraordinary situations or who have documented disabilities may petition the Committee on Academic Records for part-time status and proration of tuition in the college.

Students requesting part-time status should discuss their situation with Dean Walbridge if their reason is a documented disability that, under the Americans with Disabilities Act, requires appropriate accommodations. Otherwise, students should meet with the dean of their class.

Part-time study in final semester

Students may complete their degrees as part-time students at Cornell after fewer than eight semesters of full-time residence only if:

1) They have completed all requirements by the end of the sixth or seventh term, met the criteria for accelerated graduation, and are remaining to complete study beyond what is required for the degree.
2) They have received permission to accelerate, but have been forced to drop or delay a course for reasons beyond their control.
3) They are writing an honors thesis in the eighth semester and can complete all degree requirements by taking two courses, one of which is the thesis itself. They must register for the thesis and at least one additional course.

In all cases, approval of the dean of seniors must be sought in the semester *prior* to the part-time semester and the student must be enrolling for no more than 8 credits.

Courses and Credits

Counting courses and credits

Students must complete at least 34 courses to graduate—that is, an average of four courses during each of six semesters and five courses during each of two semesters. A three- or four-credit course counts as one course; a two-credit course counts as one-half course. Single-credit courses do not count as part of the 34 except in certain cases when they form a part of a series and two in the same series can be aggregated to count as one-half course (certain offerings in the Departments of Music and of Theatre, Film and Dance). Three one-credit courses do not aggregate to count as one course. A six-credit language course counts as 1 1/2 courses, while the summer Falcon Programs in Asian languages count as ten credits and 2 1/2 courses each. Archaeology and geology fieldwork for more than six credits count as two courses each. Biology 281 counts as 1 1/2 courses. Other five- or six-credit courses count as one course. AP exam scores that result in an award of 3 or 4 credits count as one course; those in language that result in 6 credits count as 1 1/2 courses; those in biology that result in 6 credits count as two courses; those that result in an award of 8 credits count as two courses.

Students must also complete 120 credits, 100 of which must be from courses taken in the

College of Arts and Sciences. Liberal arts courses approved for study abroad during a semester or academic year of full-time study (not summer study) and courses taken in certain off-campus Cornell residential programs may be counted toward the 100 credits required within the college and also toward the required 34 courses. Credits earned in other colleges at Cornell, or in any subject at U.S. institutions other than Cornell, do not count as part of the 100 nor, for students matriculating in Fall 1994 or after, do advanced placement credits count as part of the 100. The only exceptions are for courses (usually no more than three) that certain departments accept from other colleges at Cornell as fulfilling major requirements and for no more than two courses that an advisor accepts as part of a completed and established cross-college, inter-disciplinary concentration.

Using courses towards more than one requirement

A course may fulfill more than one college requirement, under the following conditions:

1) A course may be used to fulfill a distribution requirement and also a major requirement.
2) A one-semester course in foreign literature (not language) that is acceptable for achieving proficiency in that language may also be used as a partial fulfillment of the distribution requirement in the humanities and the arts.
3) Courses may count toward breadth requirements and toward any other requirement except Freshman Writing Seminars.
4) Courses in a second major may count as electives.

Auditing

The college encourages its students to take advantage of its rich curriculum by sitting in on courses that interest them but that they cannot commit themselves to for credit. As long as the instructor agrees, students are welcome to visit courses. Small seminars and language courses are sometimes not open to visitors. Audited courses do not appear on the student's schedule or transcript.

Repeating courses

Students occasionally need to repeat courses. If the instructor certifies that the course content has been changed, credit will be granted a second time. If the content has not changed, both grades will appear on the transcript and will be included in any average that is calculated, but credit will be counted toward the degree only once; students considering repeating a course under this circumstance should discuss the matter with their adviser and an advising dean. Students who plan to repeat a course submit a petition to the college registrar. If the original course grade was F, no petition is necessary.

Non-credit courses

The college does not grant credit toward the degree for every course offered by the university. Courses in remedial or developmental reading, high school mathematics, supplemental science and mathematics offered by the Learning Strategies Center, keyboarding, shorthand, military training, training as emergency medical technician and service as a teaching assistant are among those for which degree credit is not given and that do not constitute part of the 12 credits required for good academic standing.

Students enrolled in courses for undergraduate teaching assistants may petition once to have the non-degree credits count towards good academic standing. This would allow continued eligibility for graduating with distinction in all subjects, but would disqualify the student from being on the dean's list that semester.

Examples of non-credit courses:

All courses numbered below 100 (with the exception of Computer Science 099)

All courses in Military Science, Naval Science, and Aerospace Studies

A&LS 134

Biology G 498

Communications 498

Education 498

Engineering 470

Hotel Administration 170

Human Development and Family Studies 403

Human Ecology 100, 101

Human Service Studies 403, 454

Mathematics 109

Nutritional Science 403

Psychology 498

Advanced placement credit

See p. 5. Advanced placement credit counts as part of the 120 credits and 34 courses required for the degree. It does not count as part of the 100 credits required in Arts and Sciences; its application to distribution requirements is restricted, as explained above under Distribution.

Summer session credit

A student may earn credit toward the degree by completing courses in Cornell's summer session or by petitioning to take summer courses at other colleges. Students should consult their advisers regarding summer study plans.

Credit for summer courses not taken at Cornell must be approved by the appropriate Cornell department. Approval forms and information are available in the Academic Advising Center, 55 Goldwin Smith Hall and from Robin Perry, Office of Admissions, 172 Goldwin Smith Hall. Credit earned in summer courses other than those at Cornell will not count toward the 100 credits required in the college (including summer or orientation programs abroad) and may be applied only to part of the Group 1 and 2 distribution requirements. Transcripts from other institutions must be sent to Robin Perry, 172 Goldwin Smith Hall.

Entering students who want to receive credit toward the degree for courses completed during the summer before matriculation in a summer session away from Cornell should obtain approval forms as soon as possible and have transcripts sent to Robin Perry, 172 Goldwin Smith Hall, during the summer before matriculation. Credits completed in Cornell summer sessions will be awarded automatically.

Summer session at Cornell or elsewhere does not count toward the eight-semester residence requirement.

Transferring credit earned away from Cornell while on leave of absence

Students may petition to transfer credits from other accredited institutions for work completed while on leave of absence. Petitions are available in 55 and 172 Goldwin Smith Hall. The relevant department will decide whether the course is comparable to Cornell courses. Credit approved for transfer counts as part of the 120 required for graduation and as part of the 34 courses. It does not count among the 100 credits required in Arts and Sciences and cannot be used toward graduation in fewer than eight semesters. Its application to distribution and breadth requirements is restricted as described above under Distribution.

Transferring credit (for transfer students from another institution or from another Cornell college)

Transfer students must successfully complete at least 60 credits and 16 courses at Cornell; they must be in residence in the college for four regular semesters (summer session does not count toward the residence requirement). The college evaluates credit earned either at another school or college at Cornell University or at another accredited institution of collegiate rank, including advanced placement credit awarded by those colleges, and determines the number of credits and courses the student may apply toward the various requirements for the Bachelor of Arts degree at Cornell. Evaluations of transfer credits are normally provided when students are notified of their admission.

Physical Education

See "University Requirements for Graduation," p. 13. The college does not count physical education credit toward the 120 credits required for graduation, nor toward the twelve credits required for good academic standing each semester.

SPECIAL ACADEMIC OPTIONS

Degree Programs

The following five programs allow students to work toward more than one degree or to alter the regular college or major requirements.

Independent Major Program

The Independent Major Program allows students to design their own interdisciplinary majors and pursue a subject that cannot be found within an established major. Proposals for an independent major must be equivalent in coherence, breadth, and depth to a departmental major, well suited to the student's academic preparation, and consistent with a liberal education. Proposals must also be supported by a faculty adviser and are assessed by a board of faculty members. Independent majors substitute for established majors, but students must still satisfy all the other requirements for the baccalaureate degree. Students should contact the director of the Independent Major Program, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall, for further information. Deadlines for submitting independent major proposals are listed below on the calendar supplement for the College of Arts and Sciences.

College Scholar Program

The College Scholar Program frees up to forty students in each class from the usual college requirements for a degree and allows them to design their own course of study. It is meant to serve students whose interests and talents would benefit from a little more academic freedom than other students have, who demonstrate exceptional promise, and who show the maturity to plan and carry out, with the help of their adviser, a well-designed program of studies. College Scholars do not all design the same kind of program: some, for instance, pursue diverse interests, while others integrate a variety of courses with a common theme.

College Scholars must complete 120 credits of course work (100 in the college), 34 courses, and, unless they receive permission from the program to accelerate, eight full terms of undergraduate study. They must complete the physical education requirement. All College Scholars must complete a senior project. They are not required to complete or fulfill the general education requirements, although members of the College Scholar Advisory Board believe that the spirit of those requirements is a good one.

Each applicant to the College Scholar Program is asked to write an essay, which is due the last Wednesday in April of the freshman year. Mid-year freshmen apply by that date in their first spring semester in the college. Students should contact the the director of the program, Office of Undergraduate Admissions and Adivising, 172 Goldwin Smith Hall, for further information.

Dual-Degree Program with Other Colleges

The Dual-Degree Program enables especially ambitious undergraduate students to pursue programs of study in two colleges. Dual-degree candidates may earn both a Bachelor of Arts degree from the College of Arts and Sciences and (1) a Bachelor of Science degree from the College of Engineering or (2) a Bachelor of Fine Arts degree from the Department of Art in the College of Architecture, Art, and Planning or (3) a Bachelor of Science degree in urban and regional studies from the Department of City and Regional Planning in the College of Architecture, Art, and Planning or (4) a Bachelor of Science degree in architectural history from the Department of Architecture in the College of Architecture, Art, and Planning. Students enter one of these colleges as freshmen or sophomores and begin the Dual-Degree Program with the second college in the second or, in some cases, the third year. The Dual-Degree Program ordinarily takes five years to complete, and students are eligible for five years of financial aid. For further information contact the Office of Admissions, 172 Goldwin Smith Hall.

Double Registration with and Early Admission to Professional Schools

Registration in the senior year of the College of Arts and Sciences and the first year of Cornell Law School, Cornell Medical College, or the Johnson Graduate School of Management, is occasionally possible. A very few exceptionally well-prepared students who have earned 105 credits before the start of the senior year and have been accepted by one of the above-named professional schools may be permitted to register simultaneously in the college and in one or another of these professional schools during the seventh and eighth terms. They earn the A.B. degree after the first year of professional school.

Students with eight or fewer credits and two or fewer courses to complete may apply to enter the Master's of Engineering program during (but no earlier than) the eighth semester; dual-degree students may enter this program no earlier than the ninth semester. They earn the bachelor degree(s) after one semester of graduate school.

Students interested in the joint program with the Law School or the Graduate School of Management, or in early admission to the Master's of Engineering program should apply to the relevant program. Students interested in the joint program with Cornell Medical College should contact the health careers coordinator, 203 Barnes Hall. All candidates should confirm their eligibilty with the dean of seniors, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Double-registered students must, of course, complete all requirements for the A.B. degree, including 100 credits in Arts and Sciences courses.

Teacher Education in Agriculture, Mathematics and Science

Students at Cornell may pursue teaching credentials in agriculture, biology, chemistry, earth science, general science, mathematics, and physics. Teacher Education in Agriculture, Mathematics and Science (TEAMS) is a university program jointly conducted by the departments of education and mathematics. Although TEAMS offers options for undergraduate and graduate study, most students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching degree (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates, usually during their sophomore year.

For more information, contact the TEAMS student support specialist at 255–9255 or D. Trumbull, 255–3108.

Special-Interest Options

The following options do not alter the college's requirements but enable students to pursue special interests within the usual programs.

Informal Minors

Some students organize electives within a discipline or department. Such informal minors can be developed with the help of the departmental directors of undergraduate studies, but are not noted on the transcript.

Concentrations

Established interdisciplinary concentrations, described in the pages following the descriptions of the departments and their curricula, provide structures for organizing electives. Completed concentrations are noted on the transcript.

Independent Study

Independent study affords students the opportunity to pursue special interests or research not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the independent course, must approve the program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study (proposal forms are available in the Academic Advising Center, 55 Goldwin Smith Hall). In one semester students may earn up to six credits with one instructor or up to eight credits with more than one instructor.

Undergraduate Research Program

An excellent way to benefit from being an undergraduate at a research university, at Cornell in particular, is to become an apprentice in on-going faculty research. About 400 students participate each year in creating new knowledge and earn independent study credit for what they learn and contribute. They sharpen their critical and creative abilities and test their interest in pursuing a research career. Sometimes they publish their work.

The Undergraduate Research Program gathers information about research opportunities in most disciplines of the liberal arts and sciences, guides students in finding further opportunities—both on campus and elsewhere, and both during the academic year and during the summer—and helps students prepare for research and presenting themselves as candidates for apprenticeships. Other students locate research opportunities independently through faculty whose courses they have taken, through their major departments, or through published materials.

The Cornell Undergraduate Research Board, an undergraduate organization, conducts an annual open house to help students get started in research and an annual forum at which undergraduates present their work.

Students interested in this program should see Dean Williams, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

Language Study

FALCON (Full-Year Asian Language Concentration). FALCON allows students who are interested in the Far East to study Chinese, Indonesian, or Japanese exclusively for one year. They gain proficiency in the language and familiarity with the culture. Students who are interested in the Far East should be aware of the opportunities to pursue rapid and thorough beginning studies on campus with the objective of studying abroad later—in China, Japan, or Southeast Asia. Students interested in this program should contact the Department of Asian Studies, Rockefeller Hall; e-mail: falcon@cornell.edu.

Language House Program

A complement to classroom cultural and linguistic instruction, the Language House Program combines residential and academic opportunities for developing and practicing conversational skills in French, German, Italian, Japanese, Mandarin Chinese, Russian, and Spanish. It helps prepare students who plan to study abroad and helps returning students share their cultural experiences while further increasing their language skills. Students interested in this program should see Academic Administrator Daniel Evett, 136 Goldwin Smith Hall.

Prelaw Study

Law schools neither require nor prefer any particular program of study; they do seek students with sound training in the liberal arts and sciences. It is important that students plan a program in which they are interested and do well. Beyond that, students are advised to take courses that will develop their powers of precise, analytical thinking and proficiency in writing and speaking.

The college offers a concentration in law and society. Students should work toward completion of this concentration because they find it interesting, not because they will impress law schools.

The adviser for students in the College of Arts and Sciences who are applying to law school is Dean Cox, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Premedical Study

The breadth and depth afforded by a liberal arts education are invaluable for people who plan medical careers, whether they intend to practice or go into research. Such training has a profound effect on the doctor's usefulness to patients, and it affords the flexibility of mind that is needed for major research undertakings. Medical and dental schools do not prescribe or even prefer a particular major; they do, however, require particular undergraduate courses, and most students are well advised to begin chemistry in their freshman year. Students who are interested in medical careers are urged to visit the Health Careers Office, 203 Barnes Hall.

The adviser for students in the College of Arts and Sciences who are planning careers in medicine is Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

Off-Campus Programs

Many students find it important to their majors or to their overall academic programs to study off campus or abroad for one or two semesters. When it makes academic sense, the college encourages its students to pursue such studies and grants credit toward the degree for work satisfactorily completed.

Study Abroad

All students planning to study abroad apply through Cornell Abroad; please see the Cornell Abroad program description in the introductory section of *Courses of Study*.

Each year about 200 undergraduates in Arts and Sciences include semester- or year-long study abroad as part of their formal undergraduate education. Ideally, study abroad builds upon a broad liberal arts background in the early semesters: area studies, language training, and preparation in the proposed field of study are all essential.

The college insists wherever possible on study at foreign institutions alongside their degree candidates rather than study in self-contained programs that offer courses specially designed for foreigners. The primary goals of this educational immersion are to learn firsthand the modes of inquiry, methods of analysis, and educational values of higher education offered to students of another country and to involve students in social relationships with peers who may hold a new and unexpected range of social attitudes.

Many students go abroad to pursue work in their majors. Focused academic work in an appropriate institution abroad can prepare students for advanced study or honors work in the final semesters back in Ithaca.

The college advocates study abroad that enables students to become competent enough in another language to experience daily life, develop social relationships, and accomplish formal course work in that language. **Students who intend to study abroad in a country where the host language is not English must demonstrate a serious commitment to learning the language through course work before studying abroad; proficiency in the language is generally the prerequisite.** At least one area studies course or one course in the history, culture, economics, politics, or social relations of the country of destination must be part of every student's preparation for study abroad.

Students planning to study abroad need solid academic credentials to do so productively and successfully. The college requires a minimum overall grade point average of 3.0 for all Cornell course work and good academic standing in the semester immediately before going abroad.

Study abroad is possible during the sophomore and junior years or during the first semester of the senior year. Study abroad in the final semester is rarely approved. Important steps to prepare for study abroad include

- substantial progress with college distribution requirements;
- admission to a major and a faculty adviser in the major;
- clear academic agenda for study abroad;
- appropriate study of the country or region of destination, especially language study.

Study abroad can earn up to 15 liberal arts and sciences credits per semester of full-time course work as long as the curriculum abroad is consistent with that of the college. A maximum of 10 credits is awarded for each trimester of study. Courses that fall outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those with compelling academic reasons may study in more than one location over two semesters. The college does not approve study abroad that tours more than one country or that is more touristic than scholarly in content and structure. Students must continue study of the host language while abroad. Only in exceptional circumstances will the college approve programs which, in non-English speaking countries, provide no language training.

All courses taken abroad will appear on the Cornell transcript and grades earned are reported in the system of the host institution. Grades earned through course work abroad do not, however, become part of the Cornell grade point average.

Students who transfer to Cornell must complete a minimum of four semesters of residence on campus in Ithaca and may not study abroad during one of those four semesters.

Applications to study abroad must have the support of a faculty adviser in the major and the approval of Dean Chametzky in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith. Although students investigate options for study abroad and submit final applications through the Cornell Abroad office, Arts and Sciences applicants submit to the college an essay describing the academic rationale for study abroad, an outline of prospective courses to be taken and any other relevant materials.

Summer Residential Programs in Archaeology

During the summer months students may participate in a Cornell-sponsored archaeological project. In recent years the program has organized archaeological projects in Central America, Greece, Israel, Italy and New York State. Students should contact the Archaeology Program for information about the sites currently available.

Marine Science

Shoals Marine Laboratory is a seasonal field station that offers a variety of courses and experiences designed to introduce undergraduates to the marine sciences. The laboratory is located on Appledore Island, six miles off the Maine/New Hampshire coasts. Students should contact the Office of Undergraduate Biology for further information.

Cornell-in-Washington

The Cornell-in-Washington program offers students from all colleges within the university an opportunity to earn full academic credit for a semester in Washington, D.C. Students take courses from Cornell faculty, conduct individual research projects, and work as externs. The Cornell-in-Washington program offers two study options: 1) studies in public policy, and 2) studies in the American experience. The program also offers unique externship opportunities: students serve as externs in a federal agency, congressional office, or non-governmental organization and take part in a public policy or humanities seminar. They define and carry out individual research projects under the supervision of Cornell faculty. Potential externships are arranged through, and approved by, the Cornell-in-Washington program. For further information, see p. 20 or inquire at 471 Hollister Hall, 255–4090. Seniors who wish to study in Washington during their final semester must petition the college for permission to do so; they should first consult with the dean of seniors, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Fieldwork

Sometimes it is appropriate for students to include fieldwork as part of their major. A three-member faculty committee helps the student plan the project, arranges for ongoing supervision, and evaluates the project at the end of the term. Fieldwork almost always involves writing a long paper or several short ones, as well as practical experience. All proposals for fieldwork must be presented in advance to the Committee on Academic Records for approval. A maximum of 15 credits in fieldwork may be earned. For further information students should contact an advising dean in Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

ADVISING

The following advisers and offices provide academic advising or information on college procedures and regulations.

Faculty Advisers

Each new student is assigned a faculty adviser. Advisers help students plan programs of study and advise them about ways to achieve their academic goals. Advisers may also help students with study or personal problems or may direct them to other offices on campus where help is available. Academic difficulties may frequently be solved or avoided if students and advisers recognize and address problems early.

Advisers and new advisees meet first during orientation week to discuss course selection. New students are encouraged to see their advisers again early in the term, before it is too late to drop courses, to discuss their academic program and to become better acquainted. Advisers and advisees meet at least once each semester to discuss courses for the following term and whenever advisees wish to petition for an exception to college rules.

Student Advisers

Student advisers pass on lore about the college's requirements, courses, instructors, and about life at Cornell.

Major Advisers

After acceptance into a major, students are assigned a major adviser, a faculty member in the major department, with whom they shape and direct their course of study. The adviser eventually certifies the completion of the major. The major adviser should be consulted by the student about all academic plans, including honors, study abroad, acceleration, and graduate study. The adviser's support is especially important if a student petitions for an exception to the requirements for the degree.

Office of Undergraduate Admissions and Advising

This office, 55 Goldwin Smith Hall, 255–5004 and 172 Goldwin Smith Hall, 255–4833, offers resources for faculty and student advisers and for students themselves and their parents. Advising deans are available to help students define their academic and career goals and to help with special academic options and exceptions to college rules:

Lynne S. Abel, college scholar and independent major programs—255–3386

Robert Chametzky, sophomores and study abroad—255–5004

Gerry Cox, seniors, pre-law students, and national scholarships—255–4833

Ken Gabard, freshmen—255–5004

Lawrence Lamphere, internal transfers and minority students—255–4833

Maria S. Terrell, student advisors and ambassadors, Dean's scholars and Cornell research scholars—255–5004

Janice Turner, minority and pre-med students—255–5004

Peggy Walbridge, transfers and students with disabilities—255–4833

Catherine Wagner, juniors and mid-year freshmen—255–4833

Marilyn Williams, undergraduate research, careers, academic integrity—255–5004

REGISTRATION AND COURSE SCHEDULING

Enrollment in Courses in the College of Arts and Sciences

New Students

During orientation week, new students attend briefings and other information sessions, meet with faculty advisers, and sign into courses. The college reserves spaces in courses for its in-coming students.

Continuing Students

Continuing students select and schedule up to five courses during the semester prior to the one in which the courses will be taken. Students who do not "pre-register" during the designated period must wait until the beginning of the term and may have difficulty securing places in the courses they most want. Before signing into courses, students plan their programs and discuss long-range goals with their faculty advisers. In addition, all students are welcome to discuss programs and plans with an advising dean in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, or 172 Goldwin Smith Hall.

At the beginning of each term, students find their schedules and should confirm the accuracy of their records on "Just the Facts."

Limits on Numbers of Courses and Credits

To meet the 34-course requirement, students must normally take four courses during each of six semesters and five courses during each of two semesters. To meet the 120-credit requirement, students must average 15 credits per semester. (AP credit and/or summer credits may reduce the numbers of courses and credits.)

Minimum number of credits per semester

To maintain good academic standing as a full-time student, students must enroll in at least twelve credits per semester; if for compelling personal or academic reasons students need to carry fewer than twelve credits, they should consult their faculty adviser and an advising dean. Permission is by petition only; it is freely given for first-semester students.

Maximum number of credits per semester

First-term freshmen must petition to register for more than eighteen credits; other students may register for more than eighteen credits only if their previous term's average was 3.0 or higher. No more than twenty-two credits may be taken in a regular semester without permission of the Committee on Academic Records. Students who fail to receive approval for excess credits from the committee run the risk of having only 18 credits for the semester count toward the degree.

Attendance

Attendance in classes is a matter between students and their instructors. If a student cannot attend classes because of illness or family crisis, the Office of Undergraduate Admissions and Advising will notify instructors at the request of the student or the family. Nonetheless, the student must arrange to make up examinations or other work with each instructor. A student who will be absent because of religious holidays or athletic competitions must discuss arrangements for making up work with his or her instructors well in advance of the absence. A student who must miss an examination must also consult with the professor in advance. Alternative arrangements are at the discretion of the instructor.

Adding and Dropping Courses

After course enrollment (pre-registration), students may not adjust their schedules until the new term begins. During the first three weeks of the semester, students may change courses without petitioning. Add/drop forms are available in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

After the third week of classes, students must petition to add courses. They may drop courses up to the seventh week of the term. Between the seventh and twelfth weeks students may petition to withdraw from courses, if (1) the instructor approves; (2) the adviser approves; (3) no issue of academic integrity is at stake; and (4) an advising dean approves. Students must meet with an advising dean to obtain petition forms.

Courses dropped after the seventh week will be noted on the transcript by a "W" where the grade would normally appear. No petitions to withdraw from courses may be submitted after the end of the twelfth week in the term. Deadlines for short courses will be adjusted according to the length of the courses.

Leaves of Absence

Taking time off from college to explore goals and direction, or to gain experiences or funds, is sometimes useful. Students in good academic standing who take a leave before the end of the seventh week of the semester are welcome to register in the college the following semester. Five years is the maximum length of time a student may be on leave and return without special permission. Leaves of absence are of four types:

1) *Personal leaves* impose no conditions concerning reentering the college except for the five-year limit. Readmission is automatic upon written request made at least one month before the beginning of the term in which the student wishes to return.

2) *Medical leaves,* usually for at least six months, are granted by the college only upon recommendation by a physician from University Health Services. In some cases, students must satisfy the UHS that the condition requiring the leave has been corrected before they may return. The student's academic standing will also be subject to review at the time of the leave and upon return.

3) *Conditional leaves* may be granted by an advising dean if the student is not in good academic standing or, in unusual circumstances, after the seventh week of the term. Normally students may not return from conditional leaves for at least two terms or until specific and individual

conditions, such as completing unfinished work, have been met.

4) *Required leaves:* The Committee on Academic Records may require a leave of absence if a student is not making satisfactory progress toward the degree. See the section "Academic Actions."

Any student who wishes to take a leave of absence should consult an advising dean in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. On readmission, the student's graduation date will be recalculated.

Students who take courses elsewhere while on leave may petition to have credits transferred and applied toward the 120 credits needed for graduation, but not toward the 100 credits required in the college. Approval depends on acceptable grades and the judgment of the relevant departments about the quality of the courses. Credits earned during a leave do not count toward the eight semesters of residence and may not be used to reduce the terms of residence. See the section "Residence."

Withdrawals

A withdrawal is a permanent severance from the university and from status as a degree candidate. Students planning to withdraw should consult an advising dean. Students not requesting a leave and failing to register for a term will be withdrawn from the college. The Committee on Academic Records may require a student to withdraw for a highly unsatisfactory academic record.

Transferring within Cornell (Internal Transfer)

Internal transfer from one college or school at Cornell into another is attractive for many students whose intellectual interests change. Students who want to transfer should discuss their eligibility with a counselor in the new school or college.

In some cases, students who want to transfer into the College of Arts and Sciences may transfer directly. In other cases, they may be referred to the Internal Transfer Division. During the term immediately preceding transfer into the College of Arts and Sciences, students should complete at least 12 credits of courses in the College of Arts and Sciences with a B average and without any grades of *Incomplete*, any S-U grades (unless only S-U grades are offered for that particular course), or any grades below C. Satisfying this minimum requirement does not, however, guarantee admission. Admission to the college is based on consideration of the student's entire record at Cornell and the high school record, not just the work of one semester. Interested students should see Dean Lamphere, 172 Goldwin Smith Hall.

ACADEMIC STANDING

Students are in good academic standing for the term if they successfully complete at least 12 degree credits by the end of the term and earn no more than one D and no F or U grades. If a student completes only three courses, all grades must be above D. In addition, students are expected to make acceptable progress toward satisfying requirements for the degree and to earn grades of C (not C–) or better in at least 100 of the total credits for the degree. Courses listed above under "Noncredit courses" do not count towards good academic standing.

Academic Actions

Students who are not in good academic standing will be considered for academic action by the faculty Committee on Academic Records or by one of the deans of the college. Those being reviewed for academic action are urged to present evidence that will help explain their poor academic performance. Students may appeal a decision or action of the committee if they have new relevant information. They must consult an advising dean about appealing.

Warning

Any student who fails to maintain good standing will, at a minimum, be warned. The warning may be given by an advising dean or by the faculty Committee on Academic Records. A warning is posted on a student's college record but is not reported to the university registrar and does not appear on official transcripts.

Required leave of absence

A student in serious academic difficulty may be required by the Committee on Academic Records to take a leave of absence, normally for a full year. Usually, but not always or necessarily, the Committee on Academic Records warns students before suspending them. Before being allowed to return and reregister in the college, students must describe what they did on leave and how they resolved their problems and submit a plan for completing the degree. In some cases students will be required to furnish evidence that they are ready to return or satisfy other conditions before being allowed to reregister in the college. Students who request to return in less than a year must present to the committee extraordinarily convincing evidence of their readiness to return. "Required leave" and the date are posted on the student's official transcript.

Required withdrawal

The Committee on Academic Records may dismiss a student from the college because of a highly unsatisfactory record for one term or for failure to make satisfactory overall progress in grades, credits, or the requirements of the major. This action expels the student permanently from the college. "Required withdrawal" and the date are posted on the student's official transcript.

Academic Integrity

Cornell's Code of Academic Integrity and policy about acknowledging the work of others are among the documents new students receive. Students should read them carefully rather than assume they understand what integrity and cheating are and are not. Academic integrity implies more here at the university than it usually did in high school. The standards of integrity are those that prevail in professional life. This means that students must acknowledge and cite ideas they adopt from others (not just direct quotes) and help they receive from colleagues. With emphases on collaborative learning and writing, students must understand the general standards and policies about academic integrity and be sure they understand the expectations in individual courses as well. When in doubt, ask your instructor.

Forgery on Forms

Forging signatures or credentials on college forms is an academic offense; sometimes it constitutes academic fraud. In all cases of forgery on academic forms, the effect of the forged documents shall be negated. Students may then petition properly to do whatever they attempted to do improperly. Such incidents will be recorded in the Academic Integrity Hearing Board confidential file for forgeries. If a student forges more than once or if the forgery would advance the student's academic standing unfairly or fraudulently, or if for any other reason the situation requires some response in addition to the uniform penalty, the Academic Integrity Hearing Board might make a different recommendation, such as a notation on the student's transcript, suspension, or dismissal.

GRADES

Letter Grades

See Grading Guidelines, page 12.

S-U Grades

The S-U (satisfactory-unsatisfactory) option allows students to explore unfamiliar subjects or take advanced courses in subjects relatively new to them without being under pressure to compete with better prepared students for high grades. It is not meant to allow students to reduce the amount of work they complete in a course or the amount of effort they devote to it. The S-U option is contingent upon the instructor's willingness to assign such grades. Students must select their grading option and obtain the instructor's approval for the S-U option during the first three weeks of the term (virtually no exceptions to this deadline are permitted). A grade of S is equivalent to a grade of C– or higher; a grade of U, which is equivalent to any grade below C–, is a *failing* grade equal to an F. S means the student receives the credit specified for the course. U means no credit is given. A few courses in the college are graded exclusively S-U; in that case, the final grade appears on the transcript as SX or UX.

Courses that will count toward satisfaction of major requirements should not be taken for an S or U grade unless the department grants permission. Students may elect the S-U option in courses used to satisfy the distribution, language, and elective requirements, provided that such courses do not also count toward major requirements or serve as prerequisites for admission to the major. Students are advised to use the S-U option sparingly if they intend to apply to graduate school or for transfer to another college. There is no limit on the number of courses each term for which students may elect the S-U grade, but within the 120 credits required for the degree, a minimum of 80 credits must be in courses for which a letter grade was received.

Grades of Incomplete

A grade of incomplete signifies that a course was not completed before the end of the term for reasons beyond the student's control and acceptable to the instructor. Students must have substantial (more than 50%) equity in the course; that is, they must be able to complete the remaining work without further registra-

tion and must have a passing grade for the completed portion. When a grade of incomplete is reported, the instructor submits a form stating what work must be completed, when it must be completed, and the grade (or "frozen" incomplete) earned if the work is not completed by that date. When a final grade is reported, it is recorded on the official transcript with an asterisk and a footnote explaining that this grade was formerly an incomplete.

Students must resolve (make up or "freeze") any incompletes with their instructors before graduation.

R Grades

R designates two-semester or year-long courses. The R is recorded on the student's transcript at the end of the first term. The grade recorded at the end of the second term evaluates the student's level of performance in the course for the entire year. The total of credits earned for the whole course is listed each term.

Grade Reports

Students should periodically check their courses and grades on "Just the Facts" to be sure that they are recorded correctly.

Class Rank

The college does not compute class rank.

Dean's List

Inclusion on the Dean's List for academic excellence is an honor bestowed by the dean of the college semester by semester. Based on grades, the criteria include about the top 30 percent of students and vary with the number of credits the student completes. The criteria are subject to slight changes from semester to semester and are available in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

GRADUATION

The Degree

The College of Arts and Sciences grants only one degree (no matter what the student's major): the A.B. (or B.A.). A.B. is the abbreviation of the Latin name for the degree, "Artium Baccalarius," or translated into English, B.A., "Bachelor of Arts."

Application to Graduate

In the first semester of their senior year, students attend senior briefings and then complete an application to graduate. The application allows the college to check each student's plan for fulfilling college requirements. This process is intended to help seniors identify problems early enough in the final year to make any necessary changes in course selection to satisfy those requirements. *Nonetheless, meeting graduation requirements is the student's responsibility;* problems that are discovered, even late in the final term, must be resolved by the student before the degree can be granted.

Degree Dates

There are three degree dates in the year: May, August, and January. Students who plan to graduate in August may attend graduation ceremonies in the preceding May. Students graduating in January are invited to a special recognition ceremony in December; they may also attend graduation ceremonies the following May.

Honors

Bachelor of Arts with Honors

Almost all departments offer honors programs for students who have demonstrated exceptional ability in the major and who have completed original independent research. The honors programs are described by individual departments in the following sections. The degree of Bachelor of Arts with honors will be conferred upon students who, in addition to having completed the requirements for the degree of Bachelor of Arts, have satisfactorily completed the honors program in their major and have been recommended for honors by their major department, the Independent Major Program, or the College Scholar Program. Concentrations do not offer honors programs.

Bachelor of Arts with Distinction

The degree of Bachelor of Arts with distinction in all subjects will be conferred on students who have completed the requirements for the degree of Bachelor of Arts, if they have met the following requirements by the end of their final semester:

1) completed at least 60 credits while registered in regular sessions at Cornell;
2) ranked in the upper 30 percent of their class at the end of the seventh semester, or next-to-last semester for transfers and accelerants;
3) received a grade below C– in no more than one course;
4) received no failing grade;
5) maintained good academic standing, including completing a full schedule of at least 12 credits, in each of their last four terms; and
6) have no *Incompletes* remaining on their records.

CALENDAR SUPPLEMENT

All of the dates in the university calendar at the front of this volume apply to all Cornell students. Listed below are some additional dates that are of importance for students in the College of Arts and Sciences.

	Fall 1999	*Spring 2000*
Last day for adding courses without petition.	Sept. 17	Feb. 11
Last day for changing grade option to S-U or letter.	Sept. 17	Feb. 11
First deadline for submitting independent major requests. Go to Academic Advising Center, 55 Goldwin Smith Hall, for further information.	Sept. 28	Feb. 22
Last day for dropping courses without petition.	Oct. 15	March 10
Last day to petition to withdraw from a course.	Nov. 19	April 21
Second deadline for submitting independent major requests. Go to Academic Advising Center, 55 Goldwin Smith Hall, for further information.	Nov. 30	April 5
Deadline for requesting internal transfer to the College of Arts and Sciences for the following term.	Dec. 1	May 1
Deadline for applying to the College Scholar Program.		April 26
Deadline for applying to study abroad.	See Cornell Abroad, 474 Uris Hall	
Course enrollment (pre-registration) for the following term.	TBA	TBA

ADMINISTRATION

Philip E. Lewis, dean—255–4146

Biddy Martin, senior associate dean—255–4147

Lynne S. Abel, associate dean of admissions and undergraduate education—255–3386

Thak Chaloemtiarana, associate dean—255–7061

Jane V. Pedersen, associate dean of administration—255–7507

Courses and Departments

SPECIAL PROGRAMS AND AREAS OF CONCENTRATION

The college offers a number of interdisciplinary programs described in the section following the departmental program descriptions.

AFRICANA STUDIES MAJOR

See Special Programs and Interdisciplinary Studies.

AKKADIAN

See Department of Near Eastern Studies.

AMERICAN STUDIES

See Special Programs and Interdisciplinary Studies.

ANTHROPOLOGY

P. S. Sangren, chair; T. Volman, director of undergraduate studies; R. Ascher, T. Bestor, J. Borneman, J. Fajans, D. Greenwood, J. Henderson, D. Holmberg, B. J. Isbell, A. T. Kirsch, B. Lambert, K. March, V. Munasinghe, N. Russell, V. Santiago-Irizarry, J. Siegel, M. Small, T. Turner. Emeritus: J. Murra, R. Smith.

Anthropology is one of the most diverse disciplines in the university. Spanning human evolution, the development and heterogeneity of language and culture, human history, and the diversity of cultures past and present, the field has broad scope, utilizes a variety of methods, addresses basic issues about human origins and human life, and maintains commitment to understanding social life and using this understanding to improve society. Anthropology is an ideal "liberal arts" major. It also serves as a major that, when well designed by the student with their adviser, prepares students for a wide range of professional careers, e.g., law, medicine, foreign service, social services, and business, among others.

Courses for non-majors: Anthropology welcomes non-majors into many of its courses. Unless prerequisites are explicitly stated, 200- and 300-level courses do not have formal prerequisites and can be taken by students without prior experience in anthropology. Such students are welcome in these upper-level courses. For additional information to assist non-majors and students from other colleges in selecting anthropology courses, see the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/).

The Major

The range and complexity of the field of anthropology requires active collaboration between the student and a faculty adviser in developing an individualized program of study. To enter the anthropology major, a student must pass one course in each of the two broad introductory areas of anthropology: "Nature and Culture" and "Culture and History" listed below under the heading "Introductory Courses." Provisional acceptance into the major is possible before completing these courses, with permission from the Director of Undergraduate Studies in anthropology. When students first enter the major, they work with their adviser to develop a preliminary program of study built around their own interests and goals.

In the first semester of the junior year, the student and adviser formalize a concentration reflecting the special interests of the student and select a set of courses from those listed below as a program of study. Once the concentration is developed, they submit the plan to the Anthropology Curriculum Committee for comment and advice. Examples of possible concentrations are Latin American ethnohistory and contemporary identity politics, nature and culture in human history, prehistory of the Americas, anthropology and literature, anthropology and social change, ethnomusicology, anthropology and the arts, etc. The plan must include a minimum of eight courses in anthropology (including an Anthropology Senior Seminar) totaling 32 credit hours. When warranted, the adviser is free to approve up to two cognate courses from other departments totaling up to eight credit hours to fill this eight-course requirement. Students may revise their program of study in consultation with their adviser as they move through their studies. Our goal is to provide a close and supportive advising relationship and a strong and coherent structure for the student's major.

In their senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively, the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus, the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

Study abroad and off-campus study programs: the Department of Anthropology encourages students to consider a semester of study abroad or off-campus study developed as an integral part of the student's major concentration and has designated Professor Viranjini Munasinghe as the Anthropology Study Abroad adviser.

The Cornell-Nepal Study Program: the Cornell-Nepal Study Program is a joint program of Cornell University and Tribhuvan University, the national university of Nepal. Qualified juniors, seniors, and first-or second-year graduate students work with faculty from both universities to prepare for and undertake field research projects in Nepal. Students receive 15 credits per semester; students may enroll for either fall or spring semester, or for the entire year; application is through Cornell Abroad. For further information, consult David Holmberg or Kathryn March in the Department of Anthropology.

Other antropologically-relevant study abroad options, using existing Cornell Abroad and off-campus options, can be worked out in consultation with the major adviser, the Anthropology Study Abroad adviser, and Cornell Abroad.

Honors

Honors in anthropology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. Anthropology majors interested in the Honors Program should consult the chair of the Honors Committee in their junior year. To qualify for entrance into the Honors Program, a student must have at least a 3.0 GPA overall and 3.3 GPA in the major, and the consent of a faculty member in anthropology who will guide the honors thesis. After applying to the program and being admitted as a candidate by the Honors Committee, the student will conduct research and write a thesis. This thesis will be evaluated by the faculty research adviser and two other faculty members. Honors (i.e., cum laude, magna cum laude, or summa cum laude) are awarded based on the quality of the thesis and the student's overall record. Honors candidates must start this process by consulting their major adviser about the honors program early in their junior year.

While working on the thesis during the senior year, students should make use of the Senior Seminar as a place to develop the ideas for their thesis. In addition, students may enroll in Anthropology 483 (fall or spring) "Honors Thesis Research." To complete the thesis, students must enroll in 491 (fall or spring) "Honors Thesis Write-up." Only Anthropology 483 may count toward hours for completion of the anthropology major requirements. The credit hours for these courses are variable, grades for these courses are given by the faculty research adviser, and they are based on performance during thesis research and writing.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

Special Programs and Facilities

Collections: the department has an extensive collection of archaeological and ethnological materials housed in the anthropology collections. A limited number of students can make arrangements to serve as interns in the anthropology collections. Olin Library houses some of the most extensive collections of materials on the ethnology of Southeast Asia, South Asia, East Asia, and Latin America to be found anywhere in the United States. The biological anthropology laboratory (McGraw B65) houses an extensive collection of materials for teaching purposes, including 1) human skeletal remains, 2) articulated skeletons and cranial casts of primates, and 3) casts of important fossils in the human lineage.

Independent Study: specialized individual study programs are offered in Anthropology 497, Topics in Anthropology, a course open to a limited number of juniors and seniors who have obtained consent and supervision of a faculty member. Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

Colloquia: the Department of Anthropology holds colloquia almost every week of the semester on Friday at 3:30 in McGraw 215. Faculty members from Cornell and other universities participate in discussions of current research and problems in anthropology. Students are encouraged to attend.

For more complete information about the anthropology major, see the Director of Undergraduate Studies, pick up a copy of the major brochure (which includes descriptions of the courses not offered during 1999–2000), or visit the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/).

I. Introductory Courses

A. Nature and Culture:

ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind

Fall. 3 credits. M. Small.

The evolution of humankind is explored through the fossil record, studies of the biological differences among current human populations, and a comparison with our closest relatives, the primates. This course investigates the roots of human biology and behavior with an evolutionary framework. Fee for lab usage and maintenance, $5.

ANTHR 103 The Scope of Anthropology
Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102. S-U grades only. Staff.
This course is intended for majors or prospective majors in anthropology. Each week a different member of the faculty in anthropology at Cornell will make a presentation on the nature of their work within the field and discuss their interests with students. The course is meant to introduce the range of approaches found within anthropology and help students in planning future course work.

ANTHR 203 Early People: The Archaeological and Fossil Record (also Archaeology 203) #
Spring. 3 credits. T. Volman.
A survey of the archaeological and fossil record of human evolution. Contributions by researchers from a variety of disciplines are highlighted, as are the discoveries that have enlivened the study of human evolution for more than a century. Critical evaluation of evidence and interpretation will be stressed. Demonstrations and films supplement the lectures.

ANTHR 211 Nature and Culture @
Spring. 4 credits. S. Sangren.
Sociocultural anthropology, because it encompasses the comparative study of humankind in society, provides a unique vantage on the nature of humanity. One of the focal questions of the discipline is the relationship between the physical/biological, the symbolic/biological, and the symbolic/moral worlds in which people live. This inquiry places anthropology squarely at the center of social theory, as most social theories and political ideologies are founded on premises regarding human nature. Through study of several conceptual categories which have been flashpoints for debates about nature and culture (e.g., gender, race, and sexuality), this course examines a variety of past and current attempts to explain the relationships between nature and culture in human life.

[ANTHR 275 Human Biology and Evolution (also Biological Sciences 275 and Nutritional Sciences 275)
Fall. 3 credits. Not offered 1999–2000.]

B. Culture and History:

ANTHR 100 Introduction to Archaeology (also Archaeology 100) #
Fall. 3 credits. J. Henderson.
A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks archaeologists use to reconstruct them. This course can serve as a platform for both Archaeology and Anthropology undergraduate majors.

ANTHR 102 Introduction to Anthropology: The Comparison of Cultures @
Spring. 3 credits. T. Bestor.
An introduction to cultural anthropology through ethnographies, or the descriptive accounts of anthropologists. Through readings and lectures, students acquaint themselves with a number of cultures from several parts of the world. The cultures range in form from those of small-scale tribal societies to those of state societies. Throughout the course, we attempt to make sense of exotic cultures in their own terms. Attention is focused on variation in cultural patterns as they are expressed in social, economic, and ritual practices. In this encounter, the principles of anthropology as a comparative enterprise that pose distinct cultural systems in relief will be developed. Fiction, films, and exercises supplement the formal anthropological materials.

ANTHR 103 The Scope of Anthropology
Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102. S-U grades only. Staff.
For course description, see section I.A.

ANTHR 200 Cultural Diversity and Contemporary Issues @
Fall. 3 credits. Staff.
This course will introduce students to the meaning and significance of forms of cultural diversity for understanding contemporary issues. Drawing from films, videos, and selected readings, students will be confronted with different representational forms that portray cultures in various parts of the world and they will be asked to critically examine their own prejudices as they influence the perception and evaluation of cultural differences. We shall approach cultures holistically, assuming the inseparability of economies, kinship, religion, and politics, as well as interconnections and dependencies between world areas (e.g., Africa, Latin America, the West). Among the issues considered: "political correctness" and truth; nativism and ecological diversity; race, ethnicity, and sexuality; sin, religion, and war; global process and cultural integrity.

[ANTHR 202 Interpretive Archaeology (also Archaeology 202) #
Fall. 3 credits. Not offered 1999–2000.]

[ANTHR 204 Ancient Civilizations (also Archaeology 204) @#
Fall. 3 credits. Not offered 1999–2000.]

ANTHR 215 Stone Age Art (also Archaeology 215) @ #
Fall. 3 credits. T. Volman.
When did "art," however defined, appear during the human career, how was it produced and for what purposes? These are some of the questions we will investigate through a survey of the discovery, validation, analysis, and interpretation of the earliest art. The course will cover a variety of finds from the Old World, including the well-known cave art of southwestern France and northern Spain, and also consider portable art and decoration. The contributions of new analytical techniques and interpretive approaches are highlighted.

[ANTHR 240 Old World Prehistory (also Archaeology 240) @ #
Fall. 3 credits. Not offered 1999–2000.]

II. Honors and Independent Study

ANTHR 483 Honors Thesis Research
Fall or spring. Credit and hours to be arranged. Prerequisite: consent of the Honors Committee. Staff.
Independent work under the close guidance of a faculty member selected by the student.

ANTHR 491 Honors Thesis Write-up
Fall or spring. Credit and hours to be arranged. Staff.

ANTHR 497 Topics in Anthropology
Fall or spring. Credit and hours to be arranged. Intended for undergraduate students only. Staff.
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

III. Anthropology Major Senior Seminars

In the senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively, the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

ANTHR 489 Anthropology Senior Seminar
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: anthropology majors only. Fall, V. Munasinghe; spring, D. Greenwood.
This course is a synthesis of each student's undergraduate concentration in the major. In collaboration, the instructor and the students will develop a series of topics representing the interests of the students. Students will be required to read extensively and present topics.

IV. Nature and Culture

Thinking about nature and culture and their interaction is central to contemporary anthropology. The courses in this section present a biological and evolutionary perspective on behavior, focus on the interplay between nature and culture, and discuss the controversies surrounding these relationships between these dimensions of human life.

[ANTHR 208 The Evolution of Human Mating
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 211 Nature and Culture @
Spring. 4 credits. S. Sangren.
For course description, see section I.A.

[ANTHR 344 Male and Female in Chinese Culture and Society (also Women's Studies 344) @
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 370 Environmental Archaeology (also Anthropology 670 and Archaeology 370/670)
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 371 Human Paleontology (also Biological Sciences 371) @ #
Fall. 4 credits. One year of introductory biology or Anthropology 101 or permission of instructor. Offered alternate years. K. Kennedy.
A broad survey of the fossil evidence for human evolution with special attention to

skeletal and dental anatomy, geological contexts, paleoecology, dating methods, archaeological associations, and current theories of human origins and physical diversity.

ANTHR 372 Hunters and Gatherers (also Anthropology 672) #
Spring. 4 credits. T. Volman.
A survey of contemporary and recent peoples with economies based completely or mainly on hunting and gathering. Selected societies from various parts of the world will be examined to compare aspects of technology, subsistence practices, organization and beliefs. The impact of contact with more economically advanced societies will be considered.

[ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 409 Approaches to Archaeology (also Anthropology 609 and Archaeology 409/609)
Fall. 4 credits. N. Russell.
An exploration of the concepts that have shaped modern archaeology. The course briefly examines the history of theoretical orientations in archaeology, then considers the variety of perspectives and interpretive frameworks that guide present-day investigations. Case studies illustrate the implications of the nature of the archaeological record for reconstructing subsistence and economic systems, trade, social and political organization, demography, and ideology. An undergraduate seminar especially recommended for undergraduate majors and graduate archaeologists but open to anyone with a serious interest in archaeology.

[ANTHR 475 Evolutionary Theory and Human Behavior (also Anthropology 675)
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 490 Primates and Evolution
Spring. 4 credits. Not offered 1999–2000.]

V. Human History and Archeology

Archaeology tells the story of human origins, the invention of farming and settled life, the rise of complex social institutions and technologies, and the worldviews of the past, while also teaching field and laboratory methods for uncovering the human past.

ANTHR 203 Early People: The Archaeological and Fossil Record (also Archaeology 203) #
Spring. 3 credits. T. Volman.
For course description, see section I.A.

ANTHR 215 Stone Age Art (also Archaeology 215) @ #
Fall. 3 credits. T. Volman.
For course description, see section I.B.

[ANTHR 240 Old World Prehistory (also Archaeology 240) @ #
Fall. 3 credits. Not offered 1999–2000.]

[ANTHR 317 Stone Age Archaeology (also Archaeology 317)
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 355 Ancient Mexico and Central America (also Archaeology 355) @#
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 370 Environmental Archaeology (also Anthropology 670 and Archaeology 370/670)
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 371 Human Paleontology (also Biological Sciences 371) #
Fall. 4 credits. One year of introductory biology or Anthropology 101 or permission of instructor. Offered alternate years. K. Kennedy.
For course description, see section IV.

ANTHR 372 Hunters and Gatherers (also Anthropology 672) #
Spring. 4 credits. T. Volman.
For course description, see section IV.

[ANTHR 405 Archaeological Research Design (also Anthropology 605 and Archaeology 405/605)
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 409 Approaches to Archaeology (also Anthropology 609 and Archaeology 409/609)
Fall. 4 credits. N. Russell.
For course description, see section IV.

[ANTHR 456 Mesoamerican Religion, Science, and History @ #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 458 Archaeological Analysis (also Anthropology 658 and Archaeology 458/658) @
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 463 Zooarchaeological Method (also Archaeology 463) #
Fall. 5 credits. Limited enrollment due to limited lab space. N. Russell.
This is a hands-on laboratory course in zooarchaeological method: the study of animal bones from archaeological sites. It is designed to provide students with a basic grounding in identification of body part and taxon, aging and sexing, pathologies, taphonomy, and human modification. We will deal only with mammals larger than squirrels. While we will work on animal bones from prehistoric Europe, most of these skills are easily transferable to the fauna of other areas, especially North America. This is an intensive course that emphasizes laboratory skills in a realistic setting. You will analyze an assemblage of actual archaeological bones. It is highly recommended that students also take the course in Zooarchaeological Interpretation (Anthr/Arkeo 464) offered in the spring of 2000.

ANTHR 464 Zooarchaeological Interpretation (also Archaeology 464) #
Spring. 4 credits. N. Russell.
This course follows from last semester's Zooarchaeological Method. We shift our emphasis here from basic skills to interpretation, although you will continue to work with archaeological bones. We will begin by examining topics surrounding the basic interpretation of raw faunal data: sampling, quantification, taphonomy, seasonality. We will then explore how to use faunal data to reconstruct subsistence patterns, social structure, and human/animal relations.

[ANTHR 466 Humans and Animals (also Anthropology 666 and Archaeology 466/666) #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 467 Origins of Agriculture (also Archaeology 467) #
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 469 Gender and Age in Archaeology (also Anthropology 669 and Archaeology 469/669) #
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 493 Seminar in Archaeology (also Archaeology 493) @ #
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also Archaeology 494) @ #
Fall. 4 credits. N. Russell.
An exploration of the archaeological record associated with early modern and near-modern humans as well as their non-modern contemporaries, such as the Neanderthals. Major issues include: what behaviors and capabilities are indicated for various populations, and how and why did these change over the course of the later Pleistocene? To what extent does the archaeological record support the "Out-of-Africa" hypothesis of a recent, African origin for all modern humans?

VI. Anthropological Thought and Method

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and a wide variety of anthropological approaches are presented, along with courses focused on the design of anthropological research projects.

ANTHR 215 Stone Age Art (also Archaeology 215) @ #
Fall. 3 credits. T. Volman.
For course description, see section I.B.

ANTHR 291 Filming Other Cultures (also Anthropology 691 and Theatre Arts 291/691) @
Spring. 3 credits. Limited to 20 students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, $35. R. Ascher.
Shortly after the first films were screened, their makers saw in motion pictures a promise for greater understanding among peoples. Was the promise fulfilled? In this discussion course, responses to this question are examined through the study of short, representative films and related readings. The discussions are framed and informed by ideas from anthropology and film studies. For example, we consider: aesthetics, ethics, and responsibility in filming and editing; connections between sound—or lack of it—and image; the implications of film as a product of Euroamerican culture; cultural assumptions in camera movements, film color, and film pace; indigenous people's presentations of themselves and Euroamerican representations of others; and the blurry, ever changing space that separates fiction from non-fiction film. For one meeting each week, two students, in cooperation with the instructor, are responsible for leading the discussion.

[ANTHR 306 Ethnographic Description
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 324 Anthropology Amongst the Disciplines
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 362 Democratizing Society: Participation, Action, and Research (also Anthropology 662)
Fall. 4 credits. D. J. Greenwood.
This course poses an alternative to distanced, "objectivist" social science by reviewing some of the numerous approaches to socially engaged research. Among the approaches discussed are those centering on the pedagogy of liberation, feminism, the industrial democracy movement, "Southern" participatory action research, action science, and participatory evaluation. There are no prerequisites and undergraduates are welcome.

[ANTHR 368 Marx: An Overview of His Thought (also Anthropology 668)
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 372 Hunters and Gatherers (also Anthropology 672) #
Spring. 4 credits. T. Volman.
For course description, see section IV.

[ANTHR 400 The Craft of Anthropology: Ethnographic Field Methods
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 405 Archaeology Research Design (also Anthropology 605 and Archaeology 405/605)
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 412 Contemporary Anthropological Theory @
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 420 Development of Anthropological Thought
Spring. 4 credits. B. Lambert.
An examination of the history and development of anthropological theory and practice. The course will focus on the differences and continuities among the various national and historical approaches that have come to be regarded as the schools of anthropology.

[ANTHR 453 Visual Anthropology
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 458 Archaeological Analysis (also Anthropology 658 and Archaeology 458/658) @
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 463 Zooarchaeological Method (also Archaeology 463) #
Fall. 5 credits. Limited enrollment due to limited lab space. N. Russell.
For course description, see section V.

ANTHR 464 Zooarchaeological Interpretation (also Archaeology 464) #
Spring. 4 credits. N. Russell.
For course description, see section V.

[ANTHR 466 Humans and Animals (also Anthropology 666 and Archaeology 466/666) #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 467 Origins of Agriculture (also Archaeology 467) #
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 474 Laboratory and Field Methods in Human Biology (also Biological Sciences 474)
Spring. 5 credits. Not offered 1999–2000.]

ANTHR 487 Field Research Abroad @
Fall or spring. Credit to be arranged. Intended for undergraduate students only. Staff.
Field research abroad as part of the Cornell-Nepal Studies Program, the Cornell-Honduras Program, or other departmentally-approved programs. Topics are selected and project proposals prepared by students in consultation with faculty. Fieldwork typically involves extended research (usually 4–6 weeks) in a foreign setting with faculty supervision, culminating in a major paper or report.

ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also Archaeology 494) @#
Fall. 4 credits. T. Volman.
For course description, see section V.

[ANTHR 495 Classic Theorists Seminar
Spring. 4 credits. Not offered 1999–2000.]

VII. Understanding Cultures

Anthropologists examine the diversity of human behaviors, social relationships and structures, economies, political and legal orders, worldviews, logics, languages, symbols, myths, and religions among the many other means human beings invent to create and reproduce social life around the world. Anthropologists work from a holistic perspective to account for differences and similarities across cultures. Anthropologists also take small-scale societies and local sociocultural systems as the object of analysis. They collect data primarily through ethnographic fieldwork, that is, months or years of participating in and observing of the societies they study. Anthropologists see inherent linkages between the practical and the meaningful dimensions of human existence.

A. Anthropological Approaches to Economy, Society, Law, and Politics:

The courses below take as their starting point what are usually defined as the social, political, legal, and economic practices and structures of human life and show how they are shaped culturally and how they shape culture.

ANTHR 217 Nationalism and Revivalism
Fall. 4 credits. A. Willford

[ANTHR 305 Emotion, Gender, and Culture (also Women's Studies 305) @
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 313 Anthropology of the City @
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 321 Sex and Gender in Cross-Cultural Perspective (also Anthropology 621 and Women's Studies 321/631) @
Fall. 4 credits. K. March.
An introduction to the study of sex roles cross-culturally and to anthropological theories of sex and gender. The course examines various aspects of the place of the sexes in social, political, economic, ideological, and biological systems to emphasize the diversity in gender and sex-role definition around the world.

ANTHR 323 Kinship and Social Organization @
Spring. 4 credits. B. Lambert.
Much of this course is a survey of forms of the family, descent groups, and marriage systems. The role of age and sex in the social structure is also considered. The last part of the course is devoted to a history of the British and American family and to its fate in utopian communities.

[ANTHR 326 Economic Anthropology @
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 328 Conflict, Dispute Resolution, and Law in Cultural Context @
Fall. 4 credits. V. Santiago-Irizarry.
Rule-making and dispute resolution are integral aspects of social reality in any culture. The ways in which conflict is treated and interpreted—to be then deflected or resolved—articulate with other cultural domains such as religion, politics, and economics as part of the material and symbolic processes that enable sociocultural interaction. At issue then are the formal and processual means that the treatment of conflict takes in different societies. These means constitute frames for the definition of social experience that are used by social actors in the interpretation of events within the terms of an overriding sociocultural logic that is in turn refigured by these interpretive frames.

[ANTHR 380 State, Nation, and Everyday Life
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 426 Ideology and Social Reproduction @
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 460 Culture and International Order
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 470 Anthropology, Theory, Politics, Performance (also Government 470)
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 479 Ethnicity and Identity Politics: An Anthropological Perspective
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 481 Sex, Money, and Power: Topics in Kinship Theory
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 485 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America (also Anthropology 685) @
Spring. 4 credits. Not offered 1999–2000.]

B. Interpretive Approaches in Cultural Anthropology:

These courses stress symbolic or textual approaches to human society. They take as their object of analysis structures of meaning in such diverse areas as performance and text, myth and religion, views of the self, gender, and the sociology of knowledge. These same topics arise in many of the area-focused courses as well (Section D), but take center stage in the following courses.

ANTHR 291 Filming Other Cultures (also Anthropology 691 and Theatre Arts 291/691) @
Spring. 3 credits. Limited to twenty students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, $35. R. Ascher.
For description, see section VI.

ANTHR 320 Myth, Ritual, and Symbol (also Religious Studies 320) @
Spring. 4 credits. D. Holmberg.
This course examines how systems of thought, symbolic forms, and ritual practice are formulated and expressed in primarily non-Western societies. It focuses on anthropological interpretations of space, time, cosmology, myth, classificatory systems (such as color, totems, food, dress, kinship), taboo, sacrifice, witchcraft, sorcery, and rites of passage (birth, initiation, marriage, death). It will examine both the roles of specialists (spirit mediums, curer, priests, ascetics, etc.) and nonspecialists in producing these cultural forms.

ANTHR 322 Magic, Myth, Science, and Religion (also Religious Studies 322) @
Fall. 3 credits (4 by arrangement with instructor). Staff.
Surveys various classic anthropological perspectives on the role of religion as a cultural system in human life. Magic, myth, and ritual as cultural markers of and solutions to endemic contradictions, tensions, and transitions are explored. We will ponder the role of science as cultural system and the present state and future prospects for religion in the "modern" and "post-modern" world.

ANTHR 379 Culture, Language, and Thought
Spring. 4 credits. V. Santiago-Irizarry.
The relationship among culture, language, and thought has been a core concern in anthropology. Language and culture are commonly defined as processes that are public and shared yet they also operate within and upon subliminal experiential realms. In this course we shall examine how anthropologists have explored this relationship, which is engendered in the interaction between culture and language as parallel mediating devices for the constitution, interpretation, and expression of human experience.

[ANTHR 406 The Culture of Lives (also Women's Studies 406) @
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 408 Gender Symbolism (also Women's Studies 408) @
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 417 Person, Gender, and Song (also Women's Studies 416) @
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 432 Culture and Performance, and Performing Culture @
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 453 Visual Anthropology
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 456 Mesoamerican Religion, Science and History @ #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 460 Culture and International Order
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 469 Gender and Age in Archaeology #
Spring. 4 credits. Not offered 1999–2000.]

C. Cultures in Anthropological Perspective:

Anthropology constructs its theories in the comparison of different social and cultural systems and thus depends integrally on knowledge about particular places. The courses below are all focused on the cultures and societies of particular areas of the world and organize knowledge about these areas in reference to key anthropological questions. Students without prior experience in anthropology are welcome in these courses.

[ANTHR 221 Anthropological Representation: Ethnographies on Latino Culture (also Latino Studies Program 221 and American Studies 221)
Fall. 3 credits. Not offered 1999–2000.]

ANTHR 224 The French Experience (also French Literature 224)
Fall. 3 credits. J. Siegel, A. Berger.
An examination of French society, culture, and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals and cinema. Looking attentively at texts, images, and contexts from selected moments in the eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience.

ANTHR 230 Cultures of Native North America @ #
Fall. 4 credits. B. Lambert.
A survey of the principal Eskimo and American Indian culture areas north of Mexico. Selected cultures will be examined to bring out distinctive features of the economy, social organization, religion, and worldview. Although the course concentrates on traditional cultures, some lectures and readings deal with changes in native ways of life that have occurred during the period of European-Indian contact.

ANTHR 280 Intercultural Ethnoscapes: Spain and America (also Latino Studies 280)
Fall. 3 credits. M. Buxo i Rey.
This course is based on combined research in Spain, the U.S. Southwest, and Latin America and takes advantage of combined work in cultural anthropology, ethnic and gender studies, and the long-term study of information systems. It is intended as an introductory course and does not assume background in anthropology. Readings will be in English.

ANTHR 303 Asians in the Americas: A Comparative Perspective (also Asian American Studies 303) @
Fall. 4 credits. V. Munasinghe.
The common perception of ethnicity is that it is a "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians"? On what basis can we label "Asians" an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies will focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

[ANTHR 316 Power, Society, and Culture in Island Southeast Asia @
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 333 Ethnology of the Andean Region @ #
Spring. 4 credits. B. J. Isbell.
Cultural continuities in the development of Andean societies. The ecological, archaeological, ethnohistorical, and contemporary ethnological record. The Andean heritage as a resource for "modernization."

ANTHR 335 Subsistence, Polity, and Worldview in Mainland Southeast Asia @
Spring. 4 credits. Limited to 12 students. Prior course work in Anthropology or Asian Studies encouraged but not required. Staff.
A survey of the peoples and cultures of Mainland Southeast Asia from prehistoric to contemporary times. The course examines the social-cultural implications of the subsistence forms found in the region: foraging, swidden horticulture, irrigated rice cultivation, capitalist developments, and current trends toward a globalized economic order. We examine how these subsistence forms relate to sustainable population size, societal complexity, and forms of governance ranging through "band" societies, "galactic polities" and contemporary "nation-states." The grounding of these forms of subsistence, governance, and social organizations in indigenous and supra-national religious values and worldviews is of special concern in the course.

[ANTHR 336 Change and Continuity in the Pacific Islands @
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 337 Gender, Identity, and Exchange in Melanesia
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 339 Peoples and Cultures of the Himalayas @
Spring. 4 credits. K. March.
A comprehensive exploration of the peoples and cultures of the Himalayas. Ethnographic materials draw on the lifeways of populations living in the Himalayan regions of Bhutan, India, Nepal, and Tibet. Some of the cultural issues to be examined through these sources include images of the Himalayas in the West, forms of social life, ethnic diversity, political and economic history, and religious complexity.

[ANTHR 343 Religion, Family, and Community in China @
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 344 Male and Female in Chinese Culture and Society (also Women's Studies 344) @
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 345 Japanese Society @
Fall. 4 credits. T. Bestor.
A survey of the patterns of social structure and cultural identity in contemporary Japan, including ethnographic perspectives on: family; community; individual lifecourse (including gender, education, career, and aging); workplace, markets and economic organization; and public culture.

[ANTHR 350 Topics in the Anthropology of Europe
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 355 Ancient Mexico and Central America (also Archaeology 355) @ #
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 377 The United States (also Latino Studies Program 377 and American Studies 377)
Fall. 4 credits. V. Santiago-Irizarry.
The anthropological inquiry into one's own culture is never a neutral exercise. This course will explore issues in the cultural construction of the United States as a "pluralistic" society. We will look at the ideological context for the production of a cultural profile predicted upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings will include historic documents and accounts, popular writing, and recent ethnographies on the United States.

[ANTHR 433 Andean Thought and Culture @ #
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 443 Religion and Ritual in Chinese Society (also Religious Studies 443) @
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 444 Japanese Social Organization @
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 456 Mesoamerican Religion, Science, and History @ #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 477 Ethnology of Island Southeast Asia @
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 493 Seminar in Archaeology (also Archaeology 493) @ #
Fall. 4 credits. Not offered 1999–2000.]

Relevant courses in other departments

ASIAN 601 Seminar: Indonesia
Fall. 4 credits. J. Siegel.

BIOPL 247 Ethnobiology
Fall. 3 credits. D. Bates.

BIOPL 348 The Healing Forest
Spring 2000. 2 credits. D. Bates, E. Rodriquez.

[BIOPL 442 Current Topics in Ethnobiology
Fall. 2 or 4 credits. Not offered 1999–2000. D. Bates, E. Rodriquez.]

GOVT 444 Afrocentism
Spring. 4 credits. M. Bernal.

GOVT 454 The Herodotean Moment: The Uses and Abuses of 'Western Civilization' (also History 454)
Spring. 4 credits. M. Bernal.

Spring. 3 credits. M. Hatch.

MUSIC 245 Gamelan in Indonesian History and Cultures
Fall or spring. 3 credits. M. Hatch.

MUSIC 445–446 Cornell Gamelan Ensemble
445 fall; 446 spring. 1 credit. Prerequisite: permission of instructor. M. Hatch.

NS/HD 347 Human Growth and Development: Biological and Behavioral Perspectives
Spring. 3 credits. J. Haas, S. Robertson.

VIII. Graduate Seminars

The graduate program in anthropology is described in much greater detail in the Graduate Program brochure which is available through the Director of Graduate Studies. This document is also found on the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/). The seminars described immediately below pertain to the program in socio-cultural anthropology. For information about graduate study in archaeology and biological anthropology, see the Anthropology Department web page.

A core set of seminars is required of all graduate students in socio-cultural anthropology: Anthropology 600, 601, and 602. Anthropology 603 is strongly recommended. These courses are open to graduate students from other related fields. This sequence, and the graduate curriculum in general, is premised on the idea that anthropology is best defined as the comparative study of human social life. This definition resists institutional pressures in the academy to distinguish social science from humanistic or cultural studies and scholarly from more worldly applications. Our most important method, ethnography, is at once scientific and humanistic; disciplinary aspirations refuse to view cultural interpretation and analytic explanation as separable values. Furthermore, theory in anthropology is directly related to practice in the world whether in relation to research or more action-oriented pursuits. Consequently, the core sequences as well as most other courses for graduate students are oriented explicitly toward subverting an ideological construction of social life as separable into cultural and social (or political-economic) domains.

ANTHR 600 Proseminar: Culture and Symbol
Spring. 6 credits. D. Holmberg.
This course focuses on an appreciation of symbolic, expressive, and representational forms and processes both as producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiology, etc., we will investigate how identity and meaning are linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course will endeavor to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlins, among others, as well as contemporary theories are given careful attention.

ANTHR 601 Proseminar: Social Organization
Fall. 6 credits. S. Sangren.
This course focuses on linkages between culture and social institutions, representations and practices. The nature of these linkages is debated from strongly contesting points of view in social theory (structuralist, poststructuralist, utilitarian, hermeneutic, Marxist). Unlike debates in critical theory where the form of contestation has been mainly philosophical, in anthropology, these issues have developed in ethnographic analyses. The course briefly surveys kinship theory and economic anthropology with a focus on implications for general issues in social theory. Discussion of attempts to develop dialectical syntheses around the motion of "practice" follows. The issues addressed in this section carry over into the next, colonialism and post-colonialism, in which poststructuralist readings of history are counterposed to Marxism ones. Finally, Lacanian and Marxist visions of ideology as they relate to anthropological theory and ethnographic analysis are examined with particular emphasis on the cultural and social production of persons.

ANTHR 602 The Practices of Anthropology
Fall. 4 credits. D. Greenwood.
The course builds on the foundation of the proseminars but broadens the concept of anthropological practices to include issues about the relations between theory and method, practice/theory relationships, the ethnography of anthropological practices themselves, the examination and critique of the concept of "participant observation," and a consideration of "ethical practices" in anthropology. The centerpiece of the seminar is the connection between the students' own intellectual and existential commitments and their anthropological "practices" and between these and their own emerging research projects.

[ANTHR 603 Research Design
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 604 Praxis and Culture
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 605 Archaeological Research Design (also Anthropology 405 and Archaeology 405/605)
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 607 Special Problems in Anthropology
Fall or spring. Credit and hours to be arranged. Intended for graduate students only. Staff.
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 609 Approaches to Archaeology (also Anthropology 409 and Archaeology 409/609)
Fall. 4 credits. N. Russell.
For course description, see section IV.

[ANTHR 610 Language and Myth
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 614 Reading in the Ethnographic Tradition (1880–1960)
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 615 Reading Contemporary Ethnographies (1960–1990)
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 616 Cultural Production of the Person
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 619 Anthropological Approaches to the Study of Buddhisms in Asia
Spring. 4 credits. Staff.
This seminar will examine the various conceptual and analytical strategies employed by social scientists in the study of Buddhism especially in South and Southeast Asia. Problems of religious complexity, the social correlates of Buddhism, and the role of Buddhism in social change will be explored.

ANTHR 621 Sex and Gender in Cross-Cultural Perspective (also Anthropology 321 and Women's Studies 321/631)
Fall. 4 credits. Time to be arranged. Graduate section of Anthr 321. K. March.
For course description, see Anthr 321, section VII.A.

[ANTHR 629 Chinese Ethnology
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 632 Andean Symbolism
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 635 Southeast Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course on topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

[ANTHR 636 Cognition and Classification
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 637 Theorizing Social Movements, Human Rights and Democracy in Latin America
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 639 The Feminine Symbolic
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 641 South Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

[ANTHR 645 Japanese Ethnology
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 647 Death of the Father
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 648 Marriage and Death
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 649 Narrative and the Analysis of Culture
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 653 Myth Onto Film (also Theatre Arts 653)
Spring. 4 credits. Enrollment limited by available studio space and equipment. Some knowledge of one of the following: anthropology, filmmaking, mythology, graphics, drawing, or painting is required. Open to undergraduates and graduate students with permission of instructor. Fee for film screening and maintenance, $50. R. Ascher.
In myths, whales fly, pebbles throw themselves across streams, and trees are transformed into women. Toward the end of visualizing myths—in particular the myths of other people—we explore the possibilities of animated film. The technique used is cameraless animation; that is, we draw and paint, frame by frame, directly onto movie film. The intellectual problem is to visualize the myths of others so that they are comprehensible to us but are not thought to be of us. Reading includes introductory works on both myth and animation and there is background reading on the particular myth that is committed to film.

ANTHR 655 East Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

[ANTHR 656 Maya History
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 658 Archaeological Analysis (also Anthropology 458 and Archaeology 458/658)
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 660 Language, Ideologies and Practices (also Latino Studies Program 660)
Spring. 4 credits. V. Santiago-Irizarry.
Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course will look at the place of language as a signifying practice in the U.S. by focusing on the experience of Latino communities. Topics to be explored include linguistic diversity and change, accommodation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.

ANTHR 662 Democratizing Society: Participation, Action, and Research (also Anthropology 362)
Fall. 4 credits. D. J. Greenwood.
For description, see ANTHR 362, Section VI.

ANTHR 663 Action Research
Spring. 4 credits. D. Greenwood.
This seminar is a practicum in action research (AR) in which the semester becomes a self-managing learning environment for the exploration of the techniques and group processes involved in AR, including co-generative learning, searching, and AR facilitation. Participation in a seminar-centered LISTSERV on the Internet is expected.

[ANTHR 665 Topics in Native American Societies and Cultures
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 666 Humans and Animals (also Anthropology 466 and Archaeology 466/666) #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 669 Gender and Age in Archaeology (also Anthropology 469 and Archaeology 469/669) #
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 670 Environmental Archaeology (also Anthropology 370 and Archaeology 370/670)
Fall. 4 credits. Not offered 1999–2000.]

ANTHR 672 Hunters and Gatherers (also Anthropology 372) #
Spring. 4 credits. T. Volman.
For course description, see section IV.

[ANTHR 673 Human Evolution: Concepts, History and Theory (also Biological Sciences 673)
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 675 Evolutionary Theory and Human Behavior (also Anthropology 475)
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 680 Theory and Ethnography in the Anthropology of Southeast Asia
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 682 Perspectives on the Nation (also Asian American Studies 682)
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 685 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America
Spring. 4 credits. Not offered 1999–2000.]

[ANTHR 690 Ritual and Myth: Structure, Process, Practice
Spring. 4 credits. Not offered 1999–2000.]

ANTHR 691 Filming Other Cultures (also Anthropology 291 and Theatre Arts 291/691)
Spring. 4 credits. Fee for film screening and maintenance, $35.
For description, see Anthropology 291 and Theatre, Film and Dance 291. Graduate students who register in this course attend the meetings of 291. In addition, they write in-depth studies of one or more films in consultation with the instructor.

ARABIC AND ARAMAIC

The Department of Asian Studies encompasses the geographical areas of East Asia, South Asia, and Southeast Asia and offers courses in most of the disciplines of the social sciences and the humanities. Asian studies courses through the 400 level (ASIAN is the prefix) are taught in English and are open to all students in the university. Some of these courses may be counted toward majors in other departments; others fulfill the humanities distribution requirement. Courses listed under Asian Studies offered through other departments may fulfill distribution requirements in history, social sciences, and arts.

The Major

A student majoring in Asian studies normally specializes in the language and culture of one country and often chooses an additional major in a traditional discipline.

Majors complete two courses at the 200 level (a minimum of 6 credits with a grade of C or better) in one of the Asian languages offered at Cornell. The major consists of at least 30 additional credits (which may include up to 6 credits of further language study) selected by the student in consultation with his or her adviser from among the courses listed under the Department of Asian Studies and numbered 250 and above.

The applicant for admission to the major in Asian studies must have completed at least one area studies course selected from among those listed under the Department of Asian Studies and must receive permission for admission to the major from the director of undergraduate studies. The student must have received a minimum grade of C in this course and in all other courses counted toward the major.

Honors

To be eligible for honors in Asian studies, a student must have a cumulative grade average of A- in all Asian Studies area courses, exclusive of language study only, and must successfully complete an honors essay during the senior year. Students who wish to be considered for honors should apply to the director of undergraduate studies during the second term of their junior year. The application must include an outline of the proposed project and the endorsement of a faculty adviser. During the first term of the senior year the student does research for the essay in conjunction with an appropriate Asian studies course or Asian Studies 401. Students of China, Japan and Southeast Asia must also complete Asian Studies 611, 612 or 613 respectively. By the end of the first term the student must present a detailed outline of the honors essay and have it approved by the faculty sponsor and the director of undergraduate studies. The student is then eligible for Asian Studies 402, the honors course, which entails writing the essay. At the end of the senior year, the student has an oral examination (with at least two faculty members) covering both the honors essay and the student's area of concentration.

Concentration in South Asia Studies

A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in South Asian Studies by completing at least 18 credits of course work in South Asian studies, including Asian Studies 215 (Introduction to South Asia) and four courses or seminars at the intermediate or advanced levels, two of which may be South Asian language courses.

Students taking a concentration in South Asian studies are considered members of the South Asia Program and will have an adviser from the program faculty. (This adviser will be for the student's concentration and is not a substitute for a student's academic adviser in his or her major.)

One South Asian graduate course may be taken for the concentration with consent of both the instructor and the adviser. The same applies for one South Asia-related course with a research paper on a South Asian subject. Additional courses may be added if offered with comparable South Asia content.

Concentration in Southeast Asia Studies

A candidate for the Bachelor of Arts or Bachelor of Science degree at Cornell may take a concentration in Southeast Asian studies by completing 18 credits of course work. A recommended plan would include Asian Studies 208 and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Students taking a concentration in Southeast Asian studies are members of the Southeast Asia Program and are assigned an adviser from the program faculty. Such students are encouraged to commence work on a Southeast Asian language either at the 10-week intensive courses offered by the Southeast Asia Studies Summer Institute (SEASSI) or by studying for one semester at IKIP Malang, Indonesia; Khon Kaen University, Thailand; and Hanoi University, Vietnam; fellowships are available for undergraduates through the Cornell Abroad Program.

Intensive Language Program (FALCON)

The FALCON Program offers intensive instruction in Japanese, Chinese, or Indonesian. The program is still the only one in the world offering a full year of intensive instruction, except perhaps for the exclusive language schools of some government agencies. Students must formally apply to the program, but the application process is simple and admissions is open to all students. (Applications available for FALCON from the secretary, room 414 Morrill Hall, or visit website http://dml.cornell.edu./FALCON/ and apply on-line). Students may take the entire sequence of 160, 161, 162, or any other portion of the program is they have necessary background (to be determined by placement test). The courses are full-time intensive language study; the degree of intensity required does not allow students to enroll simultaneously in other course or to work, except perhaps on weekends.

Study Abroad

Cornell is a member of the Inter-University Center for Chinese Language Study in Taipei and a member of the Council on International Educational Exchange offering study in China at Peking University and Nanjing University. These centers offer intensive training in both spoken and written forms of the languages. The Kyoto Center for Japanese Studies (KCJS) is an undergraduate program for students who want to spend one or two semesters in Japan studying both language and culture.

Cornell is a class-A member of the American Institute of Indian Studies, which offers fellowships in India for intensive language study in Hindi, Bengali, and Tamil.

Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, cosponsor an academic semester or year in Nepal.

Other opportunities include a junior year abroad at IKIP-Malang, in Indonesia, or at the School of Oriental and African Studies, University of London. Many other options for study in Asia exist, including in Indonesia, Thailand, and Vietnam through the Council for International Educational Exchange. Undergraduates should consult Cornell Abroad; graduate students should inquire at the East Asia Program, the South Asia Program, or the Southeast Asia Program offices.

General Education Courses

ASIAN 203 Introduction to Comparative Literature (also ComL 203)
Fall. 4 credits. Team.
See ComL 203 for description.

ASIAN 204 Global Fictions (also ComL 204)
Spring. 4 credits. N. Melas.
See ComL 204 for description.

ASIAN 206 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also History 207)
Spring. 4 credits. T. Loos.
See HIST 206 for description.

ASIAN 208 Introduction to Southeast Asia @
Spring. 3 credits. T. Chaloemtiarana.
This course is for anyone curious about the part of Asia with the most diversity; it defines Southeast Asia both as the nation-states that have emerged since 1945 (Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, and Viet Nam) and as a larger cultural world extending from southern China to Madagascar and Polynesia. Students will find a serious, organized introduction to a variety of disciplinary and topical approaches to this region, including geography, linguistics, history, religion and ideology, anthropology, marriage and family systems, music, literacy

and literature, art and architecture, agriculture, industrialization and urbanization, politics and government, warfare and diplomacy, ecological and human degradation, business and marketing. The course aims to teach both basic information and different ways of interpreting that information.

ASIAN 211 Introduction to Japan: Japanese Texts in History @ #
Fall. 3 credits. B. de Bary.
An interdisciplinary introduction to Japanese Studies especially designed for non-majors. The course takes up a diverse series of cultural artifacts and demonstrates how, against the background of simultaneous and successive rises and falls of polities on the Japanese archipelago, the meanings and readings generated by these artifacts have changed dramatically over time. We will consider verbal and visual, fictional and historical, canonical and non-canonical texts, including the eighth century *Kojiki*, the courtly narrative *Tale of Genji*, eighteenth century puppet theater, modern Ainu autobiography, and films and comic books dealing with themes of nuclear warfare and apocalypse.

ASIAN 212 Introduction to China @
Spring. 3 credits (4 credits with a special project; consult instructor for information). S. Tian.
An interdisciplinary introduction to Chinese culture especially designed for students not majoring in Asian Studies.

ASIAN 215 Introduction to South Asian Civilization @
Fall. 3 credits. C. Minkowski.
An interdisciplinary introduction to the culture and history shared by India and other states of South Asia. Designed for students not majoring in Asian Studies. Guest lecturers will provide the perspective of their disciplines to the general themes of the course: cultural diversity and the role of tradition in contemporary life.

ASIAN 218 Introduction to Korea (also History 218 and Government 218) @
Fall. 3 credits. J. Choi.

Asia—Literature and Religion Courses

The following courses are taught entirely in English and are open to any Cornell student.

ASIAN 250 Introduction to Asian Religions (also Religious Studies 250) @ #
Spring. 3 credits. D. Boucher.
This course will explore a range of religious traditions in South Asia (Pakistan, India, and Sri Lanka) and East Asia (China and Japan) including Hinduism, Buddhism (South and East Asian), Confucianism, Daoism, and Shinto. We will concentrate on these religions in traditional times in order to understand better the historical foundations that have influenced much of what these cultures are today. We will attempt to inquire collectively into the nature of religious impulses among peoples who are in some fundamental ways both very much like us and very much different from us. The course format will include lectures and discussion sections.

ASIAN 277 Meditation in Indian Culture @ #
Spring. 3 credits. D. Gold.
This course probes the truths behind traditional claims of the priority of internal practice in Indian traditions. We will examine both practices themselves—techniques of meditation and contemplation, religious ways of using intellect, forms of chant and ritual—and the dynamics through which these have left a wider mark on South Asian civilization. These dynamics include not only the evident reverberations of practice in philosophical reflection and socioreligious institutions, but also wide-ranging processes of stylization, elaboration, and popularization found throughout South Asian culture. In order to get a sense of the experiences treated in classical religious texts, students will be expected to experiment with some basic meditation practices. At least as important for the work of the course (and much more important for the grade) will be the ways in which students situate these practices within larger South Asian world views as suggested by doctrines, rituals, iconic forms, and literary texts. To keep the interaction between internal practice and broader world views central, we will examine both Hindu and Buddhist sources, consistently examining the ways in which similar practices are given distinct shapes by the two religious traditions.

[ASIAN 291 Classical Indian Narrative (also Classics 291) @ #
Spring. 3 credits. Not offered 1999–2000. C. Minkowski.
Reading in translation from the principal story collection of ancient India. Sources will include the Vedas, the Sanskrit epics, the Buddhist Jatakas, the Kathasaritsagara, the Pancatantra, and related collections. Attention will be given to comparisons with Greek narrative, and to the diffusion of Indian narratives into the world's literature.]

ASIAN 298 The U.S.-Vietnam War (also History 289) @
Spring. 3 credits. K. Taylor.
This course will survey events in Vietnam, the U.S., and elsewhere related to the US policy of intervention in Vietnam between 1954 and 1975. Readings will include historical narratives, memoirs, and literature. The courses will evaluate the standard winner (Hanoi) and loser (U.S.) narratives and how they have silenced southern Vietnamese voices.

ASIAN 299 Buddhism (also Religious Studies 361) @ #
Fall. 4 credits. D. Boucher.
This course will explore the Buddhist tradition from its origins in ancient India to its migrations throughout Asia and eventually to the West. The first half of the course will deal with Indian Buddhism: the Buddha, the principal teachings and practices of his early followers, and new developments in spiritual orientation. We will then turn to the transmission of Buddhism to Central and East Asia, including China, Japan, and Tibet, concentrating on those traditions in traditional times. From there we will look at the southern migration to Sri Lanka and Southeast Asia and conclude with an examination of Buddhism in America.

ASIAN 300 Premodern Chinese Literature in Translation @ #
Fall. 4 credits. S. Tian.
This course is an introduction to classical Chinese literature. A variety of forms and genres, such as poetry, fiction, essays and historical writings, are chosen and arranged in chronological order as well as by general topics and issues, so as to present an overview of how the Chinese literary tradition evolves and to show the interplay of Chinese literature, culture, and history.

[ASIAN 311 Modern Korean Culture and Literature @
Spring. 4 credits. Not offered 1999–2000. Staff.
A survey of the literature of the Post-Liberation period (1945-present), with an emphasis on the development of modern Korean poetry and its relation to the intellectual history of this time. Students will read major poetic texts of each period in English translation as well as writings on cultural movements and major arguments in intellectual history.]

ASIAN 314 Europe & Its Others (also Comparative Literature 304)
Fall. 4 credits. N. Melas.
See ComL 304 for description.

[ASIAN 347 Tantric Traditions (also Religious Studies 349) @ #
Fall. 4 credits. Not offered 1999–2000. D. Gold.
This course treats the development of tantric traditions in the Indian subcontinent and beyond. Philosophical, socio-religious, cultic, and visionary dimensions of tantra will be discussed. We study different Hindu and Indo-Tibetan traditions, with some attention also paid to tantric developments in East Asian Buddhism.]

ASIAN 348 Indian Devotional Poetry (also Religious Studies 348) @ #
Fall. 4 credits. D. Gold.
A survey of Indian devotional genres, with particular attention to the medieval vernacular literatures. Consideration will be given to social and ritual contexts of the texts, the ways in which their literary conventions work, and their contemplative uses. The predominant focus will be on Hindu traditions, but some Buddhist and Islamic works will also be read. Readings will be in translation.

[ASIAN 351 The Religious Traditions of India (also Religious Studies 351) @ #
Spring. 4 credits. Not offered 1999–2000. D. Gold.
A study of the relationships between the main currents of Indian religion. The course will first focus on the Hindu tradition and its holistic worldview within the context of the caste system. It will then describe the rise of Jainism and Theravada and Mahayana Buddhism, as well as Hindu and Buddhist Tantrism, as religious phenomena reflecting the emergence of individualism.]

[ASIAN 354 Indian Buddhism (also Religious Studies 354) @ #
Fall. 4 credits. Not offered 1999–2000. C. Minkowski.
A survey of Buddhist tradition in India from the life of the Buddha through the formation of the early schools, to the development of the Mahayana and the emergence of tantric Buddhism. Topics to be considered will include Buddhist concerns of human suffering and spiritual liberation, the nature of reality and human understanding, and the importance of compassion and emptiness. Attention will be paid to the institutional identity and social function of the Buddhist movements in classical India.]

[ASIAN 355 Japanese Religions (also Religious Studies 355) @
Fall. 4 credits. Not offered 1999–2000. J. M. Law.
This course addresses the complexity of religion in Japanese history through a focus on the dominant ideological system of Japanese religious practice and thought—that system commonly referred to as Shinto. In this course, we are interested in understanding the general methodological issues surrounding tradition formation, continuity, change, and revision. The Shinto case reveals the complexity of a given religious system which simultaneously serves as both a cultural ideology and a path for individual spiritual cultivation. A study of Shinto allows us to develop the intellectual frameworks for understanding the dynamics of religious traditions in societies. We will explore the Shinto tradition by looking at 1) the means by which a central corpus of values, tastes, practices, beliefs and concerns have been formulated and how this system has interacted with other religious systems in Japan so as to maintain its right to represent the "authentic Japanese spirit;" 2) the academic sources for the study of the Shinto tradition which have also contributed to its identity and continuity; 3) the view of this religious system from the perspective of those who are actively shaping its discourse; 4) the view of this religious system from the perspective of those peripheralized by its ideologies; 5) the issue of personal cultivation and aesthetic taste in the tradition and 6) the relationship between this religious system and imperialism, war, and historical revisionism.]

ASIAN 357 Chinese Religions (also Religious Studies 357) @ #
Spring. 4 credits. D. Boucher.
This course will present a broad survey of Chinese religions from the earliest historic records through the late imperial and modern periods, from highbrow philisophical movements to local deity cults. Our survey will focus intensively on the great traditions of Confucianism, Taoism, and Buddhism as well as the lesser known practices that often fall through the cracks. Our goal in part will be to trace patterns of continuity among competing and sometimes acrimonious voices.

[ASIAN 358 Chinese Buddhism (also Religious Studies 356) @ #
Fall. 4 credits. Not offered 1999–2000. D. Boucher.]

[ASIAN 359 Japanese Buddhism: Texts in Context (also Religious Studies 359) @ #
Spring. 4 credits. Not offered 1999–2000. J. M. Law.]

[ASIAN 360 Buddhist and Confucian Cultures of Asia @ #
Spring. 4 credits. Not offered 1999–2000. K. Taylor.
Confucius and Buddha were contemporaries 2,500 years ago. Teachings attributed to them spread over large parts of Asia and were used to formulate expressions of cultural authority in many times and places. This course surveys historic themes in Buddhist and Confucian studies, such as Theravada and Mahayana, Pure Land, Zen, and other forms of Buddhist thought and practice, including interaction with and adaption to local religions; Confucius and Mencius, Han eclectic Confucianism, Song Chu Hsi Confucianism, and dissenting or variant forms of Confucian thought. This course explores and compares specific examples of these themes in Japan, Korea, China, Vietnam, Thailand, and Burma. This course is intended for Asian studies majors and other interested students. Premodern focus.]

[ASIAN 363 Contemporary Mass Culture in Japan and the U.S. (also Comparative Literature 343) @
Fall. 3–4 credits. Not offered 1999–2000. B. de Bary.
A comparative study of Japanese and American mass cultures. Rather than seeking, through comparison, to delineate distinctive models of national cultures, the course will trace the complex relationships between cultural nationalist impulses and transnational economies, emphasizing processes of hybridity and fusion. The course will introduce students to a small number of important theoretical writings on mass culture. Areas of study will include the analysis of science fiction, comic books, film and video, popular music, and toy industries. Enrollment limited to 25 students.]

ASIAN 373 Twentieth-Century Chinese Literature @
Fall. 4 credits. E. Gunn.
A survey of the principal works in English translation, the course introduces fiction, drama, essays, and poetry of China beginning with the Republican era and continuing up to the present in the People's Republic and Taiwan, with attention to social and political issues and literary theory.

ASIAN 374 Chinese Narrative Literature (also Comparative Literature 376) @ #
Spring. 4 credits. E. Gunn.
Selected works in classical Chinese fiction are read in translation. Major novels, such as *The Dream of the Red Chamber* and *Water Margin*, are emphasized.

