- 16 - 10:00 a.m. - Conference Room, Jordan Hall - Potato Extension Meeting
- 18 - Noon - Luncheon and Tour - Management Development Group, Curtice-Burns
- 18 - 8:00 p.m. - Auditorium, Jordan Hall - Wayne and Ontario Counties Home Economists
- 19 - 1:30 p.m. - Tour - 4H Club, Penn Yan

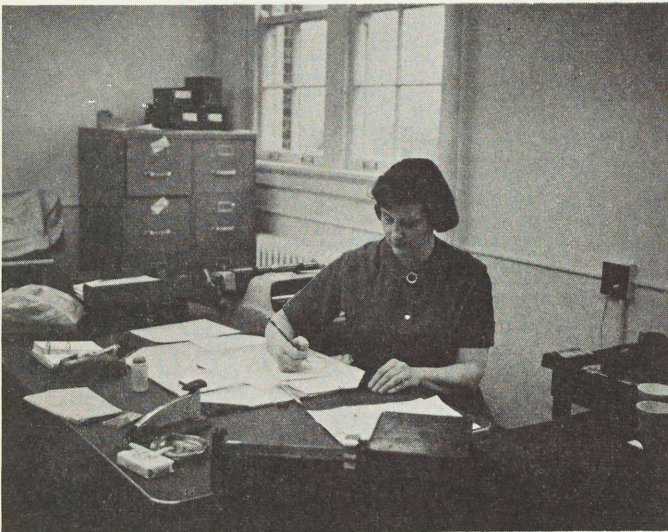

## CURTICE-BURNS GROUP TO TOUR STATION

On April 18, a management development group from Curtice-Burns will be on our campus to participate in a review program of the Station's research activities. This management development group is composed of young executives in the Curtice-Burns organization who wish to expand their knowledge of agriculture. Approximately 50 or 60 persons are expected to attend the Geneva tour.

The session will open with a luncheon at the Lafayette Inn with Director Barton as keynote speaker and then the entire group will spend the afternoon visiting the various departments and faculty members on campus.

## PUBLICATIONS DEPARTMENT MAKES CHANGES

As many of you will note in the two photographs, certain physical

changes have been made in the Publications Department's offices. Rita Curtin has moved her office from the first floor of Jordan Hall to the basement. Her office is right next to Ray Fryer's shop. This move makes for much more efficient use of staff time in Publications and also gives Rita a great deal more space in which to work. The Xerox 914 was also moved to Rita's new location, so faculty and staff should make note of this change in location of the Xerox copier.

## GERTRUDE CATLIN WINS AWARDS

Congratulations once again from all the Station family to Entomology's photographer, Gertrude Catlin, for the three awards that she

won at the recent New York State Conference for Professional and Industrial Photographers held at Grossinger's March 17-20. Gertrude entered three photographs and came home with one blue ribbon and two reds. The print entitled, "Pretentious Display" (an apple sphinx larva), took the blue ribbon and the other two prints entitled, "Anchored" (a butterfly chrysalis), and "Radar" (an adult cecropia moth), won red ribbons. These photographs were chosen for their photographic excellence and craftsmanship from over 650 prints submitted by commercial, portrait, and industrial photographers located in New York, New England, and Canada. Congratulations again, Gertrude, and everyone is proud of your excellent showing.

#### TWO RETURN FROM SABBATICS

Two of the Station's wandering minstrels have returned from sabbatic leaves. Willard Crosier just returned from the Commonwealth University of Virginia where he studied bacteriology and also spent time isolating fungi and aflatoxin from peanuts for the Virginia Department of Agriculture.

George Cathy Schaefer, Entomology, and their children have returned from a 6-months sabbatic in Puerto Rico. George was associated with the University of Puerto Rico at Rio Piedros.

#### SPAGHETTI SUPPER PLANNED

Station Club is again planning to have its famous spaghetti supper. This year it is to be held on May 4 and Joe Pettrone says spaghetti will be served from 5-7 p.m. More details will be available in the next issue of Station News.

#### MEETINGS

John Natti presented a talk yesterday in Oleans on his crucifer research program.

Bob Shallenberger, John Bourke, and Terry Acree are attending the American Chemical Society meetings in San Francisco this week. Bob and Terry are presenting papers at this meeting. John plans to visit Oregon State University before he returns to Geneva.

Ross Hackler, Walt Wilkens, Art Badenhop, and Danji Fukushima were in Washington, D. C. April 1-4 presenting papers at the Association of Cereal Chemists and American Oil Chemical Society meeting.

#### APPOINTMENTS

Stephen Durnin, a student at Alfred Agricultural and Technical College, will be working this summer in Seed Investigations.

Dr. Joseph E. Raymond has been appointed chemical technologist in Food Science and Technology. He is working with Jim Moyer until September when he will assume an assistant professorship of food technology and processing at the State University of New York Agricultural and Technical College, Morrisville.

William Burris was appointed research technician in Food Science March 15. Bill lives in Penn Yan and has his B.S. degree in physics. He was previously employed at Baush and Lomb in Rochester and here at the Station is working with Malcolm Bourne on studies concerning texture measurements of foods.

Don Chimera has been appointed to a temporary service position in Food Science for about 6 months. Don is in the work study program at Alfred Agricultural and Technical College and plans to earn an Associated Applied Science degree in animal husbandry. While at the Station, he is working with Gil Stoewsand on toxicology studies.

Mrs. Margaret H. Bosch has been appointed part-time stenographer in Food Science effective April 1. Peg lives with her family at 487 White Springs Road and received her training at Ontario Business School.

## SPECIAL NOTICE TO GROUP HEALTH INSURANCE SUBSCRIBERS

Kay Schurstedt, Personnel, has received five copies of the GHI Participating Doctors and Physicians Directory. So long as the supply lasts, she will distribute them to those who might wish a copy. The list of Geneva doctors participating in this GHI plan is: Family Doctor Eric Hirsch, Physicians Alvin J. Brown, Thomas A. McCormick, and W. Harold Neild.

## TWO OTHER NOTES OF INTEREST

You might be wondering what the cover photograph has to do with agriculture. Absolutely nothing, except that Paris Trail, who is president of the Newark Art Club this year, is announcing the club's fifteenth annual spring art exhibit at the Prouty-Chew Museum of the Geneva Historical Society located on South Main Street. The exhibit will open Sunday, April 7, and run through Saturday, April 13. The public is invited to see the exhibit from 2 p.m. to 8 p.m. during that period. Included in the exhibit are works by artists from the Finger Lakes and Rochester areas. Several artists in the Station family will have works on display.

The Annual Policemen's Ball will be held on Saturday, April 20, 1968 at the Armory on Main Street, Geneva. This year the ball is not being dedicated to an individual, but rather to an organization that is becoming well-known in the area as a helping hand in the education of handicapped children. This is Happiness House, celebrating its second anniversary. Music at this year's ball will be supplied by the famous Woody Herman and his band. Tickets are now on sale at \$7.00 per couple and can be obtained at the Police Station in City Hall or any policeman. Here at the Station, Rose McMillen in Parrott Hall has tickets for anyone who desires to go.

## BARBECUE TIME

Sure, it was a little windy last night, but who cares when you have the first charcoal fire of the season, some marshmallows, and a nice cool, windy night. At least these two kids could have cared less that it was a little too chilly last night, that the charcoal burned so rapidly they hardly had time to roast one or two marshmallows, or that they were forced to wear winter coats. They had fun!
