Acknowledgments

This book was inspired by *Picture Clues to Turfgrass Problems*, which was published by Cornell Cooperative Extension in 1982 and written by A. Martin Petrovic, Maria T. Cinque, Richard W. Smiley, and Haruo Tashiro. The authors of this book would like to acknowledge the importance of *Picture Clues to Turfgrass Problems* to their work here.

The authors are greatly indebted to many people who contributed to this project. The manuscript was peer-reviewed by experts whose comments improved the accuracy, clarity, and usefulness of the final product. See pages 201–202 for a list of peer reviewers. Thanks to Rose Harmon, Paul Robbins, Mike Villani, and Leslie Weston—all of Cornell University—for providing text used in this book. Thanks also to the individuals, organizations, and universities who generously contributed many of the photos. See pages 203–204 for a list of photo credits.

Thanks to The Art Department in Ithaca, New York, for drawing the raster patterns in chapter 5. Thanks to Jim Houghton of The Graphic Touch, also in Ithaca, for illustrating the sampling procedures in chapter 2.

Jeff Popow, NRAES managing editor, coordinated the peer review of the manuscript, ensured the quality of the photograph processing, and managed the overall project. Cathleen Walker, NRAES production editor, copyedited the book, managed the development of illustrations, and gathered photograph permissions. Jeff and Cathleen collaborated on the design.