[ASIAN 375 Japanese Poetry and Poetic Prose @ #
Spring. 4 credits. Alternates with ASIAN 377. Not offered 1999–2000. K. Brazell.]

[ASIAN 376 Modern Japanese Literature: From Meiji through the Pacific War (also Comparative Literature 369) @
Fall. 4 credits. Not offered 1999–2000. B. de Bary.
We will read Japanese works of fiction, poetry, and critical theory written from the Meiji Restoration into the Showa Period. The course will take up such issues as modernization and the narrative of discovery, imperialism and the non-Western novel, the politics of visibility, gender and representation, and Japanese colonialism. We will consider how writings of critics like Karatani, Fujii, and Layoun have complicated modernizationist schemas of literary development. We will also attempt to explore what Nagahara Yutaka has called the "phenomenology of discrimination" in relation to Japanese literary texts, pursuing contradictions between egalitarianism and discrimination in the legacy of Meiji Enlightenment thought. Reading of non-Japanese (other Asian, as well as African, American, and European) texts raising pertinent theoretical perspectives will be integrated into the course work.]

[ASIAN 377 Japanese Tales of Love, War, and the Supernatural @ #
Spring. 4 credits. Alternates with ASIAN 375. Not offered 1999–2000. K. Brazell.
The romantic adventures of the Shining Prince Genji, the battles of 12th-century samurai clans, the ghosts and demons of folklore, and the adventures of Saikaku's men and women who "loved love" are still very much alive in modern Japanese mass culture—in films, comic books, commercials, TV programs, and video games. This course will survey the original tales (in English translation) to introduce students to this rich array of literature. We will explore some of the changes in the representations of sex and gender, death and dying, and supernatural forces that occurred between the 9th and the 19th centuries.]

ASIAN 383 Introduction to the Arts of China (also Art History 380 and Archaeology 380)
Fall. 4 credits. A. Pan.
See ART H 380 for description.

ASIAN 388 Theorizing Gender & Race in Asian Histories & Literatures @
Fall. 4 credits. N. Sakai.
In recent years some studies have been published about the questions of gender and race in the fields related to East Asia. Yet, compared with the accumulated factual knowledge about these topics, little attention has been paid to how to conceptualize gender and race, how to analyse the mutual implication of sexism and racism, and how to understand the relationships of these topics to the broader contexts of colonialisms, imperialisms and nationalisms. This course is designed to offer a series of discussions about the following problems: 1) the historically specific modes of sexism and racism in social spaces which are related to Japan and other areas in East Asia. 2) the mutual implication of sexism and racism in various contexts including those of colonialism, imperialism and nationalism. 3) the roles of gender and race in the production of knowledge about Japan and East Asia in general. 4) the conceptions of gender and race in the social formations particular to East Asia. The assigned readings include both English and Japanese materials. However, those who register in AS 388 are exempt from reading the Japanese materials*.

*Students are allowed to take this course either as AS 388 or as AS 688, although those who have studied Japanese for more than four years are strongly encouraged to register in AS 688. Those who register in AS 688 have to spend additional time in class in order to deal with texts in Japanese.

[ASIAN 390 The Sanskrit Epics @ #
Spring. 4 credits. Not offered 1999–2000. C. Minkowski.
Readings in translation from the two Sanskrit epics, the Mahabharata and the Ramayana, supported by a study of the reception of the epics in later Indian imaginative literature. Attention will also be given to comparitive theories of the epic in ancient Indo-European languages.]

[ASIAN 395 Classical Indian Philosophical Systems (also Classics 395 and Religious Studies 395) @ #
Fall. 4 credits. Prerequisite: some background in philosophy or in classical culture. Not offered 1999–2000. C. Minkowski.]

ASIAN 396 Southeast Asian History from the Eighteenth Century (also History 396)
Spring. 4 credits. T. Loos.
See HIST 396 for description.

ASIAN 400 Tibetan Buddhism (also Religious Studies 400) @#
Fall. 3 credits. Prerequisites: at least one course on Buddhism or Asian religions, or the permission of the instructor. Class size is limited to 15. J. M. Law.
This course is an exploration of the development of the Vajrayana tradition through a focus on the myths and stories about, and writings by central figures in, what is known in the west as Tibetan Buddhism. Following an overview of the historical development of this tradition, we will explore the contributions made by several (mythico-historical) seminal thinkers in the tradition including Atisa, Naropa, Marpa, Milarepa, and Tsongkapa, and explore how their life works reflect the process of adapting Buddhism to the Tibetan context. (We will also include myths and stories about the mythical founder Padmasambhava.) Readings will include primary source religious works written by or attributed to these figures, hagiographical accounts of their lives (their "biographies" and "autobiographies" and tributes to them by their disciples), and treatises and commentaries on their works which are influential in the formulation of the various schools of Tibetan Buddhism. In the final segment of the course, we will explore the implications of exile for Tibetan Buddhism, and will read several popular works by the Ven. Tenzin Gyatso (the fourteenth Dalai Lama), to show the dramatic changes made in the tradition as it reformulates itself in a more global context. Throughout this course, we will be directing our attention to dynamics of tradition formulation, articulation and reformation as it changes throughout Tibetan history. In addition to two short writing assignments and a final research project, we will also take field trips to two regional Tibetan monasteries.

[ASIAN 406 Contemporary Literary Criticism in Korea
Spring. 4 credits. Not offered 1999–2000. Staff.
A survey of literary criticism and theory from the liberation in 1945 to the 1990s, including the KAPF (engagement movement of nationalism) versus belletristic movement, new criticism, nationalism based upon realism, grass-roots literature movements, postmodernism and the heteroglossia of critical theories. Major arguments of each of these movements will be covered. Also covered will be current movements in Korean literary criticism influenced by the globalized industry of critical theories, including deconstruction, postmodernism, poststructuralism, postcolonialism, cultural studies, feminism, and new historicism.]

ASIAN 407 Religion and Human Rights (also Religious Studies 407)
Spring. 3 credits. J. M. Law.

[ASIAN 410 Chinese Performing Arts @
Spring. 4 credits. Not offered 1999–2000. E. Gunn.
The course will survey drama, music theater, and film in twentieth-century China. Some material will require knowledge of Chinese.]

ASIAN 411 History of the Japanese Language (also Linguistics 411)
Fall. 4 credits. J. Whitman.
See LING 411 for description.

ASIAN 412 Linguistic Structure of Japanese (also Linguistics 404)
Spring. 4 credits. J. Whitman.
See LING 404 for description.

ASIAN 415 Virtual Orientalisms (also SHUM 415 and ComL 418) #
Spring. 4 credits. Enrollment limited to 25 students. B. de Bary.
A comparative study of representations of Japan in postwar French, American, and Japanese cultures. The course will be particularly concerned with the role of virtual technologies in representations of Japan, as well as with a proliferation of late twentieth century representations of Japan as a site of utopic or dystopic virtuality. Positing Orientalism as a broadly-based, but definitely not monolithic, ensemble of representational and regulatory practices, we will attend to differences in the historical context. Examples include; Roland Barthes' figuring of Japan as a "possibility of difference," or of "the very fissure of the symbolic" in post-1968 France, and Michael Crichton's more recent superimposition of a "Rising Sun" over processes of American racial hybridization, high-tech reproduction and alteration of images, and trade imblances. Ambiguously represented as a culture of both the "chrysanthemum" (the hyper-aesthetic) and the "sword" (the hyper-phallic), with the advent of what some have called "techno-orientalism," Japan has increasingly become a preoccupation of technological and futurological imagination. We will consider literary, filmic, and theoretical texts, as well as science fiction, video games, and fanzines.

ASIAN 416 Undergraduate Seminar on Gender & Sexuality in Southeast Asian History (also History 416)
Fall. 4 credits. T. Loos.
See HIST 416 for description.

ASIAN 417 Second Language Acquisition (also LING 415)
Spring. 4 credits. Y. Shirai.
See LING 415 for description.

ASIAN 429 Structure of the Chinese Language (also LING 429)
Fall. 4 credits. H. Tao.
See LING 429 for description.

ASIAN 430 Structure of Korean (also LING 430)
Spring. 4 credits. J. Whitman.
See LING 430 for description.

[ASIAN 441 Mahayana Buddhism (also Religious Studies 441) @ #
Spring. 4 credits. Not offered 1999–2000. D. Boucher.
By reading successive examples of Mahayana Buddhist literature, we will study the formation and evolution of the ideal of the bodhisattva; the understanding of transcendental wisdom and the concept of emptiness; and the workings of both the conscious and subconscious mind in the course of spiritual practice. We will include discussion of major philosophical schools, as well as issues of social setting and popular religious practice, in both India and East Asia.]

ASIAN 449 History and Methods of the Academic Study of Religion (also Religious Studies 449) #
Spring. 4 credits. D. Gold.
See RELST 449 for description.

ASIAN 460 Indian Meditation Texts (also Religious Studies 460) @ #
Fall. 4 credits. D. Gold.
Because texts that record visionary experience prescribe the practice of contemplation, and present enigmatic utterances are highly valued in Indian tradition, they need to be taken seriously by students of Indian and world civilizations. Yet the special problems of interpretation that they present have often caused meditation texts to be passed over in embarrassed, sometimes reverent silence. In this course we will draw on approaches from literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise: in what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between convention and experience in the creation of the texts? Readings will be drawn from the Upanishads and Tantra, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.

[ASIAN 463 Readings in Hindi and Urdu Literature @
Spring. 4 credits. Not offered 1999–2000. D. Gold.
Selected topics in Hindi and Urdu literature, with readings in the original; discussions in Hindi-Urdu and English. May be repeated for additional credit with consent of instructor.]

[ASIAN 464 Readings in Urdu Literature @
Spring. 2–4 credits. Not offered 1999–2000. D. Gold.
Selected topics in Urdu literature, with readings in the original; discussions in Urdu and English.]

[ASIAN 470 The Japanese Noh Theater and Modern Dramatists (also Comparative Literature 470 and Theater Arts 470) @ #
Fall. 4 credits. Alternates with ASIAN 471. Not offered 1999–2000. K. Brazell.
Several weeks will be spent studying the literary, performance, and aesthetic aspects of the noh theater. Emphasis will be on noh as a performance system, a total theater in which music, dance, text, costume, and props all interact to create the total effect. Then attention will turn to modern theater people who have reacted to noh in some creative way. Choice of dramatists will depend partly on student interests but will probably include Yeats, Brecht, Britten, Claudel, Grotowski, and Mishima. All readings may be done in English translation.]

[ASIAN 471 Japanese Theatre (also Theatre Arts 471) @#
Fall. 4 credits. Alternates with ASIAN 470. Not offered 1999–2000. K. Brazell.
A study of traditional forms of Japanese theatre. Topics will include ritual and theatre, noh and kyogen, kabuki, and the puppet theatres, and contemporary theatrical use of the traditional forms. Special emphasis will be placed on dramaturgy, acting styles, perfor-

mance aesthetics, and theories of performer training.]

[ASIAN 481 Translation and Identities @
Fall. 4 credits. Not offered 1999–2000. N. Sakai.]

[ASIAN 483 Internationalism, Nationalism, and Modern Japanese Discursive Space @
Fall. 3 credits. Not offered 1999–2000. N. Sakai.
The late 19th century marks an important transitional period; nation-states formed in Britain, France, Japan, Germany, the United States, and elsewhere sought to become imperial powers; and "internationalism" virtually collapsed. Focusing on Japanese examples, but not excluding other cases, we will study the discursive spaces of modern national subjectivity with a view to the problems of ethnicity, colonialism, imperial sexism, violence, historical memory, post-coloniality and academic knowledge. A major critical paper will be required.]

ASIAN 490 Tales of the Heike (also History 490) @ #
Fall. 4 credits. Brazell, Piggott.
See HIST 490 for description.

[ASIAN 496 Tokugawa Literature and Thought @ #
Spring. 4 credits. Not offered 1999–2000. N. Sakai.
An introduction (in English translation) to literary, theatrical, and intellectual works of the Tokugawa period (1600–1868). We will examine the characteristics of early Tokugawa literary and theatrical works and see how different they are from the literary works of the later Tokugawa period. We will also read the philosophical and philological works on the classics by writers such as Ogyu Sorai and Motoori Norinaga to understand the ways contemporary Japanese intellectuals understood cultural activities and literature during the Tokugawa period.]

Asia—Graduate Seminars

For complete descriptions of courses numbered 600 or above, consult the director of graduate studies.

ASIAN 601 Southeast Asia Seminar: Indonesia (also Government 652)
Fall. 3–4 credits. J. Siegel.
The course will serve as an introduction to Indonesia, considered in several dimensions: nationalist Indonesia, ethnic Indonesia, the recent history of nationalism and the politics of the present, minority problems, etc. No knowledge of Indonesian is required.

ASIAN 602 Southeast Asia Seminar: Cambodia
Spring. 4 credits. D. Chandler.

ASIAN 603 Southeast Asia Topical Seminar: Sociology of Natural Resources & Development (also Rural Sociology 607)
Fall. 3 credits. P. Gellert.
Building on theories in the sociology of development, this seminar will examine the role of natural resource extraction, processing, and exports to global markets in the development trajectories of nations in Asia, Africa and Latin America. This course engages students in both theoretical debates and practical implications of resource access, control, and conflict amongst various social stakeholders. Detailed historical cases will be examined, primarily from Southeast Asia (Indonesia, Malaysia, Philippines).

ASIAN 604 Southeast Asia Topical Seminar
Spring. 3–4 credits. Staff.

ASIAN 605–606 Master of Arts Seminar in Asian Studies
605, fall; 606, spring. 2–4 credits. Staff.

ASIAN 607–608 The Plural Society Revisited (also Government 653)
607, fall; 608, spring. 4 credits. 607 may be taken independently for credit; 607 is a prerequisite for 608. B. Anderson.
See GOVT 653 for description.

ASIAN 609 Modern Japanese Studies: The Formation of the Field in History and Literature (also History 609)
Spring. 4 credits. N. Sakai, J. V. Koschmann, B. de Bary.
See HIST 609 for description.

ASIAN 610 SLA and the Asian Languages (also LING 609)
Fall. 4 credits. Y. Shirai.
See LING 609 for description.

ASIAN 611 Chinese Bibliography and Methodology
Spring. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. C. d'Orban.

ASIAN 612 Japanese Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. F. Kotas.

ASIAN 613 Southeast Asian Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. A. Riedy.
This course is designed to instruct students in methods of identifying and locating resources for the study of Southeast Asia. Emphasis will be on the practical aspects of using various types of bibliographical tools to identify both primary and secondary sources in Southeast Asian and Western languages. Electronic databases and online services as well as traditional printed resources will be covered. Relevant arcana of library science will be explained as necessary. Required of honors students and Master of Arts candidates. No foreign language competence is required but a reading knowledge of at least one Southeast Asian language or other Asian language (especially Chinese or Japanese) and a major European language (especially French, Spanish, or Dutch) is highly desirable.

[ASIAN 621–622 South Asia Seminar: Topic to be announced
621, fall; 622, spring. 4 credits. Not offered 1999–2000.]

[ASIAN 623–624 Topics in South Asia
623, fall; 624, spring. 1 credit. Not offered 1999–2000. Staff.
A series designed to introduce as well as enhance and build on students' knowledge of various topics of importance to South Asia (Bangladesh, India, Nepal, Pakistan, and Sri Lanka). Weekly lectures will survey contemporary themes in South Asian scholarship where visiting scholars and members of the Cornell community will discuss a multidisciplinary range of issues. These may include science and nation building; ritual power and resistance; tribal communities and the environment; industrial and agrarian relations; gender and the media; and economic liberalization. A short essay will be required at the end of the course.]

ASIAN 630 Seminar on Vietnamese Historiography of the 16th-18th Centuries
Spring. 4 credits. Permission of instructor required. K. Taylor.
A survey of texts and secondary literature about Vietnamese speakers from the Hong Duc era (end of 15th century) to the founding of the Nguyen dynasty (beginning of 19th century). Required work will include class presentations, short essays, and a seminar paper representing new research.

ASIAN 676 Southeast Asia Research Training Seminar
Fall or spring. 3–4 credits. Staff.

ASIAN 688 Theorizing Gender & Race in Asian Histories and Literatures @
Fall. 4 credits. N. Sakai.
In recent years some studies have been published about the questions of gender and race in the fields related to East Asia. Yet, compared with the accumulated factual knowledge about these topics, little attention has been paid to how to conceptualize gender and race how to analyse the mutual implication of sexism and racism, and how to understand the relationships of these topics to the broader contexts of colonialisms, imperialisms and nationalisms. This course is designed to offer a series of discussions about the following problems: 1) the historically specific modes of sexism and racism in social spaces which are related to Japan and other areas in East Asia. 2) The mutual implication of sexism and racism in various contexts including those of colonialism, imperialism and nationalism. 3) The roles of gender and race in the production of knowledge about Japan and East Asia in general. 4) The conceptions of gender and race in the social formations particular to East Asia. The assigned readings include both English and Japanese materials. However, those who register in AS388 are exempt from reading the Japanese materials*.

*Students are allowed to take this course either as AS 388 or as AS 688, although those who have studied Japanese for more than four years are strongly encouraged to register in AS 688. Those who register in AS 688 have to spend additional time in class in order to deal with texts in Japanese.

ASIAN 701–702 Seminar in East Asian Literature
701, fall; 702, spring. 1–4 credits. Staff.

ASIAN 703–704 Directed Research
703, fall or spring; 704, fall or spring. 1–4 credits. Staff.

ASIAN 899 Masters Thesis Research
Fall, spring. 2–4 credits. Staff.

ASIAN 999 Doctoral Dissertation Research
Fall, spring. 2–4 credits. Staff.

Honors Courses

ASIAN 401 Asian Studies Honors Course
Fall or spring. 4 credits. Intended for seniors who have been admitted to the honors program. Staff.
Supervised reading and research on the problem selected for honors work.

ASIAN 402 Asian Studies Honors: Senior Essay
Fall or spring. 4 credits. Prerequisite: admission to the honors program. Staff.
The student, under faculty direction, prepares an honors essay.

ASIAN 403–404 Asian Studies Supervised Reading
Fall, spring, or both. 1–4 credits. Prerequisite: permission of instructor. Open to majors and other qualified students. Intensive reading under the direction of a member of the staff.

Bengali

BENGL 121–122 Elementary Bengali
121, fall; 122, spring. 4 credits each term. Prerequisite: for Bengali 122, Bengali 121 or examination. D. Sudan.
The emphasis is on basic grammar, speaking, and comprehension skills; Bengali script will also be introduced.

BENGL 201–202 Intermediate Bengali Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Bengali 201, Bengali 122 or examination; for Bengali 202, Bengali 201 or examination. D. Sudan.
Continuing instruction in grammar with attention to speaking and reading skills.

BENGL 203–204 Intermediate Bengali Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Bengali 203, Bengali 122 or examination; for Bengali 204, Bengali 203 or examination. D. Sudan.
Continuing instruction in grammar with attention to writing skills.

BENGL 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. D. Sudan.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BENGL 303–304 Bengali Literature I, II
303, fall; 304, spring. 4 credits each term. Prerequisites: Bengali 203–204 or equivalent. D. Sudan.
An introduction to noted Bengali writers. Selections of works by Rabindranath Tagore and Abanindranath Tagore and short stories by Bonophul will be covered. The course will be devoted to reading these works and developing literary criticism and creative writing in Bengali.

Burmese

NOTE: Contact S. Tun in Morrill Hall 405 before classes begin for placement or other testing and organizational information.

BURM 103–104 Burmese Conversation Practice
103, fall; 104, spring. 2 credits each term. Prerequisites: for Burmese 104, Burmese 103 and Burmese 121. May not be taken alone. Must be taken simultaneously with Burmese 121–122. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun.
Additional drills, practice and extension of materials covered in Burmese 121 and 122. These courses are designed to be attended simultaneously with Burmese 121–122 respectively, allowing students to obtain qualification within a year.

BURM 121–122 Elementary Burmese
121, fall; 122, spring. 4 credits each term. Prerequisite: for Burmese 122, Burmese 121. May be taken alone or simultaneously with Burmese 103–104. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun.
A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

BURM 123 Continuing Burmese
Fall. 4 credits. Prerequisite: Burmese 122. Satisfactory completion of Burmese 123 fulfills the qualification portion of the language requirement. S. Tun.
Continuing instruction in conversational and reading skills, to prepare students for 200-level courses.

BURM 201–202 Intermediate Burmese Reading @
201, fall or spring; 202, fall or spring. 3 credits each term. Prerequisites: for Burmese 201, Burmese 123; for Burmese 202, Burmese 201. S. Tun.
Continuing instruction in Burmese, with emphasis on consolidating and extending conversational skills, and on extending reading ability.

BURM 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. S. Tun.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BURM 301–302 Advanced Burmese @
301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for Burmese 301, Burmese 202 or permission of instructor; for Burmese 302, Burmese 301. S. Tun.
Continuing instruction on conversational and literary skills, but with special emphasis on reading. Students encounter various genres and styles of written Burmese. Readings will include articles on current events, and either several short stories or a novel. Focus is on developing reading skills, particularly on vocabulary development, consolidating and expanding grammar, and appreciating stylistic and cultural differences.

BURM 303–304 Advanced Burmese II
303, fall or spring; 304, fall or spring. 3 credits each term. Prerequisite: for Burmese 303, Burmese 202 or permission of instructor; for Burmese 304, Burmese 303. S. Tun.
This is a course for students who have good conversational ability in Burmese and some familiarity with Burmese culture, but who need to strengthen reading skills and further enrich their vocabulary. Students will, in consultation with the instructor, be able to select reading materials. There will also be an opportunity for those who need it, to strengthen listening skills, through the study of current films, TV and radio programs in Burmese.

BURM 401–402 Directed Individual Study
401, fall; 402, spring. 2–4 credits variable each term. Prerequisite: permission of instructor. S. Tun.
This course is designed to accommodate the needs of advanced or specialized students, and faculty interests. Topics of reading and discussion are selected on the basis of student need.

Cambodian

See Khmer.

Chinese

NOTE: Testing for placement, except for those with near-native abilities (particularly those schooled in a Chinese setting up until the age of about 12) takes place in registration week, before classes begin. Time and place will be posted on the web at http://dml.cornell.edu and the Chinese bulletin board opposite Morrill 416. Students with some Chinese schooling who want to obtain 3 or 6 credits for their proficiency will be tested at the beginning of the second week of classes. Again, the time and place will be announced.

CHIN 101–102 Elementary Standard Chinese ('Mandarin')
101, fall; 102, spring. 6 credits each term. Prerequisite: for Chinese 102, Chinese 101 or equivalent. Since each section is limited to 10–12 students, students missing the first two class meetings without a university excuse are dropped so others may register. No student will be added after the second week of classes. Satisfactory completion of Chinese 102 fulfills the qualification portion of the language requirement. Staff.
A course for beginners or those who have been placed in the course by examination. The course gives a thorough grounding in conversational and reading skills. Students with some facility in the spoken language (because Chinese is spoken at home) but who do not read characters should take 109–110. Students who read Chinese, but who speak 'dialects,' such as Cantonese or Amoy, should consult with the staff before enrolling.

CHIN 109–110 Beginning Reading and Writing (Standard Chinese)
109, fall; 110, spring. 4 credits each term. Prerequisites: for Chinese 109, basic conversational Chinese ('Mandarin'); if in doubt, take the placement examinaton; for Chinese 110, Chinese 109 or equivalent. Students who complete Chinese 110 normally continue with Chinese 209 and 210. Because of high demand for this course, students missing the first two meetings without a university excuse are dropped so others may register. Satisfactory completion of Chinese 110 fulfills the qualification portion of the language requirement. F. Lee Mehta.
This course is intended primarily for students who speak some Chinese (e.g., at home), but who have had little or no formal training. The focus is on characters, reading comprehension, basic composition, standard grammar, and reading aloud with standard Chinese ('Mandarin') pronunciation.

CHIN 111–112 Beginning Cantonese (Spoken)
111, fall; 112, spring. 3 credits each term. Prerequisite: for Chinese 112, Chinese 111 or equivalent. Chinese 111–112 only satisfies the qualification portion of the language requirement if the student can also demonstrate a comparable reading ability. Staff.
A course in conversational standard Cantonese (as spoken in Hong Kong and Canton) for beginners. Students need not have a Mandarin background to take this course, but those with elementary reading skills will also be introduced to Cantonese (character) writing.

CHIN 113–114 Beginning Reading for Cantonese Speakers
113, fall; 114, spring. 3 credits each term. Prerequisite: everyday conversational ability in Cantonese. Completion of 114 satisfies the qualification portion of the language requirement. Staff.
This course is intended primarily for students who speak some Cantonese (e.g., at home), but who have had little or no formal training in writing. The focus is on characters, reading comprehension, standard grammar, and reading aloud with Cantonese pronunciation.

CHIN 201–202 Intermediate Standard Chinese ('Mandarin') @
201, fall or summer; 202, spring or summer. 4 credits each term. Prerequisites: for Chinese 201, Chinese 102 with a grade of C+ or above or equivalent; for Chinese 202, Chinese 201 or equivalent. Satisfactory completion of Chinese 201 fulfills the proficiency portion of the language requirement. Section 1, Q. Teng; Section 2, H. Wang.
Continuing instruction in written and spoken Chinese with particular emphasis on consolidating basic conversational skills and improving reading confidence and ability.

CHIN 209–210 Intermediate Reading and Writing @
209, fall; 210, spring. 4 credits each term. Prerequisites: for Chinese 209, Chinese 110 or equivalent; Chinese 210, Chinese 209. Satisfactory completion of 209 fulfills the proficiency portion of the language requirement. After completing 210, students may only take 400-level courses in Chinese. X. Sun.
Continuing focus on reading and writing for students with spoken background in standard Chinese; introduction of personal letter writing and other types of composition.

[CHIN 215 Mandarin for Cantonese Speakers
Fall or spring. 3 credits each term. Not offered 1999–2000.]

CHIN 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

CHIN 301–302 High Intermediate Chinese
301, fall; 302, spring. 4 credits each term. Prerequisites: for Chinese 301, Chinese 202 or equivalent; for Chinese 302, Chinese 301. F. Lee-Mehta.
Continuing instruction in spoken Chinese and in various genres and styles of written Chinese.

[CHIN 303–304 Advanced Mandarin Conversation @
303, fall; 304, spring. 1 credit each term. Prerequisite: Chinese 201–202 or equivalent or permission from instructor. S-U grades only. Not offered 1999–2000. Staff.
Conversation and reading practice for students who wish to maintain language skills. Guided conversation and oral composition and translation. Corrective pronunciation drills.]

CHIN 411–412 Advanced Chinese: Fiction, Reportage, Current Events
411, fall; 412, spring. 4 credits each term. Prerequisites: for Chinese 411, Chinese 302 or equivalent; for Chinese 412, Chinese 411. Q. Teng.
Reading, discussion, and composition at advanced levels.

[CHIN 413–414 Advanced Chinese: Focus on Current Events
413, fall; 414, spring. 3 credits each term. Prerequisites: for Chinese 413, Chinese 412 or equivalent or permission of instructor; for Chinese 414, Chinese 413. S-U grades only. Not offered 1999–2000.
Reading and discussion, with a focus on current events. One of the goals of this course is to build reading confidence and speed. The content will partially be determined by student need and interest.]

CHIN 425 Special Topics
Fall or spring, according to demand. 4 credits. Prerequisite: permission of instructor. S. Wen.
A number of different topics in advanced Chinese language, advertised the previous semester, will be offered under this title to accommodate the needs of advanced or specialized students, and take advantage of faculty interests. Topics include: correspondence and composition, excerpts from classical novels, Ch'ing documents, xiesheng comedy routines, etc. May be repeated for credit.

FALCON (Full-year Asian Language CONcentration)

For full information, brochures, etc., see the FALCON secretary 414 Morrill Hall (e-mail: falcon@cornell.edu).

CHIN 160 Introductory Intensive Mandarin
Summer only. 8 credits. Completion of 160 fulfills the qualification portion of the language requirement. Staff.
Introduction to spoken and written Mandarin. Lectures on linguistic and cultural matters, intensive practice with native speakers, and laboratory work. Students who complete this course with a grade of at least B are normally eligible to enroll in Chinese 201.

CHIN 161–162 Intensive Mandarin @
161, fall; 162, spring. 16 credits each term. Prerequisites: for Chinese 161, Chinese 160 or equivalent or permission of instructor; for Chinese 162, Chinese 161. Satisfactory completion of Chinese 161 fulfills the proficiency portion of the language requirement. Staff.

Literature in Chinese

CHLIT 213–214 Introduction to Classical Chinese @ #
213, fall, T. L. Mei; 214, spring, S. Tian. 3 credits each term. Prerequisite: qualification in Chinese or permission of instructor. May be taken concurrently with Chinese 101–102, 201–202, 301–302.

CHLIT 420 T'ang and Sung Poetry @ #
Spring. 4 credits. Prerequisite: permission of instructor. T. L. Mei.
Readings in the original Chinese, together with secondary works by Chinese and Western critics.

CHLIT 421–422 Directed Study
Fall or spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff.

CHLIT 423 Readings in Chinese History
Fall. 4 credits. W. Shizhen.
Selected Readings.

[CHLIT 424 Readings in Literary Criticism
Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. T. L. Mei.]

[CHLIT 426 History of the Chinese Language (also CHIN 403) @ #
Fall. 4 credits. Prerequisite: reading knowledge of Chinese. Not offered 1999–2000. T. L. Mei.
This course explores the development of the Chinese language from its Sino-Tibetan beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old Chinese, Middle Chinese and historical origins of modern dialects.]

CHLIT 435 Chinese Buddhist Texts @ #
Fall. 4 credits. Prerequisite: one year of literary Chinese or permission of the instructor. D. Boucher.
This seminar is designed to introduce students to the idiom of Buddhist Chinese. We will start by reading selections from the early translations to gain a grounding in the vocabulary and syntax that came to characterize literary Buddhism in China. From there we will survey some of the so-called apocryphal texts (Buddhist "sutras" produced in China) and look at samples from important writers and schools, depending on student interests. This course is open to students in any area of East Asia with an interest in developing skills in Buddhist texts.

CHLIT 603 Seminar in Chinese Fiction and Drama
Fall. 4 credits. Prerequisite: permission of instructor. E. Gunn.

[CHLIT 605 Seminar in Chinese Fiction and Drama
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.]

CHLIT 607 Early Medieval Chinese Poetry
Spring. 4 credits. S. Tian.
By reading the poetry, criticism, and discursive prose of the 1st to 6th centuries AD, we will consider the changing roles and development of Chinese poetry.

[CHLIT 610 Chinese Cultural Criticism
Fall. 4 credits. Not offered 1999–2000. E. Gunn.]

CHLIT 621–622 Advanced Directed Reading: Chinese Historical Syntax
621, fall; 622, spring. 2–4 credits. Prerequisite: permission of instructor. Staff.

Hindi

HINDI 101–102 Elementary Hindi-Urdu
101, fall; 102, spring. 6 credits each term. Prerequisite: for Hindi 102, Hindi 101 or equivalent. Staff.
A semi-intensive course for students without prior experience in Hindi-Urdu or a closely related language. A thorough grounding is given in all language skills: listening, speaking, reading, and writing. Students who have had exposure to Hindi-Urdu or a closely related language in the home or otherwise should generally take Hindi 109–110. Check with instructor regarding placement.

HINDI 109–110 Accelerated Elementary Hindi-Urdu
109, fall; 110, spring. 3 credits each term. Prerequisite for Hindi 110: Hindi 109 or equivalent. Staff.
An entry-level sequence for students with some prior exposure to Hindi-Urdu or a closely related language. This course sequence will provide a thorough grounding in all the language skills: listening, speaking, reading, and writing. Completion of this sequence, including satisfactory performance on an examination given at the end of Hindi 110, will constitute a level of performance equal to that of the 101–102 sequence, and will thus be considered to fulfill qualification for the language requirement plus eligibility for 200-level Hindi-Urdu courses. Check with instructor regarding placement.

[HINDI 201–202 Intermediate Hindi Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Hindi 201, Hindi 102; for Hindi 202, Hindi 201 or permission of instructor. Not offered 1999–2000. Staff.]

HINDI 203–204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Hindi 203, Hindi 102; for Hindi 204, Hindi 203 or permission of instructor. Staff.
Throughout this course sequence all aspects of language learning are practiced: listening, speaking, reading, and writing. In 203, video materials are used and the emphasis is on the conversational aspect of the language. In 204, the focus shifts to reading skills and the main text used is a popular novel.

HINDI 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

[HINDI 301–302 Advanced Readings in Hindi Literature @
301, fall; 302, spring. 4 credits each term. Prerequisites: for Hindi 301, Hindi 202; for Hindi 302, Hindi 301 or equivalent. Not offered 1999–2000. Staff.
Selected readings in modern Hindi literature.]

HINDI 303–304 Advanced Composition and Conversation @
303, fall; 304, spring. 4 credits each term. Prerequisites: for Hindi 303, Hindi 204 or equivalent; for Hindi 304, Hindi 303 or equivalent. Staff.

[HINDI 305–306 Advanced Hindi Readings @
305, fall; 306, spring. 4 credits each term. Prerequisites: for Hindi 305, Hindi 202 or equivalent; for Hindi 306, Hindi 305 or equivalent. Not offered 1999–2000.
Intended for those who wish to do readings in history, government, economics, etc., instead of literature.]

Indonesian

For students who have completed Indonesian 121–122–123 or its equivalent there is the option of a one-semester program in Malang, East Java, during the junior year. The program combines a variety of cultural and artistic options with area course work and advanced language study. Complete information is available through Cornell Abroad.

Students who have completed a minimum of 18 credits or the equivalent are eligible to apply for a summer program in the Advanced Indonesian Abroad Program. Further information is available from Professor John Wolff (307 Morrill Hall, 255–0733).

INDO 121–122 Elementary Indonesian
121, fall; 122, spring. 4 credits each term. Prerequisite: for Indonesian 122, Indonesian 121. Staff.
A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

INDO 123 Continuing Indonesian
Fall. 4 credits. Prerequisite: Indonesian 122 or equivalent. Satisfactory completion of Indonesian 123 fulfills the qualification portion of the language requirement. J. Wolff and staff.
Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings and sharpens listening skills.

INDO 203–204 Intermediate Composition and Conversation
203, fall; 204, spring. 3 credits each term. Prerequisites: for Indonesian 203, Indonesian 123; for Indonesian 204, Indonesian 203 or permission of instructor. J. Wolff and staff.

INDO 205–206 Intermediate Indonesian @
205, fall; 206, spring. 3 credits each term. Prerequisites: for Indonesian 205, Indonesian 123 or equivalent; for Indonesian 206: Indonesian 205 or equivalent. Satisfactory completion of Indonesian 205 fulfills the proficiency portion of the language requirement. Staff.
This course develops all four skills: reading, writing, speaking, and comprehension.

INDO 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. J. Wolff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

INDO 301–302 Advanced Readings in Indonesian and Malay
301, fall; 302, spring. 4 credits each term. Prerequisites: for Indonesian 301, Indonesian 205–206 or equivalent; for Indonesian 302, Indonesian 301. J. Wolff and staff.

INDO 303–304 Advanced Indonesian Conversation and Composition
303, fall; 304, spring. 4 credits each term. Prerequisites: for Indonesian 303, Indonesian 206; for Indonesian 304, Indonesian 303 or equivalent. J. Wolff and staff.

INDO 305–306 Directed Individual Study
305, fall; 306, spring. 2–4 credits. Prerequisites: Indonesian 301–302 and 303–304 or equivalent knowledge of Indonesian or Malay. Staff.
A practical language course on an advanced level in which the students will read materials in their own field of interest, write reports, and meet with the instructor for two hours a week for two credits and twice a week for four credits.

[INDO 401–402 Advanced Readings in Indonesian and Malay Literature
401, fall; 402, spring. 4 credits each term. Prerequisites: for Indonesian 401, Indonesian 302 or equivalent; for Indonesian 402, Indonesian 401 or equivalent. Not offered 1999–2000. J. Wolff and staff.]

FALCON (Full-year Asian Language CONcentration)

INDO 161–162 Intensive Indonesian
161, fall; 162, spring. 16 credits each term. Prerequisite: permission of instructor. J. Wolff and staff.

Japanese

JAPAN 101–102 Elementary Japanese
101, fall; 102, spring. 6 credits each term. Prerequisite for Japanese 102: Japanese 101 or placement by the instructor during registration period. Intended for beginners or for those who have been placed in the course by examination. Y. Nakanishi-Whitman, R. Sukle and staff.
A thorough grounding in all four language skills—speaking, hearing, reading, writing—at the beginning level, but with a special emphasis on oral communication and actual use of the language in social context. Homework for the course is largely work on the skill aspects of language through practice in the language lab with tapes or CD-ROM. The lecture provides explanation, analysis, and cultural background necessary for successful interaction with Japanese people. The sections are conducted entirely in Japanese. Materials covered are not the same as for Japanese 141–142.

JAPAN 121 Continuing Japanese
Fall. 6 credits. Prerequisite: placement by the instructor at beginning of semester. Y. Nakanishi.
Accelerated training in listening, speaking, reading, and writing with special emphasis on oral communication. For students who have already acquired a limited facility in Japanese through residence in Japan or through brief formal study and require fewer contact hours per week.

JAPAN 141–142 Beginning Japanese at a Moderate Pace
141, fall; 142, spring. 4 credits each term. Prerequisite for Japanese 142: Japanese 141 or placement by instructor during registration period. Y. Shirai and staff.
Beginning level training in listening, speaking, reading, writing, with more emphasis on written skills than Japanese 101–102. Classroom activities focus on oral communication skills. Homework for the course is largely written exercises. Fewer credits and fewer class contact hours than Japanese 101–102; the course meets 5 hours per week (MTWRF). Materials covered are not the same materials as Japanese 101–102.

JAPAN 201–202 Intermediate Japanese Conversation @
201, fall and summer; 202, spring and summer. 4 credits each term. Prerequisites: for Japanese 201, Japanese 102 or placement by the instructor during registration; for Japanese 202, Japanese 201 and 203 or placement by the instructor during registration. Y. Katagiri.

JAPAN 203–204 Intermediate Japanese Reading I @
203, fall; 204, spring. 2 or 3 credits each term. Prerequisites: for Japanese 203, Japanese 102, Japanese 142 or placement by the instructor during registration; for Japanese 204, Japanese 203 or placement by the instructor during registration. N. Nakada.
Reading of elementary texts emphasizing practical materials, with development of writing skills.

JAPAN 241–242 Intermediate Japanese at a Moderate Pace @
241, fall; 242, spring. 4 credits each term. Prerequisites: for Japanese 241, Japanese 142 or placement by instructor, for Japanese 242, Japanese 241 or placement by instructor. Y. Kawasaki and K. Selden.
Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command.

[JAPAN 251–252 Elementary/ Intermediate Japanese @
251, fall; 252, spring. 4 credits each term. Prerequisites: for Japanese 251, Japanese 160 or placement by instructor during registration period; for Japanese 252, Japanese 251, 102 or placement by instructor during registration period. Not offered 1999–2000. Y. Nakanishi-Whitman.
Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 and 202/204 into their schedules: MBA students, engineering students, hotel school students, arts college students, and others identical with 541–552. Can be followed by Japanese 351–352.]

JAPAN 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

JAPAN 301–302 Communicative Competence @
301, fall; 302, spring. 3 credits each term. Prerequisites: for Japanese 301, Japanese 202 and preferably Japanese 204, Japanese 242 or placement by the instructor during registration; for Japanese 302, Japanese 301 or placement by the instructor during registration. Y. Katagiri.
This is a course for students who have learned basic Japanese grammar and oral skill and would like to utilize the language for natural conversation and effective oral communication. The course is intended: 1) to expand vocabulary for daily life use; 2) to brush up on knowledge of basic grammar for fluency; and 3) to develop communicative skills for varied situations.

JAPAN 303–304 Intermediate Japanese Reading II @
303, fall; 304, spring. 4 credits each term. Prerequisites: for Japanese 303, Japanese 204 or placement by the instructor during registration; for Japanese 304, Japanese 303 or placement by the instructor during registration. K. Selden.
Reading of selected modern texts with emphasis on expository style.

[JAPAN 351–352 Advanced Japanese at a Moderate Pace @
351, fall; 352, spring. 4 credits each term. Prerequisites: for Japanese 351, Japanese 252 or placement by instructor during registration period; for Japanese 352, Japanese 351 or placement by instructor during registration period. Not offered 1999–2000.
Training in intermediate to advanced listening and speaking, and continued work on reading and writing. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 and 202/204 into their schedules: MBA students, engineering students, hotel school students, arts college students, and others. Also highly recommended for those with prior background in the language who are weak in the more complex and difficult grammar patterns.]

JAPAN 401–402 Oral Narration and Public Speaking
401, fall; 402, spring. 2 credits each term. Prerequisites: for Japanese 401, Japanese 302 or placement by the instructor during registration; for Japanese 402, Japanese 401 or placement by the instructor during registration. N. Nakada.
Instruction in making and delivering socially appropriate and effective speeches, with emphasis on both the construction of discourse and Japanese patterns of oral delivery.

JAPAN 403–404 Advanced Japanese Reading @
403, fall; 404, spring. 4 credits each term. Prerequisite: Japanese 304 or permission of instructor.
Section I: Area of Humanities. Cannot be used for distribution. K. Selden. Reading of selected modern texts with emphasis on expository style.

Section II: Area of Economics and Social Science. Cannot be used for distribution. Y. Kawasaki. Reading of selected modern texts with emphasis on expository style.

JAPAN 410 History of the Japanese Language (also Linguistics 411) @ #
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. J. Whitman.
An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

JAPAN 414 Linguistic Structure of Japanese (also Linguistics 404) @
Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and Linguistics 101 or equivalent introductory course in linguistics. Offered alternate years. J. Whitman.
Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

JAPAN 421–422 Directed Readings
421, fall; 422, spring. Credit to be arranged. Limited to advanced students. Prerequisite: placement by the instructor during registration. K. Selden.
Topics are selected on the basis of student needs.

[JAPAN 551–552 Intermediate Japanese for Business School Students
551, fall; 552, spring. 4 credits each term. Prerequisites: for Japanese 551, Japanese 160, and permission of instructor or placement by instructors during registration period; for Japanese 552, Japanese 551, 102, or placement by instructors during registration. Not offered 1999–2000. Y. Nakanishi-Whitman.
Training in listening, speaking, reading, and writing for students who have already acquired a basic oral proficiency. Course times are arranged to accommodate those in the MBA program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the more intensive 201/203 or 202/204 courses into their schedules.]

[JAPAN 555–556 Advanced Japanese for Business School Students
555, fall; 556, spring. 4 credits each term. Prerequisites: for Japanese 555, Japanese 552 or placement by instructors during registration period; for Japanese 556, Japanese 555 or placement by instructors during registration period. Not offered 1999–2000. Staff.
Training in listening and speaking at intermediate to advanced level; continued work on reading and writing at intermediate level. Course times are arranged to accommodate those in the MBA program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the more intensive 202/204 courses into their schedules.]

FALCON (Full-year Asian Language CONcentration)

Director: R. Sukle, 412 Morrill Hall; FALCON Secretary 414 Morrill Hall, 255–6457.

There are three small interactive classes per day conducted entirely in Japanese and one lecture conducted in English and Japanese. The interactive classes are conducted by experienced and highly trained native teachers; the lecture is conducted by an expert in Japanese language structure. Two one-

hour sessions in the language lab are required daily. Additional preparation time in the language lab is necessary in the evenings. Exposure to the language exceeds that of even students living and studying in Japan, providing over 1200 hours of exposure throughout the full-year program. The extensive exposure and intensive work on the language allows students to develop a level of fluency, accuracy and control of the language not achieved in any other type of academic settings. The course is designed to develop 'copability' in the students by bringing them up to the level where they will be able to successfully make further progress in the language on their own even if they do not have further formal instruction. The intensive nature of the program allows graduate students to complete their language work in minimal time and undergraduates, including freshmen, to achieve levels of Japanese that are far beyond what is normally achieved in a four-year program, provided they continue their study of Japanese after FALCON.

JAPAN 160 Introductory Intensive Japanese (FALCON)
Summer only. 8 credits. R. Sukle and staff.
(See general description above). This is the first term of the FALCON Program. It is a full-time, intensive, nine-week course which begins at the absolute beginning level, in speaking as well as rudimentary reading and writing. Formal application must be made to the program (see above), but admission is open to all students, not just those planning to take the full-year program. Students completing this course can move smoothly in the academic year to Japanese 251–252 or 551–552 for part-time work, or continue full time with Japanese 161–162.

JAPAN 161–162 Intensive Japanese (FALCON)
161, fall; 162, spring. 16 credits each term. Prerequisites: for Japanese 161, Japanese 160, or Japanese 102 at Cornell, or placement by FALCON staff prior to beginning of fall term; for Japanese 162, Japanese 161, or placement by FALCON staff prior to beginning of spring term. Students must apply formally to program (see above); application open to all Cornell students and students from other institutions.
(See general description above). Work on spoken and written Japanese from an intermediate level to an advanced level. This is a full-time program and full academic load; the demands of the program do not normally permit students to take other courses simultaneously. With a sequence of 160–161–162, in only one calendar year a student can complete as much Japanese as would be contained in three or more years of regular study at most academic institutions. This course sequence also serves to fulfill the language requirement for the MA in Asian Studies and the joint MBA/MA in Asian Studies.

Literature in Japanese

JPLIT 406 Introduction to Classical Japanese @#
Fall. 4 credits. Prerequisite: permission of instructor. K. Brazell.

[JPLIT 407 Advanced Classical Japanese
Spring. 4 credits. Prerequisite: JPLIT 406 or permission of instructor. Not offered 1999–2000. K. Brazell.]

JPLIT 421–422 Directed Readings
421, fall; 422, spring. 2–4 credits. Prerequisite: for JPLIT 421, Japanese 402 or equivalent; for JPLIT 422, Japanese 421 or equivalent. Staff.

[JPLIT 611 Seminar in Classical Japanese Literature
Spring. 2–4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1999–2000. K. Brazell.]

[JPLIT 612 Seminar in Medieval Genres
Spring. 2–4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1999–2000. K. Brazell.
This seminar will explore medieval literary genres in terms of the contemporary religious, social, political, and aesthetic discourses. Readings will be in classical and modern Japanese as well as in English.]

JPLIT 613 Seminar in Tokugawa Culture and Thought
Spring. 2–4 credits. Prerequisite: permission of instructor. Offered alternate years. N. Sakai.
This seminar will examine a variety of texts written during the Tokugawa period. The topics discussed in these are many: from the conceptualization of the virtue in the Confucian tradition, to the composition of Waka poetry. The texts are not selected from one school or from one teaching but encompass a wide range of intellectual trends including Neo-Confucianism, the Kogaku and the Kokugaku. In addition to the original texts of the Tokugawa period, we are going to read a few works of modern historiography on Tokugawa thought and culture. I do not think that these works necessarily represent the standard of the present-day Tokugawa studies, but they clearly show different approaches. In this seminar, we will evaluate critically these works through a careful reading of the original texts of the Tokugawa period.

JPLIT 614 Seminar in Modern Japanese Literature (also ComL 695)
Fall. 4 credits. Prerequisite: permission of instructor. B. deBary.
How might postmodern debates on language and difference transform our understanding of the project of cross-cultural learning institutionalized in postwar American area studies? Intended as an introductory course for graduate students, this class will emphasize weekly readings of important texts which have grappled with, or attempted to challenge, epistemological assumptions, categories, and processes which have informed modern disciplinary knowledge of cultural others. All readings will be done in English, and will attempt to trace the contours of debate over broad theoretical issues whose relevance is by no means confined to the question of area studies. Readings will include texts by Rosi Braidotti, Rey Chow, James Clifford, Jacques Derrida, Gilles Deleuze, William Haver, Luce Irigaray, Alice Jardine, and others.

Graduate-Level Reading Courses

[JPLIT 621 Advanced Readings in Pre-Modern Japanese Narrative Literature
Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. K. Brazell.]

[JPLIT 622 Advanced Readings in Pre-Modern Japanese Poetry
Spring. 2–4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. K. Brazell.]

[JPLIT 623 Advanced Readings in Pre-Modern Drama
Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. K. Brazell.]

JPLIT 624 Advanced Readings in Modern Japanese Literature
Spring. 4 credits. Prerequisite: permission of instructor. Offered alternate years. B. deBary.
The course will consider representations of the body and eroticism in fiction, poetry, film, and theoretical writings from the Taisho through early Showa periods (1912 to the late 1930's). Special attention will be given to writings about the "New Woman" and "Modern Girl," to sexuality in modernist cinematic and literary experiments, and to reciprocal relations between colonial and metropolitan culture. All readings will be done in Japanese.

JPLIT 700 Seminar: Reading of Historical Materials. Japanese imperial nationalism and its literature
Spring. 4 credits. N. Sakai.

Javanese

[JAVA 131–132 Elementary Javanese
131, fall; 132, spring. 3 credits each term. Prerequisite: for Javanese 132, Javanese 131 or equivalent. This language series (131–132) cannot be used to satisfy the language requirement. Not offered 1999–2000. J. Wolff and staff.
An elementary language course for those who have had no previous experience in the language.]

[JAVA 133–134 Continuing Javanese
133, fall; 134, spring. 3 credits each term. Prerequisites: for Javanese 133, Javanese 132 or equivalent; for Javanese 134, Javanese 133 or equivalent. Satisfactory completion of Javanese 134 fulfills the qualification portion of the language requirement. Not offered 1999–2000. J. Wolff and staff.
An intermediate conversation and reading course.]

[JAVA 203–204 Directed Individual Study
203, fall; 204, spring. 3 credits. Prerequisite: Javanese 134 or equivalent. Not offered 1999–2000. J. Wolff and staff.
This is a practical language course on an intermediate level in which the students will work through readings and conversations under the guidance of a native speaker for three contact hours a week.]

[JAVA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Not offered 1999–2000. J. Wolff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.]

Khmer (Cambodian)

[KHMER 101–102 Elementary Khmer
101, fall; 102, spring. 6 credits each term. Prerequisite: for Khmer 102, Khmer 101 or equivalent. Not offered 1999–2000. Staff.
A course for beginners or for those who have been placed in the course by examination. The course gives a thorough grounding in speaking and reading.]

[KHMER 201–202 Intermediate Khmer Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Khmer 201, Khmer 102; for Khmer 202, Khmer 201. Not offered 1999–2000. Staff.
Continuing instruction in spoken and written Khmer.]

[KHMER 203–204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Khmer 203, Khmer 102; for Khmer 204, Khmer 203. Not offered 1999–2000. Staff.
Letter writing and other forms of composition.]

[KHMER 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.]

[KHMER 301–302 Advanced Khmer @
301, fall; 302, spring. 4 credits each term. Prerequisites: for Khmer 301, Khmer 202 or equivalent; for Khmer 302, Khmer 301. Not offered 1999–2000. Staff.
Continuing instruction in spoken and written Khmer; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.]

[KHMER 401–402 Directed Individual Study
401, fall; 402, spring. For advanced students. 2–4 credits each term. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.
Various topics according to need.]

Korean

KOREA 101–102 Elementary Korean
101, fall; 102, spring. 6 credits each term. Satisfactory completion of Korean 102 fulfills the qualification portion of the language requirement. H. Diffloth and staff.
Covers basics of speaking, reading, and writing. Introduces Hangul writing system and grammar.

KOREA 109–110 Elementary Reading
109, fall; 110, spring. 3 credits each term. Prerequisite: permission of instructor. Satisfactory completion of Korean 110 fulfills the qualification portion of the language requirement. H. Diffloth and staff.
This course is for students who have spoken some Korean in the home, but whose reading and writing skills are limited or nonexistent. If in doubt about eligibility, see instructor.

KOREA 201–202 Intermediate Korean @
201, fall; 202, spring. 4 credits each term. Prerequisites: for Korean 201, Korean 102 or permission of instructor; for Korean 202, Korean 201. Satisfactory completion of Korean 201 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.
Covers the basics of speaking, reading, and writing at the intermediate level. Introduces some reading and writing with Chinese characters.

KOREA 209–210 Intermediate Reading
209, fall; 210, spring. 4 credits each term. Prerequisites: for Korean 209, Korean 110 or permission of instructor; for Korean 210, Korean 209 or permission of instructor. Satisfactory completion of Korean 209 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.
An intermediate level of reading comprehension and writing course for students who have acquired basic oral proficiency. Introduces some reading and writing with Chinese characters. If in doubt about eligibility, see instructor.

KOREA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. H. Diffloth.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

KOREA 301–302 Advanced Korean @
301, fall; 302, spring. 4 credits each term. Prerequisites: for Korean 301, Korean 202 or placement by instructor; for Korean 302, Korean 301 or placement by instructor. H. Diffloth and staff.
Reading of advanced texts, including newspapers and Chinese character material, together with advanced use of the spoken language.

[KOREA 430 Structure of Korean (also Linguistics 430)
Spring. 4 credits. Offered alternate years. Not offered 1999–2000. J. Whitman.
See description under Ling 430.]

Literature in Korean

[KRLIT 405 Readings in Korean Literature
Fall. 4 credits. Not offered 1999–2000.]

[KRLIT 406 Korean Literature Translation Workshop @
Spring. 2–3 credits. Prerequisite: Korean 301–302 or equivalent; permission of instructor. Not offered 1999–2000.]

Nepali

Study Abroad in Nepal

Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, co-sponsor an academic year in Nepal. North American students study and live with Nepalese students who come from outside the Kathmandu Valley to Tribhuvan University. Students may participate in one or two semesters. Courses are offered both at Tribhuvan University and at the Cornell-Nepal Study Program House adjacent to the university. All courses are officially taught in English. A five-week, in-country orientation program includes classes in intensive Nepali conversation, cultural orientation programs, and a ten-day field trip and trek. Semester course offerings include Nepali language (Tibetan and/or Newari languages also possible), contemporary issues in Nepalese studies, field research design and methods in sociology/anthropology and ecology/environment, and guided field research.

Juniors and seniors in good academic standing from any major field may participate. Students must have a desire to study on the other side of the world, to participate in a multicultural program, and to undertake rigorous field research. No experience in Nepal is necessary and instruction is in English, but some prior Nepali language study is strongly recommended. Students interested in the study abroad in Nepal program should consult with the Cornell Abroad office (474 Uris Hall) for further information.

NEPAL 101–102 Elementary Nepali
101, fall; 102, spring. 6 credits each term. Prerequisite: for Nepali 102, 101 or examination. S. Oja.
Intended for beginners. The emphasis is on basic grammar, speaking and comprehension skills, utilizing culturally appropriate materials and texts. Devanagari script for reading and writing is also introduced.

NEPAL 160 Intensive Nepali
Summer only. 10 credits. Intended for beginners. Offered alternate years. S. Oja.
Emphasis will be on the spoken language, in dialogues, exercises, and conversation practice. In addition, however, special attention is given to assisting students to develop vocabularies and abilities appropriate to their unique professional needs. Reading and writing practice use both colloquial and scholarly materials in the Nepali (Devanagari) script.

NEPAL 201–202 Intermediate Nepali Conversation @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Nepali 201, Nepali 102 or examination; for Nepali 202, Nepali 201 or examination. S. Oja.
Intermediate instruction in spoken grammar and verbal comprehension skills, with special attention to developing technical vocabularies and other verbal skills appropriate to students' professional fields.

NEPAL 203–204 Intermediate Nepali Composition @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Nepali 203, Nepali 102 or examination; for Nepali 204, Nepali 203 or examination. S. Oja.
A systematic review of written grammar and reading comprehension, with special attention to the technical vocabularies, necessary writing skills, and published materials typical of advanced students' professional fields.

NEPAL 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. S. Oja.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

NEPAL 301–302 Advanced Nepali
301, fall; 302, spring. 3 credits each term. Prerequisite: Nepali 204 or permission of instructor. S. Oja.
Reading of advanced texts, together with advanced drill on the spoken language.

Pali

See also courses listed in this section under South Asian Languages.

[PALI 131–132 Elementary Pali
131, fall; 132, spring. 3 credits each term. This language series cannot be used to satisfy the language requirement. Not offered 1999–2000. J. Gair.
131 is an introduction to the language of the canonical texts of Theravada Buddhism. Reading of authentic texts of Theravada Buddhism. Emphasis on both content and grammatical structure. Familiarity with Sanskrit is not required. 132 is a continuation of 131 with further readings.]

PALI 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. J. Gair.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Sanskrit

SANSK 131–132 Elementary Sanskrit (also Classics 131–132 and Linguistics 131–132)
131, fall, C. Minkowski; 132, spring, staff. 4 credits each term.
An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

[SANSK 251–252 Intermediate Sanskrit (also Classics 251–252 and Linguistics 251–252) @ #
251, fall; 252, spring. 3 credits each term. Prerequisite: Sanskrit 132 or equivalent. Not offered 1999–2000. A. Nussbaum, fall; C. Minkowski, spring.
Readings from the literature of classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics and selections from either Sanskrit story literature or from Sanskrit dramas.]

Literature in Sanskrit

[SNLIT 467–468 Reading in Sanskrit Literature: The Vedas @#
Spring. 3 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. Minkowski.]

Sinhala (Sinhalese)

SINHA 101–102 Elementary Sinhala
101, fall; 102, spring. 6 credits each term. Prerequisite: for Sinhala 102, Sinhala 101 or equivalent. Staff.
A semi-intensive course for beginners.
A thorough grounding is given in all the language skills; listening, speaking, reading, and writing.

SINHA 160 Intensive Sinhala
Summer only. 10 credits. Intended for beginners. Offered alternate years.
Emphasis is on the spoken (colloquial) language, the writing system is introduced and used to present all Sinhala materials, with additional reading practice with colloquial materials. A foundation is laid for later study of the written language (literary Sinhala).

SINHA 201–202 Intermediate Sinhala Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Sinhala 201, Sinhala 102; for Sinhala 202, Sinhala 201 or equivalent. Staff.

[SINHA 203–204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Sinhala 203, Sinhala 102 or permission of instructor; for Sinhala 204, Sinhala 203 or equivalent. Not offered 1999–2000. Staff.]

SINHA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

[LING 341 India as a Linguistic Area (also Linguistics 341)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. W. Gair.
A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to cross-linguistic family influences and convergence.]

[LING 440 Dravidian Structures (also Linguistics 440)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. W. Gair.
A comparative and contrastive analysis of the structures of several Dravidian languages.]

[LING 442 Indo-Aryan Structures (also Linguistics 442)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. W. Gair.
Typological discussion of the languages of the subfamily. Specific topics and emphasis may vary depending on the interest of the student.]

Southeast Asian Languages

[LING 230 Introduction to Southeast Asian Languages and Linguistics
Fall. 3–4 credits variable. For non-majors or majors. Not offered 1999–2000. A. Cohn, J. Wolff.
This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich language diversity of the region. It includes three main parts: 1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; 2) language structures and typological patterns of the area's languages; 3) historical linguistics, as well as the linguistic effects of language contact and linguistic evidence for prehistory.]

[LING 653–654 Seminar in Southeast Asian Linguistics
653, fall; 654, spring. 4 credits each term. Prerequisite: permission of instructor. Language 653 isn't a prerequisite for Language 654. Not offered 1999–2000. Staff.
Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.]

[LING 655–656 Seminar in Austronesian Linguistics (also Linguistics 655–656)
655, fall; 656, spring. 4 credits each term. Prerequisites: for 655, permission of instructor, for 656, Language 655. Not offered 1999–2000. J. Wolff.
Descriptive and comparative studies of Malayo-Polynesian languages.]

[LING 657–658 Seminar in Austoasiatic Linguistics (also Linguistics 657–658)
657, fall; 658, spring. 4 credits each term. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.
Descriptive and comparative studies of Austroasiatic languages.]

Tagalog

TAG 121–122 Elementary Tagalog
121, fall; 122, spring. 4 credits each term. Prerequisite: for Tagalog 122, Tagalog 121. Staff.
A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

[TAG 123 Continuing Tagalog
Fall. 4 credits. Prerequisite: Tagalog 122 or equivalent. Satisfactory completion of Tagalog 123 fulfills the qualification portion of the language requirement. Not offered 1999–2000. J. Wolff and staff.
Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings; and sharpens listening skills.]

TAG 205–206 Intermediate Tagalog @
205, fall; 206, spring. 3 credits each term. Prerequisites: for Tagalog 205, Tagalog 123 or equivalent; for Tagalog 206, Tagalog 205 or equivalent. Satisfactory completion of Tagalog 205 fulfills the proficiency portion of the language requirement. Staff.
This course develops all four skills: reading, writing, speaking, and comprehension.

TAG 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Thai

THAI 101–102 Elementary Thai
101, fall; 102, spring. 6 credits each term. Prerequisite: for Thai 102, Thai 101 or equivalent. Intended for beginners or students placed by examination. N. Jagacinski.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

THAI 201–202 Intermediate Thai Reading
201, fall; 202, spring. 3 credits each term. Prerequisites: for Thai 201, Thai 102; for Thai 202, Thai 201 or equivalent. N. Jagacinski.

THAI 203–204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Thai 203, Thai 102; for Thai 204, Thai 203. N. Jagacinski.

THAI 301–302 Advanced Thai @
301, fall; 302, spring. 4 credits each term. Prerequisite: Thai 202 or equivalent. N. Jagacinski.
Selected readings in Thai writings in various fields.

THAI 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. N. Jagacinski.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

THAI 303–304 Thai Literature
303, fall; 304, spring. 4 credits each term. Prerequisite: Thai 302 or equivalent. N. Jagacinski.
Reading of significant novels, short stories, and poetry written since 1850.

THAI 401–402 Directed Individual Study
401, fall; 402, spring. 4 credits each term. For advanced students or students with special problems or interests. Prerequisite: permission of instructor. N. Jagacinski.

Urdu

See listings under Hindi.

Vietnamese

VIET 101–102 Elementary Vietnamese
101, fall; 102, spring. 6 credits each term. Prerequisite: for Vietnamese 102, Vietnamese 101 or equivalent. Intended for beginners or students placed by examination. Satisfactory completion of Vietnamese 102 fulfills the qualification portion of the language requirement. T. Tranviet.
A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

VIET 201–202 Intermediate Vietnamese
201, fall; 202, spring. 3 credits each term. Prerequisites: for Vietnamese 201, Vietnamese 102 or equivalent; for Vietnamese 202, Vietnamese 201. T. Tranviet.
Continuing instruction in spoken and written Vietnamese.

VIET 203–204 Intermediate Vietnamese Composition and Reading @
203, fall; 204, spring. 3 credits each term. Prerequisite: permission of instructor only. T. Tranviet.
Designed for students and "native" speakers of Vietnamese whose speaking and listening are at the advanced level, but who still need to improve writing and reading skills.

VIET 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. T. Tranviet.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

VIET 301–302 Advanced Vietnamese @
301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for Vietnamese 301, Vietnamese 202 or permission of instructor; for Vietnamese 302, Vietnamese 301. T. Tranviet.
Continuing instruction in spoken and written Vietnamese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

VIET 401–402 Directed Individual Study
401, fall; 402, spring. 2–4 credits variable each term. Prerequisite: permission of instructor. Intended for advanced students. T. Tranviet.
Various topics according to need.

[VTLIT 222–223 Introduction to Classical Vietnamese @ #
222, fall; 223, spring. 3 credits. Prerequisite: qualification in Vietnamese or permission of instructor. Not offered 1999–2000. K. Taylor.
This is the first semester of a two-semester sequence of courses introducing students to Han (Classical Chinese as used in the Vietnamese language) and Nom (vernacular Vietnamese character writing). Students will learn to read Han and Nom texts, mostly from the 17th through 19th centuries, including historical records, prose writings, and poetry.]

VTLIT 224 Continuing Classical Vietnamese @ #
Fall. 3 credits. K. Taylor.
This course continues study for students who have completed VTLIT 222–223 "Introduction to Classical Vietnamese."

ASTRONOMY

J. F. Veverka, chair (312 Space Sciences Building, 255–6920); M. P. Haynes, director of undergraduate studies (530 Space Sciences Building 255–0610); J. F. Bell, J. A. Burns, D. B. Campbell, D. F. Chernoff, J. M. Cordes, M. M. Davis, S. S. Eikenberry, E. E. Flanagan, P. J. Gierasch, R. Giovanelli, P. F. Goldsmith, T. L. Herter, J. R. Houck, D. Lai, R. V. E. Lovelace, P. D. Nicholson, C. J. Salter, S. W. Squyres, G. J. Stacey, Y. Terzian, S. A. Teukolsky, J. F. Veverka, I. M. Wasserman. Emeritus: T. Gold, T. Hagfors, M. O. Harwit, E. E. Salpeter

Cornell's astronomy faculty, research staff, and graduate students are active in diverse areas of modern astronomy ranging from theoretical astrophysics and general relativity to radio and radar astronomy, infrared and optical astronomy, and the exploration of the solar system. Cornell operates two local optical observatories, the world's largest radio telescope at Arecibo, Puerto Rico, and with two other institutions, the 200-inch optical telescope at Mt. Palomar in California. The department faculty are also Principal Investigators on several major NASA space and planetary exploration missions.

The department offers a number of courses to satisfy a general interest in astronomy. These courses have few or no prerequisites and are not intended for the training of professional astronomers. Among the introductory courses, several choices are available, depending on background and on the requirements to be fulfilled. The 100-level courses are designed primarily for non-science majors. The alternative introductory sequence Astronomy 211–212 is geared toward sophomore physical science and engineering majors and requires coregistration in beginning calculus. Astronomy 201 and 202 are intended for students with an interest in astronomy but no scientific background; they are topical rather than survey-oriented. Astronomy 332 is designed for physical science and engineering majors as an introduction to astrophysics. Other courses at the 200 and 300 levels may appeal to students of various backgrounds and interests, as indicated in the individual course descriptions.

Courses numbered above 400 are intended for students who have had two to three years of college physics and at least two years of college mathematics. Astronomy 440, Independent Study, permits students to engage in individual research projects under the guidance of a faculty member.

Interested students are encouraged to become members of the undergraduate Cornell Astronomy Club. The club has access to the Fuertes Observatory on campus and conducts regular observing and astrophotography sessions. All students are invited to visit the Space Sciences Building, see the exhibits on display there, and consult a faculty member about career plans or choice of courses.

The Major

The purpose of the major in astronomy is to provide in-depth knowledge and education about the nature of the universe. Astronomy relies heavily on preparation in physics and mathematics. Consequently, many courses in these fields are included as prerequisites. In preparation for the major, a student would normally elect the introductory physics sequence Physics 112–213–214 or 116–217–218 and the complementary pathway in mathematics, Mathematics 111–122–221–222 or 191–192–293–294 (or equivalent). Students who anticipate undertaking graduate study are urged to elect the honors physics sequence Physics 116–217–218–318–327 if possible. The sophomore seminar, Astronomy 233 "Topics in Astronomy and Astrophysics," will provide an introduction to current research in astronomy and astrophysics for prospective majors, but is not required of students who elect to major in astronomy after the sophomore year. Students are also urged to acquire computer literacy. Acceptance to the major will first be considered after completion of three semesters of introductory physics and mathematics and in general will require a GPA of 3.20 in physics and mathematics courses.

The major requirements stress the importance of building a strong preparation in physical science. The following upper level courses are normally required:

Physics 314 or 318, 316, 323 or 327, 341 and 443

Mathematics 420 and 422 (or equivalent, e.g. A&EP 321–2)

Astronomy 410, 431, and 432.

Students interested in planetary studies may substitute one or more appropriate advanced courses upon consent of the major adviser or may pursue an independent major under the program in the Science of Earth Systems. In addition, majors are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level. Advanced seniors can enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects under the course Astronomy 440 or to apply to a variety of programs at Cornell, Arecibo, and elsewhere that offer undergraduates summer employment as research assistants. Nearly all undergraduate majors and concentrators become involved in research projects in the upperclass years.

Students whose interest in astronomy is sparked somewhat late in their undergraduate career are encouraged to discuss possible paths with the Director of Undergraduate Studies in Astronomy.

Honors. A student may be granted honors in astronomy upon the recommendation of the Astronomy Advisers Committee of the astronomy faculty.

Double majors. A double major in astronomy and another subject is possible in many circumstances. However, the set of courses used to fulfill the requirements for each major must be completely independent.

Concentration. The concentration in astronomy for other majors normally requires 12 credits, at least 8 of which must be at the 300 level or above. Astronomy 233 is recommended for sophomores planning to concentrate in astronomy.

Distribution Requirement

All courses in astronomy, except Astronomy 233, may be used to fulfill the science distribution requirement in the Colleges of Arts and Sciences.

Courses

ASTRO 101 The Nature of the Universe
Fall. 4 credits. No prerequisites. Labs and discussions limited to 30 students each. T. Herter, labs: J. Bell.
This course introduces students to the cosmos. The birth, evolution, and death of stars, the formation of the chemical elements, and the nature of white dwarfs, neutron stars, and black holes are discussed. An introduction to the theories of special relativity and general relativity is given. The course covers the search for other worlds outside the solar system and the possible existence of life and intelligence elsewhere in the universe. Modern theories of cosmology are presented, and the origin, structure, and fate of the universe are discussed. The full notes for the course as well as sample exams and simulations are made available on the web.

ASTRO 102 Our Solar System
Spring. 4 credits. No prerequisites. Labs and discussions limited to 30 students each. J. Veverka; labs: J. Bell.
A survey of the current state and past evolution of our solar system, with emphasis on results from the direct exploration of planets by spacecraft. The course is divided into four parts: theories of formation; the inner planets; the outer solar system; and the search for life in the solar system and elsewhere. Stress is placed on the important processes that have shaped the evolution of planets and satellites.

ASTRO 103 The Nature of the Universe
Fall. 3 credits.
Identical to Astronomy 101 except for omission of the laboratory (see description above).

ASTRO 104 Our Solar System
Spring. 3 credits.
Identical to Astronomy 102 except for omission of the laboratory (see description above).

ASTRO 105 An Introduction to the Universe
Summer. 3 credits.
How do we measure the size of our galaxy and the size of the universe? Is the universe round or flat? How are the stars born, why do they shine, and how do they die? What are the chemical elements, and how were they formed in stars? What are quasars, pulsars, and black holes? How was the solar system formed? What are the environments of other planets like? What is the basic structure of Earth and the other planets? Will we catastrophically alter the earth? Does life exist elsewhere in the universe? How can we find out? Each student has an opportunity to make observations with small telescopes.

ASTRO 106 Essential Ideas in Relativity and Cosmology
Summer. 3 credits. Prerequisites: high school algebra and trigonometry.
Einstein's theories of special and general relativity, which brought about a fundamental change in our conceptual understanding of space and time, will be studied. Correspondence to, and conflicts with, common sense will be pointed out. Applications to various areas will be studied: in special relativity—space travel, equivalence of mass and energy, nuclear fission and fusion, and thermonuclear processes in the sun; in general relativity—motion of light and particles in curved space-time, cosmological models, and the question of whether the universe is open or closed.

ASTRO 107 An Introduction to the Universe
Summer. 4 credits.
Identical to Astronomy 105 except for the addition of the afternoon laboratory.

[ASTRO 109 Freshman Writing Seminar: Questions in Astronomy?
Spring. 3 credits. Not offered 1999–2000.
This class, an introduction to critical, logical thought, will present the basics of the scientific method, how science works in practice, and scientific standards of evidence. We will discuss the evolution of repeatable data into natural law and ideas into accepted theories. Historical illustrations will be drawn from the Copernican Revolution, the Big Bang Theory, and the Search for Extraterrestrial Intelligence. We will also examine pseudoscienes such as astrology and ufology, compare them to their scientific counterparts, and demonstrate that they consistently fail to meet rigorous scientific standards. Students will be asked to write logical criticism of items in the news and assigned readings from Carl Sagan's *Demon-Haunted World* and James Burke's "Connections," and design and report on their own small scientific experiments.]

ASTRO 195 Observational Astronomy
Fall. 3 credits. Limited to 20 students. G. Stacey.
This course provides a "hands-on" introduction to observational astronomy intended for liberal arts students at the freshman and sophomore level. High school mathematics is assumed, but there are no formal prerequisites. The course objective is to teach how we know what we know about the Universe. The course is set up with 2 lectures and 1 evening laboratory per week. Not all of the evening sessions will be used. Planned exercises include 5 or 6 observational labs (star gazing with binoculars and small telescopes, telescopic observations and CCD imaging of star clusters, nebulae and the planets, solar observations, radio observations of the Milky Way Galaxy), plus a selection of exercises from the following: construction and use of simple instruments such as optical spectroscopes and sun dials; experiments in planetary cratering; collection and study of micrometeorites; computer simulations of planetary orbits and the effects of obliquity on planetary weather; and cosmological explorations using data from the Hubble Space Telescope available on the World Wide Web.

ASTRO 201 Our Home in the Universe
Fall. 3 credits. Assumes no scientific background. Course intended for freshmen and sophomores. R. Giovanelli, M. Haynes.
A general discussion of our relation to the physical universe and how our view of the universe has changed from ancient to modern times. Several main themes are covered over the course of the semester: (1) our view of the night sky from the ancient Greeks to the Hubble Space Telescope; (2) the death of stars and the formation of black holes; (3) dark matter and the structure of galaxies and (4) the origin, evolution, and fate of the universe. We present a nonmathematical introduction to these subjects and discuss uncertainties and unresolved issues in our understanding.

ASTRO 202 Our Home in the Solar System
Spring. 3 credits. Prerequisite: some background in science is required. Course intended for freshmen and sophomores. J. Bell.
This writing course is designed to develop an understanding of our home planet as a member of a diverse and fascinating family of objects in our solar system. Discussion will center on how studies of other planets and satellites have broadened our knowledge and perspective of Earth, and vice versa. We will study, debate, and learn to write critically about important issues of science, ethics, and public policy that have emerged from this new found perspective. Topics to be discussed include global warming, nuclear winter, the impact threat, and the searches for extrasolar planets and extraterrestrial intelligence. Our exploration of these and other topics will be up-to-date, interactive, and possibly controversial.

ASTRO 211 Astronomy: Stars, Galaxies, and Cosmology
Fall. 4 credits. Intended for engineering and physical sciences freshmen and sophomores. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191. J. Houck.
The formation and evolution of normal stars, supernovae, pulsars, and black holes. The interstellar medium. Cosmology and the structure and evolution of galaxies.

ASTRO 212 The Solar System: Planets, Satellites, and Rings
Spring. 4 credits. Intended for first and second year engineering and physical sciences students. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191; some knowledge of classical physics (mechanics and thermodynamics). P. Nicholson, D. Campbell.
An introduction to the solar system, with emphasis on the application of simple physical principles. Topics will include the Sun, nucleosynthesis of the elements, radioactive dating, seismology and planetary interiors, planetary surfaces and atmospheres including greenhouse models, orbital mechanics and resonances, interrelations between meteorites, asteroids and comets, the Jovian planets, icy moons and ring systems, and the search for extra-solar planets.

ASTRO 233 Topics in Astronomy and Astrophysics
Fall. 2 credits. Prerequisites: Physics 112 or 116 and 213 or 217, Mathematics 112, 122, or 192, or permission of instructor. Intended for sophomores planning to major in astronomy or related fields. D. Chernoff.
A seminar course on selected topics in astronomy and astrophysics designed for prospective astronomy majors. Content will vary from year to year, but will include topics from the fields of planetary, galactic, and extragalactic research.

ASTRO 280 Space Exploration
Spring. 3 credits. S. Squyres.
This course provides an overview of space science, with particular emphasis on the solar system, and a detailed examination of a few selected objects, including the planet Mars, the

satellites in the outer solar system, and comets. The focus is on methods of collecting information and especially on spacecraft and space missions. Topics will include the design and limitations of instruments. Ethical and political questions associated with space exploration will be discussed. Intended for students with an interest in science, technology, and associated policy issues. No special background in physical sciences, math, or engineering is assumed.

ASTRO 290 Relativity and Astrophysics
Spring. 4 credits. Prerequisites: knowledge of freshman physics, calculus, and geometry. I. Wasserman.
This course provides a geometrically based introduction to special and general relativity, followed by consideration of astrophysical applications. Included will be discussion of tests of Einstein's theory of space, time, and gravitation; physics of white dwarfs, neutron stars, and black holes; introduction to modern cosmology.

ASTRO 299 Search For Life in the Universe
Spring. 4 credits. Prerequisites: two courses in any physical science subject or permission of instructor. J. Cordes, S. Eikenberry.
The contents of the universe will be surveyed. Theories of cosmic and stellar evolution, and of the formation and evolution of planetary systems, planetary atmospheres and surfaces will be reviewed. Questions regarding the evolution of life and the development of technology will be discussed. Methods to detect extraterrestrial life with emphasis on radio telescopes and associated instrumentation will be presented. Hypothetical communication systems will be developed and discussed.

ASTRO 331 Climate Dynamics (also SCAS 331)

ASTRO 332 Elements of Astrophysics
Spring. 4 credits. Prerequisites: Math 112, 122, 192 or equivalent. Physics 213 or 217. R. Giovanelli, G. Stacey.
An introduction to astronomy, with emphasis on the application of physics to the study of the universe. Physical laws of radiation. Distance, size, mass, and age of stars, galaxies, and the universe; stellar evolution and nucleosynthesis. Supernovae, pulsars, and black holes. Galaxies and quasars. Introduction to cosmology. The structure and evolution of planets and of the solar system. Mainly intended for students of science, engineering and science education, interested in astronomy and astrophysics.

ASTRO 410 Experimental Astronomy
Fall. 4 credits. Prerequisites: Physics 214/8 (or 310 or 360), Physics 323/7 (or co-registration) or permission of instructor. J. Cordes, J. Houck, D. Campbell.
Observational astrophysics. Major experiments will involve techniques in CCD (charge-coupled-device) imaging, optical photometry, optical spectroscopy, radiometry, radio spectroscopy and radio astronomy. The experiments involve use of the Hartung-Boothroyd Observatory's 24-inch telescope, a laboratory 2-element radio interferometer, and a radio telescope mounted on top of the Space Sciences Building. The laboratory covers the fundamentals of using astronomical instrumentation and data analysis as applied to celestial phenomena: asteroids, normal stars, supernova remnants, globular clusters, planetary nebulae, the interstellar medium, OH masers, and galaxies.

ASTRO 431 Introduction to Astrophysics and Space Sciences I
Fall. 4 credits. Prerequisites: mathematics above the 200 level and physics above the 300 level; Physics 443 is recommended. D. Lai.
A systematic development of modern astrophysical concepts for physical science majors. Stellar structure and evolution, stellar atmospheres, compact objects (white dwarf, neutron star and black hole), planets and brown dwarfs. Current research problems in these areas will be introduced along the way. The emphasis will be on using fundamental physics principles to explain astronomical phenomena. A variety of physics, including elements of general relativity, nuclear physics, sold state physics and fluid mechanics, will be introduced or reviewed in a quick, practical fashion and put into use in solving astrophysics puzzles. At the level of *Astrophysical Concepts* by Harwit.

ASTRO 432 Introduction to Astrophysics and Space Sciences II
Spring. 4 credits. Prerequisite: Astronomy 431 or permission of instructor. D. Chernoff.
This course is divided into two broad topics; the astrophysics of the interstellar medium and cosmology. The interstellar medium section will cover thermal equilibrium and radiative transport in HII regions, atomic gas regions, and molecular clouds. The cosmology section will include expansion of the universe, metrics, Friedmann equations, dark matter, cosmological tests, the early universe, and the cosmological production of the elements.

[ASTRO 434 The Evolution of Planets
Spring. 4 credits. Not offered 1999–2000.
An introduction to the physical and chemical processes that have been active in altering the environments of planets and satellites from their original to their present state. Theories of the formation of the solar system are revealed with special emphasis on chemical differentiation of the primeval solar nebula. A critical assessment is made of how well the various theories account for the clues left in the meteorite record and how well they explain the current environments of the planets and satellites. The main ideas about the formation and evolution of terrestrial planets, satellite systems, and asteroids are considered in detail. Some specific topics included are the history of the earth-moon system, the probable evolution of Jupiter's Galilean satellites, and the comparative histories of Venus, Earth, and Mars.]

ASTRO 440 Independent Study in Astronomy
Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Recommended: familiarity with the topics covered in Astronomy 332, 431, or 434.
Individuals work on selected topics. A program of study is devised by the student and instructor. Students need to fill out an independent study form, have it signed by the instructor, and register in the department office, 510 Space Sciences Building.

[ASTRO 485 Atmospheric and Ionospheric Physics (also ELE E 485)
Fall. 3 credits. Prerequisites: Physics through 214 or equivalent, introductory chemistry, introductory differential equations. Not offered 1999–2000. Staff.
The structure and dynamics of the middle atmosphere and the ionosphere are surveyed. Topics include energy balance and thermal structure, global circulation patterns, waves that carry energy from the lower atmosphere to the upper atmosphere, ionization, production and loss of charged particles, coupling of the neutral atmosphere with electric fields, and charged particle transports. Observation techniques, including radar and in situ instruments, will be discussed. Comparisons with other planets will be made.]

[ASTRO 490 Senior Seminar Critical Thinking
Spring. 3 credits. Not offered 1999–2000.
Critical thinking in scientific and nonscientific contexts. Topics will include elements of classical logic and rhetoric, including standards of evidence. Case studies will include examples of competing hypotheses in the history of science, as well as examples from borderline science and medicine, religion, and politics. Stress will be laid on creative generation of alternative hypotheses and their winnowing by critical scrutiny. Topics will include the nature and history of the universe, the nature of reality, the possibilities of life on other planets, and artificial intelligence.]

[ASTRO 509 General Relativity
Fall. 4 credits. Not offered 1999–2000.
For description, see PHYS 553.]

[ASTRO 510 Applications of General Relativity
Spring. 4 credits. Not offered 1999–2000.
For description, see PHYS 554.]

ASTRO 511 Physics of Black Holes, White Dwarfs, and Neutron Stars (also Physics 525)
Spring. 4 credits. D. Lai.
The formation of compact objects; neutrino and gravitational radiation from supernova collapse and neutron stars. Equilibrium configurations, equations of state, stability criteria and mass limits: the influence of rotation and magnetic fields. Pulsar phenomena. Mass flow in binary systems; spherical and disk accretion; high-temperature radiation processes. Compact X-ray sources and gamma-ray bursts. Super massive black holes and active galactic nuclei. Emphasis will be on the application of fundamental physical principles to compact objects. No astronomy or general relativity prerequisites. Text: *Physics of Black Holes, White Dwarfs, and Neutron Stars*, by Shapiro and Teukolsky. Co-registration in ASTRO 699 recommended.

[ASTRO 516 Galactic Structure and Stellar Dynamics
Fall. 4 credits. Not offered 1999–2000.
This course is an introduction to the study of the structure of galaxies via the laws of modern physics. Topics include the observed kinematics and spatial distribution of stars in the vicinity of the Sun, shapes and properties of stellar orbits, the gravitational N-body problem, collisional relaxation in stellar systems, spiral structure, galaxy classification and evolution, and cosmological results in galaxy formation.]

ASTRO 520 Radio Astronomy
Fall. 4 credits. D. Campbell, J. Cordes.
Radio astronomy telescopes and electronics; antenna theory; observing procedures and data analysis; concepts of interferometry and aperture synthesis.

[ASTRO 523 Signal Modeling, Statistical Inference, and Data Mining in Astronomy
Spring. 4 credits. Not offered 1999–2000.
The course aims to provide tools for modeling and detection of various kinds of signals encountered in the physical sciences and engineering. Data mining and statistical inference from large and diverse databases will also be covered. Experimental design is to be discussed. Basic topics covered include: probability theory; Fourier analysis of continuous and discrete signals; digital filtering; matched filtering and pattern recognition; spectral analysis; Karhunen-Loeve analysis; wavelets; parameter estimation; optimization techniques; Bayesian statistical inference; deterministic, chaotic, and stochastic processes; image formation and analysis; maximum entropy techniques. Specific applications will be chosen from current areas of interest in astronomy, where large-scale surveys throughout the electromagnetic spectrum and using non-electromagnetic signals (e.g., neutrinos and gravitational waves) are ongoing and anticipated. Applications will also be chosen from topics in geophysics, plasma physics, electronics, artificial intelligence, expert systems, and genetic programming. The course will be self-contained and is intended for students with thorough backgrounds in the physical sciences or engineering.]

ASTRO 525 Techniques of Optical/ Infrared and Submillimeter Astronomy
Spring. 4 credits. T. Herter, G. Stacey.
Optical/infrared and submillimeter telescopes and instrumentation will be discussed and related to current research in these fields. The course includes telescope design and general optical design (ray tracing). CCD, photoconductor, photovoltaic, bolometer, impurity band conduction, and heterodyne detection systems are presented. The instrumentation discussion includes general instrument design and specific applications to cameras, spectrographs, and interferometers. Detection limits of various systems, cryogenic techniques, and astronomical data anlaysis techniques are also discussed. Special topics include speckle interferometry and adaptive optics.

ASTRO 530 Astrophysical Processes
Spring. 4 credits. R. Giovanelli, M. Haynes.
Thermal and nonthermal radiation processes encountered in studies of stars, the interstellar and intergalactic media, galaxies and quasars. Fundamentals of radiative transfer, bremsstrahlung, synchrotron radiation, and Compton scattering will be covered, as well as spectral line transfer, gas heating and cooling, and topics in atomic and molecular spectroscopy. These topics will be discussed within the framework of astrophysical situations, such as star formation, interstellar gas and dust clouds, jets, active galactic nuclei, clusters of galaxies and cosmology.

[ASTRO 555 Theory of the Interstellar Medium
Spring. 4 credits. Not offered 1999–2000.
Global theories of the interstellar medium-mass and energy exchange between the different phases. The role of shock waves and energic outflows in the thermal equilibrium and ionization state of gas in the galaxy. Basic astrophysical fluids and plasmas. Galactic dynamics. Observations techiques, current problems and results.]

[ASTRO 560 Theory of Stellar Structure and Evolution (also Physics 667)
Fall. 4 credits. Not offered 1999–2000.
Observational overview; hydrostatic equilibrium; equations of state; radiative and convective energy transport; nuclear burning; solar neutrinos; rotation and magnetic fields; stellar seismology; brown dwarfs; pre-main sequence contraction.]

ASTRO 570 Physics of the Planets
Fall. 4 credits. P. Nicholson.
An introductory survey of planetary science with an emphasis on the application of physical principles. Planetary dynamics, including satellite orbits, tidal interactions, resonances, and ring dynamics. An introduction to the theory of planetary interiors, gravitational fields, heat sources, and rotational mechanics. Physics of planetary atmospheres, including radiative transfer, convection, and thermal structure. Important observational results, including those of ground-based optical, infrared, radio, and radar astronomy, as well as those made by spacecraft, will also be discussed. Intended for graduate students and seniors in astronomy, physics, and engineering.

ASTRO 571 Mechanics of the Solar System (also Theoretical and Applied Mechanics 673)
Spring. 3 credits. J. Burns.
Gravitational potential, planetary gravity fields. Free and forced rotations. Chandler wobble, polar wander, damping of nutation. Equilibrium tidal theory, tidal heating. Orbital evolution of natural satellites, resonances, spin-orbit coupling. Cassini states. Long-term variations in planetary orbits. Orbital and Rotational Chaos. Dust dynamics. Dynamics of ring systems. Seismic waves, free oscillations. Illustrative examples are drawn from contemporary research.

[ASTRO 579 Celestial Mechanics
Fall. 3 credits. Not offered 1999–2000.
For description, See T&AM 672.]

[ASTRO 590 Galaxies and the Universe
Spring. 4 credits. Not offered 1999–2000.
The universe, its constituents, its large-scale structure, and its history in the light of the major thrusts of extragalactic research. The morphology, photometry, dynamics, and kinematics of galaxies and their subsystems. Determination of masses, mass-to-light ratios, and the "missing mass." Activity in Seyferts, radio galaxies, and quasars. Binaries, groups, clusters and superclusters. The extragalactic distance scale. Galaxy formation and evolution. Confrontation of cosmological theories with observational results.]

ASTRO 599 Cosmology (also Physics 599)
Fall. 4 credits. Prerequisites: statistical physics, quantum mechanics and electromagnetic theory. I. Wasserman.
This course is intended to provide a detailed theoretical development of current ideas in cosmology. Topics will include observational overview; growth of irregularities, galaxy formation and clustering; big bang cosmology, recombination, nucleosynthesis; very early universe, symmetry breaking, inflationary scenarios. At the level of Peebles, *Principles of Physical Cosmology*.

[ASTRO 620 Seminar: Advanced Radio Astronomy
Spring. 2 credits. Prerequisites: some background in extragalactic astronomy and/or radio astronomy suggested. Open to advanced undergraduates by permission of instructor. Not offered 1999–2000.
Selected topics in observational cosmology at radio wavelengths including: redshift surveys, gas stripping mechanisms, rotation curves and the distributions of mass and light, large scale structure, peculiar motions, atomic and molecular studies at high redshift, the Sunyaev-Zel'dovich effect, evolution of radio luminosity function, and the cosmic microwave background.]

[ASTRO 621 Seminar: Planetary Radar Astronomy
Spring. 3 credits. Prerequisites: intended for graduate students and upper-level undergraduates in astronomy, engineering, and geology. A good background in undergraduate mathematics and physics is required. Not offered 1999–2000.
The application of radar to the study of the surfaces of planets, planetary satellites, asteroids, and comets. Topics covered will be target detectability and the specification of the needed antennas, transmitters, and receiving systems; data processing techniques; imaging techniques including delay-Doppler imaging, synthetic aperture radar (SAR) and interferometric SAR; target characterization from cross section, scattering laws and polarization measurements; results from earth-based and spacecraft radar observations of Mercury, Earth, the Moon, Mars, the satellites of Jupiter, the rings of Saturn, asteroids, and comets.]

ASTRO 640 Advanced Study and Research
Fall or spring. Credit to be arranged.
Guided reading and seminars on topics not currently covered in regular courses. Students need to register in the department office, 510 Space Sciences Building.

[ASTRO 652 Advanced Atmospheric Dynamics (also SCAS 652)
Spring. 3 credits. Offered alternate years. Not offered 1999–2000.
For description, see SCAS 652.]

[ASTRO 660 Cosmic Electrodynamics (also Applied and Engineering Physics 608)
Spring. 2 credits. Not offered 1999–2000.]

ASTRO 671 Seminar: Planetary Science
Fall. 3 credits. J. Veverka.
An informal series of lectures discussing the techniques used to obtain and interpret spacecraft and earth-based remote sensing data to the planets, satellites and smaller bodies in the solar system. Intended for graduate students and seniors. The emphasis this year will be on the continuing exploration of Io, Jupiter's volcanically active moon.

[ASTRO 673 Seminar: Planetary Atmospheres
Spring. 2 credits. Not offered 1999–2000.
This course will deal with motions in planetary atmospheres. Among the topics to be discussed are the Venus general circulation, dust and water transports on Mars, alternating jets on the outer planets, and compositional layering in the outer planets.]

