MORE FARM AND HOME WEEK

The thirtieth annual College got off to a good memorable occasion in many involving members of the mainder of the week are as

Farm and Home Week at the start and promises to be a respects. Program features Station Staff for the re- follows:

Thursday Morning

Round-table Discussion on San-Farm, led by Dr. Breed, with ing.

"The Response of Apple Trees to Ap-Peach Insects," Dr. Daniel.

"Recent Developments in the Manufacture of Commercial Fertilizers," Mr. Clark.

"Pear Insects," Mr. Munding.

itary Milk Production on the Mr. Hening and Dr. Yale assist- plications of Potash," Mr. Collison.

Thursday Afternoon

"Fruit Tree Stocks and Related Problems," Dr. Tukey.

"Grade A Milk Premiums and How to Get More of Them," Dr. Yale.

Round-table Discussion on Insects, Diseases, and Cultural Problems on the Production of Vegetables, with Mr. Sayre and Dr. Glasgow participating.

Friday Morning.

"Pasteurization of Milk for Cheese Making," Dr. Kelly.

"Insecticides for the Control of Aphis, Bud Moth, and Scale Insects," Mr. Hartzell.

Friday Afternoon

"The Cheese Industry in Europe," Mr. Marquardt.

"Insects of Nursery and Ornamental Plants," Dr. Gambrell.

Dr. Hedrick's talk on the history of agriculture in New York State was broadcast over WESG yesterday afternoon, while Mr. Marquardt is scheduled for a radio talk on "The Present-day Germany with Special Reference to Agriculture" over the same station at 1:00 o'clock Friday afternoon.

VEGETABLE GROWERS COMING

Ontario County vegetable growers will hold a two-day meeting at the Station on Wednesday and Thursday of next week under the auspices of the Farm Bureau. Several members of the Staff and representatives from the College will discuss cultural, economic, insect, and disease problems.

A WELL-EARNED PROMOTION

At a recent meeting of the Board of Trustees of Cornell University Mr. Gladwin was promoted from the position of Associate in Research to that of Chief in Research in Pomology, effective February 1.

A NEW INVESTIGATORSHIP

Mr. J. R. Sanborn, recently employed as a research bacteriologist for the International Paper Company at Glens Falls, N. Y., has been appointed to an Investigatorship in the Bacteriology Division where he will make a study of the sanitation of paper milk containers. The project is a cooperative one between the Station and the New York City and New York State Departments of Health.

SUGGESTIONS ON PARKING

The newly formed Parking Committee calls attention to what it regards as the only serious violation of the parking regulations that has been called to its attention, namely, parking in the drive between Hedrick Hall and the Dairy Building. The situation here is complicated by the fact that often the oil truck must stand in that drive for some time while filling the oil tanks in the Dairy Building. A car parked on the west side of the drive at that time will completely block traffic thru the drive. The Committee also calls attention to the ruts being cut in the lawn around the parking area in the rear of the Chemistry Building, and asks that everyone try to avoid making these worse.

One final suggestion from the Parking Committee deserves special attention, especially from heads of Divisions. This has to do with the congestion of cars on the Station grounds at the time of meetings of farmers or others. The Committee believes the situation could be greatly helped if the head of the Division concerned with the meeting would notify the Committee a few days in advance in order that arrangements might be made to provide room for the visitors' cars with the least inconvenience to all concerned. In this connection, the Committee might well take note now of meetings here on February 24 and 25 and March 1, 2, and 3.

A POPULAR PARTY

Over fifty ladies of the Staff attended a Valentine party at the Director's residence last Wednesday where, from all accounts, they had a most enjoyable time solving pantomimes of books staged by different groups and participating in other "sports". Among the important items of business discussed was a name for this new organization, and in order to stimulate some genius in such things a valuable prize (its nature undisclosed) is being offered for the best name submitted. Entries are to be 'phoned or handed to Mrs. Henning prior to the next meeting of the group on March 10. We are also asked to call attention to a pair of grey kid gloves that were left behind by someone attending last week's party. The gloves may be obtained from Miss Sharpe in Jordan Hall. Mrs. Kertesz, Chairman and Mrs. Horsfall and Mrs. Magie, Assistants have been named as the committee in charge of the March party.

IT COULDN'T HAPPEN HERE!

Or could it? We quote from last week's Extension Echoes:

"The poor 'prof' has been the butt of many an absent-minded joke, some true and some untrue. This one actually happened, with a Cornell 'prof' the victim. It seems that he drove to Albany for a meeting or conference of some kind. Afterwards, he forgot about the car but couldn't return for it himself, so he sent his wife. To top it all, he bought her a roundtrip ticket."

COULD HE HAVE WORKED AT AN EXPERIMENT STATION

"Every man must be his own law in his own work, but it is a poor-spirited artist in any craft who does not know how the other man's work should be done or could be improved."

Rudyard Kipling in his Autobiography.

MILK ROOM OPEN FROM 8:30 TO 9:30 A.M. ONLY, MONDAY, FEBRUARY 22
