

## DATA COLLECTION PLANNING TOOL

Assessment Questions	What kind of data can we get to answer these Assessment Questions?	Existing or New data?	Briefly describe where we will get this information?	Who will be responsible for data collection/by when?
1. How would you describe the <u>demographics</u> of the youth in your community?				
2. What is the <u>prevalence and incidence</u> of adolescent pregnancy, birth, STIS and HIV/AIDS among the youth in your community?				
3. What are the common <u>sexual risk-taking behaviors</u> among the youth in your community?				
4. What are the important <u>determinants</u> (or risk and protective factors) that influence the sexual behaviors described above?				
5. What <u>existing programs, services, and resources</u> in your community address adolescent pregnancy, STI, and HIV?				
6. What existing youth programs and services in your community promote positive adolescent health outcomes?				
7. What <u>potential collaborations</u> or partners might you leverage to support your efforts?