[ASTRO 690 Seminar: Computational Astrophysics (also Physics 680)
Spring. 3 credits. Prerequisites: working knowledge of FORTRAN. Not offered 1999–2000. S. Teukolsky.
A course designed to familiarize graduate students with numerical techniques for solving diverse problems in astrophysics. Numerical methods discussed in the course will include solving ordinary and partial differential equations, linear algebra and eigenvalue problems, Monte Carlo techniques, fast Fourier transforms, etc. In contrast to traditional numercial analysis courses, the course will be "how-to," rather than theoretical. No theorems will be proved. Students will be allotted computer time to solve, both individually and in small teams, assigned numerical exercises. Text: *Numerical Recipes* by Press, Teukolsky, Vetterling, and Flannery.]

[ASTRO 699 Seminar: Problems in Theoretical Astrophysics (also Physics 665)
Fall. 2 credits. Not offered 1999–2000.
An informal seminar that will examine "New Directions in Astrophysics." The participants will discuss neutrino astronomy, LIGO (the gravitational wave observatory), high energy gamma rays and cosmic rays, laboratory searches for dark matter, and the future of optical, radio, and infrared astronomy, both on the ground and in space. The seminar is open to all graduate students.]

ASTRO 699 Seminar: Observational High Energy Physics (also Physics 665)
Spring. 2 credits. ASTRO 511 (PHYS 525) is strongly recommended as a co- or prerequisite. S. Eikenberry.
This is a seminar for graduate students, and is intended as a companion course to ASTRO 511 (PHYS 525). The seminar will take an approach to understanding compact objects (primarily black holes and neutron stars) based on their observed properties, in order to complement the primarily theoretical approach of ASTRO 511. The focus will be on areas of recent progress in the field of high energy astrophysics. Topics to be covered include (but are not limited to): rotation-powered pulsars (including millisecond pulsars and magnetars), black-hole X-ray binaries, microquasars and other relativistic jet sources, X-ray bursters, kilohertz QPO sources and gamma-ray bursts.

BIOLOGICAL SCIENCES

Biology is a popular subject at many universities for a variety of reasons: it is a science that is in an exciting phase of development; it prepares students for careers in challenging and appealing fields such as human and veterinary medicine, environmental sciences, and biotechnology; and it deals with the inherently interesting questions that arise when we try to understand ourselves and the living world around us. Many of the decisions we face today deal with the opportunities and problems that biology has put before us.

The major in biological sciences at Cornell is available to students enrolled in either the College of Agriculture and Life Sciences or the College of Arts and Sciences. Student services associated with the major, such as the Behrman Biology Center and the Office of Undergraduate Biology, are available to students from either college.

The biology major is designed to enable students to acquire the foundations in physical and life sciences necessary to understand modern biology and to pursue advanced studies in a specific area of biology. Programs of study include animal physiology; biochemistry; cell biology; ecology and evolutionary biology; general biology; genetics and development; microbiology; neurobiology and behavior; systematics and biotic diversity and plant biology. A special program of study is available for qualified students with an interest in nutrition. Students interested in the marine sciences may consult the Cornell Marine Programs Office (G14 Stimson Hall, 255–3717) for academic advice and career counseling. For more details about the biology curriculum, see the section in this catalog on Biological Sciences.

CHEMISTRY AND CHEMICAL BIOLOGY

P. L. Houston, chair (122 Baker Laboratory, 255–4174); R. C. Fay, director of undergraduate studies; H. D. Abruña, A. C. Albrecht, B. A. Baird, T. P. Begley, J. M. Burlitch, B. K. Carpenter, R. A. Cerione, J. C. Clardy, G. W. Coates, D. B. Collum, H. F. Davis, F. J. DiSalvo, S. E. Ealick, G. S. Ezra, R. C. Fay, J. H. Freed, B. Ganem, M. A. Hines, R. Hoffmann, P. L. Houston, S. Lee, R. F. Loring, T. McCarrick, J. E. McMurry, J. Meinwald, S. O. Russo, D. Y. Sogah, D. A. Usher, B. Widom, C. F. Wilcox, P. T. Wolczanski, D. B. Zax

S. T. Marcus, associate director of undergraduate studies

The chemistry department offers a full range of courses in physical, organic, inorganic, analytical, theoretical, bioorganic, and biophysical chemistry. In addition to their teaching interests, chemistry faculty members have active research programs. The link between teaching and research is a vital one in a continuously evolving scientific subject; it ensures that students will be provided with the most advanced information and perspectives, and affords opportunities for students to participate in research.

The Standard Major

The chemistry major at Cornell provides a great deal of flexibility and prepares students for a large variety of career options. In recent years, chemistry majors have gone on to graduate study in chemistry, medicine, law, and business management, as well as directly into positions with chemical, pharmaceutical, and other industrial companies. A major in chemistry can also provide the basis for work in related areas such as molecular biology, chemical physics, geochemistry, chemical engineering, materials science, solid state physics, and secondary education. The required courses for the major can be completed in three years, leaving the senior year open for advanced and independent work under the supervision of a professor.

The courses are arranged as a progression, with some (including mathematics and physics) prerequisite to those that are more advanced. During the first year, a student should normally register for general chemistry (preferably Chemistry 215–216 although Chemistry 207–208 or 206–208 is acceptable), mathematics, a freshman writing seminar, a foreign language if necessary, or physics. Chemistry 215–216 is aimed at those students with good preparation and a strong interest in chemistry. Students who do not know if their preparation is adequate should consult the instructor. In the second year a student should complete calculus and take physics and organic chemistry (Chemistry 359–360 is preferred to Chemistry 357–358). The second-year laboratory courses include 300, Quantitative Chemistry and 301, Experimental Chemistry I. Chemistry 389–390, Physical Chemistry I and II, and Chemistry 302–303, Experimental Chemistry II and III, should be completed in the third year. Chemistry 410 should be completed in the third or fourth year. Advanced work in chemistry and related subjects can be pursued in the fourth year and in the earlier years as well. The opportunity for independent research is also available. All students with questions about the major are encouraged to consult the chair of the Department of Chemistry and Chemical Biology or the chair's representative. Entering students who are exceptionally well prepared in chemistry may receive advanced placement credit for Chemistry 207.

Prerequisites for admission to a major in chemistry are (1) Chemistry 215–216, 300; or 207–208, 300; or 211, 208, 300; or 206, 208, 300; (2) Physics 207 or 112; and (3) Mathematics 111 or 191. Students are not encouraged to undertake a major in chemistry unless they have passed those prerequisite courses at a good level of proficiency. The minimum additional courses that must be completed for the standard major in chemistry are listed below.

1) Chemistry 301–302–303, 359–360 (357–358 may be substituted), 389–390, and 410
2) Mathematics 112, 213; or 122, 221–222; or 192–293–294
3) Physics 208

Potential majors electing to take Mathematics 213 are strongly urged to do so in their sophomore year to avoid scheduling conflicts with Chemistry 389 in their junior year.

The sequence described above is a basic program in chemistry that students can extend substantially in whatever direction suits their own needs and interests. Those going on to do graduate work in chemistry should recognize that these requirements are minimal and should supplement their programs, where possible, with further courses such as Chemistry 405, 605, 606, 666, 668, and 681. Even students not planning graduate work in chemistry should consider advanced work in physics and mathematics, courses in the

biological sciences, and advanced work in chemistry as possible extensions of the basic program.

Honors. The honors program in chemistry offers superior students in the standard major an opportunity to study independently in seminars and to gain additional experience by engaging in research during the senior year. It is particularly recommended to those who plan graduate work in chemistry. Prospective candidates should complete the introductory organic chemistry and physical chemistry sequences by the end of the junior year, although failure to have completed those courses in the junior year does not in itself disqualify a student from the honors program. Completion of the program at a high level of performance leads to the degree of Bachelor of Arts with honors in chemistry. Students will be admitted to the program by invitation of the department, with selection based on a superior cumulative average, including chemistry grades, and good performance in at least 4 credits of research at Cornell.

Prospective candidates should discuss their plans with advisers by March 1 of their junior year; participants are notified by early January of their senior year. To be awarded honors, candidates must show outstanding performance in at least 8 credits of undergraduate research such as is offered in Chemistry 421, 433, 461, or 477. In addition, the writing of a thesis in the honors seminar (Chemistry 498) is expected.

The Alternative Major

The alternative major is a flexible program that provides core coverage of chemistry around which students can design a program to meet their own career goals. Requirements consist of a core program along with four additional courses chosen by the student. One of the four must be in chemistry at the 300 level or above; the other three may be in another field but should represent a cohesive plan and must be approved by a departmental committee.

The Core Program for the Alternative Major

1) Chemistry 215–216, 300 (or 207–208, 300; or 211, 208, 300; or 206, 208, 300); 251, 257, 287, 289, and 410 (Chem 357–358 or 359–360 can be substituted for Chem 257, or Chem 389–390 can be substituted for Chem 287, thereby fulfilling the requirement for an additional 300-level chemistry course)
2) Mathematics 111–112; or 111, 122; or 191–192
3) Physics 207–208; or 112, 213

Additional Courses for the Alternative Major

Possible plans for the remaining three courses might include programs in Biochemistry; Biology; Physics; Computer Science; Polymers; Materials Science; Science, Technology, and Society; History and Philosophy of Science and Technology; Business and Management; Economics; Education; and others.

Premedical students and those interested in pursuing double majors might find the alternative major particularly attractive. The course requirements for admission to the alternative major are the same as those for the standard major.

Program for Science Teachers

Chemistry majors who wish to become teachers will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7–12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students integrate some course work in Education with the rest of their undergraduate studies. All chemistry majors who enter this program will remain in the College of Arts and Sciences to complete the major.

After earning the bachelor's degree, certification students enter the Graduate Field of Education to complete a fifth year of study at Cornell. Following this fifth year, students are eligible for a master's degree from Cornell and a teaching certificate from New York State. Additional information is available from Susie Slack, 424 Kennedy Hall, 255–9255 or Prof. Deborah Trumbull, 426 Kennedy Hall, 255–3108.

Laboratory Course Regulations

Students registered for laboratory courses who do not appear at the first meeting of the laboratory will forfeit their registration in that course.

Students and members of the teaching staff are required to wear safety goggles and lab aprons in all chemistry laboratories. Closed-toed footwear is required (no sandals). Students are reminded to take their goggles and lab aprons to the first laboratory session. Those who fail to cooperate with the safety program will be asked to leave the laboratories.

Students are required to pay for glassware and any other items broken or missing from their laboratory desks at the close of each semester. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a $10 fee in addition to charges for any breakage.

Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

Preliminary examinations for all courses may be given in the evening.

CHEM 105 The Language of Chemistry
Fall. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" (Group I) distribution requirement, as well as satisfying the C.A.L.S. physical science requirement of one course in chemistry. S-U or letter grades. Lecs, M W F 12:20. Prelims: in normal class period at 12:20 p.m. J. Meinwald.

In his autobiography, A. Kornberg (Nobel Laureate in Medicine, 1959) wrote, "much of life can be understood in rational terms if expressed in the language of chemistry. It is an international language, a language for all time, a language that explains where we came from, what we are, and where the physical world will allow us to go." Through careful examination of a few milestone investigations of naturally occurring biologically important compounds (such as the antimalarial quinine, bombykol, and the sperm attractants of algae), the principles of chemistry to which Kornberg refers will be developed. Methods of analyzing chemical problems will be emphasized, rather than the memorization of specific results or formulas. There will be an opportunity for students, working in small groups, to prepare and present short reports on topics of particular current interest at the interface between chemistry and biology.

CHEM 106 Strategies in Science: The World of Chemistry
Spring. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" distribution requirement (Group I) as well as satisfying the C.A.L.S. physical science requirement of one course in chemistry. S-U or letter grades. Lecs, M W F 1:25. Prelims: 7:30–9 p.m., Feb. 29, March 30. M. A. Hines.

A general appreciation of chemistry in the everyday world which will highlight for nonscientists the way the scientific method works. The course will focus not only on what modern chemistry has accomplished, but more generally on the way scientists think and how they function.

CHEM 206 Introduction to General Chemistry
Fall or summer. 4 credits. Enrollment limited. Recommended for students who have not had high school chemistry and for those needing a less intensive course than Chemistry 207. Lecs, M W F 11:15; dis sec, W 7:00–8:30 p.m.; lab, T R or F 8:00–11:00, or M W or F 1:25–4:25. Prelims: 7:30–9 p.m., Oct. 5, Nov. 11. S. Lee.

An introduction to general chemistry, with emphasis on important principles and facts. Chemistry 206 covers much of the same material as Chemistry 207 plus the basics of chemical equilibrium, but does so at a slower pace.

CHEM 207–208 General Chemistry
Fall or summer, 207; spring or summer, 208. 4 credits each term. Recommended for those students who will take further courses in chemistry. Prerequisite for Chemistry 207: high school chemistry. Prerequisite for Chemistry 208: Chemistry 206 or 207. Lecs: T R 10:10 or 12:20. Lab: T R F 8–12 or M T W R F 12:20–4:25. Prelims: 7:30–9 p.m., Oct. 5, Nov. 11, Feb. 29, April 11. Fall: J. E. McMurry; spring: R. C. Fay.

Fundamental chemical principles and descriptive facts are covered, with considerable attention given to the quantitative aspects and to the techniques important for further work in chemistry. Second-term laboratory includes a systematic study of qualitative analysis.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry 207 by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall. Taking Chemistry 208 after 215 is not recommended and can be done only with the permission of the 208 instructor.

CHEM 211 Chemistry for the Applied Sciences
Fall or spring. 4 credits. Recommended for those students who intend to take only one term of chemistry. Enrollment limited. Prerequisite: high school chemistry or

permission of instructor. Corequisite: a calculus course at the level of Mathematics 111 or 191. Lecs: M W F 12:20. Lab: fall and spring, M T W R F 1:25–4:25. Prelims: 7:30–9 p.m., Sept. 23, Oct. 21, Nov. 23, Feb. 17, March 14, April 13. Fall: H. F. Davis; spring: D. B. Zax.

Important chemical principles and facts are covered with the objective of understanding the role of chemistry in other fields. Emphasis is on topics such as solid-state materials, periodic trends, and specific classes of compounds, such as polymers.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall.

CHEM 215–216 General and Inorganic Chemistry

Fall, 215; spring, 216. 4 credits each term. Recommended for students who intend to specialize in chemistry or in related fields. Enrollment limited. Prerequisites: good performance in high school chemistry, physics and mathematics. Corequisite: a calculus course at the level of Mathematics 111 or 191 for students who have not taken high school calculus. Prerequisite for Chemistry 216: Chemistry 215. Lecs: M W F 12:20; lab, M T W R or F 1:25–4:25. Prelims: 7:30–9 p.m., Oct. 5, Nov. 11, Feb. 17, March 14, April 13. Fall: R. Hoffmann; spring: S. Lee.

An intensive systematic study of the laws and concepts of chemistry, with considerable emphasis on quantitative aspects. Second term includes systematics of inorganic chemistry. Laboratory work covers qualitative and quantitative analysis, transition metal chemistry, and spectroscopic techniques.

Note: Taking Chem 208 after 215 is not recommended and can be done only with the permission of 208 instructor.

CHEM 233 Introduction to Biomolecular Structure

Fall. 2 credits. Limited to 30 students. Prerequisites: CHEM 207–208 or equivalents. Lecs, T R 2:30–3:20. S. E. Ealick.

This course is intended for students with a basic understanding of chemistry who are considering a program of study in biochemistry. The interrelationship of the structure and function of biologically important molecules are explored. Emphasis is placed on understanding the way in which the three-dimensional arrangements of atoms determine the biological properties of both small molecules and macromolecules such as proteins and enzymes. The study of molecular structure is aided by interactive computer graphics for visualizing three-dimensional structures of molecules.

CHEM 251 Introduction to Experimental Organic Chemistry

Fall, spring, or summer. 2 credits. Recommended for non-chemistry majors. Enrollment limited. Prerequisites: coregistration in Chemistry 257 or 357. Lecs: fall, R 11:15 or F 8:00; spring, F 8; lab, M T W R or F 1:25–4:25, or T or R 8–11. Prelims: 7:30–9 p.m., Fall: Nov. 11. Spring: April 18. S. Russo.

Introduction to the synthesis, separation, and handling of materials, including applications of many types of chromatography, simple and fractional distillation, crystallization, extraction, and others.

CHEM 252 Elementary Experimental Organic Chemistry

Spring. 2 credits. Recommended for non-chemistry majors. Prerequisite: Chemistry 251. Lec, R 11:15; lab, W 1:25–4:25, or R 8–11. Prelims: 7:30–9 p.m. April 18. S. Russo.

A continuation of Chemistry 251.

CHEM 257 Introduction to Organic and Biological Chemistry

Spring. 3 credits. Prerequisite: Chemistry 206 or 207. Because Chemistry 257 is only a three-credit course, it does not provide a practical route to satisfying medical school requirements. Lecs, M W F 11:15. Prelims: in normal class period at 11:15. J. Meinwald.

An introduction to organic chemistry with an emphasis on those structures and reactions of organic compounds having particular relevance to biological chemistry.

CHEM 287–288 Introductory Physical Chemistry

Fall, 287; spring, 288. 3 credits each term. Prerequisites: Chemistry 208 or 216 and Mathematics 111–112 and Physics 208, or permission of instructor. Prerequisite for Chemistry 288: Chemistry 287 or 389. Lecs, M W F 9:05; 287: rec, M or W 1:25, T 9:05; 288: rec, M or W 1:25. Prelims: 7:30–9 p.m., 287: Sept. 30, Nov. 4, Nov. 30. 288: March 9, April 18. Fall: A. C. Albrecht; spring: TBA.

A systematic treatment of the fundamental principles of physical chemistry, focusing in the fall on thermodynamics and the quantum mechanics of the periodic table and chemical bonding. In the spring the course will be oriented to the application of physical chemistry to biological systems, including transport, kinetics, electrochemistry, spectroscopy. Chemistry 287 satisfies the minimum requirement for physical chemistry in the alternative chemistry major.

CHEM 289–290 Introductory Physical Chemistry Laboratory

Fall, 289; spring, 290. 2 credits each term. Lecs: fall, R 8:00 a.m.; spring, R 8:00 or 9:05. Lab: fall, M T 1:25–4:25; spring, M T W R 1:25–4:25. T. McCarrick.

A survey of the methods basic to the experimental study of physical chemistry, with a focus on the areas of kinetics, equilibrium, calorimetry and molecular spectroscopy.

CHEM 300 Quantitative Chemistry

Fall. 2 credits. Prerequisite: Chemistry 208, or Chemistry 216 or advanced placement in chemistry. Lec, R 10:10; lab, M T W R F 12:20–4:25 or T 8–12. Prelim: 7:30–9 p.m., Oct. 21, Nov. 16. J. M. Burlitch.

Volumetric, spectrophotometric, and potentiometric methods are emphasized. Techniques are learned by analysis of knowns, and then are used on unknowns. Lectures and problem sets stress the relationship between theory and applications.

CHEM 301 Experimental Chemistry I

Spring. 4 credits. Prerequisites: Chemistry 300, and 357 or 359. Lec, M W F 8:00; 2 labs, M W 1:25–4:25 or T R 8–11 or T R 1:25–4:25. J. M. Burlitch.

An introduction to the techniques of synthetic organic chemistry. A representative selection of the most important classes of organic reactions will be explored in the laboratory. Laboratory techniques and the theoretical basis for the separation and characterization techniques used will be discussed in the lectures.

CHEM 302 Experimental Chemistry II

Fall. 4 credits. Enrollment limited; preference given to chemistry majors. Prerequisite: Chemistry 301. Lecs, M W F 9:05; 2 labs, M W 1:25–4:25, T R 8–11 or T R 1:25–4:25. B. A. Baird.

Instrumental methods of analysis, including chemical microscopy, UV, IR and AA spectroscopies, and gas chromatography. The design, execution, and analysis of experiments is stressed.

CHEM 303 Experimental Chemistry III

Spring. 4 credits. Each lab limited to 11 students. Prerequisites: Chemistry 302, 389, 390; coregistration in the latter is permissible. Lecs, M W F 9:05; 2 labs, M W 1:25–4:25, or T R 9:00–12 or T R 1:25–4:25. H. D. Abruña.

An introduction to experimental physical chemistry, including topics in calorimetry, spectroscopy and kinetics. The analysis and numerical simulation of experimental data is stressed.

CHEM 357–358 Organic Chemistry for the Life Sciences

Fall or summer, 357; spring or summer, 358. 3 credits each term. Prerequisite for Chemistry 357: Chemistry 208 or 216 or advanced placement; recommended: concurrent registration in Chemistry 251 or 300. Prerequisite for Chemistry 358: Chemistry 357 or permission of the instructor. Lecs, M W F 9:05 or 10:10, optional rec may be offered. Prelims: 7:30–9 p.m., Sept. 30, Oct. 19, Nov. 16, Feb. 17, March 14, April 13. Fall: B. K. Carpenter; spring: J. C. Clardy.

A study of the more important classes of carbon compounds—especially those encountered in the biological sciences. Emphasis will be placed on their three-dimensional structures, mechanisms of their characteristic reactions, their synthesis in nature and the laboratory, methods of identifying them, and their role in modern science and technology.

Note: Because of duplication of material, students who take both Chemistry 257 and 357 will receive graduation credit only for Chemistry 257.

CHEM 359–360 Organic Chemistry I and II

Fall, 359; spring, 360. 4 credits each term. Recommended for students who intend to specialize in chemistry or closely related fields. Enrollment limited. Prerequisites: Chemistry 216 with a grade of B or better, Chemistry 208 with a grade of A or better, or permission of instructor. Prerequisite for Chemistry 360: Chemistry 359. Recommended: coregistration in Chemistry 300–301–302. Lecs, M W F 9:05; dis sec, W 7:30 p.m.; prelims, 7:30–9:00 p.m., Sept. 22, Oct. 20, Nov. 10, Spring: 7:30–9:00 p.m., Feb. 9, March 8, April 5. Fall: B. Ganem; spring, G. W. Coates.

A rigorous and systematic study of organic compounds, their structures, the mechanisms of their reactions, and the ways they are synthesized in nature and in the laboratory.

CHEM 389–390 Physical Chemistry I and II
Fall, 389; spring, 390. 4 credits each term. Prerequisites: Mathematics 213 or, ideally, 221–222; Physics 208; Chemistry 208 or 216 or permission of instructor. Prerequisite for Chemistry 390: Chemistry 389. Lecs, 389: M W F 10:10; rec M or W 1:25 or T 9:05. Lecs, 390: M W F 10:10; prelims: 7:30–9 p.m. 389: Sept. 30, Nov. 2, Nov. 30. 390: Feb. 17, March 14, April 13. Fall: M. A. Hines; spring: 390: H. F. Davis.
The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.

CHEM 391 Physical Chemistry II (also CHEM E 391)
Spring. 4 credits. Enrollment limited to engineering students only. Prerequisites: Mathematics 293; Physics 112, 213; Chemistry 208 or 216 or permission of instructor. Co-requisite: Math 294. Prerequisite for Chemistry 391: Chemistry 389. Lecs, M W F 9:05; rec M 1:25 or T 9:05; T. M. Duncan.
The study of two topics: (1) Quantum chemistry—the electronic structure of atoms, molecules, and condensed matter; the interaction of electromagnetic radiation with matter for spectroscopy and chemical reaction. (2) Chemistry kinetics—reaction rate laws from experimental data and reaction mechanisms; approximation methods and applications to polymerization and heterogeneous catalysis.

CHEM 404 Entrepreneurship in Chemical Enterprise
Spring. 1 credit. Lecs, T 2:55–4:10. B. Ganem.
Designed to acquaint students with the problems of planning, starting, and managing a new scientifically oriented business venture, the course will consist of six weekly 90-minute meetings focusing on case studies and assigned reading, as well as outside lectures by entrepreneurs in the chemical, pharmaceutical, and biotechnology industries. Topics will include new technology evaluation and assessment, business formation, resource allocation, management development, as well as manufacturing and sales issues.

[CHEM 405 Techniques of Modern Synthetic Chemistry
Spring. 3 or 6 credits. Enrollment limited. Prerequisites: Chemistry 302 *and* permission of instructor. To receive three credits, students must perform a minimum of three two-week experiments. Six credits will be given for three additional experiments. Completion of five exercises in elementary glass-blowing will count as one experiment. Lab time required: 16 hours each week, including at least two 4-hour sessions in one section (M W 1:25). First meeting will be at 1:30 on first class day of semester. Lec, first week only, at times to be arranged. Not offered 1999–2000. J. M. Burlitch.
The syntheses of complex organic, organometallic, and inorganic molecules are carried out with emphasis on the following techniques: vacuum line, high pressure, high-temperature solid state, inert atmosphere, nonaqueous solvents, radioactive labeling, sol-gel, photochemical and electrochemical methods, solid phase peptide synthesis, and polymer synthesis. Elementary glassblowing.]

CHEM 410 Inorganic Chemistry
Fall. 4 credits. Prerequisites: Chemistry 358 or 360, and 287 or 390. Lecs, M W F 11:15. Prelims: 7:30–9:00 p.m., Sept. 23, Oct. 21, Nov. 18. P. T. Wolczanski.
A systematic study of the synthesis, structure, bonding, reactivity and uses of inorganic compounds, organometallic complexes and solid state species.

CHEM 421 Introduction to Inorganic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 303 and 389–390, or Chemistry 287–288, and Chemistry 289–290 with an average of B– or better, or permission of instructor. Selected faculty.
Research in inorganic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 433 Introduction to Analytical Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 303 and 390 with an average of B– or better or permission of instructor. Selected faculty.
Research in analytical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 461 Introduction to Organic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 302 and 358 or 360 with a grade of B– or better or permission of instructor. Selected faculty.
Research in organic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 477 Introduction to Physical Chemistry Research
Fall or spring. 2–4 credits. Prerequisite: Chemistry 390 with an average of B– or better or permission of instructor. Selected faculty.
Research in physical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 498 Honors Seminar
Spring. No credit. Admission to standard chemistry majors only by departmental invitation. Additional prerequisites or corequisites: outstanding performance in either (1) two coherent 4-credit units of research in a course such as Chemistry 421, 433, 461, or 477; or (2) one 4-credit unit in a course such as Chemistry 421, 433, 461, or 477 and summer research equivalent to at least 4 credits in the same subject. W 2:30–4. R. Hoffman.
Informal presentations and discussions of selected topics in which all students participate. Professional issues will be discussed, including graduate education, publication, techniques of oral and audiovisual presentation, employment, ethics, chemistry in society, and support of scientific research. Individual research on advanced problems in chemistry or a related subject under the guidance of a faculty member, culminating in a written report.

CHEM 600–601 General Chemistry Colloquium
Fall, 600; spring, 601. No credit. Required of all graduate students except those majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. R 4:40. D. B. Zax.
A series of talks representative of all fields of current research interest in chemistry other than organic chemistry, given by distinguished visitors and faculty members.

[CHEM 602 Information Literacy for the Physical Scientist
Spring. 1 credit. Primarily for undergraduate chemistry majors doing research and first-year graduate students. Lec, W 4:45–6:00. Not offered 1999–2000.
An introduction to physical science information research methods, including use of paper and electronic resources. With the continued information explosion, much time can be wasted and important information missed unless an efficient information research strategy is developed. This course demonstrates the use of library and other information resources as a method to critically evaluate the success of research projects. Text: *Journal Literature of the Physical Sciences* by Alice Leffer Primack and *Chemical Information Sources* by Gary Wiggins.]

CHEM 605 Advanced Inorganic Chemistry I: Symmetry, Structure, and Reactivity
Fall. 4 credits. Prerequisite: Chemistry 389–390 or equivalent or permission of instructor. Lecs, M W F 11:15. R. C. Fay.
Selected topics in structure, bonding, and reactivity of inorganic compounds with emphasis on main group elements; at the level of *Chemistry of the Elements*, by Greenwood and Earnshaw. Group theory applications: hybrid orbitals, molecular orbitals, molecular vibrations, and ligand field theory; at the level of Cotton's *Chemical Applications of Group Theory*.

[CHEM 606 Advanced Inorganic Chemistry II: Synthesis, Structure, and Reactivity of Coordination Compounds, and Bioinorganic Chemistry
Spring. 4 credits. Lecs, M W F 10:10. Not offered 1999–2000. P. T. Wolczanski.
Synthesis, structure, and reactivity of modern coordination compounds; oxidation and bioinorganic chemistry. Emphasis on bonding models, structure, and reactivity, including the elucidation of mechanisms. Readings at the level of Purcell and Kotz's *Inorganic Chemistry*, and Jordan's *Reaction Mechanisms of Inorganic and Organometallic Systems*.]

[CHEM 607 Advanced Inorganic Chemistry III: Solid-State Chemistry
Spring. 4 credits. Prerequisite: Chemistry 605 or permission of instructor. Lecs, M W F 11:15. Not offered 1999–2000. F. J. DiSalvo.
The third in a three-term sequence. Interdisciplinary approach to solids. Topics include solid-state structure and X-ray diffraction, synthesis methods, defects in solids, phase diagrams, electronic structure, and chemical and physical properties of solids. Text: *Solid State Chemistry and Its Applications*, by West. Readings from inorganic chemistry and solid-state physics texts.]

CHEM 608 Organometallic Chemistry
Spring. 4 credits. M W F 10:10. P. T. Wolczanski.
Synthesis, structure, and reactivity of organotransition metal complexes. Current literature is emphasized, and background readings are at the level of Collman, Hefedus, Finke and Norton's "Principles and Applications of Organotransition Metal Chemistry".

[CHEM 622 Chemical Communication
Fall. 3 credits. Lecs, M W F 10:10. Not offered 1999–2000. J. Meinwald, T. Eisner.
For description, see BIONB 623.]

CHEM 625 Advanced Analytical Chemistry I
Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or equivalent. Lecs, M W F 9:05; occasional prelims W 7:30 p.m. C. F. Wilcox.
The application of molecular spectroscopy to chemical problems. Topics in infrared, NMR, and mass spectroscopy are discussed.

[CHEM 627 Advanced Analytical Chemistry II
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 390 or equivalent; but Chemistry 793 or equivalent would be helpful. Lecs, M W F 12:20. Not offered 1999–2000. D. B. Zax.
Modern techniques in nuclear magnetic resonance. Little overlap is expected with Chem 625, as this course will focus on more general questions of experimental design, understanding of multipulse experiments, and aspects of coherent averaging theory. Example to be taken from both liquid and solid-state NMR. May also be of interest to other coherent spectroscopies.]

CHEM 628 Isotopic and Trace Element Analysis (also Nutritional Sciences 690)
Spring. 3 credits. Primarily for graduate students and advanced undergraduates. Prerequisite: Chemistry 288 or 390 or 302, or Chemistry 208 and Mathematics 112, or permission of instructor. Offered alternate years. Lecs T R 10:10. J. T. Brenna.
Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications.

CHEM 629 Electrochemistry
Fall. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: Chemistry 390 or equivalent (Mathematics 213 helpful). Lecs, T R 8:40–9:55. H. D. Abruña.
Fundamentals and applications of electrochemistry. Topics will include the fundamentals of electrode kinetics, electron transfer theory, the electrical double layer, diffusion, and other modes of transport. A wide range of techniques and their application as well as instrumental aspects will be covered.

CHEM 650–651 Organic and Organometallic Chemistry Seminar
Fall, 650; spring, 651. No credit. Required of all graduate students majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. M 4:30. D. Y. Sogah.
A series of talks representative of all fields of current research interest in organic and organometallic chemistry, given by research associates, faculty members, and distinguished visitors.

CHEM 665 Advanced Organic Chemistry
Fall. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisites: Chemistry 358 or 360, and 390 or equivalents or permission of instructor. Lecs, M W F 12:20. D. B. Collum.
A survey of reaction mechanisms and reactive intermediates in organic chemistry.

CHEM 666 Synthetic Organic Chemistry
Spring. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: Chemistry 665 or permission of instructor. Lecs, T R 10:10–11:25. B. Ganem.
Modern techniques of organic synthesis; applications of organic reaction mechanisms and retrosynthetic analysis to the problems encountered in rational multistep synthesis, with particular emphasis on modern developments in synthesis design.

CHEM 668 Chemical Aspects of Biological Processes
Fall. 4 credits. Prerequisite: Chemistry 360 or equivalent. Lecs, T R 8:40–9:55. T. P. Begley.
A representative selection of the most important classes of enzyme-catalyzed reactions will be examined from a mechanistic perspective. Topics discussed will include the chemical basis of enzymatic catalysis, techniques for the elucidation of enzyme mechanism, cofactor chemistry, and the biosynthesis of selected natural products. The application of chemical principles to understanding biological processes will be emphasized.

CHEM 670 Fundamental Principles of Polymer Chemistry
Fall. 4 credits. Prerequisite: Physical Chemistry 389/390 and Organic Chemistry 359/360 or equivalent or by permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymers is required. Lecs, T R 10:00–11:15. G. W. Coates.
This course emphasizes general concepts and fundamental principles of polymer chemistry. The first part of the course deals with general introduction to classes of polymers, molar masses and their distributions, and a brief survey of major methods of polymer synthesis—radical, step growth, ionic, group transfer, Ziegler-Natta and metathesis polymerization methods—with emphasis on kinetics and mechanisms rather than on structure. The second part deals with characterization and physical properties. These include: solution properties—solubility and solubility parameters, solution viscosity, molecular weight characterizations [gel permeation chromatography, viscometry, light scattering, osmometry]; bulk properties—thermal and mechanical properties; and structure-property relationships. The discussions will focus on chemistry rather than engineering of polymers.

CHEM 671 Synthetic Polymer Chemistry (also Materials Science and Engineering 671 and Chemical Engineering 675)
Spring. 4 credits. Prerequisites: Organic Chemistry 359/360 or equivalent or by permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymer chemistry is required. Knowledge of material covered in Chem 670 will be helpful but not required. Lecs, T R 8:30–10:00. D. Y. Sogah.
The objective of the course is to teach general concepts of polymer synthesis and discuss application of organic synthetic methods to the development of new polymers and the control of their architecture. Emphasis will be on modern concepts in synthetic polymer chemistry and cover topics of current interest: the study of new methods of synthesis, preparation of polymers with reactive end groups, the control of polymer stereochemistry and topology, and the design of polymers tailored for specific uses and properties. Topics on synthesis will be selected from the following: step-growth polymerization, free radical polymerization and copolymerization, Ziegler-Natta polymerization, recent developments in living free radical polymerization, anionic polymerization, cationic polymerization, group transfer polymerization, ring-opening metathesis polymerization, and cyclopolymerization.

CHEM 672 Kinetics and Regulation of Enzyme Systems
Fall. 4 credits. Primarily for graduate students with interests in biophysical chemistry. Prerequisite: Chemistry 288 or 390, BIOBN 331, or equivalents or permission of instructor. Lecs, M W F 10:10. P. L. Houston.
Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include: protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of cell membrane receptors in regulating cellular activities.

[CHEM 677 Chemistry of Nucleic Acids
Spring. 4 credits. Primarily for graduate students. Prerequisites: Chemistry 358 or 360, and 390 or equivalents. S-U grades only. Lecs, M W 10–11:10. Not offered 1999–2000. D. A. Usher.
Properties, synthesis, reactions, and biochemical reactions of nucleic acids.]

CHEM 678 Statistical Thermodynamics
Fall. 4 credits. Primarily for graduate students. Prerequisite: Chem 390 or equivalent. Lecs, M W F 10:10. J. Marohn.
The principles of statistical thermodynamics and how they lead to classical thermodynamics. Ensembles and partition functions. Ideal gases and crystals. Thermodynamic properties from spectroscopic and structural data. Chemical equilibrium. Dense gases: virial coefficients. Statistical mechanics of solutions. Bose-Einstein and Fermi-Dirac statistics. At the level of the first twelve chapters of *Statistical Mechanics* by McQuarrie.

CHEM 681 Introduction to Quantum Chemistry
Prerequisites: one year of undergraduate physical chemistry, three semesters of calculus, one year of college physics. Lecs: T R 10:10–11:25 a.m. R. F. Loring.

An introduction to the application of quantum mechanics in chemistry. This course covers many of the topics in Chemistry 793–794 at a more descriptive, less mathematical level. The course is designed for advanced undergraduates, chemistry graduate students with a minor in physical chemistry, and graduate students from related fields with an interest in physical chemistry. At the level of *Quantum Chemistry*, by Levine, or *Molecular Quantum Mechanics* by Atkins.

[CHEM 686 Physical Chemistry of Proteins
Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 288 or 390 or equivalents. S-U grades. Letter grades for undergraduates. Offered alternate years. Not offered 1999–2000.
Chemical constitution, molecular weight, and structural basis of proteins; thermodynamic, hydrodynamic, optical, spectroscopic, and electrical properties; protein and enzyme reactions; statistical mechanics of helix-coil transition in biopolymers; conformation of biopolymers; protein folding.]

CHEM 700 Baker Lectures
Fall, on dates to be announced. No credit.
Distinguished scientists who have made significant contributions to chemistry present lectures for approximately six weeks. This year's lecturer: Prof. Carl Lineberger, University of Colorado. Lec, T R 11:15.

[CHEM 716 Special Topics in Advanced Inorganic Chemistry (Bonding in Molecules)
Spring. 3 credits. Prerequisite: some exposure to (or a course in) quantum mechanics. A good undergraduate physical chemistry course may be sufficient, while Physics 443 or Chemistry 793 or Chemistry 794 are at a substantially higher level than what is needed. Lecs, M W F 12:20. Not offered 1999–2000. R. Hoffmann.
The purpose of this course is to build a qualitative picture of the bonding in all molecules, including organic, inorganic, organometallic systems and extended structures (polymers, surfaces and three-dimensional materials). The approach uses molecular orbital theory to shape a language of orbital interactions. Most quantum mechanic ideas needed will be taught along the way; the course is specifically directed at organic, inorganic, and polymer chemists who are not theoreticians.]

[CHEM 762 Special Topics in Organic Chemistry: Fundamentals of Polymer Chemistry
Fall. 4 credits. Prerequisite: Physical Chem 389/390 and Organic Chem 359/360 or equivalent or permission of instructor. Primarily for graduate and advanced undergraduate students. Lecs, T R 8:30–10:00. Not offered 1999–2000.
Introduction to polymer physical chemistry. Kinetics and mechanisms of Polymerization methods: Ionic, radical, step-growth and group transfer polymerization. Polymer Stereochemistry. Solution properties: molecular weight characterization and polymer solubility. Mechanical and Thermal Properties. Structure-Property Relations. The discussions will focus on chemistry rather than engineering of polymers and examples will be taken from current literature.]

CHEM 765 Physical Organic Chemistry I
Fall. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 665 or permission of instructor. Lecs, M W F 10:10. C. F. Wilcox.
Application of computational and experimental techniques to studies of organic reaction mechanisms and the properties of reactive intermediates.

[CHEM 766 Physical Organic Chemistry II
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 765 or permission of instructor. Not offered 1999–2000.]

CHEM 774 Chemistry of Natural Products: Combinatorial Chemistry
Spring. 3 credits. Prerequisites: Chemistry 360 and BIOBM 330 or equivalent. Lec, M W F 10:10–11:30. T. P. Begley.
Combinatorial chemistry has revolutionized the way organic chemists think about structure function studies on biological systems and the design of inhibitors. This course will explore the design, synthesis, screening, and use of natural (i.e., peptide, protein, nucleic acid, carbohydrate) and unnatural (i.e., totally synthetic) libraries.

[CHEM 780 Chemical Kinetics and Molecular Reaction Dynamics
Fall. 4 credits. Prerequisite: Chemistry 681 or permission of instructor. Lecs, T R 10:10–11:25. Not offered 1999–2000. H. F. Davis.
Principles and theories of chemical kinetics and molecular reaction dynamics. Topics include potential energy surfaces, transition state theory, and statistical theories of unimolecular decomposition. Depending on class interest, the course will also include special topics such as surface reactions and photochemistry.]

[CHEM 782 Special Topics in Biophysical and Bioorganic Chemistry
Spring. 3 credits. Lecs, T R 11:15. Not offered 1999–2000.
Topics vary from year to year.]

[CHEM 788 Macromolecular Crystallography (also BIOBM 738)
Spring. 3 credits. S-U grades optional. Prerequisite: permission of instructor. Offered alternate years. Lecs, M W F 10:10. Not offered 1999–2000. S. E. Ealick, P. A. Karplus, J. C. Clardy.
Lectures briefly cover the fundamentals of crystallography and focus on methods for determining the 3-dimensional strucures of macromolecules. These include crystallization, data collection, multiple isomorphous replacement, molecular replacement, model building, refinement, and structure interpretation.]

[CHEM 789 X-ray Crystallography
Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or permission of instructor. Offered alternate years. Lecs, M W F 10:10. Not offered 1999–2000. J. C. Clardy.
A beginning course in the applications of X-ray crystallography to chemistry. Topics include symmetry properties of crystals, diffraction of X-rays by crystals, interpretation of diffraction data, and refinement of structures. The chemical information available from a diffraction experiment is stressed, and practical aspects are incorporated.]

CHEM 791 Spectroscopy
Spring. 4 credits. Prerequisite: Chemistry 793 or Physics 443 or equivalent. Lecs, M W F 11:15–12:05. G. S. Ezra.
Principles of molecular rotational, vibrational, and electronic spectroscopy. Topics include: interaction of molecules with radiation; Born-Oppenheimer approximation; diatomic molecules; polyatomic molecules; feasible operations and the moelcular symmetry group; spectroscopy, dynamics, and IVR. At the level of Kroto's *Molecular Rotation Spectra*.

[CHEM 792 Molecular Collision Theory
Spring. 4 credits. Lecs, T R 10:10–11:25. Not offered 1999–2000. G. S. Ezra.
The concepts and methods of scattering theory are described with particular emphasis on applications to problems of chemical interest. At the level of Child's *Molecular Collision Theory* and Taylor's *Scattering Theory*.]

CHEM 793 Quantum Mechanics I
Fall. 4 credits. Prerequisites: Chemistry 390, coregistration in A&EP 321 or equivalents or permission of instructor. Lecs, M W F 11:15. G. S. Ezra.
Schrodinger's equation, wave packets, uncertainty principle, WKB theory, matrix mechanics, orbital and spin angular momentum, exclusion principle, perturbation theory, variational principle. At the level of Cohen-Tannoudji's *Quantum Mechanics*.

CHEM 794 Quantum Mechanics II
Spring. 4 credits. Prerequisites: Chemistry 793 or equivalent and the equivalent of or coregistration in A&EP 322, or permission of instructor. Lecs, T R 10:10–11:25. J. H. Freed.
Time-dependent phenomena in quantum mechanics and light/matter interaction. Group theory. Quantum structure of atoms and molecules. At the level of Weissbluth's *Atoms and Molecules*, Levine's *Quantum Chemistry*, and Sakurai's *Modern Quantum Mechanics*.

CHEM 796 Statistical Mechanics
Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 678 and 793 or equivalent. Lecs, T R 8:30–9:55. B. Widom.
Statistical mechanics of systems of interacting molecules. Structure and thermodynamics of classical liquids. Phase transitions and critical phenomena. Inhomogeneous fluids. Introduction to non-equilibrium statistical mechanics. Students are presumed to have taken a course in statistical thermodynamics at the level of the first twelve chapters of *Statistical Mechanics*, by McQuarrie.

[CHEM 798 Special Topics in Physical Chemistry (Chemical Bonding in Polymers, Surfaces and the Solid State)
Spring. 4 credits. Prerequisite: Chemistry 605, or 681, or 793, or Physics 443, or the equivalent. Lecs, T R 10:10–11:25. Not offered 1999–2000. R. Hoffmann.
The qualitative aspects of the electronic structure and chemical bonding on extended one-, two-, and three-dimensional systems will be discussed, in a way accessible to a wide range of inorganic and organic chemists, and to engineers and physicists as well.]

FALCON Program (Chinese)

See Department of Asian Studies.

CLASSICS

J. Rusten (chair), L. S. Abel, F. M. Ahl, C. Brittain, K. Clinton, J. E. Coleman, G. Fine, J. R. Ginsburg (director of undergraduate studies), E. Hohendahl, G. Holst-Warhaft, T. Irving, G. M. Kirkwood (emeritus), H. Kolias, D. Mankin, G. M. Messing (emeritus), C. Minkowski, A. Nussbaum, H. Pelliccia (director of graduate studies), P. Pucci, H. R. Rawlings III, J. Reed, J. L. Rife, D. R. Shanzer, B. Strauss

Cornell University has long recognized the importance of studying the civilizations of ancient Greece and Rome. Particularly in an age of increasing specialization, study of the Classics is widely viewed as an excellent means of acquiring a liberal education; at Cornell, we are deeply interested in the continuing humanistic values contained in the literature of the ancient world and in gaining a fuller understanding of these important cultures and their imprint upon subsequent ages.

The Department of Classics at Cornell is one of the oldest and largest in the country. With eleven faculty members, together with professors of related interests in the departments of History, Philosophy, Comparative Literature, History of Art, Modern Languages, Linguistics, and Near Eastern Studies and in the Archaeology, Medieval Studies, and Religious Studies programs, the range of instruction available is very large, including not only the traditional study of language, literature, and ancient history, but also newer developments in the field, such as comparative study of Mediterranean civilizations and modern literary theory.

Although Classics, like other areas of humanistic study, does not aim at providing specific preprofessional training, over the years Classics majors from Cornell have gone on to a wide variety of careers in law, education, medicine, diplomacy, management, educational administration, government, and many others.

The department offers courses in Bronze Age and Classical archaeology and is active in field projects in Classical lands. It sponsors archaeological excavations at Halai in Greece, which serves as a field training school for Cornell undergraduate and graduate students. On campus there are also collections of ancient artifacts, reproductions of ancient sculpture, and one of the few laboratories in the world to concentrate on the tree-ring dating of ancient monuments from Greece, Cyprus, and Turkey. The archaeology courses may be used to satisfy some of the requirements for the Intercollege Program in Archaeology or for the major in Classical Civilization. They require no knowledge of either Greek or Latin. Similarly, the department offers a variety of courses and seminars in English on such subjects as Greek mythology, Greek and Roman mystery religions, early Christianity, and Greek and Roman society, as well as ancient epic, tragedy, history, and philosophy. For those whose interest in things Greek and Roman extends no further than a desire to understand the English language a little better, the department offers one course in the Greek and Latin elements that make up a huge proportion of the vocabulary of Modern English, and another that deals more specifically with the Greek and Latin ingredients of bioscientific vocabulary. Programs in Greek and Latin at the elementary level are also offered. For the more ambitious there are courses involving reading, in the original, of Greek and Latin authors from Homer to St. Augustine and Bede and, periodically, the Latin works of Dante, Petrarch, and Milton. Sanskrit, the classical language of ancient India, is also offered, along with courses in translation on Indic religion, myth, and literature. The department makes every attempt to adapt its program to the needs of each student. If there is a Classical writer you would like to study, the department will do its best to help you do so whether you are a major in the department or not.

Majors

The Department of Classics offers majors in Classics, Greek, Latin, and Classical Civilization.

Classics

The Classics major comprises seven courses in advanced Greek and Latin (numbered 201 or above) and 3 courses in related subjects (see below) selected in consultation with the adviser. Classics majors are required to take a minimum of one 300-level course in one language and two 300-level courses in the other.

Students who are considering the option of undertaking graduate study in Classics are strongly advised to complete the Classics major.

Greek

The Greek major comprises Classics 201 plus 5 advanced courses in Greek (numbered 203 and above) of which at least 3 are to be taken at the 300-level, and 3 courses in related subjects (see below) selected in consultation with the adviser.

Latin

The Latin major comprises Classics 205 plus 5 advanced courses in Latin (numbered 207 and above) of which at least 3 are to be taken at the 300-level, and 3 courses in related subjects (see below) selected in consultation with the adviser.

Classical Civilization

Those who major in Classical Civilization must complete (a) qualification in Latin and Greek or proficiency in either; (b) Classics 211 (or History 265), Classics 212 (or History 268), and Classics 220, plus 5 courses selected from those listed under Classical civilization, Classical archaeology, Ancient Philosophy, Latin, and Greek; and (c) 3 courses in related subjects (see below) selected in consultation with the adviser.

Related Subjects

The field or scope of the subject "Classics" is the interdisciplinary study of Greek and Roman antiquity, comprising Greek and Latin language, literature, and linguistics; ancient philosophy; history; archaeology and art history; papyrology; epigraphy; and numismatics. It covers the ancient Mediterranean and neighboring lands as they were during the period extending from approximately 3000 B.C.E. to the 6th century C.E. In addition to the required courses in language and literature, the major includes related courses intended to give breadth and exposure to the other disciplines within the field and to enrich the student's study of the original languages. Since the influence of the Greco-Roman world extended far beyond antiquity, a related course could well focus on some aspect of the classical tradition in a later period. Students select related courses in consultation with their advisers or the DUS.

Honors

Candidates for the degree of Bachelor of Arts with honors in Classics, Greek, Latin, or Classical civilization must fulfill the requirements of the appropriate major study as given above and must also successfully complete the special honors course 472. Credit for the honors course may be included in the credits required for the major. Students who wish to become candidates for honors must have a cumulative average of B, and B+ in the major. In consultation with the Standing Committee on Honors, the students should choose an honors adviser by the end of their sixth semester. By the second week of their seventh semester they should submit an outline of their proposed honors work to the Standing Committee and to the adviser(s). The thesis will be written under the supervision of the honors adviser(s) chosen by the student. Honors advisers will submit recommendations to the Standing Committee on Honors. The Committee will read all honors theses and will determine the level of departmental honors. A copy of each successful honors thesis will be filed with the department.

Independent Study

Independent study at the 300 level may be undertaken by undergraduates upon completion of one semester of work at the 300 level. 200-level independent study may be undertaken only in the case of documented schedule conflict upon application to the DUS.

Study Abroad

Cornell participates in the Intercollegiate Center for Classical Studies in Rome, which offers courses in Latin, Greek, ancient history, art, archaeology, and Italian. Another opportunity for a semester's study abroad is available through College Year in Athens. (Consult Cornell Abroad for details.) In addition, Cornell is a member institution of the American School of Classical Studies at Athens, whose Summer Program is open to graduate students and qualified undergraduates. The American Academy in Rome, of which Cornell is also a member institution, offers full-year and summer programs for qualified graduate students. For graduate students the Department of Classics offers a few travel grants each year from the Townsend Memorial Fund. Detailed information on these programs is available in the Department of Classics Office, 120 Goldwin Smith Hall.

Summer Support for Language Study

The Beatrice R. Kanders Memorial Scholarship (for the summer immediately following the freshman or sophomore year; preference given to dyslexic students) is available to students who want to enroll in Intensive Latin or Greek in the Cornell summer session. These courses are designed to enable students to enter second-year Latin or Greek the following fall. Preference is given to Classics undergraduate majors, and other students needing Latin or Greek for completion of their majors. Applications are due to the chair of the Department of Classics by March 27.

Placement in Latin, Ancient Greek, and Modern Greek

Placement of first-year students in Latin and ancient Greek courses, and proficiency level in modern Greek, is determined by an examination given by the Department of Classics during orientation week or by arrangement with the director of undergraduate studies.

First-Year Writing Seminars

The department offers freshman writing seminars on a variety of topics. Consult John S. Knight Writing Seminar Program brochures for times, instructors, and descriptions.

Classical Civilization

CLASS 100 Word Power: Greek and Latin Elements in the English Language
Spring. 3 credits. E. Hohendahl.
This course gives the student with no knowledge of the classical languages an understanding of how the Greek and Latin elements that make up over half our English vocabulary operate in both literary and scientific English usage. Attention is paid to how words acquire their meaning and to enlarging each student's working knowledge of vocabulary and grammar.

[CLASS 102 Bioscientific Terminology
3 credits. Not offered 1999–2000; next offered 2000–2001. Staff.
A study of the Greek and Latin word elements that combine to form most of the specialized terms in the biological sciences. The student who learns the meanings of those elements and the rules of word formation can usually recognize the basic meaning of any unfamiliar word in that field. This skill is especially valuable for pre-medical, pre-dental, pre-veterinary students, and for those in other health science fields, as well as for students who would like to broaden their general vocabulary.]

CLASS 211 The Greek Experience #
Fall. 3 credits. Limited to 50 students. F. Ahl.
An introduction to the literature and thought of ancient Greece. Topics will include epic and lyric poetry, tragedy and comedy, and historical, political, philosophical, and scientific writings. Some attention will also be given to the daily life of ordinary citizens, supplemented by slides of ancient art and architecture.

CLASS 212 The Roman Experience #
Spring. 3 credits. J. Ginsburg.
An introduction to the civilization of the Romans as expressed in their literature, religion, and social and political institutions.

CLASS 217 Initiation to Greek Culture: The Greeks at War, from Troy to Charoneia #
Fall. 4 credits. Limited to 18 students. This course is intended especially for freshmen (a few exceptionally motivated sophomores or upperclass students may be accepted). Apply in writing to the chair, Department of Classics, 120 Goldwin Smith Hall. J. Coleman.
Knowledge of Greek or Latin is not necessary, since all texts are in translation. What is necessary is the willingness to participate in three one-hour seminars each week and also a supplementary one-hour (occasionally two-hour) session, during which the class will participate in workshops with specially invited guests.

One of the most troubling legacies of the Ancient Greeks is their almost unquestioning acceptance of war as a legitimate human activity and a measure of male heroism. Our critical examination will show how literature and art exemplify this attitude, beginning with the first and greatest war poem, the *Iliad*, and concluding with the Macedonian conquests of the 4th century B.C.E. Included are Herodotus on the Persian wars, Thucydides on the Peloponnesian War, and the anti-war comedies of Aristophanes. Themes include the visual image of the hero, the role of women as mediators and victims, and the importance of warfare in the political life of the Greek city-states.

[CLASS 218 Initiation to the Classical Tradition: Strange Voyages #
Spring. 4 credits. See Classics 217 front matter above. Not offered 1999–2000; next offered 2000–01.]

[CLASS 223 The Comic Theater (also Comparative Literature 223 and Theatre Arts 223) #
Summer 2000 and spring 2001. 3 credits. J. Rusten.
The origins of comic drama in ancient Greece and Rome, and its subsequent incarnations especially in the Italian renaissance (*Commedia erudita* and *Commedia dell'arte*), Elizabethan England, seventeenth-century France, the English Restoration, and Hollywood in the thirties and forties. Chief topics will be: the growth of the comic theatrical tradition and conventions; techniques and themes of comic plots (trickster, parody, farce, caricature); and the role of comedy in society. All readings in English.]

CLASS 231 Ancient Philosophy (also Philosophy 211) #
Fall. 4 credits. G. Fine.
For description, see PHIL 211.

CLASS 236 Greek Mythology (also Comparative Literature 236) #
Fall 1999 and summer 2000. 3 credits. Limited to 200 students. D. Mankin.
A survey of the Greek myths, with emphasis on the content and significance of the myths in Mediterranean society, including the place of myth in Greek life and consciousness; the factors and influences involved in the creation of myths; and the use of myths for our understanding of Greek literature, religion, and moral and political concepts.

[CLASS 237 Greek Religion and Mystery Cults (also Religious Studies 237) #
3 credits. Not offered 1999–2000. K. Clinton.
Greek religion constitutes one of the essential features of ancient Greek civilization and distinguishes it from later Western civilization. Since religion permeates Greek culture, including the major art forms (epic poetry, tragedy, comedy, architecture, painting, and sculpture), the course will investigate the interaction of religion with these forms—an investigation that is fruitful both for the understanding of Greek religion and the forms themselves, some of which, like tragedy, originated in cult. A representative variety of cults and their history will be studied with special emphasis on mystery cults, such as the Eleusinian mysteries of Demeter and Persephone, the Kabiroi, the Great Gods of Samothrace, and Bacchic rites.]

[CLASS 238 The Ancient Epic and Beyond #
3 credits. Not offered 1999–2000. H. Pelliccia.
We will move, Odysseus-like, to the West: beginning with Homer's *Iliad* (and including the British poet Christopher Logue's "account" of the opening books) and *Odyssey*, we will continue in the Hellenistic and Augustan eras with Apollonius of Rhodes' *Argonautica* and Virgil's *Aeneid*. A violent shift in space and time will have us conclude with two New World maritime epics: Herman Melville's *Moby Dick* and Derek Walcott's *Omeros*.]

CLASS 265 Ancient Greece from Homer to Alexander the Great (also History 265) #
Spring. 4 credits. Open to freshmen. B. Strauss.
For description, see HIST 265.

[CLASS 268 A History of Rome from Republic to Holy City (also History 268) #
Spring. 4 credits. Open to freshmen. Not offered 1999–2000.
For description, see HIST 268.]

[CLASS 291 Classical Indian Narrative (also Asian Studies 291) @ #
Spring. 3 credits. Not offered 1999–2000. C. Minkowski.]

CLASS 303–304 Independent Study in Classical Civilization, Undergraduate Level
303, fall; 304, spring. Up to 4 credits.

[CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also Religious Studies 333) #
Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. Not offered 1999–2000. K. Clinton.
A study of the controversial question of religious continuity between paganism and early Christianity. After a brief survey of classical mystery cults and Hellenistic religion, the course will focus on such Hellenistic cults as the mystery cults of Isis, Bacchus, and Attis and the Great Mother and on the distinctive features that contributed to their success. Discussion of Christian liturgy and beliefs to determine what Christianity owed to its pagan predecessors and to isolate the factors that contributed to its triumph over the "rival" pagan cults of late antiquity.]

CLASS 345 The Tragic Theater (also Comparative Literature 344 and Theatre Arts 345) #
Spring. 4 credits. Limited to 40 students. F. Ahl.
Tragedy and its audiences from ancient Greece to modern theater and film. Topics: origins of theatrical conventions; Shakespeare and Seneca; tragedy in modern theater and film. Works studied will include: Aeschylus' *Agamemnon*; Sophocles' *Oedipus Tyrannus*, *Philoctetes*; Euripides' *Alcestis*, *Helen*, *Iphigeneia in Aulis*, *Orestes*; Seneca's *Thyestes*, *Trojan Women*; Shakespeare's *Julius Caesar*, *Titus Andronicus*, *Othello*; Strindberg's *The Father*; Dürrenmatt's *The Visit*; Bergman's *Seventh Seal*; Cacoyannis' *Iphigeneia*.

[CLASS 382 Greeks, Romans, and Victorians (also Comparative Literature 382) #
Fall. 4 credits. Not offered 1999–2000. F. Ahl.
This course explores how nineteenth-century (and especially Victorian English and Irish) poets, dramatists, and to a lesser extent, novelists, present Greco-Roman antiquity. The varied influences of Vergil and Homer, Seneca and Sophocles, Plautus and Aristophanes, Horace, and Greek lyric poetry will be discussed in selected works of Thomas More, Shelley, Byron, Swinburne, W. S. Gilbert, Oscar Wilde, and the pre-Raphaelites and Victorian poets.]

[CLASS 390 The Sanskrit Epics (also Asian Studies 390) @ #
4 credits. Not offered 1999–2000. C. Minkowski.
For description, see ASIAN 390.]

[CLASS 395 Classical Indian Philosophical Systems (also Asian Studies 395 and Religious Studies 395) @ #
4 credits. Prerequisite: some background in philosophy or in classical Indian culture. Not offered 1999–2000. C. Minkowski.
For description, see ASIAN 395.]

CLASS 405 Augustine's *Confessions*: Memory and Self (also Comparative Literature 400, Philosophy 413, and Society for the Humanities 402)
Fall. 4 credits. Limited to 15 students. Permission of instructor. C. Brittain.
For description, see S HUM 402.

CLASS 406 Augustine's Dialogues on the Soul (also Comparative Literature 424, Philosophy 413, and Society for the Humanities 403)
Spring. 4 credits. Limited to 15 students. Permission of instructor. C. Brittain.
For description, see S HUM 403.

[CLASS 463 Gender and Politics in the Roman World (also History 463 and Women's Studies 464) #
4 credits. Not offered 1999–2000; next offered 2000–01. J. Ginsburg.
An undergraduate seminar examining the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions this course will address are: was politics the exclusive domain of men in Roman society (as is generally assumed) or does a broader definition of politics and an understanding of the various forms political activity in ancient Rome might have taken allow a place for women in Roman political life? What role did gender have in Roman political discourse and ideology? Why did issues such as family, marriage, and sexuality become subjects of political debate and legislation?]

CLASS 469 Equality and Inequality in Ancient Greece (also History 469)
Fall. 4 credits. Prerequisite: History 265, Classics 211 or 217, or written permission of the instructor. B. Strauss.
For description, see HIST 469.

[CLASS 480 Roman Society and Politics under the Julio-Claudians (also History 473) #
4 credits. Prerequisite: Classics 212, History 268, or permission of instructor. Not offered 1999–2000. J. Ginsburg.
This course examines several of the important social and political changes in Roman society under Augustus and his successors, the Julio-Claudians. Topics to be investigated include Augustus's consolidation of power through political and social revolution, the Augustan attempt to regulate family life and social relations by legislation, the relation of the emperor Tiberius with the members of the old ruling class, the growth of the imperial bureaucracy and the new opportunities for social mobility, the political opposition to Claudius and Nero, Nero's cultural and provincial policy, and the manipulation of the imperial cult. All readings will be in English.]

CLASS 711–712 Independent Study for Graduate Students in Classical Civilization
711, fall; 712, spring. Up to 4 credits.

Greek

CLASS 101 Greek for Beginners
Fall. 4 credits. F. Ahl.
Introduction to Attic Greek. Designed to enable the student to read the ancient authors as soon as possible.

CLASS 103 Attic Greek
Spring. 4 credits. Prerequisite: 101 or equivalent. H. Pelliccia.
A continuation of Classics 101.

CLASS 104 Intensive Greek
Summer. 6 credits. Staff.
An intensive introduction to the fundamentals of ancient Greek grammar. Prepares students in one term for 200-level Greek.

CLASS 201 Attic Authors #
Fall. 3 credits. Prerequisite: Classics 103 or 104 or equivalent. H. Pelliccia.
Selected readings from Greek prose.

[CLASS 202 The Greek New Testament #
3 credits. Prerequisite: at least one year of ancient Greek (Classics 101–103 or 104) or permission of instructor. Not offered 1999–2000.]

CLASS 203 Homer #
Spring. 3 credits. Prerequisite: Classics 103 or 104 or equivalent. J. Coleman.
Readings in the Homeric epic with emphasis on formulaic style.

[CLASS 210 Attic Prose
3 credits. Prerequisite: Classics 103 or 104 or equivalent. Not offered 1999–2000.]

CLASS 225–226 Independent Study in Greek, Undergraduate Level
225, fall; 226, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict.

CLASS 307–308 Independent Study in Greek, Undergraduate Level
307, fall; 308, spring. Up to 4 credits.

CLASS 310 Greek Undergraduate Seminar #
Fall and spring. 4 credits. Prerequisite: two 200-level courses in Greek or permission of instructor. Fall topic: Lucian. J. Rife. Spring topic: Tragedy. H. Pelliccia.

CLASS 311 Greek Philosophical Texts: (also Philosophy 411) #
Fall and spring: up to 4 credits. Prerequisites: knowledge of Greek and permission of instructor. T. Irwin.
Readings of Greek philosophical texts in the original.

[CLASS 313 Greek Epic #
Fall. 4 credits. Prerequisite: Classics 206 or equivalent. Not offered 1999–2000.]

[CLASS 342 Greek Prose Composition
4 credits. Prerequisite: one term of 200-level Greek or permission of instructor. Not offered 1999–2000; next offered 2000–01.]

CLASS 417 Advanced Readings in Greek: Comedy #
Spring. 4 credits. J. Rusten.
Aristophanes, Menander, and fragments by other authors.

CLASS 419 Advanced Greek Composition
Fall. 4 credits. Prerequisite: Classics 342 or equivalent. J. Rusten.

CLASS 555 Graduate Proseminar
Fall. 1 credit. H. Pelliccia and staff.
Graduate students will be introduced to the tools, techniques, and methods of classical scholarship.

[GREEK 605–606 Graduate Survey of Greek Literature
605, fall; 606, spring. 4 credits each term. Prerequisite: linguistic proficiency to be determined by instructor. Not offered 1999–2000.
A survey of Greek literature in two semesters. Classics 605: Greek literature from Homer to the mid-fifth century. Classics 606: Greek literature from the late fifth century to the Empire.]

CLASS 632 Topics in Ancient History (also History 630)
Fall. 4 credits. B. Strauss.
For description, see HIST 630.

[CLASS 671 Graduate Seminar in Greek
Fall. 4 credits. Not offered fall 1999.]

[CLASS 672 Graduate Seminar in Greek
Spring. 4 credits. Not offered spring 2000.]

CLASS 701–702 Independent Study for Graduate Students in Greek
701, fall; 702, spring. Up to 4 credits.

Latin

CLASS 105 Latin for Beginners
Fall. 4 credits. Staff.
An introductory course in the essentials of Latin, designed for rapid progress toward reading the principal Latin writers.

CLASS 106 Elementary Latin
Spring. 4 credits. Prerequisite: 105 or equivalent. Staff.
A continuation of Classics 105, using readings from various authors.

CLASS 107 Intensive Latin
Spring and summer. 6 credits. Staff.
Prepares students in one term for 200-level Latin.

CLASS 108 Latin in Review
Fall. 4 credits. Prerequisite: placement by departmental examination. E. Hohendahl.
This course will accommodate students who place too high for beginning Latin, but not high enough for intermediate.

CLASS 205 Intermediate Latin #
Fall and spring. 3 credits. Prerequisite: Classics 106, 107, 108, or placement by departmental examination. J. Ginsburg, E. Hohendahl.
Readings in Latin prose.

[CLASS 207 Catullus #
Fall. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. Not offered 1999–2000.]

CLASS 208 Roman Drama: Seneca #
Fall. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. J. Reed.

CLASS 216 Vergil #
Spring. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. F. Ahl.

CLASS 227–228 Independent Study in Latin, Undergraduate Level
227, fall; 228, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict.

CLASS 312 Latin Undergraduate Seminar #
Fall and spring. 4 credits. Prerequisite: two terms of 200-level Latin or permission of instructor. Fall topic: Virgil's *Georgics*. D. Mankin. Spring topic: Sallust. D. Shanzer.

[CLASS 314 The Augustan Age #
4 credits. Prerequisite: two terms of 200-level Latin or permission of instructor. Not offered 1999–2000.]

CLASS 315–316 Independent Study in Latin, Undergraduate Level
315, fall; 316, spring. Up to 4 credits.

[CLASS 317 Roman Historiography #
4 credits. Prerequisite: one term of 300-level Latin or permission of instructor. Not offered 1999–2000. J. Ginsburg.]

CLASS 341 Latin Prose Composition
Fall. 4 credits. Prerequisite: one term of 200-level Latin or permission of instructor. J. Ginsburg.

CLASS 369 Intensive Mediaeval Latin Reading
Summer only. 4 credits. D. Shanzer.
Web site: www.arts.cornell.edu/classics/Classes/Classics 369/Med_Latin.html

[CLASS 411 Advanced Readings in Latin Literature #
Fall. 4 credits. Not offered fall 1999.]

[CLASS 412 Advanced Readings in Latin Literature #
Spring. 4 credits. Not offered spring 2000.]

[CLASS 441 Advanced Latin Prose Composition
Fall. 4 credits. For graduate students. Only those undergraduates who have completed Latin 341 and have permission of the instructor may enroll. Not offered 1999–2000; next offered 2000–01.]

CLASS 555 Graduate Proseminar
Fall. 1 credit. H. Pelliccia and staff.
Graduate students will be introduced to the tools, techniques, and methods of Classical scholarship.

[CLASS 603 Later Latin Literature
4 credits. Not offered 1999–2000. D. Shanzer.]

CLASS 625–626 Graduate Survey of Latin Literature
625 fall; 626 spring. 4 credits each term. Prerequisite: linguistic proficiency to be determined by instructor. J. Reed.
A survey of Latin literature in two semesters. 625: Latin poetry from its beginnings to the early Empire. 626: Latin literature of the Empire.

[CLASS 679 Graduate Seminar in Latin
Fall. 4 credits. Not offered fall 1999.]

CLASS 680 Graduate Seminar in Latin: Tacitus
Spring. 4 credits. J. Ginsburg.

CLASS 751–752 Independent Study for Graduate Students in Latin
751, fall; 752, spring. Up to 4 credits.

Classical Art and Archaeology

CLASS 220 Introduction to Art History: The Classical World (also History of Art 220) #
Fall. 4 credits. A. Ramage.
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the late empire.

[CLASS 221 Minoan-Mycenaean Art and Archaeology (also Archaeology 221 and History of Art 221) #
Spring. 3 credits. Not offered 1999–2000. J. Coleman.
The birth of civilization in Greece and the Aegean islands during the Bronze Age. The main focus is on the rise and fall of Minoan Crete and Mycenaean Greece, with consideration given to the nature and significance of Aegean interactions with Egypt, the Near East, and Anatolia.]

[CLASS 232 Archaeology in Action I (also Archaeology 232 and History of Art 224) #
3 credits. Prerequisite: permission of instructor. Not offered fall 1999–2000. P. I. Kuniholm.]

[CLASS 233 Archaeology in Action II (also Archaeology 233 and History of Art 225) #
Spring. 3 credits. Prerequisite: permission of instructor. Not offered 1999–2000. P. I. Kuniholm.
For description, see Art H 225.]

CLASS 309 Dendrochronology of the Aegean (also Archaeology 309 and History of Art 309)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm.
For description, see ART H 309.

[CLASS 319 Art in the Daily Life of Greece and Rome (also History of Art 319) #
Spring. 4 credits. Not offered 1999–2000. A Ramage.
For description, see ART H 319.]

[CLASS 320 The Archaeology of Classical Greece (also History of Art 320) #
4 credits. Not offered 1999–2000. A. Ramage.]

CLASS 321 Mycenae and Homer (also Archaeology 321 and History of Art 321) #
Fall. 4 credits. Prerequisite: at least one previous course in Archaeology, Classics, or History of Art. J. Coleman.
Study of the relationship between the Mycenaean period of Greece (known primarily from archaeology) and the Homeric *Iliad* and *Odyssey*. Topics include Mycenaean architecture, burial customs, kingship and military activities; the reasons for the collapse of the Bronze Age palatial economies; the archaeological evidence for society in the "Dark Ages" that followed; the writing systems of Mycenaean Greece (Linear B) and the Iron Age (the Semitic/Greek alphabet); the nature of the Homeric poems and their value as historical sources.

[CLASS 322 Greeks and Barbarians (also History of Art 328) #
4 credits. Prerequisite: Classics 220 or 221, or permission of instructor. Not offered 1999–2000. J. Coleman.
A study of the archaeological and other evidence for the interaction between Greek civilization and the peoples of the eastern and western Mediterranean from the thirteenth to the fourth centuries B.C.E. The course will focus on Greek relationships with Egypt, Phoenicia, Cyprus, Anatolia, and Italy in the post-Bronze Age period.]

[CLASS 323 Painting in the Greek and Roman World (also History of Art 323) #
4 credits. Not offered 1999–2000. A. Ramage.]

[CLASS 325 Greek Vase Painting (also History of Art 325) #
4 credits. Not offered 1999–2000. A. Ramage.
For description, see ART H 325.]

CLASS 327 Greek and Roman Coins (also History of Art 327) #
Spring. 4 credits. A. Ramage.
For description, see ART H 327.

CLASS 329 Greek Sculpture (also History of Art 329) #
Spring. 4 credits. J. Coleman.
An examination of ancient Greek sculpture, both three-dimensional and two-dimensional, from the Archaic to the Hellenistic period. Aspects of the works studied include: technological advances, changing ideology of the sculptors, regionalism of styles, and taste of individual patrons.

[CLASS 350 Arts of the Roman Empire (also History of Art 322) #
4 credits. Not offered 1999–2000.
A. Ramage.
For description, see ART H 322.]

[CLASS 352 The City of Athens (also Archaeology 352 and History of Art 352) #
3 credits. Not offered 1999–2000.
A detailed survey of the architectural development of the city of Athens from the Bronze Age to the 6th century A. D. The principal monuments will be examined against a broad historical and cultural background, with special attention to both Athenian society and the development of Greek art and architecture as a whole.]

CLASS 357–358 Independent Study in Classical Archaeology, Undergraduate Level
357, fall; 358, spring. Up to 4 credits.

CLASS 361 Summer Program in Etruscan Archaeology at La Piana (also Archaeology 361)
Summer only. 3 or 6 credits. Permission required. J. Whitehead.

CLASS 423 Ceramics (also Archaeology 423 and History of Art 423)
Fall. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 423.

[CLASS 430 Seminar on the Bronze Age Architecture of Asia Minor (also Archaeology 425 and History of Art 425) #
4 credits. Not offered 1999–2000.
P. I. Kuniholm.
For description, see ART H 425.]

[CLASS 432 Sardis and the Cities of Asia Minor (also Archaeology 432 and History of Art 424) #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000.
A. Ramage.
For description, see ART H 424.]

CLASS 434 The Rise of Classical Greece (also Archaeology 434 and History of Art 434) #
Spring. 4 credits. Recommended: Classics 220 or 221, History of Art 220 or 221, or permission of instructor.
P. I. Kuniholm.
For description, see ART H 434.

[CLASS 435 Seminar on Roman Art and Archaeology (also Archaeology 435 and History of Art 427) #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000.
A. Ramage.
For description, see ART H 427.]

[CLASS 629 The Prehistoric Aegean (also Archaeology 629) #
4 credits. Not offered 1999–2000.
J. Coleman.
Seminar with focus on the Aegean and neighboring regions in the Neolithic and Early Bronze Ages.]

[CLASS 630 Seminar in Classical Archaeology (also Archaeology 520 and History of Art 520)
4 credits. Not offered 1999–2000.
P. I. Kuniholm.
For description, see ART H 520.]

CLASS 721–722 Independent Study for Graduate Students in Classical Archaeology
721, fall; 722, spring. Up to 4 credits.

Greek and Latin Linguistics

CLASS 420 Plautus #
Fall. 4 credits. Prerequisite: at least one 300-level Latin course or permission of instructor. A. Nussbaum.
A close reading of several Plautine comedies with attention to language and meter.

CLASS 421 Greek Comparative Grammar (also Linguistics 451) #
Fall. 4 credits. Prerequisite: thorough familiarity with the morphology of classical Greek. A. Nussbaum.
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

[CLASS 422 Latin Comparative Grammar (also Linguistics 452) #
4 credits. Prerequisite: thorough familiarity with the morphology of classical Latin. Not offered 1999–2000.
A. Nussbaum.
The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.]

[CLASS 424 Italic Dialects (also Linguistics 454) #
4 credits. Not offered 1999–2000.
A. Nussbaum.]

[CLASS 425 Greek Dialects (also Linguistics 455) #
4 credits. Not offered 1999–2000.
A. Nussbaum.]

[CLASS 426 Archaic Latin (also Linguistics 456) #
4 credits. Prerequisite: reading knowledge of Latin. Not offered 1999–2000.
A. Nussbaum.]

[CLASS 427 Homeric Philology (also Linguistics 457) #
4 credits. Prerequisite: ability to read Homeric Greek. Not offered 1999–2000.
A. Nussbaum.
The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a *Kunstsprache*: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.]

[CLASS 429 Mycenaean Greek (also Linguistics 459) #
4 credits. Prerequisite: thorough familiarity with the morphology of Classical Greek. Not offered 1999–2000.
A. Nussbaum.]

Sanskrit

CLASS 131–132 Elementary Sanskrit (also Linguistics 131–132 and Sanskrit 131–132)
131, fall, C. Minkowski; 132, spring, staff. 4 credits each term.
An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.]

[CLASS 251–252 Intermediate Sanskrit (also Linguistics 251–252 and Sanskrit 251–252) @ #
251, fall; 252, spring. 3 credits each term. Prerequisite: Classics 132 or equivalent. Not offered 1999–2000; next offered 2000–01. C. Minkowski.
Readings from the literature of Classical Sanskrit. Fall: selections from the two Sanskrit epics, the *Mahabharata* and the *Ramayana*. Spring: more selections from the epics, and from either Sanskrit story literature or from Sanskrit dramas.]

CLASS 403–404 Independent Study in Sanskrit, Undergraduate Level
403, fall; 404, spring. Up to 4 credits.
C. Minkowski.

CLASS 703–704 Independent Study for Graduate Students in Sanskrit
703, fall; 704, spring. Up to 4 credits.
C. Minkowski.
Also see Classics 291, 390, and 395 (Classical Civilization listings).

Honors Courses

CLASS 472 Honors Course: Senior Essay
Fall and spring. 8 credits. An adviser must be chosen by the end of the student's sixth semester. Topics must be approved by the Standing Committee on Honors by the beginning of the seventh semester.
See "Honors," Classics front matter.

COMPARATIVE LITERATURE

W. J. Kennedy, chairman (141 Goldwin Smith), C. Arroyo, director of Undergraduate Studies (285 Goldwin Smith); N. Saccamano, director of Graduate Studies (145 Goldwin Smith); F. Ahl, C. Arroyo, A. Caputi (Emeritus), C. Carmichael, D. Castillo, C. Chase, W. Cohen, J. Culler, B. deBary, G. Gibian, D. Grossvogel (Emeritus), P. Hohendahl, W. Holdheim (Emeritus), W. Kennedy, N. Melas, J. Monroe, J. Porte, E. Rosenberg, N. Saccamano, N. Sakai, L. Waugh, W. Wetherbee.

Also cooperating: A. Adams, D. Bathrick, J. Bishop, R. Brann, S. Buck-Morss, P. Carden, E. Hanson, T. Hope, C. Kaske, D. Mankin, B. Maxwell, M. Migiel, G. Waite.

The Department of Comparative Literature provides a broad range of courses in European as well as non-European literature. Courses stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, reception aesthetics, feminism, and psychoanalysis.

The Major

The major enables students to develop an integrated knowledge of Western literature, to strengthen their reading and writing abilities, and to prepare for careers demanding analytical, interpretive, and evaluative skills. Prospective majors should consult with the director of undergraduate studies. After declaring a major, a student chooses an adviser from the department's faculty. The requirements for the major are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests. The specific contours of such a program are worked out in consultation with the student's adviser.

Requirements for the Major

1) Five courses in Comparative Literature at the 200 level and above, including the core course listed below. A student may include up to two literature courses from other departments.

2) One core course in Comparative Literature (for 1999–2000 Comparative Literature 304 [fall]), to be taken by all majors in their junior or senior year. At the discretion of the department, students may enroll in core courses in both their junior and senior years.

3) Five courses in literature and other areas of the humanities at the 200 or higher level, to be taken in one or more foreign literature departments. Texts must be read in the original language. A student may offer one language course (conversation, composition, etc.) towards fulfilling the language requirement.

4) An honor's essay (Comparative Literature 493) of roughly fifty pages is now optional. It is to be written during the senior year under the direction of a faculty member, preferably from within the department, who has agreed to work in close cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year. In lieu of a Senior Honors Essay, students may take one course at the 400–600 level.

The department also encourages:

1) a program that includes broad historical coverage (e.g., Comparative Literature 201–202: Great Books); intensive study of a single genre (e.g., Comparative Literature 363–364: The European Novel, Comparative Literature 365: Contemporary Fiction); analysis of problems in literary theory (e.g., Comparative Literature 302: Literature and Theory, Comparative Literature 448: Subject to Translation). The department also offers a number of strongly recommended 200-level courses designed to acquaint undergraduates with the discipline: Comparative Literature 203: "Introduction to Comparative Literature," as well as broadranging introductory courses in World Fiction (Comparative Literature 204) and World Poetry (Comparative Literature 205), with emphasis on the nineteenth and twentieth centuries.

2) a second foreign language, especially for students interested in graduate work in literature.

Honors

A student who completes the requirements for the major is eligible for the degree of Bachelor of Arts with honors in comparative literature. The department bases its decision on the student's achieving grades of at least B+ on the senior essay, in course work for the major, and in their overall academic performance at Cornell.

First-Year Writing Seminars

Most 100-level courses may be used toward satisfying the freshman writing seminar requirements. See "John S. Knight Writing Program" for a full description of the first-year seminar program.

Courses

COM L 201#–202 Great Books
201, fall; 202, spring. 4 credits. Comparative Literature 201 and 202 may be taken independently of each other. Fall: W. J. Kennedy; spring: T. Hope.
A reading each semester of seminal texts that represent and have shaped Western culture, and hence form an essential part of the student's intellectual equipment. By analyzing, interpreting, and evaluating, students will develop critical reading abilities.

201: Selections from the Bible, Homer, Dante, Rabelais, Shakespeare, and others.

202: World literature of the last 300 years, emphasizing the response to European worldwide expansion first in the colonizing countries, then in the colonized. The persistence of certain themes (such as slavery, monstrosity, overreaching, coercion, and vengeance) will be a central concern in many of the texts studied. A certain amount of attention will be given to an examination of differing ideological perspectives on the notion of "Great Books." Readings chosen from texts by Shakespeare, Defoe, Swift, Voltaire, Goethe, Mary Shelley, Balzac, Poe, Melville, Marx, Flaubert, Conrad, Kipling, Brecht, Woolf, Césaire, Tutuola, Brathwaite, Naipaul, and Armah.

COM L 203 Introduction to Comparative Literature (also Asian 203)
Fall or spring. 4 credits. Fall: W. Kennedy and department members; spring: E. Rosenberg and department members.
The course is intended to answer the question persistently asked by undergraduates: "What *is* comparative literature, anyway?" The format of the course is designed to acquaint students with the range and variety of the field by having members of the department present those aspects which reflect their areas of expertise and their methods of teaching. Of the two meetings each week, the first will generally take the form of a lecture; the second will be a discussion of the assigned text. Texts and topics range from bawdy tales by Chaucer and Boccaccio to the naturalism of Thomas Mann and the fantasy of Kundera, and from modern American poetry to post-modern critical theory.

COM L 204 Global Fictions (also Asian 204)
Spring. 4 credits. N. Melas.
This course will be an introduction and an inquiry into global perspectives on fiction. Can the reading of fiction point us towards becoming citizens of the world? How might we know this world? How might we imagine it? We will consider the condition of the stranger in this global era as well as construct a geography of reading. Readings will be drawn mainly but not only from the contemporary period and outside Europe. Readings will change depending on the instructor, but may include works of Rushdie, Marquez, Conde, Munif, Castellanos, Oe, Ngugi, Wolf, Kincaid, Homer.

[COM L 205 Introduction to Poetry, Chiefly Modern
4 credits. Not offered 1999–2000. Staff.
Unlike Comparative Literature 207, 205 is intended to be a survey that concentrates largely (but of course not exclusively) on foreign poetry. The course will cut across historical periods and poetic genres, from conventional "strict" genres of the sonnet-variety to forms more nearly associated with our own times: free verse, "the prose poem," etc. Difficult as it may be to avoid poets on the order of Shakespeare, Milton, Goethe, and Keats, we propose to focus on the practitioners of the craft from Baudelaire,Whitman, Hopkins, Mallarmé, and Rilke on down.]

[COM L 206 Introduction to Literary Criticism
Spring. 4 credits. Not offered 1999–2000. Staff.
More advanced undergraduate seminars naturally tend to focus on contemporary literary theory; after all, it is essential for students of literature to be well-informed about contemporary theoretical debates, methodologies, and problems. But literary theory and criticism did not begin with the structuralist revolution of the 1960s, and it is essential for students to understand earlier developments—many of which still have the power to provoke and inspire. Critical historicization should begin at home, with an awareness of how different the forms, practices, institutions and politics of literary criticism have been, and this course will thus introduce students to the vast field of pre-1960 debates. We will examine the historical evolution of key terms now more or less taken for granted as part of critical vocabulary, and we will pay particular attention to the

(relatively recent) emergence of literature itself as a category of study. Critics and theorists will be chosen from among Plato, Aristotle, Cicero, Horace, and Augustine; Renaissance and neo-classical critics such as Spenser, Dryden, and Dr. Johnson; Enlightenment, Romantic and post-Romantic theorists such as Kant, Hegel, Schiller, Coleridge, Wilde, and Pater; and such major twentieth-century figures as Heidegger, Bataille, Sartre, Benjamin, Adorno, and I. A. Richards. No prior knowledge of the subject will be assumed, and all texts will be read in English.]

[COM L 208 Shakespeare and the 20th Century (also ENGL 208)
Fall. 4 credits. Not offered 1999–2000. W. Cohen.
What is the relationship between the plays of Shakespeare in their own time and the various ways they have functioned in modern culture? We will compare selected works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course as a whole will attempt to provide a systematic introduction to the contemporary study of literature and culture.]

COM L 209 Introduction to Cultural Studies
Fall. 4 credits. T. Hope.
What is culture above and beyond literature, and how are the esthetics of walking in the city or receiving a postcard different from (or related to) that of reading a detective story or *National Geographic*? Are we immersed in culture or precipitated out of it? Are we cultural subjects or objects? And who is this "we" in any case? Is this imaginary collective identity itself a product or fantasy of culture? When does culture demand assimilation, and when does it allow for or violently enforce the operations of (class, sexual, racial) difference? Do cultures exist in the plural, and would this plural be one of particularity or relationality? How does or do culture(s) mediate between recent enactments of multiculturalism, on the one hand, and globalization on the other? Readings will range from Freud, Marx and Saussure to contemporary poststructuralist critiques and reformulations of cultural identification.

COM L 215 Comparative American Literatures
Fall. 4 credits. B. Maxwell.
Twentieth-century writing from Canada, the United States, the Caribbean, and Latin America. A hemispheric American Studies perspective will encourage thinking about and across cultural, linguistic, and national demarcations. This course proposes that a question put by the poet William Carlos Williams—"History, history! What do we fools know or care?"—finds its counter-statement in words from Africa, passed on by the novelist Paule Marshall: "Once a great wrong has been done, it never dies. People speak the words of peace, but their hearts do not forgive. Generations perform ceremonies of reconciliation but there is no end." Countering the literature of amnesia and baseless optimism, the works that we will read cannot forget, and decline to forgive, the historical traumas that so bitterly flavor them. Our concern largely will be with understanding the aesthetic means and strategies that certain writers use to perform ceremonies *not* bent on reconciliation. Readings (in English) will include Joy Kogawa, *Obasan;* Sheila Watson, *The Double Hook;* Hubert Aquin, *The Antiphonary;* Jean Toomer, *Cane;* William Faulkner, *Absalom, Absalom!;* Wilson Harris, *The Palace of the Peacock;* Edward Kamau Brathwaite, *X/Self* and *Trench Town Rock;* Mariano Azuela, *The Underdogs;* Jose Donoso, *Curfew;* and Eduardo Galeano, *The Book of Embraces* and selections from the work of John Sanford, Rosario Castellanos, Clarice Lispector, and Juan Gelman.

COM L 223 The Comic Theater (also CLASS 223 and THETR 223) #
Summer 2000 and spring 2001. 3 credits.
For description, see Classics 223.

COM L 236 Greek Mythology (also CLASS 236) #
Fall. 3 credits. Limited to 200. D. Mankin.
For description, see Classics 236.

[COM L 239 Cultural History of the Jews of Spain (also NES 239, JWST 239, Rel. St. 239 and SPAN L 239)
Fall. 3 credits. Not offered 1999–2000. R. Brann.
For description, please see Near Eastern Studies 239.]

COM L 246 Israel: Literature and Society (also NES 236, JwSt 236)
Fall. 4 credits. Y. Halevi-Wise.
For course description, please see Near Eastern Studies 339.

COM L 279 The Russian Connection, 1830–1867 (also RussL 279)
Fall. 4 credits. P. Carden.
For course description, please see RussL 279.

COM L 280 The Russian Connection, 1870–Present (also RussL 280)
Spring. 4 credits. P. Carden.
For course description, please see Russian Literature280.

COM L 299 The Hebrew Bible and the Arabic Qur'an in Comparative Literature (also RelSt 299 and JwSt 299)
Spring. 4 credits. R. Brann.
For course description, please see Jewish Studies 299.

[COM L 302 Literature and Theory (also COM L 622 and ENGL 302/602)
Fall. 4 credits. Not offered 1999–2000. J. Culler.
Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings from Barthes, Derrida, Foucault, J. Butler, B. Johnson, and others. No previous knowlege of literary theory is assumed.]

COM L 304 Europe and Its Others: An Introduction to the Literature of Colonialism
Fall. 4 credits. N. Melas.
Core course for 1999–2000. Through an examination of selected works from the literature of the nineteenth century to the modern period, mainly written in English and French, the course will explore the problems and possibilities, imperialism presented for narration, both in the literature of imperialism and the literature against imperialism. Topics will include transcultural (de)formation of identity, exoticism and internationalism, racial romance, cultural pressures on reading and interpretation, and the powers and pitfalls of writing back. Probable authors: Hagard, Stevenson, Conrad, Ngugi, Camus, Conde, Achebe, Duras, Saleh. All readings available in English.

[COM L 305 Irony: An Introduction
Fall. 4 credits. Not offered 1999–2000. Staff.
Oscar Wilde suggested that all bad poetry is sincere. Was he being ironic? Irony is an aspect of literature (and everyday life) that is very common and of fundamental importance but misunderstood and even distrusted. This course will confront the theory and politics of irony. Our approach will be historical, philosophical, and literary but will never lose sight of practical questions that students necessarily face: must we—or can we—mean what we say? How can we analyze irony in a text? In what sense is the performance of a drag queen ironic? Texts about irony—or ironic texts—to be studied will include Plato, Kierkegaard, Swift, Flaubert, and German idealists. We will also investigate nonverbal irony in twentieth-century music from Mahler to Madonna.]

COM L 311 Modern European Literature and Culture (also RussL 311, French 315)
Fall. 4 credits. G. Gibian.
We shall concern ourselves with European culture as embracing the area from Russia through to the Atlantic Ocean, not as divided into Western, Eastern, or Central. European culture crosses the old East-West political boundaries. Case studies: Ireland, France, Czech Republic, Russia.

This course is designed for those interested both in the artistic, imaginative side of European literature and in the ways in which culture expresses some of the most significant concerns of our age. The conceptual links will include issues of national identity and social justice, as well as concerns of private emotions and individual personality. Popular culture, film, TV, theatre will be integrated with the reading and class discussion. Some authors who will be read: Flaubert, Charlotte Bronte (*Villette*), Karl Marx, Dostoevsky, Mayakovsky, Yeats, Malraux, Camus, Joyce, Solzhenitsyn, Kundera, and others.

[COM L 318 Bodies Politic: Queer Theories and Literature of the Body
Fall. 4 credits. Not offered 1999–2000. T. Hope.
This course will examine notions of corporality—of bodies both social and individual—as deployed and analyzed in theories of gender and sexuality of the last century. How do concepts of perversion and degeneration haunt the idea of the social body? How are individual bodies stigmatized, encoded, and read within the social sphere? Sexology, psychoanalysis and new-historicist critiques, including those that emphasize the discursive intersections of sexuality, race and nationhood, will constitute our textual *corpus*; in an attempt to question the habitual dichotomization of "theoretical" and "cultural" production, we shall also include a small number of literary and visual texts which comment upon these theoretical traditions. Included are works by: Sigmund Freud, Havelock Ellis, Max Nordau, André Gide, Radclyffe Hall, E. M. Forster, Luce Irigaray, Cherríe Moraga, Judith Butler, Michael Foucault, Homi Bhabha, Biddy Martin, Esther Newton, Julia Kristeva, Janine Chasseguet-

Smirgel, Adrienne Rich, Leo Bersani, Richard Fung, Kobena Mercer, Jewelle Gómez, Teresa de Lauretis.]

