

APPENDIX 1

AN EPIGRAPHIC INVENTORY OF THE CULTS OF TETRADIC THESSALY

This dissertation has attempted to illuminate what I have termed the regional stratum of Thessalian religion. As a point of contrast, it will be useful cast some light on the local and panhellenic strata of Thessalian religion. In the following pages, I offer a complete inventory of the cults of tetradic Thessaly, excepting the Imperial cult, as known from the region's epigraphy. The inscriptions collected here belong to two basic types: 1) Dedications mentioning the name of a divinity; 2) Publication clauses in decrees.
