BRIEFS

Bike & Walk
Week 2000

It's that time of year again! Bike & Walk Week 2000 is coming up June 12-16, and we hope to have a great Station event like last year's. Highlights will include daily breakfasts, an interdepartmental competition, and prize drawings. Everyone who bikes or walks to work is invited to join us for breakfast from 7:30 to 8:00 AM daily at the Jordan Pavilion. The event is being sponsored by the Station Club and a few local businesses. See your department representatives to sign-up now.

Phone Codes To Change

The change from using the current three-digit phone code system to the new four-digit codes will take place on June 21, 2000. As of that date it will be necessary to use a four-digit code to complete local and long distance calls being made from Station phones.

Employees who have been assigned a

four-digit code will receive written notification of that code next week. Please note that it is very important that you do not share your code with anyone. All calls made using your code will be billed to your name. It is your responsibility to maintain the confidentiality of your code.

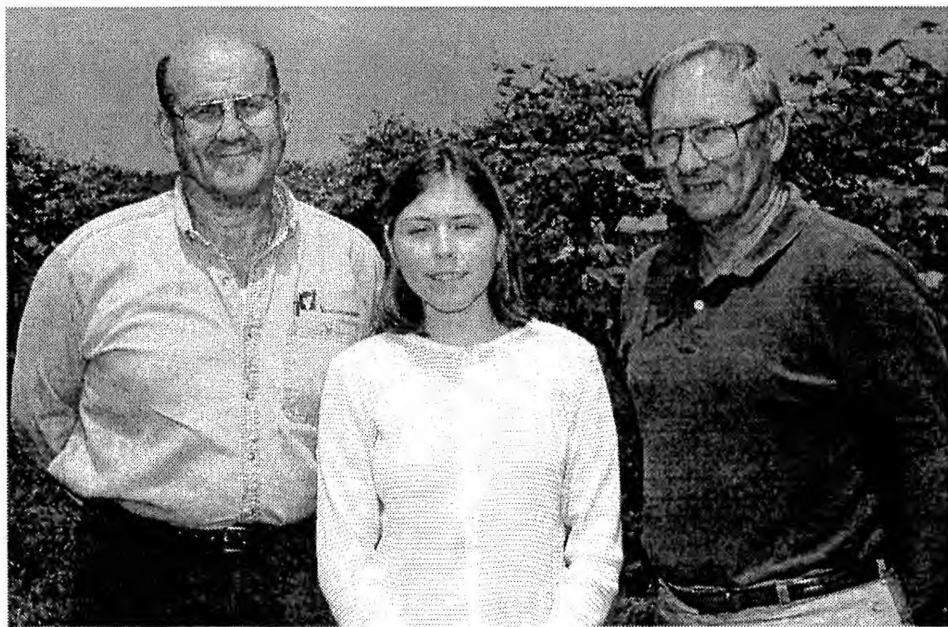

Thanks for your cooperation!

June 18!**

The Nelson J. Shaulis Award 2000

This year's recipient of the Nelson J. Shaulis Advancement of Viticulture award is Kiran Goldman from Ithaca. Goldman will be a junior in the Agriculture and Biological Engineering department in the College of Agriculture and Life Sciences at Cornell. Four years ago her parents bought a vineyard and moved to Hammondsport, New York. "Since then," she said, "I have gained some hands-on experience planting, pruning, and

John Brahm (left) and Hugh Price (right) toured one of the Station's vineyards on June 1, with the 2000 Nelson J. Shaulis Scholarship award winner, Kiran Goldman (center).

tying. As a result of this work, I developed an interest in learning more about viticulture."

Goldman visited the Experiment Station on Thursday, June 1, where she was the guest of the Horticultural Sciences Department. Like her predecessors, she met and talked with a number of faculty and staff. Unlike previous recipients of the scholarship, she could not meet the man for whom the award was named, Nelson J. Shaulis, who passed away earlier this year.

Schaulis is considered to be one of the fathers of modern viticulture—a field in which he made numerous important contributions during his distinguished career.

Nelson J. Shaulis

"Nelson Shaulis was one of the truly great minds in viticulture of the 20th century," Hugh Price, chairman of the Department of Horticultural Sciences commented at the time of Dr. Shaulis' passing. "His research and writings have had a profound influence on grape production in New York and around the world. He will be sorely missed by friends, colleagues and admirers and remembered every time one sees a vineyard trained to the Geneva Double Curtain system."

"I am sorry that I was unable to actually meet Nelson J. Shaulis and to experience first-hand his commitment to and enthusiasm for viticulture," Goldman said. "I am very honored, though, to have won the Shaulis Scholarship. I am excited to have the chance to get practical experience doing

research in the vineyards and working with specialists at the Geneva Station on their projects. I hope to make the most of the opportunity. Dr. Shaulis has given me, and I look forward to the work I will do at the Experiment Station this summer." Goldman will be working primarily with Martin Goffinet, Jan Nyrop and Greg English-Loeb.

The Nelson J. Shaulis award was established in 1978 in honor of the then retiring scientist and world-renowned grape expert. The award funds the work of viticulture students and allows them to work directly with Cornell grape research and extension faculty on independent research projects.

"The goal of the award is to encourage students to enter the field of viticulture as a career by involving them in viticultural research," said John H. Brahm, of Arbor Hill Winery in Naples. Brahm is chairman of the N J. Shaulis Advancement of Viticulture Award Committee. The award is administered by the New York Grape Production Research Fund.

FIELD RESEARCH UNIT PESTICIDE REMINDERS

The spray season has begun. Please remember to check the electronic posting board (EPOST), WPS Central Posting, or the on-site posting before entering any research blocks. The EPOST instructions "Read Me First" are in the "sprays" folder on the CC fileserver.

Please remember applicators cannot always see people in or around the blocks being sprayed. If you are exposed to drift, vacate the area immediately and check the proper central posting location for specific information about the application or contact Mart Van Kirk at 781-5307 or mwv1@cornell.edu. Thank you for your cooperation.