COM L 322 Russian Theatre and Drama (also RussL 322)
Spring. 4 credits. S. Senderovich.
For course description, please see Russian Literature 322.

COM L 323 Encounters with the Dead (also ITAL L 323/623)
Fall. 4 credits. M. Migiel.
For description, please see Italian Literature 323/623.

COM L 326 Christianity and Judaism (also RelSt 326)
Spring. 4 credits. C. Carmichael.
A study of the New Testament as a product of the First Century Palestinian and Hellenistic Judaism. Other text (also in translation): Passover Haggadah.

COM L 328 Literature of the Old Testament (also Rel. St. 328) @ #
Fall. 4 credits. C. M. Carmichael.
Analysis of small sections of well-known material for in-depth discussion.

COM L 330 Political Theory and Cinema (also GerSt 330, Govt 370, Thetr 329)
Spring. 4 credits. G. Waite.
For course description, please see German Studies 330.

COM L 334 Muslims, Christians and Jews in Islamic Spain: Literature and Society (also NES 339/639, JWST 339, Rel. St. 334 and SPAN L 339/699)
Fall. 4 credits. R. Brann.
For description, please see Near Eastern Studies 339.

[COM L 335 The Modern and Contemporary Theatre (also THETR 335)
Fall. 4 credits. Not offered 1999–2000. R. Schneider.
For course description, please see THETR 335.]

[COM L 336 European Drama 1660–1900: Molière to Ibsen (also ENGL 335 and THETR 333) #
Spring. 4 credits. Not offered 1999–2000. A. R. Parker.
Major works by such writers as Molière, Congreve, Goethe, Schiller, Kleist, Shelley, Byron, Büchner, Ibsen, and Chekhov. Attention to influential theater traditions (commedia dell'arte, melodrama, pantomime); theories and styles of acting (Diderot, Garrick, Kean); the role of theater in the cultural politics of Enlightenment and Revolutionary Europe (Rousseau, Burke).]

COM L 338 Western and Eastern Films of Russian Literary Masterpieces (also RussL 337)
Fall. 4 credits. S. Senderovich.
For course description, please see Russian Literature 337.

[COM L 343 Contemporary Mass Culture in Japan and in the U.S. (also Asian St 363)
Spring. 4 credits. Enrollment limited to 25. Not offered 1999–2000. B. deBary.
For description, please see Asian Studies 363.]

COM L 344 Tragic Theatre (also Classics 345)
Spring. 4 credits. F. Ahl.
For course description, please see Classics 345.

COM L 350 Education and the Western Literary Tradition (also RussL 350, ColS 350)
Spring. 4 credits. P. Carden.
For course description, please see Russian Literature 350.

[COM L 352 European Cultural History, 1750–1870 (also HIST 362) #
Spring. 4 credits. Not offered 1999–2000. M. Steinberg.
For description, please see History 362.]

[COM L 353 European Cultural History (also Hist 363)
Fall. 4 credits. Not offered 1999–2000. M. Steinberg.
For course description, please see History 363.]

COM L 355 Decadence (also ENGL 355 and WOMNS 355)
Fall. 4 credits. E. Hanson.
For description, please see English 355.

[COM L 356 Renaissance Literature
Spring. 4 credits. Not offered 1999–2000. W. Kennedy.
An introduction to Renaissance literary texts with some attention to cultural backgrounds and intellectual history. Readings from Machiavelli, Erasmus, Rabelais, Shak, Cervantes and others.]

COM L 357 Orientalism, Exoticism, and Interiority (also FrLit 397)
Spring. 4 credits. T. Hope.
Not a spatially defined place on a map, nineteenth-century Europe's "Orient" is far more a fantastic resource for the "mapping" of an estranged and eccentric region of European selfhood. We shall critically examine the processes of exoticization and mystification, but also the uncanny intimacy of the imagined Orient. How does the figure of a distant cultural trove to be plundered by the European imagination turn so swiftly into nightmare visions of the haunted domesticity of rugs, divans, caskets and cabinetry, and what does this folding of the exoticized exterior into domestic and psychic interiority have to do with the novel as a genre? Readings in French prose fiction, but also poetry, opera, painting, non-fiction and German and English literature.

[COM L 358 Literature and Religion: Western Mysticism (also RomS 358, Rel. St. 358)
Spring. 4 credits. Not offered 1999–2000. C. Arroyo.
Analysis of some canonical texts of western mysticism toward a systematic view of their common features (a semiotics of the mystic text). Readings include: excerpts from the Bible, Plotinus, Pseudodionysius, Bernard of Clairvaus, Ibn Arabi of Murcia, The Zohar, Meister Eckhart, Teresa of Avila, John of the Cross, and expressions of silence and the ineffable in our times.]

COM L 362 The Culture of the Renaissance II (also ENGL 325, HIST 364, MUS 390, ART H 351 and Rel. St. 362)
Spring. 4 credits. C. Kaske, W. J. Kennedy.
Members of various departments will lecture on Luther, Michelangelo, Edmund Spenser, Cervantes, Copernicus, Galileo, and Monteverdi. Guest lectures will include Peter Dear, History; Esther Dotson, History of Art; and Rebecca Harris-Warrick, Music. Lectures and discussion will introduce different methods of interpretation and of historical analysis. Written requirements: two short papers and a final take-home examination.

COM L 363–364 The European Novel (also SpanL 363)
363, fall; 364, spring. 4 credits. Comparative Literature 363 and 364 may be taken independently of each other. Fall: C. M. Arroyo; spring: J. Ashton.

363: From Boccaccio to Goethe. Survey of the history of the novel from its origins to the end of the eighteenth century. The new genre of Humanism and the medieval romances of chivalry. Ambiguities derived from the lack of the word "novel." Different steps in the conquest of realism. The novel and intellectual history in different epochs: character and structure in the novels and contemporary philosophical views on man, cosmos, gender, and social classes. Readings include Boccaccio's *Fiammetta*; G. Pérez's *Lazarillo de Tormes*; Cervantes's *Don Quixote*, Mme de Lafayette's *The Princess of Cleves*; Defoe's *Robinson Crusoe*; Horace Walpole's *The Castle of Otranto*; and Goethe's *The Sorrows of Young Werther*, as well as a short package containing theoretical statements about the genre from Giraldi Cinthio to Goethe. All texts read in English.

364: From Stendhal to the present (in translation). Close reading of novels from the 19th and 20th centuries: Stendhal's *The Red and the Black*; Flaubert's *Madame Bovary*; Dostoevsky's *Crime and Punishment*; Joyce's *Portrait of the Artist as a Young Man*; Kafka's *The Metamorphosis*; and Kundera's *The Unbearable Lightness of Being*. Study of the changing ways of representing recurring themes: the role of the creative imagination; the city and country; rebellions and revolutions; communities and solidarity; dominant groups and minorities (social, ethnic, religious, psychological); interplay of politics, sex, and humor. Artistic and structural developments: coherence, connectedness, fragmentation; from realism to modernism.

COM L 365 Contemporary Fiction
Fall. 4 credits. B. Maxwell.
A study of European fiction and drama largely drawing on texts from the first half of the twentieth century. We will pay particular attention to the making of literary types and characters; to traces of utopian and messianic elements; to the relations between memory and political revolution; and to the motive of *ressentiment*. Readings (in translation) chosen from the following: Robert Walser, *Snowwhite* and *The Walk*; Franz Kafka, *The Trial*; Thomas Mann, *Death in Venice*; Bertolt Brecht, *The Rise and Fall of the City of Mahagony*; Joseph Roth, *Hotel Savoy*; Alfred Döblin, *Berlin Alexanderplatz*; Christa Wolf, *The Quest for Christa T.*; Louis Aragon, *Paris Peasant*; Louis-Ferdinand Céline, *Death on the Installment Plan*; Elio Vittorini, *In Sicily*; Natalia Ginzburg, stories; and Isaac Babel, stories. Collateral theoretical readings by Georg Lukács, Ernst Bloch, Bertolt Brecht, Walter Benjamin, Siegfried Kracauer, Gershom Scholem, Elias Canetti, and Christa Wolf.

COM L 367 The Russian Novel (also RUSS L 367)
Fall. 4 credits. G. Gibian.
For description, please see Russian Literature 367.

COM L 376 Chinese Narrative Fiction (also Asian 374)
Spring. 4 credits. E. Gunn.
For course description, please see Asian Studies 374.

COM L 385 Reading Nabokov (also RUSS L 385, ENGL 379)
Fall. 4 credits. Enrollments limited to 25. G. Shapiro.
For course description, please see Russian Literature 385.

[COM L 387 Interpretation and/as Violence
Spring. 4 credits. Not offered 1999–2000. Staff.
This course is a response to the approach of the millennium and the increase of violence that seems destined to accompany it. The working hypothesis of the course is that reading should be a process of radical patience which resists the millenarian drive towards apocalypse, and that 'reading' should be distinguished from 'interpretation.' The course will introduce students to the history and theory of interpretation and will show how it has implied a certain kind of violence at least since the beginnings of Christianity. We will begin by exploring how the New Testament comes into being as a more or less violent interpretation of Jewish scriptures, and how Christianity sets up a strong interpretative regime that continues to exert its power today. Given that the ethics of interpretation is becoming increasingly urgent, we will focus on how literary interpretation becomes institutionalized in order to rethink what happens when a reader meets a text. Particular attention will be given to developments in nineteenth-century Germany, where theological categories gradually became secularized as part of the founding process of the modern university.]

[COM L 389 Contemporary Literature in Central and E. Europe (also RUSS L 389)
Fall. 4 credits. Not offered 1999–2000. G. Gibian.
For course description, please see Russian Literature 389.]

[COM L 394 Trans-Atlantic Renaissance (also ROM S 394)
Spring. 4 credits. Not offered 1999–2000. J. Piedra.
For course description, please see Romance Studies 394.]

[COM L 395 Fin de Siècle or Belle Epoque?: Parisian Culture Around 1900 (also FRLIT 393)
Spring. 4 credits. Not offered 1999–2000. Staff.
Focusing on Parisian culture between 1880 and 1914, a period in which artists and intellectuals confronted a startling new world wrought by industrial production, urban concentration, and political reorganization, this course will consider the relationship between decadence and modernity, with special attention to sexuality and the subject of modernity in the Belle Epoque. Themes to be considered will include: 1) theories of pathology, decadence, and difference; 2) city spectacle and mass entertainment; 3) the retreat to the interior as a site of psychological exploration and artistic innovation; 4) feminine culture and the New Woman; 5) spaces of the demimonde (the culture of courtesans, sapphism 1900); 6) identity and technological innovation. Short critical texts will be read in relation to well-known authors of the period such as Max Nordau, Zola, Huysmans, Rachilde, Colette, and Proust. Requirements will include short oral presentations and a term paper.]

[COM L 396 German Film (also GERST 396 and THETR 396)
Spring. 4 credits. Requirements: participation in class discussion, one paper, midterm, and final. Not offered 1999–2000. D. Bathrick.
For description, please see Theatre Arts 396.]

COM L 400 Augustine's *Confessions* (also SOC HUM 402 and NES 490)
Fall. 4 credits. Enrollments limited to 15. C. Brittain.
For course description, please see Society for Humanities 402.

COM L 404 History into Fiction: Nazis and the Literary Imagination (also JewST 414, ENGL 404 and GERST 414)
Fall. 4 credits. E. Rosenberg.
For description, see ENGL 404.

COM L 408 Operatic Contacts (also SOC HUM 405)
Fall. 4 credits. Enrollments limited to 15. A. Groos.
For course description, please see Society for Humanities 417.

[COM L 409 Genius and Madness in German Literature (also GER ST 428)
Fall. 4 credits. Not offered 1999–2000. A. Schwarz.
For course description, please see GER ST 428.]

[COM L 410 Semiotics and Language (also LING 400 and Fr Rom St 400)
Spring. 4 credits. Prerequisite: some background in an area relevant to semiotics: e.g., linguistics, philosophy, psychology, anthropology, or literature; or permission of instructor. Not offered 1999–2000. L. Waugh.
For description, please see Linguistics 400.]

[COM L 411 The Short Novel from Flaubert and James to the Present
Spring. 4 credits. Enrollment limited. Not offered 1999–2000. E. Rosenberg.
Discussion of some ten authors who excelled in the form of the novella and whose names are thus up to a point "given": in addition to James and Flaubert, writers like Conrad, Tolstoy, Mann, Kafka, Joyce, Faulkner, Marquez, Morrison. One novella each week or week and a half, but not in canonical order; e.g., Conrad's *Heart of Darkness*, Kafka's *Penal Colony*, and Ozick's *The Shawl* as versions of modern politics (or atrocities); the question of "status" as this is reflected in the relations between employer and domestic in things like Flaubert's *Simple Heart*, Tolstoy's *Master and Man*, and Gertrude Stein's *The Good Anna*; versions of the *récit*—specifically on the conditions of marriage—in Tolstoy's *Kreutzer Sonata* and (to stick with Beethoven) André Gide's *Pastoral Symphony*; same-sex relations in James's *Pupil* and Mann's *Death in Venice*; then also varieties of the fantastic in, say, *Jekyll and Hyde*, *Turn of the Screw*, Dostoevski's *Double*.]

[COM L 413 Death, Culture and the Literary Monument
Fall. 4 credits. Not offered 1999–2000. N. Melas.
Beginning with Homer's *Iliad*, this course will inquire into the monumental transformation of death into immortality in the literary composition. How do death's negations become fiction's triumph? We will pay particular attention to the fate of this procedure when its subjects are no longer heroic warriors but slaves and women. How do colonial domination and gender difference alter the aesthetic procedures and assumptions underlying commemoration and literary immortality? In addition to death and language, we will consider such themes as the relation of antiquity to the present, of identity to its dissolution and of politics to culture. Readings of literary texts drawn from a variety of languages and traditions will be attended by selected readings in critical theory and a glance at visual culture, particularly surrounding monuments commemorating the emancipation of slaves and the holocaust. Authors will include Homer, Derek Walcott, Simone Schwartz-Bart, Virginia Woolf, Krista Wolf, Tayeb Salih, Maurice Blanchot, Hegel, Orlando Patterson, Walter Benjamin.]

COM L 416 Contemporary Literary Criticism (also ASIAN 406)
Spring. 4 credits. Y. Kim.
For course description, please see Asian Studies 406.

[COM L 417 Faust (also GER ST 417)
Fall. 4 credits. Not offered 1999–2000. H. Deinert.
For course description, please see German Studies 417.]

COM L 418 Virtual Orientalisms (also Asian 415)
Spring. 4 credits. B. deBary.
Registration limited to 25. For course description, please see Asian Studies 415.

COM L 419–420 Independent Study
419, fall; 420, spring. Variable credit. Comparative Literature 419 and 420 may be taken independently of each other. Applications available in 145 G.S.

[COM L 421 Approaches to Discourse (also LANG 420
Spring. 4 credits. Not offered 1999–2000. H. Tao.
For course description, please see LANG 420.]

COM L 424 Augustine's *Dialogues of the Soul* (also SOC HUM 403)
Spring. 4 credits. Enrollments limited to 15. C. Brittain.
For course description, please see Society for Humanities 403.

[COM L 425 Marx, Freud, Nietzsche (also GER ST 415, GOVT 473)
Spring. 4 credits. Not offered 1999–2000. G. Waite.
For course description, please see German Studies 415.]

[COM L 426 New Testament Seminar (also REL ST 426)
Spring. 4 credits. Enrollment is limited to 20 students. Not offered 1999–2000. C. Carmichael.
Identification and discussion of problems in the New Testament.]

COM L 428 Biblical Seminar (also RelSt 427)
Fall. 4 credits. C. Carmichael.
Topic for 1999–2000: Sex and Religion in the Bible. Discussion of attitudes to sexuality in the Bible. In Old and New Testament texts we will examine the clash between ancestral behavior and subsequent laws and between legal and religious ideas. Topics will include: marriage and divorce, incest, intermarriage, gender discrimination, guilt and shame, homosexuality, women and purity, sexual language and symbols. It should be possible to say something new about the topics and also, because of the perennial nature of the issues, to say something that is relevant to contemporary life. The seminar is for teachers of ancient history, biblical, Jewish, and religious studies, cultural anthropology, ethics, history of law, literary studies, sociology, western civilization, and women's studies.

[COM L 429 Readings in the New Testament (also NES 429, REL ST 429 and ENGL 429)
Fall. 4 credits. Limited to 30 students. Not offered 1999–2000. J. P. Bishop.
Close readings of representative texts from the New Testament in modern scholarly editions, with the help of appropriate introductory and specialized commentary. The focus will be on Acts and the letters of Paul. All readings will be in English, but repeated reference to the Greek original will be made. Graduate students and undergraduates from other colleges who are interested in the material should not feel inhibited about enrolling. The approach will be primarily exegetical; that is, we will try to find out what the texts say and what they mean by what they say. Thus we can hope to stay open to scholarly and religious issues alike.]

COM L 431 Testimony, Law and Literature (also SocH 420)
Spring. 4 credits. M. Sanders.
For course description, please see Society for Humanities 420.

COM L 433 Visual Studies in the Diaspora (also SocH 410)
Fall. 4 credits. K. Mercer.
For course description, please see Society for Humanities 410.

COM L 434 Nabokov vs. Freud (also RussL 435)
Spring. 4 credits. S. Senderovich.
For course description, please see Russian Literature 435.

Spring. 4 credits. Not offered 1999–2000. S. Senderovich.
For course description, please see Russian Literature 425.]

[COM L 449 Misogyny and Its Readers (also COM L 649, ITAL L 409/609, WM ST 409/609)
Fall. 4 credits. Not offered 1999–2000. M. Migiel.
For course description, please see Italian Literature 409.]

COM L 450 Renaissance Poetry (also ComL 650, Engl 422/622)
Fall. 4 credits. W. Kennedy.
A reading and discussion of key texts in lyric poetry from Italian, French, English, and other European literatures of the Renaissance.
Topic for Fall 99: Forms of national identity in Petrarch, DuBellay, Sidney, and Wroth.

COM L 451 Renaissance Narrative
Spring. 4 credits. W. Kennedy.
A reading and discussion of key texts in narrative epic and chivalric romance from Italian, French, English, and other European literatures of the Renaissance.

[COM L 452 Renaissance Humanism (also COM L 652)
Spring. 4 credits. Enrollment limited to 15. Not offered 1999–2000. W. Kennedy.
A reading and discussion of key texts by Renaissance humanists in Italian, French, English and other European literatures from the fourteenth to seventeenth centuries.]

[COM L 455 Caribbean Literature (also AFRICANA ST 455)
Fall. 4 credits. Enrollment limited to 15. Not offered 1999–2000. A. Adams.
For description, please see Africana Studies 455.]

[COM L 456 Boccaccio: Gender, Power, and the Medieval Text (also ITAL L 445/645 and WOMNS 448/648)
Fall. 4 credits. Not offered 1999–2000. M. Migiel.
For description, please see Italian Literature 445/645.]

COM L 459 Opera, History, Politics, Gender (also HIST 456, MUSIC 474, ITALL 456, SOC HUM 459, WOMST 454)
Spring. 4 credits. M. Steinberg, S. Stewart.
For course description, please see History 456.

COM L 460 Francophone Sub-Saharan African Cinema and Literature
Fall. 4 credits. D. Thomas.
Lectures will focus on the history of Western colonial contact with Africa (from colonization to decolonization), the particular conditions in which African cinema emerged, language politics, production and distribution, film and popular culture, the impact of colonial education and neo/colonial culture on traditional Africa, African women and sexual politics, satires and fables of today's Africa, political commitment, and the consequences of modernization on African traditions and rural life.

In addition to the films that will be screened, students will be required to read a number of novels and plays. This will allow students to compare and contrast the respective merits and effectiveness of writers and filmmakers treating similar sociological circumstances, and to confront the particular problems facing film and print culture.

[COM L 463 Decadence, Degeneration and the 19th-Century Imaginary
Spring. 4 credits. Not offered 1999–2000. T. Hope.
Through critical reading of French, British and German prose fiction as well as examples of medical, anthropological and philosophical thought, we shall examine the social significance of discourses of disease, decadence and degeneration from the late eighteenth century to the early twentieth. How are questions of bodily pathology related to the construction of "national" bodies? How does perversion emerge at the core of theories of heredity and genealogy that traverse Europe's colonial scenes? What is the relationship between symptoms and texts, between sickness and subversion, in the mapping of gender, class, race and sexuality onto the body? The course material will include readings from Jean-Jacques Rousseau, Alexandre Dumas *fils*, Edgar Allan Poe, Honoré de Balzac, Arthur Schopenhauer, Friedrich Nietzsche, Sigmund Freud, Rémy de Gourmont, Havelock Ellis, Radclyffe Hall and Thomas Mann. Students may read in the original language or in translation.]

COM L 465 Feminist Theory/Lesbian Theory (also WomSt 465, GerSt 465)
Fall. 4 credits. A. Villarejo.
For course description, please see Women's Studies 465.

[COM L 472 Poetry of the 1990s (also ENGL 408, SPAN L 472, and GER ST 472)
Fall. 4 credits. Enrollment limited to 15 students. Not offered 1999–2000. J. Monroe.
Where is poetry now? Where is it heading as we move toward the twenty-first century? What is its current situation in light of the historic changes that have occurred since 1989? Exploring how contemporary poetry is responding to a new era of altered expectations and redrawn boundaries, a time of renewal and redefinition, we will track the principal issues, directions, figures, and forces shaping the process of poetry's unfolding in the twentieth century's final decade. Materials will be drawn from a wide variety of forms and contexts, including movies, literary journals, general circulation magazines, and anthologies, as well as individual poetry collections.]

COM L 474 Topics in Modern European Intellectual and Cultural History (also Hist 474)
Fall. 4 credits. D. LaCapra.
For course description, please see History 474.

COM L 477 Mourning People: Melancholias of Nation and Race (also COM L 677, FrLit 409/609)
Fall. 4 credits. T. Hope.
This course will examine the usefulness of psychoanalysis to postcolonial studies, race theory, and genealogies of nationhood. We

shall concentrate on French and Francophone, English and Anglophone literatures as "case studies" intended to test the limits of historicization of theories of race and nation including those of Todorov, Bhabha, Said, Spillers, Cheng, Anderson, Glissant and Freud. Why is the imagination of community so tightly linked with the specter of violent origins? Why is a collectivity grounded in nationhood in fact ruptured by abysses of disavowal? Why does the genealogical imagination of race, similitude and assimilation depend upon the specter of fleshly pathology and archaic symptomaticity? Course material will be wide-ranging, but we shall depart from Bernardin de Saint Pierre's national (French? Mauritian?) fable, Paul et Virginie. proceed through nineteenth-century French and British "cryptic orientalism" and imperial gothic, museology as ethnographic and national discipline, psychoanalytic Egyptology, Africanist and diasporic nostalgias, memory and Jewish identity before and since the holocaust, and migrant mournfulness. In general, the course will move from "allo-melancholic" to "auto-melancholic" cultural formations, investigating, for example, how Mauritian culture has inherited European melancholy as its colonial legacy and how the metropoles have responded to the loss of former colonies.

COM L 478 Nationalism and National Literatures in Francophone sub-Saharan Africa (also COM L 678)
Spring. 4 credits. D. Thomas.
This seminar will begin with an examination of the history of French colonial contact with francophone sub-Saharan Africa. Our discussion will focus on colonial expansionism, French assimilationist policies, and the gradual emergence of the nationalist discourse that culminated in the gradual and systematic dismantling of the Empire. This information will subsequently be brought to the appreciation and understanding of cultural phenomena procued by francophone sub-Saharan African novelists and filmmakers between 1950–1990.

[COM L 481 Baudelaire in Context (also COM L 680)
Spring. 4 credits. Not offered 1999–2000. J. Culler.
A study of *Les Fleurs du Mal* in the context of various nineteenth- and twentieth-century discourses: The Romantic lyric (Hugo, Lamartine, Desbordes-Valmore), romantic satanism, debates about prostitution, and twentieth-century accounts of Baudelaire as the founder of modern poetry or the poet of the city.]

COM L 482 Latin American Women Writers (also SpanL 492, WmSt 481)
Spring. 4 credits. D. Castillo.
For course description, please see Spanish Literature 492.

COM L 483 Imagining the Holocaust (also Engl 483)
Spring 2000. 4 credits. D. Schwarz.
For course description, please see English 458.

COM L 493 Senior Essay
Fall and spring. 8 credits.
Hours to be arranged individually in consultation with the director of the Senior Essay Colloquium. Approximately fifty pages to be written over the course of two semesters in the student's senior year under the direction of the student's adviser. An "R" grade will be assigned on the basis of research and a preliminary draft completed in the first semester. A letter grade will be awarded on completion of the second semester.

[COM L 604 Translation and the Global Marketplace
Fall. 4 credits. Not offered 1999–2000. Staff.
The seminar will investigate the global politics of translation, focusing on how works are picked up (or not) for international circulation. Issues to be examined will include: how the politics of local censorship restrict or enable visibility; how the problem of cultural essentialism is packaged and marketed transnationally; how cultural and national identity come through (or not) in translation; how experiments in non-standard English (ebonics, cubonics, créolité, drug argot, and class slang) disturb or reaffirm linguistic identity politics. In addition to critical texts, the course will engage with textual studies of Ken Saro-wiwa's *Sozaboy: A Novel Written in Rotten English*, Salmon Rushdie's *The Santanic Verses*, Theresa Hak Cha's *Dictée*, Patrick Chamoiseau's *Texaco*, Irvine Welsh's *Trainspotting*, and Gustavo Perez Firmat's *Life on the Hyphen*. The final section of the seminar will be devoted to exploring ways in which a growing number of non-western writers have begun to break out of traditionalist narrative modes in order to "translate" the effects of new media on literary representation, from Afro-futurism to postcolonial cyberpunk.]

[COM L 609 Comparison and Cultural Difference
Fall. 4 credits. Not offered 1999–2000. N. Melas.
This course will be a wide-ranging investigation of the pitfalls and possibilities for cross-cultural comparison. We will examine the structure and mechanisms of comparison, both as a disciplinary method and as a concept or practice: to what extent and in what circumstance can comparison produce cultural difference, consolidate it, dissolve it, erect borders, inhabit borderlands, propose a global ecumene? With particular attention to colonialism and globalization, we will inquire into the relation between various modes of comparison and broader contexts and ideologies. Though focused on the humanities and on theoretical texts, readings will include incursions into the social sciences and selected poetry and film. Authors may include Lyotard, Foucault, Fanon, Tilley, Gilroy, Clifford, Appadurai, Bhabha, Lanser, Kincaid, Walcott.]

COM L 610 Modern Japanese Studies: The Formation of the Field in History and Literature (also ASIAN 609)
Spring. 4 credits. B. deBary, N. Sakai, J. Koschmann.
For course description, please see Asian 609.

COM L 619–620 Independent Study
619, fall; 620, spring. Variable credit. Comparative Literature 619 and 620 may be taken independently of each other. Applications available in 145 G.S.

[COM L 622 Literature and Theory (also Com L 302 and ENGL 302/602)

Fall. 4 credits. A. Schwarz.
For course description, please see German Studies 617.

[COM L 626 Baroque (also GER ST 627)
Fall. 4 credits. Not offered 1999–2000. G. Waite.
For description, please see German Studies 627.]

[COM L 641 Bakhtin as Reader (also RUSS L 641)
Spring. 4 credits. Also open to undergraduates with permission of instructor. Not offered 1999–2000. P. Carden.
For description, please see Russian Literature 641.]

[COM L 649 Misogyny and Its Readers (also COM L 449, ITAL L 409/609, WM ST 409/609)
Fall. 4 credits. Not offered 1999–2000. M. Migiel.
For course description, please see Italian Literature 409.]

COM L 650 Renaissance Poetry (also ComL 450, Engl 622)
Fall. 4 credits. W. Kennedy.
For course description, please see Comparative Literature 450.

[COM L 652 Renaissance Humanism (also COM L 452)
Spring. 4 credits. Not offered 1999–2000. W. Kennedy.]

[COM L 656 Aesthetic Theory: The End of Art (also GER ST 656)
Spring. 4 credits. Not offered 1999–2000. P. Gilgen.
For course description, please see German Studies 656.]

[COM L 657 Seminar in Dramatic Theory (also THETR 637)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. R. Schneider.
For description, please see Theatre Arts 637.]

COM L 660 Visual Ideology (also GerSt 660, Thetr 660)
Spring. 4 credits. G. Waite.
For course description, please see German Studies 660.

COM L 662 Cinematic Desire (also Engl 660, WmSt 661)
Fall. 4 credits. E. Hanson.
For course description, please see English 660.

[COM L 664 Literature and the Uncanny (also GER ST 668)
Fall. 4 credits. Not offered 1999–2000. A. Schwarz.
For course description, please see German Studies 656.]

COM L 671 Transnational Imaginaries: Globalization and Culture
Fall. 4 credits. N. Melas.
The term "globalization" has become ubiquitous in recent years as the primary conceptual frame and material basis for understanding contemporary transnationalism. It evokes a brave new borderless world in

which politics, culture, and social formations are no longer necessarily congruent nor primarily beholden to national boundaries, thus making neocolonial domination easier to see and harder to combat. It triumphantly or despairingly announces the end of history when space precedes time as the measure of human experience, and that experience exceeds the grasp of aspects of our understanding of culture—both in its ethnographic and humanist guises—and of the categories through which we apprehend and analyze it. The question of the mutation of culture in globalization is most often framed either in terms of the prospects for global culture and its inverse, a regeneration of resistant and hybrid localism, or in terms of the global reach of chiefly U.S. popular culture through the media.

While considering these issues, this seminar will focus on how globality is represented, or rather imagined, particularly in cultural texts (chiefly theory, literature, and film) marginal to the centers of power. In addition to providing a critical survey of some of the most influential texts and debates on the subject of globalization, this seminar will also attempt a re-evaluation (not to say a rehabilitation) of the notion of "imagination" and the pivotal if often covert role it plays in claims for cultural resistance. Authors may include Amin, Wallerstein, Hall, Myoshi, Harvey, Robertson, Appadurai, Agamben, Walcott, Brennan, Jameson, Glissant, Mies.

[COM L 674 Contemporary Poetry and Culture: 1968–1998 (also ENGL 697 and GERST 674)
Spring. 4 credits. Not offered 1999–2000. J. Monroe.
The redrawing of cultural and political boundaries underway since the late 1980's has made it possible to conceive of the poetry of the Cold War era with a degree of closure unimaginable only a few years ago. In light of this changed situation, we will focus on the second half of the post-1945 period—the thirty years extending from 1968 to the present—with particular attention to the past two decades. Exploring issues of emerging and evolving importance for a poetry of the present moment in light of the recent past, we will consider dominant modes as well as alternative practices; canon formation, gender, and multiculturalism; the roles of the publishing industry, popular culture, creative writing programs, and new computer technologies in shaping reading habits and writing communities.]

[COM L 675 After the Divide: German Critical Theory of the Seventies and Eighties (also GERST 675 and HIST 675)
Fall. 4 credits. Not offered 1999–2000. P. Hohendahl.
For description, please see German Studies 675.]

COM L 677 Mourning People: Melancholias of Nation and Race (also FrLit 609)
Fall. 4 credits. T. Hope.
For course description, please see Comparative Literature 477.

COM L 678 Nationalism and National Literatures in Francophone sub-Saharan Africa (also COM L 478)
Spring. 4 credits. D. Thomas.
For course description, please see Comparative Literature 478.

[COM L 680 Baudelaire in Context (also COM L 481)
Spring. 4 credits. Not offered 1999–2000. J. Culler.
For course description, please see Comparative Literature 481.]

COM L 683 Imagining the Holocaust (also Com L 483, Engl 458/658, JWST 458/658)
Spring. 4 credits. D. Schwarz.
For course description, please see English 458.

[COM L 686 Althusser and Lacan (also GER ST 686, FR LIT 623)
Spring. 4 credits. Enrollment limited to 12. Not offered 1999–2000. G. Waite.
For course description, please see German Studies 686.]

[COM L 689 Adorno's Aesthetic Theory (also GER ST 689)
Fall. 4 credits. Not offered 1999–2000. P. Hohendahl.
For course description, please see German Studies 689.]

COM L 695 Post-Modern Thought and Area Studies (also JapL 614)
Fall. 4 credits. B. deBary.
For course description, please see Japanese Literature 614.

COM L 696 Conceptualizing Cultural Contact (also GerSt 696, NES 696)
Spring. 4 credits. L. Adelson.
For course description, please see German Studies 696.

[COM L 699 German Film Theory (also GERST 699 and THETR 699)
Fall. 4 credits. Not offered 1999–2000. D. Bathrick.
For description, please see Theatre Arts 699.]

COMPUTER SCIENCE

C. Van Loan, chair; B. Arms, K. Birman, C. Cardie, T. Coleman, R. L. Constable, R. Elber, D. Greenberg, D. Gries, J. Halpern, J. Hartmanis, J. E. Hopcroft, D. Huttenlocher, S. Keshav, J. Kleinberg, D. Kozen, L. Lee, G. Morrisett, A. Myers, K. Pingali, R. A. Rubinfeld, F. B. Schneider, B. Selman, P. Seshadri, D. Shmoys, B. Smith, E. Tardos, R. Teitelbaum, S. Toueg, S. Vavasis, T. vonEicken, R. Zabih

The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college may major in computer science. For details, visit our World Wide Web site at http://www.cs.cornell.edu/ugrad

The Major

CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:

- four semesters of calculus (MATH 111–122 (or 112)–221–222 or 191–192–293–294)
- two semesters of introductory computer programming (COM S 100 and 211 or 212)
- a seven-course computer science core (COM S 222, 280, 314, 381, 410, 414, and 482)
- two 400+ computer science electives, totaling at least 6 credits
- a computer science project course (COM S 413, 415, 418, 433, 473, 501, 514, 519, or 664)
- a 3+ credit mathematical elective course (OR&IE 270, MATH 300+, T&AM 300+, etc.)
- two 300+ courses that are technical in nature and total at least six credits
- a three course specialization in a discipline other than computer science. These courses must be numbered 300-level or greater and total at least nine credits.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the advisor, the computer science major is expected to put together a coherent program of study that supports career objectives and is true to the aims of liberal education.

Admission

The prerequisites for admission to the major are:

1) Completion of Computer Science 100–211 (or 212)–280
2) Completion of Mathematics 111–122–221 or Mathematics 191–192–293
3) B- or better in all computer science and mathematics courses
4) Acceptance by the department's admissions committee

After admission, students are expected to maintain at least a 2.75 grade-point average in their major courses. Any grade below C– in a core course or related elective is not acceptable.

Honors. To qualify for departmental honors a student must have:

- maintained a cumulative GPA>=3.5
- completed 8 credit hours of COM S course work at or above the 500 level
- completed 6 credit hours of COM S 490 research with a COM S faculty member, spread over at least two semesters and with grades of A- or better.

Note: Honors courses may not be used to satisfy the COM S 400+ elective requirement, the COM S project requirement, the math or technical electives, or the specialization minor. See the COM S undergraduate website for more information on eligibility: http://www.cs.cornell.edu/Ugrad.

Courses

For complete course descriptions, see the computer science listing in the College of Engineering section.

COM S 099 Fundamental Programming Concepts
Fall, summer. 2 credits. S-U grades only. No prerequisites.

COM S 100 Introduction to Computer Programming
Fall, spring, summer. 4 credits.
During the fall semester, two versions of COM S 100 (COM S 100a and COM S 100b) are available as described in the computer science listing in the College of Engineering.

COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, and PSYCH 102)
Fall. 3 credits.

COM S 113 Introduction to C
Fall, spring. 1 credit. Weeks 5–8. Prerequisite: COM S 100 or equivalent programming experience. Credit is granted for both COMS 113 and 213 only if 113 is taken first. S–U grades only.

COM S 114 Unix Tools
Fall, spring. 1 credit. Weeks 1–4. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.

COM S 130 Creating Web Documents
Fall. 3 credits.

COM S 201 Cognitive Science in Context Laboratory: Explorations of Cognitive Science in Ecological Settings (also COGST 201 and PSYCH 201)
Fall, spring. 4 credits. Limited to 24 students. Prerequisite: Introduction to Cognitive Science (PSYCH 102, COGST 101, COM S 101), or written permission of the instructor. Disc and demos, M W 10:10; lab, M or W 1:25–4:25, plus additional hours to be arranged.
B. Halpern and staff.

COM S 202 Transition to Java
Fall, spring. 1 credit. Weeks 1–4. Prerequisites: COM S 100; COM S 212 recommended.

COM S 211 Computers and Programming (also ENGRD 211)
Fall, spring, summer. 3 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.

COM S 212 Structure and Interpretation of Computer Programs (also ENGRD 212)
Fall, spring. 4 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.

COM S 213 C++ Programming
Fall, spring. 2 credits. Prerequisite: COM S 211 or 212 or equivalent programming experience. Students who plan to take COMS 113 and 213 must take 113 first. S-U grades only.

COM S 222 Introduction to Scientific Computation (also ENGRD 222)
Spring, summer. 3 credits. Prerequisites: COM S 100 and (MATH 222 or 294).

COM S 280 Discrete Structures
Fall, spring. 4 credits. Pre- or co-requisite: COM S 211 or 212 or permission of instructor.

COM S 314 Introduction to Digital Systems and Computer Organization
Fall, spring. 4 credits. Prerequisite: COM S 211 or 212 or equivalent.

COM S 381 Introduction to Theory of Computing
Fall, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.

[COM S 400 The Science of Programming
Spring. 4 credits. Prerequisite: COM S 280 or equivalent. Not offered every year; semester to be announced.]

COM S 409 Data Structures and Algorithms for Computational Science
Spring. 4 credits. This course is not open to COM S majors. Credit will not be granted for both COM S 409 and 410. Prerequisite: COM S 211 or 212 or equivalent programming experience.

COM S 410 Data Structures
Fall, spring, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor.

[COM S 411 Programming Languages and Logics
Fall. 4 credits. Prerequisites: COM S 410 or permission of instructor. Not offered every year; semester to be announced.]

COM S 412 Introduction to Compilers and Translators
Spring. 3 credits. Prerequisites: COM S 314, 410, and 381 or 481. Corequisite: COM S 413.

COM S 413 Practicum in Compilers and Translators
Spring. 2 credits. Prerequisites: COM S 314, 410, and 381 or 481. Corequisite: COM S 412.
A compiler implementation project related to COM S 412.

COM S 414 Systems Programming and Operating Systems
Fall, summer. 3 credits. Prerequisite: COM S 314 or permission of instructor.

COM S 415 Practicum in Operating Systems
Fall. 2 credits. Prerequisite: COM S 410. Corequisite: COM S 414.

COM S 417 Computer Graphics and Visualization (also ARCH 374)
Spring. 3 credits. Prerequisite: COM S 211 or 212.

COM S 418 Practicum in Computer Graphics (also ARCH 375)
Spring. 2 credits. Enrollment limited. Permission of instructor. Prerequisite: COM S 211 or 212. Recommended: COM S 314. Corequisite: COM S 417.

COM S 421 Numerical Analysis
Fall. 4 credits. Prerequisites: MATH 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

COM S 432 Introduction To Database Systems
Fall. 3 credits. Prerequisites: COM S 211 or 212 and COM S 410. Recommended: COM S 213 and strong programming skills in C, C++, or Java.

COM S 433 Practicum in Database Systems
Fall. 2 credits. Corequisite: COM S 432.

[COM S 444 Distributed Systems and Algorithms
Fall. 4 credits. Pre- or co-requisite: COM S 414 or permission of instructor. Not offered every year. Not offered 1999–2000.]

COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits. Prerequisites: COM S 211 or 212 and COM S 280 or equivalent.

COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits. Prerequisites: COM S 211 or 212 and COM S 280 or equivalent. Corequisite: COM S 472.

COM S 481 Introduction to Theory of Computing
Fall. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.
A faster-moving and deeper version of COM S 381. Corrective transfers between COM S 481 and 381 (in either direction) are encouraged during the first few weeks of instruction.

COM S 482 Introduction to Analysis of Algorithms
Spring, summer. 4 credits. Prerequisites: COM S 410 and either 381 or 481, or permission of instructor.

COM S 486 Applied Logic (also MATH 486)
Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, COM S 280 or equivalent (such as MATH 332, 432, 434, 481), and some course in mathematics or theoretical computer science.

COM S 490 Independent Reading and Research
Fall, spring. 1–4 credits.

COM S 501 Software Engineering: Technology and Technique
Fall. 4 credits. Prerequisite: COM S 410 and knowledge of the C programming language.

COM S 513 System Security
Spring. 4 credits. Prerequisites: COM S 414 or 519 and familiarity with JAVA programming language.

COM S 514 Intermediate Computer Systems
Fall or spring. 4 credits. Prerequisites: COM S 414 or permission of instructor.

COM S 515 Practicum in Systems
Fall or spring. 1–2 credits. Co-rerequisite: COM S 514.

COM S 519 Engineering Computer Networks
Fall. 4 credits. Prerequisites: COM S 314 and 410, or permission of instructor.

COM S 522 Computational Tools and Methods for Finance
Spring. 4 credits. Prerequisites: programming experience (e.g. C FORTRAN, or MATLAB,) some knowledge of numerical methods, especially numerical linear algebra.

COM S 574 Heuristic Methods for Optimization (also CEE 509)
Spring. 3 or 4 credits. Prerequisite: COM S/ENGRD 211 or 212 or 222 or CEE/ENGRD 241, or graduate standing, or permission of instructor.

COM S 601 System Concepts
Fall. 3 credits. Prerequisite: open to students enrolled in the COM S Ph.D. program.

COM S 611 Advanced Programming Languages
Fall. 4 credits. Prerequisites: graduate standing or permission of instructor.

COM S 612 Compiler Design for High-Performance Architectures
Spring. 4 credits. Prerequisites: COM S 314 and 412 or permission of instructor.

COM S 613 Concurrent Programming
Spring. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered every year; semester to be announced.

COM S 614 Advanced Systems
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

COM S 618 Principles of Distributed Computing–Message Passing
Spring. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in even-numbered years.

[COM S 619 Principles of Distributed Computing–Shared Memory
Spring. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in odd-numbered years. Not offered 1999–2000.]

COM S 621 Matrix Computations
Fall. 4 credits. Prerequisites: MATH 411 and 431 or permission of instructor.

[COM S 622 Numerical Optimization and Nonlinear Algebraic Equations
Spring. 4 credits. Prerequisite: COM S 621. Offered in odd-numbered years. Not offered 1999–2000.]

COM S 624 Numerical Solution of Differential Equations
Spring. 4 credits. Prerequisite: previous exposure to numerical analysis (e.g. COM S 421 or 621) to differential equations, and knowledge of MATLAB. Offered in even-numbered years.

COM S 626 Computational Molecular Biology
Spring. 4 credits. Prerequisites: familiarity with linear programming, numerical solutions of ordinary differential equations and non-linear optimization methods.

[COM S 631 Multimedia Systems
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor. Not offered 1999–2000.]

COM S 632 Advanced Database Systems
Spring. 4 credits. Prerequisite: COM S 432/433 or permission of instructor.

COM S 664 Machine Vision
Spring. 4 credits. Prerequisites: undergraduate-level understanding of algorithms and MATH 221 or equivalent.

COM S 671 Introduction to Automated Reasoning
Fall. 4 credits. Prerequisite: COM S 611 and graduate standing or permission of instructor.

COM S 672 Advanced Artificial Intelligence
Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor.

COM S 674 Natural Language Processing
Spring. 3 credits. Prerequisites: COM S 472 or permission of instructor. Not offered every year; semester to be announced.

[COM S 676 Reasoning About Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in even-numbered years. Not offered 1999–2000.]

COM S 677 Reasoning About Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in odd-numbered years.

COM S 681 Analysis of Algorithms
Fall. 4 credits. Prerequisite: (COM S 381 or 481, and graduate standing) or permission of instructor.

COM S 682 Theory of Computing
Spring. 4 credits. Prerequisite: (COM S 381 or 481) and (COM S 482 or 681) or permission of instructor.

COM S 686 Logics of Programs
Spring. 4 credits. Prerequisites: COM S 481, 682, and (MATH 481 or MATH/COM S 486).

COM S 709 Computer Science Colloquium
Fall, spring. 1 credit. S-U grades only. For staff, visitors, and graduate students interested in computer science.

COM S 713 Seminar in Systems and Methodology
Fall, spring. 4 credits. Prerequisites: a graduate course employing formal reasoning, such as COM S 611, 613, 671, a logic course, or permission of instructor. Not offered every year; semester to be announced.

COM S 715 Seminar in Programming Refinement Logics
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 717 Topics in Parallel Architectures
Fall. 4 credits. Prerequisite: COM S 612 or permission of instructor. Not offered every year; semester to be announced.

COM S 719 Seminar in Programming Languages
Fall, spring. 4 credits. Prerequisite: COM S 611 or permission of instructor. S-U grades only.

COM S 722 Topics in Numerical Analysis
Fall, spring. 4 credits. Prerequisite: COM S 621 or 622 or permission of instructor. Not offered every year; semester to be announced.

COM S 729 Seminar in Numerical Analysis
Fall, spring. 1–4 credits (to be arranged). Prerequisite: permission of instructor. S-U grades only.

COM S 754 Systems Research Seminar
Fall, spring. 1 credit.

COM S 772 Seminar in Artificial Intelligence
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 773/774 Proseminar in Cognitive Studies I & II (also COGST, PHIL, LING, and PSYCH 773/774)
Fall, 773; spring, 774. 4 credits.

COM S 775 Seminar in Natural Language Understanding
Fall, spring. 2 credits.

COM S 789 Seminar in Theory of Algorithms and Computing
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

COM S 790 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. Letter grade only. Independent research or Master of Engineering project.

COM S 890 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Master of Science degree research.

COM S 990 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Doctoral research.

ECONOMICS

T. Mitra, chair; R. Masson, graduate field representative; T. Lyons, director of undergraduate studies; K. Basu, L. Blume, S. Coate, M. Conlin, G. Cozzi, T. E. Davis, D. Easley, R. Ehrenberg, R. Frank, G. Hay, Y. Hong, N. Kiefer, P. D. McClelland, M. Majumdar, T. O'Donoghue, S. Ortigueira, U. Possen, R. E. Schuler, K. Shell, G. J. Staller, S. Subramanian, E. Thorbecke, T. Vogelsang, H. Y. Wan, Jr., Y. Wen, J. Wissink. Emeritus: W. Isard, A. Kahn, J. Vanek

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking, international and comparative economics; econometrics; theory; history; growth and development; and the organization, performance, and control of industry.

Social Science Distribution Requirement

The microeconomics distribution requirement can be fulfilled with any of the following:

Economics 101, Economics 301, or Economics 313.

The macroeconomics distribution requirement can be satisfied with any of the following:

Economics 102, Economics 302, or Economics 314.

The Major

Prerequisites

Economics 101 and 102 and Math 111 (or equivalents, with approval of the director of undergraduate studies), all with grades of C or better.

Economics 301 with a grade of C or better substitutes for 101; Economics 302 with a grade of C or better substitutes for 102.

Requirements

Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student's major adviser, all with grades of C- or better.

These eight courses must include:

(1) Economics 313 and 314,

(2) Economics 321, or Economics 319 and 320,

(3) at least 3 courses from the following: 318, 320, 322–99, 467.

Economics 301 with a grade of B or better substitutes for both 101 and 313; Economics 302 with a grade of B or better substitutes for both 102 and 314.

If Economics 321 is applied toward the major, neither 319 nor 320 can be applied.

Economics 263, 399, and 499 *cannot* be counted toward the eight-course requirement.

An honors program is currently being offered. Students should consult the director of undergraduate studies before May of their junior year for more information.

Students planning graduate work in economics and business are strongly encouraged to prepare themselves well in mathematics and econometrics. These students are strongly encouraged to enroll in Economics 319–320 rather than Economics 321.

Courses

ECON 101 Introductory Microeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.
Explanation and evaluation of how the price system operates in determining what goods are produced, how goods are produced, and who receives income, and how the price system is modified and influenced by private organizations and government policy.

ECON 102 Introductory Macroeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.
Analysis of aggregate economic activity in relation to the level, stability, and growth of national income. Topics discussed may include the determination and effects of unemployment, inflation, balance of payments, deficits, and economic development, and how these may be influenced by monetary, fiscal, and other policies.

ECON 263 International Economics
Spring and summer. 4 credits. Prerequisite: Economics 101–102 or equivalent.
This course surveys international economics in one semester. First, it surveys the sources of comparative advantage, and it analyzes commercial policy and the institutional aspects of the world trading system. Second, it discusses exchange rates, and it studies theories of balances of payments adjustments. This course is intended primarily for government majors who are comfortable with a less technical approach to international economics. (Cannot be applied to the economics major.)

ECON 301 Microeconomics
Fall. 4 credits. Prerequisite: calculus.
Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 101 and 313. (Can replace 313 only with grade of B or better). This course covers the topics taught in Economics 101 and 313. An introduction to the theory of consumer and producer behavior and to the functioning of the price system.

ECON 302 Macroeconomics
Spring. 4 credits. Prerequisite: Economics 301.
Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 102 and 314. This course covers the topics taught in Economics 102 and 314. (Can replace 314 only with grade of B or better). An introduction to the theory of national income determination, unemployment, growth, and inflation.

ECON 307 Introduction to Peace Science (also CRP 495.18 and Introduction to Peace Science)
Winter session. 4 credits. Prerequisites: Economics 101–102 or permission of instructor.
Introduction to the theories of and research on conflict resolution. Topics include conflict, its role and impact on society; theories of aggression and altruism; causes of war; game theory; conflict management procedures and other analytical tools and methods of peace science; alternatives to war.

ECON 313 Intermediate Microeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.
The pricing processes in a private enterprise economy are analyzed under varying competitive conditions, and their role in the allocation of resources and the functional distribution of national income is considered.

ECON 314 Intermediate Macroeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.
The theory of national income and determination and economic growth in alternative models of the national economy is introduced. The interaction and relation of these models to empirical aggregate economic data is examined.

[ECON 317 Intermediate Mathematical Economics I
Fall. 4 credits. Prerequisites: Economics 101–102 and Math 111–112. Not offered 1999–2000.
Introduction of calculus and matrix algebra; problems of maximization of a function of several variables. Economic examples are used to illustrate and teach the mathematical concepts.]

[ECON 318 Intermediate Mathematical Economics II
Spring. 4 credits. Prerequisites: Economics 101–102 and Math 111–112. Not offered 1999–2000.
Advanced techniques of optimization and application to economic theory.]

ECON 319 Introduction to Statistics and Probability
Fall. 4 credits. Prerequisites: Economics 101–102 and Mathematics 111–112.
This course provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

ECON 320 Introduction to Econometrics
Spring. 4 credits. Prerequisites: Economics 101–102, 319, or equivalent.
Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding economists' results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

ECON 321 Applied Econometrics
Fall, spring and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.
This course provides an introduction to statistical methods and principles of probability. Topics to be covered include analysis of data, probability concepts and distributions, estimation and hypothesis testing, regression, correlation and time series analysis. Applications from economics are used to illustrate the methods covered in the course.

ECON 323 American Economic History #
Fall. 4 credits. Prerequisites: Economics 101–102 or equivalent.
Problems in American economic history from the first settlements to early industrialization are surveyed.

ECON 324 American Economic History #
Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent.
A survey of problems in American economic history from the Civil War to World War I.

ECON 324A American Economic History #
Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent. Instructor's permission required.
Same material as Economics 324, seminar limited to 12 students.

ECON 331 Money and Credit
Fall. 4 credits. Prerequisites: Economics 101–102 and 314.

A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

ECON 333 Financial Economics
Spring. 4 credits. Prerequisites: Economics 313 and 314.
The theory and decision making in the presence of uncertainty and the practical aspects of particular asset markets are examined.

ECON 335 Public Finance: The Microeconomics of Government
Fall. 4 credits. Prerequisites: Economics 101–102 and 313, or their equivalent, and one semester of calculus.
The role of government in a free market economy is analyzed. Topics covered include public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature will vary from term to term.

ECON 336 Public Finance: Resource Allocation and Fiscal Policy
Spring. 4 credits. Prerequisites: Economics 101–102, 313 or their equivalent and one semester of calculus.
This course covers the revenue side of public finance and special topics. Subjects covered include the federal debt, the budget, and government regulation and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

ECON 341 Labor Economics
For description, see ILRLE 240.

ECON 351 Industrial Organization I
Fall. 4 credits. Prerequisite: Economics 313 or its equivalent.
This course examines markets with only a few firms (i.e., oligopolies), and the primary focus will be the strategic interactions between firms. Topics include static competition in oligopolies, cartels and other forms of collusive behavior, competition between firms producing differentiated products, entry behavior, R&D behavior, and government interventions in oligopoly industries (e.g., antitrust laws).

ECON 352 Industrial Organization II
Spring. 4 credits. Prerequisite: Economics 313 or its equivalent.
This course primarily focuses on the pricing decisions of firms. The course does not consider the strategic response of other firms to these pricing decisions. The pricing decisions include price discrimination, commodity bundling, pricing a product line and pricing a durable good. In addition to pricing decisions, the course will consider topics associated with private information such as adverse selection, signaling and moral hazard. Numerous theoretical models are presented and empirical results are discussed.

ECON 361 International Trade Theory and Policy
Fall. 4 credits. Prerequisites: Economics 101–102 and 313.
This course surveys the sources of comparative advantage. It studies commerical policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

ECON 362 International Monetary Theory and Policy
Spring and summer. 4 credits. Prerequisites: Economics 101–102 and 314.
This course surveys the determination of exchange rates and theories of balance of payments adjustments. It also explores open economy macroeconomics, and it analyzes some of the institutional details of foreign exchange markets, balance of payments accounting, and the international monetary system.

ECON 371 Economic Development
Spring. 4 credits. Prerequisites: Economics 313 or equivalent.
Study of the problem of sustaining accelerated economic growth in less-developed countries. Trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change are emphasized.

[ECON 372 Applied Economic Development
Fall or spring. 4 credits. Prerequisite: Economics 101–102. Not offered 1999–2000.
This course examines several special topics in the economics of developing countries. Among the topics covered recently are the concepts of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.]

ECON 404 Economics and the Law
Fall. 4 credits. Prerequisite: Economics 101.
An examination, through the lens of economic analysis, of legal principles drawn from various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

ECON 408 Production Economics and Policy
For description, see ARME 608.

ECON 409 Environmental Economics and Policy
For description, see ARME 451.

ECON 413 Economics of Consumer Demand
For description, see CEH 613.

ECON 415 Price Analysis
For description, see ARME 415.

[ECON 416 Intertemporal Economics
Spring. 4 credits. Prerequisites: Economics 313. Not offered 1999–2000.
This course is intended for advanced economics majors who are especially interested in economic theory. Topics to be covered: (a) review of the one good Ramsey model of optimal savings and accumulation; conditions for intertemporal efficiency in production; comparative dynamics and sensitivity analysis; (b) some earlier models of capital accumulation; the roles of present value and internal rate of return in guiding investment decisions; (c) growth, exhaustible resources; pollution and conservation: discussion of the trade-offs facing a society.]

[ECON 417 History of Economic Analysis #
Spring. 4 credits. Prerequisites: Economics 101–102 or permission of instructor. Not offered 1999–2000.
Early writings in economics and their relationship to current economic analysis and policy issues, for example, ancient and medieval philosophers on justice in exchange; mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Cantillon); and general competitive equilibrium (the Physiocrats). The most recent reading assignment in this course is Adam Smith's *Wealth of Nations* but the emphasis is on the relationship between the precursors of Adam Smith and his *Wealth of Nations* to modern economics analysis and current efforts to answer some of the questions raised in the early writing on economics.]

[ECON 419 Economic Decisions under Uncertainty
Fall. 4 credits. Prerequisites: Economics 313 and 319. Not offered 1999–2000.
This course provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.]

ECON 420 Economics of Family Policy—Adults
Economics 420 and 421 together, count as one course for the Economics major.
For description, see CEH 320.

ECON 421 Economics of Family Policy—Children
Economics 420 and 421 together, count as one course for the Economics major.
For description, see CEH 321.

ECON 422 The Economics of Infrastructure and a Sustainable Environment
For description, see CEE 422.

ECON 425 Economic History of Latin America @ #
Spring. 4 credits.
A survey of changing economic institutions and policies from pre-Columbian to modern times.

ECON 426 History of American Enterprise #
Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent.
History of the changing structure of American business from 1800 to the present, with major emphasis upon developments after the Civil War. The focus of the course will be the changing structure of challenges (for example, the rise of unions, development of a national capital market, changing role of government) and the various responses of business organizations and entrepreneurs to those challenges.

ECON 430 Policy Analysis: Welfare Theory, Agriculture, and Trade
For description, see ARME 630.

ECON 432 Health Economics and Policy
For description, see CEH 632 or PAM 653.

ECON 435 Information and Regulation
For description, see CEH 635.

ECON 440 Analysis of Agricultural Markets
Economics 440 and 441 together, count as one course for the Economics major.
For description, see ARME 640.

ECON 441 Commodity Futures Markets
Economics 440 and 441 together, count as one course for the Economics major.
For description, see ARME 641.

ECON 444 Modern European Economic History
For description, see ILRLE 444.

ECON 445 Topics in Microeconomic Analysis—Markets and Planning
Fall. 4 credits. Prerequisites: Economics 313.
This is a course of economic theory designed for upperclass undergraduates. Course contents may vary from year to year. Issues that may be examined include (1) How can economic activities be efficiently organized through the market mechanism? Why is the presence of many traders essential to efficiency? (2) What can be done if the indivisibility in production processes becomes an important hindrance to competitive pricing? (3) How can economic planning be decentralized efficiently? This course serves two purposes: (1) to introduce concepts that are novel to undergraduates and relevant to public policy but require only a modicum of analytic tooling up, and (2) to illustrate the deductive approach of modern economic analysis—how to define concepts unambiguously, how to form propositions in clear-cut fashion, and how to follow up logical implications sequentially to the conclusion.

[ECON 446 Topics in Macroeconomic Analysis—Is Keynesianism Dead?
Fall or spring. 4 credits. Prerequisites: Economics 314. Not offered 1999–2000.
The coverage of this course may vary from term to term. Presently, the content of the course deals with the range of criticisms against Keynesian theory by the New Classical Economics, alias the Equilibrium School, alias the Rational Expectations School. Despite the fact that almost all intermediate macroeconomic textbooks are Keynesian in perspective, clearly Keynesian economics is currently at bay. We shall review critically, critiques to Keynesian theory.]

ECON 450 Resource Economics
For description, see ARME 450.

ECON 451 Economic Security
For description, see ILRLE 340.

ECON 453 The Economics of Unemployment
For description, see ILRLE 348.

ECON 454 The Economics of Health Care
For description, see ILRLE 440.

ECON 455 Income Distribution
For description, see ILRLE 441.

ECON 456 The Economics of Employee Benefits
For description, see ILRLE 442.

ECON 457 Women in the Economy
For description, see ILRLE 445.

ECON 458 Topics in Twentieth Century Economic History
For description, see ILRLE 448.

ECON 459 Economic History of British Labor 1750–1940
For description, see ILRLE 640.

ECON 460 Economic Analysis of the Welfare State
For description, see ILRLE 642.

ECON 461 The Economics of Occupational Safety and Health
For description, see ILRLE 644.

ECON 462 Labor in Developing Economies
For description, see ILRIC 332.

ECON 464 Economics of Agricultural Development
For description, see ARME 464.

ECON 465 Food and Nutrition Policy
For description, see ARME 665.

ECON 466 Economics of Development
For description, see ARME 666.

ECON 467 Game Theory
Fall. 4 credits. Prerequisites: Economics 313 and 319.
This course studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).

ECON 468 Economic Problems of Latin America @
Spring. 4 credits. Prerequisites: Economics 101–102.
Current topics include, international debt, capital flight, economic integration, stabilization programs, etc.

ECON 469 China's Economy Under Mao and Deng @
Fall. 4 credits. Prerequisites: Economics 101–102 or permission of instructor.
Examines the development of the Chinese economy and the evolution of China's economic system between 1949 and the early 1990's.

ECON 471 The Economies of the Former Soviet Union and of Central Europe: From Central Planning to Markets
Fall. 4 credits. Prerequisites: Economics 101, 102.
The course will introduce first the basic features of a centrally planned economy and proceed to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis will be extended to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course will proceed to current attempts to move away from Socialist central planning and its legacies to market economy, privatization, and independence.

ECON 472 Comparative Economic Systems: East and West
Fall. 4 credits. Prerequisites: Economics 101–102.
The course will develop first a framework for studying economic systems and national economies and present three simple stylized systemic models: capitalist market, socialist market, and central planning. Secondly, the course will consider economic goals to be achieved (such as growth, stability, and productivity) and introduce quantitative measures used in the evaluation of the performance. Thirdly, comparative studies of selected national economies representing the models will be carried out.

ECON 473 Economics of Export-led Development @
Spring. 4 credits. Prerequisites: Economics 313, 314, or their equivalent.
This course will examine the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration will be on experiences within the West Pacific Rim.

ECON 474 National and International Food Economics
For description, see NS 457.

ECON 475 The Economy of India @
Fall. 4 credits. Prerequisite: Economics 101–102 or equivalent background.
This course will present the major economics and development problems of contemporary India and examine the country's future economic prospects. It will, however, be our aim to discuss these problems in their proper historical perspectives. Hence, the course will start with a brief outline of the social and political history of India. It will then turn to a more detailed account of the economic history of India in two stages.

ECON 477 Contemporary Development of Southeast Asian Economies
Spring. 3 credits. Prerequisite: Economics 101, 102.
See CRP 679.09 for description.

ECON 498 Readings in Economics
Fall or spring. Variable credit.
Independent study.

ECON 499 Honors Program
Fall and spring. 8 credits. Prerequisites: Economics 313, 314, 321 (or 319–320).
Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.

Graduate Courses and Seminars

ECON 609 Microeconomic Theory I
Fall. 4 credits.
Topics in consumer and producer theory.

ECON 610 Microeconomic Theory II
Spring. 4 credits.
Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.

ECON 613 Macroeconomic Theory I
Fall. 4 credits.
Static general equilibrium. Intertemporal general equilibrium: infinitely lived agents models and overlapping generations models. Welfare theorems. Equivalence between sequential markets and Arrow-Debreu Markets. Ricardian proposition. Modigliani-Miller theorem. Asset pricing. Recursive competitive equilibrium. The Neoclassical Growth Model. Calibration. Introduction to dynamic programming.

ECON 614 Macroeconomic Theory II
Spring. 4 credits.
Dynamic programming. Stochastic growth. Search models. Cash-in-advance models. Real business-cycle models. Labor indivisibilities and lotteries. Heterogeneous agents models. Optimal fiscal and monetary policy. Sustainable plans. Endogenous growth.

ECON 616 Applied Price Theory
Spring. 4 credits.
The course emphasizes the applications of the principles of price theory to a variety of problems taken from concrete, practical settings.

ECON 617 Intermediate Mathematical Economics I
Fall. 4 credits. Prerequisites: Calculus II and intermediate linear algebra.
The course will cover selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).

[ECON 618 Intermediate Mathematical Economics II
Spring. 4 credits. Not offered 1999–2000.
A continuation of Economics 617, the course develops additional mathematical techniques for applications in economics. Topics covered could include study of dynamic systems (linear and nonlinear difference equations, differential equation, chaotic behavior), dynamic optimization methods (optimal control theory, nonstochastic and stochastic dynamic programming), and game theory (repeated dynamic and evolutionary games).]

ECON 619 Econometrics I
Fall. 4 credits. Prerequisites: Economics 319–320 or permission of instructor.
This course gives the probabilistic and statistical background for meaningful application of econometric techniques. Topics to be covered are (1) probability theory: probability spaces, random variables, distributions, moments, transformations, conditional distributions, distribution theory and the multivariate normal distribution, convergence concepts, laws of large numbers, central limit theorems, Monte Carlo simulation; (2) statistics: sample statistics, sufficiency, exponential families of distributions. Further topics in statistics will be considered in Economics 620.

ECON 620 Econometrics II
Spring. 4 credits. Prerequisite: Economics 619.
This course is a continuation of Economics 619 (Econometrics I) covering (1) statistics: estimation theory, least squares methods, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nonnested hypothesis testing and (2) econometrics: the general linear model, generalized least squares, specification tests, instrumental variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

ECON 699 Readings in Economics
Fall or spring. Variable credit.
Independent study.

ECON 703 Seminar in Peace Science
Fall. 4 credits.
Among topics to be covered at an advanced level are game theory, coalition theory, bargaining and negotiation processes, cooperative procedures, microbehavior models, macrosocial processes, and general systems analysis.

ECON 710 Stochastic Economics: Concepts and Techniques
Spring. 4 credits. Prerequisites: Economics 609, 610, 613, 614, 619, and 620.
This course will review a number of techniques that have been useful in developing stochastic models of economic behavior. Among these are (a) discrete-time Markov processes, (b) dynamic programming under uncertainty, and (c) continuous-time diffusion processes. Examples of economic models will be drawn from recent literature on optimal capital accumulation and optimal savings and portfolio selection problems; permanent income hypothesis; dynamic models of price adjustment, etc. Advanced graduate students contemplating work in economic theory and econometric theory will gain exposure to current research.

ECON 712 Advanced Macroeconomics
4 credits. Prerequisites: Economics 613, 614.
The purpose of this course is to introduce the student to some of the topics and analytic techniques of current macroeconomic research. The course will fall into three parts: dynamic programming, new Keynesian economics, and recent theories of economic growth. The dynamic programming section will include models of consumption, investment, and real business cycles. The new Keynesian section will cover models of wage and price rigidity, coordination failure and credit markets. The section on endogenous growth will look at recent efforts to add non-convexities to models of optimal growth. These topics are intended to complement the material on overlapping generations covered elsewhere.

ECON 713 Advanced Macroeconomics II
Spring. 4 credits. Prerequisites: ECON 613, 614.
This course reveiws the most recent research in endogenous growth theory. This theory is little more than a decade old, but it has produced a large amount of both empirical and theoretical results that have substantially reshaped the general field of macroeconomics. It is perhaps no exaggeration to say that most of the work at the frontier of today's macroeconomics belongs to this field. An increasing number of papers have been touching important issues such as; learning by doing, R&D investment, market structure, private and public organization of R&D, education financing, human capital accumulation, technological unemployment, growth and business cycles, inequality and growth, political equilibrium, democracy and growth, instability, social conflict, capital accumulation, intergenerational and vested interests and barriers to technology adoption, international transfers of technologies, sustainable development, etc.

This course tries to orient the student in this large and variegated literature consisting of recently published articles and working papers. Understanding this literature is a sound training in the analytical methods used at the frontier of theoretical research, but it also provides a number of empirical results at the center of the economic debate.

ECON 717 Mathematical Economics
4 credits. Prerequisites: ECON 609–610 (or equivalent training in micro theory) and MATH 413–414 (or equivalent training in analysis).
The primary theme of this course is to explore the role of prices in achieving an efficient allocation of resources in dynamic economies. Some of the classical results on static equilibrium theory and welfare economics on attaining optimal allocation through decentralized organizations are examined through an axiomatic approach. Some basic issues on capital theory are also analyzed.

[ECON 718 Topics in Mathematical Economics
4 credits. Not offered 1999–2000.]

ECON 719 Advanced Topics in Econometrics I
Fall. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
Advanced topics in econometrics, such as asymptotic estimation and test theory, robust estimation, Bayesian inference, advanced topics in time-series analysis, errors in variable and latent variable models, qualitative and limited dependent variables, aggregation, panel data, and duration models.

ECON 720 Advanced Topics in Econometrics II
Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
For description see Economics 719.

ECON 721 Time Series Econometrics
Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
This course covers traditional and current time series techniques that are widely used in econometrics. Topics include the theory of stationary stochastic processes including univariate ARMA(p,q) models, spectral density analysis, and vector autoregressive models; parametric and semi-parametric estimation; current developments in distributional theory; estimation and testing in models with integrated regressors including, unit root tests, cointegration, and permanent vs. transitory components.

[ECON 731 Monetary Theory and Policy
Spring. 4 credits. Preequisites: Economics 614 or permission of the instructor. Not offered 1999–2000.
Advanced topics in monetary economics, macroeconomics, and economic growth—such as overlapping-generations, taxes and transfers denominated in money, transactions demand for money, multi-asset accumulation, exchange rates, and financial intermediation.]

[ECON 732 Monetary Theory and Policy
Fall. 4 credits. Prerequisites: Economics 731 or permission of the instructor. Not offered 1999–2000.
Advanced topics in monetary economics, macroeconomics, and economic growth—such as economic volatility, the "burden" of government debt, restrictions on government borrowing, dynamic optimization, endogenous growth theory, technological evolution, financial market frictions, and cyclical fluctuations.]

ECON 735 Public Finance: Resource Allocation and Fiscal Policy (also ARME 735)
Spring. 4 credits.
This course develops a mathematical and highly analytical understanding of the role of government in market economies and the fundamentals of public economics and related issues. Topics covered include generalizations and extensions of the fundamental theorems of welfare economics, in-depth analysis of

social choice theory and the theory on implementation in economic environments, public goods and externalities and other forms of market failure associated with asymmetric information. The theoretical foundation for optimal direct and indirect taxation is also introduced along with the development of various consumer surplus measures and an application to benefit cost analysis. Topics of an applied nature vary from semester to semester depending upon faculty research interests.

ECON 736 Public Finance: Resource Allocation and Fiscal Policy
Fall. 4 credits.
This course spends a large part of the semester covering the revenue side of public finance. Topics include the impact of various types of taxes as well as the determination of optimal taxation. The impact of taxation on labor supply, savings, company finance and investment behavior, risk bearing, and portfolio choice are explored. Other topics include the interaction of taxation and inflation, tax evasion, tax incidence, social security, unemployment insurance, deficits, and interactions between different levels of government.

[ECON 737 Location Theory and Regional Analysis
Fall. 4 credits. Prerequisites: Economics 609, 617, and Econometrics. Not offered 1999–2000.
Economic principles influencing the location of economic activity, its spatial equilibrium structure, and dynamic forces. Topics include spatial pricing policies, price competition, and relocation by firms; residential location patterns; patterns of regional growth and decline; and patterns of urbanization.]

ECON 738 Public Choice
Spring. 4 credits. Prerequisites: ECON 609, 610.
This class has two parts. It begins with an introduction to economic theories of political decision making. We review the theory of voting, theories of political parties and party competition, theories of legislative decision making and interest group influence. We also discuss empirical evidence concerning the validity of these theories. The second part uses these theories to address a number of issues in Public Economics. We develop the theory of political failure, analyze the performance of alternative political systems and discuss the problem of doing policy analysis which takes into account political constraints.

ECON 741 Seminar in Labor Economics
For description see ILRLE 744.

ECON 742 Seminar in Labor Economics
For description see ILRLE 745.

ECON 751 Industrial Organization and Regulation
Fall. 4 credits. Prerequisites: ECON 609, 610.
This course focuses primarily on recent theoretical advances in the study of industrial organization. Topics covered include market structure, non-linear pricing, quality, durability, location selection, repeated games, collusion, entry deterrence, managerial incentives, switching costs, government intervention, and R&D/Patents. These topics are discussed in a game-theoretic context.

ECON 752 Industrial Organization and Regulation
Spring. 4 credits. Prerequisites: ECON 609, 610, 751.
This course rounds out some topics in the Theory of Industrial Organization with the specific intent of addressing the empirical implications of the theory. The course reviews empirical literature in the SCP paradigm and in the NEIO paradigm.

[ECON 753 Public Policy Issues for Industrial Organizations
Spring. 4 credits. Prerequisites: Economics 609, 610, and 751. Not offered 1999–2000.
The course takes an in-depth view of the interaction between the government and business. Methods of business control, including antitrust, price regulation, entry regulation, and safety regulation. Emphasis will be not only on the economic effects on business, but on the economics of selecting and evolving the method of control.]

[ECON 755 Rivalry and Cooperation
Fall. 4 credits. Prerequisites: Economics Graduate Core or instructor's permission. Not offered 1999–2000.
In standard models, economic interaction is impersonal. Agents respond to price signals and measure their own welfare not in relative but in absolute terms; and cooperative behavior emerges only when it coincides with narrow self-interest. This course will explore the details of rivalry and cooperation in an effort to synthesize broader views of economic interaction. Topics will include the effect of concerns about relative income on wage rates, consumption, savings, and regulation; the effect of concerns about fairness on prices and wages; the conditions that foster trust and cooperation; and the role of positional competition in the distribution of economic rewards.]

ECON 756 Noncooperative Game Theory
Fall. 4 credits. Prerequisites: Economics 609–610 and 619.
This course surveys equilibrium concepts for non-cooperative games. We will cover Nash equilibrium and a variety of equilibrium refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more! We will pay attention to important special classes of games, including bargaining games, signalling games, and games of incomplete information. Most of our analysis will be from the strict decision-theoretic point of view, but we will also survey some models of bounded rationality in games, including games played by automata.

ECON 757 Economics of Imperfect Information
Spring. 4 credits. Prerequisites: Economics 609–610 and 619.
The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory will be discussed.

ECON 760 Topics in Political Economy
Fall. 4 credits. Prerequisite: Economics graduate core or instructor's permission.
This course will develop critiques and extensions of economic theory, taking into account the political and social moorings of economic activity and equilibria. The formation and persistence of social norms; the meaning and emergence of property rights; the role of policy advice in influencing economic outcomes; and the effect of political power and ideology on economic variables will be studied. While these topics were popular in the classic works of political economy, recent advances in game theory and, more generally, game-theoretic thinking allows us to approach these topics from a new perspective. Hence, the course will begin by devoting some lectures to elementary ideas in game-theory and strategic analysis.

ECON 761 International Economics: Trade Theory and Policy
Fall. 4 credits. Prerequisites: ECON 609, 610.
This course surveys the sources of comparative advantage. It analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and econometrics as applied to international economics may be covered.

ECON 762 International Economics: International Finance and Open Economy Macroeconomics
Spring. 4 credits. Prerequisite: ECON 761.
This course surveys the determination of exchange rates and theories of balance of payment adjustments. It explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics will be covered.

ECON 770 Topics in Economic Development
For description, see ARME 667.

ECON 771 Economic Development and Development Planning
Spring. 4 credits. Prerequisites: graduate core or instructor's permission.
Reviews the existing literature on the determinants of economic growth and the interrelationship of growth and income distribution through the process of economic development. A general equilibrium approach to development is taken. Computable general equilibrium models, based on social accounting matrices, are used to explore the performance of a variety of developing countries. Among the topics explored are: impact of structural adjustment and stabilization policies on growth, equity and internal and external equilibrium; sectoral interrelationship and interdependence through the growth process. Critical review and evaluation of national, sectoral and regional development models built for such developing countries as India, Brazil, Indonesia and Ecuador.

ECON 772 Economics of Development
Spring. 4 credits. Prerequisites: first-year graduate economic theory and econometrics.
Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

ECON 773 Economic Development
Fall. 4 credits. Prerequisites: Economics 609 and 620.
The course is concerned with theoretical and applied works that seek to explain economic development, or lack thereof, in countries at low-income levels. Specific topics vary each semester.

ECON 774 Economic Systems
Spring. 4 credits.
The course deals with economic systems, with the formerly centrally planned economies, and with the economies in transition.

ECON 784 Seminars in Advanced Economics
Fall and spring. 4 credits.

ENGLISH

H. Shaw, chair; B. Adams, director of undergraduate studies (255–3492); D. Mermin, director of graduate studies (255–7989); B. Correll, director of honors program; J. Ashton, A. Boehm, F. Bogel, L. Bogel, M. P. Brady, L. Brown, C. Chase, J. Culler, S. Davis, E. DeLoughrey, L. Fakundiny, R. Farrell, D. Fried, A. Galloway, R. Gilbert, J. Goldsby, K. Gottschalk, E. Hanson, L. Herrin, T. Hill, M. The Department of English offers a wide range of courses in English, American, and Anglophone literature as well as in creative writing, expository writing, and film analysis. Literature courses focus variously on the close reading of texts, the study of particular authors and genres, questions of critical theory and method, and the relationship of literary works to their historical periods and to other disciplines. The department seeks not only to foster analytical reading and lucid writing, but also through the study of literary texts, to teach students to think about the nature of language and to be alert to the rigors and pleasures of that ordinary and peculiar activity, reading.

Students who major in English develop their own programs of study in consultation with their advisers. Some focus on a particular historical period or literary genre; others combine sustained work in creative writing with the study of literature. Others pursue special interests in such areas as women's literature, African-American literature, literature and the visual arts, or critical theory.

Many students informally supplement their course work in English by attending the public lectures and poetry readings sponsored by the department, or by writing for campus literary magazines.

The Major

The Department of English recommends that students prepare themselves for the English major by taking at least one introductory course. Freshmen interested in majoring in English are encouraged to take one or more of the following freshman seminars: The Reading of Fiction (English 270), The Reading of Poetry (English 271), Introduction to Drama (English 272). These courses concentrate on the skills basic to the English major and to much other academic work—responsive, sensitive reading and lucid, forceful writing. As freshman seminars, English 270, 271, or 272 will satisfy one-half the College of Arts and Sciences' freshman seminar requirement. They are open to all second-term freshmen and are also open, as space permits, to first-term freshmen with scores of 700 or above on the CEEB College Placement Tests in English composition or literature, or 4 or 5 on the CEEB Advanced Placement Examination in English, as well as to students who have completed another freshman seminar.

English 201 and 202, which together constitute a two-semester survey of major British writers, though not required are strongly recommended for majors and prospective majors because they afford the kind of overview and introduction to authors, periods, and literary genres that helps students make more informed choices of advanced courses. The American Literary Tradition (English 275), Creative Writing (English 280 or 281), and the Essay in English (English 295) are also suitable preparations for the major.

Course Requirements

English majors are required to complete, with passing letter grades, at least 40 credit hours in courses approved for the major. All English courses numbered 300 and above are approved for the major. In addition, all 200-level English courses except freshman seminars (English 270, 271, and 272), courses in creative and expository writing (English 280, 281, 288, and 289), and those courses which state that they are intended for nonmajors are approved for the major.

Of the 40 credits required to complete the major, 8 (two courses) must be at the 400 level or above, and 12 (three courses) must be taken in lierature originally written in English before 1800. As many as 12 credits in literature or creative writing in Comparative Literature, Theatre, Film, & Dance, the Africana Studies and Research Center, the Society for the Humanities, Asian American Studies, and Latino Studies may be counted toward the major provided they are at the 300 level or above. Double majors may exercise this option even if the 12 credits are applied to their second major. English majors are encouraged to take advantage of this option by taking courses in which they read foreign works of literature in the original language: 200-level literature courses for which qualification is a prerequisite may for this purpose be treated as if they were 300-level courses.

The Major in English with Honors

Second-term sophomores who have done superior work in English and related subjects are encouraged to seek admission to the department's program leading to the degree of Bachelor of Arts with Honors in English. Following an interview with the chair of the Honors committee, qualified students will be admitted provisionally to the program. During their junior year, these students must complete at least one Honors seminar (English 491 or 492) and are encouraged to take an additional 400-level English course in the field in which they plan to concentrate. On the basis of work in these and other English courses, a provisional honors candidate is expected to select a thesis topic and secure a thesis adviser by the end of the junior year. A student who has been accepted by a thesis adviser becomes a candidate for honors rather than a provisional candidate.

During the senior year, each candidate for Honors in English enrolls in a year-long tutorial (English 493 and 494) with the faculty member chosen as thesis adviser. The year's work culminates in the submission of a substantial scholarly or critical essay to be judged by at least two members of the faculty.

More information about the program may be found in the brochure for honors candidates available in the English office.

Courses for Nonmajors

For students not majoring in English, the department makes available a variety of courses at all levels. Some courses at the 200 level are open to qualified freshmen, and all of them are open to sophomores. Courses at the 300 level are open to sophomores, juniors, and seniors and to others with permission of the instructor. The suitability of courses at the 400 level for nonmajors will vary from topic to topic, and permission of the instructor may be required.

First-Year Writing Seminars

As part of the First-Year Writing Program, the Department of English offers many one-semester courses concerned with various forms of writing (narrative, biographical, expository), with the study of specific areas in English and American literature, and with the relation of literature to culture. Students may elect any two of these courses during their first year to satisfy the Freshman Writing Seminar requirement. Descriptions of First-Year Writing Program offerings may be found in the First-Year Writing Program listings, available from college registrars in August for the fall term and in November for the spring term.

First-Year Writing Seminars Recommended for Prospective Majors

ENGL 270 The Reading of Fiction
Fall, spring, each summer. 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Recommended for prospective majors in English.
This course examines modern fiction, with an emphasis on the short story and novella. Students will write critical essays on authors who flourished between 1870 and the present, such as James, Joyce, Woolf, Hurston, Lawrence, Fitzgerald, Hemingway, Faulkner, Rhys, Welty, Salinger, and Morrison. Reading lists vary from section to section, and some may include a novel, but close, attentive, imaginative reading and writing are central to all. This course does not satisfy requirements for the English major.

ENGL 271 The Reading of Poetry
Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English.
This course is designed to increase the student's ability to understand and write about poetry. Readings will be drawn from the major periods, modes, and genres of poetry written in English. This course does not satisfy requirements for the English major.

ENGL 272 Introduction to Drama
Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English.
Students in this seminar study plays, older and newer, in a variety of dramatic idioms and cultural traditions. Plays being performed by the Theatre Department will be included if possible. A reading list might include works by Sophocles, Shakespeare, Chekhov, Brecht, Caryl Churchill, Beckett, and Shange. Course work consists of writing and discussion and the occasional viewing of live or filmed performances. This course does not satisfy requirements for the English major.

Expository Writing

ENGL 288–89 Expository Writing
Fall, spring, summer, winter. 3 credits. Each section limited to 16 students. Students must have completed their colleges' first-year writing requirements or have permission of the instructor. S. Davis and staff.
Web site: http://instruct1.cit.cornell.edu/Courses/engl288/288FT99.index.html English 288–89 offers guidance and an audience for students who wish to gain skill in expository writing. Each section provides a context for writing defined by a form or use of exposition, a disciplinary area, a practice, or a topic intimately related to the written medium. Course members will read in relevant published material and write and revise their own work regularly, while reviewing and responding to each other's. Since these seminar-sized courses depend on members' full participation, regular attendance and submission of written work are required. Students and instructors will confer individually throughout the term. English 288 does not satisfy requirements for the English major.

Section 1—S. Jefferis—Minding the Body

Section 2—J. Dougherty—Into the Wild

Section 3—A. Boehm—The Reflective Essay

Section 4—B. LeGendre—Issues, Audiences and Ourselves

Section 5—S. Davis—Writing in the Electronic Age

Section 6—G. Umbach—Reading the News, Understanding the Media

Spring 1999: To be announced

See English department *Course Offerings* for full fall and spring section descriptions.

ENGL 381 Reading as Writing
Spring. 4 credits. Course limited to 15 students. Prerequisite: permission of the instructor on the basis of a writing sample (critical/interpretive prose), which should reach the instructor before the first day of class. S. Davis.
This course practices and studies related arts: reading selected 19th- and 20th- century prose fictions and poems and writing interpretive essays about them—but also, writing as a reader of one's own work and revising in the light of others' responses to it. Course members will work with a fairly small number of texts and build sustained essays from shorter (written) "readings" of them. The texts (tentatively): Marilynne Robinson's *Housekeeping*, poems of Wordsworth, poems and stories of Poe, Vladimir Nabokov's *Lolita;* Doris Lessing's *Memoirs of a Survivor*, and J. M. Coetzee's *Waiting for the Barbarians.* Students will present their work to the group at various stages of completion and develop a portfolio of well-crafted prose for submission at the end of the term. With the help of a few theorists of reading and literary reception, they will also pay attention to the ways in which both critical readers and creative writers "rewrite" the texts they read. This is a course for English majors and nonmajors who wish to extend their mastery of critical and interpretive prose and their understanding of what they do when they write it. It will be advantageous for students planning to write honors theses in English or another discipline.

ENGL 387 Autobiography: Theory and Practice
Spring. 4 credits. A. Boehm.
In this nonfiction prose-writing seminar we explicate canonical autobiographies as models of rhetoric to be imitated in weekly writing assignments.

ENGL 388 The Art of the Essay
Fall. 4 credits. Limited to 15 students. Interested students should submit one or more pieces of recent writing (prose) to the instructor before the beginning of the term, preferably at preregistration. L. Fakundiny.
For both English majors and nonmajors who have done distinguished work in freshman writing seminars and in such courses as English 280–281, 288–289, and who desire intensive practice in writing essays as a kind of creative nonfiction. The course assumes a high degree of self-motivation, a capacity for independent work, and critical interest in the work of other writers; it aims for a portfolio of conceptually rich and stylistically polished writing.

Creative Writing

Students usually begin their work in Creative Writing with English 280 or 281, and only after completion of the Freshman Writing Seminar requirement. Please note that either English 280 or English 281 is the recommended prerequisite for 300-level creative writing courses. English 280 and 281 may satisfy a distribution requirement in your college (please check with your college adviser). English 382–383, 384–385, and 480–481 are approved for the English major.

ENGL 280–281 Creative Writing
Fall, spring, summer, winter session. 3 credits. Prerequisites: completion of the Freshman Seminar requirement. Limited to 18 students.
Majors and prospective majors, please note. Although recommended for prospective English majors, English 280–281 cannot be counted towards the 40 credits required for completion of the English major. It is a prerequisite for 300-level courses in creative writing, which count towards the major. English 280 is not a prerequisite for English 281.
An introductory course in the theory, practice, and reading of prose, poetry, and allied forms. Students are given the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.

ENGL 382–383 Narrative Writing
Fall, 382; spring, 383. 4 credits each term. Each section limited to 15 students. Previous enrollment in English 280 or 281 recommended. Prerequisite: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, R. Morgan; sec. 2, D. McCall; sec. 3, L. Herrin. Spring: H. Viramontes, M. Koch, R. Morgan, L. Herrin.
The writing of fiction; study of models; analysis of students' work.

ENGL 384–385 Verse Writing
Fall or summer, 384; spring, 385. 4 credits each term. Each section limited to 15 students. Prerequisites: English 280 or 281, or permission of instructor. Fall: R. Shepherd, R. McClane. Spring: R. Shepherd, P. Janowitz.
The writing of poetry; study of models; analysis of students' poems; personal conferences.

ENGL 480–481 Seminar in Writing
Fall, 480; spring, 481. 4 credits each term. Each section limited to 15 students. Students are encouraged to take English 280 or 281 and at least one 300-level writing course. Prerequisites: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, H. Viramontes; sec. 2, R. Morgan. Spring: M. McCoy, K. McClane.
Intended for those writers who have already gained a basic mastery of technique. Although English 480 is not a prerequisite for 481, students normally enroll for both terms and should be capable of a major project—a collection of stories or poems, a group of personal essays, or perhaps a novel—to be completed by the end of the second semester. Seminars are used for discussion of the students' manuscripts and published works that individual members have found of exceptional value.

Courses for Freshmen and Sophomores

These courses have no prerequisites and are open to freshmen and non-majors as well as majors and prospective majors.

Introductions to Literary Studies

ENGL 201–202 The English Literary Tradition #
201: Fall. 4 credits. English 201 is not a prerequisite for 202. This course may be used as one of the three pre-1800 courses required of English majors. A. Galloway.
An introduction to the study of English literature, examining its historical development and many of its highest achievements. Works to be read include *Sir Gawain and the Green Knight*; selections from Chaucer's *Canterbury Tales* and Spenser's *Faerie Queene*; Shakespeare's *Henry IV, Part I* and *King Lear*; poems by Jonson, Donne, and Herbert; and selections from Milton's *Paradise Lost.*
202: Spring. 4 credits. D. Fried.
A survey of English literature from the late seventeenth century to the early twentieth

century, including poetry and some prose works from the Restoration and eighteenth century, the Romantic period, the Victorian period, and Modernism. Lectures and discussion sections.

ENGL 204 Mostly Poems and Stories
Fall and spring. 4 credits. Fall, F. Bogel; spring, R. Parker.
Introduction to the pleasures of close reading, with special emphasis on analyzing the forms, structures, and rhetorical dynamics that characterize poems, prose narratives, and drama and contribute to their appeal. The syllabus will include works from older as well as more recent periods. We are likely to study poems by (among others) William Shakespeare, Robert Herrick, John Keats, Robert Browning, Christina Rossetti, Sylvia Plath, Ted Hughes, and Elizabeth Bishop; stories by Isabel Allende, Flannery O'Connor, James Baldwin, Toni Cade Bambara, and Beth Nugent; and such novels as Austen's *Pride and Prejudice* and Morrison's *The Bluest Eye*.

ENGL 208 Shakespeare and the Twentieth Century (also Comparative Literature 208)
Fall. 4 credits. S. Davis.
This course traces relationships between the Shakespeare of early modern times and some of the Shakespeares inherited and created by the twentieth century. We will compare a small number of plays with their adaptations in fiction, theater, film, the educational system, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course will attempt to provide an introduction to the contemporary study of literature and culture.

ENGL 227 Shakespeare #
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. W. Wetherbee.
Careful study of ten of Shakespeare's major plays, including at least three videotaped performances.

Major Genres and Areas

ENGL 203 Major Poets
Spring. 4 credits. R. Gilbert.
Intensive reading in the work of nine poets chosen to represent important periods and modes of poetry. Poets to be studied may include William Shakespeare (the sonnets), Andrew Marvell, Alexander Pope, John Keats, Emily Dickinson, Robert Browning, Gwendolyn Brooks, and Seamus Heaney.

ENGL 205 Readings in English Literature
Fall. 3 credits. **This course is intended for nonmajors.** R. Farrell.
English Literature to 1800: this course is open to any student interested in literature and culture. Authors covered include Chaucer, Shakespeare, Jonson, Swift, and Pope. Grade will be based on four short papers, three of which may be revised for a higher grade.

[ENGL 206 Readings in English and American Literature
3 credits. **This course is intended for non-majors.** Two lectures and one discussion section each week. To be offered 2000–2001.]

ENGL 207 Introduction to Modern Poetry
Fall. 4 credits. R. Gilbert.
This course will sample the vast array of poetic modes and forms employed over the past century and a half, with primary emphasis on the work of American poets. Our focus in the course will be on the poems themselves—how they feel, sound, look, mean, and behave. Lectures, discussions, and written assignments will emphasize both the craft of writing poetry and the discipline of reading it with understanding and appreciation. No previous study of poetry required.

ENGL 209 Introduction to Cultural Studies
Spring. 4 credits. M. P. Brady.
Salsa, hip-hop, MTV, talkshows, sit-coms, movies, literature are all forms of entertainment and means of analyzing the cultures that produce them. This course will introduce students to the various cultural forms we encounter in our everyday lives and to some of the critical work that has been written about them. Examples will come from a range of contemporary and historical texts. The course will follow a lecture-discussion format.

[ENGL 210 Medieval Romance: The Voyage to the Other World
3 credits. To be offered 2000–2001.]

