CHICKEN 'N EVERYTHING

The stage is set for the dinner and business meeting October 4, at 6:30 in Jordan all for a chicken dinner and an To date, 132 persons have indicated being present, so if you don't want to wing be sure that your name is in the pot the election of officers for the coming business, Dr. Breed will show his colored parks visited on a recent trip across the details get in touch with one of the following Miss Updike; Entomology, Dr. Daniel; Hedrick Hall, Mr. Van Eseltine: Dairy Building, Miss Cass; Jordan Hall, Miss Jessie Sperry.

Station Club annual for next Tuesday, Hall. Come one, come entertaining program. their intention of be left with a neck or in good time. Besides year and other routine movies of national continent. For further persons: Chemistry,

MARGARET LOUISE HOLT

Margaret Louise Holt sweeping New England last Vermont. Her proud grand-Experiment Station, has Parrott Holt, are doing the storm. Congratulations to Mother and Dad and Grandfather!

arrived in this world while the hurricane was week, including her home town of Montpelier,, father, who happens to be the Director of the received word that she and her mother, Margaret fine despite rather harrowing experiences during

A TIMELY TOPIC, AT LEAST

"The Present Crisis" is the title of a topic to be discussed by Mr. Paul Harris, Jr., of the National Council for Prevention of War, Washington, D. C., at an open meeting at the Y. M. C. A., tomorrow evening at 8:00 o'clock. The program is sponsored by the Geneva Peace Council.

SPEAKING OF THE CRISIS

There is much speculation as to how the European situation will affect the Hening's plans. Originally, they expected to remain at the Institute near Reading until October 22, with their arrival in New York set for about October 29. The last word received from them came about a week ago from Switzerland and told of a brief excursion to the continent.

A GOOD MEETING

The intersectional meeting of the American Chemical Society held here last Saturday brought in about 150 persons and proved highly successful in all respects.

MR. SIBLEY HERE

Mr. Harper Sibley of Rochester, President of the U. S. Chamber of Commerce, spent some little time at the Station last Friday enroute to a meeting of the Board of Trustees of Cornell University. He appeared much interested in all that he saw of the Station work.

HEADING FOR AMHERST

Dr. Tukey and Mr. Brase will attend a meeting of the committee on rootstocks composed of horticulturists from the Northeastern Experiment Stations to be held at the Massachusetts Experiment Station at Amherst, beginning tomorrow evening and continuing thru Saturday.

CONFERRED IN ROCHESTER

Mr. Tapley attended a meeting of the Executive Committee of the State Vegetable Growers Association in Rochester last Saturday to consider plans for the winter meeting of that organization which will be held early in January.

MR. STREET

In the death of John Street, Executive Secretary of the Association of New York State Canners, in Rochester last week, the Station lost an ardent supporter and many members of the Staff a good friend. Our sincere sympathy goes to Mrs. Street and members of the family.

WINTER HOURS

"Winter" hours are in effect in the Milk room so far as the distribution of milk on Sundays is concerned with the announcement that from now on no milk will be given out on Sundays until warm weather comes around again.

CONFERENCE BOARD

Mr. Tapley was in Ithaca Monday to attend a meeting of the Farm Conference Board.

ANOTHER EDITOR

The NEWS LETTER of the Association of Official Seed Analysts of North America has a new editor in the person of Dr. W. F. Crosier. Dr. Crosier has issued two numbers of the NEWS LETTER since taking over his duties in July.

LEAVING FOR MICHIGAN

Dr. Mack will leave Saturday for Ann Arbor, Michigan, where he will take up investigations in the University of Michigan on the wetting and sticking properties of fungicides and insecticides on plant surfaces under the auspices of a grant from the Rackham Foundation. Dr. Mack has been granted a year's leave of absence from the Station for this purpose.

SCHOOL DAYS BEGIN

A number of persons in the Chemistry and Bacteriology Divisions are beginning course work at Cornell this week or have left for residence at the University in connection with graduate studies. Mr. Frank Kopko, Mr. H. E. Rhoades, Miss McIntosh, Mr. Zimmerman, and Mr. R. F. Brooks will spend all of their time in Ithaca for the present term. Mr. Kopko has been granted leave of absence for this purpose and Mr. Casper Bigelow is substituting for him in the chemistry laboratory. Mr. Rhoades is a U. S. Dept. of Agriculture employee associated with Dr. Pederson in food investigations, while the others are graduate assistants. Mr. Brooks will carry on cooperative work between the Bacteriology Division and the College of Agriculture, as well as his course work. Commuting between the University and their work here at the Station will be Miss Kirk and Messrs. Beavens and Moyer. Others registered in the Graduate School at Cornell but who will continue to work here at the Station this term include L. A. Dick, W. G. Walter, and W. C. Haynes. Douglas Greenwood, from the Entomology Division, has registered for the fall term.

FLASH! FLASH!

Just as we go to press a letter from Mr. Henning, written at the Institute on Sunday, September 18, states that at that time they were planning to sail on October 21 and comments on the fact that "the political situation is still very tense". Since it has grown considerably more tense the past few days, we still wonder what effect it may have on their plans.
