

Over Mohawk bridge at Selmaetady

5 spans of 105 ft - deck ^{continuous} was
built a Lorn Lattice - - 1804

It was rebuilt in lattice
by Mr Hilton - Continuous - 1874

It was strengthened by the
introduction of a center
truss + cut apart - 1884

The old NY Central bridge over
Mohawk at Selmaetady was
built in 1835 or 1836

and was subsequently burned,
rebuild of iron - continuous spans.
+ subsequently reinforced 1886

The original iron bridge was
built by men brought from
England for that purpose

Yours very truly
A J Swift