ENGL 212 Introduction to Medieval Epic
Spring. 4 credits. This course may be used as one of the three courses before 1800 required for the English major. T. Hill.
An introduction to medieval epic focusing particularly on the English and "insular" epic tradition. Works studied will normally include *Beowulf, Maldon, Egils saga, Njals saga*, the *Tain Bo Cualigne*, the *Chanson de Roland*, the *Nibelunglied*, selections from Malory, and English and Scots ballads. Requirements include two papers, a mid-term, and a final. No previous knowledge of medieval literature is expected.

ENGL 240 Survey in U.S. Latino Literature (also Latino Studies 240)
Spring. 4 credits. M. P. Brady.
It is estimated that by the year 2030, the Latino/a population in the United States will be the largest "minority group" in the country. This course seeks to introduce students to the growing body of literature (both fiction and poetry) by the various U.S. Latino/a communities. We will consider cultural production that results from intercultural crossings between Mexico, Cuba, Guatemala, Dominican Republic, El Salvador and Los Angeles, New York, Miami. How do Latina/o literatures converge and diverge as they explore issues of "race," ethnicity, gender, sexuality, class, nationality, and identity in general, at a time when the American profile is increasingly becoming "latinized." Authors examined may include Tomás Rivera, Cherrie Moraga, Jesús Colón, Miguel Pinero, Nicolasa Mohr, Cristina García, Julia Alvarez, Américo Paredes, Junot Díaz, Loida Maritza Pérez, Sandra Benítez, Martin Espada, Lorna Dee Cervantes, Frances Negrón-Muntaner, Luz María Umpierre, and Hector Tobar.

ENGL 253 The Modern Novel
Fall. 4 credits. J. Ashton.
In this course we will read some of the most famous and groundbreaking novels of the 20th century, asking, among other things, what makes them "modern." Period of concentration will shift from year to year. For Fall of 1999, the focus will be on American modernism 1920–1940, including the following novels: *Babbitt* (1922), *The Great Gatsby* (1925), *The Sun Also Rises* (1926), *Death Comes for the Archbishop* (1927), *Passing* (1929), *The Sound and the Fury* (1929), *The Maltese Falcon* (1930), *The 42nd Parallel* (1930), *Nightwood* (1936), and *Native Son* (1940).

ENGL 260 Introduction to American Indian Literatures (also American Studies 260)
Fall. 4 credits. R. Warrior.
An introduction to Native American literatures, we read a variety of genres—novels, short fiction, autobiography, poetry, oral traditions—spanning Indian publications through the last two centuries. Issues arising from the texts include aesthetics of orality and literacy; cultural change and survival; colonial identity politics; mythic histories; world views and ideologies; and contemporary tribal sovereignty. A goal of the course is to read historical American contexts through the eyes of Native American texts.

ENGL 262 Asian American Literature (also Asian American Studies 262 and American Studies 262)
Fall. 4 credits. S. Wong.
This course will introduce students to a range of writing by Asian Americans and to some critical issues concerning the production and the reception of Asian American texts. In reading through selected works of prose, poetry, and drama, we will be asking questions about the relation between literary forms and the sociohistorical context within which they take on their meanings, and about the historical formation of Asian American identities.

[ENGL 264 Ethnic Literature: Bridges and Boundaries
4 credits. To be offered 2000–2001.]

ENGL 265 Introduction to African American Literature (also American Studies 265)
Fall. 4 credits. J. Goldsby.
From Phillis Wheatley's Boston to Walter Moseley's Los Angeles, the city has long been an alluring force in African American literature. In this course, we will read a broad range of texts, films, and other visual media that celebrate and/or question urban life. Through these works, we will also explore intraracial conflicts of class, gender, sexuality, and nationality amongst African Americans themselves, from the "Talented Tenth" to the "Hip Hop Nation." Authors may include: DuBois, Larsen, Hughes, Hurston, Wright, Petry, Baldwin, Brooks, Ellison, Hansberry, Baraka, Shange, Reed, Deveare Smith, Morrison.

ENGL 274 Scottish Literature and Culture #
Fall. 3 or 4 credits. The course may be taken for 3 or 4 credits; those taking it for 4 credits will complete an additional writing project. This course only counts towards the English major when taken for 4 credits. Non-majors are welcome. Enrollment limited to 20. T. Hill and H. Shaw.
Scotland was an independent kingdom during most of its history. Although it is now politically united with England, it preserves its cultural distinctiveness. This course provides an introduction to Scottish literature and its cultural context. We will focus on important Scottish literary texts, with special emphasis on the medieval period and the nineteenth and twentieth centuries. The course should

appeal to those who wish to learn more about their Scottish heritage, to those who wish to view in a new perspective works normally considered monuments of "English" literature, and to those who simply wish to know more about a remarkable culture and the literature it produced. Some of the texts will be read in Scots, but no familiarity with Scots or earlier English is presumed. Authors studied will include Henryson, Dunbar, Anonymous (the Scottish Ballads), Hume, Burns, Scott, Hogg, Stevenson, and Grassic Gibbon.

ENGL 275 The American Literary Tradition (also American Studies 275)
Fall. 4 credits. H. Spillers.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

[ENGL 295 The Essay in English #
4 credits. Prerequisite: completion of freshman seminar requirement. This course may be counted as one of the three pre-1800 literature courses required of English majors. To be offered 2000–2001.]

Special Topics

ENGL 235 Rewriting the Classics: Stories of travels and encounters
Spring. 4 credits. E. DeLoughrey.
In this course we will look at such classic tales as Shakespeare's *The Tempest*, Defoe's *Robinson Crusoe*, Brontë's *Jane Eyre*, and Conrad's *Heart of Darkness* and later novels that rewrite them, such as Aime Cesaire's *The Tempest*, J. M. Coetze's *Foe*, Jean Rhys' *Wide Sargasso Sea*, and Wilson Harris' *Palace of the Peacock*. We will consider how stories travel across time and space and how the modern versions differ from their classic counterparts. Requirements: active class participation, student presentations, a few short essays and a final paper on the writer of your choice.

ENGL 252 Women and the Holocaust (also Women's Studies 252 and Jewish Studies 255)
Fall. 4 credits. M. Jacobus.
The lens provided by women's writing about the Holocaust offers a unique perspective on women's living and dying in the camps. We will focus on Holocaust writing by women and girls, some autobiographical, some fictional, that explores their gendered traumas of separation, sequestration, sexuality, survival, and memory. Using the definitive edition of Anne Frank's diaries as a point of departure, we will read memoirs and journals by women who recorded their lives en route to and in the camps. Texts will include the Dutch Etty Hillesum's *An Interrupted Life* and the French Charlotte Delbo's account of French women deportees in *Auschwitz and After*, which provides an extended meditation on both trauma and memory. As well as later fiction by Cynthia Ozick and Ida Fink that trace both the lasting effects and the irrecoverable "traces" of Holocaust trauma, we will read accounts of betrayal and survival such as Cordelia Edvardson's *Burned Child Seeks the Fire* and Liana Millu's *Smoke over Birkenau*. We will also look at Charlotte Salomon's moving pictorial autobiography of a young woman painter caught up in the events of the Holocaust. The supposed narrative of a child survivor, Binjamin Wilkomirski's controversial "memoirs" of a child survivor, *Fragments*, and Anne Michaels's *Fugitive Pieces* segue to the later effects of Holocaust trauma on the literary imagination. Readings will include autobiographical essays, essays on trauma theory and Holocaust literary criticism, as well as historical, documentary, and video material. Throughout, the emphasis will be on women's holocaust writing as literature, memorial and testimony.

ENGL 263 Interpreting Hitchcock
Fall. 4 credits. Two lectures a week, and a weekly discussion section. Students must be free to attend Monday evening screenings of the films. Lab fee. Enrollment limited to 75. L. Bogel.
Through detailed analysis of about a dozen of Hitchcock's major films—from early British talkies (*Blackmail, The Thirty-Nine Steps*), to early 40's work in Hollywood (*Shadow of a Doubt, Notorious*), and major American films of his late period (*Rear Window, Psycho, The Birds, North By Northwest*)—we will consider Hitchcock as a major technical and stylistic innovator in the history of cinema. As texts for psychoanalytic and feminist approaches to study, his films invite questions about film language, the ethics of spectatorship, and the nature of desire and sexuality.

ENGL 268 The Culture of the 1960s (also American Studies 268)
Fall. 4 credits. P. Sawyer.
Were the Sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an empassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, the Vietnam War, the counterculture, the New Left, the woman's movement and the movement for gay rights. Texts will include *The Autobiography of Malcolm X, The Electric Kool-Aid Acid Test, Dispatches*, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, and manifestos. The term paper will explore students' special interests.

ENGL 291 The American 1920s: Literature and Culture (also American Studies 291)
Fall. 4 credits. B. Maxwell.
The course will take a broad approach to the cultural activities of the decade following the First World War and preceding the Great Depression. Topics will include the new motives, forms, and audiences of fiction and poetry; literary realism under duress; the Harlem Renaissance; postwar blues and the influenza epidemic; suffragist politics and the New Woman; *Fugitive* revanchism; the masses as a matter for intellectual scrutiny; Fordism; the Red Scare, nativism, and the fear of anarchism; the cultures of radio, children's illustrated books, popular song and jazz. We will ask: what made for aesthetic radicalism and political radicalism in the period; what were the relations of pleasure and labor; how differentiated was the self-consciousness of the "Lost Generation"; and what appear to be the legacies of the decade? Readings will include essays by Randolph Bourne, Margaret Sanger, Walter Lippmann, W. E. B. DuBois, and Lewis Mumford; fiction by Jean Toomer, Ernest Hemingway, Sherwood Anderson, Dorothy Parker, Nella Larsen, John Dos Passos, Samuel Ornitz, Sinclair Lewis, Dashiell Hammet, and perhaps even F. Scott Fitzgerald; and poetry by Pound, Eliot, Williams, H. D., Langston Hughes, Hart Crane, Marianne Moore, and Louis Zukofsky.

Courses for Sophomores, Juniors, and Seniors

Courses at the 300 level are open to sophomores, juniors, and seniors and to others with the permission of the instructor.

ENGL 301 Mind and Memory (also Society for the Humanities 301, Theater 301, and Music 372)
Spring. 4 credits. D. Ackerman.
For complete description see Society for the Humanities 301.

[ENGL 302 Literature and Theory (also English 602 and Comparative Literature 302 and 622)
Fall. 4 credits. To be offered 2000–2001.]

[ENGL 308 Icelandic Family Sagas
4 credits. To be offered 2000–2001.]

ENGL 310 Old English in Translation
Spring. 4 credits. T. Hill.
This course may be used as one of the three courses before 1800 required for the English major.

Cultural backgrounds, reading, and critical analysis of Anglo-Saxon poetry in translation, pagan and Christian epic, elegy, heroic legend, and other forms. Attention will be given to the relations of this literature to that of later periods.

ENGL 311 Old English (also English 611) #
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill.
This course will provide a grounding in the Old English language and proceed to the reading of some major texts in poetry, such as *The Wanderer* and *The Battle of Maldon*. No previous knowledge of Old or Middle English is required or expected. There will be both a mid term and a final, plus oral reports. Students will be encouraged to follow their own interests. Graduate students will be expected to do a substantial paper, or other research exercise.

ENGL 312 *Beowulf* (also English 612) #
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. One semester's study, or the equivalent, of Old English is a prerequisite. R. Farrell.
A close reading of *Beowulf*. Attention will be given to relevant archaeological, literary, cultural, and linguistic issues.

ENGL 319 Chaucer #
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.
This course will begin with the study of the major *Canterbury Tales* and some of Chaucer's minor works, such as *The Book of the Duchess*. All works will be read in Middle English, but ample time will be devoted to learning the language, for it is impossible to read Chaucer as a poet without Middle English. There will be lectures on Chaucer's life, society, literary and religious content. There will be take home mid- and end-of-term exams, and student presentations.

ENGL 320 Literature of the English Renaissance (1500–1660) #
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Adams.
Verse and prose (principally non-dramatic) from More to Milton, including selected works of Skelton, Wyatt, Surrey, Sidney, Spenser, Marlowe, Shakespeare, Jonson, Donne, Herbert, Bacon, Marvell, Suckling, Lovelace, Burton,-and Browne. Contexts (political, social, intellectual, religious) as well as texts.

ENGL 321 Spenser and Malory (also Religious Studies 319) #
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Informal lecture and discussion. Two papers, no exams. C. Kaske.
Paired selections covering about half of Malory's *Morte d'Arthur* and half of Spenser's *Faerie Queene*. Chretien's romances, *Sir Gawain and the Green Knight* and some of Spenser's minor poems will be mentioned occasionally as background. Comparisons will assess possible literary influence, the distinctive genius of each author as a writer of romance, and the development of Arthurian romance from the Middle Ages to the Renaissance.

ENGL 325 The Culture of the Renaissance II (also Comparative Literature 362, and History 364) #
Spring. 4 credits.
For complete description, see Comparative Literature 362.

ENGL 327 Shakespeare
Fall. 4 credits. B. Correll.
The course will focus on the importance of gender and power in eight texts of Shakespeare: comedies, tragedies, poetry. Lectures and discussions will address issues of form, context and thematic content, as well as Renaissance and contemporary cultural debates.

[ENGL 328 The Bible
4 credits. To be offered 2000–2001.]

[ENGL 329 Milton #
4 credits. To be offered 2000–2001.]

ENGL 330 Restoration and Eighteenth-Century Literature #
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Bogel.
Close reading of texts in a variety of genres (poetry, fiction, drama, autobiography) will be guided by such topics as the nature of satire, irony, and mock-forms; the languages of the ridiculous and the sublime; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

ENGL 333 The Eighteenth-Century English Novel #
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. N. Saccamano.
A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction; romance, realism, satire, and the gothic; heroic and mock-heroic modes; sentiment, sensibility, and sexuality; race and gender; and the forms and uses of narrative. Readings may include Behn's *Oroonoko*, Defoe's *Moll Flanders*, Richardson's *Clarissa*, Fielding's *Tom Jones*, Johnson's *Rasselas*, Walpole's *The Castle of Otranto*, Sterne's *A Sentimental Journey*, and Austen's *Emma*.

ENGL 335 European Drama 1660–1900: Molière to Ibsen (also Comparative Literature 336)
Spring. 4 credits. R. Parker.
For complete description, see Comparative Literature 336.

ENGL 340 The English Romantic Period #
Fall. 4 credits. R. Parker.
Readings in various writers from the late 1780s through the 1820s—among them Blake, Wordsworth, Wollstonecraft, Coleridge, Byron, Mary Shelley, Percy Shelley, and Keats—with major emphasis on poetry but substantial collateral attention also to prose fiction, drama, letters, and political and literary surveys. The course will be concerned both with formal experiments in narrative, lyric, and dramatic representation and with analyses of political and cultural issues and contexts in an age of national reform and international revolution and conflict.

ENGL 345 Victorian Controversies
Fall. 4 credits. S. Siegel.
Economic, political and technological changes transformed the nineteenth century. We will consider some of the controversies these transformations provoked in England and Ireland. Our readings will be selected chiefly from leading nineteenth-century periodicals and from essays that contributed greatly to shaping public opinion. We will explore the social problems Victorian critics and artists identified, the various solutions they proposed, and their contrasting visions of their nation and its colonies. The men and women who contributed to the periodical press, and who shaped literary culture and anticipated new cultural forms, were preoccupied with urgent quetions about themselves: Was their century marked by progress or by decline? Would machines degrade or ennoble workers? Did aesthetic experience complement or compete with religious doctrine? Were art and science dependent upon or opposed to each other? Should all forms of expression be permitted or should certain forms be censored? Should the colonies be permitted to rule themselves or remain dependent on England? Would prestige be gained if institutions of higher learning awarded degrees to women? Was "manliness" revealed through "character" or through "behavior"? In addition to these intellectual conflicts, we will be attentive to the emergence of new visual forms that participated in and provoked controversy. Accordingly, we will view photographs and descriptions of England's great Crystal Palace Exhibition of 1851. We will consider the objections such displays aroused, as well as the emergence of new and controversial fashions in painting, in clothing, in interior design, and in home furnishings. Authors will include Arnold, Browning, Eliot, Morris, Pater, the Rossettis, Ruskin, Shaw, Swinburne, Wilde, and Yeats. Classes will be taught by lecture and discussion. Examinations will be in-class and take-home exercises.

ENGL 347 Freud and Reading
Spring. 4 credits. M. Jacobus.
This course will offer an introduction to Freud's writings, and to the legacy of his ideas, focusing on Freud as both writer and reader, as well as exploring his interest for contemporary students of literature and culture. Well served by his early translators, Freud has long been an object of fascination to literary critics and close-readers, as well as the source of a significant body of literary theory. We will look both at early "novella"-style works such as *Studies on Hysteria* and at the case-histories of Little Hans, Dora, and the Wolf Man, with an eye to Freud's narrative skill and persuasive art, as well as at subsequent readings that take issue with or illuminate his theories or modes of analysis. Alongside the case-histories, we will explore *The Interpretation of Dreams* and some of the influential readings of the dream-text to which it gave rise. We will also read Freud's writings on literature and art, including *Delusion and Dream in Jensen's Gradiva* (his reading of a *fin de siècle* novel), along with his writings on such topics as daydreaming, telepathy, negation, and the uncanny. We will end with his response to the first world war in *Beyond the Pleasure Principle*. The emphasis will be on what Freud's writing offers for literary and cultural studies, as well as the ways in which his ideas both shaped and were shaped by twentieth-century European culture.

ENGL 348 Studies in Women's Fiction: The Development of the Female-Authored Novel from the Seventeenth to the Twentieth Century (also Women's Studies 348)
Fall. 4 credits. L. Brown.
This course raises central questions about the role of gender in the study of literature by exploring the development of the female-authored novel from the seventeenth to the twentieth century. Readings will include Aphra Behn's *Oroonoko*, Fanny Burney's *Evelina*, Jane Austen's *Emma*, Charlotte Brontë's *Jane Eyre*, Virginia Woolf's *A Room of One's Own* and *Mrs. Dalloway*, and Toni Morrison's *Sula*. These works raise issues of race and slavery, love and marriage, sexuality and homosexuality, history and women's history, and writing itself. Students in the class will work together to develop strong close readings of the texts and to explore the contexts in which they were written. These discussions will be the basis for an evolving assessment of the status of a work authored by a woman. Students will be asked to participate in discussion, and to write 4 four-page papers and a take-home final exam.

[ENGL 350 The Modern Tradition I: 1890–1930
Fall. 4 credits. To be offered 2000–2001.]

ENGL 351 The Modern Tradition II
Spring. 4 credits. S. Siegel.
This course will consider the relation of modernists literary expression to the violence and ideological upheavals of the first half of the century. Readings will include Imagist and Surrealist Manifestos; the social and political writings of the Bloomsbury Group; the emergence and elaboration of dream theory, psychoanalysis, and literary Expressionism. Readings will include T. E. Hulme, Ezra Pound, and Wyndham Lewis; Lytton Strachey, Virginia Woolf, and G. E. Moore; Freud, Jung, and Winnicott; Yeats, Lady Gregory, and Shaw.

ENGL 352 Queer Theatre (also Theatre Arts 320 and Women's Studies 320)
Spring. 4 credits. E. Gainor.
For complete description, see Theatre Arts 320.

[ENGL 353 Postcolonial Liteature
To be offered 2000–2001.]

ENGL 355 Decadence (also Comparative Literature 355 and Women's Studies 355)
Spring. 4 credits. E. Hanson.
"My existence is a scandal," Oscar Wilde once wrote, summing up in an epigram the effect of his carefully cultivated style of perversity and paradox. Through their valorization of aestheticism and all that was considered artificial, unnatural, or morbid, the so-called "decadent" writers of the late-nineteenth century sought to free the pleasures of beauty and sexual desire from their more conventional ethical moorings. We will discuss the most important texts through which "decadence" was defined as a literary style, including works by Charles Baudelaire, J.-K. Huysmans, Rachilde, Leopold von Sacher-Masoch, A. C. Swinburne, Walter Pater, and Lionel Johnson, with a particular focus on Oscar Wilde. Topics for discussion will include aestheticism and the cult of "art for art's sake," theories of cultural and linguistic degeneration, homophobia and sexual encoding, androgyny and sexual inversion, hysteria and paranoia, masochism and mysticism, chastity and sublimation, Catholicism and Hellenism, and dandyism. Students may read French and German texts in the original or in translation.

ENGL 356 Postmodernist Fiction
Spring. 4 credits. M. Hite.
This class will explore experimental (i.e., weird, counterrealist, "difficult") fiction, both print and hypertext, written in the post-World War II period by some, but not all, of the following writers: Kathy Acker, Margaret Atwood, John Barth, Angela Carter, Theresa Hak Kyung Cha, Robert Coover, Don De Lillo, J. Yellowlees Douglas, Michael Joyce, Nathaniel Mackey, Vladimir Nabokov, Thomas Pynchon, Ishmael Reed and Joanna Russ. We will also read some criticism and theory dealing with the period, condition, or movement described as "postmodern" or "postmodernist." Hypertexts will be available on computers at campus locations designated especially for this function. Copies of hypertexts (on floppy disk) will also be available from library reserve.

Class requirements include online newsgroup participation, two critical papers, a take-home midterm and a take-home final.

ENGL 361 Early American Literature (also American Studies 361)
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required for English majors. S. Samuels.
An exploration of national identities in the formative British colonial period, including the relation of sexualities, religions, narrative practices, and encounters with other cultures to the contested formulations of destiny and free will in determining and explaining an American national character. Moving from early contact narratives through the conflicts that led to the American Revolution and beyond, this course will consider American writing from the 1630s to the 1830s; among other sources, we will read sermons, diaries, journals and poetry of the Puritans, captivity and emancipation narratives, autobiographical writings by Jonathan Edwards and Benjamin Franklin, political writings by Crevecoeur, Paine, and Jefferson, fiction by Brockden Brown, Irving, Sedgwick, Child, and Cooper and the early work of Poe, Hawthorne, and Emerson.

ENGL 362 The American Renaissance (also American Studies 362)
Fall. 4 credits. J. Porte.
American writing from the 1830's through the 1850's, with emphasis on the major literary achievements of Emerson, Poe, Hawthorne, Thoreau, Melville, Whitman and Dickinson. We shall also study Douglass's 1845 *Narrative* and Stowe's *Uncle Tom's Cabin*.

ENGL 363 The Age of Realism and Naturalism (also American Studies 363)
Spring. 4 credits. J. Goldsby.
Literary history tells us that realism and naturalism were aesthetic movements that emerged in American fiction at the turn of the 19th century. Cultural histories of the era tell us social ideals about what constituted the "real" and the "natural" were debated by Americans as they coped with the revolutionary changes that turned their worlds upside down between the Civil and First World Wars.

This course moves between these two accounts in order to appreciate the varied styles and issues that comprised the literature of American realism at the turn of the 19th century. Principal authors may include: Charles Chesnutt, Stephen Crane, Theodore Dreiser, William Dean Howells, Henry James, Mark Twain, and Edith Wharton.

[ENGL 364 American Literature Between the Wars (also American Studies 364)
4 credits. To be offered 2000–2001.]

[ENGL 365 American Literature Since 1945 (also American Studies 365)
Fall. 4 credits. To be offered 2000–2001.]

ENGL 366 The Nineteenth-Century American Novel (also American Studies 366)
Spring. 4 credits. M. Seltzer.
A study of American fiction in its first flowering. This course will include such major works as Hawthorne's *The Scarlet Letter*, Melville's *Moby-Dick*, James's *The Portrait of a Lady*, and Mark Twain's *Adventures of Huckleberry Finn*.

ENGL 369 Studies in Film Analysis: Fast Talking Dames
Spring. 4 credits. L. Bogel.
With some attention to melodrama's roots in nineteenth-century fiction and theatre and in twentieth-century women's fiction and popular Freudianism, we will work to define Hollywood's melodrama as both a genre and a way of viewing the world. Psychoanalytic and feminist analyses of melodrama will help us pose larger questions about gender and culture, about gendered spectatorship, about the relation of these films to American culture, about Hollywood's changing constructions of "woman," the "maternal," and the "feminine," and questions about desire, pleasure, fantasy, and ideology in relation to the melodramatic heroine. Required weekly, evening screenings of such films as: *Picnic; Now, Voyager; Rebecca; Mildred Pierce; The Women; Imitation of Life; Gilda; Leave Her to Heaven; Gaslight*. Regular critical readings, frequent viewing questions, two longer essays, no exam. Students must be free to attend regular evening screenings and video showings of the films once or twice a week. Lab fee.

[ENGL 371 American Poetry to 1950 (also American Studies 371)
4 credits. To be offered 2000–2001.]

[ENGL 375 Survey in African American Literature to 1917 (also American Studies 375)
4 credits. To be offered 2000–2001.]

ENGL 376 Survey in African American Literature: 1918 to present
Spring. 4 credits. H. Spillers.
This course will select its readings from the genres of poetry, drama, fiction, and non-fiction produced by black American writers from the period of the Harlem Renaissance, to the present. Readings will include poems by Harlem Renaissance poets, the poets of African-American modernism, i.e., Gwendolyn Brooks and Robert Hayden, and some of the poetry of the Black Arts Movement of the 60s, by way of Leroi Jones/Imamu Baraka's and Larry Neal's *Black Fire*; plays by Lorraine Hansberry, Ed Bullins, and August Wilson; non-fictional and fictional writings by Malcolm X, Martin Luther King, Nella Larsen, Jean Toomer, Zora Neale Hurston, Toni Morrison, and Nate Mackey. (*Cane, The Autobiography of an Ex-Colored Man, Passing, The Autobiography of Malcolm X, Letter from an Birmingham Jail, Black Boy, Invisible Man, Flight to Canada, Oxherding Tales, Middle Passage, Jazz*, and *The Bedouin Hornbook* will be among the selected texts for the spring term.) The course is designed for majors, but will be open to all interested students.

ENGL 378 American Poetry Since 1950 (also American Studies 372)
Fall. 4 credits. R. Gilbert.
The second half of the 20th century has been a remarkably rich and diverse period in American poetry, characterized by constant innovations in form and technique, and restless exploration of new areas of language and experience. In this course we'll focus on a series of representative figures born between 1911 and 1932. These may include some or all of the following: Elizabeth Bishop, Robert Lowell, Gwendolyn Brooks, John Berryman, Robert Creeley, Allen Ginsberg, Frank O'Hara, W. S. Merwin, James Wright, A. R. Ammons, John Ashbery, James Merrill, Sylvia Plath, and Adrienne Rich.

ENGL 379 Reading Nabokov
Fall. 4 credits. G. Shapiro.
For complete description, see Russian literature 385.

ENGL 381 Reading as Writing
See complete course description in section headed Expository Writing.

ENGL 382–383 Narrative Writing
See complete course description in section headed Creative Writing.

ENGL 384–385 Verse Writing
See complete course description in section headed Creative Writing.

ENGL 388 The Art of the Essay
See complete course description in section headed Expository Writing.

[ENGL 390 Autobiography: Memoir, Memory, and History
4 credits. To be offered 2000–2001.]

[ENGL 394 Topics in American Indian Literature (also American Indian Studies 394 and American Studies 394)
4 credits. To be offered 2000–2001.]

[ENGL 395 Video: Art, Theory, Politics (also Theatre Arts 395)
Fall. 4 credits. To be offered 2000–2001.]

Courses for Advanced Undergraduates

Courses at the 400-level are open to juniors and seniors and to others by permission of instructor unless other prerequisites are noted.

ENGL 402 Literature as Moral Inquiry
Fall. 4 credits. S. Mohanty.
What can literary works, especially novels and short stories, tell us about moral issues? Should they be seen as suggesting a form of moral inquiry similar to the kind of philosophical discussion we get in, say, Aristotle's Nicomachean Ethics? Do they deal with the same range of issues? Can reading philosophical works in ethics together with novels that deal with similar themes help us understand these themes better? This course is an attempt to answer these questions. We will read selections from key texts in moral philosophy, including works by Aristotle, Kant, Marx, Nietzsche, and Rawls. Our attempt will be to use these works to help us understand the nature of moral debate and inquiry in novels like Eliot's *Middlemarch*, James's *Portrait of a Lady*, Morrison's *Beloved*, Woolf's *Mrs. Dalloway*, Conrad's *Heart of Darkness*, Achebe's *Things Fall Apart*, and Handke's *The Left Handed Woman*. Other writers we will most probably read include Nadine Gordimer, Doris Lessing, Salman Rushdie, and Kazuo Ishiguro. The emphasis will be on close reading, with particular attention to the relationship between formal elements (such as the use of narrative techniques) and the moral questions the texts organize and explore. Assignments include two papers and a journal.

ENGL 404 History Into Fiction: Nazis and the Literary Imagination (also Comparative Literature 404 and German Studies 414)
Fall. 4 credits. E. Rosenberg.
The twelve years of Hitler's rule remain the most critical, "longest" years of the century. We shall read some eight texts by Anglophone and Continental novelists (and a few playwrights and poets) that explore the salient features of the regime: Weimar and Hitler's rise to power (e.g., Mann's "Mario and the Magician," Brecht's *Arturo Ui*, Isherwood's *Goodbye to Berlin*); civilian life in Nazi Germany (Brecht's "Jewish Wife" and other one-actors, Günter Grass's *Tin Drum)*; World War II and the Occupation of Europe (e.g., Camus's *The Plague*, Heinrich Böll's short fiction, Anne Frank's *Diary*); the persecution of the European Jews and genocide (e.g., Sartre's "Childhood of a Leader," Peter Weiss's *The Investigation*, Borowski's *This Way for the Gas*, Spiegelman's *Maus I* or *Maus II*, Ozick's "The Shawl"). Lastly some lyrics by Celan, Nelly Sachs, Anthony Hecht. Brief ancillary selections by historians and memorialists (Arendt, Primo Levi, Bettelheim) and the instructor's private documentation of life under Hitler. Two papers, no exam.

[ENGL 405 The Politics of Contemporary Criticism
Fall. 4 credits. To be offered 2000–2001.]

ENGL 410 Contemporary Native American Literature and its Contexts (also Society for the Humanities 408)
Fall. 4 credits. E. Cheyfitz.
For complete description, see Society for the Humanites 408.

ENGL 413 Middle English (also English 613) #
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. A. Galloway.
This course surveys the literature of later medieval England, beginning with the cultural, literary, and linguistic collapse of standard Old English and proceeding to the age of Chaucer and perhaps a bit beyond. Readings will move through chronicles, homilies, lyrics, and acknowledged literary masterpieces such as *The Owl and the Nightingale*, the works of the Pearl poet, selections from *Piers Plowman*, and other poems from the "alliterative revival."

[ENGL 416 Chaucer and the Politics of Love
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 2000–2001.]

[ENGL 417 Early Medieval Archaeology and Literature (Also ENGL 617, ARCHEO 417, & ARCHEO 617)
Spring. 4 credits. To be offered 2000–2001.]

[ENGL 423 Seventeenth-Century Lyric
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Not open to sophomores. To be offered 2000–2001.]

[ENGL 425 Elizabethan and Jacobean Drama (also ENGL 628)
4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 2000–2001.]

[ENGL 427 Studies in Shakespeare
4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 2000–2001.]

ENGL 430 Literature as History: The Americas (also American Studies 430.04)
Spring. 4 credits. B. Maxwell.
Beginning with William Carlos Williams's *In the American Grain* (1925), this course will consider modernist innovations in the telling of history by literary means. Responding to what they felt as the "deadness" of conventional historiography, writers such as Williams, Charles Reznikoff, John Sanford, Muriel Rukeyser, Melvin Tolson, and Paul Metcalf produced imaginative American histories that made a new world of historical narration, and in the process found new objects of historical attention, one of which was the plural, transnational America of the hemispheric Americas. This reconfiguration anticipated and in some cases shaped recent revisionist critiques of the European presence on American soil (Eduardo Galeano, Leslie Marmon Silko, David Stannard, Ward Churchill, Noam Chomsky, Ana Castillo); accordingly, students will read examples, some polemical, of that later work.

[ENGL 432 Studies in the 18th Century: The Development of Print Culture
4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 2000–2001.]

ENGL 434 Electronic Art and Culture
Fall. 4 credits. Requirements: 2 medium length papers (7–8 pages), visual project (hypertext or image), seminar presentation. Some advanced knowledge of either the artistic or theoretical context is helpful. Permission of Instructor. T. Murray.
The course will analyze the "interface" between recent projects in electronic art and theories of digital culture. Artifacts to be studied include video and audio installations, web art, CD-Rom art, and digitized cinema. We will study both process and content with an emphasis on the role of historical and ideological representation in the works to be discussed. Special consideration will be given to issues such as memory, sexuality, cultural identity, and virtuality. Theorists to be read will include: Bellour, Mercer, Rodowick, Zimmermann, Druckrey, Kroker, Virilio, Morse, Hershman, and Gomez-Pena. Artists to be studied, including, Piper, Menkes, Woolery, Tamblyn, Marker, Iimura, McCoy, can be previewed at: http://contactzones.cit.cornell.edu/

[ENGL 438 Libertines and License (also French Literature 474)
4 credits. To be offered 2000–2001.]

ENGL 439 Austen in the Eighteenth Century #
Fall. 4 credits. D. Mermin.
This course may be used as one of the three pre-1800 courses required of English majors. This course will give students the opportunity to read and discuss nearly all of Jane Austen's fiction, as well as works by writers who influenced her. Austen's novels draw deftly on eighteenth-century thought and literature; exploring these links should enrich our experience of Austen's wit and art.

ENGL 440 Slavery and the Idea of Race in Early Modern England (also English 640 and Society for the Humanities 415)
Spring. 4 credits. L. Brown.
For complete description, see Society for the Humanities 415.

ENGL 442 Testimony, Law, Literature (also Society for the Humanities 415)
Spring. 4 credits. M. Sanders.
For complete description, see Society for the Humanities 415.

[ENGL 443 The Dandy in London and Dublin: 1790–1890
4 credits. To be offered 2000–2001.]

[ENGL 448 The American Short Story
Fall, spring, or summer. 4 credits. To be offered 2000–2001.]

ENGL 452 Wilde and Woolf (also English 652)
Fall. 4 credits. S. Siegel.
This seminar will consider the question of style: what does the word mean; why has it claimed attention; how has it behaved in the work of two authors whose writing among their contemporaries marked a distinctive departure? We will explore Oscar Wilde and Virginia Woolf as readers of literary and social texts. Along the way, we will direct our attention to the implicit expectations we bring to our understanding of "Victorians" and "Modernists." Selections will be drawn from the full range of Wilde's and Woolf's work. Our principal texts, however, will be limited to a few essays by each author.

[ENGL 454 American Musical Theatre (also Music 490 and Theatre Arts 454)
4 credits. Prerequisite: English 272 or Theatre Arts 240–41. To be offered 2000–2001.]

ENGL 458 Imagining the Holocaust (also English 658, Jewish Studies 458 and 658, Comparative Literature 483 and 683)
Spring. 4 credits. D. Schwarz.
What is the role of the literary imagination in keeping the memory of the Holocaust alive for our culture? We shall examine major and widely read Holocaust narratives which have shaped the way we understand and respond to the Holocaust. As we move further away from the original events, why do the kinds of narratives with which authors render the Holocaust horror evolve to include fantasy and parable? Employing both a chronological overview and a synchronic approach—which conceives of the authors having a conversation with one another—we shall discover recurring themes and structural patterns in the works we read.

We shall begin with first person reminiscences—Wiesel's *Night*, Levi's *Survival at Auschwitz*, and *The Diary of Anne Frank*—before turning to searingly realistic fictions such as Hersey's *The Wall*, Kosinski's *The Painted Bird*, and Ozick's "The Shawl." In later weeks, we shall explore diverse kinds of fictions and discuss the mythopoeic vision of Schwarz-Bart's *The Last of the Just*, the illuminating distortions of Epstein's *King of the Jews*, the Kafkaesque parable of Appelfeld's *Badenheim 1939*, and the fantastic cartoons of Spiegleman's *Maus*, books. We shall also include Kineally's *Schindler's List*, which was the source of Spielberg's academy award winning film, and compare the book with the film.

[ENGL 459 Contemporary British Drama
4 credits. To be offered 2000–2001.]

ENGL 460 Riddles of Rhythm
Fall. 4 credits. D. Fried.
What makes a poem's pulse beat? How and why does language ordered into rhythm affect us? How do poets shape our responses through rhythmic means? What are some of the ways that poets and their readers have tried to make sense of the essence and effects of rhythm? Is poetic rhythm best understood on the model of music? Does ordinary language outside of poetry have its own rhythms? What does the arrangement of poems in lines have to do with its rhythms? Is "free verse" free from rhythm? We will read a variety of poems from the Renaissance to the present, and a range of essays about poetry in an attempt to answer these questions. Writing assignments will include interpretive essays about poems, analysis of accounts of poetic rhythm, including accounts offered by the poets themselves, and occasional short exercises working with poetic rhythm and other formal features of poems. Poets to be studied may include Shakespeare, Herbert, Marvell, Milton, Pope, Keats, Byron, Poe, Dickinson, Whitman, Hopkins, Hardy, Owen, Frost, Williams, Moore, Bishop, and Ammons. No previous study of poetic meter or rhythm is assumed.

ENGL 463 Problems in the Novel: Murder and Crimewriting
Spring. 4 credits. M. Seltzer.
An investigation of the representation of murder across a range of novels, non-fictional accounts and film. Focus on turn of the century and recent materials.

ENGL 464 Emerson and Poe
Spring. 4 credits. R. Morgan.
This course will focus on the two most important opposing theories and theorists of American poetry and poetics in the 19th century. Though near contemporaries, born in Boston in the same decade, and both deriving their main ideas from Coleridge, Emerson and Poe represented sharply differing versions of the American poetic enterprise. Both steeped in Neo-platonic terms and metaphors, they inspired conflicting traditions, Emerson the expansive Wordsworthian poetics that Whitman seized upon, Poe the Gnostic interiors that made him kin to Hawthorne, Melville and Baudelaire in faraway Paris. Poe called Emerson one of the transcendental "frog-pondians" and Emerson referred to Poe as "the jingle man." Through the work of later writers such as Dickinson, Frost, Crane, and Faulkner we will study how the schism Poe and Emerson defined has been central to American literature ever since.

[ENGL 465 Proseminar in American Studies (also AmSt 465)
4 credits. To be offered 2000–2001.]

[ENGL 466 James on Film
4 credits. To be offered 2000–2001.]

ENGL 469 Faulkner (also American Studies 469)
Fall. 4 credits. H. Spillers.
This course will examine selected writings of William Faulkner, beginning with some of the early novels (*The Sound and the Fury, Light in August, Absalom, Absalom!)* and concluding with *A Fable*. We will consider Faulkner's impact as a maker of myth and as one of the leading figures of a literary discourse that creates a modernist sensibility in American letters. As a southern writer, Faulkner is traditionally confined to the character study of exotic types, but his systemic fictional exploration of "violence and the sacred" provides a powerful clue to the larger issue of a national identity. Faulkner, in his own terms, dared to imagine "culture" as a problem for fiction. This course will attempt to consider the outcome.

ENGL 470 Studies in the Novel: Hemingway, Fitzgerald, Faulkner
Spring. 4 credits. D. McCall.
Close readings of the major texts. Problems in biography.

[ENGL 473 American Indian Autobiography
4 credits. To be offered 2000–2001.]

[ENGl 474 Contemporary African American Poetry
4 credits. Limited to 15 students. Admission by permission of instructor only. To be offered 2000–2001.]

ENGL 475 Studies in the Twentieth Century: Major Experimental Novels
Fall. 4 credits. M. Hite.
A seminar looking at the scope of experimental narrative fiction in the twentieth century, going backward from the hypertexts of the 1990s to the "stream of consciousness" mode and theory that marked the second decade of the century. We will look closely at hypertext fiction and theory by Shelley Jackson, Deena Larsen and Stuart Moulthrop; at print fiction by Angela Carter, Thomas Pynchon, William Faulkner, Virginia Woolf and Dorothy Richardson; and at critical essays by such writers as Moulthrop, Coover, Carter, Haraway, Benjamin, Woolf and Richardson.

Seminar participants will do regular 5–10 minute presentations, weekly short (2–3 page) essays posted on the class newsgroup, and a final, longer (14+ pages) paper. Hypertexts will be available on computers at two campus locations designated specially for this function. Copies of the hypertexts will also be on library reserve for students to check out.

ENGL 476 Global Women's Literature (also Women's Studies 476)
Fall. 4 credits. E. DeLoughrey.
This course focuses on contemporary women's writing in English from "postcolonial" regions such as the Pacific, Caribbean, India and Africa. During the semester we will look at how women from these regions depict the process of migration from within the nation (from rural to urban spaces) or from the "postcolony" to metropoles such as England. As women are generally associated with private, domestic space, this course will explore the motifs of exile and border crossing and sketch out the ways in which gender, nation and class relate to recent masculinist productions of "traveling theory." We will read novels/poetry by Joan Riley, Merle Hodge, Patricia Grace, Miriama Ba, Anita Desai, and Grace Nichols, and align these texts with the theoretical works of Edward Said, Karen Kaplan, Paul Gilroy and M. Nourbese Philip. Requirements: active class participation, student presentations, a few short essays and a final paper on the writer of your choice.

ENGL 477 Studies in Native American Literature: Native American Literature and Criticism (also English 677)
Spring. 4 credits. R. Warrior.
Native American literature and the criticism that has grown alongside it has emerged over the past thirty years into a maturing field. A major purpose of this course is to provide an advanced introduction to the major literary texts in the field. But another focus of the course will be a metatheoretical discussion of how literary and cultural criticism is constructed and theorized for that literature.

Readings will include Silko, Vizenor, Momaday, Harjo, Craig Womack, Jace Weaver, and Kimberly Blaeser.

ENGL 478 American Religions and American Literatures
Spring. 4 credits. R. Warrior.
This course explores ways in which the discourses of American religions inform the literary production of the United States in the nineteenth century. Beginning with selections from Jonathan Edwards and other theological writers, we will then turn to a set of canonical literary texts, including *The Scarlet Letter, Moby Dick*, and Whitman's "Democratic Vistas." But we will also read work that represents a more diverse version of America's literatures and religions, including American Indian writers such as William Apess, Maria Stewart and others.

ENGL 479 Jewish-American Writing (also American Studies 479 and Jewish Studies 478)
Fall. 4 credits. J. Porte.
A study of American Writing from about 1895 to the present that is concerned with the Jewish experience in the New World. Some topics to be covered: immigrant life, gender issues, the conflict between religious and secular outlooks, political affiliation, the Great Depression, the Group Theater, anti-Semitism, Jewish life in the suburbs, the impact of the Holocaust, the "renewal" of Yiddish culture and religious interest. Authors to be studied will probably include: Abraham Cahan, Anzia Yezierska, Fannie Hurst, Henry Roth, Clifford Odets, Karl Shapiro, Alfred Kazin, Saul Bellow, Bernard Malamud, Philip Roth, Ruth Whitman, and Cynthia Ozick. There will be opportunities for research in secondary sources and we may view some films on Jewish subjects.

ENGL 480–481 Seminar in Writing
Fall, 480; spring 481. 4 credits.
See complete description in section headed Creative Writing.

ENGL 490 Literatures of the Archipelagoes: Caribbean and Pacific "Tidalectics"
Spring. 4 credits. E. DeLoughrey.
The islands of the Pacific and Caribbean share similar histories of European colonization and complex patterns of migration, diaspora, "ex-isle" and settlement. As a series of small nations connected by the migratory paths of the sea, their literatures are often categorized under the rubric of regional studies. In Barbadian Kamau Brathwaite's definition, "tidalectics" draw upon "the movement of the water backwards and forwards as a kind of cyclicmotion, rather than linear." While we will examine a number of themes shared by the writers of both regions (island sovereignty, creolization, and postcolonial issues), overall we will focus on how seas and oceans facilitate these patterns of dispersal and landfall in both archipelagoes. We will look at the ways bodies of water are theorized by Paul Gilroy, Antonio Benitez-Rojo, Edouard Glissant and Pacific writers Epeli Hau'ofa, Witi Ihimaera and Albert Wendt. Other readings will include poetry by Derek Walcott, Brathwaite, Grace Nichols, Teresia Teaiwa, and novels/short stories by Ihimaera, Wendt, Ana Lydia Vega, and Edwidge Danticat.

ENGL 491 Honors Seminar I
Fall. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.
Early Shakespeare. S. McMillin.
Studies in the first half of Shakespeare's career, intended to introduce the critical and scholarly questions important in Shakespeare studies today. Readings will include such plays as *Henry IV, Parts One and Two, Henry V, Romeo and Juliet, Comedy of Errors, Much Ado About Nothing, Merchant of Venice.* Assignments will fall at the rate of about one play and one critical essay per week. Reports, short papers, a term paper.

ENGL 492 Honors Seminar II
Spring. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructors.
Section I: Birth of the Cool: African American Literary Culture of the 1940s and 1950s. J. Goldsby.
After the Harlem Renaissance but before the Civil Rights and Black Nationalist eras, an extraordinary group of African American writers—the "coolest," in Miles Davis' sense of the term—came of literary age together: Ralph Ellison, Richard Wright, and James Baldwin; Gwendolyn Brooks, Ann Petry, and Dorothy West. We will read their signal works in the context of the authors' careers, and in relation to the cultural and racial politics underlying the "American Century." Short critical essays, 1–2 oral presentations, and a research-oriented project. English 265 or 376 suggested but not required.

Section II: Reading Joyce's *Ulysses*. D. Schwarz.
A thorough, episode-by-episode study of the art and meaning of Joyce's *Ulysses*. We will explore the relationship between it and the other experiments in modernism and show how *Ulysses* redefines the concepts of epic and hero. We will also view *Ulysses* to address major issues in literary study and to test various critical and scholarly approaches. Such a self-conscious inquiry into theories and methods should prepare students to confront other complex texts, as well as help them define their own critical positions as they plan their senior honors theses.

ENGL 493 Honors Essay Tutorial I
Fall or spring. 4 credits. Prerequisites: senior standing and permission of Director of the Honors Program.

ENGL 494 Honors Essay Tutorial II
Fall or spring. 4 credits. Prerequisites: English 493 and permission of Director of the Honors Program.

ENGL 495 Independent Study
Fall or spring. 2–4 credits. Prerequisites: Permission of departmental adviser and director of undergraduate studies.

Courses Primarily for Graduate Students

Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600–level course should consult the instructor. The list of courses given below is illustrative only; a definitive list, together with course descriptions and class meeting times, is published in a separate department brochure before course enrollment each term.

Graduate English Courses for 1999–2000

Fall

ENGL 600 Colloquium for Entering Students

ENGL 602 Literature and Theory

ENGL 611 Old English (also English 311)

ENGL 614 Middle English (also English 413)

ENGL 616 The Development of Print Culture

ENGL 622 Renaissance Poetry (also Comparative Literature 450, Comparative Literature 650)

ENGL 627 Studies in Shakespeare: Shakespeare and Money

ENGL 641 Studies in Romantic Writing: Byron, Hazleitt, Shelley, Keats, and the Issue(s) of Romanticism

ENGL 652 Wilde and Woolf (also English 452)

ENGL 660 Cinematic Desire (also Theatre Arts 661, Women's Studies 661, & Comparative Literature 662)

ENGL 667 American Fiction, 1850–1900

ENGL 688 The Stein Era: (Post)Modernism and the Canonzing of Gertrude Stein

ENGL 707 Writing in the Disciplines: Literacy, Social Organization, Consciousness, and the Information Society (also Writing 707)

ENGL 710 Advanced Reading in Old English

ENGL 780.1 MFA Seminar: Poetry

ENGL 780.2 MFA Seminar: Fiction

ENGL 785 Reading for Writers

Spring

ENGL 610 Dante, Chaucer, Boccacio, and Gower

ENGL 612 *Beowulf* (also English 312)

ENGL 618 Medieval Drama

ENGL 623 Allegory and Romance

ENGL 633 Eighteenth Century Poetry

ENGL 640 Slavery and the Idea of Race in Early Modern English (also Society for the Humanities 418 & English 440)

ENGL 643 Mad Romanticisms

ENGL 656 Postmodernism

ENGL 658 Representing the Holocaust (also English 458, Jewish Studies 458 & Jewish Studies 658)

ENGL 675 The Long Poem

ENGL 676 Theory of the Novel

ENGL 677 Native American Literature and Criticism

ENGL 681 Prosody

ENGL 699 Studies in African American Literature: African-American Women and the Culture Critique

ENGI 781.1 MFA Seminar: Poetry

ENGL 781.2 MFA Seminar: Fiction

English for Academic Purposes

ENGLF 205 English as a Second Language
Fall. 4 credits. Prerequisite: placement by examination. S. Schaffzin.
An all-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor.

ENGLF 206 English as a Second Language
Spring. 3 credits. Prerequisite: ENGLF 205 or placement by examination. S. Schaffzin.
A writing class for those who have completed ENGLF 205 and need further practice, or for those who place into the course. Individual conferences are also included.

ENGLF 209 English as a Second Language
Fall or spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.
Practice in classroom speaking and in informal conversational English techniques for gaining information. Students also practice giving informal presentations. Individual conferences with the instructor supplement class work.

ENGLF 210 English as a Second Language
Spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.
Practice in academic speaking. Formal classroom discussion techniques and presentation of information to a group. Presentations are videotapes and reviewed with the instructor. Individual conferences supplement class work.

ENGLF 211 English as a Second Language
Fall, spring, or summer. 3 credits. Prerequisite: placement by examination. D. Campbell.
Academic writing with emphasis on improving organization, grammar, vocabulary, and style through the writing and revision of short papers relevant to students' fields. Frequent individual conferences supplement class work.

ENGLF 212 English as a Second Language
Spring. 3 credits. Prerequisite: permission of instructor. Enrollment is restricted to 12 on a first-come, first-served basis. D. Campbell.
Research paper writing. For the major writing assignment of this course, the students must have a real project that is required for their graduate work. This can be a thesis proposal; a pre-thesis; part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (with permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology.

ENGLF 213 Written English for Non-Native Speakers
Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.
Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

First-Year Writing Seminar

ENGLB 215–216 English for Later Bilinguals
For description, see first-year writing seminar brochure.

Intensive English Program

305 Morrill Hall

J. M. Mancusi, director; E. J. Beukenkamp, R. L. Feldman, K. Golkowska, M. Johns, M. T. Lovell, S. Yates

This noncredit, nondegree program provides full-time intensive English language instruction as well as academic, social, and cultural orientation to the United States and its institutions. The aim of the program is for participants to acquire proficiency in the language in order to pursue goals in English for academic, business, professional, or personal purposes.

Programs are offered both fall and spring semesters and in the six-week summer session (from late June to early August). Participants receive a minimum of 20 hours of classroom instruction weekly in speaking, listening, reading, writing, and grammar, which are taught at all levels from low intermediate through very-high advanced. Applicants must be at least 17 years of age, hold the equivalent of a high school diploma, and have had some previous study of English.

Students who have gained full admission to or who are already registered in degree-granting programs at Cornell should consult the section "English for Academic Purposes" (series ENGLF).

The Intensive English Program is coordinated by the director, Jeanette Mancusi, Cornell University, Morrill Hall, Ithaca, New York 14853–4701, U.S.A. Information and application materials are available directly from the program by writing to the above address, calling 607/255–4863, or faxing 607/255–7491. Internet e-mail is CUIEP@cornell.edu. Web page is http://dml.cornell.edu/languages/IEP/cuiep.html.

FILM

See Department of Theatre, Film and Dance.

FRENCH

See Romance Studies.

FIRST-YEAR WRITING SEMINARS

For information about the requirements for writing seminars and descriptions of seminar offerings, see "Special Programs and Interdisciplinary Studies" at the end of the Arts and Sciences section of this catalog and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in October for the spring term.

GEOLOGICAL SCIENCES

B. L. Isacks, chair; R. W. Kay, director of undergraduate studies; R. W. Allmendinger, W. Allmon, M. Barazangi, W. A. Bassett, J. M. Bird, L. D. Brown, L. M. Cathles, J. L. Cisne, K. Cook, L. A. Derry, C. H. Greene, T. E. Jordan, S. Mahlburg Kay, F. H. T. Rhodes, D. L. Turcotte, W. M. White

As an intercollege unit, the Department of Geological Sciences has degree programs in both the College of Arts and Sciences (B.A. degree) and the College of Engineering (B.S. degree).

We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is also a powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important for both future policy makers and ordinary citizens. Because the human need to understand the earth is so pervasive, we provide our students with a broad and solid minimal set of required courses plus room to explore more specialized topics with well-chosen electives within and outside the department. The Geological Sciences Major prepares students for advanced study in geology, geophysics, geochemistry and geobiology, and careers in mineral and petroleum exploration or in environmental geology. Alternatively, it is a valuable major for a pre-law or pre-med program or in preparation for a career in K-12 education.

In addition to course work, students learn by outdoor field work and involvement in the vigorous research programs of the department. Facilities include equipment for processing seismic signals and digital images of the earth's surface, instruments for highly precise isotopic and element analyses, and extensive libraries of earthquake records, satellite images, and exploration seismic records. High-pressure, high-temperature mineral physics research uses the diamond anvil cell and the Cornell High Energy Synchrotron Source (CHESS). Undergraduates have served as field assistants for faculty members and graduate students in Argentina, British Columbia, the Aleutian Islands,

Scotland, Switzerland, Tibet, and Barbados. Undergraduates are encouraged to participate in research activities, frequently as paid assistants.

The Department of Geological Sciences is the core department in a new intercollege program in the Science of Earth Systems (SES). In the College of Arts and Sciences, this program can be taken as a separate major administered by the Department of Geological Sciences (described in more detail in the section at the front of this catalog, "Interdisciplinary Centers, Programs, and Studies"). The Geological Sciences major emphasizes the structure, composition and evolution of our planet, while the SES major is more concerned with currently active processes on and near the earth's surface where the interactions of water, life, rock and air produce our planetary environment. The SES major is for students interested in careers in atmospheric, hydrological and ocean sciences, environmental chemistry (biogeochemistry), and environmental geophysics.

The Major

For admission to the Geological Sciences major in the College of Arts and Sciences, a student should have made substantial progress toward completing the following basic science requirements for the major: MATH 111–112 or MATH 191–192, PHYS 207–208 or PHYS 112–213, CHEM 207 or 211. Freshmen and Sophomores should take an introductory GEOL course (or courses), normally GEOL 101 or GEOL 201, or GEOL 102 or GEOL 104. Juniors with a strong foundation in mathematics and science may be accepted into the major without an introductory course.

Majors take GEOL 210, the five 300-level core courses listed below, 6 credits of additional course work from geological sciences courses numbered 300, 400, or 600, plus an additional course in either computer science or biological science, or an intermediate-level course in biological science, mathematics, chemistry, or physics.

In addition, a requirement for an advanced outdoor field experience may be met by completing one of the follow 4 credit options: (a) GEOL 417 (Field Mapping in Argentina, 3 credits) and GEOL 491 or 492 (based on field observations) for a combined 4 credit minimum; (b) GEOL 437 (Geophysical Field Methods, 3 credits) plus at least 1 credit of GEOL 491 or 492 using geophysical techniques from GEOL 437; (c) GEOL 491–492 (Undergraduate Research, 2 credits each) with a significant component of field work; or (d) an approved outdoor field course taught by another college or university (4 credit minimum).

Core Courses

GEOL 326 Structural Geology

GEOL 355 Mineralogy

GEOL 356 Petrology and Geochemistry

GEOL 375 Sedimentology and Stratigraphy

GEOL 388 Geophysics and Geotectonics

Prospective majors should consult R. W. Kay, director of undergraduate studies, or another faculty member as early as possible for advice in planning a program. Students majoring in geological sciences may attend the departmental seminars and take advantage of cruises, field trips, and conferences offered through the Department of Geological Sciences.

Courses offered at the 100 and 200 level are open to all students. Certain 300- and 400-level courses in geology also may be of particular interest to students of chemistry, biology, and physics. Students are encouraged to inquire about courses that interest them at the department office in Snee Hall.

Honors. An honors program is offered by the Department of Geological Sciences for superior students. Candidates for honors must maintain an overall 3.0 grade-point average, a cumulative average of 3.5 in the major, and complete an honors thesis (Geological Sciences 491 or 492). Students interested in applying should contact the director of undergraduate studies during the second semester of the junior year.

Courses

Freshman and Sophomore Courses

GEOL 101 Introductory Geological Sciences
Fall, spring, or summer. 3 credits. Fall, staff; spring, J. M. Bird; summer, W. Brice.
Designed to enhance an appreciation of the physical world. Natural environments, surface features, dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems are emphasized. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (Earth System Science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

GEOL 102 Evolution of the Earth and Life (also Bio G 170)
Spring. 3 credits. J. L. Cisne.
Earth systems and their evolution. Earth history's astronomical context. Plate tectonics, continental drift, and their implications for climate and life. Coevolution of life and the atmosphere. Precedents for ongoing global change. Dinosaurs, mass extinctions, and human ancestry. Laboratories on reconstructing geological history and mapping ancient geography. Fossil collecting on field trips.

GEOL 104 The Sea: An Introduction to Oceanography (also BIO ES 154)
Spring, summer. 3–4 (4 credits with lab section) credits. Spring: C. H. Greene, W. M. White; summer: J. Chiment.
A survey of the physics, chemistry, geology, and biology of the oceans for both science and non-science majors. Topics include: seafloor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, coastal processes, marine pollution, and marine resources.

GEOL 105 Writing on Rocks (Freshman Seminar)
Fall. 3 credits. J. Chiment.
See Freshman Seminar Handbook for description.

GEOL 106 Vertebrate Fossil Preparation
Spring. 1 credit. Prerequisites: one introductory geology course or concurrent enrollment, class size is limited.
J. Chiment.
A laboratory-oriented course that will expose students to techniques of vertebrate fossil preparation. Roughing-out and fine preparation of large specimens in solid matrix will be covered, as well as screen washing and microscope techniques for the recovery of micro-vertebrate remains. Specialized scanning techniques will be discussed.

The class will meet for one hour each week for the first six weeks of the semester. Students will be assigned to an individual or group project requiring two hours of participation each week for the remainder of the semester.

GEOL 107 How the Earth Works
Fall. 1 credit. J. L. Cisne.
A user-friendly introduction to the workings and interactions of solid earth, ocean, atmosphere, and life as they relate to understanding ongoing global change.

GEOL 109 Dinosaurs
Fall. 1 credit. J. L. Cisne.
An introductory survey course for anyone interested in dinosaurs. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

GEOL 111 To Know the Earth and Build a Habitable Planet
Fall. 3 credits. J. M. Bird.
Acquaints the non-scientists with Earth. Major features and how Earth has evolved. Earth System Science and building a habitable planet. Effects of human activity on geologic environments, mitigating environment damage, living with natural hazards. Mineral resource use in 21st century and an environmentally sound fuel-minerals cycle.

GEOL 122 Earthquake! (also ENGRI 122)
Fall. 3 credits. L. D. Brown.
The science of natural hazards and strategic resources is explored. Techniques for locating and characterizing earthquakes, and assessing the damage they cause; methods of using sound waves to image the earth's interior to search for strategic materials; the historical importance of such resources. Seismic experiments on campus to probe for groundwater, the new critical environmental resource.

GEOL 200 Art, Archaeology, and Analysis (also ARKEO 285, ARTH 200, ENGRI 185, PHYS 200)
Spring. 3 credits. R. Kay.
An interdepartmental course on the use of techniques of science and engineering in cultural research. Applications of physical and physiological principles to the study of archaeological artifacts and works of art. Historical and technical aspects of artistic creation. Anlayses by modern methods to deduce geographical origins, and for exploration, dating and authentication of cultural objects. Does not meet liberal studies distribution requirement for Engineering.

GEOL 201 Introduction to the Physics and Chemistry of the Earth (also ENGRD 201)
Fall. 3 credits. Prerequisites: Physics 112 or 207. L. M. Cathles.

Formation of the solar system: accretion and evolution of the earth. The rock cycle: radioactive isotypes and the geological time scale, plate tectonics, rock and minerals, earth dynamics, mantle plumes. The hydrologic cycle: runoff, floods and sedimentation, groundwater flow, contaminant transport. Weathering cycle: chemical cycles, CO_2 (weathering), rock cycle, controls on global temperature (CO_2 or ocean currents), oil and mineral resources.

[GEOL 203 Natural Hazards and the Science of Complexity
Fall. 3 credits. Prerequisites: 1 calculus course. Not offered 1999–2000. D. L. Turcotte.
Studies of natural hazards; earthquakes, volcanic eruptions, floods, hurricanes, tornadoes, severe storms, wildfires, meteor impacts. Applications of the science of complexity to natural hazards: fractals, chaos, and self-organized criticality.]

GEOL 204 Ocean Sciences Laboratory
Spring. 3 credits. Prerequisite or co-requisite: BIOES 154/GEOL 104. C. H. Greene, B. W. Monger.
A laboratory course investigating the physics, chemistry, geology, and biology of the oceans. This course is intended for science majors to supplement the material covered in BIOES 154/GEOL 104. The course includes a discussion section and laboratory each week.

GEOL 210 Introduction to Field Methods in Geological Sciences
Fall. 3 credits. Prerequisite: GEOL 101, 201, or permission of instructor. Weekly field sessions. A weekend field trip. S. Mahlburg Kay.
The methods by which rocks are used as a geological database. Field methods used in the construction of geologic maps and cross sections; systematic description of stratigraphic sections. Field and laboratory sessions on Saturday mornings until Thanksgiving. One additional lecture during most of these weeks. One weekend field trip to eastern New York.

GEOL 212 Caribbean Field Trip (January)
Spring. 2 credits. Prerequisite: permission of instructor. Enrollment limited to 15. Approximate cost $1100. L. D. Brown.
A multidisciplinary look at earth science and environmental issues represented in the Yucatan Peninsula of Mexico. Base for operations will be the Centro Ecologico Akumal, located on the Caribbean coast south of Cancun. This coast and its associated reef epitomizes the conflict between ecological preservation and economic development on an international scale. Excursions may include visits to Merida, a historic Spanish town which lies above the buried impact structure that many believe resulted in the death of the dinosaurs; ruins at Chichen Itza, Mayapan, Coba, and Tulum associated with the rise and fall of Mayan culture; and wildlife (monkeys, jaguars, crocodiles) preserves where recent geological studies have found evidence that the fall of the Mayans may have been triggered by climate change. The field trip will feature snorkel tours of reefs and lagoons as well as the cenotes (sinkholes) that characterize this classic karst landscape. Weekly lectures during the semester will provide background; field trip scheduled for January 2000.

GEOL 213 Marine and Coastal Geology
Summer. 2 credits. Prerequisites: an introductory course in geology or permission of instructor. Staff.
A special one-week course offered at Cornell's Shoals Marine Laboratory (SML), on an island near Portsmouth, New Hampshire. For more details and an application, consult the SML office, G14 Stimson Hall. Estimated cost for 1999 (including tuition, room, board, and ferry transportation) is $1100.

Junior, Senior, and Graduate Courses

Of the following, the core courses GEOL 326, 355, 356, 375, and 388 may be taken by B.S. candidates who have successfully completed GEOL 201 or the equivalent and by B.A. candidates who have completed GEOL 101 or the equivalent, or who can demonstrate to the instructor that they have adequate preparation in mathematics, physics, chemistry, biology, or engineering.

GEOL 302 Evolution of the Earth System (also SES 302 and SCAS 332)
Spring. 4 credits. Prerequisites: MATH 112 or 192 and CHEM 207 or equivalent. Lectures, to be announced; discussion, to be announced. B. L. Isacks and staff.
Co-evolution of life and the earth system: Earth's early history; plate tectonics, continental drift and climate changes during the past billion years; mountain building, ice ages, and our own emergence during the past ten million years. Introduction to methods of interpreting information preserved in the rock record.

GEOL 315 Geomorphology
Fall. 4 credits. Prerequisite: one of the following: a 3-credit GEOL or SES course, or SCAS 260. T. E. Jordan and B. L. Isacks.
A study of the processes that sculpt the Earth's landscapes (above and below sea level) and the nature of those landforms. Landforms constructed by Earth's internal processes are the point of departure, as we examine their modification by physical interaction with the atmosphere and oceans. Also treated are depositional landforms that are generated by accumulations of grains of sediment. Laboratory exercises include both field examination of landforms of the Finger Lakes area and computer analysis of satellite images and Digital Elevation Models of examples from around the globe. Two Saturday field trips.

GEOL 321 Introduction to Biogeochemistry (also SES 321, NTRES 321)
Fall. 4 credits. Prerequisites: CHEM 207, MATH 112, plus a course in biology and/or geology. L. A. Derry, J. Yavitt.
Control and function of the Earth's global biogeochemical cycles. The course begins with a review of the basic inorganic and organic chemistry of biologically significant elements, and then considers the biogeochemical cycling of carbon, nutrients, and metals that take place in soil, sediments, rivers and the oceans. Topics include weathering, acid-base chemistry, biological redox processes, nutrient cycling, trace gas fluxes, bio-active metals, the use of isotopic tracers, and mathematical models. Interactions between global biogeochemical cycles and other components of the Earth system are discussed.

GEOL 326 Structural Geology
Spring. 4 credits. Prerequisite: MATH 112, GEOL 101 or 201, or permission of instructor. R. W. Allmendinger.
Nature and origin of deformed rocks at microscopic to macroscopic scales, with emphasis on structural geometry and kinematics. Topics include stress, strain, rheology, deformation mechanisms, minor structures, faulting, folding, and structural families.

GEOL 355 Mineralogy
Fall. 4 credits. Prerequisite: GEOL 101 or 201 and Chem 207 or permission of instructor. S. Mahlburg Kay.
Examination of minerals by hand-specimen properties and optical microscopy. Geological setting, classification, crystal structures, phase relations, chemical properties, and physical properties of minerals. X-ray diffraction is introduced. Independent research project.

GEOL 356 Petrology and Geochemistry
Spring. 4 credits. Prerequisite: GEOL 355. R. W. Kay.
Principles of phase equilibrium as applied to igneous and metamorphic systems. Description, classification, chemistry, origin, regional distribution, and dating of igneous and metamorphic rocks. Geochemical distribution of trace elements and isotopes in igneous and metamorphic systems. The petrological evolution of the planets.

GEOL 375 Sedimentology and Stratigraphy
Fall. 4 credits. Prerequisite: GEOL 101 or 201. J. L. Cisne.
Formation of sedimentary rocks. Depositional processes and environments. Correlation of strata in relation to time and environment. Petrology of sandstones and limestones. Geological age determination. Reconstruction of paleogeography and interpretation of earth history from stratigraphic evidence. Organization of strata in stratigraphic sequences.

GEOL 388 Geophysics and Geotectonics
Spring. 4 credits. Prerequisites: Mathematics 192 (or 112) and Physics 208 or 213. B. L. Isacks.
Global tectonics and the deep structure of the solid earth as revealed by investigations of earthquakes, earthquake waves, the earth's gravitational and magnetic fields, and heat flow.

[GEOL 411 Satellite Remote Sensing in Geosciences
Fall. 3 credits. Prerequisite: permission of instructor. Not offered 1999–2000. B. L. Isacks.
Instruction in satellite remote sensing, image processing, geographic information systems (GIS) and analysis of digital elevation models, using advanced computer workstations, via participation in current research on earthquakes, glaciers, and tectonics.]

GEOL 417 Field Mapping in Argentina
Summer. 3 credits. Prerequisites: GEOL 210 and 326; Spanish desirable, but not required. S. Mahlburg Kay.
Modern techniques of geological mapping applied in the region of San Juan, Argentina, including folded and faulted sedimentary rock units of the Andean Precordillera (San Juan River section), intensely deformed Precambrian metamorphic rocks of the Pampean Ranges (Pie de Palo), and shallow-level silicic intrusives (Cerro Blanco-Ullun).

[GEOL 423 Petroleum Geology
Fall. 3 credits. Recommended: GEOL 326. Offered alternate years. Not offered 1999–2000.
Introduction to hydrocarbon exploration and development. Exploration techniques, including well logs, fluid pressures, seismic-reflection methods, gravity, and magnetic measurements to map subsurface structures and stratigraphy. Petroleum origin and migration. Dispersal systems and depositional patterns of petroleum reservoirs. Economics of exploration, leasing, drilling and production. Estimates of petroleum reserves, including tar sands and oil shales.]

GEOL 434 Reflection Seismology
Spring. 4 credits. Prerequisites: Mathematics 192 and Physics 208, 213, or equivalent. L. D. Brown.
Fundamentals of subsurface imaging by multichannel seismic reflection techniques as used in oil exploration and geohydrological investigations. Covers survey design, acquisition, analysis, processing and interpretation in both 2D and 3D. Includes discussion of related techniques such as seismic refraction analysis, tomographic inversion, vertical seismic profiling, shear wave exploration and ground penetrating radar. Lab is keyed to state-of-the-art seismic processing, modeling and interpretation software from LandMark.

GEOL 437 Geophysical Field Methods
Fall. 3 credits. Prerequisites: PHYS 213 or 208, or permission of instructor. L. D. Brown.
Introduction to field methods of geophysical exploration, especially as applied to environmental issues. Emphasis on seismic, ground penetrating radar, gravity, and magnetic techniques. Field surveys carried out at the beginning of the semester are analyzed in a series of weekly follow-up meetings during the semester wherein the results are analyzed and interpreted. A field companion to GEOL 436, which is recommended but not required prior to this course.

GEOL 445 Geohydrology (also ABEN 471 and C&EE 431)
Fall. 3 credits. Prerequisites: Mathematics 294 and Engr 202. W. Brutsaert, L. M. Cathles, J.-Y. Parlange, T. S. Steenhuis.
Intermediate-level study of aquifer geology, groundwater flow, and related design factors. Includes description and properties of natural aquifers, groundwater hydraulics, soil water, and solute transport.

[GEOL 452 X-ray Diffraction Techniques
Spring. 3 credits. Prerequisites: GEOL 355 or permission of instructor. Offered alternate years. Not offered 1999–2000. W. A. Bassett and staff.
Automated X-ray diffractometer, Debye-Scherrer, real-time Laue, high-temperature diffraction, high-pressure diffraction, and pole-figure analysis. Applications in materials science and geological sciences. Labs will be held in the new Materials Science X-Ray Facility.]

[GEOL 453 Advanced Petrology
Fall. 3 credits. Prerequisite: GEOL 356. Offered alternate years. Not offered 1999–2000. R. W. Kay.
Magmas and metamorphism in the context of plate tectonics. Major and trace element chemistry and phase petrology as monitors of the creation and modification of igneous rocks. Temperature and stress in the crust and mantle and their influence on reaction rates and textures of metamorphic rocks. Application of experimental studies to natural systems.]

[GEOL 454 Advanced Mineralogy
Spring. 3 credits. Prerequisite: GEOL 355 or permission of instructor. Offered alternate years. Not offered 1999–2000. W. A. Bassett.
Crystallography and crystal chemistry of minerals and the methods of their study. X-ray diffraction, optical methods, computer simulation of crystal structures. Emphasis on effects of high pressures and temperatures with implications for understanding of Earth's interior.]

GEOL 455 Geochemistry
Fall. 4 credits. Prerequisites: Chemistry 207 and Mathematics 192 or equivalent. Recommended: GEOL 356. Offered alternate years. W. M. White.
The Earth from a chemical perspective. Formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and Solar System; trace-element geochemistry; isotope geochemistry; geochemical thermodynamics and kinetics; chemical evolution of the crust, mantle, and core; weathering and the chemistry of natural waters; chemistry of rivers and the oceans; hydrothermal systems and ore deposition.

[GEOL 458 Volcanology
Spring. 3 credits. Corequisite: GEOL 356 or equivalent. Offered alternate years. Not offered 1999–2000. R. W. Kay and W. M. White.
Causes of volcanism, melting in the Earth, and the origin of magmas. Physical volcanology, nature and types of volcanic eruptions and associated deposits, eruption mechanisms. Volcanic plumbing systems, magma chamber processes, evolution of magma. Volcanism and impact phenomena in the Solar System. Volcanic hazard assessment and volcano monitoring. Ore deposits associated with volcanism.]

[GEOL 462 Marine Ecological Processes (also BIOES 462)
Spring. 3 credits. Limited to 75 students. Prerequisite: BIOES 261. Offered alternate years. Not offered 1999–2000. Lecs and disc, M W F 10:10. C. D. Harvell, C. H. Greene.
Lectures and discussion focus on current research in broad areas of marine ecology with an emphasis on processes unique to marine systems. A synthetic treatment of multiple levels of organization in marine systems including organismal, population, community, ecosystems, and evolutionary biology. Examples are drawn from all types of marine habitats, including polar seas, temperate coastal waters, and tropical coral reefs.]

GEOL 475 Special Topics in Oceanography
Spring, summer. 2–5 var. credits. Prerequisites: GEOL 104 or BIO ES 154, and permission of instructor. C. H. Greene.
Undergraduate instruction and participation in advanced areas of oceanographic research. Topics will change from term to term. Contact instructor for further information.

[GEOL 476 Sedimentary Basins: Tectonics and Mechanics
Fall. 3 credits. Prerequisite: GEOL 375 or permission of instructor. Not offered 1999–2000. T. E. Jordan.
Subsidence of sedimentary basins from the point of view of plate tectonics and geomechanics. Interactions of subsidence, sediment supply, and environmental characteristics in development of stratigraphic sequences. Stratigraphic characteristics of active-margin, passive-margin, and cratonic basins. Geophysical and stratigraphic modeling; sequence stratigraphy. Modern and ancient examples.]

GEOL 478 Advanced Stratigraphy
Fall. 3 credits. Prerequisite: GEOL 375 or permission of instructor. Offered alternate years. TBA. T. E. Jordan.
Modern improvements on traditional methods of study of ages and of genetic relations among sedimentary rocks, emphasizing 3-D relationships. Techniques and applications of sequence stratigraphy at scales ranging from beds to entire basins. Physical correlation, dating techniques, and time resolution in sedimentary rocks. Physical controls on the stratigraphic record. Numerical modeling.

GEOL 479 Paleobiology (also BIOES 479)
Fall. 3 credits. Prerequisites: one year of introductory biology for majors and either BIOES 274, 373, GEOL 375, or permission of instructor. W. Allmon.
A survey of the major groups of organisms and their evolutionary histories. Intended to fill out the biological backgrounds of geology students and the geological backgrounds of biology students concerning the nature and significance of the fossil record for their respective studies.

GEOL 481 Senior Survey of Earth Systems
Fall. 3 credits. Limited to seniors majoring in geological sciences. J. M. Bird.
Survey course that integrates undergraduate course work, intended to enhance overall understanding of geological sciences. Emphasis on current models of earth's dynamic systems (e.g., global climate change; mantle evolution). Guest lecturers; synthesis and review literature; scientific literature readings; discussions; student presentations.

GEOL 491–492 Undergraduate Research
Fall, spring. 1 to 4 credits. Staff. (B. L. Isacks and R. W. Kay, coordinators).
Introduction to the techniques and philosophy of research in the earth sciences and an opportunity for undergraduates to participate in current staff research projects. Topics chosen in consultation with, and guided by, a staff member. A short written report is required, and outstanding projects are prepared for publication.

GEOL 500 Design Project in Geohydrology
Fall, spring. 3–12 credits. An alternative to an industrial project for M.Eng. students choosing the geohydrology option. May continue over two or more semesters. L. M. Cathles.
The project may address one of many aspects of groundwater flow and contamination, and must involve a significant geological component and lead to concrete recommendations or conclusions of an engineering nature. Results are presented orally and in a professional report.

GEOL 502 Case Histories in Groundwater Analysis
Spring. 4 credits. L. M. Cathles.
Groundwater flow in a specific area, such as a proposed nuclear-waste disposal site, analyzed in depth. Geological and resource data on the area are presented early in the course. Then the material is analyzed by students working as an engineering analysis team. Each student makes a weekly progress report and writes part of a final report. Results are presented in a half-day seminar at end of term.

GEOL 622 Advanced Structural Geology I
Spring. 3 credits. Prerequisites: GEOL 326 and permission of instructor. Offered alternate years. R. W. Allmendinger.
Stress-strain theory and application. Advanced techniques of structural analysis. Topics include finite and incremental strain measurement; microstructure, preferred orientation, and TEM analysis; pressure solution and cleavage development; and experimental deformation. Applications to deformation of unconsolidated sediments, brittle and brittle-ductile deformation of supracrustal strata, and ductile deformation of high-grade metamorphic rocks. Kinematic analysis of shear zones and folds in these regimes.

[GEOL 624 Advanced Structural Geology II
Spring. 3 credits. Prerequisites: GEOL 326 and permission of instructor. Offered alternate years. Not offered 1999–2000. R. W. Allmendinger.
Geometry, kinematics, and mechanics of structural provinces. Concentration on thrust belts, rift provinces, or strike-slip provinces. Techniques of balanced cross sections.]

GEOL 628 Geology of Orogenic Belts
Spring. 3 credits. Prerequisite: permission of instructor. J. M. Bird.
A seminar course in which students study specific geologic topics of an orogenic belt selected for study during the term. The course is intended to complement GEOL 681.

GEOL 634 Advanced Geophysics I: Fractals and Chaos in Geology and Geophysics
Spring. 3 credits. Prerequisite: GEOL 388 or permission of instructor. Offered alternate years. D. L. Turcotte.
Definitions of fractal sets and statistical fractals, scale invariance, self-affine fractals, multifractals, applications to fragmentation, seismicity and tectonics, petroleum distribution and reserves, ore grade and tonnage, drainage networks and landforms, and floods and droughts. Definitions of chaos and self-organized criticality, renormalization groups, diffusion limited aggregation and percolation clusters, wavelet transforms, applications to mantle convection, the earth's dynamo, and distributed seismicity.

[GEOL 636 Advanced Geophysics II: Quantitative Geodynamics
Spring. 3 credits. Prerequisite: GEOL 388 or permission of instructor. Offered alternate years. Not offered 1999–2000. D. L. Turcotte.
Stress and strain in the earth, elasticity and flexure, heat transfer, gravity, fluid mechanics, rock rheology, faulting, chemical geodynamics, flow in porous media.]

GEOL 651 Analysis of Biogeochemical Systems
Spring. 3 credits. Prerequisite: MATH 293 or permission of instructor. Offered alternate years. L. A. Derry.
Dynamics of biogeochemical systems. Kinetic treatment of biogeochemical cycles. Box models, residence time, response time. Analytical and numerical solutions of model systems. Eigen-analysis of linear systems. Feedback and nonlinear cases, problems of uncertainties in natural systems. Modeling software such as Stella II and Matlab; applications to current research of participants or from recent literature.

GEOL 656 Isotope Geochemistry
Spring. 3 credits. Open to undergraduates. Prerequisite: GEOL 455 or permission of instructor. Offered alternate years. W. M. White.
Nucleosynthetic processes and the isotopic abundances of the elements. Geochronology and cosmochronology using radioactive decay schemes, including U-Pb, Rb-Sr, Sm-Nd, K-Ar, U-series isotopes, and cosmogenic isotopes such as ^{14}C and ^{36}Cl. Use of radiogenic and stable isotopes in petrology and their application to study of the evolution of the crust and mantle. Isotopic evidence regarding the formation of the Earth and the Solar System. Stable isotopes and their use in geothermometry, ore petrogenesis, paleontology, and the global climate system.

GEOL 681 Geotectonics
Fall. 3 credits. Prerequisite: permission of instructor. J. M. Bird.
Theories of orogeny; ocean and continent evolution. Kinematics of lithosphere plates. Rock-time assemblages of modern oceans and continental margins, and analogs in ancient orogenic belts. Time-space reconstructions of specific regions. Problems of dynamic mechanisms—corollaries and evidence from crustal features.

GEOL 695 Computer Methods in Geological Sciences
Fall, spring. 3 credits. L. Brown, B. L. Isacks.
Independent research projects using state-of-the-art computational resources in the Department of Geological Sciences. Possibilities include: image and seismic processing, seismic and geomechanical modeling, GIS, use of interpretational workstations for 3D seismics and satellite imagery; modeling fluid flow through complex media.

GEOL 700–799 Seminars and Special Work
Fall, spring. 1–3 credits. Prerequisite: permission of instructor. Staff.
Advanced work on original investigations in geological sciences. Topics change from term to term. Contact appropriate professor for more information.

GEOL 722 Advanced Topics in Structural Geology
R. W. Allmendinger.

GEOL 731 Plate Tectonics and Geology
J. M. Bird.

GEOL 733 Fractals and Chaos—Independent Studies
D. L. Turcotte.

GEOL 751 Petrology and Geochemistry
S. Mahlburg Kay, R. W. Kay.

GEOL 753 Advanced Topics in Mineral Physics
W. A. Bassett.

GEOL 755 Advanced Topics in Petrology and Tectonics
J. M. Bird, W. A. Bassett.

GEOL 757 Current Research in Petrology
S. Mahlburg Kay, R. W. Kay.

GEOL 762 Advanced Topics in Petroleum Exploration
Fall. W. B. Travers.

GEOL 771 Advanced Topics in Sedimentology and Stratigraphy
T. E. Jordan.

GEOL 773 Paleobiology
J. L. Cisne.

GEOL 775 Advanced Topics in Oceanography
Spring. C. H. Green.

GEOL 780 Earthquake Record Reading
Fall. M. Barazangi.

GEOL 781 Geophysics, Exploration Seismology
L. D. Brown.

GEOL 783 Advanced Topics in Geophysics
B. L. Isacks.

GEOL 789 Lithospheric Seismology (COCORP Seminar)
L. D. Brown.

GEOL 793 Andes-Himalaya Seminar
S. Mahlburg Kay, R. W. Allmendinger, B. L. Isacks, T. E. Jordan.

GEOL 795 Low Temperature Geochemistry
L. A. Derry.

GEOL 796 Geochemistry of the Solid Earth
W. M. White.

GEOL 797 Fluid-Rock Interactions
L. M. Cathles.

GEOL 799 Soil, Water, and Geology Seminar
L. M. Cathles, T. S. Steenhuis.

GERMAN STUDIES

L. Adelson, chair; P. Gilgen, director of undergraduate studies; A. Schwarz, director of graduate studies; D. Bathrick, M. Briggs (Dutch), B. Buettner, H. Deinert, I. Ezergailis, A. Groos, P. U. Hohendahl, G. Lischke, B. Martin, L. Trancik (Swedish), G. Valk, G. Waite

The Department of German Studies offers students a wide variety of opportunities to explore the literature and culture of German-speaking countries, whether as part of their general education, a major in German Studies or a double major involving another discipline, or as preparation for graduate school or an international professional career. Courses are offered in English translation as well as in German; subjects range from medieval to contemporary literature and from film and visual culture to intellectual history, music, history of psychology, and women's studies.

The department's offerings in English begin with a series of First-Year Writing Seminars introducing various aspects of German literature (the fairy-tale and romantic narratives, twentieth-century writers such as Kafka, Hesse, Mann, Brecht), issues in mass culture and modernity, problems of German national identity/ies, and cinema and society. A variety of courses in English translation are also offered on the 300- and 400-level. They explore such topics as the Faust legend, aesthetics from Kant to Heidegger, Freud and his legacy, opera from Mozart to Strauss, the German novel, political theory and cinema, the Frankfurt School, and feminist theory. It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

Students wishing to begin German language at Cornell enroll in GERST 121–122. Those successfully completing this sequence and those placing into the 200-level may pursue further language study or begin with the literature and cultural studies tracks in German Studies. The beginning sequence of 200-level courses in German Studies, with readings and discussion in German, is designed to provide further grounding in the language as well as introduce German literature and cultural studies. More advanced courses introduce majors and other qualified students to a broad variety of literary and cultural topics. (Beginning in spring 1998, GERST 201 and GERLA 203 were replaced by GERST or GERLA 200.)

Sequence of courses

First level: German 121–122; after completion, placement into German 123 or 200, 205

Second level: German 200, 202, 204, 205–206.

Third level: German 301, 302, 303–304, 306, 307.

Further 300- and 400-level literature and culture courses.

Advanced Standing

Students with an AP score of 4 or better are automatically granted three credits in German. Students with an AP score of 4 or better, an LPG score of 65 or higher, or a SAT II score of 680 or higher must take the CASE examination for placement in courses above GERST 200. Students coming to Cornell with advanced standing in German and/or another subject are encouraged to consider a double major and to discuss the options with the director of undergraduate studies as early as possible.

The Majors

The department offers two options for the major: German literature/culture and German area studies, the latter a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines. For both majors, there is a wide variety of courses co-sponsored with other departments (Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women's Studies).

The department encourages double majors and makes every effort to accommodate prospective majors with a late start in German. Students interested in a major should consult the director of undergraduate studies, Peter Gilgen, 180 Goldwin Smith Hall.

German (Literature/Culture)

Although the emphasis of this track is on literature, majors may also pursue individual interests in courses on film and visual culture, theater and performing arts, music, intellectual and political history, and women's studies that have a substantial German component. Please consult with the director of undergraduate studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERST or GERLA 204.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, GERST or GERLA 303, 305) or the equivalent.
2. Complete six courses in German Studies at the 300 level or above. One of these must be the Senior Seminar (GERST 410).

German Area Studies

Students select courses from the Department of German Studies as well as courses with a substantial German component from other departments, such as Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women's Studies.

Admission: By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERST or GERLA 204.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, GERST or GERLA 303, 305) or the equivalent.
2. Complete six courses with a substantial German component at the 300 level or above. Three of these must be in German Studies, including the Senior Seminar (GERST 410).
3. Select a committee of one or more faculty advisors to help formulate a coherent program of study. One of the advisors must be from the Department of German Studies.

Study Abroad

The department encourages undergraduate majors to consider studying abroad for 1–2 semesters, normally during the junior year, as regular students at a German-speaking university. Interested students should consult Bonnie Buettner or Gunhild Lischke as early as possible.

Honors

Eligibility: A student wishing to receive honors in German Studies must have a GPA of 3.5 in all courses relevant to the major.

Committee: Candidates for honors form an advisory committee consisting of an advisor from German Studies and at least one additional faculty member.

Honors essay: During the first term of their senior year, students determine the focus of their honors essay through an appropriate course, GERST 453, under the direction of their advisors. During the second term they complete an honors essay, GERST 454, which will be evaluated by the committee.

Determination of honors: An oral examination concludes the process. Honors will be determined by the essay, the exam, and grades in the major.

Fees. Depending on the course, a small fee may be charged for film rental or photocopied texts for course work.

Freshman Writing Seminars

See Freshman Seminar booklet for course times and descriptions.

GERST 109 From Fairy Tales to the Uncanny: Exploring the Romantic Consciousness
Fall or spring. 3 credits. B. Buettner, P. Gilgen, and staff.

GERST 111 Workshop in German Studies
Fall. 3 credits. H. Deinert.

GERST 130 Metropolis, Modernity, and Mass Culture: The Roaring Twenties, German-style
Fall or spring. 3 credits. B. Buettner, P. Gilgen and staff.

GERST 150 Imagining Germany/s
Fall or spring. 3 credits. B. Buettner, P. Gilgen and staff.

GERST 151 Kafka, Hesse, Brecht, and Mann
Spring. 3 credits. H. Deinert.

GERST 170 Marx, Nietzsche, Freud
Fall or spring. 3 credits. G. Waite and staff.

[GERST 175 Cinema and Society
Not offered 1999–2000.]

GERST 180 Towards the Net.Citizen: Writing and New Communication Technologies
Fall. 3 credits. B. Buettner and staff.

Courses Offered in German

All courses are now designated GERST. Courses in earlier years were designated either GERLA or GERST. Course numbers remain the same.

GERST 121 Elementary German I
Fall or spring. 4 credits. Intended for students with no prior experience in German or with a language placement test (LPG) score below 37, or an SAT II score below 370. G. Lischke and staff.
Elementary German I is designed to familiarize students with basic vocabulary and syntax so they can communicate about everyday life. Videos and audio tapes facilitate listening comprehension and insight into German culture. Daily practice in section provides the opportunity to learn vocabulary and syntax.

GERST 122 Elementary German II
Fall or spring. 4 credits. Prerequisite: German 121, LPG score 37–44, or SAT II 370–450. Students who obtain an LPG score of 56 or above after German 122 attain qualification and may enter a 200-level course; otherwise, successful completion of German 123 is required for qualification. G. Lischke and staff.
Elementary German II, the second semester of elementary German, presupposes that students have not yet learned narrative past, subjunctive, passive or dependent word order. Topics include travel, leisure activities, work and the media, including TV, newspaper, film and fiction. There is also discussion of a timeline of key events in Germany from 1917–1989.

GERST 123 Continuing German
Fall or spring. 4 credits. Limited to students who have previously studied German and have an LPG score 45–55 or SAT II 460–570. Satisfactory completion of German 123 fulfills the language qualification requirement. Staff.
German 123 is a course on the beginning intermediate level. Students will further develop their language proficiency by communicating about broad cultural topics and themes. To provide each student with a maximum opportunity for speaking in German and getting as much help and feedback as possible, much of the work in class will be done in pairs and/or small groups.

GERST 200 Contemporary Germany
Fall and spring. 3 credits. Prerequisite: qualification in German (LPG score 56–64 or SAT II score 580–670 or GERST or GERLA 123 or equivalent or permission of instructor). Fulfills the Arts and Sciences language proficiency requirement and can be used in partial fulfillment of the Arts and Sciences humanities distribution requirement. Staff.
An intermediate language course designed to provide an introduction to modern German culture and literature while developing language proficiency. Students examine issues that shape German society, literature, and thought as reflected in short stories, poems, socio-cultural and political texts, video, and audio materials. Selected themes include "Beyond the Wall: German Unification," "Germany: a Multi-cultural Society?", "Speaking and Identity," and "Musikszene." Oral and written work and individual and group presentations emphasize accurate and idiomatic expression. Successful completion of the course enables students to continue with more advanced courses in language, literature and culture.

GERST 202 Exploring German Literature
Fall or spring. 3 credits. Prerequisite: GERST or GERLA 200, GERST or GERLA 203 or equivalent or permission of instructor. Taught in German. Can be used in partial fulfillment of the humanities distribution requirement. B. Buettner, P. Gilgen, and staff.
In this intermediate course, we will read and discuss a number of works belonging to different literary genres by major German-speaking authors, such as Kafka, Walser, Brecht, Mann, Frisch, Dürrenmatt, Bachmann, and others. We will explore questions of subjectivity and identity in modern society, of human existence as existence in language, and of the representation of history in literary texts. Activities and assignments in this course will focus on the development of reading competency in different literary genres, the use of accurate and idiomatic expressions, the expansion of students' German vocabulary, and the systematic review of select topics in German grammar.

GERST 204 Intermediate Conversation and Composition
Fall or spring. 3 credits. Prerequisite: GERST or GERLA 200, GERST or GERLA 203 or GERST 201, or GERST or GERLA 205 or placement by examination (placement score and CASE). Staff.
Emphasis on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Material consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include: awareness of culture, dependence of meaning on perspective, interviews with native German speakers, German news broadcasts, reading German newspapers on the internet.

GERST 205 Business German I
Fall. 3 credits. Prerequisite: qualification in German (German 123 or an LPG score of 56–64 or an SAT II score between 580–670). Successful completion of GERST or GERLA 205 fulfills the language proficiency requirement. G. Lischke.
Learn German and understand German business culture at the same time. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to be effective in a work environment, Germany's role within the European Union, the dual education system, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage and a Business German textbook.

