

Florence Kelley Database Editorial Policies

This database contains all recovered letters from Florence Kelley (FK) to hundreds of recipients, most of which were written in connection with her reform career during the Progressive era. It includes most of the letters she wrote to her parents, brothers, children, and other relatives. Omitted because of their sheer volume (FK received letters almost daily from her small children when she lived apart from them for many years) are letters from her daughter Margaret and her son John. Also excluded are letters from FK's two brothers, William D. Kelley, Jr., and Albert. We have included letters from FK's parents, William D. Kelley and Caroline Bonsall Kelley as well as letters from her oldest child, Nicholas. Also included are some letters from her daughters-in-law, Augusta Maverick Kelley and Ann Valentine Kelley as well as her sisters-in-law, Marianna Parrish Kelley and Esther King Kelley. Cross references are supplied for women with whom FK corresponded before and after their marriages. If an enclosure has survived, it is noted.

To prepare this volume of letters we created an electronic database of correspondence to and from Florence Kelley from repositories throughout the world. "The Correspondence of Florence Kelley, 1865-1932," edited by Kathryn Kish Sklar and Beverly Wilson Palmer, grew to include about 7000 letters and lists, when known, the name and location of the recipient or sender, the date and type of correspondence, and what repository and collection they can be found in. A list generated from this database has been made available on-line by Cornell University's Kheel Center for Labor-Management Documentation & Archives through Catherwood Library's DigitalCommons@ILR system. The database includes all recovered letters from Florence Kelley to hundreds of recipients as well as thousands of letters written to Florence Kelley.

Editorial Codes

The following explain the symbols and abbreviations used in the database:

#	letter written before this date
^	letter written after this date
*	following column inferred, i.e. evidence persuasive
**	following column construed, i.e., evidence suggestive not conclusive
ALS	autograph letter signed
AN	autograph note (added to typed letter)
APC	autograph postcard
APS	autograph postscript
C	copy, in another hand
dam	letter is damaged (usually cut)
Enc	letter has enclosure
Env	envelope included
Frag	fragment only of letter
Forward	FK is simply forwarding some material
ILL	letter, or parts of it, illegible
Inc	part of letter missing
Inv	invitation only, no other information in letter
Invoice	invoice only, no letter
JL	joint letter, written to or from many correspondents
LS	letter in another hand, signed by FK
PL	printed letter
TEL	telegram
TL	typed letter (no handwriting on letter)
TLS	typed letter signed by FK
TR	our transcription

The numbers in the lefthand column are for identification purposes only.

This database can be sorted in a number of ways. It must first be downloaded. Then it can be sorted by date, by repository, by place of writing, etc. To sort: go to top of file. Use Ctrl A to highlight entire file. At top menu click on Data and choose the sort option. Click on header row. Then choose the columns by which you want to sort, e.g. correspondent, date.

The AutoFilter option may also be used to sort the data. However, if you are using Excel 2003, or an earlier version, you will not get all the names in the Correspondence column. There are 1290 unique entries in the Correspondence column and only Excel 2007 allows more than 1000 entries in the AutoFilter drop down list.