GERST 206 Business German II
Spring. 3 credits. Prerequisite: proficiency in German (GERST or GERLA 205, GERST or GERLA 200, GERST or GERLA 203, GERST 201 or placement by examination (placement score and CASE)). G. Lischke.
This course is a continuation of GERST or GERLA 205; however students without previous knowledge of Business German are welcome. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to be effective in a work environment, Germany's role within the European Union, the role of the German Bundesbank, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage and a Business German textbook. At the end of the course, the external Goethe Institut exam "Deutsch für den Beruf" will be offered.

[GERST 220 Was ist deutsch?
Not offered 1999–2000. B. Buettner.]

GERST 301 Scenes of the Crime: German Mystery and Detective Fiction
Fall. 4 credits. Prerequisite: GERST 202, or 220, or GERST or GERLA 204, or equivalent or permission of instructor. Taught in German. P. Gilgen.
An exploration of German crime, detective, and mystery writing in texts ranging from the eighteenth century to contemporary fiction. Authors to be studied may include: Kleist, E. T. A. Hoffmann, Kafka, Dürrenmatt, Handke, Schatten, Süskind. This course aims at improving proficiency in aural and reading comprehension, as well as speaking and writing skills, with emphasis on vocabulary expansion, advanced grammar review, and stylistic development. Recommended for students interested in a combined introduction to literature and high-level language training. This course may be counted toward the requirement for 300-level language work in the major.

GERST 302 Youth Culture: Adolescence in German Fiction
Spring. 4 credits. Prerequisite: GERST 202 or 220 or GERST or GERLA 204 and GERST 301 or equivalent or permission of instructor. Taught in German. A. Schwarz.
Examination of literary and cultural approaches to childhood, youth and adolescence in texts ranging from the late 18th century to the present. Authors include: Hoffmann, Keller, Goethe, Mann, Walser, Musil, Zweig, Handke, Kaschnitz. Aimed at further improving students' proficiency in aural and reading comprehension, as well as in speaking and composition skills. Focus on high-level grammar review, stylistic and expository refinement and vocabulary expansion. Recommended for students wishing to combine intensive language training with reading and discussion of short fiction.

GERST 303 Advanced Conversation and Composition
Fall or spring. 4 credits. Prerequisite: GERST or GERLA 204, GERST 202, GERST 220, or placement by examination (CASE). Staff.
Further enrichment of vocabulary and emphasis on improving students' oral and written style. Study of the language of different text types, including journalistic and literary texts. Discussion of current events provides insight into the historical, political and social-issues of German-speaking countries. Individual and group projects provide an opportunity for each student to pursue his/her field of interest and share it with the class.

[GERST 304 Advanced Conversation and Composition
Spring. 4 credits. Prerequisite: German 303 or placement by examination (CASE). Not offered 1999–2000.]

[GERST 306 Zeitungsdeutsch
Spring. 4 credits. Not offered 1999–2000. Staff.]

GERST 307 Modern Germany
Fall. 4 credits. Prerequisite: GERST 202 or GERST or GERLA 204 or GERST 220 or equivalent or permission of instructor. Taught in German. L. Adelson.
Introduction to the history of postwar Germany, the development and unification of the two Germanys, and their societies. The

emphasis is on cultural and social institutions as well as political and intellectual debates. Focal topics include responses to the Nazi past, Germany and Europe, protest movements, migration patterns, women, mass media, and popular culture. We will consider the changes taking place in Germany today in light of the recent past. Some films will also be shown.

[GERST 353 Kleist #
Not offered 1999–2000.]

[GERST 354 Schiller #
Not offered 1999–2000.]

[GERST 357 Major Works of Goethe (1749–1832) #
Not offered 1999–2000.]

Courses offered in English

It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

[GERST 237 The Germanic Languages (also Linguistics 237)
Fall. 4 credits. Not offered 1999–2000. W. Harbert, M. Diesing.]

GERST 318 "1800" #
Spring. 4 credits. Taught in English. P. Gilgen.
This course examines the period from 1770 to 1830, a period of decisive social and cultural change in Germany, which led to the emergence of nationalism, historicism, classicism, romanticism, the invention of "literature," as well as the development of the systems of Kantian and post-Kantian philosophy. The course will include a selection of texts from different genres and other artifacts (opera, the fine arts) and will give a survey of the cultural and intellectual developments during the period. Readings may include Lessing, Kant, Herder, Goethe, Schiller, Fichte, Hölderlin, Mozart, Novalis, F. Schlegel, A. W. Schlegel, Kleist, Beethoven and Hegel as well as other authors and artists. While most readings will consist of shorter selections, a number of longer works will also be read. The goals of this course are to examine (the emergence and concept of) literature and its social function, and to introduce the students to the vibrant debates and main events of German cultural and intellectual history around 1800.

[GERST 320 Postwar German Novel
Not offered 1999–2000.]

GERST 330 Political Theory and Cinema (also COM L 330, GOVT 370 and THETR 329)
Spring. 4 credits. G. Waite.
This course provides an introduction to some fundamentals of current film analysis and political theory and their relationship to one another. Our investigation has two main aspects. On the one hand, we will be interested in the work of filmmakers who have been particularly concerned with reshaping ideas about politics in the cinematographic medium. On the other, we will attempt to develop a way of reading political theory using techniques borrowed from cinema and vice versa—thus forging between these two disciplines productive analogies that are not necessarily based on influence. We will study not only Hollywood but also alternative and foreign films; similarly, we will find political theory in obscure places, as well as more obvious ones. Particular focus on post-Marxist, psychoanalytic, postmodernist, and postcolonial topics and approaches. Filmmakers/theoreticians include: David Cronenberg, Gilles Deleuze, Alfred Hitchcock, Fredric Jameson, Pier Paolo Pasolini, Gillo Pontecorvo, Ridley Scott, Kidlat Tahimik, Slavoj Zizek.

GERST 340 Metropolis: Urban Sites in Literature
Fall. 4 credits. Readings and discussions in English (texts will be available in German). A. Schwarz.
An interdisciplinary study of metropolitan life focusing on Berlin and Vienna (1890–1999) as major centers of artistic modernity and historical change. Topics of investigation include: the city as both the product and source of artistic production; the interrelationship between literary concepts of montage, collage, and their architectural counterparts (Bauhaus et al.); the tension between private and public spaces, and the status of crowds, anonymity, and the flaneur. We will also analyze the rise of an avant-garde movement in an urban environment. Focus on short fiction, architectural theory, sites and art history, film, political and literary manifestos. Authors include: Fontane, Broch, Benn, Benjamin, Döblin, Simmel, Johnson, Rilke, Kohlhaas, Vidler.

[GERST 374 Opera and Culture (also MUSIC 374 AND ITALL 374)
Not offered 1999–2000.]

[GERST 378 German Aesthetic Theory: From Kant to Hegel #
Not offered 1999–2000.]

[GERST 383 German Literature of the Twentieth Century
Not offered 1999–2000.]

GERST 395 Rilke: The Duino Elegies and Sonnets to Orpheus
Spring. 4 credits. In English translation. We will use a bilingual edition for the benefit of those who know German. H. Deinert.
We will discuss the ten elegies and fifty-five sonnets both as documents of their time and in the context of intellectual history. In 1922, the same year that saw the publication of Joyce's "Ulysses", Eliot's "Waste Land", and Valéry's "Charmes", Rilke's "Duino Elegies", more than ten years in the making, and "Sonnets to Orpheus" were finally completed in a burst of creative energy that astonished even the poet. One of Germany's greatest lyrical poets along with Klopstock, Goethe and Hölderlin, Rilke attempts nothing less than the creation of a modern myth, secular religiosity in which the relationship between God and humans is replaced by one between man and Angel, the latter, like Nietzsche's Superman, but a projection of human possibilities and aspirations. A member of a generation still numbed by the destruction and social and political upheaval wrought by World War I, Rilke defines the role of humans in terms of preservation and conservation, of exuberant service to what is transitory, be they natural or cultural phenomena: "transient, they look to us for deliverance, us, the most transient of all" (IX. Elegy).

[GERST 396 German Film (also COM L 396 and THETR 396)
Not offered 1999–2000.]

Advanced Undergraduate and Graduate Courses

[GERST 403 The Afro-Europeans

[GERST 409 Spinoza and Virtual Ideology
Not offered 1999–2000.]

GERST 410 Senior Seminar #
Fall. 4 credits. Open to all students with an adequate command of German. Prerequisite: any German course at the 300 level or equivalent or permission of instructor. Texts and seminar discourse in German. H. Deinert.
Topic: Kleist. The Prussian aristocrat Heinrich von Kleist, who has been compared by some to Aeschylus and Shakespeare, committed suicide in 1811 at the age of thirty-four because "I have run out of options." We will examine his dramas and prose writings against the background of revolutionary turmoil in Europe and the Americas and the Wars of National Liberation against Napoleon.

Not offered 1999–2000.]

GERST 617 Literature and Affect (also COM L 625)
Fall. 4 credits. Discussion and texts in English (German texts will be available). A. Schwarz.
By focusing on two predominant affects within traditional and contemporary thought—melancholy and anxiety—the goal of this class is to investigate the relationship between moods, dispositions, affects, and literary representation. In order to discuss the impact of melancholy and anxiety on processes of communication and signification, particular attention will be paid to their relation to philosophical and psychoanalytic models of understanding; their relation to rhetorical figures as well as to metaphors of spatiality and the body (questions of spatial and "mental" orientation, states of suspension, corporeal integrity). Our readings will be directed by the following concerns: are melancholy and anxiety mental disorders, philosophical concepts, natural dispositions, or literary genres? Focus on the relationship of affects to artistic production and the constitution of subjectivity. Authors include: Hegel, Benjamin, Kierkegaard, Heidegger, Kristeva, Freud, Butler, Abraham, Torok, Nietzsche, Goethe, Hölderlin, Büchner, Rilke, Benn, Walser.

GERST 618 "The Science of the Experience of Consciousness": Hegel's *Phenomenology of Spirit* (and Beyond)
Fall. 4 credits. P. Gilgen.
Centered on a close reading of the *Phenomenology of Spirit*, this course examines its problematic position vis-à-vis Hegel's subsequent system of philosophy. Intended as a ladder that would lead up to philosophical knowledge, the *Phenomenology* is and, at the same time, is not (yet) philosophy. This undecided position of the text is reflected in the text, and it poses the question of the possibility, the status, and the options of philosophy after the *Phenomenology* (which then leads to the question whether such philosophy would or would not coincide with philosophy after Hegel). The examination of three prominent constellations in the reception history of the *Phenomenology* will, on the one hand, address contemporary theory's vast debt to Hegel (primarily to the *Phenomenology*) and will, on the other hand, lead us back to the primary text by forcing repeated reexaminations of its philosophical arguments as well as its textual structure. We will begin this examination by tracing the aftermath of the *Phenomenology* in post-Hegelian German thought (especially in the works of "Left-Hegelians" such as Feuerbach and Marx, among others). In a second stage, we will focus on the intense reception of Hegel—for the most part the Hegel of the *Phenomenology*—in France during the years immediately preceding and following World War II, especially Jean Hyppolite's seminal commentary and Alexander Kojeve's influential lectures, published as *Introduction to the Reading of Hegel*. Finally, the presence of the *Phenomenology* in contemporary theory will be addressed in readings that may include Francis Fukuyama, Jacques Derrida, Judith Butler, John Sallis, and Donald Phillip Verene.

[GERST 621 Issues in Gay and Lesbian Studies (also WOMNS 621)
Not offered 1999–2000.]

[GERST 624 Seminar in Medieval German Literature II
Not offered 1999–2000.]

GERST 631–632 Academic German I and II
631, fall; 632, spring. 3 credits each term. Limited to graduate students. Prerequisite: for German 632, German 631 or equivalent. Staff.
Intended primarily for beginners with little or no previous German knowledge. Emphasis in 631 on acquiring basic German reading skills. Emphasis in 632 on development of the specialized vocabulary of student's field of study.

GERST 634 German Romanticism
Fall. 4 credits. Most readings are in German; discussion and papers are in English. Students from other disciplines are welcome. Anchor course. G. Waite.
Structured introduction to German literature, philosophy, criticism, and painting from c. 1789 to c. 1830 in the context of European developments. The larger social context requires readdressing aesthetic and poetic questions to a romantic "school" (Heine), a "German ideology" (Marx and Engels), a "Romantic ideology" (McGann), "Art and the Industrial Revolution" (Klingender), and "the flight from reality of the artistic period" (Lukács). Crucial and related issues include gender and political economy; the Spinoza debate; the trope of the automaton; and understanding critically the reception of this ostensible object by subsequent history: what is the ulterior motive behind literary periodization and (literary) history?

[GERST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution
Not offered 1999–2000.]

[GERST 637 19th-Century Fiction: The Realist Project
Not offered 1999–2000.]

Not offered 1999–2000.]

GERST 660 Visual Ideology (also COM L 660 and THETR 660)
Spring. 4 credits. G. Waite.
Some of the most powerful approaches to visual practices have come from outside or from the peripheries of the institution of art history and criticism. This seminar will analyze the interactions between academically sanctioned disciplines (such as iconography and connoisseurship) and innovations coming from philosophy, psychoanalysis, historiography, sociology, literary theory, mass media criticism, feminism, and Marxism. We will try especially to develop: (1) a general theory of "visual ideology" (the gender, social, racial, and class determinations on the production, consumption, and appropriation of visual artifacts under modern and postmodern conditions); and (2) contemporary theoretical practices that articulate these determinations. Examples will be drawn from the history of oil painting, architecture, city planning, photography, film and other mass media.

Not offered 1999–2000.]

GERST 696 Conceptualizing Cultural Contact (also COM L 696 and NES 696)
Spring. 4 credits. Prerequisite: reading knowledge of German and English. L. Adelson.
Since the West German and Turkish governments signed a labor recruitment agreement in 1961, the Turkish population in the Federal Republic has become the largest group of "foreigners" to reside permanently in Germany. While Turks have borne the brunt of xenophobic hostility in a country that may soon grant them citizenship, a lesser known fact is that Turkish-German authors of several generations have been producing German literature for over two decades. This includes Turkish emigrés who publish in German translation as well as Turkish-German writers whose literary language of choice is German. Departing from the sociological model that usually interprets this minority literature as a plea for German compassion or intercultural dialogue, this course juxtaposes prose fiction about Turkish-German contact and critical theories of difference with two primary goals in mind: 1) Students will be introduced to representative examples of Turkish-German literature, a cultural phenomenon whose scope and significance have grown, not lessened, over time. 2) Various modes of conceptualizing cultural contact within a given country will be explored and compared, methodologically in relation to each other and analytically with regard to the Turkish-German field. Exemplary rather than comprehensive readings structure the syllabus, but theories discussed will include those that address situational marginality, migrant literature, borderland cultures, postcolonial hybridity, translating alterity, and intercultural hermeneutics. Literary selections include works by Güney Dal, Aras Oren, Aysel Özakin, Emine Sevgi Ozdamar, Zafer Senocak, and Feridun Zaimoglu.

[GERST 699 German Film Theory (also COM L 699 and THETR 699)
Not offered 1999–2000.]

GERST 753–754 Tutorial in German Literature
Fall and spring. 1–4 credits per term. Prerequisite: permission of instructor.

Dutch

DUTCH 121–122 Elementary Dutch
121, fall or summer; 122, spring or summer. 4 credits each term. Prerequisite: permission of instructor. M. Briggs.
Intensive practice in listening, speaking, reading, and writing basic Dutch in meaningful contexts. The course also offers insight into Dutch language, culture, and society.

DUTCH 203 Intermediate Composition and Conversation
Fall. 3 credits. Prerequisite: qualification in Dutch or permission of instructor. M. Briggs.
Improved control of Dutch grammatical structures and vocabulary through guided conversation, compositions and reading, drawing on all Dutch-speaking cultures. Taught in Dutch.

DUTCH 204 Intermediate Composition and Conversation
Spring. 3 credits. Prerequisite: Dutch 203 or permission of instructor. M. Briggs.
This course aims to emphasize written and oral application of accurate, idiomatic Dutch. Reading of authentic material such as newspapers, literature, and history, with emphasis on the students' interests and specializations. Taught in Dutch.

DUTCH 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: proficiency in Dutch or permission of instructor. M. Briggs.
Individualized advanced Dutch studies. This course aims to provide students with individualized programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research. Literature history in support of all disciplines. Taught in Dutch.

Swedish

SWED 121–122 Elementary Swedish
121, fall; 122, spring. 4 credits each term. Prerequisite: for Swedish 122, Swedish 121 or equivalent. L. Trancik.
The aim of this course is to develop skills in listening, speaking, reading and writing within Sweden's cultural context. Work on the internet and interactive computer programs are used in these courses.

SWED 123 Continuing Swedish
Fall. 4 credits. Prerequisite: Swedish 122 or equivalent. L. Trancik.
Development of skills in spoken and written Swedish within Sweden's cultural context.

SWED 203 Intermediate Swedish
Spring. 3 credits. Prerequisite: Swedish 123 or permission of instructor. L. Trancik.
Intermediate to advanced level instruction utilizing audio-visual material and text to enhance language comprehension.

SWED 204 Advanced Swedish
Fall. 3 credits. Prerequisite: Swedish 203 or permission of instructor. Taught in Swedish. L. Trancik.
Emphasis on improving oral and written expression of Swedish, including vocabulary, readings in contemporary prose, treatment of specific problems in grammar, and presentation of videos and films.

SWED 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Trancik.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

GOVERNMENT

I. Kramnick, chair; B. R. O'G. Anderson, R. Bensel, M. G. Bernal, S. Buck-Morss, R. Bullock, V. Bunce, J. Cowden, M. Evangelista, R. Herring, N. Hirschmann, M. Katzenstein, P. Katzenstein, E. W. Kelley, J. Kirshner, T. J. Lowi, R. McDermott, W. Mebane, K. O'Neill, J. Pontusson, J. Rabkin, E. Sanders, H. Schamis, M. Shefter, V. Shue, A. M. Smith, S. G. Tarrow, N. T. Uphoff, C. Way

Government is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on applications. Some engage in the close reading of great texts of political philosophy, while others analyze the behavior of power-wielders and publics in this and other societies. Government is divided into four subfields: U. S. politics, comparative politics (other nations), political theory (philosophy), and international relations (transactions between nations).

To accommodate new courses or course changes, a supplementary announcement is prepared by the department. Before enrolling in courses or registering each term, students are requested to consult the current supplement listing courses in government, available in 125 McGraw Hall.

The Major

To be admitted to the major, a student must pass two government courses.

To complete the major, a student must (1) pass two of the introductory government courses (Government 111, 131, 161, 181); (2) pass an additional course in one of the remaining subfields (American government, comparative government, political theory, or international relations). This course may be any course offered in the government department, including introductory courses, upper-level courses or seminars. Students are strongly advised to take at least one course in each of the four subfields; (3) accumulate an additional 28 credits of government course work at the 200-level or above; (4) complete at least one seminar-style course in government which may be applied toward the 28 credits. These courses include those numbered 400.XX to which students are admitted by application only; (5) accumulate 12 credits in upper-level courses in related fields (such as anthropology, economics, history, psychology, and sociology). Upper-level courses are usually courses numbered at the 300-level or above (200-level courses are not considered upper-level). Students should consult with their major adviser to choose appropriate courses. All choices of related courses must be approved by the major adviser, or the director of undergraduate studies; (6) all courses used to fulfill a government major must be passed with a letter grade.

To summarize, a total of 10 government courses and 3 additional courses (12 credits) of upper-level related courses are required to complete the major.

Cornell-in-Washington Program. Government majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Study Abroad in Geneva. French, history, and government majors, or other students with a commitment to international experience, may study abroad in Geneva, Switzerland. Geneva is an especially appropriate location for students with an interest in international affairs, as many international organizations maintain offices there, among them the United Nations, the Red Cross, the Headquarters of the World Health Organization, the International Labor Organization, the International Telecommunications Union, the World Intellectual Property Organization, the European Nuclear Research Center, and the Ecumenical Center at Grand-Saconnex. Cornell students enroll full-time in the University of Geneva and affiliated schools, including the Graduate School of International Studies (HEI) and the Development Studies Institute, where they take year-long courses, studying with Swiss and international students. They can choose classes in many subjects, including literature, economics and other social sciences, law, theology, psychology, education, architecture, physical education, and French language, civilization and history.

The University of Geneva offers four consecutive three-week language and civilization summer courses beginning in mid-July, which prepare students for the mandatory French exam given in early October. Cornell students must attend the last of these sessions, from mid-September to early October, but earlier sessions are recommended for students who need additional language preparation.

Interested students can participate in internships at international organizations, and qualified participants may be able to work under the direction of officials on research studies that are of mutual interest.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of French 204 or 213, or its equivalent in advanced credit or placement by the Cornell C.A.S.E. examination. Students should plan to study abroad for the entire academic year.

Students interested in the study abroad program in Geneva should contact the Cornell Abroad office (474 Uris) for further information.

European Studies Concentration. Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein, J. Pontusson, and Tarrow for advice on course selection and foreign study programs.

Model European Community Simulation. Undergraduates with an interest in the European Union, public affairs or debating may participate in an annual European Union simulation held, on an alternating basis, in April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the members states, to discuss issues and resolutions of currentconcern to the EU.

To prepare for the simulation, a two-credit course is offered by the Government department each year (Government 431 or Government 432). Participation in the simulation is open only to those who register for this course. Anyone interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255–7592.

International Relations Concentration. See the description under "Special Programs and Interdisciplinary Studies."

Honors. In their junior year, Government majors with a G.P.A. of 3.30 in all subjects may join the honors program, which involves a sequence of special courses in the junior and senior year. Application to the honors program will be made in the late spring of the sophomore year and application forms will be available in 125 McGraw Hall. The courses comprising the honors sequence (honors courses) are described below. Students may be admitted to the honors program in the junior or senior year only with the special permission of the Director of Undergraduate Studies.

Introductory Courses

Students registering for introductory courses should register for the lecture only. Sections will be assigned during the first week of class. Introductory courses are also offered during summer session.

GOVT 111 Introduction to American Government and Politics
Fall and summer. 3 credits. T. J. Lowi. An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

GOVT 131 Introduction to Comparative Government and Politics
Fall and summer. 3 credits. V. Bunce. This course provides a survey of the institutions, political processes, and policies of contemporary states. It focuses on the conditions for and workings of democracy. Looking at Western Europe, we will analyze institutional variations among liberal democracies, and their political implications. We will then probe the origins of democracy in

Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, we will explore the impetus behind and the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy will be related to problems of economic development, efficiency, and equality.

GOVT 161 Introduction to Political Philosophy #
Spring. 3 credits. N. Hirschmann.
A survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. An examination of the relevance of their ideas to contemporary politics.

GOVT 181 Introduction to International Relations
Spring and summer. 3 credits.
P. Katzenstein.
An introduction to the basic concepts and practice of international politics.

First-Year Writing Seminars

GOVT 100 Freshman Seminars
Fall, spring, or summer. 3 credits.
Seminars will be offered in fall, spring, and summer terms. Consult the listings for the Freshman Seminar Program in the section "Special Programs and Interdisciplinary Studies," the supplement issued by the department, and the Freshman Seminar booklet for course descriptions and instructors.

Major Seminars

GOVT 400 Major Seminars
Fall or spring. 4 credits.
These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given majors over nonmajors and seniors over juniors. Topics and instructors change each semester. To apply, students should pick up an application in 125 McGraw Hall during the course selection period the semester before the seminar is given.

The following courses are open to sophomores, juniors, and seniors without prerequisites unless otherwise indicated.

American Government and Institutions

Government 111 is recommended.

GOVT 302 Social Movements in American Politics (also American Studies 302)
Spring. 4 credits. E. Sanders.
From populism to environmentalism, social movements directed at reform of national policies and political structures have been an earmark of American politics. This course will begin with an examination of late nineteenth-century agrarian and labor movements and move through progressivism, a variety of 1930s upsurges, civil rights, and more or less contemporary environmental, consumer, feminist, and peace movements. The focus will be on the conditions that gave rise to these movements, their internal resources, and external alliances and their ultimate impact on the national state (as well as vice versa).

[GOVT 303 Introduction to American Political Parties
4 credits. Not offered 1999–2000.]

GOVT 304 Public Opinion and Political Participation
Fall. 4 credits. J. Cowden.
Government 304 is a survey course about the nature and impact of public opinion and mass political behavior. We will examine classic and contemporary scholarship on the following topics: the role of public opinion in democratic theory; the measurement of opinions; the political sophistication of the electorate; racial and political intolerance; political socialization; party identification and party systems; media effects; candidate preference; turnout and abstention; attitudes about distributive justice; and the intersection between public opinion and public policy.

[GOVT 305 Atomic Consequences: The Incorporation of Nuclear Weapons in Post-War America
4 credits. Not offered 1999–2000.]

GOVT 306 Latino Politics in the United States
Spring. 4 credits. P. Caban.
During the last two decades, the U.S. has undergone a dramatic demographic transition in which people of Latin American and Caribbean descent have emerged as the fastest growing racial/ethnic minority. At the local and state levels Latinos constitute a political force that has fundamentally reconfigured the public policy making process in certain regions of the country. Their growing electoral strength also promises to inject new issues and perspectives into national level politics. This course focuses on the emergence of Latino political identity and the complex forms of Latino political participation and engagement in the United States.

[GOVT 308 Science in the American Polity 1800–1960
3 credits. Not offered 1999–2000.]

[GOVT 309 Science in the American Polity
4 credits. Not offered 1999–2000.]

[GOVT 310 Power and Poverty in America
4 credits. Not offered 1999–2000.]

[GOVT 311 Urban Politics
4 credits. Not offered 1999–2000.]

GOVT 313 The Nature, Functions, and Limits of Law
Spring. 4 credits. Undergraduates only.
R. Hillman.
A general education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion.

[GOVT 316 The American Presidency (also American Studies 316)
4 credits. Not offered 1999–2000.]

GOVT 317 Campaigns and Elections
Fall. 4 credits. W. Mebane.
This course examines campaigns and elections, focusing primarily on national elections in the United States. Topics include the relationship between elections and the economy, the weakness of the American party system, voter turnout, individual voting decisions, negative campaigning, and the noncompetitiveness of congressional elections. We examine several theories that explain these phenomena, including in particular the theory of rational choice. Course requirements include one or two papers based on original analysis of election survey data.

GOVT 318 The American Congress
Spring. 4 credits. M. Shefter.
The role of Congress in the American political system. Topics to be discussed: the political setting within which Congress operates, the structure of Congress, the salient features of the legislative process, and recent congressional behavior in a number of policy areas.

GOVT 320 Public Opinion and Public Choice
Spring. 4 credits. Prerequisite: Government 111 or permission of the instructor.
W. Mebane.
A fundamental paradox in democracy is the fact that a government the people control will only rarely be a government that does what the people want. This is not to say that government NOT by the people is better (it's usually worse). This course explores this problem, contrasting the answers given by the concept of public opinion and the formal theory of social choice. We encounter the paradox in several American political institutions, including elections, legislatures, and bureaucracy.

[GOVT 324 Legal Reasoning and Legal Adaptation: A Comparison of American and Talmudic Law
4 credits. Not offered 1999–2000.]

GOVT 327 Civil Liberties in the United States
Spring. 4 credits. J. Rabkin.
An analysis of contemporary issues in civil liberties and civil rights, with emphasis on Supreme Court decisions. Cases are analyzed in terms of democratic theory and the social and political context in which they arose.

GOVT 328 Constitutional Politics: The United States Supreme Court
Fall. 4 credits. J. Rabkin.
The course investigates the role of the Supreme Court in American politics and government. It traces the historical development of constitutional doctrine and the institutional role the court has played in American politics.

GOVT 353 Feminism Movements and the State (also Women's Studies 353)
Fall. 4 credits. M. Katzenstein.
This course focuses on women's activism and the American state. The subject emphasis and format (lecture, sections, tutorials) of this course changes each year and is announced on the first day of class. Active class discussion and extensive writing will be encouraged whatever the particular format of this coming year's class organization.

Interested students should pre-register (in order that we may estimate possible class number), but final admission to the class is contingent on application to be completed at the first meeting of the class.

[GOVT 405 Government and the Economy (also GOVT 705)
4 credits. Not offered 1999–2000.]

[GOVT 406 Politics of Education (also GOVT 706)
4 credits. Not offered 1999–2000.]

GOVT 408 Politics of the American Civil War (also American Studies 430)
Fall. 4 credits. R. Bensel.
The Civil War, along with the Founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American political development. Arising out of intense ideological, cultural and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention will be paid to: (1) the political economy and culture of plantation slavery in the antebellum South; (2) the apparent inevitability of collision between the slave and free states and their respective societies; (3) the military, political, and economic strategies that determined, on both sides, the course and duration of the war; (4) the limits and possibilities of reform of southern society during Reconstruction; and (5) the impact of the Civil War on the subsequent development of the United States.

GOVT 409 Racial Prejudice and Political Intolerance
Spring. 4 credits. J. Cowden.
This course explores the nature, scope, and etiology of intolerance and its implications for the operation of politics in the United States. Readings will include many of the "classics" in political science, political psychology, psychoanalysis, and social psychology, dating from the 1930s to the present.

GOVT 412 American Political Parties and Elections
Spring. 4 credits. J. Cowden.
This seminar examines changes in the character of political parties and the behavior of the electorate. It also considers the changing relationship between political parties and elections, on the one hand, and other political processes and institutions, on the other.

GOVT 413/613 Finance, Federalism, and Politics
Spring. 4 credits. W. Mebane.
"All politics is local politics," some say. This course gives sustained attention to that proposition. We examine the dependencies which exist in the United States between political outcomes and local economies. Fiscal federalism, the consequences local taxing and spending have for economic growth, the pork barrel, and the effects local economic conditions have on elections are among the topics considered. Theoretical suggestions from economics and regional science are reviewed, along with research from political science. Students are also introduced to a number of recently organized data collections which offer chances for new, systematic research in this area.

GOVT 419 The Politics of Scandal (also GOVT 619)
Spring. 4 credits. M. Shefter, J. Rabkin.
This seminar will discuss the politics of "scandal" and "reform" in constitutional doctrine, American history, and recent experience.

[GOVT 427 The Politics of Environmental Protection in America
4 credits. Not offered 1999–2000.]

GOVT 428 Government and Public Policy: An Introduction to Analysis and Criticism
Fall. 4 credits. T. J. Lowi.
Government 428 concentrates on history and criticism of U.S. policies and the politics associated with them. Particular attention given to the origins and character of the regulatory state and the welfare state.

GOVT 429 Government and Public Policy: An Introduction to Analysis and Criticism
Spring. Open to undergraduates. 428 and consent of instructor are required for 429. T. J. Lowi.
Government 429 is an opportunity to pursue further the research begun in 428.

Comparative Government

Government 131 is recommended.

GOVT 218 Introduction to Korea (also ASIAN 218) @
Fall. 3 credits. J. J. Choi.
An interdisciplinary introduction to Korean history and culture, including geography, ethnography, language, literature, philosophy, religion, political economy, government, music, and art (sculpture, architecture, and painting), with an overview of Korean history from the Three Kingdoms Period to the present, focusing on the March 1, 1919, Independence Movement, the Korean War, the 1960 Student Revolution, the 1980 Kwangju Massacre, and other events.

[GOVT 251 The Politics of Economic Life
4 credits. Not offered 1999–2000.]

[GOVT 252 Contemporary Palestinian Society (also NES 298)
3 credits. Not offered 1999–2000.
See Near Eastern Studies 298 for description.]

[GOVT 332 Modern European Politics
4 credits. Not offered 1999–2000.]

[GOVT 333 Government and Politics of the Former Soviet Union
4 credits. Not offered 1999–2000.]

GOVT 334 Political Economy of East Asia
Spring. 4 credits. R. Bullock.
This lecture course examines East Asian political economy in historical and comparative perspective. Central questions include: Why have Japan, South Korea, and Taiwan developed so rapidly in the postwar era? Can we identify an East Asian mode of development? What does the region's growth mean for other countries and for the international economy? Are Southeast Asian countries following a similar trajectory today? Particular topics include Japanese colonialism, industrial policy and its critics, domestic political consequences of rapid growth, political corruption, US-Japan economic conflict, and recent attempts at political-economic liberalization.

[GOVT 335 America in the World #
4 credits. Not offered 1999–2000.]

[GOVT 336 Postcommunist Transitions
4 credits. Not offered 1999–2000.]

GOVT 338 Comparative Political Economy
Fall. 4 credits. C. Way.
This course examines the juncture of politics and the economy in the advanced industrial democracies. Why do some countries have large, inclusive welfare states while others have minimal social programs? Is the welfare state in decline, and if so why? Does it really make any difference for the economy whether parties of the left or right govern? Do strong unions have negative effects on the economy, or can they actually boost economic performance? What does increasing globalization of the world economy mean for the constraints and opportunities facing governments in managing the economy and providing social welfare? How will the Euro and increasing European integration change the world? Are all market economies pretty much the same, or are there varieties of capitalism that differ in important ways? We will use a variety of theoretical perspective to provide some insight into these and other questions, paying particular attention to evaluating the theoretical arguments with both systematic and historical evidence.

GOVT 340 Latin American Politics @
Spring. 4 credits. H. Schamis.
This is the introductory lecture course to the politics of Latin America. The main purpose is to view the region in a conceptual and comparative perspective. Country cases will be introduced in order to understand the fundamental historical processes as well as to explain the significance of competing theoretical frameworks that have shaped the debate in the field. The course will focus on the political economies of the region in order to analyze the role of groups and classes under different political regimes and contrasting strategies of development.

GOVT 341 Modern European Society and Politics (also SOC 341)
Spring. 4 credits. J. Pontusson and D. Schirmer.
This interdisciplinary course explores the contested meaning(s) of citizenship in contemporary European societies, situating recent developments in an historical perspective. In postwar Europe, citizenship took on social and industrial connotations which are largely absent in the U.S. The tension between this expanded notion of citizenship and market economics is a central feature of current political debates, not least in the emergent democracies of Eastern Europe. At the same time, the process of European economic and political integration recasts the role of nation states and their relationship to their citizens. Under the general theme of citizenship, the course will explore the political economy of European integration, nationalism and the formation of transnational identities, class structure and gender relations, the realignment of political ideologies and partisan allegiances, social movements, civil society and the future of European welfare states.

[GOVT 342 United Germany in the New Europe
4 credits. Not offered 1999–2000.]

[GOVT 343–345 State, Society, and Language in Ancient Egypt (also NES 368/369) @ #
4 credits each term. Not offered 1999–2000.]

[GOVT 346 Modern Japanese Politics @
4 credits. Not offered 1999–2000.]

GOVT 347 Government and Politics of China @
Spring. 4 credits. V. Shue.
An introduction to the main currents in China's domestic politics over the last sixty years. Topics include the revolutionary rise of communism; Maoism, in theory and in practice; the politics of bitterness during the "Cultural Revolution"; the evolving roles of the party and the military, and of peasants, workers, and intellectuals in the polity; the prospects for democracy, perceived social inequality, violence, corruption, and other pressing problems that have emerged with the reforms under Deng Xiaoping.

[GOVT 349 Political Role of the Military
4 credits. Not offered 1999–2000.]

GOVT 351 India
Fall. 4 credits. M. Katzenstein.
How well do India's political institutions function in the face of the social and economic challenges of the 1990s? We will take up a range of issues that have been hotly debated in India over the last ten years—economic restructuring, Hindu nationalism, child labor, gender inequality, among others—considering what these controversies reveal about the character of the Indian state. Each week will be organized around a controversial question as presented in articles, books, and films.

GOVT 354 Capitalism, Competition and Conflict in the Global Economy
Spring. 4 credits. P. Katzenstein.
Unemployed auto workers in Detroit and the wood stoves in New England signal an important change in America's relation to the world economy. This course characterizes these changes in a number of fields (trade, money, energy, technology), explains them as the result of the political choices of a declining imperial power that differs substantially for the choices of other states (Japan, Germany, Britain, France, the small European states, and Korea), and examines their consequences for America and international politics.

[GOVT 355 International Relations of the Ancient Near East
4 credits. Not offered 1999–2000.]

[GOVT 356 Enlarging the New Europe: Labor, Business, and Politics (also ILRIC 337)
3 credits. Not offered 1999–2000.]

[GOVT 357 Understanding Russia Today
4 credits. Not offered 1999–2000.
For description see, Russ L 330.]

GOVT 358 Modern History of the Middle East: Changing Politics, Society, and Ideas @
Spring. 4 credits. M. Bloom.
For description, see NES 390.

[GOVT 415 Race, Gender, and Organization
4 credits. Not offered 1999–2000.]

[GOVT 430 Democracy, Power, and Economic Reform
4 credits. Not offered 1999–2000.]

[GOVT 431 Model European Union
2 credits. Not offered 1999–2000.]

GOVT 432 Model European Union II
Fall. 2 credits. J. Pontusson.
This two-credit course is designed to prepare students to participate in the annual Model European Union Simulation held, on an alternating basis, at SUNY Brockport and in Brussels. The simulation provides an opportunity for participants, representing politicians from the member states of the European Union, to discuss issues and resolutions of current concern to the EU. The preparatory course introduces students to the EU, the country that the Cornell team will represent, and the issues to be discussed at the simulation. A substantial part of travel costs for the Cornell team will be paid by the Institute for European Studies, and course enrollment will be restricted by budgetary considerations. Students enrolled in this course are required to write a research paper.

GOVT 433 The Politics of Economic Liberalization in the Developing World @
Fall. 4 credits. H. Schamis.
What drives the current processes of economic liberalization taking place in most of the developing world? What kinds of constraints and opportunities do governments embarked upon such policy reforms face? What types of factors account for their success or failure? What is the relationship between the international dimension of this phenomenon and the domestic political conditions? This seminar addresses these questions by examining the interplay of domestic and international ideas, local and foreign actors, and national and transnational institutions which take part in these processes. The course focuses extensively on, but is not limited to, Latin America.

[GOVT 434 Politics and Society in Modern Italy
4 credits. Not offered 1999–2000.]

[GOVT 436 Environmental Politics and Policy
4 credits. Not offered 1999–2000.]

[GOVT 437 Contemporary China: Society and Politics @
4 credits. Not offered 1999–2000.]

[GOVT 438 Contemporary China: Political Economy @
4 credits. Not offered 1999–2000.]

GOVT 439 Japan in International Politics @
Spring. 4 credits. R. Bullock.
The focus of the course is on how Japan shapes and is shaped by the international environment, with particular emphasis on the post-cold war era. Our approach will be both thematic and institutional. Topics to be discussed include US-Japan trade friction, Japan's investment and ODA in Southeast Asia, and cultural politics and notions of a New Asian Identity.

[GOVT 440 The Political Economy of Market Reform (also GOVT 630)
4 credits. Not offered 1999–2000.]

[GOVT 442 Feminist Politics and Policy in the United States and Europe (also GOVT 655)
4 credits. Not offered 1999–2000.]

[GOVT 443 Proseminar in the Politics of South Asia @
4 credits. Not offered 1999–2000.]

GOVT 444 Afrocentrism
Spring. 4 credits. M. Bernal.
The seminar will begin with a survey of African-American writings about African history from David Walker's *Appeal* in 1829 to W. E. B. DuBois's *The Negro* and *Black Folk Then and Now*. We shall then read from the works of "Afrocentrist" writers of history including Chancellor Williams, Yosef ben-Yochanen and Chiekh Anta Diop as well as those of sympathetic scholars such as St. Clair Drake and Shomarka Keita. After examining the historical utility of these writings, we shall turn to Afrocentrism as a social, political, and pedagogical movement reading the works of such figures as Molefi Asante, Charles Finch, Asa Hilliard and Leonard Jeffries. In this section we shall be investigating the relationship of Afrocentrism to more directly political movements as well as the objections to it from those who dislike its neglect of issues of class and gender. In the last section, we shall consider the portrayal of Afrocentrism as a "bogey" discussing selections from the works of Arthur Schlesinger, Dinesh d'Souza, Mary Lefowitz and others.

[GOVT 445 Stalinism as Civilization
4 credits. Not offered 1999–2000.]

[GOVT 446 Social Welfare and International Competitiveness
4 credits. Not offered 1999–2000.]

GOVT 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also Comparative Literature 454, History 454) #
Spring. 4 credits. M. Bernal.
The basic premise of the seminar is that the concept of "Western civilization" is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological, and anthropological dimensions of the idea's history.

[GOVT 458 Comparative Democratization
4 credits. Not offered 1999–2000.]

[GOVT 468 Global and Domestic Dimensions of Science and Technology Policy (also S&TS 425)
4 credits. Not offered 1999–2000.]

Political Theory

Government 161 is recommended.

[GOVT 260 Social and Political Philosophy (also Philosophy 260)
4 credits. Not offered 1999–2000.]

GOVT 293 Inequality, Diversity and Justice
Fall. 4 credits. R. Miller.
See Philosophy 193 for description.

[GOVT 361 Modern Ideologies: Liberalism and Its Critics #
4 credits. Not offered 1999–2000.]

[GOVT 362 Politics of Sexuality (also Women's Studies 262)
4 credits. Not offered 1999–2000.]

[GOVT 364 The Selfish Individual and the Modern World
4 credits. Not offered 1999–2000.]

[GOVT 366 American Political Thought from Madison to Malcolm X (also History 316 and American Studies 366) #
4 credits. Not offered 1999–2000.]

[GOVT 368 Global Climate and Global Justice (also Philosophy 368)
4 credits. Not offered 1999–2000.]

GOVT 369 Introduction to Feminist Political Thought (also Women's Studies 269)
Fall. 4 credits. N. Hirschmann.
This course will provide a general introduction to feminist political thought, surveying various current issues and methodologies. The course will combine analysis of women in western political thought and the relationship of feminism to the discipline of political science; readings by contemporary feminist theorists; and consideration of what theory can contribute to practical issues such as battering, pornography, prostitution, racism, sexuality, and sexual harassment.

GOVT 370 Political Theory and Cinema (also GERST 330, COM L 330, THETR ARTS 330)
Fall. 4 credits. G. Waite.
See German Studies 330 for description.

GOVT 375 Visual Culture and Social Theory (also ART H 370 and Comp. Lit. 368)
Fall. 4 credits. S. Buck-Morss.
Introduction to critical concepts for the analysis of visual culture, in specific socio-historical contexts.

GOVT 377 Concepts of Race and Racism
Spring. 4 credits. A. M. Smith.
This course examines race and racism from a political theory perspective. We will discuss the different types of racism: traditional racism, "new racism," or cultural racism, scientific racism and contemporary hybrid racism. We will then examine the politically ambiguous "ethnicity theory." In the second half of the course, we will consider the works by Marable on African American political economy; women of color feminist theorists; native American theorists; Takaki on Asian American labor history; and Hero on Latinos/Latinas and American politics. Although we will discuss American multicultural history in some detail, our primary focus will be on an investigation of these works' theoretical foundations.

[GOVT 461 Interpreting Race and Racism
4 credits. Not offered 1999–2000.]

[GOVT 462 Modern Political Philosophy
4 credits. Not offered 1999–2000.]

GOVT 465 Reconceiving Liberalism (also Phil 447)
Fall. 4 credits. R. Miller.
For description see Philosophy 447.

[GOVT 466 Feminism and Gender Discrimination
4 credits. Not offered 1999–2000.]

GOVT 467 Radical Democratic Feminisms
Fall. 4 credits. A. M. Smith.
Radical Democratic Feminisms is an advanced feminist theory seminar. We will focus on contemporary political discourses that are influenced by socialist feminism, radical democratic pluralism, critical race theory, and radical anti-racist and anti-heterosexist multiculturalism. The reading list will include works by Sheila Rowbotham, Joan Scott, Michele Barrett, Lynne Segal, Zillah Eisenstein, Frances Fox Piven, Barbara Ehrenreich, Jacqui Alexander, Chandra Talpade Mohanty, Judith Butler, Julia Epstein, Anne McClintock, Angela Davis, Alice Echols, Dangerous Bedfellows, Lisa Duggan, Nan Hunter, Amy Gluckman and Betsy Reed, Elizabeth Grosz, Elspeth Probyn, Katha Pollitt, Renata Salecl, Patricia J. Williams, Ellen Willis, Gayatri Spivak, Jeffrey Escoffier, Barbara Epstein, and bell hooks. Students should have completed at least one course in feminist theory and at least one course in social theory or political theory before taking this course.

[GOVT 468 Global and Domestic Dimensions of Science and Technology Policy
4 credits. Not offered 1999–2000.]

[GOVT 469 Limiting War (also Phil 369)
4 credits. Not offered 1999–2000.]

[GOVT 473 Marx, Nietzsche, Freud (also German Studies 415)
4 credits. Not offered 1999–2000.]

[GOVT 474 Community, Nation, and Morality
4 credits. Not offered 1999–2000.]

International Relations

Government 181 is recommended.

GOVT 294 Global Thinking (also Philosophy 294) @
Spring. 4 credits. No prerequisites; intended for freshmen and sophomores. Fulfills geographical distribution requirement. H. Shue.
The analysis taught in this course is global in two different respects: international subjects and interdisciplinary methods. We look in detail at questions raised by one of the most important and most difficult issues facing international society: when, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Bosnia and Rwanda in this decade? Both of these recent cases, one in Europe and one in Africa, raise fundamental questions about the kind of world we are constructing for the 21st century. To what extent is the system of nation-states we now have either desirable or unavoidable? Does every ethnic group have a right to a self-determining and sovereign state? When is the use of military force morally justified? Should trials for war crimes or crimes against humanity be routinely held after military conflicts? These and other ethical questions need to be answered in light of the best available knowledge about the political dynamics of foreign interventions and the changing international legal regime, bringing together political science, law, and ethics. The course is team-taught by leading faculty researchers from the three fields listed.

GOVT 380 The Politics of Modern Germany
Fall. 4 credits. D. Schirmer.
"Learning from History" in the sense of "learning from failure" is one of the basic modes of political modernization. Thus, structures and functioning of German postwar politics are inseparably tied to interpreting the causes of the political instability of the Weimar Republic and the rise of Nazism. Therefore, the course will employ the interpretation of history as a general framework for the introduction into German politics. Topics will include the constitutional concept of the Grundgesetz (basic law), the political culture, the electoral and party systems, parliament and government, interest groups and Germany's liberal corporatism, and the federal system. We will also try to evaluate to which degree German politics have been transformed by the process of unification.

[GOVT 382 International Relations of East Asia @
4 credits. Not offered 1999–2000.]

[GOVT 383 Theories of International Relations
4 credits. Not offered 1999–2000.]

GOVT 385 American Foreign Policy
Fall. 4 credits. M. Bloom.
This course will provide an overview of the history of American foreign policy, concentrating on the period between 1914 and the present. Various theoretical approaches to the study of American foreign policy will be covered, including international, domestic and individual levels of analysis. These interpretations will be used to examine events including: the First World War and the League of Nations; the rise of American hegemony; various crises of the Cold War, including the U-2 crisis, the Suez and Berlin crises, and the Cuban missile crisis; and the Korean, Vietnamese and Gulf Wars. Emphasis will be placed on security as opposed to economic foreign policy issues.

GOVT 386 The Causes of War
Spring. 4 credits. C. Way.
This course surveys leading theories of the causes of interstate war—that is, large scale organized violence between the armed forces of states. Why is war a recurring feature of international politics? Are democracies more peaceful than other types of states, and if so what explains this "democratic peace"? Why do democratic publics seem to reward threats to use force by "rallying around the flag" in support of their governments? Does the inexorable pattern of the rise and fall of nations lead to cycles of great power wars throughout history? These and other questions will be examined in our survey of theories of war at three levels of analysis: the individual and small groups, domestic politics, and the international system. Topics covered include: 1) historical patterns in warfare; 2) theoretical explanations for war; 3) evaluation of the evidence for the various explanations; 4) nuclear weapons; 5) ethics and warfare; and, 6) the major security problems of the coming decades, civil war, and the prospects for peace in the future.

[GOVT 387 Political Psychology in International Relations
4 credits. Not offered 1999–2000.]

4 credits. Not offered 1999–2000.]

[GOVT 392 International Relations of the Middle East (also NES 395) @
4 credits. Not offered 1999–2000.]

GOVT 393 Introduction to Peace Studies (also SOC 310)
Fall. 4 credits. J. Reppy and R. Williams.
This course serves as an introduction to the study of war, peace, and peacemaking. We will study different theories of peace and war from a variety of disciplinary perspectives. The course will cover definitions of peace and war, causes of conflict, and modes of conflict prevention and resolution. The concepts will be applied to a range of historical and current conflicts. Students will prepare analyses of specific conflicts or instances of peacemaking for class presentation.

[GOVT 394 Comparative Foreign Policy
4 credits. Not offered 1999–2000.]

4 credits. Not offered 1999–2000.]

Honors Courses

Late each spring a limited number of sophomore majors are admitted to the honors program, their work to begin the following fall. Application forms and a full description of the program may be obtained in 125 McGraw Hall.

GOVT 493 Studying Politics: The Junior Honors Seminar
Fall and spring. 4 credits. Fall, V. Shue; spring, R. Bensel.
The seminar will meet twice weekly under the supervision of a senior faculty member with numerous classes being led by other members of the department faculty. The seminar will survey the broad range of what we mean by "the study of politics" and the various methods we enlist to carry out the study. The seminar will be writing intensive, requiring at least five papers.

GOVT 494 Honors Seminar: Thesis Clarification and Research
Fall. 4 credits. E. Sanders.
Each student works individually with a faculty member. The student initiates the tutorial by interesting a faculty member in his or her likely thesis project and by submitting to the director of undergraduate studies a form outlining the general area the thesis will treat and bearing the faculty tutor's signature. This form is due the third week of classes. The tutorial culminates in a ten-to-fifteen-page paper setting forth the central questions to be addressed by the thesis, the state of existing knowledge regarding those questions, and why they matter.

GOVT 495 Honors Thesis: Research and Writing
Spring. 4 credits. Limited to students who have successfully completed Government 494.
Students continue the work of the preceding semester typically with the same faculty tutor. Research on the thesis is completed and writing begun. The tutorial culminates in a thesis of some sixty to eighty pages. The grade for the tutorial is determined by the faculty tutor, while the degree of honors (if any) awarded the thesis is decided by a committee of faculty members established for that purpose.

Independent Study

Independent study, Government 499, is a one-on-one tutorial which is arranged by the student with a faculty member of their choosing. Government 499 is open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty sponsor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than 4 credits of independent study may count toward fulfillment of the major. Students who elect to continue taking this course for more than one semester must select a new theme or subject each semester. Credit can be given only for work that results in a satisfactory amount of writing. Emphasis is on the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The application form for Independent Study is available in 125 McGraw Hall and must be completed at the beginning of the semester in which the course is being taken.

GOVT 499 Readings Fall or spring.
Fall or spring. 1–4 credits.

Graduate Seminars

Qualified undergraduates are encouraged to apply for seminars listed with 600 course numbers but may only register with the permission of the instructor. Students may consult the supplement that lists graduate courses, available in the department office.

Field Seminars

GOVT 603 Field Seminar in American Politics
Fall. 4 credits. E. Sanders.
The basic issues and institutions of American government and the various subfields of American politics are introduced. The focus is on substantive information and theoretical analysis and problems of teaching and research.

GOVT 606 Field Seminar in International Relations
Fall. 4 credits. M. Evangelista.
A general survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants will be expected to do extensive reading in the literature as well as research.

[GOVT 607 The Western Political Tradition: A Survey
4 credits. Not offered 1999–2000.]

Methodology

GOVT 601 Scope & Methods of Political Analysis
Fall. 4 credits. W. Mebane.
This course introduces the major analytical approaches used in contemporary political science research. We touch on broad philosophical issues concerning the nature of theory and inference, the practices of cultural and historical interpretation, and the relevance of moral values and political commitments. Several kinds of research designs, including comparative case study and quasi-experimentation, are briefly examined. The basic analytical ideas involved in statistical methods such as sampling and regression analysis are introduced, as are the basic concepts of the theory of collective choice and the elementary methods of applied game theory.

[GOVT 602 Field Seminar in Political Methodology
4 credits. Not offered 1999–2000.]

GOVT 605 Comparative Methods
Spring. 4 credits. J. Pontusson and C. Way.
This seminar provides a survey of different methodological approaches to the study of comparative politics: single case studies, comparative case studies based on Millian logic, qualitative comparative analysis, and a variety of quantitative methods. Substantive works will be used to illustrate each approach. Throughout, the discussion will emphasize methodological issues that are common to all forms of comparative inquiry.

[GOVT 707 Game Theory for Political Science
4 credits. Not offered 1999–2000.]

American Government and Institutions

[GOVT 609 Political Parties and Elections
4 credits. Not offered 1999–2000.]

GOVT 611 The Political Economy of American Development, 1860–1900
Fall. 4 credits. R. Bensel.
This course will trace and describe the political economy of national state formation from the last decades of the antebellum period, through the Civil War and Reconstruction eras, and ends with the transition to a more industrial society during the late nineteenth and early twentieth centuries. Utilizing a broad survey of the historical literature on these periods, the course will investigate: (1) the connection between slavery and the emergence of southern separatism; (2) the impact of conflict between the plantation South and industrializing North on American state formation; (3) the failure of post-Civil War attempts to remold the southern political economy; (4) the role of finance capital markets in industrial and

western agrarian expansion and the consequent emergence of monetary issues in national politics; and (5) the political economic basis of possible developmental trajectories other than the high-tariff, gold-standard one actually followed.

[GOVT 612 American Political Development II: Social Movements and State Expansion in the Twentieth Century
4 credits. Not offered 1999–2000.]

GOVT 613/413 Finance, Federalism, and Politics
Spring. 4 credits. W. Mebane.
For description see Government 413.

GOVT 615 State and Economy in Comparative Perspective
Spring. 4 credits. R. Bensel.
This course reviews the extensive literature on the political economy of comparative state formation and institutional change. Among the topics covered will be war-making and state expansion, regime evolution and economic development, and market processes and class transformations. Although much of the reading and discussion will focus on the United States and Europe, the limits of these cases as theoretical prototypes for the remainder of the world will also be considered.

[GOVT 618 Politics, Markets, and the Middle Classes
4 credits. Not offered 1999–2000.]

GOVT 619 The Politics of Scandal
Spring. 4 credits. M. Shefter and J. Rabkin.
See Government 419 for description.

[GOVT 620 The United States Congress
4 credits. Not offered 1999–2000.]

[GOVT 623 The Politics of Courts
4 credits. Not offered 1999–2000.]

[GOVT 628 Bureaucracy and Law
4 credits. Not offered 1999–2000.]

[GOVT 629 Cleavages and Coalitions in Contemporary American Politics
4 credits. Not offered 1999–2000.]

[GOVT 703 Political Economy
4 credits. Not offered 1999–2000.]

[GOVT 705/405 Government and the Economy
4 credits. Not offered 1999–2000.]

[GOVT 706 The Politics of Education
4 credits. Not offered 1999–2000.]

Comparative Government

[GOVT 630 The Political Economy of Market Reform
4 credits. Not offered 1999–2000.]

[GOVT 632 Politics and Society in Western Europe
4 credits. Not offered 1999–2000.]

[GOVT 633 European Party Systems and Political Change
4 credits. Not offered 1999–2000.]

[GOVT 634 Genetic Engineering: Politics and Society in Comparative Perspective
4 credits. Not offered 1999–2000.]

GOVT 638 Latin American Political Economy
Spring. 4 credits. H. Shamis.
The central goal of this seminar is to examine the magnitude and scope of the decades-long process of economic transformation in the region and capture its implications for political stability. In order to do so, we will adopt a historical political economy approach. Old concepts—populism, corporatism, nationalism—will be reviewed in light of new developments. Different economic phases and strategies—export-led growth, import-substituting industrialization, market-oriented reform—will be analyzed in light of the region's changing social structures, unstable political institutions, and shifting preferences and ideologies of social actors. And classic theoretical approaches—Modernization, Dependency, Bureaucratic-Authoritarianism—will be reevaluated in light of the current convergence toward marketization and democratization.

[GOVT 639 Studying Political Culture
4 credits. Not offered 1999–2000.]

[GOVT 642 Comparative Political Economy: East and Southeast Asia
4 credits. Not offered 1999–2000.]

GOVT 645 Chinese Politics
Spring. 4 credits. V. Shue.
Review and assessment of several of the major currently competing approaches to the study of Chinese politics. Discussion and evaluation of leading works in the field analyzing Chinese state and society, policymaking and policy implementation, bureaucratic politics, elite politics, political culture, and political economy. Special attention to problems of research and interpretation.

[GOVT 648 Political Economy of Change: Rural Development in the Third World
4 credits. Not offered 1999–2000.]

[GOVT 652 Southeast Asia Seminar: The Philippines (also Asian Studies 601)
4 credits. Not offered 1999–2000.]

GOVT 653 The Plural Society Revisited (also Asian Studies 607)
Fall. 4 credits. B. Anderson.
John Furnivall's concept, invented 40 years ago, posited colonial society as one in which race (and ethnicity), class, occupation, and residence were distributed more or less isomorphically. The seminar will review the utility of the concept in light of subsequent research on colonial Asia, and its applicability to developments since the achievement of independence. It will also consider the relevance of the concept to (uncolonized) modern Thailand. The core problematic issue will be the relationship between classification (naming) and power.

[GOVT 655 Gender, Politics and Welfare Policies in Europe and the U.S. (also GOVT 442)
4 credits. Not offered 1999–2000.]

[GOVT 656 Comparative Political Economy
4 credits. Not offered 1999–2000.]

GOVT 657 Comparative Democratization
Fall. 4 credits. H. Schamis.
This course will focus on the transition from authoritarian to liberal politics in Eastern Europe and in Latin America. Particular attention will be paid to Poland, Hungary, Russia as well as Argentina, Brazil, and the not-necessarily-transitional Mexico. During the course, we will also bring in a variety of other cases of recent democratization—in particular, Spain, Portugal, Italy, and Greece. Our focus will be equally divided between the empirics of these transitions and theoretical understandings of transitions to democracy.

[GOVT 660 Social Movements and Contentious Politics (also SOC 660)
4 credits. Not offered 1999–2000.]

GOVT 692 The Administration of Agricultural and Rural Development
Spring. 4 credits. N. Uphoff.
For description, see INTAG 603.

GOVT 731 Political Ecology
Spring. 4 credits. R. Herring.
Political ecology studies the intersection of the politics of economic change and policies of states with interests in the environment—whether in conservation or transformation. It is centrally concerned with the sources of change in landscapes, both proximate and distal—and therefore with the political economy of development—and equally with human responses to ecological dynamics: scarcity, degradation, threat, and opportunity. Politics respond to and shape evolution of ecological systems, in both intended and unintended ways. Reciprocally, social movements around both protection of particular environments and opposition to state efforts to protect or change ecological systems introduce new political cleavages. Differing conceptualizations of public goods in ecological systems give rise to divergent problems of policy and collective action. Arenas cross boundaries: international environmental "soft law" is a product of domestic enviromental politics and simultaneously a source of new politics on the ground. The course is seminar in format and explicitly comparative in method; materials will be drawn from both the history of industrial societies and currently transitional ("less developed") societies.

GOVT 732 Postsocialist Transformations
Fall. 4 credits. V. Bunce and M. Evangelista.
This is a seminar in comparative and international politics that examines the political and economic, domestic and international experiences of the 27 countries that once made up the Soviet Union and Eastern Europe. Among the topics addressed will be explanations of why socialism and socialist states collapsed; how democratization relates to economic reform; and why relations among the nations of the region and the new states of the region are cooperative or conflictual.

GOVT 733 State, Market Economy and Civil Society in Contemporary South Korea
Fall. 4 credits. J. J. Choi.
This seminar aims to analyze basic aspects in Korea politics and society since World War II, with special emphasis on the basic categories of society, the state, market economy and civil society. These categories broadly match with the state-making, industrialization, and democratization which have been the main forces in shaping the history of contemporary Korea.

Political Theory

GOVT 663 Political Theories of Power
Fall. 4 credits. A. M. Smith.
Through reading and discussion of theorists such as Lukes, Gramsci, Laclau and Mouffe, Nietzsche, Foucault, Connolly, Fraser, Butler, (Biddy) Martin, (Renata) Salecl, (Joan) Scott, (Jacqueline) Rose and (Mike) Davis, we will explore the contemporary debates on the structure of power relations. Seminar themes will include: the definition of social agents' interests, hegemony, disciplinary regimes, subjectivity and resistance. Seminar participants should already have a basic familiarity with the treatment of power in the political theory tradition.

[GOVT 664 Contemporary Democratic Theory
4 credits. Not offered 1999–2000.]

[GOVT 665 American Political Thought: From Madison to Malcolm X
4 credits. Not offered 1999–2000.]

GOVT 667 Major Figures in Modern Political Theory
Spring. 4 credits. N. Hirschmann.
This seminar will focus on three figures in modern political theory who present contrasting yet curiously related visions of politics. Emphasis will be placed on analytical treatment of historical works, and the course will strive to integrate historical and analytical political philosophy through weekly student papers and presentations of primary and secondary sources. Newer critical methods, such as feminism and postmodernism, may be utilized to locate a critical reading of texts within contexts of cultural history.

GOVT 669 Modern Social Theory I
Fall. 4 credits. S. Buck-Morss.
Readings vary, but topics are drawn from the traditions of Marx, Weber, Durkheim, the Frankfurt School, and Freud. They include political economy, the transformation to "modernity," ideology as the legitimation of power, and social institutions as social constraints. The methods of critical theory, structuralism, post-structuralism, and feminism will be considered.

GOVT 670 Modern Social Theory II
Spring. 4 credits. S. Buck-Morss.
Issues raised by neo-Marxism, critical theory, post-structuralism, and feminism.

GOVT 671 Graduate Seminar in Feminist Political Theory
Fall. 4 credits. N. Hirschmann.
The course is open to undergraduates who have taken Government 463 or other courses in feminist theory, with permission of the instructor. This graduate seminar will examine contemporary feminist theory from the perspective of political theory. We will study the work of feminist theorists who work specifically within the discipline of political science, as well as the specifically political dimensions of work not generally considered political theory. Though particular readings and topics will change from year to year in response to the most recent literature, in general the course will focus on questions of epistemology and methodology as a way to explore a variety of issues relevant to feminism as an academic, intellectual, and political enterprise.

GOVT 674 Theory and Practice of Nationalism
Fall. 4 credits. B. Anderson.
This course will be devoted to the comparative study of the rise and transformation of nationalism, according to different theoretical and philosophical traditions. The relationship of nationalism to questions of race, gender, class, and time will also be discussed on the basis of both theoretical and empirical studies.

[GOVT 675 Gramsci and Cultural Politics (also German Literature 685)
4 credits. Not offered 1999–2000.]

[GOVT 676 Theories of Governmentality
4 credits. Not offered 1999–2000.]

[GOVT 678 Classics in Political Thought: Adam Smith and David Hume
4 credits. Not offered 1999–2000.]

[GOVT 679 Althusser and Lacan
4 credits. Not offered 1999–2000.]

GOVT 760 Theoretical Approaches to Ideology
Spring. 4 credits. A. M. Smith.
An investigation of what is casually referred to as the "politics of meaning" is of course central to political theory and political science as a whole. However, profound controversies revolve around the definition of "ideology," its location in the social, its relationship to the interests of dominant groups, the means by which it is circulated throughout diverse social sites, its ability to displace traditional modes of thought, and the processes by which it penetrates and re-constructs the world views of the dominanted. We will lay the groundwork for the seminar by examining key texts on ideology by Marx. We will trace the multiple meanings of the term in his work and their various implications. Next we will discuss the ways in which Adorno, Horkheimer, Gramsci, Althusser, Hall and Laclau have re-articulated Marx's formulations. We will address the Freudian and Lacanian interventions in ideology studies with respect to the concepts of the unconscious and mis-identification. Then we will explore the problem of ideological analysis and historicity, with reference to classical texts in the structuralist, science and technology studies, and feminist traditions. Finally, we will conclude the seminar with a discussion of the incorporation of sedimented discourse in everyday practice with reference to the work of Bourdieu.

International Relations

[GOVT 681 Politics of Transnationalism
4 credits. Not offered 1999–2000.]

[GOVT 682 International Relations of the Middle East
4 credits. Not offered 1999–2000.]

GOVT 684 Strategies of Inquiry for International and Comparative Politics
Fall. 4 credits. C. Way.
This course provides a survey of different approaches to studying international and comparative politics through examination of important research agendas in both sub-fields. In surveying research using both qualitative and quantitative approaches, we will pay special attention to bridging the gaps that often lead to the compartmentalization of these two research styles and study ways of fruitfully combining multiple methods. Although the course has methodological goals, these will be pursued through reading and discussing important applications (e.g., the democratic peace, rally effects, cabinet formation and dissolution, economic disputes and bargaining between states, welfare state development and retrenchment, exchange rate politics, etc). We will focus on the problems of identifying interesting questions, formulating appropriate strategies for answering them, ascertaining the appropriate methodological tools with which to conduct the research, acquiring the knowledge necessary to read and understand literature using a variety of methods, and writing up results so they can be published. The major course requirement is a piece of original research on a topic of the student's choosing.

[GOVT 685 International Political Economy
4 credits. Not offered 1999–2000.]

[GOVT 686 International Strategy
4 credits. Not offered 1999–2000.]

[GOVT 687 International Environmental Policy
Not offered 1999–2000.]

[GOVT 688 Political Economy and National Security
4 credits. Not offered 1999–2000.]

GOVT 689 International Security Politics
Spring. 4 credits. P. Katzenstein.
This course will provide an overview of theoretical and research topics in the area of international security policy. This course will cover several theoretical perspectives, including rational choice and psychological approaches to the study of security issues. These perspectives will be used to examine various substantive topics including war and deterrence, balance of power, alliance politics, domestic constraints on foreign policy and military strategy. Less attention will be paid to issues involving economic cooperation and sanctions.

GOVT 691 Normative Elements of International Relations
Fall. 4 credits. H. Shue.
We examine selected normative elements of international affairs, divided into three inter-locking clusters. First are issues about conflict, including both low-intensity military intervention and nuclear weapons. Second are questions about cooperation, especially between rich nations and poor nations. Third are debates about the authority and status of the major players in the international system of individual persons, nation-states, and international regimes. Questions considered include: is the retention by some nations of nuclear weapons morally justified? Is the world economy unjust? Should national governments be pressured to respect individual human rights?

[GOVT 694 Research Design and Grant Writing
4 credits. Not offered 1999–2000.]

Independent Study

This course is *NOT* open to undergraduates. Undergraduates wishing to conduct supervised study should register for Government 499.

GOVT 799 Independent Study
Fall or spring. 4 credits.
Government 799 is a course of individualized readings and research for graduate students. Topics, readings, and writing requirements will be designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chairs of their special committees. They are available from, and must be returned to, the graduate assistant in 125 McGraw Hall.

HISTORY

I. Hull, chair; V. Caron, director of graduate studies; T. Borstelmann, director of undergraduate studies; S. Blumin, V. Caron, S. Cochran, P. R. Dear, M. C. Garcia, S. Greene, P. Holquist, P. R. Hyams, J. J. John, C. Kammen, M. Kammen, S. L. Kaplan, J. V. Koschmann, D. C. LaCapra, W. F. LaFeber, T. L. Loos, R. L. Moore, J. M. Najemy, M. B. Norton, C. Peterson, J. R. Piggott, S. Pohl, R. Polenberg, W. B. Provine, M. J. Roldon, J. H. Silbey, B. Strauss, E. Tagliacozzo, D. Usner, M. Washington, R. Weil, J. H. Weiss, D. Wyatt

Emeritus: D. A. Baugh, K. Biggerstaff, W. M. Pintner, F. Somkin, B. Tierney, O. W. Wolters

The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing; the reputation of the faculty for scholarship, teaching, and advising; and most of all, the intrinsic interest of the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

The Major

To complete the history major, a student must fulfill the requirements listed below:

Entry requirement: completion of *any* two History courses excluding First-Year Writing Seminars.

1) Take 9 history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better. (Courses taken for entry may count towards fulfilling the major.)
2) Of the total 9 courses:
   a) 4 must be outside of American history and
   b) 3 must be in history before 1800.

   Courses used to fulfill Requirement (1) above may also be used to fulfill Requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill Requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both Requirements (2a) and (2b).
3) Of the total 9 courses, one must be a 400-level seminar. History 400 may be used to fulfill this requirement. Appropriate 400-level seminars may be used to fulfill Requirements (2a) and (2b).

Honors

The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take the Honors Proseminar (History 400) plus an additional 400-level seminar, preferably during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second term of sophomore year or early in junior year, interested students should speak to a faculty member or faculty adviser about the honors program.

Before the beginning of senior year, the candidate presents in conversation or in writing a thesis proposal to an appropriate member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in History 401, Honors Research, with their supervisors. Any exceptions to this must be approved by the Honors Committee. History 401 is a 4-credit course that permits honors candidates to conduct research and to begin writing the honors essay. At the end of the first semester of the senior year, as part of the requirements for History 401, the student submits to the supervisor a ten-to-fifteen page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole and meets with a committee consisting of the student's supervisor and one other department member who will eventually serve as a reader of the thesis. That committee then recommends whether the student may proceed to enroll in History 402, Honors Thesis, during the final semester of the senior year. History 402 is a 4-credit course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the two faculty members who administered the preliminary oral interview in December.

The text of the honors essay may not exceed sixty pages except by permission of the chair of the honors committee and the student's supervisor. Two copies are due during the third or fourth week of April. In May each honors candidate is given an oral examination administered by the supervisor; examination focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, seventeenth-century science, nineteenth-century America).

To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral examination.

Cornell-in-Washington Program. History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Medieval, Renaissance, and early modern European history

Modern European history

Honors and research courses

Course Numbering System

100–level courses are very general introductory courses (like 151–152, 190–191) and freshman writing seminars.

200-level courses come in two kinds: seminars or lecture courses. Neither kind has prerequisites and both admit freshmen. 200-level seminars (which are identified by the name "seminar" in the title) are similar to first-year writing seminars, except that there is greater emphasis on subject matter and less on writing.

200-level lecture courses cover a relatively broad geographical area, period of time, or subject.

300–399–level courses may have specified prerequisites or deal with more-specialized subjects than do those numbered 250–299. Admission of freshmen varies from course to course and is indicated in the course descriptions.

400–499 are upper level undergraduate courses.

600–699 and 700–799 are graduate level courses.

Comparative History

[HIST 274 Foodways: A Social History of Food and Eating #
Spring. 4 credits. Not offered 1999–2000. S. L. Kaplan.
An interdisciplinary examination of the validity of the adage "man is what he eats." Among the topics: food and nutrition, food and social structure, the politics of food control, food and modernization, taste making, and food in religion and literature. Cases will be drawn widely across space and time, from Pharaoh's Egypt to the 1990s.]

[HIST 360 Early Warfare, East and West #
Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. C. Peterson.
A study of the principal modes of warfare found both in the East and the West from ancient times up to the eighteenth century. Tactical evolution and the impact of innovations are stressed, but attention is also paid to the general social and cultural background and the role of nonmilitary factors.]

[HIST 380 Social History of Western Technology #
4 credits. Not offered 1999–2000. J. Weiss.
For description, see History of Science.]

[HIST 393 Images of Humanity in Medieval China (also Asian Studies 393) @ #
Fall. 4 credits. Prerequisite: any course on premodern China or Chinese religions, or permission. Not offered 1999–2000. C. Peterson.]

[HIST 405 Population and History #
4 credits. Open to sophomores. Not offered 1999–2000. S. L. Kaplan.]

[HIST 409 Seminar on Work in Europe and America #
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. S. L. Kaplan.
A comparative study of the meaning of work in different societies from premodern times to the present. Emphasis on the "representations" of work of the actors themselves who worked, as well as of those, who for various critical reasons, did not work. The seminar will examine not only ideology but also the organization, practice, and physical place of work. It will explore theory as well as "cases," and draw on anthropological and sociological as well as historical materials.]

[HIST 432 The City in History: Europe and America #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. S. Blumin.
Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe and in modern Europe and America. Individual research projects.]

[HIST 451 Lord and Peasant in Europe: A Seminar in Social History #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. S. L. Kaplan.]

HIST 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also Government 454) #
Spring. 4 credits. Limited to 20 students. Prerequisite: permission of instructor. J. Najemy, M. Bernal.
The basic premise of the seminar is that the concept of "Western civilization" is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological, and anthropological dimensions of the idea's history. Readings include selections from Herodotus's *Histories,* Virgil's *Aeneid,* Augustine's *City of God, The Song of Roland,* Petrarch, Pico, Machiavelli, Montesquieu, Flaubert, Shelley's *Hellas,* Arnold, Hegel's *Philosophy of History,* James Mill's *History of British India*, and, from secondary critical literature, Tzvetan Todorov's *The Conquest of America* and Edward Said's *Orientalism.*

History of Science

HIST 250 Technology in Society (also Engineering General Interest 250, Electrical Engineering 250, and Science and Technology Studies 250)
Fall. 3 credits. R. Kline.
For description, see ENGRG 250.

HIST 281 Science in Western Civilization (also Science and Technology Studies 281) #
Fall. 4 credits. History 281 is not a prerequisite to 282. P. R. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. 281 runs chronologically up to the death of Isaac Newton and focuses on the cultural traditions of Christian Europe and its selective appropriation of a Greek heritage.

[HIST 282 Science in Western Civilization (also Science and Technology Studies 282) #
Spring. 4 credits. History 281 is not a prerequisite to 282. Not offered 1999–2000. P. R. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show sciences as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. This course covers the eighteenth, nineteenth, and early twentieth centuries.]

HIST 287 Evolution (also Biology-General Courses 207, Science and Technology Studies 287)
Fall. 3 credits. W. Provine.
For description, see BIO G 207.

HIST 292 Inventing an Information Society (also Engineering General Interest 298, Electrical Engineering 298, and Science and Technology Studies 292)
Spring. 3 credits. R. Kline.
For description, see ENGRG 298.

[HIST 380 Social History of Western Technology #
Spring. 4 credits. Not offered 1999–2000. J. Weiss.
Studies in the interaction between technological changes and social changes in Western Europe and America since the eighteenth century. Readings and lectures will deal both with instances of social transformation that accompanied technological changes and with the role of technology in social thought and cultural expression. Special attention to three periods: Britain during the Industrial Revolution, America in the nineteenth century, and America during the Vietnam War.]

[HIST 415 Seminar in the History of Biology (also Biology-General Courses 467, Biology and Society 447, Science and Technology Studies 447)
Summer. 4 credits. Not offered 1999–2000. W. Provine.
Specific topic changes each year.]

HIST 525 Seminar in the History of Technology (also Science and Technology Studies 525)
Fall. 4 credits. R. Kline.
For description, see S&TS 525.

HIST 616 Enlightened Science (also Science and Technology Studies 416)
Fall. 4 credits. P. R. Dear and M. A. Dennis.
"Science" is a term that is often associated with "rationality." The idea that "reason," rather than "faith" or "tradition" should be the pre-eminent guide to practical action has deep roots in the thought of 18th-century Europe, the period known as the Enlightenment. The practice and image of science in the Enlightenment shows how this ideal was developed and understood, and what its meanings and implications were. Those meanings, and their associated values, remain strongly with us today. This course will investigate our current scholarly understanding of many themes and issues relating to "enlightened science," as well as studying writings of the period itself in a variety of topical areas, from political economy to astronomy and natural history, in several national contexts including Scotland, France, and Germany. We will attempt to view these materials from the perspective both of developments from earlier periods and in relation to the later consequences of this ideology.

[HIST 680 Seminar in Historiographical Approaches to Science (also Science and Technology Studies 680)
Fall. 4 credits. Not offered 1999–2000. P. R. Dear.
Examines philosophical, sociological, and methodological dimensions of recent historiography of science.]

[HIST 682 Topics in the Scientific Revolution (also Science and Technology Studies 682)
Fall. 4 credits. Not offered 1999–2000. P. R. Dear.
This is a graduate seminar devoted to investigation of recent scholarship and issues in sixteenth- and seventeenth-century European knowledge of nature. Students will be expected to produce a substantial paper focused on the study of primary source documents. The seminar will focus alternately on the study of recent historiography in selected areas, and an examination of primary source materials intended to critique and test those historiographical approaches. Topics will include: credibility and social status; the academic environment; philosophy and court culture; the situated meaning of experiment.]

HIST 711 Introduction to Science and Technology Studies (also Science and Technology 711)
Fall. 4 credits. S. Hilgartner.
For description, see S&TS 711.

American History

HIST 101 Introduction to American History (also American Studies 103) #
Summer and fall. 4 credits. 101 is not a prerequisite to 102. D. Usner.
A survey of American history from the beginnings through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization the American Revolution, the early republic, antebellum reform movements, the coming of the Civil War.

HIST 102 Introduction to American History
Summer and spring. 4 credits. 101 is not a prerequisite to 102. M. C. Garcia.
An introductory survey of the development of the United States since the Civil War.

HIST 201 Seminar: Immigration and Ethnicity in Twentieth-Century U.S.
Spring. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. M. C. Garcia.
This seminar will look at immigration to the United States in the twentieth century, highlighting the experiences of several groups as case studies. We will analyze the "push/pull" historical-structural factors that compelled people to come to the United States; the nature of cultural and structural assimilation; nativist movements; the evolution of U.S. immigration policy; the formation of ethnic identity in U.S. society. Attention will be given to current issues such as immigration reform, bilingual education; and the multiculturalism debate.

[HIST 202 Comparative Migration in the Americas (also American Studies 204)
Spring. 4 credits. Not offered 1999–2000. M. C. Garcia.
A seminar examining migration both within and to the Americas in the 19th and 20th centuries. Topics to be discussed are the reasons for population movements; immigration policies; social, economic, and political accommodation; nativist and restrictionist responses; women and migration; remittances and transnationalism. Among the immigrant-receiving nations studied are Argentina, Brazil, Canada, Cuba, Mexico, and the United States.]

HIST 208 Seminar: The Era of Franklin D. Roosevelt (also American Studies 208)
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. R. Polenberg.
The impact of the Great Depression and World War II on American politics, law, and culture.

[HIST 209 Seminar: Political History of Indians in the United States (also American Indian Studies 209) #
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000. D. Usner.
An investigation of political organization and change among Native American societies. Discussions and assignments examine forms of tribal government, diplomacy, and warfare, as well as political relations with European colonies and the United States. Specific topics include pan-Indian confederacies, Indian policy, struggles over sovereignty, and Indian strategies of autonomy and resistance.]

HIST 210 The Atlantic World from Columbus to Equiano
Spring. 4 credits. R. J. Weil and M. B. Norton.
After Europeans first crossed the Atlantic in the late fifteenth century, the ocean became a vast highway linking the European powers—Spain, France, Britain, and the Netherlands—with their colonial outposts in America. This seminar will explore the Atlantic world through reading such primary sources as the log of Christopher Columbus and the autobiography of Olaudah Equiano, an Anglo-African sailor, and recent scholarly examinations of the slave trade and other aspects of the Atlantic economy. Intended primarily for sophomore prospective history majors; open to others by permission of instructors.

[HIST 213 Asian American History (also Asian American Studies 213)
Fall. 4 credits. Not offered 1999–2000. Staff.
Comparative introductory history of Asian Indians, Chinese, Filipino, Japanese, and Koreans in the U.S. from about 1850 to World War II. Themes include U.S. expansionism in the Pacific, Asian migrant labor in Hawaii and the American West, the anti-Asian movement, and Asian resistance.]

HIST 214 Seminar on American Foreign Policy (also American Studies 214)
Fall. 3 credits. Prerequisite: permission of instructor. W. LaFeber.
Topic for 1999: U.S. presidents and foreign policy in the Cold War and after.

[HIST 238 History of Women in the Professions, 1800 to the Present (also American Studies 258, Women's Studies 238, and Human Development 258)
Spring. 3 credits. Not offered 1999–2000. J. Brumberg.
For description, see HDFS 258.]

HIST 251 Black Religious Traditions from Slavery to Freedom (also American Studies 251, Religious Studies 251)
Spring. 4 credits. Sophomore seminar. Letter only. M. Washington.
A survey on the black religious and spiritual traditions during bondage and the early years of freedom. The course will examine slave religion, the rise of black churches in the North, the formation of black churches after the Civil War, the independent church movement and the churches' role in social protest.

HIST 260 Introduction to U. S. Latino History, Part I (also Latino Studies Program 260 and American Studies 259)
Spring. 4 credits. M. C. Garcia.
This course introduces students to the history of Latinos in the United States. We will focus specifically on the history of Chicanos (Mexican Americans) and Central Americans. Part II of this course, History 261, focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. (students are not required to take both courses). Among the topics that will be addressed are: historical immigration patterns and the "push/pull" factors that compelled migration to the United States; the social and political events that shaped the evolution of these Latino communities; the role of cultural identity, race, class, and gender in shaping experience; the role of foreign policy in formulating immigration policy.

HIST 261 Introduction to U.S. Latino History, Part II (also Latino Studies 261 and American Studies 261)
Fall. 4 credits. M. C. Garcia.
This survey will discuss the history of Latinos from the Caribbean: the Puerto Ricans, Cubans, and Dominicans. Students will be introduced to some of the most important historical and theoretical works in this field. Topics to be discussed include the push-pull/historical-stuctural factors that influenced migration to the United States; the historical evolution of these communities; the role of cultural identity, as well as race, class, and gender in shaping experience; the intersection of foreign policy and immigration policy.

HIST 273 Women in American Society, Past and Present (also Women's Studies 273) #
Spring. 4 credits. M. B. Norton.
A survey of women's experiences in America from the seventeenth century to the present. Among the topics to be discussed are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism.

[HIST 276 American Indian History, 1500–1850 (also American Indian Studies 276 and American Studies 272) #

Fall. 4 credits. Not offered 1999–2000; next offered 2000–2001. D. Usner.

A survey of North American Indian history from the sixteenth century to the mid-nineteenth century. Relations between Indian Nations and with European colonies will be explored. Different cultural groups and cross-cultural encounters will be compared, with emphasis on resistance and adaptation to European colonialism. The formative years of U.S. Indian policy and the experiences of Indian people through the removal era will receive close attention.]

[HIST 277 American Indian History Since 1850 (also American Indian Studies 277)

Summer and spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. D. Usner.

A historical study of American Indians in the United States and Canada from the mid-nineteenth century to the present. The active and complex role played by Indian people in their responses to government policies and to socioeconomic changes will be emphasized. Challenges faced and initiatives taken by Indians will be traced from the early reservation years to the current era of self-determination. Cultural change and continuity within Indian communities will be closely examined.]

[HIST 303 African-American Women in Slavery and Freedom (also Women's Studies 307)

Spring. 4 credits. Letter only. Not offered 1999–2000. M. Washington.

Historical exploration of African-American women from a sociopolitical perspective. Topics include women in Africa, slavery and freedom, sexuality, labor, the family, gender crossracially that begins with the African background and ends at 1900.]

HIST 304 American Culture in Historical Perspective, 1880–1980 (also American Studies 304)

Spring. 4 credits. M. Kammen.

An introduction to the study of modern American culture. Emphasis upon the role of culture in the quest for national identity; the function of cultural myths and myth making; the advent of modernism; relationships between mass culture, popular culture, and high culture; and on the question of American exceptionalism (distinctiveness). Special attention also to the situation of subcultures and regions, to the changing role of entertainment in relation to leisure, the media, ethnicity (pluralism), the decorative and popular arts.

[HIST 311 The Structure of American Political History (also American Studies 311) #

Fall. 4 credits. Not offered 1999–2000; next offered 2000–2001. J. Silbey.

Examines the course of American politics from the eighteenth century to the Gilded Age, focusing on the development of American political culture, the nature of decision making, and the role of interest groups, political parties, and political elites in shaping our political history.]

[HIST 312 The Structure of American Political History

Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. J. Silbey.

A continuation of History 311 but can be taken independently. Examines the course of American politics from the 1890s to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialism and urbanization, the depression and the international crises from the 1930s to the 1990s.]

[HIST 313 U.S. Foreign Relations, 1750–1912 #

Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 1999–2000; next offered 2000–2001. W. LaFeber.

Examines the development of the U.S. continental and global empires by analyzing policy and policymakers from Benjamin Franklin to Woodrow Wilson. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with HIST 313, a special course, 301, for discussion and guided research will be offered.]

[HIST 314 History of American Foreign Policy, 1912 to the Present

Summer and spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. T. Borstelmann.

Students examine the emergence of the United States as a world power in the twentieth century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policymakers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the role of American racial views in the making of foreign policy, and the increasingly dominant role of the president in the making of U. S. foreign policy.]

[HIST 316 American Political Thought: From Madison to Malcolm X (also Government 366) #

Fall. 4 credits. Not offered 1999–2000. I. Kramnick.

For description, see GOVT 366.]

[HIST 318 American Constitutional Development

Fall. 4 credits. Not open to freshmen. Not offered 1999–2000; next offered 2000–2001. R. Polenberg.

Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by slavery and emancipation; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt "revolution"; civil liberties and civil rights in modern America; the right of privacy; the contemporary Supreme Court.]

[HIST 321 Colonial North America to 1763 #

Fall. 4 credits. Not offered 1999–2000; next offered 2001–2002. M. B. Norton.

A survey of European settlement in North America and the Caribbean, emphasizing the interactions of Europeans, Indians, and Africans; economic development; gender relations; religious and political change; and the impact on the colonies of internal and external conflicts.]

[HIST 324 Varieties of American Dissent, 1880–1900 (also American Studies 324)

Fall. 4 credits. Not offered 1999–2000. N. Salvatore.

The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course will explore the varieties of economic, political, and cultural dissent in America between 1880 and 1990, and will examine how understanding dissent in its specific historical context illuminates major aspects of American life and culture.]

[HIST 325 Age of the American Revolution, 1754–1815 #

Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. M. B. Norton.

An examination of the process by which the thirteen English colonies became an independent and united nation, with emphasis on political thought and practice, social and economic change, and cultural development. Attention will be paid to the impact of the American Revolution on women, Blacks, and Indians as well as on white males.]

[HIST 327 American Frontier History Before 1850 #

Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. D. Usner.

An overview of European exploration and colonization in North America, life on different colonial-Indian frontiers, and territorial expansion by the United States. Topics include the ideological and material frameworks of expansionism, the political and social dimensions of interethnic and imperial rivalry, and the formation of U.S. Indian and land policies. Themes of human migration, commercial development, and environmental change are emphasized.]

[HIST 329 Indians, Settlers, and Slaves in the Early South (also American Indian Studies 329) #

Fall. 4 credits. Not offered 1999–2000; next offered 2000–2001. D. H. Usner.

History of the American South from the sixteenth century to the early nineteenth century with an emphasis on intercultural relations. Topics include colonization of the region by Spain, England, France, and the United States, American Indian adaptation and resistance, the evolution of slavery, African American relations with European and Indians, and the role of racial ideology and ethnic identity in the formation of the South as a distinct section of the United States.]

[HIST 330 The Age of Jackson, 1815–1850 (also American Studies 330) #

4 credits. Not offered 1999–2000. J. Silbey.]

HIST 331 The American Civil War and Reconstruction 1850–1877 (also American Studies 331) #

Spring. 4 credits. J. Silbey.

An analysis of the factors leading up to the breakup of the Union, the impact of the war in North and South, and the problems of restoration and reconstruction of the seceded states.

HIST 332 The Urbanization of American Society: 1600–1860 (also American Studies 332) #

Fall. 4 credits. S. Blumin.

America was born in the country and moved to the city. This course examines the transformation of America from a rural to a

rapidly urbanizing society and culture, from the first European settlements to the era of the Civil War. It is also a history of the city itself, as a human community, and as a crucible of cultural contact and change.

HIST 333 The Urbanization of American Society: 1860–2000 (also American Studies 333)
Spring. 4 credits. 332 is not a prerequisite to 333. S. Blumin.
America was born in the country and moved to the city. This course examines the transformation of America from the urbanizing society and culture of the mid-nineteenth century to the thoroughly metropolitan nation of the present (and near future). It is also a history of the city itself, as a human community, a crucible of cultural contact and change, and a focus of public policy.

[HIST 335 African-American History from Slavery to Freedom #
Fall. 4 credits. Letter only. Not offered 1999–2000; next offered 2001–2002. M. Washington.
Introductory course on African-Americans from 1619 to 1865. Emphasis will be on life in bondage, the free black communities, and racism. Other topics include African cultural heritage, the slave trade, religion, the family, and the black freedom struggle.]

[HIST 336 Capitalism and Society in Developing America, 1607–1877 (also American Studies 336) #
Fall. 4 credits. Not offered 1999–2000. S. Blumin.
An examination of American society in the context of capitalist development, and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of social classes; the emerging ethos of free enterprise.]

[HIST 337 Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840–2000 (also American Studies 337)
Spring. 4 credits. Not offered 1999–2000. S. Blumin.
An examination of American society in the context of capitalist development and of capitalism as a social phenomenon. The rise of corporate capitalism; class, "mass", and the ethos of enterprise in twentieth-century American society.]

[HIST 340 Recent American History, 1925–1960
Summer and fall. 4 credits. Not open to freshmen. Not offered 1999–2000; next offered 2000–2001. R. Polenberg.
Topics include the Sacco-Vanzetti case; radicalism and reform in the New Deal; Franklin Roosevelt and World War II; the Holocaust and the atomic age; the Cold War and civil liberties; individualism and conformity in the 1950s.]

HIST 341 Recent American History, 1960 to the Present
Summer and fall. 4 credits. Not open to freshmen. R. Polenberg.
Topics include the Supreme Court and civil rights; Kennedy, Johnson, and social reform; the Vietnam War and Watergate; politics and the presidency from Carter to Clinton; and class, race, and ethnicity in modern America.

[HIST 345 The Intellectual and Cultural Life of Nineteenth-Century Americans (also American Studies 345 and Religious Studies 345) #
Fall. 4 credits. Not offered 1999–2000. R. L. Moore.
An examination of the development of cultural and intellectual diversity in the United States. Particular emphasis will be placed on religious pluralism.]

HIST 346 The Modernization of the American Mind (also American Studies 346)
Fall. 4 credits. R. L. Moore.
American thought and culture from 1890 to the present. Emphasizes the intellectual impact of major political and economic events and the adaptation of social ideas and values to new conditions.

[HIST 359 American Families in Historical Perspective (also American Studies 359, HD 359, and Women's Studies 357)
Spring. 3 credits. Prerequisite: HD 150 or one 200-level social science or history course. S–U grades optional. Human ecology students must register for HD 359. Not offered 1999–2000. J. Brumberg.
For description, see HDFS 359.]

[HIST 375 The African-American Workers, 1865–1910: The Rural and Urban Experience (also ILRCB 385) #
Fall. 3 credits. Prerequisite: juniors and seniors, or permission of instructor. Not offered 1999–2000. N. Salvatore.
For description, see ILRCB 385.]

[HIST 376 The African-American Workers, 1910–the present: Race, Work, and the City
Not offered 1999–2000. N. Salvatore.
For description, see ILRCB 386.]

HIST 378 Topics in U.S. Women's History (also American Studies 378 and Women's Studies 378)
Fall. 4 credits. Preference given to students who have taken Hist/WS 273, Hist/WS 303, or Hist/WS 238. Others: by permission of instructor only. M. B. Norton.
Topic for 1999: Gender and Sexuality in America. A colloquium course, limited to 20 students. Students will read and discuss some of the new scholarly work on gender and sexuality in American history. They will also prepare several written and oral presentations based on their analyses of primary sources in the Cornell Human Sexuality collection and elsewhere.

HIST 411 Undergraduate Seminar in American Political History
Spring. 4 credits. Prerequisite: permission of instructor. J. Silbey.
Topic for spring 2000: Abraham Lincoln.

HIST 414 Motivations of American Foreign Policy
Fall. 4 credits. Prerequisite: permission of instructor. W. LaFeber.
Topic for Fall 1999: technology and its perceived effect on U.S. foreign relations, 1840–1990s.

[HIST 418 Undergraduate Seminar in the History of the American South
4 credits. Not offered 1999–2000; next offered 2000–2001. J. Silbey.]

HIST 419 Seminar in American Social History (also American Studies 419)
Spring. 4 credits. S. Blumin.
Topic for 2000: Race, class and the American city in the nineteenth and twentieth centuries. Offered in Cornell-in-Washington program.

HIST 421 Undergraduate Seminar in Cultural History (also American Studies 421)
Spring. 4 credits. Prerequisite: permission of instructor. M. Kammen.
Topic for Spring 2000: the annual cycle of the seasons in nature and in Western culture, with contextual attention to pagan origins, syncretism in the cycle of the Christian calendar year; psychological connections between the human life cycle and the seasons; and the more recent impact of industrialization as well as urbanization on societal feelings about the seasons. Emphasis upon the United States and seasonal implications for the history of consumerism. Sources will include art, literature, the writings of eminent naturalists, and materials concerning festivals and holidays. A mix of primary and secondary source readings.

HIST 426 Undergraduate Seminar in Early American History
Spring. 4 credits. M. B. Norton.
Topic for Spring 2000: The Early Modern Atlantic World. Recent scholarship has emphasized the links among the French, Spanish, Portuguese, and English colonies and homelands in the period between the late 15th century and the early 19th century. The seminar will look at this Atlantic world from a variety of perspectives. Each student is expected to complete a substantial research paper.

HIST 428 Comparative History of Colonial North America
Fall. 4 credits. D. Usner.
This seminar will consider ways of comparing how different European empires, especially Spain, France, and England, colonized North America from the 16th through the 18th centuries. Settlement patterns, labor systems, trans-Atlantic connections, and Indian relations will be examined for similarities and differences across imperial boundaries. Borders between colonial and frontier regions, where empires came face-to-face, will also be explored. Problems and opportunities for comparative study, found in old and new scholarship on early America, will be critically discussed.

[HIST 429 Undergraduate Seminar in Indians of Eastern North America (also American Indian Studies 429) #
Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. D. Usner.
A seminar examining the history of Native Americans in the eastern woodlands from colonial times to the present. The cultural and economic participation of Indians in the evolution of frontier societies will be examined. Major topics include fur-trade networks, political relations, removal, and the persistence of Indian communities in eastern states.]

HIST 430 America in the Camera's Eye (also American Studies 430.2)
Fall. 4 credits. R. L. Moore.
Photographs and films have become archives for historical research. From the era of Matthew Brady's Civil War images, the United States has been recorded by documentary

photographers who have called attention to the country's progress and it's poverty. Hollywood filmmakers have also recorded endless images of the American landscape and placed against that landscape fictionalized accounts of the country's history and its social problems. What can we learn from these images? What is their relation to written texts and to other documents that tell us about the past? How truthful is documentary? How misleading is Hollywood? One key text will be James Agee's and Walker Evans' *Let Us Now Praise Famous Men*. The seminar will meet once each week for discussion and periodically during the semester to view films.

[HIST 432 The City in History: Europe and America #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. S. Blumin.
Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe, and in modern Europe and America. Individual research projects.]

[HIST 440 Undergraduate Seminar in Recent American History
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. R. Polenberg.
Topic: freedom of speech, censorship, and the Supreme Court.]

[HIST 442 Religion and Politics in American History: From J. Winthrop to R. Reed (also American Studies 442 and Religious Studies 442)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. R. L. Moore.
A reading and research seminar concerned with popular culture in nineteenth-century America (publications, performances, and audiences).]

HIST 458 Female Adolescence in Historical Perspective (also Women's Studies 438 and Human Development 417) #
Fall. 3 credits. Limited to juniors and seniors. Prerequisite: permission of instructor. J. Brumberg.
For description, see HD 417.

[HIST 484 Seminar in the History of American Labor: Race, Work, and the City (also ILR 304)
Fall. 4 credits. Open to juniors and seniors only with the permission of the instructor. Not offered 1999–2000. N. Salvatore.
For description, see ILRCB 304.]

HIST 486 Seminar on the 1960s
Fall. 4 credits. T. Borstelmann.
This course will explore the issues and developments of the most turbulent and significant decade in recent U.S. history. Major topics will include the civil rights movement, the Kennedy and Johnson administrations, the Vietnam War, the anti-war movement, the counterculture, the women's liberation movement, and the Nixon administration. A substantial research paper will be required.

HIST 487 Spanish Borders and French Frontiers in American History (also S HUM 417)
Spring. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. D. Usner.
For description see S HUM 417.

HIST 500 Undergraduate Research Seminar (also American Studies 500)
Fall and spring. 8 credits each term. S. Blumin and others.
Offered in Cornell-in-Washington Program. An intensive research and writing experience utilizing the extensive resources of Washington, D.C.

[HIST 521 Seminar in American Cultural Studies (also American Studies 521)
Fall. 4 credits. Not offered 1999–2000. M. Kammen.
The focus will be the relationship between government and culture in historical perspective. After three contextual sessions devoted to 19th-century background, we will mainly be concerned with the period from the 1930s to the present. Several comparative sessions will be devoted to government as a patron of culture in other societies. A research paper is required.]

[HIST 607 Writing Seminar on African-American Women
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. M. Washington.
This course is designed for students actively engaged in a writing project on African-American women's history. Students must have already done the research and most of the reading for their papers prior to enrollment. Reading and class discussion will focus on style, methodology, and theory. An extensive research paper is due at the end of the semester.]

HIST 608 African-American Women
Spring. 4 credits. Prerequisite: permission of instructor. Letter only. M. Washington.
A reading and discussion topics seminar focusing on the experiences of African-American women in nineteenth-century America, including the Caribbean. Topics include women and labor, abolitionism, women's rights, sexuality and race relations, education and racial uplift, black women's literature, marriage and family.

[HIST 610 Afro-American Historiography
Fall. 4 credits. Letter only. Not offered 1999–2000; next offered 2000–2001. M. Washington.
Reading and discussion course focusing on the way historians write and interpret the Black experience in America. Students will be concerned with individual historians, various schools of thought, and historical approaches.]

[HIST 613 Seminar on American Diplomatic History
Fall. 4 credits. Not offered 1999–2000; next offered 2000–2001. T. Borstelmann.
A reading and research seminar in twentieth-century American diplomatic history, emphasizing the Cold War period and interpretive approaches to U.S. foreign policy. A research paper is required.]

[HIST 617 Seminar in American Cultural History
4 credits. Not offered 1999–2000. Semester/TBA. R. L. Moore.]

HIST 618 Seminar in American Cultural History
Spring. 4 credits. R. L. Moore.
A reading and research seminar concerning selected topics in nineteenth century America.

HIST 621 Graduate Seminar in American Cultural History
Fall. 4 credits. M. Kammen.
The history of cultural criticism in the U.S. during the 20th century. Emphasis on the problem of cultural stratification and on the shifts from genteel to popular mass culture. A research paper will be required.

[HIST 624 Graduate Seminar in American Indian History (also American Indian Studies 624)
Spring. 4 credits. Not offered 1999–2000. D. Usner.
This seminar examines, through a selected series of major topics and problems, the historical study of North American Indians. Various approaches in history—together with anthropology, political science, folklore, and other disciplines—are explored. Emphasis is placed on current interpretations and directions.]

[HIST 626 Graduate Seminar in the History of American Women (also Women's Studies 626)
Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. M. B. Norton.
A reading and research seminar intended primarily for graduate students. Major works in American women's history will be carefully scrutinized, and each student will prepare a lengthy research paper.]

HIST 627 Graduate Seminar in Early American History
Fall. 4 credits. Prerequisite: permission of instructor. M. B. Norton.

[HIST 633 Seminar in Nineteenth-Century American History
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. J. Silbey.]

[HIST 634 Seminar in Nineteenth-Century American History
Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. J. Silbey.
A research seminar intended primarily for graduate students exploring society, culture, and politics of the United States between 1815 and 1896.]

[HIST 640 Graduate Seminar in Recent American History
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. R. Polenberg.
A graduate research seminar that will examine American legal and constitutional history.]

[HIST 683 Seminar in American Labor History (also ILRCB 783)
Fall. 3 credits. Prerequisites: graduate students only. Not offered 1999–2000. N. Salvatore.
For description, see ILRCB 783.]

[HIST 710 Colloquium in American History
Spring. 4 credits. Required of all first-year graduate students in United States history. Not offered 1999–2000. M. Kammen.
Examination of major approaches, periods, issues, and modes of interpreting American history. Readings include recent "classics" of American scholarship from diverse subfields and genres.]

Latin American History

HIST 249 Race and Class in Latin American History
Fall. 4 credits. Prerequisite: permission of instructor. T. Holloway.
This seminar focuses on ethnic interaction and class formation in the historical development of Latin American societies considering the roles of Native Americans, Europeans, and Africans. Each unit will be approached as an analysis of the historical origins of contemporary patterns, and comparisons will be made among units, in a search for underlying and overarching themes.

HIST 295 Colonial Latin America @ #
Fall. 4 credits. M. Roldan.
Survey of Spanish America from the rise of pre-Columbian civilizations through the European conquest, the establishment and development of colonial societies, imperial rivalries in the New World, the background of the independence movements, and the achievement of political independence.

HIST 296 Modern Spanish America @
Spring. 4 credits. T. Holloway.
Survey of the Latin American nations from independence to the present. Major themes include the persistence of neocolonial economic and social institutions, the development of nationalist and populist politics, revolutionary movements of the twentieth century, and United States–Latin American relations.

HIST 347 Agrarian Societies in Latin American History @ #
Spring. 4 credits. T. Holloway.
The development of rural patterns of wealth, status, and power, focusing on the role of country people in the larger society. Topics include disruption of the conquest, evolution from encomienda to hacienda, rise of plantation agriculture and export enclaves, decline of Indian communities, peasant protest, and land reform and development programs of the recent past.

HIST 348 History of Brazil @
Fall. 4 credits. T. Holloway.
A survey of Brazilian history from colonial times to the present. Recent topics include the import-substituting growth model, contradictions leading to military rule 1964–1985, transition to competitive politics, debt, ecology, regional and social disparities. Some comparisons are made to other Latin American countries.

[HIST 424 Art and Politics in Twentieth-Century Latin America
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. M. Roldan.
This seminar will examine how the intersection of art and politics shaped culture, ideology, and identity in Latin America from the Mexican Revolution to the dictatorships of the late twentieth century. Topics may include muralism and the Mexican Revolution; the artist as muse and activist (Frida Kahlo); working class and immigrant culture in Argentina and the tango; samba as social and political protest in Brazil; gender and politics in exiled women's literature; the appropriation of public spaces as artistic forum and means of communication under authoritarian regimes.]

HIST 445 Prostitutes and Patriots: Urban Culture and the Construction of Citizenship in Latin America, 1880–1950 (also History 645)
Fall. 4 credits. Prerequisites: History 295 and/or 296 suggested. Permission of instructor required. Enrollment limited to 15. M. Roldan.
Unprecedented demographic and economic changes gave rise to debates by the late nineteenth century regarding the definition of citizenship and the limits of individual participation in Latin American societies. These debates centered on the city—the symbol of both "progress" and "disorder". Rising tensions were expressed through the trope of the "prostitute" (disease and loss of control) and the "patriot" (science, statesmanship and order). The course examines changing notions of the private/public; the regulation of sexuality and gender; popular mobilization; and the construction of the nation.

HIST 470 Violence, Nation, Myth: The Americas (1770–1940).
Spring. 4 credits. M. Roldan and S. Samuels.
Marchum Seminar. This course considers the concept of violence in two different cultural contexts (the United States and Latin America) and from a range of perspectives: historical, literary, theoretical, and political. A central assumption is that violence has played a critical role in shaping discourses about the nation, everyday life, individual identity, and citizenship in the Americas. We will examine the intersection of domestic and national violence and myth, and the significance of frontiers, borders, and marginality as these are contested in struggles over slavery, family violence, transnational migration, and sexual, racial or ethnic identity.

[HIST 649 Seminar in Latin American History
Spring. 4 credits. Not offered 1999–2000. Staff.]

African History

[HIST 255 Cultures and Ecology in Precolonial Africa @ #
Fall. 4 credits. Not offered 1999–2000; next offered 2001–2002. S. E. Greene.
This course will examine the history of Africa, from the origins of humankind up to 1800 by focusing on a number of controversial issues about the African past. Why did humankind emerge in Africa? Who were the ancient Egyptians? What "race" were they and is this important anyway? If so, why? How did the ecological environments of the past shape African cultures and their histories? What role did women play in early African societies and what can this information tell us about how human societies have operated from time immemorial? What role did the slave trade play in influencing the current economic position of Africa and race relations in the U.S. today?]

[HIST 391 Riot and Revolution in Nineteenth Century Africa: The Birth of the Modern
Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. S. E. Greene.
The beginning of the nineteenth century witnessed the rapid and often times forceful expansion of Islam in West Africa, the end of the Atlantic slave trade, the transformation of the Zulu from a small, inconsequential people to the largest and most powerful ethnic group in South Africa, and the wild fire spread of Swahili as a lingua franca in east and central Africa. This course explores these revolutionary changes and the upheavals that accompanied them as Africa remade itself to face the modern era. Lectures, readings and discussions will focus on the causes and consequences of these events and their significance for understanding contemporary Africa.]

[HIST 407 The Colonial Encounter
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. S. Greene.
The course examines the way colonizer and colonized influenced the culture, history and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself as well as both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, Netherlands) with the states they colonized in Africa and Asia. This linkage challenged, at different times in different places, pre-existing understandings of self, country, and culture, as well as notions about the other.]

[HIST 434 Gender and Sexuality in the Social History of Africa (also Women's Studies 477) @ #
Spring. 4 credits. Not offered 1999–2000. S. Greene.
This course will examine the history of gender relations in Africa during the precolonial and colonial periods. Among the questions to be explored: what was the nature of gender relations in precolonial Africa; how were these relations affected by the entrance of Islam, the Atlantic slave trade, and other changes that affected particular African societies; what factors influenced the nature and extent of that impact; how did African men and women define gender and sexual identities and how did particular historical forces such as colonialism and the entrance of Christianity and Islam affect these identities.]

HIST 443 The European as Other (also S HUM 404)
Fall. 4 credits. Prerequisite: permission of instructor. Limit 15. S. Greene.
For description see S HUM 404.

Asian History

[HIST 190 Introduction to Asian Civilizations @ #
Spring. 4 credits. Not offered 1999–2000. C. Peterson, D. Wyatt.
An introduction to the distinctive cultures of China, India, Japan, and Southeast Asia that features an intensive examination of selected topics and periods of particular significance in the history of each.]

HIST 191 Introduction to Modern Asian History @
Fall. 4 credits. S. Cochran, T. Loos.
The history of Asia-Pacific from the nineteenth century to the present, focusing on relations of China, Japan, and Southeast Asia with each other and with the West.

HIST 207 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also Asian Studies 207)
Spring. 4 credits. Letter grade only. T. Loos.

Students read travel literature written by white westerners about Southeast Asia in the 19th and early 20th centuries. The course also assigns primary texts (in translation) by Southeast Asians about their travels abroad and about white westerners in their home countries. Introduces the concept of Orientalism and explores cultural transformation in the 'contact zone.'

HIST 218 Introduction to Korea (also Asian Studies 218)
Fall. 3 credits. Y. J. Park.
For description see Asian Studies 218.

HIST 230 Seminar in History and Memory: The Asia-Pacific War
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. J. V. Koschmann.
This seminar will examine what is at stake when the fighting between Japan and its former enemies in the Pacific during World War II is remembered, memorialized, and (re)constructed as historical narrative by Japanese, Americans and others. By exploring the legacies of such events and processes as the Rape of Nanking, live testing of biological and chemical warfare agents, sexual slavery, and incendiary bombings of Hiroshima and Nagasaki, the seminar will offer an opportunity to reflect in a more general way on the politics of historical representation and memory.

[HIST 243 Seminar: China and the West before Imperialism @ #
Spring. 3 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. C. Peterson.
What accounts for the first great passion for things Chinese in the West (from the sixteenth to the nineteenth centuries) followed by the hostility characteristic of imperialism? This seminar explores this question relying heavily on original sources to trace the China vogue in thought, literature and art and comparing the Western image with the realities of China of that day.]

[HIST 244 Seminar: History of Siam and Thailand
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000. D. Wyatt.
An examination of the long history of the central position of the Indochina Peninsula, based on close reading of the primary sources (in translation).]

HIST 289 The U.S. Vietnam War (also Asian Studies 298)
Spring. 3 credits. K. W. Taylor.
This course will survey events in Vietnam, the U.S., and elsewhere related to the U.S. policy of intervention in Vietnam between 1954 and 1975. Readings will include historical narratives, memoirs, and literature. The course will evaluate the standard winner (Hanoi) and loser (U.S.) narratives and how they have silenced southern Vietnamese voices.

HIST 293 History of China up to Modern Times @ #
Fall. 4 credits. C. A. Peterson.
A survey of the principal developments in the history of China from the earliest times to the eighteenth century that also undertakes a topical introduction to Chinese culture and civilization, in part by the use of visual materials.

HIST 294 History of China in Modern Times @
Spring. 4 credits. S. Cochran.
A survey that concentrates on the rise of the last imperial dynasty in the seventeenth and eighteenth centuries, the upheavals resulting from domestic rebellions and foreign imperialism in the nineteenth century, and the twentieth-century efforts to achieve social mobilization, political unity, and commercial expansion.

[HIST 297 Japan Before 1600 @ #
Fall. 4 credits. Not offered 1999–2000. J. Piggott.
This course explores Japan before 1600 from a variety of perspectives. Analysis of primary sources, including literary and archaeological artifacts, is emphasized. History 297 is a good introduction to issues of premodern historical study and to the general study of East Asia. (Graduate students or more advanced undergraduates who would like to do a research project should register for History 497).]

HIST 298 State, Society, and Culture in Modern Japan @
Spring. 4 credits. J. V. Koschmann.
A survey of Japan from early-nineteenth century to the present, which attempts to connect the political, socio-economic, and imaginative realms of modern Japanese life so as to achieve a complex view of modern Japanese society. Pays particular attention to the changing situation of women and women's movements, Japan's relations with Asia and the U.S., and problems of historical representation and consciousness. Readings will include Japanese works in translation as well as secondary sources.

[HIST 322 History of *Samurai* # @
Spring. 4 credits. Not offered 1999–2000. J. Piggott.
This course explores the role of the *samurai* at various epochal moments, and the effects *samurai*-centered governance has had on society and culture writ broadly up to the early modern era. This is very much a hands-on course in which analysis and writing are emphasized. Graduate students are welcome but they should register for History 522 after consultation with the instructor.]

HIST 326 History of the Samurai II
Fall. 4 credits. J. Piggott.
We will continue study of themes and issues introduced in History 322, wherein we traced the origins of the *samurai* from eighth-century roots through the era of the first *bakufu*, or warrior government, during early medieval times. This course will cover the *samurai* during the remaining centuries of the medieval age, through 1600.

[HIST 360 Early Warfare, East and West #
Spring. 4 credits. Not offered 1999–2000. C. A. Peterson.
For description see Comparative History.]

[HIST 388 Vietnamese Histories (also History 688 and Asian Studies 385/685)
Fall. 3 credits. Not offered 1999–2000. K. Taylor.
For description see Asian Studies 385.]

[HIST 393 Images of Humanity in Medieval China (also Asian Studies 393) @ #
Fall. 4 credits. Permission required. Not offered 1999–2000. C. A. Peterson.]

HIST 395 Southeast Asia to the Eighteenth Century @ #
Fall. 4 credits. D. Wyatt.
A survey of the earlier history of Southeast Asia, concentrating particularly on regional movements of economic, social, cultural, and political change and using, to the extent possible, readings in translated primary sources.

HIST 396 Southeast Asian History from the Eighteenth Century (also Asian Studies 396)
Spring. 4 credits. S-U option. T. Loos.
Surveys the modern history of Southeast Asia with special attention to colonialism, the Chinese diaspora, and socio-cultural institutions. Considers global transformations that brought "the West" into people's lives in Southeast Asia. Focuses on the development of the modern nation-state, but also questions the narrative by incorporating groups that are typically excluded. Assigns primary texts in translation.

HIST 416 Undergraduate Seminar on Gender and Sexuality in Southeast Asia (also Asian Studies 416 and Woman's Studies 416)
Fall. 4 credits. Letter grade only. T. Loos.
Students consider the relationships among colonialism and gender and sexual identity formation in Southeast Asia. Using material from a wide range of fields including anthropology and literature, the course complicates a simplistic East/West and male/female binary.

[HIST 420 Japan in the Year 1000: *The Tale of Genji* in Historical Perspective @ #
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. Piggott.
The tale of Genji is a classic of premodern Japanese literature that provides readers a broad view into Japan's courtly society at a time when many of the elements of Japan's classical tradition were taking form. Additional primary source readings and secondary sources provide insight into the countryside beyond the capital as well. Previous study of premodern Japan is advised.]

HIST 422 China Goes Global (also S HUM 422, ASIAN 420, COM L 444)
Spring. 4 credits. Prerequisite: permission of instructor. Limited to 15 students.
For description see S HUM 422.

[HIST 448 Family and Gender Relations in Premodern Japan # @
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. Piggott.
An inquiry into structures of family and gender relations in the classical and medieval periods. Themes will include kinship and family organization, state formation, and gender construction. Those interested in comparative perspectives are encouraged to enroll. "Breadth" reading, primary source materials, and comparative reading placing Japan in an East Asian context will be emphasized. Previous study of premodern Japan and East Asia is recommended.]

[HIST 466 Kings and Shoguns: the *Taiheiki* Age @ #
Spring. 4 credits. Not offered 1999–2000. J. Piggott.
The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-*Bakufu* relations, land-holding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenno's royal restoration. Core readings of the seminar will include portions of the martial epic, the *Taiheiki*, and other materials from which insights into these transformations can be drawn. Previous study of Japanese history, especially History 322, is highly recommended.]

[HIST 489 Seminar in Modern Japanese History @
Fall. 4 credits. Prerequisites: History 298 or equivalent. Not offered 1999–2000. J. V. Koschmann.]

HIST 490 Tales of the Heike—A Marcham Seminar (also Asian Studies 490 and Soc Hum 489)
Fall. 4 credits. Prerequisite: previous study of pre-1600 Japan or permission of an instructor. Limited to 12 students. K. Brazell and J. Piggott.
Medieval Japan was crisscrossed by a growing assortment of itinerant, traditionally blind, minstrel monks who sang the heroic exploits of fighting men of the late twelfth century. The cantos of the *Tales of the Heike* (*Heike Monogatari*) were reportedly woven together by a master chanter named Kakuichi in the 14th century. The cultural historian, Barbara Ruch, has called the *Heike* "Japan's first national epic," because listening to it, enjoying it, identifying with it brought strata and regions together like nothing had ever done before. This seminar will bring a literary specialist and a historian together to lead a group of students in investigating the *Heike* from both literary and historical perspectives.

HIST 492 Undergraduate Seminar in Medieval Chinese History @ #
Fall. 4 credits. Prerequisite: History 190, 293, 360, or permission of instructor. C. A. Peterson.
Topic for fall 1999: China and the nomads, an in-depth examination of their often hostile relations with a comparative unit devoted to Byzantium and its nomadic neighbors.

HIST 493 Problems in Modern Chinese History (also History 693) @
Fall. 4 credits. Prerequisite: History 294 or permission of instructor. S. Cochran.
Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

[HIST 495 Asian Kingship and State Formation @ #
Fall. 4 credits. Prerequisite: previous coursework in premodern East Asian history and consultation with the instructor. Not offered 1999–2000. J. Piggott.
The seminar will explore kingship and state formation in comparative perspective. Readings will include theoretical and ethnohistorical work on societies across the globe, East and West. In addition to participating in discussions focused on core readings, seminar members will undertake research projects targeting societies of their choice. Students with an interest in the history of preindustrial societies, political and cultural anthropology, and religion will find the seminar stimulating.]

[HIST 497 Colloquium in Premodern Japanese History @ #
Fall. 4 credits. Not offered 1999–2000. J. Piggott.
Explores the premodern civilization of Japan from a variety of historical perspectives. Students will attend History 297 lectures and participate in a special weekly colloquium.]

HIST 499 Problems in Modern Chinese History (also History 694) @
Spring. 4 credits. Prerequisite: History 294 or permission of instructor. S. Cochran.
This course gives each student an opportunity to select one research topic and work on it throughout the semester. Knowledge of Chinese is not required, but background in Chinese studies is needed.

[HIST 588 Proseminar in Modern Korean History
Spring. 4 credits. Prerequisite: a course on East Asian history or equivalent. Not offered 1999–2000. J. V. Koschmann.
Designed primarily for graduate students in East Asian Studies who specialize in Chinese and/or Japanese history but need for comparative or other purposes to develop a familiarity with the main problems and contours of modern Korean history. Readings will be selected primarily from English-language works on Korea from the 1870s through the post-World War II era, including Japanese colonial policy and practice in Korea, the Korean War, and the postwar history of the Republic of Korea.]

HIST 598 Colloquium in Modern Japanese History
Spring. 4 credits. J. V. Koschmann.
For graduate students only. Students will attend lectures and do the reading for History 298, participate in a special weekly colloquium, and write a seminar paper.

HIST 609 Modern Japan Studies: The Formation of the Field in History and Literature (also Asian Studies 609)
Fall. 4 credits. J. V. Koschmann and N. Sakai.
The course will provide both a historical introduction to and critical analysis of the constitution of modern Japan studies as a "field" of postwar academic inquiry. While reading texts particularly influential in the early and contemporary formation of the field, we will consider such questions as the domestic and international contexts in which Japanese studies has been institutionalized and maintained, and the relationship between "Japan" as object of area studies discourse and "Japan" as represented in American journalism, popular culture, and politics. Interdisciplinary and team-taught, the course will aim to introduce students to a range of methodologies and approaches developed in historical and critical works, problematizing assumptions in each case. Possibilities for cross-disciplinary research (along lines recently undertaken in areas such as feminist criticism and cultural studies, for example), will also be explored.

[HIST 688 Vietnamese Histories (also History 388 and Asian Studies 385/685
Fall. 3 credits. Not offered 1999–2000. K. Taylor
For description see Asian Studies 385.]

[HIST 691 Chinese Historiography and Source Materials
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. Peterson.]

HIST 693 Problems in Modern Chinese History (also History 493)
Fall. 4 credits. Prerequisite: permission of instructor. S. Cochran.
Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

HIST 694 Problems in Modern Chinese History (also History 499)
Spring. 4 credits. Prerequisite: permission of instructor. S. Cochran.
For description, see HIST 499.

HIST 695 Early Southeast Asia: Graduate Proseminar
Fall. 4 credits. D. Wyatt.
Introduction to the history of Southeast Asia for graduate students.

[HIST 696 Modern Southeast Asia: Graduate Proseminar
Spring. 4 credits. Not offered 1999–2000.
Introduction to the modern history of Southeast Asia for graduate students. Students will be expected to attend the lectures and complete the readings for History 396, and they will meet separately as a group to further explore selected topics.]

[HIST 791 Seminar in Medieval Chinese History
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. A. Peterson.]

[HIST 792 Seminar in Medieval Chinese History
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. A. Peterson.]

[HIST 795 Seminar in Modern Southeast Asian History
Fall. 4 credits. Permission of the instructor. Not offered 1999–2000.]

HIST 796 Seminar in Southeast Asian History
Spring. 4 credits. Prerequisite: reading knowledge of relevant languages. D. Wyatt.

HIST 797 Seminar in Japanese Thought
Spring. 4 credits. Prerequisite: reading knowedge of Japanese and permission of instructor. J. V. Koschmann.

[HIST 798 Seminar in Japanese Thought
4 credits. Prerequisite: reading knowedge of Japanese and permission of instructor. Not offered 1999–2000. J. V. Koschmann.]

Near Eastern History

HIST 206 From Empire to Empire: Palestine under late Ottoman and British Rule, 1799–1948 (also Near Eastern Studies 265)
Fall. 4 credits. M. LeVine.
This course examines the social history of Palestine during the late Ottoman and Mandate periods from a variety of disciplinary perspectives with the goal of helping students better understand the continuities of changes that occurred in the transition from Ottoman to British rule.

HIST 253 Introduction to Islamic Civilization I (also Near Eastern Studies 255, Religious Studies 255)
Spring. 3 credits. D. Powers.
For description see NES 255.

[HIST 254 Islamic History: 600–1258 (also Near Eastern Studies 257 and Religious Studies 257) @ #
Fall. 3 credits. Not offered 1999–2000. D. Powers.
For description, see NES 257.]

[HIST 317 Islamic History: The Age of Ibn Khaldun (also Near Eastern Studies 356)
Spring. 4 credits. Prerequisite: NES 257 or equivalent. Not offered 1999–2000. D. Powers.
For description, see NES 356.]

[HIST 372 Introduction to Islamic Law (also History 652, Near Eastern Studies 351/651, Religious Studies 350) @ #
Fall. 4 credits. Enrollment is limited to 25 students. Not offered 1999–2000. D. Powers.
For description, see NES 351.]

[HIST 461 Seminar in Islamic History 600–750 (also History 671, Near Eastern Studies 451 and 650, and Religious Studies 451) @ #
Spring. 4 credits. Enrollment is limited to 25 students. Not offered 1999–2000. D. Powers.
For description, see NES 451.]

[HIST 652 Introduction to Islamic Law (also History 372, Near Eastern Studies 351/651, Religious Studies 350)
Fall. 4 credits. Enrollment is limited to 25 students. Not offered 1999–2000. D. Powers.
For description, see NES 351.]

[HIST 671 Seminar in Islamic History (also History 461, Near Eastern Studies 451, and 650, and Religious Studies)
Spring. 4 credits. Not offered 1999–2000. D. Powers.
For description, see NES 451.]

Ancient European History

HIST 151 Introduction to Western Civilization #
Summer and fall. 4 credits. S. Pohl.
A survey of European history from Antiquity to the Renaissance and Reformation. Important themes will include the influence of ancient culture on medieval society, the development of and conflict between secular and ecclesiastical governments, European encounters with the non-Europeans, the culture and role of minority groups within European society, and the roles of women.

HIST 203 War and Diplomacy in Korea
Spring. 4 credits. B. Strauss.
Korea's challenging location between great powers, its long struggle between independence and outside control, and its tragic division, all make for a singular case study in the history of war and diplomacy. This course will examine that history with particular focus on the Imjin War (1592–1598) and the Korean War (1950–1953). Topics include geopolitics, military tactics and strategy on the Korean peninsula, Admiral Yi Sun-Shin as strategist and tactician, the effect of war on Korean society; and the pattern of Korean relations with China, Japan, Russia (and other northern Asian powers), and the United States.

[HIST 228 Seminar: War and Peace in Greece and Rome
Fall. 3 credits. Not offered 1999–2000. B. Strauss.
A study of war and peace in the ancient Mediterranean world in light of modern theories of international relations. The course will test the validity of modern theories against ancient models and will ask what the ancient experience can contribute to modern theory and practice. Case studies include the Peloponnesian War, the Second Punic War, Alexander's conquests, and the defense of the Roman Empire.]

[HIST 232 Seminar: Eyewitness to War in the Ancient World
Fall. 3 credits. Not offered 1999–2000; next offered 2000–2001. B. Strauss.
A study of ancient soldier-historians who participated in the campaigns about which they later wrote. Topics include historicity, autobiography, propaganda, prose style. Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus, Ammianus Marcellinus as well as, for comparative purposes, modern soldier-historians.]

HIST 265 Ancient Greece from Homer to Alexander the Great #
Spring. 4 credits. Open to freshmen. B. Strauss.
A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture.

[HIST 268 A History of Rome from Republic to Holy City #
Summer and spring. 4 credits. Open to freshmen. Not offered 1999–2000; next offered 2000–2001. J. Ginsburg.
A survey of Rome and its empire from the beginning to late antiquity. This course will explore the formation of Rome's Mediterranean empire and its political, social and economic consequences; the constitutional and social struggles of the late Republic; the transition from Republic to Principate; society and state under the Caesars; the nature and limits of governing a world empire; the interaction of pagans, Christians and Jews in the Roman world.]

[HIST 367 Representations of Women in Ancient Greece and Rome (also Classics 363 and Women's Studies 363)
Spring. 4 credits. Not offered 1999–2000. L. Abel and J. Ginsburg.
For description, see Class 363.]

[HIST 452 The Tragedy of Classical Athens, 462–404 B.C. #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. B. Strauss.
The nature of Athenian democracy, society, and culture in the "golden age" of Athens. The course will examine the influence of Athenian political life on the great tragedians of the age and the influence of tragedy on the Athenians' conception of their character and history. Readings from Herodotus, Thucydides, Aeschylus, Sophocles, Euripides, Aristophanes, Plato, Aristotle, and Plutarch.]

[HIST 453 Crisis of the Greek City-State, 415–336 B.C. #
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000; next offered 2000–2001. B. Strauss.
The fortunes of the city-state and citizen in an age of uncertainty. The focus is on Athens with some attention paid to the wider Greek world. Topics include the nature of Athenian politics, Athenian society, cultural change, and war between the city-states, crisis as a historical concept, and anthropology and ancient Greece. Readings in translation include Thucydides, Sophocles, Euripides, Aristophanes, Plato, Aristotle, Demosthenes, and Xenophon.]

[HIST 463 Gender and Politics in the Roman World (also Classics 463 and Women's Studies 464) #
Not offered 1999–2000. J. Ginsburg.
For description, see CLASS 463.]

HIST 464 Murder, Warfare and the State: Violence in Europe, 1300–1800
Fall. 4 credits. Permission of instructor. S. Pohl.
An inquiry into forms of and attitudes toward violence in late medieval and early modern Europe. Questions to be explored include: How violent was premodern Europe compared to modern Europe? How did the various cultural legitimations of violence change over time? We will examine these questions by analyzing forms of interpersonal violence as well as violence orchestrated by the state, such as warfare and capital punishment.

HIST 469 Equality and Inequality in Ancient Greece (also Classics 469)
Fall. 4 credits. Prerequisite: History 265, Classics 211 or 217, or written permission of the instructor. B. Strauss.
We will examine equality and inequality in Archaic and Classical Greek city-states ca. 650–400 B.C., with an eye toward politics, society and economics, culture, and gender relations. The course will focus on concepts and institutions such as ancient democracy, tyranny, and oligarchy, "middling" ideology, and slavery, as well as theories of equality. All readings in English.

[HIST 473 Roman Society and Politics under the Julio-Claudians (also Classics 480) #
Spring. 4 credits. Prerequisite: Classics 212, History 268, or permission of instructor. Not offered 1999–2000. Next offered 2000–01. J. Ginsburg.
For description, see Classics 480.]

HIST 630 Topics in Ancient History (also Classics 632)
Fall. 4 credits. B. Strauss.

Medieval, Renaissance, and Early Modern European History

HIST 151 Introduction to Western Civilization #
Fall. 4 credits. S. Pohl.
For description see Ancient European History.

HIST 152 Introduction to Western Civilization #
Summer and spring. 4 credits.
R. L. Moore and M. Steinberg.
For description see Modern European History.

[HIST 204 Seminar: Age of Atlantic Revolution
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000. R. Weil.
"All the Atlantic Mountains shook," wrote the poet William Blake of the revolutions which toppled regimes across Europe and the Americas at the end of the 18th century. This course will explore the ideas, outcomes and connections among events in America, France, Haiti, and Britain, through literary and philosophical texts: Wordsworth, Rousseau, Jefferson, Paine, Burke, Godwin, Tocqueville, and even Jane Austen.]

HIST 211 Specters, Demons and the Dead in European Society, 1200–1800
Spring. 4 credits. S. Pohl.
Premodern Europeans believed that they could interact with supernatural apparitions in a variety of ways. The dead could return to admonish the living, demons might possess men and women, houses could be haunted by specters and poltergeists. What can we learn from a study of these beliefs about the ways in which Europeans regarded sin, punishment, the afterlife, and the role of the devil in their lives? What was the impact of the Reformation or the scientific revolution on these beliefs?

[HIST 231 Seminar: Witchcraft, Magic, and the Occult in Europe, 1400–1700 #
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000. S. Pohl.
A study of attitudes toward magic, witchcraft, astrology, specters and demons in late medieval and early modern Europe and what they reveal to us about religious beliefs, concepts of community, and gender relations. Special attention will be given to the role the Christian Church claimed in defining the occult: which aspects it legitimated and which it condemned. Other topics include the influence of humanism, the Reformation, and the Scientific Revolution on attitudes toward the occult. We shall also undertake an analysis of the historiographical model which opposes "elite" to "popular" ideas. The course emphasizes close analyses of primary works, including literary and visual sources.]

[HIST 233 Seminar: The Politics of Religion in Early Modern Europe
Spring. 4 credits. Not offered 1999–2000. R. Weil.
We will look at the impact of the reformation, counter-reformation and wars of religion on aspects of political, social and cultural life in 16th-and 17th-century Europe, exploring shifts in gender relations, the problem of social control, the effect of religious conflict on the power of the state and its contested boundaries with the church, the relationship of elite and popular religion, and the encounter of European missionaries with other cultures. Students will engage with major historiographical interpretations of the period, as well as with the close reading of primary sources.]

[HIST 234 Seminar: Gender in Early Modern Europe (also WOMNS 234)
Spring. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000. R. Weil.
An inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?]

[HIST 257 English History from Anglo-Saxon Times to 1485 #
Fall. 4 credits. Not offered 1999–2000; next offered 2001-2002. P. Hyams.
A survey of the government, social organization, and cultural and religious experience of the English people. Particular stress is laid on land settlement, the unification of the realm, the emergence of state institutions such as Parliament, and changes in economic organization (manors, towns and commerce). The approach will be comparative within a context of contemporary European developments. The course offers students who wish to work on their writing skills an opportunity to do so, especially in the second paper.]

[HIST 259 The Crusades # @
Fall. 4 credits. Not offered 1999–2000; next offered 2000–2001. P. Hyams.
A lecture course examining the Crusading Movement and the States it produced from the eleventh century to the fall of the mainland Kingdom of Jerusalem in 1292. The historical themes this generates are almost unlimited. The course treats the Christianity and Chivalry of the Medieval West, the confrontation of this culture with those of the Mediterranean and Islam, and what is perhaps the cradle of Western Colonialism. The very concept of "Crusade" itself is problematic today and will continue to cast its shadow on U.S. dealings with the Middle East. The sometimes spectacular readings allow students to choose from a very wide range of paper topics, and enjoy an excellent introduction to every aspect of the long-gone world of the Middle Ages.]

[HIST 262 The Middle Ages: Introduction and Sampler (also Religious Studies 265) #
Fall. 4 credits. Not offered 1999–2000. P. Hyams.
As a single-semester introduction to the period, this survey aims to convey what was significant in that area of the "West" that was to become Europe, between the end of the Roman Empire in the West and the Renaissance, from 395 to 1400. It thus takes a critical look at a formative period of Western Civilization. The course is organized into modules. The first of which surveys in five weeks the main public developments in Political and Church History over the period. Other modules focus in some depth on select aspects, such as technology, music, material resources and religions, to other choice samples from the best of medieval culture. . The emphasis is on students finding their own ways to win credit.]

HIST 263 The Earlier Middle Ages (also Religious Studies 263) #
Fall. 4 credits. J. J. John.
A survey of medieval civilization from ca. 300 to ca. 1100 dealing with religious, intellectual, political, and economic developments in Western Europe.

[HIST 264 The High Middle Ages #
Fall. 4 credits. Not offered 1999–2000. P. Hyams.
A survey of medieval civilization 1100–1400, dealing with political, economic, religious, and intellectual developments in Western Europe. Special attention will be paid to the interaction of different kinds of history and to the historian's understanding of literature and its use as a primary source. Lectures and class discussions.]

HIST 275 Authority and Resistance in Europe, 1400–1600 #
Spring. 4 credits. S. Pohl.
A lecture course examining the political, cultural and social transformations during the Reformation era through an exploration of aspects of state formation and ecclesiastical order, social and religious protest and deviant behavior. Specific topics to be covered include the Protestant Reformations and the emergence of confessional churches, law and crime, the peasant rebellions and the early modern witch hunts.

HIST 349 Early Modern England #
Spring. 4 credits. R. Weil.
This course will explore the crises of political, religious, and epistemological authority that plagued England in the sixteenth and seventeenth centuries. We will examine the political and cultural impact of the Protestant Reformation, the nature of Tudor despotism and Stuart absolutism, the construction of a rhetoric of political dissent around issues of sexuality and corruption, competing understandings of the social order and social control, the Puritan Revolution and the invention of liberalism. Emphasis on close reading of contemporary sources, from autobiography and drama to political theory.

HIST 350 The Italian Renaissance (also Romance Studies 221) #
Fall. 4 credits. J. Najemy.
An exploration of intellectual, cultural, religious, and political developments in Italy from the political thought of Dante and Marsilius in the age of the communes, through the several stages of Humanism from Petrarch

to Alberti to Pico, down to the crisis of Italian liberity in the generation of Machiavelli, Guicciardini and Castiglione. The course will seek to problematize the notion of a "Renaissance" in the period's ambivalent attitudes toward history, politics, learning, culture, gender, language, and the role of intellectuals in politics and society. Emphasis will be placed on the close reading of primary sources and on issues of interpretation.

HIST 351 Machiavelli (also Romance Studies 351) #

Spring. 4 credits. J. Najemy.
This course will present Machiavelli in a variety of historical and interpretive contexts: European and Italian politics in the early sixteenth century; the decline of the Florentine republic and the rise of the Medicean principate; Machiavelli's own career in government and his, and the republic's, crisis in 1512–13; the intellectual traditions of Renaissance humanism, political thought, and the revival of antiquity; vernacular literary currents and popular culture; and the remarkable generation of political figures, writers, and theorists with whom Machiavelli associated and corresponded. Emphasis will be placed on a close reading of the major works (including the letters, *The Prince,* the *Discourses, Mandragola,* and selections from *The Art of War* and the *Florentine Histories,* all in translation) and a critical examination, in the light of that reading, of some major modern interpretations of Machiavelli.

HIST 361 The Culture of the Renaissance I (also History of Art 350 and Comparative Literature 361) #

Spring. 4 credits. J. Najemy, C. Lazzaro.
An interdisciplinary exploration of some major themes of Renaissance society and culture from the fourteenth to the sixteenth centuries. Through texts and works of art we investigate Renaissance discourses of antiquity and authority, education and learning, religion and lay culture, politics, gender and family, love and eros, and cross-cultural encounters.

HIST 364 The Culture of the Renaissance II (also Comparative Literature 362, English 325, Religious Studies 362, Music 390)

Spring. 4 credits. Open to freshman with permission. C. Kaske, W. Kennedy.
For description, see COM L 362.

[HIST 365 Medieval Culture, 400–1150 (also Religious Studies 365) #

Fall. 4 credits. Prerequisite: History 263 or permission of instructor. Not offered 1999–2000. J. J. John.
Intellectual and cultural developments in the age of monasticism, from St. Augustine and St. Benedict to St. Anselm and St. Bernard of Clairvaux.]

HIST 366 Medieval Culture, 1100–1300 (also Religious Studies 366) #

Fall. 4 credits. Prerequisite: History 264 or permission of instructor. J. J. John.
The origin and development of the universities will be studied as background for a consideration of the scholastic mentality and its influence on the art, literature, philosophy, science, script, and theology of the period. Readings from Abelard, Hugh of St. Victor, Bonaventure, Thomas Aquinas, Dante, and others.

HIST 368 Marriage and Sexuality in Medieval Europe (also Religious Studies 368, Women's Studies 368) #

Spring. 4 credits. P. Hyams.
Few topics generate heat so readily as gender relations and sexuality. Behind the current controversies lie decisions made in the first Christian centuries, and firmed up in the course of the Middle Ages; these still affect all of us, believers and unbelievers alike. This course studies Western attempts to deal with the problem of sexuality up to about 1500. The class will first clarify the church's normative rules of law and theology. Armed with this framework, it will then turn to more specific topics, including homosexuality, prostitution, rape/abduction and sexuality in medieval literature. The goal is to be able to compare the ideal model with the reality, and thus to assess the product the medieval church passed on to Western culture and ourselves. No formal prerequisite, though some prior knowledge of medieval European history is desirable.

[HIST 369 The History of Florence in the Time of the Republic, 1250–1530 #

Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. J. Najemy.
Florentine politics and society from the communal period through the age of Dante, the rise and decline of the guild republic, the age of civic humanism, and the rise of the Medici to the crisis of the republic in the time of Machiavelli. Social conflicts, economic structures, guilds, family history, and political and historical ideas are considered in the context of the emergence and transformation of republican government.]

[HIST 377 Gender in Early Modern Europe (also Women's Studies) #

Spring. 4 credits. Enrollment limited to 30. Not offered 1999–2000. R. Weil.
An inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?]

[HIST 405 Population and History

Not offered 1999–2000. S. Kaplan.
For description, see Comparative History.]

[HIST 408 Feudalism and Chivalry: Secular Culture in Medieval France, 1000–1300 #

Fall. 4 credits. No prerequisites; History 263 or 264 would help. Not offered 1999–2000. P. Hyams.
An upper-level seminar on the main currents of noble lay culture in France, which led European fashions in love, warfare, entertainment, and environment through most of the period. There will be heavy emphasis on contemporary sources (in English), including lively and complete readings from epic literature (the Song of Roland), lives, and chronicles.]

[HIST 409 Seminar on Work in Europe and America

Fall. 4 credits. Not offered 1999–2000. S. Kaplan.
For description see Comparative History.]

[HIST 427 Power and Society in Early Medieval Europe and Japan

Spring. 4 credits. Prerequisite: a course in medieval European or Japanese historical studies, or permission of instructor. Not offered 1999–2000. P. Hyams and J. Piggott.
This seminar will focus on structures, processes, and practices of society in early medieval Europe and Japan. It will provide a forum for discussion of the ways in which, in some very different societies, Europeans and Japanese handled power. We will also be interested in comparing historiographical methodologies employed and issues considered by historians of these societies.

The nature of power and authority and characteristic organizational practices, including kingship, land tenure, status systems, and religious and military structures; the formation of ideology through art, ritual, literature, and law; and various means of linking center and periphery in these societies will be topics for discussion.]

HIST 436 Conflict Resolution in Medieval Europe #

Spring. 4 credits. P. Hyams.
This seminar concentrates on a time (late 9th-13th centuries) when much of Europe lacked formal systems of justice, and so handled questions of social control quite largely by extra-legal means. Its subject is in one sense political history upside-down, as viewed by individuals rather than their rulers. We examine ways in which anthropology and some recent approaches to law can assist: the readings will be partly anthropology, partly translated medieval accounts of actual conflicts, with samples of recent interpretation. The topics covered should be of interest to law students and majors in anthropology and other modern social sciences.

[HIST 446 Law, Crime and Society in Europe, 1400–1700

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. S. Pohl.
This comparative study focuses on Germany, England, France, and Italy and concentrates mainly on the social and legal treatment of crimes of violence. Throughout the course, we shall consider the differences and similarities between English common law and continental legal systems. Major issues to be covered include the role of criminal justice, the fate of customary methods of conflict resolution in a time of increasing legal centralization, and the relationship between cultural and legal change. We shall approach these issues by examining, among other things, the development of criminal procedure, the role of lawyers, contested notions of criminal responsibility, and the self-presentation of defendants. The course emphasizes close readings of primary works, including trial documents and literary sources.]

[HIST 447 Crusaders and Chroniclers

Fall. 4 credits. Not offered 1999–2000. P. Hyams.
An intensive reading seminar offering a natural progression from History 259 The Crusades. It will examine contemporary accounts of the crusading movement in English translation. The twin goals are to follow select themes of crusading history to a deeper level than is possible in History 259 and to study medieval historiography through whole chronicles and other primary sources.]

[HIST 451 Lord and Peasant in Europe: A Seminar in Social History #
Not offered 1999–2000. S. L. Kaplan.]

[HIST 468 The Representation of Eros in the Italian Renaissance #
Spring. 4 credits. Not offered 1999–2000. J. Najemy.]

[HIST 472 Politics and Culture in 18th-Century England #
Spring. 4 credits. Not offered 1999–2000. R. Weil.
Between 1660 and 1800 England experienced imperial and economic expansion, the Enlightenment, and the threat of Revolution abroad and at home. How in this context did people interpret and imagine the nature of the social order, political authority, and the family? We will consider the changing and fiercely contested notions of property, politeness, crime and punishment, sexuality, Empire, slavery and the market.]

[HIST 481 The English Revolution #
Spring. 4 credits. Not offered 1999–2000. R. Weil.
Between 1640 and 1660, England experienced two decades of civil war and revolution and embarked on a fascinating series of attempts to reorganize political and religious life. Women and the lower classes emerged as actors on the political stage, radical religious sects flourished, and the nature of authority was questioned in both the family and the state. This course will explore the political, cultural, religious and social dimensions of the English Revolution, using mostly primary sources.]

[HIST 496 Theorizing the Public Sphere (also Comparative Literature 496 and German Studies 496)
Fall. 4 credits. Not offered 1999–2000; next offered 2000–2001. P. Hohendahl.
For description, see GERST 496.]

[HIST 651 Old English Literature in Its Historical Context (also English 710)
Spring. 4 credits. Not offered 1999–2000. P. Hyams, T. D. Hill.
This graduate course, cross-listed with English 710, might equally be known as "Anglo-Saxon England: History and Literary Context." It studies the written sources for major questions of Anglo-Saxon history in their literary and cultural context. It concentrates on important texts extant in both Latin and Old English. Comparison can illuminate the resources and intentions of writers, compilers, and copyists, the literary and linguistic culture of England, and the ways in which historians might most fruitfully study such texts. Bede's *Ecclesiastical History*, and *Battle of Maldon* and Aelfric's *Collequies*, and selections from the Anglo-Saxon chronicle, *Beowulf*, laws, homilies and wisdom literature are all likely to come under scrutiny. One goal is to reclaim for European religious history a corpus of material that historians neglect because it is in Old English.]

[HIST 653 England—Britain—Europe in the Middle Ages
Fall. 4 credits. Not offered 1999–2000. P. Hyams.
This graduate seminar tentatively explores the coming move from the study of medieval English history to that of the British Isles and its inhabitants within the wider context of Europe and Western Christendom. Readings will mostly be representative original sources. The precise texts and topics studied will depend on the interests (and especially future teaching plans) of participants, but will certainly allow for a critical examination of existing literature on the general and cultural history of England, Scotland, Ireland and Wales.]

HIST 663 Graduate Seminar in Renaissance History
Fall. 4 credits. Open to undergraduates with permission of instructor. J. Najemy.

[HIST 664–665 Seminar in Latin Paleography
664, fall; 665, spring. 4 credits each term. Hours to be arranged. Not offered 1999–2000. J. J. John.]

[HIST 666 Seminar in Medieval History
Fall. 4 credits. Not offered 1999–2000. J. J. John.]

[HIST 669 Politics, Power, and Culture in Early Modern England
Fall. 4 credits. Not offered 1999–2000. R. Weil.
An inquiry into how the ruling class ruled, and what that meant to and for everyone else. Topics include: the invention of the "state," the relationship of central and local power, clientage and corruption, the construction of categories of "public" and "private," representations of monarchy, hegemony and resistance, court culture, the social interpretations of the English Revolution and their critics. Focus is on historiography and methodology, with some engagement with primary sources.]

Modern European History

HIST 152 Introduction to Western Civilization (1600 to the end of World War II) #
Spring. 4 credits. R. L. Moore and M. Steinberg.
This course offers a comparative perspective on the development of modern states, societies, and cultures in Europe and North America. Religious and scientific revolutions in early modern Europe; European expansion and conquest; Enlightenment and revolution; liberalism, capitalism, and communism; the politics of race, slavery, and the new imperialism; the World Wars and the Holocaust; the Cold War; the modern and the post-modern in European and American culture.

[HIST 220 The French Experience: An Introduction (also French Literature 224)
Fall. 3 credits. Not offered 1999–2000. S. Kaplan and M. Greenberg.
An examination of French society culture and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals and cinemas. Looking attentively at texts, images and contexts from selected moments in the seventeenth, eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience. Two lectures/week in English and one section (one section conducted in English, one in French). Readings available both in French and English translation.]

HIST 252 Russian History to 1800 #
Fall. 4 credits. W. Pintner.
The origin and development of the fundamental social, political, economic, and cultural institutions that have determined the nature of contemporary Russian society.

[HIST 267 History of Zionism and the Birth of Israel (also Jewish Studies 290; Near Eastern Studies 290)
Spring. 4 credits. Not offered 1999–2000. V. Caron.
This course will examine the history of Zionism as an ideology and political movement from its origins in the nineteenth century to the present. Attention will be paid to situating Zionism within the context of modern Jewish, European, and Middle Eastern History. Topics will include: the ideological foundations of Zionism; the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration; the development of theYishuv; Zionism as a cultural identity for Diaspora Jewry; the British mandate; the Arab-Zionist encounter; Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.]

[HIST 283 Europe in the Technological Age
Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. J. Weiss.
An introduction to politics, culture, and technology in contemporary Europe. In the sections on politics a survey of party systems and their interactions with social movements is followed by examinations of post-Communist constitution and political structures, the New Germany, and the European Union. The section on European culture pays special attention to the European press and electronic media as shapers and reflectors of cultural values. A section on the struggle over the control of the past deals with tensions and conflicts in European national memories. In the section on Nationalism and ethnicity, political and cultural approaches are combined in consideration of the wars in former Yugoslavia as well as less violent conflicts between nationalists and members of ethnic minorities elsewhere in Europe. The section on technology deals with the design of products and processes as a cultural phenomenon, making cross-national comparisons of some of the social, cultural, and institutional influences on engineering performance.]

[HIST 285 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492–1789 (also Near Eastern Studies 245, Jewish Studies 253) #
Fall. 4 credits. Not offered 1999–2000. V. Caron.
This course will examine the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We will examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics will include: the impact of the Spanish Expulsion of 1492; religious, intellectual, and socioeconomic dimensions of the Marrano dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Zevi; the establishment of Jewish communities in the West; the end of the "Golden Age" of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the 17th and 18th centuries; and the impact of the Enlightenment.]

[HIST 290 Twentieth-Century Russia and the Soviet Union

Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. P. Holquist.

An introductory lecture course spanning the lifetime of the USSR (1917–1991), but covering the last years of the Russian Empire and the first years of the post-communist present as well. Geographically, it focuses on the Russian heartland and the non-Russian areas of the Soviet Union. The course will explore the roots and consequences of the Russian Revolution; the nature and evolution of Leninism, Stalinism and Soviet communism; the entrenchment of reform of the post-Stalinist system; and the legacy of communism for the region's new regimes. Students are introduced to a wide variety of historical materials, including documents, essays, memoirs, literature and film.]

HIST 291 Modern European Jewish History, 1789–1948 (also Jewish Studies 252)

Fall. 4 credits. V. Caron.

Jewish life in Europe experienced a profound transformation as a result of the process of Jewish emancipation which began at the end of the eighteenth century. While emancipation offered Jews unprecedented social, economic and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course will examine the ways in which Jewish and non-Jewish society responded to these new developments from the eighteenth century Enlightenment to the post-World War II era. Topics will include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation; the development of modern antisemitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era.

HIST 355 The Old Regime: France in the Seventeenth and Eighteenth Centuries #

Fall. 4 credits. S. Kaplan.

A systematic examination of the social structure, economic life, political organization, and collective mentalities of a society that eclipsed all others in its time and then, brutally and irreversibly, began to age. France, in European perspective, from the wars of religion through the age of Voltaire.

[HIST 356 The Era of the French Revolution and Napoleon #

Spring. 4 credits. Not offered 1999–2000. S. Kaplan.

A study of the failure of the traditional system, its dismantling and replacement in France, and the international consequences. Focus will be on the meaning of the revolutionary experience, the tension between the desires to destroy and to create, and the implications of the Revolution for the modern world.]

HIST 357 Survey of German History, 1648–1890 #

Fall. 4 credits. Open to freshmen with permission of instructor. I. Hull.

An examination of the social, political, intellectual, and diplomatic history of the German states from the devastation of the Thirty Years' War, through absolutism, the bourgeois revolutions of 1848, the struggle for unification, to the beginning of the modern industrial state.

HIST 358 Survey of German History, 1890 to the Present

Spring. 4 credits. Open to freshmen with permission of instructor. I. Hull.

An examination of the "German problem," that is the political, cultural, economic and other causes of modern Germany's extreme violence and volatility from 1890 through 1945, and of the consequences thereof on the divided Germany of 1945 to 1989, and on the new German state since 1989.

[HIST 362 European Cultural History, 1750–1870 (also Comparative Literature 352) #

Spring. 4 credits. Not offered 1999–2000. M. Steinberg.

The course will focus on the making of middle-class culture, society, and imagination from the Enlightenment through the French Second Empire. There will be three units with national and thematic foci: Germany in the period of Enlightenment, emancipation, and the burgeoning of national consciousness; questions of law, property, gender, and sexuality in early 19th-century England; modernism and urbanism in Second Empire France. Primary readings (including novels, paintings, and operas) will be considered along with contemporary historical and theoretical readings.]

[HIST 363 European Cultural History, 1870–1945 (also Comparative Literature 353)

Summer and fall. 4 credits. Not offered 1999–2000. M. Steinberg.

This course will focus on problems of modernity, identity, and ideology in comparative European contexts. We will address the politics and culture of German nationalism, French urbanism and religious revival, the cultural origins of psychoanalysis, technological culture (including film), and the cultural origins and dynamics of fascism. As in 362, primary materials (including Wagner, Nietzsche, George Eliot, Freud, Benjamin and Alfred Hitchcock) will be considered along with recent theoretical work.]

[HIST 370 History of the Holocaust (also Jewish Studies 353)

Spring. 4 credits. Each student must enroll in a section. Not offered 1999–2000. V. Caron.

This course will analyze the meaning of the Holocaust from three vantage points: that of European history; that of Jewish history; and that of those states and religious institutions that shared responsibility by having stood by in silence. Topics include: the evolution of modern anti-semitism; the role of anti-semitism in the Nazi ideology and program; the bureaucratization of death; Jewish life in ghettos and concentration camps; the fate of Jews in occupied Europe and the question collaboration; Jewish political behavior under duress; the responses of the Western allies and the Churches; contemporary interpretations of the Holocaust and the meaning of evil.]

[HIST 379 The First World War: Causes, Conduct, Consequences

Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 1999–2000. P. Holquist and I. Hull.

This course examines the long-term and immediate political, social, and cultural causes of World War I, its catastrophic prosecution, and its revolutionary consequences. Recurring themes are: the building of nation-states, the diplomatic and military systems of the nineteenth and twentieth centuries, mass mobilization, the development of mass violence, and the emergence of millenarian visions of the future.]

[HIST 380 Social History of Western Technology

Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. J. Weiss.

For description see History of Science.]

[HIST 383 Europe, 1900–1945

Spring. 4 credits. Not offered 1999–2000; next offered 2000–2001. J. Weiss.

An investigation of the major developments in European politics between 1900 and the end of the Second World War. Emphasis on the rise and fall of democratic political systems and their alternatives. Topics include the reorientation of liberalism and socialism, the transforming effects of war and depression, the dynamics and diplomacy of fascism, the European response to the economic and ideological influence of America and the Soviet Union, the changes in Eastern Europe during the interwar years, and the interaction between politics and social structure.]

HIST 384 Europe, 1945–1968

Fall. 4 credits. J. Weiss.

A political and social history of Europe between the fall of fascism and the political crises of 1968. Emphasis on the comparative study of the elaboration of democratic institutions and ideologies. Topics include the origins and course of the Cold War in Western and Eastern Europe, Gaullism and Christian Democracy, the emergence of welfare states, liberal-democratic and Communist culture, the end of colonial empires in the West, opposition movements in Eastern Europe, and the general upheaval of 1968.

HIST 385 Europe in 20th Century: 1968–1990

Spring. 4 credits. J. Weiss.

The major political developments in Europe between the upheavals of 1968 and the collapse of Communist regimes. Topics will include the effects of economic turndown in 1973–1974; the response to terrorism; regionalist movements; new ethnic minorities and their opponents; Socialist governments in southern Europe; the arrival of democracy in Spain, Portugal, and Greece; new dynamics in the European Community; the rise of Thatcherism; the war scare of the 1980s; and the final phase of the Cold War.

[HIST 405 Population and History

4 credits. Not offered 1999–2000. S. Kaplan.

For description, see Comparative History.]

[HIST 406 The People in the French Revolution #

Fall. 4 credits. Not offered 1999–2000. S. Kaplan.

The Revolution was nothing if not a mass event. Mass action played a critical part in shaping its course. The "re-invention" of France affected the population down to each village and demanded decisions from virtually every adult. This course will focus on the people as actors: their collective memory, their ideologies, their repertoire of intervention, the formation of a popular political culture. It will examine the encounters between the people (in their multiple incarnations) and the revolutionary elites who sought to articulate and appropriate the Revolution. A major theme will be the tension

between the ambitions to achieve liberty and equality.]

[HIST 409 Seminar on Work in Europe and America
Fall. 4 credits. Not offered 1999–2000. S. L. Kaplan.
For description see Comparative History.]

[HIST 417 History of Jews in Modern France (also Jewish Studies 446; French Literature 413)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. V. Caron.
This course will explore the integration of Jews into French society from the French Revolution to the present. Topics will include: the debate over Jewish emancipation during the Enlightenment, the French Revolution, and the Napoleonic era; the processes of religious and social assimilation; the rise of antisemitism and the Dreyfus Affair; Jewish responses to antisemitism; the immigrant challenge and refugee crisis of the 1930's; the Vichy era and Jewish resistance during World War II; and the reconstruction of the French Jewish community since 1945.]

[HIST 435 Collective Action and Politics in Modern Europe
Not offered 1999–2000. S. Kaplan, S. Tarrow.
For description, see GOVT 435.]

[HIST 441 Seminar in the European Enlightenment #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Semester/TBA. I. Hull.]

[HIST 451 Lord and Peasant in Europe: A Seminar in Social History #
4 credits. Not offered 1999–2000. S. L. Kaplan.]

HIST 456 Opera, History, Politics, Gender (also WOMNS 454, COM L 459, S HUM 459, ITAL 456, MUSIC 474)
Spring. 4 credits. M. Steinberg and S. Stewart.
The will to social order and the desire to transgress it: this basis conflict in modern culture was negotiated in many places, nowhere more dramatically than in the world of opera. Body and mind; the visceral and the mannered, authority and subversion: these themes are integral to operatic works and culture. This seminar will examine works and contexts of Mozart, Beethoven, Wagner, Verdi, and Puccini alongside issues of German and Italian nationbuilding, liberalism, the continuities of patriarchy, and patterns of cultural identity and cultural difference in modern Europe. We will analyze opera videos in class, and if possible we will arrange an excursion to the Metropolitan Opera in New York City. No technical competence in required, but the seminar should be most interesting to those seeking an upper-level course in cultural history and/or cultural studies.

[HIST 457 Seminar in European Fascism
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Semester/TBA. I. Hull.]

[HIST 459 Antisemitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (also Jewish Studies 454)
Spring. 4 credits. Not offered 1999–2000. V. Caron.
This course will examine the role of antisemitism in nineteenth and twentieth century European ideological, political and socioeconomic developments. Attention will be paid to the way in which antisemitism illuminates the underside of European history, allowing us to see how anti-Jewish intolerance and prejudice became embedded in the worldviews of significant sectors of the European population, culminating in the Holocaust. Topics will include: the Christian roots of antisemitism and the extent to which modern antisemitism marks a break with the medieval past; the politicization of antisemitism by both Left and Right; the role of antisemitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to antisemitism; antisemitism in the nazi and Fascist revolutions; and contemporary interpretations of antisemitism.]

HIST 462 Popular Culture in European History
Fall. 4 credits. S. L. Kaplan.
An examination of the origins, practices and meanings of popular culture throughout Europe from the Middle Ages to the era of the French Revolution. After considering the various ways in which "culture" and "popular" can be construed, the seminar will focus on the specific manifestations of popular culture, its various languages and gestures, and its complex relations with the dominant/elite cultures.

HIST 467 Seminar in Modern European Political History
Fall. 4 credits. Permission of instructor required. J. Weiss.
Topic for 1999–2000: The Year 1968 as Post War Europe's Turning Point. The course will examine the thought and actions that culminated in the upheavals of 1968. Critical thought, social movements, and political shifts brought fundamental challenges to governments and institutions in both Western and Eastern Europe. Was this the end of one postwar era and the beginning of another?

HIST 474 Topics in Modern European Intellectual and Cultural History (also ComL 474)
Fall. 4 credits. Prerequisite: permission of instructor. D. LaCapra.
Topic for 1999–2000: History and Trauma. The course will investigate the role of traumatic events in history and the attempt in various genres (especially historiography) to "represent" or come to terms with them. The focus will be on the nazi genocide, but comparative issues will also be treated (notably with respect to the problem of slavery). Assignments include works of Tadeusz Borowski, Cathy Caruth, Frantz Fanon, Saul Friedlander, Raul Hilberg, Toni Morrison, and Art Spiegelman. There will also be viewings of testimonies and films, including Part I of Claude Lanzmann's *Shoah*.

[HIST 477 Seminar on the Politics of the Enlightenment #
Spring. 4 credits. Not offered 1999–2000. S. Kaplan.
An inquiry into the historical origins of European (especially French) political, social, and economic thought, beginning in the 1680s, at the zenith of Louis XIV's absolutism, and culminating in the French Revolution a century later. Emphasis is on the relation of criticism and theory to actual social, economic, religious, and political conditions. An effort is made to assess the impact of enlightened thought on the eighteenth-century world and to weigh its implications for modern political discourse. Readings in translation from such authors as Bayle, Montesquieu, Voltaire, Rousseau, Diderot, and others as well as from modern scholarly and polemical literature.]

[HIST 478 Stalinism As Civilization
Fall. 4 credits. Not offered 1999–2000; next offered 2001–2002. P. Holquist.
The collapse of the Soviet Union provides an opportunity to reconsider the entire Stalinist experience, both on the basis of newly accessible documents and from fresh perspectives. This course approaches Stalinism as an entire system, examining the links between high politics, foreign relations, culture and everyday political strategies. Readings will include historical studies as well as newly available primary materials. Knowledge of Russian not required.]

[HIST 488 Seminar in Late Nineteenth-Century European Imperialism
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. I. Hull.
This seminar examines the theories of the "second wave" of European imperialism, and then compares the imperial experiences of Great Britain, France, and Germany. It focuses on the imperialist powers, and on the (often unintended) consequences of their colonial involvement on them. Of special concern are the transformation of nationalism into imperialism, and the effects on the European powers themselves of their experiences of applied racism and the commission of mass violence in their colonies.]

[HIST 605 Graduate Seminar in European Cultural and Intellectual History
Fall. 4 credits. Not offered 1999–2000. M. Steinberg.
The seminar will function as a companion course to History 363. Admission is open to graduate students and, by application to the instructor, to seniors. All participants will be required to attend the lectures in History 363. The seminar readings will focus on the primary readings in History 363 (Nietzsche, Wagner, Eliot, Freud) and will add to them literary and theoretical texts on the themes of subjectivity, ideology, and psychoanalysis.]

[HIST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution (also German Studies 635)
4 credits. Anchor course. Not offered 1999–2000. P. Hohendahl.
For description, see GER ST 635.]

[HIST 661 Graduate Seminar in Twentieth-Century German History
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Semester/TBA. I. Hull.]

HIST 672 Seminar in European Intellectual History
Fall. 4 credits. D. LaCapra.

HIST 673 Seminar in European Intellectual History
Spring. 4 credits. D. LaCapra.

[HIST 674 Graduate Seminar in German History, 1770–1918
Fall. 4 credits. Not offered 1999–2000. Semester, TBA. I. Hull.]

[HIST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also Comparative Literature 675 and German Studies 675)
Fall. 4 credits. Not offered 1999–2000. P. Hohendahl.
For description, see GER ST 675.]

[HIST 678 Seminar in Modern European Social History
Spring. 4 credits. Permission of instructor required. Not offered 1999–2000. J. Weiss.]

HIST 750 European History Colloquium
Fall and spring. 4 credits, each term. Kaplan, Caron (fall); Weiss, Caron (spring).
A research colloquium designed for European history graduate students. The colloquium will offer a forum for students to present papers and to discuss the work of visiting scholars.

Honors and Research Courses

Note: History 301–302 are not regular courses for which students may sign up at will. They are personal arrangements between an instructor and a particular student. Students must first gain the consent of a particular instructor to work with them.

HIST 301 Supervised Reading
Fall or spring. 2 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 302 Supervised Research
Fall or spring. 3 or 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 400 Honors Proseminar
Fall. 4 credits. Limited to 14 students. For prospective honors candidates in history. Prerequisite: permission of a member of the Honors Committee is required to register. M. Kammen.
An exploration of major approaches to historical inquiry, analysis, and presentation. Ways of thinking about history along with research methods and organization of the results will be considered by reading and discussing a variety of historical works. Substantive readings will be drawn from several time periods and diverse geographical areas. There will be one short paper during the semester, and a longer final paper which explores the work of a major historian or school of historical writing.

HIST 401 Honors Guidance
Fall or spring. 4 credits. Prerequisites: History 400 and permission of instructor. Staff.

HIST 402 Honors Research
Fall or spring. 4 credits. Prerequisites: History 400 and permission of instructor. Staff.

HIST 703–704 Supervised Reading
703, fall; 704, spring. 4 credits each term. Limited to graduate students. Prerequisite: permission of instructor. Staff.

HIST 709 Introduction to the Graduate Study of History
Fall. 4 credits. Required of all first-year graduate students. T. Borstelmann, J. V. Koschmann.
The course is designed to introduce entering graduate students to crucial issues and problems in historical methodology that cut across various areas of specialization.

HISTORY OF ART

L. L. Meixner, chair; R. G. Calkins, director of graduate studies; J. E. Bernstock, director of undergraduate studies; P. I. Kuniholm, C. Lazzaro, K. McGowan, A. Pan, A. Ramage, S. Reiss

The Department of the History of Art provides a broad range of introductory and advanced courses in Western (European and American) and non-Western art (East and Southeast Asian, African), from antiquity to the present.

The Major

Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, Baroque, modern (Europe and U.S.A.), Southeast Asia, China, Japan, and Africa. Additionally, majors practice a range of art historical methods and interpretive strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is encouraged strongly.

Requirements for the Major

Prospective majors should consult the director of undergraduate studies. Students wishing to major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. One of the two courses required for entry into the major must be at the 200-level, and one must emphasize material either predominantly before 1800 or outside Europe/U.S.A. These two courses are prerequisites for the major and a grade of C or above is required for admission; courses must be taken for a letter grade. These courses do count toward the total 44 credits. The major in the history of art requires 44 credits, 30 at the 300-level or above. The core requirements: proseminar; one 400-level area seminar; two courses in art outside Europe/U.S.A.; three courses in art predating 1800 (ancient, medieval, or Renaissance/Baroque). Majors must choose at least two courses from different categories. In addition to the 44 credits, majors are required to take two courses, approved by their advisers, in areas related to the history of art.

Honors

To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all arts and sciences courses. Application to write an honors thesis should be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. In the senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student's project adviser.

Course Numbering System

100–level courses are all freshman writing seminars.

200–level courses are introductions to the major subdivisions of Western art and art outside the West.

300–level courses are more specialized, and some have the introductory course in the appropriate area as a prerequisite. Freshmen are advised to take the introductory courses unless they already have substantial background in the history of art.

400–level courses are seminars primarily for advanced undergraduates and graduate students.

500–level courses are seminars primarily for graduate students.

First-Year Writing Seminars

For First-Year Writing Seminar offerings in the History of Art, see the John S. Knight Writing Program's special brochure. These courses may be used as freshman electives but not to satisfy the distribution requirement.

Courses

ART H 200 Art, Archaeology and Analysis (also Architecture 285, MS&E 285, Engineering 185, Geology 200, Physics 200)
Spring. 3 credits. R. Kay.
For description see Geology 200.

ART H 202 Survey of European Art: Renaissance to Modern #
Summer only. 3 credits. Staff.
The major traditions and movements in western European art from the Renaissance to the Modern period. Painting, sculpture, and architecture with an emphasis on painting.

ART H 220 Introduction to Art History: The Classical World (also Classics 220) #
Fall. 4 credits. Each student must enroll in a section. A. Ramage.
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.

[ART H 221 Minoan-Mycenaean Art and Archaeology (also Classics 221 and Archaeology 221) #
3 credits. Not offered 1999–2000. J. Coleman.
For description, see Classics 221.]

[ART H 224 Archaeology in Action I (also Classics 232 and Archaeology 232) #
3 credits. Prerequisite: permission of instructor. Not offered 1999–2000. P. I. Kuniholm.]

[ART H 225 Archaeology in Action II (also Classics 233 and Archaeology 233) #
3 credits. Prerequisite: permission of instructor. Not offered 1999–2000. P. I. Kuniholm.
Objects from the Classical, Hellenistic, and Roman periods are "dug" out of Cornell basements, identified, cleaned, restored, catalogued, and photographed and are considered in their appropriate historic, artistic, and cultural contexts.]

ART H 230 Introduction to Art History: Monuments of Medieval Art (also Religious Studies 230) #
Spring. 4 credits. Each student must enroll in a section. R. G. Calkins.
An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 245 Introduction to Art History: Renaissance and Baroque Art #
Fall. 4 credits. Each student must enroll in a section. C. Lazzaro.
A survey of major works of European painting, sculpture, and architecture from 1400 to 1700. The focus is on preeminent artists, workshop methods, style, meaning, patronage, and the function of art in a range of social contexts. The course also covers the methods of art history currently practiced in Renaissance and Baroque studies. Weekly section meetings are required.

ART H 260 Introduction to Art History: The Modern Era
Spring. 4 credits. Not open to students who have taken History of Art 261. Each student must enroll in a section. J. E. Bernstock.
A discussion of the most important developments in art from 1780 to the present. The emphasis is on major movements and artists such as Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol).

[ART H 261 Introduction to Art History: Modern Art
3 credits. Not offered 1999–2000. Staff.
An introduction to early modern art as it developed between the French Revolution and World War I. Both European and American movements are examined, including Romanticism, Impressionism, and Cubism. Units are organized around central figures such as Mary Cassatt, Edgar Degas, Thomas Eakins, and Vincent van Gogh. Lectures are supplemented with discussions of methods of inquiry, including social history and feminism, fundamental to interpreting works of art.]

[ART H 280 Introduction to Art History: Approaches to Asian Art @ #
Fall. 3 credits. Not offered 1999–2000. K. McGowan.
Arranged according to selective focus and emphasis rather than broad chronological survey, this course introduces students to the varied responses of the Asian artist in diverse social, geographical and historical contexts. Indian miniature paintings, Japanese prints, high-fired ceramics from Thailand and Vietnam, Indonesian textiles and jewelry, Javanese shadow-puppet theater, and Balinese ritual and performance traditions will be explored. A number of class sessions will meet in the Herbert F. Johnson Museum of Art.]

ART H 309 Dendrochronology of the Aegean (also Classics 309 and Archaeology 309)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm.
Participation in a research project of dating modern and ancient tree-ring samples from the Aegean and Mediterranean. Supervised reading and laboratory work. A possibility exists for summer fieldwork in Greece and Turkey.

[ART H 319 Art in the Daily Life of Greece and Rome (also Classics 319) #
4 credits. Not offered 1999–2000. A. Ramage.
Classical art is well reflected in the small items of daily life that are neglected frequently in the standard histories. This course looks at the making and decorating of household items in Greece and Rome in a variety of materials from clay to metal. The links between the commissions of the state and the tastes of the people are examined through their material culture.]

[ART H 320 The Archaeology of Classical Greece (also Classics 320) #
4 credits. Not offered 1999–2000. A. Ramage.]

ART H 321 Mycenae and Homer (also Classics 321 and Archaeology 321)
Fall. 4 credits. J. Coleman.
For description, see CLASS 321.

[ART H 322 Arts of the Roman Empire (also Classics 350) #
4 credits. Not offered 1999–2000. A. Ramage.
The visual arts in the service of the first world state. The course starts with the architecture, painting, and sculpture of the Etruscan and Republican period but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.]

[ART H 323 Painting in the Greek and Roman World (also Classics 323) #
4 credits. Not offered 1999–2000. A. Ramage.]

[ART H 325 Greek Vase Painting (also Classics 325) #
4 credits. Not offered 1999–2000. A. Ramage.
A stylistic and iconographical approach to an art in which the Greeks excelled. The course will be arranged chronologically from the early (eleventh century B.C.), anonymous beginnings to the "personal" hands of identifiable masters of the fifth and fourth centuries B.C. Styles of cities other than Athens will be stressed.]

[ART H 326 Greek Cities and Towns (also Classics 326) #
4 credits. Prerequisite: Classics/History of Art 220 or permission of instructor. Not offered 1999–2000. J. Coleman.]

ART H 327 Greek and Roman Coins (also Classics 327) #
Spring. 4 credits. A. Ramage.
The varied issues of Greek cities and the Roman state are examined. Coins are considered as art objects as well as economic and historical documents. The changes in design, value, and metals from the origins of coinage to the late Roman period are studied. Lectures, student presentations, and work with the actual examples.

[ART H 328 Greeks and Barbarians (also Classics 322) #
4 credits. Not offered 1999–2000. J. Coleman.
For description, see CLASS 322.]

ART H 329 Greek Sculpture (also Classics 329) #
Fall. 4 credits. J. Coleman.
For description, see CLASS 329.

[ART H 332 Architecture in the Middle Ages (also Architecture 382, Religious Studies 332) #
4 credits. Not offered 1999–2000. R. G. Calkins.
A survey of medieval architecture from the Early Christian period to the Late Gothic (A.D. 300–1500). Considerable emphasis will be placed on the development of structural systems and upon the form, function, and meaning of important medieval buildings.]

[ART H 333 Early Medieval Art and Architecture #
4 credits. Not offered 1999–2000. R. G. Calkins.
Sculpture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300–900). The evolution of the early Byzantine tradition will also be considered.]

[ART H 335 Gothic Art and Architecture (also Religious Studies 335) #
4 credits. Not offered 1999–2000. R. G. Calkins.]

ART H 336 Prelude to the Italian Renaissance (also Religious Studies 336) #
Fall. 4 credits. R. G. Calkins.
An examination of Italian art, beginning with twelfth-century Sicily, and with emphasis on thirteenth- and fourteenth-century sculpture, painting, and to a lesser extent, architecture, which includes the works of Duccio, Giotto, the Pisani, and Lorenzetti as the prelude to the Italian Renaissance.

[ART H 337 The Medieval Illuminated Book (also Religious Studies 337) #
4 credits. Not offered 1999–2000. R. G. Calkins.
A study of selected major examples of medieval illuminated manuscripts from between A. D. 300 and 1500. Facsimiles of major manuscripts such as the Lindisfarne Gospels, the Book of Kells, and the Hours of Mary of Burgundy will be examined. Students will write a research paper on a manuscript of their choice. Two lectures, plus a session each week in the Rare Book Room.]

ART H 341 Flemish Painting (also Religious Studies 342) #
Spring. 4 credits. R. G. Calkins.
An examination of Flemish painting in the 15th century, with emphasis on the works of Robert Campin, Jan van Eyck, Roger van der Weyden, Hugo van der Goes, Hans Memling, and ending with Jerome Bosch. Issues of the social, economic, and devotional context will be discussed as they pertain to the particular development of Northern Realism and Symbolism during this century.

[ART H 343 Italian Renaissance of the Fifteenth Century #
4 credits. Not offered 1999–2000.
C. Lazzaro.
This course examines the artistic production of the fifteenth century in its social and cultural context. The new style, which was developed in Florence in the early century and spread to other city-states in Italy, is examined in the context of the new educated class, the increased wealth of the mercantile, urban class, and the new role of family in society.]

[ART H 344 Italian Renaissance of the Sixteenth Century: Leonardo, Michelangelo, and Raphael #
4 credits. Not offered 1999–2000.
C. Lazzaro.
This course focuses on the three great artists of the late fifteenth and sixteenth century, Leonardo, Michelangelo, and Raphael. It examines each as a thinker as well as an artist, through their own writings together with their works of painting, sculpture, and architecture. It also analyses the contemporary constructions of the artist as genius and as courtier in the biographies and other writings about them.]

ART H 345 Rome, Florence, and Venice in the Sixteenth Century #
Spring. 4 credits. C. Lazzaro.
This course examines the distinctive cultural identities of Rome, Florence, and Venice, and how art, architecture, and urban planning served to create the myths and self-images of these cities, their rulers, and society. Topics include the centers of power, relationship of church and state, and private patronage and collections.

[ART H 348 Renaissance Art in Northern Europe: The Sixteenth Century #
4 credits. Prerequisites: History of Art 245, 341, 342, 351 or permission of instructor. Not offered 1999–2000.
S. Reiss.
This course will examine the painting, graphic arts, and sculpture of Northern Europe in the sixteenth century. Principal emphasis will be on art produced in the Netherlands and Germany. Topics to be considered include patronage and audience in different regions of Northern Europe, the importance of fifteenth-century traditions, the impact of Italian art, and the development of specifically northern forms of artistic expression in religious and secular art, including landscape, portraiture, and genre painting. Among the themes we will explore are constructions of gender and representations of women in Northern Renaissance art, attitudes to peasants and the urban lower classes, the impact of the Protestant Reformation and iconoclasm, and the development of the art market in the North. Artists to be considered include Bosch, Bruegel, Dürer, and Grünewald.]

[ART H 350 The Culture of the Renaissance I (also History 361 and Comparative Literature 361) #
4 credits. Each student must enroll in a section. Not offered 1999–2000.
C. Lazzaro, J. M. Najemy.]

ART H 351 The Culture of the Renaissance II (also Comparative Literature 362, History 364, Music 390, Religious Studies 362, English 325) #
Spring. 4 credits. W. J. Kennedy, C. Kaske.
For description, see COM L 362.

[ART H 353 Art and Death in Europe: 1250–1600 #
4 credits. Not offered 1999–2000. S. Reiss.
This course will explore rituals, images, and monuments associated with death and dying in late medieval and early modern Europe. Topics to be considered include cultural attitudes towards death, the impact of the Black Death, the *ars moriendi*, the relation between death and eroticism, funeral rituals, and, especially, tomb sculpture and mortuary structures in Italy, France, the Netherlands, Germany, England, and Spain.]

[ART H 355 Art as Spectacle: The Italian Baroque (also Religious Studies 352) #
4 credits. Not offered 1999–2000. Staff.]

[ART H 358 Religion and Images Across the Early Modern World (also Religious Studies 360) #
4 credits. Not offered 1999–2000. Staff.]

[ART H 360 Painting and Everyday Life in Nineteenth-Century America (also American Studies 360) #
4 credits. Not offered 1999–2000.
L. L. Meixner.
Nineteenth-century American painters often constructed images of "exceptionalism," DeTocqueville's term for the social harmony and material abundance he considered unique to the New World. Embedded in these icons of national cohesion, however, were signs of race, class, and political conflict that we will decode through interdisciplinary methods. Our topical units include New England portraiture and commodity, Hudson River landscape and corporate (railroad) patronage, images of African-Americans and Reconstruction, images of Native Americans, the West, and Manifest Destiny. Through these, we will challenge the assumption that American art celebrated democracy, and consider more conflicted attitudes. Our key artists include John S. Copley, George Caleb Bingham, Winslow Homer, Mary Cassatt, and Thomas Eakins. Our readings include art historical texts and others by Poe, Emerson, and Whitman.]

[ART H 361 The Social History of Nineteenth-Century European Painting #
4 credits. Not offered 1999–2000.
L. L. Meixner.]

ART H 362 Impressionism and Society
Fall. 4 credits. L. L. Meixner.
This course discusses French Impressionist images as the products of nineteenth-century public life. By relating Impressionism to the state culture of the Third Republic, including universal expositions, we will trace subversive themes such as criminality, cafe and brothel societies, clandestine prostitution, and class-regulated leisure. Alongside the "Haussmannization" of Paris and urban commodity culture, we will consider French agrarian identity, landscape, and utopia.

ART H 365 Art from 1940 to 1990 (also American Studies 355)
Fall. 4 credits. J. E. Bernstock.
Major artists and movements in the United States since 1940, beginning with Jackson Pollock and Abstract Expressionism, and continuing through recent developments in art. Attention is devoted to the critical reception that artists have received and to artists' statements themselves.

[ART H 370 Visual Culture and Social Theory (also Government 375 and Comparative Literature 368)
4 credits. Not offered 1999–2000. Staff.
For description, see Government 375.]

ART H 371 Architectural History of Washington, D.C.
Fall or spring. Variable credit. Only for students in the Cornell-in-Washington program. Only for non-architects.
P. Scott.
A historical and critical survey of the architecture of Washington. Attention will be given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urbanscape of the nation's capital. The vocabulary of architectural analysis and criticism will be taught. Field trips required.

ART H 377 African American Art (also AS&RC 304)
Spring. 3 credits. S. Hassan.
For description, see AS&RC 304.

ART H 378 Art in African Culture and Society (also AS&RC 310) @
Fall. 3 credits. S. Hassan.
For description, see AS&RC 310.

ART H 380 Introduction to the Arts of China (also Archaeology 380 and Asian 383) @ #
Fall. 4 credits. A. Pan.
This course offers a survey of the art and culture of China, from the Neolithic period to the twentieth century. We begin with an inquiry into the meaning of national boundaries and the controversy of the Han Chinese people, which will help us identify the scope of Chinese culture. Pre-dynastic (or prehistoric) Chinese culture will be presented through both legends about the origins of the Chinese, and scientifically excavated artifacts. Art of the dynastic and modern periods will be presented in light of contemporaneous social, political, geographical, philosophical and religious contexts. Students will work directly with objects in the Herbert F. Johnson Museum of Art.

ART H 385 Representation and Meaning in Chinese Painting
Spring. 4 credits. A. Pan.
Using major monuments of art, this course introduces various genres of Chinese painting through socio-political and religious history. The focus is on understanding the aesthetic criteria, artistic movements, stylistic transformations, and agendas of different social classes. Weekly sections will meet at the Herbert F. Johnson Museum so that students can gain first-hand experience examining and handling Chinese paintings.

ART H 395 The House and the World: Architecture of Asia @
Spring. 4 credits. K. McGowan.
In many Asian societies, houses are regarded as having a life force or a vitality of their own. This course will examine the role of the house as a living organism in Asia, a symbol of the cosmos encapsulated. Houses also function in many societies as storehouses for material and immaterial wealth; artifacts such as textiles, jewelry, sculptures, and masks function within the house as ancestral heirlooms, conveying their own currents of life force, the power from which serving to blend with the vitality of the house. This accumulation of energy can be conferred upon the inhabitants, or it may exist as a quiet reservoir of power, distinct from its occupants. The indigenous architectural traditions of India, Vietnam, Thailand, Indonesia, and the Philippines will be examined. By studying the inhabited spaces of others, divining their technologies of construction and their applied symbologies, students will be provided with powerful tools for examining the visual skills and sensibilities of other cultures. "The House and the World" will serve as the metaphor for these discoveries.

ART H 396 The Arts of Southeast Asia @ #
Fall. 4 credits. K. McGowan.
The arts of Southeast Asia will be studied in their social context, since art plays a role in most of the salient occasions in life in traditional societies. Special emphasis will be devoted to developments in Indonesia, Thailand, and Cambodia. Among topics covered will be the shadow puppet theater of Java, textiles, architecture, sculpture, and Bali's performance tradition.

Seminars

Courses at the 400 and 500 level are open to upperclass students, majors, and graduate students. All seminars involve the writing and presentation of research papers. Enrollment is limited to 15 students, and *permission of the instructor is required.* Students may repeat courses that cover a different topic each semester.

ART H 400 Proseminar for Art History Majors: The History and Practice of Art History
Fall. 4 credits. Prerequisite: History of Art majors only. Enrollment is limited.
C. Lazzaro.
This seminar examines the history of the discipline of art history and focuses on the various approaches and methods of its practitioners. We begin with the early history of the discipline, but concentrate on the twentieth century and the concerns with style, iconography, social history, and the post-structuralist theories of the last decades.

ART H 401 Independent Study
Fall or spring. 2–4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member.
Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ART H 402 Independent Study
Fall or spring. 2–4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member.
Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ART H 407 Museum Issues
Spring. 4 credits. Prerequisite: permission of instructor. Majors only. All classes will meet in the Johnson Art Museum Study Gallery. L. Meixner.
This seminar gives advanced Art History majors the opportunity to work directly with original objects from collections in the Herbert F. Johnson Museum. The course focuses on art and connoisseurship by questioning the ways quality is determined in works of art. Topics include methods of attribution, fakes and forgeries, technique and media, restoration and conservation, art education and theories of perception. Session leaders include the curatorial staff of the art museum.

ART H 410 Visual Studies in the Diaspora (also Society for the Humanities 410)
Fall. 4 credits. K. Mercer.
For description see Society for the Humanities 410.

ART H 423 Ceramics (also Classics 423 and Archaeology 423)
Fall. 4 credits. A. Ramage.
Bronze Age, Greek, and Roman pottery specimens from Near-Eastern and Mediterranean sites will be studied to provide direct experience of one of the basic prerequisites of archaeological excavation—the identification and dating of pottery types. Reports, delivered in class, will concern ancient ceramic materials or particular types and periods of ceramics. Practical experience in making and decorating pottery will be encouraged.

[ART H 424 Sardis and the Cities of Asia Minor (also Archaeology 432 and Classics 432) #
4 credits. Not offered 1999–2000.
A. Ramage.]

[ART H 425 Seminar on the Bronze Age Architecture of Asia Minor (also Classics 430 and Archaeology 425) #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000.
P. I. Kuniholm.
The course will cover major architectural building programs from Neolithic Catal Hüyük, Beycesultan, to the final phases of Troy and Hittite Bogazkoy. The art and archaeology of these civilizations will be taken into account when relevant. Reading knowledge of German useful.]

[ART H 427 Seminar on Roman Art and Archaeology (also Classics 435 and Archaeology 435) #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000.
A. Ramage.]

ART H 430 America In the Camera's Eye (also History 430 and Women's Studies 430.2)
Fall. 4 credits. R. L. Moore.
For description see History 430.

ART H 434 The Rise of Classical Greece (also Archaeology 434 and Classics 434) #
Spring. 4 credits. Recommended: Classics 220 or History of Art 220, Classics 221 or History of Art 221, or permission of instructor. P. I. Kuniholm.
The art and archaeology of the Greek dark ages. Topics include: site reports, pottery, metalworking, the introduction of the alphabet, the beginnings of coinage, and links with Anatolia and the Near East.

[ART H 448 Studies in Sixteenth-Century European Art #
4 credits. Not offered 1999–2000.
C. Lazzaro.
Constructing the Self in the Sixteenth Century. This seminar examines portraits, self-portraits, autobiographies, and biographies, as well as treatises on etiquette and behavior. In this society, "civility," the mark of class and education, was conveyed through bearing, gesture, manners, and speech, as well as social organization and artistic interests, all of which are evident in both visual and verbal representations of individuals.]

[ART H 450 Women in Italian Renaissance Art (also Women's Studies 451) #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000.
C. Lazzaro.
This seminar examines representations of the Madonna and Child from the fourteenth and fifteenth centuries, the narrative scenes painted on chests and other domestic furniture, biblical and historical heroines such as Judith and Lucretia, portraits of patrician women and courtesans, and violence to women in a political context. It will investigate the contemporary ideas about motherhood, beauty, sexuality, social presentation, and gender roles in society that inform these representations. We will discuss the existing critical frameworks for interpreting them in feminst art history and theory (particularly in Renaissance studies). We will be concerned especially with how visual images are encoded with meaning, what kind of relationship can be established with their histrocial context, and how they convey social constructs as ideology.]

[ART H 451 Prints of the Fifteenth through the Seventeenth Century #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000.
C. Lazzaro.
This seminar has several aims: to introduce students to prints—the techniques, styles, and issues of connoisseurship—and to the major printmakers of the period, including Marcantonio Raimondi, Dürer, and Rembrandt; to give students first-hand experience with works of art in the Herbert F. Johnson Museum; and to consider the social and cultural issues raised in the medium of prints and through their unique visual language. These issues include the social hierarchies of class and gender (including witches), moral concerns and religious devotion, the construction and transmission of notions of antiquity and classicism, and the representation of the urban and rural environment. Students will give brief presentations on prints in the collection and longer ones of their own research projects on these and related topics.]

[ART H 456 Seminar in Baroque Art #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.]

[ART H 457 The Sexed Body in Western Art (also Women's Studies 457) #
4 credits. Not offered 1999–2000. Staff.]

[ART H 461 Fin-de-siècle Cultures in Europe, England, and America #
4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not offered 1999–2000. L. L. Meixner.]

ART H 462 Topics in Early Modernism #
Spring. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not open to freshmen or sophomores. L. L. Meixner.
Topic for Spring 2000: Early Modernism in America. Using the Armory Show (1913) as its center, this interdisciplinary seminar examines the varied expressions of American modernism prior to World War II. Against the backdrop of post-World War I social politics and the Jazz Age, we will examine: the machine aesthetic and kinetic poetry, icons such as the Brooklyn Bridge, O'Keefe, Stieglitz, and the rise of photography at "291," American Dada, the Harlem Renaissance, and the introduction of homoerotic imagery. Aside from major artists, key figures include Gertrude Stein, Dos Passos, Hart Crane, and Ernest Hemmingway.

[ART H 463 Studies in Modern Art
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. E. Bernstock.]

ART H 464 Studies in Modern Art
Spring. 4 credits. Prerequisite: Art History 365 and permission of instructor. Auditing is not permitted. J. E. Bernstock.
Topic for Spring 2000: Problems in Modern Sculpture. This seminar focuses on problems in criticism of twentieth-century sculpture, starting with Rodin. Controversial issues involving public sculpture are also examined.

ART H 466 Women Artists (also Women's Studies 404)
Fall. 4 credits. Prerequisite: permission of instructor. J. E. Bernstock.
This seminar will be devoted to a study of the work of women artists from antiquity to the present. The works of the most prominent women artists from each period will be studied in relation to the changing roles of women in society. The artists to be studied include Jennifer Bartlett, Artemisia Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Käthe Kollwitz, Georgia O'Keeffe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger.

[ART H 476 Seminar in American Art
4 credits. Not offered 1999–2000. L. L. Meixner.]

ART H 481 Art of the Tang Dynasty (618–907) @
Fall. 4 credits. Prerequisite: ART H 383 or a course in Chinese history or Chinese literature and permission of instructor required. A. Pan.
This seminar explores art and culture of the Tang dynasty, China's "golden age," by focusing on new discoveries and museum objects representing court, secular, and Buddhist art. We will examine how imperial taste, patronage, and aesthetics influenced painting, calligraphy, gold and silver wares, ceramics, and important architectural and cave-temple sites.

ART H 483 Arts of the Song Dynasty (960–1279)
Spring. 4 credits. A. Pan.
This seminar surveys arts of the Song dynasty, a period of introversion and high refinement. Through readings, class discussions, and visits to the Herbert F. Johnson Museum of Art, students will gain knowledge of painting (landscape, figure, horse, flower-and-bird, literati traditions and theories), calligraphy, Song antiquarianism, imperial patronage, religious art (painting, sculpture and temples), and ceramics.

[ART H 490 Art and Collecting: East and West @
4 credits. Not offered 1999–2000. K. McGowan.]

[ART H 494 Feminist Theory and the History of Art
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.]

[ART H 520 Seminar in Classical Archaeology (also Classics 630 and Archaeology 520)
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. P. I. Kuniholm.]

ART H 531 Problems in Medieval Art and Architecture (also Religious Studies 531)
Fall. 4 credits. Prerequisite: permission of instructor. R. G. Calkins.
Topic for fall 1999: Archaeology of the Book. A detailed investigation of the methods and procedures of examining medieval illuminated manuscripts. Emphasis will be on understanding the hand written book as a functioning object: its production, decoration, use, and reception. Students will conduct research on a facsimile of a medieval manuscript amongst those housed in the Rare and Manuscript Collections, Kroch Library. Discussions, reports on readings and presentations of research paper in class.

ART H 540 Seminar in Renaissance Art
Spring. 4 credits. Prerequisite: permission of instructor. C. Lazzaro.
Topic for Spring 2000: Nature, Cultural Landscape and Gardens in Early Modern Italy. This seminar will examine cultural understandings of nature, the paired concepts of nature and culture, and the representations of nature in gardens. We will consider the human interventions on the land, the cultural significance of plants and animals, the literary pastoral, collections of natural objects, and the flourishing garden tradition.

[ART H 549 Problems in Interpretation in Italian Renaissance Art
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. Lazzaro.
This seminar will examine assumptions about meaning and how meaning is produced in Renaissance art. Various interpretative strategies will be examined, among them iconographic, semiotic, feminist, and psychoanalytic, within a specifically Renaissance literary, intellectual, and social context. Texts by Panofsky and critical discussions of them, Baxandall, Bryson, and others will be read and discussed with reference to particular works of art. The seminar is intended primarily for graduate students in all areas of the history of art and those in other disciplines with an interest in the Italian Renaissance. Senior History of Art majors with background in the Italian Renaissance are also welcome.]

[ART H 555 Baroque Ephemera and Public Performance #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.]

ART H 571 African Aesthetics (also AS&RC 503) @
Spring. 4 credits. S. Hassan.
For description, see AS&RC 503.

ART H 580 Problems in Asian Art (also Asian Studies 602 and Religious Studies 580)
Spring. 4 credits. Prerequisite: permission of instructor. K. McGowan.
Topic for Spring 2000: The Subtle Body—Exploring the Art of Tantra. One of the defining characteristics of Tantra is the attention paid to the human body. In Hindu and Buddhist traditions alike, the esoteric practice of Tantra regards sexual energy as a path to spiritual enlightenment by means of the subtle body. This course examines the particular wisdom contained in texts called Tantras, divining the complex and interpenetrating symbologies which evolve visually in art and architecture, mathematics and music, dance and ritual, magic and metaphysics. Since the essential ingredients of Tantra are presumably older than either Hinduism or Buddhism, we will explore how both religions developed their own distinct variations, which can be seen to have fused with dynamic effect in localized communities throughout history in India, Tibet, Cambodia, Champa, and Indonesia. Special emphasis will be given to the popularity of Hindu Tantra's deliberate critique of caste distinctions, and Buddhist Tantra's prevailing social iconoclasms.

ART H 591–592 Supervised Reading
591, fall; 592, spring. 4 credits. May be repeated for credit. Limited to graduate students.

[ART H 594 Feminist Theory and the History of Art
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.]

ART H 600 Honors Work
Fall or spring. 8 credits. Intended for senior art history majors who have been admitted to the honors program.
Basic methods of art historical research will be discussed and individual readings assigned, leading to the selection of an appropriate thesis topic.

ART H 601 Honors Work
Fall or spring. 8 credits. Prerequisite: History of Art 600.
The student under faculty direction will prepare a senior thesis.

LINGUISTICS

A. Cohn, chair; J. Whitman, director of graduate studies (320 Morrill Hall); M. Diesing, director of undergraduate studies (212 Morrill Hall); J. Bowers, W. Browne, V. Carstens, C. Collins, J. Gair, W. Harbert, S. Hertz, S. McConnell-Ginet, A. Nussbaum, C. Rosen, M. Suñer, J. Wolff, D. Zec.

Visiting: E. Rieken, J. Shimoyama, A. Tsuchida.

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and linguistic colleagues in other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; sociolinguistics, the study of language's role in social and cultural interactions; and applied linguistics, which relates the results of linguistic research to problems of bilingual education, second-language learning, and teaching.

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless, knowing particular languages (e.g., Spanish or Japanese) in some depth can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study.

Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take Linguistics 101, which is a prerequisite for most other courses in the field, or one of the freshman writing seminars offered in linguistics (on topics such as metaphor, American Sign Language, and the science of language). Linguistics 101 and other introductory courses fulfill the social science distribution requirement. Most 100- and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., Ling 118 Varieties of Human Language, Ling 216 Mathematical Linguistics) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., Ling 217 History of the English Language, Ling 230 Introduction to Southeast Asian Languages and Linguistics). Some of these courses also fulfill the breadth requirements.

Talks and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Cornell Linguistic Circle. These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

The Major

For questions regarding the linguistics major, contact Professor Molly Diesing (212 Morrill Hall, 255–8635, md20@cornell.edu).

The prerequisite for a major in linguistics is the completion of Linguistics 101 and either Linguistics 201 or 203. The major has its own language requirement, which should be completed as early as possible: qualification in two languages other than English, one of which must be either non-European or non-Indo-European. With approval of the department's director of undergraduate studies, this requirement may be waived (i.e., reduced to the normal arts college language requirement) for students taking the cognitive studies concentration or a double major.

The other requirements for the linguistics major are as follows:

1) Linguistics 201 (Introduction to phonetics and phonology) or Linguistics 203 (Introduction to syntax and semantics), whichever one was not taken as a prerequisite to the major
2) Linguistics 314 (Historical)
3) Three of the following five courses, one of which must be either Phonology I or Syntax I:

   Linguistics 301 (Phonology I)

   Linguistics 303 (Syntax I)

   Linguistics 309 or 310 (Morphology I or II)

   Linguistics 319 (Phonetics I)

   Linguistics 421 (Semantics I)
4) A course at or beyond the 300 level in the structure of English or some other language, or a typological or comparative structure course such as Linguistics 401, 402, or Field Methods (Linguistics 300).
5) One additional linguistics course for at least 4 credit hours, which may be a course with significant linguistic content in a related field.

Honors. Applications for honors should be made during the junior year. Candidates for admission must have a 3.0 (B) average overall and should have a 3.2 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete an honors thesis and take a final oral examination in defense of it. The thesis is usually written during the senior year but may be started in the second term of the junior year when the student's program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis adviser and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. Linguistics 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

General Linguistics

Fees: Depending on the course, a small fee may be charged for photocopied texts for course work.

First-Year Writing Seminars

LING 100 Language, Thought, and Reality

For descriptions, see freshman writing seminar brochure.

LING 101 Theory and Practice of Linguistics

Fall or spring. 4 credits each term. Fall, J. Whitman; spring, M. Diesing.

An introductory course designed to provide an overview of the science of language, especially its theoretical underpinnings, methodology, and major findings. The course focuses on the basic analytic methods of several subfields of linguistics including phonetics, phonology, morphology, syntax, semantics, language variation, language change, and psycholinguistics.

[LING 118 Varieties of Human Language

Fall. 3 credits. Not offered 1999–2000.

Language diversity has a place in our complex world. Whether spoken by a handful of speakers or by hundreds of millions, each language manages the same tasks of communication and fits in with its social environment. Language identification, literacy, and multilingualism are among the issues touched on.]

LING 170 Introduction to Cognitive Science (also Cognitive Studies 101, Computer Science 101, Philosophy 191, and Psychology 102)

For description, see COGST 101.

LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. A. Cohn.
An introduction to the study of human speech sounds and how they pattern in languages. The first part of the course will focus on phonetics: the production, acoustics, and perception of speech, with attention to both the common and the less common sounds of the world's languages. The second part of the course will focus on phonology: how human speech sounds pattern within and across languages, with an emphasis on the rules that govern these patterns and their possible representation.

LING 203 Introduction to Syntax and Semantics
Fall. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. J. Shimoyama.
This course focuses on language as a system of knowledge that enables native speakers to create and interpret the structures of their language. Part of the course will consider issues of syntactic structure, such as the order of constituents, the hierarchical organization of grammars, and syntactic universals. The other part of the course will focus on meaning and interpretation, addressing such issues as the role of context, how information is structured, and how it is encoded in the syntax.

[LING 212 Language and Culture
Spring. 3 credits. Not offered 1999–2000. J. Whitman.
We often assume that there is a close relationship between differences in language and cultural variation. This course focuses on that relationship, beginning with an examination of the linguistic relativity hypothesis, which posits a link between basic properties of languages and crosscultural differences in world view. We also examine potential cultural determinants of variation in language: pronouns and honorific systems, systems of ritual and taboo in language, and the impact of narrative organization on grammar. Special attention is paid to 'extreme' forms of language: invented languages from Esperanto to Klingon; glossolalia and trance languages; language games and secret languages.]

[LING 215/715 Psychology of Language (also Psychology 215)
Not offered 1999–2000.
For description, see PSYCH 215.]

[LING 216 Mathematical Linguistics
Spring. 4 credits. Not offered 1999–2000. Staff.
The course is an introduction to the mathematical concepts and techniques most frequently used in theoretical linguistics.]

LING 244 Language and Gender (also Women's Studies 244)
Spring. 4 credits. For non-majors or majors. S. McConnell-Ginet.
This course explores connections between language (use) and gender/sex systems, addressing such questions as the following. How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women's studies and feminist theory.

[LING 246/546 Minority Languages and Linguistics
Spring. 4 credits. Graduate students register under LING 546. Not offered 1999–2000. W. Harbert, W. Browne, V. Carstens, M. Diesing, and M. Suñer.
This course examines minority languages from linguistic, social, and political perspectives. Topics discussed include language death, language maintenance, bilingualism, language contact, official status, and related issues. Languages/language families to be discussed include Spanish in the U.S., Celtic languages, African languages, Yiddish, and others, depending on the special interests of the instructors.]

LING 264 Language, Mind, and Brain
Fall. 4 credits. For non-majors or majors. Prerequisite: a basic course in linguistics and/or psychology is desirable. J. Bowers.
An introductory course that emphasizes the formal structure of natural language and its biological basis. The following topics are covered: the formal representation of linguistic knowledge, principles and parameters of universal grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. This course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.

[LING 270 Truth and Interpretation (also Cognitive Studies 270 and Philosophy 270)
Not offered 1999–2000.
For description, see PHIL 270.]

LING 300 Field Methods
Spring. 4 credits. Prerequisites: LING 201 and 203 or permission of instructor. C. Collins.
Elicitation, recording, and analysis of data from a native speaker of a non-Western language not generally known to students.

LING 301–302 Phonology I, II
301, fall; 302, spring. 4 credits each term. Prerequisites: for LING 301, LING 201 or equivalent; for LING 302, LING 301 or permission of instructor. Fall, A. Cohn; spring, D. Zec.
301 provides a basic introduction to phonological theory. The first half of the course focuses on basic principles of phonology, patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 302 provides further refinement of the issues investigated in 301, focusing in particular on metrical theory, Lexical Phonology, autosegmental phonology, and Prosodic Morphology.

LING 303–304 Syntax I, II
303, fall; 304, spring. 4 credits each term. Prerequisites: for LING 303, LING 203; for LING 304, LING 303 or permission of instructor. Fall, C. Collins; spring, J. Bowers.
303 is an introduction to syntactic theory, with emphasis on the classical theory of transformational grammar. 304 is an advanced course, surveying current syntactic models and dealing with such issues as the nature of syntactic representation, levels of representation, principles of universal grammar, and the relation of syntax and semantics.

[LING 306 Functional Syntax
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 1999–2000.
A general survey of syntactic theories that highlight grammatical function and reveal its role in discourse structure.]

LING 309 Morphology
Spring. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. V. Carstens.
A general survey course, focusing on the relationship of meaning and form in morphology and introducing techniques of morphological analysis. Current research on form-meaning questions is discussed.

[LING 310 Morphology II
Fall. 4 credits. Prerequisite: LING 203 or permission of instructor. Not offered 1999–2000. Staff.
Considers recent discussions in morphological theory, in particular the relationship of morphology and syntax.]

LING 314 Introduction to Historical Linguistics #
Spring. 4 credits. Prerequisite: LING 201 or permission of instructor. J. Whitman.
A survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

LING 319 Phonetics I
Fall. 4 credits. Prerequisite: LING 201 or permission of instructor. A. Tsuchida.
Provides a basic introduction to the study of phonetics. Topics to be covered include anatomy and physiology of the speech production apparatus, transcription and production of some of the world's sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, stress and intonation.

LING 320 Phonetics II
Spring. 4 credits. Prerequisite: LING 319. A. Tsuchida.
This course is a continuation of Phonetics I and provides a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of "hands-on" projects will be part of the course.

[LING 325 Pragmatics
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 1999–2000. S. McConnell-Ginet.
An introduction to the study of such topics as speech acts, presupposition, deixis, implicatures, and conversational strategies.]

[LING 334 Non-Linear Syntax
Fall. 4 credits. Prerequisite: LING 303 or equivalent. Not offered 1999–2000. C. Rosen.
Analyses of some twenty diverse languages are examined with the aim of building a formal account of the syntactic constructions existing in the world's languages, and discerning universals that delimit this inventory. Non-linear theory, designed for comparative work, depicts constructions in the abstract, not imagining them as arrays of elements in space. Simultaneously it studies the morphosyntactic systems that relate constructions to their linear realizations.]

LING 350 Representing Language: Knowledge Taught and Untaught (also Cognitive Studies 350)
Fall. 4 credits. J. Gair.
This course will deal with some of the discoveries made in modern linguistics that reveal some fundamental properties of human language and the special human capacity for it, as well as some of the still unsettled questions about it. It will also trace some of the paradigm shifts that have occurred within linguistics, and consider some of the ways in which language has been represented, both within the science of linguistics and outside of it, by contrasting what is known with what is popularly believed to be true. Projected topics will include: innateness vs. language as socio-cultural; language variability vs. Universal Grammar; language change and relatedness of languages; the question of correctness.

[LING 370 Language and Cognition (also Psychology 370)
Spring. 4 credits. Prerequisite: LING 101 or 264 or PSYCH 215, or permission of one of the instructors. Not offered same years as PSYCH 416. Not offered 1999–2000.
Examination of current research on selected topics on language from both linguistic and psychological perspectives. Topics may include: universal grammar and language acquisition, syntactic parsing, word recognition, sentence production, aphasia, and schizophrenic language.]

LING 390 Independent Study in Linguistics
Fall or spring. 1–4 credits variable. Prerequisite: LING 101 or permission of instructor. Staff.
Independent study of linguistics topics not covered in regular curriculum for undergrads.

LING 401 Approaches to Language Typology I
Spring. 4 credits. Prerequisite: LING 101 or equivalent. C. Rosen.
Study of a basic question of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts to formalize universals of syntax and to characterize the total repertory of constructions available to natural languages. Common morphological devices and their syntactic correlates. Emphasis on systems of case, agreement, and voice.

[LING 402 Approaches to Language Typology II
Spring. 4 credits. Prerequisite: a course in syntax. Not offered 1999–2000. C. Collins.
A topics-oriented course focusing on the interaction between linguistic theory and crosslinguistic variation.]

[LING 403 Applied Linguistics and Second Language Learning
Fall. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, anthropology, communication, cognitive studies, education or literary analysis; or permission of instructor. Not offered 1999–2000. Staff.
This course is an introduction to the field of applied linguistics with focus on different domains of language research as they come to bear on the matter of second language learning. Thus, topics include developmental and experimental psychology of language, textual and discourse analysis, literacy, cognitive consequences of bilingualism, corpora and language teaching, and contact between first and second language communities.]

LING 405 Sociolinguistics
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. J. Wolff.
The principal work of linguistics is to describe, analyze, and understand the regularities of language systems. How, then, are we to deal with irregularities and variability when they are observed in language? This course will introduce and discuss the most significant issues in the study of language variation, and it will examine some of the methodologies that have been developed to study variation in language use.

We will consider the observable interations between linguistic variables and social factors (e.g., age, sex, ethnicity) and review the main generalizations about these factors that sociolinguistics has arrived at in the last three decades. Some of the problems associated with the quantification and measurement of non-linguistic variables will be discussed and we will evaluate the various ways researchers have dealt with these problems.

LING 406 Ethnolinguistics
Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. J. Wolff.
This course will be an introduction to the study of pidgin and creole languages and the issues surrounding them both in and beyond linguistics. Topics covered will include: genesis of pidgins and creoles; classification of pidgins and creoles; creoles and language universals; creoles and sociolinguistic variation; a module on Saramaccan Creole English; educational and language planning issues; sociohistorical issues; Black English.

[LING 413 Topics in Historical Linguistics #
Fall. 4 credits. Prerequisite: LING 314 or permission of instructor. Not offered 1999–2000. W. Harbert, C. Rosen.
Examines a selection of recent research illustrating a variety of productive and innovative approaches to problems in historical linguistics. Readings center on phonological and morphological evolution in the Romance and Germanic families. Students carry out guided research projects.]

[LING 414 Second Language Acquisition I (also Asian Studies 414)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Y. Shirai.
A survey of the quantitative and qualitative research literature on the acquisition of second and additional languages among the adult population. Research carried out in both experimental and natural settings will be considered. Topics include: learner errors and errors analysis; contrastive analysis hypothesis; developmental and variability patterns in the acquisition of syntax, phonology and morphology, including the potential effects of typological and formal universals; pragmatics and discourse; the lexicon, social and cognitive factors in acquisition, communication and learning strategies; theories of second language acquisition.]

[LING 415 Second Language Acquisition II (also Asian Studies 417)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Y. Shirai.
This course will examine various issues in second language acquisition research that is particularly relevant to foreign language teaching and learning. Topics covered will include: the role of input (listening/reading) vs. output (speaking/writing); implicit vs. explicit learning; negative vs. positive evidence (including the role of error correction); affective factors (motivation, anxiety); individual differences; teachability hypothesis and syllabus construction; the structure of second language proficiency.]

[LING 420 Approaches to Discourse (also Asian Studies 419 and Comparative Literature 421)
Spring. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, sociology, anthropology, or literary analysis, or permission of instructor. Not offered 1999–2000. H. Tao.
Learning another language entails using that language—that is, being able to create and understand discourse in that language. Interdisciplinary studies demonstrate that there are patterns of language use above the sentence level in ordinary conversation and other types of spoken interaction as well as in written texts of various sorts. This course will introduce the various discourse approaches to language from the fields of anthropology, sociology, cognitive psychology, literary analysis, linguistics, and philosophy and focus on the major insights that have proven to be most helpful in understanding second language learning and language use. The topics to be covered include: narrative structure, conversation structure, rhetorical structure, information flow in discourse, and language and social interaction.]

LING 421–422 Semantics I, II
421, spring; 422, fall. 4 credits each term. Prerequisites: for LING 421, LING 203; for LING 422, LING 421 or permission of instructor. Fall, J. Shimoyama; spring, M. Diesing.
421: An introduction to semantics of natural language. The course starts from basic foundational questions concerning the nature of meaning and the empirical domain of semantic theory. Truth-conditional and logical theories and their application to the investigation of the structure of natural languages are extensively explored (with some comparisons with other approaches). Through the study of quantification, scope, anaphora, modalities, presuppositions, and the like, one tries to gain insight into general characteristics of the cognitive apparatus that is at the basis of our capacity for understanding sentences.
422: Guides students into current work in semantic theory. The first half of the course is an introduction to Montague-style semantics, whose influence on current research is quite

extensive. The second half of the course focuses on selected topics that have grown out of (and sometimes against) classical Montague semantics. Such topics are usually drawn from the following: generalized quantifiers and anaphora, type-shifting, problems of tense and aspect, the linguistic relevance of algebraic approaches to properties, propositions, events and thematic roles, and discourse representation theory.

[LING 425 Corpora and Applied Linguistics (also Asian Studies 425)
Fall. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, sociology, anthropology, or literary analysis, or permission of instructor. Not offered 1999–2000. H. Tao.
This course introduces the foundations of studies of language based on large quantities of natural language data, the utility of large corpora for language learning and teaching, and the computational skills needed to carry out applied linguistics research based on language corpora. It will be conducted in both lecture and lab session formats. Topics include: the creation of corpora, coding and tagging of corpora, monolingual vs. parallel corpora, native vs. learner corpora, corpora and language pedagogy, corpora and discourse pragmatics, special issues in East Asian language corpora, corpora and lexicon and grammar.]

LING 436 Language Development (also Cognitive Studies 436, Human Development 436, and Psychology 436)
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633/LING 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, neurobiology, or linguistics. B. Lust.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 437).

LING 450 Lab Course: Language Development (also Cognitive Studies 450 and Psychology 437)
Spring. 2 credits. Prerequisite: concurrent enrollment in either COGST/HD/LING/PSYCH 436. B. Lust.
This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies research labs and will meet once a week in group format. It will include several structured modules dealing with topics covered in the survey course, COGST/HD/LING/PSYCH 436, Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods in order to test hypotheses.

LING 493 Honors Thesis Research
Fall. 4 credits. Staff.
May be taken before or after LING 494, or may be taken independently.

LING 494 Honors Thesis Research
Spring. 4 credits. Staff.
May be taken as a continuation of, or before, LING 493.

LING 601 Topics in Phonological Theory
Spring. 4 credits. Prerequisites: LING 301 and one higher-level course in phonology. D. Zec.
Selected topics in current phonological theory.

[LING 602 Topics in Morphology
Fall. 4 credits. Prerequisites: LING 301 or 303 or permission of instructor. Not offered 1999–2000. D. Zec.
Selected topics in current morphological theory.]

LING 604 Research Workshop
Fall. 2 credits. S-U grade only. Required of third-year linguistics graduate students. A. Cohn.
This course provides a forum for presentation and discussion of ongoing research, and development of professional skills. Participants must enroll in a concurrent independent study with a special committee member, or a relevant workshop.

[LING 606 Historical Syntax
Spring. 4 credits. Prerequisite: LING 303. Not offered 1999–2000. J. Whitman.
A course on change in language structure, beginning with an overview of widely attested types of syntactic change and proceeding to an introduction of current theoretical treatments. Topics covered include grammaticalization, word order change, and the interplay between morphological and syntactic change. Assumes a basic background in syntax.]

[LING 607 Twentieth-Century Approaches to Language
Fall. 4 credits. Prerequisite: at least one course in linguistics or permission of instructor. Offered alternate years. Not offered 1999–2000. L. Waugh, M. Bernal.
The development of 20th-century approaches to language in America and Europe. Work in 19th-century approaches will also be considered in their relation to 20th-century approaches.]

[LING 608 Discourse Analysis (also Comparative Literature 618)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. L. Waugh, H. Tao.
Linguistic theory applied to relationships beyond the sentence.]

LING 609 SLA and the Asian Languages (also Asian Studies 610)
Fall. 4 credits. Prerequisite: LING 414–415 or permission of instructor. Y. Shirai.
This course will survey the literature on the acquisition of Asian languages both in first and second language. We will mainly focus on Japanese, Korean, Chinese (Mandarin/Cantonese), but other languages (Thai, Malay, Vietnamese, Burmese, Tagalog, etc.) may be dealt with, depending on faculty/student interest.

LING 616 Syntax III
Fall. 4 credits. Prerequisite: LING 304 or permission of instructor. V. Carstens.
An examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/representations and the nature of economy conditions, and parametric differences.

[LING 633 Seminar in First-Language Acquisition: Cross-linguistic Studies of the Acquisition of Anaphora (also Cognitive Studies 633 and Human Development 633)
Fall. 1–4 credits. Prerequisite: LING 436 or equivalent or permission of instructor. Not offered 1999–2000. B. Lust.
This seminar will review and critique current theoretical and experimental studies of the first-language acquisition of anaphora, with a concentration on insights gained by cross-linguistic study of this area. The seminar will focus on relating current developments in linguistic theory regarding anaphora to current experimental research on first-language acquisition of anaphora. Attention will also be given to the development of research proposals.]

[LING 637 Experimental Research for Language Sciences
Fall. 4 credits. Not offered 1999–2000. Staff.
A detailed study of experimental procedures for carrying out research in linguistics, especially in the areas of applied linguistics, phonetics, and language acquisition. Quantitative and qualitative research methods are considered.]

[LING 648 Speech Synthesis by Rule
Spring. 4 credits. Prerequisite: LING 301, 319, or permission of instructor. Offered alternate years. Not offered 1999–2000. S. Hertz.
Investigates the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model will be proposed, developed, and motivated by considering the relationship between phonological and acoustic structure, speech timing, phonetic universals, coarticulation, and speech perception. The primary tool for investigation will be the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduate students in linguistics, but may also be of interest to students in psychology/psycholinguistics, computer science, and cognitive studies.]

LING 700 Seminar
Fall or spring, according to demand. Credit to be arranged.
Seminars are offered according to faculty interest and student demand. Topics in recent years have included subject and topic, Montague grammar, speech synthesis, lexicography, classical and autonomous phonology, Japanese sociolinguistics, relational grammar, semantics and semiotics, and others.

LING 701–702 Directed Research
701, fall; 702, spring. 1–4 credits. Hours to be arranged. Staff.

LING 773–774 Proseminar in Cognitive Studies I, II (also Cognitive Studies 773–774, Computer Science 773–774, Philosophy 773–774, Psychology 773–774)
Fall: R grade; spring: S-U only. 4 credits. Staff.
This year-long seminar is intended to provide graduate students with an interdisciplinary introduction to the study of knowledge, its representation, acquisition, and use.

Linguistics of Particular Languages

Fees: Depending on the course, a small fee may be charged for photocopied texts for course work.

African

[LING 235 Introduction to African Languages and Linguistics @
Fall. 3–4 credits variable. Not offered 1999–2000. C. Collins.
This is a survey of aspects of language use in Africa. We will discuss the relation between language and culture, the structural characteristics of African languages, and the historical relationships between different African languages.]

[LING 431 Structure of an African Language
Spring. 4 credits. Prerequisite: LING 101 or permission of the instructor. Offered alternate years. Not offered 1999–2000. V. Carstens.
A survey of the grammar of an African language in light of current linguistic theory.]

[LING 514 Syntax of African Languages
Spring. 4 credits. Prerequisites: LING 101 and permission of instructor. Not offered 1999–2000. V. Carstens.
Selected topics in the syntax of African languages.]

American Sign Language

LING 111 American Sign Language I
Fall. 4 credits. T. Galloway.
Students with no previous background in American Sign Language (ASL) will be introduced to the nature of a signed language and develop expressive and receptive skills in ASL. Basic grammar and vocabulary will be covered, including explanations of the fundamental parts of a sign, proper use of fingerspelling, and the significance of nonmanual features. Instruction will be supplemented with videotexts allowing students to begin to explore the visual literature of the Deaf community in the United States: stories, poems, and jokes which are unique to Deaf culture. Readings and class discussions will acquaint students with the causes of deafness, the historical development of ASL and its linguistic status, as well as characteristics of deaf education both throughout history and in the present day.

LING 112 American Sign Language II
Fall. 4 credits. Prerequisite: LANG 101, LING 111, or permission of instructor. T. Galloway.
In this intermediate course, students will continue to develop expressive and receptive fluency in ASL. Focus will be on greater descriptive skill, developing intermediate level narratives, and enhancing conversational ability. Advanced grammar and vocabulary will be supplemented with further instruction in the linguistic structure of ASL. Readings, class discussions, and videotexts containing samples of the visual literature of the U.S. Deaf community will continue students' investigation into American Deaf history and the shaping of modern Deaf culture.

Arabic

[LING 416 Structure of the Arabic Language (also Near Eastern Studies 416) @ #
Not offered 1999–2000.
For description, see NES 416.]

Celtic

LING 236 Introduction to Gaelic
Spring. 3 credits. W. Harbert.
This course is an introduction to the history, structure, and current status of the Scottish Gaelic language, oriented around elementary Gaelic texts.

[LING 238 Introduction to Welsh
Spring. 3 credits. Not offered 1999–2000. W. Harbert.
This course surveys the history, structure, cultural and political situation of the Welsh language. It includes several sessions of elementary language instruction and a brief introduction to Welsh literature.]

LING 239/539 The Celtic Languages
Fall. 4 credits. Graduate students register under LING 539. W. Harbert.
This course surveys the history, structure, and political and social situation of the Celtic languages (Welsh, Scottish Gaelic, Irish Gaelic, Breton, Cornish, and Manx). The course includes a few days of introductory language instruction in some of these languages.

LING 437 Celtic Linguistic Structures
Spring. 4 credits. Prerequisite: LING 303. W. Harbert.
This course will treat selected topics in the syntax and morphosyntax of the modern Celtic languages.

LING 623–624 Old Irish I, II
623, fall; 624, spring. 4 credits each term. Prerequisite for LING 624: LING 623 or permission of instructor. E. Rieken.
An introduction to "classical" Old Irish for students with no previous experience with the language.

LING 625 Middle Welsh
Spring. 4 credits. Prerequisite: permission of instructor. W. Harbert.
Students develop a reading knowledge of Middle Welsh through reading prose and poetic texts with emphasis on prose tales, including the *Mabinogi*.

[LING 627 Advanced Old Irish]

Chinese

LING 429 Structure of the Chinese Language (also Asian Studies 429) @
Fall. 4 credits. Prerequisite: proficiency in Chinese or permission of instructor. H. Tao.
This course is an introduction to the structure of Chinese and to general issues related to Chinese linguistics. Special attention will be paid to Chinese discourse and pragmatics and to general questions of language use.

English

LING 217 History of the English Language #
Spring. 4 credits. W. Harbert.
This course explores the development of the English language from its Indo-European beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old English, Middle English, Standard English, dialects, and World Englishes.

LING 242 Diversity in American English
Spring. 3 credits. C. Collins.
This course is a basic introduction to the regional dialects of English spoken in the United States. It is linguistically oriented, introducing the relevant aspects of phonetics, phonology, morphology, and syntax where appropriate. There is an emphasis on the students discovering what features characterize their own dialects (if they speak American English). The class is also of use as an introduction to American English dialects for non-native speakers of English.

LING 311 The Structure of English: Demystifying English Grammar
Spring. 4 credits. J. Bowers.
Do you suffer from grammatical insecurity? In foreign language classrooms, do you find yourself at a loss because you don't know how grammatical terminology applies to English? This course will make English grammar accessible and comprehensible to native speakers who want to understand how the language they use so easily works. In addition to standard grammatical notions, the course will consider dialectal variation, matters of style, how sentence structure conveys viewpoint, and other discourse phenomena.

LING 347 Topics in the History of English
Spring. 4 credits. Prerequisite: LING 217, 314, a course in Old or Middle English, or permission of instructor. W. Harbert.
The course will treat specific topics in the linguistic history of the English language, selected on the basis of the particular interests of the students and the instructor. The topic area for the 1999–2000 academic year will be morphological and syntactic change during the Early Middle English period—a period crucial to the development of the distinctive syntactic properties of Modern English.

[LING 649 Structure of Old English
Spring. 4 credits. Prerequisite: Ling 441. Offered alternate years. Not offered 1999–2000. W. Harbert.
Linguistic overview of Old English, with emphasis on phonology and syntax.]

French

[LING 232 The French Language Today
Fall. 3 credits. Prerequisite: LING 101. Not offered 1999–2000. A. Cohn.
Designed for students with a working knowledge of French, this course explores the structure of French and how it is used. The course investigates the sound system, word structure and sentence structure of French as well as different varieties of French, including regional and social variation and formal vs. informal differences.]

[LING 433 Contemporary Theories of French Grammar
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1999–2000. L. Waugh.
Selected topics in twentieth-century French linguistics.]

[LING 439 Linguistic Structure of French II: Semantics, Pragmatics, and Discourse Analysis
Fall. 4 credits. Prerequisite: qualification in French. Offered alternate years. Not offered 1999–2000. L. Waugh.
A synchronic study and analysis of modern French, with emphasis on semantics, pragmatics, and discourse analysis.]

German and Germanic

[LING 237 The Germanic Languages
Fall. 4 credits. Not offered 1999–2000. W. Harbert, M. Diesing.
This course surveys the history, structure, and use of the modern Germanic languages (English, German, Dutch, Afrikaans, Swedish, Danish, Icelandic, Norwegian, Faroese, and Yiddish).]

LING 241 Yiddish Linguistics (also Jewish Studies 271)
Fall. 4 credits variable. Prerequisite: LING 101 or permission of instructor. M. Diesing.
This course will cover a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.

LING 315–316 Old Norse
315, fall; 316, spring. 4 credits each term. E. Johannsson.
Old Norse is a collective term for the earliest North Germanic literary languages: Old Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic will be the center of attention, and the purpose is twofold: the student will gain (a) knowledge of an ancient North Germanic language, important from a linguistic point of view, as well as (b) access to the medieval Icelandic (and Scandinavian) literature.

315: The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a 13th-century narrative based on the Eddaic poetry. 316: Extensive reading of Old Norse texts, among them selections from some of the major Icelandic family sagas: Njals saga, Grettis saga, and Egils saga, as well as the whole Hrafnkels saga.

LING 441 Introduction to Germanic Linguistics (also German Studies 441)
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. W. Harbert.
Survey of major issues in historical Germanic linguistics.

[LING 643 Topics in Historical Germanic Phonology #
Spring. 4 credits. Prerequisite: LING 441. Not offered 1999–2000. W. Harbert.
The development of the sound system from Proto-Germanic to its daughter languages.]

[LING 644 Topics in Historical Germanic Syntax #
Fall. 4 credits. Prerequisite: LING 441. Not offered 1999–2000. W. Harbert.
A diachronic and comparative investigation of syntactic processes in the older Germanic languages.]

[LING 645 Gothic
Spring. 4 credits. Prerequisite: LING 101. Offered alternate years. Not offered 1999–2000. W. Harbert.
Linguistic structure of Gothic, with extensive readings of Gothic texts.]

[LING 646 Old High German, Old Saxon
Spring. 4 credits. Prerequisite: LING 101. Offered alternate years. Not offered 1999–2000. W. Harbert.]

[LING 649 Structure of Old English #
Fall. 4 credits. Prerequisite: LING 441. Offered alternate years. Not offered 1999–2000. W. Harbert.
Linguistic overview of Old English, with emphasis on phonology and syntax.]

Greek

LING 451 Greek Comparative Grammar (also Classics 421)
Fall. 4 credits. Prerequisite: thorough familiarity with classical Greek morphology. A. Nussbaum.
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

[LING 455 Greek Dialects (also Classics 425) #
Fall. 4 credits. Prerequisite: basic familiarity with classical Greek morphology. Not offered 1999–2000. A. Nussbaum.
A survey of the dialects of ancient Greek through the reading and analysis of representative epigraphical and literary texts.]

[LING 457 Homeric Philology (also Classics 427) #
Spring. 4 credits. Prerequisite: ability to read Homeric Greek. Not offered 1999–2000. A. Nussbaum.
The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstsprache: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.]

[LING 459 Mycenaean Greek (also Classics 429) #
4 credits. Prerequisite: thorough familiarity with classical Greek morphology. Not offered 1999–2000. A. Nussbaum.
An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology.]

Hungarian

[LING 427 Structure of Hungarian
Fall. 4 credits. Prerequisite: LING 101 or equivalent. Offered alternate years. Not offered 1999–2000. W. Browne.
Survey of phonology, morphology, and syntax of this non-Indo-European language. Topics to be stressed include vowel harmony, consonant assimilation; definite and indefinite conjugations, possessives, verb prefixes, causatives; focus, word order, clause types, movement, intonation.]

Indo-European

LING 131–132 Elementary Sanskrit (also Classics 131–132 and Sanskrit 131–132)
For description, see SANSK 131–132.

[LING 251–252 Intermediate Sanskrit (also Classics 251–252 and Sanskrit 131–132) @ #
Not offered 1999–2000.
For description, see SANSK 131–132.]

[LING 460 Sanskrit Comparative Grammar
Spring. 4 credits. Prerequisite: reasonable familiarity with classical Sanskrit morphology. Not offered 1999–2000. A. Nussbaum.
A survey of the historical phonology and morphology of Sanskrit in relation to the Indo-Iranian and Indo-European comparative evidence.]

LING 617–[618] Hittite
617, fall; [618, spring]. 4 credits each term. Prerequisites: for LING 617, permission of instructor; for LING 618, LING 617 or permission of instructor. E. Rieken.
An introduction to the cuneiform writing system and the grammar of Hittite, followed by the reading of selected texts.

[LING 619 Rigveda
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. Minkowski.
Reading and linguistic analysis of selected Vedic hymns.]

[LING 631 Comparative Indo-European Linguistics
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.
An introduction to the comparative grammar of the Indo-European languages.]

[LING 635–636 Indo-European Workshop
635, fall; 636, spring. 4 credits each term. Prerequisite: permission of instructor. Not offered 1999–2000. Staff.
An assortment of subjects intended for students with previous training in Indo-European linguistics: problems in the reconstruction of Proto Indo-European, topics in the historical grammars of the various IE languages, reading and historical linguistic analysis of texts, and grammatical sketches of "minor" IE languages.]

Italian

[LING 409 Structure of Italian
Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1999–2000. C. Rosen.
Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modals, clitics, reflexive constructions, agreement, impersonal constructions, causatives.]

[LING 410 History of the Italian Language #
Spring. 4 credits. Prerequisites: LING 321 and either Italian 201, 203, or equivalent. Offered alternate years. Not offered 1999–2000. C. Rosen.
Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.]

Japanese

LING 404 Linguistic Structure of Japanese (also Asian Studies 412) @
Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and LING 101 or equivalent introductory course in linguistics. Offered alternate years. J. Whitman.
Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

LING 411 History of the Japanese Language (also Asian Studies 411) @ #
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. J. Whitman.
An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

Korean

LING 430 Structure of Korean (also Asian Studies 430)
Spring. 4 credits. Offered alternate years. J. Whitman.
Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory. No previous knowledge of Korean required.

Latin and Italic

[LING 452 Latin Comparative Grammar (also Classics 422)
Fall. 4 credits. Prerequisite: thorough familiarity with classical Latin morphology. Not offered 1999–2000. A. Nussbaum.
The prehistory and evolution of the sounds and forms of classical Latin as reconstructed by comparison with the other Indo-European languages.]

[LING 454 Italic Dialects (also Classics 424) #
Fall. 4 credits. Prerequisite: thorough familiarity with classical Latin morphology. Not offered 1999–2000. A. Nussbaum.
The phonology and morphology of Faliscan, Oscan, and Umbrian studied through the reading of epigraphical texts. Attention to the relations of these languages to Latin and the question of proto-Italic.]

[LING 456 Archaic Latin (also Classics 426) #
Fall. 4 credits. Prerequisite: reading knowledge of Latin. Not offered 1999–2000. A. Nussbaum.
Reading of epigraphic and literary preclassical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language.]

Romance

[LING 321–322 History of the Romance Languages #
321, fall; 322, spring. 4 credits each term. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1999–2000. C. Rosen.
321: Popular Latin. Pan-Romance trends in phonology, morphology, syntax, and the lexicon. Regional divergence. Non-Latin influences. Medieval diglossia and emergence of Romance standards. 322: French, Italian, and Spanish from 850 to 1250 A.D. Analysis of texts. Overview of other languages to the present day. Elements of dialectology.]

LING 323–[324] Comparative Romance Syntax
323, spring; [324]. 4 credits. Prerequisites: LING 101, or equivalent and qualification in any romance language. Offered alternate years. C. Rosen.
Concise survey of romance syntax, covering the salient constructions in six languages with equal attention to their historical evolution and their current state. Grammatical innovation and divergence in a typological perspective.

Russian and Slavic

[LING 417–418 History of the Russian Language (also Russian 401–402) #
417, fall; 418, spring. 4 credits each term. Prerequisites: for LING 417, permission of instructor; for LING 418, LING 417 or equivalent. Offered alternate years. Not offered 1999–2000. W. Browne.
Phonological, morphological, and syntactic developments from Old Russian to modern Russian.]

LING 443–[444] Linguistic Structure of Russian (also Russian 403–404)
443, spring; [444]. 4 credits each term. Prerequisites: for LING 443, LING 101 and permission of instructor; for LING 444, LING 443 or equivalent. Offered alternate years. W. Browne.
A synchronic analysis of the structure of modern Russian. LING 443 deals primarily with morphology and its relation to syntax and 444 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.

LING 661 Old Church Slavonic (also Russian 601)
Fall. 4 credits. This course is prerequisite to LING 662. Offered alternate years. W. Browne.
Grammar and reading of basic texts.

LING 662 Old Russian Texts (also Russian 602)
Spring. 4 credits. Prerequisite: LING 661. Offered alternate years. W. Browne.
Grammatical analysis and close reading of Old Russian texts.

[LING 671–672 Comparative Slavic Linguistics (also Russian 651–652)
671, fall; 672, spring. 4 credits each term. Prerequisites: for LING 671, LING 661 taken previously or simultaneously or permission of instructor; for LING 672, LING 671 or permission of instructor. Offered alternate years. Not offered 1999–2000. W. Browne.
Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.]

South Asian

[LING 341 India as a Linguistic Area
Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 1999–2000. J. Gair.
A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to cross-linguistic family influences and convergence.]

[LING 440 Dravidian Structures
Fall. 4 credits. Prerequisite: LING 101. Not offered 1999–2000. J. Gair.
A comparative and contrastive analysis of the structures of several Dravidian languages.]

[LING 442 Indo-Aryan Structures
Fall. 4 credits. Prerequisite: LING 101. Not offered 1999–2000. J. Gair.
Typological discussion of the languages of the subfamily. Specific topics and emphasis may vary depending on the interest of the students.]

Southeast Asian

[LING 230 Introduction to Southeast Asian Languages and Linguistics @
Fall. 3–4 credits variable. For non-majors or majors. Not offered 1999–2000. A. Cohn, J. Wolff.
This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich language diversity of the region. It includes three main parts: 1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; 2) language structures and typological patterns of the area's languages; 3) historical linguistics, genetic relations between languages, as well as the linguistic effects of language contact and linguistic evidence for prehistory.]

[LING 653–654 Seminar in Southeast Asian Linguistics
653, fall; 654, spring. 4 credits each term. Prerequisite: LING 303 or permission of instructor. LING 653 is not a prerequisite for 654. Not offered 1999–2000.
Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.]

LING 655–656 Seminar in Austronesian Linguistics
655, fall; 656, spring. 4 credits each term. Prerequisites: for LING 655, LING 101 and permission of instructor; for LING 656, LING 655. J. Wolff.
Descriptive and comparative studies of Malayo-Polynesian languages.

[LING 657–658 Seminar in Austroasiatic Linguistics
657, fall; 658, spring. 4 credits each term. Prerequisite: LING 101 or permission of instructor. Not offered 1999–2000.
Descriptive and comparative studies of Austroasiatic languages.]

Spanish

[LING 366 Spanish in the United States (also SpanRom 366 and Latino Studies Program 366)
Fall. 4 credits. Prerequisite: some knowledge of Spanish. Not offered 1999–2000. M. Suñer.
Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics. Sex-related phenomena.]

[LING 407 Grammatical Structure of Spanish I (also SpanRom 407)
Spring. 4 credits. Prerequisite: proficiency in Spanish or permission of instructor. Not offered 1999–2000. M. Suñer.
This course seeks to equip the advanced student or the future language professional with practical insights into problem areas for foreign language learners with the aid of linguistic descriptions. The intent is to narrow the gap known to exist between the knowledge that a native speaker has and the incomplete one that a foreign language learner possesses.]

[LING 408 Grammatical Structure of Spanish II (also SpanRom 408)
Spring. 4 credits. Prerequisites: LING 101 and proficiency in Spanish or permission of instructor. Offered alternate years. Not offered 1999–2000. M. Suñer.
Survey of Spanish morpho-syntax using contemporary theoretical models to highlight hidden patterns and generalizations. Topics may vary according to students' interests, but may include major clause types, word order possibilities, negation, agreement, and null categories.]

MATHEMATICS

R. Connelly, chair; G. Bailey, D. Barbasch, Y. Berest, L. Billera, K. Brown, S. Chase, associate chair and director of undergraduate studies; M. Cohen, R. K. Dennis, P. Diaconis, R. Durrett, E. Dynkin, C. Earle, A. Epstein, J. Escobar, V. Gasharov, L. Gross, M. Gross, J. Guckenheimer, A. Hatcher, D. Henderson, J. Hubbard, J. Hwang, Y. Ilyashenko, A. Kable, P. Kahn, H. Kesten, V. Limic, M. Morley, A. Nerode, M. Nussbaum, I. Peeva, R. Platek, R. Ramakrishna, T. Rishel, O. Rothaus, L. Saloff-Coste, A. Schatz, S. Sen, R. Shore, R. Sjamaar, J. Smillie, A. Solomon, B. Speh, M. E. Stillman, R. Strichartz, M. Sweedler, M. Terrell, R. Terrell, P. Topping, K. Vogtmann, L. Wahlbin, B. H. West, J. West, D. Wise, (Emeritus: J. Bramble, R. Farrell, G. R. Livesay, P. Olum, L. E. Payne, A. Rosenberg)

Mathematics is the language of modern science; basic training in the discipline is essential for those who want to understand, as well as for those who want to take part in, the important scientific developments of our time. Acquaintance with mathematics is also extremely useful for students in the social sciences and valuable for anyone interested in the full range of human culture and the ways of knowing the universe in which we live.

The Department of Mathematics faculty has strong groups specializing in algebra, number theory, real and complex analysis, Lie groups, topology and geometry, logic, probability and statistics, mathematical physics, and applied mathematics. Related departments at Cornell have specialists in computer science, operations research, linear programming, and game theory, and courses in these topics can be integrated readily into the mathematics major.

The department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help.

Students who want to take any of the courses numbered 300 or above are invited to confer, before registering, with the instructor concerned. The level of a course is indicated by the first digit of the course number: roughly, 1, 2, indicate underclass courses; 3, 4, upperclass courses; 5, professional level and mathematics education courses; 6, 7, graduate courses. The subject matter of courses is often indicated by the second digit: 0, general; 1, 2, analysis; 3, 4, algebra; 5, 6, topology and geometry; 7, probability and statistics; 8, logic; 9, other.

Midterm grades, when required, will be S or U only, except in special circumstances. In courses with numbers below 700, students will receive letter grades, with the exception of non-mathematics majors who have requested an S-U grade.

Advanced Placement

Secondary school students are strongly urged to take one of the two advanced placement examinations of the College Entrance Examination Board in their senior year. Freshmen who have had some calculus but who have not taken an advanced placement examination should take the placement examination in mathematics offered at Cornell just before the beginning of classes in the fall. It is most important that anyone with any knowledge of calculus carefully read "Advanced Placement," p. 5.

The Major

The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike, and can be broad or narrow. It can also be combined easily with serious study in another subject in the physical, biological or social sciences by means of a double major and/or concentration. For example, a double major with mathematics and computer science is facilitated by the concentration in computer science (4b) described below; this concentration permits a student to use certain computer science courses to satisfy the requirements of both majors. Questions concerning the major should be brought to a departmental representative.

Prerequisites: the traditional prerequisites are Mathematics 221–222, 223–224 or 293–294. A unit on infinite series is required. Such a unit is offered in Mathematics 112, 122, and 192. Normally students will be admitted to the major only when they have grades of B– or better in all sophomore-level mathematics courses they have taken. Alternative prerequisites are Mathematics 213, 231, normally with grades of B+ or better.

Requirements

There are five requirements for the major:

1) Computer Science 100. Students are urged to take this course before the end of the sophomore year.
2) Two courses in algebra. Eligible courses are Mathematics 431 or 433, 432 or 434 or 332, 336.
3) Two courses in analysis. Eligible courses are Mathematics 321, 411 or 413, 414, 418, 420, 422, 423, 427, 428.
4) Further high-level mathematical courses. Any one of the following are sufficient:
   a) four additional Mathematics courses numbered 300 or above.
   b) (Concentration in Computer Science) five additional courses from i) and ii) below, of which at least one is from i) and three are from ii)
      i) Mathematics courses numbered 300 or above
      ii) Computer Science courses numbered 310 or above
   c) (Concentration in Operations Research) five additional courses from iii) and iv) below, of which at least one is from iii) and three are from iv)
      iii) Mathematics courses numbered 300 or above

iv) courses in Operations Research and Industrial Engineering, typically out of 320–361 (excluding 350) and/or out of 431–472.

d) (Concentration in Economics) Five additional courses from v), vi), vii) below, as follows: 1 course from v), 3 courses from vi), and a 5th course from any of v), vi), vii). However, Mathematics 472 and Economics 319 cannot **both** be used to satisfy these requirements.

v) Mathematics courses numbered 300 or above

vi) Economics courses with significant mathematical content. Eligible courses are Economics 318, 319, 320, 416, 419, 450 (also ARME 450), 467, 609, 610, 613, 614, 619, 620, 717, 756

vii) Courses in Operations Research with significant mathematical content and dealing with material of interest in economics; e.g. OR&IE 320, 321, 432, 435, the 1-semester sequence 475–476. However, the student may, with the advisor's approval, select an OR&IE course that satisfies the basic intent of the requirement but is not in this list.

These four alternatives do not exhaust the possibilities. A mathematics major interested in a concentration in a subject different from those above may develop a suitable individual program in consultation with the major advisor.

5) One course dealing with mathematical models. Any course from outside mathematics with serious mathematical content and dealing with scientific matters, provided the course has not been used toward satisfying the previous requirement, e.g., Physics 208, 213, or 217 (but not 112 or 207), or Computer Science 211 (if Computer Science option not used above). Students may consider courses from biology, chemistry, economics, and other fields; they should consult their adviser.

A course may be counted toward the mathematics major only if a grade of C- or better is received for that course.

Major advisers can alter these requirements upon request of an advisee, provided the intent of the requirements is met.

Honors Program

The Department of Mathematics awards honors (cum laude) and high honors (magna cum laude and summa cum laude) to graduating mathematics majors who have demonstrated outstanding ability in the major program.

The awards are determined by the Mathematics Major Committee in the latter part of the semester prior to graduation. Normally, one requirement for honors is participation in the Honors Seminar (Math 401) for one semester, or independent study at a high performance level. The committee will also be looking for excellent performance in mathematics courses, particularly in challenging courses at the 400-level or beyond. Students interested in honors should consult their major advisers concerning suitable courses.

To be considered for high honors, a student usually will be expected to write a Senior Thesis, and present it orally to the department. This project is carried out during the senior year under the supervision of a member of the Mathematics Department faculty. Students interested in high honors should consult their major advisers and the Mathematics major director during the second semester of their junior year.

Teacher Education in Agriculture, Mathematics and Science (TEAMS)

Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. TEAMS is a university program jointly conducted by the Departments of Education and Mathematics. Although TEAMS offers options for undergraduate and graduate study, most students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates. Students who complete their undergraduate studies and their student teaching are eligible for provisional teaching certification from the State Education Department, effective for five years. Students completing the graduate program can earn the master's degree required for permanent certification.

For more information, contact the TEAMS Student Support Specialist at 255–9255 or the program coordinator, D. Trumbull (Education) 255–3108 or, in Mathematics, A. Solomon 255–3894.

Distribution Requirement

Virtually all mathematics courses can be used to satisfy the Quantitative and Formal Reasoning part of the Distribution Requirements. Explicit exceptions are noted in the beginning of the Arts and Sciences section of the Courses of Study.

Basic Sequences

Precalculus

Description	*Course Numbers*
1) Algebra and trigonometry to prepare students for calculus	MATH 109* or EDUC 005*
2) Algebra, analytic geometry, elements of calculus	EDUC 115**

*MATH 109 and EDUC 005 do not carry credit for graduation.

**Students who want a second semester of mathematics after EDUC 115 may take MATH 105 or if they need more calculus, MATH 111.

Calculus

Description	*Mathematics Course Numbers*
1) Standard three-semester sequence for students who do not expect to take advanced courses in mathematics	111–112–213
2) Calculus for engineers (also taken by some physical science majors)	191(193)–192–293–294

3) Prospective mathematics majors and others who expect to take advanced courses in mathematics: many sequences are possible. For example, 111–112–221–222; or 121–122–221–222; or 121–122–223–224; or the engineering sequence 191(193)–192–293–294; or a mix of the above. There is no specifically "approved" basic sequence for mathematics majors. Students should consult with their advisers for each individual case.

Mathematics 191 or 193 may be substituted for 111 in sequences 1 and 3. Sequences 2 and 3 are two-year sequences that include some linear algebra.

Students who take sequence 1 may learn some linear algebra by taking Mathematics 231. A student whose performance in 112 is excellent may switch to sequence 3 and take 221.

Special-Purpose Sequences

Description	*Mathematics Course Numbers*
1) Finite mathematics and calculus for biology majors	105–106
2) Other possible finite mathematics and calculus sequence	105–111

Students who want to take two semesters of calculus are advised to take the first two semesters of one of the three calculus sequences. It is also possible to follow Mathematics 106 with 112 or 122.

Switching between calculus sequences is often difficult, especially at the 200 level. Students should not attempt such a switch without consulting the associate chair.

Courses with Overlapping Content

Because the department offers many courses with overlapping content, students must choose their courses carefully to ensure that they will receive credit for each course they take. Listed below are groups of courses with similar content. Students will receive credit for only one of the courses in each group.

106, 111, 121, 191, 193
112, 122, 192
213, 222, 224, 293
221, 223, 231, 294
332 and 432
336 and 436
321 and 420

Fees

In some courses there may be a small fee for computer lab use or for photocopying materials to be handed out to students.

Summer Courses

A list of mathematics courses usually offered every summer can be found in the School of Continuing Education and Summer Sessions section of this catalog. Students interested in taking summer courses in mathematics should consult the Mathematics Department (255–4013). A tentative summer listing may be available as early as October.

Undergraduate Course Offerings

Please visit the department web site (http://math.cornell.edu/) for further information and up-to-the-minute corrections.

Foundation courses: 105, 106, 109, 111, 112, 121, 122, 191, 192, 193, 213, 221, 222, 223, 224, 293, 294

Mathematics Education: 405, 408, 451

History of Mathematics: 403

General and Liberal Arts Courses: 103, 150, 171, 181, 401, 405, 408, 490

Analysis: 411, 413, 414, 418

Algebra and Number Theory: 231, 332, 336, 431, 432, 433, 434, 436

Combinatorics: 441, 442

Geometry and Topology: 150, 356, 451, 452, 453, 454, 455

Probability and Statistics: 171, 471, 472, 474

Mathematical Logic: 181, 281, 384, 481, 482, 483, 486

Applied Analysis and Differential Equations: 321, 420, 422, 423, 425, 427, 428

MATH 103 Mathematical Explorations
Fall, spring. 3 credits. This course may be used to satisfy the distribution requirement in mathematics.
This course is for students who wish to experience how mathematical ideas naturally evolve. The homework will consist of the students actively investigating mathematical ideas. The course will emphasize ideas and imagination as opposed to techniques and calculations. Topics will vary depending on the instructor. Some assessment will be done through writing assignments.

MATH 105 Finite Mathematics for Biologists
Fall. 3 credits. Prerequisite: three years of high school mathematics, including trigonometry and logarithms.
Mathematical modeling, sets, functions, and graphing (including use of log and semi-log paper). Probability (with some applications to genetics). Matrices, systems of linear equations, and Markov chains. Examples from biology are used.

MATH 106 Calculus for Biologists
Spring. 3 credits. Prerequisite: readiness for calculus, such as can be obtained from 3 years of high school mathematics (including trigonometry), or any one of the following Cornell courses: MATH 105, MATH 109, or EDUC 115. Mathematics 111, rather than 106, is recommended for those planning to take 112.*
Introduction to differential and integral calculus, partial derivatives, elementary differential equations. Examples from biology are used.

MATH 109 Precalculus Mathematics
Summer. 3 transcript credits only; cannot be used toward graduation.
This course is designed to prepare students for Mathematics 111. Algebra, trigonometry, logarithms, and exponentials are reviewed.

*See the list of courses with overlapping content at the end of the introduction.

MATH 111–112 Calculus
Calculus is the study of functions and processes from the point of view of how they are changing. What can we know of a function from the rate at which it changes? What is the cumulative effect of infinitely many infinitesimal changes?

Mathematics 111 and 112 aim to provide, to students with little or no prior exposure to calculus, the knowledge that calculus is *useful,* in that its applications to the physical, biological and social sciences have shaped our world, and *beautiful*, in that it represents a breathtaking attempt of the human mind to capture the infinitely large and the infinitely small.

These courses seek to provide basic understanding, technical skills and sample applications in various fields for the very broad range of students who take them. Topics are studied (as appropriate) by analytic, numerical and graphical methods. These courses usually have several sections with small-group projects. (See the Supplement to the Course and Room Roster.)

MATH 111 Calculus
Fall, spring. 4 credits. Prerequisites: Mathematics 109 or three years of high school mathematics, including trigonometry.*
Functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic and exponential functions. Applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, applications to the sciences. The mean value theorem. Antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integration, the area under a curve. Graphing calculators will be used, and their pitfalls will be discussed, as applicable to the above topics.

Mathematics 111 can serve as a one-semester introduction to calculus or as part of a 2-semester sequence in which it is followed by Mathematics 112 or 122.

MATH 112 Calculus
Fall, spring. 4 credits. Prerequisites: Mathematics 106 or 111 with a grade of C or better. Those who do well in Mathematics 111 and expect to major in mathematics or a strongly mathematics-related field should take 122 instead of 112.*
Integration: applications, including volumes and arc length; techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separation of variables, initial conditions, systems, some applications). Infinite sequences and series: definition and tests for convergence, power series, Taylor series with remainder. Parametric equations.

MATH 121 Honors Calculus
Fall. 4 credits. Prerequisite: three years of high school mathematics with average grade of A- or better, or permission of the department.*
This is a first-semester course in calculus intended for students who have been quite successful in their previous mathematics courses. The syllabus for the course is quite similar to that of Mathematics 111; however, the approach is more theoretical and the material will be covered in greater depth.

*See the list of courses with overlapping content at the end of the introduction.

MATH 122 Honors Calculus
Fall, spring. 4 credits. Prerequisite: one semester of calculus with a high performance or, permission of the department. Students planning to continue with Mathematics 213 are advised to take 112 instead of this course.*
Differentiation and integration of elementary transcendental functions, the techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems. The approach is more theoretical than in Mathematics 112.

[MATH 150 From Space to Geometry
Fall. 3 credits. Not offered 1999–2000.
Over the centuries mathematicians have interpreted the concept of "space" in numerous ways. This course will survey some of these approaches from the time of Euclid to the later perspective of non-Euclidean systems. We will evaluate the impact of these viewpoints on such concepts as distance, angle measurement, straightness and curvature, dimension, and surface. We will make and analyze models to get a feel for the concepts and to assess the relevance of various approaches to geometry.]

*See the list of courses with overlapping content at the end of the introduction.

MATH 171 Statistical Theory and Application in the Real World
Fall, spring. 4 credits. Prerequisites: high school mathematics.
This introductory statistics course will discuss techniques for analyzing data occurring in the real world and the mathematical and philosophical justification for these techniques. Topics include population and sample distributions, central limit theorem, and statistical theories of point estimation, confidence intervals, and testing hypotheses, the linear model, and the least squares estimator. The course concludes with a discussion of tests and estimates for regression and analysis of variance (if time permits). The computer will be used to demonstrate some aspects of the theory, such as sampling distributions and the Central Limit Theorem. In the lab portion of the course, students will learn and use computer-based methods for implementing the statistical methodology presented in the lectures. (No previous familiarity with the computer is presumed.)

[MATH 181 Elementary Logic and Formal Proof
Fall. 3 credits. Prerequisite: high school mathematics. Not offered 1999–2000.
The course will explore, from an elementary viewpoint, several topics selected by the instructor from the following list: sets and relations, mathematical induction, cardinal numbers and the notion of infinity, formal and informal proofs and their roles in mathematics and computer science, introduction to mathematical logic, applications of formal logic to world problems and puzzles. The course is designed for liberal arts students, including those who may be "math-averse." Rather than providing a systematic treatment of formal logic, it attempts to instill an appreciation for mathematics and its uses, as

*See the list of courses with overlapping content at the end of the introduction.

well as some understanding of the process by which intuitive notions are developed into precise mathematical statements.]

MATH 191 Calculus for Engineers
Fall. 4 credits. Prerequisite: three years of high school mathematics, including trigonometry.*
Plane analytic geometry, differential and integral calculus, and applications. This course is restricted to engineering students who have had no previous successful experience with calculus. Students who have had such experience but wish a first-semester calculus course should take MATH 193.

MATH 192 Calculus for Engineers
Fall, spring. 4 credits. Prerequisite: Mathematics 191 or 193.*
Methods of integration, polar coordinates, complex numbers, infinite series. Introduction to physical vectors and calculus of functions of several variables.

MATH 193 Calculus for Engineers
Fall, spring. 4 credits. Prerequisite: three years of high school mathematics including trigonometry, plus some knowledge of calculus.*
Plane analytic geometry, differential and integral calculus, and applications. Mathematics 193 covers essentially the same topics as 191, but is designed for students with some previous successful experience with calculus.

MATH 213 Calculus
Fall, spring. 4 credits. Prerequisite: Mathematics 112, 122, or 192.*
Vectors and vector-valued functions. Multivariable and vector calculus including multiple and line integrals. First- and second-order differential equations with applications; systems of differential equations. Elementary partial differential equations. This course is designed for students who wish to master the basic techniques of calculus, but whose major will not require a substantial amount of mathematics. The course may emphasize different topics in the syllabus in different semesters.

MATH 221 Linear Algebra and Calculus
Fall, spring. 4 credits. Prerequisite: two semesters of calculus with a grade of B or better, or permission of instructor.*
Linear algebra and differential equations. Topics include vector algebra, linear transformations, matrices, linear differential equations, as well as an introduction to proving theorems. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.

MATH 222 Calculus
Fall, spring. 4 credits. Prerequisite: Mathematics 221.*
Vector differential calculus, calculus of functions of several variables, multiple integrals. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.

MATH 223 Honors Linear Algebra and Calculus
Fall. 4 credits. Prerequisites: two semesters of calculus with a grade of A- or better, or permission of instructor.*
Vectors, matrices and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals. Mathematics 223–224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses.

MATH 224 Honors Linear Algebra and Calculus
Spring. 4 credits. Prerequisites: Mathematics 223.*
Vector fields; line integrals; differential forms and exterior derivative; work, flux, and density forms; integration of forms over parametrized domains; Green's, Stoke's, and divergence theorems.

MATH 231 Linear Algebra
Spring. 3 credits. Prerequisite: Mathematics 111 or equivalent.*
Vectors, matrices, and linear transformations, affine and Euclidean spaces, transformation of matrices, and eigenvalues.

MATH 281 Deductive Logic (also Philosophy 331)
Spring. 4 credits.
For description, see PHIL 331.

MATH 293 Engineering Mathematics
Fall, spring. 4 credits. Prerequisites: Mathematics 192 plus a knowledge of computer programming equivalent to that taught in Computer Science 100.*
Introduction to ordinary differential equations, systems of ordinary linear differential equations. Vector fields and vector calculus. May include computer use in problem solving.

MATH 294 Engineering Mathematics
Fall, spring. 4 credits. Prerequisite: Mathematics 293.*
Introduction to partial differential equations, Fourier series, and boundary value problems, with applications. Matrix theory and linear algebra, inner product spaces. May include computer use in solving problems.

MATH 321 Applicable Analysis
Fall. 4 credits. Prerequisites: Mathematics 294, or 221 and 222, or 213 and 231. Graduate students who need mathematics extensively in their work and who have had solid courses in calculus and complex variables should take Mathematics 615–616. With less preparation they should take Mathematics 420 (or 321)–422–423.* (This course was formerly MATH 421 and has a substantial overlap with MATH 420.)
A survey of some of the mathematical techniques that are of primary use in applications to the physical sciences and engineering. The primary mathematical tool explored is harmonic analysis, including Fourier Series, Fourier Integral, and Laplace Transform. The applications will be principally to boundary value problems for ordinary and partial differential equations. Moderately advanced mathematics will be used but explained as the course progresses at an elementary level. Much of the formal mathematical material missing in applied courses (e.g., uniform convergence, dominated convergence, complete orthonormal sets) will be thoroughly explained in the course and at the working level.

MATH 332 Algebra and Number Theory
Fall. 4 credits. Prerequisites: Mathematics 221, 231, or 294.*
Various topics from number theory and modern algebra, usually including most of the following: Primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, introduction to arithmetic of the Gaussian integers and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.

MATH 336 Applicable Algebra
Spring. 4 credits. Prerequisites: Mathematics 221, 294, or 231.*
An introduction to concepts and methods of abstract algebra and number theory that are of importance in science and engineering. Applications of the theory to concrete problems will be stressed. The course treats mathematical topics usually selected from the following list: elementary number theory and congruences, groups, fields, partially ordered sets, lattices, graph theory, Boolean algebras, finite machines and languages. Applications discussed usually include at least some of the following: cryptography, primality testing, elementary coding theory, enumeration problems, fast Fourier transform, difference equations. Additional topics and applications may be chosen by the instructor.

MATH 356 Groups and Geometry
Spring. 4 credits. Prerequisites: Mathematics 221 or Mathematics 294.
Groups were introduced in the nineteenth century as the set of symmetries of an algebraic or geometric object, and this viewpoint is a central one in modern mathematics. This course studies the geometry of the planes and of patterns in the plane in terms of the group of symmetries ("isometries") of the plane. Prior knowledge of groups is not a prerequisite. One aim is to give students experience in modern algebra and geometry (including the geometry of complex numbers) and a sense of the unity of mathematics before they take the 400-level courses. Special care is given to initiate the student into the writing of proofs and the language of mathematics. Symmetries. Groups of transformations. Subgroups and cosets. Homomorphisms and isomorphisms. Orbits and fixed points. Frieze groups, wallpaper groups ("2-dimensional crystallographic groups") and the associated tesselations of the Euclidean plane.

MATH 384 Foundations of Mathematics (also Philosophy 434)
Fall. 4 credits. Prerequisites: one course in logic or permission of instructor.
For description, see PHIL 434.

MATH 401 Honors Seminar: Topics in Modern Mathematics
Spring. 4 credits.
This course is a participatory seminar primarily aimed at introducing senior and junior mathematics majors to some of the challenging problems and areas of modern mathematics. The seminar will help students develop research and expository skills in

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). The content will vary from year to year.

MATH 403 History of Mathematics #
Spring. 4 credits. Prerequisites: two courses in mathematics above 300, or permission of instructor.
Survey of the development of mathematics from antiquity to the present, with an emphasis on the achievements, problems, and mathematical viewpoints of each historical period and the evolution of such basic concepts as number, geometry, construction, and proof. Readings from original sources in translation. Students will be required to give oral and written reports.

[MATH 405 Mathematical Exposition
Fall. 3 credits. Not offered 1999–2000.
A seminar in mathematics and its applications to other fields. Students are asked to have had at least two years of college-level mathematics. Course work will consist of discussions, written projects, and student talks. The content of these discussions, projects, and talks will vary, to be determined by the instructor in consultation with the students.]

[MATH 408 Mathematics in Perspective
Spring. 4 credits. Prerequisite: consent of instructor (intended for senior mathematics majors and other students with strong mathematics backgrounds). Not offered 1999–2000.
The purpose of this course is for students to step back and to form an overview of the mathematics they have learned.]

MATH 411 Introduction to Analysis
Fall. 4 credits. Prerequisite: Mathematics 222 or 293–294. Students who need measure theory and Lebesgue integration for advanced probability courses should take Mathematics 413–414 or audit the first few weeks of Mathematics 621. Undergraduates who plan to attend graduate school in mathematics should take 413–414.
An introduction to the theory of functions of real variables, stressing concepts and a logical development of the subject rather than applications. Topics include Euclidean spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, and the Riemann integral. Students who wish to continue study of theoretical analysis upon completion of Mathematics 411 may take, for example, Mathematics 418.

MATH 413–414 Honors Introduction to Analysis
413, fall; 414, spring. 4 credits each. Prerequisite for 413: Mathematics 222 or 293–294. Prerequisite for Mathematics 414: Mathematics 413.
This sequence, designed for honors students, provides an introduction to the theory of functions of real variables, stressing a rigorous logical development of the subject rather than applications. Topics include metric spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, Fourier series, Riemann and Lebesgue integrals, calculus in several variables, and differentiable forms.

MATH 418 Introduction to the Theory of Functions of One Complex Variable
Spring. 4 credits. Prerequisite: Mathematics 222 or 294 or 213. May be offered only in alternate years.
A rigorous introduction to complex variable theory. Complex numbers. Differential and integral calculus for functions of a complex variable, including Cauchy's theorem and the calculus of residues. Elements of conformal mapping.

MATH 420 Applicable Analysis
Fall, spring. 4 credits. Prerequisites: high level of performance in Mathematics 294; or 221 and 222; or permission of instructor. Graduate students who need mathematics extensively in their work and who have had solid courses in calculus and complex variables should take Mathematics 615–616. With less preparation they should take Mathematics 420 (or 321)–422–423.*
Ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical methods, with physical applications. Some important partial differential equations (heat equation, wave equation, and vibrating membrane) and their connections with Fourier series and the Laplacian. Vector calculus and Stokes Theorem, with applications to electromagnetism. Mathematics 420 has substantial overlapping content with Mathematics 321, but more strongly emphasizes the mathematical properties of solutions of ordinary differential equations and the approximation to such solutions by numerical and computer methods.

MATH 422 Applicable Analysis II
Fall, spring. 4 credits. Prerequisite: Mathematics 420 or 321.
Complex variables, Fourier transforms, Laplace transforms. Additional topics may include: an introduction to generalized functions. Applications to partial differential equations.

MATH 423 Applicable Analysis III
Spring. 4 credits. Prerequisite: Mathematics 420 or 321; however, students who have not taken 422 should talk to the instructor before taking this course.
Normed vector spaces. Elementary Hilbert space theory. Projections. Fredholm's alternative. Eigenfunction expansions. Applications to elliptic partial differential equations and to integral equations.

[MATH 425 Numerical Solutions of Differential Equations
Spring. 4 credits. Prerequisites: Mathematics 222 or 294, one course numbered 300 or higher in mathematics, or permission of instructor. Not offered 1999–2000.
Methods and basic theory for the numerical solution of ordinary and partial differential equations. Linear multistep methods, Runge-Kutta methods, and the problem of stiffness for ordinary differential equations. Finite difference methods and Galerkin finite element methods for partial differential equations. Homework will involve use of a computer.]

MATH 427 Introduction to Ordinary Differential Equations
Fall. 4 credits. Prerequisite: Mathematics 222 or 294 or permission of instructor.
Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include singular points, series solutions, Sturm-Liouville theory, transform methods, approximation methods, and application to physical problems.

MATH 428 Introduction to Partial Differential Equations
Spring. 4 credits. Prerequisite: Mathematics 222 or 294 or permission of instructor.
Topics selected from first-order quasilinear equations, classification of second-order equations, with emphasis on maximum principles, existence, uniqueness, stability Fourier series methods, approximation methods.

MATH 431–432 Introduction to Algebra
431, fall; 432, spring. 4 credits each. Prerequisite: Mathematics 221 or 231. Prerequisite for Mathematics 432: Mathematics 431 or 433, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take 433–434.*
431: An introduction to linear algebra, including the study of vector spaces, linear transformations, matrices, and systems of linear equations; quadratic forms and inner product spaces; canonical forms for various classes of matrices and linear transformations; determinants. 432: an introduction to various topics in abstract algebra, including groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated modules over Euclidean domains with application to canonical forms of matrices.

MATH 433–434 Honors Introduction to Algebra
433, fall; 434, spring. 4 credits each. Prerequisite: Mathematics 221 or 231. Prerequisite for Mathematics 434: Mathematics 433 or permission of instructor.
Honors version of Mathematics 431–432. Mathematics 433–434 will be more theoretical and rigorous than 431–432 and will include additional material such as multilinear and exterior algebra.

[MATH 436 Applications of Abstract Algebra
Spring. 4 credits. Prerequisites: Linear algebra (MATH 231 or higher). Familiarity with elementary algebra or number theory such as MATH 332 would also be helpful.* Not offered 1999–2000.
The course is intended for students who would like to learn modern algebra and its applications outside of mathematics. There will be at least as much emphasis on applications as the relevant modern algebra. Frequently, the applications involve or were made possible by the advent of computers. Students who already know the modern algebra covered in the course may still find the applications to be of interest. Specific topics will be chosen by the instructor. The algebra typically includes items drawn from: elementary number theory, polynomials and ring theory, monoids and group theory, real closed fields, algebraic combinatorics, Groebner bases, algebraic geometry, field theory. The applications and related topics typically include items drawn from: complexity theory, coding theory, encryption, discrete

*See the list of courses with overlapping content at the end of the introduction.

*See the list of courses with overlapping content at the end of the introduction.

and fast Fourier transform, primality testing, factoring integers and polynomials, root counting and isolation, solving systems of polynomial equations, formal language theory and automata.

MATH 336 and 436 may overlap in choice of material. Where they overlap, the coverage in MATH 436 will be of greater depth appropriate to a 400-level course. Students cannot get credit for both MATH 336 and MATH 436.]

MATH 441 Introduction to Combinatorics
Spring. 4 credits. Prerequisites: Mathematics 221, 231, or 294.
Enumerative combinatorics: permutation enumeration, stirling and bell numbers, generating functions, exponential formula, Lagrange inversion, recurrences, basic asymptotic methods, rational generating functions. Basic graph theory: trees and Cayley's theorem, chromatic polynomial, eigenvalues and their application. Matching theory: equivalences, marriage theorem, flow problems, totally unimodular matrices. Polya theory: action of a group on a set, Burnside lemma, DeBruijn's method, applications to graphical enumeration and algorithms.

[MATH 442 Introduction to Combinatorics
Spring. 4 credits. Prerequisites: Mathematics 221, 231, or 294. Not offered 1999–2000.
Sieves and Mobius Inversion: inclusion/exclusion and its application to enumeration and number theory. Partially ordered sets, abstract Mobius inversion, rudiments of lattice theory. Matroids and combinatorial geometry: Rank function, circuits, bases, application to graph theory and geometry. Combinatorial design: Fisher's inequality, Latin squares, Hadamard matrices, Wilson's theorem on t-designs, application to statistical design. Nonconstructive methods: Ramsey's theorem, Lovasz local lemma, random graphs, application to coding theory. Extremal set theory: Sperner's lemma, Kruskal-Katona and Erdös-Ko-Rado theorems.]

MATH 451 Euclidean and Spherical Geometry
Fall. 4 credits. Prerequisite: Mathematics 221 or 231 or permission of instructor.
Topics from Euclidean and spherical (non-Euclidean) geometry. A non-lecture, seminar-style course organized around student participation.

MATH 452 Classical Geometries
Spring. 4 credits. Prerequisites: Mathematics 221 or its equivalent.
This is an introduction to hyperbolic, spherical, and projective geometry—the classical geometries that developed as Euclidean geometry was better understood. For example, the historical problem of the independence of Euclid's fifth postulate is understood when the existence of the hyperbolic plane is realized. Straightedge (and compass) constructions and stereographic projection in Euclidean geometry can be understood within the structure of projective geometry. Topics in hyperbolic geometry include models of the hyperbolic plane and relations to spherical geometry. Topics in projective geometry include homogeneous coordinates and the classical theorems about conics and configurations of points and lines. Optional topics include principles of perspective drawing, finite projective planes, orthogonal Latin squares, and the cross ratio.

MATH 453 Introduction to Topology
Fall. 4 credits. Prerequisites: Mathematics 411 and 221, or permission of instructor.
Basic point set topology, connectedness, compactness, metric spaces, fundamental group. Application of these concepts to surfaces such as the torus, the Klein bottle, the Moebius band.

MATH 454 Introduction to Differential Geometry
Spring. 4 credits. Prerequisites: Mathematics 222 or 294, plus at least one mathematics course numbered 300 or above. Mathematics 453 is not a prerequisite.
Differential geometry of curves and surfaces. Curvature, geodesics, differential forms. Introduction to n-dimensional Riemannian manifolds. This material provides some background for the study of general relativity; connections with the latter will be indicated.

MATH 455 Applicable Geometry
Fall. 4 credits. Prerequisite: a good introduction to linear algebra (such as in Math 221 or 293) or permission of the instructor. It will not be assumed that you know what any of the words in the following paragraphs mean.
An introduction to the theory of n-dimensional convex polytopes and polyhedra and some of its applications, with an in-depth treatment of the case of 3-dimensions. We will discuss both combinatorial properties (such as face counts) as well as metric properties (such as rigidity).

Theorems of Euler, Cauchy, and Steinitz, Voronoi diagrams and triangulations, convex hulls, cyclic polytopes, shellability and the upper-bound theorem. We relate these ideas to applications in tiling, linear inequalities and linear programming, structural rigidity, computational geometry, hyperplane arrangements and zonotopes.

MATH 471 Basic Probability
Fall. 4 credits. Prerequisite: Mathematics 221. May be used as a terminal course in basic probability. Intended primarily for those who will continue with Mathematics 472.
Topics include combinations, important probability laws, expectations, moments, moment-generating functions, limit theorems. Emphasis is on diverse applications and on development of use in statistical applications. See also the description of Mathematics 671.

MATH 472 Statistics
Spring. 4 credits. Prerequisite: Mathematics 471 and knowledge of linear algebra such as taught in Mathematics 221. Some knowledge of multivariate calculus helpful but not necessary.*
Classical and recently developed statistical procedures are discussed in a framework that emphasizes the basic principles of statistical inference and the rationale underlying the choice of these procedures in various settings. These settings include problems of estimation, hypothesis testing, large sample theory.

[MATH 474 Basic Stochastic Processes
Spring. 4 credits. Prerequisites: Mathematics 471 or equivalent and knowledge of linear algebra such as taught in Mathematics 221. Not offered 1999–2000.
This is a second-semester undergraduate course on probability. It covers topics from renewal theory, martingales, discrete and continuous time Markov chains, Brownian motion and related diffusion processes, and applications to queuing theory and finance. Theoretical as well as applied aspects of the subject will be emphasized.]

[MATH 481 Mathematical Logic (also Philosophy 431)
Spring. 4 credits. Not offered 1999–2000.
Propositional and predicate logic. Classical proof procedures. Completeness and compactness. Decidability and undecidability. The Godel incompleteness theorem. Elements of set theory.]

[MATH 482 Topics in Logic (also Philosophy 432)
Spring. 4 credits. Prerequisites: one logic course from the Mathematics Department at the 200 level or higher, one logic course from the Philosophy Department at the 300 level or higher, or permission of the instructor. Not offered 1999–2000.
For description, see PHIL 432.]

[MATH 483 Intensional Logic (also Philosophy 436)
Fall. 4 credits. Prerequisites: one logic course at the 200 level or higher from the Philosophy Department or the Mathematics Department, or permission of instructor. Not offered 1999–2000.
For description, see PHIL 436.]

MATH 486 Applied Logic (also Computer Science 486)
Spring. 4 credits. Prerequisites: Mathematics 222 or 294; Computer Science 280 or equivalent (such as Mathematics 332, 336, 432, 434, 436, or 481); and some additional course in mathematics or theoretical computer science.
Propositional and predicate logic; compactness and completeness by tableaux, natural deduction, and resolution. Equational logic. Herbrand Universes and unification. Rewrite rules and equational logic, Knuth-Bendix method and the congruence-closure algorithm and lambda-calculus reduction strategies. Topics in Prolog, LISP, ML, or Nuprl. Applications to expert systems and program verification.

MATH 490 Supervised Reading and Research
Fall, spring. 1–6 credits.
Supervised reading and research by arrangement with individual professors. Not applicable for material currently available in regularly scheduled courses.

Professional Level and Mathematics Education Courses

MATH 500 College Teaching
Fall, weeks 1–6. 1 credit.
Among the topics covered: basic topics about teaching, such as how to plan recitations, how to prepare lesson plans for lectures, exam design and grading, syllabus planning. Also discussed: the structure of colleges and universities, jobs and tenure, professionalism, alternative teaching strategies.

[MATH 503 History of Modern Mathematics
Spring. 4 credits. Prerequisites: undergraduate algebra and analysis. Not offered 1999–2000.

*See the list of courses with overlapping content at the end of the introduction.

Topics in the history of modern mathematics at the level of F. Klein's *Evolution of Mathematics in the 19th Century*, J. Dieudonne's *Abrege D'Histoire Des Mathematiques 1700–1900*, and G. Birkhoff's *Source Book of Classical Analysis*.]

MATH 505 Educational Issues in Undergraduate Mathematics
Fall. 4 credits. Prerequisite: graduate standing or permission of the instructor.
This course will examine various educational issues in undergraduate mathematics and the relationship of these issues to the mathematics itself. The precise choice of topics will vary, but the intent is that a balance of different views be presented and discussed. There will be extensive readings in the course and occasional guest lectures. Possible topics include: nature of proof and how and when to teach it, calculus "reform," teaching mathematics to school teachers, using writing, using history, alternative assessments, alternatives to lecturing, equity issues, effective uses of technology, what is mathematical understanding and how do we recognize it, what should every mathematics major know, research in undergraduate mathematics.

MATH 507 Teaching Secondary Mathematics: Theory and Practices
Spring. 4 credits.
This course will provide direct experience of new approaches, curricula and standards in mathematics education. Discussion of articles, activities for the secondary classroom and videotape of classroom teaching will be tied to in-class exploration of math problems. Experience in the computer lab, examining software environments and their use in the mathematics classroom will be included. Participants will be expected to write short papers, share ideas in class and present their opinions on issues.

MATH 508 Mathematics for Secondary School Teachers
Fall, spring. 1–6 credits. Prerequisite: secondary school mathematics teacher, graduate standing, or permission of instructor. May not be taught every semester.
An examination of the principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics and current mathematics research.

Graduate Courses

Graduate-level mathematics courses (formerly 500 and 600 level) have been renumbered to conform to university guidelines regarding course level numbers, p. 5. The level numbers (first digit of the course number) have been raised by one, effective in the fall of 1997. Course content and level of difficulty remain unchanged.

Students interested in taking graduate courses in mathematics should consult the department for further details, times, and possible changes in courses as described below.

MATH 611–612 Real and Complex Analysis
611, fall; 612, spring. 4 credits each.
611: measure and integration, functional analysis. 612: complex analysis, Fourier analysis, and distribution theory.

MATH 613–[614] Topics in Analysis
613, fall; 614, spring. 4 credits each. 614 not offered 1999–2000.

MATH 615–[616] Mathematical Methods in Physics
615, fall; 616, spring. 4 credits each. Intended for graduate students in physics or related fields who have had a strong advanced calculus course and at least two years of general physics. A knowledge of the elements of finite dimensional vector space theory, complex variables, separation of variables in partial differential equations, and Fourier series will be assumed. The course overlaps with parts of Mathematics 420 (or 321)–422–423. Undergraduates will be admitted only with permission of instructor. Mathematics 615 is a prerequisite for 616. 616 not offered 1999–2000.
Topics designed to give a working knowledge of the principal mathematical methods used in advanced physics. A brief discussion of some basic notions: metric space, vector space, linearity, continuity, integration. Generalized functions (Schwartz distributions). Fourier series and Fourier integrals. Saddle point method. Linear operators. Differential operators and integral operators, the equations and eigenvalue problems connected with them and the special functions arising from them. Elements of group theory. The rotation group and its representations.

MATH 617 Dynamical Systems
Fall. 4 credits.
Topics: existence and uniqueness theorems for ODEs. Poincaré-Bendixon theorem and global properties of two dimensional flows. Limit sets, non-wandering sets, chain recurrence, pseudo-orbits and structural stability. Linearization at equilibrium points: stable manifold theorem and the Hartman-Grobman theorem. Generic properties: transversality theorem and the Kupka-Smale theorem. Examples: expanding maps and Anosov diffeomorphisms. Hyperbolicity: the horseshoe and the Birkhoff-Smale theorem on transversal homoclinic orbits. Rotation numbers: Herman's theorem. Characterization of structurally stable systems.

[MATH 618 Smooth Ergodic Theory
Spring. 4 credits. Not offered 1999–2000.
Topics: invariant measures. Entropy. Hausdorff dimension and related concepts. Hyperbolic invariant sets: stable manifolds, Markov partitions and symbolic dynamics. Equilibrium measures of hyperbolic attractors. Ergodic theorems. Pesin theory: stable manifolds of non-hyperbolic systems. Liapunov exponents: relations between entropy, exponents and dimensions.]

MATH 619–620 Partial Differential Equations
619, fall; 620, spring. 4 credits each.
Basic theory of partial differential equations.

MATH 621 Measure Theory and Lebesgue Integration
Fall. 4 credits.
Measure theory, integration, and Lp spaces.

MATH 622 Applied Functional Analysis
Spring. 4 credits.
Basic theory of Hilbert and Banach spaces and operations on them. Applications.

[MATH 628 Complex Dynamical Systems
Spring. 4 credits. Prerequisite: Mathematics 418. Not offered 1999–2000.
Various topics in the dynamics of analytic mappings in one complex variable, such as: Julia and Fatou sets, the Mandelbrot set, Mañe-Sad-Sullivan's theorem on structural stability. Local theory, including repulsive cycles and the Yoccoz inequality, parabolic points and Ecalle-Voronin invarients, Siegel disks and Yoccoz's proof of the Siegel Brjuno theorem. Quasi-conformal mappings and surgery: Sullivan's theorem on non-wandering domains, polynomial-like mappings and renormalization, Shishikura's constructin of Hermann rings. Puzzles, tableaux and local connectivity problems. Thurston's topological characterization of rational functions, the spider algorithm, and mating of polynomials.]

MATH 631–[632]–634 Algebra
631, fall; 632, spring; 634, spring. 4 credits each. 632 not offered 1999–2000.
631: finite groups, field extensions, Galois theory, rings and algebras, tensor and exterior algebra. 632: Wedderburn structure theorem, Brauer group, group cohomology. 634: Dedekind domains, primary decomposition, Hilbert basis theorem, local rings.

[MATH 637 Analytic Number Theory
